

Orange and Rockland Utilities, Inc.
Case 07-E-0949
ALJ Questions Regarding Joint Proposal

37. With reference to transcript page (Tr.) 980, what is the Company's opinion of the proposal that commercial and public buildings be allowed to enter into net metering arrangements?

Response:

It is the Company's understanding that legislation will be enacted in the current legislative session that will allow and/or require a utility to net meter certain non-residential customers. Once this legislation is enacted, and the Company's corresponding tariff in place, the Company will provide net metered service as required.

38. If the Company supports such arrangements, what would be the best procedural avenue for accomplishing that goal?

Response:

Please see the Company's response to Question 37.
