

**CONSOLIDATED BILLING BUSINESS PROCESSES
(Utility Bill Ready)**

This document describes the detailed business processes associated with rendering consolidated bills for end use retail customers under the Utility Bill Ready Model. The scope of this document addresses processes associated with the ESCO transmitting an 810 Consolidated Billing Invoice to the Utility and the Utility rendering a consolidated customer bill. In developing these business processes, the following documents were reviewed:

- June 30, 1999 Report of the New York EDI Collaborative
- New York Uniform Business Practices (UBP), Order Granting Portions of Petitions for Rehearing , issued and effective April 15, 1999 in Case 98-M-1343 - In the Matter of Retail Access Business Rules
- Order Establishing Uniform Retail Access Billing and Payment Processing Practices, issued and effective 5/18/01 in Case 99-M-0631, In the Matter of Customer Billing Arrangements and Case 99-M-1343, In the Matter of Retail Access Business Practices
- Opinion 01-03, Opinion and Order Approving EDI Data Standards and Data Protocols and Modifying the New York Uniform Business Practices for EDI Implementation, Case 98-M-0667, issued and effective July 23, 2001
- New York Uniform Business Practices (UBP), as modified in Opinion 01-03 in Case 98-M-0667 issued and effective July 23, 2001 (as displayed in the Interim Document published 11/16/01)
- Order Resolving Petitions for Rehearing, issued and effective March 14, 2002 in Case 99-M-0631 - In the Matter of Customer Billing Arrangements and Case 98-M-1343 - In the Matter of Retail Access Business Practices
- Order approving EDI Test Plans and Data Standards, issued and effective November 8, 2001 in Case 98-M-0667 - In the Matter of Electronic Data Interchange
- Order Approving Electronic Data Interchange Transactions for Utility Bill Ready and Rate Ready Billing, issued and effective June 21, 2002 in Case 98-M-0667
- Order Approving Electronic Data Interchange Standards Regarding Remittance and Account Assignment and Modifying the Application Advice Standards and all Type 814 Standards, issued and effective July 31, 2002 in Case 98-M-0667
- NY EDI TS814 Change (Account Maintenance) Business Process issued November 8, 2001
- NY EDI TS814 Enrollment Request & Response Business Process issued August 7, 2002
- NY EDI TS867 Monthly Usage Business Process issued August 7, 2002
- Notification Advice for Consolidated Billing Business Processes – Bill Ready Models
- Order Taking Actions to Improve the Residential and Small Nonresidential Retail Access Markets, issued and effective February 25, 2014 in Case 12-M-0476 et.al.
- Order Granting and Denying Petitions for Rehearing in Part, issued and effective February 6, 2015 in Case 12-M-0476 et.al.

**CONSOLIDATED BILLING BUSINESS PROCESSES
(Utility Bill Ready)**

NOTES:

- Any item displayed under a Process component (i.e. rules, etc.) is also applicable for its sub-processes, unless otherwise noted.
- The source of various Process Rules listed in this document is indicated by the following annotations which precede each rule:
 - B&PP= Uniform Business Practices for Billing and Payment Processing issued 3/14/02
 - CWG = Collaborative Work Group or Case 12-M-0476 EDI Working Groups
- Utilities and ESCOs must demonstrate the technical capability to exchange information electronically for the billing and payment processing options offered by each party and meet the operational time frames that support the billing options used [B&PP B.10.].
- For purposes of validating EDI transactions, the customer's utility account number (with check digit, if included) must be included on every transaction unless otherwise specified in an Implementation Guide for a specific EDI data standard.
- When the Utility Bill Ready consolidated billing arrangement is in place, an 810 Invoice will be used by the ESCO to communicate ESCO billing information to the Utility. The Utility will present charges as calculated by the ESCO on the consolidated bill.
- A separate 810 Invoice will be received for each commodity (i.e. electric or gas).
- In this model, an 810 Original Invoice will contain billing information for the current bill period and may contain information on charges canceled by the ESCO. For example, if charges for the month of March are cancelled as a result of the April meter reading, the cancelled charges should be sent in the April 810 Invoice in addition to the re-billed charges for March period and the new charges for April. An 810 Cancel Invoice will not be used in this model.
- For the Bill Ready method, the ESCO's current charges will appear on the consolidated bill when the 810 Invoice containing their charges, and other pertinent information, is received by the Utility within 2 business days of the date the ESCO received valid usage data for a customer. This two-day period will be referred to as the "bill window." When an 810 Invoice is not received within the bill window, or is rejected for cause, the ESCO's current charges will not appear on the consolidated bill.
- Utilities will render the consolidated bill to the customer within two business days from receipt of the incoming ESCO 810 Invoice when the Invoice is received within the bill window.

**CONSOLIDATED BILLING BUSINESS PROCESSES
(Utility Bill Ready)**

- This process assumes that the transmission date and receipt date of the 867 MU is the same.
- Customer usage, billing, and credit data is to be considered confidential and may not be shared with anyone without the express authorization of the customer, unless disclosure is required by appropriate legal or regulatory authority or is authorized in accordance with the Uniform Business Practices to facilitate the customer's retail access or billing and payment choice. The same level of accountability for data confidentiality will apply to any third party data service providers engaged by an ESCO or Utility. Parties utilizing third party data service providers must ensure that such providers adhere to this confidentiality policy, for example, by incorporating express terms regarding data confidentiality in a Billing Service Agreement and/or Trading Partner Agreement. Delivery service billing data for customers with negotiated delivery contracts may not be disclosed without the utility's consent, except as otherwise required by appropriate regulatory and other legal authorities [seeB&PP B.7.].
- Although transactions may be sent at any time, they will be processed during normal business days and hours. Business days are Monday through Friday, except for national holidays and for days for which business cannot be performed due to force majeure events [B&PP C.2.a.10, Footnote 11]. For example, the billing party must reject an 810 Invoice within one business day of receipt (via an 824 Application Advice). If the 810 Invoice transaction were received at the Utility Web server at 3:00 a.m. on Day 1, the Utility must send the 824 Application Advice transaction to the ESCO by the close of business on Day 2.

PROCESS NUMBER:	<i>UBR O</i>
PROCESS NAME:	<i>UTILITY PROCESSES CONSOLIDATED BILLS USING UTILITY BILL READY MODEL (PARENT PROCESS)</i>
PROCESS DEFINITION:	Process by which the Utility (billing party) uses data from the meter reading entity, charges calculated by the Utility (billing party) for delivery service and charges calculated by the ESCO (non-billing party) to issue a consolidated bill to the end use Customer.
TRIGGER(S):	Reported usage results in a bill and/or a billing has been scheduled for a customer (e.g. budget plan customers).
ESTIMATED / PEAK TRANSACTION RATE:	Dependent on the number of customers enrolled in Utility Bill Ready Consolidated billing per ESCO.
PROCESS INPUTS:	Usage information which can be Actual recorded usage obtained from the meter, or Estimated usage calculated at bill cycle or Customer read data; Customer Information; Service Information; Utility Bill Information; ESCO Bill Information.
PROCESS OUTPUTS:	Consolidated bill to end use customer displaying both Utility and ESCO charges for a billing period.
SUB OR PRECEDING	<ul style="list-style-type: none"> • ESCO enters a Billing Services Agreement (BSA) with the Utility and provides necessary generic information for example, an ESCO toll free or local number for billing inquiries. This information is exchanged non-EDI.

	<p>any other entity for processing and payment, using the appropriate authorization mechanism.</p> <p>[B&PP B.6.] Validated usage information necessary for billing will be made available by the meter reading entity to both the billing and non-billing parties when it is deemed appropriate for billing purposes.</p> <p>[B&PP C.3.a. (1)] ESCOs must provide advance notice to utilities of plans to offer their customers a consolidated billing option. The option may not be available until the adequacy of the data interchange is successfully demonstrated to staff of the Department of Public Service and to the specific utility through testing. A minimum of 60 calendar days notice is required for such notices. The 60 calendar day notice may be waived or shortened by utilities if the time is not needed by the utility or where testing of data exchange capability was previously conducted successfully. The 60-day notice shall not impose any obligation on any party to proceed without a successful test of data exchange capability and the fulfillment of other obligations described herein. If an ESCO later changes its system in such a way that affects data interchange, adequate advance notice must also be given, and additional testing may be required.</p> <p>[B&PP C.3.b.] ESCOs and utilities must provide at least 15 calendar days advance notice (prior to a meter reading date or the first of a calendar month for gas utilities, where applicable) to each other of any decision to change billing options offered to customers, if the change would impact the other party. If the change would affect data exchange, the notification and testing provisions of section C.3.a. (1) apply.</p> <p>[B&PP C.3.c.(1)] ESCOs and utilities must provide at least 15 calendar days advance notice (prior to a meter reading date of the first of a calendar month for gas utilities, where applicable) to each other of any decision to terminate a billing option available to customers.</p> <p>[B&PP C.4.a.] A retail access customer may elect to initiate or change a billing option (including termination of consolidated billing) by requesting such action from an eligible ESCO. The ESCO shall</p>

PROCESS NAME:	<i>UTILITY PROCESSES CONSOLIDATED BILLS USING UTILITY BILL READY MODEL (PARENT PROCESS)</i>
	<p>timeliness, or accuracy of the consolidated bill of an ESCO’s responsiveness to inquiries. If the utility determines that the ESCO has failed to meet any of its obligations, it may notify the ESCO that its right to initiate consolidated billing for additional customers is temporarily suspended and give the ESCO at least 15 calendar days from the date of the notice to cure the identified deficiency. If the deficiency is not cured within the specified period, the utility may commence dual billing for the ESCO’s customers after it submits a change request in accordance with section C.3.b. above.</p> <p>[B&PP C.3.c.(3)] After termination (either voluntary or involuntary) of consolidated billing rights, an ESCO wishing to resume consolidated billing to its customers must reapply to the utility using the same process as used for new entrants (see section C.3.a. (1)). Utilities shall expedite consideration of such applications. Customers may begin receiving consolidated bills again after requirements are met, including submission of the EDI transaction requests to establish consolidated billing for customers. Such a process is not required for suspensions that do not result in terminations of consolidated billing.</p> <p>[B&PP C.4.c] When more than one request to change a customer’s billing option is transmitted for a billing cycle, the last request received, if submitted at least 15 calendar days prior to the customer’s meter read date (or first of the month, where applicable) shall control.</p> <p>[B&PP C.4.d.] A utility may deny a request for initiation of, or may discontinue, consolidated billing for a customer with a past due amount outstanding at least 38 calendar days, unless the past due amount is subject to a deferred payment agreement and the customer is fulfilling the deferred payment obligations.</p> <p>[B&PP C.4.d.) [FOOTNOTE 17] Payment processing for consolidated bills will continue for 23 days after a final bill is issued, or payment of the final bill, whichever is sooner.</p> <p>[B&PP C.5.a.] The billing party must render a consolidated bill in accordance with applicable legal and consumer disclosure requirements and agreed-upon standards documented in the Billing Service Agreement. The billing party shall issue a bill directly to the customer or the customer’s representative</p>

**CONSOLIDATED BILLING BUSINESS PROCESSES

	<p>charges, the billing party shall refer the customer to the non-billing party. Billing and non-billing parties shall address complaints related only to their own services and charges, except as noted in the previous paragraph, unless the parties have agreed in the Billing Services Agreement specifically to resolve other parties' complaints, or except to the extent necessary to explain calculations performed using the rate ready method. Inquiries related to another party's services and charges shall be referred to the appropriate party, except as noted above.</p> <p>(b) <u>Notification of Customer Complaints</u></p> <p>The billing party, upon determining that complaint exists that will impact the entire bill, shall notify the non-billing party of the subject and amount in dispute, if known. The non-billing party shall inform the billing party of disputes related to non-billing party charges that would affect the billing process. Once such complaints are resolved and the billed amounts are no longer in dispute, the other party shall be notified.</p> <p>(c) <u>Call Centers for Consolidated Billing</u></p> <p>Parties issuing consolidated bills shall provide call centers with toll-free or local telephone access available 24 hours a day. Voice mail service shall be accessible when call center staff is not available. The parties shall maintain adequate staff to respond to customers' inquiries or refer inquiries to the non-billing party, where appropriate, within 24 hours.</p> <p>[CWG] [B&PP C.5.c.] The consolidated bill will include a summary section which will display as of the bill date: the total beginning balance, total payments applied since previous bill, total current period charges, total current period adjustments and the total balance due on the consolidated bill. The consolidated bill will also contain a detail section itemizing utility current period charges, and a detail section itemizing ESCO current period charges. Such itemizations will be in clearly separated portions of the bill with the source of the charges (utility or ESCO) clearly identified.</p>

**CONSOLIDATED BILLING BUSINESS PROCESSES
 (Utility Bill Ready)**

PROCESS NUMBER:	<i>UBR O</i>
PROCESS NAME:	<i>UTILITY PROCESSES CONSOLIDATED BILLS USING UTILITY BILL READY MODEL (PARENT PROCESS)</i>
	<p>[CWG] The Utility will maintain a balance on each account on behalf of the ESCO for both payment allocation and bill presentation purposes. The Utility will use information sent by the ESCO in the 810 Invoice and payment information in the Utility system, through the date the Utility assigns, to generate the consolidated bill summary and detail sections. The customer will receive a bill that displays activity dates for each part of the consolidated bill and will be able to easily understand where new charges and adjustments were generated and where payments were applied.</p> <p>[CWG] The ESCO will notify the Utility of generic ESCO information via non-EDI methods. This non-EDI means will be identified in a Billing Services Agreement (BSA) to be executed between the parties. Generic information may include ESCO logo (if used on the consolidated bill), ESCO phone number, and ESCO address. If parties agree that other information is to be presented on the consolidated bill on behalf of the ESCO, arrangements to accommodate that additional information will be documented in the Billing Services Agreement.</p> <p>[CWG] When Utility Bill Ready consolidated billing is in place, an 810 Invoice is used by an ESCO to communicate their billing information to the Utility for presentation on the customer’s consolidated bill.</p> <p>[CWG] At the time the account switches to bill ready consolidated billing, the ESCO may send the ESCO Beginning Balance to the Utility to communicate the customer’s balance, if any, prior to the switch to Bill Ready billing. The Utility will establish this amount in its records as the starting balance for that customer.</p> <p>[CWG] Where the Utility is the meter reading entity, the Utility will send usage when the data is acceptable by the utility to bill its customers. For accounts on a bi-monthly meter read cycle that are billed monthly, for example customers enrolled in budget bill plans, and no usage information is available for the interim month, the Utility will send an 867MU transaction to notify the ESCO that an interim bill will be issued. In this instance, the 867MU transaction will not contain usage data, but only an <u>Interim</u></p>

**CONSOLIDATED BILLING BUSINESS PROCESSES
 (Utility Bill Ready)**

PROCESS NUMBER:	<i>UBR O</i>
PROCESS NAME:	<i>UTILITY PROCESSES CONSOLIDATED BILLS USING UTILITY BILL READY MODEL (PARENT PROCESS)</i>
	<p><u>Bill Notice</u> segment to indicate that a bill window is open for the customer. The ESCO may, but is not required to, bill the customer. If the ESCO chooses to bill the customer, they must return an 810 Invoice containing their charges for the interim month consolidated bill within the current bill window.</p> <p>[CWG] When an account is scheduled to be read bimonthly, but a monthly budget bill is being provided by the Utility, the ESCO may bill the account bimonthly based upon the bimonthly consumption or bill the account monthly using either estimated consumption or establishing its own budget billing plan.</p> <p>[CWG] Customers are billed at the time collection of usage information is scheduled and/or when the customer is scheduled for billing. Transmission of an 867MU transaction initiates a bill window for that customer. Following receipt of valid usage data or an 867MU Interim Bill Notice for a customer account, the ESCO has two business days to transmit to the billing party an 810 Invoice transaction containing their charges.</p> <p>[CWG] The ESCO will transmit information on current period charges/adjustments, other than tax information, in an SAC segment in the 810 Invoice transaction. Each charge or adjustment sent in the Invoice transaction may be described through the assignment of a specific code in the standard used to identify charge/adjustment types. Although a specific text description is associated with each code, by agreement between the Utility and ESCO, alternate text may be substituted and presented in the customer bill.</p> <p>[CWG] The ESCO will send tax information in a TXI segment in the 810 Invoice.</p> <p>[CWG] Information on payments received by the ESCO for its own charges and/or a refund issued by the ESCO to its customer must be communicated to the billing party via a PAM segment in the 810 Invoice. Payments on a consolidated bill received by the Utility would be allocated between the Utility and ESCO accounts for the customer in the manner prescribed in the UBP. The amount of the customer's payment allocated to the ESCO, and remitted by the Utility to the ESCO, should not be included in a subsequent</p>

**CONSOLIDATED BILLING BUSINESS PROCESSES
 (Utility Bill Ready)**

PROCESS NAME:	<i>UTILITY PROCESSES CONSOLIDATED BILLS USING UTILITY BILL READY MODEL (PARENT PROCESS)</i>
	<p>810 Invoice sent by the ESCO. Information presented in the ESCO detail portion of the consolidated bill on payments applied to the customer’s account with the ESCO will be amounts posted in the Utility system as of the bill date. When an ESCO receives a customers’ payment on the consolidated bill , the ESCO must contact the Utility immediately (non-EDI means). The process for handling payments on a consolidated bill that are misdirected to the ESCO must be agreed upon and documented in the BSA.</p> <p>[CWG] Bill messages to be displayed on the ESCO’s portion of the customer’s consolidated bill may be communicated in one of two ways. The 810 Invoice transaction may contain either the actual text of the bill message to be displayed on the bill or may contain code(s) that the parties have previously agreed to associate with specific pre-approved bill message text. The method to be used for handling text messages is at the discretion of the Utility.</p> <p>[CWG] To date, laws, rules and Commission orders applicable to bill inserts require ESCO’s to provide only one bill insert, an environmental disclosure label. Inclusion of additional inserts is subject to negotiation by the Utility and ESCO and details of such arrangement will be included in the BSA.</p> <p>[CWG] When the Utility and ESCO agree that the ESCO may offer budget billing to its’ customers then the Utility must present in the consolidated bill the budget plan amount sent by the ESCO in the 810 Invoice transaction.</p> <p>[CWG] The ESCO may send additional budget information to the Utility for presentation on the customer’s bill such as:</p> <ul style="list-style-type: none"> • budget plan cumulative difference (budget amount and actual charges billed, to date, for budget balance information purposes) • budget plan current month difference (difference between actual charges and budget charges, for budget balance information purposes)

**CONSOLIDATED BILLING BUSINESS PROCESSES
 (Utility Bill Ready)**

PROCESS NUMBER:	<i>UBR O</i>
PROCESS NAME:	<i>UTILITY PROCESSES CONSOLIDATED BILLS USING UTILITY BILL READY MODEL (PARENT PROCESS)</i>
	<ul style="list-style-type: none"> • settlement amount (total amount due if the budget is ended) • actual charges <p>[CWG] The Utility (as the billing party) must maintain the balance for the customers’ account with the ESCO for the purpose of payment allocation and to accurately prepare the summary and ESCO detail section of the consolidated bill. To establish and maintain a record of the customers’ account balance with the ESCO the Utility will use information sent by the ESCO as well as payment information from the Utility system including:</p> <ul style="list-style-type: none"> • the ESCO Beginning Balance (if sent by the ESCO when Bill Ready billing is initially established), • ESCO charges (which may consist of either budget installment plan amounts or actual charges where a budget plan is not in effect), • ESCO adjustments (payments received by ESCO for its charges, refunds issued to customers, security deposits collected and applied by the ESCO, rebates or waivers of previously billed amounts, or canceled charges), and • and payments on consolidated bills received, allocated and posted by the Utility. <p>[CWG] When the customer’s account is on ESCO budget billing, the Utility will use the budget installment amount to establish and maintain the ESCO balance.</p> <p>[CWG] To present the ESCO <u>detail</u> portion of the consolidated bill, the Utility will use data provided by the ESCO in the 810 Invoice transaction, generic information previously provided non-EDI, information on payments made to, and apportioned by, the Utility to the customer’s account with the ESCO and past due balance information, if any, as shown in the Utility’s system. The information will be reflected in the aggregate line item amounts that are displayed in the summary section of the consolidated bill.</p>

**CONSOLIDATED BILLING BUSINESS PROCESSES
 (Utility Bill Ready)**

PROCESS NUMBER:	<i>UBR O</i>
PROCESS NAME:	<i>UTILITY PROCESSES CONSOLIDATED BILLS USING UTILITY BILL READY MODEL (PARENT PROCESS)</i>
	<p>[CWG] Should the ESCO receive a payment directly for ESCO-only charges (i.e. not a payment on a consolidated bill), the ESCO must include the amount of the payment in the 810 Invoice in a PAM segment so that the Utility may adjust its balance, if necessary, on the customer’s account with the ESCO and be able to present this information as an adjustment in the ESCO portion of the consolidated bill. The summary section of the consolidated bill will not recognize this amount as a ‘payment’ because this amount was not a payment received by the Utility on a previous consolidated bill and was not subject to the payment allocation process. The summary section of the consolidated bill will reflect the effect of the ESCOs receipt of this payment in the presentation of the total adjustments and in the total amount due.</p> <p>[CWG] For bill presentation purposes, the customer’s total balance due for the ESCO detail section of the bill will be equal to:</p> <ul style="list-style-type: none"> Beginning Balance on the ESCO account for the customer (from Utility system which may include an amount provided by the ESCO in its initial 810 Invoice for this customer) +/- Current period charges/adjustments (sent in the 810 invoice) - Payments received and credited on or before the “as of” date displayed on the consolidated bill (from Utility system) +/- Payments received or refunds issued by the ESCO for their charges (sent in a PAM segment in the 810 invoice) = Total Balance Due <p>[CWG] The Utility will determine the bill date (the ‘as of’ date) to be presented on the consolidated bill. The bill date will be either (1) as of the date usage data was sent to the ESCO (867MU) or (2) as of the date the 810 Invoice transaction is received by the Utility. For option 1, payments received by the Utility during the bill window would not be reflected in the consolidated bill; for option 2, payments received</p>

**CONSOLIDATED BILLING BUSINESS PROCESSES
 (Utility Bill Ready)**

PROCESS NUMBER:	<i>UBR O</i>
PROCESS NAME:	<i>UTILITY PROCESSES CONSOLIDATED BILLS USING UTILITY BILL READY MODEL (PARENT PROCESS)</i>
	<p>and allocated by the Utility after the 867MU transaction was sent but before the consolidated bill is generated may be reflected in the consolidated bill.</p> <p>[CWG] The Utility will respond to all ESCO 810 Invoices. The response will either be a notification of amounts billed (an 824 Positive Notification) or a response indicating that ESCO charges have not been presented on the consolidated bill (an 824 Application Advice). See Processes 1.0 and 2.0 for more detail.</p> <p>[CWG] When the ESCO does not transmit an 810 Invoice to the Utility within the bill window (the Invoice has been rejected), the bill for the period would reflect balance information in the ESCO detail portion but will not reflect current period charges. When this occurs, the Utility will indicate that there are no current period charges being billed for the ESCO in this consolidated bill.</p> <p>[CWG] A single 810 Invoice will be used to communicate both billing information and cancellation of charges on behalf of the ESCO. For example, if charges for the month of March are cancelled as a result of the April meter reading, the cancelled charges will appear on the April 810 Invoice in addition to the re-billed charges for March period and the new charges for April.</p> <p>[CWG][B&PP C.6.d.] The process for handling ESCO issuance of separate bills should be carefully documented in advance in the Billing Services Agreement between the parties. When an ESCO sends a bill directly to the customer, the ESCO must notify the Utility via a non-EDI method.</p> <p>[CWG] [B&PP C.6.f.] When the Utility is unable to render a bill within the allotted time, the Utility will notify the ESCO immediately. This notification will be non-EDI.</p> <p>[CWG] For the Bill Ready method, the ESCOs current charges will appear on the consolidated bill when the 810 Invoice containing those charges and other pertinent information is received by the Utility within 2 business days of the date the ESCO received valid usage data for a customer. This two-day period is referred to as the “bill window.” When the 810 Invoice is not received within the bill window</p>
