 Subject: Fix needed to 867 HU

- Note that we have the note saying that AJ means there is a special program adjustment, but shouldn't K1 say that there is not, similar to the 814 E?
- Also, I think that we intended for the 867 HU to contain both the current and future tags, which would use two QTY*KZ loops with appropriate dates. We might want to show a sample of that in the gray box. I'm buried right now, but can find a sample from the test files later today to add to it.

FROM JULY 24, 2015 FILED 867 HU IG:
