**REVISED NOTICE
ALL TELECOMMUNICATIONS CORPORATIONS
SUBJECT TO
COMMISSION REPORTING REQUIREMENTS**

In early January, 2000, notice was sent to all telecommunications corporations subject to Commission reporting requirements, reminding them of the need to file the Telecommunications Competition Monitoring Report (TCMR) by March 31, 2000, for the year ending December 31, 1999. This notice supersedes that earlier notice.

The Commission, at its session on February 9, 2000, approved a proposal to streamline the TCMR reporting requirements. This Order eliminates the TCMR filing requirement for many companies and reduces the amount of information required to be filed by the rest. Any questions concerning the information to be reported in the TCMR should be directed to Gerald DuPont at (518) 486-2805.

Attached is a Statement of Gross Intrastate Operating Revenues form for 1999. This form should be completed and mailed directly to the Department's Finance and Budget Office. If you have already filed an annual report for 1999, this form does not need to be returned.

CASE 96-C-0647 - Proceeding on Motion of the Commission to
Monitor the Development of Competition, filed
in C 94-C-0095.

ORDER ADOPTING MODIFIED
TELECOMMUNICATIONS COMPETITION MONITORING REPORT

(Issued and Effective February 18, 2000)

BY THE COMMISSION:

INTRODUCTION

In order to gather information for monitoring the development of competition within the state, we required most of the telephone companies operating in New York State to file annual Telecommunications Competition Monitoring Reports (TCMRs). It is now apparent that the TCMR filing requirements can be substantially reduced without materially affecting the Commission's ability to monitor competition. By this Order, we adopt a proposal by the Office of Communications to streamline the TCMR filing requirements by: (1) reducing the amount of information required to be filed in the TCMRs, and (2) exempting a broader range of companies from the TCMR filing requirements.

BACKGROUND

By Order issued and effective May 20, 1997, the Commission adopted Telecommunications Competition Monitoring Report (TCMR) filing requirements. This information gathering effort was designed to monitor the extent to which competition

has developed in various markets in New York; assess the competitive effectiveness of the markets in meeting its fundamental objectives; evaluate the impact on consumers of changing market conditions; and assist in the determination of future regulatory modifications or enhancements.

Under the terms of the Order, most of the telephone companies under the Commission's jurisdiction (local exchange carriers and resellers, as well as long distance carriers and resellers) are required to file TCMR reports by March 31 of each year. Incumbent local exchange carriers are exempt from the filing requirements, if less than 2% of the access lines in their territory are served by competing local exchange companies.

The information currently required in the annual TCMRs includes:

- Name and title of officer with custody of general books of accounts and address where books are kept.
- State of incorporation.
- List of all classes of service furnished.
- Copy of latest annual report to stockholders.
- List of affiliated companies.
- Income statement (operating revenues, expenses, and taxes).
- Network plant-in-service balances.
- Operating revenues.
- Retail local exchange lines and central office codes.
- Retail local exchange customers.
- Wholesale local exchange lines and unbundled network elements.
- Presubscribed access lines.

- Minutes of local, carrier access, and long distance usage.
- Operating expenses.
- Retail long distance billing information.
- Retail local access line billing information.
- Retail local usage billing information.
- List of counties served.

Most of the revenue, access line, and usage data is broken down geographically by LATA in order to reveal variations in the development of competition across the state. Companies that do not maintain this information by LATA are permitted to provide the information by area code or to provide estimates.

The information filed in the TCMR reports is used by the Office of Communications to prepare annual Competitive Analysis Reports to the Commission. Since the TCMR filing requirements were adopted in 1997, there have been two filing cycles (March 31, 1998 and March 31, 1999) and two Competitive Analysis Reports to the Commission, one in November 1998, and the other in October 1999.

DISCUSSION

In adopting the TCMR, the Commission was committed to streamlining reporting requirements to the extent possible in recognition of evolving competitive markets. Considerable progress has been made since 1997 in the transition to competition. The Department's recent decision to support Bell Atlantic-New York's application for entry into the long distance market is evidence of this progress. Based on these developments and our experience with the reporting requirements, the Commission finds that it is appropriate to reduce the TCMR filing requirements to comport more closely with current regulatory

needs and to fulfill our intention to streamline record keeping and reporting requirements where appropriate. Discussion of these changes follows.

1. Content Reductions

Of the information currently required to be filed in the TCMRs, the data that has been consistently furnished by companies and utilized in the Competition Monitoring Reports has been:

- List of all classes of service furnished.
- List of affiliated companies.
- Network plant-in-service balances.
- Operating revenues.
- Retail local exchange lines and central office codes.
- Retail local exchange customers.
- Wholesale local exchange lines and unbundled network elements.
- List of counties served.

The TCMR content will be scaled back to require only this information. Revenue and access line data will continue to be required by LATA in order to identify geographical variations in the development of competition. Companies that do not maintain this information by LATA will be permitted to provide the information by area code or to provide estimates.

The following TCMR filing requirements will be eliminated:

- Name and title of officer with custody of general books of accounts and address where books are kept.
- State of incorporation.

- Copy of latest annual report to stockholders.
- Income statement (operating revenues, expenses, and taxes).
- Presubscribed access lines
- Minutes of local, carrier access, and long distance usage.
- Operating expenses.
- Retail long distance billing information.
- Retail local access line billing information.
- Retail local usage billing information.

2. Reduced Applicability

Currently, the TCMR filing requirements apply to local exchange carriers, local service resellers, long distance carriers and long distance resellers. As explained above, incumbent local exchange carriers are exempt, if their competitors do not serve more than 2% of the access lines in their territories.

There is still a need to monitor facilities-based and resale competition in the local exchange carrier market because the incumbent local exchange carriers still retain a vast majority of the market share (in some cases 100%) and there is still little or no local competition in many areas of the state. We will continue the filing exemption available to incumbent local exchange carriers but will require them to file a letter affirmatively notifying the Commission that they are claiming the exemption.

On the other hand, the TCMR reporting requirements will no longer apply to long distance carriers and long distance resellers, because there is no longer a need to monitor the transition to competition in this segment of the industry. "Equal access" to alternative toll providers is almost

universally available in New York State, and there are no significant other regulatory or technical barriers to long distance competition. Moreover, in the case of long distance resellers, there are literally hundreds of such companies, and little meaningful TCMR information has been received from them.

CONCLUSION

A streamlined TCMR will enable the Commission to monitor the development of local exchange service competition, while relieving reporting burdens to the extent practicable. Accordingly, the TCMR, as modified herein, will be adopted.

The Commission orders:

1. The attached Telecommunications Competition Monitoring Report is adopted.
2. By March 31, 2000, and by March 31 of every succeeding year, each telephone corporation, unless specifically exempted therein, shall file such report, covering the immediately preceding calendar year.
3. This proceeding is continued.

By the Commission,

Frequently Asked Questions

1. Q. We had no revenues in 1999. Do I need to file a report?
 - A. You need only file a letter explaining that you are not filing a TCMR because your company had no revenues in 1999.
2. Q. We have no retail customers. We deal strictly in wholesale. Do I need to file a report?
 - A. Yes.
3. Q. We had no activity in some categories. Do I need to fill out those schedules?
 - A. Indicate the lack of activity by noting it, or through zeroes.
4. Q. My company does not keep track of its revenues by LATA. Can I report only the total company revenues?
 - A. By reporting total company revenues, it would not be possible to determine, with any degree of accuracy, where competition is occurring geographically. That was one of the reasons the TCMR requirement was established. Many companies reported that they keep revenues by area code. Area codes can be used as a surrogate for LATA boundaries (sometimes this will require combining data from two or more area codes). Example: 518 area code approximates the Albany LATA boundary; or 212/718/917/516, etc. combined would approximate the NY Metro LATA. This solution is preferable to providing only total company information.
5. Q. My company does not, at this time, have all data broken down by LATA, as called for in some schedules of the TCMR. What should I report?
 - A. You should provide what information is available until you are able to furnish what is asked for in the TCMR. Provide estimates, if possible, and indicate that they are only estimates. (See Question 4, above.)
6. Q. Should Inter-Region calls as part of the Regional Calling Plan in the Metro LATA be considered local calling?
 - A. Only home region calls would be considered local. Inter-Region calls should be considered long distance.

Applicability

The Telecommunications Competition Monitoring Report filing requirements apply to facilities-based local exchange carriers and to resellers of local exchange service. Exemptions from these filing requirements are available to certain incumbent local exchange carriers (see Section A, Part 2).

Do not include this sheet in the Annual Report you send to the Commission.

INSTRUCTIONS FOR TELECOMMUNICATIONS COMPETITION MONITORING REPORT

SECTION A

GENERAL INSTRUCTIONS

1. Filing Report

The completed report and one copy shall be filed with the Public Service Commission, Albany, N.Y. 12223-1350, on or before March 31st of the year following that to which the report applies. The corporation should retain a copy of the report in its files.

Entries of a reverse or contrary nature should be enclosed in parenthesis. If extra pages are necessary for further explanation of accounts or schedules, they should identify the schedule to which they relate and be the same size as the report.

2. Exemptions from TCMR Filing Requirements

Incumbent local exchange carriers are granted an exemption from filing the TCMR if the combination of 1) access lines provided on a wholesale basis (i.e., flat or measured rate local services provided to other carriers for resale and/or links leased to other carriers) and 2) access lines lost to facilities-based local exchange carriers does not exceed 2% of the company's total access lines. Companies claiming this exemption are required to notify the Commission by letter each year.

3. Proprietary Information

If the respondent considers any information requested on a schedule to be of a proprietary nature, as defined in Section 6-1.3(a) of Chapter 1 of the Rules of Procedure, the schedule as included in the report forms should be filed as directed by the Commission. However, the respondent is required to file one completed copy of each schedule deemed proprietary along with a request for proprietary treatment in accordance with the Rules of Procedure of Title 16 NYCRR, Chapter 1, Section 6-1.3(b).

4. Period of Report

If the period of the report is less than the calendar year, the period covered must be stated on the front cover and elsewhere throughout the report where the period covered is shown.

5. Completion of Schedules

Each question should be answered fully and accurately. "Non" or "not applicable" may be used as the answer to an inquiry or schedule where it states the fact. Where information called for herein is not given, state the reason for its omission.

Money items should be in units of dollars.

The name of the respondent and the year to which the report relates should be inserted at the top of each page.

6. Retention of Records

Records, worksheets, memorandum, etc. to substantiate all data and information contained herein shall be retained for a period of six years from the date of this report.

Do not include this sheet in the Annual Report you send to the Commission

INSTRUCTIONS FOR TELECOMMUNICATIONS COMPETITION MONITORING REPORT

SECTION B SCHEDULE REPORTING INSTRUCTIONS

1 Services Furnished

Instructions are contained in schedule.

2 Affiliated Companies

List all affiliated companies

3 Telecommunications Network Plant in Service

1. All carriers having investment in switching and/or cable and wire facilities must complete this schedule for investment located in New York State. Additionally, facilities located outside of New York State that are significantly utilized for service provided within the State should also be reported.
2. The category "Other Central Office Equipment" refers to investment in equipment other than switching equipment, such as operator systems, radio systems, and circuit equipment.
3. The category "Other C&WF" refers to investment in outside plant equipment other than cable, such as poles, towers, conduit and aerial wire.

4 Operating Revenues

1. Carriers must report retail local services revenues, by LATA, separately for residential and business services. Within each class of service, revenues must be further segregated between revenues derived from end-users for 1) the provision of local services using the carrier's owned and/or leased facilities and 2) the provision of local services on a resale basis.
Local service retail end-user revenues should include revenue derived from a) the provision of basic local area services such as flat rate and measured rate services, as well as local usage charges not included in basic monthly rates and b) the provision of custom calling and secondary features including, but not limited to, call forwarding, call waiting, touchtone and directory assistance services.
"Other" local retail service revenues include local retail revenues not accounted for elsewhere.
2. Carriers must report local "wholesale" service revenues derived from the provisioning of residential and business services provided to other carriers for resale and other wholesale services not provided for elsewhere.
Note: Wholesale unbundled network element revenues should be reported in the Miscellaneous Operating Revenues category.
3. Access service revenues derived from the provisioning of originating and/or terminating local, long distance and cellular access services to other carriers must be reported separately. "Other" access revenues include access revenues not accounted for elsewhere.
4. Long Distance revenues must be segregated between revenues derived from 1) the provision of retail long distance services to end-users using the carrier's owned and/or leased facilities, 2) the provision of retail long distance services to end-users on a resale basis and 3) wholesale long distance services provided to other carriers for resale. "Other" long distance revenues include long distance revenues not accounted for elsewhere.

Do not include this sheet in the Annual Report you send to the Commission.

**INSTRUCTIONS FOR TELECOMMUNICATIONS COMPETITION MONITORING REPORT
SECTION B
SCHEDULE REPORTING INSTRUCTIONS (continued)**

5. "Package" service revenues include revenues derived from telecommunications services that are bundled and offered at a single price (e.g., a package might include local, long distance, and cellular for \$100 per month). These revenues are not to be allocated back to the individual revenue categories, but must be reported in aggregate on this line.
 Note: A single service (e.g., local, long distance or cellular), offered with secondary services such as call forwarding and voicemail, does not constitute a package, as defined herein. Therefore, this revenue must be reported in the appropriate local or long distance revenue category.
6. "Other" service revenues include telecommunications services, regulated by this Commission, not specifically accounted for elsewhere.
7. Miscellaneous revenues, with the exception of wholesale unbundled network elements, need not be reported on a LATA basis, but should be reported for total New York State operations
 "Nonregulated" revenues include revenues derived from services not regulated by this Commission.
8. "Links" are defined as the facilities that run from the customer's premises to the vertical side of the MDF in the local exchange carrier's central office. In most instances, the facilities include, but are not limited to, the protector frame (a portion of the MDF), feeder/distribution cable, serving area interface/distribution terminal equipment and service wire or intrabuilding cable facilities.
9. "Ports" are defined as those facilities that actually connect the link to the first point of switching, with a unique network address (i.e., telephone or line equipment number).
10. "Other" bundled network element revenues include revenues derived from all remaining network elements, excluding links and ports.
11. Other Miscellaneous Wholesale Revenues include wholesale revenues not provided for elsewhere.

5A Retail Local Exchange Access Lines and NXXs

1. Carriers must report separately, by LATA, the number of retail residential and business access lines provided to end-users 1) using the carrier's owned and/or leased facilities and 2) on a resale basis.
2. Access lines are any and all facilities appearing at a customer's premise for which an access line charge is made as provided for in company tariffs.
3. "Public" includes access lines used to serve public, semi-public, COCOT and credit card telephones.
4. "Official" includes access lines utilized by the telephone company for official telecommunications business.
5. Private Line Circuits are telephone facilities furnished under contracts providing exclusive service, i.e., service not requiring central office switching equipment.
6. The number of Central Office Codes (NXXs) in use, by LATA, must be reported.

5B Retail Local Exchange Customers

1. Carriers must report separately for each LATA the number of retail local exchange customers being provided service 1) over the carrier's owned and/or leased facilities and 2) on a resale basis.
 Residential figures should include Lifeline customers
2. If actual records of customers are not available, number of bills rendered should be reported.
3. Carriers must indicate, in the boxes provided, whether the figures reported for residential and business customers represent actual customers or number of bills rendered.

5C Wholesale Local Exchange Service

1. Carriers must report for each LATA the number of wholesale access lines provided to other carriers. This includes, for example, access lines associated with the wholesale provisioning of residential and business, flat rate and message services. Carriers must also report the number of public access lines and private line circuits provided on a wholesale basis to other carriers. See instruction 6A for a description of access lines and private line circuits.

Do not include this sheet in the Annual Report you send to the Commission

INSTRUCTIONS FOR TELECOMMUNICATIONS COMPETITION MONITORING REPORT

SECTION B

SCHEDULE REPORTING INSTRUCTIONS (continued)

2. Carriers must also report the number of links and ports leased to other carriers, by LATA. See instruction 4 for a description of links and ports.

6 Counties Served

Carriers should place an "X" in the appropriate boxes to indicate those counties in which they are currently providing local residential and/or business service (only mark boxes for counties where company currently has customers).

1. SERVICES FURNISHED
