Subcommittee Work Complete	Date:
Notes from Chair (if applicable):	
Notes from Staff (if applicable):	
<p>Task 1 – Version 2 of the New York Standard Approach for Estimating Energy Savings from Energy Efficiency Programs (Technical Resource Manual) was released and posted to website on December 10, 2014.</p> <p>Task 2 – Subcommittee provided input on the role/responsibilities of a third-party consultant to support the TRM/MCL. This input was documented in Staff’s Proposed Technical Resource Manual (TRM) & Measure Classification List (MCL) Consultant Scope of Services which was shared with the E2 Working Group on May 15, 2014. Subsequently, Staff determined it would not proceed with procuring a third-party consultant at this time, pending further clarity of Staff’s needs given the transitions expected under REV.</p> <p>Task 3 – Ongoing</p> <p>Task 4 - The Subcommittee has prioritized the following measures for it to review and modify based on submitted evaluation reports: small commercial lighting (pending SBDI EM&V Review Subcommittee Report); refrigerator recycling; and residential HVAC. Additionally, the subcommittee will address housekeeping for a list of measures that were in various stages of review, time permitting, including anti-condensation door heater controls, geothermal heat pumps, commercial showerheads, wi-fi thermostats, and unitary AC units. All revisions will be completed no later than June 1, 2015.</p>
