## Change (Account Maintenance)

Ver/Rel 004010

	<b>Summary of Changes</b>
<b>November 1, 2001</b>	<b>Initial Release</b>
<b>April 16, 2002</b>	<b>Version 1.1 Issued</b>
	Notice of Correction Max Use of the REF* <b>TU</b> segment is revised from 1 to >1.
<b>August 7, 2002</b>	<b>Version 1.2 Issued</b>
	Added new REF segment (REF* <b>AJ</b> ) to accommodate exchange of a Utility Account Number for the ESCO/Marketer
	Inserted updated Field Descriptions Guideline Page
	Modified the segment notes for the N1* <b>8R</b> and N1* <b>BT</b> segments to clarify that an N1 segment is required in an N1 loop when other segments are sent in that loop.
	Modified the element notes for REF03 in the REF* <b>65</b> (Meter Cycle Code) and REF* <b>BF</b> (Bill Cycle Code) segments to indicate it is only required when the REF02 data in each segment is insufficient for the recipient to determine when, or how frequently, a customer's meter is read or the account is billed. (See October 2, 2001 clarification).
	Modified the segment notes for the REF* <b>BLT</b> (Bill Presenter) and REF* <b>PC</b> (Bill Calculator) segments to remove the parenthetical reference to RG&E regarding Single Retailer since National Fuel will also offer Single Retailer.
	Modified the Front Matter Notes regarding 'Request Transactions' to indicate that changes in bill option may not be processed when the customer is not yet active with the E/M initiating the Request transaction. (See June 21, 2002 order adopting EDI standards for Utility Rate Ready Consolidated Billing).
	Modified the segment notes for the AMT* <b>DP</b> segment to remove the parenthetical relating to RG&E in favor of a more generic note. Both RG&E and National Fuel Gas offer single Retailer Model.
	Added text to the segment notes for the REF* <b>MT</b> (Measurement Type and Reporting Interval) segment and REF02 element to indicate that this segment must be accompanied by a REF* <b>TU</b> segment in some instances in order to adequately describe the measurement period(s) or time intervals associated with specific service end points.
	Modified the use attribute for REF* <b>TD</b> (Reason for Change – Account Level) segment at position 030 from Required to Conditional. This segment is only required when a change in account level data is being reported.
<b>March 17, 2004</b>	<b>Version 1.3 Issued</b>
	Corrected the 'Max Use' attribute for the REF* <b>TD</b> (Reason for Change – Meter Level) segment in the NM1 loop to >1.
	An element note is added to clarify the use of the LIN01 identifier in a Response transaction.
	Added two codes (AMT9M & AMT9N) to the REF* <b>TD</b> (Reason for Change – Account Level) segment to enable ESCOs to transmit information about changes in a customer's tax rates when the customer's bill option is Utility Rate Ready Consolidated billing.
	Added AMT* <b>9M</b> and AMT* <b>9N</b> segments to enable ESCOs to transmit changes in customer's tax rate information when the bill option requested is Utility Rate Ready consolidated billing and the Utility requires ESCOs to provide this data. When different tax rates are applicable to portions of the customer's service <u>i.e.</u> when a REF* <b>RP</b> (Portion Taxed Residential) segment was present in an Enrollment Request transaction, it will be necessary to send both the 9M (residential tax rate applicable to a portion of the service) and the 9N segment (commercial tax rate applicable).
	Corrected the segment notes for the NM1 Loop to indicate that transmitting an NM1 Loop in a Response transaction is 'Optional' rather than "Not Used".
	Corrected sample transaction 2.A. (E/M Change Request) to delete the DTM007 (Effective Date of Change) segments which are not applicable to the change being reported in this example.

NY 814 Change Request & Response

	Modified sample transactions 4.A. & 4.B. to add segments for a change in the customer's tax rate coincident with the change to Utility Rate Ready billing.
	Notes regarding the attributes of "R" elements are added to the Front Matter notes.
	Coding for the REF*GC (Gas Capacity Assignment/Obligation) has been corrected (from Yes/No to Y/N) to be consistent with the coding for the same segment in the Enrollment Standard.
<b>May 17, 2006</b>	<b>Version 1.4 Issued</b>
	Any references to Niagara Mohawk or NMPC throughout the document were revised to refer to National Grid.
	References to RG&E's use of the Single Retailer Model have been deleted. This model is no longer offered in Rochester's service territory. A new example replaces Scenario #4 in the previous Implementation Guide.
	A PER segment is added to the N1 (Customer) Loop (N101=8R) to enable parties to communicate changes in a customer's telephone number where the telephone number was initially sent in an Enrollment Accept Response transaction in an N1 (Customer) Loop. A change in the customer's telephone number coincident with a change in mailing address should be reported in an N1 (Name for Mailing) Loop in the Single Retailer model (see scenario 2 in the examples).
	The N1*8R (Customer) segment note is revised to delete extraneous text and to reflect the addition of a PER segment in the N1 (Customer) Loop.
	The LIN segment notes are revised to clarify the looping structure at the header and detail levels when multiple changes are being sent in a Request transaction.
	The REF*11 (ESCO/Marketer Customer Account Number) segment note is changed to indicate that this segment must be sent when the Utility is the bill presenter and there is a change in the account number.
	The REF*12 (Utility Account Number) segment note is changed to reflect the correct line number reference in the data dictionary.
	A REF03 element is added to the REF*12 segment (Utility Account Number) for use in Change Requests sent to, or received from, Orange & Rockland Utilities when the reported change pertains to the un-metered portion of a customer's electric service when both metered and un-metered service are present on the same account.
	The REF*AJ (Utility Assigned Account Number for ESCO/Marketer) segment note is revised to indicate that this segment is Not Used in a Response transaction.
	A REF*LF (E/M Late Fees) segment is added at the account level to enable E/Ms to communicate a change in late fee policies for customer's receiving a Rate Ready consolidated bill from National Fuel Gas.
	An AMT*B5 (E/M Budget Plan Installment Amount) segment is added for use in National Fuel Gas service territory. The AMT*B5 segment is used in that service territory to communicate a change in the customer's budget plan installment amount for E/M charges when the bill option is Rate Ready consolidated billing and the payment option is Pay-As-You-Get-Paid.
	Additional codes were added to the REF*TD (Reason for Change – Account Level) segment to accommodate the new segments (PERIC, REFLF, and AMTB5).
<b>October 23, 2014</b>	<b>Version 1.5 Issued</b>
	New Change Reason Codes added at the account level and new segments from Case No. 12-M-0476 REFIJ – Change Industrial Classification Code REFSG – Change Utility Discount Indicator REFTDT – Change Account Settlement Indicator REFTX – Change Tax Exempt Status REFYP – Change NYPA Discount Indicator Added new segment DTM*AB2 (ICAP Effective Dates)
	Utility specific notes are generalized, as appropriate, and designated for relocation to/reference within Utility Maintained EDI Guides, as necessary.

NY 814 Change Request & Response

	Replaced references to Marketer and E/M with ESCO
<b>April 7, 2015</b>	<b>Version 1.6 Issued</b>
	<ul style="list-style-type: none"> <li>• Clarifying revisions to ESCO Service Tax Rate related segments.</li> <li>• Changes permitting a rate ready utility to receive a bill credit from an ESCO to be provided to an Assistance Program Participant.</li> </ul>
<b>July 24, 2015</b>	<b>Version 1.7 Issued</b>
	<ul style="list-style-type: none"> <li>• Added codes EM and FX to the PER Administrative Communications Contact (Customer Phone Number) segment to support utility optional exchange of Customer email addresses and facsimile numbers with ESCOs</li> <li>• Rejection reason codes ECB and MOV added to REF*7G Segment</li> <li>• Changes to N3 Address Information (Mailing Address) &amp; N4 Geographic Location (Mailing Address) to accommodate provision of a customer's forwarding address in APP Credit Rejection Responses when the customer has moved outside the service territory.</li> <li>• Clarified circumstances under which 814C could be used by a Bill Ready Utility to accept an APP Credit from an ESCO.</li> <li>• Added APP Credit Example</li> <li>• Errata - Corrected acronym for North American Industry Classification System</li> </ul>
<b>January 29, 2016</b>	<b>Version 1.8 Issued</b>
	<ul style="list-style-type: none"> <li>• Modification to notes for DTM Date/Time Reference (Effective Date of Change) Segment to show ICAP Tag changes as an exception, making provision of the segment optional in this instance.</li> <li>• ICAP Tag oriented clarifications/examples in notes for AMT Monetary Amount (ICAP), DTM Date/Time Reference (ICAP Effective Dates) and DTM Date/Time Reference (Effective Date of Change) Segments.</li> <li>• ICAP Tag Change Example added.</li> <li>• Modification to REF Reference Identification (Gas Capacity Assignment/Obligation) Segment to correspond to Orders issued in Case No. 07-G-0299.</li> </ul>
<b>June 30, 2016</b>	<b>Version 1.9 Issued</b>
	<ul style="list-style-type: none"> <li>• Existing references to Assistance Program Participant Credits (APP Credits) are changed to EPA (ESCO Pricing Adjustment) Credits; the APP Credit is one type of an EPA Credit.</li> <li>• Modifications to clarify EPA Credits and adjustments to EPA Credit are to be submitted as Real Numbers.</li> <li>• Update to conditionality of REF Reference Identification (Previous Utility Customer Account Number) segment.</li> <li>• PERIC code is retired to conform with usage of N18R and N1BT codes in other retail choice jurisdictions.</li> <li>• Added IF (Insufficient Funds) code and broadened description of the ECB code in REF Reference Identification (Reject Response Reasons) segment.</li> <li>• Updates to example transactions.</li> </ul>
<b>March 31, 2017</b>	<b>Version 2.0 Issued</b>
	<ul style="list-style-type: none"> <li>• Modifications to support 867 MIU/HIU transactions.</li> </ul>

NY 814 Change Request & Response

<b>October 31, 2017</b>	<b>Version 2.1 Issued</b>
	<ul style="list-style-type: none"> <li>• Inclusion of changes to address errata since filing of Version 2.0 in REF*TD and REF*7G segments.</li> </ul>
<b>April 30, 2018</b>	<b>Version 2.2 Issued</b>
	<ul style="list-style-type: none"> <li>• Changes to enable data exchange for ESCOs that bill customers under ESCO Combined Billing related to HEAP payments. New segments AMT*B1 and AMT*BK added.</li> <li>• Optional REF*5E added to communicate changes in customer APP Status to ESCO.</li> <li>• AMT*7 Segment repurposed to process Guaranteed Savings Program (GSP) Credits. GSP Credits are a type of ESCO Pricing Adjustment.</li> <li>• New AMT*UJ segment added for ESCO Generic Credits.</li> <li>• Elimination of references to NY Billing Agency model.</li> <li>• References to Single Retailer Model changed to ESCO Consolidated Billing, where appropriate.</li> </ul>
<b>November 30, 2018</b>	<b>Version 2.3 Issued</b>
	<ul style="list-style-type: none"> <li>• Consistency modifications to gray box notes</li> </ul>

	<b>Notes pertaining to the use of this document</b>
Purpose	<ul style="list-style-type: none"> <li>An 814 Change transaction is used to communicate changes in customer account information between market participants. The 814 Change Standards are based on the ASC X12 Ver/Rel 004010 standard and related UIG guidelines.</li> </ul>
One account per 814	<ul style="list-style-type: none"> <li>Each change transaction may contain only one account for one commodity (i.e. electric, gas, etc.).</li> </ul>
Cross referencing Request & Response Transactions	<ul style="list-style-type: none"> <li>The BGN02 element in the BGN segment received on a request must be returned in the BGN06 element of the BGN segment sent on the response.</li> <li>The LIN01 element is used to cross-reference each individual LIN response with its corresponding request.</li> </ul>
Validation Field	<ul style="list-style-type: none"> <li>In New York, the validation field is the customer’s utility account number (with check digit, if included).</li> </ul>
Request Transaction	<ul style="list-style-type: none"> <li>An 814 Change transaction can accommodate more than one change request per commodity per account.</li> <li>Each change request pertaining to data transmitted at the account level must be sent in a separate LIN loop. Account level items include all segments listed on page 1 of this guide under “Heading” as well as those segments listed under “Detail” that are NOT part of the NM1 loop. For example, if changing from dual billing to utility consolidated billing, it would be necessary to request a change in bill presenter as well as bill calculator. Each change request in this example would be sent in a separate LIN loop.</li> <li>Customer name changes are sent in the N1*8R segment. Changes to the name for mailing address are sent in the N1*BT segment. Changes in the customer's telephone number should be sent in the N1 (Customer) Loop (N101=8R) if the information originated in that Loop.</li> <li>At the meter level, all change requests are grouped by meter in individual LIN loops. If a change is made to all meters on a multi-metered account, the data should be reported in a single NM1 loop and the literal “ALL” sent in the NM109 element. Changes related to a single meter, such as changes to both Utility Rate Class and Utility Load Profile Group code, are sent in one LIN Loop. Change requests for different meters are grouped in separate LIN loops. For example, if different Utility Rate codes apply to each meter on a multi-metered account, the change to Utility Rate Code should be reported in a separate LIN loop for each meter.</li> <li>ESCO initiated Requests to change a customer’s bill option (Bill Presenter and/or Bill Calculator segments) may not be processed for accounts that are not yet active with that ESCO (i.e. enrollment is pending but not yet effective) at the time the change Request was received.</li> </ul>
NM1 loop structure	<ul style="list-style-type: none"> <li>Changes to meter information are communicated in the NM1 loop. Each NM1 loop may contain all changes for a particular meter, all changes affecting the un-metered service on the account or a single change that pertains to all metered or un-metered service points on the account. Each NM1 loop is sent within a single LIN loop. If multiple changes are being requested, the changes pertaining to each meter or un-metered service are sent in separate NM1 loops. Each NM1 loop may be associated with only one LIN loop.</li> </ul>

<p>Response Transaction</p>	<ul style="list-style-type: none"> <li>• There must be one response LIN for each request LIN.</li> <li>• Requests are accepted or rejected at the LIN level.</li> <li>• Responses may be created and sent at different times in different 814 transactions, but the response for each request must be sent within 2 business days.</li> <li>• The Change Response Transaction has been structured as follows:             <ul style="list-style-type: none"> <li>◆ The transaction containing an Accept Response may contain the REF*TD(s) from the request transaction, at the option of the sender, but will not contain or echo back the segment that was changed.</li> <li>◆ The transaction containing a Reject Response will contain the rejection reason (REF*7G) and, may contain, at the option of the sender, the REF*TD(s) from the Request Transaction and/or the segments that were in error.</li> </ul> </li> </ul>
<p>Use of REF*TD segment</p>	<ul style="list-style-type: none"> <li>• The REF*TD segments are used to indicate to the receiver the type of change that is being requested. At least one REF*TD is required on a Request transaction. The REF*TD(s) may be echoed back on the Response transaction at the option of the sender.</li> <li>• REF*TD segments are located at the account (LIN) or meter (NM1) level within the document.             <ul style="list-style-type: none"> <li>◆ Each data element that is being changed at the Account (LIN) level must be associated with a REF*TD segment in the LIN loop.</li> <li>◆ For a meter addition, a REF*TD code of NM1MA must be present, and all new data reported in a single NM1 loop.</li> <li>◆ For a meter exchange, a REF*TD code of NM1MX must be present, and all data for the new meter is reported in a single NM1 loop (a REF*46 segment, containing the old meter number, is returned in the same NM1 loop).</li> <li>◆ For a meter removal (not an exchange), an NM1 segment and a REF*TD segment with a code of NM1MR must be present. No other segments or elements are required.</li> <li>◆ For other changes at the meter level, an NM1 segment, the applicable REF*TD segment, and the segment containing the change must be present.</li> </ul> </li> </ul>
<p>Conditional Segments</p>	<ul style="list-style-type: none"> <li>• A change in one data segment may necessitate changes in dependent data segments. For example, when there is a change in billing option, some dependent data segments may also be subject to change. For example, when changing from dual billing to Utility rate ready consolidated billing, in addition to the changes in Bill Presenter and Bill Calculator segments, it will be necessary to send other data segments (such as ESCO Commodity Price, ESCO Fixed Charge, or ESCO Rate Code, Percent Tax Exempt, Portion Taxed Residential, Current Budget Billing Status, etc.) in order for the Utility to be able to calculate the customer's bill.</li> </ul>
<p>Changes to Utility Account Numbers or Meter Numbers</p>	<ul style="list-style-type: none"> <li>• When updating or correcting existing Utility account numbers or meter numbers, the Change Request transaction must contain the new (or corrected) and old number.</li> <li>• For the Utility account number, the new, or corrected, account number is sent in a REF*12 segment. The old account number is sent in a REF*45 segment.</li> <li>• For meter numbers, the new, or corrected, meter number is sent in an NM1 segment. The old meter number is sent in a REF*46 segment.</li> </ul>

NY 814 Change Request & Response

<p>Use of DTM*007 segment</p>	<ul style="list-style-type: none"> <li>• A DTM*007 segment (Effective Date of Change) is used to communicate the effective date for a requested change in the following circumstances:               <ul style="list-style-type: none"> <li>◆ Utility Request – required for non-DTM segments</li> <li>◆ Utility Response – may be sent to establish the effective date of an ESCO requested change</li> <li>◆ ESCO Requests sent to communicate a change in mailing address (required for Single Retailer Model)</li> <li>◆ ESCO Requests to change the ESCO Commodity Price (AMT*RJ), ESCO Fixed Charge (AMT*FW), or ESCO Rate Code (REF*RB) when the Utility is the Bill Presenter and Bill Calculator and has agreed to process rate or price changes mid-cycle.</li> </ul> </li> </ul>
<p>Data Element Attributes</p>	<ul style="list-style-type: none"> <li>• Data elements whose X12 attribute type is ‘R’ (for example AMT02 elements) are treated as real numbers. Real numbers are assumed to be positive numbers and a minus (-) sign must precede the amount when a negative number is being sent. Real numbers do NOT provide for an implied decimal position; therefore a decimal point must be sent when decimal precision is required. Note that in transmitting real numbers it is acceptable, but not necessary, to transmit digits that have no significance i.e. leading or trailing zeros.</li> </ul>
<p>Single Retailer Model</p>	<ul style="list-style-type: none"> <li>• There are some differences in the required segments for a Change Request and/or Response where the Single Retailer Model has been implemented for Retail Access. These differences have been noted in the notes and gray box text in the individual data segments in this Implementation Guide as well as the corresponding data dictionary.</li> </ul>
<p>Conditional Data Segments</p>	<ul style="list-style-type: none"> <li>• There are minor differences in the extent to which specific data elements are supported by each Utility and/or whether they are applicable to both electric and gas services. These differences have been noted, for the most part, in the data dictionary associated with this implementation guide.</li> </ul>
<p>Definitions</p>	<ul style="list-style-type: none"> <li>• The term Utility is used in this document to refer to the local gas or electric distribution company, i.e. the entity providing regulated bundled commodity service. The term ESCO is used in this document to refer to either a gas or electric supplier.</li> </ul>
<p>Companion Documents</p>	<ul style="list-style-type: none"> <li>• All of the applicable business rules for New York are not necessarily documented in this implementation guide. Accordingly, the Account Change Business Process document and/or the 814 Change Data Dictionary should be reviewed where further clarification is needed.</li> <li>• In addition, further information on the Change data elements can be found in the Implementation Guide for the 814 Enrollment Request &amp; Response.</li> </ul>

# Implementation Guideline Field Descriptions

**Segment:** **REF** Reference Identification (Utility Customer Account Number)  
**Position:** 050  
**Loop:**  
**Level:** Heading  
**Usage:** Optional (Must Use)  
**Max Use:** 1  
**Purpose:** To specify identifying information  
**Syntax Notes:**

- 1 At least one of REF02 or REF03 is required.
- 2 If either C04003 or C04004 is present, then the other is required.
- 3 If either C04005 or C04006 is present, then the other is required.

**Semantic Notes:**

- 1 REF04 contains data relating to the value cited in REF02.

**Comments:**

This section shows the X12 Rules for this segment but the Usage and Max Use fields will also reflect NY rules. For Usage, "Optional (Must Use)" means that this segment is Optional for X12, but is required in NY. "Optional (Dependent)" means Optional for X12, but use is conditional in NY. The grayboxes below should also be reviewed for additional NY Rules.

**Notes:** Required  
 The Utility account number assigned to the customer is used for validation and must be present on all transactions.

This section displays the NY Rules for implementation of this segment.

One or more examples. 11231287654398

## Data Element Summary

Mand.	Ref Des.	Data Element	Name	X12 Attributes	
				M	ID 2/3
Mand.	REF01	128	Reference Identification Qualifier 12 Billing Account REF02 contains the Utility-assigned account number for the customer.		
Must Use	REF02	127	Reference Identification Utility assigned customer account number The utility account number must be supplied and cannot contain non-alphanumeric characters. (Characters on a bill, for example, should be removed)		AN 1/30

This column documents differences between X12 and NY use for each data element:

Mand. (Mandatory) – Required by X12  
 Must Use – Required by NY  
 Cond. (Conditional)  
 Optional

These columns show the X12 attributes for each data element:

M = Mandatory  
 O = Optional  
 X = Conditional  
  
 AN = Alphanumeric  
 N# = Implied Decimal  
 ID = Identification  
 R = Real  
 DT = Date (CCYYMMDD)  
  
 1/30 = Minimum 1, Maximum 30

# 814 Change (Account Maintenance)

Functional Group ID=**GE**

**Introduction:**

This Draft Standard for Trial Use contains the format and establishes the data contents of the Account Maintenance Transaction Set (814) for use within the context of an Electronic Data Interchange (EDI) environment.

**Notes:**

This guideline is limited to defining various account maintenance information that may be exchanged between trading partners.

**Heading:**

This segment may be sent by the utility to provide the customer's telephone number, Facsimile Number and/or Email Address when this information was unavailable at the time an enrollment request was processed or to correct such information previously sent in an Enrollment Accept Response transaction. This segment may be sent by an ESCO to provide the correct or missing information when the information provided in an Enrollment Response has been determined to be incorrect or absent. This segment is sent in an N1 (Customer) Loop and must be accompanied by an N1\*8R segment.

The format for phone/facsimile numbers is area code + 7 digit number (xxxxyyzzzz).

If a change is made to this segment, the N18R code is transmitted in the REF\*TD segment at position 030.

In its Utility Maintained EDI Guide, a utility will indicate if it accepts and/or sends Change Requests containing the Customer's Telephone/Facsimile number and/or Email Address.

**Data Element Summary**

	<u>Ref.</u>	<u>Data</u>	<u>Name</u>	<u>Attributes</u>
<u>Mand.</u>	<u>Des.</u>	<u>Element</u>		
	REF01	128	Reference Identification Qualifier	M ID 2/3
			TD Reason for Change	
Must Use	REF02	127	Reference Identification	X AN 1/30
			AMT7 Change ESCO Pricing Adjustment Credit	
			Used to report a credit to the customer's account when the ESCO has charged a customer that receives service subject to a price guarantee more than what the customer would have paid the utility and the ESCO is required to provide a credit to the customer, i.e. a Guaranteed Savings Program (GSP) Credit. The Utility will include this one-time credit on the customer's next bill.	
			AMT9M Change Customers' Tax Rate 1	
			Utility Rate Ready Consolidated Billing Only. Used to report a change in the customer's tax rate when the utility is calculating ESCO charges. The 9M code may also be used to report a change in the residential tax rate applicable to a portion of the service (i.e. a REF*RP was present in the Enrollment transaction) when URR billing is in effect. The AMT9N code may be used to report a change in the portion of the account taxed at a commercial rate.	
			AMT9N Change Customers' Tax Rate 2	
			Utility Rate Ready Consolidated Billing Only. This code may only be used to report a change in the customer's tax rate applicable to the portion of the service taxed at a commercial rate in instances when part of the service is taxed at a residential rate and the balance at a commercial rate (i.e. REF*RP was present in the Enrollment transaction). The AMT9M code may be used to report a change in the residential tax rate on that account.	
			AMTB1 Change Benefit Amount	

	Used to report receipt of a Basic HEAP Payment under ESCO Combined Billing using Single Retailer transactions.
AMTB5	Change ESCO Budget Plan Installment Amount Supported only if indicated within a utility's Utility Maintained EDI Guide.
AMTBD	Change ESCO Budget Plan Balance Supported only if indicated within a utility's Utility Maintained EDI Guide.
AMTBK	Change Disbursements for Protection and Preservation Used to report receipt of an Emergency HEAP Payment under ESCO Combined Billing using Single Retailer transactions.
AMTDP	Change Percentage of Service Tax Exempt
AMTFW	Change ESCO Fixed Charge
AMTKZ	Change ICAP ELECTRIC Service Only.
AMTRJ	Change ESCO Commodity Price
AMTUJ	Change ESCO Generic Credit Used to report a credit to the customer's account when the ESCO provides a generic credit to the customer. The Utility will include this one-time credit on the customer's next bill.
DTM007	Change Effective Date
DTM150	Change Service Period Start Date Enrollment is pending. This code is used by the Utility to report a change in the Assigned Service Start Date.
DTM151	Change Service Period End Date A Drop is pending. This code is used by the Utility to report a change in the Assigned Service End Date.
N18R	Change Contact Information or Service Address Use this code when the Customer contact information, e.g. name, phone, fax or email, on the account is being changed and/or a change of service address is being reported.
N1BT	Change Contact Information for Mailing or Mailing Address Use this code when the Customer contact information, e.g. name, phone, fax or email, for mailing and/or the mailing address is being changed.
REF11	Change ESCO Customer Account Number
REF12	Change Utility Account Number
REF5E	Change Consumer Identifier (APP Status)
REF65	Change Meter Read Cycle
REFBF	Change Bill Cycle
REFBLT	Change Billing Type (Bill Presenter)
REFGC	Change Gas Capacity Assignment/Obligation GAS Service Only
REFIJ	Change Industrial Classification Code
REFIU	Barge Permit Number (Interval Usage Option)
REFLF	Change ESCO Late Fee Policy Supported only if indicated within a utility's Utility Maintained EDI Guide.
REFNR	Change Current Budget Billing Status
REFPC	Change Party that Calculates the Bill (Bill Calculator)
REFPGC	Change Partial Participation Portion
REFRP	Change Portion Taxed Residential
REFSG	Change Utility Discount Indicator
REFSPL	Change ISO LBMP Zone ELECTRIC Service Only

NY 814 Change (Account Maintenance)

REFSU	Change Special Processing Code Use this code to report a change in the Customer's Life Support status (Single Retailer Model)
REFTDT	Change Account Settlement Indicator
REFTX	Change Utility Tax Exempt Status
REFVI	Change Gas Pool ID GAS Service Only
REFYP	Change NYPA Discount Indicator

 Utility Response: Conditional

This segment is required on all Utility initiated Requests (except for changes to ICAP Tags, Assigned Service Start or Assigned Service End Date). This segment is also required on the Utility Response to an ESCO Request for a change in customer billing option. This segment is required on ESCO initiated Requests reporting a change in the customer's mailing address or HEAP payment when Single Retailer transactions are used to support ESCO Consolidated Billing.

This segment may also be sent on ESCO initiated Requests to report a change in ESCO Commodity Price, Fixed Charge or Rate Code when the Utility is the Bill Presenter and Bill Calculator (Rate Ready Consolidated Billing) AND the Utility has agreed to process price or rate changes on a date other than the regularly scheduled bill cycle date.

When a DTM~007 segment is not sent and the date has not been provided in another DTM segment (DTM~105, DTM~AB2...), it can be presumed that the transaction date is the effective date of the change. In any case, the utility should clarify its use of this segment in its Utility Maintained EDI Guide.

 This segment must be sent by the ESCO to report a change in the fixed charge per account when the bill option is Utility Rate Ready consolidated billing and the ESCO charges include a fixed charge on each account.  
  
 This segment may be accompanied by a DTM\*007 segment to communicate the effective date of the change in fixed charge when the applicable Utility has agreed to process price changes on a date other than the regularly scheduled bill cycle date.  
  
 AMT~FW~2.00

**Data Element Summary**

Utility Response:	Optional

Utility Rate Ready Consolidated Billing Only.

In its Utility Maintained EDI Guide, the utility will indicate if it supports the AMT\*9M segment and if so, whether and how it is supported in conjunction with the AMT\*9N and REF\*RP segments.

Where supported:

- This segment is sent by an ESCO to report a change in the customer's tax rate for all service on the account or for the portion of the service taxed at a residential rate when a REF\*RP segment was present in the Enrollment Request transaction.
- This segment is sent by an ESCO to report a change in the composite tax rate to compute the applicable tax amount associated with the ESCO charges.

The tax rate change may be echoed back on the Utility Accept Response transaction, at the option of the Utility, to confirm a tax rate change.

**Usage:** Optional (Dependent)  
**Max Use:** 1  
**Purpose:** To indicate the total monetary amount  
**Syntax Notes:**  
**Semantic Notes:**  
**Notes:**

Utility Request: Not Used  
 ESCO Response: Not Applicable

ESCO Request: Conditional  
 Utility Response: Optional

This segment must be sent by the ESCO when a Guaranteed Savings Program (GSP) Credit, e.g. to credit an Assistance Program Participant, is to be included on a Rate Ready Consolidated customer bill. This segment would only be sent when the ESCO has charged the customer more than what the utility would have and the ESCO is required to provide a credit to the customer. The amount may be echoed back on the Utility Accept Response transaction, at the option of the Utility, to confirm the one-time credit amount. Note that GSP Credits were formerly known as APP or EPA Credits. GSP Credits are a type of ESCO Pricing Adjustment.

Additionally, at utilities providing Bill Ready Consolidated customer bills, in cases where the ESCO issuing the credit is no longer serving the customer (and therefore no monthly usage is available for that ESCO), unless the Utility has specified a non-EDI process in its Utility Maintained EDI Guide, this segment should be used by the ESCO.

The utility will use this segment to apply a one-time credit to the customer's bill. This credit will be reflected in the 810 issued by a rate ready utility that is sent to the ESCO for the period where the credit was applied. This credit, when received via the AMT\*7 segment, will be reflected in the 820 issued by a rate ready utility, or by a bill ready utility if the ESCO is no longer serving the customer, for the period where the credit was applied.

The 814 Change must be sent to the utility at least 4 business days prior to the scheduled meter read date in order to be included in the rate ready calculation for that bill period. In the event the 814 Change is not sent in time, the utility may hold the transaction for the next billing cycle or reject the 814 Change. If utility cannot issue a bill to the customer because the account is inactive, the Utility will reject the 814 Change and the ESCO is responsible for directly reimbursing the customer.

AMT~7~-2.15

 This segment is used to communicate changes at the meter or service end point level. At the Detail Level, all change requests should be grouped by meter in individual LIN Loops, e.g. multiple changes pertaining to the same meter may be sent in one LIN Loop (refer to examples in this implementation guide).  
 'MA' is used for a meter addition.  
 'MQ' is used when changes to existing meter data are being sent.  
 'MX' is used for a meter exchange.  
 'MR' is used when a meter has been removed but the account will remain active.  
 A Drop transaction, rather than a Change, will be sent when a meter removal is done coincident with an account termination.  
 NM1~MA~3~~~~~32~A1234567 Meter addition (new meter number supplied)  
 NM1~MQ~3~~~~~32~A1234567 Change in existing meter or service end point data (when a meter number is being corrected, the corrected meter number is supplied)  
 NM1~MR~3~~~~~93~A1234567 Meter removal (removed meter number is supplied or the word "Un-metered")  
 NM1~MX~3~~~~~32~A1234567 Meter exchange (new meter number supplied - old meter number sent in a REF\*46)

**Data Element Summary**

Mand.	Ref. Des.	Data Element	Name	Attributes
				M ID 2/3
	NM101	98	Entity Identifier Code	
			MA	Party for whom Item is Ultimately Intended Indicates a Meter Addition. Used when an additional meter is added to a multi-metered account or un-metered account or, when a new meter is added to an active account whose old meter had been recently removed (see the MR code).
			MQ	Metering Location Indicates that this NM1 loop contains a change to delivery point or meter related information unrelated to a meter addition, removal, or exchange. Used when a meter service attribute is changed or when erroneous meter numbers are corrected (for corrections, the NM1*MQ is used in conjunction with the REF*46 segment, which is used to send the incorrect meter number).
			MR	Medical Insurance Carrier

				Indicates a Meter Removal. This code is used when: one or more meters are removed from a multi-metered account; an account with a single meter is changed to UNMETERED or; a meter has been removed temporarily but the account remains active and another meter is added.
			MX	Juvenile Witness
				Indicates a Meter Exchange. This code value in this segment will be used in conjunction with a REF*46 segment, which will contain the old meter number, when there has been a meter exchange. This would include instances in which a meter is added to a previously un-metered account.
<b>Mand.</b>	<b>NM102</b>	<b>1065</b>	<b>Entity Type Qualifier</b>	<b>M ID 1/1</b>
			3	Unknown
				NM102 is an X12 required element.

This segment is sent to describe the measurement types and reporting intervals associated with the service delivery point(s) identified in the NM109 segment when a meter addition (NM01='MA'), a meter exchange (NM01='MX') or a change in existing meter data (NM01='MQ') is being reported. In some instances, a REF\*TU segment may be required in conjunction with the REF\*MT to adequately describe the consumption and reporting intervals for specific service end points.

REF~MT~KHMON  
 REF~MT~COMBO  
 REF~MT~TDMON  
 REF~MT~KH030

**Data Element Summary**

	<u>Ref. Des.</u>	<u>Data Element</u>	<u>Name</u>	<u>Attributes</u>
<b>Mand.</b>	<b>REF01</b>	<b>128</b>	<b>Reference Identification Qualifier</b> MT Meter Ticket Number Meter type. Used to identify the type of consumption measured by a meter and the interval between measurements or the type of consumption and reporting interval applicable to the un-metered service delivery points on the account.	<b>M ID 2/3</b>
<b>Cond.</b>	<b>REF02</b>	<b>127</b>	<b>Reference Identification</b> The type and reporting interval for consumption measurements are described in a five-character field. The first two characters are used to describe the type of consumption. The last three characters describe the reporting interval.  The literal "COMBO" is sent in the REF02 when the service delivery point(s) identified in the NM109 is capable of providing different measurement types and/or providing measurements for more than one time period in a day. When the REF*MT segment contains "COMBO" OR usage is being measured in timed intervals (e.g. on peak), multiple REF*TU segments are used to provide the measurement types and the daily time period(s) for each measurement the meter will provide, as well as the reporting intervals used for billing.	<b>X AN 1/30</b>

When only one measurement type is applicable to the metered or un-metered service points identified in the NM109 element, the REF02 in this segment should contain one of the following codes as the first two characters to describe the type of consumption:

K1 Kilowatt Demand (kW)  
K2 Kilovolt Amperes Reactive Demand (kVAR)  
K3 Kilovolt Amperes Reactive Hour (kVARH)  
K4 Kilovolt Amperes (kVA)  
K5 Kilovolt Amperes Reactive (kVAR)  
KH Kilowatt Hour (kWh)  
HH Hundred Cubic Feet (CCF)  
TZ Thousand Cubic Feet (MCF)  
TD Therms

The following codes are used in the last three characters of the REF02 to document the interval capabilities for the metered or un-metered service delivery point(s) identified in the NM109. If that capability is not known then the interval that should be reported is the scheduled meter reading interval.

BIM Bi-Monthly  
DAY Daily  
MON Monthly  
QTR Quarterly  
TOU Time of Use

001-999 - Reporting Intervals (e.g. 015 indicates 15 minute intervals, 060 indicates 60 minute intervals, etc.)

- 2 If either C04003 or C04004 is present, then the other is required.
- 3 If either C04005 or C04006 is present, then the other is required.

**Semantic Notes:**

- 1 REF04 contains data relating to the value cited in REF02.

**Notes:**

Utility Request: Conditional  
 ESCO Response: Not Used

ESCO Request: Not Used  
 Utility Response: Not Applicable

This segment is sent when there is a change in the manner in which usage will be measured on an account due to a meter addition, a meter exchange or a correction to previously reported data AND the "COMBO" code was sent in the REF\*MT segment OR usage is measured in time intervals.

REF~TU~51~KHMON } The service point identified in NM109 measures kilowatt  
 REF~TU~41~KHMON } hours monthly for four time intervals: Total, Off Peak,  
 REF~TU~42~KHMON } On Peak and Shoulder Peak.  
 REF~TU~43~KHMON }

**Data Element Summary**

	<u>Ref.</u>	<u>Data</u>	<u>Name</u>	<u>Attributes</u>
<u>Mand.</u>	<u>Des.</u>	<u>Element</u>	<u>Reference Identification Qualifier</u>	<u>M ID 2/3</u>
	REF01	128	TU Trial Location Code REF02 will contain a code that indicates the time of day for which measurements are obtained.	
Must Use	REF02	127	Reference Identification 41 Off Peak 42 On Peak 43 Intermediate Peak 51 Total/Totalizer Use "51" when:  The total of all consumption of the indicated type for all periods recorded by the meter indicated in the NM1 segment will be reported in the 867 transaction. For example, if only the total usage for a metered service point will be sent in the 867, the REF*TU segment should contain "51". When consumption will be reported by intervals on the 867 transaction, for example, off peak, on peak, and total then multiple REF*TU segments must be present with codes of "41","42" and "51" for the applicable metered service point.	X AN 1/30

**Must Use**    **REF03**    **352**    **Description**    **X**    **AN 1/80**

The REF03 element is used to associate the time of day intervals in REF02 with the measurement type and meter cycle frequency for the meter(s) indicated in the NM109 element.

For example, if a specific meter provides both kilowatt hours and demand measurements for peak and off peak intervals for a monthly reading period, multiple REF\***TU** segments would be sent as follows:

REF~**TU**~41~KHMON  
 REF~**TU**~42~KHMON  
 REF~**TU**~41~K1MON  
 REF~**TU**~42~K1MON

Valid values for REF03 for consumption types:

K1 Kilowatt Demand (kW)  
 K2 Kilovolt Amperes Reactive Demand (kVAR)  
 K3 Kilovolt Amperes Reactive Hour (kVARH)  
 K4 Kilovolt Amperes (kVA)  
 K5 Kilovolt Amperes Reactive (kVAR)  
 KH Kilowatt Hour (kWh)

Valid values for metering periods to be reported on an 867:

BIM Bi-Monthly  
 DAY Daily  
 MON Monthly  
 QTR Quarterly  
 TOU Time of Use

001-999 is used to report the number of minutes in an interval for an interval meter.

**Segment:** **REF** Reference Identification (ESCO Rate Code)

**Position:** 130

**Loop:** NM1 Optional (Dependent)

**Level:** Detail

**Usage:** Optional (Dependent)

**Max Use:** 1

**Purpose:** To specify identifying information

**Syntax Notes:**

- 1 At least one of REF02 or REF03 is required.
- 2 If either C04003 or C04004 is present, then the other is required.
- 3 If either C04005 or C04006 is present, then the other is required.

**Semantic Notes:**

- 1 REF04 contains data relating to the value cited in REF02.

**Notes:**

Utility Request: Not Used  
 ESCO Response: Not Applicable

ESCO Request: Conditional  
 Utility Response: Conditional

This segment must be sent by the ESCO to report a change in the ESCO Rate Code when the bill option is Utility Rate Ready consolidated billing and the ESCO charges are being calculated based on a rate code table. This segment may be echoed back in Utility Accept Responses at the discretion of the utility.

This segment may be accompanied by a DTM\*007 segment to communicate the effective date of the change in Rate Code when the applicable Utility has agreed to process such changes on a date other than the regularly scheduled bill cycle date.

## EXAMPLES

These examples are presented for illustrative purposes only. Although they are syntactically correct with respect to the published transaction standard for TS814 Change Request & Response, it should be understood that these examples reflect certain assumptions regarding optional and conditional data segments in this standard. Accordingly, these examples are not necessarily indicative of the manner in which a specific Utility or ESCO would map a specific transaction.

### *Scenario 1A: Utility Change Request – Correct Customer Name*
