Note F: Upon adoption of an accrual plan of accounting, pension payments to employees retired before the adoption of such plan shall be charged to an existing pension reserve until such reserve is exhausted, unless the reserve is eliminated by payment of an equivalent amount into the pension trust fund.

926.2 Employee Welfare Expenses

A. This account shall include the expenses incurred in conducting employees' educational and recreational activities; the cost of

employees' relief and benefits (other than pensions, and injuries and damages chargeable to account 925, Injuries and Damages) and the cost of life insurance for employees when the utility is not the beneficiary.

B. This account shall not include any charges representing amounts used or to be used for the purchase of securities of the accounting company or any associated company, whether contributed by the accounting company or deducted from salaries and wages of employees, unless and until such amounts have actually been realized and paid to the employees in cash or its equivalent subject to their free disposition. To the extent that the securities thus purchased have an actual market value, the amounts paid for them may be carried meanwhile in account 128, Other Special Funds; otherwise such amounts shall be charged to account 426, Miscellaneous Income Deductions. (See general instruction ÷ 561.8.)

Note A: When the utility is the beneficiary of insurance on officers or employees, the cash surrender value shall be included in account 174, Miscellaneous Current and Accrued Assets, and the excess of cost of insurance over such cash surrender value shall be charged to account 426, Miscellaneous Income Deductions.

Note B: See subaccount 926.1, Note B.

Note C: Credit to this account the portion of welfare expenses which is applicable to nonutility operations or which is charged to construction and retirement work orders, and to clearing or other accounts unless such amounts are distributed directly to the accounts concerned in the first instance.

926.3 Pension and Welfare Administration

This account shall include the salaries of persons engaged in the administration of the pension and welfare department and the expenses incurred in such administration.

Note A: The cost of labor and related supplies and expenses of administrative and general employees who are only incidentally engaged in welfare and pension activities may be included in the accounts appropriate for their major duties.

Note B: Credit to this account the portion of the cost of the administration of the welfare and pension department which is applicable to amounts transferred to nonutility operations or which are charged to construction and retirement work orders or to clearing or other accounts, unless such administrative costs are distributed directly to the accounts concerned in the first instance.

927. Franchise Requirements

A. This account shall include payments to municipal or other governmental authorities, and the cost of materials, supplies and

services furnished such authorities without reimbursement in compliance with franchise, ordinance, or similar requirements; provided, however, that the utility may charge to this account at regular tariff rates, instead of cost, utility service furnished without charge under provisions of franchises. (See also account 302, Franchises and Consents.)

B. When no direct outlay is involved, concurrent credit for such charges shall be to account 929, Duplicate Charges-Credit.

C. The account shall be maintained so as to readily reflect the amounts of cash outlays, utility service supplied without charge, and other items furnished without charge.

Note A: Franchise taxes shall not be charged to this account but to account 408.1, Taxes Other Than Income Taxes, Utility Operating Income.

Note B: Any amount paid as initial consideration for a franchise running for more than one year shall be charged to account 302, Franchises and Consents.

928. Regulatory Commission Expenses

A. This account shall include all expenses (except pay of regular employees only incidentally engaged in such work) properly includible in utility operating expenses, incurred by the utility in connection with formal cases before regulatory commissions, or other regulatory bodies, or cases in which such a body is a party, including payments made to a regulatory commission for fees assessed against the utility for pay and expenses of such commission, its officers, agents, and employees.

B. Amounts of regulatory commission expenses which by approval or direction of the commission are to be spread over future periods, shall be charged to account 186, Miscellaneous Deferred Debits, and amortized by charges to this account.

C. The utility shall be prepared to show the cost of each formal case.

ITEMS

(1) Salaries, fees, retainers, and expenses of counsel, solicitors, attorneys, accountants, engineers, clerks, attendants, witnesses, and others engaged in the prosecution of, or defense against petitions or complaints presented to regulatory bodies, or in the valuation of property owned or used by the utility in connection with such cases.

(2) Office supplies and expenses, payments to public service or other regulatory commissions, stationery and printing, traveling expenses, and other expenses incurred directly in connection with formal cases before regulatory commissions.

Note A: Exclude from this account and include in other appropriate operating expense accounts, expenses incurred in the improvement of

service, additional inspection, or rendering reports, which are made necessary by the rules and regulations, or orders, of regulatory bodies.

Note B: Do not include in this account amounts includible in account 302, Franchises and Consents, account 181, Unamortized Debt Expense, or account 214, Capital Stock Expense. Expenses incidental to securing certificates of convenience and necessity from regulatory bodies shall be charged to account 302, Franchises and Consents. Costs and expenses incident to securing authorization for issuance of long-term debt or capital stock shall be charged to account 181, Unamortized Debt Expense, or account 214, Capital Stock Expense, as appropriate.

Note C: Do not include in this account costs incident to the acquisition of franchises, consents or certificates, or to construction or acquisition of water property, which are chargeable to the water plant accounts. Costs incurred in connection with property purchases shall be accounted for as provided in water plant instruction section 563.5. (See also account 183.)

Note D: Do not include in this account expenses in connection with investigations by legislative bodies or cases to which the utility is not a party.

Note E: The cost of maintaining continuing property records of water plant shall not be included herein but in other operation and maintenance expense accounts appropriate for the class of expenditure.

929. Duplicate Charges--Credit

This account shall include concurrent credits for charges which may be made to operating expenses or to other accounts of the utility for the use of utility service from its own supply. Include, also, offsetting credits for any other charges made to operating expenses for which there is no direct money outlay.

930. Miscellaneous General Expenses

A. This account shall include the cost of labor and expenses incurred in connection with the general management of the utility not provided for elsewhere.

B. This account shall be maintained or supported in such manner as to readily disclose the principal types of items included herein, as corporate and fiscal expenses, association dues, contributions, etc.

ITEMS

Labor:

(1) Miscellaneous labor not elsewhere provided for.

Expenses:

(2) Industry association dues for company memberships.

(3) Contributions for conventions and meetings of the industry.

(4) Research and development expenses not charged to other operation and maintenance expense accounts on a functional basis.

(5) Communication service not chargeable to other accounts.

(6) Trustee, registrar, and transfer agent fees and expenses. (See note B below.)

(7) Stockholders meeting expenses.

(8) Dividend and other financial notices.

(9) Printing and mailing dividend checks.

(10) Directors' fees and expenses.

(11) Publishing and distributing annual reports to stockholders.

(12) Institutional or goodwill advertising. (See note A below.)

(13) Public notices of financial, operating, and other data required by regulatory statutes, not including, however, notices required in connection with security issues or acquisitions of property.

Note A: The cost of any advertising for the purpose of influencing public opinion as to the election of public officers, referenda, proposed legislation, proposed ordinances, repeal of existing laws or ordinances, approval or revocation of franchises, or for the purchase of influencing the public or its elected officials, in respect to political matters shall not be included herein but charged to account 426, Miscellaneous Income Deductions.

Note B: Fees and expenses incurred in connection with original or additional issues of stocks or bonds shall be charged to account 214, Capital Stock Expense, or to account 181, Unamortized Debt Discount and Expense, as appropriate.

931.1 General Rents

This account shall include rent properly includible in water operating expenses covering the property of others used, occupied or operated in connection with the administrative and general functions of the utility; and also amounts payable for depreciation, taxes, interest or return, under joint facility agreements. (See operating expense instructions 567.3 and account 931.2.)

931.2. Expenses of Data Processing Equipment

This account shall include expenses properly includible in water operating expenses charged direct or through clearing accounts for costs covering the use of electronic data processing equipment and other mechanical equipment, whether owned or rented from others, in connection with the administrative and general functions of the utility. (See operating expense instruction 567.3 and account 931.1.)

Maintenance

932. Maintenance of General Plant

A. This account shall include the cost of maintenance of general plant. (See operating expense instruction ÷ 567.2.)

B. This account shall be subdivided as indicated below:

932.1 Maintenance of Structures

This account shall include the cost of maintenance of general buildings, the book cost of which is included in account 390, Structures and Improvements.

932.2 Maintenance of Office Furniture and Equipment

This account shall include the cost of maintenance of office furniture and equipment, the book cost of which is included in account 391, Office Furniture and Equipment.

932.3 Maintenance of Communication Equipment

This account shall include the cost of maintenance of communication equipment for general use in connection with the utility's operations, the book cost of which is included in account 397, Communication Equipment.

932.4 Maintenance of Miscellaneous Equipment

This account shall include the cost of maintenance of miscellaneous property not provided for elsewhere including miscellaneous general equipment, the book cost of which is included in account 398, Miscellaneous Equipment.

Note: Maintenance of plant included in other general equipment accounts shall be included herein unless charged to clearing accounts or to the particular functional maintenance expense account indicated by the use of the equipment.

Sec.

575.0 Order authorizing uniform system of accounts for classes C and D

575.1 Definitions

Section 575.0 Order authorizing uniform system of accounts for classes C and D. (a) The uniform system of accounts for waterworks corporations (classes C and D) is hereby prescribed for every waterworks corporation (as that term is defined in the Public Service Law) which has annual operating revenues from water operations of \$100,000 or more but less than \$700,000 subject to the jurisdiction of this commission, and every such waterworks corporation is hereby required, on and after July 1, 1987, to keep its records and accounts in conformity therewith.

(b) During the 12 months following the date on which said uniform system of accounts becomes effective, any such waterworks corporation may, for purposes of comparison, keep on its books, in addition to the accounts hereby prescribed, such portion or portions of its present accounts as may be deemed desirable by any such corporation.

(c) Each waterworks corporation for which this uniform system of accounts is prescribed shall classify, set forth and carry all assets, liabilities, capital stock and surplus existing as of the effective date of this uniform system of accounts, as prescribed in such system of accounts.

(d) As of the date a utility becomes subject to this system of accounts, it shall prepare opening entries in accordance with the following provisions:

(1) The accounts prescribed herein shall be opened by transferring thereto the balances carried in the accounts previously maintained. The company is authorized to make such subdivisions, reclassifications or consolidations of such balances as are necessary to meet the requirements of this system of accounts.

(2) The company shall prepare and keep as supporting records summary statements showing:

(i) the closing balances in each account carried on the books prior to the adoption of this system of accounts;

(ii) the journal entries to effect the transfer of those balances to the accounts prescribed herein, arranging such entries so as to show for each account or subdivision thereof from what account and to what account each amount was transferred; and

(iii) the resultant opening balance of each account under this system of accounts.

(3) The first annual report filed with this commission by a utility covering its operations subsequent to the adoption of this system of accounts shall include copies of statements referred to in paragraph (2) of this subdivision.

(e) In prescribing this system of accounts, the commission does not commit itself to the approval or acceptance of any item set out in any account, for the purpose of fixing rates or in determining other matters before the commission.

(f) The system of accounts prescribed by this Part shall become effective July 1, 1987, and shall be put into effect by each water corporation affected thereby on July 1, 1987.

.SO DOC 16C-575.1

NYCRR

575.1 Definitions. (a) When used in this system of accounts:

(1) Accounts means the accounts prescribed in this system of accounts.

(2) Associated companies means companies or persons that, directly or indirectly, through one or more intermediaries, control, or are controlled by, or are under common control with, the accounting company.

(3) Control (including the terms controlling, controlled by, and under common control with) means the possession, directly or indirectly, of the power to direct or cause the direction of the management and policies of a company, whether such power is exercised through one or more intermediary companies, or alone, or in conjunction with, or pursuant to an agreement, and whether such power is established through a majority or minority ownership or voting of securities, common directors, officers, or stockholders, voting trusts, holding trusts, associated companies, contract, or any other direct or indirect means.

(4) Commission or this commission means the Public Service Commission of the State of New York.

(5) Company. (See paragraph (9) of this subdivision.)

(6) Cost means the amount of money actually paid for property or services or the cash value at the time of the transaction of any consideration other than money. (See, however, water plant instruction section 577.1 of this Title.)

(7) Long-term debt means notes or other obligations having a life of more than one year from date of creation or assumption (except obligation representing advances from associated companies), and all unmatured bonds and receivers' certificates.

(8) Original cost as applied to water plant, means the cost of such property to the person first devoting it to public service.

(9) Person means an individual, a corporation, a partnership, an association, a joint-stock company, a business trust, or any organized group of persons, whether incorporated or not, or any receiver or trustee.

(10) Utility or utility company as used herein and when not otherwise indicated in the context, means any waterworks corporation. (See Public

Service Law.)

(11) Waterworks corporation. (See Public Service Law.)

.SO DOC 16C-576.1

NYCRR

Section 576.1 Classification of utilities. (a) For the purpose of applying the system of accounts prescribed herein, utilities are divided into two classes as follows:

Class C. Utilities having annual water operating revenues of \$400,000 or more but less than \$700,000. Such utilities shall keep all the accounts prescribed herein which are applicable to their operations.

Class D. Utilities having annual water operating revenues of \$100,000 or more but less than \$400,000. Such utilities shall keep all the accounts prescribed herein which are applicable to their operations, except those accounts in which the letter D does not appear in the prefix.

(b) The class to which any utility belongs shall be determined by the average of its annual water operating revenues for the three years next preceding the effective date of this system of accounts. If the average of its water operating revenues for the three years ended December 31st of any year following the effective date of this system of accounts is greater than the maximum specified for the class within which the utility has theretofore been included, such utility shall for the succeeding year keep the accounts prescribed for such higher class.

(c) Any utility, which because of its revenues falls within a given

class, may, at its option, adopt the system of accounts prescribed for a higher class. Notice of such action shall be promptly filed with the commission.

.SO DOC 16C-576.2

NYCRR

576.2 Records. (a) Each utility shall so keep its books of account, and all other books, records, and memoranda which support in any way the entries in such books of account, as to be able to furnish readily full information as to any item included in any account. Each entry shall be supported by such detailed information as will permit a ready identification, analysis, and verification of all the facts relevant thereto.

(b) The books and records referred to herein include not only accounting records in a limited technical sense, but all other records such as minute books, stock books, reports, correspondence, memoranda, engineering records, calculations, drawings, etc., which may be useful in developing the history of or facts regarding any transaction.

(c) Except as authorized by this commission, all operating, accounting, or financial papers, records, books, invoices, stubs, maps or documents or any papers or records which support entries to any of the accounts or which are necessary for an analysis shall be retained permanently. All such records shall be accessible, at all times, to the authorized representatives of the commission at a location within the State of New York.

(d) Subdivisions of any account in the system of accounts prescribed herein and clearing, temporary, or experimental accounts may be kept, provided that such subdivisions or additional accounts do not impair the integrity of the prescribed accounts. The titles of all subdivisions or subaccounts shall refer by number and title to the account or accounts of which they are subdivisions.

(e) All charges to the accounts prescribed in this system for water plant, income, operating revenues and operating expenses shall be just and reasonable and any payments by the utility in excess of just and reasonable charges shall be included in account 1538, Miscellaneous Income Deductions.

(f) The numbers prefixed to account titles are to be considered as part of the titles. Each utility may, however, adopt a different system of account numbers provided that the numbers herein prescribed shall appear in the descriptive headings of the ledger accounts. When the same account number is used in system of accounts prescribed for different classes of operations conducted by one utility, the initial letters W, G, E, O, R and S may be prefixed to identify the account with water,

gas, electric, omnibus rail line or steam heating, respectively.

Accounts for common utility plant and operations shall be designated by the word "common."

.SO DOC 16C-576.3

NYCRR

576.3 Accounting period. Each utility in Class C shall keep its books on a monthly basis, so that all transactions applicable thereto, as nearly as may be ascertained, shall be entered monthly in the books of the utility. Each utility in Class D shall keep its books on either monthly or quarterly basis; when the quarterly basis is used provisions contained herein relative to monthly entries shall be regarded as calling for quarterly entries. A trial balance shall be taken after the monthly or quarterly postings have been made, and each utility shall close its books at the end of each calendar year.

.SO DOC 16C-576.4

NYCRR

576.4 Submission of questions. To maintain uniformity of accounting, utilities shall submit questions of doubtful interpretation to the commission for consideration and decision. Utilities shall also ask for instructions, if occasion arises, regarding the accounting for such transactions as spreading over a number of months relatively large income or expense items which if included in the accounts for a single month would seriously distort the accounts; the disposition of items which relate to transactions which occurred prior to the current calendar year but which were not recorded in the books of account in the prior year and which are relatively so large that inclusion in the accounts for a single year would seriously distort the accounts; and expenditures for replacement of units of property leased from others. Ordinary delayed items shall be charged or credited to the same accounts which would have been charged or credited if the items had not been delayed.

.SO DOC 16C-576.5

NYCRR

576.5 Accounting to be on accrual basis. (a) The utility is required to keep its accounts on the accrual basis. This requires the inclusion in its accounts on an estimated basis of all known transactions of appreciable amount which affect the accounts, even though bills covering such transactions have not been received or rendered. When the bills are received or rendered, appropriate adjustments shall be made.

(b) Also when payments are made for items such as insurance, rents, taxes, or interest, the amount applicable to future periods shall be charged to account 1132, Prepayments, and spread over the periods to which applicable by credits to account 1132, Prepayments, and charges to the accounts appropriate for the expenditure.

.SO DOC 16C-576.6

NYCRR

576.6 Interpretation of lists of items. Lists of items appearing in the texts of the accounts or elsewhere herein are for the purpose of more clearly indicating the application of the prescribed accounting. The lists are intended to be representative, but not exhaustive. The appearance of an item in a list warrants inclusion of the item in the account mentioned only when the text of the account also indicates inclusion, inasmuch as the same item frequently appears in more than one list. The proper entry in each instance must be determined by the texts of the accounts.

.SO DOC 16C-576.7

NYCRR

576.7 Transactions with associated companies. (a) Each utility shall so keep its accounts and records as to be able to furnish accurately and expeditiously statements of all transactions with associated companies, showing the general nature of the transactions, the amounts involved therein and the amounts included in each account prescribed herein with respect to such transactions.

(b) Dividends, rebates, or earnings from associated companies or mutual service companies representing refunds of the excess charges made by such companies over the cost to them, shall be cleared through account 1901, Charges by Associated Companies--Clearing, and shall be credited so far as practicable to the same accounts to which the corresponding charges were made, including proper distinction between construction and operating expenses. Credits applicable to operating expenses which it is impracticable to allocate among the accounts to which the corresponding charges have been made, shall be to account 1806, Duplicate Charges--Credit.

.SO DOC 16C-576.8

NYCRR

576.8 Depreciation accounting.

(a) Depreciation, as applied to water plant, means the net loss in service value not restored by current maintenance, incurred in connection with the consumption or prospective retirement of water plant in the course of service from causes which are known to be in current operation and against which the utility is not protected by insurance. Among the causes to be given consideration are wear and tear, decay, action of the elements, inadequacy, obsolescence, changes in the art, changes in demand, and requirements of public authorities.

(b) Each utility shall record each month (see also general instruction ò 576.3) the estimated amount of depreciation on water plant accrued during that month, by crediting the appropriate subdivision of account 1250, Reserve for Depreciation of Utility Plant, and charging the

accounts for the depreciation expense as follows:

Account in Which Water Plant is Included	Subdivision of Account 1250 to be Credited	Account to be Charged
1101 Water Plant in Service	1250.1 Reserve for Depreciation of Water Plant in Service	1503 Depreciation (See notes hereunder.)
1102 Water Plant Leased to Others	1250.2 Reserve for Depreciation of Water Plant Leased to Others	1508.2 Expenses of Water Plant Leased to Others
1104 Water Plant Held for Future Use	1250.4 Reserve for Depreciation of Water Plant Held for Future Use	The question to be submitted to the commission
1106 Unclassified Water Plant	1250.6 Reserve for Depreciation of Unclassified Water Plant	1503 Depreciation (See note hereunder.)

Note A: To the extent that any water property is used in construction, the depreciation thereon shall be charged to account 1103, Construction Work in Progress; if clearing accounts are used, depreciation of plant (except structures) the maintenance and operation of which are charged to clearing accounts, shall be charged to such clearing accounts.

Note B: The accounting for depreciation of utility plant in other departments carried in account 1108, Other Utility Plant, which are subject to regulation by the commission shall be in accordance with the effective system of accounts applicable to such operations.

Note C: Depreciation accruals on "common" plant (see note B under heading "Utility Plant" in the Balance Sheet Accounts, *infra*) shall be currently distributed on an equitable basis to the departments making use thereof; the reserve applicable to common plant shall be carried by Class C utilities in subdivisions of account 1250, Reserve for Depreciation of Utility Plant, applicable to the plant account wherein the common plant is carried.

Note D: See also account 1250, Reserve for Depreciation of Utility Plant, and water plant instruction section 577.2.

.SO DOC 16C-576.9

NYCRR

576.9 Distribution of pay and expenses of employees. (a) The charges to water plant, operating expense and other accounts for services and expenses of employees engaged in activities chargeable to various accounts, such as construction and operations (or in more than one type of water operation, such as water source and distribution) shall be

based upon the actual time engaged in the respective classes of work, or, in case that method is impracticable, upon the basis of a study of the time actually engaged during a representative period.

(b) The pay and expenses of general officers shall be charged to the actual work on which they are engaged, to the particular operations over which they have direct supervision, or, if their jurisdiction is over the entire water operation, to the appropriate accounts provided in the administrative and general group in operating expenses.

(c) Except as otherwise specifically provided in this system of accounts or by order of the commission, no amounts for salaries or wages shall be included in charges to water plant, cost of removal, or water operating expenses, except employees' welfare and pension expenses includible in account 1800, Other General Expenses, which are not paid to employees affected subject to their free disposition. Payroll deductions made under a statute or order of a court; or for such purposes as group insurance, purchase of appliances or homes, etc., authorized by written order of the employee without coercion of any kind, may be included.

.SO DOC 16C-576.10

NYCRR

576.10 Accounting for other departments. This system of accounts is designed for use by water utilities. If the utility, in addition to its water operations, operates other departments, such as electric or gas, it shall keep such accounts for the other departments as may be prescribed by this commission, and in the absence of prescribed accounts, it shall keep such accounts as are proper or necessary to reflect the results of operating each such other department. It is not intended that proprietary and similar accounts which apply to the utility as a whole shall be departmentalized. (See also general instruction ò 576.2, subd. (f).)

.SO DOC 16C-576.11

NYCRR

576.11 Allocation of costs between water plant and operating expenses to be made currently. Each utility shall determine currently the costs which are applicable to the water plant accounts and in the case of costs involving allocations, the amount which is applicable to other accounts, such as operating expenses, taxes, depreciation reserve (cost of plant removal), other balance sheet accounts, and income or surplus accounts; the intent of this provision being that such costs shall be allocated to the accounts to which they are applicable when they are incurred.

.SO DOC 16C-576.12

NYCRR

576.12 Employee pensions and benefits. (a) All costs of employee

pensions and benefits, whether such costs represent pensions payable currently to retired employees or their beneficiaries, advance provision for future payments, or both, are includible in the charges of each accounting period, provided: (1) the pension program under which the costs are determined is reasonable, (2) amounts paid are irrevocably dedicated to pension purposes, and (3) any program of systematic advance provision is based on actuarial studies or other recognized and acceptable systematic method of computation and allocation. Pension payments and accruals are includible in account 1800, Other General Expenses; however, a utility may distribute to construction and retirement projects and to clearing and other accounts an applicable portion of the pension and benefits costs.

(b) No charge shall be made to any account in this system of accounts to reflect the advance provision for employee pension and benefits costs or to augment incomplete provision at a given date for amounts computed in relation to service prior to that date, unless full particulars of the program shall have been filed with the commission together with copies of supporting documents. Filings shall be promptly made also of any material changes in pension or other benefits programs, subsequent to the initial presentation to the commission. Acceptance by the commission of such data, as filed, shall not be interpreted as constituting approval of a pension and employee benefits program, or of documents associated therewith, or of any accounting made thereunder by the utility.

(c) The utility shall keep supporting records which will disclose as of the end of each accounting period:

(1) the amounts disbursed by the company during the period direct to pensioners or their beneficiaries;

(2) the amounts paid into the fund dedicated to future pension payments; and for each of such classes of disbursements, the accumulated total from the beginning of the year;

(3) the amount accumulated in the pension fund as provision for future pension payments; and

(4) at each year end the amount by which pension commitments under the plan as then in effect, even though subject to future amendment or termination, computed in relation to employee service to that date, (generally the "actuarial liability") exceed the amount in the pension fund.

.SO DOC 16C-PT577

NYCRR

PART 577

INSTRUCTIONS--WATER PLANT ACCOUNTS

(Statutory authority: Public Service Law, § 2 [26][27])

Sec.

577.1 Water plant to be recorded at original cost

577.2 Additions and retirements of water plant

577.3 Components of construction cost

577.4 Work order system required (Class C utilities only)

577.5 Transfers of property

577.6 Expenditures on property leased for use in water operations

.SO DOC 16C-577.1

NYCRR

Section 577.1 Water plant to be recorded at original cost. (a) All amounts included in subaccounts 1301-1336 of accounts 1101 to 1104 for water plant (except as otherwise provided in account 1302, Franchises and Consents) shall be the original cost (see definition § 575.1, subd. (a) (8)) of such water plant. (See also paragraphs B and C of account 1106.)

(b) When the term cost is used in the detailed water plant accounts (1301-1336), it shall mean the original cost unless otherwise specified and shall include not only the materials, supplies, labor, services and other items consumed or employed in the construction and installation of water plant, but also the cost of preliminary studies, plans, surveys, engineering, supervision, and general expenses, which contribute directly and immediately to water plant without duplication of such cost.

(c) When the consideration given for property is other than cash, the value of such consideration shall be determined on a cash basis. In the entry recording such transaction the actual consideration shall be described with sufficient particularity to identify it. The utility shall be prepared to furnish the commission the particulars of its determination of the cash value of the consideration, if other than cash.

(d) When property is purchased under a plan involving deferred payments, no charge shall be made to the water plant accounts for interest, insurance, or other expenditures occasioned solely by such form of payment.

(e) Water plant contributed to the utility or constructed by it from contributions to it of cash or its equivalent shall be charged to the water plant accounts at cost (see § 575.1, subd. (a) (6)) to the utility (i.e., original cost less the portion thereof contributed by, or on behalf of customers). Records shall be kept so that the utility can readily furnish information as to the source, purpose, and amount of each contribution, the property to which each contribution relates, and

the conditions, if any, upon which each contribution was made.

Note: Amounts received for construction which are ultimately to be refunded, wholly or in part, shall be credited to account 1241, Customer Advances for Construction. When the amount to be refunded has been finally determined, the balance, if any, remaining in account 1241 shall be debited thereto and credited to the water plant accounts to which the cost of the property was charged.

.SO DOC 16C-577.2

NYCRR

577.2 Additions and retirements of water plant. (a) For the purpose of avoiding undue refinement in accounting for additions to and retirements and replacements of water plant, all property shall be considered as consisting of units of property or retirement units and minor items.

Units of property means those items of water plant which are sufficiently distinct or important so that when they are retired with or without being replaced by other units of the same type or use, they are accounted for by crediting the amount at which they are carried on the books to the water plant account in which included. All other items are to be considered as minor items. These retirement units should not be confused with continuing property record units filed by utilities with annual operating revenues in excess of \$50,000; the latter are units for which the cost will be shown separately in the continuing property records. Whenever units of property are mentioned in this system of accounts, the term refers to retirement units and not to continuing property record units. Each utility may adopt its own list of units of property for the purpose of this instruction until such time as the commission shall prescribe a list of units.

(b) Units of property. (1) When a unit of property is added to water plant, the cost thereof shall be added to the appropriate water plant account.

(2) When a unit of property is retired from water plant (i.e., is removed, sold, abandoned, destroyed or otherwise ceases to be used or useful in water service), whether or not replaced by another unit of the same type or use, the amount at which it is carried on the books shall be credited to the water plant account in which it is included (determined in the manner set forth in subd. (d), below) and charged to the depreciation reserve provided for such property.

(c) Minor items of property. (1) When a minor item of property which does not replace a similar item is added to water plant the cost thereof shall be charged to the appropriate maintenance account and no entry shall be made in the water plant or depreciation reserve accounts.

(2) When a minor item is retired and replaced independently of the

unit of property of which it is a part, the cost of replacement shall be charged to the appropriate maintenance account and no entry shall be made in the water plant or depreciation reserve accounts.

(3) When a minor item the book cost of which does not exceed \$50 is retired and not replaced, if the book cost of such minor item is included with or spread over one or more units of property so that it will be accounted for through the retirement of such one or more units of property, no separate credit to the water plant account shall be made; otherwise, however, the book cost of such minor item shall be credited to the appropriate water plant account and charged to account 1250, Reserve for Depreciation of Utility Plant.

Note: For example, if a given length of main, including all fittings, valves, etc., is a unit and the cost of such section of main includes the cost of the fittings, valves, etc., no separate credit to the plant accounts shall be made when a fitting or valve (the book cost of which is less than \$50) is retired even though not replaced. Any labor in connection with the removal shall be charged to the appropriate maintenance account, and any salvage for material recovered shall be credited to the appropriate maintenance account.

(d) Determination of amount to be credited to plant accounts. Water plant retired shall be credited to the plant accounts at the amount at which such property is included therein, including all components of construction costs, such as engineering, supervision, interest and taxes during construction, etc. The amount shall be determined from the utility's records and if this can not be done, it shall be estimated. When it is impracticable to determine the amount carried on the books for each item, due to the relatively large number or small cost thereof, the average of such items, with due allowances for any differences in size, character, and year of installation (if known), shall be used.

(e) Land retired. When land is retired the amount at which it is carried on the books shall be credited to the appropriate land account. If the land is sold, the difference between the amount at which it is carried on the books and the sale price of the land (less commissions and other expenses of making the sale) shall be credited or debited to account 1250, Reserve for Depreciation of Utility Plant.

.SO DOC 16C-577.3

NYCRR

577.3 Components of construction cost.

(a) The cost of construction properly includible in the water plant accounts shall include, when applicable and when actually incurred, the cost of contract work, labor, materials and supplies, transportation, engineering and supervision, law expenditures, compensation and other

insurance and injuries and damages applicable to construction, taxes and interest during construction, permits and privileges, use of construction facilities, cost of keeping construction records, and other analogous elements applicable to the construction and acquisition of water plant. The costs includible in the principal items are:

(1) Contract work includes amounts paid for work performed under contract by other companies, firms, or individuals, costs incident to the award of such contracts, and the inspection of such work. The cost of work performed by the utility on projects when part of the work is performed by the utility itself and part is performed by others under contract shall be included as labor, materials, transportation, general administration, engineering services, etc.

(2) Labor includes the pay and expenses of employees of the utility engaged on construction work, and also workmen's compensation insurance, payroll taxes and similar items of expense.

(3) Materials and supplies includes the purchase price at the point of free delivery plus customs duties, excise taxes, the cost of inspection, loading and transportation, the related stores expenses and the cost of fabricated materials from the utility's shop. In determining the cost of materials and supplies used for construction, proper credit shall be made for unused materials and supplies, for materials recovered from temporary structures used in performing the work involved, and for discounts allowed and realized in the purchase of materials and supplies.

(4) Transportation includes the cost of transporting employees, materials and supplies, tools, purchased equipment, and other work equipment (when not under own power) to and from points of construction. It includes amounts paid to others as well as the cost of operating the utility's own transportation equipment.

(5) Engineering and supervision includes the portion of the pay and expenses of general officers, engineers, surveyors, draftsmen, inspectors, superintendents and their assistants applicable to construction work and the amounts paid to other companies, firms or individuals engaged by the utility to plan, design, prepare estimates, supervise, inspect, or give general advice and assistance in connection with construction work.

(6) Law expenditures includes the general law expenditures incurred in connection with construction and the court and legal costs directly related thereto.

(7) Interest during construction includes the net cost of borrowed funds used for construction purposes and a reasonable rate upon the

utility's own funds when so used. Interest during construction shall be charged to the individual job upon which the funds are expended and shall be credited to account 1536, interest Charged to Construction--Credit. The period for which interest may be capitalized shall be limited to the period of construction. No interest shall be included in these accounts upon expenditures for construction projects which have been abandoned.

(8) Taxes during construction includes taxes on physical property (including land) during the period of construction and other taxes properly includible in construction costs before the facilities become available for service.

Note: The cost of property includes the cost of preliminary surveys and studies and the cost of preparing plans and specifications at the time of construction for construction projects which are undertaken, and also the cost of keeping the construction accounts during the construction period, together with the cost of maps, books, files and other systems employed and permanently preserved in support of such construction costs. The cost of property does not include the cost incurred subsequent to the construction period of preparing, installing or maintaining maps, inventories, accounting and other financial records of property for use in the operation of a constructed plant, the cost of the preparation of inventories, appraisals, or other studies, nor costs incurred in the establishment or revision of accounting routine.

.SO DOC 16C-577.4

NYCRR

577.4 Work order system required (Class C utilities only). (a) Each utility shall record all changes, such as installations, additions, retirements or replacements in water plant used wholly or partly in water operations by means of a work order or job order system. Such work orders and supporting records shall be permanently preserved.

(b) All installations, additions, retirements, or replacements shall be covered by work orders. Standing work orders may be used for projects of less than \$250 each, such as for mains, services, and meters.

(c) The work order shall include the following particulars:

(1) A work order number;

(2) A description and the location of the work to be done (or the purchase to be made), the dates between which such work (or purchase) is to be accomplished, the date when the work was begun and the date when finished, the estimated cost of the project, together with maps, plans, diagrams, specifications, etc., applicable to the project;

(3) The accumulated charges applicable to each particular job or project and the total cost of the completed project; the cost of removal

shall also be shown. When any project involves charges to more than one account, the work order shall be so kept as to show the amount chargeable to each account. Every charge or credit on work orders shall refer to the voucher, journal, or other source from which the entry therein was made.

(d) The cost of completed projects shall be promptly transferred to the accounts to which chargeable.

Note: Requirement of the use of the work order system here outlined may be suspended by order of the commission in the case of a utility which satisfies the commission that the system which it has in use for recording changes in water plant accounts gives the equivalent detail by accounts in substantially the same form. The identification of expenditures with property must be complete and clear, and the detail of the cost of each project or job must be readily available.

.SO DOC 16C-577.5

NYCRR

577.5 Transfers of property.

(a) When property is transferred from one account for water plant to another, from one utility department to another, such as from water to electric, to or from accounts, 1101, Water Plant in Service, 1102, Water Plant Leased to Others, and 1104, Water Plant Held for Future Use, the transfer shall be recorded by transferring the book cost thereof from the one account, department or division to the other, and likewise any related amounts carried in the depreciation and amortization reserves and other accounts shall be transferred in accordance with the segregation of such reserves and other accounts. When property (except customers' meters) in connection with which installation costs have been incurred is physically transferred it shall be accounted for as provided in water plant instruction section 577.2.

(b) When property subject to depreciation is transferred from the water plant accounts to account 1110, Other Physical Property, the transfer shall be accomplished by crediting the water plant accounts and charging the depreciation reserve with the book cost of the item transferred; the depreciation reserve shall then be credited and account 1110, Other Physical Property, charged with the fair value of the property transferred.

.SO DOC 16C-577.6

NYCRR

577.6 Expenditures on property leased for use in water operations. (a) The cost of additions and betterments, excluding replacements by lessee of units of property installed by lessor, to property leased from others shall be charged to separate subdivisions of the water plant accounts appropriate for the class of property leased. Depreciation thereon shall

be computed on a basis consistent with the duration of the lease.

(b) The cost of initial repairs and rearrangements to adapt the property for use in water operations shall be charged to a subdivision of account 1132, Prepayments, and amortized over the life of the lease through credits to that account with concurrent debits to the rent account appropriate for the class of property involved.

(c) If, in the case of leased property, replacements of units of property installed by the lessor become necessary, the utility shall make application to the commission for instructions regarding the accounting procedure to be followed and shall submit full particulars of the nature and extent of the replacements.

(d) When expenditures on property leased from others for use in water operations are relatively minor, or the period of the lease is less than one year, the cost shall be charged to the account appropriate for the cost of repairs of such plant.

.SO DOC 16C-PT578

NYCRR

PART 578

INSTRUCTIONS--OPERATING REVENUE ACCOUNTS

(Statutory authority: General City Law, § 21-e)

Sec.

578.1 Purpose of operating revenue accounts

578.2 Basis of credits to operating revenue accounts

578.3 Commissions on water sales

578.4 Water supplied without direct charge

578.5 Water, steam or other power used by utility

.SO DOC 16C-578.1

NYCRR

Section 578.1 Purpose of operating revenue accounts. The operating revenue accounts (1601 to 1615.2) are designed to show the amounts of money which the utility becomes entitled to receive from furnishing water utility service and from service incidental thereto, including amounts for services rendered but not yet billed when the utility exercises its option to record in account 1133, Miscellaneous Current and Accrued Assets, such accrued water revenue.

.SO DOC 16C-578.2

NYCRR

578.2 Basis of credits to operating revenue accounts. Credits to the operating revenue accounts shall be made on the basis of the net tariff rates. Discounts forfeited for delayed payments shall be credited to account 1613, Customers' Forfeited Discounts. Corrections of overcharges and overcollections theretofore credited, authorized abatements and allowances, and other corrections shall be charged to the revenue accounts to which they relate.

.SO DOC 16C-578.3

NYCRR

578.3 Commissions on water sales. If the utility distributes all or a part of its water through an agent but the sales are made to customers under rate schedules filed by the utility, the utility shall credit its revenue accounts with the full amount of sales to customers. The commission paid to the agent shall be charged to account 1800, Other General Expenses, and any distribution expenses charged by the agent shall be debited to the appropriate expense accounts. Agents shall credit the amount of commissions earned to operating revenue account 1615.2, Miscellaneous Water Revenues.

.SO DOC 16C-578.4

NYCRR

578.4 Water supplied without direct charge. Water supplied to municipalities, or to other governmental units, without charge, in accordance with franchise and similar requirements, shall be charged to account 1805, Franchise Requirements, and credited concurrently to account 1806, Duplicate Charges--Credit.

.SO DOC 16C-578.5

NYCRR

578.5 Water, steam or other power used by utility. (a) If the utility desires to charge the appropriate accounts in any of its water operations with the cost of water, steam or other power used from its own supply, the credit therefor shall not be made to operating revenue accounts, but to account 1806, Duplicate Charges--Credit.

(b) Water supplied by the utility from its own supply to other departments shall be credited to account 1608, Interdepartmental Sales. Steam or other power supplied from the water plant to other departments shall be credited to account 1730, Power Transferred--Credit, except when such production of steam or other power is treated as a joint facility, in which case it shall be accounted for as provided in accounts 1808-1809.

ASSETS AND OTHER DEBITS

UTILITY PLANT

Note A: In accounts 1101, 1102, and 1104 for water plant are to be carried the totals of the detailed plant accounts 1301-1336 in which the utility's plant is required to be carried on the utility's plant ledger.

Note B: If the utility is engaged in more than one utility service, such as water, electric or steam, and any of its utility plant is used in common for several utility services or for other services, the original cost of such plant may be carried in a separate subdivision of the plant accounts, whereto the word "common" shall be suffixed to designate such property as common.

D 1100. Water Plant

This account shall include items provided for in accounts 1101 to 1104.

C 1101. Water Plant in Service

This account shall include the original cost of water plant owned and used and useful by the utility in the service of the public in its water operations. The original cost of such plant not owned, including additions to and betterments of property leased from others, shall be included in separate subdivisions of this account. (See water plant instruction ò 577.6.)

C 1102. Water Plant Leased to Others

This account shall include the original cost of water plant owned by the utility and leased to others as operating units or systems when the lessee has exclusive possession, such as an entire source of supply, distribution system, or office building.

C 1103. Construction Work in Progress

This account shall include the expenditures on water plant in process of construction but not ready for service at the date of the balance sheet.

C 1104. Water Plant Held for Future Use

This account shall include the original cost of water plant owned and held for future use in water service under a definite plan for such use. This includes property acquired but never used by the utility in water service, but held for such service in the future under a definite plan, and property previously used by the utility in water service, but retired from such service and held pending its reuse in water service in the future under a definite plan.

Note: Materials and supplies and meters held in reserve shall not be included in this account.

D C 1105. Water Plant Acquisition Adjustments

A. With respect to water plant acquired prior to the effective date hereof and still in service at that date, this account shall include (unless otherwise ordered by this commission) the difference between the amount carried on the books therefor as of the effective date hereof, and the original cost thereof when such difference is not clearly includible in any other account.

B. With respect to water plant acquired after December 31, 1938, as an operating unit or system by purchase, merger, consolidation, liquidation or otherwise, this account shall include (unless otherwise ordered by this commission) the difference between (a) the cost to the accounting utility of such water plant, and (b) the original cost thereof, less credits representing contributions (see paragraph B of account 1265, Contributions in Aid of Construction, and water plant instruction 577.1, subd. (e)), less the amount or amounts credited to the depreciation reserves of the accounting utility at the time of acquisition with respect to such water plant and less the amount in account 1265, Contributions in Aid of Construction.

C. Whenever practicable, this account shall be subdivided by Class C utilities according to the character of the amounts included herein and so as to show the amounts applicable to water plant in service, water plant leased to others, and water plant held for future use.

D. A record shall be kept of the amounts in this account for each

property acquisition after the effective date hereof.

E. With respect to the amount applicable to water plant acquired prior to the effective date hereof, and to each property acquisition thereafter, the utility shall notify the commission as to its program for depreciation, amortization, or other disposition of the amounts included in this account.

D C 1106. Unclassified Water Plant

A. Pending the classification of water plant at the effective date of this system of accounts in accordance with the accounts prescribed herein, as provided in paragraph B hereof, each utility shall maintain its present accounts with respect to such property which shall be summarized under the title of this account.

B. Not later than six months after the effective date hereof, each utility in Class C shall submit to the commission the entries it proposes to make to carry out the provisions of this system of accounts with reference to the original cost of its water plant as of the effective date hereof. It shall submit also a comparative balance sheet showing the accounts and amounts appearing in its books as of the effective date of this system of accounts and the accounts and respective amounts as of the same date after the proposed entries shall have been made.

C. Nothing herein stated shall be taken as permitting the recording as part of the original cost of water plant of amounts charged in previous years to operating expenses, operating taxes or other income or surplus accounts.

D. There shall also be included in a separate subdivision of this account (1) the cost of water plant acquired as an operating unit or system by purchase, merger, consolidation, liquidation or otherwise, pending the distribution thereof to the appropriate accounts in accordance with orders of this commission; and (2) the credit for the sale price of water plant constituting an operating unit or system sold, conveyed or transferred to another through sale, merger, consolidation, or otherwise, pending the completion of the accounting for the transaction and an order of this commission for the accounting of such sale.

D C 1108. Other Utility Plant

A. There shall be included under this caption the balances in accounts for utility plant other than water plant, as for example, electric, steam, etc.

B. A separate account shall be kept for each utility department.

Note: In the case of utility services for which systems of accounts

are prescribed by this commission, the appropriate accounts in such systems shall be used.

INVESTMENT AND FUND ACCOUNTS

D C 1110. Other Physical Property

A. This account shall include the cost to the utility of land, structures, and equipment owned by the utility and not includible in utility plant accounts (1100-1108).

B. The records supporting the entries to this account shall be so kept that the utility can furnish information as to the nature and cost of each kind of property, from whom it was acquired, its location, and its use.

D C 1114. Miscellaneous Investments and Special Funds

A. This account shall include assets, such as:

- (1) Investments in securities issued or assumed by others
- (2) Advances to others, except advances to associated companies (see account 1115) including interest accrued thereon
- (3) Assets held in sinking funds, depreciation funds, and other special funds, such as:
 - a. Cash
 - b. Securities issued by others or other assets, at cost except as provided in paragraphs C and D
 - c. Live securities, issued or assumed by the utility, at cost
 - d. Securities of the utility, issued to trustees without intervening sale, at face value
- (4) Special deposits for more than one year, such as for rent, performance of contracts, etc.

B. The records shall be so kept as to show the amount of each investment and the investment advances to each person.

C. Except as otherwise provided, the investments included in this account shall be recorded at cost at the time of acquisition. Cost does not include any amount paid for accrued interest or dividends. The utility may write down the cost of any investment in recognition of a decline in the value thereof, and if there be no reasonable prospect of substantial value it shall be written off or written down to a nominal value. Fluctuations in market value shall not be recorded but a permanent impairment in the value shall be recognized in the accounts. When investments are written off or written down the amount of the adjustment shall be charged to account 1538, Miscellaneous Income Deductions, or to account 1414, Miscellaneous Debits to Surplus, except that if a reserve has been created therefor, it shall be to such reserve account.

D. If securities with a fixed maturity date are purchased at a discount or at a premium, such discount or premium may be written off over the remaining life of the securities through periodic debits or credits to this account with concurrent credits or debits to account 1524, Interest Revenues.

Note A: Securities pledged shall be so indicated.

Note B: This account shall not include advances to or open accounts with associated companies. See account 1115, Owing by Associated Companies.

OWING BY ASSOCIATED COMPANIES

D C 1115. Owing by Associated Companies

A. This account shall include debit balances in all accounts with associated companies, and notes and drafts upon which associated companies are liable, together with interest thereon.

B. This account shall be so kept as to show for each associated company the amounts receivable on notes separately from amounts receivable on open accounts, and the due date of each item.

Note: The face amount of notes receivable from associated companies discounted or sold without releasing the utility from liability as endorser thereon, shall not be credited to this account, but to account 1221, Notes Receivable Discounted.

CURRENT AND ACCRUED ASSETS

D C 1120. Cash and Working Funds

This account shall include cash on hand and in bank and cash advanced to officers, agents, employees, and others as petty cash or working funds. Special cash deposits for payment of interest, dividends, or other special purposes shall be included in this account in separate subdivisions which shall specify the purpose for which each such special deposit is made.

Note: Deposits for more than one year shall not be charged to this account but to account 1114, Miscellaneous Investments and Special Funds.

D C 1124. Notes Receivable

This account shall include the cost of all collectible obligations in the form of notes receivable and similar evidences (except interest coupons) of money due on demand or within one year from the date of issue, which are not includible in other accounts.

Note A: Notes receivable from associated companies shall not be included herein but in account 1115, Owing by Associated Companies.

Note B: When notes receivable are discounted, sold or transferred, unless transferred without recourse, an entry shall be made debiting

account 1120, or other applicable accounts, and crediting account 1221, Notes Receivable Discounted. If notes receivable are placed in a bank for collection, no entry need be made therefor in the general ledger, but a memorandum entry to state the fact shall be made in the note record.

D C 1125. Accounts Receivable

A. This account shall include amounts due on open accounts from customers for utility services (including merchandising, jobbing and contract work) and from others than customers, except amounts due from associated companies.

B. Utilities shall subdivide this account to show separately (1) amounts due from customers, (2) amounts due from officers and employees (except working fund advances which are includible in account 1120, but including amounts due for utility service), and (3) amounts due from others.

D C 1131. Materials and Supplies

A. This account shall include the cost of unissued small tools and unapplied materials and supplies (except meters). The cost shall include, when practicable, the purchase price at the point of free delivery, plus customs duties, excise and other taxes on purchases, freight, insurance, costs of inspection, special tests prior to acceptance, loading and unloading, transportation and other directly assignable charges.

B. If inward transportation charges on materials are not included as a part of the cost of the particular materials to which they relate, they shall be charged to account 1810, Stores, Shop and Laboratory Expenses, unless account 1902, Stores Expenses--Clearing, is used, in which case they shall be therein included.

C. Cash or other discounts on materials shall be deducted, when practicable, in determining the cost of the particular material, or credited to the account to which the material is charged. Discounts which are not so handled shall be credited to account 1810, Stores, Shop and Laboratory Expenses, unless account 1902, Stores Expenses--Clearing, is used, in which case they shall be therein included.

D. Materials recovered in connection with construction, maintenance, or the retirement of property which are not intended to be reused, shall be designated as "scrap" and charged to this account at amounts which it is estimated will be realized therefrom; if they are intended to be reused, they shall be charged to this account at the average price at which like materials are carried, except that large individual items of equipment, such as purification plant equipment, shall be carried at

original cost.

E. When materials are issued for use, this account shall be credited with either the actual cost of the material issued or the average cost of all items of the same kind and size, not including "scrap" material. Scrap materials shall be credited to this account when sold or otherwise disposed of at the amount at which such materials were charged into the account. Account 1250, Reserve for Depreciation of Utility Plant, shall be adjusted for the difference between the amount charged hereto and the amount received therefor if material was recovered from retirement of property, and the appropriate maintenance account shall be adjusted if such material was recovered on maintenance work.

F. Inventories of materials and supplies shall be taken at least annually and the necessary adjustments shall be made to bring this account into harmony with the actual inventories. In effecting the adjustments, differences shall be equitably apportioned among the accounts to which materials have been charged since the preceding inventory, or included in account 1810, Stores, Shop and Laboratory Expenses, unless account 1902, Stores Expenses--Clearing, is used, in which case they shall be therein included.

D C 1132. Prepayments

A. When a payment is made in advance of the period to which the expenditure applies, the amount thereof shall be charged to this account. Each month or other accounting period to which the item applies an entry shall be made crediting this account and charging the appropriate account with its proper portion of the prepayment.

B. Representative items includible herein are prepaid insurance, rents (see water plant instruction 577.6), taxes and interest. The account shall be so kept or supported as to disclose the balance of each class of prepayments.

Note: For example, an insurance premium amounting to \$1200 is paid on a policy running for a year in the future. The amount of the premium shall be charged to this account, and each month or other accounting period, entries shall be made transferring from this account to the appropriate operating expense or other account the portion of the premium which is applicable to the period.

D C 1133. Miscellaneous Current and Accrued Assets

This account shall include the following classes of items:

- (1) Interest, dividends and rents receivable, except from associated companies
- (2) Estimated amounts accrued to the utility for service rendered but not billed as of the end of any accounting period (This is optional.)

(3) Cash surrender value of life insurance policies under which the utility is the beneficiary (See note to account 1800, Other General Expenses.)

(4) Other assets not includible in accounts 1120 to 1132, or 1115, which are readily convertible into cash or are held for current use in operations or construction

DEFERRED DEBITS

D C 1140. Unamortized Debt Discount and Expense

A. Discount on bonds or other debt is the excess of the face value of the securities plus interest accrued at the date of sale over the cash value of the consideration received from their sale; when the amount (or cash value of the consideration) received, exceeds the face value and accrued interest, the excess is the premium. Expenses incurred in connection with the issue are items such as fees for drafting mortgages, taxes and fees for issuing and recording, commissions or fees paid for selling bonds, cost of obtaining governmental authorization, etc.

B. When discount and expenses are incurred on an issue of long-term debt (see § 575.1, subd. (a) (7)) or when expenses on an issue are greater than the premiums on such issue, the amount thereof shall be included in this account. A separate subdivision shall be kept for each class and series of long-term debt.

C. The discount and expense (or expense less premium if a net debit) on each issue shall be written off over the life of the issue to which it applies under a plan that will equitably distribute the amounts over the life of the bonds or other long-term debt. This may be done by monthly charges to account 1531, Amortization of Debt Discount and Expense, and credits to this account. The utility may, however, charge off discount and expense (or expenses less premium if a net debit) over a shorter period by charges to account 1414, Miscellaneous Debits to Surplus.

D. When bonds or other long-term debt are reacquired, any balance included in this account representing discount and expense (or expense less premium if a net debit) on the reacquired debt shall be credited to this account and debited to account 1414, Miscellaneous Debits to Surplus. The difference between the face value of the bonds or other long-term debt and the amount for which they were reacquired shall be carried to Surplus. (See also account 1153, Reacquired Long-term Debt.)

D C 1146. Miscellaneous Deferred Debits

A. This account shall include the following classes of items:

(1) Expenditures for preliminary surveys, plans, investigations, etc., made for the purpose of determining the feasibility of projects under

contemplation. If construction results, this account shall be credited with the amount applicable thereto and the appropriate water plant accounts shall be charged with an amount which does not exceed the expenditures which may reasonably be determined to contribute directly and immediately and without duplication to water plant. If the work is abandoned, the charge shall be to account 1538, Miscellaneous Income Deductions, or account 1414, Miscellaneous Debits to Surplus, unless otherwise authorized or directed by this commission.

(2) Extraordinary property losses which require abandonment or retirement of property in advance of adequate provision therefor through reserves or otherwise, such as destruction by floods, condemnation for public use, etc. When such losses are incurred the utility shall make application to this commission to prescribe the accounting therefor and shall submit all the relevant facts concerning the case.

(3) Undistributed balances in clearing accounts (see accounts 1901 to 1905) at the date of the balance sheet. Balances in clearing accounts shall be substantially cleared not later than the end of the calendar year unless items held therein relate to a future period.

(4) Balances representing expenditures for work in progress other than on utility plant. This includes jobbing and contract work in progress.

(5) Other debit balances, the proper final disposition of which is uncertain, and unusual or extraordinary expenses, not included in other accounts, which are in process of being written off.

B. The records supporting the entries to this account shall be so kept that the utility can furnish full information as to each deferred debit included herein.

CAPITAL STOCK EXPENSE

D C 1151. Capital Stock Expense

A. There shall be reported by this caption all balances in the accounts for expenses incurred in connection with the issuance and sale of capital stocks.

B. The accounts hereunder shall be so kept as to show separately the expense on each class and series of capital stocks.

C. Credits made to this account to write off capital stock expense (if the utility desires to write off such expense) shall be offset by debits to account 1414, Miscellaneous Debits to Surplus.

D. When capital stock is reacquired, this account shall be credited and account 1414, Miscellaneous Debits to Surplus, shall be charged with the amount of expenses included herein applicable to such reacquired stock.

REACQUIRED SECURITIES

D C 1152. Reacquired Capital Stock

A. This account shall include the par value of capital stock which had been issued by the utility and is reacquired by it and not retired or canceled, but is held by the utility. Stock without par value shall be included in this account at the proportionate amount at which the particular class and series of stock is included in account 1200, Common Capital Stock, or account 1201, Preferred Capital Stock.

B. The difference between the amount paid for capital stock reacquired and the amount at which such reacquired stock is charged to this account in accordance with paragraph A, above, shall be carried to account 1401, Miscellaneous Credits to Surplus, or account 1414, Miscellaneous Debits to Surplus, as appropriate, to which shall also be transferred any premium or expenses applicable to the capital stock reacquired.

C. When reacquired capital stock is retired or canceled, this account shall be credited and account 1200 or 1201, as applicable, shall be charged with the amounts at which such stock is included therein. When reacquired capital stock is resold by the utility (see section 89-f of Public Service Law), the par value (or amount included in this account for stock without par value) of the stock resold shall be credited to this account.

D. This account shall be so kept or supported as to show the amount herein applicable to each class and series of stock.

D C 1153. Reacquired Long-term Debt

A. This account shall include the par or face value of bonds or other long-term debt which had been issued or assumed by the utility and is reacquired by it and held under conditions which do not permit the utility to treat such securities as paid, retired, or canceled, but which permit the resale of the securities (see section 89-f of Public Service Law). It shall not include securities which are held by trustees in sinking or other funds.

B. The difference between the amount paid for bonds or other long-term debt reacquired and their par or face value shall be debited or credited, as appropriate, to account 1414, Miscellaneous Debits to Surplus, or 1401, Miscellaneous Credits to Surplus, to which shall also be transferred any discount, premium or expense applicable to the reacquired bonds or other long-term debt.

C. When reacquired bonds or other long-term debt are resold by the utility (see section 89-f of Public Service Law), the par or face value thereof shall be credited to this account. When reacquired bonds or other long-term debt are retired or canceled, this account shall be credited and the appropriate long-term debt account shall be charged

with the par or face value thereof.

D. This account shall be so kept or supported as to show the amount herein applicable to each class and series of long-term debt.

LIABILITIES AND OTHER CREDITS

CAPITAL STOCK

D C 1200. Common Capital Stock

D C 1201. Preferred Capital Stock

A. These accounts shall include the par value of capital stock with par value and the cash value of the consideration received for non-par stock, of each class of capital stock which has been issued and is outstanding, and also the capital stock in account 1152, Reacquired Capital Stock.

B. When the actual cash value of the consideration received is more than the par value of any stock having par value, the excess shall be credited to account 1203, Premiums and Assessments on Capital Stock.

C. When capital stock is retired and canceled, these accounts shall be charged with the amount at which such stock is carried herein.

D. A separate ledger account, with a descriptive title, shall be kept for each class and series of stock. The supporting records shall show the shares in the hands of the public and those reacquired by the company and not resold.

Note A: When a levy or assessment, except a call for payment on subscriptions, is made against holders of capital stock, the amount collected upon such levy or assessment on capital stock with par value shall be credited to account 1203, Premiums and Assessments on Capital Stock, and a levy or assessment on capital stock without par value shall be included in these accounts.

Note B: No entries, other than those covered by the above provisions and those to record liquidating dividends, shall be made in any account for non-par stocks, except upon order of this commission.

D C 1203. Premiums and Assessments on Capital Stock

A. This account shall include the excess of actual cash value of the consideration received over the par value and accrued dividends, of par value stock issued, together with assessments against stockholders representing payments required in excess of par value. (Assessments on stock without par value shall be included in account 1200 or 1201, as appropriate.)

B. A separate account shall be kept for premiums and assessments on each class and series of par stock.

C. When capital stock is reacquired or retired, the amount in this account with respect to the shares of such stock reacquired or retired

shall be debited hereto.

D C 1205. Installments Received on Capital Stock

A. This account shall include the amount of installments received on capital stock subscribed for on a partial or instalment payment plan.

B. As subscriptions are paid in full and certificates issued, this account shall be charged and account 1200, Common Capital Stock, account 1201, Preferred Capital Stock (if reacquired stock is resold), credited with the par value of such capital stock having par value, and with the consideration received for capital stock without par value. Premiums on capital stock with par value shall be transferred to account 1203, Premiums and Assessments on Capital Stock.

Note: The records supporting the entries to this account shall be so kept that the corporation can furnish the name and address of each subscriber, the amount and kind of capital stock subscribed, the date of subscription, the date that each is paid, the nature of each payment (whether cash or other consideration) and any other information that is necessary to make the history of the subscription complete.

NON-CORPORATE PROPRIETORSHIP

D C 1206. Non-corporate Proprietorship

This account shall include the investment in an unincorporated utility by the proprietor thereof, and shall be charged with all withdrawals from the business by its proprietor. At the end of each calendar year the net income for the year as developed in the income account shall be transferred to this account. There shall also be entered in this account such items as in corporate organizations are handled through Surplus. (See optional accounting procedure provided in note C hereunder.)

Note A: Amounts payable to the proprietor as just and reasonable compensation for services performed shall not be charged to this account but to appropriate operating expense or other accounts.

Note B: When the utility is owned by a partnership, a separate account shall be kept to show the net equity of each member therein and the transactions affecting the interest of each such partner.

Note C: This account may be restricted to the amount considered by the proprietor to be the permanent investment in the business, subject to change only by additional investment by the proprietor or the withdrawal of portions thereof not representing net income. When this option is taken the surplus accounts shall be maintained and entries thereto shall be made in accordance with the texts thereof.

LONG-TERM DEBT

D C 1210 Bonds

This account shall include the face value of unmatured bonds which

have been issued and have not been retired or canceled; also the face value of such bonds issued by others the payment of which has been assumed by the utility. The account shall be so kept as to show the face value of each class and series outstanding.

Note A: The accounting for discount, expense, and premium on long-term debt, is set forth in accounts 1140, Unamortized Debt Discount and Expense, and 1240, Unamortized Premium on Debt.

Note B: Matured long-term debt shall be included in account 1225, Matured Long-term Debt.

D C 1211. Receivers' Certificates

A. This account shall include the face value of certificates of indebtedness issued by receivers in possession of the property and acting under the orders of a court.

B. A separate subdivision shall be kept for each issue of receivers' certificates.

Note: Matured receivers' certificates shall be included in account 1225, Matured Long-term Debt.

D C 1213. Miscellaneous Long-term Debt

A. This account shall include until maturity all notes or other obligations (except advances from associated companies) having a life of more than one year after issue or assumption. This includes such items as real estate mortgages, executed or assumed, assessments for public improvements due later than one year after date, etc.

B. Separate accounts shall be kept for each class of obligation, and records shall show separately for each class all details as to date of obligation, date of maturity, interest dates and rates, security for the obligation, etc.

Note: Matured long-term debt shall be included in account 1225, Matured Long-term Debt.

DEBTS TO ASSOCIATED COMPANIES

D C 1214. Debts to Associated Companies

This account shall include all amounts owed to associated companies on notes, drafts, acceptances or other similar evidences of indebtedness and open accounts payable, and also interest on obligations included herein, and shall be so kept as to show separately the amount payable to each associated company on (1) notes, (2) open accounts.

CURRENT AND ACCRUED LIABILITIES

D C 1220. Notes Payable

This account shall include the face value of all notes, drafts, acceptances, or other similar evidences of indebtedness to other than associated companies, payable on demand or which by their terms are

payable within a time not exceeding one year from the date of issue.

D C 1221. Notes Receivable Discounted

This account shall include the face amount of notes receivable discounted or sold without releasing the utility from liability as endorser thereon.

D C 1222. Accounts Payable

This account shall include all open accounts payable by the utility within one year and which are not provided for in other accounts.

D C 1224. Dividends Declared

This account shall include the amount of dividends which have been declared but not paid. Dividends shall be credited to this account when they become a liability.

D C 1225. Matured Long-term Debt

When any debt carried in account 1210, Bonds, 1211, Receivers' Certificates, or 1213, Miscellaneous Long-term Debt, matures but is not paid or for which no specific agreement for extension of the time of payment is made, it shall be transferred to this account; bonds called for redemption but not presented, shall also be included herein.

D C 1227. Customers' Deposits

This account shall include all amounts deposited with the utility by customers as security for the payment of bills.

D C 1228. Taxes Accrued

A. This account shall be credited each month with the amount of taxes applicable thereto when payment of such taxes is to be made in a subsequent period. Concurrently, debits shall be made to the appropriate accounts for tax charges. In the absence of precise information as to the amount of the tax the monthly credits to this account will necessarily be based upon estimates; when the actual amount of the tax becomes known, the amounts of the periodic accruals shall be adjusted so as to include as nearly as can be determined in each year the taxes applicable thereto.

B. The records supporting the entries to this account shall be so kept that the utility can furnish information as to the amount of each class of taxes accrued, the basis for each tax accrual, the accounts to which charged, and the amount of each class of taxes paid.

D C 1229. Interest Accrued

This account shall include the amount of interest accrued on long-term debt and other liabilities of the utility, except interest on debt to associated companies, which shall be included in account 1214, Debts to Associated Companies, and except interest which is added to the principal of the debt on which incurred.

Note: This account shall be so kept as to show the amount of matured interest on each obligation.

D C 1230. Other Current and Accrued Liabilities

This account shall include liabilities of a current character (those which are either matured at the date of the balance sheet or become due on demand or within one year from date of issuance or assumption except bonds, receivers' certificates, and debts to associated companies) or which have accrued but are not payable at the date of the balance sheet, other than those for which accounts 1220 to 1229 have been provided.

DEFERRED CREDITS

D C 1240. Unamortized Premium on Debt

A. This caption shall include credit balances representing the premiums less expenses, when a net credit, on each issue of long-term debt, including receivers' certificates. (See account 1140 for definitions of premium and debt expense.)

B. The net credit of the premium less expense on each issue shall be written off over the life of the issue under a plan that will equitably distribute the amounts over the life of the securities by debits to this account and credits to account 1532, Amortization of Premium on Debt--Credit.

C. When bonds or other long-term debt are reacquired, any balance included in this account representing premium (less expense) on the debt shall be wiped out by a debit to this account and a credit to account 1401, Miscellaneous Credits to Surplus. (See also account 1153, Reacquired Long-term Debt.)

D C 1241. Customer Advances for Construction

A. This account shall include such advances by customers for construction as are to be refunded wholly or in part. When a customer is refunded the entire amount to which he is entitled according to the agreement or rule under which the advance was made, the balance, if any, remaining in this account shall be debited hereto and credited to the water plant accounts to which the cost of the property was charged.

B. In each accounting period (see general instruction 576.3), this account shall be charged and account 1615.2, Miscellaneous Water Revenues, credited with amounts deductible for depreciation on property for which the advances were made to the extent that the liability of the utility to make refunds is reduced because of such depreciation on the property.

C. Separate subdivisions shall be kept for each utility service.

D C 1242. Other Deferred Credits

This account shall include advanced billings and receipts and other

deferred credit items not provided for elsewhere; also amounts which can not be entirely cleared or disposed of until additional information has been received, or which should be credited to income or to surplus accounts in the future.

RESERVES

D C 1250. Reserve for Depreciation of Utility Plant

A. This account shall be credited with the following:

(1) Amounts representing currently accruing depreciation on utility plant (See general instruction ð 576.8.)

(2) Amounts charged to account 1414, Miscellaneous Debits to Surplus, for past accrued depreciation of utility plant

(3) Accrued depreciation upon utility properties acquired as operating units or systems

(4) Amounts charged upon approval of the commission to account 1146, Miscellaneous Deferred Debits

B. Class D C utilities shall subdivide this account as follows:

C 1250.1 Reserve for Depreciation of Water Plant in Service

C 1250.2 Reserve for Depreciation of Water Plant Leased to Others

C 1250.4 Reserve for Depreciation of Water Plant Held for Future Use

C 1250.6 Reserve for Depreciation of Unclassified Water Plant

C 1250.8 Reserve for Depreciation of Other Utility Plant

C. Class C utilities shall keep further subdivisions of the foregoing accounts to show the amounts applicable to each water plant account (1302-1336); and also subdivisions for "common" plant.

D. This account shall be charged with the amount carried on the books for plant retired (except items in account 1301, Organization) and with the cost of removal, and shall be credited with the salvage realized and any other amounts recovered, such as insurance. (See also item 2 of account 1146, Miscellaneous Deferred Debits.)

E. The reserves shall be so kept as to show separately for each subdivision (1) the amount of the accrual for depreciation, (2) the amount at which property retired was carried on the books, (3) cost of removal, (4) salvage, and (5) other items, including recoveries from insurance.

Note: The utility is restricted in its use of the reserve to the purposes set forth above. It shall not divert any portion of the reserve to Surplus or make any other use thereof without the approval of this commission.

D C 1252. Reserve for Amortization of Water Plant Acquisition Adjustments

This account shall be credited (or debited) with amounts which are

charged (or credited) to account 1505, Amortization of Water Plant Acquisition Adjustments, to account 1538, Miscellaneous Income Deductions, or to Surplus, for the purpose of providing for the extinguishment of amounts carried in account 1105, Water Plant Acquisition Adjustments.

D C 1254. Reserve for Uncollectible Accounts

This account shall be credited each month with estimated amounts required to provide for losses on accounts receivable which may become uncollectible, and also with collections on accounts previously charged hereto. Concurrent charges shall be made to account 1783, Uncollectible Accounts, for amounts applicable to water operations, and to corresponding accounts for other operations.

Note: Accretions to this reserve shall not be made in excess of a reasonable provision against losses of the character provided for.

D C 1255. Reserve for Insurance, Injuries and Damages

A. This account shall be credited, and account 1798, Insurance, Injuries and Damages, or other appropriate account, charged each month with amounts which the utility estimates are required for self-insurance against losses through accident, fire, flood, or other hazards to its own property or property leased from others, and for probable liability, not covered by insurance, for deaths or injuries to employees and others, and for damages to property not owned or held under lease. A schedule of risks covered by this reserve shall be maintained, giving a description of the property involved, the risks covered, and the rates used.

Charges shall be made to this account for:

(1) Losses to property owned or leased from others, covered by self-insurance

(2) Liability for any injury or damage which is admitted by the utility either voluntarily or because of the decision of a court or other lawful authority, such as a workmen's compensation board; the amount of the liability pending its payment shall be credited to the appropriate liability account

Note A: Accretions to this reserve shall not be made in excess of a reasonable provision against losses of the character provided for.

Note B: Recoveries or reimbursements for losses charged to this account shall be credited hereto.

D C 1258. Miscellaneous Reserves

A. This account shall include all reserves which are not provided for elsewhere in this system of accounts, such as reserves for pensions, accident and death benefits, relief or other provident purposes, etc.,

and for depreciation of property carried in account 1110, Other Physical Property.

B. This account shall be so kept as to show the amount of each separate reserve and the nature and amounts of the debits and credits hereto.

D C 1265. Contributions in Aid of Construction

A. This account shall include those contributions for construction purposes made prior to January 1, 1947 in cash, services of property by states, municipalities or other governmental agencies, individuals and others which have not been transferred to other accounts.

B. Amounts in this account at December 31, 1946 which are refundable wholly or in part shall be transferred to account 1241, Customer Advances for Construction. Unless otherwise ordered by the commission, non-refundable amounts in this account at December 31, 1946 which can be identified with property in water plant accounts shall be transferred to the appropriate accounts. Amounts not identified with property in water plant accounts may be distributed to water plant accounts under a plan approved by the commission; otherwise the amounts remain in this account. Except as provided herein, amounts in this account shall not be transferred to any other account without the approval of the commission.

C. The records supporting the entries to this account shall be so kept that the utility can furnish information as to the purpose of each contribution, the conditions, if any, upon which it was made, and the amount of contributions from (a) states, (b) municipalities, (c) customers, and (d) others.

D. This account shall be subdivided according to departments (water, electric, steam, etc.) of the utility.

SURPLUS

D C 1271. Surplus

This account shall include the total of balances of accounts 1400 to 1414. The balance may be either a credit or a debit.

WATER PLANT ACCOUNTS

C 1301. Organization

C 1302. Franchises and Consents

C 1303. Miscellaneous Intangible Plant

D 1311. Land

C 1311.1 Source of Supply Land and Water Rights

C 1311.2 Power, Pumping and Purification Land

C 1311.5 Transmission and Distribution Land

C 1311.9 General Land

C 1312. Structures

- C 1312.1 Source of Supply Structures
- C 1312.2 Power and Pumping Structures and Purification Buildings
- C 1312.5 Distribution Reservoirs and Standpipes
- C 1312.9 General Structures
- D C 1315. Power and Pumping Equipment
- D C 1320. Purification System
- D C 1321. Mains
- D C 1323. Services
- D C 1324. Meters
- D C 1325. Meter installations
- D 1326. Fire Protection Plant
- C 1326.1 Hydrants
- C 1326.2 Fire Mains
- C 1326.3 Other Fire Protection Plant
- D C 1327. Fountains and Basins
- D C 1328. Office Furniture and Equipment
- D C 1329. Transportation Equipment
- D C 1335. Other General Equipment
- D C 1336. Other Tangible Property

INTANGIBLE PLANT

- D C 1301. Organization

This account shall include fees paid to federal or State governments for the privilege of incorporation and expenditures for organizing the corporation, partnership or other enterprise and putting it into readiness to do business.

ITEMS

- (1) Cost of obtaining certificates authorizing an enterprise to engage in the public utility business (except costs includible in account 1302)
- (2) Fees and expenses for incorporation
- (3) Fees and expenses for mergers or consolidations
- (4) Office expenses incident to organizing the utility
- (5) Stock and minute books and corporate seal

Note A: This account shall not include any discounts upon securities issued or assumed; nor shall it include any costs incident to negotiating loans, selling bonds or other evidences of debt, or expenses in connection with the authorization, issuance, or sale of capital stock.

Note B: Exclude from this account and include in the appropriate expense account the cost of preparing and filing papers in connection with the extension of the term of incorporation unless the first organization costs have been written off. When charges are made to this

account for expenses incurred in mergers, consolidations, or reorganizations, amounts previously carried on the books of the corporations merged, consolidated, or reorganized shall not be included in this account.

D C 1302. Franchises and Consents

A. This account shall include only amounts paid to the federal government, to a state or to a political subdivision thereof in consideration for franchises, consents, or certificates, running in perpetuity or for a specified term of more than one year.

B. If a franchise, consent, or certificate is acquired by assignment, the charge to this account in respect thereof shall not exceed the amount paid therefor by the utility to the assignor, nor shall it exceed the amount paid by the original grantee. Any excess of the amount actually paid by the utility over the amount above specified shall be charged to account 1414, Miscellaneous Debits to Surplus.

C. When any franchise has expired, the amount included therefor in this account shall be credited hereto.

Note: Annual or other periodic payments under franchises shall not be included herein but in the appropriate operating expense account.

D C 1303. Miscellaneous Intangible Plant

A. This account shall include the cost of patent rights, licenses, privileges, and other intangible property necessary or valuable in the conduct of the utility's water operations and not specifically chargeable to any other account.

B. When any item included in this account is retired or expires, the amount included herein for the item shall be credited hereto.

C. This account shall be so kept that the utility can furnish full information with respect to the amounts included herein.

Note: Expenses incident to procuring franchises, consents, or certificates shall not be included herein.

TANGIBLE PLANT

D 1311. Land

A. This account shall include the cost, including the amounts of mortgages or other liens assumed, of land owned in fee by the utility and rights, interests, and privileges held by the utility in land owned by others, such as leaseholds, easements, rights of way, water rights (including water diversion rights, riparian rights, flowage rights, pondage rights, submersion rights), and other like interests in land having a life of more than one year.

B. The cost of buildings and other improvements (other than public improvements) shall not be included in this account. If at the time of

acquisition of an interest in land such interest extends to buildings or other improvements (other than public improvements), which are then devoted to water operations, the land and improvements shall be separately appraised and the cost allocated to land and buildings or improvements on the basis of the appraisals. If the improvements are removed or wrecked without being used in water operations, the cost thereof and the cost of removing or wrecking shall be charged and the salvage credited to this account.

C. The net profit from the sale of timber, cordwood, or other property acquired with rights of way or other lands shall be credited to this account. The proceeds from the sale of trees or the products thereof planted on land carried in this account, shall be credited to account 1615.2, Miscellaneous Water Revenues, and the cost of harvesting, carting and marketing them shall be charged thereto.

D. Separate entries shall be made for the acquisition, transfer, or retirement of each parcel of land and each land right. Entries transferring or retiring land or land rights shall refer to the original entry recording its acquisition. A record shall be maintained showing the nature of ownership, full legal description, area, map reference, purpose for which used, city, county, and tax district in which situated, from whom purchased or to whom sold, payment given or received, other costs, contract date and number, date of recording deed, book and page of record.

E. Class C utilities shall subdivide this account as shown below. Land used for more than one purpose shall be classified under the subdivision of this account indicative of its principal use.

C 1311.1 Source of Supply Land and Water Rights

C 1311.2 Power, Pumping and Purification Land

C 1311.5 Transmission and Distribution Land

C 1311.9 General Land

ITEMS

- (1) Clearing (first cost) the land of brush, trees and debris
- (2) Condemnation proceedings, including court and counsel costs
- (3) Consents and abutting damages, payment for
- (4) Conveyancers' and notaries' fees
- (5) Cost of acquisition including mortgages and other liens assumed (but not interest thereon after the property is placed in service)
- (6) Dredging and channel or bank improvements
- (7) Easements and rights of way, cost of, and expenses of acquisition
- (8) Fees, commissions, and salaries to brokers, agents and others in connection with the acquisition of the land or land rights

- (9) Forestation or trees, first planting (See paragraph C.)
- (10) Grading the land, except when directly occasioned by the building of a structure
- (11) Leases, cost of voiding upon purchase to secure possession of land
- (12) Leases having a life of more than one year, cost of, and expenses incidental to acquiring
- (13) Removing, relocating, or reconstructing property of others, such as buildings, highways, railroads, bridges, cemeteries, etc.
- (14) Rights of way, including costs of locating
- (15) Special assessments levied by public authorities for public improvements on the basis of benefits for new roads, new bridges, new sewers, new curbing, new pavements, and other public improvements, but not taxes levied to provide for the maintenance of such improvements
- (16) Surveys in connection with the acquisition
- (17) Taxes assumed, accrued to date of transfer of title
- (18) Title, examining, clearing, insuring, and registering in connection with the acquisition, and defending against claims relating to the period prior to the acquisition
- (19) Water pollution, eliminating causes of

Note A: When special assessments for public improvements provide for deferred payments, the full amount of the assessments shall be charged to this account and the unpaid balance shall be carried in an appropriate liability account. Interest on unpaid balances shall be charged to the appropriate interest account. If any part of the cost of public improvements is included in the general tax levy, the amount thereof shall be charged to the appropriate tax account.

Note B: When the purchase of land for water operations requires the purchase of land not to be used for such purposes, the charge to this account shall be based upon the cost of the land purchased, less the fair market value of that portion of the land which is not to be used for water operations. The fair market value of such land not to be used for water operations shall be included in account 1110, Other Physical Property.

D 1312. Structures

A. This account shall include the cost in place of structures used in water operations. This includes all permanent constructions for impounding, collecting and storing water, and structures, buildings (including purification buildings) and shelters to house, support, or safeguard property or persons, with all appurtenant fixtures permanently attached thereto; improvements to land and other structures or

constructions not specifically provided for elsewhere.

B. This account shall be subdivided as shown below, and utilities shall keep their records so as to show separately the cost of each structure included in this account. Structures used for more than one purpose shall be classified under the subdivision of this account indicative of their principal use.

C 1312.1 Source of Supply Structures, such as:

- (1) Collecting and Impounding Reservoirs
- (2) Lake and River Intakes
- (3) Gravity Intakes and Suction Pipes
- (4) Springs and Wells
- (5) Infiltration Galleries and Tunnels
- (6) Other Water Source Structures

C 1312.2 Power and Pumping Structures and Purification Buildings

C 1312.5 Distribution Reservoirs and Standpipes

C 1312.9 General Structures

ITEMS

- (1) Aerators
- (2) Attendants' dwellings
- (3) Boat houses
- (4) Buildings (miscellaneous) on water shed
- (5) Collecting basins
- (6) Dams
- (7) Fences
- (8) Gate houses and equipment
- (9) Infiltration galleries
- (10) Intake pipes
- (11) Intakes
- (12) Office buildings
- (13) Power and pumping structures
- (14) Purification buildings, including substructures, if not part of the purification system
- (15) Reservoirs
- (16) Roads and paths
- (17) Sanitary structures
- (18) Screens and racks
- (19) Shop, garage and stores buildings
- (20) Spillways and channels
- (21) Spring or well structures (pumps shall be included in account 1315)
- (22) Standpipes

- (23) Surface drains
- (24) Tanks
- (25) Towers
- (26) Any applicable item shown in "Item List for Buildings" listed below

ITEM LIST FOR BUILDINGS

- (1) Architects' plans
- (2) Ash pits
- (3) Awnings
- (4) Boilers, furnaces, piping, wiring, fixtures, and machinery for heating, lighting, signaling, ventilating, and plumbing
- (5) Bridges and culverts
- (6) Bulkheads including dredging, riprap fill, piling, decking, concrete, fenders, etc., when exposed and subject to maintenance and replacement
- (7) Chimneys
- (8) Clearing land for structures included herein
- (9) Coal bins and bunkers
- (10) Commissions and fees to brokers, agents, architects and others
- (11) Conduit
- (12) Damages to abutting property during construction
- (13) Door checks and door stops
- (14) Drainage and sewerage systems
- (15) Elevators, cranes, hoists, etc., and the machinery for operating them, when not specifically provided for in other accounts
- (16) Excavation, including shoring, bracing, bridging, refill, and disposal of excess excavated material
- (17) Fences and hedges
- (18) Fire protection systems when forming a part of a structure
- (19) Floor covering (permanently attached)
- (20) Foundations and piers for machinery, constructed as a permanent part of a building or other item listed herein
- (21) Grading when directly occasioned by the building of a structure
- (22) Leases, voiding, upon purchase, to secure possession of structures
- (23) Leased property, expenditures on (See water plant instruction 577.6.)
- (24) Monuments and bench marks
- (25) Outside lighting systems
- (26) Painting, first
- (27) Partitions, including movable

- (28) Permits and privileges
- (29) Platforms, railings, and gratings when constructed as part of structure
- (30) Power boards for services to a building
- (31) Railroad sidings for general use
- (32) Refrigerating systems for general use
- (33) Retaining walls
- (34) Roads
- (35) Scales, connected to and forming part of the structure
- (36) Screens
- (37) Sidewalks, pavements, and driveways on building grounds
- (38) Sprinkling systems
- (39) Stacks--brick, steel, or concrete, when set on foundations forming part of general foundation and steelwork of a building
- (40) Storage facilities constituting part of a building
- (41) Storm doors and windows
- (42) Subways, areaways, and tunnels directly connected to and forming part of general foundation and steelwork of a building
- (43) Tanks, constructed as part of a building, when not includible in another account
- (44) Tunnels, intake and discharge, when constructed as part of a structure
- (45) Vaults constructed as part of a building
- (46) Water supply system for a building
- (47) Wharves
- (48) Window shades and ventilators

Note A: The cost of specially provided foundations not expected to outlast machinery or apparatus for which they are provided and the cost of angle irons, castings, etc., installed at the base of an item of equipment shall be charged to the same account as the cost of the machinery, apparatus, or equipment.

Note B: The cost of additions and betterments, including initial improvements to leased structures shall be accounted for as provided in water plant instruction section 577.6.

Note C: Minor buildings and structures, such as valve towers, patrolmen's towers, telephone stations, etc., which are used directly in connection with or form a part of a reservoir, dam, waterway, etc. shall be considered a part of the facility in connection with which constructed or operated and the cost thereof shall be accounted for accordingly.

Note D: The cost of disposing of material excavated in connection with

construction shall be considered as a part of the cost of such work, except as follows: (a) When such material is used for filling, the cost of loading, hauling and dumping shall be equitably apportioned between the work in connection with which the removal occurs and the work in connection with which the material is used; (b) when such material is sold, the net amount realized from such sales shall be credited to the work in connection with which the removal occurs. If the amount realized from the sale of excavated materials exceeds the removal costs and the costs in connection with the sale, the excess shall be credited to the land account in which the site is carried.

Note E: Where the structure of a dam forms also the foundation of a building, such foundation shall be considered a part of the dam.

D C 1315. Power and Pumping Equipment

This account shall include the cost installed of equipment used in the production of steam or other power, principally for use in pumping water, and the pumping plant equipment driven thereby.

ITEMS

(1) Steam power and pumping equipment, such as furnaces, boilers, steam and feed water piping, boiler apparatus and accessories, pumps and other pumping equipment, including auxiliary power and pumping equipment

(2) Other power and pumping plant equipment, such as:

(a) Electric power equipment, and pumping equipment driven thereby

(b) Diesel or other oil engines and pumping plant equipment driven thereby

(c) Hydraulic power equipment and pumping plant equipment driven thereby

(d) Gasoline or gas engines and pumping plant equipment driven thereby

(e) Other types of pumping plant equipment

Note A: This account shall not include boilers or steam pipes whose primary purpose is the heating of structures.

Note B: Include office furniture and equipment, desks, chairs, etc., in account 1328, Office Furniture and Equipment.

D C 1320. Purification System

This account shall include the cost in place of structures, apparatus, and equipment used for the purification of water.

Note: Protecting superstructures shall be included in account 1312.2, Power and Pumping Structures and Purification Buildings.

ITEMS

(1) Aerators (except when located at reservoir)

(2) Chlorine machines and other chemical treating plant

(3) Clear water basins

- (4) Filter plants
- (5) Mixing tanks
- (6) Sedimentation or coagulation basins
- (7) Softening plants (lime-soda)
- (8) Softening plants (zeolite)

D C 1321. Mains

A. This account shall include the cost installed of transmission and distribution mains, pipes or canals, and also meters and appurtenances on transmission and distribution lines, but not meters and appurtenances located on customers' premises.

ITEMS

- (1) Air chambers
- (2) Blowoffs and overflows
- (3) Bridges and culverts
- (4) Canals
- (5) Fences
- (6) Gates, gate houses, and chambers
- (7) Gauges and recorders
- (8) Jointing and jointing material
- (9) Manholes
- (10) Meters and meter houses
- (11) Municipal inspection or permits
- (12) Pavement disturbed, including cutting and replacing pavement, pavement base, and sidewalks
- (13) Pipes, aqueducts, or conduits
- (14) Placing mains and accessories
- (15) Pressure regulators
- (16) Protection of street openings
- (17) Shutoffs
- (18) Special castings
- (19) Surge tanks
- (20) Trenching, including shoring, bracing, bridging, pumping, backfill, and disposal of excess excavated material
- (21) Tunnels
- (22) Valves and appurtenances
- (23) Valve vaults

Note: The cost of cutting and replacing pavement, pavement base, and sidewalks disturbed in laying mains shall be included in a separate subdivision of this account.

D C 1323. Services

A. This account shall include the cost installed of service pipes and

accessories in, or leading to, the customer's premises when the utility actually incurs such cost for which it has not been reimbursed. This includes the cost of stub services run in anticipation of future service.

B. Records shall be maintained to show separately the number, diameter, and material of services through which water is being delivered; services to which customers have been connected but through which water is not being delivered; and services through which water has not yet been delivered.

C. Services which have been used but have become inactive shall be retired immediately if there is no prospect of reuse, and, in any event, shall be retired by the end of the year following that during which the service became inactive unless reused in the interim.

D. When a service previously retired in accordance with paragraph C is reused, the amount previously credited to this account on retirement shall be charged hereto and concurrently credited to account 1250, Reserve for Depreciation of Utility Plant.

ITEMS

- (1) Corporation cocks
- (2) Gate valves and boxes
- (3) Goose necks
- (4) Jointing and pointing material
- (5) Municipal inspection
- (6) Pavement disturbed, including cutting and replacing pavement, pavement base, and sidewalks
- (7) Permits
- (8) Pipes
- (9) Placing pipes and accessories
- (10) Protection of street openings
- (11) Service boxes
- (12) Service cocks
- (13) Tapping main

Note B: The cost of cutting and replacing pavement, pavement base, and sidewalks disturbed in laying service pipes and accessories shall be included in a separate subdivision of this account.

D C 1324. Meters

A. This account shall include the cost delivered of meters or devices and appurtenances thereto, for use in measuring water delivered to users thereof, whether actually in service or held in reserve.

B. When a meter is permanently retired from service, the amount at which it is included herein shall be credited to this account.

C. The records of meters shall be so kept as to show the number of the various types and capacities in service and in reserve and the location of each meter owned.

ITEMS

- (1) Meters, including badging and initial testing
- (2) Meter coupling

Note: This account shall not include meters on the transmission or distribution lines. It includes only those meters to record water delivered to customers.

D C 1325. Meter Installations

A. This account shall include the cost of labor employed, materials used and expenses incurred in connection with the first installation at a location of meters, devices and appurtenances thereto included in account 1324, Meters.

B. Except as modified by paragraph C, following, when a meter installation is permanently retired from service, the cost thereof included herein shall be credited to this account.

C. Meter installations in excess of the number of meters installed, both active and inactive, shall be retired immediately if there is no prospect of reuse, and in any event shall be retired by the end of the year following that during which the meter was removed unless reused in the interim.

D. When a meter installation previously retired in accordance with paragraph C is reused, the amount previously credited to this account on retirement shall be charged hereto and concurrently credited to account 1250, Reserve for Depreciation of Utility Plant. Any installation costs incurred at the time of reuse shall be charged to account 1753, Meter Maintenance Labor.

ITEMS

- (1) Cocks
- (2) Installation, labor of, first installation at a location
- (3) Meter bars
- (4) Meter fittings and connections, shelves and other materials used in installation
- (5) Meter vaults and boxes
- (6) Swivels and bushings
- (7) Transportation from point of storage to location of installation
- (8) Yokes

Note A: The utility shall keep statistical records to show the total number of installations subdivided between those in service and those not in service, and further subdivided to show the number of meter

installations the cost of which is included herein, and the number of meter installations which prior to the effective date of this system of accounts was charged to operating expenses.

Note B: The cost of removing and resetting meters shall be charged to account 1753, Meter Maintenance Labor.

Note C: Charges made to customers for connection, disconnection or reconnection of meters, shall be credited to account 1615.2, Miscellaneous Water Revenues.

Note D: Minor items such as meter bars and other attachments shall be included in this account only when in service or associated with a meter held in reserve; otherwise they shall be carried in account 1131, Materials and Supplies.

D 1326. Fire Protection Plant

A. This account shall include the cost in place of hydrants, fire cisterns and basins in service owned by the utility, including connection to the main. This account shall also include the cost of mains and appurtenances used exclusively for fire protection.

B. This account shall be subdivided by Class C utilities as follows:

C 1326.1 Hydrants

C 1326.2 Fire Mains

C 1326.3 Other Fire Protection Plant

ITEMS

- (1) Basins
- (2) Cisterns
- (3) Connections to main, cistern, or basin
- (4) Gate valve
- (5) Hydrants and fittings
- (6) Pavement disturbed, cutting and replacing pavement, pavement base, and sidewalks
- (7) Pipe and specials
- (8) Tapping sleeve and tapping valve
- (9) Tee
- (10) Trenching, backfill, and disposal of excess excavated material
- (11) Valve box
- (12) For items in fire mains, see list under account 1321, Mains

Note A: A statistical record shall be kept to show the number, size (nominal diameter of bottom connection), number and size of hose connections, diameter of hydrant branch and main to which attached, type, and cost of hydrants located in each city, village, town, or water supply district, divided as follows:

- (1) Public use--owned

- (2) Private use--owned
- (3) Not owned

A record shall also be kept of the number of cisterns and basins.

Note B: The cost of cutting and replacing pavement, pavement base, and sidewalks disturbed in placing hydrants, fire mains, and connections to mains shall be included in a separate subdivision of this account.

D C 1327. Fountains and Basins

This account shall include the cost in place of fountains, basins, troughs, pools, etc., owned by the utility, except such as are includible in account 1326.3, Other Fire Protection Plant

ITEMS

- (1) Connections to main
- (2) Excavation, backfill, and disposal of excess excavated material
- (3) Fountains, basins, troughs, pools, etc.
- (4) Pavement disturbed, cutting and replacing pavement, pavement base and sidewalks
- (5) Piping
- (6) Valves and valve boxes

Note: The cost of cutting and replacing pavement, pavement base, and sidewalks disturbed shall be included in a separate subdivision of this account.

D C 1328. Office Furniture and Equipment

A. This account shall include the cost installed of all office furniture and equipment owned by the utility and devoted to water service, and not permanently attached to buildings. Articles of slight value or short service life acquired subsequent to the commencement of operations shall be charged to the appropriate operating expense account and not to this account.

B. If the utility has equipment includible in this account at more than one location, separate records shall be maintained for each location.

ITEMS

- (1) Book cases and shelves
- (2) Desks, chairs, and desk equipment
- (3) Drafting room equipment
- (4) Filing, storage, and other cabinets
- (5) Flooring covering
- (6) Library and library equipment
- (7) Mechanical office equipment such as accounting machines, typewriters, etc.
- (8) Safes

(9) Tables

D C 1329. Transportation Equipment

A. This account shall include the cost of transportation and garage equipment when such equipment is not an integral part of the housing structure. This account shall be subdivided as follows:

1329.1 Vehicles

1329.2 Garage and Repair Equipment

B. If the utility has garage equipment at more than one location, separate records shall be maintained for each location.

ITEMS

(1) Airplanes and other aviation equipment

(2) Automobile repair shop equipment

(3) Automobiles

(4) Battery charging equipment

(5) Bicycles

(6) Drays

(7) Electric vehicles

(8) Gasoline and oil pumps (portable)

(9) Gasoline storage tanks

(10) Greasing tools and equipment

(11) Horses, wagons and harness

(12) Horseshoeing equipment

(12a) Marine equipment

(13) Motor trucks

(14) Motorcycles

(15) Oil storage tanks

(16) Repair cars or trucks

(17) Tractors

(18) Trailers

(19) Trucks

(19a) Tugs

(20) Other garage or stable equipment

Note: Office furniture and equipment shall be included in account 1328, Office Furniture and Equipment.

D C 1335. Other General Equipment

This account shall include the cost installed of the following equipment:

1. Equipment used for the receiving, shipping, handling and storage of materials and supplies when not an integral part of the housing structure

2. Equipment specially provided for general shops when such equipment

is not an integral part of the housing structure

3. Laboratory equipment used for general laboratory purposes and not specially provided for or includible in other departmental or functional plant accounts

4. Tools, implements, and equipment used in construction or repair work exclusive of equipment includible in other equipment accounts

5. Other general equipment, apparatus, etc., used in the utility's water operations, and which is not includible in any other account

Note A: General equipment of the nature indicated above whenever practicable shall be assigned to the water plant accounts on a functional basis. Thus to illustrate, laboratory equipment used at the purification plant only, shall be included in account 1320, Purification System.

Note B: Office furniture and equipment shall be included in account 1328, Office Furniture and Equipment.

D C 1336. Other Tangible Property

A. This account shall include the cost of tangible water plant not provided for elsewhere.

B. A separate subdivision of this account shall be maintained for each class of property in which the utility has a relatively large investment, and records shall be so kept as to show separately the cost of each major item.

SURPLUS ACCOUNTS

Note: Total of surplus accounts to be carried as balance sheet account 1271.

CREDITS

D C 1400. Credit Balance Transferred from Income Account

D C 1401. Miscellaneous Credits to Surplus

DEBITS

D C 1410. Debit Balance Transferred from Income Account

D C 1411. Dividend Appropriations--Preferred Stock

D C 1412. Dividend Appropriations--Common Stock

D C 1413. Miscellaneous Reservations of Surplus

D C 1414. Miscellaneous Debits to Surplus

CREDITS

D C 1400. Credit Balance Transferred from Income Account

This account shall include the net credit balance transferred from the income account for the year.

D C 1401. Miscellaneous Credits to Surplus

A. This account shall include all credits affecting the surplus or deficit not provided for elsewhere. Among the items which shall be

credited to this account are:

- (1) Credits for amounts previously written off through charges to surplus
 - (2) Delayed income, operating revenue, and operating expense credits as provided in general instruction section 576.4
 - (3) Profits on reacquirement of the utility's securities (See accounts 1152 and 1153.)
 - (4) Surplus arising from donations by stockholders of the utility's capital stock
 - (5) Surplus arising from a reduction of the par value of the utility's capital stock
 - (6) Surplus arising from forgiveness of debt of the utility
- B. All items included in this account shall be sufficiently described in the entries relating thereto as to identify them with all accounts affected, and if the credits relate to prior years, the amount applicable to each year shall be shown.

DEBITS

D C 1410. Debit Balance Transferred from Income Account

This account shall include the net debit balance transferred from the income account for the year.

D C 1411. Dividend Appropriations--Preferred Stock

D C 1412. Dividend Appropriations--Common Stock

A. These accounts shall include amounts declared payable out of surplus or earnings as dividends on outstanding capital stock issued by the utility.

B. Dividends shall be segregated as to those payable in cash and otherwise. If not payable in cash, the medium of payment shall be described with sufficient particularity to identify it.

C. This account shall be so kept or supported as to show separately the dividends on each class and series of stock.

D C 1413. Miscellaneous Reservations of Surplus

A. This account shall include the reservations or appropriations of surplus for purposes not provided for elsewhere in this system of accounts.

B. The entries to this account shall show the nature of each reservation of surplus.

D C 1414. Miscellaneous Debits to Surplus

A. This account shall include amounts chargeable to surplus not provided for elsewhere. Among the items which shall be charged hereto are:

- (1) Amounts charged to surplus to cover past accrued depreciation and

amortization not provided for

- (2) Decline in value of investments (See account 1114)
- (3) Delayed income, operating revenue, and operating expense debits as provided in general instruction section 576.4
- (4) Payments of amounts previously credited to surplus
- (5) Losses on reacquirement of the utility's securities (See accounts 1152 and 1153)
- (6) Losses which are not properly chargeable to operating expenses or income and for which reserves have not been provided

B. All items included in this account shall be sufficiently described in the entries relating thereto as to identify them with all accounts affected, and if the charges relate to prior years, the amount applicable to each year shall be shown.

DISPOSITION OF NET INCOME

- D C 1540. Miscellaneous Reservations of Net Income
 - Balance Transferred to Surplus

UTILITY OPERATING INCOME

Note: The income accounts (1501 to 1540) are designed to show for each month and each calendar year the operating revenues and expenses, the other income, the income deductions, the net income, the miscellaneous reservations of net income and the amount of income or loss remaining for transfer of surplus.

D C 1501. Operating Revenues

Under this caption shall be included the total operating revenues credited to the revenue accounts 1601-1615.2, derived by the utility from its water operations during the period covered by the income account.

D C 1502. Operation and Maintenance

Under this caption shall be included the total expenses shown in accounts 1700-1811, incurred by the utility in its water operations during the period covered by the income account.

D C 1503. Depreciation

A. This account shall include the depreciation expense applicable to water operations, on plant carried in accounts 1101 and 1106 for the period covered by the income account, except such depreciation expense as is charged to clearing accounts or to construction work in progress.

B. Class C utilities shall keep supporting records to show the amount of depreciation charges applicable to each work plant account.

D C 1505. Amortization of Water Plant Acquisition Adjustments

This account shall be debited or credited, as the case may be, with amounts which the commission shall have determined are includible in operating revenue deductions for the purpose of providing for the extinguishment of the amount in account 1105, Water Plant Acquisition Adjustments. Account 1252, Reserve for Amortization of Water Plant

Acquisition Adjustments, shall be concurrently credited or debited.

D C 1506. Property Losses Chargeable to Operations

This account shall be charged with amounts credited to account 1146, Miscellaneous Deferred Debits, when the commission has authorized an extraordinary loss included in the latter account to be written off by charges to operations.

D C 1507. Operating Taxes

A. This account shall include the amount of federal, State, county, municipal and other taxes, including payroll taxes (but excluding taxes on net income, excess profits, undivided profits, excess dividends, or capital stock) which are properly chargeable to water operations, and except taxes includible in account 1615.1, Merchandise and Jobbing, or in clearing accounts. (See account 1228, Taxes Accrued.)

B. This account shall be charged each month with the amount of taxes which are applicable thereto, and concurrent credits shall be made to account 1228, Taxes Accrued. (See also account 1132, Prepayments.)

C. Taxes assumed by the utility on property leased from others for use in water operations shall be considered as additional rent and so charged.

D. This account shall be kept as to show the amount of each kind of tax, and the basis upon which each charge is made.

Note: The following items shall not be charged to this account but shall be treated as specified below:

(1) Gasoline or other sales taxes shall be added to the cost of the materials on which levied

(2) Taxes chargeable to other utility operations shall be assigned to such operations; taxes applicable to non-utility operations shall be charged to account 1521, Income from Non-utility Operations

(3) Annual or more frequent payments under the terms of franchises, shall be included in account 1805, Franchise Requirements

(4) Special assessments for street and similar improvements shall be included in the water plant account in which the property with which the taxes are identified is included

(5) Taxes applicable to water construction shall be charged to account 1103, Construction Work in Progress; taxes on labor charged to cost of removal shall be charged to account 1250, Reserve for Depreciation of Utility Plant

(6) Taxes on net income, excess profits, undivided profits, excess dividends, or capital stock, shall be charged to account 1539, Income Taxes

D C 1508. Income from Water Plant Leased to Others

A. This account shall include all rental income from water property leased by the utility to others, and which property is included in account 1102, Water Plant Leased to Others.

B. This account shall be subdivided as follows:

1508.1 Revenues from Water Plant Leased to Others

1508.2 Expenses of Water Plant Leased to Others

C. This account shall be so kept or supported as to show separately the following for each lease:

(1) Rentals

(2) Expenses

(3) Depreciation

(4) Taxes

(5) Uncollectible rents

D C 1509. Other Utility Operating Income

Under this caption shall be included (1) the revenues derived from and (2) operation and maintenance, depreciation, rents and taxes incurred in the operation of utility plant, the book cost of which is included in account 1108, Other Utility Plant.

Note: In the case of utility services for which systems of accounts are prescribed by this commission, such as electric, gas, etc., the appropriate accounts in such systems shall be used instead of this account.

OTHER INCOME

D C 1521. Income from Non-utility Operations

A. This account shall include the revenues derived from and the expenses incurred in non-utility operations.

B. The expenses shall include every element of cost (except return on investment) incurred in such operations, including depreciation, rents, taxes, insurance, etc.

D C 1523. Dividend Revenues

This account shall include the revenues derived by the utility from dividends on stocks of other companies

Note: No dividends on reacquired securities issued or assumed by the utility shall be included in this account.

D C 1524. Interest Revenues

This account shall include interest revenues on investments, loans, notes, advances, special deposits, etc.

D C 1526. Miscellaneous Non-operating Income

This account shall include all revenue items properly includible in the income account other than from operations (utility and non-utility), interest, or dividends. It shall also include all expenses incurred in

connection with such revenues.

INCOME DEDUCTIONS

D C 1530. Interest on Long-term Debt

A. This account shall include in each accounting period the amount of interest applicable thereto on outstanding long-term debt issued or assumed by the utility, the liability for which is included in account 1210, Bonds, account 1211, Receivers-Certificates, or account 1213, Miscellaneous Long-term Debt. No interest shall be accrued on reacquired debt carried in account 1153, Reacquired Long-term Debt.

B. Amounts charged to this account, shall be credited to account 1229, Interest Accrued.

C. This account shall be so kept or supported by other records as to show the interest accruals on each class and series of long-term debt.

D C 1531. Amortization of Debt Discount and Expense

This account shall include in each accounting period the portion of unextinguished debt discount and expense on outstanding long-term debt which is applicable to such period. The amount shall be computed as provided in account 1140, Unamortized Debt Discount and Expense, to which account concurrent credit shall be made.

D C 1532. Amortization of Premium on Debt--Credit

This account shall include in each accounting period the portion of unextinguished premium (or premium less expenses, when a net credit) on outstanding long-term debt which is applicable to such period. The amount shall be computed as provided in account 1240, Unamortized Premium on Debt, to which account concurrent debit shall be made.

D C 1534. Interest on Debt to Associated Companies

A. This account shall include in each accounting period interest on debt to associated companies and shall be so kept as to show the amount of interest on each such debt.

B. Amounts charged to this account shall be credited to account 1214, Debts to Associated Companies.

D C 1535. Other Interest Charges

This account shall include in each accounting period all interest not provided for in account 1530 or 1534, and shall be so kept as to show the amount of interest charges on each debt.

D C 1536. Interest Charged to Construction--Credit

When interest is charged to construction in accordance with water plant instruction section 577.3, subd. (g), concurrent credit shall be made to this account.

D C 1538. Miscellaneous Income Deductions

This account shall include miscellaneous debits to income not provided

for elsewhere.

ITEMS

- (1) Decline in value of investments
- (2) Donations
- (3) Expenditures for associated companies for which the utility will not be reimbursed
- (4) Charges not includible in account 1505, Amortization of Water Plant Acquisition Adjustments, to write off amounts in account 1105, Water Plant Acquisition Adjustments, and other items being written off which are not elsewhere provided for
- (5) Penalties or fines for violations of law
- (6) Expenses in connection with interest and dividend revenues
- (7) Taxes assumed on interest

D C 1539. Income Taxes

This account shall include taxes on net income, excess profits, undivided profits, excess dividends, and capital stock.

DISPOSITION OF NET INCOME

D C 1540. Miscellaneous Reservations of Net Income

A. This account shall include reservations of net income, such as may be required under the terms of mortgages, deeds of trust, orders of a court, contracts, or other agreements, and other reservations of net income.

B. Amounts charged to this account shall be credited concurrently to the appropriate reserve account.

C. The entries in this account shall show the nature of each reservation of income.

OPERATING REVENUE ACCOUNTS

SALES OF WATER

- D C 1601. Metered Sales to General Customers
- D C 1602. Flat Rate Sales to General Customers
- D C 1603. Sales to irrigation Customers

SALES OF WATER

D C 1601. Metered Sales to General Customers

This account shall include revenues from measured water supplied for residential, commercial and industrial purposes when the total charge is or may be in any way dependent upon the quantity of water delivered.

Note A: This account includes all revenues under service classifications which consist of a rate for a specified diameter of service pipe, or per meter, fixture, room, foot of frontage, or other similar unit, plus an additional charge or an adjustment dependent upon the quantity of water delivered.

Note B: The records supporting the entries to this account shall be so kept that the quantity of water sold and the revenues therefrom will be available for each service classification.

D C 1602. Flat Rate Sales to General Customers

This account shall include revenues from water supplied for residential, commercial and industrial (except irrigation) purposes when the charge is not in any way dependent upon the quantity of water delivered, but consists of a rate for a specified diameter of service pipe or per fixture, room, foot of frontage, or other similar unit.

Note: The records supporting the entries to this account shall be so kept that the revenue under each service classification will be available.

D C 1603. Sales to Irrigation Customers

A. This account shall include revenues from water supplied for irrigation purposes under service classifications applicable only to irrigation customers.

B. This account shall be subdivided as follows:

1603.1 Metered Sales to Irrigation Customers

1603.2 Flat Rate Sales to Irrigation Customers

Note A: For distinction between metered sales and flat rate sales see accounts 1601 and 1602.

Note B: The records supporting the entries to this account shall be so kept that there will be available:

For metered sales, the quantity of water sold and the revenues therefrom for each service classification

For flat rate sales, the revenue under each service classification

D C 1604. Private Fire Protection

This account shall include revenues from fire protection to others than public authorities except when such protection is furnished under the same service classification with other service.

D C 1605. Public Fire Protection

A. This account shall include revenues from municipalities or other subdivisions or agencies of State or federal governments for rental of hydrants or other fire protection facilities and for water delivered in connection therewith.

B. When the charges for fire protection include the use of water for street sprinkling, sewer flushing, or other similar purposes the total revenue may be included in this account.

Note: The records supporting the entries to this account shall be so kept as to show separately for each political subdivision the number, size (nominal diameter of bottom connection), and type of hydrants and the diameter of the main to which they are connected, the rate per hydrant or other fire protection charge, and the total revenue.

D C 1606. Other Sales to Public Authorities

This account shall include revenues from water, other than for fire protection, delivered to municipalities or other subdivisions or agencies of State or federal governments, under special contracts or agreements or service classifications applicable only to public authorities.

Note A: Do not include in this account revenues from public authorities for water delivered for distribution or for public fire protection, or revenues from sales to public authorities billed under general service classifications.

Note B: The records supporting the entries to this account shall be so kept that the quantity of water sold under each contract will be available for metered sales.

D C 1607. Sales to Other Water Utilities

This account shall include the revenues from water supplied (including standby or breakdown service) to other water utilities or to public authorities for distribution.

Note A: When the contract is a reciprocal one, i.e., when either party thereto may take water from the other, the gross amount receivable for water supplied to the other party shall be included herein in each accounting period and the gross amount payable for water received from the other party shall be charged to account 1708, Water Purchased for Resale.

Note B: The records supporting the entries to this account shall show separately for each contract the point of delivery, the quantity of water supplied, the basis for the charge, and the total charge to the distributor.

D C 1608. Interdepartmental Sales

This account shall include the total amounts charged to other departments of the utility by the water department for water supplied by the latter. (See operating revenue instruction ÷ 578.5.)

OTHER WATER REVENUES

D C 1611. Rent from Water Operating Property

This account shall include rents received for the use by others or by a coordinate department of the utility of land, buildings, and other property devoted to water operations by the utility.

Note A: Do not include in this account rents from property included in account 1102 Water Plant Leased to Others. (See account 1508, Income from Water Plant Leased to Others.)

Note B: When rentals are received for use of structures the cost of which is not included in water plant accounts, but which are located on land which is included in water plant accounts, the portion of such rent representing the charge for use of land or access to water shall be credited to this account.

D C 1613. Customers' Forfeited Discounts

This account shall include the amounts which the utility allows its customers on condition that they pay their water bills on or before a specified date and which are forfeited because of failure to pay within the specified time.

D C 1614. Servicing of Customers' Installations

This account shall include revenues accruing to the utility from charges to customers on account of the maintenance of appliances, piping, or other installations on customers' side of meters. This includes also charges to customers for testing and repairing meters owned by customers.

D C 1615.1. Merchandise and Jobbing

A. This account shall include revenues derived from the sale of water merchandise. To this account shall be charged the cost to the utility of such merchandise sold, including transportation and stores cost, the cost of labor employed in merchandising (so far as it is practicable for the company to segregate such labor cost), and discounts and uncollectible revenues arising from merchandise.

B. To this account shall also be credited the revenue from piping and other jobbing work performed by the utility for its own customers, excluding items includible in account 1614, but including charges made for installing meters owned by customers, and for tapping mains and laying services when the cost of such work is not includible in account 1323, Services. This account shall be charged with the cost of jobbing work, including shop expenses, transportation, stores and other expenses

applicable. (See also general instruction § 576.9, and account 1265, Contributions in Aid of Construction.)

Note A: The utility shall keep the records supporting this account in sufficient detail to permit a complete analysis of the credits and debits therein.

Note B: Do not include in this account the receipts from the sale of superseded equipment or of junk or other scrap. The accounting for scrap material shall be as provided in account 1131, Materials and Supplies.

Note C: If the utility is engaged generally in merchandising, jobbing, or plumbing, such transactions shall be accounted for under the appropriate accounts for non-utility operations. (See account 1521, income from Non-utility Operations.)

D C 1615.2 Miscellaneous Water Revenues

A. This account shall include revenues incidental to water operations not includible in any of the foregoing accounts. This covers such items as turn-on charges, fees and charges for testing and repairing company-owned meters and for changing, connecting, disconnecting and restoration of service; profit on the sale of unused materials and supplies not ordinarily purchased for resale; commissions on sales or distribution of others' water (sold under rates filed by such others); management or supervision fees; sale of steam (except when the utility furnishes steam-heating service); sales of ice, trees, fruit, crops, etc.

B. This account shall be charged with the cost of harvesting, cutting and marketing ice, trees, fruit, crops, and similar products. (See also paragraph C of account 1311, Land.)

WATER SOURCE, PUMPING AND PURIFICATION EXPENSES

Note: Separate operation and maintenance accounts shall be kept for each source of water supply and for each separate pumping and purification station.

D 1700. Supervision and Labor

This account shall include items provided for in accounts 1701 to 1706

C 1701. Supervision

This account shall include the cost of supervising and directing the operation and maintenance of the water source, pumping and purification facilities.

C 1702. Water Source Operation Labor

This account shall include the pay of employees for the time during which they are engaged in operating the sources of water supply.

ITEMS

- (1) Cutting brush
- (2) Operating gates
- (3) Patrolling
- (4) Removing organic growth
- (5) Removing sediment
- (6) Trimming trees

Note: Do not include maintenance labor in this account.

C 1703. Power and Pumping Operation Labor. This account shall include the pay of employees for the time during which they are engaged in operating the power and pumping equipment.

Note: Do not include maintenance labor in this account.

C 1704. Purification Operation Labor

This account shall include the pay of employees for the time during which they are engaged in operating the purification system.

Note: Do not include maintenance labor in this account.

C 1705. Maintenance Labor--Water Sources

This account shall include the pay of employees or others for the time during which they are engaged in making repairs to water source property, such as reservoirs, dams, wells, etc. This includes, in addition to labor on actual repairs, such work as routine inspection and testing, replacing or adding minor items of plant (see water plant instruction 577.2, subd. (c)), testing for, locating and clearing trouble, restoring the condition of damaged property, etc., but not

replacing items of property designated as "units of property."

C 1706. Maintenance Labor--Power, Pumping and Purification

This account shall include the pay of employees or others for the time during which they are engaged in making repairs to power and pumping structures and equipment, and purification buildings and equipment. This includes, in addition to labor on actual repairs, such work as routine inspection and testing, replacing or adding minor items of plant (see water plant instruction 577.2, subd.(c)), testing for, locating and clearing trouble, restoring the condition of damaged property, etc., but not replacing items of property designated as "units of property."

D C 1708. Water Purchased for Resale

A. This account shall include the cost at the point of delivery of all water purchased for resale. This includes charges for readiness to serve, and the portion applicable to each month of annual or more frequent payments for the right to divert water at the source of supply.

B. When the contract is a reciprocal one, i.e., when either party thereto may take water from the other, the amount payable for the gross quantity of water received from the other party shall be charged hereto in each accounting period and the amount receivable for the gross quantity supplied to the other party shall be included in the appropriate revenue account.

Note: The records supporting entries to this account shall be so kept as to

show for each company from which water is obtained, the point of delivery, the quantity thereof, the basis of charges, and the amount payable therefor.

D 1710. Materials, Supplies and Expenses

This account shall include items provided for in accounts 1711 to 1715.

C 1711. Water Source Operation Supplies and Expenses

This account shall include the cost of supplies consumed and expenses incurred in the operation of the sources of water supply.

ITEMS

- (1) Attendants' supplies
- (2) Chemicals used in water sources
- (3) Employees' service facilities expense
- (4) Stationery and office supplies
- (5) Tools, fire
- (6) Tools, hand
- (7) Transportation

Note: Do not include maintenance materials in this account.

C 1712. Power and Pumping Supplies and Expenses

This account shall include the cost of supplies consumed and expenses incurred in the operation of the power and pumping equipment.

ITEMS

- (1) Fuel
 - (a) Coal
 - (b) Gasoline
 - (c) Oil
 - (d) Other fuels
- (2) Boiler plant supplies and expenses
- (3) Lubricants
- (4) Records
- (5) Tools
- (6) Transportation
- (7) Waste

Note: Do not include maintenance materials in this account.

C 1713. Purification Supplies and Expenses

A. This account shall include the cost of supplies consumed and expenses incurred in the operation of the purification system.

B. The company may charge to this account the cost of water used for washing filters and for washing or cleaning other purification facilities. When such charges are made concurrent credits shall be made to account 1806, Duplicate Charge--Credit.

ITEMS

- (1) Charts, recording
- (2) Chemicals
 - (a) Activated carbon
 - (b) Ammonia
 - (c) Caustic soda
 - (d) Chlorine
 - (e) Ferrous sulphate
 - (f) High test hypochlorite
 - (g) Iodine
 - (h) Lime
 - (i) Potassium permanganate
 - (j) Soda ash (dry sodium carbonate)
 - (k) Sulphate of alumina
 - (l) Sulphuric acid
 - (m) Other chemicals
- (3) Electricity
- (4) Hose

- (5) Lubricants
- (6) Shop and laboratory expenses
- (7) Tools, hand
- (8) Transportation
- (9) Waste

Note: Do not include maintenance materials in this account.

C 1714. Maintenance Materials--Water Sources

This account shall include the cost of materials and supplies used and expenses incurred in repairing and maintaining the water source property, such as reservoirs, dams, wells, etc.

ITEMS

- (1) Bills from others for repairs, inspection, adjustment or other maintenance of water source structures
- (2) Materials and supplies used in making repairs or in replacing minor items of property (See water plant instruction ÷ 577.2, subd.(c).)
- (3) Minor items added to plant
- (4) Transportation, shop and stores expense, if clearing accounts are used

Note: Materials recovered in connection with repair and maintenance work which is charged to this account, shall be credited hereto; repairing such materials for reuse shall be charged hereto.

C 1715. Maintenance Materials--Power, Pumping and Purification

This account shall include the cost of materials and supplies used and expense incurred in repairing and maintaining the power and pumping structures and equipment, and purification buildings and equipment.

ITEMS

- (1) Bills from others for repairs, inspection, adjustment or other maintenance
- (2) Materials and supplies used in making repairs or in replacing minor items of property (See water plant instruction ÷ 577.2, subd.(c).)
- (3) Minor items added to plant
- (4) Transportation, shop and stores expense, if clearing accounts are used

Note: Materials recovered in connection with repair and maintenance work which is charged to this account, shall be credited hereto; repairing such materials for reuse shall be charged hereto.

D C 1720. Rents

A. This account shall include all rents for property of others used, occupied, or operated in connection with the sources of water supply and power, pumping and purification operations, including amounts payable to the United States for the occupancy and use of public lands and

reservations for reservoirs, dams, etc. Taxes paid on such property shall be charged hereto.

B. If the leased property is used by more than one department of the utility, the rental (and taxes) shall be apportioned to the departments making use of the property on an equitable basis. If a portion of the rented property is subleased, the revenue therefrom shall be included in account 1611, Rent from Water Operating Property.

D C 1729. Power Purchased or Transferred--Debit

A. This account shall include the cost of power purchased which is used for the operation of pumping equipment.

B. This account shall also include charges for power transferred to water operations when such power is produced primarily for use in another operating department of the company.

C. This account shall be subdivided so as to show separately the amount applicable to each type of power purchased or transferred:

- (1) Steam
- (2) Electric
- (3) Other power

Note: This account shall be so kept as to show separately for each company from which power is purchased, the point of delivery, the quantity, the price, and the total charge. When power is transferred from another operating department, the company shall be prepared to show the basis of the charges to water operations, full details of the cost of producing such power, and the extent and manner of use by each department involved.

D C 1730. Power Transferred--Credit

A. This account shall include credits for power transferred to another operating department of the company when such power is produced primarily for use in water operations except when such production is treated as a joint facility, in which case it shall be accounted for as provided in accounts 1808-1809.

B. This account shall be subdivided so as to show separately the account applicable to each type of power transferred:

- (1) Steam
- (2) Electric
- (3) Other power

Note: The company shall keep records to show the basis for determining the amounts to be credited to this account.

Note: The accounting for power used by the water department itself shall be in accordance with operating revenue instruction section 578.5.

TRANSMISSION AND DISTRIBUTION EXPENSES

D 1750. Supervision and Labor

This account shall include items provided for in accounts 1751 to 1755.

C 1751. Supervision

This account shall include the cost of supervising and directing the operation and maintenance of the transmission and distribution systems.

C 1752. Operation Labor

This account shall include the pay of employees for the time during which they are engaged in operating the transmission and distribution systems, except labor on work on customers' premises (chargeable to account 1753) and labor on fire protection plant (chargeable to account 1755). (See also note hereunder.)

ITEMS

- (1) Attending gates and valves
- (2) Keeping maps and other transmission and distribution records
- (3) Operating valves
- (4) Patrolling
- (5) Pressure, recording of
- (6) Recording readings

Note: Maintenance labor shall be included in account 1753, 1754, or 1755, as appropriate.

C 1753. Meter Maintenance Labor

This account shall include the pay of employees for the time during which they are engaged in inspecting, testing, repairing, removing and resetting or changing the location of meters and accessory equipment located on customers' premises, investigating service complaints, adjusting water fixtures, repairing leaks in pipes and fixtures, adjustments in connection with pressure and other work on customers' premises.

Note: The cost of the first installation at a location of a meter shall not be charged to this account but to water plant account 1325, Meter installations.

C 1754. Other Maintenance Labor

This account shall include the pay of employees engaged in repairing and maintaining transmission and distribution facilities, including distribution reservoirs and standpipes, mains, services, fountains and basins, but not meters or fire protection plant.

ITEMS

- (1) Cutting and replacing pavement, pavement base, and sidewalks in connection with repairs
- (2) Inspecting and testing after repairs have been made

(3) Inspecting, testing and reporting on the condition of mains, services, distribution reservoirs and standpipes, etc., to determine the need for repairs, minor replacements and changes

(4) Replacing or adding minor items of plant (See water plant instruction 577.2, subd.(c).)

(5) Repairing materials for reuse

(6) Restoring the condition of damaged mains, services, distribution reservoirs and standpipes, etc. (See note B, below.)

(7) Routine work to prevent trouble

(8) Testing for, locating, and clearing trouble

(9) Training employees for maintenance work

Note A: Meter repair labor shall be included in account 1753; labor on fire protection plant shall be included in account 1755.

Note B: The cost of maintenance does not include cost of replacing items of property designated as "units of property."

C 1755. Labor on Fire Protection Plant

This account shall include the pay of employees for the time during which they are engaged in operation and maintenance work on the fire protection plant.

ITEMS

(1) Cleaning hydrants and other fire protection plant

(2) Recording pressure

(3) Repairs to hydrants and other fire protection plant

(4) Restoring the condition of damaged property

(5) Routine inspection and tests

(6) Testing for and clearing trouble

(7) Thawing hydrants

D 1760. Materials, Supplies and Expenses

This account shall include items provided for in accounts 1761 to 1764.

C 1761. Operation Supplies and Expenses

This account shall include the cost of all supplies, tools, etc., used and miscellaneous expenses incurred in operating the transmission and distribution systems, except repair materials, supplies and expenses, and those used on the fire protection plant.

Note: All materials and supplies used and expenses incurred on fire protection plant systems are chargeable to account 1764; maintenance materials, supplies and expenses used on meters, and other work on customers' premises shall be charged to account 1762; maintenance materials and supplies used and expenses incurred on other transmission and distribution property are chargeable to account 1763.

C 1762. Meter Maintenance Materials and Expenses

This account shall include the cost of materials and supplies used and expenses incurred in repair and maintenance and other work on customers' premises.

ITEMS

- (1) Meter repair materials, supplies and expenses
- (2) Other materials, supplies and expenses used on customers' premises
- (3) Replacing or adding minor items of property (See water plant instruction 577.2, subd.(c).)
- (4) Transportation, shop and stores expenses, if clearing accounts are used
- (5) Work done by others

Note: Do not include in this account expenses incurred in connection with merchandising and jobbing work. (See account 1615.1.)

C 1763. Other Maintenance Materials and Expenses

This account shall include the cost of materials and supplies used and expenses incurred in repairing and maintaining the transmission or distribution reservoirs and standpipes, mains, services, and fountains and basins.

ITEMS

- (1) Jointing materials
- (2) Paving repair materials
- (3) Pipe and fittings
- (4) Replacing or adding minor items of property (See water plant instruction 577.2, subd.(c).)
- (5) Special castings
- (6) Transportation, shop and stores expenses, if clearing accounts are used
- (7) Valves and appurtenances
- (8) Work done by others

Note: The cost of maintenance does not include the cost of replacing items of property designated as "units of property."

C 1764. Materials and Expenses on Fire Protection Plant

This account shall include the cost of materials and supplies used and expenses incurred in operating, repairing and maintaining the fire protection plant. This includes work done by others, and replacing or adding minor items of property (see water plant instruction 577.2, subd.(c)), but does not include the cost of replacing items of property designated as "units of property."

D C 1770. Rents

This account shall include all rents of property of others used,

occupied, or operated in connection with the transmission and distribution system. Taxes on such property shall be charged hereto.

CUSTOMERS' ACCOUNTING AND COLLECTING EXPENSES

D 1780, Meter Reading, Accounting and Collecting

This account shall include items provided for in accounts 1781 and 1782.

C 1781. Meter Reading

This account shall include the pay of employees engaged in reading customers' meters, and the cost of supplies used and expenses incurred in connection therewith.

ITEMS

- (1) Badges
- (2) Forms for recording readings
- (3) Lamps
- (4) Meter readers, pay of
- (5) Transportation
- (6) Uniforms

C 1782. Accounting and Collecting

This account shall include the pay and expenses of employees engaged on customers' applications, contracts, orders, complaints, and inquiries, and in making credit investigations, billing, collecting customers' bills, and bookkeeping; and the cost of supplies used and expenses incurred in connection therewith.

ITEMS

- (1) Accounts, customers', keeping of
- (2) Address plates
- (3) Billing
- (4) Bookkeeping
- (5) Books
- (6) Cashier, pay of
- (7) Commissions, fees, or salaries of collectors
- (8) Delivery of bills
- (9) Disconnection for non-payment of bills
- (10) Office supplies
- (11) Postage
- (12) Stationery and printing
- (13) Statistical work on customers' accounts
- (14) Tabulating sales
- (15) Transportation

D C 1783. Uncollectible Accounts

This account shall be charged each month with amounts sufficient to

provide for losses from uncollectible water revenues. Concurrent credits shall be made to account 1254, Reserve for Uncollectible Accounts. Losses from uncollectible accounts shall be charged to such reserve.

D C 1784. Rents

A. This account shall include rents for property of others used, occupied, or operated in connection with customers' accounting and collecting, such as for a commercial office. Taxes paid on such property shall be charged hereto. (See also water plant instruction 577.6.)

B. If the leased property is used by more than one department of the utility, the rents (and taxes) shall be apportioned on an equitable basis to the departments making use of the property. If a portion of the rented property is subleased, the revenue therefrom shall be included in account 1611, Rent from Water Operating Property.

Note: If the commercial office and the general office occupy space jointly, and the allocation of the rental to each office is not practicable, the entire amount for office rental may be included in account 1803, General Rents.

SALES PROMOTION EXPENSES

D C 1786. Sales Expenses

This account shall include the cost of labor employed and expenses incurred for the purpose of promoting the sale of water, other than merchandising or jobbing.

ITEMS

- (1) Advertising
- (2) Demonstrating use of appliances
- (3) Salaries and commissions of solicitors

ADMINISTRATIVE AND GENERAL EXPENSES

D C 1790. Salaries of General Officers

This account shall include the compensation (salaries, bonuses and other considerations for services) of officers and executives of the utility, properly chargeable to water operations and not chargeable directly to a particular water function.

Note: Directors' fees, even though paid to officers, shall be charged to account 1800, Other General Expenses.

D C 1791. Other General Office Salaries

This account shall include the compensation of employees engaged in the general offices properly chargeable to water operations and not chargeable directly to a particular water function.

D C 1793. General Office Expenses

This account shall include the expenses of general officers and general office employees, and the cost of office supplies and office

expenses in connection with the general administrative functions of the utility's water operations.

ITEMS

- (1) Books and periodicals for office use
- (2) Building service (not including rent)
- (3) Meals and hotel bills
- (4) Membership fees and dues in trade, technical and professional associations
- (5) Office supplies
- (6) Postage
- (7) Printing
- (8) Stationery
- (9) Telephone, telegrams, etc.
- (10) Traveling expenses

D 1795. Special Services

A. This account shall include amounts payable to any corporation, firm or individual, other than officers and employees of the utility, for special services to the water department for general supervision and management services and expenses, and for legal and other special services and expenses.

ITEMS

- (1) Services:
 - (a) Auditing and accounting
 - (b) Legal
 - (c) Management
 - (d) Rates
 - (e) Secretarial
 - (f) Statistical
 - (g) Supervisory
- (2) Expenses:
 - (a) Hotel
 - (b) Meals
 - (c) Printing
 - (d) Stationery
 - (e) Traveling

B. Class C utilities shall subdivide this account as follows:

C 1795.1 Management and Supervision

C 1795.2 Legal Services

C 1795.3 Other Special Services

C. Records supporting this account shall be so kept as to show (1) the basis of each fee, (2) the amount of the fee, and (3) the person to whom

the fee is paid or payable.

Note A: Legal or other special services in connection with formal cases before regulatory commissions, or in cases in which such a commission is a party, shall be charged to account 1797, Regulatory Commission Expenses, or when specifically applicable to injury or damage cases to account 1798, Insurance, Injuries and Damages, or other appropriate account.

Note B: Legal or other special services incident to the construction of water property shall be charged to the appropriate utility plant accounts. Legal services incident to the issuance of long-term debt or capital stock shall be charged to account 1140, Unamortized Debt Discount and Expense, account 1240, Unamortized Premium on Debt, or account 1151, Capital Stock Expense, as appropriate.

D C 1797. Regulatory Commission Expenses

A. This account shall include all expenses (except pay of regular employees only incidentally engaged in such work), properly includible in water operating expenses, incurred by the utility in connection with formal cases before regulatory commissions, or other regulatory bodies, or cases in which such a body is a party, including payments made to a regulatory commission for fees assessed against the accounting utility for pay and expenses of such commission, its officers, agents, and employees.

B. Amounts of regulatory commission expenses which are spread over future periods shall be charged to account 1146, Miscellaneous Deferred Debits, and amortized by charges to this account. (See general instruction ÷ 576.4.)

C. The utility shall be prepared to report the cost of each formal case.

D. The costs which may be partly chargeable to this account and partly to the other accounts enumerated in notes A and B to account 1795 shall be equitably apportioned, and the basis of allocation to the several accounts shall be submitted to this commission.

ITEMS

(1) Salaries, fees, retainers, and expenses of counsel, solicitors, attorneys, accountants, engineers, clerks, attendants, witnesses, and others engaged in the prosecution of, or defense against, petitions or complaints presented to regulatory bodies, or in the valuation of property owned or used by the utility in connection with such cases.

(2) Expenses: Engineering supplies, office expenses, payments to public service or other regulatory commissions, stationery and printing, traveling expenses, and other expenses incurred directly in connection

with formal cases before regulatory commissions.

Note A: Exclude from this account and include in other appropriate operating expense accounts, expenses incurred in the improvement of service, additional inspection, or rendering reports, which are made necessary by the rules and regulations, or orders, of regulatory bodies.

Note B: Do not include in this account costs incident to the construction of water property, which are chargeable to the tangible water plant accounts. Costs incurred in connection with property purchases shall be accounted for as provided in paragraph D of account 1106, Unclassified Water Plant. Costs incurred incident to the issuance of long-term debt shall be charged to account 1140, Unamortized Debt Discount and Expense, or account 1240, Unamortized Premium on Debt, as applicable; costs incurred incident to the issuance of capital stock shall be charged to account 1151, Capital Stock Expense.

Note C: Do not include in this account expenses in connection with investigations by legislative bodies or cases to which the utility is not a party.

D C 1798. Insurance, Injuries and Damages

A. This account shall include the cost of insurance to protect the utility against the following losses and damages:

(1) Losses and damages to owned or leased property used in its water operations such as by fire, storm, burglary, boiler explosion, lightning, etc.

(2) Protection against claims for injuries or deaths to employees or others, or damages to the property of others, including public liability, property damage, boiler, casualty, employees' liability, etc.

(3) Other losses which occur in connection with water operations, and payments and expenses on account of damages for non-performance of contractual obligations.

B. Amounts may be accrued monthly sufficient to meet the probable liability for such losses, concurrent credits being made to account 1255, Reserve for Insurance, Injuries and Damages, in which case losses sustained shall be charged to the reserves. This includes payments to attorneys, investigators and adjusters, court costs, etc.

C. Reimbursements from insurance companies or others for expenses charged hereto on account of property damages or for injuries and damages, and insurance dividends or refunds shall be credited to this account.

Note A: If clearing accounts 1902 to 1905 are kept, the applicable items provided for in this account shall be included in such clearing accounts.

Note B: The utility shall so keep its records as to show the amount of coverage for each class of insurance carried, the property covered, the applicable premiums, and the distribution of the costs to specific operations or functions. If the utility carries reserves for self-insurance, it shall keep records to show the types of losses against which such reserves are maintained, and the basis of the accruals to the reserves for each risk covered.

D C 1800. Other General Expenses

A. This account shall include such items of expense applicable to the water department, not provided for in other accounts, as the cost of publishing and distributing annual reports to stockholders; advertising notices of stockholders' meetings; dividend and other corporate and financial notices of a general character; association dues; contributions for conventions and meetings of the industry; fees of transfer agents, registrars of stock and fiscal agents; director's fees; fees for filing annual reports and tariff schedules; commissions paid under agency sales contracts; expenses incurred in accident, welfare, educational and recreational work; cost of life insurance for employees when the utility is not the beneficiary; pensions payable currently to retired employees or their beneficiaries and the cost of advance provision for pensions to be paid to retired employees or their beneficiaries, except payroll taxes, (see general instruction ÷ 576.12); cost of employees' relief and benefits; and any other miscellaneous expenses connected with the general management and not otherwise provided for.

B. This account shall not include any charges representing amounts used or to be used for the purchase of securities of the accounting company or any associated company, whether contributed by the accounting company or deducted from salaries and wages of employees, unless and until such amounts have actually been realized and paid to the employees in cash or its equivalent subject to their free disposition. To the extent that the securities thus purchased have an actual market value, the amounts paid for them may be carried meanwhile in account 1114, Miscellaneous Investments and Special Funds; otherwise such amounts shall be charged to account 1538, Miscellaneous Income Deductions. (See general instruction ÷ 576.7.)

Note A: When the utility is the beneficiary of insurance on officers or employees, the cash surrender value shall be included in account 1133, Miscellaneous Current and Accrued Assets, and the excess of cost of the insurance over such cash surrender value shall be charged to account 1538, Miscellaneous Income Deductions.

Note B: No charges shall be made to this account or distributed to other accounts to cover advance provision for future pension payments, unless the controlling plan has been filed with the commission; and no charges shall be made in anticipation of discretionary pension payments in the future.

Note C: Records shall be kept so that the amounts paid for pensions and the amounts paid as advance provision for future pensions can be readily determined.

Note D: Upon adoption of an accrual plan of accounting, pension payments to employees retired before the adoption of such plan shall be charged to an existing pension reserve until such reserve is exhausted, unless any such existing reserve is eliminated by payment of an equivalent amount into the pension trust fund.

D C 1802. Operation and Maintenance of General Property

This account shall include the cost of operating and maintaining general buildings and general office furniture and equipment.

D C 1803. General Rents

A. This account shall include rent, covering the property of others used, occupied, or operated in connection with the general and administrative functions of the utility, such as general offices. Taxes paid on such property shall be charged hereto. (See also water plant instruction 577.6.)

B. If the leased property is used by more than one department of the utility, the rental (and taxes) shall be apportioned on an equitable basis to the departments making use of the property. If a portion of the rented property is subleased, the revenue therefrom shall be included in account 1611, Rent from Water Operating Property.

Note: If the commercial office and the general office occupy space jointly and the allocation of the rental to each office is not practicable, the entire amount of such rental may be included in this account.

D C 1805. Franchise Requirements

A. This account shall include payments to municipal or other governmental authorities, and the cost of materials, supplies and services furnished such authorities without reimbursement in compliance with franchise, ordinance, or similar requirements, provided, however, that the utility may charge to this account at regular tariff rates, instead of cost, water furnished without charge under provisions of franchises.

B. When no direct outlay is involved, concurrent credits for such charges shall be to account 1806, Duplicate Charges--Credit.

Note A: Taxes shall not be charged to this account. (See account 1507, Operating Taxes.)

Note B: The cost of plant, supplies, etc., given as an initial consideration for a franchise running for more than one year shall be charged to account 1302, Franchises and Consents.

D C 1806. Duplicate Charges--Credit

A. This account shall include concurrent credits for charges which are made to account 1805, Franchise Requirements, to the extent that such charges do not represent direct outlays. It shall also include concurrent credits for charges made to operating expense or other accounts of the water department for water or steam for heating for which there is no direct money outlay.

B. This account shall be so kept as to disclose the nature and amount of each item included herein.

D C 1807. Administrative and General Expenses Transferred--Credit

A. This account shall be credited with amounts recorded in the administrative and general expenses which are properly includible in construction costs, covering the portion of the pay and expenses of general officers, clerks, and others when engaged on construction work.

B. The records supporting this account shall be so kept as to show the basis of determining the amounts transferred to construction.

Note: See water plant instruction, section 577.3, subdivision (a) (3).

D C 1808. Joint Expenses--Debit

D C 1809. Joint Expenses--Credit

A. A joint facility for the purpose of this system of accounts is defined as any property occupied or used jointly by the utility and another or others under a definite arrangement whereby the actual costs are shared between or among the parties. Property of the utility occupied or used under a similar definite arrangement between the water department and a coordinate department or departments shall likewise be considered as a joint facility.

B. Amounts payable by the water department to others or to a coordinate department for joint facilities used, occupied, or operated in connection with water operations shall be charged to account 1808, Joint Expenses--Debit; amounts receivable under the arrangement shall be credited to account 1809, Joint Expenses--Credit.

C. These accounts shall also include interdepartmental rents receivable or payable even though such rents are not determined on the basis of costs of operation and maintenance of property jointly used.

D. The records supporting the entries to these accounts shall be so kept that the utility can furnish a complete explanation of the items

therein.

D C 1810. Stores, Shop and Laboratory Expenses

A. This account shall include the cost of labor employed and expenses incurred in the operation and maintenance of the water storerooms, shops and laboratories if such expenses are not allocated, either directly or through the medium of a clearing account, to the accounts benefited.

B. This account, when kept, shall include costs covered by the text and items listed in accounts 1902, Stores Expenses--Clearing, and 1905, Shop and Laboratory Expenses--Clearing, except depreciation, insurance, and rents. (See accounts 1503, 1798 and 1803.)

Note A: The cost of repairs to meters and other plant made at the shop shall not be included herein but in the accounts appropriate for such maintenance.

Note B: Stores, shop and laboratory expenses applicable to construction shall not be included in operating expenses.

D C 1811. Transportation Expenses

A. This account shall include the cost of labor employed and expenses incurred in the operation and maintenance of transportation equipment if such expenses are not allocated, either directly or through the medium of a clearing account, to the accounts benefited. For item list and optional accounting, see account 1903, Transportation Expenses--Clearing.

B. This account, when kept, shall include costs covered by the text and items listed in account 1903, Transportation Expenses--Clearing.

Note: Transportation expenses applicable to construction shall not be included in operating expenses.

CLEARING ACCOUNTS
REQUIRED

D C 1901. Charges by Associated Companies--Clearing

OPTIONAL

1902. Stores Expenses--Clearing

1903. Transportation Expenses--Clearing

1905. Shop and Laboratory Expenses--Clearing

Note: Utilities which do not use accounts 1902 to 1905 shall keep accounts 1810, Stores, Shop and Laboratory Expenses, and 1811, Transportation Expenses.

D C 1901. Charges by Associated Companies--Clearing (Required)

A. This account shall include all charges made by associated companies against the utility for any purpose whatsoever (except interest), including charges for management, supervision, purchasing, construction, accounting, engineering, legal, financial, rent, advertising, materials

and supplies, equipment and other property, commissions, taxes and other items, together with credits applicable thereto as provided in general instruction section 576.7.

B. This account shall be cleared by charging the appropriate accounts with the expenditures applicable thereto.

C. The records supporting this account shall be so kept as to show the nature of each charge together with the account or accounts to which each charge is cleared.

Note: The mandatory use of this account may be suspended upon order of the commission if equivalent information is readily obtainable from other records of the utility.

1902. Stores Expense--Clearing (Optional)

A. This account shall include the cost of labor and expenses incurred in the operation and maintenance of the storerooms (other than those identified only with a particular function) including storage, handling and distribution of materials and supplies.

B. Cash discounts shall be credited hereto when such discounts can not be applied to the cost of particular materials.

C. This account shall be cleared by adding to the cost of materials and supplies a suitable loading charge which will distribute the expense equitably over stores issues.

ITEMS

- (1) Adjustments of inventories of materials and supplies
- (2) Collecting and handling scrap materials in stores
- (3) Depreciation of storeroom equipment
- (4) Discount on materials, when not assignable to specific items
- (5) Freight, express, etc., when not assignable to specific items
- (6) Heat, light and power for storerooms and stores offices
- (7) Injuries and damages
- (8) Inspecting and testing materials and supplies, when not assignable to specific items
- (9) Insurance on materials and supplies and on stores equipment
- (10) Losses due to breakage, leakage, evaporation, fire and other causes. Credit any amounts received from insurance, transportation companies or others in compensation of such losses
- (11) Maintenance of stores equipment
- (12) Pay and expenses of storekeepers, clerks and others employed in store-rooms or in store offices
- (13) Purchasing agents' fees, portion applicable to items carried through this account
- (14) Purchasing agents' pay and expenses, portion applicable to items

carried through this account

(15) Rents (See also water plant instruction ò 577.6.)

(16) Transporting materials into storehouse, when not assignable to specific items

Note: Large differences in the accounts disclosed by inventories, which can readily be assigned to important classes of materials, shall be equitably adjusted among the accounts to which such classes of materials have been charged since the preceding inventory. Other differences shall be equitably apportioned among the accounts to which materials have been charged, or included in this account.

1903. Transportation Expenses--Clearing (Optional)

A. This account shall include the cost of labor and expenses incurred in the operation and maintenance of the water general transportation equipment, including direct taxes and depreciation on transportation equipment.

B. This account shall be cleared by apportionment to operating expense, water plant, or other accounts benefited on a basis which will distribute the expenses equitably. Credits to this account shall be made in such detail as to permit ready analysis.

ITEMS

(1) Depreciation of transportation equipment

(2) Feed and bedding for horses and mules

(3) Fuel and lubricants for vehicles (including sales and excise taxes thereon)

(4) Freight, express, drayage, etc., on fuel, repair parts, etc.

(5) Heat, light and power for garage and garage office

(6) Injuries and damages

(7) Insurance on garage equipment and transportation equipment including public liability and property damage

(8) License fees for vehicles and drivers

(9) Maintenance of transportation and garage equipment

(10) Operation of garages and stables

(11) Pay and expenses of drivers, mechanics, etc.

(12) Rent of garage buildings and grounds (See also water plant instruction ò 577.6.)

(13) Rent of vehicles and other rents

(14) Taxes, direct, such as on gasoline, oil, tires, etc.

(15) Tires, tubes and chains

1905. Shop and Laboratory Expenses--Clearing (Optional)

A. This account shall include the cost of labor and expenses incurred in the operation and maintenance of shops and laboratories of the

utility operations. The statement shall:

(1) Describe the circumstances in which cost estimates will be prepared and the procedures for awarding a contract which exceeds such an estimate. Such estimates, when prepared:

(i) Shall be related to market conditions and trends as well as the utility's own experience; and

(ii) Where competitive bidding is employed, shall remain confidential until after the bids are opened.

(2) Where competitive bidding is employed, specify the procedures used in preparing and maintaining lists of qualified bidders by geographical area, type of material or service provided, and degree of capability, including:

(i) The criteria used for including or excluding bidders;

(ii) A description of the circumstances in which all bidders on such a list not be solicited in instances where the utility uses competitive bidding; and

(iii) A provision that in the absence of such a list, all requests to be allowed to bid that are not honored, shall be reviewed within the utility.

(3) Where competitive bidding is employed, specify the procedure to be employed to ensure that sealed bids are opened at the time and place specified.

(4) Specify the procedure employed in making awards in the absence of bids or, where competitive bidding is employed, to a person other than the low bidder.

(5) Specify the procedures employed in reviewing contract expenditures, relating such expenditures to any cost estimate, the amount of the award and existing market conditions.

(6) Include a requirement for disclosure to the utility of any ownership or beneficial interest in potential suppliers by employees involved in specifying or procuring services, equipment and materials, which requirement shall provide that no employee in the purchasing department nor anyone with authority to review or approve a purchasing decision shall have such an interest, except in accordance with such rules as the utility may develop and file with this Commission.

.SO DOC 16C-585.2

NYCRR

585.2 Filing of changes in procedures.

Each such water-works corporation shall file with this commission any change in these procedures at least 30 days before they are to be effective, unless otherwise authorized by this commission.

586.1 Filing of proposed contract

586.2 Subcontract on cost-plus basis

586.3 Emergency contract

586.4 Quarterly filing of contract

586.5 Waiver of rule

.SO DOC 16C-586.1 NYCRR

Section 586.1 Filing of proposed contract.

(a) Every public utility company subject to the jurisdiction of this Commission shall file, in accordance with the requirements of § 3.5 of this Title, with this Commission one copy of every proposed cost-plus contract or agreement including those contracts or agreements in which the payment to be made by the utility is based on time and material consumed regardless of the number of units completed, for the construction, improvement or extension of its plant, works or system exceeding in amount \$100,000 in any calendar year, and a list of any other offers received, and such contract or agreement shall not become effective until it has been on file with this Commission for 30 days, or until the Commission has notified the utility that such contract or agreement may be made effective immediately. If during the 30 day period, the Commission determines that it is in the public interest for the contract or agreement for the work proposed to be performed to be let after public bidding, the Commission will notify the public utility company, and the filed contract or agreement will not become effective. In such circumstances the public utility shall proceed to make a public offering of the proposed work in accordance with the direction of the Commission.

(b) When the accumulated amount of all other such contracts or agreements awarded to a single contractor in any calendar year has exceeded \$100,000, a list of such contracts, including any other offers received, shall be filed, in accordance with the requirements of § 3.5 of this Title, with the commission by March 1 of the succeeding year.

.SO DOC 16C-586.2 NYCRR

586.2 Subcontract on cost-plus basis. In view of the fact that a so-called subcontract covering any part of the work to be performed under a cost-plus contract or agreement entered into by a public utility

company is, in effect, the contract or agreement of the public utility company within the meaning of § 115 of the Public Service Law, every such subcontract on a cost-plus basis, proposed to be let under a principal contract or agreement which is subject to § 586.1 hereof, shall be filed, in accordance with the requirements of § 3.5 of this Title, with the Commission in accordance with the requirements of provisions of such section. All such contracts or agreements shall contain suitable provisions to give effect to the provisions of this Part. This section shall not apply to a subcontract which provides by its terms that the maximum payment thereunder shall not exceed the sum of \$5,000.

.SO DOC 16C-586.3 NYCRR

586.3 Emergency contract. In case a storm, flood, accident or similar emergency requires that a contract or agreement be made without complying the foregoing provisions of this Part in order to maintain or restore the company's service, immediate notice shall be given to the Commission by telephone of the making of such contract or agreement, and a copy thereof shall be filed, in accordance with the requirements of § 3.5 of this Title, as soon as possible, but not later than 10 days after the making thereof, and such contract or agreement shall be exempted from the other provisions of this Part.

.SO DOC 16C-586.4 NYCRR

586.4 Quarterly filing of contract.

Every public utility company subject to the jurisdiction of this commission shall file with this commission quarterly, one copy of every contract or agreement for the construction, improvement, extension or maintenance of its plant, works or system exceeding in amount \$1,000,000 in any calendar year, and a list of any other offers received.

.SO DOC 16C-586.5 NYCRR

586.5 Waiver of rule. Any public utility company may apply to this commission for a waiver or modification of all or part of the requirements of this Part upon a showing that compliance therewith would be impracticable or unduly burdensome in connection with a particular project, contract or agreement.

600.8 Billing Disputes

.SO DOC 16C-600.1 NYCRR

Section 600.1 Deposits.

(a) Each and every telegraph corporation, telephone corporation and telegraph and telephone corporation holding subscriber deposits shall allow to each depositor simple interest on the amount deposited. The interest rate to be applied to the amount deposited shall be a composite yield of intermediate term, A-rated corporate bonds, as reported in financial publications, less costs of administering deposits of 1.75 per centum per annum. The rate shall be updated effective January 1st each year, based upon yield information available on the first Friday of October of the preceding year. The commission will issue an advisory letter which publicizes the information to assure consistency. Each corporation shall credit such interest to each depositor, by paying such interest in cash or deducting it from the amount of a bill for service at the time prescribed by law or more frequently.

(b) The prudent period of deposit retention referred to in Public Service Law section 117 may not exceed two years of nondelinquency in payment of bills rendered.

.SO DOC 16C-600.2 NYCRR

600.2 Notice of discontinuance--definitions.

As used in this Part:

(a) The term suspended or suspension shall mean the interruption of outgoing service only.

(b) The terms terminated and termination shall mean the interruption of both outgoing and incoming service.

.SO DOC 16C-600.3 NYCRR

600.3 Notice of discontinuance--time. (a) No telephone corporation shall suspend service for nonpayment of bills rendered for service, or for failure to post a required deposit, until:

(1) at least five days after written notice has been served personally upon the telephone subscriber;

(2) at least eight days after mailing written notice in postpaid wrapper to the telephone subscriber, addressed to such subscriber at premises where service is rendered; or

(3) at least five days after the telephone subscriber has either signed for or refused a registered letter containing written notice addressed to such subscriber at premises where service is rendered.

(b) No telephone corporation shall terminate service for nonpayment of bills rendered for service, or for failure to post a required deposit, until:

(1) at least 10 days after written notice has been served personally upon the telephone subscriber;

(2) at least 13 days after mailing written notice in postpaid wrapper

to the telephone subscriber, addressed to such subscriber at premises where service is rendered; or

(3) at least 10 days after the telephone subscriber has either signed for or refused a registered letter containing written notice, addressed to such subscriber at premises where service is rendered.

(c) Notwithstanding any provision of this section, no telephone corporation which has suspended service for nonpayment of bills rendered, or for failure to post a required deposit, shall terminate such service until five days after the date on which suspension of service shall have occurred.

(d) No telephone corporation shall suspend or terminate service for nonpayment of bills not actually rendered, except with the consent of the subscriber.

(e) If the telephone subscriber has specified to the company in writing an alternate address for billing purposes, the notice authorized under this section shall be sent to such alternate address in lieu of to the premises where service is rendered.

(f) No telephone corporation shall discontinue service for nonpayment of bills rendered, or for failure to post a required deposit, unless it shall have verified that payment has not been received through the end of the notice period required by this Part; or that payment has not been posted to the customer's account as of the opening of business on the day disconnection occurs.

.SO DOC 16C-600.4

NYCRR

600.4 Notice of discontinuance--format. (a) Every notice indicating suspension or termination of service shall:

(1) clearly indicate in nontechnical language and, where practicable, in a bilingual format:

- (i) the reason for suspension or termination of service;
- (ii) the total amount required to be paid by the subscriber before service is restored;
- (iii) a method whereby the subscriber may tender payment of the full sum due and owing, including any required deposit, to avoid the discontinuance of his service;
- (iv) the availability of company procedures to consider customer complaints prior to discontinuance, including the address and phone number of the office of the telephone company the subscriber may contact in reference to his account; and
- (v) the earliest date on which suspension or termination may be attempted.

.SO DOC 16C-600.5

NYCRR

600.5 Suspension or termination for abandonment of facilities. (a) No telephone corporation shall suspend or terminate service on the grounds that a subscriber's facilities have been abandoned or are being used by unauthorized persons unless such corporation shall first determine by an on-premises inspection, or such other means as are necessary, that such facilities have in fact been abandoned or are being used by unauthorized persons.

(b) In the event that telephone service is suspended or terminated in accordance with subdivision (a) of this section, and that service is subsequently restored to the same subscriber at the same location:

(1) no charge shall be made for the period during which service had been suspended or terminated; and

(2) no charge shall be made for the restoration of that service if suspension or termination was in error.

.SO DOC 16C-600.6

NYCRR

600.6 No discontinuance on Saturday, Sunday, public holiday, or day on which the main business office of the company is not open for business.

No telephone corporation shall discontinue service to any person for nonpayment of bills or for failure to post a required deposit on a Saturday, Sunday, public holiday, or day on which the main business office of the company is not open for business. For purposes of this section, "public holiday" shall refer to those holidays enumerated in the General Construction Law.

.SO DOC 16C-600.7

NYCRR

600.7 No additional notice required when payment by check is subsequently dishonored. Receipt of a subsequently dishonored negotiable instrument in response to a notice of discontinuance shall not constitute payment of the customer's account, and no telephone corporation shall be required to issue additional notice prior to discontinuance.

.SO DOC 16C-600.8

NYCRR

600.8 Billing disputes. (a) Every telephone corporation shall establish procedures whereby any complaint filed with such corporation by any customer thereof in regard to any bill for service rendered, or any deposit required, will be promptly investigated in an appropriate and fair manner, with the result of such investigation being promptly reported to the complaining customer. Such procedures shall allow the acceptance and processing of complaints submitted in simple manner and form. Regardless of whether a notice of discontinuance has previously been sent, the utility's procedures shall provide that, pending the utility's investigation, it shall not discontinue service or issue a

notice of discontinuance; provided, however, the consumer may be required to pay the undisputed portion of a disputed bill or deposit to prevent discontinuance or the issuance of a notice of discontinuance.

(b) If, after the completion of such an investigation, the utility determines that the disputed service has been rendered, or that the disputed charge or deposit is proper, in whole or in part, the utility may require the full bill or deposit or the appropriate portion thereof to be paid; in such event, appropriate notice of the determination shall be given to the customer, and where notice of discontinuance of service has previously been sent, or is served with the determination, such notice shall include a statement advising the customer of the availability of the commission's complaint handling procedures. The utility's procedures may provide for discontinuance of service if the customer fails to pay such required amount after receipt of proper notice, provided that a customer's service will not be discontinued until at least five days after notice of the utility's determination, where personal service is made upon the person supplied, or at least eight days after mailing of such a notice; and provided further that no discontinuance may occur if so precluded by the commission pursuant to section 11.2(d) of this Title.

(c) The utility's procedures shall provide that, where the complaint procedures of the commission pursuant to Part 12 of this Title have been invoked and it is determined that the disputed service has been rendered, or that the disputed charge or deposit is proper, in whole or in part, a customer's service will not be discontinued for failure to pay the amount found appropriate until at least 15 days after notice of the commission's determination.

NYCRR

602.1 Definitions.

The following definitions apply to Part 602, Consumer Relations, and Part 603, Service Standards Applicable to Telephone Corporations:

(a) Service Provider - A telephone corporation certified in New York State with the authority and tariff to provide local exchange service using either its own or leased facilities.

(b) Basic Local Service - The provision of access to: one party line service, local/toll calling, local usage, tone dialing, emergency services, assistance services, telecommunications relay services, directory listings, privacy protections and non-published service associated with the public switched network.

(c) Local Exchange Service - Any form of switched telecommunications provided within a defined geographic area known as the local calling area.

(d) Customer Service Center - Any functional entity where consumers can initiate communication with the service provider for installation, billing, repair, operator and other services.

(e) Access Line - A telecommunications channel of varying size with an associated telephone number.

(f) Business Office - Any functional entity which accepts service orders, billing inquiries and/or provides consumer information.

(g) Repair Office - Any functional entity which receives trouble reports.

(h) Trouble - A trouble is an impairment of the telephone network, or

a deviation from its design specifications.

(i) Customer Trouble Report - The record of when the repair office personnel receives notification of a trouble or perceived trouble by a subscriber, third party, or employee acting as a subscriber or when other employees receive notification of a trouble or perceived trouble by a subscriber, third party, or employee acting as a subscriber and refers the report to the repair office.

(j) Initial Report - The first customer trouble report associated with a specific trouble for which there is no pending report.

(k) Out-Of-Service - A classification of a trouble report where the customer indicates either: (1) an inability to complete incoming or outgoing calls; or (2) the presence of interference which causes connected calls to be incomprehensible. Other service difficulties (slow dial tone, busy circuits, etc.) shall not be considered out-of-service conditions.

(l) Service Affecting - All trouble reports not categorized as out-of-service will be considered service affecting.

(m) Final Trunk Group - The last choice group of common interoffice communications channels for the routing of local, operator and/or toll calls.

(n) Operator Assistance - The act of providing a consumer with help in placing a call including collect, third party billed, person-to-person and emergency calls.

(o) Answer - The point in time when a call has been delivered to a representative who is ready to render assistance and/or accept the information necessary to process the call. An acknowledgment that the customer is on the line does not constitute an answer.

(p) Subsequent Report - Any customer trouble report that is received prior to the closing of its associated initial report.

.SO DOC 16C-602.2 NYCRR

602.2 General Provisions.

As indicated by their wording, a number of regulations in this Part prescribe the normal procedures and practices to be directed in good faith by the service provider. However, the regulations in this Part are not intended to govern the implementation of such procedures in individual instances. The execution or nonexecution of such procedures and practices in individual instances is not the sole indicator of whether the service provider has provided adequate service to a particular consumer or group of consumers.

.SO DOC 16C-602.3 NYCRR

602.3 Customer Service Centers.

(a) Service providers shall ensure that customers have convenient access, by a toll free telephone number or in person, to customer service centers.

(b) In instances where automated responses are used to handle billing or repair issues, service providers shall configure their menu system such that a consumer is able to be routed to a representative for billing or repair issues within 60 seconds from the time the automated response begins. In addition, service providers may use additional means of access (e.g., the Internet) that are not subject to this provision.

(c) Service providers shall provide notice to their customers and to the public as to the means of contacting their customer service centers by notice on the bill and other appropriate means.

(d) Customer service centers ordinarily shall be accessible to consumers during the normal working hours in the community being served and at such other times and in such other places as may be warranted in Sections 602.6(d) and 602.7(b).

(e) Service providers shall strive to provide trained and qualified customer contact personnel.

.SO DOC 16C-602.4

NYCRR

602.4 Public Information.

Access to the following information shall be made available upon request:

(a) Rate information applicable to the area served by the service provider, as provided by Part 630 of this title.

(b) Where a provider's rates are based upon rate area boundaries, maps, listings or other formats used by the provider showing rate area boundaries sufficiently detailed that mileage or zone charge can be determined.

(c) Information pertaining to changes in services and rates as proposed in an informational filing or a pending tariff or rate filing.

(d) Upon receipt of a request from a consumer for copies of the above described information, the service provider will provide a single copy of the information requested, up to 25 pages, without charge.

.SO DOC 16C-602.5

NYCRR

602.5 Service Orders.

(a) Service providers shall receive and respond to applications for tariffed services in a timely manner. Upon the request of a consumer, each service provider shall provide an explanation of the rates, charges and provisions applicable to the services available, respond to questions the consumer may have, and provide additional appropriate information to assist the consumer in obtaining the communication

service(s) that meet the consumer's needs.

(b) Where special charges for extraordinary construction, maintenance, replacement costs, expenses or overtime work are not specifically set forth in a service provider's tariff, the consumer will be advised of the options available. If the service provider is to perform any such work for a special charge, the service provider shall offer the customer the option of accepting a good faith estimate of the charge to be levied, or of being billed on an actual cost basis. Once an estimate is accepted by the customer it will become binding on both parties, and the customer pays the estimated charge whether the actual cost is greater or less than the estimate.

(c) Service providers shall notify customers of connection fees and provide an estimated first bill, not reflecting usage charges, prior to processing the customer's request.

(d) Each service provider shall inform new residential customers of a 60 day grace period whereby such consumer may select a different type of basic local flat rate service or basic local measured rate service from that provider without incurring any additional connection or installation charges for basic local service. A grace period applies only when the consumer actually incurred an installation charge for basic local service.

(e) (1) Normally, the service provider shall offer a consumer applying for its initial basic local exchange service an installation appointment interval (e.g., the period of time that a premise visit is to take place) within five working days.

(2) After such an offer, the consumer may nonetheless agree to other terms that better meet the needs of the consumer and the provider (e.g. installation appointments for either morning or afternoon).

(3) Prior to an appointment, arrangements to access a necessary third party's premises shall be discussed with the consumer.

(f) Normally, when a service provider cannot meet a commitment date to complete an order, the provider shall make a reasonable effort to advise the applicant of the reason for the delay, and probable date service will be provided.

.SO DOC 16C-602.6

NYCRR

602.6 Billing.

(a) Service providers shall clearly list all charges and credits on customers' bills, which shall be issued monthly unless provided otherwise by tariff. Local service charges may be billed one month in advance and may be listed as a single flat fee. All toll charges shall be itemized to allow consumer identification unless provided otherwise

by tariff.

(b) Credit shall be granted for any call for which a charge applies when the consumer has reported that a wrong number was reached or for that portion of a call the consumer has reported as inadequate for communication, unless there is reason to believe that an adequate connection to the desired party was effected.

(c) Service providers shall require that agents authorized to receive bill payments on their behalf normally mail or report consumers' payments within one business day.

(d) Service providers shall have a representative available for the purpose of explaining charges on bills and to adjust bill errors.

(e) Upon reasonable consumer request, each service provider shall provide itemized statements of charges, if feasible, and if a customer disputes a bill, available call detail bill information shall be provided at no charge. However, requests for detailed bill information normally bulk billed may be provided at an additional charge pursuant to tariff.

.SO DOC 16C-602.7

NYCRR

602.7 Consumer Complaints and Trouble Reports.

(a) Service providers shall provide full and prompt investigation of complaints, oral or written, received either through normal reporting channels or through the Commission, and appropriate responses shall be made with respect to complaints.

(b) Service providers shall have a representative available to receive customer trouble reports at all hours.

(c) Troubles of an emergency nature shall be cleared at all hours, consistent with the bona fide needs of consumers and the personal safety of service provider personnel.

(d) All other out-of-service troubles not requiring unusual repairs shall normally be cleared within 24 hours excluding Sundays and holidays.

(e) Commitments made with consumers should be kept. In the event of unavoidable change by the service provider, such as if unusual repairs are required, or rehabilitation programs or other factors preclude clearing of reported trouble promptly, reasonable attempts shall be made to notify the customer as to when the trouble will be cleared.

(f) During major service outages of extended duration, the service provider shall make every effort to inform the general public of the details of the outage, including the areas affected and a schedule for expected service restoral. Whenever reasonable and practical, affected offices shall be intercepted and callers advised that a service outage

has taken place, in accordance with accepted industry standards.

(g) All local service providers shall assist consumers reporting obscene, threatening or harassing calls, to help in eliminating such calls.

.SO DOC 16C-602.8

NYCRR

602.8 Operator Services.

(a) Each service provider shall provide access from its exchanges at all hours to local assistance operators who shall be capable of connecting calls to appropriate emergency services and/or other operator services normally provided by local exchange companies or their designees, if the service provider is responsible for handling the call.

(b) All telephone corporations, either individually or in concert with other telephone corporations operating within the State, shall be responsible for insuring the provision of a relay system to enable communications between persons with hearing or speech disabilities, who use non-voice terminal devices, and persons of normal hearing and or speech who use conventional telephones. The system shall operate on a 24-hour basis. All telephone corporations shall provide annual notice to advise customers of this service. Pertinent information regarding the relay system shall be included in telephone directories.

(c) All service providers shall provide network overflow to local operators on all originating trunking that carries emergency calls destined for Enhanced 911 emergency report centers. Each such call overflowing to the operator shall be identified as an emergency call, and the operator shall have Automatic Number Identification on the telephone line used by the calling party. As an alternative to provision of overflow to the operator on an originating basis, service providers may install originating trunking from end offices to Enhanced 911 emergency report centers in such a manner that blocking on such trunks is engineered for less than half the normal blocking design of the public switched network. On a terminating basis from the last central office to the emergency report center, overflow to the operator (including Automatic Number Identification and an indication that the call was originally destined for an emergency center) shall always be provided.

.SO DOC 16C-602.9

NYCRR

602.9 Intercept.

(a) Intercept shall consist of operator intercept or a suitable recorded announcement, providing sufficient information to callers to indicate the reasons for being intercepted as well as directions to assist them in completing the call.

(b) The service provider shall normally provide intercept service for the following minimum periods:

(1) In case of a customer-initiated residence number change, either sixty days or the remaining life of the normal alphabetical directory (including local directories), published by the serving service provider or on its behalf, in which the old number appears plus thirty days, whichever is shorter.

(2) In case of customer-initiated business number change, either sixty days or the remaining life of the normal alphabetical directory (including local directories), published by the serving service provider or on its behalf in which the old number appears plus thirty days, whichever is shorter.

(3) In case of a company-initiated number change, one hundred and eighty days or the remaining life of the normal alphabetical directory (including local directories), published by the serving service provider or on its behalf, in which the old number appears plus thirty days, whichever is longer. If at the time of change the new number is noted in all of the aforementioned current directories, intercept will be provided for thirty days.

(c) Service providers shall strive to update intercept records within 24 hours of a number change.

(d) Each service provider shall provide intercept on calls to non-working numbers, codes, vacant levels, etc., where reasonable and practical.

(e) The local service provider shall not impose charges for intercepted calls.

.SO DOC 16C-602.10

NYCRR

602.10 Directories.

(a) All service providers shall publish directories, or cause their numbers to be published. Directories shall be regularly published at approximately yearly intervals. The interval between directories shall not exceed 15 months without express Commission approval. The form of directories shall ordinarily conform to the following criteria:

(1) A directory shall be in such form and list such information, as will permit the numbers of local exchange customers in the area covered by the directory to be obtained, except for public telephones and numbers unlisted at a customer's request.

(2) Information pertaining to emergency calls to such agencies as the police and fire departments shall appear conspicuously in the opening pages of the directory.

(3) Instructions concerning the placing of local and long distance

calls, shall appear conspicuously in the opening pages of the directory. This section shall include access codes that can be used for placement of long distance calls, for those interexchange carriers agreeing to have their codes published. Directories will also include a telephone number for contacting each local service provider that serves the area covered by the directory at no additional cost to the service provider being listed.

(4) The introduction to the directory shall instruct customers to call the local service provider from which they receive service for information on billing, party lines, annoyance call procedures, emergency calling procedures and how to obtain tariff information.

(b) Each service provider shall distribute at no charge to its customers within a local exchange area, a copy of the local exchange directory for that area, and one additional copy shall be provided for each working telephone number upon request. A copy shall be filed with the Commission.

(c) A service provider shall furnish its directory databases to all directory assistance service providers on terms and conditions no less favorable than the service provider furnishes such databases to its own or affiliated directory assistance service operations.

(d) In the event of an error in a number published in the directory, the service provider shall intercept calls to the published number for the life of the directory where such number is not already in service. Where the published number is in service, the party served by it shall be given appropriate transfer information, and also the opportunity for a number change (at no charge). In that event, the normal practice shall be to place the published number on intercept, for the life of the directory listing plus 30 days.

(e) Reasonable advance notice shall normally be given to the consumers affected when a service provider has cause to change a large group of numbers, even if such changes coincide with a directory issuance.

NYCRR

PART 603

SERVICE STANDARDS APPLICABLE TO TELEPHONE CORPORATIONS

(Statutory authority: Public Service Law §§ (4)(1) and 94(1)
Sec.

603.1 General Provisions

603.2 Measurements

603.3 Metrics and Performance Thresholds

603.4 Reporting Requirements

603.5 Service Interruptions

.SO DOC 16C-603.1

NYCRR

603.1 General Provisions.

(a) This part shall apply to telephone corporations that provide local exchange service.

(b) As indicated by their wording, a number of the regulations in this Part prescribe the normal procedures and practices to be directed in good faith by the service provider. However, the regulations in this Part are not intended to govern the implementation of such procedures in individual instances. The execution or non-execution of such procedures and practices in individual instances is not the sole indicator of whether the service provider has provided adequate service to a particular consumer or group of consumers.

(c) The standards set forth herein relate to the quality of service under normal operating conditions. They do not establish a level of performance to be achieved during periods of emergency, catastrophe, natural disaster, severe storm or other events affecting large numbers of consumers nor shall they apply to extraordinary or abnormal conditions of operation, such as those resulting from work stoppage, civil unrest, major transportation disruptions or other events beyond a service provider's control.

.SO DOC 16C-603.2

NYCRR

603.2 Measurements.

(a) Service providers shall gather accurate data consistent with the definitions contained in Section 602.1 for those measures indicated by subsection 603.4(c) and:

(1) keep performance records and retain them as specified by Part 651 for each entity level as defined in subsection 603.3 and maintained in a manner that permits audit by Commission staff, and

(2) measure answer time performance as defined in subsection 603.3, for customer service centers that receive a monthly average of more than 275 calls per working day for three consecutive months. Excluded from this provision is any group of specialized business account representatives established to address the needs of a single large business customer, or a small group of such customers.

.SO DOC 16C-603.3

NYCRR

603.3 Metrics and Performance Thresholds.

(a) This section sets forth the metrics and performance thresholds that each service provider is expected to meet or exceed related to maintenance service, installations, network performance and answer time.

(b) (1) Customer Trouble Report Rate. This is composed of two

metrics. The first metric is defined as the number of initial customer trouble reports per hundred access lines per month and has a performance threshold of 5.5 or less for each central office. The second metric is applicable to service providers with 7 or more central offices, and is defined as the percentage of a service provider's total central office entities that perform at or below 3.3, and has a performance threshold of at least 85%.

(2) Reports included in the Customer Trouble Report Rate are limited to troubles associated with the regulated components of residential, business, Centrex and pay telephone service of the service provider's customers, and also includes all regulated features associated with these services except voice mailboxes.

(3) Customer trouble reports received as a result of any network failure are included in the report rate.

(4) Separate trouble reports should be recorded and included in the customer trouble report rate for multiple-line customers, for each access line identified by the customer.

(c)(1) Percent Out-Of-Service Over 24 Hours. This metric is defined as the monthly percentage of customer trouble reports classified as out-of-service which are not cleared within 24 hours. The performance threshold for each maintenance administrative entity is 20% or less.

(2) Only trouble reports included in the customer trouble report rate shall be used to determine the percent out-of-service over 24 hours.

(d) (1) Percent Service Affecting Over 48 Hours. This metric is defined as the monthly percentage of customer trouble reports classified as service affecting which are not cleared within 48 hours. The performance threshold for each maintenance administrative entity is 20.0% or less.

(2) Only trouble reports included in the customer trouble report rate shall be used to determine the percent service affecting over 48 hours.

(e) Percent Initial Basic Local Exchange Service Line Installations Completed Within Five Days. This metric is defined as the monthly percentage of initial basic local exchange service line installations completed within five working days (following the day the order is received) and has a performance threshold of 80.0% or greater for each installation administrative entity. This provision shall apply to the primary installation of service as follows: (i) the initial residential line; or (ii) the initial business customer order of five lines or less.

(f) (1) Percent Installation Commitments Missed. This metric is defined as the percentage of installation commitments missed per month

and has a performance threshold of 10.0% or less for each installation administrative entity.

(2) A missed installation commitment occurs when initial basic local exchange service is not provided to the consumer's interface on or before the end of the day of the appointment interval with the customer except when due to consumer fault or other condition as defined in subsection 603.3(f)(3).

(3) For purposes of this Section, the terms Consumer Fault and Other are defined to include the following:

(i) Consumer fault occurs when during the appointment interval, the consumer is not ready, there is not access to or there exists unsafe conditions at the consumer's premises, or on or before the commitment date the consumer requests a later date.

(ii) Other circumstances such as set forth in subsection 603.1(c) or the need to reassign a significant portion of the service provider's installation work force in order to re-establish service to existing customers who lost service as a result of circumstances set forth in subsection 603.1(c).

(g) Percent Final Trunk Group Blockages. This metric is defined as the monthly percentage of blocked calls on any local, toll and local operator final trunk groups and has a performance threshold of 3.0% or less for each final trunk group.

(h) (1) Business Office Answer Time. This metric is defined as the monthly percentage of consumer calls of the business office answered within 30 seconds. The performance threshold for each administrative entity is 80.0% or greater.

(2) Calls answered, 15% of calls abandoned, and 10% of calls blocked or routed to an intercept message are to be included when determining the total number of calls to be answered.

(i) (1) Repair Office Answer Time. This metric is defined as the monthly percentage of consumer calls for repair office service answered within 30 seconds. The performance threshold for each administrative entity is 80.0% or greater.

(2) Calls answered, 15% of calls abandoned, and 10% of calls blocked or routed to an intercept message are to be included when determining the total number of calls to be answered.

(j) Operator Assistance Answer Time. Service providers may elect to report operator assistance answer time under either (i) or (ii) below.

(i) This metric is defined as the monthly percentage of calls for operator assistance service answered within 10 seconds. The performance threshold for each administrative entity is 90.0% or greater.

(ii) This metric is defined as the monthly average speed of answer of calls for operator assistance. The performance threshold for each administrative entity is 3.0 seconds or less.

(iii) For purposes of calculating performance under (i) above, count those calls answered, 15% of calls abandoned, and 10% of calls blocked or routed to an intercept message when determining the total number of calls to be answered.

(k) The following table summarizes the foregoing metrics and performance thresholds.

METRIC	PERFORMANCE THRESHOLD (Monthly)
Maintenance Service:	
Customer Trouble Report Rate (Initial Reports)	
Per individual central office entity	5.5 or less
Percentage of total entities (for those providers with 7 or more offices)	
at 3.3 or less	85.0 or more
Percent Out-of-Service Over 24 Hours	20.0 or less
Percent Service Affecting Over 48 Hours	20.0 or less
Installation Performance:	
Percent Initial Basic Local Exchange Service Line Installations Completed Within 5 Days	80.0 or greater
Percent Installation Commitments Missed	10.0 or less
Network Performance:	
Percent Final Trunk Group Blockages	3.0 or less
Answer Time Performance:	
Business Office Answer Time	
% Answered within 30 sec.	80.0 or greater
Repair Office Answer Time	
% Answered within 30 sec.	80.0 or greater
Operator Assistance Answer Time	
% Answered within 10 sec.	90.0 or greater
Average Answer Time in sec.	3.0 or less
.SO DOC 16C-603.4	NYCRR

603.4 Reporting Requirements.

(a) The Director of the Office of Communications shall issue guidelines prescribing the format, content and reporting times (except where otherwise prescribed herein) of each of the reports required pursuant to this Part. The Director's guidelines shall be reasonable, practical, give due consideration to the format of the reports utilized

by the service providers in the operation of their business, and be subject to de novo review by the Commission in the event of a dispute.

(b) Each report shall arrive at the Commission office no later than 30 days following the end of the report period (or such shorter interval as may be reasonable and practical and agreed upon between the Director of the Communications Division and the service provider).

(c) Unless otherwise specified by the Director of the Communications Division, the following terms for service performance shall apply:

(1) Service providers with 500,000 or fewer access lines in service shall only report on Customer Trouble Report Rate.

(2) Service providers with over 500,000 access lines in service shall report on all of the service metrics of Subsection 603.3.

(d)(1) For all the service quality metrics subject to reporting under Subsection 603.4(c) except Customer Trouble Report Rate and Percent Final Trunk Group Blockages, whenever a performance measure is not at or better than the performance threshold for the current month and any two of the previous four months, a service provider shall automatically submit to the Commission staff a Service Inquiry Report, as defined in Subsection 603.4(e).

(2) For Customer Trouble Report Rate, a service provider shall automatically submit to the Commission staff a Service Inquiry Report whenever an individual central office entity experiences 5.5 reports per 100 lines or greater for the current month and any two of the previous four months, or if a service provider has 7 or more central offices and less than 85% of its central office entities experience 3.3 reports per 100 lines or less for the current month and any two of the previous four months.

(3) For Percent Final Trunk Group Blockages, a Service Inquiry Report shall automatically be filed whenever performance is not at or better than 3.0 percent for three consecutive months.

(4) In addition, Commission staff may request a Service Inquiry Report where deemed appropriate.

(e) A Service Inquiry Report means a report which provides an explanation for the condition giving rise to the report, where readily determinable, and the number of consumers affected. It shall further include plans for corrective action including expectations of restoring service to adequate levels, or an explanation of why the corrective action details do not apply in this specific instance. The report shall be filed within 21 calendar days of a qualifying event as defined in Section 603.4(d). Addenda will be made to the report as necessary if the reporting service provider identifies important additional information

and/or substantially modifies its corrective action plan as described in the Report.

(f) A service provider may request an exemption from any or all of the reporting requirements of Section 603.4, if that provider can demonstrate that the services are provided through the resale of another service provider's tariffed services or purchase of another service provider's Unbundled Network Elements (UNEs) over which it has no direct control. The Director of the Office of Communications will grant or deny such exemption requests on a case-by-case basis.

.SO DOC 16C-603.5

NYCRR

603.5 Service Interruptions.

(a) Each service provider shall establish and implement procedures regarding the construction, operation, and maintenance of its network, which are intended to minimize service failures, cable cuts, sudden increases in traffic, employee absences, fires, severe storms, and floods and which are intended to maintain, to the extent practical and reasonable, continuous operation of its service in the event of commercial power loss, except where such power is provided by the consumer.

(b) In executing section 603.5(a), each service provider is expected to:

(1) Maintain emergency contingency plans designed to assist personnel to prepare for emergencies, perform repairs and service restorals in the aftermath of such events, and assess company performance and identify opportunities for improvement after conditions have been normalized. An original copy of each service provider's emergency contingency plan and any subsequent updates shall be filed with the Director of the Office of Communications. The names and telephone numbers of individuals and any information which, in the opinion of the service provider, could compromise its ability to protect the network against vandalism, terrorist acts, or other potential threats to the network, may be redacted from the copies of the emergency contingency plans and updates filed with the Director of the Office of Communications pursuant to this Section.

(2) Report major service interruptions to Commission staff per guidelines issued by the Director of the Office of Communications pursuant to Subsection 603.4(a).

(3) Be guided by accepted industry guidelines and best practices, such as the findings and recommendations of the FCC's Network Reliability Councils, relating to fiber optic, signaling, switching, digital cross-connect and power systems, 911, fire prevention, mutual aid and

restoration, performance, interconnections, changing technologies, emergency communications, and other topics related to network reliability.

(c) In the event that service must be interrupted for purposes of working on the lines or equipment, the service provider's work scheduling procedures shall provide that an attempt be made to do the work at a time which will cause minimal inconvenience to consumers and, where reasonable and practical, to notify consumers in advance of the interruption. The service provider's procedures shall make provision for the availability of required emergency services for the duration of the interruption.

(d) On lines that have been voluntarily suspended or temporarily suspended for non-payment, access should continue to be provided to emergency services such as 911 or to an operator for emergency calling during the suspension period.

NYCRR

Section 604.1 Definitions. Unless the context otherwise requires, as used in this Part and Part 608 of this Title:

(a) The term distribution facility means the telephone cable, wire and associated hardware used to provide service to one or more customers;

(b) The term feeder facility means connecting cable, conduit or poles that are installed between a telephone switching station and distribution facilities outside, within or through a residential

subdivision;

(c) The term underground telephone facilities means a system in which all cable, service wire, conduit and manholes are placed below ground, either direct buried or in conduit, as specified needs dictate, and may include:

(1) rear wall cable placed on row houses; and
(2) pedestal terminals necessary to facilitate installation, operation and subsequent maintenance of the underground distribution system.

(d) The term applicant means a developer, builder, person, partnership, association, corporation or governmental agency applying for construction of telephone facilities.

(e) The term residential building means a structure enclosed within exterior walls or fire walls which is built, erected and framed of component structural parts and is designed for permanent residential occupancy.

(f) The term multiple occupancy building means a structure (including row houses) enclosed within exterior walls or fire walls which is built, erected and framed of component structural parts and is designed to contain four or more individual dwelling units for permanent residential occupancy.

(g) The term residential subdivision means a tract of land divided into five or more lots for the construction of five or more new residential buildings or the land on which new multiple occupancy buildings are to be constructed, the development of either of which has been approved (or was required to be approved) by governmental authorities having jurisdiction over land use, which authorities include:

(1) the Department of State, pursuant to article 9-A of the Real Property Law;

(2) the Department of Environmental Conservation, pursuant to article 15, Titles 5, 15 and 27, article 17, Title 15 and article 24 of the Environmental Conservation Law;

(3) The Adirondack Park Agency, pursuant to sections 809 and 810 of the Executive Law and article 15, Title 27, and article 24 of the Environmental Conservation Law;

(4) any Department of Health, pursuant to article 11, Title 2 of the Public Health Law;

(5) counties, pursuant to section 239-d(7) of the General Municipal Law;

(6) cities, pursuant to sections 32, 33 and 34 of the General City Law;

(7) villages, pursuant to section 179-k, 179-l and 179-m of the Village Law; and

(8) towns, pursuant to sections 276, 277 and 278 of the Town Law.

(h) The term public R/W means the area within the territorial limits of any street, avenue, road or way that is for any highway purpose under the jurisdiction of the State of New York or the legislative body of any county, city, town or village, that is open to public use and that may be used for the placement of utility facilities.

(i) The term R/W (right-of-way) means a right to pass over, occupy or use another's land for placing and maintaining utility facilities.

(j) The term new construction means the installation of new telephone, distribution or feeder facilities on any R/W where no overhead telephone facilities previously existed.

(k) The term VSR means a visually significant resource:

(1) designated primarily or exclusively because of its exceptional, outstanding, significant, special or unique scenic quality, pursuant to State or Federal enabling legislation; and

(2) listed in section 608.2(h) of this Title.

(l) The term Commission means the Public Service Commission of New York State.

(m) The term utility means a telephone corporation subject to the jurisdiction of the Commission.

.SO DOC 16C-604.2

NYCRR

604.2 Obligations of applicants and utilities.

(a) Within an applicant's residential subdivision, each utility shall construct, own, operate and maintain underground distribution and feeder facilities along public R/W and on public land and private property across which a R/W satisfactory to such utility is obtained.

(b) Before construction may proceed, the applicant shall first have:

(1) either:

(i) delivered to the utility, free from cost, any necessary R/W agreements; or

(ii) paid in advance or agreed in writing to pay the utility any charge relating to the utility's acquisition of the necessary R/W agreements, so long as the applicant indicates to the utility in writing that the applicant has been unable to obtain such agreements;

(2) in the case of nonresiding applicants, cleared any R/W necessary for the provision of utility service, at no charge to the utility, of tree stumps, brush, and other obstructions and graded such R/W to within six inches of final grade where telephone facilities will be installed;

or

(3) in the case of nonresiding applicants, provided a survey map certified to by a licensed professional engineer or land surveyor and

certified to as final by the applicant, showing the location of each dwelling (if known), lot, sidewalk and roadway, if requested to do so by the utility;

(4) in the case of a nonresiding applicant, placed, and agreed to continue to maintain, survey stakes indicating grade and property lines; and

(5) in the case of a nonresiding applicant, furnished to the utility, or agreed to furnish, a map showing the location of all existing and proposed underground facilities as soon as the location of such facilities is known.

(c) In the case of a nonresiding applicant, the applicant shall maintain the required clearance and grading during construction by the utilities.

.SO DOC 16C-604.3

NYCRR

604.3 New construction of underground facilities in residential subdivisions.

(a) This Part applies to the new construction of distribution and feeder facilities within residential subdivisions. Nothing in this Part shall be construed to compromise the ability of a state or local agency to require underground facilities in the exercise of its land use or environmental protection authority.

(b) Any distribution or feeder facility necessary to furnish permanent telephone service to one or more multiple occupancy buildings (including four or more dwelling units) shall be installed underground and any such facility necessary to furnish permanent telephone service within a subdivision in which it is planned to build five or more new residential buildings shall be installed underground if:

(1) the subdivision will require no more than 200 trench feet of facilities per dwelling unit planned within the subdivision; or

(2) a utility's tariff provides for such underground service without contribution; or

(3) a governmental authority with jurisdiction to do so has required undergrounding; or

(4) an applicant requests undergrounding.

Note: The number of dwelling units is the criterion to be used to determine whether installation is required to be underground. In order to ascertain the number of dwelling units, it is necessary to consult the approved subdivision map to determine how many dwelling units are planned. Each lot shown on the map should, in the case of a single family dwelling,

be considered to contain one dwelling unit unless there is sufficient contrary evidence to render it unlikely that each lot will contain a separate dwelling unit (e.g., a foundation is constructed occupying two lots). The measurement of trench footage should be the shortest distance required to serve the homes within the subdivision, consistent with the utility's obligation to provide safe and adequate service.

(c) Upon receipt of a proper application, the utility shall inform the electric company and cable television company serving the area in which the residential subdivision is located of the receipt of such application. Upon compliance by the applicant with the requirements of this Part, the utility shall install underground telephone distribution facilities with sufficient capacity and suitable material which, in its judgment, will assure that the applicant will receive safe and adequate telephone service. Such installation shall be undertaken by the utility as soon as is reasonably possible after receipt of a proper application and shall be made at a time appropriate to render service. Construction will not be delayed by the utility so that the applicant will be delayed in the sale or other disposal of the buildings, or lots, except where such delay is caused by strikes, fire, flood, inclement weather, unavailability of materials, civil disorders, or other conditions beyond the control of the utility.

(d) After distribution or feeder facilities are installed underground in a residential subdivision no overhead circuits shall be installed by a utility within such subdivision.

(e) The utility's tariff must permit the applicant at least to excavate the trench necessary for the underground installation of distribution or feeder facilities within the subdivision, at the applicant's cost and to the utility's specifications.

(f) A utility may install overhead distribution or feeder facilities in a residential subdivision or a section thereof otherwise required to have underground distribution facilities in accordance with subdivision (b) of this section when:

(1) the developer of the subdivision is not primarily engaged in the construction of dwelling units within the subdivision;

(2) no governmental authority having jurisdiction to do so has required underground installation; and

(3) either:

(i) five years have elapsed from the sale of the first lot within the

subdivision to the first application for service and the utility has no indication that there will be other new requests for service in the subdivision within six months;

(ii) five years have elapsed from the date of final approval of the subdivision or section thereof, and less than 25 percent of the lots have been sold in the subdivision and every section thereof, except where ten percent or more of the lots in the subdivision or any section thereof have been sold within the last two years;

In cases where overhead installation would be permissible in accordance with condition (3) (paragraph (3) of this subdivision) except that less than five years have elapsed and the utility has reason to believe that the subdivision will not be developed sufficiently soon to permit the orderly utilization of underground facilities installed to serve the initial subscriber(s), the utility may petition the commission to allow overhead installation, which petition shall set forth the relevant economic, engineering and environmental factors.

Note: The term final approval refers to authorization of a residential subdivision by governmental authorities having jurisdiction. A residential subdivision is finally approved when all necessary governmental consents have been obtained to allow the developer of the subdivision to sell lots and/or build residences. If a subdivision needs only be approved by a county health department the final approval of that agency, in accordance with its regulations, when received is final. If the town planning board must give its consent as well, final approval is not obtained until the board and the health department have completed their processes of authorization. A section of a subdivision is the smallest unit of a subdivision given final governmental approval. If, for example, the developer of a subdivision submits a preliminary plan covering 100 lots but initially only 50 are finally approved, the 50 lot portion is a section of the subdivision. If the subdivision contains sections, the percentage of lot sales required by condition (3) must be met by every section of the subdivision and not just the section in which the distribution facilities are to be installed.

(g) If a utility receives an application for service within a

residential subdivision which is governed by the provisions of subdivision (b) of this section and the per-foot cost of installing the necessary distribution or feeder facilities will be greater than two times the cost per foot of installing overhead distribution or feeder facilities, the utility or applicant may petition the Secretary of the Commission to allow overhead installation. Such petition shall be filed in accordance with the requirements of § 3.5 of this Title and set forth the relevant economic, engineering and environmental factors. The petition shall be reviewed by staff. The Secretary shall notify the petitioner within 60 days of receipt of the petition either that the petition is granted or that staff objects to it. If staff objects, the petition shall be referred to the Commission for further review. The petition shall be granted or denied based on economic, engineering or environmental factors. If the residential subdivision is located within the Adirondack Park, the utility shall send a copy of the petition to the Adirondack Park Agency.

.SO DOC 16C-604.4

NYCRR

604.4 Connection from existing telephone facilities to residential subdivisions. (a) The connection from a telephone switching station to the underground distribution or feeder facility installed within an applicant's residential subdivision shall be made in accordance with the following requirements:

(1) the utility shall install underground without contribution from the applicant an amount of feeder facilities from the boundary line of the residential subdivision equal to 25 feet per dwelling unit or 200 feet, whichever is greater, except as may be required under subdivision (3) of this section; in no event will the utility be required to provide more than 500 feet without contribution by the applicant;

(2) the utility may, at its discretion and expense, install underground additional portions of connecting feeder facilities; and

(3) where any part of a feeder facility in excess of that required by section 604.4(a) (1) of this Part is to be placed overhead, the applicant must submit a written application to the utility at least 75 days prior to the projected commencement of construction of the feeder facility and the utility must report such projected construction to the Commission no later than 45 days before such construction is commenced, the Commission reserving the right to require the underground installation of particular facilities on the basis of the relevant economic, engineering or environmental factors.

(b) In the event a utility intends at its own discretion or is required pursuant to this section to place underground feeder facilities

to an applicant's residential subdivision, it shall inform the electric company and cable television company serving the area in which the subdivision is located. If a new common access route from existing systems to the subdivision will be used, the connecting facilities of the utility, the electric company and cable television company shall be placed underground.

.SO DOC 16C-604.5

NYCRR

604.5 Deposits by applicants. (a) In order to guarantee performance, a utility may require from an applicant before construction is commenced a deposit equal to the estimated cost of construction. This deposit is in addition to the applicant's payment of its share of costs for installation and such deposit shall be returned to the applicant with interest on a pro rata basis as each new customer is connected with service from the utility at the rate specified by the Commission for interest on deposits.

(b) Any portion of the deposit remaining unrefunded five years after the date the utility is first ready to render service from the underground telephone distribution facility shall be retained by the utility and credited to the appropriate plant account.

(c) Upon the mutual agreement of both a utility and an applicant, a bond may be posted in lieu of any deposit.

.SO DOC 16C-604.6

NYCRR

604.6 Cooperation by applicants. (a) Each applicant shall cooperate with the utility providing service in an effort to keep the cost of construction and installation of underground telephone distribution facilities as low as possible, consistent with requirements for safe and adequate service, including reasonable provision for load growth and requirements of Part 607 of this Title.

(b) The utility may require that all sewers, water facilities, drainage facilities, and curbs be installed before it commences construction within a residential subdivision.

.SO DOC 16C-604.7

NYCRR

604.7 Joint activities. To the extent practicable, underground, electric, communication, gas, and cable facilities shall be installed in a common trench when new construction is, or can without undue difficulty, be made simultaneously. Every reasonable effort shall be made to use joint occupancy utility poles to accommodate electric, communication and cable television facilities when new overhead construction occurs.

.SO DOC 16C-604.8

NYCRR

604.8 Reports.

Each utility shall provide the following information as part of its annual report to the Commission:

- (a) the length of trench in new residential subdivisions shared with others;
- (b) the utility's average cost per foot of such shared trench;
- (c) the length of trench in new residential subdivisions not shared with others;
- (d) the utility's average cost per foot of such nonshared trench;
- (e) the total length of distribution and feeder facilities placed underground outside residential subdivisions (in cable sheath feet);
- (f) the utility's average cost per foot of such distribution and feeder facilities placed underground;
- (g) the total length of distribution and feeder facilities placed above ground outside residential subdivisions (in cable sheath feet); and
- (h) the utility's average cost per foot of such distribution and feeder facilities placed aboveground.

.SO DOC 16C-604.9

NYCRR

604.9 Special conditions.

(a) This section governs the new construction of distribution and feeder facilities performed pursuant to this Part.

(b) In unusual circumstances when the application of this Part appears impracticable or unjust to either party or discriminatory to other customers, the utility providing service or the applicant may file a petition, in accordance with the requirements of § 3.5 of this Title, for a special ruling or for the approval of special conditions which may be mutually agreed upon before construction is commenced, which petition shall set forth relevant economic, engineering, and environmental factors.

(c) If the utility or the applicant believes that the new construction of underground distribution or feeder facilities within a residential subdivision would be less environmentally desirable than the new construction of overhead facilities, the utility or applicant may request that the Secretary of the Commission grant an exception. The request shall be sent to the Secretary in accordance with the requirements of § 3.5 of this Title. The request shall:

- (1) as between overhead and underground construction, compare the probable environmental effects associated with the subdivision and any economic, engineering, or other factors considered pertinent to the case;
- (2) for those instances where visual values would be diminished by

underground construction, indicate factors bearing on probable retention of significant flora (including the utility's practice with respect to trimming trees in a vicinity of the overhead facilities);

(3) be mailed to the Adirondack Park Agency whenever the request will involve construction within the Adirondack Park; and

(4) be reviewed by staff. The Secretary shall notify the utility within 60 days of receipt of the request either that the request is granted or that it objects to the request. If staff objects, the request shall be referred to the Commission for further review.

Requests and petitions shall be granted or denied based on environmental, economic and engineering factors.

(d) Service to a residential subdivision may be supplied overhead if no governmental authority having jurisdiction to do so has required underground installation and the utility can provide such service:

(1) by extending its facilities no more than 600 feet in a cul-de-sac where a portion of the street within the subdivision is served by overhead facilities within or at the entrance of the cul-de-sac;

(2) by connecting an area between existing overhead facilities for a distance of 1,200 feet or less {17};

(3) by installing drop wires to new individual applicants for service from existing overhead facilities; or

(4) where a utility constructs overhead facilities because of paragraphs (1) or (2) of this subdivision, it shall report such overhead construction to the Commission quarterly, along with a description of the project; and

(e) Where a one-pole extension (whether or not it crosses a road) would enable an existing overhead distribution facility to be connected to a proposed distribution facility in a residential subdivision, such extension may be installed overhead rather than underground; provided.

{17} In order to determine whether 1,200 feet or more of facilities must be constructed to connect existing overhead facilities, the measurement should be along the route of construction.

This will usually be the street within the residential subdivision.

.SO DOC 16C-604.10

NYCRR

604.10 Information on line extension costs. Each utility shall prepare an information sheet describing line extension procedures and costs, to be given to persons inquiring about line extensions.

PART 605

COMMON CARRIER RULES

(Statutory authority: Public Service Law, §§ 51 [1] [d], 91 [3], 94[2])

Sec.

605.1 Common carriage

605.2 Availability of services

605.3 Carrier involvement with content

.SO DOC 16C-605.1

NYCRR

Section 605.1 Common carriage. Pursuant to the Public Service Law and the commission's authority and jurisdiction, the rules set forth in this Part establish certain standards and obligations applicable to telephone corporations operating as common carriers.

(a) Definitions. (1) Common carrier means a corporation that holds itself out to provide service to the public for hire to provide conduit services including voice, data, or video by electrical, electronic, electromagnetic or photonic means.

(2) Conduit means the facilities, functions, or media used for providing electric, electromagnetic, electronic, or photonic transmission of communications, including voice, data or video.

(3) Conduit services means the provision of conduit or functions integrally related to the provision of conduit.

(4) Content means the information or intelligence transmitted over a conduit. Information used solely for the provision of a communications "conduit" is not "content."

(5) Content services means those services offered over common carrier conduits, including, but not limited to, point to multi-point connections, which provide content, employ computer processing applications that act on the format, code, protocol or similar aspects of transmitted content; provide additional, different, or restructured content; or involve user interaction with stored content.

(6) Blocking means the ability to prevent the completion of a telephonic communication to a specified telephone number.

(b) General applicability. (1) These rules are applicable to telephone corporations operating as common carriers, and, except as waived or otherwise stated, shall apply to such corporations.

(2) These rules shall not apply to:

(i) cable television services provided by cable television operators exempted from common carrier regulation under 47 U.S.C. 541(c).

(ii) the provision of content services.

(c) Waivers. Where the commission determines that it is in the public interest, it may, for services or types of carriers, waive any portion of these rules.

.SO DOC 16C-605.2

NYCRR

605.2 Availability of services. (a) General requirements. Telephone corporations operating as common carriers must provide publicly offered conduit services on demand to any similarly situated user on substantially similar terms, subject to the availability of facilities and capacity. Such services shall be provided by a telephone corporation on a first-come, first-served basis unless a party is able to show in a timely fashion that such provision would be unreasonable or unless otherwise ordered by the commission. Additionally:

(1) conduit services shall be made available as services separate from the provision of content;

(2) interconnection into the networks of telephone corporations shall be provided for other public or private networks; and

(3) segregable services and functions requested by users shall be provided to the extent technically and economically practicable.

(b) Restrictions on network use. No telephone corporation operating as a common carrier shall unreasonably restrict lawful network. No restriction may impede access between a content service provider and a willing customer, except where required by law. All restrictions shall be administered in a least restrictive fashion.

(1) Requirements by telephone corporations on users for prior subscription to a particular content services will generally be permissible only where requested by the provider of the service, or required by law, or where a waiver is granted.

(2) End-user initiated blocking shall always be available for content services, to the extent technically and economically feasible.

(c) Video conduit services. To the extent that a telephone corporation may provide video conduit services, it may do so only so long as it provides adequate capacity to content service providers seeking its video conduit services, and treats all users in a nondiscriminatory fashion.

(d) Individualized contracts. Where permitted by the commission, individualized contracts may be offered by telephone corporations operating as common carriers, so long as similarly situated customers are provided, upon request, service upon substantially similar terms. Such contracts may not be used to avoid common carrier obligations.

.SO DOC 16C-605.3

NYCRR

605.3 Carrier involvement with content.

(a) General requirement. No telephone corporation operating as a common carrier shall exercise control or influence over the content of lawful communications tendered to it for distribution. In turn, it has

no liability for the content of tendered communications. This does not diminish a telephone corporation's duty to provide service of adequate transmission quality, capacity and timeliness.

(b) Safeguards against abuse. Telephone corporations operating as common carriers shall make reasonable efforts to inform each content service provider, serving the public at large, of the need for safeguards against abuse of its service, appropriate to the nature of the service and the cost and difficulty of such safeguards. In addition, they shall incorporate in the tariffs or contracts pursuant to which services are made available to information providers, a requirement that such providers adopt and apply procedures reasonably designed to provide safeguards against such abuse, including, but not limited to, the provision of information concerning complaint mechanisms.

(c) Availability of blocking. Telephone corporations shall make available, once technically and economically feasible, facilities giving end-users the ability to block (or delegate the blocking of) individual content services. Until such time that such blocking is readily available, it shall be permissible for telephone corporations to designate particular special interest central office codes which can be blocked at the subscriber's request. Inclusion in such central office codes shall be left to self-selection by the content service provider with independent arbitration and due process protections in the event of a dispute. Such special interest central office codes should be treated nondiscriminatorily, with respect to terms and conditions of services.

.SO DOC 16C-PT606

NYCRR

PART 606

BILLING AND COLLECTION SERVICES

(Statutory authority: Public Service Law, §§ 4[1], 91, 92, 94)

Sec.

606.1 Purpose

606.2 Applicability of rules

606.3 (Reserved)

606.4 Service disconnections

606.5 Partial payments

.SO DOC 16C-606.1

NYCRR

Section 606.1 Purpose.

This Part sets forth the Commission's rules applicable to the provision of billing and collection services by telephone corporations.

.SO DOC 16C-606.2

NYCRR

606.2 Applicability of rules.

Notwithstanding any other Commission rules or order to the contrary,

this Part governs the rights, duties and obligations of every telephone corporation subject to the jurisdiction of the Commission by virtue of Article 5 of Public Service Law and their residential and nonresidential customers concerning the provision of billing and collection services by telephone corporations and the selling of those services to third parties.

.SO DOC 16C-606.4

NYCRR

606.4 Service disconnections. (a) Where a telephone corporation disconnects services for nonpayment of charges, basic local telephone service may be disconnected only for nonpayment of basic local telephone service charges. Nonpayment of charges for other services (including long distance services provided by local exchange telephone corporations, interexchange telephone corporations, and resellers, and nonregulated services offered by information providers) will not be cause for disconnection of local exchange service if charges for local exchange services have been paid but may result in denial or blocking of the service from the individual provider for which payment has not been received where such blocking is technically feasible, or denial or blocking of the class of services from all providers where the selective blocking is not technically feasible. The technical capability to block service from an individual provider shall be attained as soon as practicable.

(b) When nonpayment of charges for basic local telephone service would result in the disconnection of the service, the local exchange corporation shall adhere to the procedures specified in Part 609 of this Title.

(c) When nonpayment of charges for regulated nonbasic or optional features or long distance calls warrants the denial or blocking of such services, the local exchange telephone corporation may implement such denial or blocking of the services and shall adhere to the procedures specified in Part 609 of this Title.

(d) The denial or blocking of regulated nonbasic or optional long distance and information features and services may not have the effect of restricting a customer's ability to access emergency services by dialing 911 or operator.

(e) Every telephone corporation shall develop a plan detailing how a customer's undesignated partial payments will be assigned among the services billed and how nonpayment of other charges on bills will affect the customer's services. A customer's monthly statement will list, separately, the charges for each service and show any balance due for the service. Further, each telephone corporation shall develop outreach

and education programs to advise customers of the assignment plan and the protections against disconnection of services. The assignment plan, revised bill format and outreach and education program shall be submitted to the commission for approval. The outreach and education program shall be approved so long as it reasonably conveys to telephone customers the new information set out in this rule through bill inserts, presentations, advertisements, or other information programs.

.SO DOC 16C-606.5

NYCRR

606.5 Partial payments. Upon receipt of a partial payment from a telephone service customer, the telephone corporation shall apply the payment as directed by the customer. If the customer does not include directions on how to apply the partial payment to the bill, and there is no billing dispute pending on the account, telephone corporations will apply such a payment in the following order:

(a) The full amount of the partial payment will be applied to basic local exchange services which, for the purpose of these rules, include tone signaling and nonpublished listings, and exclude charges for other features and long distance calls.

(b) Upon satisfaction of the charges identified in subdivision (a) of this section, any residual or subsequent payment received during the same billing period will be applied to the charges for interLATA long distance services billed by the local exchange telephone corporation.

(c) Upon satisfaction of the charges in subdivision (b) of this section, the residual or any subsequent payments received during the same billing period will be applied to the charges for other regulated services provided by the local exchange telephone corporation.

(d) In the event a customer has a billing dispute pending regarding any of the foregoing charges, the amount in dispute will be deducted from the amount owing prior to the application of any payment.

.SO DOC 16C-PT607

NYCRR

PART 607

UNDERGROUND TELEPHONE CONSTRUCTION

(Statutory Authority: Public Service Law, §§91(1), 94(2))

Sec.

607.1 Definitions

607.2 Clearance requirements of new subsurface telephone facilities from gas and liquid petroleum lines

607.3 Clearance requirements of subsurface telephone facilities constructed to replace existing facilities

607.4 Standards and practices applicable to the construction and environmental management of subsurface telephone facilities

Section 607.1 Definitions. (a) Subsurface telephone facilities means all underground cable and/or conduit and associated equipment, manholes and any other subsurface structures (including poles and anchors) for purposes of sections 607.2 and 607.3 of this Part, utilized to furnish telephone service and owned or operated by any telephone corporation under the jurisdiction of the New York State Department of Public Service.

(b) Gas transmission facilities means gas pipelines that:

- (1) transport gas from a production or underground storage facility to a distribution center or underground storage facility;
- (2) transfer gas within a storage field; or
- (3) operate at a pressure of 125 PSIG or more.

(c) Gas distribution facilities means underground gas pipelines other than gas transmission facilities and includes gas service lines.

(d) Liquid petroleum pipeline means a pipeline that either:

- (1) transports liquid petroleum from a production or storage facility to a distribution center or storage facility; or
- (2) transports petroleum within a production field; and
- (3) is certified to operate at a pressure of 200 PSIG or more.

(e) Land used in agricultural production (as defined in Agricultural and Markets Law, section 301) means not less than ten acres of land used as a single operation in the preceding two years for the production for sale of crops, livestock or livestock products of an average gross sales value of ten thousand dollars or more. For the purposes of this subdivision, whenever a crop is processed before sale, the average gross sales value shall be based upon the market value of such crop in its unprocessed state. Land used in agricultural production shall not include land or portions thereof used for processing or retail merchandising of such crops, livestock or livestock products. Land used in agricultural production shall also include:

- (1) rented land which otherwise satisfies the requirements for eligibility for an agricultural assessment;
- (2) land of not less than ten acres used as a single operation for the production for sale of crops, livestock or livestock products, exclusive of woodland products, which does not independently satisfy the gross sales value requirement, where such land was used in such production for the preceding two years and currently is being so used under a written rental arrangement of five or more years in conjunction with land which qualifies for an agricultural assessment;
- (3) land used in support of a farm operation or land used in

agricultural production, constituting a portion of a parcel, as identified on the assessment roll, which also contains land qualified for an agricultural assessment;

(4) farm woodland which is part of land which is qualified for an agricultural assessment, provided, however, that such farm woodland attributable to any separately described and assessed parcel shall not exceed fifty acres; for purposes of determining average gross sales value, proceeds from the sale of woodland products from farm woodland eligible to receive an agricultural assessment may be included up to a maximum annual amount of two thousand dollars;

(5) land set aside through participation in a federal conservation program pursuant to title one of the federal food security act of nineteen hundred eighty-five or any subsequent federal programs established for the purposes of replenishing highly erodible land which has been depleted by continuous tilling or reducing national surpluses of agricultural commodities.

(f) Cultivated land (as defined in 1 NYCRR Part 370.2(j)) means land used for growing crops, hay, pasture, and permanent pasture for the preceding two years.

(g) Farm operator means a person who owns or leases land used in agricultural production.

(h) Double-ditching is a method of separately excavating and stockpiling the topsoil layer (i.e., the A horizon) of a respective soil from the subsoil/substratum layers.

(i) Sensitive resources means areas that are likely to be adversely affected by telephone facility construction, including wetlands; streams; waterbodies; springs; wells; rare, threatened and endangered species habitat; unique old forest stands; officially designated scenic areas, officially designated historical and cultural resources; soil resources contained in cultivated lands requiring land management facilities and practices on or below the surface and specialty cropland (for example, vineyards, apiaries, hop fields, orchards, sugar bush, etc).

(j) Noise sensitive uses means those land uses which may be adversely affected by noise; for example, residences, schools, churches, cemeteries, hospitals and outdoor amphitheatres.

(k) Public R/W means the area within the territorial limits of any street, avenue, road or way that is for any highway purpose under the jurisdiction of the State of New York or of a legislative body of any county, city, town or village, that is open to public use and that may be used for the placement of utility facilities.

(l) R/W (right-of-way) means a right to pass over, occupy or use another's land for placing and maintaining utility facilities.

(m) Direct buried cable installation by cable plowing means a procedure using specialized equipment which, in a linked sequence of operations, opens soils to the desired depth, places or lays in a utility service cable and replaces the temporarily disturbed surface soil.

.SO DOC 16C-607.2

NYCRR

607.2 Clearance requirements of new subsurface telephone facilities from gas and liquid petroleum pipelines. (a) All new subsurface telephone facilities shall be constructed with a standard minimum clearance of 12 inches from gas transmission facilities.

(b) All new subsurface telephone facilities shall be constructed with a standard minimum clearance of six inches from gas distribution facilities.

(c) All new subsurface telephone facilities shall be constructed with a standard minimum clearance of 12 inches from liquid petroleum pipelines.

(d) The standard minimum clearances specified in subdivisions (a), (b) and (c) of this section when not obtainable through practicable means may be reduced to an absolute minimum of four inches, provided that such reduction is agreeable to all companies involved and that protective materials suitable to all companies are placed between the telephone and gas or liquid petroleum facilities for the entire length of such reduced clearances.

(e) The standard minimum clearance for underground service laterals shall be four inches from the gas service line. If it is not practicable to achieve this clearance, it may be reduced to an absolute minimum of two inches, provided that all companies involved agree to the reduction and that suitable protective materials are placed between the telephone and gas facilities for the entire length of such clearances.

.SO DOC 16C-607.3

NYCRR

607.3 Clearance requirements of subsurface telephone facilities constructed to replace existing facilities. Whenever subsurface telephone facilities are replaced for any reason, the new facilities shall be constructed in accordance with section 607.2 of this Part, to the extent reasonable and economically practicable.

.SO DOC 16C-607.4

NYCRR

607.4 Standards and practices applicable to the construction and environmental management of subsurface telephone facilities.

(a) This section covers the standards and practices which the

utilities are expected to follow to minimize adverse environmental impacts associated with the construction of subsurface telephone facilities under Parts 604 and 608 of this Title. In this section, any reference to subsurface telephone facilities does not include poles and anchors.

(b) The standards and practices are not intended to supersede the jurisdiction of any federal, state or municipal agency that has permitting or other regulatory requirements intended to protect environmental resources or values which may be adversely affected by the installation of subsurface telephone facilities. To accomplish the objectives set forth in this section, each utility shall stay in contact with directly affected land owners and governmental agencies having jurisdiction.

(c) Each utility shall use its best efforts to avoid or minimize to the maximum extent practicable, any adverse environmental effects associated with the construction (including clearing and site-restoration activities) of subsurface telephone facilities, by:

- (1) limiting clearing of trees, shrubs and landscaped areas in accordance with safe construction, operating and maintenance practices;
- (2) minimizing off R/W impacts by confining construction activities and access to the smallest areas possible, consistent with safe and efficient construction and operation practices;
- (3) scheduling construction for those times that would minimize damage or disruption to sensitive resources and agricultural production activities (except as otherwise agreed to by the landowner);
- (4) minimizing disturbances to sensitive resources such as streams, wetlands or rare, threatened or endangered species habitats by limiting machinery movement in or near such resources during construction and throughout the life of the facility;
- (5) selecting construction and maintenance equipment that minimizes damage to and disruption of soils;
- (6) minimizing topsoil damage and soil erosion due to grading and other soil-scarifying activities by promptly stabilizing disturbed soil and employing soil separation as appropriate, and thereby preventing erosion and siltation and minimizing compaction; and
- (7) minimizing traffic disruption when construction vehicles travel along or cross R/W by providing appropriate traffic controls.

(d) The clearing, construction and site restoration practices set forth in the following sections shall be observed by each utility where applicable:

- (1) Each utility shall take care to prevent or minimize the grading or

piling of soil off the R/W, particularly in cultivated land(s) and near streams and wetlands.

(2) Before constructing a new access road, each utility shall give preference to using existing access to the R/W; however, where steep slopes (over 20 percent) are encountered along the R/W or where soils, which would not support construction equipment or would result in extensive rutting or compaction, are encountered, the construction of either a temporary or permanent off R/W access road shall be considered. However, the placement of permanent access roads in cultivated land shall be avoided wherever possible, unless such roads are requested or agreed to by the landowner or farm operator.

(3) Each utility shall endeavor to complete stream crossings in the shortest amount of time, with the least amount of adverse environmental impact.

(4) Where necessary each utility shall properly install temporary drainage and erosion control devices during clearing and grading operations, appropriately maintain them during construction and incorporate them, where necessary, into final grading operations.

(5) Before grading and trenching, each utility shall make an on-site effort to verify the location of any buried gas lines, water lines, sewer lines, drainage tiles or similar facilities which may be encountered. All such facilities removed, cut, broken or otherwise damaged during facility construction shall be restored or replaced to at least their pre-existing condition, unless the affected property owner declines such restoration or replacement or where such facilities would interfere with the safe and efficient operation and maintenance of the subsurface telephone facilities.

(6) At the project planning stage, before initiating grading or trenching operations in cultivated land on land used in agricultural production (as demonstrated by the affected farm operator), each utility shall discuss with such farm operator and the appropriate County Soil and Water Conservation District the soil characteristics of the project area, drainage, irrigation, cultivation and other land management installations and practices, flood control, the proposed depth-of-cover above the facility and the appropriateness of topsoil segregation. In cultivated land, all cable shall be installed with a minimum 24 inches of cover. However, the farm operator may require a depth-of-cover greater than 24 inches as a condition of permitting a right-of-way across his or her land where necessary to safely accommodate such practices and projects. In such cases, where practicable, the depth-of-cover shall be included in the easement recorded in the County

Records Office. All such decisions shall take into account the recommended practices and standards of the United States Department of Agriculture, Soil Conservation Service, as noted in the farm operator's Farm Conservation Plan on file with the County Soil and Water Conservation District. The farm operator shall not be liable for any damage to the buried cable which occurs as a result of land fitting activities including, but not limited to, plowing, sub-soiling and disking. Cable plow installation may be used in cultivated land unless the land within the area of construction contains subsurface drain lines. In those cases open trenching shall be used unless the farm operator agrees to cable plow installation. A generic plan and procedure for the repair of drain lines removed, cut, broken or damaged by either method of installation shall be developed by the utility with the Soil Conservation Service and the New York State Department of Agriculture and Markets showing the method(s) for shouldering of the tile drain line repair into the undisturbed trench wall, the support of the repair tile and the maintenance of the drain line's gravity flow. In all cases of removal, cutting, breakage or damage of drain lines during construction by the utility, repairs shall be undertaken at the utility's expense.

(7) Where adverse effects to significant plantings such as ornamental shrubs and trees, as well as visual screens, cannot be avoided during construction, such plants shall be carefully removed and planted in a temporary location and then be returned as close as possible to their original location following back filling. If such plants must be removed and are destroyed, they shall be replaced with species and varieties as close as possible in height, diameter and grade to those removed. Exceptions would be where such vegetation would interfere with the operation and maintenance of the facility, the construction is done at the request of the affected landowner, or where the affected landowner and the utility agree otherwise. If the affected property has been the subject of federal, state or local agency review jurisdiction, the involved federal, state or local agency must also agree to the extent the resulting disturbance affects a condition of a previously issued permit or other approval. Transplanting and plant replacement shall be done consistent with established horticultural practices.

(8) In areas where livestock are confined or farm equipment is operating, all trenches which will remain open overnight or on non-working days shall be temporarily fenced or barricaded, unless the trench shoring or sheeting material extends at least 40 inches above the working surface. Where reasonably determined necessary by the affected landowner or farm operator, temporary access should be constructed to

permit persons, vehicles and livestock to cross safely from one side of the trench to the other.

(9) Should dewatering of the trench become necessary, all water shall be filtered and dissipated through appropriate filter material or discharged onto vegetated or graveled areas, to prevent stream siltation and sedimentation and soil erosion. No such water shall be discharged onto cultivated land in the cropping season or directly into regulated streams, ponds or wetlands. If cultivated land receives discharges outside the cropping season, measures shall be applied to dissipate the water to prevent soil erosion.

(10) Engine-powered construction equipment shall be properly muffled and maintained to avoid producing excessive noise. Such equipment shall not be permitted to idle unnecessarily near noise sensitive uses. Near such uses, the quietest equipment which is readily available to each utility and appropriate for the task shall be employed. If blasting is necessary, explosive charges shall be controlled to limit the sound pressure level to 127 dB.

(11) Whenever artifacts or relics which appear to have historic value are uncovered during construction, work shall be stopped immediately at the site of impact and the State Historic Preservation Office shall be notified. Work elsewhere may continue. Construction at the impact site shall not be resumed until the State Historic Preservation Office or its designated representative determines the significance of the find and, if required, develops a plan to salvage or protect such resource. If prompt clarification of the situation by such officials is not forthcoming or if complications arise, the Commission shall be notified immediately.

(12) In restoring the R/W each utility shall:

- (i) recycle all waste material or dispose of it in accordance with governing rules and regulations;
- (ii) grade the entire disturbed R/W to restore it to original grade and contour, unless changes made to grade and contour are agreed to by the landowner;
- (iii) contact the County Soil and Water Conservation District for the most appropriate seed mix and application rates in the construction area;
- (iv) utilize the most appropriate seed mix and application rate, giving consideration to compatibility with undisturbed areas of the R/W and the surrounding land and consistent with erosion, wildlife and other environmental concerns;
- (v) determine the site-specific seed mix to be applied on active

agriculture land in consultation with the affected farm operator;

(vi) by the end of the workweek in which construction commences, apply mulch (and seed, if no further disturbance is planned) on all disturbed sites at least 20 feet from all streams and wetlands;

(vii) stabilize all cut and fill banks by employing the most appropriate erosion control devices and techniques;

(viii) complete stream bank restoration as soon as practicable after the stream crossing installation is completed. If seasonal conditions do not permit final restoration, temporary restoration measures shall be undertaken, with final restoration measures to follow as soon as practicable thereafter; and

(ix) repair or replace (and leave in a condition equivalent to or better than, the preexisting) all existing installations or improvements, for example, lawns, fences, walls, curbs, sidewalks, culverts, mailboxes, gates, tiles, drainage ditches, waterways, ponds which are disturbed, damaged or destroyed during construction, unless previous arrangements with landowners or farm operators dictate otherwise.

(e) Each utility shall ensure that the construction supervisor who is on the job, appropriately applies the foregoing standards and practices. The supervisor shall also have authority to stop any work that is inconsistent with the intent of this section and to direct appropriate remedial action. Also the supervisor shall obtain a competent specialist's advice on how to deal with any sensitive resources encountered.

PART 608

NEW CONSTRUCTION OF DISTRIBUTION FACILITIES IN CERTAIN VISUALLY

SIGNIFICANT RESOURCES OUTSIDE RESIDENTIAL SUBDIVISIONS

(Statutory authority: Public Service Law, §§91(1), 94(2))

Sec.

608.1 Applicability

608.2 Procedures and requirements

608.3 Reports

.SO DOC 16C-608.1

NYCRR

Section 608.1 Applicability. (a) The requirement of section 608.2(a) of this Part applies to the new construction of distribution and feeder facilities (other than pursuant to either the provisions of Part 604 of this Title that require underground construction or to the requirement of any other governmental authority having jurisdiction to require

underground construction) on public and private land in VSRs where an agency referred to in subdivision 608.2(h) of this Part:

(1) has no statutory authority to require the underground construction of the particular distribution or feeder facility; and

(2) has supplied to the affected utility(ies) and to the Commission a map of the particular VSR (at a scale appropriate to such VSR) showing its boundaries in sufficient detail to permit the utility to comply with the requirements of this Part.

(b) Notwithstanding the provisions of this Part, where any electric company has been permitted to install an overhead distribution or service line necessary to furnish permanent electric service in a particular VSR in accordance with the procedures set forth in section 99.2 of this Title, a utility may install a distribution or feeder facility necessary to furnish permanent telephone service overhead using the poles which were used for the electric line.

(c) This Part shall remain in full force and effect for a period of five years after its effective date.

.SO DOC 16C-608.2

NYCRR

608.2 Procedures and requirements.

(a) Each utility shall allocate annually to its own VSR undergrounding fund an amount equal to the greater of:

(1) the average of its annual expenditures on the underground installation of new underground distribution and feeder facilities within residential subdivisions for the years 1985, 1986 and 1987; or

(2) 0.14% of its 1987 local service revenues.

The amount to be allocated to the fund shall be adjusted for inflation each year according to the Handy-Whitman Index. The amount in the fund is the utility's maximum obligation in a given year. Each utility shall install or provide for the installation of new underground distribution and feeder facilities under this Part unless it has expended its maximum obligation in a given year. Each utility shall spend up to such maximum obligation on its share of the cost of installing such facilities underground that exceeds what an applicant for a line extension would have paid for facilities had the area not been designated as a VSR. If a utility spends in excess of its maximum obligation in a particular year, the excess shall reduce its maximum obligation of the following year by the amount of such excess. After a utility spends its maximum obligation in a particular year, additional VSR undergrounding is not required. If a utility does not spend its maximum obligation in a given year, any unspent portion shall be carried over to the next year.

(b) In addition to other procedures which may apply in connection with

the proposed construction of a particular distribution or feeder facility:

(1) If a utility has not expended its maximum obligation as described in subdivision (a) of this section in a particular year when it chooses to propose, or receives a written application for service to a premises which necessitates the new construction of distribution or feeder facilities on any public or private land in a VSR, the utility shall provide a written report to the agency which designated or administers the VSR and any agency having jurisdiction over affected public land and the Commission of its intention to install the necessary distribution or feeder facilities underground or overhead (including a project description and consideration of the factors set forth in subdivision (j) of this section), at least 60 days before construction is planned to commence.

(2) Notwithstanding the provisions of paragraph (1) of this subdivision, a utility may provide the written report described therein within 30 days after the commencement of construction if the necessary distribution or feeder facilities are installed overhead on a temporary basis, pending the review of the utility's report if the visual impact of the temporary service is mitigated, to the extent appropriate, after the procedures of this section are followed.

(3) Notwithstanding the provisions of paragraph (1) of this subdivision, a utility may install permanent overhead facilities if the utility, before installation:

- (i) determines that the situation is an emergency; and
- (ii) obtains the written approval of the appropriate agency(ies); and
- (iii) upon written request, obtains the written approval of the Secretary of the Commission.

(4) If undergrounding is otherwise required in a VSR, and if the per-foot cost of installing the necessary facilities will be greater than two times the charge per foot set forth in the utility's tariff, the utility or the applicant may petition the Secretary of the Commission to allow overhead installation.

Approvals shall be granted or denied based on economic, engineering, environmental, emergency or hardship conditions.

(c) Unless the agency(ies) described in subdivision (b) of this section provide(s) written notification in-hand to both the utility and the Commission objecting to the utility's proposal within 30 days after receipt of the utility's report, the utility may install the facilities in question as contemplated in its report. The utility may also proceed as contemplated in its report within such 30-day period if the

agency(ies) provide(s) written notification to both the utility and the Commission concurring with the utility's proposal.

(d) If the agency(ies) described in subdivision (b) of this section provide(s) written notification in-hand to both the utility and the Commission objecting to the utility's proposal (including a detailed explanation of such objection) within 30 days after receipt of the utility's report, the Commission shall review the report and notification(s) filed by the utility and agency(ies).

(e) Unless the Commission serves on the utility an order requiring the installation of the facilities in question to be performed in a different manner than that contemplated by the utility within 30 days after the Commission's receipt of the agency's notification pursuant to subdivision (d) of this section, the utility may install such facilities as contemplated in its report. The utility may also proceed as contemplated in its report within such 30-day period if the Commission serves on it an order concurring with the utility's proposal.

(f) If an agency referred to in subdivision (h) of this section intends to supply a map(s) of a VSR(s) listed in such subdivision to the affected utility(ies) and the Commission, such agency shall consult with such utility(ies) and the Commission staff as to the appropriate scale(s) and other details of such map(s).

(g) If an agency referred to in subdivision (h) of this section has a VSR map prepared before the effective date of these regulations, such map may be filed with the Commission and utilities without consultation if the map otherwise complies with section 608.1(a) (2) of this Title.

(h) A VSR is:

(1) one of the following resources which is designated as having high scenic quality:

(i) scenic areas of statewide significance (in coastal areas) designated by the Secretary of State pursuant to article 42 of the Executive Law;

(ii) Adirondack Park scenic vistas, designated by the Adirondack Park Agency, identified on the Private Land Use and Development Plan Map and listed in the State Land Master Plan for the Adirondack Park pursuant to article 27 of the Executive Law;

(iii) scenic roads, designated by the Commissioner of Environmental Conservation pursuant to article 49 of the Environmental Conservation Law;

(iv) scenic districts, designated by the Commissioner of Environmental Conservation pursuant to article 49 of the Environmental Conservation Law;

(v) State and national wild and scenic river areas administered respectively by either the Department of Environmental Conservation or the Adirondack Park Agency pursuant to article 15 of the Environmental Conservation Law, and by the Department of the Interior, pursuant to 16 U.S.C. section 1271; and

(vi) Areas of Exceptional Scenic Beauty, acquired pursuant to the 1986 Environmental Quality Bond Act and administered by the Department of Environmental Conservation.

(2) any area in one of the following resources which is determined to have high scenic quality by the agency with jurisdiction over the affected resource as long as such determination is filed with the Commission:

(i) State Nature and Historic Preserve areas designated by the Legislature.

(ii) State parks, which were so designated for their scenic quality by the Legislature, the Department of Environmental Conservation or the Office of Parks, Recreation and Historic Preservation, including the Adirondack and Catskill Parks.

(iii) Lake George Park, except incorporated villages, administered by the Lake George Park Commission, pursuant to article 43 of the Environmental Conservation Law.

(iv) Parks within New York State administered by the Palisades Interstate Park Commission pursuant to article 9 of the Parks, Recreation and Historic Preservation Law.

(v) State historic sites owned by the Office of Parks, Recreation and Historic Preservation under article 19 of the Parks, Recreation and Historic Preservation Law and Title 9 NYCRR Part 384.

(vi) national historic sites, national seashores and national recreation areas located in New York State and operated by the National Park Service.

(i) The listing of VSRs in subdivision (h) of this section constitutes a determination that the new construction of distribution or feeder facilities underground is generally more appropriate therein than elsewhere. Neither such listing nor any agency's provision of a map of a given VSR to the affected utility and the Commission, however, creates a presumption that construction of particular distribution or feeder facilities underground is appropriate. The propriety of such construction will, instead, be determined in accordance with the procedures set forth in subdivisions (b)-(e) of this section.

(j) In evaluating the utility's proposal pursuant to subdivision (e) of this section, the Commission will consider such factors as:

(1) the nature of the visual setting in the vicinity of the proposed construction, including the character of existing or proposed adjacent structures or land areas, unless a governmental authority with jurisdiction has plans to improve the scenic quality of the area in question;

(2) the probable environmental effects associated with both overhead and underground construction;

(3) any expected engineering difficulties associated with both overhead and underground construction; and

(4) the estimated cost associated with both overhead and underground construction.

(k) In the event a utility either intends at its own discretion or is required pursuant to this section to place a distribution facility underground, it shall inform the electric company and cable television company serving the area in which the underground construction is to be located. If a new common access route from existing facilities to the location of such underground construction will be used, the portions of the connecting facilities of the utility and the electric company that are located in a VSR shall be placed underground.

(l) Any delays caused by a utility's compliance with this Part shall be omitted from the counts of service standards measurements in section 603.12(d) of this Title.

(m) To the extent practicable, underground electric, communication, gas and cable television facilities shall be installed in a common trench when new construction is, or can without undue difficulty, be made simultaneously. Every reasonable effort shall be made to use joint occupancy utility poles to accommodate electric, communication and cable television facilities when new overhead construction occurs.

(n) Any interested agency or person may petition the Commission to add additional categories to the VSR list of subdivision (h) of this section. The Commission will approve or disapprove addition of the proposed category based on whether the category fits within the VSR definition in section 604.1(k) (1) of this Title.

(o) The VSR program shall be evaluated by the Commission after the program has been in effect for two years. Utilities shall submit to the Department within six months after the program has been in effect for two years, details of their experience with the program including: all locations of line extension construction in VSRs, the total length of all facilities undergrounded in VSRs, costs incurred by the utility, costs incurred by applicants for their share of line extension costs, problems encountered with the program, suggestions for changes to the

program, or any other information the utility deems relevant to evaluation of the VSR program. The Department staff and/or the Commission may request, and the utilities shall provide, any information the Commission or staff deem relevant to evaluation of the VSR program.

.SO DOC 16C-608.3

NYCRR

608.3 Reports.

Each utility shall provide the following information as part of its annual report to the Commission:

- (a) the total length of distribution and feeder facilities placed underground in VSRs (in cable sheath feet);
- (b) the utility's average cost per foot of such distribution and feeder facilities placed underground;
- (c) the total length of distribution and feeder facilities placed aboveground in VSRs (in cable sheath feet);
- (d) the subject utility's average cost per foot of such distribution and feeder facilities placed aboveground;
- (e) the total length of distribution and feeder facilities placed underground outside VSRs (in cable sheath feet);
- (f) the utility's average cost per foot of such distribution and feeder facilities placed underground;
- (g) the total length of distribution and feeder facilities placed aboveground outside VSRs (in cable sheath feet);
- (h) the utility's average cost per foot of such distribution and feeder facilities placed aboveground; and
- (i) an indication of how much the subject utility spent of its maximum obligation described in section 608.2(a) of this Part.

Section 609.1 Purpose. This Part sets forth the commission's rules and regulations which apply to the provision of basic local exchange service by telephone corporations when service is provided to residential customers or applicants for residential service as defined in section 609.2 of this Part.

.SO DOC 16C-609.2 NYCRR

609.2 Applicability of rules.

Notwithstanding any other commission rule or order to the contrary, this Part governs the provision of residential service as defined herein and the rights, duties and obligations of every telephone corporation subject to the jurisdiction of the commission by virtue of Article 5 of the Public Service Law with respect to such service, their residential customers and applicants for residential service.

(a) Residential service is basic local exchange service furnished in private homes or apartments, including all parts of the subscriber's domestic establishment, for domestic use and not for substantial occupational use; in the study of a clergyman located in a church, in college fraternity or sorority houses, college dormitories, convents and monasteries for domestic rather than occupational use in residential quarters.

(b) The term existing residential customer, when used in this Part, shall include any person who is supplied directly by a telephone corporation with residential service at a dwelling for his or her residential use pursuant to an application for service made by such person or a third party on his or her behalf. The term includes a person requesting such service who was a customer of the same telephone corporation within 12 months of making the request, who was not terminated for nonpayment more than 10 days before making the request, and who may move to a different dwelling within the telephone corporation's service territory.

(c) The term applicant, when used in this Part, shall include any

person who does not qualify as an existing residential customer and who requests basic local exchange service at a dwelling for his or her residential use or the residential use by another person.

(d) The term reportable charges shall mean any charges for local service which are unpaid 45 days from the date of the bill for the charges, provided that the bill was mailed within six business days of the date of the bill. Charges which are the subject of a deferred payment agreement under which the customer is making the agreed upon payments are not reportable charges; failure to make an agreed upon payment shall make the entire unpaid balance of the deferred payment agreement a reportable charge. Charges which are the subject of a pending billing dispute pursuant to section 609.16 of this Part are not reportable charges during the pendency of the dispute or for 15 days after its resolution.

(e) The term basic local exchange service shall include the following charges for residential service:

- (1) customer access line, including any usage bundled in this charge;
- (2) local measured service;
- (3) local measured units;
- (4) locality rates;
- (5) mileage;
- (6) late payment charges on local exchange service;
- (7) subscriber line charge;
- (8) taxes and surcharges prorated to reflect only the taxes and surcharges associated with local exchange service;
- (9) nonpublished service;
- (10) touchtone;
- (11) local exchange service restoral charge;
- (12) NSF check charge for local exchange service or any part of local exchange service;
- (13) service order charge for local exchange service;
- (14) construction charges for local exchange service; and
- (15) intra LATA toll service and interregional calls unless intraLATA prescription is offered and selective intraLATA access is available.

(f) The term suspension shall mean the interruption of outgoing service only.

(g) The term termination shall mean the interruption of both incoming and outgoing service.

(h) The term seasonal customer shall mean a customer who applies for and receives service periodically each year, intermittently during the year, or at other irregular intervals.

(i) The term short-term customer shall mean a customer who requires service for a specified period of time that does not exceed one year.

(j) The terms deny or denied shall mean any determination, by a representative of a telephone corporation in response to an application for service, that service will not be initiated as requested.

(k) The term delinquent in payment shall mean a residential customer has not paid in full a duly rendered bill, or an agreed-upon partial payment, for basic local exchange service 25 days after the first day of the period for which the local service charge is being billed, or within a longer period agreed to by the utility. A residential customer who has not paid in full a bill, or an agreed-upon partial payment, for basic local exchange service in circumstances where disconnection for nonpayment is precluded under utility complaint procedures established under section 609.16 of this Part or commission complaint procedures under Part 11 of this Title, shall not be considered delinquent in payment. Nothing in this Part shall modify the commission's rules or orders applicable to the provision of telephone service to nonresidential customers.

.SO DOC 16C-609.3

NYCRR

609.3 Applications for residential basic local exchange service.

(a) Extension of service. (1) Consistent with the provisions of this section, every telephone corporation shall provide basic local exchange service to an applicant upon his or her oral or written request.

(2) A telephone corporation shall not be obligated to provide service to an applicant who owes the telephone corporation money for basic local exchange service provided to a prior account in his or her name unless:

(i) the applicant makes full payment for such service provided to any such prior account in his or her name;

(ii) the applicant agrees to make payments under a deferred payment plan, not to exceed three months, of any amount due for basic local exchange service to a prior account in his or her name if the applicant qualifies for such a plan by having been a customer for three months and service was not terminated for nonpayment during that period and if the amount due has not been the subject of a previous deferred payment plan under this subdivision;

(iii) the applicant has pending a billing dispute pursuant to section 609.16 of this Part with respect to any amounts due for service to a prior account in his or her name and has paid any amounts required to be paid pursuant to those provisions; or

(iv) the commission or its authorized designee directs the provision of service, who may require such extension of service to be made within

24 hours or less.

(3) A telephone corporation shall not be obligated to provide service to an applicant who has reportable charges, or has been terminated for nonpayment within the past 6 months, with any other telephone corporation unless the applicant agrees to:

(i) pay a deposit in accordance with the provisions of section 609.9 of this Part; or

(ii) make advance payment of an amount not to exceed two times the average monthly bill for basic local exchange service. Such payment shall be applied to charges for local service on the first and subsequent bills, until it has been liquidated. The telephone corporation may not condition service upon payment in advance for any person it knows to be a recipient of public assistance, supplemental security income, or additional State payments.

(4) The telephone corporation may request either a deposit or payment in advance, but not both, as a condition of service.

(5) A telephone corporation shall be obligated to provide service to any applicant who meets the requirements of this section within five business days of receipt of a completed oral or written application for service or such later time as may be specified by the applicant, except:

(i) where prevented by labor strikes or precluded by law;

(ii) where precluded by consideration of public safety;

(iii) where the applicant fails to pay, or agree in writing to pay, reasonable chargeable material and installation costs relating to temporary or permanent line extensions, or otherwise fails to comply with any applicable requirements of the commission's rules;

(iv) where precluded by physical impediments including:

(a) adverse weather conditions;

(b) inability to gain access to premises in the possession of the applicant or others when necessary;

(c) incomplete construction of necessary facilities by the applicant or inspection thereof by the appropriate authorities; or

(d) incomplete construction of necessary facilities by the telephone corporation.

the telephone corporation shall make reasonable efforts to eliminate conditions preventing extension of service and shall pursue completion of any facilities it must construct with due diligence; or

(v) where directed by the commission or its authorized designee, who may require such extension of service to be made within 24 hours or less.

(6) An oral application for service shall be deemed completed when an

applicant who meets the requirements of this section provides his or her name, address, and address of prior account, if any or prior telephone number, if any. A telephone corporation may establish nondiscriminatory procedures to require an applicant to provide reasonable proof of the applicant's identity.

(7) A telephone corporation may require an applicant to complete a written application if:

(i) there are reportable charges from a previous account with any telephone corporation at the premises to be served; or

(ii) the application is made by a third party on behalf of the person(s) who would receive service.

A written application may require the submission of information required in an oral application, and reasonable proof of the applicant's responsibility for service at the premises to be supplied. A telephone corporation requiring a written application shall so notify an applicant as soon as practicable after the request for service is made, and in no event more than three business days after such request, and shall state the basis for requiring a written application. A written application containing the required information shall be deemed completed when received by the utility.

Comment: When a written application is permitted, a telephone corporation may require the applicant to provide a copy of a lease (if one exists), deed, bill of sale or other documentation to show the date the applicant became responsible for service. A telephone corporation may also require an applicant to validate the applicant's prior address.

(8) Subject to the requirements of paragraph (5) of this subdivision, whenever a residential customer moves to a different dwelling within the service territory of the same telephone corporation and requests residential service within 12 months, he or she shall be eligible to receive service at the different dwelling, and such service shall be considered a continuation of service in all respects, with any deferred payment agreement, and with all rights honored; provided, however, that such customer's prior service was not terminated for nonpayment more than 10 days before the request for service.

(9) A telephone corporation shall extend service to an applicant for residential basic local exchange service, whose application for service has previously been denied, within five business days unless a later time is requested by the applicant, after the following events:

(i) elimination of all the conditions specified in paragraphs (2)-(5) of this subdivision which resulted in the denial of service; or

(ii) by direction of the commission or its authorized designee, who

may require such extension of service to be made within 24 hours or less.

(b) Denial of application for service--notice. (1) An application for service not denied within three business days shall be deemed approved.

(2) No telephone corporation shall deny an application for service or condition service upon an advance payment or deposit without advising the applicant within three business days of receipt of the application for service of:

(i) the reason or reasons for the denial, or the requirement for an advance payment or deposit;

(ii) precisely what the applicant must do to qualify for service or eliminate the requirement; and

(iii) his or her right to an investigation and review by the commission or its authorized designees of the denial or request for an advance payment or deposit. The telephone corporation shall advise the applicant of the appropriate methods available to challenge the action of the telephone corporation and the address and telephone number of the commission.

(3) When the notice required by paragraph (2) of this subdivision is made orally, the telephone corporation shall provide the applicant, upon request, the notice in writing at his or her current address unless a different address is specified. When oral notification cannot be accomplished within three business days due to the unavailability of the applicant, the telephone corporation shall provide immediate written notification.

.SO DOC 16C-609.4

NYCRR

609.4 Suspension or termination of basic local exchange service.

(a) Conditions for suspension or termination. A telephone corporation may suspend or terminate basic local exchange service as provided for in these rules if the customer:

(1) fails to pay the telephone corporation charges due at any time during the preceding six months; provided, however, that suspension or termination of service for bills due for service rendered during periods in excess of the six-month period is permitted in cases involving billing disputes during the six-month period or the culpable conduct of the customer; and provided further, that the telephone corporation shall commence any such billing not more than two months after the resolution of the billing dispute, the cessation of the event which caused the telephone corporation to delay or delays caused by the customer's culpable conduct;

(2) fails to pay amounts due under a deferred payment agreement;

(3) fails to pay or agree in writing to pay equipment and installation charges relating to the initiation of service; or

(4) fails to pay a lawfully required deposit.

(b) Notice of suspension or termination--contents. A notice of suspension or termination shall clearly state or include:

(1) the earliest date on which suspension or termination may occur;

(2) the reasons for suspension or termination and the manner in which suspension or termination may be avoided, including the total amount required to be paid to avoid suspension or termination;

(3) the address and telephone number of the office of the telephone corporation that the customer may contact in reference to his or her account;

(4) the availability of procedures for handling complaints;

(5) the availability and a general description of a deferred payment agreement, which shall be highlighted;

(6) a summary of the protections available under this Part, together with a notice that any customer eligible for such protections should contact the telephone corporation; and

(7) the notice may include any additional information not inconsistent with this Part. In addition, the notice shall have printed on its face, in a size type capable of attracting immediate attention, language conveying the following:

"THIS IS A FINAL DISCONNECTION NOTICE. PLEASE BRING THIS NOTICE TO THE ATTENTION OF THE TELEPHONE CORPORATION WHEN PAYING THIS BILL."

(c) Notice of suspension or termination--time. (1) No telephone corporation shall suspend service until at least eight days nor terminate service until at least 20 days after a notice:

(i) has been served upon the residential customer; or

(ii) has been mailed to the residential customer at the premises where service is rendered; provided, however, if a residential customer has specified to the telephone corporation in writing an alternative address for billing purposes, the notice under this paragraph shall be sent to such alternative address rather than to the premises where service is rendered.

(2) A telephone corporation may not issue or send a notice of suspension or termination unless at least 25 days have elapsed from the date of the bill, except when exceptional circumstances exist, a notice may be issued in less than 25 days, but only in accordance with procedures approved by the commission or its designee. A telephone

corporation shall mail the bill within six business days of the date of the bill. A telephone corporation shall extend the 25-day period one day for each day beyond the sixth business day when bills are mailed late. Individual customers also shall be given the same extension when documentation, such as the postmarked date, exists.

(3) After issuing the notice, the telephone corporation shall attempt to notify the customer by telephone of the intended suspension or termination and how such suspension or termination may be avoided. The attempt to notify the customer by telephone shall include at least one telephone call during nonworking hours before the scheduled date for suspension or termination.

(d) Suspension or termination of service--time. A telephone corporation complying with the conditions set forth in this section may suspend or terminate service to a residential customer for nonpayment of bills only between the hours of 8 a.m. and 7:30 p.m., Monday through Thursday, and between 8:00 a.m. and 3:00 p.m. on Friday, provided such day or the following day is not:

- (1) a public holiday, as defined in the General Construction Law;
- (2) a day on which the main business office of the telephone corporation is closed for business; or
- (3) during the periods of December 23rd through December 26th and December 30th through January 2nd.

(e) Suspension or termination for abandonment of facilities. (1) No telephone corporation shall suspend or terminate service on the grounds that a customer's facilities have been abandoned or are being used by unauthorized persons unless such corporation shall first determine, by such means as are reasonably calculated to determine occupancy, that such facilities have in fact been abandoned or are being used without the authority of the customer of record. The telephone corporation shall send a notice to the customer stating the reasons for the suspension or termination no later than five days prior to the date of any such suspension or termination, except that the five-day notification period shall be waived when mailings are returned by the post office or a new customer advises that he or she has moved into the location.

(f) No suspension or termination without verification of delinquent account. No telephone corporation shall suspend or terminate service for nonpayment of bills rendered unless:

- (1) it shall have verified that payment has not been received at any office of the telephone corporation or at any office of an authorized collection agent through the end of the notice period required by this

Part; and

(2) it shall have verified on the day suspension or termination occurs that payment has not been posted to the customer's account as of the opening of business on that day.

(g) Rapid posting of payments in response to notices of suspension or termination. Every telephone corporation shall ensure that any payments made in response to a notice, when the customer brings the fact that such a notice has been issued to the attention of the telephone corporation or its collection agents:

(1) are posted to the customer's account on the day payment is received; or

(2) are processed in some manner so that suspension or termination will not occur.

(h) Additional notice required when payment by check is subsequently dishonored. The telephone corporation shall be required to make at least two attempts, one outside of normal business hours, to contact a customer within 24 hours when the telephone corporation is in receipt of a subsequently dishonored negotiable instrument due to lack of funds, provided that the customer previously has not submitted a dishonored check within the past 12 months. Upon reaching the customer, the telephone corporation shall give him or her an additional 24 hours to pay the bill before suspension or termination of service.

NYCRR

609.5 Suspension or termination of residential basic local exchange service--special procedures.

This section provides special protections for residential customers regarding the suspension or termination and restoration of basic local exchange service in cases involving medical emergencies, the elderly, blind or disabled.

(a) Medical emergencies. (1) No telephone corporation shall suspend, terminate or refuse to restore basic local exchange service and any access determined by the customer's doctor to be necessary to reach the customer's doctor when a medical emergency exists, for which certification by a medical doctor or local board of health may be required, for nonpayment of monthly charges in an amount set by the commission; provided, however, that a demonstration of the customer's inability to pay charges for service may be required before a certificate of medical emergency can be renewed pursuant to paragraphs (3) and (4) of this subdivision, unless the commission or its designee directs otherwise.

(2) A medical emergency exists when a resident of a customer's

residence suffers from a serious illness or medical condition which severely affects the resident's well-being and the absence of such telephone service would create a serious risk of inaccessibility of emergency medical assistance, assistance relating to medical care or professional advice. An inability to pay charges for service is demonstrated when a customer is unable to pay past due and current telephone bills because of insufficient liquid assets and current income, considering other necessary and reasonable expenses of the customer such as food, shelter and medical expenses, which may be documented by provisions of the information required in the form set in Appendix 17 of this Title or such other form approved by the commission.

(3) Certification. An initial certification of a medical emergency by a medical doctor or local board of health may be made by telephone and shall remain effective if written certification is provided thereafter to the telephone corporation within five business days. A telephone corporation may require that any certification of a medical emergency shall be submitted on stationery of the medical doctor or local board of health, shall be signed by the medical doctor or an official of the local board of health qualified to make a medical judgment and shall state the name and address of the certifying medical doctor or local board of health, the doctor's State registration number, the name and address of the seriously ill person, the nature of the serious illness or medical condition, any service beyond basic local exchange services which may be necessary to reach the customer's doctor because of the medical condition and an affirmation that the customer suffers from a serious illness or a medical condition that severely affects the resident's well-being and that the absence of such telephone service would create a serious risk of inaccessibility of emergency medical assistance, assistance relating to medical care or professional advice. The certificate shall be effective for 30 days from the time the telephone corporation receives an oral or written certification, whichever occurs earlier. In deciding whether the conditions for a medical emergency are met, the medical doctor or qualified official of the local board of health should use his or her best judgment. A telephone corporation receiving an initial certificate shall promptly so notify the customer in writing and shall provide information on renewal of certificates, including the form set forth in Appendix 17 of this Title, or such other form approved by the commission if the telephone corporation intends to make a determination concerning a customer's ability to pay charges for service. The telephone corporation also shall issue a reminder notice on renewal of certificates seven days

prior to the expiration of the certificate.

(4) Certificate renewal. If the medical condition is likely to continue beyond the expiration of an initial certification, a certificate may be renewed, provided:

(i) a medical doctor or qualified official of the board of health states in writing to the telephone corporation the expected duration of the medical emergency, and explains either the nature of the medical emergency or the reason why the absence of such telephone service would create a serious risk of inaccessibility of emergency medical assistance or assistance relating to medical care or professional advice; and

(ii) the customer demonstrates an inability to pay charges for service. A customer may be required, before the expiration of the initial certification, to submit to the telephone corporation the information required in the form set forth in Appendix 17 of this Title, or such other form approved by the commission for the purpose of demonstrating an inability to pay charges for service. A telephone corporation shall, within five days of submission of such information, determine whether the customer's liquid assets and current income are insufficient to pay such telephone bills, considering other necessary and reasonable expenses of the customer such as food, shelter, medical and other necessary expenses. Whenever a telephone corporation determines that a customer has not demonstrated a financial hardship, it shall provide the customer with written notice of determination and the customer's right to review of the determination by the commission or its authorized designee. A telephone corporation shall stay any suspension or termination activity pending its determination on the customer's ability to pay and any review of such determination by the commission or its authorized designee. A renewed certificate shall remain in effect for 30 days, provided that in cases certified as chronic by a medical doctor or qualified official of the local board of health, the renewed certificate shall remain in effect for 60 days or such longer period as may be approved by the commission or its designee. The telephone corporation may require that the statement of financial hardship shall be completed and submitted to the telephone corporation whenever a certificate is renewed.

(5) No telephone corporation shall suspend or terminate such service to a residential customer after the expiration of a certification of medical emergency or after the telephone corporation determines and the commission or its designee concurs that the customer has an ability to pay charges for service without first sending the customer a final notice of suspension or termination at least eight days prior to

suspension of outgoing service and 20 days prior to the date of termination.

(6) While certification of medical emergencies remains in effect, customers shall remain liable for payment of telephone service and shall make reasonable efforts to pay charges for such service. The authorized designees of the commission shall be available to offer assistance to customers for working out equitable payment arrangements in order to avoid substantial arrearages at the end of a medical emergency.

(b) Customers who are elderly, blind or disabled. (1) No telephone corporation shall suspend or terminate or refuse to restore service where a residential customer is known to or identified to the telephone corporation to be blind, disabled, or 62 years of age or older, and all the remaining residents of the household are 62 years of age or older, 18 years of age or under, blind or disabled, without complying with the procedures specified in this subdivision. A person shall be considered "disabled" if the person has a disability as that term is defined in the Human Rights Law (Executive Law, section 292(21)). A person shall be considered blind if the person has central visual acuity of 20/200 or less in the better eye with the use of a correcting lens. An eye which is accompanied by a limitation in the fields of vision such that the widest diameter of the visual field subtends an angle no greater than 20 degrees shall be considered as having a central visual acuity of 20/200 or less.

(2) In such cases, a telephone corporation shall not suspend or terminate service for an additional 20 days after the date of suspension or termination as stated on the notice and shall make a diligent effort to contact by telephone or in person if telephone contact is unsuccessful, an adult resident at the customer's premises at least eight days prior to the date on which suspension or termination of service may occur for the purpose of devising a payment plan.

(3) In cases where service has been suspended or terminated and the telephone corporation subsequently learns that the customer is entitled to the protections established under this subdivision, the telephone corporation shall, within 24 hours of such notification, restore service for an additional 20 days and make a diligent effort to contact in person an adult resident at the customer's premises for the purpose of devising a payment plan. A telephone corporation unable to contact such person within 24 hours shall make reasonable efforts to achieve contact as soon as practicable.

.SO DOC 16C-609.6

NYCRR

609.6 Voluntary third-party notice prior to termination of service.

Every telephone corporation shall permit a residential customer to designate a third party to receive all notifications relating to suspension and/or termination of service or other credit notices sent to such residential customer, provided that the designated third party agrees in writing to receive such notices. The telephone corporation shall inform the third party that the authorization to receive such notices does not constitute acceptance of any liability on the third party for service provided to the customer. The telephone corporation shall promptly notify the residential customer of the refusal or cancellation of such authorization by the third party.

.SO DOC 16C-609.7

NYCRR

609.7 Reconnection of service.

(a) A telephone corporation shall reconnect suspended or terminated basic local exchange service within 24 hours, unless prevented by circumstances beyond the telephone corporation's control or unless a customer requests otherwise, in the following situations:

(1) receipt by the telephone corporation of the full amount of arrears for which service was suspended or terminated or upon the elimination of conditions that warranted suspension or termination of service;

(2) agreement by the telephone corporation and the customer on a deferred payment plan and the payment of a down payment, if required, under the plan;

(3) where a telephone corporation has notice that a serious impairment to health or safety exists and telephone service is necessary to insure accessibility of emergency medical assistance, assistance relating to medical care or professional advice. Doubts as to whether reconnection of service is required for health or safety reasons shall be resolved in favor of reconnection; or

(4) upon the direction of the commission or its designee.

Comment: A telephone corporation may not insist upon payment of lawful charges that did not provide the basis for suspension or termination before restoring service under this subdivision. In these circumstances, payment of other lawful charges that did not form the basis for the suspension or termination should be part of the deferred payment plan in accordance with section 609.8 of this Part, unless the customer elects to pay such charge immediately.

(b) Whenever circumstances beyond the telephone corporation's control prevent reconnection of service within 24 hours of any of the events specified in subdivision (a) of this section, service shall be reconnected within 12 hours after those circumstances cease to exist.

.SO DOC 16C-609.8

NYCRR

609.8 Deferred payment agreements.

(a) No telephone corporation shall suspend, terminate or refuse to restore or provide basic local exchange service to a residential customer, who has been an existing residential customer for three months and for whom basic local exchange service has not been terminated for nonpayment during that period because of arrears owed on such person's account, unless it offers the customer a deferred payment agreement pursuant to this section. Customers with medical emergencies and customers who are elderly, blind or disabled shall be exempt from such eligibility criteria. However, any such agreement shall not be available to any customer who the commission or its designee determines has the resources available to pay his or her bill. The offer of a deferred payment agreement shall specify the total amount of arrears, the down payment, the installment payments and the time for making such payments. The telephone corporation shall mail to the customer not less than six days prior to termination of service, a notice describing to the customer a deferred payment plan which shall contain a conspicuous, bold-type notice that the customer may obtain the assistance of the commission in reaching an agreement. Where service is already terminated pursuant to section 609.4 of this Part, such notice shall be given at the time the customer requests reconnection. A new deferred payment agreement need not be offered to a customer who is in default on an existing deferred payment agreement; provided, however, that such a customer may have his or her existing payment agreement renegotiated once within a 24-month period if he or she demonstrates that his or her financial circumstances have changed significantly because of conditions beyond his or her control.

(b) A deferred payment agreement:

(1) shall obligate the customer to make timely payments of current charges for basic local exchange service together with payment of the amount deferred during the pendency of the agreement;

(2) shall be for total amounts up to \$150 but may be greater amounts if agreed to by the telephone corporation or directed by the commission or its authorized designee;

(3) shall be for a time period of no less than 5 months unless otherwise agreed to by the customer; and

(4) may require the customer to make a down payment which shall not exceed the lesser of one fifth of the amount deferred or three months of the customer's average billing for basic local exchange service plus the difference, if any, between the total amount of arrears and the amount being deferred.

(c) Telephone corporations and customers should observe the following practices in developing the terms of deferred payment agreements: payment of amounts deferred may be made on a weekly, monthly or longer basis, at the convenience of the parties to the agreement. Telephone corporations must voluntarily offer plans with down payments of lesser amounts than allowed by subdivision (b) of this section when a customer cannot reasonably make a down payment equal to the amount allowed by subdivision (b). Eligible customers may voluntarily waive their right to make a down payment of not more than the amount allowed by subdivision (b) of this section, but telephone corporations cannot require or otherwise solicit customers to make such waiver. Amendments of payment agreements should, to the extent reasonable and practical, reflect the changed circumstances of the customer.

(d) If the telephone corporation believes that a deferred payment agreement should not be offered because a customer has the resources to pay his or her bill, it shall notify the customer and the commission or its designee in writing of the reasons for its belief. The commission or its designee shall, in accordance with the complaint procedures set forth in section 609.16 of this Part, forthwith make a determination whether the customer has the resources to pay his or her bill. A telephone corporation shall stay any suspension or termination activity, and restore or provide service pending the decision on the telephone corporation's complaint by the commission or its authorized designee.

.SO DOC 16C-609.9

NYCRR

609.9 Residential basic local exchange service deposits.

(a) No telephone corporation shall require any applicant or existing residential customer to post a security deposit as a condition of receiving basic local exchange service unless the existing residential customer or applicant:

- (1) is a seasonal customer or short-term customer;
- (2) is an existing residential customer who has accumulated two consecutive months of arrears without making reasonable payment of such charges, defined as one-half of the total arrears, prior to the due date of the second bill, provided that the telephone corporation requests such deposit within two months of such failure to pay. A local exchange carrier intending to require a deposit of an existing residential customer shall provide a customer written notice, including the amount of the deposit, at least 10 days before it may assess a deposit, and state that the failure to make timely payment of the arrears will permit the utility to require a deposit from such customer;
- (3) has had basic local exchange service terminated for nonpayment

during the preceding six months;

(4) has reportable charges with any other telephone corporation;

(5) does not give a telephone corporation with which he or she is applying for service permission to determine the existence of reportable charges or if the customer has been terminated for nonpayment during the preceding six months on a previous or current account with other local telephone corporations subject to these regulations; or

(6) fails to provide reasonable proof of identity pursuant to section 609.3(a) (6) of this Part.

(b) Payment of deposit. If a telephone corporation requires a deposit from an existing residential customer or an applicant for telephone service, it shall permit such customer to pay the deposit in installments over a period not to exceed six months.

(c) Exceptions to deposit authorization. (1) No telephone corporation shall require any person it knows to be a recipient of public assistance, supplemental security income, or additional state payments to post a security deposit.

(2) No telephone corporation shall demand or hold a deposit from any applicant or existing residential customer it knows is 62 years of age or older unless such customer has had service terminated for nonpayment of bills within the preceding six months. Telephone corporations shall permit an applicant or existing residential customer 62 years of age or older to pay the deposit in installments over a period not to exceed 12 months.

(d) Deposit amounts. In any case where customer deposits are authorized by this section, the deposit amount shall not exceed two times the average monthly bill for basic local exchange service for a calendar year in order to secure payment for basic local exchange services actually rendered or for the rental of fixtures, instruments and facilities actually supplied.

(e) Interest on deposits. Every telephone corporation shall allow every customer from whom a deposit is required interest on the amount deposited at a rate prescribed annually by the commission.

(f) Application of deposit to unpaid bill. Each telephone corporation holding customer deposits shall render to each depositor, when and as his or her deposit is applied to an unpaid bill or bills, a statement showing:

(1) the amount of the deposit, together with the interest accrued thereon and the period covered thereby; and

(2) the balance of the bill or bills remaining unpaid or the balance of the deposit and interest thereon remaining to the credit of the

depositor.

(g) Refunds. (1) Each telephone corporation shall review the accounts of all existing residential customers who have made deposits at least annually. Each depositor, upon becoming entitled to a refund by reason of nondelinquency for one year or upon ceasing to be a customer, shall receive his or her deposit and all interest thereon which has not been refunded or credited against bills for service.

(2) The telephone corporation shall initiate such refund action and may request the payment of all bills for which such deposit is security.

(3) Any refund may be credited to the customer's account or, at the election of the depositor, the full refund shall be made to the depositor.

(4) For purposes of establishing a refund date when deposits are paid on an installment plan, the date will be the day of receipt of the first installment.

(h) Circular containing terms of deposit. Each and every telephone corporation holding customer deposits shall keep on hand for distribution to its customers a summary of the pertinent features of these requirements and shall inform customers from whom deposits are requested of its availability.

(i) Records. Each telephone corporation holding customer deposits shall keep adequate records with respect to each deposit.

.SO DOC 16C-609.10

NYCRR

609.10 Backbilling on residential accounts.

No telephone corporation shall charge a residential customer for previously unbilled service or adjust upward a bill previously rendered when the period for the unbilled service or billing adjustment is more than 24 months prior to the mailing of the bill or the upward billing adjustment for service to the residential customer unless the culpable conduct of the customer caused or contributed to the failure of the corporation to render timely or accurate billing. If the customer is liable for any service and the delay in billing was not due to the culpable conduct of the customer, the telephone corporation shall explain the reason for the late billing and shall advise the customer that suspension/termination of service is not permitted for nonpayment of charges billed in excess of six months after the service was provided and that payments may be made under an installment payment plan. Any such installment plan must be consistent with a customer's ability to pay and for a reasonable period of time that shall not be less than one month for each month represented by the late-billed charges, unless otherwise agreed to by the customer. If requested by the customer, the

explanation for the late billing and the installment payment plan will be provided in writing. An adjustment to increase previously rendered bills more than six months after the time service was provided shall be made within four months of the final resolution of the billing dispute.

.SO DOC 16C-609.11

NYCRR

609.11 Adjusted payments and other charges.

(a) Adjusted payment schedule. Every telephone corporation shall offer residential customers on fixed incomes the opportunity to pay their bills on a reasonable schedule that is adjusted for such customer's periodic receipt of income.

(b) Other charges. No telephone corporation may charge any residential customer a late-payment charge, penalty, fee, interest or other charge of any kind without the approval of the commission for any late payment, collection effort, service termination or deferred payment agreement occasioned by the customer's failure to make timely payment for services. Nothing in this section shall prohibit a telephone corporation, with the approval of the commission, from imposing a reasonable charge, not in excess of its costs, pursuant to its tariff for restoral of service, dishonored checks and other lawful purposes.

.SO DOC 16C-609.12

NYCRR

609.12 Contents of bills.

Each telephone corporation's bill to a residential customer shall provide, in clear and understandable form and language:

(a) the name, address and account number of the customer, the name of the telephone corporation, the telephone number of the telephone corporation's business office which may be contacted to discuss the bill, amount owed for the latest period, the date by which payments for the latest period may be paid without a late-payment charge, the late-payment charge for late-paid bills, if any, credits from past bills, any amounts owed and unpaid from previous bills, and credits and charges which are adjustments to past bills due to service and/or rate increases; and

(b) a statement of how the bill may be paid; and

(c) an itemized listing of the services being subscribed to, and their monthly rates. An identification of those services which are not necessary for basic service shall be included with each new customer's first bill, each existing residential customer's first bill after a change in service and semiannually for all customers. New customers will be allowed 60 days to change their type or grade of service, or both, and to cancel any optional nonbasic services without incurring any cancellation or nonrecurring charges other than the original service

connection and monthly charges for the period service was used. Nothing in this section shall preclude a telephone corporation from providing pertinent messages and information on the bill, provided such information does not interfere with the presentation of the information required by this section.

.SO DOC 16C-609.13

NYCRR

609.13 Notification requirements.

(a) Annual notification of rights. Every telephone corporation shall, at the time service is initiated to a residential customer and at least annually thereafter, provide residential customers with a plain language summary of their rights and obligations under this Part, or inform customers that such a summary is available and how it can be obtained from the company. At a minimum, the summary shall include the following:

(1) a description of the complaint-handling procedures available at the telephone corporation and the commission:

Comment: Such notice shall clearly state the means by which a complaint can be made to the company and shall also advise the customer that, if after contacting the telephone corporation, the customer remains dissatisfied, he or she may contact the New York State Public Service Commission. Such notice shall further state that the Public Service Commission has a staff available to give assistance in such matters, and shall also specify an appropriate address of the Public Service Commission.

(2) the rights and obligations of residential customers relating to payment of bills, termination of service and reconnection of service;

(3) a description of special protections afforded the elderly, blind, and disabled, and persons with medical emergencies;

(4) a request that residential customers who qualify for the protections referred to in Section 609.5(b) voluntarily so inform the utility;

(5) the right of a customer to designate a third party to receive copies of all notices relating to suspension and/or termination of service or other credit notices;

(6) appropriate forms that customers claiming the protections of section 609.5 of this Part may fill out and return; and

(7) a description of the customers' rights in regard to deferred payment plans and the holding and demanding of security deposits by the telephone corporation.

(b) Notices in telephone directories. The opening pages of each directory published by the telephone corporations shall contain a

conspicuous notice advising customers that, should any utility fail to resolve their complaints regarding service or billing disputes to their satisfaction, they may refer their problems to the Consumer Services Division of the New York State Public Service Commission and the appropriate address and telephone number for the Public Service Commission's Consumer Services Division.

(c) Billing information in non-English language. Every telephone corporation providing service to a county where, according to the most recent Federal census, at least 20 percent of the population regularly speaks a language other than English, shall include in its telephone directories in such county a notice in both English and such other language which describes the contents of the telephone corporation's bill. At least once a year, every telephone corporation shall mail to all residential customers in such county a notice in both English and such other language spoken regularly by at least 20 percent of the population in such county, which describes the contents of the telephone corporation's bill.

.SO DOC 16C-609.14

NYCRR

609.14 Emergency disconnections of residences.

A telephone corporation may disconnect service to a residence when an emergency may threaten the health or safety of a person, a surrounding area or the telephone corporation's distribution system. The telephone corporation shall act promptly to assure restoration of service as soon as feasible. Service shall be restored to any residence before it may be terminated for any other reason.

.SO DOC 16C-609.15

NYCRR

609.15 Inspection and examination of telephone corporation apparatus.

(a) A duly authorized agent of the telephone corporation may enter any dwelling, building or other location supplied with service by the telephone corporation for the purposes of inspecting and examining the wires and other apparatus furnished by the telephone corporation and leased by customers for ascertaining any service-affecting problems on a nonholiday workday between 8 a.m. and 6 p.m., or at such other reasonable times as requested by a customer. At such time, the agent shall exhibit a photo-identification badge signed by the president or vice-president of the telephone corporation.

(b) The provisions of subdivision (a) of this section shall not apply to the inspection and examination of any such equipment where an emergency may threaten the health and safety of a person, the surrounding area, or the telephone corporation's distribution system.

(c) An agent of the telephone corporation otherwise duly authorized to

inspect and examine apparatus, may not enter locked premises without the permission of the person lawfully in control on the premises, nor use any manner of force to carry out inspection and examination, except when an emergency may threaten the health or safety of a person, the surrounding area, or the telephone corporation's distribution system, or where authorized by a court order.

.SO DOC 16C-609.16

NYCRR

609.16 Telephone corporation complaint-handling procedures.

Customer complaints about bills for telephone service deposit requests or other service problems shall first be made to the telephone corporation. The telephone corporation shall allow complaints to be accepted and processed in a simple manner and form. Every telephone corporation shall promptly investigate any complaint in a fair manner and report the results to the complainant. If the report of the investigation is made orally, the telephone corporation shall provide the complainant, upon request, the report in writing. If the complainant requests the report in writing, the telephone corporation shall send such report in writing within five business days after the request by the complainant. In the event the corporation is unable to give an oral report due to the unavailability of the complainant, either a letter requesting the customer to call the telephone corporation or a written copy of the report shall be sent to the complainant no later than two business days after the results of the investigation are determined. If a letter requesting the customer to call is not responded to by the customer in five business days, a written copy of the report shall be sent to the complainant no later than the seventh business day after such letter was sent to the customer. A telephone corporation resolving a complaint in whole or in part in its favor shall inform the complainant of the availability of the commission's complaint-handling procedures, including the commission's address and telephone number. A telephone corporation shall refrain from suspending or terminating service for nonpayment during the pendency of a complaint before the telephone corporation or the commission and for 15 days after resolution by the telephone corporation, or by the commission or its authorized designee, unless otherwise provided by the commission or its authorized designee; provided, however, that as a condition of continued service during the pendency of such dispute, a customer shall pay the undisputed portions of any bill for service.

.SO DOC 16C-609.17

NYCRR

609.17 Waiver.

Unless otherwise precluded by the Public Service Law or other

applicable law, the commission may, for good cause shown or upon its own motion, waive any requirement of this Part.

620.2 Issuance not heretofore reported

.SO DOC 16C-620.1 NYCRR

Section 620.1 Contents of notice.

Pursuant to the provisions of section 101 of the Public Service Law, as amended, every telephone and telegraph corporation subject to said section, after the issuance or assumption of stocks, bonds, notes or other evidences of indebtedness, including bonds, notes or other evidences of indebtedness, payable on demand or within less than 12 months, shall file with this commission a notice of such transaction within the time and in the form specified in the following:

- (a) Name of reporting utility (indicate whether corporation, partnership, individual, or other party).
- (b) Address of reporting utility.
- (c) The name of the official responsible for statements submitted and to whom should be addressed any correspondence relating thereto.
- (d) Date of the report.
- (e) Period covered by the report (both dates inclusive where applicable).
- (f) Information regarding securities or obligations issued.
 - (1) Pursuant to authority granted by order of this commission:
 - (i) Notice of issuance shall be filed within the period specified in the order approving the issuance of the securities or obligations.
 - (ii) Issuance of capital stock, in exchange for convertible securities issued pursuant to commission authorization, may be reported annually,

not later than 60 days after the end of the calendar year covered by the report; such report to show only the number of shares of such stock issued during such calendar year, the securities retired by reason of the exchange, and the additional consideration realized, if any, by reason of the exchange.

(iii) For each type of security or obligation, include the following information, as appropriate:

(a) Designation of security-classified according to distinguishing characteristics, such as class of stock of par value or no par value and dividend rate of preferred stock, or character of debt obligation and interest rate or maturity date or other distinguishing characteristic.

(b) Date of actual issue or assumption.

(c) Number of shares of each class of stock or principal amount of each debt obligation issued.

(d) Consideration realized from each class or type of security (if consideration is other than cash, give description and basis of value).

(e) Case number and date of order of this commission under which the security issue was authorized.

(2) Securities issued or assumed under circumstances not requiring the formal approval of this commission, such as obligations (real estate mortgages, chattel mortgages, conditional sale agreements, promissory notes, etc.) having a term of less than twelve months:

(i) Notice of issuance shall set forth the transaction covering obligations issued during each calendar month and shall be filed not later than 10 days after the end of the calendar month covered by such report.

(ii) For each type of obligation of \$10,000 face amount or more, include the following information as appropriate:

(a) Designation of the obligation giving descriptive distinguishing characteristics. Include description of real estate mortgage, chattel mortgage, conditional sale agreement, or any hypothecation of assets given in connection with the obligation.

(b) Date of actual issue or assumption.

(c) Name of payee.

(d) Principal or face amount.

(e) Rate of interest.

(f) Date of maturity (if demand so specify) or schedule of periodic payments.

(g) Names of endorsers, if any.

(h) Consideration realized from issuance of the obligation.

(i) Purpose for which the obligation was issued; if for cash indicate

the use to which the proceeds are to be applied.

(j) State whether the obligation represents an increase of indebtedness or an obligation given in renewal of existing obligations or in cancellation of accounts payable. For renewals of obligations of \$10,000 face amount or more, give the dates and amounts of the obligations for which the renewal obligation is in whole or in part to be substituted; for renewals of obligations of less than \$10,000 face amount, give the date or month of issuance, the rate of interest, date or month of maturity and the total amount of the obligations for which the renewal obligation is in whole or in part to be substituted. (See subparagraph (iv) of this paragraph).

(iii) For each type of obligation of less than \$10,000 face amount list the information required in subparagraph (ii) of this paragraph or group each type of obligation of less than \$10,000 face amount which is identical except for the payee, the exact date of issue or assumption within any one calendar month and the exact date of maturity within any one calendar month. Report for each group the information required in subparagraph (ii) (a), (e), (g), (h), (i) and (j) of this paragraph but substitute for subparagraph (ii) (b), (c), (d) and (f), the following; (b) month of actual issue or assumption, (c) number of obligations, (d) amount of indebtedness and (f) the month and year of maturity (if demand so specify).

(iv) Report the outstanding obligations as of the final date of the period covered by the notice of issuance. List the date of actual issue or assumption principal or face amount and rate of interest of all obligations reported pursuant to subparagraph (ii) of this paragraph. For obligations reported pursuant to subparagraph (iii) of this paragraph, list the date or month of actual issue or assumption, the rate of interest of each obligation or group of obligations and the amount of each obligation or group of obligations outstanding.

(3) For any other class of securities, give corresponding particulars, not later than 10 days after the end of the calendar month in which issued or assumed, to the end that the commission may be fully advised as to the nature of the transaction and purpose for which obligations were incurred or securities were issued and the proceeds therefrom are to be used.

(g) Each notice of issuance of securities or obligations shall be subscribed by an executive officer of the corporation, a member of the partnership, the individual owner, or other party of the utility in behalf of which the notice is filed, and affirmed by such person as true under the penalties of perjury.

.SO DOC 16C-620.2 NYCRR

620.2 Issuance not heretofore reported.

Every such public utility which has not filed with this commission a notice of the issuance of any stocks, bonds, notes, or other evidences of indebtedness now outstanding and issued with or without the approval of this commission shall, within 30 days from the date of service of a copy of this order, file a notice of each such transaction in the form prescribed herein.

SUBCHAPTER C

Rates and Charges

PART

630-631 (Reserved)

632 Liability for Directory Errors

633 (Reserved)

634 Interest on Customer Overpayments to Telephone Utilities

.SO DOC 16C-PT632 NYCRR

PART 632

LIABILITY FOR DIRECTORY ERRORS

(Statutory authority: Public Service Law, § 94)

Sec.

632.1 Liability for directory errors

.SO DOC 16C-632.1 NYCRR

Section 632.1 Liability for directory errors. (a) In the absence of gross negligence or willful misconduct and except for the allowances stated hereinafter in paragraphs (b)(1)-(3) of this section, no liability for damages arising from errors or mistakes in or omissions of directory listings, or errors or mistakes in or omissions of listings obtainable from the directory assistance operator, including errors in the reporting thereof, shall attach to the company.

(b) An allowance for errors or mistakes in or omissions of published directory listings or for errors or mistakes in or omissions of listings obtainable from the directory assistance operator shall be given as follows:

(1) For free or no-charge-published directory listings, credit shall be given at the rate of two times the monthly tariff rate for an additional or charge listing for each line affected for the life of the directory or the charge period during which the error, mistake or omission occurs.

(2) For additional or charge-published directory listings, credit shall be given at the monthly tariff rate for each such listing for the

life of the directory or the charge period during which the error, mistake or omission occurs.

(3) For listings obtainable from records used by the directory assistance operator, upon notification to the company of the error, mistake or omission in such records by the customer, the company shall be allowed a period of three business days for the correction to be effected. If the company has not corrected the error, mistake or omission within three business days after notification by the customer, credit shall be given at the rate of 2/30 of the basic monthly rate for the line or lines in question for each day thereafter that the records remain uncorrected.

(4) Credits for an error, mistake or omission in the free listing, the charge listing and listings obtainable from records used by the directory assistance operator shall be given as specified in paragraphs (1)-(3) of this subdivision; provided, however, that the total amount of the credit shall not exceed, on a monthly basis, the total of the charges for each charge listing plus the basic monthly rate for the line or lines in question.

(5) As used in paragraphs (1)-(4) of this subdivision, the terms error, mistake or omission shall refer to a discrepancy in the directory listing or directory assistance records which the company has failed to correct and where the error affects the ability to locate a particular customer's correct telephone number. The terms shall refer to addresses only to the extent that an error, mistake or omission of an address places the customer on an incorrect street or in an incorrect community.

(6) Such allowances or credits as specified in paragraphs (1)-(3) of this subdivision, shall be given upon notice to the company by the customer that such error, mistake or omission has occurred; provided, however, that when it is administratively feasible for the company to have knowledge of such error, mistake or omission, the company shall give credit without the requirement of notification by the customers.

644.2 Preservation of records.

All Records required by this Part shall be preserved for the period of time specified in Part 651, unless otherwise specified by the commission.

.SO DOC 16C-644.3

NYCRR

644.3 Capital program filing.

Each local exchange company shall file with the commission, by March 31st of each year:

(a) Capital expenditures, by major account category, actually incurred during the previous calendar year and capital budget projections for each of four years beginning with the current year.

(b) Details of the latest capital expenditure budgets approved by management for the previous calendar year and for the following two years, including brief descriptions of the major programs which comprise the three year budgets approved by management.

(c) A comparison of the actual capital expenditures for the previous calendar year and the amounts previously budgeted for that year and, by major account category, explanations of any significant differences between actuals and budgeted expenditures. Significant differences are defined as plus or minus 20% if a company's construction budget was less than \$10 million for the latest calendar year, 10% if the budget was more than \$10 million but less than \$100 million, and 3% if the budget was more than \$100 million.

(d) Other capital expenditure and accomplishment data to be specified by the director of the communications division.

(e) This section shall not apply to telephone corporations that provide service primarily over their own or leased facilities and that do not provide local exchange service.

The level of detail and the reporting format will be prescribed by the director of the communications division.

RADIO-TELEPHONE UTILITIES

(Statutory authority: Public Service Law, §§ 94, 95, 99)

Sec.

645.1 Definitions

.SO DOC 16C-645.1

NYCRR

Section 645.1 Definitions. The following words and terms, when used in this Part, shall have the meaning indicated:

(a) A radio-telephone utility is a telephone corporation, as defined in the Public Service Law, which owns, operates, or manages any radio-telephone facility used in providing for hire one way or two-way radio communication of any form whatsoever between points in New York State, regardless of whether the system is interconnected with a landline telephone system, provided however, such term shall not include any landline telephone corporations providing radio-telephone service solely within their landline franchise areas. However, landline telephone companies, in all instances, shall file contemporaneously with this commission a copy of all applications filed with the Federal Communications Commission which pertain to radio-telephone operations.

(b) Radio-telephone facility shall mean any facility within this State which is operated to perform for hire the service of radio

communications to members of the public who subscribe to such service and shall include all real property, stations, antennae, radios, receivers, transmitters, instruments, appliances, fixtures and other personal property used by a radio-telephone utility in providing service to its subscribers.

NYCRR

PART 649

REGULATIONS APPLICABLE TO PROVIDERS OF OPERATOR SERVICES

(Statutory Authority: Public Service Law, art. 5)

Sec.

649.1 Regulations applicable

649.2 Basic requirements

649.3 Rates and charges

649.4 Exclusive agreements prohibited

649.5 Enforcement

649.6 Emergency calls

.SO DOC 16C-649.1

NYCRR

Section 649.1 Regulations applicable. This Part shall apply to all telephone corporations as defined in the Public Service Law which provide intrastate operator assisted communications services by means of either human or automated call intervention, excluding local exchange telephone corporations to the extent that such corporations provide intrastate operator assisted communications services over their own or interconnected facilities and the rates and charges for such services are contained in rate schedules on file with the Commission.

.SO DOC 16C-649.2

NYCRR

649.2 Basic requirements. A provider of intrastate operator assisted communications services must:

(a) identify itself at the time the end-user accesses its services;

(b) upon request, quote all rates and charges for its services to the end-user accessing its system;

(c) arrange to have posted in plain view at each telephone location which automatically accesses the operator service provider's network and where its services are made available either to the public or transient end-users:

(1) the operator service provider's name and address;

(2) bill and service dispute calling information including the operator service provider's dispute resolution phone number;

(3) clear and specific instructions informing the end-user how to access a local exchange telephone company operator as an alternative available to the end-user; and

(4) notice concerning any and all amounts to be billed by the operator services provider on behalf of any host location or third party which will appear on the operator service provider's bill for services rendered.

(d) in instances when the provider is unable to complete the call and it requires transfer to another telephone corporation which may affect the rates and charges applicable to the telephone bill, inform the caller of the transfer and its possible effect on the applicable rates and charges, before any charges are incurred; and

(e) in the case of such a transfer, the telephone corporation or provider to which the call is transferred shall identify itself and inform the caller of the transfer's effect on the applicable rates and charges, before any charges are incurred.

.SO DOC 16C-649.3

NYCRR

649.3 Rates and charges.

(a) A provider of intrastate operator assisted communications services must file with the commission tariffs setting forth its rates, charges, rules and regulations.

(b) Whenever a provider files new tariffs or proposed changes in tariff rates previously effective, the provider shall file therewith an explanation of the rates or changes and of the basis therefor.

(c) Such tariffs shall not become effective for 75 days; and may, during that 75-day period, be suspended by the commission for a further period of up to eight months for investigation and hearing if the commission determines that the public interest so requires, unless the maximum rates and charges to be charged by a provider do not exceed the highest rates and charges authorized by the commission for use by a local exchange telephone corporation or a dominant interexchange

telephone corporation in the State for similar kinds of operator assisted telephone calls.

.SO DOC 16C-649.4 NYCRR

649.4 Exclusive agreements prohibited. Effective September 1, 1990, providers of intrastate operator assisted communications services shall not take any action or enter into any arrangement which restricts end-user selection among competing interexchange telephone corporations or end-user access to competing providers of intrastate operator assisted communications services, or pay any commissions or other compensation to any entity engaged in such action or arrangement.

.SO DOC 16C-649.5 NYCRR

649.5 Enforcement.

A provider of intrastate operator assisted communications services which violates any provision contained in this Part is subject to having its authority to provide such services revoked, its certificate of public convenience and necessity suspended, and commission actions pursuant to Public Service Law, sections 25 and 26.

.SO DOC 16C-649.6 NYCRR

649.6 Emergency calls. (a) A provider of intrastate operator assisted communications services will be authorized by the commission to receive direct routing to it of calls initiated by dialing solely "0", upon its demonstration that it:

- (1) can process all emergency calls with a high degree of reliability;
- (2) can ensure that at the start of each call it will receive a signal enabling it to pinpoint the specific location of the calling telephone;
- (3) has internal procedures to police, monitor, and routinely test its ability to continuously process emergency calls with a high degree of reliability; and
- (4) can and will maintain the ability to reliably and promptly connect any "0" call which it cannot satisfactorily complete to the LEC operator in the area serving the calling location, in a manner such that the caller does not sense or believe that the call has been abandoned by the operator.

(b) Such authorization shall take the form of an amendment to the operator services provider's Certificate of Public Convenience and Necessity.

(c) Upon a finding by the commission that the provider is not in compliance with the requirements set forth in subdivision (a) of this section, such authorization shall be revoked and the provider shall notify the owners of all telephones it serves of the revocation.

.SO DOC 16C-PT650 NYCRR

PART 650
REGULATIONS APPLICABLE TO PAYPHONE
(Statutory Authority: Public Service Law §§ 90(3) and 94(2))

Sec.

- 650.1 Requirements applicable to payphones
- 650.2 Operational and service requirements
- 650.3 Access to interexchange or local exchange companies
- 650.4 Notice requirements
- 650.5 Customer service requirements
- 650.6 Enforcement

.SO DOC 16C-650.1 NYCRR

Section 650.1 Requirements applicable to payphones.

A provider of telephone service to end users by means of a currency or credit operated telephone, hereinafter a "payphone", shall be subject to the requirements set forth in this Part. The term "COCOT," as defined in Public Service Law Sections 90 and 92-c, shall be used interchangeably with the term payphone.

.SO DOC 16C-650.2 NYCRR

650.2 Operational and service requirements.

The following operational requirements shall apply to payphones:

- (a) Access to intraLATA directory assistance shall be provided;
- (b) Calls to the 911 emergency number, to an operator, and to relay centers providing service to persons with speech, hearing, or other disabilities shall be completed at no charge to payphone end users.

When "9-1-1" is dialed from a payphone, the payphone must input a signal for a 911 call to the local exchange network with no perceptible delay. When a payphone end user dials "0", if no further digits are dialed within 5 seconds the call must be routed either to a local exchange carrier operator or to an operator services provider authorized by the commission to receive such calls. If additional digits are dialed by the caller within five seconds after dialing "0", the call may be routed at the discretion of the payphone service provider; and,

- (c) Payphones, which are serviced by dedicated exchange access lines, shall be connected to the telephone network by means of a metered or measured service access lines, or a specially rated flat rate lines in situations where measured service is not available, offered pursuant to tariffs by local exchange carriers, an hereinafter referred to as "public access lines." Such public access lines are subject to the same regulatory requirements as other access line services provided by local exchange carriers.

.SO DOC 16C-650.3 NYCRR

650.3 Access to interexchange or local exchange companies.

(a) A payphone service provider shall not take any action or enter into any agreement which restricts an end user's access to any interexchange or local exchange carrier providing service to payphone callers within the local access and transport area (LATA) in which the payphone is located.

(b) A payphone service provider shall not take any action or enter into any agreement which restricts an end user's access to any interexchange or local exchange carrier providing interLATA long distance service to payphone callers.

.SO DOC 16C-650.4

NYCRR

650.4 Notice requirements.

(a) A payphone service provider shall conspicuously display on, or in the immediate vicinity of, its payphones the following information:

(1) the identity of the payphone service provider; when ownership of a payphone changes due to merger with or acquisition by another company, the identity of the new owner must be registered within 30 days with the local exchange carrier serving the payphone and be posted at the payphone within 60 days of the ownership change or when scheduled maintenance is performed, whichever is earlier.

(2) a statement indicating that calls can be made at no charge, and without need to deposit coins, use credit cards, or input any other information, to the 911 emergency number, relay centers for the disabled and an operator;

(3) specific dialing and coin deposit/return information, including instructions for accessing a telephone company operator and directory assistance service;

(4) local call charging information, including the timing of and rates applicable during the initial call period and the timing of and rates applicable during additional (overtime) call periods;

(5) the identity of the local exchange and long distance companies carrying calls from the payphone on an automated or presubscribed basis, and instructions for obtaining access to other long distance carriers;

(6) a notice stating the location surcharge, if any, that is imposed on an end user for placing a long distance call, unless such information is made available through an on-line audio notification system pursuant to Section 650.4(b) of this Part and instructions for accessing the system are posted;

(7) a toll-free number that an end user can dial to obtain information on the rates, surcharges, terms or conditions applicable to calls placed to the presubscribed carrier from the payphone, unless such information

is made available through an on-line audio notification system pursuant to Section 650.4(b) of this Part and instructions for accessing the system are posted;

(8) a toll-free number that an end user can call to resolve, through the payphone service provider, billing and service quality complaints;

(9) a toll-free number that an end user can dial to reach the Department of Public Service for assistance in resolving an intrastate complaint;

(10) the rates charged for interLATA Directory Assistance calls placed to the presubscribed carrier; and

(11) the rates charged for intraLATA Directory Assistance calls placed to the presubscribed carrier.

(b) At payphones where on-line audio rate notifications are available from long distance carriers to callers who place interstate long distance calls, pursuant to 47 CFR 64.703 (a)(4) (1998):

(1) similar audio rate notifications must also be available to end users placing intrastate long distance calls.

(2) the notice requirements contained in Section 650.4(a)(6) and (7) of this Part are waived, provided instructions for accessing the on-line audio rate notification system are posted. (47 CFR Section 64.703 is available for purchase from the U.S. Government Printing Office, Superintendent of Documents, Mail Stop: SSOP, Washington, D.C. 20402-9328 and for inspection and copying at the Public Service Commission, 3 Empire State Plaza, Albany, NY 12223.)

NYCRR

650.5 Customer service requirements.

(a) Every payphone service provider shall maintain adequate complaint handling procedures, including the:

(1) acceptance and processing of complaints in a simple manner and form; and

(2) prompt investigation and resolution of complaints.

.SO DOC 16C-650.6

NYCRR

650.6 Enforcement.

(a) Any payphone which operates in violation of any provision contained in this Part is subject to discontinuance of public access line service by the local exchange carrier serving it; a refusal to install public access line service by other local exchange carriers; and, penalties imposed pursuant to paragraph 3 of Public Service Law, section 90(3). Provision of public access line services to all payphones owned by a person or entity or affiliate thereof may be discontinued by current local exchange carriers and refused by other local exchange

carriers if that person or entity repeatedly violates the rules set forth in this Part.

(b) Every local exchange carrier providing public access line services to payphones, shall:

(1) maintain a list of payphones being served, and provide access to that list to the Department of Public Service;

(2) adopt, as part of its schedule of rates and charges, a provision stating that provision of public access line service to payphones may be terminated and refused for violation of the rules set forth in this Part; and

(3) discontinue provision of public access line service, or refuse to install public access line service, to payphones upon directive of the commission or a department director pursuant to the provisions of this Part.

(c) The Department of Public Service staff is authorized to conduct any investigation necessary to ensure compliance with Public Service Law, section 90(3) and the requirements set forth in this Part. Upon finding a violation, the staff shall issue a written citation to the payphone service provider, stating the penalty and the violation. Within 30 days, the payphone service provider must pay any fine assessed and correct the violation, or notify the department that the citation will be contested. Such notification shall include a statement of the grounds upon which the citation is being contested. Any citation that is contested shall be subject to an investigation, hearing and determination by the commission.

(d) Where the penalty prescribed in a staff citation issued pursuant to Section 650.6(c) of this Part, is discontinuance of service, and the citation has not been contested within 30 days of issuance, the staff shall direct the local exchange carrier currently providing public access line service to the payphone to discontinue the service, and all other local exchange carriers operating in the area not to install public access line service to the offending payphone.

(e) Where public access line service to a payphone has been discontinued pursuant to the provisions of this Part, an application for restoration of service may be made to the staff, demonstrating that the conditions which prompted the discontinuance of service will not recur. Within 60 days, the staff shall either deny the application or direct the local exchange carrier formerly serving the payphone that it shall restore public access line service and other local exchange carriers providing service in the area that they may install public access line service. If such an application is denied, the applicant may, within 30

days, contest the denial, in which case there will be an investigation, hearing and determination by the commission.

(f) Discontinuance of public access line service to a payphone pursuant to the provision of this Part shall not affect the right of an unaffiliated person or entity to apply directly to a local exchange carrier for installation of public access line service at or near the same location.

(g) A local exchange carrier instructed to disconnect, or to refuse to install, public access line service to a payphone owned or controlled by a non-affiliated company, pursuant to the provisions of the Part, shall not convey any information about such instruction to any affiliated payphone operation.

NYCRR

Section 651.1 Applicability.

This Part is prescribed and promulgated as the regulations governing the preservation of records of telephone corporations excluding other common carriers and cellular communications companies, subject to the jurisdiction of the commission, engaged in furnishing telephone service. As used in this Part, the term "telephone corporation" includes every corporation, company, association, joint-stock association, partnership and person, owning, operating or managing any telephone line or part of telephone line used in the conduct of business of providing telephone service or telephonic communication for hire.

.SO DOC 16C-651.2 NYCRR

651.2 Scope of the regulations in this Part.

(a) The regulations in this Part, effective November 1, 1993, apply to all accounts, records, memoranda, documents, papers, and correspondence prepared by or on behalf of the telephone company as well as those which come into its possession in connection with the acquisition of property, such as by purchase, consolidation, merger, etc.

(b) The regulations in this Part shall not be construed as excusing compliance with any other lawful requirement for the preservation of records for periods longer than those prescribed in this Part.

(c) Unless otherwise specified in section 651.11 of this Part, duplicate copies of records may be destroyed at any time; provided, however, that such duplicate copies contain no significant information not shown on the originals and that precautions have been taken to assure the continued retention of the originals (or one true copy) for the full period required under the regulations in this Part.

(d) Records other than those listed in section 651.11 of this Part may be destroyed at the option of the company; provided, however, that records which are used in lieu of those listed shall be preserved for the periods prescribed for records used for substantially similar purposes. And provided further, that retention of records pertaining to added services, functions, plant, etc., the establishment of which cannot be presently foreseen, shall conform with the principles promulgated in section 651.11 of this Part.

(e) Notwithstanding the provisions of the schedule of records and periods of retention, the commission may, upon the request of the company, authorize a shorter period of retention for any record listed therein upon a showing by the company that preservation of such record for a longer period is not necessary or appropriate in the public interest or for the protection of investors or consumers.

.SO DOC 16C-651.3 NYCRR

651.3 Designation of supervisory official.

Each company subject to the regulations in this Part shall designate one or more officials to supervise the preservation and the authorized destruction of its records.

.SO DOC 16C-651.4 NYCRR

651.4 Protection and storage of records.

The company shall protect records subject to the regulations in this Part from damage from fires, floods, and other hazards and, in the selection of storage spaces, safeguard the records from unnecessary exposure to deterioration from excessive humidity, dryness, or lack of proper ventilation.

.SO DOC 16C-651.5 NYCRR

651.5 Definition of record media.

(a) For the purpose of this Part, the data constituting the records listed in the schedule of records and periods of retention may be retained in any of the media forms in Figure 1 of this Subdivision, or in any other generally accepted electronic or photographic media form provided that the media selected has a standard life expectancy equal to or in excess of the specified retention period. However, records supporting plant cost shall be retained in their original form unless microfilmed. (See section 651.11 of this Part for periods of retention.) In no instance will media regeneration to achieve the full length of period retention be allowed without commission approval of the request of the company, which approval will be based on the condition of the record and its projected life expectancy. In emergency cases management shall take such action as prudence calls for and notify the commission thereafter.

FIGURE 1 - RECORD MEDIA

Record media/form	Media life	Comments and standards
1. Paper & card stock (hard-copy)	Archival permanency	For each document, paper stock should be selected with a life expectancy equal to or greater than the retention period specified for that document.
2. Tape magnetic (including video tape)	5 years	Assumes storage in a controlled environment with a temperature and humidity range of 60-80 degrees F and 40-60% respectively. (See section 651.8 for

specific storage conditions.)
 Punched Archival For each record, tape media
 permanency (paper, mylar, metallic base)
 should be selected with a life
 expectancy equal to, or greater
 than, the retention period
 specified for that record.

3. Microforms

a. Microfilm Archival Assumes processing to standards
 including permanency and storage in a controlled
 Computer Output environment with a temperature and
 Microfilm (COM) humidity range of 35-77 degrees F
 microfiche jackets and and 20-50% respectively.
 aperture cards Ref. American National Standards
 Institute (ANSI) standards
 ANSI/NAPM IT9.1-1992
 and ANSI IT9.11-1991.

b. Updatable type Dependent on For temporary
 use of Media records not requiring archival
 permanency so long as the micro-
 film or film selected has a life
 expectancy equal to, or greater
 than, the retention period for
 that record.
 Same storage conditions as for
 microfilm.

c. Metallic Archival Same storage
 recording permanency conditions as for
 data strips microfilm.

(b) If the media form of the record retained is other than a readable
 paper copy, then reader and/or printer equipment and related printout
 programs, if required, shall be provided by the utility for data
 reference.

(c) The media form initially selected for the record becomes the
 "original" for that particular record. If subsequent conditions (e.g.,
 improved media life expectancy, increased utility resources,
 environmental factors) require and the remaining retention period
 permits a change in the media forms, the utility may convert to another
 media, provided the certification processes described in section 651.6
 of this Part are observed and data referencing capability is maintained.

651.6 Microform, tape and computer output certification.

(a) As the initial recording media: (1) Except as provided for in paragraph (2) of this subdivision each microform record series shall contain, at the beginning, a microform introduction stating the title of the record series, the date prepared, the name of the official responsible for validating the data contained therein. Each microform record series shall be closed with a clear and standard microform notation indicating the completion of the series and the date.

(2) If an official permanent record series is a computer output product (i.e., output paper or microfilm, jacket microfiche or aperture cards), any certification that may otherwise be required under paragraph (1) of this subdivision is not required if:

(i) the series is prepared in accordance with written standard procedures developed or accepted general business practices followed by the company that ensure the integrity of record series that are the product of computer output; and

(ii) such procedures or practices include the name or title of the official responsible for validating or confirming the data contained in the record series and confirming that a particular computer output record series was produced in accordance with the standard procedures or practices.

(3) If after validation, supplemental data and/or corrections (i.e., resulting from computer programming) are required, said microform may be produced separately or as a part of the series rerun, but shall be affixed to the original microform certificate as described in paragraph (1) of this subdivision.

(4) Each tape record series shall be externally labeled and shall include, as a basic part of the program, at the beginning of that series an introduction stating the record series title, date prepared, the name of the official responsible for validating or confirming the data contained therein and an index where appropriate. Each record series shall be closed with a clear and standard notation indicating the completion of that series and the date.

(b) Conversion from other media:

(1) Each microform record series shall include, as an integral part, a certificate(s) stating that the microform are direct and facsimile reproductions of the original records and that they have been made in accordance with prescribed instructions. Such certificate(s) shall be executed by a person(s) having personal knowledge of the facts covered thereby.

(2) Each microform record series shall commence and end with a

statement as to the nature and arrangement of the records reproduced, and the date. Rolls of film shall not be cut, except to produce jacketed microfiche. Supplemental or retaken film, whether of misplaced or omitted documents or of portions of microform found to be defective, shall be attached to the beginning of the microform record series. However, if a retrieval system using such methods as, for example, image count indexing or "blipping" is used, the supplemental or retaken film may be attached at the end of the series, if provisions at the beginning of the series advise the viewer of the location of the problem frames and the location of the supplemental or retaken frames. If supplemental or retaken film of misplaced or omitted documents, or of portions of microform found to be defective, are attached to the microform record series, the certificate described in paragraph (1) of this subdivision above shall cover the supplemental or retaken film and shall state the reasons for the attachment.

(3) If, in accordance with the provisions of section 651.7 of this Part, the telephone utility elects to convert records to the tape media, the same certification provision specified in paragraph (a) (4) of this section must be provided in the conversion program.

.SO DOC 16C-651.7

NYCRR

651.7 Change of media for existing records.

Those records prepared and maintained under previous regulations in a paper media and whose remaining retention period falls within the life expectancy range of any of the media detailed in section 651.5, Figure 1 of this Part, may be converted to that media at the telephone utility's option, provided the applicable certification processes described in section 651.6 of this Part are observed and an audit referencing capability maintained.

.SO DOC 16C-651.8

NYCRR

651.8 Media. (a) All records created or maintained in a media and a format other than readable entries on paper shall:

(1) be prepared, arranged, classified, identified and indexed as to permit the subsequent location, examination and reproduction of the record to a readable media;

(2) be stored in such a manner as to provide reasonable protection from hazards such as fire, flood, theft, etc. and maintained in a controlled environment;

(3) be regenerated, including proper certification, when damaged. (Also see section 651.5(a) of this Part.)

(b) The company shall be prepared to furnish, at its own expense, standard facilities for reading media and shall additionally provide, if

the commission so directs, copies of the record in a readable form.

(c) All film stock shall be of approved operationally-permanent-record microcopying type, which meets the current specifications of American National Standard ANSI/AIIM MS14-1988.

.SO DOC 16C-651.9 NYCRR

651.9 Destruction of records. The destruction of the records permitted to be destroyed under the provisions of the regulations in this Part may be performed in any manner elected by the carrier concerned. Precautions shall be taken, however, to macerate, or otherwise destroy the legibility of, records the content of which is forbidden by law to be divulged to unauthorized persons.

.SO DOC 16C-651.10 NYCRR

651.10 Premature destruction or loss of records.

When records are destroyed or lost before the expiration of the prescribed period of retention, a certified statement listing, as far as may be determined, the records destroyed and describing the circumstances of accidental or other premature destruction or loss shall be filed with the commission within 90 days from the date of discovery of such destruction.

.SO DOC 16C-651.11 NYCRR

651.11 Schedule of records and periods of retention. A schedule of records is hereby prescribed for use by telephone corporations for record retention requirements of this Part. The schedule of records contained in section 651.19 of this Part, shows the periods of time that designated records shall be preserved. However, records related to plant shall be retained a minimum of 30 years unless otherwise specified in section 651.19 of this Part.

.SO DOC 16C-651.12 NYCRR

651.12 Retention periods designated "Destroy at option". Use of the retention period, "Destroy at option", in the regulations in this Part constitutes authorization for such destruction under the conditions specified for the particular types of records, only if such optional destruction is appropriate to limited managerial interest in such records and if such optional destruction is not in conflict with other legal retention requirements or usefulness of such records in satisfying pending regulatory actions or directives.

.SO DOC 16C-651.13 NYCRR

651.13 Records of services performed by affiliated companies. The telephone corporation to which the regulations in this Part apply shall assure the availability of records of services performed by affiliated companies for the periods indicated herein, as are necessary, to support

the cost of services rendered to it by an affiliated company.

.SO DOC 16C-651.14

NYCRR

651.14 Index of records. At each office of the company where records are kept or stored, such records as are required by this Part to be preserved shall be so arranged, filed, and currently indexed that they may be readily identified and made available to representatives of the commission. In the principal office of the company a master index shall be available showing the physical location of the various classes of records, the periods to which such classes of records relate, and the locations, names, and titles of the custodians.

.SO DOC 16C-651.15

NYCRR

651.15 Notes to schedule of records and periods of retention. (a) For the purposes of the regulation, a stockholder's account may be treated as a closed account at the time that such stockholder ceases to be a holder of record of the particular class and series of stock of the company and the six-year retention period prescribed herein shall run from that date. If such person subsequently acquires shares of capital stock of the company and thus again becomes a stockholder of the company, the record of such acquisition shall be treated as a new stockholder account.

(b) The terms "bonds" and "debentures," as used in captions (a) through (f) of this item 4 (section 651.19 of this Part), shall include all debt securities, such as bonds, debentures or notes other than debt securities which evidence temporary borrowings and which are expected to be repaid out of the proceeds of the sale of longer term securities. Typical of such temporary debt securities as described in caption (i) of this item 4 (section 651.19 of this Part), would be notes issued to banks evidencing temporary working capital and construction loans.

(c) Canceled bonds and debentures and paid interest coupons pertaining thereto may be destroyed, provided that a certificate of destruction giving full description reference to the documents destroyed shall be made by the person or persons authorized to perform such destruction and shall be retained by the company for the period herein prescribed. The certificate of destruction evidencing the destruction of paid interest coupons pertaining to bonds and debentures need not contain a listing of the bond or debenture, serial numbers pertaining to such paid interest coupons. When documents represent debt secured by mortgage, the certificate of destruction shall also be authorized by a representative of the trustee(s) acting in conjunction with the person or persons destroying the documents or shall have the trustee(s) acceptance thereon. The certificate of destruction above described may be

destroyed six years after the payment and discharge of the bonds or debentures or interest coupons described in such certificate.

(d) If a retention period is prescribed elsewhere in the schedule (section 651.19 of this Part), with respect to any document which is included as an exhibit to any filing retained pursuant to the requirements of this item 5 (section 651.19 of this Part), the company need retain only one copy of such document in its files provided appropriate cross references are established.

.SO DOC 16C-651.16 NYCRR

651.16 Retention of telephone toll records.

Each company that offers or bills toll telephone service shall retain for a period of 18 months such records as are necessary to provide the following billing information about telephone toll calls: the name, address, and telephone number of the caller, telephone number called, date, time, length of call, method of completion of call (e.g., direct dial, operator assisted, third number or calling card) and automatic message accounting tapes. Each company shall retain this information for toll calls that it bills whether it is billing its own toll service customers for toll calls or billing customers for another company.

.SO DOC 16C-651.17 NYCRR

651.17 Retention of complaint records. Except as specified in section 651.16 of this Part, each company shall retain records required by section 651.11 of this Part. Schedule of records and periods of retention, for the period established therein. Records relevant to complaint proceedings not already contained in the company index of records should be added to the index as soon as a complaint is filed and retained until 60 days after final disposition of the complaint.

Records a company is directed to retain as the result of a proceeding or inquiry by the commission to the extent not already contained in the index will also be added to the index and retained until 60 days after final disposition of the proceeding or inquiry.

.SO DOC 16C-651.18 NYCRR

651.18 Incorporation by reference.

(a) Any documents or parts thereof incorporated by reference in this Part are a part of this regulation as though set forth in full herein.

(b) All incorporated documents are available for inspection and copying at the Public Service Commission's Office, Empire State Plaza, Building 3, Albany, NY 12223. In addition, the documents are available from the American National Standards Institute, 11 West 42nd Street, New York 10036.

(c) The material from ANSI (ANSI/NAPM IT9.1-1992, for Imaging Media

(Film)--Silver-Gelatin Type--Specifications for Stability, and ANSI IT9.11-1991, for Imaging Media--Processed Safety Photographic Film--Storage), is used with the permission of the American National Standards Institute. Copies of the standards may be purchased from the American National Standards Institute at 11 West 42nd Street, New York, NY 10036.

ITEM	DESCRIPTION	RETENTION PERIOD
------	-------------	------------------

CORPORATE AND GENERAL

- 1. Capital stock records:
 - (a) Capital stock ledgers or other records showing the same information 6 years after the stockholders' account is closed. See section 651.15(a).
 - (b) Capital stock subscription accounts, warrants, requests for allotments and other essential papers related thereto 2 years after settlement.
 - (c) Stubs or similar records of capital stock certificate issuance where not used as capital stock ledger record 6 years after cancellation of certificate. If this record serves the purpose of a capital stock ledger, Item 1(a) is applicable.
 - (d) Stock transfer registers or sheets or similar records 6 years after last entry on page or sheet of record.

- (e) Papers pertaining to or supporting transfers of capital stock:
- (1) Papers that are recorded officially in a court or in the office of some other public recording authority; and other papers presented by any bank or trust company requesting transfers in its capacity as a fiduciary and miscellaneous papers Destroy at option or return to stockholder.
- (f) Canceled capital stock certificates where not used as capital stock ledger records 6 years after cancellation of certificate. If this record serves the purpose of a capital stock ledger, item 1(a) is applicable.
- (g) Change of address notices of stockholders Destroy at option after changes are recorded.
- (h) Bonds of indemnity and affidavits covering issuances of stock certificates to replace lost certificates 6 years after expiration of bonds.
- (i) Letters, notices, reports, statements and other communications distributed to all stockholders of a particular class:
- (1) Formal communications addressed to all stockholders of a particular class, including annual reports to stockholders, notices of annual and special meetings of stockholders, and other notices, reports, letters or statements relating to corporate or stockholder actions Permanently.
- (2) Interim reports of operations, 6 years after the

speeches of corporate officers, date thereof.
notices of change of corporate
address of telephone numbers, etc.

(j) Dividend registers, lists or 6 years.
similar records

(k) Paid dividend checks 6 years.

(l) Third party dividend 6 years after
orders rescission order.

2. Proxies and voting lists:

(a) Proxies of holders 3 years.
of voting securities

(b) Lists of holders of 1 year.
voting securities

represented at meetings

3. Reports to stockholders:

(a) Annual reports or Permanently.

(b) Written acknowledgments Destroy at option.
of receipts of reports
to stockholders and
written requests for
copies of such reports

4. Debt security records: See section 651.15(b)

(a) Registered bond and 3 years after
debenture ledgers redemption.

(b) Bond and debenture 3 years after settlement.
subscription accounts,

warrants, subscription
notices, requests for
allotment and essential
papers related thereto

(c) Stubs or similar 3 years after
records of bond and redemption.

debenture certificates issued

(d) Papers pertaining to or
supporting transfers of
registered bonds and
debentures:

(1) Papers that are recorded Destroy at option or
officially in a court or return to holders of
in the office of some the bonds or debentures.

other public recording authority; and other papers presented by any bank or trust company requesting transfers in its capacity as a fiduciary, plus other miscellaneous papers

(e) Records of bond and debenture interest coupons paid and unpaid Destroy at option. See section 651.15(c).

(f) Canceled bonds and debentures and paid interest coupons pertaining thereto Destroy at option. See section 651.15(c).

(g) Trust indentures, loan agreements or other contracts or agreements securing debt securities issued. 6 years after redemption.

(If such papers or documents are included among the records covered by Item 5 of the table, this instruction will not apply)

(h) Copies of reports, statements, letters or memoranda filed with Trustee(s) pursuant to provisions of trust indenture or other security instrument or agreement securing debt securities issued 6 years after redemption. (Destroy at option provided that the Trustee(s) under such indenture or security instrument is a National Bank, a member of the Federal Reserve System or a subsidiary of any such National Bank or Federal Reserve System member bank; and provided further that the trustee(s) has certified to the company that copies of all such documents will be available in the offices of the trustee(s) for inspection at any time prior to redemption by holders of debt securities to which such documents relate and

for inspection by any Federal or State regulatory authority prior to redemption and for an additional period of six years after redemption.)

(i) Paid or canceled debt securities evidencing temporary borrowings 3 years after payment or cancellation, provided other words of issuance and payment or cancellation are maintained.

(j) Paid interest checks 6 years.

5. Filings with and authorizations by regulatory agencies:

(a) Authorizations from regulatory bodies for issuance of securities:

(1) Copies of applications to regulatory bodies for authority to issue stocks, bonds, and other securities, including copies of exhibits in support of such applications 25 years or until all securities covered are retired, whichever is shorter. See section 651.15(d)

(2) Official copies of opinions and orders of regulatory bodies granting authority to issue securities Until securities covered are retired.

(3) Reports filed with regulatory bodies in compliance with authorizations to issue securities. (Reports of sales of securities of application of proceeds etc.) Until securities covered are retired.

File copies of such reports and supporting papers

(b) Copies of registration statements and other data filed with the Securities and Exchange Commission:

(1) In connection with offerings of securities for sale to the public or the listing of securities on exchanges, including supporting papers

25 years or until all securities covered are retired, whichever is shorter. See section 651.15(d).

(2) Copies of periodic reports and supporting papers filed in compliance with either the Securities Act of 1933 or the Securities Exchange Act of 1934

25 years.

6. Organizational documents:

(a) Minute books of stockholders', directors', and directors' committee meeting.

Permanently.

(b) Titles, franchises, and licenses:

(1) Deeds and other title papers (including abstracts of title and supporting data)

6 years after property is disposed of unless surrendered to transferee.

(2) Corporate charters or or certificates of incorporation

Permanently.

(3) Franchises and certificates authorizing operations as a public utility

Life of corporation.

(4) Copies of formal orders of regulatory commissions served upon the utility

Permanently.

(c) Permits:

(1) Permits and granted applications for the use of facilities of others

6 years after expiration or cancellation

(2) Copies of permits and applications granted others

6 years after expiration or

for the use of the utility's facilities cancellation.

(3) Applications for the use of facilities Destroy at option.

not granted and copies of such applications

(4) Permits, privileges, Licenses, 1 year after expiration or cancellation.
or rights of a temporary nature from municipal or other governmental

authorities or others

(5) Continuing and limited-term permits or authorizations 3 years after expiration or cancellation.
from governmental

authorities or others

(d) Patents and copyrights: Until expiration of patent.

(1) Copy of patent applications, invention descriptions, memoranda and other data relating thereto

(2) Agreements with employees for assignments of inventions Until termination of agreement.

(3) Copy of copyright applications, with specimen copies Until expiration of copyright.

(4) Letters patent and copyright certificates Until expiration of patent or copyright.

(5) Licensing and royalty agreements, assignments, or grants Until expiration of patent or copyright.

(e) Records relating to preservation and destruction of records

(1) General bulletins, circulars, list of forms and other records, 6 years after expiration or supersedure.

and other instructions to employees pertaining to preservation and destruction of records

(2) Historical record of designation of supervisory official (see section Permanently.

to the carrying out of the functions of an employee's stock purchase or other type of employee's saving plan

(f) Contracts or agreements for the acquisition or disposal of investments (excluding temporary cash investments) 25 years after disposal.

(g) Contracts with other companies for the interchange of business, divisions of revenues, and interchange of employees' benefit obligations 6 years after supersedure, expiration or cancellation.

(h) Contracts or agreements relating to construction, purchase or other acquisition or sale, removal or disposal of communication plant:

(1) Contracts for the acquisition from predecessors of substantially complete operating systems 50 years.

(2) Other contracts and agreements 6 years after retirement of property to which they relate.

(i) Pension trust agreements, with all amendments and correspondence with trustee Permanently.

(j) Contracts or agreements for joint ownership or joint use of communications plant 6 years after expiration or cancellation.

(k) Memoranda essential to clarifying or explaining provisions of contracts listed above For the same period as contracts to which they relate.

(l) Card or book records of contracts, leases, and agreements made showing dates of expiration and of renewals, For the same period as contracts to which they relate.

memoranda of receipts
and payments under such
contracts, etc.

8. Accountants' and auditors' reports:

(a) Reports of examinations
and audits by accountants
and auditors not in the
regular employ of the
utility (Such as

7 years after
date of report
or commission audit,
whichever comes last.

reports of public
accounting firms and
regulatory commission
accountants)

(b) Internal audit
reports and work
papers

7 years after
date of report or
commission audit, whichever
comes last.

AUTOMATIC DATA PROCESSING

9. Automatic data processing

records (Retain original
source data used as input
for data processing and
data processing report
printouts for the
applicable periods
prescribed elsewhere in
the schedule):

(a) Punched cards, tapes or
or similar media used as
intermediate records or steps
in data processing for
assembling data to be
posted to the records of
the company or used in a
report or study

Destroy at option.

(b) Program documentation
and revisions thereto

Retain for periods
prescribed for related
output data. Statements and illustrations
as to the scope of operations should be
sufficiently detailed to indicate (a)
the application being performed, (b)

the procedures employed in each application (which, for example, might be supported by flow charts, block diagrams or other descriptions of operating procedures), and (c) the controls used to insure accurate and reliable processing. Major program changes, together with their effective dates, should be noted in order to preserve an accurate chronological record.

GENERAL ACCOUNTING RECORDS

10. General and subsidiary ledgers:

(a)(1) General ledgers 50 years.

(2) Ledgers subsidiary or auxiliary to general ledgers except ledgers provided for elsewhere 50 years.

(b)(1) Indexes to general ledgers 50 years.

(2) Indexes to subsidiary ledgers except ledgers provided for elsewhere 50 years.

(c) Trial balance sheets of general and subsidiary ledgers 2 years.

11. Journals:

(a) General and subsidiary 50 years.

12. Journal vouchers and journal entries including supporting detail:

(a) Journal vouchers and journal entries 50 years.

(b) Analyses, summarizations, distributions, and other computations which support journal vouchers and journal entries 6 years. See section 651.11.

- (c) Schedules for recurring journal entries Destroy when superseded.
- (d) Lists of standard journal entry numbers Destroy when superseded.
13. Cash books:
- (a) General and subsidiary or auxiliary books 10 years after close of fiscal year.
See item 12(a).
14. Voucher registers:
- (a) Voucher registers or similar records when used as a source document 6 years. See section 651.11.
15. Vouchers:
- (a) Paid and canceled vouchers (one copy analysis sheets showing detailed distribution of charges on individual vouchers and other supporting papers) 6 years. See section 651.11.
- (b) Original bills and invoices for materials, services, etc., paid by vouchers 6 years. See section 651.11.
- (c) Paid checks and receipts for payments by voucher or otherwise 6 years.
See section 651.11.
- (d) Authorization for the payment of specific vouchers 6 years.
See section 651.11.
- (e) Vouchers related to acquisition of stock or evidences of debt and other investments (including advances) in other communication companies Permanently.
- (f) Vouchers related to purchase or other acquisition of plant of other 50 years.

communications companies

(g) Nonplant related vouchers supporting affiliated transactions 6 years or until a compliance audit has been completed, whichever is longer.

(h) Lists of unadited bills(accounts payable), lists of vouchers transmitted and memoranda regarding charges in unaudited bills Destroy at option.

(i) Voucher indexes Destroy at option.
16. Accounts receivable (see items 54 and 55 for accounts with customers for utility service and for equipment services):

(a) Records of accounts receivable pertaining to sales of utility plant 3 years after settlement.

(b) Record or register of accounts receivable and indexes thereto and summaries of distribution 3 years after settlement.

(c) Accounting department copies of invoices issued and supporting papers which do not accompany the original invoices and authorizations for charges including supporting papers 3 years after settlement.

(d) Periodic statements of unsettled accounts, except trial balances Destroy at option.

(e) Schedule of invoices to be issued Destroy at option.

17. Records of securities owned:

(a) Records of securities owned, in treasury, or with custodians (excluding temporary 6 years after disposal of the investment.

investment of cash)

18. Payroll records:

(a) Payroll sheets or registers of payments of salaries and wages 6 years.
See section 651.11.

(b) Records showing the distribution of salaries and wages paid and summaries or recapitulation statements of such distribution 6 years.
See item 12(b).

(c) Time tickets, time sheets, time books, time cards, workers' reports and other records showing hours worked, description of work and accounts to be charged:

(1) When used as a basis for payment of salaries and wages supporting records described in Item 18(a) 6 years.
See section 651.11.

(2) When used solely as basis for supporting records described in Item 18(b) Destroy at option, if the basic information has been transcribed to other records, otherwise see section 651.11.

(d) Paid checks, receipts for wages paid in cash and other evidences of payments for services rendered by employees 3 years.
See section 651.11.

(e) Nonplant related vouchers supporting affiliated transactions 6 years or until a compliance audit has been completed, whichever is longer.

(f) Applicants and authorizations for changes in wage and salary rates, summaries and reports of changes in 3 years.
See section 651.11.

changes in wage and salary rates, summaries and reports of changes in

payrolls, and similar records

(g) Applications for payroll changes not authorized Destroy at option.

(h) Payroll authorizations and records of authorized positions 3 years.

(i) Records of deductions from payrolls Destroy at option.

(j) Comparative or analytical statements of payrolls Destroy at option.

(k) Employee's individual earnings record 6 years after termination of employment.

19. Assignments, attachments, and garnishments:

(a) Record of assignments, attachments, and garnishments of employees' salaries, including files of notices, etc., pertaining thereto Destroy at option.

(b) Minors' salary releases

INSURANCE

20. Insurance records:

(a) Records of insurance policies in force, showing coverage, preminiums paid and expiration dates Destroy at option after expiration of such policies.

(b) Insurance policies Destroy at option after expiration of such policies.

(c) Records of amounts recovered from insurance companies in connection with losses and of claims against insurance companies, including reports of losses and supporting papers 6 years. See section 651.11.

(d) Inspectors' reports and records of

Destroy when superseded.

condition of
property

(e) Insurance maps of
property and
structures erected thereon

Destroy when
superseded.

(f) Records and
statements relating to
insurance requirements

Destroy at option.

21. Injuries and damages:

(a) Claim registers, card
or book indexes and
other records in

2 years after
settlement.

connection with claims
presented against the
company in connection
with accidents resulting
in damage to the prop-
erty of others or
personal injuries,
including investigations
of stolen property,
robberies and
frauds

(b) Papers, reports,
statements of
witnesses, etc., necessary
to the support or rejection
of individual claims against the
the company

2 years after
settlement.

(c) Other papers, reports
or statements, pertaining
to accidents resulting
in property damages or personal
injuries, not necessary to the
support or rejection of claims

Destroy at option.

(d) Detailed schedules or spread
sheets of payments to others for
personal injuries or for property
damages

2 years after settlement.

OPERATIONS

22. Service orders and plant

assignment, repair service, trouble, inspection and testing records, including data which are stored in electronic data storage devices associated with computers:

(a) Copies of service orders used as a basis for entries to:

(1) Plant and expense accounts, 6 years. See that is, when used in lieu section 651.11. of, or when similar to, basic work or material reports

(2) Revenue and receivable 6 years. accounts and related accounting records

(3) Statistical records For life of of telephones, etc. customer's account and one year after inactive.

(4) Customers' service 6 years. records

(5) Directory records 3 years.

(6) Traffic information 3 years. or other central office records

(b) Copies of service 2 years. orders used to check accuracy of work and material reports

(c) Copies of service 2 years. orders, lists, or other memoranda based on service orders and supporting forms such as wiring plan work sheets and assignment memoranda, used as instructions for performance of plant work involved in completing service orders

(d) Cards or other forms 6 years after

used as records of uncompleted or held telephone service application orders

service is furnished or 4 years after application or order is canceled.

(e) Completed service orders and similar records or copies thereof (see item 22[a][2]), notices of completion of service orders, restoral of telephone service notices, and other authorizations used as basis for billing to customers and miscellaneous debtors or for entries to records used in such billing (see items 54[a],[b] and [f])

6 years.

(f) Lists, cards, or other records of subscriber plant facilities, trunks, circuits, or other plant available for assignment or assigned, including records of working interoffice trunks, miscellaneous circuits, toll circuit layouts, and equipment associated with particular lines or circuits

Until record is superseded or is retired from active file.

(g) Tickets, logsheets, subscriber line records, toll circuit trouble records or other forms or electronic storage devices used to record individual trouble reports and conditions found:

(1) Historical records, such as subscriber line and circuit trouble history records

2 years after line or circuit is retired from service.

(2) Other records

2 years.

(h) Test and inspection schedules, instructions, check lists and

2 years.

other working papers, and reports or records of results, exclusive of records of troubles covered by item 22(g) and records of defects, etc., covered by item 22(i)

(i) Lists or other records of plant defects, potential defects or unsatisfactory plant conditions, maintained as a basis for remedial work 1 year after work is completed.

(j) Lists or other records of telephone equipment maintenance or servicing requirements, e.g., required relay adjustments Until list is superseded or equipment is retired.

(k) Radio transmitting and receiving station log sheet or other station record showing 1 year after record is superseded or is retired from active file.

when energized, changes in frequency, reports of trouble, results of routine tests, etc.

(l) Other copies of service orders and similar records As provided for items 22(a), (b) and (c).

23. Contracts, applications, correspondence, and memoranda relative to establishing, changing, or discontinuing service to customers:

(a) Contracts or agreements (with any related maps or diagrams) with customers covering specially engineered or assembled facilities and equipment or other special service arrangements for which the special charges involved are not specifically stated in tariffs, 1 year after completion of contract or agreement or until associated investments are fully recovered, whichever is longer.

rate schedules, or
other rate authorities

(b) Contracts or agreements covering arrangements with service line companies, public telephone and toll station agents, hotel private branch exchanges, and similar contracts related to service to customers

1 year after completion of contract or agreement or until associated investments are fully recovered, whichever is longer

(c) Contracts or agreements with customers covering standard or regular service arrangements for which charges or rates are specifically stated in tariffs or other rate authorities

1 year after completion of resulting service order or other service authorization.

(d) Correspondence with customers and memoranda covering customers' service requests, used as basis for service orders or other service authorizations

1 year after significant data have been transcribed to service orders or other records.

(e) Contracts, applications, correspondence and memoranda covering customers' service requests that have been canceled, withdrawn, or abandoned

1 year after application has been withdrawn.

(f) Contracts or agreements covering customer's deposits

1 year after deposit is refunded, applied to customer's account or otherwise disposed of.

(g) Contracts or agreements with customers or others for extension of lines or other construction of plant involving refundable deposits, guarantees of revenue, contributions, cost reimbursements, or special termination charges:

(1) Refundable deposits or guarantees of revenue

1 year after completion or termination of contract or

agreement.

(2) Contributions, cost reimbursements, or special termination charges 6 years after retirement of the property to which they relate.

24. Records of customers and memoranda of contacts:

(a) Records of incompletd or held service applications or service orders 6 years after service is furnished or 4 years after application or order is canceled.

(b) Service records of customers, including application cards, or other records showing name, address, telephone number, and details of service, maintained for general reference in handling contacts with customers (See item 54(a) for customers' service and equipment records used for billing) 6 years after record is superseded.

(c) Records used for central office information purposes and other records of customers or former customers 1 year after record is superseded.

(d) Correspondence and memoranda relative to changes in telephone numbers 1 year after record is superseded.

(e) Memoranda of contacts relative to collections For period prescribed for the record to which it relates (See item 55).

(f) Correspondence and memoranda of contacts relative to customers' service requests or inquiries and miscellaneous matters Until significant data have been transcribed to service orders or other records.

25. Detailed message records:

(a) Detailed records of individual toll calls or messages, used as basis for billing to customers 18 months.

(b) Detailed records of local message or measured service usage used as basis for billing 18 months.

to customers

(c) Detailed records used as 18 months.

basis of accounting for receipts from public or semipublic telephones, covering toll calls, local calls or messages

(d) Unbillable (including 1 year.

unidentifiable) records or other detailed records used in accounting for operating revenues

(e) Records of uncompleted calls 1 year.

and memoranda or detailed message records used only for operating or administrative purposes, not as a basis for billing or accounting, including such records used in handling calls, service observation, testing, checking, and the transmission of the carrier's own

messages (official business)

(f) Records covering free or concession service As provided for item 56(c).

(g) Automatic message accounting tapes, tabulating cards, and similar records:

(1) Central office tapes or other 3 months after data have been automatically produced basic transferred to the accounting detailed records of message office media used in processing handled data.

(2) Accounting office tapes, 3 months after data have been tabulating cards or transferred to the accounting similar media used in office media used as a basis sorting and assembling data for billing and accounting.

from central office tapes or other basic message records and in computing, printing or otherwise producing printed tickets, statements or other written detailed message records (see items 25(a), (b)

and (c)) used for
billing and accounting

26. Tariffs, rate schedules, and
other rate authorities:

(a) Official (or general) file 6 years after expiration or
copy of all tariffs, rate sheets or cancellation.

schedules, or other rate
authorities covering services
or facilities furnished,
together with maps, tables,
charts, etc., referred to
therein or made a
part thereof

(b) Copies of tariffs, rate Until superseded or canceled.
sheets or schedules, or other rate
authorities maintained at business
offices, agencies, etc., for
public information or reference

(c) Other copies of tariffs, rate Until superseded or cancelled.
sheets, maps, etc., used in
computing or checking charges
shown on service orders or
other billing authorizations
and tables or other records
used in computing or quoting
message charges, taxes,
fractional monthly service
charges, etc.

(d) Requests and receipts for Until superseded
copies of tariffs, rate sheets, or canceled.
etc., inquiries and copies
of replies and relative to rates

(e) Copy of each concurrence in 6 years after cancellation or
tariffs or other rate authorities supersedure.
filed with regulatory bodies

(f) Working papers, rate studies, 5 years after rate becomes
and memoranda in connection with effective or rate proposal is
the compilation of tariffs, rate denied.
sheets, etc., or rate proposals
published or filed with
regulatory authorities

(g) Rate studies, cost memoranda, 5 years after charge becomes effective; if superseded or withdrawn, optional.
rate proposals and quotations
relating to specially engineered or assembled facilities or services for which the special charges involved are not specifically stated in tariffs or other rate authorities

(h) Rate studies, correspondence For period prescribed for the and memoranda related thereto not record to which it relates.
covered by items 26(f) and (g)

27. Telephone directories:

(a) One file copy of each 3 year after supersedure or directory issued by the discontinuance.
company for use by customers

(b) Authorizations for directory Until superseded or cancelled.
listings or special treatment thereof

(c) Agreements with customers or 3 months after termination.
others for leasing of directories

(d) Contracts or agreements 3 years after expiration or covering printing of cancellation.
directories, procurement of paper and other materials, sale by others of advertising in directories, delivery of directories, and sale or disposal of obsolete directories

(e) Contracts or agreements with 1 year after expiration or customers or other advertisers cancellation.
for sale of advertising in directories

(f) Billing authorizations for 3 years.
directory advertising or directories sold

(g) Billing and account records of 1 year after payment or other charges for directory disposition of accounts.
advertising

(h) Records of prepaid directory 6 years.

expenses and accounting
distributions of directory
expenses

(i) Memoranda of individual directory errors 6 years.

(j) Records of complaints or criticisms from customers or telephone directory advertisers, together with records of investigation and disposition thereof 6 years after settlement or rejection of related claims, or after date of papers if no claim is presented.

28. Advertising and information.

(a) Copies of advertisements by all medias used by the company in behalf of itself or affiliate company 6 years.

(b) Other public information material, including press releases, booklets, radio programs, films, etc. 1 year.

(c) Contracts and agreements in connection with advertising and information services 6 years after expiration or cancellation.

29. Miscellaneous operating records:

(a) Traffic peg counts of summaries showing totals by offices, areas, etc. 1 year.

(b) Records used for traffic information, intercepting, routing, or other handling of calls 1 year.

(c) Records of operations other than communications common carrier operations For the same periods as provided in this section for similar records.

PERSONNEL

30. Personnel records:

(a) Service records of individual employees consisting of names, sex, salary and wage rates, occupational classifications, and similar data, together 6 years after termination of employment or pension.

with changes therein

(b) Applications for employment, requests for medical examination, medical examiner's report, photographs and other identification records, and other miscellaneous records pertaining to the hiring of employees Destroy at option.

31. Employees' benefit and pension records:

(a) Detailed records showing computations of accruals for pension liabilities 6 years after supersedure of the study or report or termination of plan.

(b) Pension or annuity payrolls 6 years.

(c) Pension paychecks 3 years.

(d) Records pertaining to employees' benefit programs 6 years.

32. Instructions to employees and others:

(a) Bulletins or memoranda of general instructions issued by the company to employees pertaining to changes in accounting, engineering, operating, maintenance and construction policies 10 years after expiration or supersedure.

(b) Bulletins or memoranda of general instructions issued by the company to employees pertaining to accounting, engineering, operating, maintenance and construction methods and procedures Destroy at option after expiration or supersedure

(c) Notices to employees on matters of discipline, deportment and other similar subjects Destroy at option.

TELECOMMUNICATIONS PLANT AND DEPRECIATION

33. Plant ledgers:

(a) Ledgers of telecommunications plant accounts including land and other detailed ledgers showing the cost of utility plant by account 50 years.

(b) Books, cards or other records of individual property record units of plant--such as land, buildings, central office, switching equipment, furniture, motor vehicles, etc.--showing description, location, cost and other data 6 years after record is superseded or plant is retired, provided mortality data are retained.

(c) Books, cards or other records of quantities of property record superseded, provided units of plant - such as poles, cable, wire, etc. by plant or accounting area, size, type, cost or other details 6 years after record is superseded, provided mortality date are retained.

34. Construction work in progress ledgers, work orders, and supplemental records:

(a) Construction work in progress ledgers 10 years after clearance to the plant account, provided continuing property records are maintained; otherwise 6 years after plant is retired.

(b) Construction estimates or work orders to which are posted in summary form or in detail the entries for labor, materials and other charges for utility plant additions and the entries closing the work orders to utility plant in service at completion. 10 years after clearance to the plant account provided continuing property records are maintained; otherwise 6 years after plant is retired.

(c) Analysis or cost reports showing quantities or materials used, unit costs costs, number of labor hours, etc., in connection with completed construction projects 10 years after clearance to the plant account provided continuing property records are maintained; otherwise 6 years after plant is retired.

(d) Authorizations for expenditures for additions to plant, including 10 years after clearance to the plant account provided continuing

memoranda showing the detailed property records are maintained; estimates of cost and the bases otherwise 6 years after plant is therefor (including original and retired. revised or subsequent authorizations)

(e) Requisitions and registers of 10 years. authorizations for plant expenditures

(f) Completion reports for estimates 10 years. or other authorizations showing comparisons between the estimated and actual costs or quantities of plant constructed and explanations of substantial variations and changes in plans

(g) Administrative records and 7 years. reports pertaining to progress of construction work, the order in which jobs are to be completed, and similar records which do not form a

basis of entries to the accounts
35. Retirement work in progress ledgers, work orders, and supplemental records:

(a) Retirement work in progress 6 years after plant is retired. ledgers

(b) Retirement work orders to which 6 years after plant is retired, are posted in summary form or in provided mortality data are detail the entries for removal retained. costs, materials recovered and credits to plant accounts for the cost of plant retired

(c) Authorizations for retirement 6 years after plant is retired. of plant, including estimates of salvage and removal costs

(d) Analysis or cost reports 6 years after showing quantities of plant is retired. materials retired, retirement unit costs, number of labor hours, etc., in connection

with completed retirement projects

(e) Completion reports for 10 years.

estimates or other

authorizations showing

comparisons between the estimated

and actual costs or quantities of

plant retired and explanations of

substantial variations and changes

in plans

(f) Administrative records and 7 years.

reports pertaining to the progress

of retirement work, the order in

which jobs are to be completed

and similar records which do not

form the basis of entries to the

accounts

36. Summary sheets, distribution 10 years after clearance to the

sheets, reports, statements, plant account, provided continu-

and papers directly supporting ing property records are

debits and credits to utility maintained; otherwise 6 years

plant accounts not covered after plant is retired.

by construction or retirement

work orders and their

supporting records

37. Maps, diagrams, plans, Until record is superseded or 6

specifications and other records years after plant is retired,

showing the location and physical provided continuing property

characteristics of plant owned or records are maintained.

leased for use by the company

38. Engineering records:

(a) Engineering studies, plans and 7 years.

related records in connection with

advance planning of plant

construction, maintenance and

and retirements not related to

specific projects or proposed

undertakings

(b) Engineering studies, plans, and

work authorizations or orders with

related maps, diagrams,

specifications, contract proposals

and estimates of costs and quantities in connection with proposed construction projects:

(1) If project results in charges or credits to the plant accounts 10 years after clearance to the plant account, provided continuing property records are maintained; otherwise 6 years after plant is retired.

(2) If project does not result in charges or credits to the plant accounts 6 years after completion of accounting for project.

39. Authorizations by and applications and reports to governmental authorities in connection with 10 years or such further period as may be required by the governmental authority involved.

plant extensions, construction programs, purchases, sales or other plant changes, exclusive of permits covered by item 6(c)

40. Records pertaining to reclassifications of plant accounts to confirm with prescribed systems 6 years. See section 651.11.

of accounts or for other purposes, including supporting papers showing the basis for such reclassifications

41. Records of periodic reconciliations 30 years.

of continuing property records and mortality summaries with detailed engineering records, location records or physical inventories, including related summaries of units shown on the records or inventories and supporting

work papers prepared for the purpose of such reconciliations

42. Original cost studies in connection with accounting for:

(a) Purchases from predecessors 50 years.

(b) Sales 10 years.

43. Inventories, appraisals and valuations:

(a) Inventories and appraisals, or work papers, showing development of purchase or sale price of plant, or used as a basis of accounting therefore:

(1) Purchases from predecessors 50 years.

(2) Sales 10 years.

(b) Other inventories, appraisals or valuations of plant, including all underlying records:

(1) When results have been furnished to regulatory or other governmental authorities, but not used as a basis for adjustments to plant accounts or property records 10 years after completion of any formal proceeding, otherwise 10 years

(2) When results have been used as a basis for adjustments to plant accounts or property records, except as provided for in item 43(b)(3) 30 years.

(3) Annual or other periodic inventories of furniture and other office or work equipment, used as a basis for adjustments to plant accounts

Until results of second following inventory have been entered into the accounts.

used as a basis for adjustments to plant accounts

44. Miscellaneous plant records:

(a) Reports of transfers of plant items or costs between locations or accounts 6 years.

(b) Retirement unit costs and work-

Permanently.

sheets used in developing such costs

(c) Reports of use of motor 6 years.

vehicles and other work equipment

(d) Reports of floor space 6 years after supersedure.

occupancy

45. Records of accumulated provision for depreciation and amortization of utility plant:

(a) Schedules of authorized 30 years.

depreciation or amortization

rates and summary sheets and other

data included in the official

filing submitted to the Commission

(b) Continuing record of age Permanently.

distribution of items in service

and mortality data of items retired

(c) Analyses, ledgers or other 50 years.

records of the accumulated depreciation and amortization accounts,

including segregations according

to classes of plant and

segregations of charges and

credits according

to source or nature of entry

(d) Accumulated depreciation

studies in connection with

accounting for:

(1) Purchases from predecessors 50 years.

(2) Sales 10 years.

(e) Theoretical accumulated Until superseded.

depreciation studies, not

covered by item 45(d), including

any related worksheets or records

(f) Records supporting depreciation Such period as may be

expense claimed in income tax prescribed by related

returns governmental authorities;

otherwise 6 years after

settlement of tax liability.

MATERIALS AND SUPPLIES

46. Inventories and stock records

of materials and supplies:

- (a) Ledgers or continuing inventory records of materials and supplies received, issued and on hand 6 years. See section 651.11.
- (b) Annual or other periodic inventories of materials and supplies used as a basis for adjustments of accounts, with record of related adjustment Until results of second following inventory have been entered into accounts.
- (c) Stock cards, inventory cards and other detailed records pertaining to the taking of inventories, summarized in records covered by item 46(b) Until results of first following inventory have been entered into accounts.
- (d) Stock cards, ledger sheets or other records of materials and supplies in custody of suppliers or agents 6 years after record is superseded or custodianship is terminated.

47. Materials and supplies purchased:

- (a) Detailed invoices or bills for materials and supplies purchased, including freight and express bills 6 years. See section 651.11.
- (b) Records pertaining to the receipt of materials and supplies 1 year.
- (c) Records of inspections and tests of materials and supplies received 1 year.

48. Materials and supplies issued and recovered:

- (a) Records showing the detailed distribution of materials and supplies issued during accounting periods 6 years. See section 651.11.
- (b) Records of material issued, transferred or returned to stock showing quantities, unit prices and accounts to be charged 6 years.
- (c) Records of materials and 6 years.

supplies delivered to suppliers or others for inspection, repair, conversion, storage, or other disposition, and records of such materials and supplies returned therefrom

49. Materials and supplies scrapped or sold:

(a) Detailed records, including authorizations, covering scrap, surplus or other materials and supplies sold or returned for credit 3 years.

50. Suppliers' price lists or catalogs, lists of standard items or specifications of materials and supplies, and price lists for repairs:

(a) Pertaining to principal supplier other than affiliate companies 15 years after superseded or obsolete.

(b) Affiliated company supplier 25 years after superseded or obsolete.

(c) Other supplier 6 years after superseded or obsolete.

51. Summary and distribution sheets used to summarize or distribute quantities or costs involved in accounting for purchases, issues or disbursements, recoveries, returns, repairs, sales, transfers or other transactions related to materials and supplies 6 years. See section 651.11.

52. Lists or other records of unit prices or unit costs for materials and supplies issued or recovered, including studies, memoranda or other records 6 years. See section 651.11.

prepared in connection with
the development of such unit
prices or unit costs

REVENUE ACCOUNTING AND COLLECTING

53. Customers' deposits with
telephone carriers:

(a) Copy of contracts or agreements covering customers' deposits 6 years after refund.

(b) Memorandum stubs, receipts or other records used to report refund. 6 years after refund.

(c) Card, book, or other continuing record of customers' deposits and related interest 6 years after refund.

(d) Receipts (including paid voucher checks and voucher drafts) for deposits refunded and for interest paid 6 years after refund.

54. Customers' billing and other accounts receivable records:

(a) Record of service and equipment For active accounts, 6 years or other continuing record after record is superseded; for of services or facilities furnished discontinued services, 6 years after service is disconnected.

(b) Continuing record of telephone local message or measured service usage by individual customers' accounts (See item 25(b) for detailed records) 6 years after record is superseded or retired from active file.

(c) Continuing settlement records of individual public and semi-public telephone accounts 3 years after record is superseded or retired from active file.

(d) Billing records which provide information on wire maintenance, wire investment and investment recovery charges 6 years.

(e) Records of individual accounts with customers and collectors, including ledgers or records used in lieu thereof such as accounting stubs or copies of bills or disposition of account or accounts covered by each stub or other individual record. 1 year after payment or other.

statements issued

(f) Records of accounts with miscellaneous debtors other than customers and collectors, including bill ledgers or copies of bills 3 years after payment or other disposition of account.

(g) Detailed records of adjustments of customers' accounts, including authorizations for refunds, adjustment vouchers, or other authorizations to correct charges due to errors service failures, etc. 6 years.

(h) Uncollectible vouchers or other authorizations for writing off customers' accounts and other records and reports pertaining thereto 3 years.

(i) Work papers used in developing estimates of unbilled revenues and accounts receivable 3 years after estimate is superseded.

(j) Other detailed records of calls which bear charge information 18 months.

55. Collection reports and records:

(a) Bill or memorandum stubs representing payments by customers or others, itemized lists, collection notices, coin telephone collection stubs, and other detailed reports or records (including receipts from dining rooms and vending machines):

(1) Used as a basis for entries to accounting records and summarized or detailed in daily or other periodic cash reports 1 year.

(2) Used as a basis for administrative records or collection treatment of individual accounts 1 year.

(b) Remittance or transmittal lists 3 years.

or forms (including adding machine tapes) covering records included under item 55(a)(1), used as a basis for entries to accounting records or summaries

(c) Records of credit cards and calling cards issued 1 year after expiration or cancellation.

(d) Statements or reports of age or status of uncollected accounts 3 years.

(e) Authorizations for payments of telephone customer's account by customer's bank Until expiration or cancellation.

(f) Correspondence and memoranda relative to collection of record to which it relates. For period prescribed for the

revenues or accounts receivable, including requests for explanation of items on bills or status of account and memoranda of investigations thereof,

correspondence covering routine or special collection treatment, forwarding addresses for bills, and similar matters necessary for a proper or complete understanding of another record

(g) Agreements covering payments of uncollected final accounts uncollectible, 3 years after account is written off. Until account is paid or,

(h) Subsidiary cash records or cash books covering collection of revenues and accounts receivable from customers and others:

(1) Used to summarize reports of cash receipts (See items 55(b) and 58(a) for preparation of journal entries) 6 years.

(2) Used as detailed records of collection from customers or others 1 year.

(i) Taxes collected from customers and others:

- (1) Copies of tax returns and supporting statements filed with taxing authorities 6 years after settlement of tax liability.
- (2) Special summaries of taxes and related data, used in compiling data for tax returns 6 years after settlement of tax liability.
- (3) Lists or other separate detailed records of taxes billed to or collected from individual customers or others Such period as may be prescribed by related governmental requirements.
- (4) Certificates or other special records of tax exemptions Such period as may be prescribed by related governmental requirements.

56. Free or partially free service by telephone carriers:

- (a) Records of individual authorizations, such as franks, issued for free or partially free service Until the end of the calendar year following that in which issued.
- (b) Franks or other individual authorizations used, collected, or honored for furnishing of free or partially free service:
 - (1) Authorizations of a continuing nature, e.g., related to monthly service rates 3 years after expiration or cancellation.
 - (2) Authorizations covering only specified messages or other specific charges Until the end of the calendar year following that in which used, collected, or honored.
 - (c) Detailed records covering messages handled free or at reduced rates 18 months.
 - (d) Adjustment vouchers used to adjust accounts with individuals in accordance with authorizations covered by items 56(a) and 56(b) 1 year.
 - (e) Summaries or reports of free or partially free service used for entries to accounts 6 years.

57. Division of revenues or other telephone traffic settlements with communications common carriers:

(a) Separation studies of property, revenues, or expenses, including underlying summaries, reports, or work papers prepared therefor, used for divisions of revenues or other settlements

Until completion of second following study.

(b) General instructions or outlines of procedures used in divisions of revenues or other settlements

6 years after cancellation or supersedure.

(c) Division of other settlement statements, including copies of summaries, studies or reports used therefor, covering settlements with other communications common carriers

6 years.

(d) Summaries or memoranda used in computation of settlements, when results are summarized in records covered by item 57(c)

6 months.

58. Revenue accounting controlling records and summaries of telephone carriers:

(a) Controlling records and summaries used in preparing journal entries to revenue, accounts receivable, and other accounts, including revenue, cash, transfer and other controls, proof of billing, and other summaries of data for journal entries

6 years.

(b) Statistical summaries or reports of revenues by accounts or classes of service, geographical

As provided for in item 67.

subdivisions, etc., used for reports to Federal and State regulatory commissions and other governmental authorities

TAX

59. Tax records:

(a) Copies of returns and schedules filed with taxing authorities, supporting work papers, records of appeals, tax bills and receipts for payment. (See item 15(b) for vouchers evidencing disbursements):

- (1) Federal income tax returns 7 years after settlement.
- (2) State income and property tax returns 2 years after settlement.
- (3) Sales and use taxes 3 years.
- (4) Other taxes 2 years after settlement.
- (5) Agreements between affiliated companies as to allocation of consolidated income taxes 7 years after settlement
- (6) Schedule of allocation of consolidating Federal income taxes among affiliated companies 7 years after settlement.
- (b) Summaries of taxes paid Destroy at option.
- (c) Filings with taxing authorities to qualify employee benefit plans 7 years after settlement of Federal return or discontinuance of plan, whichever is later.
- (d) Information returns and reports to taxing authorities 3 years, or for the period of any extensions granted for audit.

TREASURY

60. Statements of funds and deposits:

- (a) Summaries and periodic statements of cash balances on hand and with depositories Destroy at option.
- (b) Statements of managers' and agents' cash balances on hand and with depositories Destroy at option.
- (c) Authorizations for and state- Destroy at option.

ments of transfer of funds
from one depository to another

(d) Requisitions and receipts for funds furnished managers, agents, and others for. Destroy at option after funds have been returned or accounted for.

(e) Records of fidelity bonds of employees and others responsible for funds of the utility has expired. Destroy at option after liability and bonding company coverage has expired.

(f) Reports and estimates of funds required for general and special purposes. Destroy at option.

61. Records of deposits with banks and others:

(a) Copies of bank deposit slips. Destroy at option after completion of annual audit by independent accountants.

(b) Advise of deposits made when information thereon is shown on other records which are retained. Destroy at option after completion of annual audit by independent accountants.

(c) Statements from depositories showing the details of funds received, disbursed, transferred, and balances on deposit. Destroy at option after completion of annual audit by independent accountants.

(d) Bank reconciliation papers. Destroy at option after completion of annual audit by independent accountants.

(e) Statements from banks of interest credits. Destroy at option after completion of annual audit by independent accountants.

(f) Check stubs, registers, or other records of checks issued. 6 years.

(g) Correspondence and memoranda relating to the stopping of payment of bank checks and to the issuance of duplicate checks. 6 years or destroy at option after check is recovered.

62. Records of receipts and disbursements:

(a) Daily or other periodic statements of receipts or. Destroy at option after completion of annual audit by independent

- disbursements of funds accountants.
- (b) Records of periodic state- Destroy at option after completion
ments of outstanding vouchers, of annual audit by independent
checks, drafts, etc. issued and accountants.
not presented
- (c) Reports of affiliated showing Destroy at option after
working fund transactions and completion of annual audit by
summaries thereof independent accountants.
- (d) Reports of revenue collections Destroy at option after
by field cashiers, pay stations, completion of annual audit by
etc. independent accountants.

MISCELLANEOUS

63. Statistics and miscellaneous:

- (a) Annual financial, operating 10 years after date of report.
and statistical reports regularly
prepared in the course of busi-
nesses for internal administra-
tive or operating purposes (and
not used as the basis for
entries to accounts of the
companies concerned)
to show the results of
operations and the financial
condition of the utility
- (b) Quarterly, monthly or other 2 years after date of report.
periodic financial, operating
and other statistical reports as
above
- (c) All other statistical Destroy at option.
reports (not covered elsewhere
in these regulations) prepared
for internal administrative or
operating purposes only and not
used as the basis for entries
to the accounts of the
company

64. Budgets and other forecasts:

- (Prepared for internal administra- 3 years, except as provided
tive or operating purposes) of for elsewhere.
estimated future income, receipts
and expenditures in connection

with financing, construction and operations and acquisitions or disposals of properties or investments by the company and its affiliated companies, including revisions of such estimates and memoranda showing reasons for revisions, also records showing comparison of actual income and receipts and expenditures with estimates

65. Correspondence:

(a) Correspondence and indexes thereto relating to offices covered by other items of these regulations (a) Correspondence and indexes thereto relating to offices covered by other items of these regulations Retain for the period prescribed for the item to which it relates where necessary to a proper explanation of same.

(b) Stenographers' notebooks and dicta-phone or other mechanical device records Destroy at option.

(c) Mailing lists of prospects for appliance sales, securities, etc. Destroy at option.

66. Records of predecessors and former associates Retain until the records of utility plant acquired have been

integrated with the utility's plant records and the original cost of the acquired plant is adequately supported by cost details and until it is ascertained that such records are not necessary to fulfillment of any unsatisfied regulatory requirement, such as: (a) approval and recording of accounting adjustments resulting from reclassification and original cost studies and acceptance of property acquisition journal entries, (b) cost, depreciation and amortization reserve determinations for plant, (c) esta-

blishment of continuing plant inventory records or accounting evidence of the cost of long-lived property in the absence of such continuing plant inventory records.

67. Reports to federal and state regulatory commissions:

(a) Annual financial, operating and statistical reports 50 years.

statistical reports

(b) Monthly and quarterly reports of operating revenues, expenses, and statistics 2 years after date of report.

(c) Annual joint cost data report, quarterly joint cost and jurisdictional separations data report, report of forecast use of central office equipment and cable/wire facilities, and report of actual use of central office equipment and cable/wire facilities 50 years.

quarterly joint cost and jurisdictional separations

data report, report of forecast use of central office equipment and cable/wire facilities,

and report of actual use of central office equipment and cable/wire facilities

(d) Special or periodic reports on the following subjects:

(1) Transactions with affiliated companies 6 years.

(2) Budgets of expenditures 3 years, except as provided for elsewhere.

(3) Accidents 6 years.

(4) Employees and wages 5 years.

(5) Loans to officers and employees 3 years after fully paid.

(6) Issues of securities Data filed with the SEC

retain 25 years or all securities covered are retired, whichever is shorter; other reports retain until securities covered are retired.

(7) Purchases and sales, utility properties 10 years.

(8) Plant changes--units added 10 years.

and retired

(9) Service interruptions 6 years.

.SO DOC 16C-660.0 NYCRR

Section 660.0 Background. The revised uniform system of accounts (USOA) is an historical financial accounting system which reports the results of operational and financial events in a manner which enables both management and regulators to assess these results within a specified accounting period. The USOA also provides the financial community and others with financial performance results. In order for an accounting system to fulfill these purposes, it must exhibit consistency and stability in financial reporting (including the results published for regulatory purposes). Accordingly, the USOA has been designed to reflect stable, recurring financial data based, to the extent regulatory considerations permit, upon the consistency of the well established body of accounting theories and principles commonly

referred to as generally accepted accounting principles.

.SO DOC 16C-660.1

NYCRR

660.1 Basis of the accounts.

(a) The financial accounts of a company are used to record, in monetary terms, the basic transactions which occur. Certain natural groupings of these transactions are called (in different contexts) transaction cycles, business processes, functions or activities. The concept, however, is the same in each case; i.e., the natural groupings represent what happens within the company on a consistent and continuing basis. This repetitive nature of the natural groupings, over long periods of time, lends an element of stability to the financial account structure.

(b) Within the telecommunications industry companies, certain recurring functions (natural groupings) do take place in the course of providing products and services to customers. These accounts reflect, to the extent feasible, those functions. For example, the primary bases of the accounts containing the investment in telecommunications plant are the functions performed by the assets. In addition, because of the anticipated effects of future innovations, the telecommunications plant accounts are intended to permit technological distinctions. Similarly, the primary bases of plant operations, customer operations and corporate operations expense accounts are the functions performed by individuals. The revenue accounts, on the other hand, reflect a market perspective of natural groupings based primarily upon the products and services purchased by customers.

(c) In the course of developing the bases for this account structure, several other alternatives were explored. It was, for example, determined that, because of the variety and continual changing of various cost allocation mechanisms, the financial accounts of a company should not reflect an a priori allocation of revenues, investments or expenses to products or services, jurisdictions or organizational structures. (Note also section 661.4 (c) of this Title.) It was also determined that costs (in the case of assets) should not be recorded based solely upon physical attributes such as location, description or size.

(d) Care has been taken in this account structure to avoid confusing a function with an organizational responsibility, particularly as it relates to the expense accounts. Whereas in the past, specific organizations may have performed specific functions, the future environment with its increasing mechanization and other changes will result in entirely new or restructured organizations. Thus, any

relationships drawn between organizations and accounts would become increasingly meaningless with the passage of time.

(e) These accounts, then, are intended to reflect a functional and technological view of the telecommunications industry. This view will provide a stable and consistent foundation for the recording of financial data.

(f) The financial data contained in the accounts, together with the detailed information contained in the underlying financial and other subsidiary records required by this commission, will provide the information necessary to support separations, cost of service and management reporting requirements. The basic account structure has been designed to remain stable as reporting requirements change.

.SO DOC 16C-660.2

NYCRR

660.2 Order authorizing uniform system of accounts. (a) The attached uniform system of accounts for telephone corporations is hereby prescribed for every telephone corporation (as that term is defined in the Public Service Law) subject to the jurisdiction of this commission and every such telephone corporation is hereby required to keep its records and accounts in conformity therewith.

(b) Each telephone corporation for which this uniform system of accounts is prescribed shall classify, set forth, and carry all assets, liabilities, capital stock, and retained earnings (or noncorporate proprietorship) existing as of the effective date of this uniform system of accounts, as prescribed in such system of accounts.

(c) In prescribing this system of accounts, the commission does not commit itself to the approval or acceptance of any item set out in any account, for the purpose of fixing rates or in determining other matters before the commission. The prescribed system of accounts is designed to set out the facts in connection with the capitalization, construction, income, expenditures, etc., and therefrom the commission will determine, in connection with such matters as may be under advisement from time to time, just what consideration shall be given to the various items in the several accounts.

(d) The system of accounts prescribed by this Part shall become effective as ordered and shall be put into effect by each telephone company affected thereby on January 1, 1988.

.SO DOC 16C-660.3

NYCRR

660.3 Abstracts from law.

(a) Authority for uniform system of accounts. This uniform system of accounts for telephone corporations is established and issued by the Public Service Commission under the following provision of the Public

Service Law (chapter 48 of the Consolidated Laws):

Section 95, subdivision 2. "The commission may establish a system of accounts to be used by telegraph corporations and telephone corporations, which are subject to its jurisdiction, and are required to make annual reports to it or classify the said corporations, and prescribe a system of accounts for each class and may prescribe the manner in which such accounts shall be kept. It may also, in its discretion prescribe the form of records to be kept by such corporation. Notice of alterations by the commission in the required method or form of keeping accounts shall be given to such corporations by the commission at least six months before the same are to take effect."

(b) Telephone corporation and telephone line defined. (1) The Public Service Law defines telephone corporation and telephone line as follows:

Section 2, subdivision 17. "The term 'telephone corporation', when used in this chapter, includes every corporation, company, association, joint-stock association, partnership and person, their lessees, trustees or receivers appointed by any court whatsoever, owning, operating or managing any telephone line or part of telephone line used in the conduct of the business of affording telephonic communication for hire; excepting, however, any corporation, company, association, joint-stock association, partnership or person, their lessees, trustees or receivers, who or which do not operate the business of affording telephonic communication for profit."

Section 2, subdivision 18. "The term 'telephone line', when used in this chapter, includes conduits, ducts, poles, wires, cables, cross-arms, receivers, transmitters, instruments, machines, appliances and all devices, real estate, easements, apparatus, property and routes used, operated or owned by any telephone corporation to facilitate the business of affording telephonic communication."

Section 5-b. "Corporations formed to acquire property or to transact business which would be subject to the provisions of this chapter, and corporations possessing franchises for any of the purposes contemplated by this chapter, shall be deemed to be subject to the provisions of this chapter although no property may have been acquired, business transacted or franchises exercised."

(2) Whenever the terms telephone corporation and telephone line are used in this system of accounts they shall be understood to have the inclusive meaning given them by the definitions quoted above. The term telephone company or telecommunication company is used in the same sense as telephone corporation.

(c) Attention is directed to the following extract from the Public

Service Law:

Section 25. "Penalties. 1. Every public utility company, corporation or person and the officers, agents and employees thereof shall obey and comply with every provision of this chapter and every order or regulation adopted under authority of this chapter so long as the same shall be in force.

2. Any public utility company, corporation or person and the officers, agents and employees thereof that knowingly fails or neglects to obey or comply with a provision of this chapter or any order adopted under authority of this chapter so long as the same shall be in force, shall forfeit to the people of the state of New York a sum not exceeding ten thousand dollars for each and every offense and in the case of a continuing violation, each day shall be deemed a separate and distinct offense.

3. Notwithstanding the provisions of subdivision two of this section, any such public utility company, corporation or person and the officers, agents and employees thereof that knowingly fails or neglects to obey or comply with a provision of this chapter, or an order or regulation adopted under the authority of this chapter, adopted specifically for the protection of human safety, including but not limited to the commission's code of gas safety regulations shall, if it is determined by the commission that such safety violation caused or constituted a contributing factor in bringing about a death or personal injury, forfeit to the state of New York a sum not to exceed the greater of:

(a) twenty-five thousand dollars for each separate and distinct offense; provided, however, that for purposes of this paragraph each day of a continuing violation shall not be deemed a separate and distinct offense. The total period of a continuing violation as well as every distinct violation, shall be similarly treated as a separate and distinct offense for purposes of this paragraph; or

(b) the maximum forfeiture determined in accordance with subdivision two of this section.

4. Not Applicable

5. Penalties provided for pursuant to this section shall be recovered in an action as provided in section twenty-four of this article.

6. Any payment made by a public utility company, corporation or person and the officers, agents and employees thereof as a result of an action as provided in section twenty-four of this article and the cost of litigation and investigation related to any such action shall not be included by the commission in revenue requirements used to establish rates and charges.

7. In construing and enforcing the provisions of this chapter relating to forfeitures and penalties, the act of any director, officer, agent or employee of a public utility company, corporation or person acting within the scope of his or her official duties or employment shall be deemed to be the act of such public utility company, corporation or person."

.SO DOC 16C-661.1

NYCRR

Section 661.1 Classification of companies. (a) All telephone companies will be required to maintain the accounts and comply with the recordkeeping requirements described herein. In accounting for certain transactions herein (see sections 663.2, 663.5, 663.6, 663.8; accounts 2003, 2004, and subaccount 2005.1 of this Title) we have divided companies into two classes as follows:

Class A. Companies having annual revenues from regulated telecommunications operations of \$100,000,000 or more.

Class B. Companies having annual revenues from regulated

telecommunications operations of less than \$100,000,000.

(b) For purposes of recording certain transactions referred to in subdivision (a) of this section, the initial classification of a company shall be determined by its lowest annual operating revenues for the three immediately preceding years. Subsequent changes in classification shall be made when the annual operating revenues show a greater or lesser classification for three consecutive years. Companies becoming subject to the jurisdiction of the commission and not having revenue data for the three immediately preceding years shall estimate the amount of their annual revenues and adopt the scheme of accounts appropriate for the amount of such estimated revenues.

.SO DOC 16C-661.2

NYCRR

661.2 Records. (a) The company's financial records shall be kept in accordance with generally accepted accounting principles to the extent permitted by this system of accounts.

(b) The company's financial records shall be kept with sufficient particularity to show fully the facts pertaining to all entries in these accounts. The detail records shall be filed in such manner as to be readily accessible for examination by representatives of this commission.

(c) The commission shall require a company to maintain financial and other subsidiary records in such a manner that specific information, of a type not warranting disclosure as an account or subaccount, will be readily available. When this occurs, or where the full information is not otherwise recorded in the general books, the subsidiary records shall be maintained in sufficient detail to facilitate the reporting of the required specific information. The subsidiary records, in which the full details are shown, shall be sufficiently referenced to permit ready identification and examination by representatives of this commission, at a location within the State of New York, unless the company is specifically exempted by order of this commission.

.SO DOC 16C-661.3

NYCRR

661.3 Accounts--general. (a) As a general rule, all accounts kept by reporting companies shall conform in numbers and titles to those prescribed herein. However, reporting companies may use different numbers for internal purposes when separate accounts (or subaccounts) maintained are consistent with the title and content of accounts and subaccounts prescribed in this system.

(1) Accounts which are clearly summaries of other accounts or subaccounts are to be used for reporting purposes and are not otherwise required to be maintained.

(2) A company may subdivide any of the accounts prescribed. The titles of all such subaccounts shall refer by number or title to the controlling account.

(3) A telephone company may only use its own subaccount structure where this structure can readily be mapped to the subaccount structure prescribed in this system of accounts. Any company that wishes to use its own subaccount structure shall file its proposed structure with the director of the Office of Accounting and Finance, or his designee, no less than 60 days before the intended adoption of such accounting practice. Before such accounting practice may be adopted the director must be satisfied that the proposed subaccount structure can be mapped to the subaccount structure prescribed in this system of accounts.

(4) A company may establish temporary or experimental accounts provided that within 30 days of the opening of such accounts the company notifies the commission of the nature and purpose thereof.

(b) Exercise of the preceding options shall be allowed only if the integrity of the prescribed accounts is not impaired.

(c) As of the date a company becomes subject to this system of accounts, it shall prepare opening entries in accordance with the following provisions:

(1) The accounts prescribed herein shall be opened by transferring thereto the balances carried in the accounts previously maintained. The company is authorized to make such subdivisions, reclassifications, or consolidations of such balances as are necessary to meet the requirements of this system of accounts.

(2) The company shall prepare and keep as supporting records summary statements showing:

(i) the closing balances in each account carried on the books prior to the adoption of this system of accounts;

(ii) the journal entries to effect the transfer of those balances to the accounts prescribed herein, arranging such entries so as to show for each account or subdivision thereof from what account and to what account each amount was transferred;

(iii) the resultant opening balance of each account under this system of accounts.

(3) The first annual report filed with this commission by a utility covering its operations subsequent to the adoption of this system of accounts shall include copies of the statements referred to in subdivision (c) (2) of this section and shall be accompanied by a statement of the company's independent auditors attesting to the conformity, in all material aspects, of the transfer of the balance

sheet account balances and detail telecommunications plant accounts as required by subdivision (c) (2) (ii) of this section with this system of accounts.

(d) Nothing contained in this Part shall prohibit or excuse any company, receiver, or operating trustee of any carrier from subdividing the accounts hereby prescribed for the purpose of:

(1) complying with the requirements of the commission(s) having jurisdiction; or

(2) securing the information required in the prescribed reports to such commission(s).

(e) Where the use of subsidiary records is considered necessary in order to secure the information required in reports to the commission, the company shall incorporate the following controls into their accounting system with respect to such subsidiary records:

(1) Subsidiary records shall be reconciled to the company's general ledger or books of original entry, as appropriate.

(2) The company shall adequately document the accounting procedures related to subsidiary records.

(3) The subsidiary records shall be maintained at an adequate level of detail to satisfy State regulators.

.SO DOC 16C-661.4

NYCRR

661.4 Regulated accounts. (a) In the context of this system of accounts, the regulated accounts shall be interpreted to include the investments, revenues and expenses associated with those telecommunications products and services to which the tariff filing requirements contained in this commission's rules, as amended, are applied, except as may be otherwise provided by the commission. Regulated telecommunications products and services are thereby fully subject to the accounting requirements as specified in this commission's rules, as amended, and as detailed in this system of accounts.

(b) In addition to those amounts considered to be regulated by the provisions of subdivision (a) of this section, those telecommunications products and services to which the tariff filing requirements of other jurisdictions are applied shall be accounted for as regulated, except where such treatment is proscribed or otherwise excluded from the requirements pertaining to regulated telecommunications products and services by this commission.

(c) In the application of the detailed accounting requirements contained in this system of accounts when a regulated activity involves the common or joint use of assets and resources in the provision of regulated or nonregulated products and services, companies shall account

for these activities within the accounts prescribed in this system for telecommunications company operations. Assets and expenses shall be subdivided in subsidiary records among amounts solely assignable to nonregulated activities, amounts solely assignable to regulated activities, and amounts related to assets used and expenses incurred jointly or in common, which will be allocated between regulated and nonregulated activities. Companies shall submit reports identifying regulated and nonregulated amounts in the manner and at the times prescribed by this commission. Nonregulated revenue items not qualifying for incidental treatment, as provided in section 665.12 of this Title, shall be recorded in account 5280, Nonregulated Operating Revenue.

(d) Other income items which are incidental to the provision of regulated products and services shall be accounted for as regulated activities.

(e) All costs and revenues related to the offering of regulated products and services which result from arrangements for joint participation or apportionment between two or more telecommunications companies (e.g., joint operating agreements, settlement agreements, cost-pooling agreements) shall be recorded within the detailed regulated accounts. Under joint operating agreements, the creditor will initially charge the entire expenses to the appropriate primary accounts. The proportion of such expenses borne by the debtor shall be credited by the creditor and charged by the debtor to the account initially charged. Any allowances for return on property used will be accounted for as provided in account 5240, Rent Revenue.

(f) All items of nonregulated revenue, investment and expense that are not properly includable in the detailed, regulated accounts prescribed in this system of accounts, as determined by subdivisions (a) through (e) of this section, shall be accounted for and included in reports to this commission as specified in section 661.14 of this Part.

.SO DOC 16C-661.6

NYCRR

661.6 Changes in accounting standards. (a) The company's records and accounts shall be adjusted to apply new accounting standards prescribed by the financial accounting standards board or successor authoritative accounting standard-setting groups, in a manner consistent with generally accepted accounting principles. The change in accounting standard will automatically take effect 150 days after the company informs this commission of its intention to follow the new standard, unless the commission notifies the company to the contrary. Concurrent with informing the director of the Office of Accounting and Finance of its intent to adopt an accounting standards change, the company shall

also file a revenue requirement study for the current year and a projection for three years into the future analyzing the effects of the accounting standards change. Furthermore, any change subsequently adopted shall be disclosed in annual reports to this commission.

.SO DOC 16C-661.7 NYCRR

661.7 Interpretation of accounts. To the end that uniform accounting shall be maintained within the prescribed system, questions involving matters of significance which are not clearly provided for shall be submitted to the director of the Office of Accounting and Finance, for explanation, interpretation, or resolution. Questions and answers thereto with respect to this system of accounts will be maintained by the Office of Accounting and Finance.

.SO DOC 16C-661.8 NYCRR

661.8 Preservation of records. (a) Except with the permission of this commission, the companies shall not destroy any records beyond those specifically permitted under Part 42, Preservation of Records of Communication Common Carriers, of the rules of the Federal Communications Commission governing the preservation of records of communication common carriers, effective December 31, 1960, and as thereafter amended.

.SO DOC 16C-661.9 NYCRR

661.9 Spreading of income, revenue, and expense items. (a) When the amount of any unusual item includable in an income, operating revenue, or operating expense account for a single month is relatively so large that its inclusion in the accounts for that month would seriously distort those accounts, it may be included in account 1439, Deferred Charges, or account 4360, Other Deferred Credits, as appropriate, and distributed in equal amounts to the accounts for the current and remaining months of the calendar year.

(b) When the amount of any unusual item includable in the income, operating revenue, or operating expense accounts is relatively so large that its inclusion in the accounts for the year in which the transaction occurred, would seriously distort those accounts, the company may request permission to include all or a part of the amount in account 1439, Deferred Charges, or account 4360, Other Deferred Credits to be amortized over such period and through such accounts as this commission shall determine. Without permission from this commission, no such item shall be carried beyond the year in which the transaction occurred.

.SO DOC 16C-661.10 NYCRR

661.10 Waivers. A waiver from any provision of this system of accounts shall be made by the commission upon its own initiative or upon the

submission of written request therefor from any telecommunications company, or group of telecommunications companies, provided that such a waiver is in the public interest and each request for waiver expressly demonstrates that: existing peculiarities or unusual circumstances warrant a departure from a prescribed procedure or technique; a specifically defined alternative procedure or technique will result in a substantially equivalent or more accurate portrayal of operating results or financial condition, consistent with the principles embodied in the provisions of this system of accounts; and the application of such alternative procedure will maintain or improve uniformity in substantive results among telecommunications companies.

.SO DOC 16C-661.11 NYCRR

661.11 Address for reports and correspondence. Reports, statements, and correspondence submitted to the commission in accordance with or relating to instructions and requirements contained herein shall be addressed to the Office of Secretary, Building 3, Empire State Plaza, Albany, NY 12223.

.SO DOC 16C-661.12 NYCRR

661.12 Sequence of accounts. The order in which the accounts are presented in this system of accounts is not to be considered as necessarily indicative of the order in which they will be scheduled at all times in reports to this commission.

.SO DOC 16C-661.13 NYCRR

661.13 Comprehensive interperiod tax allocation. (a) Companies shall apply interperiod tax allocation (tax normalization) to all book/tax timing differences which would be considered material for published financial report purposes. Furthermore, companies shall also apply interperiod tax allocation if any item or group of similar items when aggregated would yield debit or credit entries which exceed or would exceed five percent of the gross deferred income tax expense debits or credits during any calendar year over the life of the timing difference. Book/tax timing differences, other than those resulting from accelerated depreciation or waiver, however, shall be phased in over a period of five years as directed by this commission. The tax effects of all book/tax timing differences shall be normalized and the deferrals shall be included in the following accounts:

1360 Current Deferred Income Taxes-Dr

1510 Noncurrent Deferred Income Taxes-Dr

4100 Current Deferred Operating Income Taxes-Cr

4110 Current Deferred Nonoperating Income Taxes-Cr

4340 Noncurrent Deferred Operating Income Taxes-Cr

4350 Noncurrent Deferred Nonoperating Income Taxes-Cr

In lieu of the accounting prescribed herein, any company shall treat the increase/reduction in current income taxes payable resulting from the use of flow through accounting in prior years and the phase-in years as an increase/reduction in current income tax expense.

(b) Supporting documentation shall be maintained so as to separately identify the amount of deferred taxes which arise from the use of an accelerated method of depreciation.

(c) With respect to the tax differentials that are phased in, companies shall maintain underlying entries to and the balances in the above accounts so as to show that the deferred tax amounts are not greater than the phase-in percentage allowed by this commission.

(d) The records supporting the activity in the deferred income tax accounts shall be maintained in sufficient detail to identify the nature of the specific timing differences giving rise to both the debits and credits to the individual accounts.

(e) Any company that uses accelerated depreciation (or recognizes taxable income or losses upon the retirement of property) for income tax purposes shall normalize the tax differentials occasioned thereby as indicated in paragraphs (1) and (2) of this subdivision.

(1) With respect to the retirement of property the book/tax difference between (i) the recognition of proceeds as income and the accrual for salvage value and (ii) the book and tax capital recovery, shall be normalized.

(2) Records shall be maintained so as to show the deferred tax amounts by vintage year separately for each class or subclass of eligible depreciable telephone plant for which an accelerated method of depreciation has been used for income tax purposes. When property is transferred to nonregulated activities, the associated deferred income taxes shall also be identified and transferred to the appropriate nonregulated accounts. Accumulated deferred investment tax credits associated with deregulated assets shall be transferred with the related asset, unless otherwise directed by the commission.

(f) The tax differentials to be normalized as indicated herein shall also encompass the additional effect of state and local income tax changes on Federal income taxes produced by the provision for deferred state and local income taxes for book/tax timing differences related to such income taxes.

(g) Companies that receive the tax benefits from the filing of a consolidated income tax return by the parent company, (pursuant to closing agreements with the Internal Revenue Service, effective January

1, 1966) representing the deferred income taxes from the elimination of intercompany profits for income tax purposes on sales of regulated equipment, may credit such deferred taxes directly to the plant account which contains such intercompany profit rather than crediting such deferred taxes to the applicable accounts in subdivision (a) of this section. If the deferred income taxes are recorded as a reduction of the appropriate plant accounts, such reduction shall be treated as reducing the original cost of the plant and accounted for as such.

.SO DOC 16C-661.14

NYCRR

661.14 Nonregulated activities.

(a) This section describes the accounting treatment of activities classified for accounting purposes as nonregulated. Preemptively deregulated activities and activities (other than incidental activities) never subject to regulation will be classified for accounting purposes as nonregulated. Activities that qualify for incidental treatment under the policies of this commission will be classified for accounting purposes as regulated activities. Activities that have been deregulated by this commission will be classified for accounting purposes as nonregulated activities. Activities that have been deregulated at the interstate level, but not preemptively deregulated, will be classified for accounting purposes as regulated activities until such time as this commission decides otherwise. The treatment of nonregulated activities shall differ depending on the extent of the common or joint use of assets and resources in the provision of both regulated and nonregulated products and services.

(b) When a nonregulated activity does not involve the joint or common use of assets and resources in the provision of both regulated and nonregulated products and services, carriers shall account for these activities on a separate set of books consistent with the instructions set forth in accounts 1406, Nonregulated Investments, and 7990, Nonregulated Net Income. Transfers of assets and sales of products and services between the regulated activity and a nonregulated activity for which a separate set of books is maintained, shall be accounted for in accordance with the rules presented in section 661.16, Transactions with Affiliates. In a separate set of books, carriers may establish whatever detail they deem appropriate beyond what is necessary to provide this commission with the information required in accounts 1406 and 7990.

(c) When a nonregulated activity does involve the common or joint use of assets and resources in the provision of regulated and nonregulated products and services, carriers shall account for these activities within accounts prescribed in this system for telephone company

operations. Assets and expenses shall be subdivided in subsidiary records among amounts solely assignable to nonregulated activities, amounts solely assignable to regulated activities, and amounts related to assets and expenses incurred jointly or in common, which will be allocated between regulated and nonregulated activities. Carriers shall submit reports identifying regulated and nonregulated amounts in the manner and at the times prescribed by this commission. Nonregulated revenue items not qualifying for incidental treatment, as provided in section 665.12, shall be recorded in a separate subaccount of account 5280, Nonregulated Operating Revenue.

(d) The following accounts shall be maintained:

Account 1406, Nonregulated Investments

Account 5280, Nonregulated Operating Revenue

Account 7130, Return from Nonregulated Use of Regulated Facilities

Account 7990, Nonregulated Net Income

.SO DOC 16C-661.15 NYCRR

661.15 Compensated absences. (a) Companies shall record a liability and charge the appropriate expense accounts for compensated absences (vacations, sick leave, etc.) in the year in which these benefits are earned by the employees unless otherwise directed by this commission.

(b) With respect to the liability that exists for compensated absences which is not yet recorded on the books as of the effective date of this system of accounts, the liability shall be recorded in account 4120, Other Accrued Liabilities, with a corresponding entry to account 1439, Deferred Charges. This deferred charge shall be amortized on a straight line basis over a period of 10 years.

(c) Records shall be maintained so as to show that no more than 10 percent of the deferred charge is being amortized each year.

.SO DOC 16C-661.16 NYCRR

661.16 Transactions with affiliates. (a) Unless otherwise approved by this commission transactions with affiliates involving asset transfers into or out of the regulated accounts shall be recorded by the carrier in its regulated accounts as provided in subdivisions (b) through (f) of this section.

(b) Charges for assets purchased by or transferred to the regulated telephone activity of a carrier from affiliates shall be recorded in the operating accounts of the regulated activity at the lower of their cost to the originating activity of the affiliated group less all applicable valuation reserves or their fair market value. (Asset transfers between regulated affiliates are subject to the original cost requirements prescribed in section 663.2 of this Part.)

(c) Assets sold or transferred from the regulated accounts to affiliates shall be recorded as operating revenues, incidental revenues or asset retirements according to the nature of the transaction involved. If such sales are reflected in tariffs on file with a regulatory commission, the associated revenues shall be recorded at the prices contained therein in the appropriate revenue accounts. If no tariff is applicable, the proceeds from such sales shall be determined at the higher of cost less all applicable valuation reserves, or estimated fair market value of the asset.

(d) Services provided to an affiliate pursuant to a tariff, including a tariff filed with the Federal Communications Commission, shall be recorded in the appropriate revenue accounts at the tariffed rate. Services provided by an affiliate to the regulated activity shall be recorded at cost which shall be determined in a manner that complies with the standards and procedures for the apportionment of joint and common costs between the regulated and nonregulated operations of the carrier entity.

(e) Income taxes shall be allocated among the regulated activities of the carrier, its nonregulated divisions and members of an affiliated group. Under circumstances in which income taxes are determined on a consolidated basis by the carrier and other members of the affiliated group, the income tax expense to be recorded by the carrier shall be the same as would result if determined for the carrier separately for all time periods, except that the tax effect of carry-back and carry-forward operating losses, investment tax credits, or other tax credits generated by operations of the carrier shall be recorded by the carrier during the period in which applied in settlement of the taxes otherwise attributable to any member or combination of members of the affiliated group.

(f) The principles set forth in this section shall apply equally to corporations, proprietorships, partnerships and other forms of business organizations.

(g) Each company shall keep its accounts and records in such a manner that accurate statements of all transactions with affiliated companies can be expeditiously furnished upon request. These records shall be kept in sufficient detail to show separately for each transaction for each affiliate (1) the amount of the transaction (2) the nature of the transaction and (3) the final revenue, income, expense or capital account of the accounting company. All transactions with affiliates must be recorded in accordance with the instructions in subdivisions (h) and (i) of this section.

(h) All gross charges from any affiliated company shall be credited to a subaccount for that company under the appropriate subdivisions of the following accounts:

4010.1 Accounts Payable to Affiliated Companies

4020.1 Notes Payable to Affiliated Companies

4260 Advances from Affiliated Companies

(i) All gross charges to any affiliated company shall be debited to a subaccount for that company under the appropriate subdivisions of the following accounts:

1150 Working Cash Advances

1160 Temporary Investments

1180 Telecommunications Accounts Receivable

1190.1 Accounts Receivable from Affiliated Companies

1200.1 Notes Receivable from Affiliated Companies

1401.1 Investments in Affiliated Companies

1401.2 Advances to Affiliated Companies

.SO DOC 16C-661.17 NYCRR

661.17 Unusual items and contingent liabilities. (a) This section applies to extraordinary items, prior period adjustments, and contingent liabilities.

(b) Extraordinary items, prior period adjustments and contingent liabilities shall be submitted to this commission for review before being recorded in the company's books of account. Corrections of errors in prior periods which are less than \$1,000,000 (Class A companies) or one percent of net income for the most current calendar year (Class B companies), may be recorded in operating accounts without prior approval.

(c) The company's filings pursuant to subdivision (b) of this section, shall set forth in detail the accounting entries contemplated together with any supporting data and, the existing special circumstances which warrant approval of the requested accounting treatment and related entries.

.SO DOC 16C-661.18 NYCRR

661.18 Capital leases. The company may adopt capital lease accounting for transactions if two conditions are met for each financing arrangement:

(a) the company receives approval from the commission to enter a long-term capital lease (see section 101 of the Public Service Law); and

(b) the company demonstrates in its filing that capital lease accounting is not detrimental to ratepayers.

.SO DOC 16C-661.19 NYCRR

661.19 Materiality. Companies shall follow this system of accounts in recording all financial and statistical data irrespective of an individual item's materiality under Generally Accepted Accounting Principles (GAAP), unless a waiver has been granted under the provisions of section 661.10 of this Part to do otherwise.

.SO DOC 16C-661.20 NYCRR

661.20 Approval by the commission. Whenever the phrases "with the permission of the commission, with the approval of the commission, approved by the commission, authorized by the commission, or directed by the commission," are used herein, such permission, approval, authorization, or direction must be specific and in writing. The commission may delegate its authority to permit, approve, authorize or direct to a designee.

.SO DOC 16C-663.1

NYCRR

Section 663.1 Purpose of telecommunications plant accounts. (a) The telecommunications plant accounts (2001 to 2007 inclusive) are designed to show the investment in the company's tangible and intangible telecommunications plant which ordinarily has a service life of more than one year, including such plant whether used by the company or others in providing telecommunications service.

(b) The telecommunications plant accounts shall not include the cost or other value of telecommunications plant contributed to the company. Contributions in the form of money or its equivalent toward the construction of telecommunications plant shall be credited to the accounts charged with the cost of such construction. Amounts of nonrecurring reimbursements based on the cost of plant or equipment furnished in rendering service to a customer shall be credited to the accounts charged with the cost of the plant or equipment. Amounts of initial charges based on the estimated cost of removal of such plant or equipment shall be credited to account 3100, Accumulated Depreciation. Amounts received for construction which are ultimately to be repaid wholly or in part, shall be credited to account 4360, Other Deferred Credits; when final determination has been made as to the amount to be returned, any unrefunded amounts shall be credited to the accounts charged with the cost of such construction. Amounts received for the construction of plant, the ownership of which rests with or will revert to others, shall be credited to the accounts charged with the cost of such construction. (Note also account 7110, Income from Custom Work.)

(c) When telecommunications plant ordinarily having a service life of more than one year is installed for temporary use in providing telecommunications service, it shall be accounted for in the same manner as plant having a service life of more than one year. This includes temporary installations of plant (such as poles, wire and cable) installed to maintain service during the progress of highway reconstruction or during interruptions due to storms or other casualties, equipment used for the training of operators, equipment used to provide intercepting positions in central offices to handle traffic for a short period following extensive system changes and similar

installations of property used to provide telecommunications service.

(d) The cost of individual items of equipment, classifiable to Accounts 2112, Motor Vehicles; 2113, Aircraft; 2114, Special Purpose Vehicles; 2115, Garage Work Equipment; 2116, Other Work Equipment; 2122, Furniture; 2123, Office Equipment; and 2124, General Purpose Computers, costing \$2,000 or less or having a life of less than one year may be charged to the applicable Plant Specific Operations Expense Accounts, except for personal computers falling within Account 2124. Personal computers classifiable to Account 2124, with a total cost for all components, including initial operating software, of \$500 or less shall be charged to the applicable Plant Specific Operations Expense Accounts. If the aggregate investment in the items is relatively large at the time of acquisition, such amounts shall be maintained in an applicable materials and supplies account until the items are used.

(e) The ledgers containing the primary telephone plant accounts and subdivisions thereof shall be kept so as to show on their face (1) additions, (2) retirements, and (3) transfers and adjustments. Corrections of errors, and adjustments to additions or retirements in the current or preceding year, shall be classified as additions or retirements.

.SO DOC 16C-663.2

NYCRR

663.2 Telecommunications plant acquired.

(a) Property, plant and equipment acquired from an entity, whether or not affiliated with the accounting company, shall be accounted for at original cost.

(b) The accounting for property, plant and equipment to be recorded at original cost shall be as follows:

(1) The amount of money paid (or current money value of any consideration other than money exchanged) for the property (together with preliminary expenses incurred in connection with the acquisition) shall be charged to account 1439, Deferred Charges.

(2) The original cost, estimated if not known, of telecommunications plant, governmental franchises and other similar rights acquired shall be charged to applicable telecommunications plant accounts, Telecommunications Plant Under Construction, and Property Held For Future Telecommunications Use, as appropriate, and credited to account 1439. When the actual original cost cannot be determined and estimates are used, the company shall be prepared to furnish the commission with the particulars of such estimates.

(3) The amounts of the theoretical accumulated depreciation requirements for depreciation and amortization of plant acquired shall

be credited to account 3100, Accumulated Depreciation, or account 3200, Accumulated Depreciation--Held for Future Telecommunications Use, 3410, Accumulated Amortization--Capitalized Leases, 3420, Accumulated Amortization--Leasehold Improvements, 3500, Accumulated Amortization--Intangible, and 3600, Accumulated Amortization--Other, and debited to account 1439.

(4) Any amount remaining in account 1439, applicable to the plant acquired, shall, upon completion of the entries provided in paragraphs (1), (2) and (3) of this subdivision, be debited or credited, as applicable, to account 2007, Goodwill, or to subaccount 2005.1, Telecommunications Plant Acquisition Adjustment, as appropriate.

(c) A memorandum record shall be kept showing the amount of contributions in aid of construction applicable to the property acquired as shown by the accounts of the previous owner.

(d) Companies shall submit to the commission for consideration and approval copies of journal entries recording acquisition of telecommunications plant covered by this instruction when the consideration paid is \$100,000 or greater (Class A companies) and \$25,000 or greater (Class B companies) (See section 661.1 of this Title). The text of such entries shall give a complete description of the property acquired and the basis upon which the amounts of the entries have been determined.

.SO DOC 16C-663.3

NYCRR

663.3 Cost of construction.

(a) Telecommunications plant represents an economic resource which will be used to provide future services, the cost of which will be allocated in a rational and systematic manner to the future periods in which it provides benefits. In accounting for construction costs, the utility shall charge to the telecommunications plant accounts, where applicable, all direct and indirect costs.

(b) Direct and indirect costs shall include, but not be limited to:

(1) Labor includes the wages and expenses of employees directly engaged in or in direct charge of construction work. It includes expenses directly related to an employee's wages, such as workers' compensation insurance, payroll taxes, benefits and other similar items of expense.

(2) Engineering includes the portion of the wages and expenses of engineers, draftsmen, inspectors, and their direct supervision applicable to construction work. It includes expenses directly related to an employee's wages, such as workers' compensation insurance, payroll taxes, benefits and other similar items of expense.

(3) Material and supplies includes the purchase price of material used at the point of free delivery plus the costs of inspection, loading and transportation, and an equitable portion of provisioning expense. In determining the cost of material used, proper allowance shall be made for unused material, for material recovered from temporary structures used in performing the work involved, and for discounts allowed and realized in the purchase of material. This item does not include construction material that is stolen or rendered unusable due to vandalism. Such material should be charged to the applicable plant specific operations expense accounts.

(4) Transportation includes the cost of transporting employees, material and supplies, tools and other work equipment to and from the physical construction location. It includes amounts paid therefor to other companies or individuals and the cost of using the company's own motor vehicles or other transportation equipment.

(5) Contract work includes amounts paid for work performed under contract or other agreement by other companies, firms or individuals; engineering and supervision applicable to such work; cost incident to the award of contracts; and the inspection of such work. The cost of construction work performed by affiliated companies and other details relating thereto shall be available from the work in progress and supporting records.

(6) Protection includes the cost of protecting the company's property from fire or other casualties and the cost of preventing damages to others or the property of others.

(7) Privileges, Permits, and Rights of way includes such costs incurred in obtaining these privileges, permits, or rights of way in connection with construction work, such as for use of private property, streets or highways. The cost of such privileges and permits shall be included in the cost of the work for which the privileges or permits are obtained, except for costs includable in account 2111, Land, and account 2690, Intangibles.

(8) Taxes includes taxes properly includable in construction costs before the facilities are completed for service, which taxes are assessed separately from taxes on operating property or under conditions that permit separate identification of the amount chargeable to construction.

(9) Special machine service includes the cost of labor expended, materials and supplies consumed and other expenses incurred in the maintenance, operation and use of special and other labor saving machines (other than transportation equipment) such as trenching

equipment, cable plows and pole setting trucks. Also included are expenditures for rental, maintenance and operation of such machines owned by others. When a construction job requires the purchase of special machines, the cost thereof, less the appraised or salvage value at the time of release from the job, shall be included in the cost of construction.

(10) Allowance for funds used during construction includes the cost of debt and equity funds used in the construction of telecommunications property and shall be applied to telecommunications property in accounts 2003 and 2004 unless otherwise directed by the commission. Allowance for funds used during construction shall be charged to the accounts appropriate for the cost of the property acquired or constructed as follows:

(i) Reasonable amounts of interest during the construction period (before the property is received or is completed ready for telecommunications service) on general funds expended for any acquisition or construction of telecommunications plant shall be computed on amounts in accounts 2003, Telecommunications Plant Under Construction--Short Term and 2004, Telecommunications Plant Under Construction--Long Term and shall be charged thereto. Such amounts shall be credited to account 7340, Allowance For Funds Used During Construction.

(ii) When funds, derived from the sales of bonds, notes and other interest-bearing debt, are specifically acquired and separately held for use in the construction of telecommunications plant, the total interest, discount or premium, and expense on such debt, less interest earned on such funds, applicable to the accounting period shall be included in the cost of telecommunications plant and credited to account 7340, Allowance For Funds Used During Construction; provided, however, that no interest charge for a period longer than six months prior to the commencement of construction work shall be made unless specifically authorized by the commission.

(iii) During the period of suspension of a construction project, no allowance for funds used during construction for a period longer than six months from the date of its suspension shall be included in these accounts unless specifically authorized by the commission. No allowance for funds used during construction charge shall be included in these accounts on expenditures for construction projects which have been abandoned.

(11) Insurance includes premiums paid specifically for protection against loss and damage in connection with the construction of

telecommunications plant due to fire or other casualty, injury to or death of employees or others, damages to property of others, defalcations of employees and agents and the nonperformance of contractual obligations of others.

(12) Construction services include the cost of telephone, electricity, power, construction quarters, office space and equipment directly related to the construction project.

(13) Indirect construction costs shall include indirect costs such as general engineering, supervision and support. Such costs, in addition to direct supervision, shall include indirect plant operations and engineering supervision up to, but not including, supervision by executive officers whose pay and expenses are chargeable to account 6711, Executive. The records supporting the entries for indirect construction costs shall be kept so as to show the nature of the expenditures, the individual jobs and accounts charged, and the bases of the distribution. The amounts charged to each plant account for indirect costs shall be readily determinable. The instructions contained herein shall not be interpreted as permitting the addition to plant of amounts to cover indirect costs based on arbitrary allocations.

(14) The cost of construction shall not include any amounts classifiable as Corporate Operations Expense.

.SO DOC 16C-663.4

NYCRR

663.4 Retirement units. The retirement units (note also section 663.5 (b) (1) of this Part) are listed in the retirement unit list appended to this system of accounts. Additions to or revisions of this list will be issued, when necessary, by this commission, to which any applications for such additions or revisions shall be presented by the company. (The retirement unit list is set out at the end of this system of accounts.)

.SO DOC 16C-663.5

NYCRR

663.5 Telecommunications plant retired.

(a) Telecommunications plant accounts shall at all times disclose the original cost of all property in service. When any item of property subject to plant retirement accounting is worn out, lost, sold, destroyed, abandoned, surrendered upon lapse of title, becomes permanently unserviceable, is withdrawn or for any other reason is retired from service, the plant accounts applicable to that item shall be credited with the original cost of the plant retired whether replaced or not (except as provided for minor items in paragraph (b) (2) of this section). Normally, these retirement credits with respect to such plant as entire buildings, entire central offices, all plant abandoned and any large sections of plant withdrawn from service, shall be entered in the

accounts for the month in which use of the property ceased. For any other plant withdrawn from service, the retirement credits shall be entered no later than the next succeeding month. Literal compliance with the provision for timing of entries with respect to property amounting to less than \$50,000 for Class A companies or \$10,000 for Class B companies retired under any one project is not required if an unreasonable amount of recordkeeping and estimating of quantities, original costs and salvage is necessary. The retirement entry shall refer to the continuing property record, or records supplemental thereto, from which the cost was obtained (note also subdivision (c) of this section). Every company shall establish procedures which will ensure compliance with these requirements.

(b) To avoid undue refinement, depreciable telecommunications plant shall be accounted for as follows:

(1) Retirement units. This group includes major items of property, as shown in the Retirement Units List of this system of accounts. (The Retirement Units List is set out at the end of the system of accounts, *infra*.) For items included on the retirement units list, the original cost of any such items retired shall be credited to the plant account and charged to account 3100, Accumulated Depreciation, whether or not replaced. The original cost of retirement units installed in place of property retired shall be charged to the applicable telecommunications plant account.

(2) Minor items. This group includes any part or element of plant which is not designated as a retirement unit. The original cost of a minor item of property when included in the specific or average cost for a retirement unit or units requires no separate credit to the telecommunications plant account when such a minor item is retired. The cost of replacement shall be charged to the account applicable for the cost of repairs of the property. However, if the replacement effects a substantial betterment (the primary aim of which is to make the property affected more useful, of greater durability, of greater capacity or more economical in operation), the excess cost of such a replacement, over the estimated cost at the then current prices of replacement without betterment of the minor items being retired, shall be charged to the applicable telecommunications plant account.

(c) The cost of property to be retired shall be the amount at which property is included in the telecommunications plant accounts. However, when it is impracticable to determine the cost of each item due to the relatively large number or small cost of such items, the average cost of all the items covered by an appropriate subdivision of the account shall

be used in determining the cost to be assigned to such items when retired. The method used in determining average cost must give due regard to the quantity, vintage, size and kind of items, the area in which they were installed and their classification in other respects. Average cost may be applied in retirement of such items as poles, wire, cable, cable terminals, conduit and booths. Any company may use average cost of property installed in a year or band of years. It should be understood, however, that the use of average costs shall not relieve the company of the requirement for maintaining its continuing property records to show, where practicable, dates of installation and removal for purposes of mortality studies. (See section 663.7 of this Part, standard practices for establishing and maintaining continuing property records.)

(d) The accounting for the retirement of property, plant and equipment shall be as provided above except:

(1) Amounts included in subaccount 2005.1, Telecommunications Plant Acquisition Adjustment; subaccount 2005.2, Other Plant Adjustment; account 2681, Capital Leases; account 2682, Leasehold Improvements; account 2690, Intangibles; and any amounts associated with amortizable leaseholds, easements, and similar rights in land included in account 2111, Land, shall be debited, as appropriate, to accounts 3410, 3420, 3500, 3600 and credited to the applicable accounts.

(2) Amounts in account 2111, Land, and amounts for works of art recorded in account 2122, Furniture, shall be treated at disposition, with commission approval, as a gain or loss and shall be credited or debited to account 7150, Gains and Losses from Disposition of Land and Artworks, as applicable. The gain or loss shall be the difference between such original cost and the sale price (less commissions and other expenses of making the sale) of the land or artwork. If land or artwork is retained by the company and held for sale, the cost shall be charged to account 2006, Nonoperating Plant.

(e) When the telecommunications plant is sold together with traffic associated therewith, the original cost of the property shall be credited to the applicable plant accounts and the estimated amounts carried with respect thereto in the accumulated depreciation and amortization accounts shall be charged to such accumulated accounts. The difference, if any, between the net amount of such debit and credit items and the consideration received (less commissions and other expenses of making the sale) for property that was ever included in regulated accounts shall, with commission approval, be included in account 7350, Gains and Losses from Disposition of Certain Property. The

accounting for depreciable telecommunications plant sold without the traffic associated therewith shall be in accordance with the accounting provided in paragraph C of account 3100, Accumulated Depreciation.

(f) Attention is directed further to the following abstract from section 99, subdivision 2 of the Public Service Law, which defines the commission's authority to require approval for the assignment or transfer by a telegraph or telephone company of its owned or leased property. Notwithstanding the foregoing, any such transfer or lease with an original cost of:

(1) less than \$100,000 proposed by a telephone corporation having annual gross revenues in excess of \$200,000,000;

(2) less than \$25,000 proposed by a telephone corporation having annual gross revenues of less than \$200,000,000; or

(3) less than \$10,000 proposed by a telephone corporation having annual gross revenues of less than \$10,000,000 shall be effective without the commission's written consent within 90 days after such corporation notifies the commission that it plans to complete such transfer or lease and submits a description of the transfer or lease, provided however, that the commission may determine within such 90 days that the public interest requires its review and written consent.

.SO DOC 16C-663.6

NYCRR

663.6 Continuing property records required.

(a) The continuing property records are that portion of the total property accounting system which preserves the following detailed information:

(1) the identity, vintage, location and original cost of units of property; and

(2) original and ongoing transactional data (plant account activity) in terms of such units.

(b) The continuing property records must be

(1) subject to internal accounting controls,

(2) auditable,

(3) equal in the aggregate to the total investment reflected in the financial property control accounts as well as the total of the cost allocations supporting the determination of cost-of-service at any particular point in time, and

(4) maintained throughout the life of the property.

(c) Companies shall establish and maintain continuing property records for each class of property recorded in the several plant accounts which comprise the balance sheet account 2001, Telecommunications Plant In Service, account 2002, Property Held for Future Telecommunications Use,

and account 2006, Nonoperating Plant.

(d) The company shall prepare and maintain the continuing property record as follows:

(1) Not later than December 31st of the year following that in which the company becomes subject to this system of accounts, begin the preparation of a continuing property record.

(2) Complete within two years of the prescribed beginning date, continuing property records for all property as of the end of the preceding calendar year.

(3) Promptly process in the continuing property records all property changes affecting periods subsequent to initial establishment of the continuing property record.

(e) The continuing property record components (see subdivision (a), (b) and (c) of this section) shall be arranged in conformity with the regulated plant accounts prescribed in this system of accounts as follows:

(1) The continuing property records shall be compiled on the basis of original cost (or other book cost consistent with this system of accounts). The continuing property records shall be maintained as prescribed in § 663.7(b) (3) of this Part in such manner as will meet the following basic objectives:

(i) provide for the verification of property record units by physical examination;

(ii) provide for accurate accounting for retirements; and

(iii) provide data for use in connection with depreciation studies.

(f) The following additional continuing property records requirements shall be complied with by Class A companies only:

(1) The Class A continuing property records shall consist of

(i) continuing property records and

(ii) records supplemental thereto which together reveal clearly, by accounting area, the detailed and systematically summarized information necessary to meet fully the requirements of subdivisions (a) and (b) of this section, and paragraph (3) of this subdivision.

(2) The records supplemental to the continuing property records shall disclose such service designations, usage measurement criteria, apportionment factors, or other data as may be prescribed by the Commission in this uniform system of accounts or other provisions of this Title. Such data are subject to the same general controls and standards for auditability and support as are all other elements of the continuing property records.

(3) The continuing property records also shall preserve any other

specific financial and cost accounting information not properly warranting separate disclosure as an account or subaccount but which is needed to support regulatory, cost, tax, management and other specific accounting information needs and requirements.

(g) Each Class A company shall notify the Commission of a plan for the continuing property record as follows:

(1) Not later than December 31st of the year following that in which it becomes subject to this system of accounts, the company shall file, in accordance with the requirements of § 3.5 of this Title, with the Commission a complete plan of the method to be used in the compilation of a continuing property record with respect to each class of property. The plan shall include a list of proposed accounting areas accompanied by description of the boundaries of each area as defined in accordance with the requirements of § 663.7(a) (1) and (2) of this Part. The plan shall also include a list of property record units proposed for use under each regulated plant account. These property record units shall be selected such that the requirements of § 663.7(b) (1), (2) and (3) can be satisfied.

(2) The company shall submit to the Commission major proposed changes in its continuing property record plan at least 30 days before the effective date of the proposed changes.

.SO DOC 16C-663.7

NYCRR

663.7 Standard practices for establishing and maintaining continuing property records.

(a) Accounting area. (1) The continuing property record, as related to each primary plant account, shall be established and maintained by subaccount for each accounting area. An accounting area is the smallest territory of the company for which accounting records of investment are maintained for all plant accounts within the area. Areas already established for administrative, accounting, valuation, or other purposes may be adopted for this purpose when appropriate. In no case shall the boundaries of accounting areas cross either State lines or boundaries prescribed by the commission.

(2) In determining the limit of each area, consideration shall be given to the quantities of property, construction conditions, operating districts, county and township lines, taxing district boundaries, city limits, and other political or geographical limits, in order that the area adopted may have maximum adaptability, within the confines of practicability, for both the company's purpose and those of Federal, State, and municipal authorities.

(b) Property record units. (1) In each of the established accounting

areas, the property record units which are to be maintained in the continuing property record shall be set forth separately, classified by size and type with the amount of original cost (or other appropriate book cost) associated with such units. Such units shall apply to only the regulated portion of this system of accounts.

(2) When it is found necessary to revise this list because of the addition of units used in providing new types of service, or new units resulting from improvements in technology, or because of the grouping or elimination of units which no longer merit separate recognition as property record units, one copy of such changes shall be submitted to the commission. Upon appropriate showing by the company, the commission may specifically exempt the company from these filing requirements.

(3) The continuing property record shall reveal the description, location, date of placement, the essential details of construction, and the original cost (note also subdivision (c) of this section) of the property record units. The continuing property record and other underlying records of construction costs shall be so maintained that, upon retirement of one or more retirement units or of minor items without replacement when not included in the costs of retirement units, the actual cost or a reasonably accurate estimate of the cost of the plant retired can be determined.

(c) Methods of determining original cost of property record units. The original cost of the property record units shall be determined by analyses of the construction costs incurred as shown by completion reports and other data, accumulated in the respective construction work orders or authorizations. Costs shall be allocated to and associated with the property record units to facilitate accounting for retirements. The original cost of property record units shall be determined by unit identification or averaging as described below:

(1) Unit identification. Cost shall be identified and maintained by specific location for property record units contained within certain regulated plant accounts or account groupings such as land, buildings, central office assets, motor vehicles, garage work equipment and furniture. In addition, units involved in any unusual or special type of construction shall be recorded by their specific location costs (note also subparagraph (2) (ii) of this subdivision).

(2) Averaging. (i) Average costs may be developed for plant consisting of a large number of similar units such as terminal equipment, poles, wire, cable, cable terminals, conduit, furniture, and work equipment. Units of similar size and type within each specified accounting area and regulated plant account may be grouped. Each such average cost shall be

set forth in the continuing property record of the units with which it is associated.

(ii) The averaging of costs permitted under the provisions of the foregoing paragraph is restricted to plant installed in a particular vintage or band of years, incurred within an accounting area. This paragraph does not permit the inclusion of the cost of units involved in any unusual or special type of construction. The units involved in such unusual or special type of construction shall be recorded at cost by location.

(d) Estimates. In cases where the actual original cost of property cannot be ascertained, such as pricing an inventory for the initial entry of a continuing property record or the pricing of an acquisition for which a continuing property record has not been maintained, the original cost may be estimated. Any estimated original cost shall be consistent with the accounting practices in effect at the time the property was constructed.

(e) Identification of property record units. There shall be shown in the continuing property record or in record supplements thereof, a complete description of the property record units in such detail as to identify such units. The description shall include the identification of the work order under which constructed, the year of installation (unless not determinable per subdivision (d) of this section), the specific location of the property within each accounting area in such manner that it can be readily spot-checked for proof of physical existence, the accounting company's number or designation, and any other description used in connection with the determination of the original cost. Descriptions of units of similar size and type shall follow prescribed groupings.

(f) Reinstalled units. When units to which average costs are not applied, i.e., specific and fixed location units, are removed or retired and subsequently reinstalled, the date when the unit was first charged to the appropriate plant account shall, when required for adequate service life studies and reasonably accurate retirement accounting, be shown in addition to the date of reinstallation.

(g) Age and service life of property. The continuing property record shall disclose the age of existing property and the supporting records shall disclose the service life of property retired.

(h) Reference to sources of information. There shall be shown by appropriate reference the source of all entries. All drawings, computations, and other detailed records which support quantities and costs or estimated costs shall be retained as a part of or in support of

the continuing property record.

(i) Jointly owned property. (1) With respect to jointly owned property, there shall be shown in the continuing property record or records supplemental thereto:

(i) the identity of all joint owners; and

(ii) the percentage owned by the accounting company.

(2) When regulated plant is constructed under arrangements for joint ownership, the amount received by the constructing company from the other joint owner or owners shall be credited as a reduction of the gross cost of the plant in place.

(3) When a sale of a part interest in regulated plant is made, the fractional interest sold shall be treated as a retirement and the amount received shall be treated as salvage. The continuing property record or records supplemental thereto shall be so maintained as to identify separately retirements of this nature from physical retirements of jointly owned plant.

(4) If jointly owned regulated property is substantial in relation to the total of the same kind of regulated property owned wholly by the company, such jointly owned regulated property shall be appropriately segregated in the continuing property record.

.SO DOC 16C-663.8

NYCRR

663.8 Work order system required.

(a) Each company shall record all changes in telecommunications plant by means of a work order system which shall include a work order estimate and a work in progress record, and all installations, additions, retirements and replacements of retirement units (note the Retirement Units List at the end of this system of accounts) shall be covered thereby. Standing work orders (sometimes known as routine estimates) may be used (1) by Class A companies, for plant changes of like character whose estimated gross additions or retirements for an individual project are less than \$100,000, and (2) by Class B companies, for plant changes of like character whose estimated gross additions or retirements for an individual project are less than \$10,000. These limits may be modified by order of this commission, upon application, when warranted by particular circumstances.

Note: When work is to be done for which a work order estimate is not used and when part or all of the cost will be ultimately billed to others, the records shall be kept so that details of the costs, including an allowance for funds used during construction, can be readily ascertained. (This type of order is commonly known as custom work order or keep cost order and should be identified by a series of

distinctive designations.)

(b) The work order estimate shall include the following:

(1) A designation number or letter and the signature of the officer or employee who authorized the work, purchase or sale, and the date of such authorization. If the authorization is by the board of directors or another body or committee, the proper officer shall so state over his signature. In case a new set of numbers is started at the beginning of each calendar or fiscal year, the designation shall identify each estimate so that it will not be confused with other estimates bearing the same number.

(2) A description and the location of the work to be done (or the purchase, or retirement to be made) and the dates between which it is proposed to progress the project, the date when work was begun and the date when completed. The date when any major portion or complete assembly is placed in or discontinued from service shall be shown consistently either in the work order estimate or in the work in progress record.

(3) Detailed estimates of the cost of the project to be supported by maps, plans, diagrams, specifications, etc., applicable.

(4) The account or accounts to which the cost of the project is to be distributed and retirements credited, and the amount estimated for each such account.

(5) Any variations between estimates and the actual cost of the project.

(6) When a project involves changes in existing telecommunications plant, the work order estimate or the work in progress record shall show the year or period of installation of the property retired or otherwise affected, and shall show or refer to other records which cover the book cost (estimated if not known, with the basis of the estimate stated) and the name and page of the accounting and engineering books and records covering such installation and the cost thereof.

(c) The work in progress record shall contain the following:

(1) A designation number or letter which shall correspond to the number or letter on the work order estimate covering the same project. When more than one work in progress record covers the expenditures on a work order estimate, each shall be numbered or lettered so as to be readily identifiable with the work order estimate for that project.

(2) The accumulated charges and credits applicable to each project, the total cost of the complete project, the cost of removal and value of salvage recovered shall be shown together with the quantity of material installed or retired and, so far as practicable, the number of

retirement units installed or retired. When any project involves amounts distributable to more than one telecommunications plant or other account, the work in progress record shall be kept so as to show the amount applicable to each account. Every charge or credit on a work in progress record shall be readily verifiable from detailed underlying sources. Indirect construction costs (see section 663.3(b) (13) of this Part) shall be separately stated for each account by classes. Credits representing contributions toward construction shall be recorded so as to show name of contributor and a distribution by plant accounts of the amount received. (Note section 663.1(b) of this Part.)

(d) Amounts on open work orders shall support accounts 2003 and 2004, Telecommunications Plant Under Construction--Short Term and Long Term respectively, and account 3100.01, Retirement Work In Progress, (note also account 3100, subdivision C), except that standing work orders (routine estimates) may reflect expenditures on short term construction or retirement projects which are not carried through those accounts. Upon coming into service, completed portions involving additions to plant accounts shall be transferred to appropriate accounts although other portions of the work covered by the same order are not yet completed and the work order has not been closed. Maintenance costs initially charged to a work order shall be cleared monthly. When use of a retirement unit ceases, the book cost thereof, estimated if not known, shall be credited to the proper account even though the plant has not been actually dismantled. (Note also section 663.5 of this Part.)

Note A: Requirement of the use of the work order system here outlined may be suspended by order of this commission when a company satisfies this commission that the procedure which it follows gives equivalent detail of changes in telecommunications plant accounts in substantially the same form and with the promptness which the accounting system contemplates. The identification of expenditures with property must be completed and clear and the detail of each project must be readily available.

Note B: The work order system is required to record changes, both additions and retirements, in plant used wholly or partly, in telecommunications operations. Its use is recommended, however, in recording other expenditures such as repairs and research projects, plant changes in other departments, and custom, construction or maintenance work for others.

.SO DOC 16C-663.9

NYCRR

663.9 Items lists. The items lists are provided for the purpose of clearly indicating the application of the prescribed accounting in

specific cases. These lists are published separately by the director of the Office of Accounting and Finance or his designee. Companies shall be guided by the lists in recording the cost of specific assets in the telecommunications plant in service detail accounts (accounts 2111 through 2690). These lists do not comprise all of the items to be recorded in the specific accounts but are considered to be representative of them. The appearance of an item in a list warrants the recording of such item in the designated account only when the text of the account also indicates inclusion in the account, inasmuch as the same item frequently appears in more than one list.

.SO DOC 16C-PT664 NYCRR

PART 664

INSTRUCTIONS--DEPRECIATION AND AMORTIZATION ACCOUNTING

(Statutory authority: Public Service Law, § 95(2))

Sec.

664.1 Computation of depreciation rates

664.2 Depreciation charges

664.3 Classes of depreciable telecommunications plant

664.4 Plant retired for nonrecurring factors not recognized in depreciation rates

664.5 Amortization accounting

664.6 Depreciation and amortization subsidiary records

664.7 Accounting for software

.SO DOC 16C-664.1 NYCRR

Section 664.1 Computation of depreciation rates. (a) Depreciation percentage rates shall be computed in conformity with a group plan of accounting for depreciation and shall be such that the loss in service value of the property, except for losses excluded under the definition of depreciation, may be distributed under the straight-line method during the service life of the property. These percentage rates shall be based upon the estimated service values and service lives developed by a study of the company's history and experience and such engineering and other information as may be available with respective future conditions. Such percentage rates shall not include any allowance for loss in service value of property expected to be installed in the future. The percentage rates shall, for each primary account comprised of more than one class of property, produce a charge to operating expenses for that account equal to the sum of the amounts that would otherwise be chargeable for each of the various classes of property included in the account.

(b) In the event any composite percentage rate becomes no longer applicable, revised composite percentage rates shall be computed and filed with the Commission in accordance with subdivisions (a) and (d) of this section.

(c) The company shall keep such records of property and property retirements as will allow the determination of the service life of property which has been retired, or facilitate the determination of service life indications by mortality, turnover, or other appropriate methods. Such records will also allow the determination of the percentage of salvage value or net salvage value, as appropriate, for property retired from each class of depreciable plant. (See account 2321 regarding amortization of customer premises wiring.)

(d) Not later than six months following the date when a company becomes subject to this system of accounts, it shall have filed with this commission estimates of the composite annual percentage rates considered applicable to the original cost of each class of depreciable telecommunications plant owned or used by the company. (Note section 664.2 of this Part.) The estimates of the composite annual percentage rates so filed shall be accompanied by a statement subscribed to by an officer or other duly authorized representative of the company, showing the basis therefor and the methods employed in their computation.

.SO DOC 16C-664.2

NYCRR

664.2 Depreciation charges. (a) A separate annual percentage rate for each depreciation category of telecommunications plant shall be used in computing depreciation charges.

(b) Charges for currently accruing depreciation shall be made monthly to the appropriate depreciation accounts, and corresponding credits shall be made to the appropriate depreciation reserve accounts. Current monthly charges shall normally be computed by the application of one-twelfth of the annual depreciation rate to the monthly average balance of the associated category of plant. The average monthly balance shall be computed using the balance as of the first and last days of the current month.

(c) When acquired depreciable plant carried in account 1439, Deferred Charges, is distributed to the appropriate plant accounts, adjusting entries shall be made covering the depreciation charges applicable to such plant for the period during which it was carried in account 1439.

(d) When the company is responsible under the terms of a lease for depreciation of property, used but not owned, the computation of depreciation charges shall be made on the same basis as for owned depreciable property.

.SO DOC 16C-664.3

NYCRR

664.3 Classes of depreciable telecommunications plant. (a) The classes of depreciable telecommunications plant and the accounts covering such plant are as follows:

- Motor Vehicles (account 2112)
- Aircraft (account 2113)
- Special Purpose Vehicles (account 2114)
- Garage Work Equipment (account 2115)
- Other Work Equipment (account 2116)
- Buildings (account 2121)
- Furniture (account 2122)
- Office Equipment (account 2123)
- General Purpose Computers (account 2124)
- Analog Electronic Switching (account 2211)
- Digital Electronic Switching (account 2212)
- Electro-Mechanical Switching (account 2215)
- Operator Systems (account 2220)
- Radio Systems (account 2231)
- Circuit Equipment (account 2232)
- Station Apparatus (account 2311)
- Customer Premises Wiring (account 2321)
- Large Private Branch Exchanges (account 2341)
- Public Telephone Terminal Equipment (account 2351)
- Other Terminal Equipment (account 2362)
- Poles (account 2411)
- Aerial Cable (account 2421)
- Underground Cable (account 2422)
- Buried Cable (account 2423)
- Submarine Cable (account 2424)
- Deep Sea Cable (account 2425)
- Intrabuilding Network Cable (account 2426)
- Aerial Wire (account 2431)
- Conduit Systems (account 2441)

.SO DOC 16C-664.4

NYCRR

664.4 Plant retired for nonrecurring factors not recognized in depreciation rates.

(a) A retirement will be considered as nonrecurring (extraordinary) only if the following criteria are met:

- (1) The impending retirement was not adequately considered in setting past depreciation rates.
- (2) The charging of the retirement against the reserve will unduly

deplete that reserve.

(3) The retirement is unusual such that similar retirements are not likely to recur in the future.

(b) Upon direction or approval from this commission, the company shall credit account 3100, Accumulated Depreciation, and charge account 1438, Deferred Maintenance and Retirements, with the unprovided-for loss in service value. Such amounts shall be distributed from account 1438 to account 6561, Depreciation Expense--Telecommunications Plant in Service, or account 6562, Depreciation Expense--Property Held for Future Telecommunications Use, over such period as this commission may direct or approve.

.SO DOC 16C-664.5

NYCRR

664.5 Amortization accounting. (a) Amortization shall be computed on the straight-line method, i.e., equal annual amounts shall be applied, or other method as directed by the commission. The cost of each type of asset shall be amortized on the basis of the estimated life of that asset and shall not be written off in the accounting period in which the asset is acquired. A reasonable estimate of the useful life may be based on the upper or lower limits even though a fixed existence is not determinable. However, the period of amortization shall not exceed 40 years.

(b) In the event any estimated useful life becomes no longer applicable, a revised estimated useful life shall be determined in accordance with subdivision (a) of this section.

(c) Amortization charges shall be made monthly to the appropriate amortization expense accounts and corresponding credits shall be made to the appropriate amortization reserve accounts. Monthly charges shall be computed by the application of one-twelfth to the annual amortization amount.

(d) The company shall keep such records as will allow the determination of the useful life of the asset.

.SO DOC 16C-664.6

NYCRR

664.6 Depreciation and amortization subsidiary records. (a) Subsidiary record categories shall be maintained for each class of depreciable telecommunications plant in account 3100 for which there is a prescribed depreciation rate. (See also section 664.1(c) of this Part.)

(b) Subsidiary records shall be maintained for accounts 3410, 3420, 3500, and 3600 in accordance with section 664.5(d) of this Part.

.SO DOC 16C-664.7

NYCRR

664.7 Accounting for software. The original cost of initial operating system software for computers shall be classified to the same account as

the associated hardware whether acquired separately or in conjunction with the associated hardware. (See also account 8310, Software Expense.)

NYCRR

665.4 Revenue recognition.

(a) Credits shall be made to the appropriate revenue accounts when such revenue is actually earned. When the billing cycle encompasses more than one accounting period, adjustments are necessary to properly recognize the revenue applicable to the current accounting period under report. Revenues recorded under the terms of two-tier contracts or other variable payment plans should be deferred, if necessary, and recognized ratably with expenses over the term of the related contract. Any amounts deferred shall be credited to account 4360, Other Deferred Credits.

(b) Known amounts of revenue losses due to fire or theft shall be recognized as an operating expense (Note account 5264, Other Incidental Regulated Revenue and account 6728, Other General and Administrative).

(c) Telecommunications service supplied to municipalities without charge, in accordance with franchise requirements, shall be accounted for as provided in account 2690, Intangibles. (Note also account 6564, Amortization Expense--Intangibles and account 6728, Other General and Administrative.)

SO PDT 12/01/88 r/a 665.4

.SO DOC 16C-665.5

NYCRR

665.5 Contractual arrangements. Charges and credits resulting from activities associated with the provision of regulated telecommunications services shall be recorded in a manner consistent with the nature of the underlying contractual arrangements. The charges and credits resulting from expense sharing or apportionment arrangements associated with the provision of regulated telecommunications services shall be recorded in the detailed regulated accounts. Charges and credits resulting from revenue settlement agreements or other revenue pooling arrangements associated with the provision of regulated telecommunications services shall be included in the appropriate revenue accounts. Those charges and credits resulting from contractual revenue pooling and/or sharing agreements shall be recorded in each prescribed revenue account and prescribed subsidiary record categories thereof to the extent that each is separately identifiable in the settlement process. It is not intended that settlement amounts be allocated or generally spread to the individual revenue accounts where they are not separately identifiable in the settlement process. When the settlement amounts are not identifiable by a revenue account they shall be recorded in accounts 5069, Other Local Exchange Revenue Settlements, 5129, Other Long Distance Private Network Revenue Settlements, 5169, Other Long Distance

Revenue Settlements, or 5269, Other Revenue Settlements, as appropriate.

.SO DOC 16C-665.6

NYCRR

665.6 Subsidiary records. (a) Subsidiary record categories shall be maintained in order that the company may separately report revenues derived from charges imposed under intrastate, interstate and international tariff filings. This jurisdictional subsidiary record requirement applies to all accounts except the Network Access Services Group where separate accounts have been established for Federal and State access revenues.

(b) Subsidiary record categories shall be maintained for the following accounts in order that the company may separately report revenues derived from residential and business customers:

- (1) all accounts in the local network services revenue group;
- (2) account 5081, End User Revenue;
- (3) any end user revenues included in account 5084, State Access

Revenues;

- (4) account 5100, Long Distance Message Revenue; and
- (5) account 5110, Unidirectional Long Distance Revenue.

(c) Unless otherwise authorized by this commission the records supporting the entries to telecommunications operating revenue accounts shall be kept so that revenues for each local service area can be readily identified.

.SO DOC 16C-665.7

NYCRR

665.7 Structure of the revenue accounts. (a) The revenue section of the system of accounts shall be organized by revenue group summary account, account and subsidiary record category (if required).

(b) The revenue section of this system of accounts shall be comprised of five major groups--local network services revenues, network access services revenues, long distance network services revenues, miscellaneous revenues, and uncollectible revenues, which shall be considered as a revenue group for the purposes of the construction of the system.

(c) Summary accounts within revenue groups shall be used to describe aggregations of two or more accounts having a certain commonality. Summary accounts are assigned numbers so that they may be used to aggregate accounts for reporting purposes.

(d) Accounts shall be maintained as prescribed in this section subject to the conditions described in section 661.3 of this Title. In certain instances, subsidiary record categories may be required below the account level by this system of accounts or by commission order.

.SO DOC 16C-665.8

NYCRR

665.8 Local network services revenues. Local network services revenues (accounts 5000-5069) shall include revenues derived from the provision of service and equipment entirely within the basic service area. That area is defined as the normal boundaries for local calling plus Extended Area Service (EAS) boundaries as they apply to that service. It includes revenues derived from both local private network service and local public network services as well as from customer premises facilities services. Local revenues include associated charges such as one-time service connection or termination charges and secondary features such as call waiting.

.SO DOC 16C-665.9

NYCRR

665.9 Network access revenues. (a) Network access revenues (accounts 5080-5084) shall include revenues derived from the provision of exchange access services to an interexchange carrier or to an end user of telecommunications services beyond the exchange carrier's network.

(b) Billing and collections service provided under exchange access tariffs shall be included in the Miscellaneous Revenues Group.

.SO DOC 16C-665.10

NYCRR

665.10 Long distance network services revenues. Long distance network services revenues shall include revenues derived from the provision of services beyond the basic service area, whether message or flat-rate and including public network switching as well as private.

.SO DOC 16C-665.11

NYCRR

665.11 Miscellaneous revenues. Miscellaneous revenues are those revenues derived from the provision of regulated products and services provided under tariff or contract but not contained elsewhere. They shall also include operating revenue derived from activities performed incident to the company's tariffed telecommunications operations which, though nontariffed, are included in the regulatory process.

.SO DOC 16C-665.12

NYCRR

665.12 Nonregulated revenues.

The nonregulated revenue account shall be used for nonregulated operating revenues when a nonregulated activity involves the common or joint use of assets or resources in the provision of regulated and nonregulated products or services and when such activity is accounted for, as required in section 661.14 of this Title, within the accounts prescribed in this system for telephone company operations. Revenues from nontariffed services offered incidental to tariffed services may be accounted for as regulated revenues, provided the activities, subject to commission approval, comply with the following criteria. The activity must have been traditionally treated as regulated for intrastate

ratemaking purposes or the activity must be a natural outgrowth of regulated operations. The activity must not constitute a separate line of business. A description of and justifications for each incidental activity must be included in a company's cost manual, or in the commission-approved Cost Allocation Manual for any company required to file a Cost Allocation Manual.

.SO DOC 16C-665.13 NYCRR

665.13 Uncollectible revenues. Uncollectible revenues shall include amounts originally credited to the revenue accounts which have proved impracticable of collection.

666.8 Reimbursements

.SO DOC 16C-666.1 NYCRR

Section 666.1 Structure of the expense accounts. (a) The expense section of the system of accounts shall be organized by expense group summary account, account, and subsidiary record category (if required).

(b) The expense section of this system of accounts shall be comprised of four major expense groups--plant specific operations, plant nonspecific operations, customer operations and corporate operations.

Expenses to be recorded in plant specific and plant nonspecific operations expense groups generally reflect cost associated with the various kinds of equipment identified in the plant asset accounts.

Expenses to be recorded in the customer operations and corporate operations accounts reflect the costs of, or are associated with, functions performed by people, irrespective of the organization in which any particular function is performed.

(c) Summary accounts within expense groups shall be used to describe aggregations of two or more accounts having a certain commonality. Summary accounts are assigned numbers so that they may be used by telephone companies to aggregate accounts for reporting purposes.

(d) Accounts shall be maintained as prescribed in this uniform system of accounts subject to the conditions described in section 661.3 of this Title. Subsidiary record categories may be required below the account level by this system of accounts or by commission order.

.SO DOC 16C-666.2

NYCRR

666.2 Plant specific operations expense. (a) The plant specific operations expense accounts, 6110 through 6441, shall be used to record costs related to specific kinds of telecommunications plant.

(b) The plant specific operations expense accounts predominantly mirror the telecommunications plant in service detail accounts and are numbered consistently with them; the first digit of the expense account being six and the remaining digits being the same as the last three numbers of the related plant account. In classifying plant specific operations expenses, the text of the corresponding plant account should be consulted to ensure appropriateness.

(c) The plant specific operations expense accounts shall include the costs of inspecting, testing (except as specified in account 6533, Testing Expense) and reporting on the condition of telecommunications plant to determine the need for repairs, replacements, rearrangements and changes; performing routine work to prevent trouble (except as specified in account 6533), replacing items of plant other than retirement units; rearranging and changing the location of plant not retired; repairing material for reuse; restoring the condition of plant damaged by storms, floods, fire or other casualties (other than the cost of replacing retirement units); inspecting after repairs have been made; and receiving training to perform these kinds of work. Also included are the costs of direct supervision (immediate or first-level) and office support of this work.

(d) In addition to the activities specified in subdivision (c) of this section, the appropriate plant specific operations expense accounts shall include the cost of personnel whose principal job is the operation of plant equipment, such as general purpose computer operators, aircraft pilots, chauffeurs and shuttle bus drivers. However, when the operation of equipment is performed as part of identifiable functions (such as the use of office equipment, capital tools or motor vehicles) the operators' cost shall be charged to accounts appropriate for those functions. (For costs of operator services personnel, see accounts 6621, Call Completion Services, and 6622.1, Number Services--Directory Assistance, and for costs of test board personnel see account 6533.)

.SO DOC 16C-666.3

NYCRR

666.3 Plant nonspecific operations expense. The plant nonspecific

operations expense accounts, 6510 through 6565, shall include expenses related to property held for future telecommunications use, provisioning expenses, network operations expenses, and depreciation and amortization expenses. Accounts in this group (except for accounts 6540, Access Expense, and accounts 6560 through 6565) shall include the costs of performing activities described in narratives for individual accounts. These costs shall also include the costs of supervision and office support of these activities.

.SO DOC 16C-666.4 NYCRR

666.4 Customer operations expense. The customer operations expense accounts, 6610 through 6623.3, shall include the cost of performing customer related marketing and services activities described in narratives for individual accounts. These costs shall also include the costs of supervision, office support and training for these activities.

.SO DOC 16C-666.5 NYCRR

666.5 Corporate operations expense. The corporate operations expense accounts, 6710 through 6790, shall include the costs of performing executive and planning activities and general and administrative activities described in narratives for individual accounts. These costs shall also include the costs of supervision, office support and training for these activities.

.SO DOC 16C-666.6 NYCRR

666.6 Expense matrix.

(a) The expense accounts shall be maintained by the following subsidiary record categories, as appropriate to each account.

(1) Salaries and wages. This subsidiary record category shall include compensation to employees, such as: wages, salaries, commissions, bonuses, incentive awards and termination payments.

(2) Benefits. This subsidiary record category shall include payroll-related benefits on behalf of employees such as the following:

Pensions

Savings plan contributions (company portion)

Workers' compensation required by law

Life, hospital, medical, dental, and vision plan insurance

Social Security and other payroll taxes

(3) Rents. (i) This subsidiary record category shall include amounts paid for the use of real and personal operating property. Amounts paid for real property shall be included in account 6121, Land and Buildings Expense. This category includes payments for operating leases but does not include payments for capital leases.

(ii) This subsidiary record category is applicable only to the plant

specific operations expense accounts. Incidental rents, e.g., short-term rental car expense, shall be categorized as Other Expenses (see paragraph (4) of this subdivision) under the account which reflects the function for which the incidental rent was incurred.

(4) Other expenses. This subsidiary record category shall include costs which cannot be classified to the other subsidiary record categories. Included are material and supplies, including provisioning (note also account 6512, Provisioning Expense); contracted services; accident and damage payments, insurance premiums; traveling expenses and other miscellaneous costs.

(5) Clearances. This subsidiary record category shall include amounts transferred to construction accounts (see section 663.3(b)(3) of this Title), other plant specific operations expense accounts and/or account 3100, Accumulated Depreciation (cost of removal: see section 664.5(d) of this Title) as appropriate, from accounts 6112, Motor Vehicle Expense, 6113, Aircraft Expense, 6114, Special Purpose Vehicles Expense, 6116, Other Work Equipment Expense, 6534, Plant Operations Administration Expense, and 6535, Engineering Expense. There shall also be transfers to Construction and/or other Plant Specific Operations Expense accounts, as appropriate, from account 6512, Provisioning Expense and account 8310, Software Expense. Cleared amounts shall retain their initial expense matrix identities in the receiving expense accounts. With respect to these expenses, companies may establish such clearing accounts as they deem necessary to accomplish substantially the same results, provided that within 30 days of the opening of such accounts, companies shall notify the Director of Accounting of the nature and purpose thereof. Additional clearing accounts affecting other expense areas may be established with prior approval of the Director of Accounting.

.SO DOC 16C-666.7

NYCRR

666.7 Distribution of pay and expenses of employees. Charges to the telecommunications plant, operating expense, and other accounts for services and expenses of employees engaged in activities chargeable to various accounts shall be based upon the actual time engaged in the respective classes of work, except that the pay and expenses of an employee who performs the same class of work from day to day may be distributed upon the basis of a study of the time actually engaged during a representative period.

.SO DOC 16C-666.8

NYCRR

666.8 Reimbursements. Reimbursements of actual costs incurred in connection with joint operations or projects, repairing plant due to damages by others, and obligations to make changes in telecommunications

plant (such as highway relocations), shall be credited to the accounts originally charged.

667.1 Purpose of the income accounts

.SO DOC 16C-667.1

NYCRR

Section 667.1 Purpose of the income accounts. The income accounts, accounts 5000 through 7991, are designed to report the results of operations of a telecommunications company for each calendar year. Operating revenues shall be reported in accounts 5000 through 5302; operating expenses in accounts 6110 through 6790; other operating income and expense in accounts 7100 through 7160; operating taxes in accounts 7200 through 7250; nonoperating income and expense in accounts 7300 through 7370; nonoperating taxes in accounts 7400 through 7450; interest and related charges in accounts 7500 through 7540.2; extraordinary items in accounts 7600 through 7640 and jurisdictional differences and nonregulated income in accounts 7910, 7990 and 7991. The income accounts shall include all items of profit or loss from operations for the calendar year. The net credit or debit balance from income accounts for the calendar year shall be transferred to accounts 4550.2 Unappropriated Undistributed Affiliate Earnings or 4550.4 Balance Transferred from Income, as appropriate.

CURRENT ASSETS

1130. Cash

A. This account shall include the amount of current funds available for use on demand in the hands of financial officers and agents, deposited in banks or other financial institutions and also funds in transit for which agents have received credit.

B. Working cash advances shall be included in account 1150, Working Cash Advances.

1140. Special Cash Deposits

A. This account shall include the amount of cash on special deposit, other than in sinking and other special funds provided for elsewhere, to pay dividends, interest, and other debts, when such payments are due one

year or less from the date of deposit; the amount of cash deposited to insure the performance of contracts to be performed within one year from date of the deposit; and other cash deposits of a special nature not provided for elsewhere. This account shall include the amount of cash deposited with trustees to be held until mortgaged property sold, destroyed, or otherwise disposed of is replaced, and also cash realized from the sale of the company's securities and deposited with trustees to be held until invested in physical property of the company or for disbursement when the purposes for which the securities were sold are accomplished.

B. Cash on deposit in special accounts where the funds are available for the current requirements of the company shall be included in account 1130, Cash.

C. Cash on special deposit to be held for more than one year from the date of deposit shall be included in account 1410, Other Noncurrent Assets.

1150. Working Cash Advances

This account shall include the amount of cash advanced to officers, agents, employees, and others as petty cash or working funds from which expenditures are to be made and accounted for. (See section 661.16(i) of this Title.)

1160. Temporary Investments

A. This account shall include the cost of current securities acquired for the purpose of temporarily investing cash, such as time drafts receivable and time loans, bankers' acceptances, U.S. Treasury certificates, marketable securities, and other similar investments of a temporary character.

B. Accumulated changes in the net unrealized losses of current marketable equity securities shall be included in the determination of net income in the period in which they occur in account 7360, Other Nonoperating Income.

Note: See section 661.16(i) of this Title.

1180. Telecommunications Accounts Receivable

A. This account shall include all amounts due from customers for services rendered or billed and from agents and collectors authorized to make collections from customers. This account shall also include all amounts due from customers or agents for products sold. This account shall be kept in such manner as will enable the company to make the following analysis:

(1) Amounts due from customers who are receiving telecommunications service.

(2) Amounts due from customers who are not receiving service and whose accounts are in process of collection.

B. Collections in excess of amounts charged to this account may be credited to and carried in this account until applied against charges for services rendered or until refunded.

C. Subaccounts shall be maintained in accordance with the instructions in section 661.16(i) of this Title.

1181. Accounts Receivable Allowance--Telecommunications

A. This account shall be credited with amounts charged to account 5301, Uncollectible Revenue--Telecommunications to provide for uncollectible amounts included in account 1180, Telecommunications Accounts Receivable. There shall also be credited to this account amounts collected which previously had been written off through charges to this account and credits to account 1180. There shall be charged to this account any amounts covered thereby which have been found to be impracticable of collection.

B. If no such allowance is maintained, uncollectible amounts shall be charged directly to account 5301, Uncollectible Revenue Telecommunications.

1190.1. Accounts Receivable from Affiliated Companies

A. This account shall include all amounts currently due from affiliated companies and not provided for in other accounts, such as those for traffic settlements, divisions of revenue, material and supplies, matured rents, and interest receivable under monthly settlements on short-term loans, advances, and open accounts.

B. Amounts included in this account shall not include amounts receivable from sales of telecommunications service provided at tariffed rates. Such amounts shall be included in account 1180, Telecommunications Accounts Receivable.

Note: If any items included in this account are not to be paid currently they shall be transferred to account 1401.2, Advances to Affiliated Companies.

1190.2. Other Accounts Receivable

A. This account shall include all amounts currently due, other than those from affiliated companies, and not provided for in other accounts, such as those for traffic settlements, divisions of revenue, material and supplies, matured rents, and interest receivable under monthly settlements on short-term loans, advances, and open accounts.

B. If any items included in this account are not to be paid currently they shall be transferred to account 1410, Other Noncurrent Assets.

1191. Accounts Receivable Allowance--Other and Affiliated

A. This account shall be credited with amounts charged to account 5302, Uncollectible Revenue--Other to provide for uncollectible amounts included in account 1190.1, Accounts Receivable from Affiliated Companies, or account 1190.2, Other Accounts Receivable. There shall also be credited to this account amounts collected which previously had been written off through charges to this account and credits to account 1190.1 or account 1190.2. There shall be charged to this account any amounts covered thereby which have been found to be impracticable of collection.

B. If no such allowance is maintained, uncollectible amounts shall be charged directly to account 5302, Uncollectible Revenue--Other.

1200.1. Notes Receivable from Affiliated Companies

This account shall include the cost of demand or time notes, bills and drafts receivable, or other similar evidences (except interest coupons) of money receivable from affiliated companies on demand or within a time not exceeding one year from date of issue.

1200.2. Other Notes Receivable

This account shall include the cost of demand or time notes, bills and drafts receivable, or other similar evidences (except interest coupons) of money receivable from nonaffiliated companies or individuals on demand or within a time not exceeding one year from date of issue.

1201. Notes Receivable Allowance--Other and Affiliated

A. This account shall be credited with amounts charged to account 6790, Provision for Uncollectible Notes Receivable to provide for uncollectible amounts included in account 1200.1, Notes Receivable from Affiliated Companies or account 1200.2, Other Notes Receivable. There shall also be credited to this account amounts collected which previously had been written off through charges to this account and credits to account 1200.1 or account 1200.2. There shall be charged to this account any amounts covered thereby which have been found to be impracticable of collection.

B. If no such allowance is maintained, uncollectible amounts shall be charged directly to account 6790, Provision for Uncollectible Notes Receivable.

C. Subsidiary record categories shall be maintained in order that the entity may separately report the amounts contained herein that relate to affiliates and nonaffiliates.

1210. Interest and Dividends Receivable

A. This account shall include the amount of interest accrued to the date of the balance sheet on bonds, notes, and other commercial paper owned, on loans made, and the amount of dividends receivable on stocks

owned.

B. This account shall not include dividends or other returns on securities issued or assumed by the company and held by or for it, whether pledged as collateral, or held in its treasury, in special deposits, or in sinking and other funds.

C. Interest receivable under monthly settlements on short-term loans, advances, and open accounts, shall be included in accounts 1180, Telecommunications Accounts Receivable, 1190.1, Accounts Receivable from Affiliated Companies or account 1190.2, Other Accounts Receivable, as appropriate.

D. Dividends received and receivable from affiliated companies accounted for on the equity method shall be included in account 1401.1, Investments in Affiliated Companies, as a reduction of the carrying value of the investment.

1220. Inventories

A. This account shall include the cost of material and supplies held in stock and inventories of goods held for resale or lease. The investment in inventories shall be maintained in the following subaccounts:

1220.1. Material and supplies

1220.2. Property held for sale or lease

B. This account shall not include material and supplies which are dedicated to the company's nonregulated activities unless that activity involves joint or common use of assets and resources in the provision of regulated and nonregulated products and services.

C. 1220.1 Material and supplies. This subaccount shall include the cost of material and supplies held in stock including plant supplies, motor vehicles supplies, tools, fuel, other supplies and material and articles of the company in process of manufacture for supply stock. (See section 663.3(b)(3) of this Title).

D. Transportation charges and sales and use taxes, so far as practicable, shall be included as a part of the cost of the particular material to which they relate. Transportation charges and sales and use taxes which are not included as part of the cost of particular material shall be equitably apportioned among the detail accounts to which material is charged.

E. So far as practicable, cash and other discount on material shall be deducted in determining the cost of the particular material to which they relate or credited to the account to which the material is charged. When such deduction is not practicable, discounts shall be equitably apportioned among the detail accounts to which material is charged.

F. Material recovered in connection with construction, maintenance or retirement of property shall be charged to this account as follows:

(1) Reusable items that, when installed or in service, were retirement units shall be included in this account at the original cost, estimated if not known. (Note also section 663.5(c) of this Title.)

(2) Reusable minor items that, when installed or in service, were not retirement units shall be included in this account at current prices new.

(3) The cost of repairing reusable material shall be charged to the appropriate account in the plant specific operations expense accounts.

(4) Scrap and nonusable material included in this account shall be carried at the estimated amount which will be received therefor. The difference between the amounts realized for scrap and nonusable material sold and the amounts at which it is carried in this account, so far as practicable, shall be adjusted in the accounts credited when the material was taken up in this account.

G. Interest paid on material bills, the payments of which are delayed, shall be charged to account 7540.1, Other Interest Deductions--Affiliated companies, or account 7540.2, Other Interest Deductions, as appropriate.

H. Inventories of material and supplies shall be taken during each calendar year and the adjustments to this account shall be charged or credited to account 6512, Provisioning Expense.

I. 1220.2 Property held for sale or lease. This subaccount shall include the cost of all items purchased for resale or lease. The cost shall include applicable transportation charges, sales and use taxes, and cash and other purchase discounts. Inventory shortages and overages shall be charged and credited, respectively, to account 5280, Nonregulated Operating Revenue.

1290. Prepaid Rents

This account shall include the amounts of rents paid in advance of the period in which they are chargeable to income, except amounts chargeable to telecommunications plant under construction and minor amounts which may be charged directly to the final accounts. As the term expires for which the rents are paid, this account shall be credited monthly and the appropriate account charged. (Note also section 663.3 (b) of this Title.)

1300. Prepaid Taxes

This account shall include the balance of all taxes, other than amounts chargeable to telecommunications plant under construction and minor amounts which may be charged to the final accounts, paid in

advance and which are chargeable to income within one year. As the term expires for which the taxes are paid, this account shall be credited monthly and the appropriate account charged. (Note also section 663.3(b)(8) of this Title.)

1310. Prepaid Insurance

This account shall include the amount of insurance premiums paid in advance of the period in which they are chargeable to income, except premiums chargeable to telecommunications plant under construction and minor amounts which may be charged directly to the final accounts. As the term expires for which the premiums are paid, this account shall be credited monthly and the appropriate account charged. (Note also section 663.3(b)(11) of this Title.)

1320. Prepaid Directory Expenses

This account shall include the cost of preparing, printing, binding, and delivering directories and the cost of soliciting advertisements for directories, except minor amounts which may be charged directly to account 6622.2, Number Services--Directory Publishing. Amounts in this account shall be cleared to account 6622.2 by monthly charges representing that portion of the expenses applicable to each month.

1330. Other Prepayments

This account shall include prepayments, other than those includible in accounts 1290 through 1320, except minor amounts which may be charged directly to the final accounts. As the term expires for which the payments apply, this account shall be credited monthly and the appropriate account charged.

1350. Other Current Assets

This account shall include the amount of all current assets which are not includible in accounts 1130 through 1330, inclusive, such as unmatured rent receivable. (Note also section 662.2 of this Title.)

1360. Current Deferred Income Taxes--Dr

A. This account shall include the balance of related income taxes resulting from a normalized method of accounting which are paid in advance, but which are expected to be charged to income in a future period (within one year).

B. As items which generated the prepaid income tax are reclassified from long-term to current, the appropriate prepaid income tax shall be reclassified from account 1510, Noncurrent Deferred Income Taxes--Dr, to this account.

C. This account shall be debited with the amount being credited to account 7250, Provision for Deferred Operating Income Taxes--Net or account 7450, Provision for Deferred Nonoperating Income Taxes--Net, or

account 7640, Provision for Deferred Income Tax Effect of Extraordinary Items--Net in accordance with the account's description and provisions of section 661.13 of this Title.

D. This account shall be credited with the amount being charged to either account 7250, 7450 or 7640 in accordance with the text of those accounts.

E. A separate subaccount shall be provided hereunder for operating and nonoperating deferred taxes and also those related to extraordinary items.

F. The classification of deferred income taxes as current or noncurrent shall follow the classification of the asset or liability that gave rise to the deferred income tax. If there is no related asset or liability, classification shall be based on the expected turnaround of the tax timing differences.

NONCURRENT ASSETS

1401.1. Investments in Affiliated Companies

A. This account shall include the acquisition cost of the company's investment in equity or other securities issued or assumed by affiliated companies, other than securities held in special funds which shall be charged to account 1408, Sinking Funds. The carrying value of the investment (securities) accounted for by the equity method shall be adjusted to recognize the company's share of the earnings or losses and dividends received or receivable of the affiliated company from the date of acquisition. (Note also account 1210, Interest and Dividends Receivable, and account 7310, Dividend Income.)

B. Declines in value of investments accounted for under the cost method shall be charged to account 4540, Other Capital, if temporary and as a current period loss if permanent. Detail records shall be maintained to reflect unrealized losses for each investment.

C. Unless otherwise directed by the commission, the company shall apply generally accepted accounting principles in choosing the method of accounting for investments in affiliates.

D. Amortization of goodwill which represents the difference between acquisition cost and the book value of an investment that is accounted for by the equity method, shall be amortized by monthly charges, on a straight-line basis, to account 7360, Other Nonoperating Income, over the periods estimated to be benefitted, but not exceeding forty years.

E. A subsidiary record shall be kept identifying separately common stocks, preferred stocks, and long-term debt. Further, the company's records shall identify the securities pledged as collateral for any of the company's long-term debt or short-term loans or to secure

performance of contracts.

F. Amounts due from affiliated companies which are subject to current settlement shall be included in account 1180, Telecommunications Accounts Receivable, account 1190.1, Accounts Receivable from Affiliated Companies, or account 1200.1, Notes Receivable from Affiliated Companies, as appropriate.

G. Subsidiary record categories shall be maintained in order that the entity may separately report the amounts contained herein that relate to the equity method and the cost method.

Note: Section 661.16(h).

1401.2. Advances to Affiliated Companies

This account shall include investment advances to affiliated companies represented by book accounts only with respect to which it is carried or intended that they shall be either settled by issuance of capital stock or debt; or shall not be subject to current cost settlement.

Note A: Amounts due from affiliated companies which are subject to current settlement shall be included in accounts 1180, 1190.1 or 1200.1, as appropriate.

Note B: Funds advanced to affiliated companies other than investment advances shall be included in account 1150, Working Cash Advances.

1402. Investments in Nonaffiliated Companies

A. This account shall include the acquisition cost of the company's investment in securities issued or assumed by nonaffiliated companies and individuals, other than securities held in special funds which shall be charged to account 1408, Sinking Funds, and also its investment advances to such parties and special deposits of cash for more than one year from date of deposit.

B. Declines in value of investments shall be charged to account 4540, Other Capital, if temporary and as a current period loss to account 7360, Other Nonoperating Income, if permanent. Detail records shall be maintained to reflect unrealized losses for each investment.

C. This account shall also include advances represented by book accounts only with respect to which it is agreed or intended that they shall be either settled by issuance of capital stock or debt; or shall not be subject to current cost settlement.

D. A subsidiary record shall be kept identifying separately common stocks, preferred stocks, long-term debt, investment advances and special deposits of cash for more than one year from the date of deposit. Further, the company's record shall identify the securities pledged as collateral for any of the company's long-term debt or short-term loans or to secure performance of contracts.

E. Amounts due from nonaffiliated companies which are subject to current settlement shall be included in account 1180, Telecommunications Accounts Receivable, account 1190.2, Other Accounts Receivable, or account 1200.2, Other Notes Receivable, as appropriate.

1406. Nonregulated Investments

A. This account shall include the carrier's investment in nonregulated activities accounted for in a separate set of books as provided in section 661.14 of this Title.

B. The investment in this account shall be maintained by the following subaccounts:

1406.1 Permanent Investment

1406.2 Receivable/Payable

1406.3 Current Net Income or Loss

1407. Unamortized Debt Issuance Expense

A. This account shall include the total unamortized balance of debt issuance expense for all classes of outstanding long-term debt. Amounts included in this account shall be amortized monthly and charged to account 7530, Amortization of Debt Issuance Expense. Unamortized debt issuance expense related to reacquired debt shall be disposed of as provided in account 4240, Reacquired Debt.

B. Debt Issuance expense includes all expenses in connection with the issuance and sale of evidence of debt, such as fees for drafting mortgages and trust deeds; fees and taxes for issuing or recording evidences of debt; costs of engraving and printing bonds, certificates of indebtedness, and other commercial paper; fees paid trustees; specific costs of obtaining governmental authority; fees for legal services; fees and commissions paid underwriters, brokers, and salesmen; fees and expenses of listing on exchanges, and other like costs.

C. A subsidiary record shall be kept of each issue outstanding.

1408. Sinking Funds

A. This account shall include the amount of cash and other assets which are held by trustees or by the company's treasurer in a distinct fund, for the purpose of redeeming outstanding obligations.

B. Interest or other income arising from funds carried in this account shall generally be charged to this account.

C. A subsidiary record shall be kept for each sinking fund which shall designate the obligation in support of which the fund was created.

D. When long-term debt is reacquired and retired (primarily redemptions for sinking fund purposes), the face amount of the debt shall be charged to account 4210, Funded Debt. The gain or loss shall be recognized at the time of retirement by credits or charges to account

7360, Other Nonoperating Income, except that material gains or losses shall be treated as extraordinary. (See accounts 7610, Extraordinary Income Credits, and 7620, Extraordinary Income Charges.)

1410. Other Noncurrent Assets

This account shall include the amount of all noncurrent assets which are not includable in accounts 1401.1 through 1408.

1438. Deferred Maintenance and Retirements

A. This account shall include such items as the unprovided-for loss in service value of telecommunications plant for extraordinary nonrecurring retirement not considered in depreciation and the cost of extensive replacements of plant normally chargeable to the current period plant specific operations expense accounts (Note also section 663.5. of this Title.)

B. Charges provided for in paragraph A above shall be included in this account only upon direction or approval from this commission. However, the company's application to this commission for such approval shall give full particulars concerning the property retired, the extensive replacements, the amount chargeable to operating expenses and the period over which in its judgment the amount of such charges should be distributed.

1439. Deferred Charges

A. This account shall include all deferred charges not provided for in accounts 1438, Deferred Maintenance and Retirements, and 1500, Other Jurisdictional Assets -- Net. Such charges include unaudited amounts and other debit balances in suspense that cannot be cleared and disposed of until additional information is received; the amount, pending determination of loss, of funds on deposit with banks which have failed; revenue, expense, and income items held in suspense (Note also section 661.9); amounts paid for options pending final disposition.

B. This account shall include the cost of preliminary surveys, plans, investigation, etc., made for construction projects under contemplation. If the projects are carried out, the preliminary costs shall be included in the cost of the plant constructed. If the projects are abandoned, the preliminary costs shall be charged to account 7370, Special Charges.

C. This account shall include also the cost of evaluations, inventories, and appraisals taken in connection with the acquisition or sale of property. If the property is subsequently acquired, the preliminary costs shall be accounted for as a part of the cost of acquisition, or if it is sold, such costs shall be deducted from the sale price in accounting for the property sold. If purchases or sales are abandoned, the preliminary costs included herein (including options

paid, if any) shall be charged to account 7370.

1500. Other Jurisdictional Assets--Net

This account shall include the cumulative impact on assets of jurisdictional ratemaking practices which vary from those of this commission. All entries recorded in this account shall be recorded net of any applicable income tax effects and shall be supported by subsidiary records where necessary as provided for in section 661.3 of this Title.

1510. Noncurrent Deferred Income Taxes--Dr

A. This account shall include the balance of income tax expense resulting from a normalized method of accounting which are paid in advance (more than one year) of the period in which they are chargeable to income.

B. This account shall be debited and the prescribed income account shall be credited to reflect the offset for the tax effect of certain items which have been included in the determination of taxable Income, but which will not be included in the determination of book income until a period in excess of 12 months in the future for regulated, nonregulated operations and extraordinary items transactions which have been included in the determination of taxable income (more than one year).

C. As items which generated the prepaid income tax are reclassified from long-term to current, the appropriate prepaid income tax shall be reclassified from this account to account 1360, Current Deferred Income Taxes -- Dr.

D. A separate subaccount shall be provided hereunder for operating and nonoperating deferred taxes and also those related to extraordinary items.

E. The classification of deferred Income taxes as current or noncurrent shall follow the classification of the asset or liability that gave rise to the deferred income tax. If there is no related asset or liability, classification shall be based on the expected turn around of the tax timing difference.

PROPERTY, PLANT, AND EQUIPMENT

2001. Telecommunications Plant in Service

This account shall include the original cost of the investment included in accounts 2111 through 2690.

2002. Property Held for Future Telecommunications Use

A. This account shall include the original cost of property owned other than station apparatus, and held for imminent use in telecommunications service under a definite plan for such use.

B. The property included in this account shall be classified in separate subaccounts, according to the primary accounts for telecommunications plant in service.

C. Subsidiary records shall be maintained to show the character of the amounts carried in this account.

2003. Telecommunications Plant Under Construction--Short Term

A. This account shall include the original cost of construction projects designed to be completed in one year or less. (Note also section 663.3 of this Title.)

B. There may be charged directly to the appropriate plant accounts the cost of any construction project which is estimated to be completed and ready for service within two months from the date on which the project was begun. There may also be charged directly to the plant accounts the cost of any construction project for which the gross additions to plant are estimated to amount to less than \$100,000 (Class A) or \$10,000 (Class B). (See section 661.1 of this Title.)

C. When the plant includable in this account is not ready for service at the end of one year, the cost of construction of the plant shall be transferred to account 2004, Telecommunications Plant Under Construction--Long Term, without further direction or approval of this commission. If a construction project has been suspended for six months or more, the cost of the plant includable in this account shall be transferred to account 2004 without further direction or approval of this commission. If a project is abandoned, the cost included in this account shall be charged to account 7370, Special Charges.

D. When any telecommunications plant, the cost of which has been included in this account, is completed ready for service, the cost thereof shall be credited to this account and charged to the appropriate telecommunications plant or other accounts.

E. Subsidiary record categories shall be maintained in order that the entity may separately report the amounts contained herein that relate to interest bearing and non-interest bearing construction.

F. Expenditures on research and development projects for construction facilities are to be included in a separate subaccount. Records shall be

maintained to show separately each project with complete detail of the nature and purpose of the project together with related costs.

Note: The cost of any construction project charged to the plant accounts shall be supported by a routine work order or work order estimate prepared and maintained in accordance with section 663.8. Entries in the plant accounts with respect to such costs shall include the designated number or letter of the work order or work order estimate covering the project to which the costs relate.

2004. Telecommunications Plant Under Construction -- Long Term

A. This account shall include the original cost of construction projects designed to be completed in more than one year. (Note also section 663.3. of this Title.)

B. There may be charged directly to the plant accounts the cost of any construction project for which the gross additions to plant are estimated to amount to less than \$100,000 (Class A) or \$10,000 (Class B). (See section 661.1 of this Title.)

C. If a project is abandoned, the cost included in this account shall be charged to account 7370, Special Charges.

D. When any telecommunications plant, the cost of which has been included in this account, is completed ready for service, the cost thereof shall be credited to this account and charged to the appropriate telecommunications plant or other accounts.

2005. Telecommunications Plant Adjustment

A. This account shall include amounts for adjustments to telecommunications plant related to plant acquisitions as prescribed in section 663.2. This account shall also include the amount of any adjustments to plant arising from a reconciliation of the company's books with its continuing property records or any other plant adjustments as required by the commission. This account shall be maintained according to the following subaccounts:

2005.1 Telecommunications Plant Acquisition Adjustment

2005.2 Other Plant Adjustment

B. 2005.1. Telecommunications Plant Acquisition Adjustment

(1) This subaccount shall include amounts determined in accordance with section 663.2 representing the difference between (a) the amount of money actually paid (or the money value of any consideration other than money exchanged) for telecommunications plant acquired, plus preliminary expenses incurred in connection with the acquisition; and (b) the original cost of such plant, governmental franchises and similar rights acquired, less the amounts of reserve requirements for depreciation and amortization of the property acquired. If the actual original cost is

not known, the entries in this account shall be based upon an estimate of such costs.

(2) The amounts recorded in this subaccount with respect to each property acquisition (except land and artworks) shall be disposed of, written off, or provision shall be made for the amortization thereof, as follows:

(a) Debit amounts may be charged to account 7370, Special Charges, in whole or in part, or amortized over a reasonable period through charges to account 7360, Other Nonoperating Income, without further direction or approval by this commission. When specifically approved by this commission, or when the provisions of subparagraph (c) below apply, debit amounts shall be amortized to account 6565, Amortization Expense--Other. (Note also account 3600 Accumulated Amortization--Other.)

(b) Credit amounts shall be disposed of in such manner as this commission may approve or direct, except for credit amounts referred to in subparagraph (c) below.

(c) Within one year from the date of inclusion in this subaccount of a debit or credit amount with respect to a current acquisition, the company may dispose of the total amount from an acquisition of telephone plant by a lump-sum charge or credit, as appropriate, to account 6565 without further approval of this commission, provided that such amount does not exceed \$100,000 (Class A) or \$10,000 (Class B) and that the plant was not acquired from an affiliated company. (See section 661.1 of this Title.)

Note: Disposition as herein provided is for accounting purposes only and shall not be construed as determining or controlling the amount or disposition of the items in a rate or other proceeding, nor shall anything contained in subparagraph (2) of this subaccount be construed as precluding the commission from subsequently requiring disposition of such amounts in a different manner or from altering a previously determined amortization period.

C. 2005.2 Other Plant Adjustment

(1) This subaccount shall include the difference between original cost, estimated if not known, and the book cost of telecommunications plant to the extent that such difference is not related to the acquisition of telecommunications plant, and for which disposition has not previously been made as prescribed in section 663.2 of this Title. This subaccount shall also include any other plant adjustments as directed by the commission.

(2) The amounts included in this subaccount shall be classified to

show the nature of each amount and shall be disposed of as the commission may approve or direct.

Note: The provisions of this subaccount shall not be construed as approving or authorizing the recording of appreciation of plant.

2006. Nonoperating Plant

A. This account shall include the company's investment in regulated property which is not includable in the plant accounts as operating telecommunications plant. It shall include the company's investment in telecommunications property held for sale. (Note also account 1406, Nonregulated Investments.)

B. Subsidiary records shall be maintained to show the character of the amounts carried in this account.

Note: The disposition of any gain or loss arising from the sale of assets being carried in account 2006 shall be at the discretion of the commission if such assets had at any time previously been recorded in the regulated plant accounts of the accounting entity.

2007. Goodwill

A. This account shall include any portion of the plant purchase price that cannot be assigned to specifically identifiable property acquired and such amount should be identified as "goodwill". Such amounts included in this account shall be amortized to account 7360, Other Nonoperating Income, on a straight line basis over the remaining life of the acquired plant, not to exceed 40 years.

B. The amounts included in this account shall be maintained to show the nature of each amount.

TELECOMMUNICATIONS PLANT IN SERVICE--DETAIL ACCOUNTS

General Support Assets

2111. Land

A. This account shall include the original cost of all land held in fee and of easements, and similar rights in land having a term of more than one year used for purposes other than the location of outside plant (see accounts 2411 through 2441) or externally mounted central office equipment (see accounts 2211 and 2212). It shall also include special assessments upon land for the construction of public improvements. (See also section 663.5(d)(2) of this Title.)

B. When land, together with buildings thereon, is acquired, the original cost shall be fairly apportioned between the land and the buildings and accounted for accordingly. If the plan of acquisition contemplates the removal of buildings, the total cost of the land and buildings shall be accounted for as the cost of the land, and the

salvage value of the buildings when disposed of shall be deducted from the cost of the land so determined.

C. Annual or more frequent payments for use of land shall be recorded in the rent subsidiary record category for account 6121, Land and Building Expense.

D. When land is acquired for which there is not a definite plan for its use in telecommunications service, its costs shall be included in account 2006, Nonoperating Plant.

E. When land is acquired in excess of that required for telecommunications purposes, the cost of such excess land shall be included in account 2006, Nonoperating Plant.

F. Installments of assessments for public improvement, including interest, if any, which are deferred without option to the company shall be included in this account only as they become due and payable. Interest on assessments which are not paid when due shall be included in account 7540, Other interest Deductions.

G. When land is purchased for immediate use in a construction project, its cost shall be included in account 2003, Telecommunications Plant Under Construction--Short Term, or account 2004, Telecommunications Plant Under Construction--Long Term, as appropriate, until such time as the project involved is completed and ready for service.

H. The original cost of leaseholds, easements, rights of way, and similar rights in land having a term of more than one year and not includable in account 2111 shall be included in the accounts for outside plant or externally mounted central office equipment in connection with which the rights were acquired.

2112. Motor Vehicles

This account shall include the original cost of motor vehicles of the type which are designed and routinely licensed to operate on public streets and highways. (See also section 663.1(d) of this Title.)

2113. Aircraft

This account shall include the original cost of aircraft and any associated equipment and furnishings installed as an integral part of the aircraft. (See also section 663.1(d) of this Title.)

2114. Special Purpose Vehicles

This account shall include the original cost of special purpose vehicles. (See also section 663.1(d) of this Title.)

2115. Garage Work Equipment

This account shall include the original cost of tools and equipment used to maintain items included in accounts 2112 through 2116. (See also section 663.1 (d) of this Title.)

Note: Separate records shall be maintained for the equipment assigned to each location.

2116. Other Work Equipment

This account shall include the original cost of power operated equipment, general purpose tools and other items of work equipment. (See also section 663.1 (d) of this Title.)

2121. Buildings

A. This account shall include the original cost of buildings, and the cost of all permanent fixtures, machinery, appurtenances and appliances installed as a part thereof. It shall include costs incident to the construction or purchase of a building and to securing possession and title.

B. When land, together with the buildings thereon, is acquired, the original cost shall be fairly apportioned between the land and buildings, and the amount applicable to the buildings shall be included in this account. The amount applicable to the land shall be included in account 2111, Land.

C. This account shall not include the cost of any telephone equipment or wiring apparatus for generating or controlling electricity for operating the telephone system.

2122. Furniture

This account shall include the original cost of furniture in offices, storerooms, shops, and all other quarters. This account shall also include the cost of objects which possess aesthetic value, are of original or limited edition, and do not have a determinable useful life. The cost of any furniture attached to and constituting a part of a building shall be charged to account 2121, Buildings. (See also section 663.1 (d).)

2123. Office Equipment

A. This account shall include office equipment and shall be maintained by the following subaccounts:

2123.1 Office Support Equipment

2123.2 Company Communications Equipment

B. 2123.1 Office Support Equipment

This subaccount shall include the original cost of office equipment in offices, shops and all other quarters.

C. 2123.2 Company Communications Equipment

This subaccount shall include the original cost of private branch exchange and key system intrasystems, as well as station apparatus including its associated inside wiring, installed for company use.

D. The cost of any equipment attached to and constituting a part of a

building shall be charged to account 2121, Buildings.

E. Equipment costing \$200 or less shall be charged to the appropriate expense account, including the associated inside wiring.

F. Cost of wires or cables used for equipment in the above subaccounts that were previously recorded with Customer Premises Wiring or Large Private Branch Exchanges/Other Terminal Equipment should be included in this account.

2124. General Purpose Computers

A. This account shall include the original cost of computers and peripheral devices which are designed to perform general administrative information processing activities.

B. Administrative information processing includes but is not limited to activities such as the preparation of financial, statistical, or other business analytical reports; preparation of payroll, customer bills, and cash management reports, and other records and reports not specifically designed for testing, diagnosis, maintenance or control of the telecommunications network facilities.

C. This account shall include the original cost of initial operating system software for computers classifiable to this account whether acquired separately or in conjunction with associated hardware. Software additions or modifications to the initial operating system shall be charged to the appropriate expense account.

D. This account does not include the cost of computers, their associated peripheral devices, and their initial operating system software associated with switching, network signaling, network operations or other specific telecommunications plant. Such computers, peripherals, and software shall be classified to the appropriate switching, network signaling, network expense, or other plant account.

Central Office Assets

2211. Analog Electronic Switching

A. This account shall include the original cost of stored program control analog circuit-switching and associated equipment. This account shall also include the cost of remote analog electronic circuit switches.

B. Switching plant excludes switchboards which perform an operator assistance function and equipment which is an integral part thereof. It does not exclude equipment used solely for the recording of calling telephone numbers in connection with customer dialed charged traffic, dial tandem switchboards and special service switchboards used in conjunction with private line service; such equipment shall be classified to the particular switch that it serves.

2212. Digital Electronic Switching

A. This account shall include the original cost of stored program control digital switches and their associated equipment. Included in this account are digital switches which utilize either dedicated or nondedicated circuits. This account shall also include the cost of remote digital electronic switches.

B. Switching plant excludes switchboards which perform an operator assistance function and equipment which is an integral part thereof. It does not exclude equipment used solely for the recording of calling telephone numbers in connection with customer dialed charged traffic, dial tandem switchboards and special service switchboards used in conjunction with private line service; such equipment shall be classified to the particular switch that it serves.

2215. Electro-Mechanical Switching

A. This account shall include the original cost of nonelectronic circuit-switching equipment. The investment in electro-mechanical switching equipment shall be maintained in the following subaccounts:

2215.1 Step-by-Step Switching

2215.2 Crossbar Switching

2215.3 Other Electro-Mechanical Switching

B. 2215.1 Step-by-Step Switching

This subaccount shall include the original cost of step-by-step and associated circuit-switching equipment.

C. 2215.2 Crossbar Switching

This subaccount shall include the original cost of crossbar and associated circuit-switching equipment. Also included in this account is the cost of electronic translator system equipment used in switching.

D. 2215.3 Other Electro-Mechanical Switching

This subaccount shall include the original cost of all other types of nonelectronic circuit-switching equipment such as panel systems and their associated circuit-switching equipment.

E. Switching plant excludes switchboards which perform an operator assistance function and equipment which is an integral part thereof. It does not exclude equipment used solely for the recording of calling telephone numbers in connection with customer dialed charged traffic, dial tandem switchboards and special service switchboards used in conjunction with private line service; such equipment shall be classified to the particular switch that it serves.

2220. Operator Systems

A. This account shall include the original cost of those items of equipment used to assist subscribers in utilizing the network and

equipment used in the provision of directory assistance, call intercept, and other operator assisted call completion activities.

B. This account does not include equipment used solely for the recording of calling telephone numbers in connection with customer dialed charged traffic, dial tandem switchboards and special service switchboards used in conjunction with private line service; such equipment shall be classified to the particular switch that it serves.

2231. Radio Systems

A. This account shall include the original cost of ownership of radio transmitters and receivers. The investment in radio systems shall be maintained in the following subaccounts:

2231.1 Satellite and Earth Station Facilities

2231.2 Other Radio Facilities

B. 2231.1 Satellite and Earth Station Facilities

This subaccount shall include the original cost of ownership interest in satellites (including land-side spares), other spare parts, material and supplies. It shall include launch insurance and other satellite launch costs.

This subaccount shall also include the original cost of earth stations and spare parts, material or supplies therefor.

C. 2231.2 Other Radio Facilities

(1) This subaccount shall include the original cost of radio equipment used to provide radio communication channels. Radio equipment is that equipment which is used for the generation, amplification, propagation, reception, modulation, and demodulation of radio waves in free space over which communication channels can be provided. This subaccount shall also include the associated carrier and auxiliary equipment and patch bay equipment which is an integral part of the radio equipment. Such equipment may be located in central office buildings, terminal rooms, or repeater stations or may be mounted on towers, masts or other supports.

(2) This subaccount shall be maintained in order that the company may separately report the amounts contained herein that relate to cellular radio facilities, noncellular radio facilities, and terrestrial microwave radio facilities.

2232. Circuit Equipment

A. This account shall include the original cost of equipment which is used to reduce the number of physical pairs otherwise required to serve a given number of subscribers by utilizing carrier systems, concentration stages or combinations of both. It shall include equipment that provides for simultaneous use of a number of interoffice channels on a single transmission path. This account shall also include equipment

which is used for the amplification, modulation, regeneration, circuit patching, balancing or control of signals transmitted over interoffice communications transmission channels. This account shall include equipment which utilizes the message path to carry signaling information or which utilizes separate channels between switching offices to transmit signaling information independent of the subscribers' communication paths or transmission channels. This account shall also include the original cost of associated material used in the construction of such plant. Circuit equipment may be located in central offices, in manholes, on poles, in cabinets or huts or at other company locations.

B. This account excludes carrier and auxiliary equipment and patch bays which are includable in account 2231.2, Other Radio Facilities. This account also excludes such equipment which is an integral component of a major unit which is classifiable to other accounts.

C. Subsidiary record categories shall be maintained in order that the company may separately report the amounts contained herein that relate to digital and analog.

Information Origination/Termination Assets

2311. Station Apparatus

A. This account shall include the original cost of station apparatus, including teletypewriter equipment, telephone and miscellaneous equipment, small private branch exchanges and radio equipment (excluding mobile), installed for customers' use. Items included in this account shall remain herein until finally disposed of or until used in such manner as to warrant inclusion in other accounts.

B. Disposition units are major items of equipment included in this account which designate the units to be accounted for when apparatus is considered to be finally withdrawn from service or transferred to other telecommunications plant accounts. Each company shall prepare a list of station apparatus which shall be used as its list of disposition units for this account, the cost of which when finally disposed of shall be credited to this account and charged to account 3100, Accumulated Depreciation.

C. The cost of cross-connection boxes, distributing frames or other distribution points which are installed to terminate intrabuilding network cable shall be charged to account 2426, Intrabuilding Network Cable.

D. Operator head sets and transmitters in central offices and at private branch exchanges, and test sets such as those used by wire chiefs, outside plant technicians, and others, shall be included in

account 2116, Other Work Equipment, account 2220, Operator Systems, or account 2341, Large Private Branch Exchanges, as appropriate.

E. Station apparatus for company official use shall be included in account 2123, Office Equipment.

F. An annual inventory shall be taken of all station apparatus in stock that are included in this account. The number of such station apparatus items as determined by this inventory, together with the number of all other station apparatus items included in this account, shall be compared with the corresponding number of station apparatus items as shown by the respective control records. The original cost of any unreconciled differences thereby disclosed shall be adjusted through account 3100, Accumulated Depreciation. Appropriate verifications shall also be made at suitable intervals and necessary adjustments between this account and account 3100 shall be made for all station apparatus included in this account.

G. Items of station apparatus in stock for which no further use in the ordinary conduct of the business is contemplated, but which as a precautionary measure, are held for possible future contingencies instead of being junked, shall be excluded from this account and included in subaccount 1220.2, Property Held For Sale or Lease.

H. Embedded CPE is that equipment or inventory which was tariffed or otherwise subject to the jurisdictional separations process as of January 1, 1983.

2321. Customer Premises Wiring

A. This account shall include all amounts transferred from the former account 232, Station Connections, inside wiring subclass.

B. The investment in Customer Premises Wiring is to be amortized to account 6561, Depreciation, with a corresponding credit to account 3100, Depreciation Reserve, over a 10-year period commencing no later than July 1, 1982. In calculating this amortization, the company shall first determine the net book cost of Customer Premises Wiring by subtracting the depreciation reserve attributable to Customer Premises Wiring from the book cost of Customer Premises Wiring. This net book cost shall be divided by the number of months remaining in the 10-year amortization period to determine the appropriate amortization for that month. For example, the amortization amount for the first month would be determined by dividing the net book cost by 120. The second month, by 119, the third month by 118, etc. The embedded investment on the books up to July 1, 1982 will be fully recovered by July 1, 1992.

C. When Customer Premises Wiring is physically removed, sold, destroyed, or abandoned, the original cost (actual or estimated average

unit cost) carried in this account shall be credited, hereto and charged to account 3100, Depreciation Reserve: or if a separate depreciation reserve account or accounts are established for customer premises wiring, the debit entry shall be made to the appropriate depreciation reserve account.

D. Embedded Customer Premises Wiring is that investment in customer premises wiring equipment or inventory which was capitalized prior to July 1, 1982.

2341. Large Private Branch Exchanges

A. This account shall include the original cost, including the cost of installation, of multiple manual private branch exchanges and of dial system private branch exchanges of types designed to accommodate 100 or more lines or which can normally be expanded to 100 or more lines, installed for customers' use. This account shall also include the original cost of other large installations of station equipment (1) which do not constitute stations, (2) which require special or individualized treatment because of their complexity, special design, or other distinctive characteristics, and (3) for which individual or other specialized cost records are appropriate. (Note also account 2311, Station Apparatus.)

B. The cost of intrabuilding network cables including their associated cross-connection boxes, terminals, distributing frames, etc., is chargeable to account 2426, intra-building Network Cable.

C. The cost of outside plant, whether or not on private property, used with intra-building network cable shall be charged to the appropriate outside plant accounts.

D. Private branch exchanges for company official use shall be included in account 2123, Office Equipment.

E. Embedded CPE is that equipment or inventory which is tariffed or otherwise subject to the jurisdictional separations process as of January 1, 1983. Inventories of Large Private Branch Exchanges equipment is included in account 1220, Inventories.

2351. Public Telephone Terminal Equipment

A. This account shall include the original cost of coinless, coin-operated (including public and semi-public), credit card and pay telephones installed for use by the public. It does not include the costs of customer-owned, coin-operated telephones.

B. This account shall also include the original cost of operating spares that are required to provide a continuity of service for public telephones. The operating spares shall not exceed six-months' supply in terms of turnover and be available to installers from locations in

reasonable proximity to the location of the installed equipment.

C. The original cost of installing public telephone equipment shall not include the labor and minor materials costs of installing the public telephone equipment or premises wiring. These costs as well as the cost of replacing a public telephone shall be charged to account 6351, Public Telephone Terminal Equipment Expense. The labor and minor materials costs of removal of public telephone will also be charged to account 6351.

2362. Other Terminal Equipment

A. This account shall include the original cost of other Non-CPE terminal equipment not specifically provided for elsewhere and items such as specialized communications equipment provided to meet the needs of the disabled, over-voltage protection equipment, multiplexing equipment to deliver multiple channels to customers, etc.

B. Each company shall prepare a list of other terminal equipment which shall be used as its list of disposition units for this account, the cost of which when finally disposed of shall be credited to this account and charged to account 3100, Accumulated Depreciation. The term disposition unit is used to identify major items of equipment; they designate the units to be accounted for when apparatus is considered to be finally withdrawn from service or transferred to other telecommunications plant accounts.

C. This account shall not include company-used apparatus. (See account 2123.2.)

Cable and Wire Facilities Assets

2411. Poles

This account shall include the original cost of poles, crossarms, guys and other material used in the construction of pole lines and shall include the cost of towers when not associated with buildings. This account shall also include the cost of clearing pole line routes and of tree trimming but shall exclude the cost of maintaining previously cleared routes.

2421. Aerial Cable

A. This account shall include the original cost of aerial cable and of drop and block wires served by such cable or aerial wire as well as the cost of other material used in construction of such plant. Subsidiary record categories, as defined below, are to be maintained for nonmetallic aerial cable and metallic aerial cable.

(1) Nonmetallic Cable. This subsidiary record category shall include the original cost of optical fiber cable and other associated material used in constructing a physical path for the transmission of

telecommunications signals.

(2) Metallic Cable. This subsidiary record category shall include the original cost of single or paired conductor cable, wire and other associated material used in constructing a physical path for the transmission of telecommunications signals.

B. The cost of permits and privileges for the construction of cable and wire facilities shall be included in the account chargeable with such construction.

Note A: The cost of cable leading from the main distributing frame or equivalent to central office equipment shall be included in the appropriate switching, transmission or other operations asset account.

Note B: Statistical records shall be kept that the utility can determine readily the miles of wire in aerial cable, except that no such reporting is required as regards drop and block wires.

2422. Underground Cable

A. This account shall include the original cost of underground cable installed in conduit and of other material used in the construction of such plant. Subsidiary record categories, as defined below, are to be maintained for nonmetallic underground cable and metallic underground cable.

(1) Nonmetallic Cable. This subsidiary record category shall include the original cost of optical fiber cable and other associated material used in constructing a physical path for the transmission of telecommunications signals.

(2) Metallic Cable. This subsidiary record category shall include the original cost of single or paired conductor cable, wire and other associated material used in constructing a physical path for the transmission of telecommunications signals.

B. The cost of drop and block wires served by underground cable shall be included in account 2423, Buried Cable.

C. The cost of cables leading from the main distributing frame or equivalent to central office equipment shall be included in the appropriate switching, transmission or other operations asset account.

Note: Statistical records shall be kept so that the utility can determine readily the miles of wire in underground cable.

2423. Buried Cable

A. This account shall include the original cost of buried cable as well as the cost of other material used in the construction of such plant. This account shall also include the cost of trenching for and burying cable run in conduit not classifiable to account 2441, Conduit Systems. Subsidiary record categories, as defined below, are to be

maintained for nonmetallic buried cable and metallic buried cable.

(1) Nonmetallic Cable. This subsidiary record category shall include the original cost of optical fiber cable and other associated material used in constructing a physical path for the transmission of telecommunications signals.

(2) Metallic Cable. This subsidiary record category shall include the original cost of single or paired conductor cable, wire and other associated material used in constructing a physical path for the transmission of telecommunications signals.

B. The cost of drop and block wires served by either underground or buried cable shall be included in this account.

Note: Statistical records shall be kept so that the utility can determine readily the miles of wire in buried cable.

2424. Submarine Cable

A. This account shall include the original cost of submarine cable and other material used in the construction of such plant. Subsidiary record categories, as defined below, are to be maintained for nonmetallic submarine cable and metallic submarine cable.

(1) Nonmetallic Cable. This subsidiary record category shall include the original cost of optical fiber cable and other associated material used in constructing a physical path for the transmission of telecommunications signals.

(2) Metallic Cable. This subsidiary record category shall include the original cost of single or paired conductor cable, wire and other associated material used in constructing a physical path for the transmission of telecommunications signals.

B. The cost of permits and privileges for the construction of cable and wire facilities shall be included in the account chargeable with such construction.

Note: Statistical records shall be kept so that the utility can determine readily the miles of wire in submarine cable.

2425. Deep Sea Cable

A. This account includes the original cost of deep sea cable and other material used in the construction of such plant. Subsidiary record categories, as defined below, are to be maintained for nonmetallic deep sea cable and metallic deep sea cable.

(1) Nonmetallic Cable. This subsidiary record category shall include the original cost of optical fiber cable and other associated material used in constructing a physical path for the transmission of telecommunications signals.

(2) Metallic Cable. This subsidiary record category shall include the

original cost of single or paired conductor cable, wire and other associated material used in constructing a physical path for the transmission of telecommunications signals.

B. The cost of permits and privileges for the construction of cable and wire facilities shall be included in the account chargeable with such construction.

Note: Statistical records shall be kept so that the utility can determine readily the miles of wire in deep sea cable.

2426. Intrabuilding Network Cable

A. This account shall include the original cost of cables and wires located on the company's side of the demarcation point or standard network interface inside subscribers' buildings or between buildings on one customer's same premises. Intrabuilding network cables are used to distribute network access facilities to equipment rooms, cross-connection or other distribution points at which connection is made with customer premises wiring. Subsidiary record categories, as defined below, are to be maintained for nonmetallic intrabuilding network cable and metallic intrabuilding network cable.

(1) Nonmetallic Cable. This subsidiary record category shall include the original cost of optical fiber cable and other associated material used in constructing a physical path for the transmission of telecommunications signals.

(2) Metallic Cable. This subsidiary record category shall include the original cost of single or paired conductor cable, wire and other associated material used in constructing a physical path for the transmission of telecommunications signals.

B. Intrabuilding network cable does not include the cost of cables or wires which are classifiable as network terminating wire, nor the cables or wires from the demarcation point or standard network interface to subscribers' stations.

Note: Statistical records shall be kept so that the utility can determine readily the miles of wire in intrabuilding network cable.

2431. Aerial Wire

A. This account shall include the original cost of bare line wire and other material used in the construction of such plant.

B. The cost of permits and privileges for the construction of cable and wire facilities shall be included in the account chargeable with such construction.

C. The cost of drop and block wires served by aerial wire shall be included in account 2421, Aerial Cable.

Note: Statistical records shall be kept so that the utility can

determine readily the miles of aerial wire.

2441. Conduit Systems

A. This account shall include the original cost of conduit, whether underground, in tunnels or on bridges, which is reusable in place. It shall also include the cost of opening trenches and of any repaving necessary in the construction of conduit plant. It shall also include the cost of manholes, handholes and service boxes constructed for use with the conduit system.

B. The cost of protective covering for buried cable shall be charged to account 2423, Buried Cable, as appropriate, unless such protective covering is reusable in place. The amounts thus charged shall be included in the nonmetallic buried cable or metallic buried cable subsidiary record category, as appropriate.

C. The cost of pipes or other protective covering for underground drop and block wires shall be included in account 2421, Aerial Cable, or account 2423, Buried Cable, as appropriate. The amounts thus charged shall be included in the nonmetallic or metallic subsidiary record category, as appropriate.

Amortizable Assets

2681. Capital Leases

A. This account shall include all property acquired under a capital lease. (Note section 661.18 of this Title.) A lease qualifies as a capital lease when one or more of the following criteria is met:

(1) By the end of the lease term, ownership of the leased property is transferred to the lessee.

(2) The lease contains a bargain purchase option.

(3) The lease term is substantially (75% or more) equal to the estimated useful life of the leased property. However, if the beginning of the lease term falls within the last 25% of the total estimated economic life of the leased property, including earlier years of use, this criterion shall not be used for purposes of classifying the lease.

(4) At the inception of the lease, the present value of the minimum lease payments, excluding that portion of the payments representing executory costs to be paid by the lessor, including any profit thereon, equals or exceeds 90% or more of the fair value of the leased property. However, if the beginning of the lease term falls within the last 25% of the total estimated economic life of the leased property, including earlier years of use, this criterion shall not be used for purposes of classifying the lease. (The lessee utility shall compute the present value of the minimum lease payments using its incremental borrowing rate, unless (1) it is practicable for the utility to learn the implicit

rate computed by the lessor, and (2) the implicit rate computed by the lessor is less than the lessee's incremental borrowing rate. If both of those conditions are met, the lessee shall use the implicit rate.)

B. All other leases are operating leases.

C. The amounts recorded in this account at the inception of a capital lease shall be equal to the original cost, if known, or to the present value not to exceed fair value, at the beginning of the lease term, of minimum lease payments during the lease term, excluding that portion of the payments representing executory costs to be paid by the lessor, together with any profit thereon.

D. If at any time the lessee and lessor agree to change the provisions of the lease, other than by renewing the lease or extending its term, in a manner that would have resulted in a different classification of the lease under the criteria in paragraph A had the changed terms been in effect at the inception of the lease, the revised agreement shall be considered as a new agreement over its term, and the criteria in paragraph A shall be applied for purposes of classifying the new lease. Likewise, any action that extends the lease beyond the expiration of the existing lease term, such as the exercise of a lease renewal option other than those already included in the lease term, shall be considered as a new agreement and shall be classified according to the above provisions. Changes in estimates (for example, changes in estimates of the economic life or the residual value of the leased property) or changes in circumstances (for example, default by the lessee) shall not give rise to a new classification of a lease for accounting purposes.

E. For corporate ledger and balance sheet purposes this account shall be treated as a single composite account. For purposes of analysis, the company shall maintain subsidiary records in which this account is broken down into component parts corresponding to the primary telecommunications plant accounts or subdivisions thereof which include leased plant.

Note: Capital leases related to assets used solely in nonregulated activities are included in account 1406, Nonregulated investments. (See section 662.2.)

2682. Leasehold improvements

A. This account shall include the original cost of leasehold improvements made to telecommunications plant held under a capital or operating lease, which are subject to amortization treatment. This account shall also include those improvements which will revert to the lessor.

B. Improvements to leased telecommunications plant which are of a

relatively minor cost or short life or for which the period of the lease is one year or less shall be charged to the account chargeable with the cost of repairs to such plant.

C. Amounts contained in this account shall be amortized over the term of the related lease.

2690. Intangibles

A. This account shall include the cost of organizing and incorporating the company, the original cost of government franchises, the original cost of patent rights, and other intangible property having a life of more than one year and used in connection with the company's telecommunications operations.

B. Subsidiary records for this account shall include a description of each class of intangible property.

C. The cost of other intangible assets having a life of one year or less shall be charged directly to account 6564, Amortization Expense -- Intangible, or as otherwise directed by the commission. Such intangibles acquired at small cost may also be charged to account 6564, irrespective of their term of life.

D. This account shall not include any discounts on securities issued, nor shall it include costs incident to negotiating loans, selling bonds or other evidences of debt, or expenses in connection with the authorization, issuance, sale or resale of capital stock.

E. When charges are made to this account for expenses incurred in mergers, consolidations, or reorganizations, amounts previously included in this account on the books of the various companies concerned shall not be carried over.

F. Franchise taxes payable annually or more frequently shall be charged to account 7240, Operating Other Taxes.

G. This account shall not include the cost of plant, material and supplies, or equipment furnished to municipalities or other governmental authorities when given other than as initial consideration for franchises or similar rights. (Note also account 6728, Other General & Administrative.)

H. This account shall not include the original cost of easements, rights of way, and similar rights in land having a term of more than one year. Such amounts shall be recorded in account 2111, Land, or in the appropriate outside plant account (see accounts 2411 through 2441), or in the appropriate central office account (see accounts 2211 through 2232).

DEPRECIATION AND AMORTIZATION ACCOUNTS

3100. Accumulated Depreciation

3200. Accumulated Depreciation -- Held for Future Telecommunications Use

3300. Accumulated Depreciation -- Nonoperating

3410. Accumulated Amortization -- Capitalized Leases

3420. Accumulated Amortization -- Leasehold Improvements

3500. Accumulated Amortization -- Intangible

3600. Accumulated Amortization -- Other

3100. Accumulated Depreciation

A. This account shall include the accumulated depreciation associated with the investment contained in account 2001, Telecommunications Plant in Service.

B. This account shall be credited with depreciation amounts currently charged to account 6561, Depreciation Expense--Telecommunications Plant in Service. (Note also account 3300, Accumulated Depreciation--Nonoperating.)

C. At the time of retirement of depreciable operating telecommunications plant, this account shall be charged with the original cost of the property retired plus the cost of removal and credited with the salvage value and any insurance proceeds recovered. (With respect to entries relating to station apparatus and station connections, see accounts 2311 and 2321.) When retirements, cost of removal and salvage are entered originally in retirement work orders, the net total of such work orders shall be included in a separate subaccount hereunder, titled 3100.01, Retirement Work in Progress. Upon completion of the work order, the proper distribution to subdivisions of this account shall be made as provided in paragraph E, *infra*.

D. This account shall be credited with amounts charged to account 1438, Deferred Maintenance and Retirements, as provided in section 664.4. This account shall be credited with amounts charged to account 6561 with respect to other than relatively minor losses in service values suffered through terminations of service when charges for such terminations are made to recover the losses.

E. For corporate ledger and balance sheet purposes this account shall be regarded and treated as a single composite reserve. However, for purposes of analysis, the company shall maintain subsidiary records in which the depreciation reserve is broken down into component parts corresponding to the primary telecommunications plant accounts or subdivisions thereof, which include depreciable telecommunications plant (note also section 664.3). Such subsidiary records shall reflect the current credits and debits to the account in sufficient detail to show separately for each primary telecommunications plant account (1) the

amount of depreciation accrued, (2) the book cost of property retired, (3) cost of removal, (4) salvage, and (5) other items including recoveries from insurance.

3200. Accumulated Depreciation -- Held for Future Telecommunications Use

A. This account shall include the accumulated depreciation associated with the investment contained in account 2002, Property Held for Future Telecommunications Use.

B. This account shall be credited with amounts concurrently charged to account 6562, Depreciation Expense--Property Held for Future Telecommunications Use.

3300. Accumulated Depreciation--Nonoperating

A. This account shall include the accumulated amortization and depreciation associated with the investment contained in account 2006, Nonoperating Plant.

B. This account shall be credited with amortization and depreciation amounts concurrently charged to account 7360, Other Nonoperating Income.

C. When nonoperating plant not previously used in telecommunications service is disposed of, this account shall be charged with the amount previously credited hereto with respect to such property and the book cost of the property so retired less the amount chargeable to this account and less the value of the salvage recovered or the proceeds from the sale of the property shall by* included in account 7350, Gains or Losses from the Disposition of Certain Property. In case the property had been used in telecommunications service previous to its inclusion in account 2006, Nonoperating Plant, the amount accrued for depreciation thereon after its retirement from telecommunications service shall be charged to this account and credited to account 3100, Accumulated Depreciation, and the accounting for its retirement from account 2006 shall be in accordance with that applicable to telecommunications plant retired.

*So in original "by" should be "be"

3410. Accumulated Amortization -- Capitalized Leases

A. This account shall include the accumulated amortization associated with the investment contained in account 2681, Capital Leases.

B. This account shall be credited with amounts for the amortization of capital leases concurrently charged to account 6563, Amortization Expense--Tangible. (Note also account 3300, Accumulated Depreciation--Nonoperating.)

C. When any item carried in account 2681 is sold, is relinquished, or is otherwise retired from service, this account shall be charged with

the cost of the retired item. Remaining amounts associated with the item shall be debited to account 7160, Other Operating Gains and Losses, or account 7360, Other Nonoperating Income, as appropriate.

D. The company shall maintain subsidiary records in which this account is broken down into component parts corresponding to the primary telecommunications plant accounts or subdivisions thereof which include leased plant.

3420. Accumulated Amortization Leasehold Improvements

A. This account shall include the accumulated amortization associated with the investment contained in account 2682, Leasehold improvements.

B. This account shall be credited with amounts for the amortization of leasehold improvements concurrently charged to account 6563, Amortization Expense--Tangible. (Note also account 3300, Accumulated Depreciation--Nonoperating.)

C. When any item carried in account 2682 is sold, is relinquished, or is otherwise retired from service, this account shall be charged with the cost of the retired item. Remaining amounts associated with the item shall be debited to account 7360, Other Nonoperating Income.

3500. Accumulated Amortization Intangible

A. This account shall include the accumulated amortization associated with the investment contained in account 2690, intangibles.

B. This account shall be credited with amortization amounts concurrently charged to account 6564, Amortization Expense intangible. (Note also account 3300, Accumulated Depreciation--Nonoperating.)

C. When any item carried in account 2690 is sold, relinquished, or otherwise retired from service, this account shall be charged with the cost of the retired item. Remaining amounts associated with the item shall be debited to account 7360, Other Nonoperating Income.

3600. Accumulated Amortization-- Other

A. This account shall include the accumulated amortization of telecommunications plant acquisition adjustments and other plant adjustments recorded in account 2005, Telecommunications Plant Adjustment.

B. This account shall be credited with amortization amounts concurrently charged to account 6565, Amortization Expense--Other. (Note also account 3300, Accumulated Depreciation--Nonoperating.)

C. When any item carried in account 2005 is sold, relinquished, or otherwise retired from service, this account shall be charged with the cost of the retired item. Remaining amounts associated with the item shall be debited to account 7360, Other Nonoperating Income.

D. Subsidiary records shall be maintained in order to separately

identify the amounts contained herein that relate to the amortization of amounts carried in subaccount 2005.1, Telecommunications Plant Acquisition Adjustment and subaccount 2005.2, Other Plant Adjustment.

CURRENT LIABILITIES

4010.1. Accounts Payable to Affiliated Companies

A. This account shall include all amounts currently due to affiliated companies for recurring trade obligations, and not provided for in other accounts, such as those for traffic settlements, material and supplies, repairs to telecommunications plant, matured rents, and interest payable under monthly settlements on short-term loans, advances, and open accounts.

B. There shall be included herein accounts payable arising from sharing of revenues.

C. A separate subaccount shall be maintained for each affiliate as prescribed in section 661.16(h).

Note: If items included in this account are not actually paid currently they shall be transferred to account 4260, Advances from Affiliated Companies.

4010.2. Other Accounts Payable

A. This account shall include all amounts currently due to nonaffiliated companies and individuals for recurring trade obligations, and not provided for in other accounts, such as those for traffic settlements, material and supplies, repairs to telecommunications plant, matured rents, and interest payable under monthly settlements on short-term loans, advances, and open accounts. It shall also include amounts of taxes payable that have been withheld from employees' salaries.

B. There shall be included herein accounts payable arising from sharing of revenues.

4020.1. Notes Payable to Affiliated Companies

A. This account shall include the face amount of notes, drafts, and other evidences of indebtedness to affiliated companies issued or assumed by the company (except interest coupons) which are payable on demand or not more than one year or less from date of issue.

B. If any part of an obligation, otherwise includable in this account matures more than one year from date of issue, it shall be included in account 4260, Advances from Affiliated Companies, or other appropriate account.

C. The records supporting the entries to this account shall be kept so that the company can furnish complete details as to each note, when it

is issued, the consideration received, and when it is payable.

D. A separate subaccount shall be maintained for each affiliate as prescribed in section 661.16(h).

4020.2. Other Notes Payable

A. This account shall include the face amount of notes, drafts, and other evidences of indebtedness to nonaffiliated companies and individuals issued or assumed by the company (except interest coupons) which are payable on demand or not more than one year or less from date of issue.

B. If any part of an obligation, otherwise includable in this account matures more than one year from date of issue, it shall be included in account 4210, Funded Debt, or other appropriate account.

C. The records supporting the entries to this account shall be kept so that the company can furnish complete details as to each note, when it is issued, the consideration received, and when it is payable.

4030. Advance Billing and Payments

This account shall include the amount of advance billing creditable to revenue accounts in future months; also advance payments made by prospective customers prior to the establishment of service. Amounts included in this account shall be credited to the appropriate revenue accounts in the months in which the service is rendered or cleared from this account as refunds are made.

4040. Customers' Deposits

A. This account shall include the amount of cash deposited with the company by customers as security for the payment for telecommunications service.

B. Advance payments made by prospective customers prior to the establishment of service shall be credited to account 4030, Advance Billing and Payments.

4050. Current Maturities -- Long-Term Debt

This account shall include the amount (including any obligations for premiums) of long-term debt matured and unpaid without any specific agreement for extension of maturity, including unrepresented bonds drawn for redemption through the operation of sinking and redemption fund agreements.

4060. Current Maturities -- Capital Leases

This account shall include the current portion of obligations applicable to property obtained under capital leases.

4070. Income Taxes -- Accrued

A. This account shall be credited or charged and the following accounts shall be charged or credited with the offsetting amount of

current year income taxes (Federal, State and local) accrued during the period or adjustments to prior accruals:

7220 Operating Federal Income Taxes

7230 Operating State and Local Income Taxes

7420 Nonoperating Federal Income Taxes

7430 Nonoperating State and Local Income Taxes

7630 Current Income Tax Effect of Extraordinary Items Net

B. If significant, current year Income taxes paid in advance shall be reclassified to account 1300, Prepaid Taxes. (Note also section 663.3(b) (8).)

4080 Other Taxes -- Accrued

A. This account shall be credited or charged and account 7240, Operating Other Taxes, or 7440, Nonoperating Other Taxes, or, for payroll related costs, the appropriate expense accounts shall be charged or credited for all taxes, other than Federal, State and local income taxes, accrued or adjusted for previous accruals during the period. Among the taxes includable in this account are property, gross receipts, franchise, capital stock, social security and unemployment taxes. (Note also section 663.3(b)(8) of this Title.)

B. Taxes paid in advance of the period in which they are chargeable to income shall be included in the prepaid taxes account 1300, Prepaid Taxes, or 1410, Other Noncurrent Assets, as appropriate.

4100. Current Deferred Operating Income Taxes -- Cr

A. This account shall include the balance of income tax expense related to current items from regulated operations which have been deferred to later periods as a result of the normalized method of accounting for tax credits authorized by this commission and not provided for elsewhere.

B. As regulated assets which generated the deferred Income tax are reclassified from long-term or noncurrent status to current, the appropriate deferred income tax shall be reclassified from account 4340, Noncurrent Deferred Operating Income Taxes -- Cr, to this account.

C. This account shall be credited with the amount being debited to account 7250, Provision For Deferred Operating Income Taxes--Net, in accordance with that account's description and provisions of section 661.13.

D. This account shall be debited with the amount being credited (reversed) to account 7250, Provision for Deferred Operating Income Taxes--Net, in accordance with that account's description and provisions of section 661.13.

E. The classification of deferred Income taxes as current or

noncurrent shall follow the classification of the asset or liability that gave rise to the deferred income tax. If there is no related asset or liability, classification shall be based on the expected turn-around of the tax timing difference.

F. Subsidiary record categories shall be maintained in order that the company may separately report the amounts contained herein that are property related and those that are nonproperty related.

4110. Current Deferred Nonoperating Income Taxes -- Cr

A. This account shall include the balance of income tax expense resulting from comprehensive interperiod tax allocation which has been deferred to later periods.

B. As other assets which generated the deferred income tax are reclassified from long-term or noncurrent status to current, the appropriate deferred income tax shall be reclassified from account 4350, Noncurrent Deferred Nonoperating Income Taxes -- Cr, to this account.

C. This account shall be credited with the amount being debited to account 7450, Provision For Deferred Nonoperating Income Taxes--Net, in accordance with that account's description and section 661.13.

D. This account shall also include the balance of the income taxes (Federal, State and local) related to current extraordinary items which have been deferred to later periods resulting from comprehensive interperiod tax allocation.

E. As the extraordinary item which generated the deferred income tax becomes current, the appropriate deferred Income tax shall be reclassified from account 4350, Noncurrent Deferred Nonoperating Income Taxes -- Cr, to this account.

F. This account shall be credited or debited with the amount being debited and credited to account 7640, Provision for Deferred Income Tax Effect of Extraordinary Items--Net.

G. The classification of deferred income taxes as current or noncurrent shall follow the classification of the asset or liability that gave rise to the deferred income tax. If there is no related asset or liability, classification shall be based on the expected turn-around.

H. Subsidiary record categories shall be maintained in order that the company may separately report the amounts contained herein that are property related and those that are nonproperty related.

4120. Other Accrued Liabilities

A. This account shall include the amount of wages, compensated absences, interest on indebtedness of the company, dividends on capital stock, and rents accrued to the date for which the balance sheet is made, but not payable until after that date.

B. This account shall be maintained so as to show separately the amount and nature of the items accrued to the date of the balance sheet.

C. Matured rents, dividends and interest shall be included in account 4010.2,

Other Accounts Payable.

D. Interest payable under monthly settlements on short-term loans, advances, and open accounts shall be included in account 4010.2.

4130. Other Current Liabilities

This account shall include liabilities of current character which are not includable in accounts 4010.1 through 4120.

LONG-TERM DEBT

4210. Funded Debt

A. This account shall include the total face amount of unmatured debt, maturing more than one year from date of issue, issued by the company and not retired, and the total face amount of similar unmatured debt of other companies, the payment of which has been assumed by the company, including funded debt the maturity of which has been extended by specific agreement.

B. This account shall include such items as mortgage bonds, collateral trust bonds, income bonds, convertible debt, debt securities with detachable warrants and other similar obligations maturing more than one year from date of issue.

C. In the case of debt securities with detachable warrants this account shall include only the face amount of the security at the time of issuance. The value of detachable warrants shall be charged to either account 4220, Premium on Long-Term Debt, or account 4230, Discount on Long-Term Debt, as appropriate, and credited to account 4520, Additional Paid-In Capital, in the case of capital stock warrants, or retained in this account as a separately identifiable amount in the case of detachable long-term debt warrants. No similar allocation shall be made for the issuance of either convertible debt or debt securities with nondetachable warrants.

D. Subsidiary records shall be maintained for each issue.

E. Securities maturing in one year or less, including securities maturing serially, shall be included in account 4050, Current Maturities--Long-Term Debt.

F. Investment advances, including those represented by notes, shall be included in account 4270, Other Long-Term Debt.

4220. Premium on Long-Term Debt

A. This account shall include the premium associated with all classes of long-term debt. Premium, as applied to securities issued or assumed

by the company, means the excess of the current money value received at their sale over the sum of their book or face amount and interest or dividends accrued at the date of the sale.

B. Amounts included in this account on securities issued after the effective date of January 1, 1988 shall be amortized monthly by the interest method or as directed by the commission and credited to account 7510.3, Amortization of Premium on Long-Term Debt-Credit. Unamortized premium related to reacquired debt shall be disposed of as provided in account 4240, Reacquired Debt. Amounts included in this account for securities issued prior to January 1, 1988 shall continue to be amortized using the straight-line method. (Note also paragraph C of account 4210, Funded Debt.)

C. Subsidiary records shall be maintained to identify the premium attributable to each issue.

4230. Discount on Long-Term Debt

A. This account shall include the discount associated with all classes of long-term debt. Discount, as applied to securities issued or assumed by the company, means the excess of the book or face amount of the securities plus interest or dividends accrued at the date of the sale over the current money value of the consideration received at their sale.

B. Amounts included in this account on securities issued after the effective date of January 1, 1988 shall be amortized monthly by the interest method or as directed by the commission and charged to account 7510.2, Amortization of Discount on Long-Term Debt. Unamortized discount related to reacquired debt shall be disposed of as provided in account 4240, Reacquired Debt. Amounts included in this account for securities issued prior to January 1, 1988 shall continue to be amortized using the straight-line method. (Note also paragraph C of account 4210, Funded Debt.)

C. Subsidiary records shall be maintained to identify the discount attributable to each issue.

4240. Reacquired Debt

A. This account shall include the face amount of debt reacquired prior to maturity that has not been retired. Gain or loss shall be recognized at the time of reacquisition by credits or charges to account 7360, Other Nonoperating Income, except that material gains or losses shall be treated as extraordinary. (See accounts 7610, Extraordinary Income Credits, and 7620, Extraordinary Income Charges.)

B. The gain or loss is the difference between the amount paid upon reacquisition and the face value; plus any unamortized premium less any

related unamortized debt expense and reacquisition costs; or less any unamortized discount, related debt expense and reacquisition costs applicable to the debt redeemed.

C. Reacquisition, with refunding. When the redemption of one issue or series of bonds or other long-term obligation is financed by another issue or series before the maturity date of the first issue, the gains or losses ordinarily recognized in income, as in paragraph A above, may be subject to amortization upon approval by the commission.

4250. Obligations Under Capital Leases

A. This account shall include the noncurrent portion of obligations applicable to property obtained under capital leases.

B. Amounts subject to current settlement shall be included in account 4060, Current Maturities--Capital Leases.

4260. Advances from Affiliated Companies

A. This account shall include the amount of advances from affiliated companies.

B. Amounts due affiliated companies which are subject to current settlement shall be included in account 4010.1 or 4020.1, as appropriate.

C. Separate subaccounts shall be maintained for each affiliate as prescribed in section 661.16(h).

4270. Other Long-Term Debt

This account shall include long-term debt not provided for elsewhere.

OTHER LIABILITIES AND DEFERRED CREDITS

4310. Other Long-Term Liabilities

A. This account shall include amounts accrued to provide for such items as unfunded pensions (if actuarially determined), death benefits, deferred compensation costs and other long-term liabilities not provided for elsewhere.

B. Subsidiary records shall be maintained to identify the nature of the items included herein.

4320. Unamortized Operating Investment Tax Credits--Net

A. This account shall be credited and account 7210, Operating Investment Tax Credits--Net, should be debited with investment tax credits generated from qualified expenditures related to regulated operations which the company defers rather than recognizes currently in income.

B. This account shall be debited and account 7210 credited with a proportionate amount determined in relation to the period of time used for computing book depreciation on the property to which the tax credit relates.

4330. Unamortized Nonoperating Investment Tax Credits -- Net

A. This account shall be credited and account 7410, Nonoperating Investment Tax Credits--Net, shall be debited with investment tax credits generated from qualified expenditures related to other operations which the company has elected to defer rather than recognize currently in income.

B. This account shall be debited and account 7410 credited with a proportionate amount determined in relation to the useful book life of the property to which the tax credit relates.

4340. Noncurrent Deferred Operating Income Taxes -- Cr

A. This account shall include the balance of income tax expense related to noncurrent items from regulated operations which have been deferred to later periods as a result of comprehensive interperiod tax allocation related to timing differences that arise from regulated operations.

B. This account shall be credited and account 7250, Provision for Deferred Operating Income Taxes--Net, shall be debited to reflect the offset for the tax effect of revenues and expenses from regulated operations which have been included in the determination of taxable Income, but which will not be included in the determination of book income.

C. This account shall be debited and account 7250, Provision for Deferred Operating Income Taxes--Net, shall be credited to reflect the reversal of the tax effects initially credited in accordance with paragraph B of this account.

D. As regulated assets which generated the deferred Income tax are reclassified from long-term or noncurrent status to current status, the appropriate deferred income tax shall be reclassified from this account to account 4100, Current Deferred Operating Income Taxes -- Cr.

E. The classification of deferred income taxes as current or noncurrent shall follow the classification of the asset or liability that gave rise to the deferred income tax. If there is no related asset or liability, classification shall be based on the expected turn-around of the tax timing difference.

F. Subsidiary record categories shall be maintained in order that the company may separately report the amounts contained herein that are property related and those that are nonproperty related.

4350. Noncurrent Deferred Nonoperating Income Taxes -- Cr

A. This account shall include the balance of income tax expense (Federal, State and local) that has been deferred to later periods as a result of comprehensive interperiod tax allocation related to

nonoperating timing differences.

B. This account shall be credited and account 7450, Provision for Deferred Nonoperating Income Taxes--Net, shall reflect the offset for the tax effect of items from other operations and extraordinary items and nonoperating items which have been included in the determination of taxable income, but which will not be included in the determination of book income.

C. As other assets or liabilities which generated the deferred income tax are reclassified from long-term or noncurrent status to current status, the appropriate deferred income tax shall be reclassified from this account to account 4110, Current Deferred Nonoperating Income Taxes -- Cr.

D. This account shall also include the balance of the income tax effect (Federal, State and local) related to noncurrent extraordinary items which have been included in the determination of taxable income in a period different from when it is included in the determination of book income, that is, more than one year.

E. This account shall be credited or charged with the contra amount recorded to account 7640, Provision for Deferred Income Tax Effect of Extraordinary Items--Net, in accordance with section 661.13 of this Title.

F. As the extraordinary item which generated the deferred income tax becomes current, the appropriate deferred income tax shall be reclassified from this account to account 4110, Current Deferred Nonoperating Income Taxes -- Cr.

G. The classification of deferred Income taxes as current or noncurrent shall follow the classification of the asset or liability that gave rise to the deferred income tax. If there is no related asset or liability, classification shall be based on the expected turn-around of the tax timing difference.

H. Subsidiary record categories shall be maintained in order that the company may separately report the amounts contained herein that are property related and those that are nonproperty related.

4360. Other Deferred Credits

This account shall include the amount of all deferred credits not provided for elsewhere, such as amounts awaiting adjustment between accounts; and revenue, expense, and income items in suspense. (See also section 661.9. of this Title.)

4370. Other Jurisdictional Liabilities and Deferred Credits -- Net

This account shall include the cumulative impact on liabilities and deferred credits of the jurisdictional ratemaking practices which vary

from those of this commission. All entries recorded in this account shall be recorded net of any applicable Income tax effects and shall be supported by appropriate subsidiary records where necessary as provided for in section 661.3(e) of this Title.

STOCKHOLDERS' EQUITY

4510.1. Capital Stock -- Common

4510.2. Capital Stock -- Preferred

A. This account shall include the par value, stated amount, or in the case of no-par stock, the amount received for capital stock issued and outstanding.

B. Subsidiary records shall be maintained so as to show the amount of stocks without par value and with par value, classified according to preferences in distribution of dividends or assets.

C. This account shall be charged with the book amount of any stock retired.

D. Before recording journal entries which propose to spread upon the company's books to record the reacquirement of capital stock or other securities issued or assumed by the company under a plan for the issuance in exchange of the company's securities, the company shall present a statement indicating the plan of proposed accounting to this commission for consideration and approval. Such statement shall give complete information concerning the plan of exchange, the authority of the regulatory body with respect thereto, if any, and the basis upon which the amounts have been determined.

E. Before recording journal entries which propose to spread upon the company's books to record the issuance or assumption by the company of nonpar capital stock or appropriations of retained earnings for transfer to nonpar capital stock accounts, the company shall present the plan of accounting to this commission for consideration and approval. Such statement shall give complete information with respect to the basis upon which the amounts to be recorded have been determined.

4520. Additional Paid-in Capital

A. This account shall include the difference between the net proceeds (including premium and stock issuance expense) received from the issuance of capital stock and the amount includable in accounts 4510.1, Capital Stock-Common, and 4510.2, Capital Stock Preferred, unless such difference results in a debit balance for that class of stock, in which case the amount shall be charged to account 4550.8, Adjustments to Retained Earnings.

B. This account shall also include gains arising from the retirement and cancellation of capital stock and gains arising from the

reacquisition and resale of the company's capital stock. Losses from the retirement and cancellation of capital stock and losses from the reacquisition and sale of the company's capital stock shall be charged to this account to the extent that there exist credits in this account for the same class of stock; otherwise to account 4550.8, Adjustments to Retained Earnings.

4530. Treasury Stock

A. This account shall include the cost of the company's own capital stock which has been issued and subsequently reacquired but not retired or resold.

B. Gains and losses on the sale of treasury stock shall be included in account 4520, Additional Paid-in Capital. Losses shall be charged to account 4520 only to the extent that there exists credits from previous sales or retirements of the same class of stock; otherwise, to retained earnings. The gain or loss on the sale of treasury stock shall be the difference, if any, between the cost of the treasury stock when reacquired and the amount actually received from the sale less commissions and other expenses of making the sale. Upon sale or other disposition, the amount credited to this account shall be exactly the same as the amount which was debited to this account when the treasury stock was acquired.

4540. Other Capital

This account shall include amounts which are credits arising from the donation by stockholders of the company's capital stock, capital recorded upon the reorganization or recapitalization of the company and temporary declines in the value of marketable securities held for investment purposes. (See also account 1401.1, Investment in Affiliated Companies.)

4550.1. Appropriated Retained Earnings

A. This account shall include the amount of retained earnings which has been appropriated or set aside for specific purposes.

B. Separate subaccounts shall be maintained under such titles as will designate the purpose for which each appropriation was made.

4550.2. Unappropriated Undistributed Affiliate Earnings

This account shall include the balance, either debit or credit, of undistributed retained earnings of affiliated companies accounted for on the equity method since their acquisition. When dividends are received from affiliated companies relating to amounts included in this account, this account shall be debited and account 4550.3, Unappropriated Retained Earnings, credited.

4550.3. Unappropriated Retained Earnings

A. This account shall include the balances, either debit or credit, of unappropriated retained earnings arising from earnings of the utility. This account shall not include any amounts representing the undistributed earnings of subsidiary companies.

B. The following group of accounts (4550.4 to 4550.8) shall be maintained throughout the year to show net changes in account 4550.3, Unappropriated Retained Earnings, during the calendar year. No entries shall be made directly to account 4550.3, except as provided for in account 4550.2, Unappropriated Undistributed Affiliate Earnings. At the end of each calendar year, the balance of accounts 4550.4 to 4550.8, inclusive, shall be closed into account 4550.3.

C. 4550.4 Balance Transferred from income. This account shall include the net credit or debit transferred from income for the year, after the exclusion of the company's share in the earnings or losses of affiliated companies accounted for under the equity method. (Note also account 4550.2, Unappropriated Undistributed Affiliated Earnings.)

D. 4550.5 Appropriations of Retained Earnings. This account shall include all appropriations of retained earnings required under the terms of mortgages, deeds of trust, order of courts or by action of regulatory authorities, contracts, or other agreements, and retained earnings appropriated at the company's discretion.

E. 4550.6 Dividends Declared--Preferred Stock

4550.7. Dividends Declared--Common Stock

(1) These accounts shall include amounts declared payable out of retained earnings as dividends on actually outstanding capital issued by the company.

(2) Dividends shall be segregated for each class and series of capital stock as to those payable in cash, stock and other forms. If not payable in cash, the medium of payment shall be described with sufficient particularity to identify it.

F. 4550.8 Adjustments to Retained Earnings.

(1) This account shall, with prior commission approval (see section 661.17(b) of this Title), include significant nonrecurring transactions accounted for as prior period adjustments, as follows:

(a) Correction of an error in the financial statements of a prior year.

(b) Adjustments that result from realization of income tax benefits of preacquisition operating loss carry forwards of purchased subsidiaries.

All other items of profit and loss recognized during a year shall be included in the determination of net income for that year.

(2) Adjustments, charges, or credits due to losses on reacquisition,

resale or retirement of the company's own capital stock shall be included in this account. (See account 4520, Additional Paid-in Capital, for the treatment of gains.)

LOCAL NETWORK SERVICES REVENUES

5000. Basic Local Service Revenue

This account number shall be used to summarize for reporting purposes the contents of accounts 5001 through 5004.

5001. Basic Area Revenue

A. This account shall include monthly revenue derived from the provision of basic local area message services such as flat-rate services and measured services as well as local usage charges not included in basic monthly rates. Included is revenue derived from nonoptional extended area services. Also included is revenue derived from the billed or guaranteed portion of semipublic services and locality mileage charges.

B. Revenue derived from charges for nonpublished numbers or additional and bold-faced listings in the alphabetical section of the company's telephone directories shall be included in account 5230, Directory Revenue.

C. Subsidiary record categories shall be maintained in order that the company may separately report the amounts that are contained herein that relate to regional calling plans and local rate plans.

Note: Message revenue from public and semipublic coin telephones shall be credited to account 5010, Public Telephone Revenue.

5002. Optional Extended Area Revenue

This account shall include total revenue derived from the provision of optional extended area service.

5003. Cellular Mobile Revenue

This account shall include message revenue derived from cellular mobile telecommunications systems connected to the public switched network placed between mobile units and other stations within the mobile

service area.

5004. Other Mobile Services Revenue

A. This account shall include message revenue derived from general radio telecommunications systems connected to the public switched network placed between mobile units and other stations within the mobile service area, as well as revenue from mobile radio paging, mobile dispatching, and signaling services.

B. Revenue from private mobile telephone services which do not have access to the public switched network shall be included in account 5264, Other Incidental Regulated Revenue.

5010. Public Telephone Revenue

This account shall include message revenue (e. g., coin paid) and other revenue derived from public and semipublic telephone services provided within the basic service area.

5040. Local Private Line Revenue

This account shall include revenue derived from local services that involve dedicated circuits, private switching arrangements, and/or predefined transmission paths, whether virtual or physical, which provide communications between specific locations (e.g., point-to-point communications). It includes revenue from subvoice grade, voice grade, audio and video program grade, digital transmission and local private network switching as well as the revenue from administrative and operational support services associated with private network services and facilities (e.g., charges for company directed testing, expedited installation, and service restoration priority).

5050. Customer Premises Revenue

A. This account shall include revenue derived from tariffed information origination/termination plant. Included is revenue derived from the provision under leasing arrangements of tariffed customer premises equipment (CPE), terminal equipment, station apparatus and large private branch exchanges as well as tariffed nonrecurring charges related solely to station apparatus. Also included are all tariffed charges for customer premises activities and facilities not related solely to station apparatus.

B. Subsidiary record categories shall be maintained to segregate monthly recurring revenues and nonrecurring revenues such as charges for installation of customer premises wiring or jacks, moves and relocations of premises wiring and premise wiring terminations, locating and repairing trouble faults on the customers side of the demarcation point.

5060. Other Local Exchange Revenue

A. This account shall include revenue from the provision of secondary

features which are integrated with the telecommunications network such as call forwarding, call waiting and touchtone line service. Also included is revenue derived from the provision of public announcement and other record message services, directory assistance and other call completion services (excluding operator assisted basic long distance calls), as well as revenue derived from central office related service connection and termination charges, and other nonpremise customer specific charges associated with public network services. This account shall also include local revenue not provided for in other accounts.

B. Subsidiary record categories shall be maintained in order that the company may report separately the amounts contained herein that relate to secondary features (i.e., call forwarding, call waiting, touchtone service), operator call completion services, non-recurring charges for central office related installations, moves and changes, recorded announcement services, tax surcharges and Federal transfer surcharges, and other exchange revenues (e.g., Centrex, Pathway services).

Note: Bid revenues associated with mass announcement services shall be included in account 5264, Other Incidental Regulated Revenues.

5069. Other Local Exchange Revenue Settlements

This account shall include the charges and credits resulting from contractual revenue pooling and/or sharing agreements for tariffed local network services only when they are not separately identifiable by local network services revenue accounts in the settlement process. (See also section 665.5 of this Title.) To the extent that the charges and credits resulting from a settlement process can be identified by Local Network Services Revenue account they shall be recorded in the applicable account.

NETWORK ACCESS SERVICES REVENUES

5080. Network Access Revenue

A. This account number shall be used to summarize for reporting purposes the contents of accounts 5081 through 5084. It shall include revenue derived from the provision of exchange access services to an interexchange carrier or to an end user of telecommunications service beyond the exchange carrier's network.

B. Accounts 5081 through 5083 are for federally tariffed access charges while account 5084 is to be used for State tariffed access charges.

5081. End User Revenue

This account shall contain the federally tariffed monthly flat-rate charge assessed upon end users.

5082. Switched Access Revenue

A. This account shall consist of federally tariffed charges assessed to interexchange carriers for access to local exchange facilities.

B. Subsidiary record categories shall be maintained in order that the company may separately report the amounts contained herein that relate to limited pay telephone, carrier common line, line termination, local switching, intercept, information, common transport and dedicated transport.

5083. Special Access Revenue

A. This account shall include all federally tariffed charges assessed for other than end user or switched access charges referred to in account 5081, End User Revenue, and account 5082, Switched Access Revenue.

B. Subsidiary record categories shall be maintained in order that the company may separately report the amounts contained herein that relate to recurring charges, non-recurring charges and surcharges.

5084. State Access Revenue

A. This account shall include all State tariffed charges assessed by local exchange carriers upon interexchange carriers and end users for access to the local exchange network for intrastate telecommunications.

B. Billing and collections services provided under exchange access tariffs shall be included in account 5270.1, Interstate Billing and Collection Revenues, or account 5270.2, Intrastate Billing and Collection Revenues.

C. Subsidiary record categories shall be maintained in order that the company may separately report the amounts contained herein that relate to end user revenues, switched access revenues and special access revenues.

LONG DISTANCE NETWORK SERVICES REVENUES

5100. Long Distance Message Revenue

This account shall be used for revenue derived from message services that terminate beyond the basic local service area of the originating wire center and are individually priced. This includes those message services which utilize the public long distance switching network and the basic subscriber access line. (See also account 5111, Long Distance Inward-Only Revenue, and account 5112, Long Distance-Outward Only Revenue.) It also includes those long distance calls placed from mobile and public telephones, as well as any charges for operator assistance or special billing directly related to the completion of a specific call. This account shall also include revenue derived from message services offered under calling plans (discounted long distance) which do not utilize dedicated access lines, as well as those priced at the basic

long distance rates where a discounted toll charge is on a per message basis. Any revenue derived from monthly or one-time charges for obtaining calling plan services shall be included in this account. Subsidiary record categories shall be maintained so that revenues from optional calling rate plans may be reported separately.

5110. Unidirectional Long Distance Revenue

This account number shall be used to summarize for reporting purposes the contents of accounts 5111 and 5112. It shall include revenue derived from long distance services which permit unidirectional calls to a subscriber from specified service areas or which permit the subscriber to place telephone calls from one location to other specified services areas. It shall also include revenue derived from toll calling plans which embody flat-rate or measured time toll service. (See also account 5100, Long Distance Message Revenue.)

5111. Long Distance inward-Only Revenue

This account shall include the revenue derived from long distance services which permit unidirectional calls to a subscriber from specified services areas (multipoint-to-point service). These calls require the use of dedicated access lines connecting a subscriber's premises and a designated central office. These dedicated access lines are generally separate from those required for the subscriber to place outward calls. The call is billed to the subscriber even though it is generally initiated by the subscriber's customer or correspondent.

5112. Long Distance Outward-Only Revenue

This account shall include revenue derived from long distance services which permit the subscriber to place telephone calls from one location to other specified service areas (point-to-multipoint service). These calls are completed without operator assistance and require the use of a dedicated access line. The dedicated access line is generally separate from those required for inward message services and cannot be used to place calls within the basic local service area or calls outside the selected service areas. Outward calls are screened and blocked to determine whether the calls are within an authorized service area.

5120. Long Distance Private Network Revenue

A. This account number shall be used to summarize for reporting purposes the contents of accounts 5121 through 5129. It shall include revenue derived from services extending beyond the basic service area that involve dedicated circuits, private switching arrangements, and/or predefined transmission paths, whether virtual or physical, which provide communications between specific locations (e.g., point-to-point communications).

B. Service connection charges, termination charges, rearrangements and changes, etc., shall be included in each account to which they apply. Revenue derived from associated administrative and operational support services shall be included in account 5128, Other Long Distance Private Network Revenue.

5121. Subvoice Grade Long Distance Private Network Revenue

This account consists of revenue from narrow-band analog private network circuits and facilities furnished exclusively for record forms of communications, such as teletypewriter, teletypesetter, telewriter, ticker, Morse, signaling, remote metering, and supervisory services.

5122. Voice Grade Long Distance Private Network Revenue

This account consists of revenue from private network circuits and facilities (including multipurpose wide-band) which provide voice grade services for the transmission of analog signals. It includes revenue from services such as voice, data and telephoto communication, as well as remote metering, supervisory control, miscellaneous signaling and channels furnished for the purpose of extending customer-provided communications systems. It includes revenue from the provision of facilities between customer premises and (1) a serving office, (2) a carrier distribution point or (3) an extension distribution channel, except when furnished as a subscriber access line under an unidirectional long distance service (in which case the revenue should be included in account 5111, Long Distance Inward-Only Revenue, or account 5112, Long Distance Outward-Only Revenue).

5123. Audio Program Grade Long Distance Private Network Revenue

A. This account consists of revenue from private network circuits and facilities furnished for audio program transmission purposes, such as radio broadcasting, sound recording (wired music) and loud speaker services. It includes revenue from the provision of facilities for the transmission of analog signals between customer premises and (1) a serving office, (2) a carrier distribution point or (3) an extension distribution channel furnished in connection with such services. It also includes revenue from facilities furnished to carry the audio portion of a television program if furnished under separate audio rates.

B. If the rate for television program services includes both the picture and sound portion of the transmission, the revenue shall be included in account 5124, Video Program Grade Long Distance Private Network Revenue.

5124. Video Program Grade Long Distance Private Network Revenue

This account consists of revenue from private network circuits and facilities furnished for television program transmission purposes, such

as commercial broadcast and educational or private television services. It includes revenue from the provision of facilities for the transmission of analog signals between customer premises and (1) a serving office, (2) a carrier distribution point or (3) an extension distribution channel furnished in connection with such services. It also includes revenue from both the picture and sound portions of transmission for television program service when provided under a combined rate schedule.

5125. Digital Transmission Long Distance Private Network Revenue

This account consists of revenue from the provision of circuits and facilities for the transmission of digital signals only.

5126. Long Distance Private Network Switching Revenue

This account consists of revenue derived from the provision of common user channels and switching capabilities used for the transmission of telecommunication signals between three or more points in the network. Also included is revenue derived from the provision of basic switching and transfer arrangements used to connect private line channels.

5128. Other Long Distance Private Network Revenue

This account consists of revenue from administrative and operation support services associated with private network services and facilities, (e.g., charges for company-directed testing, expedited installation, and service restoration priority). Also included is other private network services revenue not provided for in other accounts.

5129. Other Long Distance Private Network Revenue Settlements

This account shall include the charges and credits resulting from contractual revenue pooling and/or sharing agreements for tariffed long distance private network services only when they are not identifiable by private network services revenue account in the settlement process. (See also section 665.5 of this Title.) To the extent that the charges and credits resulting from a settlement process can be identified by private network services revenue account, they shall be recorded in the applicable account.

5160. Other Long Distance Revenue

This account shall include long distance revenues not provided for elsewhere. 5169 Other Long Distance Revenue Settlements

This account shall include the charges and credits resulting from contractual revenue pooling and/or sharing agreements for tariffed long distance public network services only when they are not identifiable by long distance public network services revenue accounts in the settlement process. (See also section 665.5 of this Title.) To the extent that the charges and credits resulting from a settlement process can be

identified by long distance public network services revenue account they shall be recorded in the applicable account.

MISCELLANEOUS REVENUES

5230. Directory Revenue

This account shall include revenue derived from alphabetical and classified sections of directories and shall also include fees paid by other entities for the right to publish the company's directories. Items to be included are:

- (1) all revenue derived from the classified section of the directories;
- (2) revenue from the sale of new telephone directories whether they are the company's own directories or directories purchased from others. This shall also include revenue from the sale of specially bound telephone directories and special telephone directory covers;
- (3) amounts charged for additional and boldface listings, marginal displays, inserts, and other advertisements in the alphabetical section of the company's telephone directories; and
- (4) charges for unlisted and nonpublished telephone numbers. A subsidiary record category shall be maintained so that these charges may be reported separately.

5240. Rent Revenue

A. This account shall include revenues (including taxes when borne by the lessee) derived from the rental or subrental to others of telecommunications plant furnished apart from telecommunications services rendered by the company. It includes revenue from the rent of such items as space in conduit, pole line space for attachments, and any allowance for return on property used in joint operations and shared facilities agreements.

B. The expense of maintaining and operating the rented property, including depreciation and insurance, shall be included in the appropriate operating expense accounts. Taxes applicable to the rented property shall be included by the owner of the rented property in appropriate tax accounts.

C. When land or buildings are rented on an incidental basis for nontelecommunications use the rental and expenses are included in account 7360, Other Nonoperating Income.

5250. Corporate Operations Revenue

This account shall include revenue derived from services rendered to other companies under a license agreement, general services contract, or other arrangement providing for the furnishing of general accounting, financial, legal, patent, and other general services associated with the

provision of regulated telecommunications services. (See also accounts 5230, 5270.1 and 5270.2.)

5260. Miscellaneous Revenue

This account number shall be used to summarize for reporting purposes the contents of accounts 5261 through 5269.

5261. Special Billing Arrangements Revenue

This account shall include revenue derived from the provision, either under tariff or through contractual arrangements, of special billing information to customers in the form of magnetic tapes, cards or statements. Special billing information provides detail in a format and/or at a level of detail not normally provided in the standard billing rendered for the regulated telephone services utilized by the customer.

5262. Customer Operations Revenue

This account shall include revenue derived from the performance of customer operations services for others incident to the company's regulated telecommunications operations which are not provided for elsewhere. (See also sections 665 and 661.4(e) of this Title.)

5263. Plant Operations Revenue

A. This account shall include revenue derived from contract services (plant maintenance) performed for others incident to the company's regulated telecommunications operations. This includes revenue from the incidental performance of nontariffed operating and maintenance activities for others which are similar in nature to those activities which are performed by the company in operating and maintaining its own telecommunications plant facilities.

B. The records supporting the entries in this account shall be maintained with sufficient particularity to identify the revenue and associated Plant Specific Operations Expenses related to each undertaking.

C. This account does not include revenue related to the performance of operation or maintenance activities under a joint operating agreement. (See also account 5240.)

5264. Other Incidental Regulated Revenue

A. This account shall include the other incidental regulated revenue not provided for in other revenue accounts. Such revenues to be included are:

- (1) collection overages (collection shortages shall be charged to account 6623.2, Customer Services-Billing and Collections;
- (2) unclaimed refunds for telecommunications services when not subject to escheats;

(3) charges (penalties) imposed by the company for customer checks returned for nonpayment;

(4) discounts allowed customers for prompt payment;

(5) late-payment charges;

(6) revenue from private mobile telephone services which do not have access to the public switched network; and

(7) other incidental revenue not provided for elsewhere in other revenue accounts including bid revenues associated with mass announcement services.

B. Any definitely known amounts of losses of revenue collections due to fire or theft, (a) at customers' coin-box stations, (b) at public or semipublic telephone stations, (c) in the possession of collectors en route to collection offices, (d) on hand at collection offices, and (e) between collection offices and banks shall be charged to subaccount 6728.5, Other General and Administrative, Miscellaneous.

5269. Other Revenue Settlements

This account shall include the charges and credits resulting from contractual revenue pooling and/or sharing agreements for activities included in the miscellaneous revenue accounts only when they are not identifiable by miscellaneous revenue account in the settlement process. (See also section 665.5 of this Title.) To the extent that the charges and credits resulting from a settlement process can be identified by miscellaneous revenue accounts they shall be recorded in the applicable account.

5270.1. Interstate Billing and Collection Revenue

This account shall include revenues for federally tariffed charges or charges under contractual arrangements by local exchange carriers to interexchange carriers for billing and/or collecting interstate and international revenues. The charges shall include the custom billing process, account collections, billing information services, account establishment and maintenance and account investigation.

5270.2. Intrastate Billing and Collection Revenue

This account shall include revenues for State tariffed charges or charges under contractual arrangements by local exchange carriers to interexchange carriers for billing and/or collecting intrastate and international revenues. The charges shall include the custom billing process, account collections, billing information services, account establishment and maintenance and account investigation.

5280. Nonregulated Operating Revenue

A. This account shall include revenues derived from a nonregulated activity involving the common or joint use of assets or resources in the

provision of regulated and nonregulated products or services which are not provided for elsewhere in this system of accounts.

B. This account shall be debited and regulated revenue accounts shall be credited at tariffed rates when tariffed services are provided to nonregulated activities that are accounted for as prescribed in section 661.14(c).

C. Separate subsidiary record categories shall be maintained for each nonregulated revenue item recorded in this account.

UNCOLLECTIBLE REVENUES

5300. Uncollectible Revenue

This account shall be used to summarize for reporting purposes the contents of accounts 5301 and 5302.

5301. Uncollectible Revenue--Telecommunications

A. This account shall be charged with amounts concurrently credited to account 1180, Telecommunications Accounts Receivable or account 1181, Accounts Receivable Allowance--Telecommunications when such allowance is maintained.

B. The following subaccounts shall be maintained:

5301.1. Interstate Uncollectible Revenues

5301.2. Intrastate Uncollectible Revenues

C. Subsidiary records shall be maintained for subaccount 5301.2 in order to segregate uncollectible revenue amounts related to nonregulated activities and transactions with affiliates.

5302. Uncollectible Revenue--Other

A. This account shall be charged with amounts concurrently credited to account 1190.1, Accounts Receivable From Affiliated Companies or 1190.2, Other Accounts Receivable or account 1191, Accounts Receivable Allowance Other and Affiliated, when such allowance is maintained.

B. Subsidiary record categories shall be maintained in order to segregate the amounts herein that relate to affiliates and nonaffiliates.

PLANT SPECIFIC OPERATIONS EXPENSE

6110. Network Support Expenses

A. This account number shall be used by telephone companies to summarize for reporting purposes the contents of accounts 6112 through 6116.

B. For accounts 6112 through 6116.

(1) Depreciation expense associated with the corresponding plant accounts shall be charged to account 6561, Depreciation Expense--Telecommunications Plant in Service.

(2) Insurance premiums paid specifically for protection against loss or damage in connection with construction or removal of telephone plant

shall be charged to the appropriate construction account; insurance costs for general and administrative activities shall be charged to account 6728, Other General and Administrative.

6112. Motor Vehicle Expense

A. This account shall include costs of fuel, lubrication, license and inspection fees, washing, repainting, and minor accessories. Also included are the costs of personnel whose principal job is operating motor vehicles, such as chauffeurs and shuttle bus drivers. The costs of users of motor vehicles whose principal job is not the operation of motor vehicles shall be charged to accounts appropriate for the activities performed.

B. Credits shall be made to this account for amounts transferred to Construction, to accumulated depreciation accounts for cost of removal, and/or to other Plant Specific Operations Expense accounts. These amounts shall be computed on the basis of direct labor hours. (See also paragraph 666.6 (a) (5) of this Title.)

6113. Aircraft Expense

A. This account shall include such costs as aircraft fuel, flight crews, mechanics and ground crews, licenses and inspection fees, washing, repainting, and minor accessories.

B. Credits shall be made to this account for amounts transferred to Construction, to accumulated depreciation accounts for cost of removal, and/or to other Plant Specific Operations Expense accounts. These amounts shall be computed on the basis of direct labor hours. (See also paragraph 666.6 (a) (5) of this Title.)

6114. Special Purpose Vehicles Expense

A. This account shall include such costs as fuel, licenses and inspection fees, washing, repainting, and minor accessories. The costs of operators of this equipment shall be charged to accounts appropriate for the activities performed.

B. Credits shall be made to this account for amounts transferred to Construction, to accumulated depreciation accounts for cost of removal, and/or to other Plant Specific Operations Expense accounts. These amounts shall be computed on the basis of direct labor hours. (See also paragraph 666.6 (a) (5) of this Title.)

6115. Garage Work Equipment Expense

This account shall be charged only with costs incurred in connection with the garage work equipment itself. The costs of using this equipment to maintain motor vehicles, special purpose vehicles, or other work equipment shall be charged to accounts 6112, Motor Vehicle Expense, 6114, Special Purpose Vehicles Expense, or 6116, Other Work Equipment

Expense, as appropriate.

6116. Other Work Equipment Expense

A. This account shall be charged only with costs incurred in connection with this work equipment itself. The costs of operators of this equipment shall be charged to accounts appropriate for the activities performed.

B. Credits shall be made to this account for amounts transferred to Construction, to accumulated depreciation accounts for cost of removal, and/or to other Plant Specific Operations Expense accounts. These amounts shall be computed on the basis of direct labor hours. (See also paragraph 666.6 (a) (5) of this Title.)

6120. General Support Expenses

This account number shall be used to summarize for reporting purposes the contents of accounts 6121 through 6124.

6121. Land and Building Expense

A. This account shall include expenses associated with land and buildings (excluding amortization of leasehold improvements). This account shall also include janitorial service, cleaning supplies, water, sewage, fuel and guard service, and electrical power.

B. The cost of electrical power used to operate the telecommunications network shall be charged to account 6531, Power Expense, and the cost of separately metered electricity used for operating specific types of equipment, such as computers, shall be charged to the expense account appropriate for such use.

6122. Furniture and Artworks Expense

A. This account shall include expenses associated with furniture and artworks.

B. Expenses of furniture having a specific function or design, so that the original cost is recorded in the Central Office Asset accounts or other Telephone Plant in Service accounts, shall be recorded in the corresponding Plant Specific Operations Expense accounts.

6123. Office Equipment Expense

A. This account shall be charged only with costs incurred in connection with the office equipment itself. The costs of operators of this equipment shall be charged to accounts appropriate for the activities performed.

B. Include in this account expenses associated with company internal use communications equipment.

6124. General Purpose Computers Expense

This account shall include costs of personnel whose principal job is the physical operation of general purpose computers and the maintenance

of operating systems. This excludes the cost of preparation of input data or the use of outputs which are chargeable to the accounts appropriate for the activities being performed. Also excluded are costs incurred in planning, developing, testing, implementing, and maintaining data bases and application systems for general purpose computers. (See also account 6724, Information Management.) Separately metered electricity for general purpose computers shall also be included in this account.

6210. Central Office Switching Expenses

This account number shall be used to summarize for reporting purposes the contents of accounts 6211 through 6215.

6211. Analog Electronic Expense

This account shall include expenses associated with analog electronic switching.

6212. Digital Electronic Expense

This account shall include expenses associated with digital electronic switching.

6215. Electro-Mechanical Expense

A. This account shall include expenses associated with electro-mechanical switching.

B. Subsidiary record categories shall be maintained as provided in account 2215.

6220. Operator Systems Expense

A. This account shall include expenses associated with account 2220, Operator Systems.

B. This account shall include the costs of: routine inspection and maintenance of operator systems equipment; maintenance of operator systems equipment in the course of clearing trouble; and other maintenance of such equipment.

Note: The cost of operators of this equipment shall be charged to the accounts appropriate for the activities performed (see accounts 6621, Call Completion Services; 6622.1, Number Services-Directory Assistance; and 6623.1, Customer Services-Service Order Processing and Instruction; and 6623.2, Customer Services-Billing and Collections.

C. This account shall include the cost of rearrangements and changes of operator systems equipment.

D. This account shall include the cost, including service remuneration charges, of shop repairs and conversions of operator systems central office equipment for reuse; also includes salvage adjustments for credits for material, the salvage value of which cannot be practicably allocated.

6230. Central Office Transmission Expenses

This account number shall be used to summarize for reporting purposes the contents of accounts 6231.1 through 6232.

6231. Radio Systems Expense

A. This account shall include expenses associated with account 2231.

B. The following subaccounts shall be maintained:

6231.1. Satellite and Earth Station Facilities

6231.2. Other Radio Facilities

6232. Circuit Equipment Expense

A. This account shall include expenses associated with account 2232.

B. Subsidiary records shall be kept in order that the company may report separately the amounts contained herein that relate to digital and analog.

6310. Information Origination/Termination Expenses

This account number shall be used to summarize for reporting purposes the contents of accounts 6311 through 6362.

6311. Station Apparatus Expense

A. This account shall include expenses associated with station apparatus. Expenses associated with company internal use communication equipment shall be recorded in account 6123, Office Equipment Expense.

B. This account shall include maintenance, installation and removal costs of station apparatus offered under state regulated tariff.

C. Subsidiary records shall be kept to distinguish costs by equipment categories as specified in account 2311.

6321. Customer Premises Wiring Expense

This account shall include the cost of repairing, disconnecting, and reconnecting customer premises wiring included in account 2321.

6341. Large Private Branch Exchange Expense

A. This account shall include maintenance expenses associated with large private branch exchanges, until such time as the associated asset is transferred out of the regulated accounts.

B. Expenses associated with company internal use of communication equipment shall be recorded in account 6123, Office Equipment Expense.

6351. Public Telephone Terminal Equipment Expense

A. This account shall include expenses associated with public telephone terminal equipment.

B. The original costs of installing public telephone terminal equipment as well as the installation costs of replacing a public telephone are chargeable to this account. (See account 2351, Public Telephone Terminal Equipment)

6362. Other Terminal Equipment Expense

This account shall include expenses associated with other terminal equipment.

6410. Cable and Wire Facilities Expenses

This account shall be used to summarize for reporting purposes the contents of accounts 6411 through 6441.

6411. Poles Expense

This account shall include expenses associated with poles.

6421. Aerial Cable Expense

A. This account shall include expenses associated with aerial cable.

B. Subsidiary record categories shall be maintained as provided in account 2421.

6422. Underground Cable Expense

A. This account shall include expenses associated with underground cable.

B. Subsidiary record categories shall be maintained as provided in account 2422.

C. The costs incurred to reconnect, repair, rearrange or replace drop and block wire, including the associated protector, served by either buried cable or underground cable shall be included in account 6423, Buried Cable Expense.

6423. Buried Cable Expense

A. This account shall include expenses associated with buried cable.

B. Subsidiary record categories shall be maintained as provided in account 2423.

C. This account shall also include the costs incurred to reconnect, repair, rearrange, or replace drop and block wires, including the associate protector, served either by buried cable or underground cable.

6424. Submarine Cable Expense

A. This account shall include expenses associated with submarine cable.

B. Subsidiary record categories shall be maintained as provided in account 2424.

6425. Deep Sea Cable Expense

A. This account shall include expenses associated with deep sea cable.

B. Subsidiary record categories shall be maintained as provided in account 2425.

6426. Intrabuilding Network Cable Expense

A. This account shall include expenses associated with intrabuilding network cable.

B. Subsidiary record categories shall be maintained as provided in account 2426.

6431. Aerial Wire Expense

A. This account shall include expenses associated with aerial wire.

B. Disconnection, reconnection, repair, rearrangement, or replacement of drop and block wires served by aerial wire, and the plant assignment of those wires, shall be charged to account 6421, Aerial Cable Expense.

6441. Conduit Systems Expense

This account shall include expenses associated with conduit systems.

PLANT NONSPECIFIC OPERATIONS EXPENSE

6510. Other Property, Plant and Equipment Expenses

This account number shall be used by telephone companies to summarize for reporting purposes the contents of accounts 6511 and 6512.

6511. Property Held for Future Telecommunications Use Expense

This account shall include expenses associated with property held for future telecommunications use in account 2002. This account shall not include depreciation or taxes associated with property held for future use. (Note accounts 6562 and 7240.)

6512. Provisioning Expense

A. This account shall include costs incurred in provisioning material and supplies, including office supplies. This includes receiving and stocking, filling reacquisitions from stock, monitoring and replenishing stock levels, delivery of material, storage, loading or unloading and administering the reuse or refurbishment of material. Also included are adjustments resulting from the annual or more frequent inventory of material and supplies.

B. Credits shall be made to this account for amounts transferred to construction, plant specific operations expense and/or accumulated depreciation accounts. These costs are to be cleared by adding to the cost of material and supplies a suitable loading charge. (See also section 666.6 (a) (5) of this Title.)

6530. Network Operations Expenses

This account number shall be used by telephone companies to summarize for reporting purposes the contents of accounts 6531 through 6535.

6531. Power Expense

This account shall include the cost of electrical power used to operate the telecommunications network.

Note: The cost of power produced for house service purposes shall be charged to account 6121, Land and Building Expense.

6532. Network Administration Expense

This account shall include costs incurred in network administration. This includes such activities as controlling traffic flow, administering traffic measuring and monitoring devices, assigning equipment and load

balancing, collecting and summarizing traffic data, administering trunking, and assigning interoffice facilities and circuit layout work.

6533. Testing Expense

A. This account shall include costs incurred in testing telecommunications facilities from a testing facility (test desk or other testing system) to determine the condition of plant on either a routine basis or prior to assignment of the facilities; receiving, recording and analyzing trouble reports; testing to determine the nature and location of reported trouble condition; and dispatching repair persons or otherwise initiating corrective action. (Note also section 666.2(c) of this Title.)

B. Subsidiary record categories shall be maintained to distinguish between amounts for the handling of trouble reports and amounts for other maintenance expenses.

6534. Plant Operations Administration Expense

A. This account shall include costs incurred in the general administration of plant operations. This includes supervising plant operations (except as specified in section 666.2 (c) of this Title); planning, coordinating and monitoring plant operations; and performing staff work such as developing methods and procedures, preparing and conducting training (except on-the-job training) and coordinating safety programs. (Note also section 663.3(b) (13) of this Title.)

B. Credits shall be made to this account for amounts transferred to construction and/ or accumulated depreciation accounts. These amounts shall be computed on the basis of direct labor hours. (See section 663.3 (b) (2) of this Title.)

6535. Engineering Expense

A. This account shall include costs incurred in the general engineering of the telecommunications plant which are not directly chargeable to an undertaking or project. This includes developing input to the fundamental planning process, performing preliminary work or advance planning in connection with potential undertakings, and performing special studies of an engineering nature.

B. Credits shall be made to this account for amounts transferred to construction and/ or accumulated depreciation accounts. These amounts shall be computed on the basis of direct labor hours. (See section 663.3(b) (2) of this Title.)

6540. Access Expense

A. This account shall include amounts paid by interexchange carriers or other exchange carriers to another exchange carrier for the provisions of exchange access services and shall be maintained by the

following subaccounts:

6540.1. Interstate Carrier's Carrier Expense

6540.2. Intrastate Carrier's Carrier Expense

B. 6540.1. Interstate Carrier's Carrier Expense

This subaccount shall include the federally tariffed access expenses incurred by the interexchange carriers for access to the local exchange carriers' facilities.

C. 6540.2. Intrastate Carrier's Carrier Expense

This subaccount shall include the state tariffed access expenses incurred by the interexchange carriers for access to the local exchange carriers' facilities.

Note: Carriers are required to maintain supporting documentation in such a manner as to be able to readily identify each tariffed element of interstate and intrastate carrier's carrier expense.

6560. Depreciation and Amortization Expenses

This account shall be used by telephone companies to summarize for reporting purposes the contents of accounts 6561 through 6565.

6561. Depreciation Expense--Telecommunications Plant in Service

A. This account shall include the depreciation expense of capitalized costs in accounts 2112 through 2441, inclusive. The depreciation charges shall be made in accordance with sections 664.1, 664.2, 664.3 and 664.6 of this Title. This account shall also include the amount of amortization of customer premises wiring. (See also paragraph B of account 2321 for amortization program; note accounts 3300 and 7360 for depreciation of nonoperating plant in account 2006.)

B. Subsidiary record categories shall be maintained to distinguish between the amounts for depreciation expense and the unprovided-for-loss in service value related to extraordinary retirements. (See also account 1438, Deferred Maintenance and Retirements.)

6562. Depreciation Expense--Property Held for Future Telecommunications Use

This account shall include the depreciation expense of capitalized costs included in account 2002, Property Held for Future Telecommunications Use. The depreciation charges shall be made in accordance with sections 664.1, 664.2, 664.3 and 664.6 of this Title.

6563. Amortization Expense--Tangible

A. This account shall include only the amortization of costs included in accounts 2681, Capital Leases, and 2682, Leasehold Improvements. The amortization charges shall be made in accordance with sections 664.5 and 664.6 of this Title. (See also paragraph c of account 2690.)

B. Subsidiary records shall be maintained to distinguish between the

costs of leasehold improvements and capital leases; with a further segregation of capital leases by each lease agreement.

6564. Amortization Expense--Intangible

This account shall include the amortization of costs included in account 2690, intangibles. The amortization charges shall be made in accordance with sections 664.5 and 664.6 of this Title. (See also paragraph c of account 2690.)

6565. Amortization Expense-Other

A. This account shall include only the amortization of costs included in account 2005, Telecommunications Plant Adjustment.

B. This account shall also include lump sum write-offs of amounts of plant acquisition adjustment as provided for in paragraph (B)(2)(c) of account 2005.

C. Subsidiary records shall be maintained so as to show the character of the amounts contained in this account in order to include separate identification of each amortization and amount.

CUSTOMER OPERATIONS EXPENSE

6610. Marketing

This account number shall be used by telephone companies to summarize for reporting purposes the contents of accounts 6611 through 6613.

6611. Product Management

This account shall include costs incurred in performing administrative activities related to marketing products and services. This includes competitive analysis, product and service identification and specification, test market planning, demand forecasting, product life cycle analysis, pricing analysis, and identification and establishment of distribution channels.

6612. Sales

This account shall include costs incurred in selling products and services.

This includes determination of individual customer needs, development and presentation of customer proposals, sales order preparation and handling, and preparation of sales records.

6613. Product Advertising

This account shall include costs incurred in developing and implementing promotional strategies to stimulate the purchase of products and services. This excludes nonproduct-related advertising, such as corporate image, stock and bond issue and employment advertisements, which shall be included in the appropriate functional accounts.

Note A: Nonproduct-related corporate advertising shall be charged to

account 6722, External Relations.

Note B: Advertising designed to instruct customers in the use of products and services shall be charged to account 6623.1, Customer Services-Service Order Processing and Instruction.

6620. Services

This account number shall be used by telephone companies to summarize for reporting purposes the contents of accounts 6621 through 6623.3.

6621. Call Completion Services

This account shall include costs incurred in helping customers place and complete calls, except directory assistance. This includes handling and recording; intercept; quoting rates, time and charges and all other activities involved in the manual handling of calls.

6622.1. Number Services--Directory Assistance

This account shall include those costs associated with responding to inquiries for customer number and classified listings, handling nonpublished number requests, and processing service orders for preparation of directory assistance operator reference source material. Costs incurred to maintain customer and classified listings shall be charged to account 6622.2, Number Services--Directory Publishing.

6622.2. Number Services--Directory Publishing

This account shall include costs incurred in preparing, printing, binding and distributing white and yellow page directories as well as the cost of securing advertisements for directories. It shall also include the cost of directories purchased from other companies.

Note: This account shall be credited with amounts received as salvage on old directories.

6623.1. Customer Services--Service Order Processing and Instruction

This account shall include costs incurred in preparing, changing, and handling contract or service orders, establishing customer accounts, and handling miscellaneous commercial relations with customers. It shall also include costs incurred in instructing customers in the use of products and services. This includes both verbal instruction and the cost of informational advertising and/or production of written materials whose objective is to instruct customers in the most efficient and safe use of products and services.

6623.2. Customer Services--Billing and Collections

A. This account shall be maintained by the following subaccounts:

6623.20. Billing and Collections--Customer

6623.21. Billing and Collections--Interstate Carriers

6623.22. Billing and Collections--Intrastate Carriers

B. This account shall include costs incurred in maintaining and

billing customer accounts including investigating customer accounts, collecting revenues, reporting receipts, administering collection treatment, and handling contacts with customers regarding adjustments of bills. This account also includes costs associated with receiving and editing of service orders and basic service and equipment billing data and maintaining, correcting and verifying record data. This account shall also include collection shortages. (See account 5264, Other Incidental Regulated Revenue.)

C. This account shall also include amounts paid by interexchange carriers or other exchange carriers to another exchange carrier for billing and collection services.

Note: Preparation of input data associated with automated customer record files and key entry of such data shall be charged to this account. The costs incurred in planning, developing, testing, implementing, and maintaining data bases and the application systems for billing customer accounts are to be recorded in account 6724, Information Management.

6623.3. Customer Services--Public Telephone Expenses

This account shall include costs incurred in collecting and reporting pay station receipts. This account shall also include amounts paid to owners or tenants of premises where public and semipublic telephone stations are located, as general compensation for occupancy privileges. (Note section 665.5 and subaccount 6728.5, Other General and Administrative--Miscellaneous.)

CORPORATE OPERATIONS EXPENSE

6710. Executive and Planning

This account shall be used by telephone companies to summarize for reporting purposes the contents of accounts 6711 through 6712.

6711. Executive

This account shall include costs incurred in formulating corporate policy and in providing overall administration and management. Included are the pay, fees and expenses of boards of directors or similar policy boards and all board-designated officers of the company and their office staffs, e.g., secretaries and staff assistants.

6712. Planning

This account shall include costs incurred in developing and evaluating long-term courses of action for the future operations of the company. This includes performing corporate organization and integrated long-range planning, including management studies, options and contingency plans, and economic strategic analysis.

6720. General and Administrative

This account shall be used by telephone companies to summarize for reporting purposes the contents of accounts 6721 through 6728.

6721. Accounting and Finance

This account shall include costs incurred in providing accounting and financial services. Accounting services include payroll and disbursements, property accounting, capital recovery, regulatory accounting (revenue requirements, separations, settlements and corollary cost accounting), noncustomer billing, tax accounting, internal and external auditing, capital and operating budget analysis and control, and general accounting (accounting principles and procedures and journals, ledgers and financial reports). Financial services include banking operations, cash management, benefit investment, fund management (including actuarial services), securities management, debt trust administration, corporate financial planning and analysis, and internal cashier services.

6722. External Relations

A. This account shall include costs incurred in maintaining relations with government, regulators, other companies and the general public. This includes:

- (1) reviewing existing or pending legislation (See also account 7370, Special Charges, for lobbying expenses);
- (2) preparing and presenting information for regulatory purposes, including tariff and service cost filings, and obtaining construction permits;
- (3) performing public relations and nonproduct-related corporate image advertising activities;
- (4) administering relations, including negotiating contracts with telecommunications companies and other utilities, businesses and industries. (See also account 6725, Legal.) This excludes sales contracts (see also account 6612, Sales); and
- (5) administering investor relations.

B. Subsidiary record categories shall be maintained in order that the company may separately report the amounts contained herein that relate to public relations and corporate image advertising.

6723. Human Resources

A. This account shall include costs incurred in performing personnel administration activities. This includes:

- (1) equal Employment Opportunity and Affirmative Action Programs;
- (2) employee data for forecasting, planning and reporting;
- (3) general employment services;
- (4) occupational medical services;

- (5) job analysis and salary programs;
- (6) labor relations activities;
- (7) personnel development and staffing services, including counseling, career planning, promotion and transfer programs;
- (8) personnel policy development;
- (9) employee communications;
- (10) benefit administration;
- (11) employee activity programs;
- (12) employee safety programs; and
- (13) nontechnical training course development and presentation.

B. The company shall maintain subsidiary record categories in order that the amounts contained herein relating to benefit administration, labor relations and training activities may be separately reported.

6724. Information Management

This account shall include costs incurred in planning, developing, testing, implementing and maintaining data bases and application systems for general purpose computers.

Note: Input preparation and output use are chargeable to the benefited activity and not to account 6724. (See also account 6124, General Purpose Computers Expense and account 8310, Software Expense.)

6725. Legal

This account shall include costs incurred in providing legal services. This includes conducting and coordinating litigation, providing guidance on regulatory and labor matters, preparing, reviewing and filing patents and contracts and interpreting legislation. Also included are court costs, filing fees, and the costs of outside counsel, depositions, transcripts and witnesses.

6726. Procurement

This account shall include costs incurred in procuring material and supplies, including office supplies. This includes analyzing and evaluating suppliers' products, selecting appropriate suppliers, negotiating supply contracts, placing purchase orders, expediting and controlling orders placed for material, developing standards for material purchased and administering vendor or user claims.

6727. Research and Development

A. This account shall include costs incurred in making planned search or critical investigation aimed at discovery of new knowledge. It also includes translating research findings into a plan or design for a new product or process or for a significant improvement to an existing product or process, whether intended for sale or use.

B. This excludes making routine alterations to existing products,

processes, and other ongoing operations even though those alterations may represent improvements.

6728. Other General and Administrative

A. This account shall include costs incurred in performing general administrative activities not directly charged to the user, and not provided for in other accounts. It excludes the cost of office services, which are to be included in the accounts appropriate for the activities supported. This account shall be maintained according to the following subaccounts:

6728.1. Accidents and Damages

6728.2. Insurance

6728.3. Benefit Payments

6728.4. Support Services

6728.5. Miscellaneous

B. 6728.1. Accidents and Damages

This subaccount includes payments in settlement of accident and damage claims, not provided for elsewhere, arising from injury or death of individuals or damage to property, in connection with the company's telecommunications operations. (See section 666.6(4) of this Title.)

C. 6728.2. Insurance

This subaccount shall include insurance premiums and other costs associated with securing protection against losses and damages arising from the company's telecommunications operations which are not chargeable elsewhere. (See section 666.6 (4) of this Title.)

D. 6728.3. Benefit Payments

This subaccount shall include direct benefit payments to or on behalf of retired and separated employees, accident and sickness disability payments, supplemental payments to employees while in governmental service, and death benefit payments.

E. 6728.4. Support Services

This subaccount shall include costs incurred in providing general reference libraries, food services (e.g., cafeterias, lunch rooms and vending facilities), archive, general security investigation services, internal company communications systems and mail and distribution services.

F. 6728.5. Miscellaneous

(1) This subaccount shall include definitely known amounts of losses of revenue collections due to fire and theft, (a) at customers coin-box stations, (b) at public or semipublic telephone stations, (c) in the possession of collectors en route to collection offices, (d) on hand at collection offices, and (e) between collection offices and banks. (See

account 5264, Other incidental Regulated Revenue.)

(2) This subaccount shall include the cost of all services, plant, material and supplies and similar items furnished to municipalities or other governmental authorities in compliance with franchises, ordinances or similar requirements for which no reimbursement is received. This subaccount shall also include amounts paid for franchises whose term is one year or less. (See account 2690, intangibles; account 6564, Amortization Expense intangible.)

(3) This subaccount shall include charges for amortization of deferred equal access costs.

(4) This subaccount shall include all operating expenses not chargeable elsewhere.

6790. Provision for Uncollectible Notes Receivable

A. This account shall be charged with amounts concurrently credited to account 1200.1, Notes Receivable and Affiliated Companies, 1200.2, Other Notes Receivable, or to account 1201, Notes Receivable Allowance--Other and Affiliated, when such allowance is maintained.

B. Subsidiary record categories shall be maintained in order that the entity may separately report the amounts contained herein that relate to affiliates and nonaffiliates.

OTHER OPERATING INCOME AND EXPENSE ACCOUNTS

Content of Accounts: Other Operating income and Expense accounts are intended to record the results of transactions, events or circumstances during the periods which are incidental or peripheral to the major or central operations of the company. They shall include all items of an operating nature as incidental work performed for others not provided for elsewhere. Whenever practicable the inflows and outflows associated with a transaction, event or circumstance shall be matched and the result shown as a net gain or loss.

7100. Other Operating Income and Expenses

This account number shall be used by telephone companies to summarize for reporting purposes the contents of accounts 7110 through 7160.

7110. Income from Custom Work

A. This account shall include profits realized from custom work (plant construction) performed for others incident to the company's regulated telecommunications operations. This includes profits from the incidental performance of nontariffed construction activities (including associated engineering and design) for others which are similar in nature to those activities which are performed by the company in constructing its own telecommunications plant facilities.

B. The records supporting the entries in this account shall be maintained with sufficient particularity to identify separately the revenue and costs associated with each undertaking.

7130. Return from Nonregulated Use of Regulated Facilities

This account shall include a return on investment for the use of regulated property plant and equipment to provide nonregulated products and services.

7140. Gains and Losses from Foreign Exchange

This account shall include all gains and losses resulting from the exchange of foreign currency. Transaction (realized) gains or losses shall be measured based on the exchange rate in effect on the transactions date. Unrealized gains or losses shall be measured based on the exchange rate in effect at the balance sheet date.

7150. Gains or Losses from the Disposition of Land and Artworks

This account shall include gains or losses resulting from the disposition of land or artworks. (Note also section 663.5(d) (2) of this Title.)

7160. Other Operating Gains and Losses

This account shall be charged or credited, as appropriate, to record the results of transactions, events or circumstances which are of an operational nature, but occur irregularly or are peripheral to the major or central operations of the company and not provided for elsewhere.

OPERATING TAX ACCOUNTS

Content of Accounts

The Operating Tax accounts shall include the taxes arising from the central operations of the company.

7200. Operating Taxes

This account number shall be used by telephone companies to summarize for reporting purposes the contents of accounts 7210 through 7250.

7210. Operating Investment Tax Credits--Net

A. This account shall be charged and account 4320, Unamortized

Operating Investment Tax Credits--Net, shall be credited with investment tax credits generated from qualified expenditures related to regulated operations which the company defers rather than recognizes currently in income.

B. This account shall be credited and account 4320 shall be charged ratably with the amortization of each year's investment tax credits included in account 4320 for investment services for ratemaking purposes. (See also account 7410, Nonoperating Investment Tax Credits--Net.) Such amortization shall be determined in relation to the period of time used for computing book depreciation on the property with respect to which the tax credits relate.

7220. Operating Federal Income Taxes

A. This account shall be charged and account 4070, Income Taxes--Accrued, shall be credited for the amount of Federal Income Taxes for the current period. This account shall also reflect subsequent adjustments to amounts previously charged.

B. Taxes should be accrued each month on an estimated basis and adjustments made as later data becomes available.

C. Tax credits, other than investment tax credits, if normalized, shall be recorded consistent with the accounting for investment tax credits and shall be amortized to income as directed by this commission.

D. No entries shall be made to this account to reflect interperiod tax allocations.

7230. Operating State and Local Income Taxes

A. This account shall be charged and account 4070, Income Taxes--Accrued, shall be credited for the amount of State and local income taxes for the current period. This account shall also reflect subsequent adjustments to amounts previously charged.

B. Taxes should be accrued each month on an estimated basis and adjustments made as later data becomes available.

C. No entries shall be made to this account to reflect interperiod tax allocations.

7240. Operating Other Taxes

A. This account shall be charged and account 4080, Other Taxes--Accrued, shall be credited for all taxes, other than Federal, State and local income taxes and payroll-related taxes, related to regulated operations applicable to current periods. Among the items includable in this account are property, gross receipts, franchise and capital stock taxes; this account shall also reflect subsequent adjustments to amounts previously charged. (Note section 663.3 (b) (8).)

B. Taxes on telephone plant leased to others shall be included in this

account by the owner. (Note also paragraph H of this account.)

C. Special assessments for street and other improvements and special benefit taxes, such as water taxes and the like, shall be included in the operating expense accounts or investment accounts, as may be appropriate.

D. Discounts allowed for prompt payment of taxes shall be credited to the account to which the taxes are chargeable.

E. Interest on tax assessments which are not paid when due shall be included in account 7540.1, Other Interest Deductions-Affiliated Companies or account 7540.2, Other Interest Deductions.

F. Taxes paid by the company under tax-free covenants on indebtedness shall be charged to account 7360, Other Nonoperating Income.

G. Sales and use taxes shall be accounted for, so far as practicable, as part of the cost of the items to which the taxes relate.

H. Taxes on rented telecommunications plant which are borne by the lessee shall be credited by the owner to account 5240, Rent Revenue, and shall be charged by the lessee to the appropriate Plant Specific Operations Expense account.

7250. Provision for Deferred Operating Income Taxes Net

A. This account shall be charged or credited, as appropriate, with contra entries recorded to the following accounts for operating income tax expense that has been deferred in accordance with section 661.13.

1360 Current Deferred Income Taxes--Dr

1510 Noncurrent Deferred Income Taxes--Dr

4100 Current Deferred Operating Income Taxes--Cr

4340 Noncurrent Deferred Operating Income Taxes--Cr

B. This account shall be maintained by the following subaccounts:

7250.1. Provision for Deferred Operating Income Taxes--Dr

This account shall include debit amounts of any current deferrals of taxes on income applicable to utility operating income.

7250.2. Provision for Deferred Operating Income Taxes--Cr

This account shall include the credit amounts of any current deferrals of taxes on income applicable to utility operating income.

7250.3. Income Credits and Charges Resulting from Prior Deferrals of Income Taxes

This account shall include the credits and charges, as appropriate, for amounts of taxes from differentials applicable to the current period resulting from deferral of income taxes in prior years as authorized by this commission.

C. Subsidiary record categories shall be maintained to distinguish between property- and nonproperty-related deferrals so that the company

may separately report the amounts contained herein that relate to Federal, State and local income taxes.

NONOPERATING INCOME AND EXPENSE ACCOUNTS

Content of Accounts

The nonoperating income and expense accounts are intended to record the results of transactions, events and circumstances affecting the company during a period, and which are not operational in nature. They shall include such items as nonoperating taxes, dividend income and interest income. Whenever practicable the inflows and outflows associated with a transaction or event shall be matched and the result shown as a net gain or loss.

7300. Nonoperating Income and Expense

This account number shall be used by telephone companies to summarize for reporting purposes the contents of accounts 7310 through 7370.

7310. Dividend income

A. This account shall include dividends on investments in common and preferred stock, which is the property of the company, whether such stock is owned by the company and held in its treasury, or deposited in trust (except in sinking or other funds, see paragraph C of this account), or otherwise controlled.

B. These accounts shall not include dividends or other returns on securities issued or assumed by the company and held by or for it, whether pledged as collateral, or held in its treasury, in special deposits, or in sinking or other funds.

C. Dividends on stocks of other companies held in sinking or other funds shall be credited to account 7330, Income from Sinking and Other Funds.

D. Dividends received and receivable from affiliated companies accounted for on the equity method shall be included in account 1401.1, Investments in Affiliated Companies, as a reduction of the carrying value of the investments.

7320. Interest Income

A. This account shall include interest on securities, including notes and other evidences of indebtedness, which are the property of the company, whether such securities are owned by the company and held in its treasury, or deposited in trust (except in sinking or other funds, see Note B to this account) or otherwise controlled. It shall also include interest on bank balances, certificates of deposits, open accounts, and other analogous items.

B. There shall be included in this account for each month the applicable amount requisite to extinguish, during the interval between

the date of acquisition and date of maturity, the difference between the purchase price and the par value of securities owned, the income from which is includable in this account. Amounts thus credited or charged shall be concurrently included in the accounts in which the securities are carried. Any such difference remaining unextinguished at the sale or upon the maturity and satisfaction of such securities shall be cleared to account 7360, Other Nonoperating Income.

C. These accounts shall not include interest or other returns on securities issued or assumed by the company and held by or for it, whether pledged as collateral, or held in its treasury, in special deposits, or in sinking or other funds.

D. Interest on cash and on securities issued by others shall be included in account 7330, Income from Sinking and Other Funds, when such assets are held in sinking or other funds.

E. Cash discounts on bills for material purchased shall not be included in this account.

7330. Income from Sinking and Other Funds

A. This account shall include the income accrued on cash, securities issued by other companies, and other assets (not including securities issued or assumed by the company) held in sinking and other funds.

B. There shall be included in this account for each month the applicable amount requisite to extinguish, during the interval between the date of acquisition and the date of maturity, the difference between the purchase price and the par value of securities held in sinking or other funds. Amounts thus credited or charged shall be concurrently included in the accounts in which the securities are carried. Any such differences remaining unextinguished upon the maturity and satisfaction of such securities shall be cleared to account 7360, Other Nonoperating Income.

7340. Allowance for Funds Used During Construction

This account shall be credited with such amounts as are charged to the telecommunications plant accounts for the purpose of recording an allowance for funds used for construction purposes. (Note also section 663.3, subdivision (b) (10) of this Title.)

7350. Gains or Losses from the Disposition of Certain Property

This account shall include gains or losses resulting from the disposition of the following (note also section 663.5(d) (2), (e) of this Title).

- (1) gains or losses from the disposition of land or artworks;
- (2) gains or loss from the disposition of plant with traffic; and
- (3) gains or losses from the disposition of nonoperating

telecommunications plant not previously used in the provision of telecommunications services.

7355. Equity in Earnings of Affiliated Companies

This account shall include the company's equity in the earnings or losses of affiliated companies accounted for under the equity method.

7360. Other Nonoperating Income

A. This account shall include all other items of income and gains or losses from activities not specifically provided for elsewhere.

B. This account shall include representative items as follows:

(1) fees collected in connection with the exchange of coupon bonds for registered bonds;

(2) gains or losses realized on the sale of temporary cash investments or marketable equity securities;

(3) uncollectible amounts previously credited to accounts 7310 through 7350, inclusive;

(4) net unrealized losses on investments in current marketable equity securities;

(5) write-downs or write-offs of the book costs of investment in equity securities due to permanent impairment;

(6) gains or losses of nonoperating nature arising from foreign currency exchange or translation;

(7) gains or losses from the extinguishment of debt made to satisfy sinking fund requirements;

(8) amortization of goodwill; and

(9) the net balance of the revenue from and the expenses (including depreciation, amortization and insurance) of property plant, and equipment, the cost of which is includable in account 2006, Nonoperating Plant.

7370. Special Charges

This account shall include the following costs that are typically given special regulatory scrutiny for ratemaking purposes. Unless specific justification to the contrary is given, such costs are presumed to be excluded from the cost of service in setting rates. Subsidiary record categories shall be maintained for each of the items enumerated below.

(1) Lobbying includes expenditures for the purpose of influencing public opinion with respect to the election or appointment of public officials, referenda, legislation, or ordinances (either with respect to the possible adoption of new referenda, legislation or ordinances, or repeal or modification of existing referenda, legislation or ordinances) or approval, modification, or revocation of franchises, or for the

purpose of influencing the decisions of public officials or advancing the political objective of the utility. This also includes advertising, gifts, honoraria, and political contributions. This does not include such expenditures which are directly related to communications with and appearances before regulatory or other governmental bodies in connection with the reporting utility's existing or proposed operations.

(2) Contributions for charitable, social or community welfare purposes.

(3) Membership fees and dues in social, service and recreational or athletic clubs and organizations.

(4) Penalties and fines paid on account of violations of statutes. This account shall also include penalties and fines paid on account of violations of U.S. statutes, including judgments arising from a violation of antitrust laws, and payments in settlement of civil and criminal suits alleging such violations.

(5) Abandoned construction projects.

NONOPERATING TAX ACCOUNTS

Content of Accounts

The Nonoperating Tax accounts shall include taxes arising from activities which are not a part of the central operations of the entity.

7400. Nonoperating Taxes

This account number shall be used by telephone companies to summarize for reporting purposes the contents of accounts 7410 through 7450.

7410. Nonoperating Investment Tax Credits--Net

A. This account shall be charged and account 4330, Unamortized Nonoperating Investment Tax Credits--Net, shall be credited with investment tax credits generated from qualified expenditures related to other operations which the company has elected to defer rather than recognize currently in income.

B. This account shall be credited and account 4330 shall be charged with the amortization of each year's investment tax credits included in such accounts relating to amortization of previously deferred investment tax credits of other property or regulated property, the amortization of which does not serve to reduce costs of service (but the unamortized balance does reduce rate base) for ratemaking purposes. Such amortization shall be determined with reference to the period of time used for computing book depreciation on the property with respect to which the tax credits relate.

7420. Nonoperating Federal Income Taxes

A. This account shall be charged and account 4070, Income Taxes Accrued, shall be credited for the amount of nonoperating Federal income

taxes for the current period. This account shall also reflect subsequent adjustments to amounts previously charged.

B. Taxes shall be accrued each month on an estimated basis and adjustments made as later data becomes available.

C. Companies that adopt the flow-through methods of accounting for investment tax credits shall reduce the calculated provision in this account by the entire amount of the credit realized during the year. Tax credits, other than investment tax credits, if normalized, shall be recorded consistent with the accounting for investment tax credits.

D. No entries shall be made to this account to reflect interperiod tax allocation.

7430. Nonoperating State and Local Income Taxes

A. This account shall be charged and account 4070, Income Taxes--Accrued, shall be credited for the amount of State and local income taxes for the current period. This account shall also reflect subsequent adjustments to amounts previously charged.

B. Taxes shall be accrued each month on an estimated basis and adjustments made as later data becomes available.

C. No entries shall be made to this account to reflect interperiod tax allocation.

7440. Nonoperating Other Taxes

This account shall be charged and account 4080, Other Taxes--Accrued, shall be credited for all nonoperating taxes, other than Federal, State and local income taxes, and payroll-related taxes for the current period. Among the items includable in this account are property, gross receipts, franchise, capital stock taxes and taxes related to property, plant and equipment in account 2006, Nonoperating Plant. (See also section 663.3(b) (8) of this Title.) This account shall also reflect subsequent adjustments to amounts previously charged.

7450. Provision for Deferred Nonoperating Income Taxes--Net

A. This account shall be charged or credited, as appropriate, with contra entries recorded to the following accounts for nonoperating tax expense that has been deferred in accordance with section 661.13 of this Title.

1360. Current Deferred Income Taxes--Dr

1510. Noncurrent Deferred Income Taxes--Dr

4110. Current Deferred Nonoperating Income Taxes--Cr

4350. Noncurrent Deferred Nonoperating Income Taxes--Cr

B. Subsidiary record categories shall be maintained to distinguish between property- and nonproperty-related deferrals and so that the company may separately report the amounts contained herein that relate

to Federal, State and local income taxes.

INTEREST AND RELATED ITEMS

Content of Accounts: Interest and related amounts shall be included in accounts 7510.1 through 7540.2.

7500. Interest and Related Items

This account number shall be used by telephone companies to summarize for reporting purposes the contents of accounts 7510.1 through 7540.2.

7510.1. Interest on Funded Debt

A. This account shall include the current accruals of interest on all classes of debt the principal of which is includable in account 4210, Funded Debt. It shall also include the interest on funded debt the maturity of which has been extended by specific agreement. (Note also section 663.3 (b) (10) of this Title.)

B. This account shall be kept so that the interest on each class of funded debt may be shown separately in the annual reports to this commission.

C. These accounts shall not include charges for interest on funded debt issued or assumed by the company and held by or for it, whether pledged as collateral or held in its treasury, in special deposits or in sinking or other funds.

D. Interest expressly provided for and included in the face amount of securities issued shall be charged at the time of issuance to account 1330, Other Prepayments, and cleared to this account as the term expires to which the interest applies.

7510.2. Amortization of Discount on Long-Term Debt

This account shall include monthly amortization of balances in account 4230, Discount on Long-Term Debt.

7510.3. Amortization of Premium on Long-Term Debt--Credit

This account shall include monthly amortization of balances in account 4220, Premium on Long-Term Debt.

7520. Interest Expense--Capital Leases

This account shall include the interest portion of each capital lease payment.

7530. Amortization of Debt Issuance Expense

This account shall include the monthly amortization of the balances in account 1407, Unamortized Debt Issuance Expense.

7540.1. Other Interest Deductions--Affiliated Companies

This account shall include interest on advances from affiliated companies.

7540.2. Other Interest Deductions

A. This account shall include all interest deductions not provided for

elsewhere. (Note also section 663.3 (b) (10) of this Title.)

B. A list of representative items of indebtedness, the interest on which is chargeable to this account, follows:

- (1) advances from nonaffiliated companies and other liabilities;
- (2) assessments for public improvements past due;
- (3) bond coupons, matured and unpaid;
- (4) claims and judgments;
- (5) customers' deposits;
- (6) funded debt mature, with respect to which a definite agreement as to extension has not been made;
- (7) notes payable on demand or maturing one year or less from date of issue;
- (8) open accounts;
- (9) tax assessments, past due; and
- (10) discount, premium, and issuance expense of notes maturing one year or less from date of issue.

C. Interest payable on notes or other evidences of indebtedness maturing serially shall be charged to account 7510.1, Interest on Funded Debt, if any portion of the obligation matures more than one year from date of issue.

EXTRAORDINARY ITEMS

Content of Accounts

These accounts are intended to segregate the effects of events or transactions that are extraordinary. Extraordinary events and transactions are distinguished by both their unusual nature and by the infrequency of their occurrence, taking into account the environment in which the company operates. These accounts shall also include the related income tax effect of the extraordinary items.

7600. Extraordinary Items

This account number shall be used by telephone companies to summarize for reporting purposes the contents of accounts 7610 through 7640.

7610. Extraordinary Income Credits

This account shall be credited with nontypical, noncustomary and infrequently recurring gains which would significantly distort the current year's income computed before such extraordinary items, if reported other than as extraordinary items. Income tax relating to the amounts recorded in this account shall be recorded in account 7630, Current Income Tax Effect of Extraordinary Items--Net, and account 7640, Provision for Deferred Income Tax Effect of Extraordinary Items--Net.

7620. Extraordinary Income Charges

This account shall be debited with nontypical, noncustomary and

infrequently recurring losses which would significantly distort the current year's income computed before such extraordinary items, if reported other than as extraordinary items. Income tax relating to the amounts recorded in this account shall be recorded in account 7630, Current Income Tax Effect of Extraordinary Items--Net, and account 7640, Provision for Deferred Income Tax Effect of Extraordinary Items--Net.

7630. Current Income Tax Effect of Extraordinary Items-- Net

This account shall be charged or credited and account 4070, Income Taxes--Accrued, shall be credited or charged for all current income tax effects (Federal, State and local) of items included in accounts 7610, Extraordinary Income Credits, and 7620, Extraordinary Income Charges. The records supporting the entries in this account shall be maintained with sufficient particularity to identify each amount included herein with the extraordinary item to which it is attributable.

7640. Provision for Deferred Income Tax Effect of Extraordinary Items-- Net

This account shall be charged or credited, as appropriate, with a contra amount recorded to account 1510, Noncurrent Deferred Income Taxes--Dr, account 1360, Current Deferred Income Taxes--Dr, account 4350, Noncurrent Deferred Nonoperating Income Taxes--Cr, or account 4110, Current Deferred Nonoperating Income Taxes--Cr, for the income tax effects (Federal, State and local) of items included in accounts 7610, Extraordinary Income Credits, and 7620, Extraordinary Income Charges, that have been deferred in accordance with section 661.13. The records supporting the entries in this account shall be maintained with sufficient particularity to identify each amount included herein with the extraordinary item to which it is attributable.

JURISDICTIONAL DIFFERENCES AND NONREGULATED INCOME ACCOUNTS

Content of Accounts

Jurisdictional differences and nonregulated income amounts shall be included in accounts 7910 and 7990.

7910. Income Effect of Jurisdictional Ratemaking Differences--Net

This account shall include the impact on revenues and expenses of the jurisdictional ratemaking practices which vary from those of this commission. All entries recorded in this account shall be recorded net of the applicable income tax effects and shall be supported by appropriate subsidiary records, where necessary, as provided for in section 661.3(e) of this Title.

7990. Nonregulated Net Income

A. This account shall be used by those companies who offer

nonregulated activities that do not involve the joint or common use of assets or resources used in the provision of both regulated and nonregulated products and services, and which have not established a separate subsidiary for that purpose.

B. All revenue and expenses (including taxes) incurred in these nonregulated activities shall be recorded on separate books of account for such operations. Only the net of the total revenues and total expenses shall be recorded in this account, with a contra debit or credit to subaccount 1406.3.

CLEARING ACCOUNTS

8310. Software expense

A. The original cost of initial operating systems software, including right to use fees, (either general purpose computers software, specific purpose computers software or central office equipment software) shall first be charged to this account and then cleared to either account 2124, General Purpose Computers, or the appropriate switching, network signaling, network operations or other specific telecommunications plant account.

B. The original cost of all other software (i.e., that which is not considered initial operating system software) shall first be recorded in this account. The disposition of this software shall be determined by management and shall be in conformance with generally accepted accounting principles at the time such determination is made.

C. Additions or modifications to general purpose computers software, previously capitalized in accordance with section 664.7, shall first be charged to this account then cleared to account 6124, General Purpose Computers Expense, or account 6724, Information Management.

D. Additions or modifications to central office equipment software previously capitalized shall first be charged to this account and then cleared to the related plant specific operating expense account.

E. Additions or modifications to specific purpose computers software previously capitalized shall first be charged to this account, then cleared to the corresponding operating expense account. (For example, the cost of a modification to the software of a computer used for the monitoring and regulation of a building's temperature will be recorded in account 6121, Land and Building Expense.)

F. Subsidiary record categories are to be maintained in accordance with section 661.2(c) and section 661.3(e) of this Title.

RETIREMENT UNITS LIST

GENERAL SUPPORT ASSETS

2112. MOTOR VEHICLES

2113. AIRCRAFT

2114. SPECIAL PURPOSE VEHICLES

2115. GARAGE WORK EQUIPMENT

2116. OTHER WORK EQUIPMENT

Each complete item of equipment, the original cost of which was charged to the appropriate plant account, such as:

A passenger automobile or truck with or without body; an airplane; a boat or snowmobile; an air compressor, car hoist or gasoline pump; a pole derrick, power winch, earth boring machine or trailer.

2121. BUILDINGS

A complete building

An entire roof with or without supporting members

Note A: A building of irregular shape having more than one roof level may have several isolated roofs, each of which shall be considered an entire roof. In the case of buildings to which lateral extensions have been made, even though having but one roof level, that part of the roof covering an entire section built at one time shall be considered an entire roof.

A complete fire escape

A complete window (i.e., box frame, and sash)

A boiler, furnace, or hot-water heater

An elevator complete with operating mechanism

A gas-burner system

A house-lighting or power board

An oil-burner system

An oil tank

The floor covering for one room

A motor, generator, engine, turbine, pump, compressor, ventilating fan, air washer, elevator drum, or similar items of equipment, with or without associated wiring, control equipment, etc.

A self-supporting structure used to support antennae

Note B: In addition to the above retirement units, material (i. e., portions of buildings, equipment, fixtures, etc.) installed and retired, and the labor and incidental costs involved in connection with work of the following character, shall be handled through the telephone plant and depreciation reserve accounts.

(1) Changes in type of operation of elevator systems, e.g., a change from manual to signal control of cars, from manual to power operation of doors from low speed to high speed, from direct to alternating current, from hydraulic to electric operation, from one type of signaling or dispatching system to another

- (2) Relocations of toilet rooms, battery rooms, kitchens, terminal rooms, machine rooms, transformer vaults, etc.
- (3) Structural changes such as:
 - (a) Reinforcements of floors, roofs, bearing walls, footings, and foundations
 - (b) Additions or relocations of elevator shafts, stairways, fire exits and vaults, but excluding switchboard cable holes and slots
 - (c) Building alterations required for fire protection and other safety measures
- (4) Changes in the type of electric current supply, or of ventilating, air conditioning, or similar systems
- (5) Building enlargements
- (6) Replacements of the following character
 - (a) Replacements of plumbing or heating pipes (with or without associated valves) except when necessitated by minor repairs or minor relocations of fixtures
 - (b) Replacements of all or substantially all of the lighting fixtures (with or without associated wiring and conduit) in one operating or equipment room or, in the case of office space, on one floor of a building
 - (c) General replacements (throughout a building or throughout an entire portion erected at one time) of items such as supply, return, or air valves in heating systems; hot or cold water valves or faucets; plumbing, heating, or drainage traps.

Note C: In order to facilitate the pricing of future retirements, at the time of construction the company should obtain from the building contractor sufficient detail to allow for the breakdown of the total cost of the project in accordance with the required retirement units identified above.

2122. FURNITURE

2123.1. OFFICE SUPPORT EQUIPMENT

2123.2. COMPANY COMMUNICATIONS EQUIPMENT

2124. GENERAL PURPOSE COMPUTERS

Each complete item of furniture or equipment, the original cost of which was charged to the appropriate plant account, such as:

A desk, chair, table, piano, rug, carpet, or floor covering for one room; a typewriter, portable air conditioning unit or cash register; a distributing frame or switchboard; a CRT display, printer or typewriter control unit

CENTRAL OFFICE ASSETS

2211. Electronic Analog Switching Equipment:

A complete bay and/or functional unit, such as incoming trunk grouping, line links, connectors or marker bay

2212. Digital Electronic Switching Equipment:

A complete bay and/or functional unit, such as line frame, line trunk frame, digital transmission interface frame, time switch frame or central processor frame

2215.1. Step-by-Step Switching Equipment:

A complete equipment frame, such as a line-finder frame, line-switch frame, selector frame, connector frame, or repeater frame

2215.2 Crossbar Switching Equipment:

A complete equipment frame such as line link, district junctor, district link, office link, incoming link, subscriber sender link, subscriber sender, originating marker, terminating sender link, terminating sender, terminating marker, trunk link, register link, or sender link

2220. Operator Systems:

A complete frame or bay, operator position and/or functional unit such as trunk unit and service circuit

2231.1. Satellite and Earth Station Facilities:

A satellite including its launch costs

Antenna systems

Earth station facilities--a complete item of radio equipment such as a transmitter, transceiver or receiver

2231.2. Other Radio Facilities

A complete item of radio equipment such as an amplifier, antenna, control equipment, frequency modulation (FM) terminal, modulation and demodulation equipment, patch bay, receiver, transceiver and transmitter

2232. Circuit Equipment

Pair gain equipment such as channel banks, concentrators and subscriber loop carrier equipment including central office terminals and remote terminals

Multiplexing equipment such as carrier terminals, carrier channel banks, modems and translators, except those used with radio facilities.

Other circuit equipment such as amplifiers, line repeaters, line signaling equipment, metallic facility terminals and modems

Following is a list of equipment which may be common to one or more of the aforementioned central office asset categories:

Switchboards, desks, and testboards:

Switchboards (i.e., local, toll, dial system "A", cordless "B" call distributing "B", observing, teletypewriter, etc.)--

A complete section or lower unit

Desks (i.e., operating, observing, testing, etc.)--

A complete section

Testboards, or test and control boards (board type)--

A complete section

Testboards, or test and control boards (rack type)--

All the equipment in one bay

A complete upper unit

A complete lower unit

A complete installation of rack framework for one board

Test panels--

A complete panel

Test cabinets--

A cabinet complete with equipment

Distributing frames:

Main distributing frames (including wall type)

A complete installation for one central office (in multi-unit offices,
for one operating unit)

Intermediate distributing frames--

A complete installation for one central office (in multi-unit offices,
for one operating unit)

Mezzanine balconies--

A complete installation for one frame

Racks:

Relay rack equipment--

A panel or unit complete with equipment

All the equipment in one bay, exclusive of any panels or units

Coil rack equipment--

All the equipment on one shelf

Message and traffic register rack equipment--

All the equipment in one bay

Iron framework--

A complete line or rack with or without enclosing cabinet or case

Cable:

The original cost of the cable may be loaded onto the cost of the associated switching and transmission equipment. Otherwise all of the cables in one run used for the same purpose, such as between--

(1) Main frame and intermediate frame for subscribers' lines

(2) Main frame and intermediate frame for outgoing trunk multiple

(3) Intermediate frame and connector frame or final frame for
subscriber' lines

(4) Intermediate frame and answering jacks

(5) Intermediate frame and switchboard for outgoing trunk multiple jacks

(6) Intermediate frame and switchboard for subscribers' multiple jacks

Iron framework--

A complete installation of rack for one cable run

Power Equipment:

Frame or rack mounted equipment--

A panel or shelf complete with equipment, such as fuses, meters, control equipment, etc.

Iron framework--

A complete line of frame or rack for one fuse board, one power switchboard, etc.

A generator, motor, motor generator set, gas engine, rectifier, ringing machine, harmonic converter, pole changer, interrupter, power filter, or choke coil

Storage Batteries--

A complete battery with or without rack, cabinet, or counter, electric motive force cells

All positive or all negative plates in an entire battery (i.e., in all cells of a 24-volt battery, in all cells of a Morse battery, etc.)

All tanks or all jars of an entire battery

A complete battery rack or cabinet, storage or dry

A complete group of bus bars, cable, or wiring (with or without conduit) such as between--

Battery and fuse panel

Power switchboard and machines

Telephone repeater equipment (including testing equipment):

A complete floor mounted rack type set

Relay rack mounted equipment--

A panel or unit complete with equipment

All the equipment in one bay, exclusive of any panels or units

Coil rack mounted equipment--

All the equipment on one shelf

Iron framework--

A complete line of rack

Carrier equipment (telephone, repeater, and testing equipment):

A complete floor mounted rack type set

Relay rack mounted equipment--

A panel or unit complete with equipment

All the equipment in one bay, exclusive of any panels or units

A line filter

A complete test table
Iron framework-- A complete line of rack
Telegraph equipment:
Table-mounted sending or receiving equipment--
A table complete with equipment
A complete optical system
A complete mechanical system
A complete fork box
A complete amplifier-modulator box
Rack-mounted sending or receiving equipment--
A panel complete with equipment
All the equipment in one bay
Iron framework--
A complete line of rack
Power equipment--
A complete power board
A complete storage battery
Photographic equipment--
A copying camera or a copying, enlarging, and reducing camera, each
with or without associated stands, illuminators, and copy boards
A print machine
A drying cabinet
A developing, fixing, and washing tank
Miscellaneous equipment:
A calculagraph, a master clock, or a secondary clock
Electrically driven calculagraph and clock systems--
A complete installation
Mechanical or pneumatic tube ticket distributing system--
A complete installation
Each complete tool or portable test set, the original cost of which
was charged to the telephone plant account, such as a plug remover and
attacher, cam aligning fixture, multiple bank resetting gage, or shaft
straightening tool, a relay adjusting set, line finder set, or wagon
type set
Loud-speaker equipment--
A complete installation
Aisle-lighting equipment--
A complete installation on one floor
Rolling ladders--
A complete installation for one side of one frame or rack
Message and traffic register cabinets--

A cabinet complete with equipment

Teletypewriter sets--

The disposition units maintained by each company for account 2311 in accordance with the provisions of that account

Key-indicator equipment or key-pulsing equipment:

A complete equipment frame, such as a link or sender frame

Note: When work of the following character is performed as a special job in a central office or at a multiple or dial private branch exchange for the purpose of improving or changing the type of the equipment, the material installed and retired and the labor and incidental costs involved shall be handled through the telephone plant and depreciation reserve accounts.

(1) Conversions of one or more switchboard positions, or dial-system frames, from one type to another, such as from subscribers' to toll, subscribers' to rural, inward toll to combined line and recording, manual B to call indicator B, or from panel B switchboard incoming frame to interoffice incoming frame

(2) Conversions of circuits from one type to another, such as conversions of cord circuits from two-party ringing to four-party selective ringing, semiselective ringing to selecting ringing or, from manual recall to flashing recall, and conversions of panel-sender circuits from noncoin to coin and from two-digit to three-digit

(3) Replacements of items of one type, with items of a different type for such reasons as improving signaling or transmission characteristics, changing operating methods or increasing capacity of the office, e.g.:

(a) Replacements of all the relays or repeating coils of one type in a central office with relays or coils of an improved type for the purpose of improving the signaling or transmission characteristics

(b) Replacements of items of equipment in dial offices because of a change in the method of operation to multiple registration

(c) Replacements of items of power equipment because of a change in power purchased from direct current to alternating current

(d) Modifications of the trunk and cord circuits of multiple manual private branch exchange boards necessitated by a cut-over of a central office district to dial operation

(e) Replacements of protectors of one size with protectors of a smaller size on a main distributing frame so that more protectors may be installed in the same space

(f) Replacements of 20 pair terminal strips on a main distributing frame with 50 pair strips to increase the capacity of the frame

(g) Replacements of jack strips having 10 jacks per strip with strips

having 20 jacks per strip to increase the capacity of a switchboard

(h) Replacements of keys of one type with keys of a different type to permit more keys to be placed in the same position

Note: In order to facilitate the pricing of future retirements, at the time of installation the company should obtain from the central office contractor sufficient detail to allow for the breakdown of the total cost of the project in accordance with the required retirement units identified above.

INFORMATION ORIGINATION/TERMINATION ASSETS

2311. STATION APPARATUS

None, but each company shall maintain its own list of station apparatus disposition units for account 2311 in accordance with the provisions of that account

2321. CUSTOMER PREMISES WIRING

None

2341. LARGE PRIVATE BRANCH EXCHANGES

Units specified under central office assets of this list

2351. PUBLIC TELEPHONE TERMINAL EQUIPMENT

None, but each company shall maintain its own list of public telephone terminal equipment disposition units so as to separately identify enclosures and coin, coinless and credit card telephones

2362. OTHER TERMINAL EQUIPMENT

None, but each company shall maintain its own list of other terminal equipment retirement units for account 2362 in accordance with the provisions of that account

CABLE AND WIRE FACILITIES

2411. POLES

A pole (i.e., line pole, brace pole, guy stub, or pole forming part A or H fixture), with or without associated anchors, guys, steps, and crossarms placed after January 1, 1971

A crossarm, (i. e., wooden crossarm, guard arm, or cable crossarm including extension arms), with or without braces or other hardware, placed prior to January 1, 1971

A special fixture (i.e., bridge fixture, a tower, or other special river-crossing or long-span fixture) with or without associated anchors, guys, etc.

2421. AERIAL CABLE

2422. UNDERGROUND CABLE

2423. BURIED CABLE

2424. SUBMARINE CABLE

2425. DEEP SEA CABLE

2426. INTRABUILDING NETWORK CABLE

Two continuous spans or more of cable, with or without associated distribution terminals, suspension strand, clamps, lashing, etc. (The term span shall include a length of cable from a Y splice not located at a pole to a pole or building.)

A section or run of cable, with or without associated elements and parts, as follows:

(1) Between a manhole, handhole, or service box and a pole, building, fence, wall, or the junction with the house cable

(2) Between manholes, handholes, or service boxes; or between an office cable vault and an office manhole

(3) Between a cable vault or an office manhole and the main frame, the main frame terminating cables, or the frame mounted connector stub

(4) A section of buried cable 300 feet or more in length, or any section of buried cable between manholes, splicing boxes, pedestals, poles, or buildings

(5) All of a continuous run of one size of house cable (All of a continuous run of one size means a section between splices other than straight splices.)

(6) All of a continuous run of one size of block cable, i.e., cable attached to buildings, walls, or fences (All of a continuous run of one size means a section between splices other than straight splices.)

(7) All of a submarine cable for one crossing; or a section of submarine cable 300 feet or more in length

(8) A section of underground dip cable between poles and/or buildings, or the appropriate units listed above

Any length of cable connected with but not a part of any unit on this list when replaced concurrently with the unit

Terminating cables:

All of the cables and forms used for terminating one cable

A complete cross-connecting cable terminal protected or unprotected, with or without associated balcony, pole seat, etc.

A complete intrabuilding network cable terminal, protected or unprotected, including frame type

A pressure contactor terminal with or without contactor

A complete house terminal, protected or unprotected, including frame type

A complete video terminal

A complete coaxial terminal

A submarine cable hut or house

A submarine cable anchorage

A submarine cable terminating frame

A case of equipment, such as loading coils, building-out capacitors, building-out condensers, carrier line filters, or auto-transformers

An air dryer

2431. AERIAL WIRE

Two continuous spans or more of insulated wire or two continuous spans of one uninsulated wire, with or without associated insulators, transposition brackets, etc.

A case of equipment such as loading coils, building-out condensers, carrier line filters, or auto-transformers

An antenna, complete with or without supports

2441. UNDERGROUND CONDUIT

A section of conduit-

- (1) Between two manholes, handholes, or service boxes
- (2) Between a manhole, handhole, or service box and a pole or building
- (3) between a central office cable vault and an office manhole
- (4) Underground dips--between two poles; between a pole and a building; between two buildings; or units (1) and (2) above
- (5) a manhole, handhole, or service box

GLOSSARY

Note: When a manhole is reconstructed, i.e., enlarged or changed in design, the investment representing portions of the manhole removed, whether or not replaced, should be written off to the depreciation reserve account.

When used in this system of accounts:

1. Accelerated depreciation means a depreciation method or period of time, including the treatment given cost of removal and gross salvage, used in calculating depreciation deductions on income tax returns which is different from the depreciation method or period of time prescribed by this commission for use in calculating depreciation expense recorded in a company's books of account.

2. Account means a specific element of a chart of accounts used to record, classify and accumulate similar financial transactions resulting from the operations of the entity. Accounts, or these accounts, refer to the accounts of this system of accounts.

3. Accounting system means the total set of interrelated principles, rules, requirements, definitions, accounts, records, procedures and mechanisms necessary to operate and evaluate the entity from a financial perspective. An accounting system generally consists of a chart of accounts, various parallel subsystems, and subsidiary records. An

accounting system is utilized to provide the necessary financial information to users to meet judiciary and other responsibilities.

4. Affiliated companies means companies that directly or indirectly through one or more intermediaries, control or are controlled by, or are under common control with, the accounting company. See also Control.

5. Amortization means the gradual extinguishment of an amount in an account by distributing such amount over a fixed period, over the life of the asset or liability to which it applies, or over the period during which it is anticipated the benefit will be realized.

6. Associated equipment means that equipment which functions with a specific type of plant or with two or more types of plant, e.g., switching equipment, network power equipment, circuit equipment, common channel network signaling equipment or network operations equipment. Associated equipment shall be classified to the account appropriate for the type of equipment with which it is predominately used rather than on its own characteristics.

Illustrative examples of associated equipment are:

Alarm and signal apparatus

Auxiliary framing

Cable and cable racks

Distributing frames and equipment thereon

Frame and aisle lighting equipment (not permanently attached to the building)

Relay racks and panels

7. Basic local service area means the minimum specified calling area for which a tariff is prescribed.

8. Book cost means the amount at which property is recorded in these accounts, without deduction of related accumulated provision for depreciation, amortization or allowances for other purposes.

9. Commission or this commission means the Public Service Commission of the State of New York.

10. Common carrier or carrier means any person engaged as a common carrier for hire, in interstate or foreign communication by wire or radio or in interstate or foreign radio transmission of energy, except where reference is made to common carriers not subject to the jurisdiction of the Federal Communications Commission; but a person engaged in radio broadcasting shall not, insofar as such person is so engaged, be deemed a common carrier.

11. Company or the company, when not otherwise indicated in the context, means the accounting entity.

12. Control (including the terms controlling, controlled by, and under

common control with) means the possession directly or indirectly, of the power to direct or cause the direction of the management and policies of a company, whether such power is exercised through one or more intermediary companies, or alone, or in conjunction with, or pursuant to an agreement with, one or more other companies, and whether such power is established through a majority or minority ownership or voting of securities, common directors, officers, or stockholders, voting trusts, holding trusts, affiliated companies, contract, or any other direct or indirect means.

13. Cost, except as applied to telecommunications plant, franchises, and patent rights, means the amount of money actually paid (or the current money value of any consideration other than money exchanged) for property or services. See also Original Cost.

14. Cost of removal means the cost of demolishing, dismantling, removing, tearing down, or otherwise disposing of telecommunications plant and recovering the salvage, including the cost of transportation and handling incident thereto.

15. Depreciation as applied to depreciable telecommunications plant is a systematic means of charging operations with the loss in service value not restored by current maintenance over the estimated useful life of the asset, incurred in connection with the consumption or prospective retirement of telecommunications plant in the course of service from causes which are known to be in current operation, against which the company is not protected by insurance, and the effect of which can be forecast with a reasonable approach to accuracy. Among the causes to be given consideration are wear and tear, decay, action of the elements, inadequacy, obsolescence, changes in technology, changes in demand and requirements of public authorities.

16. Entity means a legal enterprise (common carrier) engaged in interstate and/or intrastate communications.

17. Group plan, as applied to depreciation accounting, means the plan under which depreciation charges are accrued upon the basis of the original cost of all property included in each depreciable plant account, using the average service life thereof properly weighted, and upon the retirement of any depreciable property its cost is charged to the accumulated provision for depreciation whether or not the particular item has attained the average service life.

18. Intangible property means assets that have no physical existence but instead have value because of the rights which ownership confers.

19. Intrasystems means assets consisting of:

(1) private branch exchanges (PBX's) and key system common equipment

(a switchboard or switching equipment shared by all stations);

(2) associated customer premises equipment (CPE) station equipment (usually telephone or key telephone systems); and

(3) intrasystem wiring (all cable or wiring and associated components which connect the common equipment and the station equipment, located on the customer's side of the demarcation point).

An intrasystem does not include property, plant or equipment which are not solely dedicated to its operation.

20. Local service area as applied to the requirement to keep subsidiary records for revenue accounts mean local access transport area (LATA).

21. Minor items, as applied to depreciable telecommunications plant, means any part or element of such plant, which when removed (with or without replacement) does not require retirement accounting. (Note also section 663.5 (b)(2) of this Title.)

22. Net salvage value means the salvage value of the property retired after deducting the cost of removal.

23. Original cost or cost, as applied to telecommunications plant, rights of way and other intangible property, means the actual money cost of (or the current money value of any consideration other than money exchanged for) property at the time when it was first dedicated to public service by a regulated telecommunications entity, whether the accounting company or by predecessors.

Note: For the application of this definition to property acquired from predecessors see section 663.2(a). Note also the definition of Cost in this glossary.

24. Plant retired means plant which has been removed, sold, abandoned, destroyed, or otherwise withdrawn from service.

25. Property record units means those items, groups of items, or quantities of property in terms of which the continuing property record of telephone plant accounts is maintained.

26. Research, development and demonstration (R, D & D) means expenditures incurred by the companies either directly or through another person or organization (such as a research institute, industry association, foundation, university, engineering company or similar contractor) in pursuing research, development and demonstration activities including experiment, design, demonstration, installation, construction or operation. This definition includes expenditures for the implementation or development of new and/or existing concepts until technically feasible and commercially feasible operations are verified. Such research, development and demonstration costs should be reasonably

related to the existing or future utility business. The term includes but is not limited to all such costs incidental to the design, development or implementation of an experimental facility, a plant process, a product, a formula, an invention, a system or similar items, and the improvement of already existing items of a like nature; and the costs of obtaining its own patent, such as attorney's fees expended in making and perfecting a patent application. The term includes preliminary investigations and detailed planning of specific projects that rely on products or technologies that have not been previously verified to be feasible. The term does not include expenditures for efficiency surveys, studies of management, management techniques and organizations, audits of productivity, consumer surveys, advertising, promotions, or items of a like nature.

27. Retained earnings (formerly earned surplus) means the accumulated net income of the utility less distribution to stockholders and transfers to other capital accounts.

28. Retirement units, as applied to depreciable telecommunications plant, means those major items of plant which when removed (with or without replacement) cause the initiation of retirement accounting entries. (Note also section 663.5(b)(1) of this Title.)

29. Salvage value means the amount received for property retired, if sold, or if retained for reuse, the amount at which the material recovered is chargeable to account 1220, Inventories, or other appropriate account.

30. Service life means the period between the time of installation of telecommunications plant and the time of its retirement.

31. Service value means the difference between the original cost and the net salvage as defined in paragraph (22) of this subdivision.

32. Stock expense, as applied to capital stock, means all expenses in connection with the issuance, sale of capital stock, such as fees and commissions (including the cash value of securities) paid to promoters, underwriters, brokers and salesmen; fees for legal services; cost of soliciting subscriptions for capital stock, including fees, commissions and advertising; cost of obtaining governmental authority and filing notices thereunder; fees and taxes for issuance of capital stock and listing on exchanges; cost of preparing, engraving, printing, issuing, and distributing prospectuses and stock certificates in connection with both original and additional capital stock issues. (Note also account 4520, Additional Paid-in Capital.)

33. Straight-line method, as applied to depreciation accounting, means the plan under which the service value of property is charged to

operating expenses and credited to accumulated depreciation through equal annual charges as nearly as may be during its service life.

34. Subsidiary record means accumulation of detailed information which is required by this commission to be maintained in support of entries to the accounts.

35. Subsidiary record categories means those segregations of certain regulated costs, expenses and revenues, which must be maintained and are subject to specific reporting requirements of this commission.

36. Subsystems, or parallel mechanisms means processes or procedures which augment the use of a chart of accounts in the financial operation of the entity. These subsystems operate on and/or process account and subsidiary record information for specific purposes.

37. Tangible property means assets characterized by physical existence, such as land, buildings, equipment, furniture, fixtures and tools.

38. Telecommunications means any transmission, emission, or reception of signs, signals, writing, images or sounds or intelligence of any nature by wire, radio, visual or other electromagnetic systems. This encompasses the aggregate of several modes of conveying information, signals or messages over a distance. Included in the telecommunications industry is the transmitting, receiving, or exchanging of information among multiple locations. The minimum elements required for the telecommunications process to occur are a message source, a transmission medium and a receiver.

39. Telephone corporation. See section 660.3(b) of this Title, Abstracts from Law.

40. Telephone line. See section 660.3(b) of this Title Abstracts from Law.

41. Time of installation means the date at which telecommunications plant is placed in service.

42. Time of retirement means the date at which telecommunications plant is retired from service.

.SO DOC 16C-683.0

NYCRR

Section 683.0 Order authorizing uniform system of accounts for radio-telephone utilities. (a) This uniform system of accounts is hereby prescribed for every radio-telephone utility operating a radio-telephone facility (as those terms are defined in Part 645 of this Title) and every such radio-telephone utility is hereby required to keep its records and accounts in conformity therewith.

(b) During the 12 months following the date on which this system of accounts becomes effective, any such radio-telephone utility may, for purposes of comparison, keep on its books, in addition to the accounts hereby prescribed, such portion or portions of its present accounts as may be deemed desirable by any such corporation.

(c) Each radio-telephone utility for which this uniform system of accounts is prescribed shall classify, set forth, and carry all assets, liabilities, capital stock, retained earnings and other capital existing as of the effective date of this uniform system of accounts, as prescribed in such system of accounts.

(d) As of the date a utility becomes subject to this system of accounts, it shall prepare opening entries in accordance with the following provisions:

(1) The accounts prescribed herein shall be opened by transferring thereto the balances carried in the accounts previously maintained. The company is authorized to make such subdivisions, reclassifications, or consolidations of such balances as are necessary to meet the requirement of this system of accounts.

(2) The company shall prepare and keep as supporting records summary statements showing:

(i) the closing balances in each account carried on the books prior to the adoption of this system of accounts;

(ii) the journal entries to effect the transfer of those balances to the accounts prescribed herein, arranging such entries so as to show for each account or subdivision thereof from what account and to what

account each amount was transferred;

(iii) the resultant opening balance of each account under this system of accounts.

(3) The first annual report filed with this commission by a utility covering its operations subsequent to the adoption of this system of accounts shall include copies of the statements referred to in paragraph (2) of this subdivision.

(e) In prescribing this system of accounts, the commission does not commit itself to the approval or acceptance of any item set out in any account for the purpose of fixing rates or in determining other matters before the commission. The prescribed system of accounts is designed to set out the facts in connection with the capitalization, construction, income, expenditures, etc., and therefrom the commission will determine, in connection with such matters as may be under advisement from time to time, just what consideration shall be given to the various items in the several accounts.

.SO DOC 16C-683.1

NYCRR

683.1 Definitions. (a) When used in this system of accounts, unless otherwise indicated:

(1) Accounts or these accounts means the accounts prescribed in this system of accounts.

(2) Amortization means the gradual extinguishment of an amount in an account by prorating such amount over a fixed period, over the life of the asset or liability to which it applies, or over the period during which it is anticipated the benefit will be realized.

(3) Commission means the Public Service Commission of the State of New York.

(4) Control (including the terms controlling, controlled by, and under common control with) means the possession, directly or indirectly of the power to direct or cause the direction of the management and policies of a company, whether such power is exercised through one or more intermediary companies, or alone, or in conjunction with, or pursuant to an agreement with, one or more other companies, and whether such power is established through a majority or minority ownership or voting of securities, common directors, officers, or stockholders, voting trusts, holding trusts, affiliated companies, contract, or any other direct or indirect means.

(5) Cost means the amount of money actually paid (or the current market value of any consideration other than money given) for property or services.

(6) Cost of removal means the cost of demolishing, dismantling,

removing, tearing down, or otherwise disposing of radio-telephone utility plant and recovering the salvage.

(7) Delayed items means items relating to transactions which occurred before the current calendar year. It includes adjustments of errors in income, operating revenue, and operating expense accounts of prior years.

(8) Depreciation, as applied to depreciable radio-telephone utility plant, means the loss of service value not restored by current maintenance caused by factors such as wear and tear, decay, action of the elements, inadequacy, obsolescence, changes in the art, changes in demand and requirements of public authorities. In connection with this definition, note section 684.1 of this Title.

(9) Extraordinary items means items relating to transactions occurring during the current calendar year of such a nature that they are not a part of the regular operating performance of the utility. Accordingly, there will be events and transactions of significant effect which would not be expected to recur frequently and which would distort income if reported other than as extraordinary.

(10) Interconnecting telephone company means any telephone corporation (as that term is defined in the Public Service Law) operating a conventional landline telephone system to which the radio-telephone utility has access through means of automatic or manual connection.

(11) Net salvage value means the salvage value of the property retired, after deducting the cost of removal.

(12) Original cost, as applied to radio telephone utility plant, means the actual installed cost (or the current money value of other consideration other than money) of property in dollars at the time when it was first dedicated to the public use, whether by the accounting company or by predecessors.

(13) Plant retired means plant which has been removed, sold, abandoned, destroyed or otherwise withdrawn from radio-telephone utility service.

(14) Property unit means complete or identifiable items of radio-telephone utility equipment such as a console, a transmitter, a receiver, an antenna, or other complete and distinct units of property, the original cost of which is included in the plant accounts as separate or distinguishable amounts. When these units are retired with or without replacement, they are accounted for by crediting the original cost of the equipment to the plant account in which they are included, with a contra charge to the appropriate accumulated depreciation account.

(15) Radio-telephone utility plant means either intangible or physical property used in radio-telephone utility service, the original cost of which qualifies for inclusion in balance sheet asset account 100, Radio-telephone Plant in Service, or account 101, Radio-telephone Plant Under Construction.

(16) Salvage value means the amount received for property retired, less any expenses incurred in connection with the sale or in preparing the property for sale; or if retained, the amount at which the material recoverable is chargeable to account 114, Equipment and Supplies on Hand--Radio-telephone.

(17) Service life means the period between the date when radio-telephone utility plant is installed and the date of its retirement.

(18) Service value means the difference between the original cost and the net salvage value of radio-telephone utility plant.

.SO DOC 16C-683.2

NYCRR

683.2 Abstracts from law.

(a) Authority for uniform system of accounts. This uniform system of accounts for radio-telephone utilities is established and issued by the public service commission under the following provision of the Public Service Law (chapter 48 of the Consolidated Laws):

Section 95, subdivision 2. "The commission may establish a system of accounts to be used by telegraph corporations and telephone corporations, which are subject to its jurisdiction, and are required to make annual reports to it or classify the said corporations, and prescribe a system of accounts for each class and may prescribe the manner in which such accounts shall be kept. It may also, in its discretion prescribe the form of records to be kept by such corporation. Notice of alterations by the commission in the required method or form of keeping accounts shall be given to such corporations by the commission at least six months before the same are to take effect."

(b) Telephone corporation and telephone line defined.

(1) The Public Service Law defines telephone corporation and telephone line as follows:

Section 2, subdivision 17. "The term 'telephone corporation,' when used in this chapter, includes every corporation, company, association, joint-stock association, partnership and person, their lessees, trustees or receivers appointed by any court whatsoever, owning, operating or managing any telephone line or part of telephone line used in the conduct of the business of affording telephonic communication for hire; excepting, however, any corporation, company, association, joint-stock

association, partnership or person, their lessees, trustees or receivers, who or which do not operate the business of affording telephonic communication for profit."

Section 2, subdivision 18. "The term 'telephone line,' when used in this chapter, includes conduits, ducts, poles, wires, cables, cross-arms, receivers, transmitters, instruments, machines, appliances and all devices, real estate, easements, apparatus, property and routes used, operated or owned by any telephone corporation to facilitate the business of affording telephonic communication."

Section 5-b. "Corporations formed to acquire property or to transact business which would be subject to the provisions of this chapter, and corporations possessing franchises for any of the purposes contemplated by this chapter, shall be deemed to be subject to the provisions of this chapter although no property may have been acquired, business transacted or franchises exercised."

(2) The term company, as used herein, means radio-telephone utility.
.SO DOC 16C-683.3 NYCRR

683.3 Classification of companies.

(a) For accounting purposes, radio-telephone utilities are divided into two classes, as follows:

(1) Class 1. Companies having annual radio-telephone utility operating revenues exceeding \$50,000;

(2) Class 2. Companies having annual radio-telephone utility operating revenues not exceeding \$50,000.

(b) Class 1 companies shall keep all the accounts of this system of accounts which are applicable to their affairs.

(c) It is recommended that class 2 companies keep all the applicable accounts prescribed for class 1 companies.

(d) The initial classification of a company shall be determined by its lowest annual radio-telephone utility operating revenues for the three immediately preceding years, except that if a company's annual radio-telephone utility revenues exceeded \$70,000 in any one of the three years, it shall be a class 1 company. Subsequent changes in classification shall be made when the annual operating revenues show a greater or lesser classification for three consecutive years, except that if a company's annual radio-telephone utility operating revenues exceed \$70,000 in any one of the three years, it shall immediately be classified as a class 1 company. Companies becoming subject to the jurisdiction of the commission and not having revenue data for the three immediately preceding years shall estimate the amount of their annual revenues and adopt the scheme of accounts appropriate for the amount of

such estimated revenues.

.SO DOC 16C-683.4

NYCRR

683.4 Records. (a) The books of account of all radio-telephone utilities shall be kept by the double entry method, on an accrual basis. Each utility shall keep its accounts current and shall close its books at the end of each calendar year.

(b) All books of account, together with records and memoranda supporting the entries in the books of account, shall be kept in such a manner as to support fully the facts pertaining to such entries. The books and records referred to in this section include not only the accounting records in a limited technical sense, but also all other records, reports, correspondence, invoices, memoranda and information useful in determining the facts regarding a transaction.

(c) Utilities may further subdivide any of the accounts, provided that such subdivisions do not impair the integrity of the accounts.

(d) Except as authorized by the commission, all operating, accounting, or financial records, books, invoices, stubs, maps or documents shall be retained permanently.

(e) All such records shall be accessible, at all times, to the authorized representatives of the commission at a location within the State of New York.

(f) Attention is directed to the following extract from the Public Service Law:

Section 102, subdivision 1. "Every telegraph corporation and every telephone corporation, and all officers, agents and employees of any telegraph corporation or telephone corporation shall obey, observe and comply with every order, direction or requirement made by the commission, under authority of this article, so long as the same shall be and remain in force. Any telegraph corporation or any telephone corporation which shall violate any provision of this article, or which fails, omits or neglects to obey, observe or comply with any order or any direction or requirement of the commission, shall forfeit to the people of the State of New York, not to exceed the sum of one thousand dollars for each and every offense; every violation of any such order or direction or requirement, or of this article, shall be a separate and distinct offense, and, in case of a continuing violation, every day's continuance thereof shall be and be deemed to be a separate and distinct offense."

.SO DOC 16C-683.5

NYCRR

683.5 Applicability of Article. This Article shall apply to all radio-telephone utilities operating in any way in New York State except

landline telephone companies which also operate as radio-telephone utilities under the terms of section 645.1(a) of this Title. Said landline companies shall continue to comply with the provisions of the applicable uniform system of accounts for telephone companies.

Sec.

684.1 Depreciation accounting

684.2 Joint operations

684.3 Operating property retired

684.4 Operating revenues, segregation of

684.5 Radio-telephone utility plant accounts

684.6 Work order system recommended

684.7 Items lists

684.8 Transactions with associated companies

.SO DOC 16C-684.1 NYCRR

Section 684.1 Depreciation accounting. (a) Depreciation charges shall be such that the loss in service value of the property shall be distributed proportionately over the property's service life. The depreciation rates shall be reviewed periodically and adjusted as required, so that the depreciation accrual will bear a reasonable relationship to the cost of plant in service, its remaining service life, the estimated net future salvage, and to the balance of the accumulated depreciation.

(b) The utility shall maintain a separate accumulated depreciation subaccount for each depreciable plant account and plant subaccount.

.SO DOC 16C-684.2 NYCRR

684.2 Joint operations. (a) In instances where radio-telephone utility businesses such as sales and repair of electronic and radio equipment, are conducted as part of, or are commingled with the radio-telephone utility operations, a segregation shall be maintained, insofar as practicable, of assets, liabilities, revenues and expenses.

(b) The radio-telephone utility shall be prepared, upon request, to make a reasonable allocation of its investment in assets that are used jointly in the radio-telephone utility operations and nonutility businesses, and expenses that relate to more than one of the operations.

.SO DOC 16C-684.3 NYCRR

684.3 Operating property retired. (a) When an item of radio-telephone utility plant is retired, account 104, Accumulated Provision for

Depreciation of Radio-telephone Plant, shall be charged and the appropriate plant accounts shall be credited with the entire recorded original cost of plant retired regardless of the amount of depreciation which has been accumulated for this particular item of plant, except as provided in subdivision (b) which follows. Account 104, Accumulated Provision for Depreciation of Radio-telephone Plant, shall also be charged with the costs of removal of retired plant, and shall be credited with the salvage value, sales price or other amounts recovered from plant retired.

(b) In rare instances, the unexpected early retirement of a major unit of property which would eliminate or seriously deplete the existing accumulated depreciation may require accounting treatment which differs from that described in subdivision (b) above. In such instances the commission may authorize or order the loss on retirement, less any tax savings, to be charged directly to account 413, Extraordinary and Delayed Items--Net, or to account 117, Deferred Debits, and amortize in future periods. Such accounting treatment shall be used only when specifically authorized or directed by the commission.

.SO DOC 16C-684.4

NYCRR

684.4 Operating revenues, segregation of. Utilities generating significant amounts of revenue through offering multiple services may, at their option, segregate revenues by the various types of one-way and two-way services such as tone only, tone and voice, hand portable, radio-telephone utility and vehicle-mounted radio-telephone utility services.

.SO DOC 16C-684.5

NYCRR

684.5 Radio-telephone utility plant accounts. (a) All radio-telephone utility plant shall be recorded at original cost. Except that original cost of plant acquired from another utility or radio-telephone utility prior to the date a utility becomes subject to this system of accounts may be estimated, if not known. Adjustments to reflect such estimated cost shall be made in accordance with the text of account 102, Radio-telephone Plant Acquisition Adjustments.

(b) Each company shall establish a list of property units having the following characteristics:

(1) Groupings or property units should conform with the plant accounts prescribed in this system of accounts.

(2) Property units should be suitable for retirement purposes and should be neither so large as to cause most replacements to be charged to maintenance, nor so small and numerous as to make accounting and recordkeeping burdensome.

Note: See List A (List A is set out at the end of the system of accounts for Classes 1 and 2, infra.) for suggested list of property units.

.SO DOC 16C-684.6

NYCRR

684.6 Work order system recommended. It is recommended that utilities use a work order system for recording plant additions and retirements. The work orders should contain the date, description and location of each plant addition and retirement, together with an itemized record of materials, labor and other costs, and the plant or other accounts to be charged or credited.

.SO DOC 16C-684.7

NYCRR

684.7 Items lists. Lists of items appearing in the texts of the accounts or elsewhere herein are for the purpose of more clearly indicating the application of the prescribed accounting. The lists are intended to be representative, but not exhaustive. The appearance of an item in a list warrants the inclusion of the item in the account mentioned only when the text of the account also indicates inclusion inasmuch as the same item frequently appears in more than one list. The proper entry in each instance must be determined by the texts of the accounts.

.SO DOC 16C-684.8

NYCRR

684.8 Transactions with associated companies.

(a) Each company shall keep its accounts and records so as to be able to furnish accurately and expeditiously statements of all transactions with associated companies. The statements may be required to show the general nature of the transactions, the amounts involved therein and the amounts included in each account prescribed herein with respect to such transactions. Transactions with associated companies shall be recorded in the appropriate accounts for transactions of the same nature. Nothing herein contained, however, shall be construed as restraining the company from subdividing accounts for the purpose of recording separately transactions with associated companies.

(b) If a clearing account is not maintained for each associated company in which all gross charges by that company are entered and from which they are distributed, all charges of any nature whatsoever by any associated company shall be credited at the gross amounts involved to a subaccount for that company under the appropriate subdivisions of accounts 160, Long-term Debt, and 175, Other Current Liabilities, even though immediately transferred to an account for capital stock, proprietary capital, or other liability. In like manner, in the absence of clearing accounts, all gross charges to any associated company shall

be debited to a subaccount for that company under the appropriate subdivisions of accounts 103, Nonutility Property and Other Assets, and 115, Other Current Assets, even though immediately transferred to an investment account or other asset.

(c) Dividends, rebates, or earnings from associated companies or mutual service companies, representing refunds of the excess charges made by such companies over the cost to them, shall be debited to account 115, Other Current Assets, and shall be credited so far as practicable to the same accounts to which the corresponding charges were made, including proper distinction between construction and operating expenses. Credits applicable to operating expenses, where it is impracticable to allocate them among the accounts to which the corresponding charges have been made, shall be recorded in account 612, Other Expenses.

ASSETS AND OTHER DEBITS

100. Radio-telephone Plant in Service

A. This account shall include the original cost of all radio-telephone plant owned and used by the utility in providing radio-telephone service.

B. This account is the control account for plant account 200 through account 211.

101. Radio-telephone Plant Under Construction

This account shall include the cost of radio-telephone plant in process of construction, but not ready for service.

102. Radio-telephone Plant Acquisition Adjustments

A. This account shall include the difference between (1) the cost to the utility of radio-telephone plant acquired as an operating system by purchase, merger, or otherwise and (2) the net of amounts entered in the plant accounts, the accumulated depreciation account and other appropriate accounts.

B. No transfers shall be made from this account unless prior written authorization has been obtained from the commission.

Note A: The original cost of the acquired plant shall be charged to plant accounts, and accumulated depreciation shall be credited to account 104, Accumulated Provision for Depreciation of Radio-telephone Plant. Any balance (representing the difference between the net original cost of the assets acquired and the cost to the acquiring utility) shall remain in this account.

Note B: When an existing radio-telephone system is acquired the utility shall be obligated to obtain from the vendor all existing records, including records of plant construction dates and costs, and records of accumulated depreciation applicable to such properties.

103. Nonutility Property and Other Assets

A. This account shall include property and other assets owned by the utility, but not used in providing radio-telephone service, for which separate balance sheet accounts have not been provided.

B. The account shall be appropriately subdivided.

ITEMS

Land and buildings not used in radio-telephone operations.

Radio-telephone utility assets transferred to "nonoperative" status.

Investment in securities.

Assets of nonutility businesses operated together with the radio-telephone utility.

Notes receivable not due within one year.

Note A: Amounts due from customers for nonutility service should be included in subaccount 112.2, Accounts Receivable--Nonutility Service.

Note B: Accounting instructions permit the subdivision of accounts, provided that such subdivision does not impair the completeness of the accounts.

104. Accumulated Provision for Depreciation of Radio-telephone Plant

A. This account shall reflect the depreciation and amortization accumulated on plant used in radio-telephone utility service.

B. This account shall be credited with:

(1) Amounts concurrently charged to account 402, Depreciation and Amortization Expense, representing currently accruing depreciation and amortization on radio-telephone utility plant.

(2) Salvage value, sales price, trade-in allowance, insurance settlements and other amounts recovered from plant retired.

C. This account shall be charged with:

(1) Original cost of depreciable radio-telephone utility plant retired.

(2) Cost of removal of plant retired.

D. Charge utility plant lost or stolen by subscribers to this account and credit this account with amounts recovered from subscribers and insurance settlements.

E. The utility shall maintain separate subaccounts corresponding with the depreciable plant accounts in which the accumulated depreciation total is segregated.

F. The utility is restricted in the use of this account to the purposes set forth above. It shall not transfer any portion to retained earnings or proprietary capital or to other accounts without prior written authorization from this commission.

105. Accumulated Provision for Depreciation of Nonutility Property

A. This account shall reflect the depreciation and amortization on property not used in radio-telephone utility operations.

B. This account shall be credited with amounts currently charged to account 411, Other Income Deductions--Nonutility, representing currently accruing depreciation and amortization on property not used in radio-telephone utility operations.

C. This account shall be charged with the amount of depreciation accumulated on items of nonutility property sold, abandoned, or otherwise retired.

111. Cash

A. This account shall include the amount of cash on hand or on deposit in banks.

B. The following subaccounts should be maintained:

111.1 Cash on Hand

111.2 Cash in Bank

112. Accounts Receivable

This account shall include amounts due from customers for radio-telephone and nonutility service and shall be segregated into the following subaccounts:

112.1 Accounts Receivable--Radio-telephone Service

112.2 Accounts Receivable--Nonutility Service

113. Accumulated Provision for Uncollectible Accounts--Credit

A. This account shall be credited with:

(1) Amounts to provide for estimated losses on uncollectible accounts receivable. Concurrent charges will be made to account 612, Other Expenses, for amounts applicable to utility operations and to account 411, Other Income Deductions--Nonutility, for other operations.

(2) Collections of amounts previously considered to be uncollectible, and charged against this account.

(3) Unclaimed deposits that may lawfully be written off as unrefundable, because of the inability to locate the rightful owner or for some other reason. Concurrent charges will be made to account 172, Customers' Deposits.

114. Equipment and Supplies on Hand--Radio-telephone

A. This account shall include the cost of equipment and supplies on hand, purchased for use in radio-telephone construction installation, or repair work.

B. The cost shall include, when practicable, transportation charges, sales and use taxes and other directly assignable costs. Cash discounts realized on purchases shall be credited to this account.

C. Reusable equipment which is retired from plant and returned to the equipment and supplies inventory shall be charged to this account and credited to account 104, Accumulated Provision for Depreciation of Radio-telephone Plant. Identifiable units which have been removed from service shall be carried in inventory at original cost. Items of small value whose original cost cannot be readily determined shall be carried in inventory at current prices new. Scrap equipment shall be carried in inventory at estimated scrap value.

D. Inventories of equipment and supplies shall be taken at least annually and the necessary adjustments shall be made to bring this

account balance into agreement with the actual quantities on hand.

E. This account shall not include items in stock which are includible in account 207, Mobile Equipment for One-Way Service, or account 208, Mobile Equipment for Two-Way Service.

115. Other Current Assets

A. This account shall include the book cost of all notes receivable, payable on demand or maturing within one year.

B. This account shall include all other current assets not provided for in other balance sheet accounts.

C. Separate subaccounts shall be maintained for each class of current asset* included in this account.

* So in original. "asset" should be "assets".

Note: Notes receivable not due within one year should be recorded in account 103, Nonutility Property and Other Assets.

116. Prepayments

This account shall include prepayments of rents, taxes, insurance, and similar expenses for which payment has been made in advance of the period to which they apply. As the periods covered by such prepayments expire, this account shall be credited and the proper operating expense or other accounts shall be charged with the amounts applicable to the current period.

117. Deferred Debits

A. This account shall include such items as expenses of security issues, bond discount, items in suspense, and extraordinary cost, net of tax effect, not chargeable to operating expenses in the current period.

B. This account shall be appropriately subdivided.

LIABILITIES AND OTHER CREDITS

150. Common Stock

A. This account shall be credited with the total par value or stated value of common stock outstanding.

B. Premiums related to the issue of common stock shall be carried in a separate subaccount of account 153, Other Paid-in Capital.

Note: No debits shall be made to this account for nonpar stock except for the retirement of the stock or for amounts distributed to stockholders in liquidation.

151. Preferred Stock

A. This account shall be credited with the total par value or stated value of preferred stock outstanding.

B. Premiums and discounts related to the issue of preferred stock shall be carried in separate subaccounts of account 153, Other Paid-in Capital.

Note: No debits shall be made to this account for nonpar stock except for the retirement of the stock or for amounts distributed to stockholders in liquidation.

152. Retained Earnings (For Corporations Only)

A. This account shall reflect corporate earnings retained in the business.

B. This account shall be credited with net income.

C. This account shall be charged with:

(1) Net losses

(2) Dividends

153. Other Paid-in Capital (For Corporations Only)

A. This account shall include all paid-in capital not derived from earnings. It shall include such items as premiums and discounts related to the issuance of capital stock, donations to the utility of its capital stock, paid-in capital arising from the forgiveness of debt of the utility, paid-in capital arising out of a reorganization of the utility, or in connection with its recapitalization.

B. Each type of paid-in capital shall be carried in a separate subaccount.

154. Proprietary Capital (For Proprietorships and Partnerships Only)

A. This account shall be credited with the investment of a sole proprietor, or partners, in an unincorporated radio-telephone utility.

B. A separate subaccount shall be maintained for each partner.

C. At the end of each calendar year the net income or loss for the year shall be entered in this account.

D. All withdrawals from the business by the owner or partners other than as compensation or services performed shall be charged to subaccount 154.1, Proprietary Drawings. This subaccount shall be closed into account 154, Proprietary Capital (For Proprietorships and Partnerships Only) at the end of each accounting period.

Note: Amounts designated by a noncorporate owner or partner as a "salary" representing fair and reasonable compensation for services performed shall be charged to operating expense subaccount 607, Management Salaries, or to radio-telephone plant accounts when appropriate.

160. Long-term Debt

A. This account shall include all evidences of indebtedness payable more than one year from date of issue.

B. A separate subaccount may be maintained for each obligation outstanding.

Note A: Prior authorization must be obtained from this commission

before any long-term indebtedness may be incurred by the utility (Public Service Law, Section 101).

Note B: The current or matured portion of the long-term debt should be recorded in account 170, Notes and Other Debt Payable--Short-Term.

170. Notes and Other Debt Payable--Short-Term

This account shall include the face value of all notes, or other similar evidences of indebtedness, payable on demand, or which by their terms are payable within one year from the date of issue and the current or matured portion of long-term debt.

171. Accounts Payable

This account shall include all amounts payable by the utility within one year, and which are not provided for in other accounts.

172. Customers' Deposits

A. This account shall include all amounts deposited with the utility by customers as security for payment of bills and for the return of the utility's radio-telephone equipment.

B. Charge this account and credit account 113, Accumulated Provision for Uncollectible Accounts--Credit with unclaimed deposits that may lawfully be written off as unrefundable because of the inability to locate the rightful owner or for some other reason.

C. Charge this account and credit account 104, Accumulated Provision for Depreciation of Radio-telephone Plant, with the amount of the deposit that may lawfully be used to defray the cost of utility plant lost or stolen by subscribers.

173. Taxes Accrued

This account shall be credited with the amount of taxes accrued during the accounting period prior to their payment. It should include sales taxes, excise taxes, property taxes, employer's portion of payroll taxes and income taxes.

Note: It is recommended, but not required, that a separate subaccount be maintained for each type of tax.

174. Interest Accrued

This account shall include the amount of all interest accrued on liabilities of the utility. Supporting records shall be maintained so as to show the amount of interest accrued on each obligation.

175. Other Current Liabilities

This account shall include the amount of all other current liabilities not provided for elsewhere, appropriately designated and supported so as to show the nature of each liability.

176. Other Deferred Credits

A. This account shall include advance billings, unamortized premium on

debt, items in suspense, net of tax effect, and other credit items, net of tax effect, not provided for in other accounts.

B. This account shall be appropriately subdivided.

RADIO-TELEPHONE PLANT ACCOUNTS

200. Organization

201. Other Intangible Plant

202. Land

203. Buildings and Towers

204. Leasehold Improvements

205. Control and Message Center Equipment

206. Fixed Station Equipment

207. Mobile Equipment for One-Way Service

208. Mobile Equipment for Two-Way Service

209. Shop and Test Equipment

210. Vehicles

211. Office Furniture and Equipment

200. Organization

This account shall include all fees paid to Federal or State governments for the privilege of incorporation and expenditures incident to organizing a corporation, partnership, or other form of business enterprise.

ITEMS

(1) Fees and expenses for incorporation.

(2) Fees and expenses for mergers or consolidations.

(3) Stock and minute books and corporate seal.

Note A: This account shall not include any discounts upon securities issued or assumed; nor shall it include any costs incident to negotiating loans, selling bonds or other evidences of debt, or expenses in connection with the authorization, issuance or sale of capital stock.

Note B: When charges are made to this account for expenses incurred in mergers, consolidations, or reorganizations, amounts previously included in this account on the books of the various companies concerned shall not be carried over.

201. Other Intangible Plant

A. This account shall include the original cost of the Federal Communications Commission station license, and similar rights which are necessary in the conduct of the utility's radio-telephone operations.

B. Costs of periodic license renewals are chargeable to operating expenses.

202. Land

This account shall include the original cost of land and easements

used in connection with radio-telephone utility operations.

203. Buildings and Towers

This account shall include the original cost of buildings and towers used in radio-telephone utility operations including the cost of all permanent fixtures, masts, and antenna supporting equipment.

204. Leasehold Improvements

A. This account shall include the cost to the utility of improvements to property used in its radio-telephone operations which is held under a lease.

B. The leasehold improvement shall be amortized over either the life of the lease or the life of the leasehold improvement, whichever of these lives is shorter, by credits to this account and charges to account 402, Depreciation and Amortization Expense.

205. Control and Message Center Equipment

A. This account shall include the original cost of radio-telephone control consoles, equipment and wiring, interconnect equipment and associated apparatus used in receiving, forwarding and terminating calls and messages and for other control purposes. Monitoring and measurement equipment installed for regular control purposes also shall be recorded in this account.

B. Equipment used exclusively for private radio-telephone service shall be recorded in a separate subaccount of this account.

206. Fixed Station Equipment

A. This account shall include the original cost of transmitters, receivers, antennas, and associated equipment and wiring used in base station and repeater operations. Microwave facilities and other equipment used for control of base station operation also shall be recorded in this account.

B. Equipment used exclusively for private radio-telephone service shall be recorded in a separate subaccount of this account.

207. Mobile Equipment for One-Way Service

A. This account shall include the original cost (noninstalled) of equipment used in providing one-way signaling or paging service, including receivers, decoders, mobile antennas and associated apparatus which is mounted in vehicles or is hand portable.

B. This account shall also include mobile units in stock.

C. This account shall be maintained on a group basis, showing the equipment grouped by year of purchase, by manufacturer and by model.

D. Records shall be maintained in sufficient detail to show by acquisition date the total number of units and related costs for each type or model of equipment included in this account.

E. Equipment used exclusively for signaling or paging in connection with private radio-telephone systems shall be recorded in a separate subaccount.

Note: Charge account 612, Other Expenses, with the cost of installing and removing one-way service units and credit account 501.3, Installation and Special Charges, for the revenue obtained for installing and removing one-way service units.

208. Mobile Equipment for Two-way Service

A. This account shall include the original cost of equipment used in providing two-way radio-telephone service such as transmitters, receivers, decoders, mobile antennas, and associated apparatus and wiring which is mounted in vehicles or is hand portable.

B. Equipment used exclusively for private radio-telephone service shall be recorded in a separate subaccount of this account.

C. This account shall also include mobile units in stock.

D. This account shall be maintained on a group basis, showing the equipment grouped by year of purchase, by manufacturer, and by model.

Note: Charge account 612, Other Expenses, with the cost of installing and removing two-way service units and credit account 502.3, Installation and Special Charges, for the revenue obtained for installing and removing two-way service units.

209. Shop and Test Equipment

A. This account shall include the original cost of instruments, tools, and other equipment located in offices, shops, or vehicles, used in testing, maintaining and constructing radio-telephone plant.

B. Small tools and instruments or other equipment costing \$50 or less may be charged directly to operating expense at the time of purchase.

210. Vehicles

A. This account shall include the original cost of transportation equipment used in radio-telephone testing, maintenance, construction work, sales and administration work.

B. Records shall be maintained to show the original cost of each vehicle.

211. Office Furniture and Equipment

This account shall include the original cost of office furniture and equipment owned and used by the radio-telephone utility.

ITEMS

- (1) Adding Machines
- (2) Addressing Machines
- (3) Calculating Machines
- (4) Postage Meter Machines

- (5) Desks, Typewriters
- (6) Filing Cabinets
- (7) Book Cases, Tables and Chairs

INCOME ACCOUNTS
OPERATING INCOME

- 400. Operating Revenues
- 401. Operating Expenses
- 402. Depreciation and Amortization Expense
- 403. Income Tax
- 404. Other Operating Taxes

OTHER INCOME AND DEDUCTIONS

- 410. Other Income--Nonutility
- 411. Other Income Deductions--Nonutility
- 412. Interest Expense
- 413. Extraordinary and Delayed Items--Net

1. OPERATING INCOME ACCOUNTS

- 400. Operating Revenues

This account shall include the total revenues for the accounting period that are provided for in the operating revenue accounts 501 to 504 inclusive.

- 401. Operating Expenses

This account shall include the total expenses for the accounting period that are provided for in the operating expense accounts 600 to 612 inclusive.

- 402. Depreciation and Amortization Expense

This account shall be charged with that portion of the depreciation accrual credited to account 104, Accumulated Provision for Depreciation of Radio-telephone Plant, applicable to all classes of depreciable radio-telephone plant. This account shall also be charged with amortization of utility leasehold improvements.

Note A: See General Instruction ò 691.1 for more detailed instructions on depreciation accounting.

Note B: Depreciation and amortization on property not used in radio-telephone operations shall be charged to account 411, Other Income Deductions--Nonutility.

- 403. Income Tax

Incorporated utilities only shall charge to this account accruals of Federal income taxes for the current calendar year, computed on the basis that only radio-telephone operations amounts accounted for in the current year and interest expense allocable to such operations entered into taxable income.

Note: Personal income taxes of owners of unincorporated utilities should not be entered in utility accounts.

404. Other Operating Taxes

A. This account shall include all taxes, other than Federal income taxes, properly chargeable to radio-telephone operations. Among the taxes includible in this account are property, gross revenue or gross receipts, franchise, capital stock, social security and unemployment and all other taxes assessed by Federal, State, county, municipal or other local governmental authorities.

B. Taxes on property owned by the utility but not used in providing radio-telephone service should be charged to account 411, Other Income Deductions--Nonutility.

C. The following subdivisions of this account shall be maintained:

404.1 Property Taxes

404.2 Social Security and Unemployment Taxes

404.3 Other Federal, State and Local Taxes

2. OTHER INCOME AND DEDUCTIONS

410. Other Income--Nonutility

This account shall include all income not includible in operating revenue accounts 501 through 504, Operating Revenues.

ITEMS

1. Interest Income

2. Dividend Income

3. Gross Income for Nonradio-telephone Utility Operations

4. Net Gain on Sale of Nonradio-telephone Utility Property

411. Other Income Deductions--Nonutility

This account shall include all expenses, depreciation charges and taxes not related to radio-telephone utility operations.

ITEMS

1. Uncollectible accounts applicable to nonutility operations.

2. Contributions for charitable or community welfare purposes.

3. Expenses, including depreciation, amortization and taxes on nonradio-telephone utility property.

4. Country club dues, service club dues and items of similar nature.

5. Federal income taxes (plus or minus) related to the net of nonutility income.

412. Interest Expense

This account shall include all interest expense of the business, plus or minus net amortization of issue expenses, discount and premiums on debt issues.

413. Extraordinary and Delayed Items--Net

This account shall include extraordinary and delayed items of such size that their inclusion in regular income accounts would seriously distort those accounts. Include also the income tax effect (plus or minus) of the items included herein.

OPERATING REVENUE ACCOUNTS

501. One-Way Service Revenues (Signaling or Paging)

Subaccounts:

501.1 Minimum Message Service

501.2 Excess Over Minimum Calls

501.3 Installation and Special Charges

501.4 Equipment Rental

501.5 Equipment Maintenance Revenues

501.6 Interconnected Telephone Service

502. Two-Way Service Revenues

Subaccounts:

502.1 Minimum Message Service

502.2 Excess Over Minimum Calls

502.3 Installation and Special Charges

502.4 Equipment Rental

502.5 Equipment Maintenance Revenues

502.6 Transient Service

502.7 Interconnected Telephone Service

503. Private Radio Service Revenues

504. Other Utility Operating Revenues

ONE-WAY SERVICE REVENUES

501. One-Way Service Revenues (Signaling or Paging)

A. This account shall include all revenues from one-way service, including revenues from signaling and paging services, and shall be segregated by using the following subaccounts:

501.1 Minimum Message Service

This subaccount shall include all revenues from basic minimum message service.

501.2 Excess Over Minimum Calls

This subaccount shall include revenues from charges for additional messages over the basic monthly allowance.

501.3 Installation and Special Charges

This subaccount shall include the revenues received for the installation of one-way equipment. It also shall include revenues received for special services not charged for on a regular monthly or periodic basis, such as special maintenance charges, repair service mileage charges, disconnect and reconnect charges.

Note: Maintenance charges which are charged on a regular monthly or periodic basis should be included in subaccount 501.5, Equipment Maintenance Revenues.

501.4 Equipment Rental

This subaccount shall include revenues from the rental of one-way equipment to subscribers.

501.5 Equipment Maintenance Revenues

This subaccount shall include all revenues from maintenance of one-way equipment that is charged for on a regular monthly or periodic basis.

Note: Irregular maintenance charges which are not charged for on a regular monthly or periodic basis should be included in subaccount 501.3, Installation and Special Charges.

(B) The subaccounts may be further subdivided, if desired, to conform with the reporting requirements of the Federal Communications Commission.

501.6 Interconnected Telephone Service

This subaccount shall include all revenues received from subscribers for interconnected telephone services charged the utility under account 604.4, Interconnection Charges.

TWO-WAY SERVICE REVENUES

502. Two-Way Service Revenues

A. This account shall include all revenues from two-way service, and shall be segregated by using the following subaccounts:

502.1 Minimum Message Service

This subaccount shall include all revenues from basic minimum message service. It also shall include revenues from short-term users when the service is not considered transient message revenue as described in subaccount 502.6, Transient Service.

502.2 Excess Over Minimum Calls

This subaccount shall include revenues from charges for additional messages over the basic monthly allowance.

502.3 Installation and Special Charges

This subaccount shall include the revenues received for the installation of two-way equipment. It also shall include revenues received for special services not charged for on a regular monthly or periodic basis, such as special maintenance charges, repair service, mileage charges, disconnect and reconnect charges.

Note: Maintenance charges which are charged on a regular monthly or periodic basis should be included in subaccount 502.5, Equipment Maintenance Revenues.

502.4 Equipment Rental

This subaccount shall include revenues from the rental of two-way equipment to subscribers.

502.5 Equipment Maintenance Revenues

This subaccount shall include all revenues from maintenance of two-way equipment that is charged for on a regular monthly or periodic basis.

Note: Irregular maintenance charges which are not charged for on a regular or periodic basis should be included in subaccount 502.3, Installation and Special Charges.

502.6 Transient Service

This subaccount shall include revenues from message service furnished to a subscriber of another radio-telephone utility when that subscriber is temporarily located within the service area of the reporting radio-telephone utility.

Note: Revenues from short-term users, who are not subscribers of other radio-telephone utilities, should be included in subaccount 502.1, Minimum Message Service.

502.7 Interconnected Telephone Service

502.7.1 Message Service Charges

Credit this subaccount for revenues received from radio-telephone subscribers for interconnected multmessage unit and toll messages charged the radio-telephone utility under account 604.4, Interconnection Charges, subparagraph (3).

502.7.2 Other Line Revenue

A. Credit this subaccount for revenues received from radio-telephone subscribers for radio-telephone utility's other line (added on) rate(s) per message for interconnected local, foreign exchange and toll services.

B. The subaccounts may be further subdivided, if desired, to conform with the reporting requirements of the Federal Communications Commission.

503. Private Radio Service Revenues

A. This account shall include all revenues from private radio service.

B. This account may be further subdivided, if desired, to conform with the reporting requirements of the Federal Communications Commission.

504. Other Utility Operating Revenues

A. This account shall include all revenues from utility operations not provided for elsewhere, such as revenues from advertising other than in directories; overcharges on radio-telephone service; and profits realized from customer work performed for others incident to the utility's radio-telephone operations.

B. This account may be further subdivided, if desired, to conform with

the reporting requirements of the Federal Communications Commission.

OPERATING EXPENSE ACCOUNTS

- 600. Maintenance and Repair Expense
- 601. Rental Expense
- 602. Operators Wages
- 603. Contracted Operator Service Expense
- 604. Interconnecting Telephone Company Charges
- 605. Office Salaries
- 606. Sales and Advertising Expenses
- 607. Management Salaries
- 608. Office Supplies and Expense
- 609. Insurance Expense
- 610. Accounting, Legal and Other Services
- 611. Vehicle Expense
- 612. Other Expenses

600. Maintenance and Repair Expense

A. This account shall include the cost of labor, materials and supplies used, and contract maintenance services for the maintenance, repair, moves and charges of mobile and fixed station equipment. The labor and material cost of replacing a property unit component shall be charged to maintenance expense.

B. The maintenance and repair expenses shall be segregated by using the following accounts:

600.1 Labor

600.2 Materials and Supplies

600.3 Contracted Maintenance (includes materials and services furnished by another person or company on a flat rate, lump sum amount, or other basis.)

Note: The cost of installing* and removing mobile units shall be charged to account 612, Other Expenses.

* So in original. "installiting" should be "installing".

601. Rental Expense

A. This account shall include rental payments for equipment, real estate and other properties used in radio-telephone utility operations. Examples of such expenses are space rentals in buildings, attachments on pole lines, tower space, antenna space, and space for transmitter, receiver and microwave facilities.

B. Rental expense shall be segregated into the following subaccounts:

601.1 Rental of Mobile Equipment

601.2 Rental of Fixed Station Equipment and Sites. Includes--land, building, antenna space and equipment.

Note: Rental expenses for leased land-line facilities should be included in account 604, Interconnecting Telephone Company Charges. Rental expenses for office space and equipment should be included in account 608, Office Supplies and Expense, and rental expenses for vehicles should be included in account 611, Vehicle Expense.

602. Operators Wages

This account shall include the pay to operators handling messages of the radio-telephone utility.

603. Contracted Operator Service Expense

This account shall include operator services furnished to the utility by outside parties on a contract basis.

604. Interconnecting Telephone Company Charges

Interconnecting telephone company charges shall be segregated by using the following subaccounts:

604.1 Rental of Radio-Telephone Interconnecting Facilities

Debit this account with amounts charged by the interconnecting telephone company to the utility for installation and/or move and change charges, private branch exchange facilities, supplemental or special equipment, and other related facilities under special contracts.

604.2 Rental of Radio Control Telephone Lines

604.3 Company Business Office Telephone Service

604.4 Interconnection Charges

A. Debit this account with the monthly settlement amounts charged by the interconnecting telephone company for:

(1) Interconnection circuits to the local exchange (either message rate or flat rate as applicable from tariff for the interconnecting telephone company's local exchange).

(2) Interconnection circuit(s) to each foreign exchange (mileage and exchange charges under the interconnecting telephone company's filed tariff).

(3) The interconnecting telephone company's filed rate charge for each interconnected message sent paid or received collect, by the radio-telephone utility.

605. Office Salaries

This account shall include the salaries of all employees (other than the manager, owner or principal stockholders, and telephone operators) whose time is utilized in billing, collecting, record keeping, or general office work.

Note: Fees paid to independent accountants, attorneys and engineers should be charged to account 610, Accounting, Legal and Other Services.

606. Sales and Advertising Expenses

This account shall include sales and advertising expenses incurred in canvassing for new business, including salaries and commissions paid to salesmen and sales agents.

607. Management Salaries

A. This account shall include the portion of salaries of managers, owners, partners or principal stockholders of a radio-telephone utility chargeable to utility operations.

B. No portion of such salaries chargeable to utility operations shall be allocated to other expense accounts, even though the owner or manager may perform other duties (e.g. operating, billing, collecting, maintenance) in addition to managing the utility.

Note A: Drawings by partners or owners of noncorporate utilities in addition to amounts designated as "salaries" for operating the utility shall be charged to subaccount 154.1, Proprietary Drawings.

Note B: The portion of salaries of managers, owners, partners or principal stockholders assignable to radio-telephone plant construction shall be charged to account 100, Radio-telephone Plant in Service, or to account 101, Radio-telephone Plant Under Construction, as appropriate.

608. Office Supplies and Expense

This account shall include the cost of office supplies and expenses, including postage, printing, stationery, subscriber billing forms, general accounting supplies, addressing machine supplies, repair, maintenance and rental of office and equipment, utilities other than telephone service, and other office expenses.

Note: Rental expenses for vehicles used in radio-telephone utility operations should be included in account 611, Vehicle Expense.

609. Insurance Expense

This account shall include all insurance costs applicable to the accounting period, including Workmen's Compensation, liability, vehicle, fire and theft or robbery insurance.

Note A: Insurance dividends and refunds shall be credited to this account.

Note B: The cost of policies extending over a period of more than one year shall be prorated over the period of the coverage.

610. Accounting, Legal and Other Services

This account shall include the fees of independent accountants, engineers, lawyers, and similar professional consultants chargeable to utility operations.

611. Vehicle Expense

This account shall include all truck, automobile, construction equipment and other vehicle expenses chargeable to utility operations,

except depreciation and insurance.

ITEMS

- (1) Tires
- (2) Batteries
- (3) Lubrication
- (4) Fuel
- (5) Oil
- (6) License Fees
- (7) Vehicle and equipment rentals
- (8) Repairs

612. Other Expenses

This account shall include all expenses not includible in other operating expense accounts.

ITEMS

- (1) Subscriptions
- (2) Employee Pensions
- (3) Regulatory Commission Expense
- (4) Association Dues
- (5) Uncollectible Accounts
- (6) Collection Agency Fees

Note A: Uncollectible accounts shall be entered in a separate subaccount of this account.

Note B: Also see account 113, Accumulated Provision for Uncollectible Accounts--Credit.

Note C: Charge utility plant equipment lost, stolen or damaged by a subscriber to account 104, Accumulated Provision for Depreciation of Radio-telephone Plant.

LIST

SUGGESTED LIST OF PROPERTY UNITS {1}

Sec.

685.1 Utility contract and procurement procedures

685.2 Filing of changes in procedures

.SO DOC 16C-685.1

NYCRR

Section 685.1 Utility contract and procurement procedures.

(a) Every telephone and telegraph corporation subject to the jurisdiction of this Commission with annual gross operating revenues in excess of \$2,000,000 shall file, in accordance with the requirements of § 3.5 of this Title, with the Commission its procedures which govern the contracting for and procurement of services, equipment or materials to be used in its utility operations. These statements shall:

(1) Describe the circumstances in which cost estimates will be prepared and the procedures for awarding a contract which exceeds such an estimate. Such estimates, when prepared:

(i) Shall be related to market conditions and trends as well as the utility's own experience; and

(ii) Where competitive bidding is employed, shall remain confidential until after the bids are opened.

(2) Where competitive bidding is employed, specify the procedures used in preparing and maintaining lists of qualified bidders by geographical area, type of material or service provided, and degree of capability, including:

(i) The criteria used for including or excluding bidders;

(ii) A description of the circumstances in which all bidders on such a list will not be solicited in instances where the utility uses competitive bidding; and

(iii) A provision that in the absence of such a list, all requests to be allowed to bid that are not honored, shall be reviewed within the utility.

(3) Where competitive bidding is employed, specify the procedure to be employed to ensure that sealed bids are opened at the time and place specified.

(4) Specify the procedure employed in making awards in the absence of bids or, where competitive bidding is employed, to a person other than the low bidder.

(5) Specify the procedures employed in reviewing contract expenditures, relating such expenditures to any cost estimate, the amount of the award and existing market conditions.

(6) Include a requirement for disclosure to the utility of any ownership or beneficial interest in potential suppliers by employees involved in specifying or procuring services, equipment and materials, which requirement shall provide that no employee in the purchasing department nor anyone with authority to review or approve a purchasing decision shall have such an interest, except in accordance with such rules as the utility may develop and file with this Commission.

.SO DOC 16C-685.2 NYCRR

685.2 Filing of changes in procedures.

Each such telephone and telegraph corporation shall file with this commission any change in these procedures at least 30 days before they are to be effective, unless otherwise authorized by this commission.

PART 686

CONTRACTS OR AGREEMENTS FOR THE CONSTRUCTION,
IMPROVEMENT,

EXTENSION OR MAINTENANCE OF UTILITY PLANTS

(Statutory authority: Public Service Law, § 115)

Sec.

686.1 Filing of proposed contract

686.2 Subcontract on cost-plus basis

686.3 Emergency contract

686.4 Quarterly filing of contract

686.5 Waiver of rule

.SO DOC 16C-686.1 NYCRR

Section 686.1 Filing of proposed contract.

(a) Every public utility company subject to the jurisdiction of this Commission shall file, in accordance with the requirements of § 3.5 of this Title, with this Commission one copy of every proposed cost-plus contract or agreement, including those contracts or agreements in which the payment to be made by the utility is based on time and material consumed regardless of the number of units completed, for the construction, improvement or extension of its plant, works or system exceeding in amount \$100,000 in any calendar year, and a list of any other offers received, and such contract or agreement shall not become effective until it has been on file with this Commission for 30 days, or until the Commission has notified the utility that such contract or agreement may be made effective immediately. If during the 30 day period, the Commission determines that it is in the public interest for the contract or agreement for the work proposed to be performed to be let after public bidding, the Commission will notify the public utility company, and the filed contract or agreement will not become effective. In such circumstances the public utility shall proceed to make a public offering of the proposed work in accordance with the direction of the Commission.

(b) When the accumulated amount of all other such contracts or agreements awarded to a single contractor in any calendar year has exceeded \$100,000, a list of such contracts, including any other offers

received, shall be filed, in accordance with the requirements of § 3.5 of this Title, with the Commission by March 1 of the succeeding year.

.SO DOC 16C-686.2

NYCRR

686.2 Subcontract on cost-plus basis.

In view of the fact that a so-called subcontract covering any part of the work to be performed under a cost-plus contract or agreement entered into by a public utility company is, in effect, the contract or agreement of the public utility company within the meaning of § 115 of the Public Service Law, every such subcontract on a cost-plus basis, proposed to be let under a principal contract or agreement which is subject to § 686.1 hereof, shall be filed, in accordance with the requirements of § 3.5 of this Title, with the Commission in accordance with the requirements of provisions of such section. All such contracts or agreements shall contain suitable provisions to give effect to the provisions of this Part. This section shall not apply to a subcontract which provides by its terms that the maximum payment thereunder shall not exceed the sum of \$5,000.

.SO DOC 16C-686.3

NYCRR

686.3 Emergency contract.

In case a storm, flood, accident or similar emergency requires that a contract or agreement be made without complying with the foregoing provisions of this Part in order to maintain or restore the company's service, immediate notice shall be given to the Commission by telephone of the making of such contract or agreement, and a copy thereof shall be filed, in accordance with the requirements of § 3.5 of this Title, as soon as possible, but not later than 10 days after the making thereof, and such contract or agreement shall be exempted from the other provisions of this Part.

.SO DOC 16C-686.4

NYCRR

686.4 Quarterly filing of contract. Every public utility company subject to the jurisdiction of this commission shall file with this commission quarterly, one copy of every contract or agreement for the construction, improvement, extension or maintenance of its plant, works or system exceeding in amount \$1,000,000 in any calendar year, and a list of any other offers received.

.SO DOC 16C-686.5

NYCRR

686.5 Waiver of rule. Any public utility company may apply to this commission for a waiver or modification of all or part of the requirements of this Part upon a showing that compliance therewith would be impracticable or unduly burdensome in connection with a particular project, contract or agreement.

NYCRR

Section 687.1 Stenciling and numbering poles (Second District).

(a) Each and every electrical corporation, municipality, telephone corporation, telegraph corporation, railroad corporation, and street railroad corporation owning poles, towers, or frames, hereinafter termed structures, in streets, highways, or public places, or on private rights of way, for supporting and carrying overhead electric wire system for the transmission or distribution of electric energy for light, heat, or power, or for the operation of electric cars or trains, or for telephoning or telegraphing, or for supporting electric lamps or fixtures, shall on or before January 1, 1913, stencil each such structure, except as hereinafter provided, as follows: to wit,

(1) with the initials of its name, abbreviation of its name, corporate symbol, or other distinguishing mark by which the owner of each such structure readily and definitely may be determined;

(2) with a number by which the location of each such structure may be described.

(b) The manner of making such stencils shall be preferably with paint, otherwise with metal tags, badges, or stamps as each such corporation may elect to use; and that the characters of the stencil shall be of such size and so spaced and hereafter maintained as to be easily read from the surface of the ground at a distance of six feet from the structure.

(c) In the case of two or more companies jointly owning any such structure, the distinguishing mark of each company shall be placed on such structure but not more than one number necessarily shall be placed thereon.

(d) In the case of such structures carrying or supporting overhead trolley wires where there is a double line of structures, one on each side of the railroad track, such stencil need be affixed to but one line of such structures.

(e) In the case of such structures erected upon private rights of way or on the public highways, of such character that the construction may be deemed to be a through or trunk line, such stencil need be affixed

only to every fifth structure; provided however that each and every such structure situate within the limits of any city, village, or hamlet shall be stenciled, except as otherwise provided in subdivision (d) herein. Where every fifth structure is stenciled, the commission suggests that that number of the mile from the starting point of the construction be placed on the structure stenciled, and also the number of every fifth structure within that mile. And the commission further suggests that all such structures situate within the limits of every city, village, and hamlet shall be numbered consecutively along each street, avenue, or highway for the distance upon which structures are located.

(f) The requirements herein shall apply to all existing and future constructed structures and to all changes in the ownership of structures.

(g) Every such corporation shall file with this commission on or before May 1, 1912, a statement showing-

(1) The initials, abbreviations of name, corporate symbol, or other distinguishing mark intended to be used;

(2) The means of stenciling to be employed: to wit, paint, metal tags, badges, or stamps;

(3) The method intended to be followed in numbering structures: to wit, within the limits of cities, villages, and hamlets; and upon through or trunk lines.

Note: The above section 687.1 was originally promulgated as Case No. 2499 (Second District).

PART 689

TELEPHONE FACILITY CONSTRUCTION--CLEARANCE FROM
SUBSURFACE GAS AND

LIQUID PETROLEUM PIPELINE FACILITIES

(Statutory authority: Public Service Law, §§ 91, 94, 98)

Sec.

689.1 Definitions

689.2 Clearance requirements of new telephone facilities from gas and liquid petroleum pipelines

689.3 Clearance requirements of subsurface telephone facilities constructed to replace existing facilities

.SO DOC 16C-689.1

NYCRR

Section 689.1 Definitions.

When used in this Part (16 NYCRR Part 689), the terms set forth in this section shall be defined as follows:

(a) Subsurface telephone facilities means all underground cables, conduits, manholes or any other subsurface structures, including poles and anchors, utilized to furnish telephone service and owned or operated by any telephone company under the jurisdiction of the New York State Public Service Commission.

(b) Gas transmission facilities means gas pipelines that:

(1) Transport gas from a production or underground storage facility to a distribution center or underground storage facility; or

(2) Transport gas within a storage field, or

(3) Operate at a pressure of 125 psig or more. (See also 16 NYCRR 255.17 (d)).

(c) Gas distribution facilities means gas pipelines other than gas transmission facilities and includes gas service lines. (See also 16 NYCRR 255.17(e)).

(d) Gas service lines means gas pipelines that transport gas from a common source of supply to the outlet of the customer meter set assembly, or to the first fitting inside the wall of the customer's structure through which the service line enters, whichever is further upstream. (See also 16 NYCRR 255.17 (f)).

(e) Liquid petroleum pipeline means a pipeline that either:

(1) Transports liquid petroleum from a production or storage facility to a distribution center or storage facility, or

(2) Transports petroleum within a production field, and

(3) Is certified to operate at a pressure of 200 psig or more. (See also 16 NYCRR 258.1(g) and 258.1(j).)

(f) New means constructed on or after July 18, 1974 and utilized to provide services not previously provided or to supplement existing services.

.SO DOC 16C-689.2

NYCRR

689.2 Clearance requirements of new telephone facilities from gas and liquid petroleum pipelines. (a) All new subsurface telephone facilities shall be constructed with a standard minimum 12 inches of clearance from gas transmission facilities.

(b) All new subsurface telephone facilities shall be constructed with a standard minimum six inches of clearance from gas distribution facilities.

(c) All new subsurface telephone facilities shall be constructed with a standard minimum 12 inches of clearance from liquid petroleum pipelines.

(d) The standard minimum clearances specified in subdivisions (a), (b), and (c) of this section, when not obtainable through practical means, may be reduced to an absolute minimum of four inches, provided that such reduction is agreeable to all companies involved and that protective materials suitable to all companies are placed between the telephone and gas or liquid petroleum facilities for the entire length of such reduced clearances.

(e) All new subsurface telephone facilities shall be constructed with a standard minimum four inches of clearance from gas service lines, except that where four inches of clearance is not obtainable through practical means it may be reduced to an absolute minimum of two inches, provided such reduction is agreeable to all companies involved and that protective materials suitable to all companies are placed between the telephone facilities and the gas service lines for the entire length of such reduced clearances.

.SO DOC 16C-689.3

NYCRR

689.3 Clearance requirements of subsurface telephone facilities constructed to replace existing facilities. Telephone facilities constructed on or after July 18, 1974, to replace existing telephone facilities are subject to the clearance requirements of section 689.2 of this Part.

.SO DOC 16C-CHVII

NYCRR

CHAPTER VII

Provisions Affecting Two or More Kinds of Public Service

PART

carriers.

(b) The term municipality means a municipal corporation subject to the Commission's jurisdiction that furnishes electricity, gas, or steam to the public.

(c) Any period of notice required in this Part shall begin on and include the date the schedule is received by the Commission, but shall not include the effective date. In computing the notice required, Saturdays, Sundays and holidays shall be counted.

(d) The term filing refers to either an electronic filing made through the Electronic Tariff System (ETS) or a paper or hard copy filing of documents.

(e) As applied to electric, gas, and steam corporations and municipalities:

(1) Metropolitan district means the counties of New York, Bronx, Kings, Queens, Richmond, Putnam, Nassau, Suffolk, Westchester, Orange and Rockland.

(f) As applied to telephone corporations, the terms:

(1) Exchange schedule means a schedule containing the specific rates, charges, rules, and regulations for local service in each exchange operated by a single telephone corporation.

(2) General schedule means a schedule containing the general rates and charges and the governing rules and regulations for communication services and facilities in the several exchanges operated by a single telephone corporation.

(3) Joint schedule means a schedule containing rates and charges for any kind of telephone service rendered by more than one telephone corporation participating in such rates and charges.

(4) Local schedule means an individual schedule of a telephone corporation containing rates, charges, rules, and regulations for any kind of service which is rendered entirely by the issuing corporation.

(5) Toll schedule means a schedule containing the rates, charges, rules, and regulations for telephone service between stations in one local calling area and those in another local calling area.

.SO DOC 16C-720-1.2

NYCRR

720-1.2 Exceptions. This Part does not apply to:

(a) a contract between a municipality, an electric, gas or a steam corporation, and State, municipal, or Federal authorities, under which electricity, gas, or steam is furnished for State, municipal, or Federal use and not for resale;

(b) a contract between telephone corporations; or

(c) a contract for the sale of water by a waterworks corporation to

State, municipal, or Federal authorities.

.SO DOC 16C-720-1.3

NYCRR

720-1.3 Filing of schedules.

(a) Except as otherwise provided by section 720-4, every public utility shall file schedules with the Commission showing all rates and charges made, established, or enforced, or to be charged or enforced, all forms of contract or agreement, and all rules and regulations relating to rates, charges or service used or to be used. This information shall be readily accessible to the public during normal business hours.

(b) In the case of an individual or partnership doing business under an assumed name, both the assumed name and that of the individual or partnership shall be shown.

(c) Suitable notice shall be provided to consumers as to how a utility's tariff schedule may be accessed. Such schedules shall contain those leaves, supplements, and statements which are in effect or are proposed to take effect in the future, including schedules filed with the Commission but not yet effective.

(d) All schedules legally filed with the Commission shall continue in force until legally changed. The Commission may direct the reissue or modification of any schedule, or any part of a schedule, at any time.

(e) Schedules containing joint toll rates or charges participated in by telephone corporations not subject to the jurisdiction of this Commission shall be filed by the telephone corporation which is subject to the jurisdiction of the Commission.

(f) A telephone corporation issuing a joint publication shall send copies to each telephone corporation party thereto as soon as issued. Joint publications may be issued only when duly executed powers of attorney or concurrences have been filed with the Commission.

.SO DOC 16C-720-1.4

NYCRR

720-1.4 Filing of Contracts.

(a) Contracts between public utilities for the sale, purchase, or interchange of electricity, gas, steam, or water need not be executed according to rate schedules filed as required by § 720-1.3 when such contracts are limited to service to be used by the purchasing utility in the conduct of its utility business (including supply to concessionaires who occupy space in the property of such utility and who furnish service for the convenience of the customers of said utility) or to be supplied to another public utility for use in a utility business. All other contracts for the sale, purchase, or interchange of electricity, gas, steam, or water must be executed according to the provisions in

appropriate service classifications duly filed and posted. All such contracts not executed according to service classifications in rate schedules shall be filed, in accordance with the requirements of § 3.5 of this Title, by the purchaser with the Commission not later than 30 days after execution. If the purchaser is not subject to the jurisdiction of the Commission, such documents shall be filed by the party which is subject to the jurisdiction of the Commission. Contracts so filed shall be numbered in consecutive order by the party filing them.

(b) Contracts, which by reference include provisions of tariffs filed with the Federal Energy Regulatory Commission, shall be accompanied by copies of such provisions. Whenever revisions are made to the tariffs filed with the Federal Energy Regulatory Commission which affect the terms of the contract, these revisions shall also be filed with the contracts.

(c) Contracts shall have a title page on which shall be shown the information set forth in § 720-1.5 of this Part.

.SO DOC 16C-720-1.6 NYCRR

720-1.6 Responsibility for Filing.

(a) Each public utility shall file copies of its schedules with the Commission, in a form prescribed by the Department of Public Service, showing all rates and charges made, established, or enforced, or to be charged or enforced, all forms of contract or agreement, except as provided in section 720-1.4, and all related rules and regulations. The acknowledgment of the receipt of any schedule by the Commission, or the fact that any schedule, amendment, supplement, or statement is on file with the Commission shall be without prejudice to investigation and subsequent determination by the Commission as to its lawfulness, either upon complaint or on its own motion, and without prejudice to suspension, change, or rejection as may be provided by law.

(b) Corporations and municipalities shall file schedules and contracts as provided under this Part immediately upon becoming subject to the jurisdiction of the Commission.

720-2.6 Short Notice - Resale of Telephone Service

.SO DOC 16C-720-2.1 NYCRR

Section 720-2.1 Number of Copies.

(a) Public utilities shall file a copy of all schedules, amendments, statements, supplements, and addenda.

(b) All schedules, amendments, supplements, statements and addenda, shall be accompanied by a letter of transmittal using a format specified in the Department of Public Service's Electronic Tariff System: Utility Preparer's Guide.

.SO DOC 16C-720-2.2 NYCRR

720-2.2 Information to Accompany Letter of Transmittal. In the case of schedules or amendments, except those published under authority of an order of the Commission, each letter of transmittal shall be accompanied by the following information.

(a) The changes which are proposed to be made and the reason for each change.

(b) An estimate of the following items in connection with each service classification or rate table in which any change is made in rates, rentals, or charges, together with a statement of the nature and extent of the data upon which such estimate is based:

(1) The number of customers or customers' bills increased.

(2) The number of customers or customers' bills decreased.

(3) The number of customers or customers' bills not affected.

(4) The gross increase in revenues.

(5) The gross decrease in revenues.

(c) When a new service classification or service offering is filed covering a new territory or providing for service to new customers only, so that there is no change in any existing service classification or service offering and no transfer of customers from an existing service classification or service offering to the new one, the above information need not be furnished, but a statement shall be filed stating the purpose and reason for the new service classification or service offering, the basis for the rates, the estimated annual revenue to be derived, and the estimated number of customers to be served.

.SO DOC 16C-720-2.3

NYCRR

720-2.3 Notice Required.

(a) Except as provided by Sections 720-2.4, 720-5.1, 720-5.2, 720-5.3, and 720-5.4 of this Part, and excluding the initial tariff filing in major rate cases, every schedule, amendment, statement, supplement, or addenda which requires compliance with the State Administrative Procedure Act shall be filed with the Commission, with an effective date no earlier than 45 days after publication of the filing in the State Register. Telecommunications companies non-basic filings shall be filed at least 10 days prior to the date on which they are proposed to be effective. Any other filing, including the initial tariff filing in a major rate case, shall be filed not less than 30 days prior to the date on which it is proposed to be made effective.

(b) A request to postpone the effective date of a schedule previously filed shall be made to the Secretary. The Secretary is delegated the authority to approve changes to filed schedules which postpone the effective date of such filed schedules and to allow such postponement to take effect, for good cause shown, on less than thirty days' notice to the Commission and without publication of notice to the public. The procedure set forth in Subdivisions (b) through (d) of Section 720-2.4, shall be followed to effectuate the postponement of the effective date

of a filed schedule.

.SO DOC 16C-720-2.4

NYCRR

720-2.4 Short Notice.

(a) Except as provided in Subdivision (b) of Section 720-2.3, the power of the Public Service Commission to permit changes in existing schedules on less than 30 days' notice will be exercised only in cases where an emergency or other justifying conditions are demonstrated.

(b) Any public utility desiring to change an existing schedule on less than 30 days' notice shall file with the Commission a schedule, amendment, or supplement containing the proposed change, bearing an effective date not less than 30 days after filing, and an application as prescribed in Section 720-2.5 requesting authority to put such schedule, amendment, or supplement into effect at an earlier date.

(c) If the application is granted, a special permission order will be issued specifying the date on which the schedule, amendment, or supplement shall become effective.

(d) On schedules, amendments, statements, supplements, or addenda authorized to be made effective on less than 30 days' notice (10 days for telecommunications non-basic service), a notation in the following form (on each leaf in the case of an entire schedule) shall be shown:

EFFECTIVE under authority of PSC (order no.) made (order issuance date).

NYCRR

720-2.6 Short Notice - Resale of Telephone Service.

The Public Service Commission has determined that it is in the public interest to permit liberal modification of service offerings within the limits authorized by a reseller's certificate of public convenience and necessity. It has also determined that it is in the public interest to permit rates for resale of telephone services to fluctuate freely between the maximum and minimum rates established in filed tariffs. Because good cause for flexibility in service offerings and rates has been shown for this industry, changes in the maximum and minimum rates, except major rate changes as defined by Public Service Law, Section 92(2), may become effective immediately upon compliance with the notice

provisions of State Administrative Procedure Act, Section 202. All companies increasing or decreasing a charge within the applicable maximum and minimum rates or making a service change shall notify affected customers and the Commission of the new charge or service change no later than the date the charge is first applied or the date the service change is first implemented.

Section 720-5.1 Ordered Revisions.

When rates, charges, rules, or other tariff provisions are prescribed by Commission order, the changes shall be established by amendments to or reissue of the affected schedule or schedules. Each affected leaf shall bear the following notation:

"Issued in compliance with order in C. (case number) dated (mm/dd/yyyy; date of order)."

.SO DOC 16C-720-5.2 NYCRR

720-5.2 Authorized Revisions.

When rates, charges, rules, or other provisions are authorized to be filed by order of the Commission, the changes made shall be established by amendments to or reissuance of the affected schedule or schedules. Each affected leaf shall bear the following notation:

EFFECTIVE under authority of PSC (order no.) made (order issuance date).

.SO DOC 16C-720-5.3 NYCRR

720-5.3 Adoption by Successor.

(a) Upon the change of name or upon transfer of franchise or other operating rights from one public utility to another, the successor shall immediately file a notice adopting the publications issued under this Part and in effect (as described in Section 720-5.6) or issue new publications.

(b) A consecutively numbered supplement (which may be made effective as of the date filed with the Commission) shall be issued to each schedule then in effect by the successor public utility substantially as follows:

"Supplement No. _____ to P.S.C. No. ____ (Electricity, Gas, Steam, Water or Telephone), filed by (name of predecessor public utility).

The (name of public utility) hereby adopts, ratifies, and in every respect makes its own as if the same had been originally filed by it, P.S.C. No. ____ (Electricity, Gas, Steam, Water, or Telephone), filed with the Public Service Commission, State of New York, by (name of predecessor public utility)."

(c) Every adopted schedule shall be reissued by the successor public utility under the proper P.S.C. number in its series within one year after the date of adoption.

(d) Every adopted contract shall be renumbered by the successor public utility in its series within 30 days after the date of adoption and the Commission shall be notified.

(e) When a waterworks corporation is being discontinued and the territory is to be transferred to a water district, a supplement (which may be effective as of the date filed with the Commission) shall be filed by the public utility bearing a notice substantially as follows:

"The rules, rates, and regulations contained in this schedule are hereby canceled. The works and system of the (name of company) were transferred on (date) to Water District No. _____ of the Town of _____ in accordance with permission granted by the Public Service Commission in Case _____."

720-5.4 Supplements.

Except as authorized by the Commission, or as provided by section 720-5.3 of this Part, supplements shall be issued for the following purposes only:

(a) When a schedule, amendment, supplement, or statement is to be cancelled, a consecutively numbered supplement shall be issued which reads:

"(Here list schedule, amendment, supplement, or statement to be cancelled) is (are) hereby cancelled";

(b) When a schedule, amendment, supplement, statement, or addendum is suspended by order of the Commission, a consecutively numbered supplement shall be issued bearing notice in the following form:

"By order of the Public Service Commission, State of New York, made _____, in Case _____ (Here list suspended schedule, amendment, supplement or statement) has (have) been suspended to and including _____. Pending restoration, reissue, or cancellation, the rates, rules and regulations in (Here list schedule, amendment, supplement, or statement which it was proposed to supersede) will apply."

(1) Each affected leaf shall be marked as indicated in section 720-5.5 of this Part; and

(2) Suspension supplements shall not bear an effective date. Suspension supplements submitted in hard copy format shall show the date on which the supplement is issued, otherwise ETS will add a received date to electronically filed supplements.

(c) When the effective date of a schedule, amendment, supplement, or statement is to be postponed, a consecutively numbered supplement (with each effective leaf being noted as indicated in section 720-5.5 of this

Part when the supplement becomes effective) shall be issued in the following form:

"The effective date of (Here list schedule, amendment, supplement or statement to be postponed) is (are) hereby postponed to _____."

720-5.5 Notations on Schedules.

The following notations are prescribed for marking schedules affected by orders of the Commission. Where an entire schedule is affected, each leaf shall be marked.

(a) Where one or more leaves are suspended by order of the Commission, each suspended leaf shall be marked with the notation shown below:

SUSPENDED by order in Case (case no.).

See Suppl. No. (suppl.);

(b) Where a suspension is vacated, the following notation shall be added:

Suspension in Case (case no.).

VACATED, See Suppl. No. (suppl.);

(c) Where suspended matter is ordered cancelled, the following notation shall be added:

SUSPENDED matter in case (case no.)

Ordered cancelled by order issued (date);

(d) Where the effective date of one or more leaves is postponed, the following notation shall be placed on the leaf or leaves.

Effective date POSTPONED to (date)

See Supplement No. (suppl.);

(e) Where the rates are allowed to become effective under Section 113 of the Public Service Law, the following notation shall be placed on the leaf or leaves containing the rates:

EFFECTIVE _____

under Section 113 of the PSL in case (case no.);

(f) Where rates have been continued unchanged after the completion of a Section 113 proceeding, the following notation shall be added to the leaves affected:

Case Closed _____ (date)

and

(g) For notation in compliance with special permission authority, see Section 720-2.4.

Section 720-6.1 Electric Fuel Adjustment Clauses Generally.

(a) Where provisions are made in electric schedules for automatic adjustment of rates because of changes in cost of fuel, public utilities may elect to file statements to their schedules in lieu of amendments. Such statements shall not be a part of the schedule and will not bear a leaf designation. Statements to each schedule will be numbered consecutively.

(b) A copy of the effective statement shall be kept available with each schedule to which it applies. Statements will follow all leaves and supplements which are a part of the schedule.

(c) Every statement shall be filed not less than three business days prior to the date on which it is proposed to be effective.

.SO DOC 16C-720-6.2 NYCRR

720-6.2 Electric Fuel Statements.

(a) Where corporations and municipalities elect to file fuel adjustment statements in accordance with section 720-6.1 of this Part, the statements must contain:

- (1) identification of the schedules and service classifications to which they apply;
- (2) the base cost of fuel (separately, when more than one base is used in the schedule);
- (3) the present average cost to the utility;
- (4) the date at which, and the period for which, the average was determined;
- (5) the amount per unit of consumption affected; and
- (6) the date when the increase or decrease in rates shall become effective and the period it will remain in effect.

(b) The following definitions apply in connection with this section:

(1) The term cost of fuel is defined as the cost of fossil, hydro, and nuclear fuel used by the company in generation for its customers, plus the cost of economy energy purchased for its customers, plus the fuel costs of other energy purchased for its customers, estimated if not known, plus any necessary adjustment correcting estimated fuel costs of purchased energy of previous months, except that fuel costs associated with nuclear generating plants whose capital costs have not been reflected in the rate base for rate determination purposes may be priced at the base cost of fuel. A period of four months shall be allowed for determining the estimated fuel costs after which the estimate shall be adjusted to the utility's average fuel cost at the time of purchase.

(2) The term base cost of fuel is defined as the cost of fuel per unit which is established as the basis in computing the fuel surcharge. It shall be clearly stated, together with the method of arriving at it, in connection with the filing of the fuel surcharge provision.

(3) The average cost of fuel is defined as the cost of fuel defined in paragraph (1) of this subdivision divided by the total generated and purchased energy minus the energy sold to other utilities except utilities covered by the fuel cost adjustment clause, minus transmitting and pumping losses associated with energy supplied for pumped storage generating units. The determination of the utility's own fuel cost shall be derived using the averaging method, i.e., the total cost of fuel on hand at the beginning of the month, plus the cost of fuel received during the month divided by the sum of the total quantity of fuel on hand at the beginning of the month and the total amount of fuel received during the month.

(4) The term economy energy is defined as that energy purchased in compliance with the economy energy definition of the New York Power Pool, plus that energy purchased at a total charge equal to or less than the utility's avoided fuel cost.

(5) The term fees is defined as amounts paid to brokers, agents, individuals, or clearinghouses which are directly associated with identifiable gas supply purchases. To be considered a part of the cost of fossil fuel purchases, and includable in the fuel adjustment clause, such fees are subject to the following conditions:

(i) such fees must provide a net reduction in the delivered cost to the utility on an avoided cost basis, i.e., the combination of gas costs, delivery costs and fee payments must be less than the cost of the supply that would have been taken but for this purchase;

(ii) the fee payment may not be to an affiliate of the utility, nor may it be for gas ultimately purchased from an affiliate;

(iii) costs attributable to utility personnel may not be included in such fee payment;

(iv) the fee payment may not cause the price of the subject gas supply to exceed its maximum lawful price pursuant to the Natural Gas Policy Act of 1978;

(v) the fee payment must be related to a specific gas volume and may not be of a general nature, such as an expense for performing a survey or a start-up expense for a broker, agent, individual, or clearinghouse;

(vi) lump sum fees must be recovered over the estimated quantities with which such fees are associated;

(vii) where applicable, the utility must fully detail and justify all such costs in annual gas cost recovery reconciliations and in rate case presentations as part of the review of gas purchasing practices; and

(viii) in conjunction with the first claim for recovery of each fee through the electric adjustment clause, workpapers supporting such filings must clearly set forth the new fee and include a statement that the gas supply was not available to the utility without this payment.

.SO DOC 16C-720-6.3

NYCRR

720-6.3 Proceedings for Review of Electric Fuel Adjustment Clause Operations.

(a) In each proceeding before the Commission concerning an application for a major change (as defined by Public Service Law, Section 66(12)) in the rates, charges or service of any electric public utility, any such public utility proposing to commence or continue the provision of fuel adjustment clauses within its tariff shall offer evidence that:

(1) its fuel costs are subject to fluctuations to the extent that such

costs are not susceptible to reasonable estimation in formal rate proceedings; and

(2) its volatile fuel costs constitute a significant proportion of the cost of service provided by the public utility.

(b) Each electric public utility proposing to continue using a fuel adjustment clause shall offer evidence in each proceeding described in subdivision (a) of this section showing that:

(1) all information required by section 720-6.2 has been filed in a timely manner; and

(2) it uses all practicable means to ensure the maximum economies in those operations and purchases that affect fuel costs subject to the clause, to the extent such actions are otherwise consistent with its obligations to provide reliable service. The evidence described in this section shall include the sworn testimony of an employee or officer of the public utility relevant to the proof of compliance with the standards set forth in this section. When an electric public utility proposes to continue using a fuel adjustment clause, fuel statements or other filings required by section 720-6.2 of this Part shall be considered relevant and admitted into evidence. The public utility shall provide a sponsoring witness familiar with the preparation and contents of any such filings made after the last evidentiary hearings held pursuant to this section.

(c) Public evidentiary hearings concerning compliance with the fuel adjustment clause standards set forth in subdivisions (a) and (b) of this section shall be held not less often than every four years, with respect to any electric public utility required to file statements pursuant to section 720-6.2 of this Part. Consideration of such compliance within a rate case, as provided in subdivision (b) of this section, shall be deemed to be an evidentiary hearing for the purpose of this subdivision. In the event that four years elapse from a public evidentiary hearing of the matters set forth in the preceding paragraph, hearings concerning compliance with the standards set forth in subdivisions (a) and (b) of this section shall be convened.

(d) In the event that two years elapse from the date of the last public evidentiary hearings as to the matters set forth in the preceding subdivisions of this section with respect to any electric public utility required to file statements pursuant to section 720-6.2, the staff of the Department of Public Service shall review the compliance of the electric public utility with the standards of subdivisions (a) and (b) of this section and report its findings.

(e) The Commission may hold hearings upon its own motion, or on the

motion of any interested person upon good cause shown, as to the compliance of a public utility with the standards set forth in subdivisions (a) and (b) of this section.

.SO DOC 16C-720-6.4

NYCRR

720-6.4 Correctness and Reasonableness of Fuel Adjustment Charges.

The Commission may hold hearings upon its own motion, or upon the motion of any interested party upon good cause shown, as to the correctness and reasonableness of any increased rate or charge for fuel costs subject to a fuel adjustment clause. At any hearing so commenced, the burden of proof as to the propriety of any such rate or charge shall be with the utility. In any case in which it is determined that fuel adjustment charges were excessive because of lack of reasonable care or are otherwise unreasonable or incorrect, the Commission may order remedial action, including an adjustment of any previous collection under the fuel adjustment clause.

.SO DOC 16C-720-6.5

NYCRR

720-6.5 Gas Cost Adjustment Clauses.

(a) Definitions. The following definitions shall apply in connection with this section:

(1) Gas is natural gas distributed by a public utility to its customers without change or after mixing with other gas, and pipeline quality gas manufactured from liquified propane.

(2) Base cost of gas is the cost per Ccf, Mcf or therm which is included in stated tariff rates and established as the basis for computing the gas cost adjustment. Upon approval by the commission, the base cost of gas can be eliminated from the base tariff rates.

(3) Fees are amounts paid to brokers, agents, individuals or clearinghouses, which are directly associated with identifiable gas supply purchases. To be included in the average cost of gas computation, such fees are subject to the following conditions:

(i) such fee must provide a net reduction in the delivered cost to the public utility on an avoided cost basis, i.e., the combination of gas costs, delivery costs and fee payments must be less than the cost of the supply that would have been taken but for said purchase;

(ii) the payment may not be to an affiliate of the public utility, nor may it be for gas ultimately purchased from an affiliate;

(iii) no costs attributable to public utility personnel, (e.g., wages or expenses) may be included in such fee payment;

(iv) the fee payment must be related to a specific gas volume and may not be of a general nature such as an expense for performing a survey or a start-up expense for a broker, agent, individual or clearinghouse;

(v) lump sum fees must be recovered over the estimated quantities of gas with which such fees are associated;

(vi) the public utility must fully detail and justify all such costs in annual gas cost recovery reconciliations and in rate case presentations as part of the review of gas purchasing practices; and

(vii) in conjunction with the first claim for recovery of each fee through a gas cost adjustment, work papers supporting such filings must clearly set forth the new fee and include a statement that the gas supply was not available to the public utility without said payment.

(4) Risk management costs are costs associated with transactions that are intended to reduce price volatility or reduce overall costs to customers. These costs include transaction costs, and gains and losses associated with transactions made in commodities exchanges and with other risk management entities.

(b) Statements. Where provisions are made in gas schedules for automatic adjustment of rates because of changes in the cost of gas, gas corporations or municipalities may elect to file statements to their schedules in lieu of amendments. Such statements shall not be part of the schedule and will not bear a leaf designation. Each statement shall be numbered consecutively. A copy of the effective statement shall be kept available with each schedule to which it applies and may be attached to or bound with the schedule. If bound with the schedule, statements shall follow all leaves and supplements which are part of the schedule. Every such statement shall be filed not less than three days prior to the date on which it is proposed to be effective, except that a new statement may be filed on one day's notice to become effective not more than five days after the effective date of the initial statement if the replacement of cost estimates in the initial statement with actual figures results in a change in the average cost of gas of more than 5 percent. Each statement shall contain:

(1) an identification of the schedules and service classifications to which they apply;

(2) the date when the increase or decrease in rates shall become effective and the period it will remain in effect;

(3) the present average cost to the public utility of gas purchased to serve customers subject to the gas adjustment;

(4) the date at which, and the period for which, the average was determined;

(5)(i) the base cost of gas (stated separately, when more than one base is used in the schedule);

(ii) if gas costs are unbilled, the base cost of gas need not be

shown;

- (6) the amount per unit of consumption affected;
- (7) a summary of refunds or surcharges to be applied to the adjustment; and
- (8) the net amount per unit of consumption affected;
- (9) the weather normalization adjustment factor for each billing cycle for the prior month.

(c) Application of charge. The gas adjustment charge shall be applied to bills by prorating the gas adjustments in effect during the period of service based on the number of days each gas adjustment is in effect during each billing period, and calculating the average cost of gas using transporter, storage provider, and supplier rates estimated to be in effect on the effective date of the gas adjustment (pursuant to subdivision (d) (1) (ii) of this section).

(d) Average cost of gas. The average cost of gas shall be computed as follows:

(1) by applying the fixed rates and charges of the transporters, storage providers, and suppliers to the billing determinants associated with pipeline capacity, storage capacity, and supplier reservation charges, and dividing by, either the weather normalized quantities of gas taken for delivery to the utility's own sales customers during the 12 calendar months immediately preceding the computation date, or the forecast quantities of gas to be taken for delivery to the utility's own sales customers during the 12 calendar months ending the following August 31. Fixed costs assigned to non-sales customers should be excluded;

(2) by applying the variable rates and charges of the transporters, storage providers, and suppliers to the billing determinants associated with transportation, storage, and gas supply, for the forecasted weather normalized quantities of gas to be taken for delivery to the utility's own customers during the month in which the gas adjustment will be in effect;

(3) by applying the average unit cost of liquified propane in storage at the date of computation to the quantities of said product used to serve a public utility's own customers during the prior month;

(4) by applying the average unit cost of gas in storage at the date of computation to the quantities of gas estimated to be withdrawn from storage for a utility's own customers during the month in which the gas adjustment will be in effect;

(5) the total average cost of gas equals the amount computed in paragraphs (1) of this subdivision plus the amounts computed in

paragraphs (2) - (4) of this subdivision divided by the forecasted weather normalized quantities of gas to be taken for delivery to the utility's own customers during the month in which the gas adjustment will be in effect. The total average cost of gas shall be adjusted to reflect credits from released capacity, storage services, and sales and transportation of gas provided to interruptible and off-system customers.

(6) risk management costs may be included in paragraphs (1) - (4) of this subdivision; and

(7) supporting data and workpapers underlying gas cost adjustments and the historical cost of purchased gas, in the format set forth in Appendix 7-H of this section so as to clearly identify sources of gas and related costs as delivered to the utility, shall be filed with the commission and accompany the statement. Supporting documents may be computer generated.

(e) Factor of adjustment. The factor of adjustment shall be determined in a rate proceeding. At the conclusion of each succeeding rate proceeding, a new factor of adjustment will become effective and continue in effect until a new factor is established in the next rate proceeding.

(f) Refunds. Each utility shall file with the commission, and include in its tariff schedule, a plan to flow through to consumers credits received from suppliers due to rate settlements or retroactive rate reductions. Refunds shall include interest, calculated at a rate prescribed by the commission, on the unrefunded balances. Where exceptional circumstances warrant, the utility may petition the commission for waiver of its filed refund plan.

(g) Annual reconciliation. Actual gas cost recoveries shall be reconciled with actual gas expenses each year, and a surcharge or refund to recover gas adjustment under-recoveries or refund gas adjustment over-collections shall be computed as follows:

(1) Taking the cost of gas, adjusted for supplier refunds, and liquefied propane consumed, as recorded on its books during the determination period, adjusting that cost to reflect a level of purchased gas commensurate with actual sales and the fixed factor of adjustment as determined in the preceding rate proceeding, and subtracting therefrom an amount equal to:

(i) the base cost of gas, as defined in subdivision (a) (2) of this section, multiplied by the quantities of gas purchased;

(ii) gas adjustment revenues recorded during the determination period, adjusted to eliminate associated revenue tax recoveries;

(iii) costs recorded during the determination period assignable to gas sold to customers not subject to gas cost adjustments; and

(iv) (a) the previous year's over-collection, including interest, to the extent not refunded; or

(b) adding the previous year's under-collection, including interest, to the extent not recovered.

(2) The amount derived in paragraph (1) of this subdivision shall be divided by the quantities of gas to be sold by the utility to its customers during the surcharge/refund period.

(3) Appropriate adjustment shall be made to eliminate the effect of net credits which have been included in the gas adjustment due to interruptible or other flexibly priced sales.

(4) Surcharge or refund amounts shall bear interest, at a rate prescribed by the commission, on unamortized balances.

(5) The determination period to be used in the computation of the surcharge or refund shall be the 12 months ended August 31st of each year. The computation shall be filed with the commission on or before October 15th, the resulting surcharge or refund shall be effective with the first January billing cycle date.

(6) Interim refunds or surcharges during the 12 month period ended August 31st will be permitted for the purpose of preventing large over-collection or under-collection balances from accruing at August 31st. The methodology used to determine the amount of over-collection or under-collection and the method of refund or surcharge shall be determined by the utility and filed with the commission.

(h) Gas adjustments based on load characteristics. Utilities are permitted to calculate gas adjustments for various service classifications, sub-classes, customer groups, or customers based on load characteristics. Implementation of such gas adjustments must be approved by the commission.

(i) Alternative gas cost pricing. Utilities are permitted to offer customers alternative pricing mechanisms other than those specified above. Risk management costs and other costs associated with alternative pricing mechanisms shall be excluded from the gas adjustment. Implementation of such alternative pricing mechanisms must be approved by the Commission.

NYCRR

720-6.6 Steam Fuel Adjustment Clauses Generally.

(a) Where provisions are made in steam schedules for automatic adjustment of rates because of changes in cost of fuel, public utilities may elect to file statements to their schedules in lieu of amendments.

Such statements shall not be a part of the schedule and shall not bear a leaf designation. Statements to each schedule shall be numbered consecutively, for example: "Statement No. 1 to P.S.C. No. 1", and "Statement No. 2 to P.S.C. No. 1".

(b) A copy of the effective statement shall be kept available with each schedule to which it applies and may be attached to the schedule. Statements shall follow all leaves and supplements which are part of the schedule

(c) Every such statement shall be filed not less than three days prior to the date on which it is proposed to be effective.

.SO DOC 16C-720-6.7 NYCRR

720-6.7 Steam Fuel Statements.

(a) Where public utilities elect to file fuel statements in accordance with section 720-6.6, such statements must contain:

- (1) identification of the schedules and service classifications to which they apply;
- (2) the base cost of fuel (separately, when more than one base is used in the schedule);
- (3) the present average cost of fuel to the public utility;
- (4) the point of delivery;
- (5) the date at which and the period for which the average was determined;
- (6) the amount per unit of consumption affected; and
- (7) the date when the increase or decrease in rates shall become effective and the period during which it will remain in effect.

(b) The following definitions apply in connection with this section:

(1) The term cost of fuel is defined as the price, including all transportation charges to the point at which the public utility accepts delivery. Where more than one type of fuel is used, the cost of fuel shall be determined by converting all fuels to a common standard.

(2) The term base cost of fuel is defined as the cost of fuel per unit which is established as the basis in computing the fuel surcharge. It shall be clearly stated, together with the method of arriving at it, in connection with the filing of the fuel surcharge provision.

(3) The term average cost of fuel is defined as the total cost of fuel on hand at the beginning of the period, plus the cost of fuel received during the period, divided by the sum of the total quantity of fuel on hand at the beginning of the period and the total amount of fuel received during the period.

.SO DOC 16C-720-6.8 NYCRR

720-6.8 City and Village Utility Revenue Tax Surcharges.

(a) Where provisions are made in schedules for automatic adjustment of public utility revenue tax surcharges in response to an enactment whereby a city or village levies a new tax on public utility gross revenues, repeals such a tax, or changes the rate of such a tax, public utilities subject to the tax may elect to file statements relative to their schedules in lieu of amendments. Such statements shall not be a part of the schedule and shall not bear a leaf designation. Statements to each schedule shall be numbered consecutively.

(b) A copy of the effective statement shall be kept available with each schedule to which it applies. Statements shall follow all leaves and supplements that are a part of the schedule.

(c) Every such statement shall be filed not less than 15 business days before the date on which it is proposed to be effective, and no sooner than the date of the tax enactment to which the statement responds; shall become effective no sooner than the date when the tax enactment is filed with the Secretary of State; shall be applicable to bills subject to the tax enactment that are rendered on or after the effective date of the statement; and shall be canceled not more than five business days after the tax enactment either ceases to be effective or is modified so as to reduce the tax rate.

Section 720-7.1 Powers of Attorney.

(a) A telephone corporation may authorize another telephone corporation to file its toll schedules and revisions thereto, or concurrences by power of attorney filed with the Commission set forth in Section 720-7.3. The original copy shall be filed with the Commission and the duplicate furnished to the telephone corporation to which power of attorney is given. Such authority may not contain authority to delegate to another the power thereby conferred.

(b) Powers of attorney shall be consecutively numbered.

(c) A telephone corporation granting authority to another telephone

corporation to publish and file certain of its rates, charges, rules, or regulations shall not, in its own publications, publish rates, charges, rules, or regulations that conflict with or duplicate those which are published by such authorized other telephone corporation.

(d) Authority granted under this section may be revoked upon 60 days' notice to the Commission and to the telephone corporation to which power of attorney is given, as prescribed by Section 720-7.4.

.SO DOC 16C-720-7.2

NYCRR

720-7.2 Concurrences.

(a) A concurrence may be given by a telephone corporation to embrace joint schedules issued by another telephone corporation to which the concurring corporation is a party. The original copy of the concurrence, as set forth in 720-7.5, shall be filed with the Commission and a duplicate furnished to the corporation to which concurrence is given. Concurrences shall be filed immediately by the issuing corporation.

(b) Concurrences shall be consecutively numbered by the corporation issuing the concurrence.

(c) Where a concurrence confers authority to name rates of the telephone corporation giving concurrence, schedules shall be issued by the telephone corporation to which concurrence is given under its own PSC numbers, and the telephone corporation giving such concurrence shall be shown as a participating corporation. The filing of such schedules will constitute filing for all lawfully concurring telephone corporations, and they may be used by concurring telephone corporations for public inspection as required by Section 720-1.3. The telephone corporation to which concurrence is given may apply for permission to make a joint schedule effective on short notice as provided in Section 720-2.4. The application shall be made on the prescribed form and must include a statement that it is made on behalf of all parties to the schedule and that the formal concurrence is on file with the Commission.

(d) A concurrence may be revoked by filing notice of such revocation, as set forth in Section 720-7.4, with the Commission and serving same upon the telephone corporation to which such concurrence was given. This notice must specify the date upon which revocation is to be made effective and must give not less than 60 days' notice to the Commission and to the telephone corporation to which concurrence was given. Corresponding correction of schedules shall be made by amending or reissuing such schedules on not less than 30 days' notice to be effective upon the effective date of the revocation.

(e) A concurrence does not confer authority to cancel schedules of concurring corporations. Schedules issued under concurrences shall not

bear notation of cancellation of schedules of concurring telephone corporations. Such cancellations must be made by the telephone corporation which issued the schedule that is to be cancelled.

PART 730

PCB INVENTORY REPORTS

(Statutory authority: Public Service Law, Section 66(1), (23))

Sec.

730.1 Filing of reports

730.2 Content of reports

.SO DOC 16C-730.1

NYCRR

Section 730.1 Filing of reports.

(a) Every gas or electric corporation having equipment containing 500 parts per million (ppm) or greater of polychlorinated biphenyls (PCBs), including but not limited to capacitors and transformers, shall file, in accordance with the requirements of § 3.5 of this Title, a PCB inventory report to the Commission semiannually.

(b) The inventory reports shall be filed on September 1st each year, for the reporting period January 1st through June 30th preceding, and on March 1 each year, for the period July 1st through December 31st preceding.

(c) Each gas corporation, as set forth herein, shall file with the Secretary, in accordance with the requirements of § 3.5 of this Title, a report of each discovery in the gas distribution system of materials containing PCBs in concentrations of 50 ppm or greater, such as materials collected at custody transfer points, and the PCB concentrations found in such materials. The report shall be submitted annually by February 1st of the year following the calendar year for which the report is rendered.

(d) The inventory reports referred to in subdivision (a) of this section shall include two parts: one covering PCB equipment in service as of the last day of the reporting period and one covering PCB equipment retired, stored, processed, or shipped during the reporting period.

(e) Each gas or electric corporation filing the inventory reports referred to in subdivision (a) of this section shall also submit to the chief executive of each county and city located in its service territory a report containing the information presented for equipment and PCBs located in or transported through the county or city receiving the report.

(f) The following provisions apply in connection with the inventory reports:

(1) The term equipment means devices such as transformers, capacitors,

compressors, or other equipment designed to contain oil or other fluids necessary for their operation. The term does not include items on the gas distribution system that were not designed to contain oil necessary for operation such as drips, valves, or pipelines.

(2) Materials means liquids, particulate matter, rags or other items containing PCBs.

(3) Political jurisdiction may be reported by any of the following: town, village, city, each borough of New York City, or tax district. If the report is by tax district, it shall be made clear which political jurisdiction or jurisdictions comprise each tax district.

(4) The location of PCB equipment in service may be reported by any of the following: street address, building name, line and pole number, line and vault number, pole number with street and cross-street, vault number with street and cross-street or, for gas utility equipment, by pipeline mile post, engineering station, or geographic feature. If the location is reported by pole and line number or vault number, additional information shall be available to indicate the exact location of the line or equipment. For substations and power plants, additional information shall be available to indicate the location of the equipment within each substation or power plant. The location of storage and processing facilities shall be reported by postal address and shall include, as a minimum, the political jurisdiction in which the facility is located.

(5) Size shall be expressed as volume of PCB fluid, and the PCB concentration (ppm) shall be reported. The fluid, if a dielectric, shall be identified (i.e., mineral oil, Askarel, pure PCB).

(6) Service date may be reported by any of the following: date of purchase, date of first installation, date of last installation, date of capitalization, or date of manufacture. Date of manufacture may be reported by serial number if a key is provided which cross-references serial number to date of manufacture. For capacitors, the reported service date may be the service date for the oldest capacitor in a bank or the date that the bank was first installed. For transformers located in substations, the reported service date may be the service date for the oldest transformer installed at each substation. Each inventory report shall specify whether the reported service date is the purchase date, date of capitalization, or date of manufacture.

(7) Quantity means the number of individual units. Capacitors may be reported by bank if the number of units per bank is stated.

(8) The term in-service applies to equipment used electrically under loaded conditions, and to other equipment, such as gas compressors, on

gas distribution systems. In-service equipment may also be identified as equipment recorded in the Electric Plant In Service or Gas Plant In Service accounts.

(9) The last in-service location is the last location at which the PCB equipment was in service, or the location (i.e., service center or treatment storage and disposal facility) at which the electrical equipment or material was first determined to contain 500 ppm or greater of PCBs.

(10) The retirement date reported shall be either the date on which the equipment is no longer in service or the date on which the equipment was removed from the Electric Plant In Service or Gas Plant In Service accounts.

(11) The New York State portion of the shipping route shall be described for all shipments of PCBs between storage and processing facilities and for all shipments out of State. The route description shall identify the highways used and shall identify all cities and counties traversed by the route. Shipping routes within New York City shall identify the borough or boroughs traversed.

.SO DOC 16C-730.2

NYCRR

730.2 Content of reports.

(a) The in-service PCB equipment inventory reports and the retired PCB equipment inventory reports shall include all capacitors, transformers, gas compressors, and other equipment or material containing 500 ppm or greater of PCBs. The report shall not include equipment designed to use the PCB-free mineral oil dielectric fluids unless the unit has been serviced with fluid containing 550 ppm or greater of PCBs, or there is any other reason to believe that the unit contains, or was ever mixed with fluid with a concentration level of 500 ppm or greater, or unless testing has specifically shown otherwise.

(b) The inventory reports shall be organized alphabetically by county for those counties in which the PCB equipment is in service or was last in service.

(c) For each county, the reports shall be organized by political jurisdiction. The information for each political jurisdiction shall be divided into sections, one section each for transformers, capacitors, gas compressors and other equipment as applicable. Each section shall then be organized into overhead, underground, substation, power plant and compressor station categories.

(d) In the in-service equipment inventory, the equipment in each category shall be organized and identified by location. At each location, the size, quantity, and service date shall be reported.

(e) A separate summary sheet of in-service equipment shall indicate by section, one section each for transformers, capacitors, gas compressors, and other equipment, the total number of PCB items and the total amount of PCBs in each county and political jurisdiction. In addition, company-wide grand totals shall be provided for PCB transformers, PCB capacitors, and other PCB equipment.

(f) In the retired PCB equipment inventory, the material in each category shall be organized and identified by the last in-service location. The following information shall be provided, if applicable, for each item: the size, the quantity, the retirement date, the location of facilities at which the equipment was stored or processed, the date of shipment of PCBs and PCB equipment within or out of New York State, a description of the New York State portion of the shipping route, and a statement of the ultimate destination for out-of-state shipments. The storage/processing facilities and the shipping dates or routes need not be reported for activities that took place prior to the date the equipment was determined to contain 500 ppm or greater of PCBs.

(g) In the reporting of discoveries by gas corporations of materials with PCB concentrations of 50 ppm or more found at custody points or gate stations, reporting forms supplied by the Gas Unit shall be used to provide information on: company name and reporting dates, location and type of collection point, approximate date of delivery, date of removal, volume of material removed, PCB concentration (ppm), source of PCB material (supplier if single source can be identified), and method of removal. The reports shall be signed by a responsible company official.

.SO DOC 16C-733.1

NYCRR

Section 733.1 Scope of this Part.

(a) The regulations in this Part apply to all books of account and other records prepared by or on behalf of every electric, gas, steam and waterworks corporation and municipal electric, gas and steam utility (hereafter, in this part is referred to as a public utility or municipality). See item 64 of the schedule of records and periods of retention for those records that come into the possession of the public utility or municipality in connection with the acquisition of property, such as purchase, consolidation, merger, etc.

(b) The regulations in this Part shall not be construed as excusing compliance with any other lawful requirement for the preservation of records for periods longer than those prescribed herein.

(c) Unless otherwise specified in the schedule of records and periods of retention, duplicate copies of records may be destroyed at any time; provided, however, that such duplicate copies contain no significant information not shown on the originals.

(d) Records other than those listed in the schedule of records and periods of retention may be destroyed at the option of the public utility or municipality; provided, however, that records which are used in lieu of those listed shall be preserved for the periods prescribed

for the records used for substantially similar purposes. And, provided further, that retention of records pertaining to added services, functions, plant, etc., the establishment of which cannot be presently foreseen, shall conform to the principles embodied herein.

(e) Notwithstanding the provisions of the schedule of records and periods of retention, the commission may, upon the request of the company, authorize a shorter period of retention for any record listed therein upon a showing by the company that preservation of such record for a longer period is not necessary or appropriate in the public interest or for the protection of investors or consumers.

.SO DOC 16C-733.2 NYCRR

733.2 Designation of supervisory official.

Each public utility or municipality subject to the regulations in this Part shall designate one or more persons with official responsibility to supervise the program for preservation and the authorized destruction of its records.

.SO DOC 16C-733.3 NYCRR

733.3 Protection and storage of records.

Each public utility or municipality shall provide reasonable protection for records subject to the regulations in this Part from damage by fires, floods and other hazards and, in the selection of storage spaces, safeguard the records from unnecessary exposure to deterioration from excessive humidity, dryness, or lack of proper ventilation.

.SO DOC 16C-733.4 NYCRR

733.4 Definition of record media.

(a) For the purpose of this Part, the data constituting the records listed in the schedule of records and periods of retention may be retained in any generally accepted electronic or photographic storage medium, provided the medium selected has a standard life expectancy greater than or equal to the specified retention period. Storage media can include, but are not limited to: paper, microfilm, magnetic disk, magnetic tape, optical disk, CD-ROM, DVD, etc. It is the responsibility of the public utility to ensure that the storage medium is consistent with the prescribed retention period and all conditions for proper storage are met to insure the protection and retrievability of the data/information in the chosen format. However, records supporting plant cost shall be retained in their original form unless microfilmed (See section 733.10 of this Part for periods of retention). Media regeneration to achieve the full length of period retention will be allowed at the discretion of the utility, provided the utility follows

appropriate sections in these regulations.

(b) If the storage medium of the record retained is other than a readable paper copy, then reader and/or printer equipment and related printout programs, if required, shall be provided by the utility for data reference.

(c) A storage medium may be changed on the judgement of the utility, if subsequent conditions such as improved media life expectancy and the remaining retention period permits a change in the media forms, the public utility or municipality may convert to another medium, provided the certification processes described in section 733.5 below are observed and data referencing capability is maintained.

.SO DOC 16C-733.5

NYCRR

733.5 Record Series/Media Certification.

(a) As the initial recording media:

(1) Each microform record series shall contain, at the beginning, a microform introduction stating the title of the record series, the date prepared, the name of the individual responsible for validating the data contained therein. Each microform record series shall be closed with a clear and standard microform notation indicating the completion of the series and the date.

(2) If after validation, supplemental data and corrections (i.e., resulting from computer programming) are required, said microform may be produced separately or as a part of the series rerun, but shall be affixed to the original microform certificate as described in the immediately preceding paragraph.

(3) For other storage media, record series shall include, as a basic part of the program, at the beginning of that series an introduction stating the record series title, date prepared, the name of the individual responsible for validating the data contained therein and an index where appropriate. Each record series shall be closed with a clear and standard notation indicating the completion of that series and the date.

(b) Conversion from other media:

(1) Each record series shall include, as an integral part, a certificate(s) stating that the records are direct or facsimile reproductions of the original records and that they have been made in accordance with prescribed instructions. Such certificate(s) shall be executed by a person(s) having personal knowledge of the facts covered thereby.

(2) Each record series shall commence and end with a statement as to the nature and arrangement of the records reproduced, and the date.

Rolls of film shall not be cut. Supplemental or retaken records, whether of misplaced or omitted documents or of portions of records found to be defective, shall be attached to the beginning of the record series and in such an event, the aforementioned certificate shall cover the supplemental or retaken records and shall state the reasons for the subsequent action.

(3) If, in accordance with the provisions of section 733.6 of this Part, the public utility or municipality elects to convert records to a different medium, the same certification provision specified in section 733.5 (a) (3) of this part must be provided in the conversion program.

.SO DOC 16C-733.6 NYCRR

733.6 Change of media for existing records.

Those records prepared and maintained under previous regulations in a paper medium, and whose remaining retention period falls within the life expectancy range of any of the media detailed in section 733.4, may be converted to that medium at the public utility or municipality's option, provided the applicable certification processes described in section 733.5 of this part are observed and an audit referencing capability is maintained.

.SO DOC 16C-733.7 NYCRR

733.7 Media.

(a) All records created or maintained in a medium and a format other than readable entries on paper shall:

(1) be prepared, arranged, classified, identified and indexed so as to permit the subsequent location, examination and reproduction of the record to a readable medium;

(2) be stored in such a manner as to provide reasonable protection from hazards such as fire, flood, theft, etc. and maintained in a controlled environment;

(3) be regenerated, including proper certification, when damaged.

(b) The company shall be prepared to furnish, at its own expense, standard facilities for reading media and shall additionally provide, if the commission so directs, copies of the record in a readable form.

.SO DOC 16C-733.8 NYCRR

733.8 Destruction of records.

The destruction of the records permitted to be destroyed under the provisions of this Part may be performed in any manner elected by the public utility or municipality concerned. Precautions should be taken, however, to macerate or otherwise destroy the legibility of records, the content of which is forbidden by law to be divulged to unauthorized persons.

.SO DOC 16C-733.9 NYCRR

733.9 Premature destruction or loss of records.

When any records are destroyed before the expiration of the prescribed period of retention or are lost, a certified statement listing, as far as may be determined, the records destroyed or lost and describing the circumstances of accidental or other premature destruction or loss shall be filed with the commission within 90 days from the date of discovery of such destruction or loss.

.SO DOC 16C-733.10 NYCRR

733.10 Schedule of records and periods of retention.

The table contained in Section 733.15 shows the period of time designated records shall be preserved; however, records related to plant shall be retained a minimum of 25 years unless, accounting adjustments resulting from reclassification and original cost studies have been approved by the commission and approved continuing plant inventory records are maintained.

.SO DOC 16C-733.11 NYCRR

733.11 Retention periods designated "destroy at option".

Use of the retention period, "destroy at option," in the regulations in this Part constitutes authorization for such destruction under the conditions specified for the particular types of records, only if such optional destruction is appropriate in view of the limited managerial interest in such records and if such optional destruction is not in conflict with other legal retention requirements or the usefulness of such records in satisfying pending regulatory actions or directives.

.SO DOC 16C-733.12 NYCRR

733.12 Records of services performed by associated companies. Each public utility or municipality to which the regulations in this Part apply shall assure the availability of records of services performed by associated companies for the periods indicated in this Part, as are necessary, to support the cost of services rendered to it by an associated company.

.SO DOC 16C-733.13 NYCRR

733.13 Index of records.

At each office of the public utility or municipality where records are kept or stored, such records as are required by this part to be preserved shall be so arranged, filed and currently indexed that they may be readily identified and made available to representatives of the commission.

.SO DOC 16C-733.14 NYCRR

733.14 Notes to schedule of records and periods of retention.

(a) For the purposes of this Part, a stockholder's account may be treated as a closed account at the time that such stockholder ceases to be a holder of record of the particular class and series of stock of the company and the six-year retention period prescribed herein shall run from that date. If such person subsequently acquires shares of capital stock of the company and thus again becomes a stockholder of the company, the record of such acquisition shall be treated as a new stockholder account.

(b) The terms bonds and debentures, as used in Section 733.15 of the Part, shall include all debt securities such as bonds, debentures or notes other than debt securities which evidence temporary borrowings and which are expected to be repaid out of the proceeds of the sale of longer term securities. Typical of such temporary debt securities, would be notes issued to banks evidencing temporary working capital and construction loans and gas storage loans.

(c) Cancelled bonds and debentures and paid interest coupons pertaining thereto may be destroyed, provided that a certificate of destruction giving full description reference to the documents destroyed shall be made by the person or persons authorized to perform such destruction and shall be retained by the company for the period herein prescribed. The certificate of destruction evidencing the destruction of paid interest coupons pertaining to bonds and debentures need not contain a listing of the bond or debenture serial numbers pertaining to such paid interest coupons. When documents represent debt secured by mortgage, the certificate of destruction shall also be authorized by a representative of the trustee(s) acting in conjunction with the person or persons destroying the documents or shall have the trustee(s) acceptance thereon. The certificate of destruction above described may be destroyed six years after the payment and discharge of the bonds or debentures or interest coupons described in such certificate.

(d) If more than one retention period prescribed in section 733.15 of this Part applies to a given record, the public utility or municipality need retain only one copy of such document in its files, provided appropriate cross-references are established.

(e) Life or mortality study data for depreciation purposes should be attained as a permanent record.

------	-------------	------------------

CORPORATE AND GENERAL

1. Capital stock records:
 - (a) Capital stock ledgers or other records showing the same information
6 years after the stockholders' account is closed. See § 733.14.
 - (b) Capital stock subscription accounts, warrants, requests for allotments and other essential papers related thereto
2 years after settlement.
 - (c) Stubs or similar records of capital stock certificate issuance where not used as capital stock ledger record
6 years after cancellation of certificate. If this record serves the purpose of a capital stock ledger, Item 1(a) is applicable.
 - (d) Stock transfer registers or sheets or similar records
6 years after last entry on page or sheet of record.
 - (e) Papers pertaining to or supporting transfers of capital stock:
 - (1) Papers that are recorded officially in a court or in the office of some other public recording authority; and other papers presented by any bank or trust company requesting
Destroy at option or return to stockholder.

transfers in its capacity as
a fiduciary and miscellaneous
papers

- (f) Canceled capital stock certificates where not used as capital stock ledger records 6 years after cancellation of certificate.
If this record serves the purpose of a capital stock ledger, Item 1(a) is applicable.
- (g) Change of address notices of stockholders Destroy at option after changers are recorded.
- (h) Bonds of indemnity and affidavits covering issuances of stock certificates to replace lost certificates 6 years after expiration of bonds
- (i) Letters, notices, reports, statements and other communications distributed to all stockholders of a particular class:
 - (1) Formal communications addressed to all stockholders of a particular class, including annual reports to stockholders, notices of annual and special meetings of stockholders, and other notices, reports, letters or statements relating to corporate or stockholder actions Life of corporation.
 - (2) Interim reports of operations, speeches of corporate officers, notices of change of corporate address or telephone numbers, etc. 6 years after the date thereof.
- (j) Dividend registers, lists or similar records 6 years.
- (k) Paid dividend checks Ditto.
- (l) Third party dividend orders 6 years after rescission order.

2. Proxies and voting lists:

- (a) Proxies of holders of voting securities 3 years.

- (b) Lists of holders of voting securities represented at meetings 1 year.
3. Reports to stockholders:
- (a) Annual reports or statements to stockholders Life of corporation.
 - (b) Written acknowledgments of receipts of reports to stockholders and written requests for copies of such reports. Destroy at option.
4. Debt security records: See § 733.14.
- (a) Registered bond and debenture ledgers 3 years after redemption.
 - (b) Bond and debenture subscription accounts, warrants, subscription notices, requests for allotment and essential papers related thereto 3 years after settlement.
 - (c) Stubs or similar records of bond and debenture certificates issued 3 years after redemption.
 - (d) Papers pertaining to or supporting transfers of registered bonds and debentures:
 - (1) Papers that are recorded officially in a court or in the office of some other public recording authority; the bonds or debentures and other papers presented by any bank or trust company requesting transfers in its capacity as a fiduciary, plus other miscellaneous papers Destroy at option or return to holders of other public recording authority;
 - (e) Records of bond and debenture interest coupons paid and unpaid See § 733.14.
 - (f) Canceled bonds and debentures and interest coupons pertaining thereto Ditto. See § 733.14.
 - (g) Trust indentures, loan agreements or other contracts or agreements securing debt securities issued. (If such papers or documents are included among the records covered by Item 5 of the Regulation, this instruction will not apply.) 6 years after redemption.
 - (h) Copies of reports, statements, letters or memoranda filed with Trustee(s) 6 years after redemption. (Destroy at

pursuant to provisions of trust in- option provided that
denture or other security instrument the Trustee(s) under
or agreement securing debt securities such indenture or
issued security instrument is

a National Bank, a
member of the Federal
Reserve System or a
subsidiary of any such
National Bank or
Federal Reserve System
member bank; and pro-
vided further that the
Trustee(s) has certi-
fied to the company
that copies of all
such documents will be
available in the
offices of the
Trustee(s) for in-
spection at any time
prior to redemption by
holders of debt secur-
ities to which such
documents relate and
for inspection by any
Federal or State
regulatory authority
prior to redemption
and for an additional
period of six years
after redemption.)

(i) Paid or canceled debt securities 3 years after payment
evidencing temporary borrowings or cancellation,
provided other records
of issuance and payment
or cancellation are
maintained.

(j) Paid interest checks 6 years.

5. Filings with and authorization by
regulatory agencies:

(a) Authorizations from regulatory bodies 25 years or until all

- for issuance of securities: securities covered are
- (1) Copies of applications to regulatory bodies for authority to issue stocks, bonds, and other securities, including copies of exhibits in support of such applications
retired, whichever is shorter. See §733.14.
 - (2) Official copies of opinions and orders of regulatory bodies granting authority to issue securities
Until securities covered are retired.
 - (3) Reports filed with regulatory bodies in compliance with authorizations to issue securities. (Reports of sales of securities, application of proceeds, etc.)
Until securities covered are retired.
File copies of such reports and supporting papers
- (b) Copies of registration statements and other data filed with the Securities Exchange Commission:
- (1) In connection with offerings of securities for sale to the public or the listing of securities on exchanges, including supporting papers
25 years or until all securities covered are retired, whichever is shorter. See §733.14.
 - (2) Copies of periodic reports and supporting papers filed in compliance with either the Securities Act of 1933 or the Securities Exchange Act of 1934
25 years.
6. Organizational documents:
- (a) Minute books of stockholders', directors', and directors' committee meetings, and of Board of Light Commissioners or other municipal governing body
Life of corporation. (Permanently for municipalities.)
 - (b) Titles, franchises, and licenses:
 - (1) Deeds and other title papers (including abstracts of title and supporting data)
6 years after property is disposed of unless surrendered to transferee.
 - (2) Corporate charters or certificates of incorporation
Life of corporation.
 - (3) Franchises and certificates
Ditto.

authorizing operations as a public utility

(4) Licenses (including amendments thereof) granted by Federal or State authorities for construction and operation of utility plant 25 years after plant is retired or expiration of license, whichever is shorter.

(5) Copies of formal orders of regulatory commissions served upon the utility Life of corporation.

(6) Records of action by voters as to establishing a municipality utility or extensions thereto Ditto.

(c) Permits:

(1) Permits and granted applications for the use of facilities of others 6 years after expiration or cancellation.

(2) Copies of permits and applications granted others for the use of the utility's facilities Ditto.

(3) Applications for the use of facilities not granted and copies of such applications Destroy at option.

(4) Permits of a temporary nature for municipalities or others to perform specific work, such as permits to open streets Destroy at option.

(d) Organization diagrams and charts Destroy at option after expiration or supersession.

7. Contracts and agreements (except contracts provided for elsewhere):

(a) Service contracts, such as for management, accounting and financial services 6 years after expiration or cancellation.

(b) Contracts with other utilities for the purchase, sale or interchange of product Ditto.

(c) Leases pertaining to rentals of property to or from others Ditto.

(d) Contracts and agreements with individual employees, Ditto.

labor unions, company unions,
and other employee
organizations relative to wage rates,
hours and similar matters

- (e) Contracts, agreements, and/or other essential records necessary to the carrying out of the functions of an employee's stock purchase or other type of employee's saving plan Ditto.
- (f) Contracts or agreements for the acquisition or disposal of investments (Excluding temporary cash investments) 23 years after disposal.
- (g) Memoranda essential to clarifying or explaining provisions of contracts listed above For the same period as contracts to which they relate.
- (h) Card or book records or contracts, leases, and agreements made showing dates of expiration and of renewals, memoranda of receipts and payments under such contracts, etc. Ditto.

8. Accountants' and auditors' reports:

- (a) Reports of examinations and audits by accountants and auditors not in the regular employ of the utility (Such as reports of public accounting firms and regulatory commission accountants) 7 years after date of report or Commission audit, whichever comes last.
- (b) Internal audit reports and work papers Ditto.

AUTOMATIC DATA PROCESSING

9. Automatic data processing records (Retain original source data used as input for data processing and data processing report printouts for the applicable periods prescribed elsewhere in the schedule.):

- (a) Punched cards, tapes or similar media used as intermediate records or steps in data processing for assembling data to be posted to the records of the company or used in a report or study Destroy at option.
- (b) Program documentation and revisions thereto Retain for periods prescribed for related output data. Statements

and illustrations as to the scope of operations should be sufficiently detailed to indicate (a) the application being performed, (b) the procedures employed in each application (which, for example, might be supported by flow charts, block diagrams or other descriptions of operating procedures), and (c) the controls used to insure accurate and reliable processing. Major program changes, together with their effective dates, should be noted in order to preserve an accurate chronological record.

GENERAL ACCOUNTING RECORDS

10. General and subsidiary ledgers:
 - (a) (1) General ledgers 50 years.
(2) Ledgers subsidiary or auxiliary to Ditto.
general ledgers except ledgers
provided for elsewhere
 - (b) (1) Indexes to general ledgers Ditto.
(2) Indexes to subsidiary ledgers Ditto.
except ledgers provided for elsewhere
 - (c) Trial balance sheets of general and 2 years.
subsidiary ledgers
11. Journals:
 - (a) General and subsidiary 50 years.
12. Journal vouchers and journal entries
including supporting detail:
 - (a) Journal vouchers and journal entries Ditto.
 - (b) Analyses, summarizations, distri-

butions, and other computations which support journal vouchers and journal entries:

- (1) Charging plant accounts 6 years. See §733.10.
 - (2) Charging all other accounts Ditto.
 - (c) Schedules for recurring journal entries Destroy when superseded.
 - (d) Lists of standard journal entry numbers Ditto.
13. Cash books:
- (a) General and subsidiary or auxiliary books 10 years after close of fiscal year. See Item 12(a).
14. Voucher registers:
- (a) Voucher registers or similar records when used as a source document 5 years. See §733.10.
15. Vouchers:
- (a) Paid and canceled vouchers (one copy analysis sheets showing detailed distribution of charges on individual vouchers and other supporting papers) Ditto. See §733.10.
 - (b) Original bills and invoices for materials, services, etc., paid by vouchers 6 years. See § 733.10.
 - (c) Paid checks and receipts for payments by voucher or otherwise Ditto.
 - (d) Authorization for the payment of specific vouchers Ditto.
 - (e) Lists of unaudited bills (accounts payable), lists of vouchers transmitted and memoranda regarding charges in unaudited bills Destroy at option.
 - (f) Voucher indexes Ditto.
16. Accounts receivable (see Item 53 and 54 for accounts with customers for utility service and for merchandise sales):
- (a) Records of accounts receivable pertaining to sales of utility plant 3 years after settlement.
 - (b) Record or register of accounts receivable and indexes thereto and summaries of distribution Ditto.
 - (c) Accounting department copies of Ditto.

- invoices issued and supporting papers
which do not accompany the original
invoices and authorizations for charges
including supporting papers
- (d) Periodic statements of unsettled accounts, except trial balances Destroy at option.
- (e) Schedule of invoices to be issued Ditto.
17. Records of securities owned: 6 years after disposal
of the investment.
- (a) Records of securities owned,
in treasury, or with custodians
(excluding temporary investment
of cash)
18. Payroll records:
- (a) Payroll sheets or registers of payments of salaries and wages 6 years.
See § 733.10.
- (b) Records showing the distribution of salaries and wages paid and summaries or recapitulation statements of such distribution Ditto.
See Item 12 (b).
- (c) Time tickets, time sheets, time books, time cards, workmen's reports and other records showing hours worked, description of work and accounts to be charged:
- (1) When used as a basis for payment of salaries and wages supporting records described in Item 18 (a) Ditto.
See § 733.10
- (2) When used solely as basis for supporting records described in Item 18 (b) Destroy at option.
See § 733.10
- (d) Paid checks, receipts for wages paid in cash and other evidences of payments for services rendered by employees 3 years.
See § 733.10.
- (e) Applications and authorizations for changes in wage and salary rates, summaries and reports of changes in payrolls, and similar records Ditto.
- (f) Applications for payroll changes not authorized Destroy at option.
- (g) Payroll authorizations and records of authorized positions 3 years.

- (h) Records of deductions from payrolls Destroy at option.
- (i) Comparative or analytical statements Ditto.
of payrolls
- (j) Employee's individual earnings record 6 years after
termination of
employment.

19. Assignments, attachments, and garnishments:

- (a) Record of assignments, attachments, Destroy at option.
and garnishments of employees'
salaries, including files of notices,
etc., pertaining thereto
- (b) Minors' salary releases Ditto.

INSURANCE

20. Insurance records.

- (a) Records of insurance policies in force, Destroy at option
showing coverage, premiums paid and after expiration of
expiration dates such policies.
- (b) Insurance policies Ditto.
- (c) Records of amounts recovered from 6 years.
insurance companies in connection See § 733.10.
with losses and of claims against
insurance companies, including reports
of losses and supporting papers
- (d) Inspectors' reports and records of Destroy when
condition of property superseded.
- (e) Insurance maps of property and Ditto.
structures erected thereon
- (f) Records and statements relating to Destroy at option.
insurance requirements

21. Injuries and damages:

- (a) Claim registers, card or book indexes 2 years after
and similar records in connection with settlement.
claims presented against the company
in connection with accidents resulting
in damage to the property of others
or personal injuries
- (b) Papers, reports, statements of Ditto.
witnesses, etc., necessary to the
support or rejection of individual
claims against the company
- (c) Other papers, reports or statements, Destroy at option.

pertaining to accidents resulting in property damages or personal injuries, not necessary to the support or rejection of claims

- (d) Detailed schedules or spread sheets of payments to others for personal injuries or for property damages 2 years after settlement.

OPERATIONS AND MAINTENANCE

22.1 Production - Electric and Steam:

- (a) Boiler room, condenser room, turbine room, and pump room logs including supporting data 3 years.
- (b) Boiler room and turbine room reports of equipment in service and performance Ditto.
- (c) Boiler-tube failure report Ditto.
- (d) Generation and output logs with supporting data 6 years.
- (e) Station and system generation reports 25 years.
See § 733.10.
- (f) Generating high-tension and low-tension load records 3 years.
- (g) Oil and waste reports Ditto.
- (h) Load curves, temperature logs, coal and water logs Ditto.
- (i) Gage-reading reports 2 years, except river-flow data collected in connection with hydro-operation which shall be retained for life of corporation
- (j) Recording instrument charts 1 year, except where the basic chart information is transferred to another record, the charts need only be retained six months provided the record containing

the basic data is
retained one year.

(k) Load dispatcher's and station permits Ditto.

22.2 Production - Gas:

(a) Boiler and gas machine logs, 3 years.
including supporting data

(b) Gas generation and output logs with Ditto.
supporting data

(c) Temperature and atmospheric pressure logs Ditto.

(d) Coal, coke and oil reports Ditto.

(e) Residual reports Ditto.

(f) Recording instrument charts such as 1 year, except where
pressure (static and/or differential), the basic chart
temperature, specific gravity, information is
heating value, etc. transferred to

another record,
the charts need
only be retained
six months: provided
the record containing
the basic data is
retained one year.

(g) Test of heating value at stations 6 years.
and outlying points

(h) Records of gas produced, gas purchased, gas sent out and holder stock Ditto.

(i) Analysis of gas produced and purchased including BTU and sulphur content Ditto.

(j) Records of general inspection and operating tests 3 years.

(k) Well records, including clearing, 1 year after field or
bailing, shooting, etc., records; relevant production
rock pressure; open flow; production, area abandoned.
gas analysts' reports, etc.

(l) Gas production 6 years.

(m) Gas production by counties Destroy at option.

(n) Gas measuring records 1 year, except where
the basic chart
information is

transferred to another record, the charts need only be retained six months provided the record containing the basic data is retained one year.

- (o) Tool record For life of equipment.
- (p) Royalty record 6 years.
- (q) Records of meter tests Until superseding test, but not less than two years.
- (r) Meter history records For life of meter.

22.3 Production - Nuclear

- (a) Records of normal plant operation, 6 years. However, including power levels and periods of operating charts for operations at each power level the first year's operation will be stored for the life of the corporation.
- (b) Records of principal maintenance activities, including inspection, repair, substitution or replacement of principal items of equipment pertaining to nuclear safety Ditto.
- (c) Records of abnormal occurrences Ditto.
- (d) Records of periodic checks, inspections and calibrations performed to verify that surveillance requirements are being met Ditto.
- (e) Records and prints of changes made to the plant as described in the Final Safety Analysis Report Life of Corporation.
- (f) Records of new and spent fuel inventory and assembly histories Ditto.
- (g) Records of monthly plant radiation and continuation surveys Ditto.
- (h) Records of off-site environmental monitoring surveys Ditto.

- (i) Records of radiation exposure of all plant personnel, including all contractors and visitors to the plant who enter radiation control areas Ditto.
- (j) Records of radioactivity in liquid and gaseous wastes released to the environment Ditto.
- (k) Records of any special reactor tests or experiments Ditto.
- (l) Records of changes made in the operating procedures Ditto.

22.4 Production - Water Supply, Purification and Pumping:

- (a) Record of water supplied to distribution system by sources 15 years or 3 years after the source is abandoned, whichever is shorter.
- (b) Boiler room, condenser room, turbine room, and pump room logs, including supporting data 3 years.
- (c) Boiler room and turbine room reports of equipment in service and performance Ditto.
- (d) Equipment failure report Ditto.
- (e) Pumping output logs with supporting data 6 years.
- (f) Station output reports 25 years.
- (g) Oil and waste reports 3 years.
- (h) Coal and water logs Ditto.
- (i) Gage-reading reports Ditto.
- (j) Recording instrument charts Ditto.

23.1 Transmission and Distribution - Electric and Steam:

See § 733.14.

- (a) Substation and transmission line logs Ditto.
- (b) System operator's daily logs and reports of operation Ditto.
- (c) Storage battery and other equipment logs and records Ditto.
- (d) Interruption logs and reports 6 years.
- (e) Records of substation general inspections and operation tests. 3 years.
- (f) Apparatus failure reports 6 years.
- (g) Line-trouble reports and records 3 years.

- (h) Lightning and storm data 6 years.
- (i) Insulator test records 3 years.
- (j) Reports on inspections and repairs of all street openings 6 years.
- (k) Records of meter tests Most recent test record shall be retained for at least 6 years, and any prior test record shall be retained for at least 2 years, or as may be necessary to comply with service rules regarding refunds on fast meters.
- (l) Meter shop reports (monthly reports summarizing tests, repairs, etc.) 3 years.
- (m) Meter history records For life of meter.
- (n) Transformer history records For life of transformer.
- (o) Records of transformer inspections, oil tests, etc. Destroy at option.
- (p) Pole, tower, structure, equipment and other history records For life of equipment.
- (q) Board of Fire Underwriters certificates 3 years.
- (r) Orders from municipalities in connection with street lighting or traffic signal systems Ditto.
- (s) Service record-condensation pumped in steam distribution system 1 year.
- (t) Valve record size, location, and operating data Life of corporation, unless information is summarized in other records

23.2 Transmission and Distribution-Gas: See
 § 733.14.

- (a) Transmission line logs 5 years.
- (b) Transmission and distribution department load dispatching operating logs Ditto.
- (c) Service interruption logs and reports 6 years.
- (d) Records of general inspection and operating tests 3 years.

- (e) Reports on inspections and repairs of all street openings 6 years.
- (f) Apparatus failure reports Ditto.
- (g) Records of meter tests Most recent test record shall be retained for at least 6 years, and any prior test record shall be retained for at least 2 years, or as may be necessary to comply with service rules regarding refunds on fast meters.
- (h) Meter history records For life of meter.
- (i) Meter shop reports (monthly reports summarizing tests, repairs, etc.) 3 years.
- (j) Gas measuring records Ditto.
- (k) Transmission line operating reports Ditto.
- (l) Compressor operation and reports Ditto.
- (m) Gas pressure department reports Ditto.
- (n) Recording instrument charts such as pressure (static and differential), temperature, specific gravity, heating value, etc. 1 year, except where the basic chart information is transferred to another record, the charts need only be retained 6 months provided the record containing the basic data is retained 1 year.

23.3 Transmission and Distribution - Water: See

õ 152.14(e); 292.14(e); 441.14(e); or 542.14(e), as appropriate.

- (a) Operator's daily logs and reports of operation 6 years.
- (b) Equipment logs and records 3 years.
- (c) Apparatus failure reports 6 years.
- (d) Reports on inspections and repairs of all street openings Ditto.
- (e) Records of meter tests Most recent test record shall be retained for at least 6 years, and

any prior test record shall be retained for at least 2 years, or as may be necessary to comply with service rules regarding refunds on fast meters.

- (f) Meter history records For life of meter.
 - (g) Pipe lines, structures, equipment and other history records For life of equipment.
 - (h) Meter shop reports (monthly reports summarizing tests, repairs, etc.) 6 years.
24. Customers' service:
- (a) Reports of inspections of customers' premises 2 years.
 - (b) Records and reports of customers' service complaints Ditto.
 - (c) Survey of customers' premises to determine type of service and equipment to be installed Destroy at option.
 - (d) Records of installed customers' appliances Ditto.
25. Records of auxiliary and other operations:
- (a) Records of operations other than utility operations Retain for same periods as prescribed in these regulations for similar records pertaining to utility operations.
26. Maintenance work orders and job orders:
- (a) Authorization for expenditures for maintenance work to be covered by work orders, including memoranda showing the estimates of costs to be incurred 6 years.
 - (b) Work order sheets to which are posted in detail the entries for labor, material, and other charges in connection with maintenance, and other work pertaining to utility operations Ditto.
 - (c) Summaries of expenditures on maintenance and job orders and clearances to operating and other accounts (exclusive

of plant accounts)

PERSONNEL

27. Personnel records:

- (a) Employees' service records, length of 3 years after termination of employment. service and other pertinent data
- (b) Applications for employment, requests Destroy at option. for medical examination, medical examiner's report, photographs and other identification records, and other miscellaneous records pertaining to the hiring of employees

28. Employees' benefit and pension records:

- (a) Detailed records showing computations 6 years after super- of accruals for pension liabilities session of the study or report of termination of plan.
- (b) Pension or annuity payrolls 6 years.
- (c) Pension paychecks 3 years.
- (d) Records pertaining to employees' Destroy at option. benefit programs

29. Instructions to employees and others:

- (a) Bulletins or memoranda of general 10 years after expira- instructions issued by the company to tion or supersession. employees pertaining to changes in accounting, engineering, operating, maintenance and construction policies
- (b) Bulletins or memoranda of general Destroy at option after instructions issued by the company to expiration or super- employees pertaining to accounting, session. engineering, operating, maintenance and construction methods and procedures
- (c) Notices to employees on matters of Destroy at option. discipline, deportment and other similar subjects

PLANT AND DEPRECIATION

30. Plant ledgers:

- (a) Ledgers of utility plant accounts 50 years. including land and other detailed ledgers showing the cost of utility plant by classes
- (b) Continuing plant inventory ledger, book 6 years after plant is

or card records showing description, retired, provided location, quantities, cost, etc., of mortality data are physical units (or items) of utility retained.
plant owned

31. Construction work in progress ledgers, work orders, and supplemental records:
- (a) Construction work in progress ledgers 10 years after clearance to the plant account, provided continuing plant inventory records are maintained; otherwise six years after plant is retired.
 - (b) Work order sheets to which are posted Ditto. in summary form or in detail the entries for labor, materials and other charges for utility plant additions and the entries closing the work orders to utility plant in service at completion
 - (c) Authorizations for expenditures for 10 years. additions to utility plant, including memoranda showing the detailed estimates of cost and the bases therefor (including original and revised or subsequent authorizations)
 - (d) Requisitions and registers of authorizations for utility plant expenditures Ditto.
 - (e) Completion or performance reports showing comparison between authorized estimates and actual expenditures for utility plant additions Ditto.
 - (f) Analysis or cost reports showing quantities of materials used, unit costs, number of man-hours, etc., in connection with completed construction project 10 years after clearance to the plant account, provided continuing property plant inventory records are maintained; otherwise 6 years after plant is retired.
 - (g) Records and reports pertaining to progress of construction work, the Destroy at option.

order in which jobs are to be completed, and similar records which do not form a basis of entries to the accounts

- (h) Well-drilling logs and well-construction records 1 year after field or relevant production area abandoned.

32. Retirement work in progress ledgers, work orders, and supplemental records:

- (a) Work order sheets to which are posted 10 years after plant the entries for removal costs, is retired, provided materials recovered and credits to mortality data are utility plant accounts for cost of retained. See plant retired § 733.14.

- (b) Authorizations for retirement of 10 years after clear-utility plant, including memoranda ance to the plant showing the basis for determination of account, provided con-cost of plant to be retired and tinuing plant inventory estimates of salvage and removal costs. records are maintained; otherwise six years after plant is retired. See § 733.14.

- (c) Registers of retirement work orders 10 years.

33. Summary sheets, distribution sheets, 10 years after clear-reports, statements, and papers directly ance to the plant acc-supporting debits and credits to utility ount, provided continu-plant accounts not covered by construction ing plant inventory or retirement work orders and their records are maintained; supporting records otherwise six years after plant is retired.

34. Appraisals and valuations:

Appraisals and valuations made by the 3 years after dis-company of its properties or investments or position, termination of the properties or investments of any of lease, or write-off associated companies. (Includes all records of property or invest-essential thereto) ment.

35. Maps and map reproductions:

- (a) Geological maps and aerial photographs Until map is super-of field showing the location and phy- seded or 6 years after sical characteristics of production, plant is retired, transmission, and distribution systems provided mortality of the utility or natural gas company data are retained.

36. Engineering records in connection with construction projects:
- (a) Maps, diagrams, profiles, plans, photographs, records of engineering studies and similar records in connection with proposed construction projects:
 - (1) If construction of project results wholly or in part Until record is superseded or 6 years after plant is retired.
 - (2) If construction of project does not result Destroy at option after completely accounting for expenses incurred.
37. Contracts and other agreements relating to utility or natural gas company records:
- (a) Contracts relating to acquisition or sale of plant 6 years after plant is retired.
 - (b) Contracts and other agreements relating to services preformed in connection with construction of utility plant (including contracts for the construction of plant by others for the utility and for supervision and engineering relating to construction work) Ditto.
 - (c) The primary records of gas acreage owned, leased or optioned excluding deeds and leases but including such records as lease sheets, leasehold cards, and option agreements 6 years after rights to the gas acreage have expired or otherwise dissolved.
38. Record pertaining to reclassifications of utility plants accounts to conform to prescribe systems of accounts, including supporting papers showing the bases for such reclassifications 6 years. (see Item 12(b) (1)).
39. Records of accumulated provision for depreciation and depletion of utility plants:
- (a) Detailed records or analysis sheets 25 years.

segregating the accumulated provision for depreciation according to functional classification of plant

- (b) Records supporting computation of depreciation and depletion expense of utility plant, including such data as life and salvage studies Ditto.

PURCHASES AND STORES

40. Procurements:

- (a) Agreements entered into for the acquisition of goods or the performance of services. Includes all forms of agreements not specifically set forth in Item 7 such as, but not limited to: letters of intent, exchange of correspondence, master agreements, term contracts, rental agreements and the various types of purchase orders:
 - (1) For goods or services relating to plant construction 6 years. See 733.10.
 - (2) For other goods or services 6 years.
- (b) Supporting documents including bids or proposals evidencing all relevant elements of the procurement Ditto. (See Item 12(b)).
- (c) All other procurement record such as requisitions, advice from suppliers, registers or similar records of invoices Destroy at option after company's accounts have been examined by independent accountants.

41. Material ledgers:

- (a) Ledger sheets and card records of materials and supplies received, issued and on hand 6 years (See Item 12(b)).
- (b) Statements of materials and supplies on hand, per ledgers Destroy at option after completion of annual audit by independent accountants.

42. Materials and supplies received and issued:
- (a) Records and reports pertaining to receipt of materials and supplies Ditto.
 - (b) Records of inspecting and testing materials and supplies Destroy at option.
 - (c) Records showing the detailed distribution of material and supplies issued during accounting periods 6 years. (See Item 12(b)).
 - (d) Records of material issued, transferred or returned to stock:
 - (1) Showing quantities, unit prices, and accounts to be charged 6 years.
 - (2) Showing only quantities and accounts to be charged Destroy at option if the basic information contained thereon is transferred to other records.
 - (e) Minor records and reports pertaining to materials and supplies not involving costs or final disposition, such as reports of unfilled requisitions, authorizations for additions to stock, and similar records, also storeroom copies of purchase orders and price records, other copies being retained in files of purchasing department Destroy at option.
43. Records of sales of scrap and materials and supplies:
- (a) Authorization for sale of scrap and materials and supplies 3 years.
 - (b) Contracts for sale of scrap and materials and supplies Ditto.
 - (c) Memoranda pertaining to sale of scrap and materials and supplies Destroy at option.
44. Inventories of materials and supplies:
- (a) General inventories of materials and supplies on hand with records of adjustments of accounts required to bring store records into agreements with physical inventories Destroy at option after completion of annual audit by independent accountants

- (b) Stock cards, inventory cards, and other detailed records pertaining to the order taking of inventories if abstracted into records covered by Item 44(a) above Destroy at option.
- (c) Minor inventories of materials and supplies on hand if not reflected in adjustments of accounts Ditto.

REVENUE ACCOUNTING AND COLLECTING

45. Customers' service applications and contracts:

- (a) Application for utility service for which contracts have been executed Ditto.
- (b) Applications for utility service used in lieu of contracts 1 year.
- (c) Contracts and card files or other records thereof with customers for utility service (See also Item 7(b)) 1 year after expiration or cancellation.
- (d) Applications for utility service which were withdrawn by applicant or not granted by the utility 1 year.
- (e) Contracts or sales agreements with customers and others for sale of merchandise and appliances 1 year after sales agreement is discharged.
- (f) Contracts for lease of equipment to customers, including receipts for same contract or return of equipment. 1 year after expiration of
- (g) Applications and contracts for extensions covered by refundable deposits or guarantees of revenue, also records pertaining to such contracts 1 year after entire amount is refunded.
- (h) Applications and contracts for extension for which donations or contributions are made by customer or others 50 years.

46. Rate schedules:

- (a) General files of published rate sheets Ditto.

and schedules of utility service.
(Including schedules suspended
or superseded)

- (b) Divisional or local office copies of rate sheets and schedules of utility service 1 year after expiration or cancellation.

47. Customers' guarantee deposits:

- (a) Customers' deposit ledgers or card records 6 years after refund.
- (b) Customers' deposit certificate books Ditto.
- (c) Receipts for customers' deposits refunded Ditto.
- (d) Receipts for interest on customers' deposits Ditto.

48. Meter reading sheets and records:

- (a) Superseded meter reading sheets and records 2 years or as may be necessary to comply with service rules regarding refunds on fast meters.
- (b) Meter reread sheets (special readings to check high or low consumption) and records 1 year.
- (c) Customers' reading cards Ditto.
- (d) Connection and disconnection orders and records Ditto.
fast meters.
- (e) Superseded indexes to meter books and records Destroy at option.
fast meters.
- (f) Mark sensed meter reading cards and records Destroy at option
after transferring
data to other
record.

49. Maximum demand, pressure, temperature, and specific gravity charts and demand meter record cards 1 year except where the basic chart information is transferred to another record the charts need only be retained 6 months, provided that the record containing the basis

data is retained
1 year.

50. Miscellaneous billing data:

- (a) Billing department's copies of contracts with customers (in addition to contracts in general files) Destroy at option.
- (b) Service and inspection orders from which customers are charged and sundry charge advices 1 year.
- (c) Authorizations for charges under utility service contracts 1 year after expiration of contract.
- (d) Standard billing sheets or schedules (showing computed bills of varying consumption according to rates) Destroy at option.

51. Revenue summaries:

- (a) Summaries of monthly operating revenues according to classes of service for entire utility 6 years.
- (b) Summaries of monthly operating revenues according to classes of service by towns, districts, or divisions. (Including summaries of forfeited discounts and penalties) Ditto.

52. Customers' ledgers and other records used in lieu thereof:

- (a) Customers' ledgers 2 years or as may be necessary to comply with service rules regarding refunds on fast meters.
- (b) Records used in lieu of customers' ledgers, such as bill summaries, registers, bill stubs, etc. Ditto.
- (c) Copies of large bills
 - (1) If details are transcribed to ledgers covered by Item (a) above Destroy at option.
 - (2) If details are not transcribed to ledgers 2 years.
- (d) Trial balances of ledgers 1 year.

referred to above

- (e) Indexes to customers' accounts 2 years.
- (f) Change of address notices Destroy at option.
- (g) Cards and other records relating to 2 years.
forfeited discounts

53. Merchandise sales - accounting and collecting:

- (a) Merchandise sales tickets (duplicates) Destroy at option
and charge slips for work done after annual audit and
6 months after account
is settled.
- (b) Merchandise registers and summaries of 3 years.
sales.
- (c) Merchandise ledgers and installment 1 year after completion
records of payments.
- (d) Merchandise sales returns and Destroy at option after
adjustment tickets annual audit and 6
months after account is
settled.
- (e) Cashiers' stubs for merchandise 6 months.
collections
- (f) Cashiers' periodic reports and 1 year.
statements of collection on merchandise
accounts
- (g) Records of monthly statements to Destroy at option.
customers
- (h) Reports relating to status of 1 year.
merchandise accounts receivable
- (i) Job orders and supporting details of 3 years.
charges to customers for work done
- (j) Indexes and trial balances of 1 year.
merchandise ledgers

54. Collection reports and records:

- (a) Periodic reports, lists, and summaries Destroy at option.
of collections of operating revenues
by collectors, agents, and local or
divisional or district offices. (See
Item 60(d))
- (b) Bill stubs, copies of bills, 6 months.
collection slips, and other records
pertaining to collections, summarized

or detailed in daily or periodic cash reports

- (c) Memorandum records of remittances from Ditto. local or branch offices

Note: See Item 59 pertaining to deposits of cash with banks. Item 59 applies to all bank accounts whether at general, local, or divisional offices

55. Customers' account adjustments:

- (a) Detailed records pertaining to adjustments of customers' accounts for overcharges, undercharges, and other errors, results of which have been transcribed to other records 1 year.
- (b) Detailed records of high-bill complaints whether or not resulting in adjustments to customers' accounts Ditto.

56. Uncollectible accounts and customers' credit records:

- (a) Records of ratings, credit classifications, and investigations of customers Destroy at option.
- (b) Ledger accounts and supporting details of customers' accounts considered to be uncollectible For period legally collectible.
- (c) Reports and statements showing age and status of customers' accounts 1 year.
- (d) Data on unpaid final bills Ditto.
- (e) Authorizations for writing off customers' accounts 3 years.

TAX

57. Tax records:

- (a) Copies of returns and schedules filed with taxing authorities, supporting work papers, records of appeals, tax bills and receipts for payment. (See Item 15(b) for vouchers evidencing disbursements)
 - (1) Federal income tax returns 7 years after settlement.

- (2) State income and property tax returns 2 years after settlement.
- (3) Sales and use taxes 3 years.
- (4) Other taxes 2 years after settlement.
- (5) Agreements between associate companies as to allocation of consolidated income taxes 7 years after settlement.
- (6) Schedule of allocation of consolidating federal income taxes among associate companies Ditto.
- (b) Summaries of taxes paid Destroy at option.
- (c) Filings with taxing authorities to qualify employee benefit plans 7 years after settlement of federal return or discontinuance of plan, whichever is later.
- (d) Information returns and reports to taxing authorities 3 years, or for the period of any extensions granted for audit.

TREASURY

58. Statements of funds and deposits:

- (a) Summaries and periodic statements of cash balances on hand and with depositories Destroy at option.
- (b) Statements of managers' and agents' cash balances on hand and with depositories Ditto.
- (c) Authorizations for, and statements of, transfer of funds from one depository to another Ditto.
- (d) Requisitions and receipts for funds furnished managers, agents, and others Destroy at option after funds have been returned or accounted for.
- (e) Records of fidelity bonds of employees and others responsible for funds of the utility Destroy at option after liability and bonding has expired.
- (f) Reports and estimates of funds required Destroy at option.

in the course of business for internal administrative or operating purposes (and not used as the basis for entries to accounts of the companies concerned) to show the results of operations and the financial condition of the utility

(b) Quarterly, monthly or other periodic financial, operating and other statistical reports as above 2 years after date of report.

(c) All other statistical reports (not covered elsewhere in these regulations) prepared for internal administrative or operating purposes only and not used as the basis for entries to the accounts of the company Destroy at option.

62. Budgets and other forecasts:

Prepared for internal administrative or operating purposes of estimated future income, receipts and expenditures in connection with financing, construction and operations and acquisitions or disposals of properties or investments by the company and its associate companies, including revisions of such estimates and memoranda showing reasons for revisions; also records showing comparison of actual income and receipts and expenditures with estimates 3 years.

63. Correspondence:

(a) Correspondence and indexes thereto relating to offices covered by other items of these regulations Retain for the period prescribed for the item to which it relates when necessary for a proper explanation of same.

(b) Stenographers' notebooks and dictaphone or other mechanical device records Destroy at option.

(c) Mailing lists of prospects for appliance sales, securities, etc. Ditto.

64. Records of predecessors and former associates records of utility plant acquired have Retain until the

been integrated with the utility's plant records and the original cost of the acquired plant is adequately supported by cost details and until it is ascertained that such records are not necessary to fulfillment of any unsatisfied regulatory requirement, such as: (a) approval and recording of accounting adjustments resulting from reclassification and original cost studies and acceptance of property acquisition journal entries, (b) cost, depreciation and amortization reserve determinations for plant, (c) establishment of continuing plant inventory records or accounting evidence of the cost of long-lived property in the absence of such continuing plant inventory records.

65. Reports to federal and state regulatory commissions:

- | | |
|---|-------------------------------|
| (a) Annual financial, operating and statistical reports | Life of corporation. |
| (b) Monthly and quarterly reports of operating revenues, expenses, and statistics | 2 years after date of report. |

- (c) Special or periodic reports on the following subjects:
 - (1) Transactions with associated companies 6 years.
 - (2) Budgets of expenditures 3 years.
 - (3) Accidents 6 years.
 - (4) Employees and wages 5 years.
 - (5) Loans to officers and employees 3 years after fully paid.
 - (6) Issues of securities Data filed with the SEC retain 25 years or until all securities covered are retired, whichever is shorter; other reports retain until securities covered are retired.
 - (7) Purchases and sales, utility properties Life of corporation.
 - (8) Plant changes - units added and retired Ditto.
 - (9) Service interruptions 6 years.

66. Other miscellaneous records:

- (a) Copies of advertisements by the company in behalf of itself or any associate company in newspapers, magazines and other publications including records thereof. (Excluding advertising of product, appliances, employment opportunities, services, territory, routine notices and invitations for bids for securities, all of which may be destroyed at option) 6 years.
- (b) Indexes of forms used by company Destroy when superseded.

 PART
 753 Protection of Underground Facilities

.SO DOC 16C-PT753

NYCRR

PART 753

PROTECTION OF UNDERGROUND FACILITIES

(Statutory Authority: Public Service Law, § 119-b
and General Business Law, Art. 36)

Subpart 753-1 General Requirements

Subpart 753-2 Duties of Local Governing Bodies

Subpart 753-3 Duties of Excavators

Subpart 753-4 Duties of Operators

Subpart 753-5 One-Call Notification Systems

Subpart 753-6 Enforcement procedures

.SO DOC 16C-SP753-1

NYCRR

SUBPART 753-1

GENERAL REQUIREMENTS

Sec.

753-1.1 Purpose

753-1.2 Definitions

.SO DOC 16C-753-1.1

NYCRR

753-1.1 Purpose.

The purpose of these rules is to establish procedures for the protection of underground facilities in order to assure public safety and to prevent damage to public and private property, as required by General Business Law, Article 36 and Public Service Law, Section 119-b. This Part may be cited as Industrial Code 53 or Code Rule 53, in addition to its designation as Part 753.

.SO DOC 16C-753-1.2

NYCRR

753-1.2 Definitions.

When used in this Part, unless the context otherwise requires, the following terms shall have the following meanings:

(a) Automated Positive Response (APR) system: a system established by the one-call notification system to furnish a single point of contact between member operators and excavators for the purpose of communicating, the status of an excavation location request as provided by the member operators.

(b) Commission. The Public Service Commission.

(c) Contact. Any defacing, scraping, impact upon an underground facility or its protective coating, housing or other protective device.

(d) Damage. Any destruction or severance of any underground facility or its protective coating, housing or other protective device or any displacement of or removal of support from any underground facility which would necessitate repair of such facility.

(e) Department. The Department of Public Service.

(f) Demolition. The total or partial wrecking, razing, rending, moving or removal of any structure.

(g) Enforcement proceeding: A proceeding by the Commission to determine a penalty, for violations of this part, under the authority of §119 (b)(8) of the Public Service Law.

(h) Emergency. Any abnormal condition which presents an immediate danger to life or property including the discontinuance of a vital utility service necessary for the maintenance of public health, safety and welfare.

(i) Excavation. Any operation for the purpose of movement or removal of earth, rock, pavement or other materials in or on the ground by use of mechanized equipment or by blasting, including, but not limited to, digging, auguring, backfilling, boring, drilling, grading, plowing in, pulling in, fence post or pile driving, tree root removal, sawcutting, jackhammering, trenching and tunneling; provided, however, that the following shall not be deemed excavation:

(1) the movement of earth by tools manipulated only by human or animal power;

(2) the tilling of soil for agricultural purposes;

(3) vacuum excavation; and

(4) sawcutting and jackhammering in connection with pavement restoration of a previous excavation where only the pavement is involved.

(j) Excavator. Any person who is engaged in a trade or business which includes the carrying out of excavation or demolition; provided, however, that an individual employed by an excavator and having no supervisory authority other than the routine direction of employees over an excavation or demolition, shall not be deemed an excavator for the purpose of this Part. The act of any employee or agent of any excavator acting within the scope of his or her official duties or employment shall be deemed to be the act of such excavator.

(k) Field Citation. A written statement issued pursuant to subdivision 753-6.2 of this Part by an employee of the Department informing a Respondent that, in the judgment of the employee, a violation has occurred and setting forth the specific provisions that were allegedly violated by Respondent.

(l) Hand dug test holes. Excavations performed for designating, testing or verification purposes which are dug by the use of hand-held tools utilizing only human power. The use of vacuum excavation techniques is an acceptable means of exposing underground facilities.

(m) Local governing body. A town, village or city outside the city of New York or a county within the city of New York.

(n) Near. An area within 15 feet of the outside perimeter or diameter of an underground facility or its encasement.

(o) Notice of probable violation (NOPV): A written statement or letter from the Department, containing the items specified by subdivision 753-6.4(b) of this Part, to a Respondent informing him or her that an enforcement proceeding is being initiated.

(p) One-call notification system. Any organization among whose purposes is establishing and carrying out procedures to protect underground facilities from damage due to excavation and demolition, including but not limited to, receiving notices of intent to perform excavation and demolition and transmitting the notices to one or more member operators of underground facilities in the specified area.

(q) Operator. Any person who operates an underground facility to furnish any of the following services or materials: electricity, gases, steam, liquid petroleum products, telephone or telegraph communications, cable television, sewage removal, traffic control systems, or water.

(r) Person. Any individual, firm, corporation, association or partnership, cooperative association, joint venture, joint stock association, business trust, their lessees, trustees or receivers, municipality, governmental unit or public authority whether or not incorporated.

(s) Powered equipment. Any equipment energized by an engine or motor and used in excavation or demolition work.

(t) Respondent: A person on whom the Department has served a field citation, warning letter or Notice of Probable Violation.

(u) Tolerance zone. If the diameter of the underground facility is known, the distance of one-half of the known diameter plus two feet, on either side of the designated center line or, if the diameter of the underground facility is not known, two feet on either side of the designated center line.

(v) Underground facility. A facility and its attachments located underground and installed by an operator to furnish its services or materials, including but not limited to, pipelines, conduits, ducts, cables, wires, manholes, vaults, tanks, tunnels and any encasement containing such facilities. Such term shall not include oil and gas production and gathering pipeline systems used primarily to collect oil or gas production from wells.

(w) Warning Letter. A written letter from the Department to a Respondent, pursuant to subdivision 753-6.3 of this Part, informing a

Respondent that an alleged violation of a specific provision(s) of Part 753 has occurred or is continuing, advising the Respondent to correct it, if it is correctable, and to comply henceforth or be subject to enforcement actions under this Part.

(x) Work area. The area of the ground or equivalent surface which will be disturbed or removed by excavation work or affected by demolition work.

(y) Working days: Mondays through Fridays, exclusive of public holidays. The public holidays observed by the State of New York are as follows:

New Years Day	January 1
Martin Luther King Day	3rd Monday in January
President's Day	3rd Monday in February
Memorial Day	Last Monday in May
Independence Day	July 4
Labor Day	1st Monday in September
Columbus Day	2nd Monday in October
Veteran's Day	November 11
Thanksgiving Day	4th Thursday in November
Christmas Day	December 25

If the holiday occurs on a Saturday, it will be observed the Friday before. If the holiday occurs on a Sunday, it will be observed the Monday after.

.SO DOC 16C-753-3.1 NYCRR

Section 753-3.1 Timing of notice for excavation or demolition.

(a) (1) Before commencing or engaging in any nonemergency excavation or demolition, each excavator shall provide notice of the location and date of the planned excavation or demolition to the one-call notification system serving the vicinity in which the excavation or demolition is to take place.

(2) Such notice shall be served at least two but not more than ten working days, not including the date of the call, before the commencement date of the excavation or demolition.

(b) Excavation or demolition which is required to be performed promptly as a result of an emergency, disaster or to correct an immediate hazard may proceed immediately without prior notification to operators, if the situation is so serious that the excavation or demolition cannot reasonably be delayed. However, excavators shall notify the one-call notification system as soon as possible that such excavation or demolition is commencing or is underway. Extreme caution shall be employed by the excavator to prevent damage to existing underground facilities and to avoid endangering persons and property.

(c) At least seven working days in advance of the commencement date of a demolition, the excavator shall request a pre-demolition conference, through the one-call notification system, with all member operators who have underground facilities at or near the demolition area. A pre-demolition conference may encompass one or more demolition(s) in the

project area. A request for a pre-demolition conference is not a substitute for the notice of intent to perform demolition work required by Section 753-3.1 of this Part.

(d) Whenever an excavator cancels an excavation or demolition, he or she shall promptly communicate the cancellation to facility operators utilizing the one-call notification system.

(1) Whenever an excavator postpones the commencement date for ten or less working days, no call to the one-call notification system or operators is required.

(2) Whenever an excavator postpones an excavation or demolition more than ten working days, the same requirements for notice shall pertain to the revised commencement date as listed in subdivision 753-3.1 (a) of this section.

(e) Information requested from an operator for design purposes shall not be a substitute for the notice of intent to perform excavation or demolition as required by this Subpart.

.SO DOC 16C-753-3.2

NYCRR

753-3.2 Detailed notice requirements.

(a) Every notice provided by an excavator to the one-call notification system concerning planned excavation or demolition shall contain at least the following information:

- (1) Name of the person serving such notice;
- (2) Name, address and telephone number of the excavator or excavator's company;
- (3) Excavator's field telephone number, if one is available;
- (4) Name of the field contact person, if any;
- (5) Address and exact location as well as the extent and dimensions of the planned work area;
- (6) Means of excavation or demolition and whether or not explosives are to be used;
- (7) Brief description of the planned excavation or demolition;
- (8) Date and time the excavation or demolition is planned to commence.

(b) When necessary for adequate identification, or as determined by mutual agreement of the operator and excavator, the excavator shall delineate the work area with white paint, white stakes or other suitable white markings.

.SO DOC 16C-753-3.3

NYCRR

753-3.3 Commencement of excavation or demolition.

(a) The excavator may proceed with excavation or demolition on the stated date of commencement if, prior thereto, he or she has received notification from each and every operator notified by the one-call

notification system that:

(1) Such operator has no underground facility located in or within 15 feet of the work area; or

(2) That any underground facility located in or within 15 feet of the work area has been staked, marked or otherwise designated in accordance with the provisions of Subpart 753-4 of this Part.

(b) The excavator shall not commence the excavation or demolition on the stated commencement date if he or she has been notified by an operator that the staking, marking or other designations of an underground facility located in or within 15 feet of the work area will not be completed on the stated commencement date. In such case, the operator is required promptly to report such fact to the excavator and to inform the excavator of a prompt and practicable completion date, which in no case shall be more than two working days after the excavator's stated commencement date, unless a longer period is agreed to by both parties.

(c) The excavator may proceed with excavation or demolition prior to the stated date of commencement once he or she has received notification from each and every operator notified by the one-call notification system that each operator has no underground facilities located in or within 15 feet of the work area.

(d) Where available through the one-call notification system, the excavator shall utilize the Automated Positive Response (APR) system in order to obtain the response(s) of the operators that were notified by the one-call notification system.

.SO DOC 16C-753-3.4

NYCRR

753-3.4 Staking, marking or other designation.

(a) Every excavator shall be familiar with the provisions of this Part, especially those relating to size and depth indications, color coding, center line or offset staking or marking and the location of underground facilities by designations other than staking or marking.

(b) Whenever the excavator determines that a review of the staking, marking or other designation is necessary or that additional information is required, he or she shall so notify the operator or the one-call notification system.

.SO DOC 16C-753-3.5

NYCRR

753-3.5 Preservation of stakes, markings or other designations.

Starting on the stated commencement date given in the excavator's notice to the one-call notification system, the excavator shall be responsible for protecting and preserving the staking, marking or other designation until no longer required for proper and safe excavation or

demolition work at or near the underground facility.

.SO DOC 16C-753-3.6

NYCRR

753-3.6 Verification of underground facilities.

Where an underground facility has been staked, marked or otherwise designated by the operator and the tolerance zone overlaps with any part of the work area, or the projected line of a bore/directional drill intersects the tolerance zone, the excavator shall verify the precise location, type, size, direction of run and depth of such underground facility or its encasement. Verification shall be completed before the excavation or demolition is commenced or shall be performed as the work progresses.

(a) Powered or mechanized equipment may be used within the tolerance zone for removal of pavement or masonry but only to the depth of such pavement or masonry.

(1) Below the depth of pavement or masonry, powered equipment may be used in the tolerance zone prior to the verification of the location of facilities when agreed to in writing by the affected operator(s).

(2) Operators, or their agents and contractors working under their direction, may use powered equipment to locate their own facilities within the tolerance zone.

(b) The verification of underground facilities furnishing gas or liquid petroleum products shall be accomplished by the excavator by exposing the underground facility or its encasement to view by means of hand dug test holes at one or more points where the work area and tolerance zone overlap, or more points as designated by the operators of such facilities.

(c) The verification of underground facilities other than those furnishing gas or liquid petroleum products shall be performed at one or more points for each such underground facility as may be required by the operator. Verification shall be accomplished by exposing the underground facility or its encasement to view by hand dug test holes or by other means mutually agreed to by the excavator and operator.

.SO DOC 16C-753-3.7

NYCRR

753-3.7 Unverifiable underground facilities.

If the precise location of an underground facility cannot be verified by the excavator after diligent search at a reasonable depth within the tolerance zone as staked, marked or otherwise designated by the operator, the excavator shall so notify such operator as soon as possible. The operator shall respond in accordance with subdivision 753-4.10 of this Part.

.SO DOC 16C-753-3.8

NYCRR

753-3.8 Powered excavating equipment limitations.

After verifying the location of an underground facility, the excavator shall not employ powered or mechanical excavating equipment closer than four inches in any direction from the staked, marked or otherwise designated or known outside diameter or perimeter of such facility or its protective coating unless agreed to in writing by the operator of the affected underground facility. Any such written agreement shall be furnished to the excavator by the operator, upon request.

.SO DOC 16C-753-3.9

NYCRR

753-3.9 Discovery of unknown underground facilities.

Where an undesignated or otherwise unknown underground facility is discovered within a work area, the excavator shall report such discovery as follows:

(a) If the identity of the operator of the discovered underground facility is known or is obvious, the excavator shall report the discovery to such operator. The operator shall respond immediately and, in accordance with section 753-4.9(d) of this Part, take any necessary action and advise the excavator as to whether he or she may proceed in the immediate area.

(b) (1) If the identity of the operator of the discovered underground facility is not known or obvious, the excavator shall report the discovery to the one-call notification system and each operator notified by the one-call notification system shall respond immediately and, in accordance with subdivision 753-4.9(d) of this Part, determine whether or not such discovered facility is his or hers.

(2) While awaiting a determination of ownership, the excavator may proceed with the excavation or demolition taking reasonable care to protect and prevent damage to such underground facility.

.SO DOC 16C-753-3.10

NYCRR

753-3.10 Requirements concerning contact and damage to underground facilities.

(a) Excavators shall take all reasonable precautions to prevent contact or damage to underground facilities and their protective coatings, including but not limited to, compliance with any reasonable directions or accepted engineering practices given by affected underground facility operators.

(b) In the event of contact with or damage to an underground facility, the excavator shall immediately notify the operator of the facility.

(c) All excavation or demolition in the immediate vicinity of the contacted or damaged portion of the underground facility shall be suspended until such portion is repaired and the operator advises the

excavator that excavation or demolition may proceed.

(d) No backfilling shall be done by the excavator in the vicinity of the contact or damage until the operator conducts an inspection and makes any necessary repairs; and, the excavator shall undertake no repairs unless and until authorized by the operator.

.SO DOC 16C-753-3.11

NYCRR

753-3.11 Requirements concerning underground facilities in danger of failing.

(a) An excavator who by removing the surrounding materials exposes an underground facility which in his or her judgment appears to have failed or to be in potential danger of failing from corrosion or other causes shall immediately report such condition to the operator of such underground facility.

(b) The excavator shall delay any further work in the immediate vicinity of such underground facility which could jeopardize it but may proceed in areas not affecting the questionable facility.

(c) The excavator may proceed in such immediate vicinity after the operator responds and takes necessary action in regard thereto and advises the excavator that he or she may proceed.

.SO DOC 16C-753-3.12

NYCRR

753-3.12 Required support and protection for underground facilities.

(a) An excavator shall provide prompt and adequate support and protection for every underground facility located in the work area as is reasonably specified by the operator of any such facility.

(b) In the absence of any specifications by the operator, the excavator shall provide support and protection in accordance with generally accepted engineering practice, including but not limited to shoring and bracing.

(c) Support shall be at least equivalent to the previously existing support and shall protect the underground facility against freezing and against traffic and other loads.

(d) Support shall be maintained during excavation, during backfilling and, if necessary, after backfilling is completed.

(e) The operator may, in agreement with the excavator, provide such support.

.SO DOC 16C-753-3.13

NYCRR

753-3.13 Backfilling requirements.

(a) An excavator performing excavation or demolition at an underground facility shall backfill such excavation with materials and in such manner as specified by the operator or, in the absence of such specifications, with suitable materials and in such manner as will avoid

damage to, and provide proper support for, such underground facility and its protective coating both during and after backfilling operations.

(b) The excavator shall not place large rock, frozen earth, rubble, debris or other heavy or sharp materials or objects which could cause damage to or scraping against any underground facility.

(c) The backfill beneath and around any underground facility shall be properly compacted in accordance with generally accepted engineering practice.

(d) Heavy loads and excessive forces shall not be imposed on any exposed underground facility at any time during backfilling operations.

.SO DOC 16C-753-3.14 NYCRR

753-3.14 Emergency requirements.

In the event of an emergency involving danger to life, health or property as a result of damage to an underground facility containing gas or liquid petroleum products or as a result of an electrical short or escape of gas or hazardous fluids, the excavator shall:

(a) proceed to evacuate his or her employees and all other endangered persons from the immediate vicinity to the best of his or her ability; and

(b) immediately notify 911 and the operator of the affected facility of the exact location, nature of the emergency and of the underground facility which is affected.

.SO DOC 16C-753-3.15 NYCRR

753-3.15 Responsibility to employees.

Every excavator subject to the provisions of this Part shall make certain that all of his or her employees directly involved in excavation or demolition are thoroughly familiar with the applicable provisions of this Part and especially the provisions of this Subpart relating to their safety.

.SO DOC 16C-SP753-4 NYCRR

SUBPART 753-4

DUTIES OF OPERATORS

Sec.

753-4.1 Participation of operators

753-4.2 Removal of underground facilities

753-4.3 Operator furnished information

753-4.4 Receiving notices

753-4.5 Operator's response to notice

753-4.6 Locating underground facilities

753-4.7 Uniform color code

753-4.8 Uniform identification letters

753-4.9 Operator's response to notices of contact or damage, facilities in danger of failing and discovery of unknown underground facilities

753-4.10 Unverifiable underground facilities

753-4.11 Emergency service requirements

753-4.12 Requirements concerning demolition

753-4.13 Support and backfilling requirements

753-4.14 Information for design purposes

753-4.15 Consumer education programs

.SO DOC 16C-753-4.1 NYCRR

753-4.1 Participation of operators.

(a) Every operator of an underground facility shall participate in a one-call notification system within whose geographical jurisdiction or boundaries such underground facility is located.

(b) Every operator who is not a member of the one-call notification system and installs, has installed for him or her, or otherwise acquires, an underground facility, shall participate in a one-call notification system within 10 days after commencement of the installation or after the acquisition.

.SO DOC 16C-753-4.2 NYCRR

753-4.2 Removal of underground facilities. Any operator who removes or transfers ownership of all of his or her underground facilities from within the boundaries of any one-call notification system shall promptly notify the system.

.SO DOC 16C-753-4.3 NYCRR

753-4.3 Operator furnished information.

(a) Every operator shall provide the one-call notification system at least the following information:

(1) Corporate or other name and address of such operator.

(2) Department, agency, office or individual designated by the operator to be notified by the one-call notification system or excavators and the local address and telephone number of such department, agency, office or individual.

(b) Whenever such information is revised, changed or found to be incomplete or incorrect, the operator shall provide corrected information to each one-call notification system in which he or she participates.

.SO DOC 16C-753-4.4 NYCRR

753-4.4 Receiving notices.

Each operator shall establish a means of receiving notices of planned excavation or demolition from the one-call notification system in

accordance with the procedures of the system.

.SO DOC 16C-753-4.5 NYCRR

753-4.5 Operator's response to notice.

(a) Prior to the stated commencement date of the excavation or demolition work as stated in the recorded notice, the operator shall make a reasonable attempt to inform the excavator, by means of an Automated Positive Response (APR) system, where available, or by means of direct communications with the excavator, where APR is not available, that either:

(1) The operator has no underground facility in or within 15 feet of the work area; or

(2) Every underground facility belonging to him or her which is located in or within 15 feet of the work area has been staked, marked or otherwise designated in accordance with the provisions of this Subpart.

(b) Where an operator cannot complete the staking, marking or other designation of an underground facility prior to the stated commencement date and time of the excavation or demolition, the operator shall promptly report such fact to the excavator and shall inform the excavator of a prompt and practicable completion date which in no case shall be more than two working days after the excavator's stated commencement date, unless a longer period is agreed to by both parties.

(c) Whenever an excavator requests a review of any staking, marking or other designation, the operator shall comply with such request as soon as possible.

.SO DOC 16C-753-4.6 NYCRR

753-4.6 Locating underground facilities.

(a) Whenever an operator's underground facilities are in or within 15 feet of a work area, such facility shall be located, accurately and with due care, by means of staking, marking or other designation in accordance with the provisions of this Subpart.

(b) The following staking and marking requirements shall apply:

(1) Stakes or surface markings shall be provided preferably at the center line of the underground facility and at such sufficient intervals as is necessary to indicate clearly the location and direction of run of such underground facility;

(2) All stakes and surface markings shall be color coded in accordance with the provisions of this Subpart in order to identify the type of underground facility so staked or marked;

(3) Stakes and surface markings shall indicate in inches the size or diameter of the underground facility or its encasement, if known;

(4) Each stake and surface marking shall indicate in inches the depth

of the underground facility at that point, if known;

(5) Surface markings shall consist of paint, dye or equivalent material which is color coded in accordance with the provisions of this Subpart and which contrasts with the ground or equivalent surface;

(6) Where conditions exist so as to render center line staking or marking impractical or confusing, the operator may indicate the location of an underground facility by means of offset staking or remote tie-in markings which will clearly indicate the location and direction of run of the facility.

(c) If staking or marking are not used to indicate the location of an underground facility, the operator shall designate such location in accordance with the following:

(1) By exposing the underground facility or its encasement to view within the work area in a manner sufficient to allow the excavator to verify the type, size, direction of run and depth of the facility;

(2) By providing field representation and instruction to the excavator in the work area; or

(3) By any other means as mutually agreed to by the operator and excavator, including but not limited to written descriptions, photographs or verbal instructions. Such agreement shall be provided in writing to the excavator upon his or her request.

(d) An operator, or its agents or contractors, performing excavation or demolition work at or near his or her own underground facility shall not be required to stake, mark or otherwise designate such underground facility.

.SO DOC 16C-753-4.7

NYCRR

753-4.7 Uniform color code.

The following uniform color code shall be utilized for staking and marking used to designate the location of underground facilities and excavation sites:

(a) Yellow - Gas, oil, petroleum products, steam, compressed air, compressed gases and all other hazardous liquid or gaseous materials except water.

(b) Red - Electric power lines or conduits.

(c) Orange - Communication lines or cables, including but not limited to telephone, telegraph, fire signals, cable television, civil defense, data systems, electronic controls and other instrumentation.

(d) Blue - Water.

(e) Green - Storm and sanitary sewers including force mains and other non-hazardous materials.

(f) Purple - Radioactive materials, reclaimed water, irrigation and

slurry line.

- (g) White - Excavation site.
- (h) Pink - Survey markings.

.SO DOC 16C-753-4.8

NYCRR

753-4.8 Uniform identification letters. All staking and marking utilized for the location of underground facilities shall contain letter designations which will clearly identify the type of underground facility so staked or marked. Such letters shall comply with the following code:

- (a) C - Communication facilities (other than telephone service).
- (b) CH - Chemicals.
- (c) CTV - Cable television.
- (d) E - Electrical power.
- (e) FS - Fire signals.
- (f) G - Gas.
- (g) HPW - High-pressure water (100 psig or more).
- (h) P - Petroleum.
- (i) PP - Petroleum products (naphtha, gasoline, kerosine and similar products).
- (j) S - Sewer.
- (k) ST - Steam.
- (l) T - Telephone company services.
- (m) TC - Traffic control signals.
- (n) W - Water.
- (o) O - All other facilities.

.SO DOC 16C-753-4.9

NYCRR

753-4.9 Operator's response to notices of contact or damage, facilities in danger of failing and discovery of unknown underground facilities.

(a) Upon receipt of a notice from an excavator or a one-call notification system reporting contact or damage to an underground facility, the operator shall immediately inspect such facility and make the necessary repairs or shall advise the excavator that the excavation work may proceed.

(b) Such repairs may be performed by the operator or by others authorized by him or her, including the excavator.

(c) Upon receipt of a notice from an excavator or a one-call notification system of the discovery of an underground facility in danger of failing, the operator shall respond immediately and take any necessary action in regard thereto, and advise the excavator as to whether he or she may proceed in the immediate area.

(d) When an operator has been notified by an excavator or a one-call notification system that an unknown underground facility has been discovered in the course of the excavator's work, such operator shall immediately determine whether or not such discovered facility is his or hers by means of records, on-site inspection or otherwise, and as soon as practicable either:

(1) advise the excavator that the unknown facility is not his or hers;
or

(2) if such facility does belong to him or her, advise the excavator on how to proceed and of any special requirements the operator deems necessary.

.SO DOC 16C-753-4.10 NYCRR

753-4.10 Unverifiable underground facilities.

If an excavator notifies an operator that, after diligent search at a reasonable depth within the tolerance zone as staked, marked or otherwise designated by the operator, that he or she cannot verify the location of an underground facility, the operator shall verify such location as soon as possible or shall provide the excavator with prompt field assistance or use other means mutually agreed to by the excavator and operator. Such agreement shall be provided to the excavator upon his or her request.

.SO DOC 16C-753-4.11 NYCRR

753-4.11 Emergency service requirements.

(a) Each operator of an underground facility containing gas or liquid petroleum products shall provide means for accepting emergency calls and prompt field assistance to such calls on a 24 hour-per-day basis.

.SO DOC 16C-753-4.12 NYCRR

753-4.12 Requirements concerning demolition.

In addition to responding in accordance with section 753-4.6(a) of this Subpart, the operator shall attend a pre-demolition conference with the excavator upon the excavator's request.

.SO DOC 16C-753-4.13 NYCRR

753-4.13 Support and backfilling requirements.

Where an underground facility will be disturbed or uncovered by excavation or demolition, the operator of such facility shall indicate to the excavator any preferred means of support or protection required for such facility and any special backfilling requirements or provide any other guidance for protection of an underground facility. Such information shall be furnished to the excavator before the stated date of commencement of the work, if practical.

.SO DOC 16C-753-4.14 NYCRR

753-4.14 Information for design purposes.

Each operator shall provide a means by which information regarding the location of underground facilities can be obtained for design purposes. Such means may include, but are not limited to; provision of maps, meetings, or marking in accordance with Section 753-4.6 and shall be performed within mutually agreed to timeframes.

.SO DOC 16C-SP753-5 NYCRR

SUBPART 753-5

ONE-CALL NOTIFICATION SYSTEMS

Sec.

753-5.1 Qualifications

753-5.2 Notice procedures

753-5.3 System Duties

.SO DOC 16C-753-5.1 NYCRR

753-5.1 Qualifications.

(a) The total extent of one-call notification systems shall be such in numbers and locations as to provide protection of underground facilities throughout all areas of the state with no geographic overlap of areas served.

(b) Every one-call notification system shall be governed by a not-for-profit corporation in accordance with the minimum requirements contained in the law and in this Part.

.SO DOC 16C-753-5.2 NYCRR

753-5.2 Notice procedures.

Every one-call notification system shall:

(a) Establish an effective notification service for receipt of notices from excavators, including a toll-free telephone number, and for transmission of such notices to every member operator who has underground facilities in or within 15 feet of the work area. Such notices may include:

(1) notice of a planned excavation or demolition;

(2) a request for a pre-construction or pre-demolition conference relating to excavation or demolition work at or near underground facilities; or

(3) a notice of the discovery of an unknown underground facility;

(b) Provide a direct means of communication between the one-call notification system and each operator who is a member of the system;

(c) Use a standardized format to record all incoming notices or requests from excavators, including at least the following information:

(1) Date and time of receipt of a notice or request;

(2) Name of the person serving such notice or making such request;

(3) Name, address and telephone number of the excavator or excavator's company;

(4) Excavator's field telephone number, if one is available;

(5) Name of the excavator's field contact person, if any;

(6) Address and exact location as well as the approximate extent and dimensions of the work area;

(7) Means of excavation or demolition and plans for use of explosives;

(8) Brief description of the planned excavation or demolition;

(9) Date and time the work is to commence;

(10) Name of the person receiving such notice; and

(11) Name of the notification system;

(d) Assign a unique serial number to each incoming notice from excavators and provide the number to the excavator;

(e) Give persons providing notice of an intent to engage in an excavation or demolition activity the names of member operators of underground facilities to whom the notice will be transmitted;

(f) Furnish a copy of such notice record to the excavator, upon his or her request. The mailing of such copies of the notice record shall be construed to be in compliance with this Part; and

(g) Keep on file a copy of each such notice record for a period of at least four years from the date of such notice.

.SO DOC 16C-753-5.3

NYCRR

753-5.3 System duties. Each one-call notification system shall perform the following duties:

(b) Conduct a continuing program to:

(1) Inform excavators of the one-call notification system's existence and purpose and their responsibility to notify the one-call notification system of planned excavation and demolition and to protect underground facilities; and

(2) Inform operators of the responsibility to participate in the one-call notification system, to respond to a notice relating to a planned excavation and demolition and to designate and mark facilities according to the provisions of this Part.

(c) Provide a means by which contact information provided by the member operators can be obtained for the purpose of learning the location of underground facilities for design purposes.

(d) Provide an Automated Positive Response (APR) system for mandatory use by excavators and member operators, where determined by the one-call notification system to be technologically and economically practical.

.SO DOC 16C-SP753-6

NYCRR

SUBPART 753-6

ENFORCEMENT PROCEDURES

Sec.

753-6.1 Scope

753-6.2 Field citations

753-6.3 Warning letters

753-6.4 Notice of probable violation

753-6.5 Respondent's options

753-6.6 Commission proceeding

753-6.7 Consent orders

753-6.8 Final order

753-6.9 Payment of penalties

.SO DOC 16C-753-6.1 NYCRR

Section 753-6.1 Scope.

This Subpart describes the enforcement authority and sanctions of the Public Service Commission for achieving and maintaining compliance with 16 NYCRR Part 753. It also describes the procedures governing the exercise of that authority and the imposition of those sanctions.

.SO DOC 16C-753-6.2 NYCRR

753-6.2 Field citations.

Upon determining that a probable violation of a provision of Part 753 has occurred, the Department may issue a field citation to a Respondent, identifying specific provisions alleged to have been violated.

.SO DOC 16C-753-6.3 NYCRR

753-6.3 Warning letters.

Upon determining that a probable violation(s) of a provision of Part 753 has occurred or is continuing, the Department may issue a warning letter notifying the Respondent of the probable violation and advising him or her to correct it, if it is correctable, and to comply henceforth, or be subject to enforcement procedures under this Part.

.SO DOC 16C-753-6.4 NYCRR

753-6.4 Notice of probable violation.

(a) If the Department has reason to believe that a violation of Part 753 has occurred or is continuing, the Department may commence an enforcement proceeding by issuing a Notice of Probable Violation (NOPV).

(b) The NOPV shall include:

(1) A listing of the regulations which the Respondent is alleged to have violated, a description of the evidence on which the allegations are based and a copy of the field citation(s), if applicable;

(2) Notice of the response options available to the Respondent under Section 753-6.5 of this Subpart;

(3) If a penalty is proposed, the amount of the proposed penalty and

the maximum penalty for which the Respondent may be liable; and

(4) A proposed Consent Order pursuant to Section 753-6.7 of this Subpart.

(c) A NOPV may be amended at any time prior to issuance of a final order. If an amendment includes any new material allegations of fact or proposes an increased administrative penalty, the Respondent shall have another opportunity to respond under Section 753-6.5 of this Subpart.

.SO DOC 16C-753-6.5

NYCRR

753-6.5 Respondent's options.

Within 30 days after issuance of a NOPV the Respondent shall respond in one of the following ways:

(a) Sign the Consent Order and return it with payment of any proposed penalty;

(b) Submit a written explanation, information or other material in response to the allegations; or

(c) Request an informal conference with Department Staff.

(d) Failure of the Respondent to respond in accordance with subdivision (a), (b) or (c) shall constitute a waiver of its right to contest the allegations in the NOPV and authorizes the Commission, without further notice to the Respondent, to find facts to be as alleged in the NOPV and to issue a final order under Section 753-6.8 of this Subpart.

.SO DOC 16C-753-6.6

NYCRR

753-6.6 Commission proceeding.

(a) If the Respondent requests an informal conference, such conference will be conducted by Department Staff. The Respondent shall have the right to be represented by an attorney or other person, and shall have the right to present relevant evidence. Any evidence that Department Staff may have which indicates that the Respondent may have violated Part 753 shall be made available to the Respondent, who shall have the opportunity to rebut this evidence, either at the informal conference, in writing within thirty days following the conference, or by other mutually agreed to arrangements.

(b) Following its review of any material submitted in writing or at an informal conference, the Department will compile a case file, which will be the basis for a final order. The case file of an enforcement proceeding shall include:

(1) The field citations, inspection reports and any other evidence of alleged violations;

(2) A copy of the NOPV issued under Section 753-6.4 of this Subpart;

(3) Any material submitted by the Respondent in response to the NOPV

or at an informal conference; and

(4) A written evaluation and recommendation for a final order.

.SO DOC 16C-753-6.7

NYCRR

753-6.7 Consent Orders.

(a) Notwithstanding any other provision to the contrary, the Commission may at any time resolve an outstanding NOPV with a consent order. A consent order must be signed by the Respondent to whom it is issued, or a duly authorized representative, and must indicate agreement with the terms thereof. A consent order need not constitute an admission that the Respondent committed the violation.

(b) A consent order is a final order of the Commission having the same force and effect as a final order issued pursuant to Section 753-6.8 of this Subpart.

(c) A consent order shall not be appealable and shall include an express waiver of appeal or judicial review rights that might otherwise attach to a final order of the Commission.

.SO DOC 16C-753-6.8

NYCRR

753-6.8 Final Order.

Based on the review of a case file and upon considering the nature, circumstances and gravity of the violation, history of prior violations, effect on public health, safety or welfare and such other matters as may be required, the Commission will issue a final order that includes:

(a) A statement of findings and determinations on all material issues;

(b) If a penalty is assessed, the amount of the penalty and the procedures for payment of the penalty.

.SO DOC 16C-753-6.9

NYCRR

753-6.9 Payment of penalties.

(a) Payment of a penalty under this subpart must be made by certified check or money order payable to the "Department of Public Service" and sent to the Secretary of the Commission, Three Empire State Plaza, Albany, N.Y. 12223-1350.

(b) If a Respondent fails to pay the full amount of a penalty assessed in a final order within thirty days after receipt of the final order, the Commission may refer the case to the Attorney General with a request that an action to collect the assessed penalty be brought in any court of competent jurisdiction.

.SO DOC 16C-CVIIIISB

NYCRR

SUBCHAPTER B

General

Part

890 Consumer Service and Consumer Protection Standards

(a) Basic channel shall mean any channel which is provided as part of the basic service tier.

(b) Billing dispute shall mean a disagreement between a subscriber and a cable television company concerning:

(1) credits for payments made by the subscriber to the cable television company;

(2) credit or refund for service outage;

(3) errors in billing amount; or

(4) assessment of late charges.

(c) Home wiring shall mean the internal wiring contained within premises of a subscriber which does not include any active elements such as amplifiers, converters or decoder boxes or remote control units.

(d) Collection charge shall mean a fee or charge imposed upon a subscriber by a cable television company for its efforts at collecting or attempting to collect a past due account by personal visit at a subscriber's home or place of business.

(e) Commission shall mean the New York State Public Service Commission.

(f) Downgrade charge shall mean a charge imposed upon a subscriber for implementing a request by the subscriber for a change in service to a less expensive tier than the tier currently subscribed to.

(g) Late charge shall mean a charge which is added to a cable television subscriber's account or bill for nonpayment of a previously due account.

(h) Local office shall mean the business office of the cable television company serving the municipality in which a billing dispute arises.

(i) Normal business hours shall mean those hours during which most similar businesses in the community are open to serve customers. In all cases, normal business hours must include some evening hours at least one night per week and/or some weekend hours.

(j) Normal operating conditions shall mean those service conditions which are within the control of a cable television company. Those conditions which are not within the control of a cable company include, but are not limited to, natural disasters, civil disturbances, power outages, telephone network outages, and severe or unusual weather conditions. Those conditions which are ordinarily within the control of a cable television company include, but are not limited to, special promotions, pay-per-view events, rate increases, regular peak or seasonal demand periods, channel and/or service alterations, and maintenance or upgrade of the cable system.

(k) Service call shall mean any work at a subscriber's premises which requires the presence of a cable television company representative and the subscriber, including but not limited to, installations and reconnections.

(l) Service interruption shall mean the loss of picture or sound of one or more cable channels.

(m) Service outage shall mean a loss of picture or sound on all basic channels or on all channels provided on any other service tier or on one or more premium channels occurring during normal operating conditions which is not caused by the subscriber's television receiver or the subscriber.

(n) Small cable television system shall mean any cable television system with fewer than 1,000 subscribers.

(o) Subscriber complaint shall mean a notice to the commission from a cable television subscriber, whether in writing, by telephone or electronic mail, concerning an unresolved billing service or other service related matter affecting the complaining subscriber directly.

.SO DOC 16C-890.62 NYCRR

890.62 Billing practices; billing period.

(a) (1) Every cable television company shall adopt billing practices in compliance with sections 890.61 through 890.66 of this Part and shall provide notice to subscribers in accordance with section 890.80(e) of this Part.

(2) Every cable television company:

(i) shall file copies of its billing practices and payment requirements with the commission; and

(ii) shall maintain copies thereof on file in its local office for public inspection for a period of two years.

(b) Billing practices may include the opportunity for advance billing.

(c) Billing practices shall provide that a subscriber, upon request, shall be given the option of paying monthly. Use of coupon books for the remittance of monthly payments shall satisfy the monthly payment option request. If such coupon books are used by a cable television company, no other bills for service are required to be sent to subscribers.

.SO DOC 16C-890.63 NYCRR

890.63 Bill format, late charges, collection charges, reconnect charges and downgrade charges.

(a) Each subscriber bill shall be clear, concise and understandable and shall:

(1) (i) include the name, address and telephone number of the cable television company; and

(ii) the toll free subscriber assistance telephone number of the commission identified as "Unresolved Inquiries, NYS Public Service Commission" or otherwise as may be approved by the commission upon specific request by a cable company;

(2) itemize each category of service including, but not limited to, basic service, cable programming services, per channel premium services, and pay-per-view programming, and each piece of equipment for which a charge is imposed;

(3) state the billing period and clearly delineate all activity during the billing period, including but not limited to, the amount of current billing and appropriate credits or rebates, optional charges, late charges and past due balances, if any.

(b) Each subscriber bill shall specify a minimum time for payment which shall not be less than 15 days from mailing of the bill.

(c) Any late charge permitted by law or by the franchise, if imposed upon the subscriber, shall be itemized on the subscriber's bill, or notice of delinquent payment in cases where coupon books are used.

(d) If a late charge is to be imposed, it shall not be imposed sooner than 45 days after the mailing of the bill to the subscriber or the due date, if coupons are used.

(e) No cable television company shall impose a collection charge upon any subscriber, except as prescribed in subdivision 890.66(e) of this Part.

(f) No cable television company shall impose a charge for the reconnection of service, the amount of which is based solely upon a consideration of whether the subscriber was previously in arrears for an amount due said company.

(g) A cable television company may impose a downgrade charge upon the conditions and in the circumstances as follows:

(1) subscribers have been notified of such charge in writing in at least 10 point type;

(2) the charge does not exceed the amount permitted under applicable State or Federal law or regulation; and

(3) the downgrade was not requested by a subscriber affected by a significant programming change or a network change which included a retiering of service or a rate change within 30 days of the receipt by the subscriber of:

(i) a notice required by section 890.80(b)(4) and (c)(4) of this Part;
or

(ii) a notice of retiering or rate change as required by section 890.80(a) of this Part.

890.64 Billing disputes, auxiliary equipment, credits, and refunds.

(a) Every cable television company shall establish procedures for the prompt investigation of any billing dispute. The procedures shall provide for a period of at least 30 days from the date of receipt of the bill for the subscriber to file a timely complaint. The procedures shall provide that the subscriber remit the undisputed portion of the bill in question pending resolution of the portion in dispute and that the subscriber shall be responsible for paying the undisputed portion of current and future bills.

(b) Cable television service shall not be discontinued due solely to nonpayment of the portion in dispute during the period allowed herein for investigation of a billing dispute.

(c) If the billing dispute is not resolved within 30 days of the date it is received by the company, the subscriber may refer the matter to the commission in accordance with the provisions of section 890.70 of this Part. If referral is not made within 30 days, the company may commence its disconnection procedures in accordance with section 890.66 of this Part.

(d) The cable television company shall retain all billing complaint records for at least one year.

(e) When a cable television company supplies auxiliary equipment such as a converter or other modifying device to a subscriber the company can expect reasonable care of such equipment by the subscriber. A cable television company shall notify the subscriber and the commission in writing of any charges to subscribers for lost, stolen or damaged converters. In the event such equipment is lost, stolen or damaged, and the cable television company seeks to charge the subscriber for such equipment, the company shall give written, dated notice to the subscriber of the amount sought to be collected from the subscriber and the subscriber's opportunity to refer the matter to the commission in accordance with the provisions of section 890.70 of this Part.

(f) Refund checks will be issued promptly but no later than:

(1) the subscriber's next billing cycle following a determination that a refund is warranted or 30 days after such determination, whichever is earlier; or

(2) the subscriber's next billing cycle after the return of equipment supplied by the cable company if service is terminated or 30 days after the return of the equipment, whichever is earlier.

(g) Credits for service will be issued not later than the subscriber's next billing cycle following a determination that a credit is warranted.

.SO DOC 16C-890.65

NYCRR

890.65 Credit for service outage.

(a) Every cable television company shall provide credit to subscribers affected by any service outage in excess of four continuous hours in accordance with subdivisions (b) and (c) of this section. The four-hour period shall commence at the time the cable television company first becomes aware of the service outage.

(b) Whenever a cable television company may reasonably determine the existence and scope of a service outage as, for example, a service outage caused by a major failure in the system's headend or distribution electronic equipment, which service outage exceeds four continuous hours and some part of which occurs during the hours 6:00 p.m. to 12:00 a.m., the cable television company shall automatically credit the account of each affected subscriber.

(c) In the event a cable television company cannot determine all subscribers affected by a service outage in excess of four continuous hours or no part of such outage occurs during the hours of 6:00 p.m. to 12:00 a.m., credit shall be given to any eligible subscriber who makes application therefor by either written or oral notice within 90 days of such service outage.

(d) The minimum credit for a service outage shall be equal to one thirtieth times the applicable monthly charge for each 24-hour period during which a service outage continues for at least four hours.

(e) A cable television company shall be responsible for every service outage except for interruption of programming to provide emergency information to the public using the Emergency Alert System as defined in section 896.5.

.SO DOC 16C-890.66

NYCRR

890.66 Discontinuance of service for nonpayment.

(a) A cable television subscriber shall not be considered delinquent in payment until at least 45 days have elapsed from the mailing of the bill to the subscriber or from the due date, if coupons are used, and payment has not been received by the cable television company.

(b) No cable television company shall physically or electronically discontinue service for nonpayment of bills rendered for service until:

(1) the subscriber is delinquent in payment for cable television service; and

(2) at least five days have elapsed after a separate written notice of impending discontinuance has been served personally upon a subscriber; or

(3) at least eight days have elapsed after mailing to the subscriber a

separate written notice of impending discontinuance (for which postage has been paid by the cable television company), addressed to such person at the premises where the subscriber requests billing; or

(4) at least five days have elapsed after a subscriber has either signed for or refused a certified letter (for which postage has been paid by the cable television company), containing a separate written notice of impending discontinuance addressed to such person at the premises where the subscriber requests billing.

(c) Notice of service discontinuance shall clearly state the amount in arrears, the total amount requested to be paid to avoid discontinuance of service, reconnection charges, if applicable, and the manner and date by which, and the place where, such payment must be made.

(d) No cable television company shall disconnect service for nonpayment on a Sunday, public holiday or a day when the local office of the company is not open for business without providing an opportunity for the subscriber to pay the amount in arrears on such date.

(e) When a cable television company representative is at a subscriber's residence or place of business to disconnect service and the subscriber at that time, pays the amount in arrears in lieu of disconnection, the company may add a reasonable collection charge to the subscriber's bill provided all other applicable provisions of this section have been followed.

(f) Receipt of a subsequently dishonored negotiable instrument in response to a notice of discontinuance shall not constitute payment, and no cable television company shall be required to provide additional notice prior to discontinuance.

.SO DOC 16C-890.70

NYCRR

890.70 Subscribers' complaints; procedure.

(a) A subscriber complaint will be processed by the commission after the subscriber has first attempted to resolve the particular matter with the cable television company. The procedure with respect to such complaints shall be as follows:

(1) A copy of the complaint together with a written notice requesting a statement concerning the matter described therein shall be served on the cable television company. Within 10 days, or such other period as may be specified in the notice, the cable television company shall submit a written response to the commission and shall serve a copy of said response on the complainant. The response must contain a statement of the action that has been taken to resolve the complaint and/or to preclude any recurrence of the matter complained of. If the subject of the complaint is the failure of the company to provide cable television

service to a potential subscriber who has requested service, the commission may require the cable television company to provide, in addition to the information required by this paragraph, a map of the franchised area indicating information requested by the commission.

(2) Complaints received by the commission by telephone shall be recorded and kept on file. Where the nature of a telephone complaint warrants, the commission may request written information from the complainant. In such cases, the commission shall follow the procedure specified in paragraph (1) of this subdivision.

(3) Where numerous complaints are made, concerning a particular cable television company or where it appears that complaints have not been satisfactorily resolved by a particular company, the commission may make further inquiry of said company, which may be formal or informal, and which may include a hearing or oral argument, or both.

(b) Every cable television company shall adopt and file with the commission, in writing, its procedures for reporting and the resolution of subscriber complaints, which procedures may be in such form and contain such provisions as the company deems necessary, provided they are not in conflict with any procedures, rules or regulations of the commission. Every cable television company shall provide notice to subscribers of such procedures in accordance with section 890.80(f) of this Part.

(c) (1) The commission may delegate by written notice to any of its officers or employees authority pursuant to this section to investigate, hear and resolve subscriber complaints concerning disputed bills, charges, deposits, service problems and other subscriber-related problems. Such authority shall include the authority to conduct informal hearings. Except in the instance of an appeal by any party, disposition of unresolved complaints will be determined by such officers or employees of the commission as the commission designates to act in its place. In exercising this function, the designated officers or employees may obtain the information required to make a determination by conversation with the complainant or his or her representative, by telephone or in person, supplemented where appropriate by written materials from the complainant, reports or documents from the cable television company (including such data as may be required by the staff at the request of the complainant or on its own initiative); through written complaints similarly supplemented; or through a conference conducted by the designated officer or employee at which the complainant, accompanied and assisted by such friend, advisor or attorney as he or she desires, and company representatives are present.

Officers or employees designated to consider complaints will afford both the complainant and the cable television company a fair and reasonable opportunity to present evidence pertinent to the complaint and to challenge evidence submitted by the other party to the dispute. The complainant or cable television company complained of may obtain a determination, including a statement of the reason for the conclusion. The party adversely affected by the determination of the officer or employee designated to consider the complaint may appeal to the commission. Any such appeal shall be in writing filed with the commission within 20 days of receiving notice of the determination and shall set forth the specific basis for claiming error.

(2) After receipt of the response to a complaint, and where the procedures described in paragraph (1) of this subdivision are not applicable or cannot reasonably resolve the issues raised by a complaint, the commission, on its own initiative, the recommendation of staff or the request of the complainant or cable television company, may hold a hearing upon reasonable advance notice to all interested parties.

(3) Pending resolution of a complaint, the commission may require appropriate interim relief to either party. In the case of complaints regarding bills or deposits, the commission, without hearing or formal order, may, and in the absence of unusual circumstances shall, preclude discontinuance of service or the issuance of any notice of discontinuance during the commission's investigation of such complaint, upon such terms and conditions as it deems appropriate.

.SO DOC 16C-890.80

NYCRR

890.80 Subscriber notices.

(a) Rates programming services and channel positions.

(1) Notice required. Every cable television company shall provide notice to subscribers of:

(i) products and services;

(ii) prices and options for programming services and other services and conditions of subscription to programming and other services; and

(iii) the channel positions of programming carried on the system.

(2) Form and content of notice.

(i) Notice shall be provided:

(a) to new subscribers at the time of installation;

(b) to any subscriber who requests a change in service;

(c) to all subscribers at least semi-annually; provided, however, that any cable television company that bills subscribers only by coupon book and does not provide regular mailings to subscribers at least quarterly may provide such notice to subscribers on an annual basis; and

(d) to any person who requests such information.

(ii) Notice shall be in writing and:

(a) shall be provided immediately where a request is made in person;

or

(b) shall be provided by first class mail sent within 10 business days of the date of any request made by telephone or in writing.

(iii) The notice shall contain a description, materially accurate as of the first day of the previous month, of all service tiers and the networks provided thereon and the rates and charges therefore and other services or products offered to subscribers and the rates and charges for such other services and products. The notice shall also include a statement of significant rights accorded to the subscribers pursuant to section 224-a of the Public Service Law and the regulations promulgated by the commission. Such statement shall be in a form as approved by the commission. In addition, notice to new subscribers shall include a copy of any notice which has been sent to current subscribers pursuant to subdivisions (a) - (c) of this section within the previous 60 days.

(3) Changes.

(i) Every cable television company shall provide notice to subscribers of any changes in rates, programming services or channel positions as soon as possible through announcement on the cable system and in writing. Notice of any increase in the rates for the basic service tier or associated equipment must be provided to subscribers at least 30 days in advance. Notice of other such changes must be given to subscribers 30 days in advance if such change is within the control of the cable television company. For purposes of this paragraph announcement on the cable system shall mean a written, on-screen message on the affected channel(s), or program listing channel, or such other channel, as may be used for the dissemination of written messages to subscribers.

(ii) If a change in programming services or channel positions constitutes either a significant programming change as defined in subdivision (b) of this section or a network change as defined in subdivision (c) of this section, the cable television company shall also provide the notice as described in such subdivision.

(b) Significant programming change.

(1) Definitions. For purposes of this section:

(i) a significant programming change shall mean the removal or alteration of recurring programming which materially changes the quality or level of programming on a network; provided, however, such terms shall not include deletions of programs mandated by the regulations of the Federal Communications Commission, nor shall it include deletions of

programs that are distributed by the cable television company in lieu of such programs deleted pursuant to such regulations of the Federal Communications Commission;

(ii) a network shall mean a group of programs distributed, packaged, promoted or sold to subscribers as the offering of a single entity, including but not limited to, a channel or station; and

(iii) service tier shall mean a category of cable television services or other services provided by a cable television company and for which a rate or fee is charged by the cable television company, including, but not limited to, basic services, premium networks or services, recurring pay-per-view services and other categories of cable services for which there are additional charges.

(2) Notice required. Every cable television company shall provide notice of a significant programming change to the commission and to subscribers affected thereby.

(3) Notice to commission. Notice shall be provided to the commission no later than the later occurring of 45 days prior to the effective date of the change or within five business days of the date upon which the cable television company first knows of such change. The notice shall specify the recurring programming affected by the change, whether such recurring programming was, or will be, distributed as part of basic service tier or some other service tier immediately prior to the change and the effective date of the change.

(4) Notice to subscribers. Notice shall be provided to subscribers who are receiving services affected by such change in writing no later than the later occurring of 30 days prior to the effective date of such change or within 30 days of the date upon which the cable television company first knows of such change and by written on-screen visual message prominently displayed on the affected television program channel or channels, and on the program listing channel of the cable television system, if one is provided; at least once each hour for no less than a 30 day period.

(5) Form and content of notice to subscribers. Notice shall be directed to each affected subscriber as follows:

(i) by the mailing of a separate written notice to the subscriber's billing address of record; or

(ii) by a written notation printed on the subscriber's regular billing statement; or

(iii) by a written notice accompanying the subscriber's regular billing statement. Such notice shall specify the recurring programming affected by the change and the effective date of the change. Such notice

shall also inform subscribers of the opportunity to downgrade or terminate service within 30 days of the receipt of the notice without charge for such termination or downgrade if the programming change includes a re-tiering of service or rate increase.

(c) Network change.

(1) Definitions. For purposes of this subdivision:

(i) a network change shall mean the removal of a network from a service tier whether or not added to another tier or a substantial alteration of the character of a network by a cable television company or an affiliate it controls except that a network change shall not include the removal of a network from a service tier within 31 days of the date upon which such network was added to such service tier for promotional purposes, where such promotion was clearly disclosed to subscribers;

(ii) the character of a network shall be determined by reference to the nature, mix and quantity of programming provided on the network and whether such programming is supported by commercial sponsorship or other means. The character of a network which contains a uniform programming format, e.g., an all-shopping channel, an all-weather channel, an all-sports channel, etc., shall be considered distinct from the character of a network which includes various categories of programming. The character of a network shall also include consideration of whether a network provides programming 24 hours per day or some lesser period of time; and

(iii) promotes repeatedly and in a significant manner shall mean a promotion of the availability of a particular network on basic cable service which is designed to encourage the public to subscribe to basic cable service to receive such network and which is conducted by use of multiple media or by the multiple use of a single medium.

(2) Notice required. Every cable television company shall provide notice of a network change to the commission and to the subscribers affected thereby.

(3) Notice to commission. Notice shall be provided to the commission no later than the later occurring of 45 days prior to the effective date of the change or within five business days of the date upon which the cable television company first knows of such change. Notice shall specify the network affected by the change, whether such network was, or will be, distributed as part of the basic cable service or some other service tier immediately prior to the change and the effective date of the change. If the network change relates to the basic service tier, the notice to the commission shall also state whether said network has been

repeatedly promoted by the cable television company as available on its basic cable service during the six months immediately preceding the date of the change and, if the network has been so promoted during such period of time, the notice shall also include the specific date upon which such promotion was concluded and the number of subscribers who commenced their subscription to basic cable service during the 90 days immediately before and after the last day of promotion. If the network change relates to a network that is being deleted from basic cable service and will not be available on any other service tier, the notice shall state whether said network continues to be reasonably available to the cable television company. For purposes of this paragraph the term continues to be reasonably available to the cable television company shall mean a network, including a broadcast television station, that has been lawfully distributed by the cable television company to its subscribers as part of its basic cable service and without a substantial alteration of the character of the network remains available to the cable television company on the same terms and conditions as before or remains available to the cable television company pursuant to terms and conditions as previously agreed. A network shall also be considered to continue to be reasonably available to a cable television company when, notwithstanding a modification of the terms and conditions under which it may be distributed or a change in the character of the network, the commission so determines in writing based upon consideration of:

(i) whether the cable television company is required to offer commercial leased access and the terms and conditions of such leased access, if any;

(ii) the character of the network relative to the character of other networks distributed on the system and the manner of distribution of such other networks;

(iii) the terms and conditions pursuant to which the network is available to the cable television company relative to the terms and conditions applicable to the distribution by the cable television company of other networks as part of basic cable television service;

(iv) the extent to which the network is currently being distributed by other cable television companies in the State as part of basic cable television service on terms and conditions similar to the terms and conditions at issue; and

(v) the extent to which the cable television company may have an ownership interest in any network distributed on the system which is similar in character to the terminated network.

(4) Notice to subscribers. Every cable television company shall

provide notice of a network change to each subscriber affected thereby. Such notice shall be provided to subscribers who are receiving services affected by any such change in writing no later than the later occurring of 30 days prior to the effective date of any change or within 30 days of the date upon which the cable television company first knows of such change and by written on-screen visual message prominently displayed on the affected television programming channel or channels, and on the program listing channel of the cable television system, if one is provided, at least once each hour for no less than a 30 day period.

(5) Form and content of notice to subscribers. Notice shall be directed to each affected subscriber as follows:

(i) by the mailing of a separate written notice to the subscriber's billing address of record; or

(ii) by a written notation printed on the subscriber's regular billing statement; or

(iii) by a written notice accompanying the subscriber's regular billing statement. Such notice shall specify the network affected by the change and the effective date of the change and shall inform subscribers of the opportunity to downgrade or terminate service within thirty (30) days of the receipt of the notice without any charge for such termination or downgrade if the network change includes a retiering of service or rate increase.

(6) Additional provisions for network change affecting a premium service tier. If the notice describes a network change that affects a network that was being distributed as part of a premium service tier immediately prior to the change such notice shall also inform subscribers who have incurred installation, upgrade or other one-time charges relating to such premium service tier within six months prior to the effective date of the change, or who have prepaid any monthly service charges for said premium service tier, that they may elect to downgrade or terminate service within 30 days of the receipt of such notice and obtain a rebate of any such charges.

(7) Additional provisions for network change affecting basic cable service. If the notice describes a network change which affects a network that was being distributed as part of basic cable service immediately prior to the change, and the network was repeatedly promoted by the cable television company and in a significant manner as available as part of basic cable service at any time during the six months immediately preceding the date of the change, such notice, or a second notice given in the same manner as the first notice within 30 days of the first notice, shall contain additional information as follows:

(i) Removal of network to premium tier. If a network is moved from basic cable service to a more expensive tier, such notice shall inform subscribers who commenced their subscriptions to basic cable service during the 90-day period immediately before or after the last day of the promotion, of the opportunity, within thirty days of receipt of the notice either:

(a) to upgrade to the more expensive service tier which includes the network at no charge and to receive said service tier for up to six months also at no charge; or

(b) to terminate service and receive a refund of all installation, upgrade or other one-time charges paid during the six months prior to the change.

(ii) Removal of network from system. If a network:

(a) is deleted from basic cable service;

(b) was a substantial inducement to a significant number of subscribers; and

(c) continues to be reasonably available to the cable television company, such notice shall inform subscribers who commenced their subscriptions to basic cable service during the 90-day period immediately before or after the last day of the promotion, of the opportunity, within 30 days of receipt of the notice, either:

(1) to terminate service and receive a refund of all installation, upgrade or other one-time charges paid during the six months prior to the change; or

(2) to continue service and receive a credit in the amount specified in the notice which credit shall be for a portion of the monthly rate for basic cable service for each month or portion thereof the network is not available on the system during the six month period commencing with the last day of the promotion; or

(3) to continue service and petition the commission for determination of the amount of an appropriate credit for a portion of the monthly rate for basic cable service for each month or portion thereof the network is not available on the system during the six month period commencing with the last day of the promotion.

(8) A cable television company shall maintain copies of all advertisements, lists or other notifications regarding programming sent to or made available to the public. For purposes of this subdivision, advertisements, lists or other notification shall mean any commercial messages which a cable television company originates and causes to be disseminated to the public or its subscribers by means of radio, television or print, or pursuant to a printed directive, which relate to

the service tiers, networks or programming offered by said company to its subscribers and the rates and charges therefor, except that such terms shall not include any commercial message concerning a network or programming which originates with the network or programmer independent of the cable television company.

(d) Pay-per-view programming. Subdivisions (a) - (c) shall not apply to pay-per-view programming.

(e) Billing practices.

(1) Every cable television company shall provide notice to subscribers of its billing practices and payment requirements including the use of payment coupons. The notice shall describe or define, at a minimum, billing procedures (including payment requirements to avoid discontinuance of service, e.g. payment due dates), late charges, downgrade charges, advance billing options, if any, procedures to be followed in billing disputes and credit to be given for service outages.

(2) Notice shall be in the form of a separate written notice and shall be provided:

(i) to new subscribers, at the time of initial subscription or reconnection;

(ii) to all subscribers annually; and

(iii) to all subscribers at least 30 days in advance of any significant change in such billing practices or payment requirements; and

(iv) to any subscriber upon request.

(f) Complaint procedures.

(1) Every cable television company shall provide notice to subscribers of its complaint procedures.

(2) Notice shall be in writing and shall be provided:

(i) to new subscribers at the time of initial subscription or reconnection to the cable television system;

(ii) to all subscribers annually; and

(iii) to all subscribers at least 30 days in advance of any significant change in such complaint procedures; and

(iv) to subscribers at any time upon request. The notice shall inform the subscriber that any unresolved complaint with the company may be referred to the commission pursuant to section 890.70 (a). Such notice shall also contain the address and toll free subscriber assistance telephone number of the commission.

(g) Installation, use and maintenance of cable service.

(1) Every cable television company shall provide notice to subscribers of its installation and service maintenance policies, instructions on

how to use cable services with company provided or subscriber owned equipment, and a description of any incompatibility problems and the means of resolving such problems. Notice shall be in writing and shall be provided to new subscribers at the time of installation:

- (i) to any person upon request;
 - (ii) to all subscribers annually; and
 - (iii) to all subscribers at least thirty 30 days in advance of any significant changes in such information; and
 - (iv) to subscribers at any time upon request.
- (h) Lost, stolen or damaged equipment. A cable television company shall provide notice to subscribers of any charges for lost, stolen or damaged equipment in accordance with section 890.64(f) of this Part.
- (i) Disconnection of service. Every cable television company shall provide separate written notice of service discontinuance in accordance with section 890.66 of this Part.
- (j) Removal of home wiring.
- (1) Every cable television company shall provide notice to subscribers of the opportunity to acquire home wiring upon termination of service if the company seeks to remove such wiring.
- (2) Notice shall be in writing and shall be provided to subscribers at least seven days prior to the earliest date such home wiring would be removed.

.SO DOC 16C-890.90

NYCRR

890.90 Telephone availability and answer standards; customer service centers.

(a) Every cable television company shall maintain a local, toll-free or collect call telephone access line which will be available to its subscribers 24 hours a day, seven days a week, provided that after normal business hours, the access line may be answered by an answering service or an automated response system, including an answering machine. Inquiries received after normal business hours must be responded to by a trained company representative on the next business day. Trained company representatives must be available to respond to callers during normal business hours.

(b) Every cable television system, except a small cable television system, under normal operating conditions, shall meet the following telephone answer standards no less than 90 percent of the time, measured on a quarterly basis:

- (1) telephone answer time by trained company representatives, including wait-time, shall not exceed 30 seconds from when the connection is made;

(2) if a call needs to be transferred, transfer time shall not exceed 30 seconds;

(3) callers will receive a busy signal less than three percent of the time.

(c) Information to demonstrate compliance with the telephone answer standards in subdivision (b) of this section shall be reported to the commission for normal business hours on an annual basis and shall include:

(1) the total number of days trained company representatives were available to receive incoming calls;

(2) the total number of calls received on such days;

(3) the average length of time a caller waits on hold before reaching a trained company representative;

(4) the total number of calls abandoned by incoming callers;

(5) the percentage of time callers received a busy signal; or

(6) such other information that will document compliance with such standards.

(d) Every cable television company required to file the information specified in subdivision (c) of this section must maintain for a period of one year, a summary of records sufficient to measure and verify compliance with telephone answer standards on a quarterly basis.

(e) Annual reports on telephone answer standards shall be filed with the commission on or before January 31st of each year for the previous calendar year. Any cable television system that routinely meets or exceeds the standard in subdivisions (a) and (c) of this section may petition the commission for a waiver of the reporting requirements of this section. This waiver does not excuse a cable company from maintaining service records, subject to review by the Commission, on a quarterly basis.

(f) A cable television system will not be required to acquire equipment or perform surveys to measure compliance with telephone answer and service standards unless an historical record of complaints indicates a clear failure to comply.

(g) Customer service centers and bill payment sites shall be conveniently located and open at least during normal business hours.

.SO DOC 16C-890.91

NYCRR

890.91 Installations, outages and service calls.

(a) Whenever a service call is not started within the scheduled appointment window, as established pursuant to paragraph (3) of subdivision (b) of this section, the subscriber shall not be charged for such service call, including any installation or reconnection scheduled

to be performed, unless the service call was rescheduled with the subscriber's consent before the close of business on the business day prior to the day of the scheduled appointment window.

(b) All cable television systems under normal operating conditions, shall meet no less than 95 percent of the time, measured on a quarterly basis, the following service standards:

(1) standard installations of up to 150 feet from existing aerial distribution plant shall be performed within seven business days after an order is placed unless a subscriber requests a particular date beyond seven business days;

(2) excluding conditions beyond control of the cable company, a cable television system will:

(i) begin working on service interruptions promptly and in no event later than 24 hours after the interruption becomes known; and

(ii) begin actions to correct other service problems the next business day after notification of the service problem or trouble call;

(3) the appointment window alternatives for service calls will be either:

(i) a specific time;

(ii) morning or afternoon hours;

(iii) a four-hour block of time during normal business hours;

(iv) evenings or Saturdays during normal business hours; or

(v) at the option of the cable television company a specific time or block of time outside of normal business hours for the express convenience of the customer; and

(4) if a cable company representative is likely to be late for an appointment with a customer and will not be able to keep the appointment as scheduled, the customer will be contacted. The appointment will be rescheduled, as soon as possible, at a time which is convenient for the customer consistent with paragraphs (1) and (2) of this subdivision.

(c) Information to demonstrate compliance regarding the service standards contained in subdivision (b) of this section, measured on a quarterly basis, shall be reported to the commission and shall at a minimum include:

(1) number of requests for standard installations and the number of such installations actually performed within 7 business days;

(2) number of service interruptions and number of service interruptions responded to within and after 24 hours after notification;

(3) number of service calls to subscribers' residences and the number of such calls completed within the appointment window;

(4) number of installations or service calls rescheduled; and

(5) number of credits issued for missed service calls to subscribers' premises or such other information that will document compliance with such standards.

(d) Service reports shall be filed annually with the commission on or before January 31st of each year for the previous calendar year. Cable systems that routinely meet or exceed the requirements of subdivisions (a) and (b) of this section may petition the commission for a waiver of the report requirements of this section. This waiver does not excuse a cable company from maintaining service records on a quarterly basis, which are subject to review by the Commission.

(e) Provisions of subdivision (a), paragraphs (3) and (4) of subdivision (b) and subdivisions (c) and (d) of this section shall not be applicable to small cable television systems.

(f) Reports of service or trouble calls by cable television systems shall be made available, upon request, and for a period not to exceed 90 days from such service or trouble call as follows:

(1) For each trouble call reported by a single subscriber, the cable television system shall identify:

- (i) the subscriber;
- (ii) the date and approximate time the trouble call was received;
- (iii) the date and approximate time of the response to the trouble call;
- (iv) the corrective steps taken (if any required);
- (v) the date the trouble call is closed; and
- (vi) identification of the technician or repair person.

(2) A report on each service outage shall include the following data:

- (i) brief description of the area affected sufficient to allow the later determination of the approximate number of subscribers affected;
- (ii) date and approximate time of failure;
- (iii) cause of failure; and
- (iv) date and time service was restored.

.SO DOC 16C-890.92

NYCRR

890.92 Removal of home wiring.

Upon voluntary termination of cable service by a subscriber, a cable television company shall not remove cable home wiring in which it claims ownership unless it gives the subscriber the opportunity to acquire the wiring at the replacement cost, and the subscriber declines. The cost is to be determined based on the replacement cost per foot of the home wiring multiplied by the length in feet of such wiring. If the subscriber declines to acquire the cable home wiring, the cable television company must then remove it within seven days or make no

subsequent attempt to remove it or to restrict its use. Every cable television company shall provide notice to subscribers of the provisions of this section in accordance with section 890.80(j) of this Part.

.SO DOC 16C-890.93 NYCRR

890.93 "Negative option" promotional practices.

(a) No cable television company may bill any subscriber for any service not affirmatively requested by the subscriber.

(b) For purposes of this section, a subscriber's affirmative request need not be in writing, but any cable television company relying on an oral affirmative request shall keep records of the date on which, and the employee to whom, the request was made.

(c) For purposes of this section, a subscriber shall be deemed to have affirmatively requested service if:

(1) the subscriber voluntarily makes payment for such service after an initial trial period; and

(2) there was included, in the notice or advertising material describing the service, a statement clearly advising the subscriber that no obligation to pay for such service has been incurred and that no action is necessary to avoid incurring any such obligation.

PART 891

RENEWAL PROCEDURES

(Statutory authority: Public Service Law §222)

Sec.

891.1 Intent and applicability

891.2 Proposal for renewal of franchise that requires affirmative action by municipality

891.3 Renewals that do not require affirmative action by municipality

.SO DOC 16C-891.1 NYCRR

Section 891.1 Intent and applicability.

(a) It is the intent of the commission that the rules contained in this Part comply with the provisions of 47 U.S.C. Section 546 relative to franchise renewals. Except as otherwise provided, these rules shall apply to the renewal of every cable television franchise. No renewal of any franchise shall be effective unless it is approved by the commission pursuant to section 222 of the Public Service Law. An application for approval of a renewal shall comply with Part 897 of this subtitle provided, however, that the filing of a timely application pursuant to Part 897 shall, without further action, extend the applicant's operating rights pending final commission action.

.SO DOC 16C-891.2 NYCRR

891.2 Proposal for renewal of franchise that requires affirmative action by municipality.

(a) Filing requirement. Except as provided in section 891.3 of this Part, any cable television company lawfully engaged in the operation of a cable television system pursuant to an existing franchise may submit a proposal for renewal of said franchise in accordance with 47 U.S.C. section 546(h) at any time. Title 47 U.S.C. Section 546(h) is available for public inspection and copying at the office of the Department of Public Service, Three Empire State Plaza, Albany, New York 12223 and the New York State Department of State located at 41 State Street, Albany, New York 12207. 47 U.S.C. Section 546(h) is published in the United States Code by the United States Government Printing Office, Superintendent of Documents, Washington, D.C. 20402.

The proposal shall be submitted to the municipality and a copy shall be served on the commission. The proposal shall encompass the minimum standards for franchises as set forth in Part 895 of this chapter. The municipality may, after affording the public adequate notice and opportunity for comment, grant or deny such proposal at any time; provided, however, a municipality may not grant a proposal for renewal except after a public hearing on notice to the public in accordance with state and local laws applicable to public hearings generally, which notice shall also specifically state that the renewal proposal is available for public inspection at the office of the municipal clerk prior to the hearing.

(b) Notwithstanding the provisions of paragraph (a) hereof, and subject to the provisions of paragraph (c), a municipality shall during the six month period which commences with the thirty-sixth month prior to the expiration of an existing franchise, commence a process which affords the public in the franchise area appropriate notice and participation for the purpose of:

(i) identifying the future cable-related community needs and interests, taking into account the costs of meeting such needs and interests; and

(ii) reviewing the performance of the cable television company during the then current franchise term; provided, however, that if during such six month period, the franchisee requests by written renewal notice submitted to the municipality (with a copy to the commission) the commencement of such a process, the municipality may defer the commencement of the process for a period not longer than six months after the date such notice is received from the franchisee. The process shall be completed on or before the first day of the fifteenth month

prior to the expiration date of the franchise.

(c) Whenever a municipality grants a renewal proposal submitted by the franchisee pursuant to paragraph (a), the provisions of paragraph (b) shall be of no further effect;

(d) In order to facilitate the renewal of cable television franchises, either party to a renewal negotiation has the right to request the non-binding mediation services of the commission to aid resolution of any disagreements that have become obstacles to renewal. In addition to the foregoing, within six months of the expiration of any franchise, the cable operator shall, upon request, notify the commission staff, orally or in writing, of the status of franchise renewal negotiations.

.SO DOC 16C-891.3 NYCRR

891.3 Renewals that do not require affirmative action by municipality.

If an existing franchise contains an option to renew in favor of the franchisee, the franchisee may seek commission approval for a renewal pursuant to said option provided that the option is timely exercised and an application to the commission is made within 30 days thereof. An option to renew may not be exercised by the franchisee sooner than 36 months prior to the expiration of the existing franchise.

.SO DOC 16C-892-1.1 NYCRR

Section 892-1.1 Applicability. The rules contained in this Subpart apply to all amendments of cable television franchises; provided, however, that any amendment that would have the effect of extending the duration of a franchise shall be deemed a renewal and shall be subject to the provisions of Part 891 of this Title.

.SO DOC 16C-892-1.2 NYCRR

892-1.2 Commencement of amendment process.

Any cable television company or municipality proposing to amend a cable television franchise shall commence the formal amendment process by written notice sent to the other party and to the commission. The notice shall contain the text or set forth the substance of the proposed amendment.

.SO DOC 16C-892-1.3 NYCRR

892-1.3 Public hearing requirements.

(a) No cable television franchise may be amended except after a public hearing on notice to the public in accordance with state and local laws applicable to public hearings generally. This provision shall not be deemed to require an additional hearing in those cases in which a hearing is otherwise required by applicable provisions of law.

(b) In addition to satisfying other applicable requirements, the notice of public hearing shall indicate the subject of the proposed amendment and state that a copy of the proposed amendment is available for public inspection at the office of the municipal clerk prior to the hearing. The notice shall also state that the amendment, if approved by the municipality, may not take effect without the prior approval of the commission.

.SO DOC 16C-892-1.4 NYCRR

892-1.4 Commission approval required.

No amendment to any cable television franchise shall be effective without the prior approval of the commission upon application in accordance with the provision of section 897.3 of this Title, unless the order shall otherwise provide. The effective date of the amendment shall be the date the commission issued an order.

NYCRR

Section 892-3.1 Intent and purpose.

(a) Section 623 of the Cable Communications Policy Act of 1984, as amended by section 3 of the Cable Television Consumer Protection and Competition Act of 1992, and codified in 47 USC section 543, provides for the regulation by State and local franchising authorities of the rates charged for basic cable service by cable television companies not subject to effective competition. Section 623 has been implemented by rules and regulations adopted by the Federal Communications Commission and published at 47 CFR sections 76.900 et seq. The purpose and intent of this Subpart is to provide rules applicable to the regulation of cable service in the State of New York by municipalities and the commission consistent with the Federal rules and regulations in 47 CFR sections 76.900 et seq.

(b) This subdivision shall apply to all references to the Code of Federal Regulations (CFR) contained herein. The applicable provisions of the CFR are available for public inspection and copying at the offices of the Department of Public Service, Three Empire State Plaza, Albany, New York 12223 and the New York State Department of State located at 41 State Street, Albany, NY 12207. 47 CFR sections 76.900 et seq. were published in the Federal Register, volume 58, No. 97, May 21, 1993 at pp. 29753-29768, together with 47 CFR section 0.459 were published by the United States Government Printing Office, Superintendent of Documents, Washington, DC 20402.

.SO DOC 16C-892-3.2

NYCRR

892-3.2 Definitions.

(a) Basic cable service or basic service or basic service tier shall mean the tier of cable service that shall include, as a minimum, all signals of domestic television broadcast stations provided to any subscriber (except a signal secondarily transmitted by satellite carrier beyond the local service area of such station, regardless of how such signal is ultimately received by the cable system), any public, educational and governmental channels required by the franchise or commission rules and may include any additional video programming signals as determined by a cable television company.

(b) Cable programming service shall mean any video programming provided over a cable system, regardless of service tier, including installation or rental of equipment used for the receipt of such video programming, other than:

(1) video programming carried on the basic service tier as defined in this section; or

(2) video programming offered on a pay-per-channel or pay-per-program basis; or

(3) a combination of multiple channels of pay-per-channel or pay-per-program video programming offered on a multiplexed or time-shifted basis so long as the combined service:

(i) consists of commonly-identified video programming; and

(ii) is not bundled with any regulated tier of service.

(c) Commission shall mean the New York State Public Service Commission.

(d) Equipment or associated equipment shall mean all equipment in a subscriber's home that is used to receive the basic service tier, regardless of whether such equipment is additionally used to receive other tiers of regulated programming service and/or unregulated service, including, but not limited to, converter boxes, remote control units, connections for additional television receivers and other cable home wiring, and the installation or rental thereof.

(e) FCC shall mean the Federal Communications Commission.

(f) Participant shall include any person who has submitted written comments or sworn testimony in a ratemaking proceeding. In addition, the commission shall be deemed a participant in any ratemaking proceeding conducted by a municipality and a municipality shall be deemed a participant in any ratemaking proceeding conducted by the commission concerning a cable television company franchised to provide cable service in such municipality. Pursuant to 47 CFR section 76.944(b) (see: section 892-3.1(b)) a participant may file an appeal of a decision of a municipality or the commission with the FCC within 30 days of release of the written decision described in section 892-3.6(f) and (g) of this Subpart.

(g) Ratemaking proceeding shall mean a proceeding for the review of rates for basic cable service and associated equipment conducted by the commission or a municipality after certification pursuant to 47 CFR section 76.910 and after the written notice described in 47 CFR section 76.910(e)(2) has been served upon a cable television company.

(h) Relevant franchising authority shall mean both the municipality in which the cable television company provides cable service and the commission.

.SO DOC 16C-892-3.3

NYCRR

892-3.3 Effective competition.

Only the rates for basic cable service of a cable television system

that is not subject to effective competition as defined in 47 CFR section 76.905 may be regulated by a municipality or the commission. In the absence of a demonstration to the contrary, cable systems are presumed not to be subject to effective competition.

.SO DOC 16C-892-3.4

NYCRR

892-3.4 Municipal election.

(a) A municipality shall determine whether the rates charged for basic cable service and associated equipment by one or more cable television companies franchised to provide cable service therein will be regulated in accordance with the provisions of 47 CFR sections 76.900 et seq.

Pursuant to this section, a municipality may:

- (1) elect to undertake such rate regulation itself, or jointly in conjunction with one or more municipalities served by the same cable television system; or
- (2) elect to have the commission undertake such rate regulation; or
- (3) elect that no such regulation is warranted at the time the initial election is made.

A municipality shall make an initial election pursuant to this section on or before February 28, 1994, provided, however, that if no election is made by such date, the commission may undertake such rate regulation or other action as may be necessary consistent with the public interest.

(b) A municipality may elect to undertake the regulation of rates for basic cable service and associated equipment charged by any cable television company franchised to provide cable service therein in accordance with 47 CFR sections 76.900 et seq. subject to conditions as follows:

- (1) the municipality shall adopt a resolution at a regular or special meeting thereof, which resolution shall include:
 - (i) the name of the cable television franchisee to be regulated; and
 - (ii) a statement that the municipality possesses the personnel and resources necessary to administer the regulations in 47 CFR, sections 76.900 et seq. or, alternatively, if a municipal official is vested with authority to act on behalf of the municipality in matters pertaining to cable television rates, by action of said official in the manner prescribed for the exercise of such authority, provided said action shall identify the cable television franchisee to be regulated and state the existence of the personnel and resources necessary to administer said FCC regulations;
- (2) the municipality shall serve a certified copy of said resolution or a true copy of an action on delegated authority on the commission within five days of the date thereof;

(3) the municipality shall also serve promptly upon the commission:

(i) a copy of its request for certification as filed with the FCC and copies of oppositions, if any, to such request;

(ii) notice that certification has been obtained or, alternatively, a copy of any response from the FCC to the contrary; and

(iii) a copy of the notice served upon the cable television franchisee initiating regulation as required by 47 CFR section 76.910(e)(2).

(c) A municipality may elect to have the commission undertake the regulation of rates for basic cable service and associated equipment charged by any cable television company franchised to provide cable service therein in accordance with 47 CFR sections 76.900 et seq. subject to conditions as follows:

(1) the municipality shall adopt a resolution at a regular or special meeting thereof which resolution shall include:

(i) the name of the cable television franchisee to be regulated; and

(ii) a statement that the municipality chooses to have the commission undertake such regulation;

(2) such election shall be effective on the date that the certified copy of said resolution is received by the commission.

(d) A municipality may elect not to undertake regulation in accordance with 47 CFR sections 76.900 et seq. subject to conditions as follows:

(1) the municipality shall adopt a resolution at a regular or special meeting thereof which resolution shall include:

(i) the name of the cable television franchisee; and

(ii) a statement that the rates charged by said franchisee for basic service and associated equipment shall not be subject to regulation at such time but that the municipality reserves the right to alter said election at any time.

(2) the municipality shall serve a certified copy of said resolution on the commission within five days of the date of adoption;

(3) an election not to regulate rates may be changed at any time;

(4) a municipal determination that rates shall not be subject to regulation in accordance with 47 CFR sections 76.900 et seq. shall be subject to review by the commission pursuant to the standards set forth in section 222 of the public service law.

(e) An election made by a municipality before the thirtieth day following the effective date of this Subpart shall be presumed valid and shall remain in effect until altered in accordance with section 892-3.5 herein.

.SO DOC 16C-892-3.5

NYCRR

892-3.5 Reversal of election.

A municipality may, at any time, alter an initial election in the same manner required for such initial election, provided, that it shall provide prompt notice thereof to the commission and to any cable television company affected thereby and further provided that in any case where the commission regulates rates, any such change shall not take effect during the pendency of a ratemaking proceeding.

.SO DOC 16C-892-3.6

NYCRR

892-3.6 Procedures.

(a) Every ratemaking proceeding shall be conducted and decided in accordance with the regulations of the FCC and the provisions of this section not inconsistent therewith; provided, however, that a municipality which elects to regulate rates itself, or jointly with one or more other municipalities, may adopt and administer additional regulations with respect to the rates for the basic service tier that are consistent with the regulations of the FCC and may adopt additional procedures applicable to the submission and consideration of views of interested parties. A municipality which adopts such additional regulations or procedures shall file a copy thereof with the commission.

(b) A ratemaking proceeding shall be deemed commenced:

(1) when a cable television company is served by a municipality or the commission with the written notice described in 47 CFR section 76.910(e)

(2); or

(2) after such written notice has been served on a cable television company, and provided that certification remains in effect, upon receipt by a municipality or the commission of a notice of any proposed increase or decrease in the rates for basic cable service and associated equipment.

(c) In accordance with 47 CFR section 76.930, a cable television company shall file its schedule of rates for basic cable service and associated equipment with the municipality and the commission:

(1) within 30 days of receiving such written notice or by November 15, 1993, whichever is later; or

(2) at least 30 days prior to the effective date of any proposed increase. Such rates shall be filed on forms, or in the manner, as may be prescribed by the FCC. In either case, the cable television company shall cause to be published in a newspaper of general circulation in the municipality, a notice that said ratemaking proceeding has been commenced; that a copy of the schedule of rates will be available for public inspection during normal business hours at the office of the clerk of the municipality and at the commission; and that interested parties may submit written comments to the municipality or the

commission, as the case may be, on or before a specified date which shall not be later than the 20th day after said schedule of rates is filed by the cable television company. Such notice shall be published at least 15 days before the due date for comments.

(d) Promptly upon receipt of said schedule of rates, a municipality that has chosen to undertake rate regulation in accordance with 47 CFR sections 76.900 et seq. shall ensure that a public meeting is scheduled to occur within 30 days of the date the cable company files its schedule of rates on applicable FCC forms and may schedule a public hearing for the purpose of receiving public comment on said rates. The authority to schedule said hearing may be delegated to the clerk or other municipal official by the municipality. Notice of such hearing shall be published at least five days before the date of said hearing. In the event that the municipality determines pursuant to 47 CFR section 76.933 to extend the time for review of rates beyond 30 days, it shall provide at least one additional opportunity for the submission of comments. The costs of publication of all notices shall be borne by the cable television company.

(e) When filing or submitting financial information, a cable television company shall certify the accuracy of such information; provided, however, that certification may be made by an officer of the cable television company. A cable television company may be required to produce proprietary information provided, however, that procedures analogous to those set forth in 47 CFR section 0.459 regarding requests for confidentiality shall be applied by the municipality or the commission.

(f) A determination of rates shall be made at a public meeting and shall be embodied in a written decision whenever such determination:

- (1) disapproves an initial rate;
- (2) disapproves a request for a rate increase in whole or in part; or
- (3) approves a request for an increase in whole or in part over the objection of a participant.

(g) Every written decision must include at a minimum:

- (1) the date the ratemaking proceeding was commenced;
- (2) a copy of each public notice described in this section;
- (3) a list of the participants in the ratemaking proceeding;
- (4) a complete description of each rate approved or disapproved and the effective date thereof;
- (5) whether a rate reduction or rate refund is being ordered and, if so, the amount of the reduction or refund;
- (6) the effective date of the rates approved and the amount of

reductions or refunds, if any; and

(7) a statement that the decision was made in accordance with applicable federal standards and the regulations contained in this Subpart.

(h) Whenever a written decision is issued, copies of the text shall be provided to all participants in the proceeding and shall be made available to the public. Notice of the issuance of a written decision and the availability thereof shall be published in a newspaper of general circulation in the affected municipality. The cable television company shall bear the costs of such notice.

(i) In addition to the foregoing, the commission shall not enter an order prescribing any rate unless:

(1) it shall have first caused a notice of the rates proposed by a cable television company to be served on each municipality wherein said company provides service and shall have provided each municipality with a reasonable period of time consistent with the applicable federal procedure to file comments on the proposed rates; and

(2) in the event it determines pursuant to 47 CFR section 76.933 to extend the time for review of rates beyond 30 days, it shall provide at least one additional opportunity for the submission of written comments by interested parties and may conduct a public hearing;

(3) in respect to so much of any rate or charge as shall be based upon franchise fees payable to a municipality or the cost of compliance with public, educational or governmental access requirements or any other requirements set forth in the municipal franchise agreement, it shall have provided the municipality with a reasonable opportunity consistent with time periods applicable to review and to comment upon the amount of such fees and costs.

.SO DOC 16C-892-3.7

NYCRR

892-3.7 Notice of rate increases.

(a) A cable television company shall provide written notice to subscribers of any increase in rates for cable services at least 30 days before any proposed increase is effective. The notice to subscribers should include the name and address of the commission and the municipality.

(b) A cable television company shall provide written notice to the commission and the municipality at least 30 days before any proposed increase in the rates for cable services is effective.

.SO DOC 16C-892-3.8

NYCRR

892-3.8 Notification of basic service tier availability.

A cable television company shall provide written notification to

subscribers of the availability of basic cable service by November 30, 1993, or three billing cycles from September 1, 1993, and to new subscribers at the time of installation. This notification shall include the following information:

- (a) that a basic service tier is available;
- (b) the cost per month for the basic service tier; and
- (c) a list of all services included in the basic service tier.

.SO DOC 16C-892-3.9 NYCRR

892-3.9 Severability.

If any provision of this Subpart or the application of such provision to any circumstances is held invalid for any reason whatsoever, the remainder of this Subpart or the application of the provision to other circumstances shall not be affected thereby.

PART 894

FRANCHISING PROCEDURES

(Statutory authority:

Public Service Law §§215, 216, 221)

Sec.

894.0 Applicability

894.1 Cable television advisory committee

894.2 Final report of advisory committee

894.3 Request for proposals

894.4 Invitation of applications; public notice of request for proposals

894.5 Application for franchise

894.6 Investigation and due diligence required

894.7 Public hearing

894.8 Timing and manner of award of franchise

894.9 Alternative franchising procedure

.SO DOC 16C-894.0 NYCRR

Section 894.0 Applicability.

The provisions of section 894.1 through 894.4 shall apply only to the award of an initial franchise by a municipality that does not qualify for the alternative procedure in section 894.9 and in which no cable system is operating, and no open video system has been certified by the FCC to operate. The provisions of sections 894.5 through 894.8 shall apply to all franchise applications, whether or not requested by a municipality, and to municipal action once an application is received. No cable television franchise shall be effective unless a certificate of confirmation has been issued by the commission pursuant to section 221 of the Public Service Law. An application for a certificate of

confirmation shall comply with Part 897 of this Title.

.SO DOC 16C-894.1

NYCRR

894.1 Cable television advisory committee.

(a) Designation. Upon receipt of a formal request for a franchise, a municipality shall, and at any other time a municipality may, designate a cable television advisory committee (hereinafter referred to as advisory committee) which, insofar as possible, shall be broadly representative of the community.

(b) Notification. No more than 10 days after designating an advisory committee, the municipality shall:

(1) notify the commission of its action which notification shall include the names of those individuals designated to serve on the advisory committee and the address at which the advisory committee may receive communications; and

(2) take such action as it deems appropriate to advise residents of the municipality that it has designated an advisory committee and to ensure that such residents have an opportunity to participate in the franchising process.

(c) Duties of the advisory committee. The advisory committee shall:

(1) undertake to inform itself and the public about cable communications;

(2) determine the communication needs and interests of the residents of the municipality, and the potential services and characteristics of a cable system that will meet such needs and interests; and

(3) prepare and submit to the municipality a final written report pursuant to section 894.2 of this Part.

.SO DOC 16C-894.2

NYCRR

894.2 Final report of advisory committee.

(a) The advisory committee shall submit a final written report to the municipality within ninety (90) days of its designation containing:

(1) a description of the characteristics of the cable system deemed best suited to the needs and interests of the municipality; and

(2) a "Request for Proposals" in compliance with section 894.3

(b) The advisory committee shall submit a copy of its final report to the Commission upon submitting it to the municipality. Upon receipt of the final report of the advisory committee, the municipality shall:

(1) make a copy of the report available for public inspection during normal business hours; and

(2) consider the findings and recommendations contained in the report and, at a public session, within 45 days of the receipt of such final report, adopt a formal request for proposals that conforms to the

requirements of section 894.3 of this Part. The request for proposals submitted by the advisory committee as part of its final report is not binding on the municipality and may be modified in whole or in part.

.SO DOC 16C-894.3

NYCRR

894.3 Request for proposals.

A request for proposals shall contain, but need not be limited to:

(a) a description of the cable television system desired by the municipality, including any system specifications established by the municipality;

(b) a statement specifying the form that all applications shall follow;

(c) a statement indicating the amount of the application fee (if any) to be submitted with the application, and the manner in which such fee is to be submitted;

(d) a statement that all applications must contain the information required by section 894.5 of this Part;

(e) the closing date for the submission of applications (which shall be the same as that contained in the public notice); and

(f) the name, address and telephone number of the municipal official(s) who may be contacted for further information.

.SO DOC 16C-894.4

NYCRR

894.4 Invitation of applications; public notice of request for proposals.

(a) A municipality shall invite applications for a cable television franchise by means of a public notice advertising the availability of its requests for proposals. The public notice shall contain, but need not be limited to:

(1) a description of the political or geographic boundaries of the area for which a franchise is sought;

(2) a statement that a formal request for proposals is available to prospective applicants from a municipal officer whose name, address and telephone number are specified;

(3) a statement that applications for a franchise must be submitted in writing in the form and manner specified in the request for proposals no later than a day certain (which date shall be not less than 60 days from the date of final publication of the public notice); and

(4) a statement that all applications will be made available for public inspection during normal business hours at a specified location.

(b) The public notice of a request for proposals shall be published in the following manner:

(1) at least once in each of two different calendar weeks in the

official newspaper(s) of the municipality; and

(2) at least once in any two publications that may reasonably be expected to attract the attention of prospective franchise applicants nationally.

(c) Promptly upon the submission of its notice of request for proposals for publication, the municipality shall furnish the commission with true and complete copies of (1) the public notice; and (2) the request for proposals if materially different from the recommended request for proposals submitted to the municipality by the advisory committee. True copies of proofs of publication shall also be provided to the commission.

.SO DOC 16C-894.5

NYCRR

894.5 Application for franchise.

Every application submitted to a municipality for a cable television franchise shall include, in addition to such other information as may be required by the municipality by a request for proposals or otherwise:

(a) A description of the cable television system proposed to be constructed which description shall contain, but need not be limited to, information regarding:

(1) channel capacity, including both the total capability of the proposed system and the number of channels to be energized immediately;

(2) television and radio broadcast signals which the applicant intends to carry on its system initially;

(3) extent and type of any origination cablecasting to be undertaken, and the facilities, equipment and staff to be employed therein; and

(4) system layout or design, including where applicable:

(i) location of antennae and headend(s);

(ii) plans for two-way capability, including a proposed schedule indicating when two-way capability will become available from particular points;

(iii) location of origination points and origination facilities;

(iv) extent and type of automated services to be provided; and

(v) number of channels to be utilized for access cablecasting, and the facilities, equipment, staff and other support to be available to access users including access utilization or production costs.

(b) The terms and conditions under which service is to be provided to educational and governmental entities.

(c) Terms concerning rates and construction schedules which satisfy the requirements of Part 895 of this Title.

(d) If an application seeks a franchise for an area for which an existing franchise is in effect, the applicant shall indicate

specifically whether it will provide service on the same terms and conditions as contained in such existing franchise and may include a proposed franchise consistent therewith.

(e) A statement of the applicant's experience in the cable television field including, if applicable, the names and professional experience of the persons or organizations who will be responsible for the construction, installation and operation of the proposed system.

(f) A statement indicating whether the applicant or any of its principals owns or operates any other cable television system, directly or indirectly, and a statement indicating the name of any such operations and the name and address of the chief executive officer(s) of the franchising authority(s) in which such system or station is located.

(g) A documented plan for financing the proposed system, which plan shall indicate specifically every significant anticipated source of capital and any and all limitations or conditions with respect to the availability of the indicated sources of capital.

(h) A statement indicating whether the applicant or any of its principals (which, in the case of a corporation, shall include all officers, directors and persons having a legal or equitable interest in ten percent or more of the voting stock):

(i) has ever been convicted of a crime involving moral turpitude (including criminal fraud) or is presently under an indictment charging such a crime;

(ii) has ever been held liable by any court of competent jurisdiction in any civil action based on fraud, deceit or misrepresentation; or

(iii) has ever been punished or censured in any jurisdiction for any violation or attempted violation of any law, rule or order relating to cable television operations.

If the statement is affirmative with respect to any of the above-mentioned adverse considerations, the applicant should include in the statement such explanatory material as it deems appropriate.

(i) The applicant shall mail a copy of the application to each person that holds an existing franchise from, or provides cable service in, the municipalities. Such mailing shall be made on or before the date the applicant submits its application to the municipality.

.SO DOC 16C-894.6

NYCRR

894.6 Investigation and due diligence required.

The municipality shall use due diligence to investigate and assess the technical ability, financial condition, and character of every applicant and, in particular, to ascertain the operating record and reputation of any applicant who owns or operates, or whose principals own or operate

cable television systems elsewhere.

.SO DOC 16C-894.7

NYCRR

894.7 Public hearing.

The municipality shall conduct a public hearing prior to awarding any cable television franchise. The hearing shall be preceded by reasonable notice to each of the franchise applicants, to the public, and to each person that holds a franchise from, or provides cable service in the municipality, to be franchised, and shall be conducted by the legislative body of the municipality or other duly authorized body in accordance with the following procedures:

(a) There shall be an agenda for the hearing which shall specify the proposals to be considered at the hearing.

(b) Every person who has applied for a cable television franchise shall appear at the hearing either in person or by authorized representative. The application of any applicant not so appearing shall not be further considered, except for good cause shown.

(c) All persons, entitled to notice pursuant to this section, shall be given full opportunity to participate in the hearing and to ask questions of any applicant or participant in the hearing, but nothing contained herein shall limit the power of the presiding officer to establish reasonable time limits and otherwise limit repetitive statements or questions.

(d) The notice of hearing shall:

(1) conform to all relevant State and local laws and ordinances;
(2) describe the agenda to be considered at the public hearing; and
(3) indicate that copies of all franchise applications are available for public inspection during normal business hours at a place to be specified in the notice.

(e) Notwithstanding the number of applications for a cable television franchise which have been received, the hearing required by this section shall be convened within 60 days of the later of the following dates:

(1) the date upon which the application to be considered was filed or, if multiple franchise applications are pending, the last date upon which a pending application was filed;

(2) the closing date specified in a request for proposals for the filing of such applications; or

(3) the earliest date upon which the municipality may convene such a hearing pursuant to local law or charter.

(4) Notwithstanding paragraphs (1) - (3) of this subdivision, if the municipality has received a single application for a second or additional franchise and the applicant has stated its willingness to

provide cable service on the same terms and conditions as those contained in an existing franchise, the hearing shall be held within thirty (30) days of the receipt of the application and the municipality may grant the franchise upon conclusion of such hearing.

.SO DOC 16C-894.8

NYCRR

894.8 Timing and manner of award of franchise.

(a) A municipality may award one or more franchises within its jurisdiction. A municipality may not unreasonably refuse to award an additional competitive franchise.

(b) Notwithstanding the number of applications for a cable television franchise which have been received, the municipality shall either award or deny each application within a period of six months from the public hearing held pursuant to section 894.7 of this Part. The failure of the municipality to act within this period shall be deemed a denial of all cable television franchise applications before such municipality at such time.

(c) A municipality shall exercise due diligence to prepare a franchise agreement consistent with the needs and interests of the residents of the municipality and the standards of section 895.1.

(d) If a franchise application is denied the municipality shall include in the resolution the reasons for denial.

.SO DOC 16C-894.9

NYCRR

894.9 Alternative franchising procedure.

(a) Notwithstanding anything to the contrary in this Part, compliance with the provisions of sections 894.1 through 894.4 of this Part will not be required of any municipality and cable television company authorized to use the alternative franchising procedure. Such authorization shall be granted by the secretary or, in the secretary's absence, the counsel to the commission, upon a showing that the criteria set forth in subdivision (b) of this section have been satisfied.

(b) In order to be eligible for the alternative franchising procedure described in subdivision (a) of this section there must be no existing cable system serving the proposed franchise area and the municipality must have contacted all cable television companies (if any) serving municipalities within a 25-mile radius of the proposed service area and determined that only one company is interested in providing the service, and the municipality must have served notice on all contiguous municipalities of its intention to grant a franchise pursuant to the alternative franchising procedure if authorized to do so by the commission.

(c) In the event the municipality is authorized to and does employ the

alternative franchising procedure, the following requirements shall be met:

(1) The municipality shall cause a notice to be published in the official newspaper(s) of the municipality, within 30 days of receipt of authorization from the commission to utilize the alternative franchising procedure stating:

(i) that the municipality has received approval from the commission to utilize the alternative franchising procedure; and

(ii) that an application for a franchise containing the information specified in section 894.5 of this Part must be submitted by any interested cable television company by a date certain which shall be at least 15 days prior to the public hearing held pursuant to section 894.7 of this Part; and

(2) The municipality shall mail a copy of the public notice required by paragraph (1) of this subdivision to each company holding an existing franchise to serve any portion of the geographic area sought to be franchised through the alternative franchising procedure. Such mailing shall be made on or before the date of the publication required by paragraph (1) of this subdivision.

(d) A municipality authorized to use the alternative franchising procedure shall comply with sections 894.5 through 894.8 of this Part.

895.5 Requirements for construction of cable television plant and provision of cable television services

.SO DOC 16C-895.1

NYCRR

Section 895.1 Required contents of franchises. A franchise will be confirmed or approved by the commission only if it contains provisions in substantial compliance with the the following:

(a) Recitations indicating that:

(1) the franchisee's technical ability, financial conditions, and character were considered and approved in a full public proceeding affording due process;

(2) the franchisee's plans for constructing unconditionally and operating the cable television system were considered and found adequate and feasible in a full public proceeding affording due process;

(3) the franchise complies with the commission's franchise standards; and

(4) the franchise is nonexclusive.

(b) For an initial franchise, a full description of the system proposed for construction, which shall indicate the specific geographical areas to be wired, and the location of all trunk and feeder plant. The description shall indicate anticipated stages of completion of construction at six-month intervals for the entire franchise area and a specific schedule showing that significant construction will be accomplished and cable television service will be available to a significant number of subscribers within one year after the effective date of the certificate of confirmation of the franchise; or for a renewal, a description of the system as constructed and as will be expanded or enhanced during the term of the renewal. In either case, the provision shall specify the minimum channel capacity of the system and describe any areas where the system will be extended and service made available only in accordance with specific conditions, which requirement may be fulfilled by reference to the minimum standards governing line extension in section 895.5 of this Part.

(c) A provision specifying that the franchisee shall construct and maintain its cable system using materials of good and durable quality and that all work involved in the construction, installation, maintenance, and repair of the cable system shall be performed in a safe, thorough and reliable manner.

(d) A provision stating that access to cable service will not be denied to any group of potential residential subscribers because of the income of the residents of the local area in which such group resides.

(e) A provision stating that the rates and charges imposed by the franchisee for cable television service shall be subject to regulation in accordance with federal law.

(f) A provision describing the channel capacity and facilities, equipment and support for public, educational and governmental (PEG) access which requirement may be fulfilled by reference to the minimum standards set forth in section 895.4 of this Part; provided, however, that if any of the requirements for PEG access exceed such minimum standards, the provision shall state that the channel designation requirements for PEG access shall not be different than the channel designation requirements in any other cable television franchise granted

by the municipality and that the provisions for facilities, equipment and support for PEG access shall be competitively neutral when compared to such requirements as may be contained in such other franchise.

(g) A provision specifying the franchise term which shall be up to a maximum of 15 years from the effective date of the certificate of confirmation or approval of a franchise renewal.

(h) A provision prohibiting the abandonment of cable television service in any portion of the franchise area without the written consent of the franchising municipality.

(i) A provision:

(1) requiring the franchisee to indemnify the municipality for, and hold it harmless from, all liability, damage, cost or expense arising from claims of injury to persons or damage to property occasioned by reason of any conduct undertaken pursuant to the franchise; and

(2) specifying minimum amounts of liability insurance to be obtained by the franchisee.

(j) A provision stating that any municipal property damaged or destroyed shall be promptly repaired or replaced by the franchisee and restored to serviceable condition.

(k) A provision stating the franchisee will not refuse to hire or employ, nor bar or discharge from employment, nor discriminate against any person in compensation or in terms, conditions or privileges of employment because of age, race, creed, color, national origin or sex.

(l) A provision reserving to the municipality the right to adopt, in addition to the provisions contained in the franchise and existing applicable ordinances, such additional regulations as it shall find necessary in the exercise of its police power; provided, however, that such regulations are reasonable, not materially in conflict with the privileges granted in the franchise and consistent with all federal and state laws, rules, regulations and orders.

(m) A provision reserving to the municipality the right to inspect all pertinent books, records, maps, plans, financial statements, and other like materials of the franchisee, upon reasonable notice and during normal business hours.

(n) A provision indicating by title the office or officer of the municipality that is responsible for the continuing administration of the franchise.

(o) A provision stating:

(1) whether a franchise fee shall be payable by the franchisee to the municipality; and, if applicable;

(2) the precise amount or method of calculation of such franchise fee;

(3) whether any facilities or support for public, educational and governmental access that may be required by the franchise shall be part of such franchise fee. This provision shall also provide that the amount or method of calculation shall be competitively neutral when compared to the amount or method of calculation of a franchise fee contained in any other cable television franchise granted by the municipality.

(p) A severability clause identifying any franchise provisions which the municipality and franchisee deem to be material and stating that should any other provision of the franchise be held invalid by a court or a regulatory agency of competent jurisdiction, the remaining provisions of such franchise shall remain in full force and effect.

(q) A provision stating that the terms of the franchise are subject to the approval of the Public Service Commission.

(r) A provision requiring the franchisee to file applications for all necessary approvals from the commission and the Federal Communications Commission within 60 days from the date the franchise is granted or amended.

(s) (1) If municipal approval is required for a transfer of ownership or control of any franchise or cable television facilities serving a significant portion thereof, such approval shall be required in addition to any other approval required by applicable state law or regulation. A transfer of ownership or control for purposes of municipal jurisdiction shall mean the transfer of an equity or controlling interest or the equivalent thereof of fifty percent or more of any entity who controls the cable television system serving the municipality, unless otherwise specified in the franchise.

(2) In considering an application for the transfer of ownership or control of a franchise or cable television facilities serving a significant portion thereof, a municipality may consider the applicant's:

- (i) technical ability;
- (ii) the financial ability;
- (iii) good character; and
- (iv) other qualifications necessary to continue to operate the cable television system consistent with the terms of the franchise.

(t) A provision that any valid reporting requirements contained in the franchise may be satisfied with system-wide statistics, except for reporting requirements related to franchise fees and customer complaints.

.SO DOC 16C-895.2

NYCRR

895.2 Additional terms and conditions permitted.

Any franchise may contain such additional terms and conditions as the municipality and the franchisee deem appropriate, provided such additional terms and conditions are consistent with all Federal and State laws, rules, regulations and orders.

.SO DOC 16C-895.3 NYCRR

895.3 Level playing field.

No municipality may award or renew a franchise for cable television service which contains economic or regulatory burdens which when taken as a whole are greater or lesser than those burdens placed upon another cable television franchise operating in the same franchise area.

.SO DOC 16C-895.4 NYCRR

895.4 Minimum standards for public, educational and governmental (PEG) access.

(a) Definitions. (1) The term public access channel means a channel designated for noncommercial use by the public on a first-come, first-served, nondiscriminatory basis.

(2) The term educational access channel means a channel designated for noncommercial use by school districts and not-for-profit educational institutions chartered or licensed by the New York State Department of Education or Board of Regents.

(3) The term government access channel means a channel designated for noncommercial use by municipal, county and State government, or agencies thereof.

(4) The term public, educational or governmental (PEG) access facilities means (i) channel capacity designated for noncommercial public, educational or governmental use; and (ii) facilities and equipment for the noncommercial use of such channel capacity.

(5) The term local use means use by residents of the State of New York including school districts and not-for-profit educational institutions and municipal, county and State governments, or agencies thereof.

(6) The term access cablecast day means a day or part thereof during which public, educational or governmental access facilities are available for PEG use.

(b) Designation of channels. Every cable television franchisee shall designate channel capacity for PEG access as follows:

(1) The franchisee of a cable television system with a channel capacity of 36 or more channels shall designate (i) at least one full-time activated channel for public access use; (ii) at least one full-time activated channel for educational and governmental use; and (iii) one additional full-time activated channel for educational/governmental use whenever the first channel so designated

shall have been used for such educational and governmental programming on the average of at least 12 hours per day during any 90-day period; provided, however, that the calculation of such average shall not include any day when the unavailability of PEG access facilities precludes achieving such programming level. In the event that two channels for educational and governmental use are required by this subdivision, one channel shall be designated the educational access channel and one channel shall be designated the governmental access channel; provided, however, that either channel may be used for either purpose if necessary to satisfy the demand for channel time.

(2) The franchisee of a cable television system with a channel capacity less than 36 channels shall designate at least one full-time activated channel for public, educational and governmental use.

(c) Administration and use. The use of the channel capacity for PEG shall be administered as follows:

(1) The public access channel shall be operated and administered by the entity designated by the municipality or, until such designation is made, by the cable television franchisee provided, however, that the municipality may designate such entity at any time throughout the term of a franchise.*

* If a single public access channel is shared by two or more municipalities, the joint designation of a single entity is encouraged.

(2) The educational and governmental access channel shall be operated and administered by a committee or a commission appointed by local government and shall include appropriate representation of local school districts within the service area of the cable television system and may include for purposes of coordination an employee or representative of the cable television franchisee.**

** Where an educational or a governmental channel is shared by more than one school district or local government or combination thereof, administration of such channel(s) on a cooperative basis is encouraged.

(3) The entity responsible for administering and operating the public access channel shall provide notice to the general public of the opportunity to use such channel which notice shall include: (i) periodic messages transmitted on such channel and (ii) written notice to subscribers at least annually. Notices shall include the name, address and telephone number of the entity to be contacted for use of the channel. All PEG access programming shall be identified as such.

(4) Channel time shall be scheduled on the public access channel by the entity responsible for the administration thereof on a first-come, first-served, nondiscriminatory basis.

(5) Local use of educational and governmental access channels shall have preferred status in the event of competing requests for channel time. Priority may be afforded to local governments within the service area of the system.

(6) Channel time for PEG access programming shall be without charge to the user.

(7) The designation of PEG access facilities shall include the provision by the cable television franchisee of the technical ability to play back prerecorded programming and to transmit programming information consistent with the designated uses of PEG access channels.

(8) The cable television franchisee shall not exercise any editorial control over any public, educational or governmental use of channel capacity designated for PEG purposes provided, however, that this subparagraph shall not be applied to prevent a cable television company from taking such measures as may be authorized by Federal or state law to prohibit obscenity or other content unprotected by the First Amendment of the United States Constitution.

(9) A municipality shall not exercise any editorial control over any use by the public of a public access channel except as may be permitted by law.

(10) The entity responsible for the administration of a public access channel shall maintain a record of the use of such channel which shall include the names and addresses of all persons using or requesting the use of any such channel and which record shall be available for public inspection for a minimum of two years.

(11) Channels designated for PEG use shall be included in the lowest level of service offered by the cable television franchisee, provided, however, if the number of PEG channels exceeds the minimum number of channels required by this Part, then the cable television franchisee and the local franchising authority may agree to carriage of additional PEG channels on a tier other than the lowest level of service; where a system does not include sufficient unused channel capacity to accommodate a second educational/governmental access channel resulting from the operation of subdivision (b) of this section, the cable television franchisee may elect one time to defer the obligation to provide such additional channel until additional channel capacity becomes available.

(12) A cable television franchisee shall be permitted to use time on one or more PEG access channels whenever there are no blank channels available on the same level of service which includes the PEG channel(s) and whenever such PEG channel(s) is not scheduled for use at least 72

hours in advance of such time or times desired by the cable television franchisee; provided that any use of such PEG channel(s) by the franchisee shall at all times be subordinate to designated PEG use and shall terminate or be preempted by PEG programming scheduled at least 72 hours in advance. All nonaccess programming on PEG channels shall be identified as such by an appropriate announcement made prior to and following each nonaccess use. Notwithstanding the foregoing, at such time as any PEG channel on a cable television system with a channel capacity in excess of 40 channels has been programmed for a daily average of eight hours or 50 percent of the hours of access cablecast days, whichever is less, during any 90-day period, use of such channel by the cable television franchisee shall be suspended for such time as such minimum PEG use of such channel is maintained.

(d) Applicability. (1) Subdivisions (a), (c) and (f) of this section shall apply to the use of channel capacity designated for PEG access as of September 9, 1990.

(2) The minimum channel designation requirements in subdivision (b) of this section shall be required by, and shall be a condition to, the exercise of every franchise and certificate of confirmation granted or renewed after September 9, 1990.

(3) Notwithstanding the foregoing, nothing contained herein shall impair the enforcement of any provision of any franchise in effect on September 9, 1990 concerning the designation and use of channel capacity, facilities and equipment for PEG access or otherwise diminish the obligations of a cable television franchisee with respect to PEG access.

(e) General. Any cable television franchise may include additional provisions concerning the designation and use of public, educational and governmental access facilities as follows:

(1) a provision specifying the facilities and equipment to be made available by the franchisee for use in connection with the designated PEG channels; and

(2) any other provision concerning the designation and use of channel capacity for public, educational and governmental access consistent with Federal and State law.

(f) Waivers and rulings. (1) A cable television franchisee, a municipality or an entity designated to administer a public access channel may seek a waiver of one or more provisions of this section.

(2) Any interested person may seek a ruling from the commission concerning the applicability or implementation of any provision of this section or any provision of a franchise concerning PEG access upon the

filing of a petition.

(3) Notwithstanding paragraphs (1) and (2) of this subdivision, the commission shall not grant any waiver or ruling, or enter any order that constitutes the exercise of editorial control over the content of public access programming except as may be permitted by law.

(4) Waiver requests regarding section 895.4(b)(1) shall be submitted by joint petition of the franchising authority and the cable television franchisee. Any such petition may seek permission to substitute a commitment not required by this Part in lieu of one or more standards that are required.

(g) Severability. If any provision of this section or the application of such provision is held invalid by a court of competent jurisdiction, the remainder of this section or the application of the provision to other circumstances shall not be affected thereby.

.SO DOC 16C-895.5

NYCRR

895.5 Requirements for construction of cable television plant and provision of cable television services.

(a) Definitions. (1) Primary service area shall include each of the following within the franchised area:

(i) those areas where cable television plant has been built without a contribution-in-aid-of-construction by subscribers;

(ii) those areas where the cable television company is obligated by the terms of its franchise to provide cable television service without a contribution-in-aid-of-construction by subscribers;

(iii) any area adjoining an area described in subparagraph (i) or (ii) of this paragraph and which contains dwelling units at a minimum rate of 35 dwelling units per linear mile of aerial cable;

(iv) any area adjoining an area described in subparagraphs (i) and (ii) of this paragraph and which contains at least the same number of dwelling units per linear mile of aerial cable as is the average number of dwelling units per linear mile of cable in areas described in subparagraphs (i) and (ii) of this paragraph. The average is to be determined by dividing the sum of the dwelling units in areas described in subparagraphs (i) and (ii) of this paragraph by the number of linear miles of cable in the same areas.

(2) Line extension area shall be any area within the franchised area which is not the primary service area.

(b) Where a cable television franchise is awarded, renewed or amended after October 1, 1982, the franchise will be confirmed or the amendment will be approved by the commission only if the franchise contains the following additional minimum franchise standards:

(1) That, within five years after receipt of all necessary operating authorizations, cable television service will be offered throughout the authorized area to all subscribers requesting service in any primary service area.

(2) That cable television service will not be denied to potential subscribers located in line extension areas who are willing to contribute to the cost of construction in accordance with the following formula:

$$C - CA = SC$$

LE P

C equals the cost of construction of new plant; CA equals the average cost of construction per mile in the primary service area; P equals the lower of 35 or the average number of dwelling units per linear mile of cable in areas described in subparagraphs (a)(1)(i) and (ii) of this section; LE equals the number of dwelling units requesting service in the line extension area; and SC equals subscriber contribution-in-aid-of-construction in the line extension area.

(i) Whenever a potential subscriber located in a line extension area requests service, the cable television company shall, within 30 days of the request, conduct a survey to determine the number of potential subscribers located in the line extension area, and shall inform each of the potential subscribers of the contribution-in-aid-of-construction that may be charged. The cable television company may require prepayment of the contribution-in-aid-of-construction. The cable television company shall apply for pole attachment agreements within 30 days of its receipt of the contribution-in-aid-of-construction. Cable television services must be made available to those who made a contribution-in-aid-of-construction within 90 days from the receipt of pole attachment agreements by the cable television company.

(ii) The contribution-in-aid-of-construction shall be in addition to the installation rate set forth in the franchise.

(iii) During a five-year period commencing at the completion of a particular line extension, pro rata refund shall be paid to previous subscribers as new subscribers are added to the particular line extension; the amount of the refund, if any, shall be determined by application of the formula annually. The refunds shall be paid annually to subscribers, or former subscribers, entitled to receive them. The company shall not be required to provide refunds to any previous subscriber otherwise entitled to a refund, who is no longer at the same address and who has not informed the company of the subscriber's address.

(3) That cable television service will be provided to any subscriber who demands service within seven business days of the request for service and who is located within 150 feet of aerial feeder cable, and that the charge for the installation for any subscriber so situated will not be in excess of the standard installation charge.

(4) Nothing in paragraph (1) of this subdivision shall be construed to preclude:

(i) the provision of cable television services by the franchisee in a line extension area without assessing a contribution-in-aid-of-construction; or

(ii) the inclusion in a cable television franchise of a provision establishing a primary service area which includes at least all of those areas which are in the primary service area as defined in subdivision (a) of this section.

(5) Nothing in paragraph (2) of this subdivision shall be construed to preclude:

(i) the discounting or the waiver of the maximum contribution-in-aid-of-construction charge a cable television company can charge a subscriber pursuant to paragraph (2) of this subdivision; or

(ii) the inclusion of a provision in a cable television franchise establishing a formula to be used to determine the contribution-in-aid-of-construction charge, which formula is different than the formula set forth in paragraph (2) of this subdivision, provided that the formula included in the franchise does not require payment by the subscriber in a line extension area of a higher contribution-in-aid-of-construction charge than would result from the use of the formula set forth in paragraph (2) of this subdivision.

(c) All cable television companies operating in the State of New York shall make cable television service available to all potential subscribers requesting service who are located in a primary service area as defined in paragraph (a)(1) of this section, and shall make services available in line extension areas as defined in paragraph (a)(2) of this section at charges which may not exceed those provided for in paragraph (b)(2) of this section within the following schedule of compliance:

(1) prior to January 1, 1984 in any franchise area for which the original certificate of confirmation of the franchise was granted by this commission prior to January 1, 1979;

(2) within five years from the date the certificate of confirmation was granted by this commission, in any franchise area for which the original certificate of confirmation of the franchise was granted by

this commission after January 1, 1979.

(d) The provisions of this section may be waived by the commission if the commission determines that compliance with the section would not be possible within the limitations of economic feasibility.

TECHNICAL PERFORMANCE AND SAFETY STANDARDS

(Statutory authority: Public Service Law §§215, 216, 221)

Sec.

896.1 Purpose

896.2 Safe and reliable service

896.3 Technical standards; performance tests

896.4 Service complaints

896.5 Emergency alert system

896.6 Other Records

.SO DOC 16C-896.1

NYCRR

Section 896.1 Purpose.

The purpose of this Part is to ensure the delivery of safe, adequate and reliable cable television service to subscribers throughout the State in a manner consistent with subpart K of the rules and regulations of the Federal Communications Commission, 47 C.F.R. section 76.601 et seq. The applicable provisions of the C.F.R. referenced in this Part are available for public inspection and copying at the offices of the Department of Public Service, Three Empire State Plaza, Albany, New York 12223 and the New York State Department of State located at 41 State Street, Albany, New York 12207. 47 C.F.R. 76.601 et seq. was published in the Federal Register, Volume 59, No. 93, May 16, 1994 at pp. 25339-25434 by the United States Government Printing Office, Superintendent of Documents, Washington, D.C. 20402. In furtherance of this objective, the commission intends to exercise its jurisdiction and responsibility to the fullest extent permitted by article 11 of the Public Service Law consistent with applicable federal law and rules.

.SO DOC 16C-896.2

NYCRR

896.2 Safe and reliable service.

Construction of cable television systems shall comply with all relevant safety codes including electric or other public utility codes for joint use of pole lines or underground facilities. Other local construction codes and municipal and State laws and ordinances may also apply to the construction and maintenance of cable television systems. Particular attention is called to appropriate sections of the National Electric Code as published by the National Fire Protection Association

concerning the grounding and bonding of subscriber drop cables at building entry points, as referenced in Section 10.3 of this Title.

.SO DOC 16C-896.3

NYCRR

896.3 Technical standards; performance tests.

(a) Cable television systems are expected to be designed, installed and operated in compliance with the technical standards in 47 C.F.R. section 76.605 and cable television companies are expected to conduct all performance tests as required by 47 C.F.R. 76.601.

(b) Pursuant to 47 C.F.R. section 76.601(a), every cable television company shall be prepared to demonstrate to the commission that its system complies with the federal technical standards.

(c) Pursuant to 47 C.F.R. section 76.601(c), every cable television company shall maintain performance test data at its local office and shall make such test data available for inspection by the commission upon request.

(d) Pursuant to 47 C.F.R. section 76.601(d), the commission may order a cable television company to perform additional tests, repeat tests or tests involving specified subscriber terminals in order to ensure compliance with federal technical standards at all subscriber terminals; provided, however, that no additional testing shall be required except after notice to the cable television company of signal quality problems and the opportunity during a period of 30 days to correct such problems and to come into compliance with applicable rules.

.SO DOC 16C-896.4

NYCRR

896.4 Service complaints.

(a) Pursuant to 47 C.F.R. section 76.607, and in accordance with section 890.70 of this title, service complaints from subscribers about the quality of television signals shall be addressed initially to the commission prior to referral to the Federal Communications Commission. Cable television companies shall establish a process for resolving complaints about service quality and shall maintain such complaints for a period of one year. Aggregate data based upon such complaints shall be made available for inspection by the commission and municipal franchising authorities upon request.

.SO DOC 16C-896.5

NYCRR

896.5 Emergency alert system.

(a) All cable television systems are required to meet all applicable federal requirements for the provisions of Emergency Alert System capability in order to alert citizens in the event of emergencies as defined under the rules of the Federal Communications Commission and Federal Emergency Management Agency.

(b) Cable television systems shall activate their Emergency Alert System equipment upon receipt of any official state or local government warning of a direct and immediate threat to life and property in the area served. Such EAS alerts need only be transmitted in the general geographic area of a cable system that is specified in the warning.

(c) The Department of Public Service will monitor the participation of cable television systems in the Emergency Alert System. Activation of the Emergency Alert System shall not constitute a service interruption or service outage for purposes of this title.

.SO DOC 16C-896.6 NYCRR

896.6 Other records.

(a) Cable television systems shall maintain an up to date map or other technical records showing the physical location of all cable routes, service areas, receive sites and other interconnection points. The scale of the maps and other technical information shall be of such detail as to permit a determination of franchise areas and subscribers served.

(b) All cable television systems are required to maintain technical information and records regarding incidents that may have affected public safety. Cable systems shall also maintain a record of all Emergency Alert System tests and alerts received as well as a record of the EAS transmission sent out to the cable system. Records may include automatically generated EAS logs. These records shall be maintained for two years.

(c) All information required to be maintained pursuant to this section shall be available for inspection at the local office of the cable television company upon request of the Department of Public Service or a municipal franchising authority.

Section 897.1 Applicability.

In addition to the requirements of Part 17, of this Title, except § 17.2, and provided that at least an original of such petition will be filed with the Secretary, applications under § 221 or 222 of the Public Service Law shall conform to the requirements of this Part.

.SO DOC 16C-897.2

NYCRR

897.2 Certificate of confirmation.

An application for a certificate of confirmation shall set forth and include:

- (a) the applicant's name, mailing address and telephone number, the municipality to be served, and the date service commenced or will commence, as the case may be;
- (b) a true copy of the franchise agreement together with proof of the public hearing and a copy of the resolution authorizing the franchise;
- (c) true copies of all documents submitted by the franchisee to the municipality as part of, or in support of, its application for a franchise;
- (d) full facts as to the ownership of the cable television system;
- (e) full facts as to the technical specifications and design of the system and whether, and to what extent, the applicant intends to engage in origination cablecasting and access cablecasting;
- (f) whether, and to what extent, the proposed operation would be in violation of, or in any way inconsistent with, any federal or State law or regulation;
- (g) proof of service of a copy of the application upon the clerk of the municipality and proof of publication of notice of the application to the commission in a newspaper of general circulation in the municipality, which notice shall state the opportunity for interested parties to file comments with the commission within 10 days of publication.

.SO DOC 16C-897.3

NYCRR

897.3 Franchise renewal or amendment.

An application for approval of a franchise renewal or franchise amendment shall include:

- (a) the applicant's name, mailing address and telephone number and the name of the municipality for which the franchise has been issued;
- (b) whether affirmative municipal action was required, for the renewal or amendment at issue, and if so, proof that such action was taken, including a true copy of said renewal or amendment and proof of the public hearing that preceded such municipal action;
- (c) proof of service of a copy of the application upon the clerk of the municipality and proof of publication of notice of the application

to the commission in a newspaper of general circulation in the municipality, which notice shall state the opportunity for interested parties to file comments with the commission within 10 days of publication.

.SO DOC 16C-897.4

NYCRR

897.4 Transfers.

An application shall be filed, in accordance with the requirements of § 3.5 of this Title, with the Secretary for approval of a transfer of control of a franchise or cable television system and shall include:

- (a) the applicant's name, mailing address and telephone number;
- (b) whether the proposed transfer is an asset transfer or stock transfer, and, in either case, a list of each franchise, including the name of the municipality that granted the franchise and the date thereof;
- (c) a copy of the purchase and sale agreement;
- (d) whether pursuant to the terms of the franchise, the proposed transfer requires municipal approval and, if so, a statement that the applicant has requested or will request approval by the municipality and will provide a copy of any municipal resolution adopted relative to such request; and
- (e) a copy of FCC Form 394.

.SO DOC 16C-897.5

NYCRR

897.5 Purpose. This Part sets forth procedures in addition to those contained in 6 NYCRR Part 617, which are necessary for the commission's implementation of the State Environmental Quality Review Act. The terms used in this Part have the meanings given them in 6 NYCRR 617.2, unless the context requires otherwise.

.SO DOC 16C-897.6

NYCRR

897.6 Types of actions.

(a) Type I actions (which are more likely to require the preparation of environmental impact statements than those unlisted actions) are listed in 6 NYCRR 617.4. Type II actions (which have been determined not to have a significant, adverse effect on the environment) are listed in 6 NYCRR 617.5 and in subdivision (b) of this section. Neither new programs, nor major changes in priorities with respect to policies, regulations and procedures are included.

(b) The adoption of policies, regulations and procedures constitutes the undertaking of a Type II action if it relates to:

- (1) routine administration and management of the commission's functions, including but not limited to, rules establishing procedures for the orderly conduct of business before the commission;

(2) practices by cable companies concerning administration and management of cable company functions, including but not limited to rules relating to:

- (i) cable company reports;
- (ii) the uniform system of accounts; and
- (iii) transfers of assets and/or control;

(3) practices by cable companies concerning customer relations, such as, but not limited to, rules governing:

- (i) technical standards and requirements;
- (ii) complaint procedures;
- (iii) billing practices;
- (iv) limitation of liability; and
- (v) landlord-tenant relationships;

(4) activities by cable companies concerning testing, inspection, repair and maintenance of existing facilities; or

(5) safety measures for design, testing, operation and maintenance of cable facilities, including rules governing the reporting of signal levels and leakage.

(c) Construction of cable facilities which is limited to installations on existing utility facilities is a Type II action, unless such construction is a Type I action as defined in 6 NYCRR 617.4.

.SO DOC 16C-897.7

NYCRR

897.7 Procedure.

(a) Each application for a certificate of confirmation should be accompanied by a report of the environmental impact of the proposed approval. Such report shall be in the form set forth in 6 NYCRR 617.9.

(b) If the commission directs the preparation of an environmental impact statement, the statement shall conform with the requirements set forth in 6 NYCRR 617.9.

(c) (1) The responsibility for preparation of the environmental reports shall be with the applicant for approval.

(2) Notwithstanding the requirement that the applicant prepare a report on environmental impact, each party proposing an alternative for adoption by the commission shall, at the time a proposal is submitted, present a statement of its views as to the likely environmental impact of the alternative it has proposed.

.SO DOC 16C-898.1 NYCRR

Section 898.1 Prohibition.

Except as provided in section 898.2 of this Part, no landlord shall demand or accept any payment from any cable television company in exchange for permitting cable television service or facilities on or within said landlord's property or premises.

.SO DOC 16C-898.2 NYCRR

898.2 Just compensation.

Every landlord shall be entitled to the payment of just compensation for property taken by a cable television company for the installation of cable television service or facilities. The amount of just compensation shall be determined by the commission in accordance with section 228 (1)(b) of the Public Service Law upon application by the landlord pursuant to section 898.5 of this Part.

.SO DOC 16C-898.3 NYCRR

898.3 Notice of installation.

(a) Every cable television company proposing to install cable television service or facilities upon the property of a landlord shall serve upon said landlord or an authorized agent, written notice of intent thereof at least 15 days prior to the commencement of such installation.

(b) The secretary of the commission shall prescribe the procedure for service of such notice, and the form and content of such notice, which shall include, but need not be limited to:

- (i) the name and address of the cable television company;
- (ii) the name and address of the landlord;
- (iii) the approximate date of the installation; and
- (iv) a citation of section 228 of the Public Service Law and Part 898 of the commission's rules.

(c) Notice that installation of equipment has been completed may be served at any time on landlords upon whose property cable television service or facilities were placed prior to the effective date of this

Part.

.SO DOC 16C-898.4

NYCRR

898.4 Right of entry.

(a) A cable television company shall have the right to enter property of the landlord for the purpose of making surveys or other investigations preparatory to the installation. Before such entry, the cable television company shall serve a notice upon the landlord, or an authorized agent, which notice shall contain the date of the entry and all other information described in section 898.3(b) of this Part. The cable television company shall be liable to the landlord for any damages caused by such entry but such damages shall not duplicate damages paid by the cable television company pursuant to section 228(1)(a)(3) of the Public Service Law.

(b) Where the installation of cable television service or facilities is not effected pursuant to a notice served in accordance with section 898.3 of this Part, the cable television company may file with the commission a petition, verified by an authorized officer of the cable television company setting forth:

- (1) proof of service of a notice of intent to install cable television service upon the landlord;
- (2) the specific location of the real property;
- (3) the resident address of the landlord, if known;
- (4) a description of the facilities and equipment to be installed upon the property, including the type and method of installation, the anticipated costs thereof, and the measures to be taken to minimize the aesthetic impact of the installation;
- (5) the name of the individual or officer responsible for the actual installation;
- (6) a statement that the cable television company shall indemnify the landlord for any damage caused in connection with the installation, including proof of insurance or other evidence of ability to indemnify the landlord;
- (7) a statement that the installation shall be conducted without prejudice to the rights of the landlord to just compensation in accordance with section 898.2 of this Part;
- (8) a summary of efforts by the cable television company to effect entry of the property for the installation; and
- (9) a statement that the landlord is afforded the opportunity to answer the petition within 20 days from the receipt thereof, which answer must be responsive to the petition and may set forth any additional matter not contained in the petition. Participation by the

landlord is not mandatory, however, if no appearance by the landlord is made in the proceeding or no answer filed within the time permitted, the commission may grant to the petitioning cable company an order of entry which order shall constitute a ruling that the petitioning cable television company has complied with the requirements of section 228 of the Public Service Law and the regulations contained in this Part. If the landlord files a written answer to the petition, the cable television company shall have 10 days within which to reply to said answer. The commission may grant or deny the petition, schedule an administrative hearing on any factual issues presented thereby or direct such other procedures as may be consistent with the installation of cable television service or facilities in accordance with Section 228 of the Public Service Law.

.SO DOC 16C-898.5 NYCRR

898.5 Application for just compensation.

A landlord may file with the commission an application for just compensation within four months following the service by the cable television company of the notice described in section 898.3 of this Part or within four months following the completion of the installation of the cable television facilities, whichever is later.

.SO DOC 16C-898.6 NYCRR

898.6 Contents of application for just compensation.

An application for just compensation shall set forth specific facts relevant to the determination of just compensation. Such facts should include, but need not be limited to, a showing of:

- (a) the location and amount of space occupied by the installation;
- (b) the previous use of such space;
- (c) the value of the applicant's property before the installation of cable television facilities, and the value of the applicant's property subsequent to the installation of cable television facilities; and
- (d) the method or methods used to determine such values.

The secretary may, upon good cause shown, permit the filing of supplemental information at any time prior to final determination by the commission.

.SO DOC 16C-898.7 NYCRR

898.7 Service of application. A copy of the application filed by the landlord for just compensation shall be served upon the cable television company making the installation and upon the chief executive officer of the municipality in which the real property is located.

.SO DOC 16C-898.8 NYCRR

898.8 Responses.

Responses to the application, if any, shall be served on all parties and on the commission within 20 days from the service of the application.

.SO DOC 16C-898.9

NYCRR

898.9 Hearing and determination.

(a) If the commission finds that just compensation for the installation of cable television facilities as described in the application may be in excess of one dollar, it shall conduct a hearing pursuant to section 216(3) of the Public Service Law.

(b) An applicant may, within 20 days from the release date of the commission order which sets compensation at one dollar or less, file a written request for a hearing. Upon timely receipt of such request, the commission shall conduct a hearing pursuant to section 216(3) of the Public Service Law and Chapter I, Subchapter A of this Title.

(c) If after the filing of an application, the cable television company and the applicant agree upon the amount of just compensation and the commission approves such amount, the commission shall not be required to conduct a hearing on the issue.

899.21 Accounts

899.30 through 899.70 Reserved

899.80 Filing of financial reports-general

899.81 Selection of fiscal year

899.82 Different reports to be filed

899.83 Nature of filed reports

899.90 Obligation of cable television company to notify commission

.SO DOC 16C-899.10

NYCRR

Section 899.10 Definitions.

(a) The definitions as contained in section 212 of the Public Service Law shall be followed in determining the appropriateness of any report.

(b) Uniform reporting system. The accounting and financial recordkeeping and reporting requirements prescribed by the commission in this part. The uniform reporting system is commonly abbreviated "URS".

(c) Generally accepted accounting principles and practices. Principles and practices that would be followed in posting financial transactions

or preparing financial statements that would generally be acceptable to any other accountant: such generally accepted accounting principles would be those enumerated by the Accounting Principles Board (APB) and its successor, the Financial Accounting Standards Board (FASB).

.SO DOC 16C-899.20

NYCRR

899.20 Applicability of recordkeeping requirements.

(a) Recordkeeping requirements--all companies. Every cable television company shall maintain such books and records as will clearly and accurately disclose the condition and results of the business.

Generally accepted accounting principles, as defined in Section 899.10(c) of this Part, shall be used in determining the appropriateness of any particular individual or group of accounting entries.

(b) The books of account shall include, but may not be limited to the following:

(1) general ledger consisting of assets, liabilities, equity, revenue and expense accounts;

(2) plant and equipment ledger; and

(3) corporate minute book.

(c) The retention period for books and records will be as follows:

Records	Retention period
1. General ledger	Permanent
2. Plant and equipment ledger	Permanent
3. Corporate minute book	Permanent
Records	Retention period
4. Bank statement, cancelled checks, savings passbooks, etc.	3 years*
5. Vouchers, invoices, sales slips, etc.	3 years*
6. Customer billings, receipts, etc.	3 years
7. Construction contracts	12 years
8. Loan agreements	3 years after expiration of loan period or repayment, whichever is first*
9. Payroll records	3 years*

* Records pertaining to construction or purchase of additional plant

equipment or replacement of plant equipment should be retained for 12 years.

(d) All books of account and related records as described in this subdivision shall be made available for examination within New York State, upon reasonable notice, in not to exceed 15 days.

(e) Exemptions and prohibitions.

(1) No franchising municipality or local governmental unit shall prescribe any system of accounts for use by a cable television company. (This paragraph shall not be construed as preventing a franchising municipality or local governmental unit from requiring financial or other data and/or reports to satisfy its informational needs.)

(f) Recordkeeping requirements--specified companies. Any person who is a cable television company and files a consolidated AFR or who excludes cable television activities originating outside of New York State, pursuant to section 899.82 of this Part, or excludes activities arising from noncable television activities originating within New York State from inclusion on part II of its AFR, pursuant to section 899.83 of this Part, shall maintain its books and records so that the activities of each company are separately identifiable.

.SO DOC 16C-899.21

NYCRR

899.21 Accounts.

(a) All work papers used in calculating account balances and transaction totals shall be permanently maintained as part of the general ledger.

(b) If account balances and transaction totals are not posted directly to the accounts but are posted from entries or totals contained in another system of accounts, such books, including general and subsidiary ledgers and supporting books and records shall be preserved as long as the books of account prescribed by the URS are preserved.

(c) All reports shall reflect the accrual basis of accounting. Generally accepted accounting principles shall be used in establishing the accounting treatment of any financial transaction, except that the commission may require such accounting treatment as will yield information necessary to a proper discharge of the commission's responsibilities.

.SO DOC 16C-899.80

NYCRR

899.80 Filing of financial reports--general. By not later than 90 days following the close of its fiscal year, every cable television company, except a cable television company which is one solely by reason of its ownership or control of another cable television company, shall file an annual financial report with the commission as described in sections

899.81-899.83 of this Part.

.SO DOC 16C-899.81

NYCRR

899.81 Selection of fiscal year.

A cable television company may select any 12-month period as its fiscal year for purposes of this Part. No cable television company may change such fiscal year without having first obtained the written permission of the commission.

.SO DOC 16C-899.82

NYCRR

899.82 Different reports to be filed.

(a) Every cable television company required to file an annual financial report shall file form AFR-1 using Generally Accepted Accounting Principles (GAAP) except as provided in subdivisions (b) and (d) of this section.

(b) Except as provided in subdivision (d) of this section, every cable television company having less than \$1,000,000 but \$500,000 or more of gross annual revenues shall file form AFR-2 using GAAP.

(c) Except as provided in subdivision (d) of this section, every cable television company having less than \$500,000 of gross annual revenues shall file form AFR-3 unless a consolidated report is required, in which case form AFR-1 shall be filed using GAAP.

(d) Any cable television company may file form AFR-1 in lieu of form AFR-2 or form AFR-3.

(e) Any person subject to the jurisdiction of the commission may be required to file special financial reports, or other reports, in such form and manner as the commission may from time to time prescribe.

(f) Any group of affiliated cable television companies may elect to file a consolidated AFR starting on or after January 1, 1983. Notice shall be given to the commission, concurrently with the first consolidated AFR filed, of all companies included in the consolidation and of any companies excluded, and the reason for such exclusion. All affiliated cable television companies are eligible to file a consolidated AFR provided that:

- (1) the requirements of section 899.83 of this Part are met;
- (2) all cable television companies meeting the requirements of section 899.83 of this Part shall be included in the consolidated report;
- (3) only form AFR-1 shall be filed;
- (4) an election to file a consolidated AFR may not be revoked without written permission of the Commission.

.SO DOC 16C-899.83

NYCRR

899.83 Nature of filed reports.

(a) All financial reports shall accurately and clearly disclose all

financial transactions, account balances and such other information as may be required, and all such data shall be set forth in accordance with this Part and the instructions specified on the report forms.

(b) Financial reports, statements or schedules required to be prepared on a consolidated basis:

(1) shall exclude any company whose fiscal year is more than 93 days different from that of its parent.

(2) may exclude the account balance and transaction totals of any company where:

(i) the parent is authorized by the Securities and Exchange Commission to exclude such company from reports submitted to that commission;

(ii) such company is engaged in operations which are totally unrelated to the operations of the cable television company;

(iii) the investment of the parent in such subsidiary is of a temporary nature;

(iv) The operations of such company are trifling and have no material effect on the consolidated operations from an accounting viewpoint.

(c) Whenever a cable television company excludes from the consolidated portion of its report account balances and transaction totals in accordance with subdivisions (a) and (b) of this section, it shall attach to said report a separate financial report for the excluded company. The separate report shall be in the same form and detail as the consolidated portion of the cable television company's report.

(d) Every cable television company that is affiliated with another cable television company is eligible to file a consolidated AFR. For purposes of this section, affiliation shall be defined as having 100 percent ownership in another cable television company operating in whole or part of New York State or being 100 percent owned by such a company.

(e) Every cable television company that operates in whole or part, in a state other than New York, or which has significant noncable television activities shall only report its New York State cable television activities on part II of its AFR. All other activities, including New York State cable television activities, shall be included on part III of its AFR. For purposes of this section, significant activity shall be defined as:

(1) any noncable television related activity which generates more than 10 percent of gross annual revenues or expenses, or which requires more than 10 percent of a company's assets, or is responsible for more than 10 percent of its liabilities; and

(2) can reasonably be expected to be of a continuing nature.

(f) The commission may order the filing of individual annual financial

reports instead of or in addition to a consolidated financial report if it determines that its informational needs require such filing.

.SO DOC 16C-899.90

NYCRR

899.90 Obligation of cable television company to notify commission.

(a) A person who is a cable television company and ceases to be so shall promptly notify the commission of that fact and file, no later than 30 days after it ceases to be a cable television company, a final financial report in the form and manner prescribed by the commission.

(b) A person who is a cable television company and sells or otherwise divests itself of all, or a substantial part of a cable television system or another cable television company shall promptly notify the commission of that fact and file, no later than 30 days after the sale or divestiture is completed, a final financial report in the form and manner prescribed by the commission. For the purposes of this subdivision, the phrase sells or otherwise divests shall include not only the sale of property but also changes of ownership or control.

(c) Every cable television company shall notify the commission, and continue to keep the commission informed, whenever a significant change in the financial position of such company occurs or is about to occur. For purposes of this section, a significant change in the financial position shall include, but not be limited to:

- (1) inability to meet current payments as they come due;
- (2) contemplation of filing a petition in bankruptcy or for a court-ordered reorganization;
- (3) suspension of corporate stock from trading on a regulated exchange by action of the stock exchange or the Securities and Exchange Commission; and
- (4) notification that financial reports or practices are under investigation by any government agency, Federal or State, but this shall not include tax audits or similar audits or investigations which are conducted periodically and are not unusual in scope or nature.

NYCRR

Section 1000.1 Purpose and applicability.

The purpose of this Subchapter A is to establish procedures for

applications for Certificates and other matters affecting the construction or operation of major electric generating facilities pursuant to Article 10 of the Public Service Law. It also establishes procedures for matters affecting the construction or operation of major electric generating facilities pursuant to former Articles VIII and X of the Public Service Law.

For Certificate revisions, amendments, revocations, suspensions, transfers and compliance matters for major electric generating facilities having Certificates granted pursuant to former Articles VIII and X of the Public Service Law, the provisions of this Subchapter A will be applied in a manner that is consistent with former Article VIII of the Public Service Law remaining operative and continuing in full force and effect with regard to applications filed on or before December 31, 1978, and former Article X of the Public Service Law remaining operative and continuing in full force and effect with regard to applications filed on or before December 31, 2002, except that any such Certificate revisions, amendments, revocations, suspensions, transfers and compliance matters involving increase of capacity by more than 25 megawatts are subject to the procedures for applications for Certificates and other matters affecting the construction or operation of major electric generating facilities pursuant to Article 10 of the Public Service Law without regard to former Articles VIII and X of the Public Service Law.

.SO DOC 16C-1000.2

NYCRR

1000.2 Definitions.

In addition to the definitions referred to, and terms defined in Part 1 of Subchapter A of Chapter I of this Title, unless the context otherwise requires, the following terms have the meanings specified:

(a) Adjacent or Contiguous: When used in the context of PSL §165(4)(b), located on the same parcel of real property, on separate parcels of real property sharing a common border, or on separate parcels of real property separated by no more than 500 feet.

(b) The New York State Adirondack Park Agency (APA).

(c) Applicant: Any person who is required to have submitted or who submits a Public Involvement Program plan to the DPS pursuant to Section 1000.4 of this Subchapter or who in fact submits an application for a Certificate to the Board under this Subchapter, or who holds a Certificate.

(d) Associate Examiner: An administrative law judge appointed by DEC.

(e) Base Nameplate Generating Capacity: (1) for generating facilities in commercial operation on or before August 4, 2012, their nameplate

generating capacity as of August 4, 2012; (2) for generating facilities commencing commercial operations after August 4, 2012, their nameplate generating capacity as of the date of commencement of commercial operations; (3) for generating facilities that increased their nameplate generating capacity as a result, in whole or in part, of receiving a Certificate after August 4, 2012, their nameplate generating capacity as of the date of commencement of commercial operations of the increased capacity as a result of the Certificate. Incremental increases in generating capacity after August 4, 2012 not made as a result of receiving a Certificate shall not increase the Base Nameplate Generating Capacity.

(f) Board: The New York State Board on Electric Generation Siting and the Environment.

(g) Certificate: A certificate of environmental compatibility and public need authorizing the construction and operation of a major electric generating facility.

(h) Commission: The New York State Public Service Commission.

(i) Compliance Filing: A document prepared by or on behalf of an Applicant that describes how the Applicant will comply with the terms, conditions, limitations and modifications on the construction and operation of a facility granted a Certificate by the Board and which may, at the Applicant's option, consist of phased submissions.

(j) Ag&Mkts: The New York State Department of Agriculture and Markets.

(k) DEC: The New York State Department of Environmental Conservation.

(l) DOH: The New York State Department of Health.

(m) DOS: The New York State Department of State.

(n) DPS: The New York State Department of Public Service.

(o) ECL: The Environmental Conservation Law.

(p) Fuel Waste Byproduct: Waste or combination of wastes produced as a byproduct of generating electricity from a major electric generating facility in an amount which requires storage or disposal and, because of its quantity, concentration, or physical, chemical or other characteristics, may pose a substantial present or potential hazard to human health or the environment.

(q) Interconnections: Offsite electric transmission lines, fuel gas transmission lines, fuel oil transmission lines, water supply lines, waste water lines, communications lines, steam lines, stormwater drainage lines, and appurtenances thereto, installed in New York State connecting to and servicing the site of a major electric generating facility, that are not subject to the Commission's jurisdiction under PSL Article VII, not including service lines designed and sized for

household type usage such as for bathrooms or ordinary telephones.

(r) Local Actions Not for the Construction or Operation of the Proposed Major Electric Generating Facility: Local action requirements that remain subject to local approval processes outside of the Article 10 process and may or may not also require local agency compliance with the State Environmental Quality Review Act (SEQRA), including local approvals required for the subdivision of land; extensions of special improvement or benefit assessment districts; tax assessment or payments in lieu of taxes determinations; consents for the extension of utility franchises to provide station power, private water company service, or similar services to the affected property; the withdrawal or consumption of water from a municipal supply; the discharge of sewage or stormwater into a municipal system; the setting and payment of hook-in fees, water rates, sewer rents and similar capital and consumption charges; industrial development agency leases; the overt grant of property rights or other privileges that would require an affirmative action by a municipality; and other similar approvals.

(s) Local Party: Any person residing in a community who may be affected by the proposed major electric generating facility at the proposed location, or any alternative location identified, who is a party to the proceeding. For the purposes of this definition, the term "residing" shall include individuals having a dwelling within a community who may be affected.

(t) Local Procedural Requirements: County, city, town and village administrative process requirements, including application, hearing, and approval requirements regarding site plans, special zoning exceptions, electrical, plumbing, and building permits, wetlands, blasting, tree cutting, excavation, fill, historic preservation, flood damage prevention, storm water management, highway work, street opening, and traffic safety permits, and other similar requirements.

(u) Local Substantive Requirements: County, city, town and village substantive standards, including zoning use restrictions; zoning lot, setback, bulk, and height requirements; noise limits; electric, plumbing, building, and flood zone construction and materials codes; noise limits; historic preservation requirements; architectural style and color requirements; limits on construction activity times and duration; road weight limits; cut and fill limits; blasting practices requirements; tree preservation requirements; wetland preservation requirements; landscaping requirements; site waste/construction debris disposal/recycling requirements; traffic maintenance and safety requirements; storm water management requirements; paving, curbing, and

subgrade requirements; restrictions on date, time, duration and method of street openings; traffic maintenance and safety requirements; separation and depth of cover requirements; tap methods, materials, and sizing requirements; restoration requirements for road subgrade, base and pavement; and other similar requirements.

(v) Major Electric Generating Facility: An electric generating facility with a nameplate generating capacity of twenty-five megawatts or more, including electric transmission line and fuel gas transmission line interconnections that are not subject to review under Article VII of the PSL, and including ancillary features located on the facility site such as roads, railroads, switchyards, fuel or energy storage or regulation facilities, solid waste disposal areas, waste treatment and disposal facilities, and similar facilities.

(w) Map: A two-dimensional representation of a portion of the earth's surface, which may be in paper or digital form, provided that digital data used for map generation or geographic analysis, are made available (in an appropriate format) to parties upon request.

(x) Modification: An amendment of an application or Certificate that is not a revision; including the shifting of a wind turbine, access road or electric collector line to a new location within a 500 foot radius of the original location provided such change does not significantly increase impacts on sensitive resources or decrease compliance with setback and similar requirements.

(y) Modify: When used in the context of PSL §165(4) (b), alterations that increase by more than 25 MW the Base Nameplate Generating Capacity of an existing electric generating facility already having a nameplate generating capacity of 25 MW or more.

(z) OPRHP: The New York State Office of Parks, Recreation and Historic Preservation.

(aa) Permanent Board: The New York State Board on Electric Generation Siting and the Environment, exclusive of ad hoc members.

(ab) Person: Any individual, corporation, public benefit corporation, political subdivision, governmental agency, municipality, partnership, cooperative association, trust or estate.

(ac) Plain Language: Eighth grade reading level or language which is easily understandable to the lay public to the maximum extent possible.

(ad) Presiding Examiner: A presiding officer appointed by DPS.

(ae) Private Facility Applicant: An Applicant that does not have the power of eminent domain, either directly or indirectly; a generation facility developer partnering or intending to partner with an industrial development agency or public authority for the acquisition of any land

for the facility or the Interconnections has an indirect power of eminent domain for the purposes of this definition; a generation facility developer selling or intending to sell electric power, capacity or ancillary services to an industrial development agency or public authority does not have an indirect power of eminent domain for the purposes of this definition.

(af) PSL: The Public Service Law.

(ag) Public Information Coordinator: An office created within DPS to ensure that the public and interested parties are fully assisted and advised in participating in the Article 10 process.

(ah) Public Involvement Program (PIP): A series of coordinated activities that provides a variety of effective public participation opportunities by which public concerns can be identified as early as possible throughout the various stages of the decision-making process, ensures communication between stakeholders and an applicant, and results in education of the public as to the specific proposal and the Article 10 process.

(ai) Public Rights of Way: The entire area within the property boundary lines of those strips of land held in county, city, town or village ownership for the use of all of the public upon which county, city, town or village roadways, highways or streets are built and maintained for the passage of motorized vehicles.

(aj) Related Facilities: The interconnections, all offsite ancillary facilities, and all onsite and offsite ancillary equipment, including mobile or movable equipment, associated with the Major Electric Generating Facility.

(ak) Revision: An amendment of an application or Certificate proposing or authorizing a change in the major electric generating facility likely to result in any significant increase in any environmental impact of such facility or a substantial change in the location of all or a portion of such facility as determined by the Board; not including the shifting of a wind turbine, access road or electric collector line to a new location within a 500 foot radius of the original location provided such change does not significantly increase impacts on sensitive resources or decrease compliance with setback and similar requirements.

(al) Revocation: Termination of the rights granted in a Certificate.

(am) Secretary: The Secretary to the Commission.

(an) Stakeholders: Those persons who may be affected or concerned by any issues within the Board's jurisdiction relating to the proposed major electric generating facility and any decision being made about it.

(ao) State Actions Not for the Construction or Operation of the

Proposed Major Electric Generating Facility: State action requirements that remain subject to state approval processes outside of the Article 10 process and may also require state agency compliance with the State Environmental Quality Review Act (SEQRA), including Commission approvals of incorporations and franchises, financings and transfers pursuant to PSL §§ 68, 69 & 70; the overt grant of property rights or other privileges that would require an affirmative action by a state agency or authority; approvals for the subdivision of land in the Adirondack Park where the APA has subdivision jurisdiction; and other similar approvals.

(ap) State Procedural Requirements: State agency or authority administrative process requirements, including application, hearing, permit approval, and other similar requirements.

(aq) State Substantive Requirements: State agency or authority substantive standards set by law or regulation, and other similar requirements, including, for the sake of an example, the wetlands weighing standards set forth in 6 NYCRR, Part 663.

(ar) Study Area: An area generally related to the nature of the technology and the setting of the proposed site. In highly urbanized areas, the study area may be limited to a one-mile radius from the property boundaries of the facility site, interconnections, and alternative location sites. For large facilities or wind power facilities with components spread across a rural landscape, the study area shall generally include the area within a radius of at least five miles from all generating facility components, interconnections and related facilities and alternative location sites. For facilities in areas of significant resource concerns, the size of a study area shall be configured to address specific features or resource issues.

(as) Suspension: Temporary deprivation of some or all of the rights granted in a Certificate.

.SO DOC 16C-1000.3 NYCRR

1000.3 Adoption of procedures by reference.

Unless a provision of PSL Article 10, Section 306 of the State Administrative Procedure Act, or this Part conflicts therewith, the Rules of Procedure of the Public Service Commission (contained in Subchapter A of Chapter I of this Title) that are in force on the effective date of this Part shall apply in connection with each certification proceeding under PSL Article 10. When such regulations indicate that the Commission is the decision maker, such reference shall be deemed to apply to the Board.

.SO DOC 16C-1000.4 NYCRR

1000.4 Public involvement.

(a) To ensure throughout the Article 10 process that the Board is fully aware of the concerns of stakeholders and that the Board's consideration of an application is not delayed, it is the Board's policy to require applicants to actively seek public participation throughout the planning, pre-application, certification, compliance, and implementation process. It is also the Board's policy to encourage stakeholders to participate at the earliest opportunity in the review of the applicant's proposal so that their input can be considered.

(b) To ensure that the public and interested parties are fully assisted and advised in participating in the Article 10 process, an office of public information coordinator has been created within DPS. Public information coordination shall include:

- (1) implementing measures that assure public participation in matters before the Board;
- (2) responding to inquiries from the public for information on how to participate in matters before the Board;
- (3) assisting the public in requesting records relating to matters before the Board;
- (4) ensuring all interested persons are provided with a reasonable opportunity to participate at public meetings relating to matters before the Board;
- (5) ensuring that all necessary or required documents are available for public access on the DPS website; and
- (6) any other duties as may be prescribed by the Board, after consultation with DPS.

(c) Each Applicant shall conduct a Public Involvement Program that includes:

- (1) consultation with the affected agencies and other stakeholders;
- (2) pre-application activities to encourage stakeholders to participate at the earliest opportunity;
- (3) activities designed to educate the public as to the specific proposal and the Article 10 review process, including the availability of funding for municipal and local parties;
- (4) the establishment of a website to disseminate information to the public;
- (5) notifications; and
- (6) activities designed to encourage participation by stakeholders in the certification and compliance process.

(d) Applicants shall submit a proposed Public Involvement Program plan in writing to DPS for review as to its adequacy at least 150 days prior to the submittal of any preliminary scoping statement, except that for

good cause shown upon motion, the Secretary may reduce the minimum number of days to less than 150. An applicant's obligations regarding public involvement commence with this requirement. The plan shall indicate the steps the applicant commits to take to inform, engage, and solicit input from the local community, general public, and other stakeholders, including a schedule indicating when the steps will be taken. The plan shall also identify:

(1) any language other than English spoken according to United States Census data by 5,000 or more persons residing in any 5-digit zip code postal zone in which any portion of such zone is located within the Study Area for the facility; and

(2) any language other than English spoken by a significant population of persons residing in close proximity to the proposed facility, alternative locations and interconnections not captured by paragraph (1) of this subdivision.

(e) DPS shall have 30 days after the date of the Applicant's submittal to make written comments on the adequacy of the Public Involvement Program plan. If deemed inadequate, DPS, in its comments, shall make specific written recommendations as to what measures are necessary to make the Public Involvement Program plan adequate. Thereafter, the Applicant shall within 30 days consider the measures recommended by DPS and, in a final written Public Involvement Program plan filed with the Secretary, shall as to each specific measure either revise the Public Involvement Program plan to incorporate the DPS recommendation, or provide a written explanation as to why the Applicant is not incorporating the DPS recommendation.

(f) The Public Involvement Program plan for any potential application likely to require one or more consultations with operators of airports or heliports pursuant to Subdivision (f) of Section 1001.25 shall include as a component of the plan outreach to such operators to preliminarily inform them of the proposed facility and its location prior to the submission of the preliminary scoping statement.

.SO DOC 16C-1000.5

NYCRR

1000.5 Pre-application procedures.

(a) This Section applies to the required preliminary scoping statement and any stipulation setting forth an agreement on any aspect of the preliminary scoping statement and/or the methodology or scope of the studies or program of studies to be conducted in support of the application. It provides for consultation between the Applicant, the public, affected agencies, and other stakeholders.

(b) Applicants are required to consult with the public, affected

agencies, and other stakeholders (providing information to and effective opportunities for input from the public, affected agencies, and other stakeholders concerning the proposal).

(c) No less than 90 days before the date on which an Applicant files an application, the Applicant shall file an electronic copy and ten paper copies of a preliminary scoping statement with the Board by filing it with the Secretary at the Albany, New York Offices of the DPS and shall serve copies specifying thereon the date on or about which the preliminary scoping statement is to be filed, as follows:

(1) four paper copies on DEC at its central office and three paper copies on each affected DEC regional office;

(2) two paper copies each on the commissioner of health, the chair of the New York State Energy Research and Development Authority, and the commissioner of economic development;

(3) one paper copy each on the chief executive officer of each municipality in which any portion of such facility is to be located as proposed or in any alternative location listed;

(4) one paper copy each on Ag&Mkts, DOS, the attorney general, the department of transportation, and OPRHP;

(5) one paper copy each on a library serving the district of each member of the state legislature in whose district any portion of the facility is to be located as proposed or in any alternative location listed;

(6) one paper copy on the APA if such facility or any portion thereof as proposed or in any alternative location listed is located within the Adirondack park, as defined in subdivision one of section 9-0101 of the ECL;

(7) one electronic copy on the public information coordinator (for placement on the DPS website); and

(8) one paper copy on the chief executive officer of any other agency or municipality that would (absent PSL Article 10) have approval authority with respect to any aspect of the proposed facility or interconnections necessary to serve the proposed facility.

(d) No less than three days before the date on which an applicant files a preliminary scoping statement, notice shall be given by the applicant to all persons residing in each municipality in which any portion of the facility is proposed to be located and in which any alternative location identified is located, and each other municipality that would (absent PSL Article 10) have approval authority with respect to any aspect of the proposed facility, interconnections or related facilities necessary to serve the proposed facility. Notice shall be

given by the publication of a summary of the preliminary scoping statement in such newspaper or newspapers, including local community and general circulation newspapers, as will serve substantially to inform the public of such preliminary scoping statement and proposal, in plain language, in English and in any other language spoken according to the most recent United States Census data available by 5,000 or more persons residing in any 5-digit Zip code postal zone in which any portion of such zone is located within the Study Area for the facility. The notice and summary of the preliminary scoping statement shall describe:

- (1) the proposed facility and its location;
- (2) the range of potential environmental and health impacts of the construction and operation of the facility and of each pollutant that will be emitted or discharged by the facility;
- (3) the application and review process;
- (4) the amount of pre-application funds available for municipal and local parties; and
- (5) shall designate a contact person, with telephone number, e-mail address and mailing address, from whom information will be available on a going-forward basis as well as contact information for the public information coordinator and DPS website.

The notice and summary of the preliminary scoping statement shall also include a statement advising the public how and where persons wishing to receive all notices concerning the proposed facility can file a request with the Secretary to subscribe to receive such notices, including but not limited to notices regarding any proposed pre-application stipulations, and explaining how to utilize the DPS website to access electronic documents concerning the proposed facility.

(e) No less than three days before the date on which an applicant files a preliminary scoping statement, the applicant shall also serve a copy of the notice/summary of the preliminary scoping statement upon (1) each member of the state legislature in whose district any portion of such facility is proposed to be located or in which any alternative location identified is located, or in which any interconnections or related facilities necessary to serve the proposed facility are proposed to be located; (2) in New York City, upon the Borough President of any affected borough, and upon the Community Board of any affected areas served by a Community Board; and (3) persons who have filed a statement with the secretary within the past twelve months that they wish to receive all such notices concerning proposed or alternate facilities for a particular area or municipality.

(f) The filing of the preliminary scoping statement with the Secretary

shall be accompanied by proof of (a) service of the required copies of the preliminary scoping statement on the persons and entities required to be served enumerated above; (b) service of the required notice of preliminary scoping statement on the persons and entities required to be served enumerated above; and (c) proof of publication of the required notice of preliminary scoping statement.

(g) Within 21 days after the filing of the preliminary scoping statement, any person, agency or municipality may submit comments on the preliminary scoping statement by serving such comments on the applicant and filing a copy with the secretary. Within 21 days after the closing of the comment period, the applicant shall prepare a summary of the material comments and its reply thereto, and file and serve its summary of comments and its reply in the same manner as it files and serves the preliminary scoping statement pursuant to Subdivision (c) of this section.

(h) Upon the filing of a preliminary scoping statement, DPS shall designate a presiding examiner. DPS may also designate additional hearing examiners to assist the presiding examiner in all duties of the presiding examiner.

(i) The presiding examiner shall, among other duties, mediate any issue(s) relating to any aspect of the preliminary scoping statement and the methodology or scope of any study or program of studies concerning which agreement has not been reached and receive any stipulation setting forth any agreement that is reached. If the presiding examiner determines that any language other than English not captured by subdivision (d) of this section is spoken by a significant population of persons residing in close proximity to the proposed facility, alternative locations, interconnections and related facilities and that notice in such additional languages is warranted under the circumstances, the presiding examiner may require the applicant to publish the notice and summary of the preliminary scoping statement in such additional languages. The presiding examiner shall, within no less than 22 days but no more than 60 days of the filing of a preliminary scoping statement, convene a meeting of interested parties in order to initiate the stipulation process.

(j) After the presiding examiner has determined that funds to assure early and effective public involvement have been allocated to municipal and local parties, the applicant may commence stipulations consultations and seek agreement by stipulation with any interested person, agency or municipality including, but not limited to, the staff of DPS, DEC, and DOH, as appropriate, as to any aspect of the preliminary scoping

statement and the methodology or scope of any study or program of studies made or to be made to support the application. Before any such stipulation is finalized:

(1) a copy of the proposed stipulation shall be served by the applicant on the presiding examiner and on the persons who participated in the stipulations consultation process, and shall be filed and served by the applicant in the same manner as it files and serves the preliminary scoping statement pursuant to Subdivision (c) of this section;

(2) the applicant shall serve a copy of a notice it has prepared summarizing the contents of the proposed stipulation upon:

(i) each member of the state legislature in whose district any portion of such facility is proposed to be located or in which any alternative location identified is located, or in which any interconnections or related facilities necessary to serve the proposed facility are proposed to be located; and

(ii) persons who have filed a statement with the secretary within the past twelve months that they wish to receive all such notices concerning facilities in the area in which any portion of such facility is proposed to be located or in which any alternative location identified is located, or in which any interconnections or related facilities necessary to serve the proposed facility are proposed to be located;

(3) a copy of a proposed notice shall be prepared by the Applicant and served by the Applicant on the presiding examiner. Thereafter, the presiding examiner shall arrange for the public to be given notice and afforded a reasonable opportunity to submit comments on the stipulation before it may be executed by the interested parties.

(k) Any party that executed a pre-application stipulation may not raise objections at the hearing as to the methodology or scope of any study or program of studies performed in compliance with such stipulation. Any other party may timely raise objections at the hearing as to the methodology or scope of any study or program of studies performed in compliance with such stipulation.

(l) The preliminary scoping statement shall contain:

(1) as much information as is reasonably available concerning the proposed facility, generally in the form (though in less detail) that it will appear in the application;

(2) a preliminary scope of an environmental impact analysis containing a brief discussion, on the basis of reasonably available information, of the following items:

(i) a brief description of the proposed facility and its environmental

setting;

(ii) potentially significant adverse environmental and health impacts resulting from the construction and operation of the proposed facility including also an identification of particular aspects of the environmental setting that may be affected, including any material impacts or effects identified in consultations by the public, affected agencies, and other stakeholders, and a responsive analysis by the Applicant as to those issues identified in consultations;

(iii) the extent and quality of information needed for the application to adequately address and evaluate each potentially significant adverse environmental and health impact, including existing and new information where required, and the methodologies and procedures for obtaining the new information;

(iv) for proposed wind-powered facilities, proposed or on-going studies during pre-construction activities and a proposed period of post-construction operations monitoring for potential impacts to avian and bat species;

(v) a description of how the applicant proposes to avoid adverse impacts to the environment and health;

(vi) for those adverse environmental and health impacts that cannot be reasonably avoided, an identification of measures proposed to mitigate such impacts;

(vii) where it is proposed to use petroleum or other back-up fuel for generating electricity, a discussion and/or study of the sufficiency of the proposed on-site fuel storage capacity and supply;

(viii) a description and evaluation of reasonable and available alternative locations for the proposed facility, including a description of the comparative advantages and disadvantages of the proposed and alternative locations, except that a private facility applicant may limit its description and evaluation of alternative locations to parcels owned by, or under option to, such private facility applicant or its affiliates;

(ix) if the proposed facility affects any land or water use or natural resource of the coastal area and federal authorization or funding is necessary, a preliminary analysis of the consistency of the proposed facility with the enforceable policies of the New York State coastal management program or, where the action is in an approved local waterfront revitalization program area, with the local program;

(x) a statement of the reasons why the primary proposed location and source, taking into account the potentially significant and adverse environmental impacts, is best suited, among the alternatives, including

a "no action" alternative, to promote public health and welfare, including the recreational and other concurrent uses that the site may serve, except that a private facility applicant may limit its description and evaluation of alternative locations to parcels owned by, or under option to, such private facility applicant or its affiliates and its description and evaluation of alternative sources to those that are reasonable alternatives to the proposed facility that are feasible considering the objectives and capabilities of the sponsor;

(xi) a preliminary identification of the demographic, economic and physical attributes of the community in which the facility is proposed to be located and in which any alternative location identified is located, and a preliminary environmental justice evaluation of significant and adverse disproportionate environmental impacts of the proposed facility and any alternative facility identified that would result from construction and operation considering, among other things, the cumulative impact of existing sources of emissions of air pollutants and the projected emission of air pollutants from the proposed or alternative facility in a manner that is in accordance with any requirements for the contents of an Article 10 preliminary scoping statement contained in 6 NYCRR Part 487 promulgated by the DEC for the analysis of environmental justice issues; and

(xii) an identification of any other material issues raised by the public and affected agencies during any consultation and the response of the applicant to those issues.

(3) an identification of all other state and federal permits, certifications, or other authorizations needed for construction, operation or maintenance of the proposed facility;

(4) a list and description of all state laws and regulations issued thereunder applicable to the construction, operation or maintenance of the proposed facility and a preliminary statement demonstrating an ability to comply;

(5) a list and description of all local laws, and regulations issued thereunder, applicable to the construction, operation, or maintenance of the proposed facility and a statement either providing a preliminary assessment of an ability to comply or indicating specific provisions that the applicant will be requesting the Board to elect not to apply, in whole or in part, and a preliminary explanation as to why the Board should elect not to apply the specific provisions as unreasonably burdensome in view of the existing technology or the needs of or costs to ratepayers whether located inside or outside of such municipality;

(6) a description of the applicant, its formation, status, structure,

holdings, affiliate relationships, powers (including whether it has or will seek to obtain the power of eminent domain, either directly or indirectly), franchises and consents;

(7) a description of the applicant's property rights and interests or those it proposes to acquire to all lands of the proposed facility and any private or public lands or private or public streets, highways or rights-of-way crossed by any interconnections necessary to serve the facility such as, but not limited to, electric lines, gas lines, water supply lines, waste water or other sewage treatment facilities, communications and relay facilities, access roads, rail facilities, or steam lines; and

(8) any other information that the Applicant may deem to be relevant.

.SO DOC 16C-1000.6

NYCRR

1000.6 Filing and service of an application.

(a) The Applicant shall file an electronic copy and ten paper copies of the application with the Board by filing it with the Secretary at the Albany, New York Offices of the DPS and shall serve copies specifying thereon the date on or about which the application is to be filed, as follows:

(1) four paper copies on DEC at its central office and three paper copies on each affected DEC regional office;

(2) two paper copies each on the commissioner of health; the chair of the New York State Energy Research and Development Authority, and the commissioner of economic development;

(3) one paper copy each on the chief executive officer of each municipality in which any portion of such facility is to be located as proposed or in any alternative location listed, and in New York City, upon the Borough President of any affected borough, and upon the Community Board of any affected areas served by a Community Board;

(4) one paper copy each on the Ag&Mkts, DOS, the attorney general, the department of transportation, and OPRHP;

(5) one paper copy each on a library serving the district of each member of the state legislature in whose district any portion of the facility is to be located as proposed or in any alternative location listed;

(6) one paper copy on the APA if such facility or any portion thereof as proposed or in any alternative location listed is located within the Adirondack park, as defined in subdivision one of section 9-0101 of the ECL;

(7) one electronic copy on the public information coordinator (for placement on the DPS website); and

(8) one paper copy on the chief executive officer of any other agency or municipality that would (absent PSL Article 10) have approval authority with respect to any aspect of the proposed facility or interconnections or related facilities necessary to serve the proposed facility.

(b) At the beginning of each section of the application, the Applicant shall cite the applicable Section of Part 1001 or 1002 of this Subchapter that is addressed.

(c) The application shall be accompanied by:

(1) the testimony of each expert witness whom the Applicant intends to offer at the hearing, or panels of witnesses required by PSL Section 165, which testimony shall include the qualifications of the witness or panel and specify any portion of the application for which such witness or panel was responsible or supports;

(2) an affidavit of service showing that a copy of the application and accompanying documents were served on all those required to be served;

(3) a copy of the notice required pursuant to Section 1000.7(a) of this Part;

(4) any appropriate motion; and

(5) a statement of the names, addresses, telephone numbers and E-mail addresses of the applicant and its attorney or other representative.

.SO DOC 16C-1000.7

NYCRR

1000.7 Publication and content of notices.

(a) Publication of required notices shall be satisfied by publication both in the newspaper(s) designated for publication of official notices of each municipality in which the proposed or any alternative location site required to be described in the application is located, and in the newspaper of largest circulation in the county(ies) in which the proposed or any such alternative location site is located, except that in the case of an amendment or transfer of a Certificate, the appropriate site is that of the authorized facility. If the notice is intended to fulfill notice requirements for permits to be issued by the DEC pursuant to Federal recognition of State authority, or pursuant to federally delegated or approved authority, in accordance with the Clean Water Act, the Clean Air Act and the Resource Conservation and Recovery Act, and permits pursuant to Section 15-1503, Title 9 of Article 27, and Articles 17 and 19 of the ECL, DEC and the DEC regulations should be consulted for additional requirements.

(b) No less than three days before the date on which an applicant files the application, the applicant shall provide notice to:

(1) all persons residing in each municipality in which any portion of

such facility is proposed to be located, and in which any alternative location identified is located, and each other municipality that would (absent PSL Article 10) have approval authority with respect to any aspect of the proposed facility, interconnections or related facilities necessary to serve the proposed facility, by the publication of a summary of the application, and the date on or about which it will be filed, in such newspaper or newspapers, including local community and general circulation newspapers, as will serve substantially to inform the public of such application, in plain language, in English and in any other language spoken according to United States Census data by 5,000 or more persons residing in any 5-digit Zip code postal zone in which any portion of such zone is located within the Study Area for the facility. Notices published in languages other than English shall be published in newspapers, if any are available, serving the appropriate language community.

(2) each member of the state legislature in whose district any portion of the facility is to be located as proposed or in any alternative location listed; and

(3) persons who have filed a statement with the secretary within the past twelve months that they wish to receive all such notices concerning facilities in the area in which the facility is to be located as proposed or in any alternative location listed.

(c) If the presiding examiner determines that any language other than English not captured by paragraph (1) of subdivision (b) of this section is spoken by a significant population of persons residing in close proximity to the proposed facility, alternative locations, interconnections or related facilities and that notice in such additional languages is warranted under the circumstances, the presiding examiner may require the applicant to publish the notice and summary of the application in such additional languages.

(d) Notices shall be:

(1) in display format; and

(2) in no smaller than 10 point type or, if only smaller type is available, in the largest type that is available.

(e) The notice(s) shall include:

(1) a summary of the application describing the proposed facility, its location, and the range of potential environmental and health impacts of the construction and operation of the facility and of each pollutant that will be emitted or discharged by the facility;

(2) a map(s) at a size and level of detail appropriate to substantially inform the public of the location of the proposed site and

any alternative location sites listed as reasonable and available in the application, unless the publishing newspaper determines that inclusion of a map is infeasible;

(3) the date on or about which the application will be filed;

(4) a statement that a copy of the application will be served on the Chief Executive Officer of each municipality in which any portion of a site required to be shown pursuant to paragraph (2) hereof is located;

(5) a statement that the application, when filed, may be examined during normal business hours at the Offices of the DPS in Albany, New York, giving the address thereof, and at specified public locations in the vicinity of the proposed site;

(6) text explaining the application and review process including the funding process for municipal and local parties and the availability of funds for municipal and local parties;

(7) text informing the public how and where persons wishing to receive all notices concerning the proposed facility can file a statement with the secretary to subscribe to receive such notices;

(8) text explaining how to access from the DPS website electronic documents concerning the Board's review of the proposed facility;

(9) except where the applicant is a private applicant, a statement that PSL Article 10 permits the Board to authorize a location for the facility different from the location(s) described in the notice;

(10) the names, addresses, telephone numbers and E-mail addresses of a representative of the applicant and contact information for the public information coordinator and DPS website;

(11) if a water quality certification pursuant to Section 401 of the Federal Clean Water Act will be requested from the Board as part of the application, a brief explanation of the reasons for such request; and

(12) If a coastal consistency concurrence is required by Section 307 of the federal Coastal Zone Management Act, a brief explanation of the status of the applications for federal authorization and a DOS consistency determination.

(f) If an alternative to the applicant's proposal that was not listed as reasonable and available in the application is subsequently proposed by any party, the applicant shall give prompt notice of such alternative, unless the presiding examiner rules that such alternative is not reasonable and available or that further notice is unnecessary to substantially inform the public of the location of the proposed alternative. The notice shall include text and a map(s) at a size and level of detail to substantially inform the public of the alternative (unless the publishing newspaper determines that inclusion of a map is

infeasible) and the name, address, telephone number and the E-mail address of a representative of the party proposing such alternative from whom further information can be obtained.

(g) At any significant point in the certification process, the presiding examiner may require the applicant to publish a notice, as described in this Section, containing appropriate information, such as:

(1) a brief description of the significant events in the certification proceeding that have occurred and those that are expected to occur;

(2) a statement that the record of the proceeding may be examined during normal business hours at the Offices of the DPS in Albany, New York, giving the address thereof, and, where the presiding examiner has so required, at specified public locations in the vicinity of the proposed site; and

(3) a statement that any person may file comments for the Board's consideration.

(h) The Board, Secretary or Presiding Examiner may require an applicant to publish a notice of a public hearing or oral argument in such newspaper(s) and at such times as will serve to inform the general public of that hearing or oral argument.

(i) The applicant shall promptly notify the Presiding Examiner or the Secretary upon discovery of any inadvertent failure of publication or service of a notice or application under this Subchapter. The Presiding Examiner or the Secretary shall take such action as may be necessary to ensure fair treatment of a person aggrieved by such inadvertent failure.

(j) If the Presiding Examiner determines that any notice required in this Section was not sufficient to substantially inform potentially affected persons, the Presiding Examiner shall specify any additional steps that are necessary.

(k) Prior to the publication of any notice required by the Board, the Presiding Examiner, the Secretary, or these regulations, the applicant may submit a copy of its proposed notice to the Secretary or to the Presiding Examiner for approval.

(1) The applicant shall promptly file with the Secretary proof of the publication of any required notice.

.SO DOC 16C-1000.8

NYCRR

1000.8 Water quality and coastal certification procedures.

(a) In accordance with Section 401 of the Clean Water Act, if construction or operation of a proposed major electric generating facility, its interconnections, or related facilities would result in any discharge into the navigable water of the United States and require a federal license or permit, the applicant is required to request and

obtain a Water Quality Certification indicating that the proposed activity will be in compliance with water quality standards.

(1) Generally, the request for the Water Quality Certification shall be submitted accompanying the Article 10 application. However, in the event the related application for a Federal license or permit has not been submitted on or before the date of submission of the Article 10 application, the request for the water quality certification shall be submitted to the Board when an application for a Federal license or permit is made. If the request does not accompany the Article 10 application, the applicant shall provide a statement describing its plan for making such a request, including a timetable.

(2) A copy of all pertinent state and Federal permit applications related to the Water Quality Certification shall be submitted along with the request for the Water Quality Certification.

(3) In support of any request for a Water Quality Certification, an applicant shall demonstrate compliance with the provisions referenced in 6 NYCRR Section 608.9. A request for a Water Quality Certification will not be considered valid until the applicant files with the Secretary a copy of its related federal permit application.

(4) Any applicant that applies for a federal license or permit that will require a Water Quality Certification shall provide the pertinent contact information for the district engineer of the U.S. Army Corps of Engineers or other federal lead agency to use in contacting the Board as to the applicable time period or any other issue.

(5) When an applicant or certificate holder has requested both a Water Quality Certification from the Board and permits from the U.S. Army Corps of Engineers or other federal lead agency, the Board or a designee will provide information to the district engineer or other federal lead agency as to whether circumstances require a period of time longer than the period specified in applicable federal regulations for the certifying agency to act on the request for certification in order to avoid a waiver. The Board shall issue, waive or deny such Certification within such applicable period after the filing of the application or other document in which the request is made, taking into account whether any federal agency from which the applicant or certificate holder has sought a license or permit to conduct any activity that may result in any discharge into the navigable waters has:

(i) advised the Board that such Certification must either be issued or denied within a specified shorter period or be waived; or

(ii) determined that such Certification may either be issued or denied within a specified longer period, not to exceed one year (based on

information provided by a designee of the Board), or be waived.

(6) If it appears that the review of a request for a Water Quality Certification cannot be completed within the applicable period identified in paragraph (a)(5) of this section, the Board or a designee will deny the Certification without prejudice to a later request for Certification.

(7) The DPS Director of the Office of Energy Efficiency and the Environment is designated to act as the designee referenced in this section.

(8) If the request for a Water Quality Certification does not accompany an application, it shall be filed and served and notice of it shall be given in the same manner as an application pursuant to sections 1000.6 and 1000.7 of this subchapter. If the request for a Water Quality Certification is filed after the issuance of the Article 10 Certificate, and such request proposes changes of a nature that litigated issues would need to be reopened, such request shall be treated as a request also for a revision of the Article 10 Certificate.

(b) If the proposed facility affects any land or water use or natural resource of the coastal area and federal authorization or funding is necessary, the applicant shall, contemporaneously with submitting the application, submit to DOS copies of the application, the applicant's coastal consistency certification and necessary data and information sufficient to initiate a review by DOS pursuant to the federal Coastal Zone Management Act and its regulations.

(1) The hearing shall be used to elicit, and the hearing record in the proceedings shall provide, information on which the Secretary of State may base the determination of whether or not to concur with the applicant's coastal consistency certification.

(2) The Secretary of State may use procedures established in the Article 10 proceeding to the extent that they are consistent with the federal Coastal Zone Management Act and its implementing regulations to facilitate the required concurrence. The Secretary of State is encouraged to provide such determination to the Board prior to its decision whether or not to issue a Certificate.

(c) If the proposed facility affects any land or water use or natural resource of the coastal areas and inland waterways, the Board invites DOS, pursuant to Article 42 of the Executive Law, to review, evaluate and issue recommendations and opinions to the Board concerning the potential for the proposal to affect such coastal areas and inland waterways, and policies related thereto.

1000.9 Additional information.

(a) Upon the request or direction of the Board, the Chairperson of the Board or the presiding examiner, the applicant shall submit such additional information as may be reasonably required to reach a decision on any specified issue.

(b) Upon the motion of any party, the applicant may be required to provide additional information relevant and material to the proceeding.

A party making a motion under this subdivision shall:

- (1) clearly state the additional information sought;
- (2) establish its relevance and materiality;
- (3) to the best of its ability, demonstrate that the information can be obtained in a timely manner consistent with the need to conduct the proceeding in an expeditious fashion; and
- (4) set forth any other reasons why such information should be supplied by the applicant.

.SO DOC 16C-1000.10

NYCRR

1000.10 Fund for municipal and local parties.

(a) Pre-Application Provisions

(1) Each pre-application preliminary scoping statement shall be accompanied by an intervenor fee in an amount equal to \$350.00 for each 1,000 kilowatts of generating capacity of the subject facility, but no more than \$200,000.00.

(2) All intervenor fees submitted with each preliminary scoping statement and application, as well as any intervenor fee required to be submitted when a pre-application scoping statement or application is amended, shall be deposited in an intervenor account, established pursuant to Section 97-kkkk of the State Finance Law.

(3) Following the filing of a preliminary scoping statement, the Presiding Examiner or the Secretary shall issue a notice of availability of pre-application intervenor funds providing a schedule and related information describing how interested members of the public may apply for pre-application funds. Requests for pre-application funds shall be submitted to the presiding examiner not later than 30 days after the issuance of the notice of the availability of pre-application intervenor funds.

(4) An initial pre-application meeting to consider fund requests shall be convened within no less than 45 days but no more than 60 days of the filing of a preliminary scoping statement. At any pre-application meeting that may be held to consider fund requests, participants should be prepared to discuss their funding applications and the award of funds. Participants are encouraged to consider the consolidation of

requests with similar funding proposals of other participants.

(5) If the pre-application preliminary scoping statement is substantially modified or revised subsequent to its filing, the Board may require an additional pre-application intervenor fee in an amount not to exceed \$25,000.00. In such circumstances, the presiding examiner may make awards of the additional funds, on an equitable basis, in relation to the potential for such awards to make an effective contribution to review of the preliminary scoping statement, thereby providing early and effective public involvement.

(6) Each request for pre-application funds shall be filed with the Secretary and submitted to the presiding examiner, with copies to other interested persons, as identified by the Secretary or presiding examiner.

(7) The presiding examiner shall reserve at least 50% of the pre-application funds for potential awards to municipalities.

(8) Following receipt of initial requests for pre-application funds, the presiding examiner shall expeditiously make an initial award of pre-application funds, and thereafter may make additional awards of pre-application funds, in relation to the potential for such awards to make an effective contribution to review of the preliminary scoping statement, thereby encouraging early and effective public involvement.

(9) The presiding examiner shall award funds on an equitable basis to participants during the pre-application phase whose requests comply with the provisions of this section, provided use of the funds will make an effective contribution to review of the preliminary scoping statement, and thereby provide early and effective public involvement.

(10) Subject to the availability of funds, the presiding examiner may fix additional dates for submission of fund requests.

(11) On a quarterly basis, unless otherwise required by the presiding examiner, any person receiving an award of funds shall submit to the presiding examiner, and file with the Secretary, a report:

- (i) detailing an accounting of the monies that have been spent; and
- (ii) showing:
 - (a) the results of any studies and a description of any activities conducted using such funds;
 - (b) whether the purpose for which the funds were awarded has been achieved; or
 - (c) if the purpose for which the funds were awarded has not been achieved, whether reasonable progress toward the goal for which the funds were awarded is being achieved and why further expenditures are warranted.

(12) All disbursements from the pre-application intervenor account to any person shall be made by the Department of Public Service upon audit and warrant of the Comptroller of the State on vouchers approved by the Chairperson or a designee. All such vouchers must include a description and explanation of all expenses to be reimbursed.

(b) Application Provisions

(1) Each application shall be accompanied by an intervenor fee in an amount:

(i) equal to \$1,000 for each 1,000 kilowatts of capacity, but no more than \$400,000.00, and

(ii) for facilities that will require storage or disposal of fuel waste byproduct, an additional intervenor fee of \$500.00 for each 1,000 kilowatts of capacity, but no more than an additional \$50,000.00, shall be deposited in the intervenor account.

(2) If an amendment of an application is determined by the Chairperson to be a revision as defined in this Part, the application will require substantial additional scrutiny and the applicant shall submit an additional intervenor fee, in the amount equal to \$1,000 for each 1,000 kilowatts of capacity of the proposed project, as amended, but no more than \$75,000.00. The presiding examiner may, however, increase the level of the additional intervenor fee that shall be submitted, up to the maximum level of \$75,000 if the presiding examiner finds circumstances require a higher level of intervenor funding in order to ensure an adequate record for review of the revision to the application.

(3) Following an applicant's publication of notice of filing a PSL Article 10 application, the presiding examiner or secretary shall issue a notice of availability of application intervenor funds providing a schedule and related information describing how municipal and local parties may apply for application funds. Requests for application funds shall be submitted to the presiding examiner within 30 days after the issuance of the notice of the availability of application intervenor funds.

(4) The presiding examiner shall award funds during the application phase on an equitable basis to municipal and local parties whose requests comply with the provisions of this section, so long as use of the funds will contribute to a complete record leading to an informed decision as to the appropriateness of the site and the facility and will facilitate broad participation in the proceeding.

(5) The presiding examiner shall reserve at least 50% of the intervenor funds for potential awards to municipalities.

(6) Any municipality or local party (except an applicant) may request

funds from the intervenor account to defray expenses for expert witness, consultant, administrative or legal fees (other than in connection with judicial review).

(7) Each request for application funds shall be filed with the Secretary and submitted to the presiding examiner, with copies provided to all other parties.

(8) At any pre-hearing conference that may be held to consider fund requests, the parties should be prepared to discuss their funding applications and the award of funds. Parties are encouraged to consider the consolidation of requests with similar funding proposals of other participants.

(9) Subject to the availability of funds, the presiding examiner may fix additional dates for submission of fund requests.

(10) On a quarterly basis, unless otherwise required by the presiding examiner, any party receiving an award of funds shall submit to the presiding examiner and file with the Secretary a report:

- (i) detailing an accounting of the monies that have been spent; and
- (ii) showing:

- (a) the results of any studies and a description of any activities conducted using such funds;

- (b) whether the purpose for which the funds were awarded has been achieved; if the purpose for which the funds were awarded has not been achieved; whether reasonable progress toward the goal for which the funds were awarded is being achieved; and why further expenditures are warranted.

(11) Disbursement of Funds

(i) All disbursements from the application intervenor account to any party shall be made by the Department of Public Service upon audit and warrant of the Comptroller of the State on vouchers approved by the Chairperson or a designee. All such vouchers must include a description and explanation of all expenses to be reimbursed.

(ii) All vouchers must be submitted for payment not later than six months after any withdrawal of an application or the Board's final decision on an application (including a decision on rehearing, if applicable).

(iii) Following withdrawal or final Board decision on an application, any funds that have not been disbursed shall be returned to the applicant.

(c) General Provisions

(1) Each request for funds shall contain:

- (i) a statement of the number of persons and the nature of the

interests the requesting party represents;

(ii) a statement of the availability of funds from the resources of the requesting party and from other sources and of the efforts that have been made to obtain such funds;

(iii) the amount of funds being sought;

(iv) to the extent possible, the name and qualifications of each expert to be employed, or at a minimum, a statement of the necessary professional qualifications;

(v) if known, the name of any other interested person or entity who may, or is intending to, employ such expert;

(vi) a detailed statement of the services to be provided by expert witnesses, consultants, attorneys, or others (and the basis for the fees requested), including hourly fee, wage rate, and expenses, specifying how such services and expenses will contribute to the compilation of a complete record as to the appropriateness of the site and facility;

(vii) if a study is to be performed, a description of the purpose, methodology and timing of the study, including a statement of the rationale supporting the methodology and timing proposed, including a detailed justification for any proposed methodology that is new or original explaining why pre-existing methodologies are insufficient or inappropriate;

(viii) a statement as to the result of any effort made to encourage the applicant to perform any proposed studies or evaluations and the reason it is believed that an independent study is necessary; and

(ix) a copy of any contract or agreement or proposed contract or agreement with each expert witness, consultant or other person.

(2) If the matter has not been assigned to a presiding examiner, the Secretary shall act as an interim examiner until a presiding examiner has been assigned to the matter.

.SO DOC 16C-1000.11

NYCRR

1000.11 Assistance with documents.

For good cause shown to the presiding examiner (or, if none, the Secretary), the Board will reproduce and serve documents filed by non-applicant municipal and local parties and provide such parties access to transcripts.

.SO DOC 16C-1000.12

NYCRR

1000.12 Evidence and proof.

(a) Evidence

(1) The presiding examiner shall require parties proposing to litigate issues in the proceeding to provide a list of specific issues they propose to litigate, in advance of or at an issues conference, along

with a sufficient explanation of why litigation is necessary for each such issue. All issues to be litigated must be relevant. Issues and evidence are relevant if they assist the Board in making the required findings pursuant to PSL Section 168(2) and the required determinations pursuant to PSL Section 168(3) including the considerations required by PSL Section 168(4).

(2) All evidence submitted must be relevant and material. Evidence is material if it has the reasonable potential to affect the outcome of the Board's findings or determinations under PSL Section 168.

(3) Although relevant, evidence may be excluded if its value as proof is substantially outweighed by a potential for unfair prejudice, confusion of the issues, undue delay, or it is needlessly repetitious or duplicative. The presiding examiner may also preclude irrelevant, repetitive, redundant or immaterial evidence and irrelevant or unduly repetitious cross-examination.

(4) All rules of privilege will be observed.

(5) Other rules of evidence need not be strictly applied. Hearsay evidence may be admitted if a reasonable degree of reliability is shown.

(6) Where a part of a document is offered as evidence by one party, any party may offer the entire document as evidence or the presiding examiner may require the entire document to be submitted as evidence.

(7) Any party may move that evidence, including records and documents, in the possession of the DPS, or other public records, be received in evidence in the form of copies or excerpts or by incorporation by reference.

(8) Records or documents incorporated by reference will be available for examination by the parties before being received in evidence.

(9) Briefs and other documents that attempt to persuade through argument are not evidence and may not be entered into the evidentiary record of a proceeding.

(10) Any party may move that official notice be taken of:

(i) facts of which judicial notice could be taken pursuant to Rule 4511 of the Civil Practice Law and Rules; and

(ii) other facts within the specialized knowledge of the Board.

(11) When official notice is taken of a material fact of which judicial notice could not be taken and that does not appear in the evidence in the record, every party will be given notice thereof and will, on timely request, be afforded an opportunity to dispute such fact or its materiality prior to a decision granting or denying a certificate.

(b) Burden of proof

(1) The applicant has the burden of proof to demonstrate that all findings and determinations required by Section 168 of the PSL can be made by the Board, and after the Board's jurisdiction has ceased, that all determinations required by the Commission may be made.

(2) The burden of proof to sustain a motion is on the party making the motion.

(c) Standard of proof.

Whenever factual matters are involved, the party bearing the burden of proof must sustain that burden by a preponderance of the evidence unless a higher standard has been established by statute or regulation.

.SO DOC 16C-1000.13 NYCRR

1000.13 Amendment of an application.

(a) An amendment of an application warrants substantial additional scrutiny within the meaning of PSL Section 164(6) (a) if it is a revision.

(b) If an amendment of an application is determined by the Chairperson to be a revision as defined in this Part, the application will require substantial additional scrutiny and the applicant shall submit an additional intervenor fee, in the amount equal to \$1,000 for each 1,000 kilowatts of capacity of the proposed project, as amended, but no more than \$75,000.00. The presiding examiner may, however, increase the level of the additional intervenor fee that shall be submitted, up to the maximum level of \$75,000 if the presiding examiner finds circumstances require a higher level of intervenor funding in order to ensure an adequate record for review of the revision to the application. Such additional fee shall be awarded and disbursed substantially in accordance with section 1000.10 of this Part.

.SO DOC 16C-1000.14 NYCRR

1000.14 Dismissal of an application.

Whenever, in the absence of any genuine issue as to any material fact, it appears that the statutory requirements for a certificate cannot be met, the Board may dismiss the application seeking such certificate and terminate the proceeding in question upon the motion of any party or upon its own motion.

.SO DOC 16C-1000.15 NYCRR

1000.15 Acceptance of a certificate.

(a) Upon issuance of a final decision by a Board granting a Certificate, an applicant shall, within 30 days after the issuance of such decision, file either a written unqualified acceptance of the Certificate or a petition for rehearing, but not both.

(b) If a petition for rehearing has been granted, an applicant shall,

within 30 days after the issuance of the decision on rehearing, file either a written unqualified acceptance of the certificate (as modified by such decision) or a petition for judicial review, but not both.

(c) If judicial review has been obtained, an applicant shall file a written unqualified acceptance of the certificate within 30 days after either:

- (1) the expiration of the time for judicial review of the court order:
 - (i) enforcing the Board's decision; or
 - (ii) modifying the Board's decision and enforcing it as so modified;

or

(2) any final decision by a Board upon remand for further specific evidence or findings.

(d) A certificate will be vacated unless an applicant has filed a written acceptance in accordance with subdivision (a), (b) or (c) of this section, as the case may be.

(e) Upon the filing of a written acceptance of a certificate following a final decision on an application, rehearing, judicial review or remittal, as the case may be, a Board's jurisdiction with respect to such certificate will cease provided, however, that the permanent Board will retain jurisdiction with respect to the amendment, suspension or revocation of the certificate.

.SO DOC 16C-1000.16

NYCRR

1000.16 Amendment, revocation and suspension of a certificate.

(a) To determine whether a proposed amendment is a revision:

(1) the criteria for determining significance set forth in 6 NYCRR 617.7(c) will apply; and

(2) as appropriate, the staffs of the DPS, the DEC and the DOH shall be consulted.

(b) A certificate holder seeking the amendment of a certificate shall file with the Secretary an electronic copy and ten paper copies of a petition for approval of the amendment of the certificate, together with the accompanying documents described in this subdivision. The certificate holder shall contemporaneously serve four paper copies of the petition and accompanying documents on DEC at its central office and three paper copies on each affected DEC regional office and two paper copies each on the commissioner of health, the chair of the New York State Energy Research and Development Authority, and the commissioner of economic development. The following requirements apply:

(1) The petition shall describe the amendments proposed and the relevant engineering design, performance or operational changes proposed, with supporting documentation to describe the nature of the

changes caused by or related to the amendment.

(2) To the extent appropriate, the certificate holder shall submit the data and information required by this Subchapter that would otherwise be necessary to support an application for a certificate.

(3) Notice of such petition shall be given to, and copies of such petition shall be served on, any person, municipality or agency entitled by law to be given notice, or to receive a copy, of the application for the original certificate;

(4) A copy of such petition shall also be served on any other party to the proceeding in which the original certificate was granted and all property-owners affected by the proposed amendment; and

(5) The notice shall:

(i) briefly describe the proposed amendment and state the reasons therefor;

(ii) give the name, address, telephone number and E-mail address of an employee or representative of the petitioner/applicant from whom further information, including a copy of the petition, may be obtained;

(iii) state that those, in addition to parties to the original certification proceeding, who wish to participate in the proceeding on the amendment must so advise the Secretary within ten days after the giving of such notice; and

(iv) state that any comments on the petition must be received by the Secretary no later than 30 days after the date on which the notice was given.

(6) The petition shall be accompanied by an affidavit of publication and service showing that the required publication and service of documents was accomplished.

(c) If the Secretary determines that a proposed amendment is a revision as defined in this Part, the Board will hold a hearing following the procedures set forth in this Subchapter for applications.

(d) Any commenting party shall file one electronic copy of its comments with the Secretary.

(e) The Permanent Board may, following the procedures in subdivisions (f) and (g) of this section, amend or suspend a certificate and may, at any time before the date on which the final compliance filing in connection with the authorized facility is deemed approved, revoke a certificate on grounds including, but not limited to:

(1) discovery of materially false or inaccurate statements in the application or supporting documents;

(2) noncompliance with a material term or condition of the certificate or with a provision of the PSL or of this Subchapter; or

(3) discovery of material information that the applicant withheld or misrepresented at the time of the certification proceeding.

(f) If the Permanent Board on its own motion is considering the amendment, revocation or suspension of a certificate, it will, in an Order to Show Cause, set forth the alleged facts that appear to warrant the intended action. The time within which responses may be filed shall not exceed 30 days after the issuance of such Order. Such Order will be served on all parties to the certification proceeding. Any responding party shall, within the time specified in such order:

- (1) file an electronic copy of its comments with the Secretary;
- (2) serve a copy of its comments on all parties to the certification proceeding; and
- (3) file with the Secretary an affidavit showing that service was made.

(g) Notwithstanding the provisions of subdivision (f):

(1) the permanent Board will hold an evidentiary hearing after issuing the Order to Show Cause, if a revision, suspension or revocation is being considered; and

(2) as permitted by Section 401(3) of the State Administrative Procedure Act, the Permanent Board may summarily suspend a Certificate if it finds that public health, safety, or welfare imperatively requires emergency action, and it incorporates such finding in an Order. The summary suspension will be effective on the date specified in such Order or upon service of a certified copy of such Order on the certificate holder, whichever shall be later, pending proceedings for revocation or other action, which proceedings will be promptly instituted and determined.

(h) Upon the complaint of any interested person, DPS shall investigate such complaint and, if the material facts and other available evidence indicate that action may be warranted, forward the complaint with its assessment to the permanent Board for action under subdivisions (f) and (g) of this Section.

.SO DOC 16C-1000.17

NYCRR

1000.17 Transfer of a certificate.

(a) A certificate may only be transferred to a person who agrees to comply with the terms, limitations, or conditions contained therein and in every subsequent Order issued thereunder. A change in the ownership of a certificate holder without a transfer of the responsibility to comply with the terms, limitations, and conditions contained in the certificate is not a transfer of the certificate that requires approval pursuant to this section; however, the certificate holder shall file

written notice of any such change of ownership with the Secretary within 7 days of such change and a verified statement that the change will not adversely affect the ability of the certificate holder to comply with such terms, limitations, or conditions.

(b) A certificate holder seeking the transfer of a certificate shall file with the Secretary an electronic copy and ten paper copies of a petition for approval of the transfer of the certificate, together with the accompanying documents described in this subdivision. The certificate holder shall contemporaneously serve four paper copies of the petition and accompanying documents on DEC at its central office and three paper copies on each affected DEC regional office and two paper copies each on the commissioner of health, the chair of the New York State Energy Research and Development Authority, and the commissioner of economic development. The petition shall:

- (1) state the reasons supporting the transfer;
- (2) show that the transferee is qualified to carry out the provisions of the certificate and any Orders issued thereunder;
- (3) be verified by all parties to the proposed transfer;
- (4) if required by the Chairperson, be accompanied by a copy of any proposed transfer agreement;
- (5) be accompanied by an affidavit of service of a copy of the petition on each of the parties to the certification proceeding; and
- (6) be accompanied by an affidavit of publication of a notice concerning the petition and service of such notice on all property owners that have executed agreements to convey property rights to the applicant and all other persons, municipalities or agencies entitled by law to be given notice of, or to be served with a copy of, any application to construct a major electric generating facility, which notice shall:

- (i) briefly describe the proposed transfer and state the reasons therefor;
- (ii) give the name, address, telephone number and E-mail address of an employee or representative of the petitioner from whom further information, including a copy of the petition, may be obtained; and
- (iii) state that any comments on the petition must be received by the Secretary no later than 30 days after the date on which the notice was given.

(c) If no party to the proceeding opposes such petition within the time for filing comments, the Chairperson, after consultation with the other members of the Permanent Board, shall have exclusive jurisdiction without further notice to grant or deny the petition, grant the petition

upon such terms and conditions as deemed appropriate, or conduct such further investigation as deemed necessary.

(d) If a party to the proceeding opposes such petition within the time for filing comments, the Board, or the Permanent Board after the Board's jurisdiction has ceased, shall have jurisdiction without further notice to grant or deny the petition, grant the petition upon such terms and conditions as it deems appropriate, or conduct such further investigation as it deems necessary.

.SO DOC 16C-1000.18 NYCRR

1000.18 Counsel to the board.

The counsel to the Commission shall be counsel to the Board for all purposes, unless the Board determines otherwise.

.SO DOC 16C-1001.1 NYCRR

1001.1 General requirements.

(a) Each application for a certificate shall contain the exhibits described by this Part as relevant to the proposed major electric generating facility technology and site and such additional exhibits and information as the Applicant may consider relevant or as may be required by the Board or the Presiding Examiner. Exhibits that are not relevant to the particular application may be omitted.

(b) Each exhibit shall contain a title page showing:

- (1) the applicant's name;
- (2) the title of the exhibit; and
- (3) the proper designation of the exhibit.

(c) Each exhibit consisting of 10 or more pages of text shall contain a table of contents citing by page and section number or subdivision the component elements or matters contained in the exhibit.

(d) In collecting, compiling and reporting data required by this Part, the applicant shall establish a basis for a statistical comparison with data which shall subsequently be obtained under any program of post-certification monitoring.

(e) If the same information is required for more than one exhibit, it may be supplied in a single exhibit and referenced in the other exhibit(s) where it is also required.

(f) Exhibit 1 shall contain:

- (1) the name, address, telephone number, facsimile number, and E-mail

address of the applicant;

(2) the address of a website established by the applicant to disseminate information to the public regarding the application;

(3) the name, address, telephone number, facsimile number, and E-mail address of a person provided by the applicant that the public may contact for more information regarding the application;

(4) the name, business address, telephone number, facsimile number, and E-mail address of the principal officer of the applicant;

(5) if the applicant desires service of documents or other correspondence upon an agent, the name, business address, telephone number, facsimile number, and E-mail address of the agent;

(6) a brief explanation of the type of business entity that the applicant is, including its date and location of formation and the name and address of any parent entities; and

(7) if the facility is to be owned by a corporation, a certified copy of the charter of such corporation; if the facility is not to be owned by a corporation, a copy of the certificate or other documents of formation.

.SO DOC 16C-1001.2

NYCRR

1001.2 Exhibit 2: Overview and public involvement.

Exhibit 2 shall not exceed 15 pages of text, except that for good cause shown, the Secretary may increase the page limit. Exhibit 2 shall contain:

(a) A brief description of the major components of the proposed facility, interconnections and related facilities.

(b) A brief summary of the contents of the application.

(c) A brief description of the public involvement program conducted by the applicant prior to submission of the application and an identification of significant issues raised by the public and affected agencies during such program and the response of the applicant to those issues including a summary of changes made to the proposal as a result of the public involvement program.

(d) A brief description of the public involvement program to be conducted by the applicant after submission of the application.

(e) A brief, clearly and concisely written overall analysis in plain language that assembles and presents relevant and material facts regarding the proposed project upon which the applicant proposes that the Board makes its decision. The analysis shall be analytical and not encyclopedic and shall specifically address each required finding, determination and consideration the Board must make or consider in its decision pursuant to Section 168 of the PSL and explain why the

applicant believes that the requested Certificate can be granted.

.SO DOC 16C-1001.3

NYCRR

1001.3 Exhibit 3: location of facilities.

Exhibit 3 shall contain:

Maps, drawings and explanations showing the location of the proposed major electric generating facility, all interconnections, and all ancillary features not located on the facility site such as roads, railroads, switchyards, fuel or energy storage or regulation facilities, solid waste disposal areas, waste treatment and disposal facilities, and similar facilities, in relation to municipalities (county, city, town and village) and taxing jurisdictions associated with any part of the overall development proposal. Such maps, drawings and explanations shall include:

(a) New York State Department of Transportation or USGS maps (1:24,000 topographic edition), showing:

(1) the proposed location of the major electric generating facility and any reasonable and available alternative location sites required to be identified, including electric transmission line and fuel gas transmission line interconnections that are not subject to review under Article VII of the PSL, and including ancillary features located on the facility site such as roads, railroads, switchyards, fuel or energy storage or regulation facilities, solid waste disposal areas, waste treatment and disposal facilities, and similar facilities;

(2) the proposed location of any interconnections, including all offsite electric transmission lines, fuel gas transmission lines, fuel oil transmission lines, water supply lines, wastewater lines, communications lines, steam lines, stormwater drainage lines, and appurtenances thereto, to be installed in New York State connecting to and servicing the site of a major electric generating facility that are not subject to the Commission's jurisdiction under PSL Article VII;

(3) the location of all proposed ancillary features not located on the facility site such as roads, railroads, switchyards, fuel or energy storage or regulation facilities, solid waste disposal areas, waste treatment and disposal facilities, and similar facilities, that are not subject to the Board's jurisdiction under PSL Article 10;

(4) the proposed location of any electric transmission line and fuel gas transmission line interconnections that are subject to review under Article VII of the PSL, and that are not subject to the Board's jurisdiction under PSL Article 10; and

(5) a study area for the proposed facility generally related to the nature of the technology and the setting of the proposed site. In highly

urbanized areas, the study area may be limited to a one-mile radius from the property boundaries of the facility site, interconnections, and alternative location sites. For large facilities or wind power facilities with components spread across a rural landscape, the study area shall include the area within a radius of at least five miles from all facility components, interconnections and related facilities and alternative location sites. For facilities in areas of significant resource concerns, the size of a study area shall be configured to address specific features or resource issues.

(b) Maps clearly showing the location of the proposed facility site, any reasonable and available alternative location sites required to be identified, the interconnections, and all ancillary features not located on the facility site in relation to municipal boundaries, taxing jurisdictions, designated neighborhoods or community districts, at a scale sufficient to determine and demonstrate relation of facilities to those geographic and political features.

(c) Written descriptions explaining the relation of the location of the proposed facility site, any reasonable and available alternative location sites required to be identified, the interconnections, and all ancillary features not located on the facility site to the affected municipalities, taxing jurisdictions, designated neighborhoods or community districts.

.SO DOC 16C-1001.4

NYCRR

1001.4 Exhibit 4: land use.

Exhibit 4 shall contain:

(a) A map showing existing land uses within the study area.

(b) A map of any existing overhead and underground major facilities for electric, gas or telecommunications transmission within the study area.

(c) Except for wind power facilities, a map of all properties upon which any component of the major electric generating facility or the related facilities would be located, and all properties adjoining such properties, that shows the current land use, tax parcel number and owner of record of each property, and any publicly known proposed land use plans for any of these parcels. For wind power facilities, a map of all properties upon which any component of the major electric generating facility or the related facilities would be located, and all properties within 2,000 feet of such properties, that shows the current land use, tax parcel number and owner of record of each property, and any publicly known proposed land use plans for any of these parcels.

(d) A map of existing zoning districts, and proposed zoning districts

within the study area, including a description of the permitted and the prohibited uses within each zone.

(e) A statement as to whether the municipality has an adopted comprehensive plan and whether the proposed land use is consistent with such comprehensive plan. If the municipality's comprehensive plan is posted on a website, the exhibit shall contain the address of the internet site where the plan is posted.

(f) A map of all publicly known proposed land uses within the study area, gleaned from interviews with state and local planning officials, from the public involvement process, or from other sources.

(g) Maps showing designated coastal areas, inland waterways and local waterfront revitalization program areas; groundwater management zones; designated agricultural districts; flood-prone areas; and critical environmental areas designated pursuant to the State Environmental Quality Review Act.

(h) Maps showing recreational and other land uses within the study area that might be affected by the sight, sound or odor of the construction or operation of the facility, interconnections and related facilities, including Wild, Scenic and Recreational River Corridors, open space, and any known archaeological, geologic, historical or scenic area, park, designated wilderness, forest preserve lands, scenic vistas specifically identified in the Adirondack Park State Land Master Plan, conservation easement lands, scenic byways designated by the federal or state governments, nature preserves, designated trails, and public-access fishing areas; major communication and utility uses and infrastructure; and institutional, community and municipal uses and facilities; including a summary describing the nature of the probable environmental impact of facility and interconnection construction and operation on such uses, including an identification of how such impact is avoided or, if unavoidable, minimized or mitigated. Given the provisions of §304 of the National Historic Preservation Act, 9 NYCRR §427.8, and §15 of the Public Service Law, information about the location, character, or ownership of a cultural resource shall not be disclosed to the public, and shall only be disclosed to the parties to a proceeding pursuant to an appropriate protective order if a determination is made that disclosure may:

- (1) cause a significant invasion of privacy;
- (2) risk harm to the affected cultural resource; or
- (3) impede the use of a traditional religious site by practitioners.

(i) A qualitative assessment of the compatibility of the facility and any interconnection, including any off-site staging and storage areas,

with existing, proposed and allowed land uses, and local and regional land use plans, within a 1-mile radius of the facility site and any interconnection route. The qualitative assessment shall include an evaluation of the short- and long-term effects of facility-generated noise, odor, traffic and visual impacts on the use and enjoyment of those areas for the current and planned uses. The assessment shall identify the nearby land uses of particular concern to the community, and shall address the land use impacts of the facility on residential areas, schools, civic facilities, recreational facilities, and commercial areas.

(j) A qualitative assessment of the compatibility of above-ground interconnections and related facilities with existing, potential, and proposed land uses within the study area.

(k) A qualitative assessment of the compatibility of underground interconnections and related facilities with existing, potential, and proposed land uses within 300 feet from the centerline of such interconnections or related facilities.

(l) For projects at locations within designated coastal areas, or in direct proximity of designated inland waterways, provide an analysis of conformance with relevant provisions of the Coastal Zone Management Act, and proposed or adopted plans for inland waterways and local waterfront revitalization areas.

(m) Aerial photographs of all properties within the study area of such scale and detail to enable discrimination and identification of all natural and cultural features.

(n) Overlays on aerial photographs which clearly identify the facility site and any interconnection route, the limits of proposed clearing or other changes to the topography, vegetation or man-made structures, and the location of access and maintenance routes.

(o) All aerial photographs shall reflect the current situation. All aerial photographs shall indicate the photographer and the date photographs were taken.

(p) A description of community character in the area of the proposed facility, an analysis of impacts of facility construction and operation on community character, and identification of avoidance or mitigation measures that will minimize adverse impacts on community character. For the purposes of this paragraph, community character includes defining features and interactions of the natural, built and social environment, and how those features are used and appreciated in the community.

.SO DOC 16C-1001.5

NYCRR

1001.5 Exhibit 5: electric system effects.

Exhibit 5 shall contain:

(a) A system reliability impact study, performed in accordance with the open access transmission tariff of the New York Independent System Operator, Inc. (NYISO) approved by the Federal Energy Regulatory Commission, that shows expected flows on the system under normal, peak and emergency conditions and effects on stability of the interconnected system, including the necessary technical analyses (Thermal, Voltage, Short Circuit and Stability) to evaluate the impact of the interconnection. The study shall include the new electric interconnection between the facility and the point of interconnection, as well as any other system upgrades required.

(b) An evaluation of the potential significant impacts of the facility and its interconnection to transmission system reliability at a level of detail that reflects the magnitude of the impacts.

(c) A discussion of the benefits and detriments of the facility on ancillary services and the electric transmission system, including impacts associated with reinforcements and new construction necessary as a result of the facility.

(d) An analysis of any reasonable alternatives that would mitigate adverse reliability impacts and maintain voltage, stability, thermal limitations, and short circuit capability at adequate levels.

(e) An estimate of the increase or decrease in the total transfer capacity across each affected interface, and if a forecasted reduction in transfer capability across affected interfaces violates reliability requirements, an evaluation of reasonable corrective measures that could be employed to mitigate or eliminate said reduction.

(f) A description of criteria, plans, and protocols for generation and ancillary facilities design, construction, commissioning, and operation, including as appropriate to generation technology:

(1) engineering codes, standards, guidelines and practices that apply;
(2) generation facility type certification;
(3) procedures and controls for facility inspection, testing and commissioning; and

(4) maintenance and management plans, procedures and criteria.

(g) If there is a thermal component to the facility the applicant is to provide heat balance diagrams at various load levels and generation configurations demonstrating that the facility is utilizing the best use of heat from the facility.

(h) For wind power and other facilities where it is contemplated that a portion of a new interconnection substation to be built will be transferred to the transmission owner:

(1) describe the substation facilities to be transferred and the contemplated future transaction, including a timetable for the future transfer;

(2) describe how the substation-interconnection design will meet the transmission owner's requirements; and

(3) define the operational and maintenance responsibilities for the substation and how they will meet the transmission owner's standards.

(i) Facility maintenance and management plans, procedures and criteria, specifically addressing the following topics:

(1) turbine maintenance, safety inspections, and tower integrity; and

(2) electric transmission, gathering and interconnect line inspections, maintenance, and repairs, including:

(i) vegetation clearance requirements;

(ii) vegetation management plans and procedures;

(iii) inspection and maintenance schedules;

(iv) notification and public relations for work in public right-of-way; and

(v) minimization of interference with electric and communications distribution systems.

(j) Vegetation management practices for switchyard and substation yards, and for danger trees (trees that due to location and condition are a particular threat to fall on and damage electrical equipment) around stations, specifications for clearances, inspection and treatment schedules, and environmental controls to avoid off-site effects.

(k) If the applicant will entertain proposals for sharing above ground facilities with other utilities (communications, cable, phone, cell phone relays, and similar facilities), criteria and procedures for review of such proposals.

(1) A status report on equipment availability and expected delivery dates for major components including heat recovery steam generators, towers, turbines, transformers, and related major equipment.

(m) A description of the generating facility's black start capabilities, if any.

(n) After Consultation with DPS, NYISO, and the local transmission owners to identify applicable requirements, an identification and demonstration of the degree of compliance with all relevant applicable reliability criteria of the Northeast Power Coordinating Council Inc., New York State Reliability Council, and the local interconnecting transmission utility, including any criteria regarding blackstart and fuel switching capabilities.

1001.6 Exhibit 6: wind power facilities.

If the applicant's proposal is for a wind power facility, Exhibit 6 shall contain:

(a) A statement of all setback requirements and/or setback recommendations for turbines from roads, occupied structures (dwellings, commercial, industrial, and institutional), barns and unoccupied structures, areas of public gathering, and electric transmission lines, explaining the rationale for the setback distances for each type, as required or recommended by:

- (1) the manufacturer's specifications;
- (2) the Applicant; and
- (3) any local ordinance or law.

(b) A detailed explanation of the degree to which the Applicant has accommodated in the facility layout the required and/or recommended turbine setbacks required to be stated in subdivision (a) of this section.

(c) Documentation regarding the status and results of third-party review and certification (type and project) of wind turbines proposed for construction and operation at the electric plant.

(d) Wind meteorological analyses demonstrating adequate wind conditions supporting the estimated capacity factor for the facility.

.SO DOC 16C-1001.7 NYCRR

1001.7 Exhibit 7: natural gas power facilities.

If the applicant's proposal is for a gas power facility, Exhibit 7 shall contain:

(a) An estimate of the monthly and hourly gas usage by the facility.

(b) A statement of the gas pressure required for the gas turbines and how the pressure will be regulated or increased.

.SO DOC 16C-1001.8 NYCRR

1001.8 Exhibit 8: electric system production modeling.

Prior to preparing this exhibit, the Applicant shall consult with DPS and DEC to develop an acceptable input data set, including modeling for the Applicant's proposed facility and inputs for the emissions analysis, to be used in the simulation analyses.

Exhibit 8 shall contain:

(a) The following analyses that shall be developed using GEMAPS, PROMOD or a similar computer-based modeling tool:

(1) estimated statewide levels of SO₂, NO_x and CO₂ emissions, both with, and without the proposed facility;

(2) estimated minimum, maximum, and average annual spot prices representative of all NYISO Zones within the New York Control Area, both

with and without the proposed facility;

(3) an estimated capacity factor for the facility;

(4) estimated annual and monthly, on peak, shoulder and off-peak MW output capability factors for the facility;

(5) estimated average annual and monthly production output for the facility in MWhs;

(6) an estimated production curve for the facility over an average year;

(7) an estimated production duration curve for the facility over an average year; and

(8) estimated effects of the proposed facility on the energy dispatch of existing must-run resources, defined for this purpose as existing wind, hydroelectric and nuclear facilities, as well as co-generation facilities to the extent they are obligated to output their available energy because of their steam hosts.

(b) Digital copies of all inputs used in the simulations required in subdivision (a) of this section.

.SO DOC 16C-1001.9

NYCRR

1001.9 Exhibit 9: alternatives.

Exhibit 9 shall contain:

(a) an identification and description of reasonable and available alternate location sites for the proposed facility, except that a private facility applicant may limit its identification and description to sites owned by, or under option to, such private facility applicant or its affiliates;

(b) for each alternative location identified, an evaluation of the comparative advantages and disadvantages of the proposed and alternative locations at a level of detail sufficient to permit a comparative assessment of the alternatives discussed considering:

(1) the environmental setting;

(2) the recreational, cultural and other concurrent uses that the site may serve;

(3) engineering feasibility, including fuel availability, wind availability (if applicable), and interconnections;

(4) reliability and electric system effects;

(5) environmental impacts, including an assessment of climate change impacts (whether proposed energy use contributes to global temperature increase);

(6) economic considerations;

(7) environmental justice considerations;

(8) security, public safety and emergency planning considerations;

- (9) public health considerations;
 - (10) the site's vulnerability to potential seismic disturbances and current and anticipated climate change impacts, such as sea-level rise, precipitation changes, and extreme weather events; and
 - (11) the objectives and capabilities of the applicant;
- (c) a description and evaluation of reasonable alternatives to the proposed facility at the primary proposed location including alternatives regarding:
- (1) general arrangement and design;
 - (2) technology, including alternative power block technologies, air emissions control systems, stack configurations (single flue vs. combined flues), cooling technologies, and alternatives to any proposed use of aqueous ammonia;
 - (3) scale or magnitude;
 - (4) for wind power facilities, alternative layouts of the turbines within the site location; and
 - (5) timing of the proposed in-service date for the facility in relation to other planned additions, withdrawals, or other capacity, transmission or demand reduction changes to the electric system;
- (d) a statement of the reasons why the primary proposed location is best suited, among the alternative locations required to be identified, to promote public health and welfare, including the recreational, cultural and other concurrent uses which the site and affected areas may serve.
- (e) a statement of the advantages and disadvantages of the alternatives and the reasons why the primary proposed design technology, scale or magnitude, and timing are best suited, among the alternatives, to promote public health and welfare, including the recreational, cultural and other concurrent uses that the site may serve.
- (f) a description and evaluation of the no action/no build alternative at the primary proposed location including a statement of the reasons why the proposed facility is better suited to promote public health and welfare including the recreational, cultural and other concurrent uses that the site may serve.
- (g) an identification and description of reasonable energy supply source alternatives including but not limited to alternatives to the proposed facility consisting of renewable generation, distributed generation, transmission, and demand-reducing alternatives, except that an applicant may limit its identification and description to alternatives that are feasible considering the objectives and capabilities of the sponsor or its affiliates;

(h) for each source and demand-reducing alternative identified, an evaluation of the comparative advantages and disadvantages of the proposed facility and the alternatives at a level of detail sufficient to permit a comparative assessment of the alternatives discussed considering:

- (1) engineering feasibility;
 - (2) reliability and electric system effects;
 - (3) environmental impacts, including an assessment of climate change impacts (whether proposed energy use contributes to global temperature increase);
 - (4) economic considerations;
 - (5) environmental justice considerations;
 - (6) security, public safety and emergency planning considerations;
 - (7) public health considerations; and
 - (8) the objectives and capabilities of the applicant;
- (i) a statement of the reasons why the proposed facility is best suited, among the alternative sources and measures, to promote public health and welfare, including the recreational, cultural, and other concurrent uses that the site and affected areas may serve.

.SO DOC 16C-1001.10

NYCRR

1001.10 Exhibit 10: consistency with energy planning objectives.

Exhibit 10 shall contain:

- (a) a statement demonstrating the degree of consistency of the construction and operation of the facility with the energy policies and long range energy planning objectives and strategies contained in the most recent state energy plan including consideration of the information required by subdivisions (b) through (i) in this section;
- (b) a description of the impact the proposed facility would have on reliability in the state;
- (c) a description of the impact the proposed facility would have on fuel diversity in the state;
- (d) a description of the impact the proposed facility would have on regional requirements for capacity;
- (e) a description of the impact the proposed facility would have on electric transmission constraints;
- (f) a description of the impact the proposed facility would have on fuel delivery constraints;
- (g) a description of the impact the proposed facility would have in relation to any other energy policy or long range energy planning objective or strategy contained in the most recent state energy plan;
- (h) an analysis of the comparative advantages and disadvantages of

reasonable and available alternative locations or properties identified for construction of the proposed facility; and

(i) a statement of the reasons why the proposed location and source is best suited, among the alternatives identified, to promote public health and welfare, including minimizing the public health and environmental impacts related to climate change.

.SO DOC 16C-1001.11

NYCRR

1001.11 Exhibit 11: preliminary design drawings.

The preliminary design drawings to be submitted pursuant to this section shall be prepared by a Professional Engineer, Architect or Landscape Architect, as appropriate, licensed and registered in New York State, whose name shall be clearly printed on the drawings. All such drawings may be labeled "preliminary" or "not for construction purposes" to indicate their preliminary status. All such drawings are to be drawn to scale, or to an exaggerated scale, as appropriate. All such drawings are to be drawn using computer graphics or computer-aided design software; hand-drawn sketches and drawings may not be used.

Exhibit 11 shall contain:

(a) A site plan showing all buildings, structures, driveways, parking areas, emergency access lanes, sidewalks, access ways and other improvements at the facility site, depicting the proposed site in relation to adjoining properties, and depicting the layout of onsite facilities and ancillary features. Additional drawings shall be included depicting the layout of all offsite facilities and ancillary features.

(b) A construction operations plan indicating all materials lay-down areas, construction preparation areas, major excavation and soil storage areas, and construction equipment and worker parking areas.

(c) Grading and erosion control plans indicating soil types, depth to bedrock, general areas of cut and fill, retaining walls, initial and proposed contours, and permanent stormwater retention areas.

(d) A landscaping plan indicating areas of trees to be retained, removed, or restored; berms, walls, fences and other landscaping improvements, and areas for snow removal storage.

(e) A lighting plan showing type and location of exterior lighting fixtures and indicating measures to be taken to prevent unnecessary light trespass beyond the facility property line.

(f) Architectural drawings including building and structure arrangements and exterior elevations for all buildings and structures, indicating the length, width, height, material of construction, color and finish of all buildings, structures, and fixed equipment.

(g) Typical design detail drawings of all underground facilities

indicating proposed depth and level of cover, and all overhead facilities indicating height above grade, including descriptions and specifications of all major components including piping, conductors, cooling towers, exhaust stacks, wind turbine towers and blades, and other structures.

(h) For interconnection facilities, the plans and drawings required by subsections (a) through (g) of this Section for the proposed interconnection facilities and a profile of the centerline of the interconnection facilities at exaggerated vertical scale.

(i) A list of engineering codes, standards, guidelines and practices that the applicant intends to conform with when planning, designing, constructing, operating and maintaining the generating facility power plant, wind turbines, electric collection system, substation, transmission line, inter-connection, and associated buildings and structures.

.SO DOC 16C-1001.12

NYCRR

1001.12 Exhibit 12: construction.

Exhibit 12 shall contain:

(a) A preliminary Quality Assurance and Control plan, including staffing positions and qualifications necessary, demonstrating how applicant will monitor and assure conformance of facility installation with all applicable design, engineering and installation standards and criteria.

(b) A statement from a responsible company official that:

(1) that applicant and its contractors will conform to the requirements for protection of underground facilities contained in Public Service Law §119-b, as implemented by 16 NYCRR Part 753; and
(2) the applicant will comply with pole numbering and marking requirements, as implemented by 16 NYCRR Part 217.

(c) Preliminary plans and descriptions indicating design, location and construction controls to avoid interference with existing utility transmission and distribution systems, indicating locations and typical separations of proposed facilities from existing electric, gas, and communications infrastructure and measures to minimize interferences where avoidances cannot be reasonably achieved.

(d) Specification of commitments for addressing public complaints, and procedures for dispute resolution during facility construction and operation.

.SO DOC 16C-1001.13

NYCRR

1001.13 Exhibit 13: real property.

Exhibit 13 shall contain:

(a) A survey of the facility site showing property boundaries with tax map sheet, block and lot numbers; the owner of record of all parcels included in the site and for all adjacent properties; easements, grants and related encumbrances on the site parcels; public and private roads on or adjoining or planned for use as access to the site; zoning and related designations applicable to the site and adjoining properties, except that for wind facilities a map may be used instead of a survey to fulfill this requirement.

(b) A property/right-of-way map of all proposed interconnection facilities and off-property/right-of-way access drives and construction lay-down or preparation areas for such interconnections.

(c) A demonstration that the applicant has obtained title to or a leasehold interest in the facility site, including ingress and egress access to a public street, or is under binding contract or option to obtain such title or leasehold interest, or can obtain such title or leasehold interest.

(d) A statement that the applicant has obtained, or can obtain, such deeds, easements, leases, licenses, or other real property rights or privileges as are necessary for all interconnections for the facility.

(e) An identification of any improvement district extensions necessary for the facility and a demonstration that the applicant has obtained, or can obtain, such improvement district extensions.

.SO DOC 16C-1001.14 NYCRR

1001.14 Exhibit 14: cost of facilities.

Exhibit 14 shall contain:

(a) A detailed estimate of the total capital costs of the proposed facility, including a separately stated estimate for each interconnection, broken down in a rational manner by the Applicant into major cost components appropriate to the facility.

(b) A brief statement of the source of the information used as the basis for the estimates required by subdivision (a) of this section.

(c) Upon the demand of any party or of DPS, the applicant shall supply the work papers from which the estimates required by subdivision (a) of this section were made.

.SO DOC 16C-1001.15 NYCRR

1001.15 Exhibit 15: public health and safety.

Exhibit 15 shall contain:

A statement and evaluation that identifies, describes, and discusses all potential significant adverse impacts of the construction and operation of the facility, the interconnections, and related facilities on the environment, public health, and safety, at a level of detail that

reflects the severity of the impacts and the reasonable likelihood of their occurrence, identifies the current applicable statutory and regulatory framework, and also addresses:

(a) the anticipated gaseous, liquid and solid wastes to be produced at the facility during construction and under representative operating conditions of the facility, including their source, anticipated volumes, composition and temperature, and such meteorological, hydrological and other information needed to support such estimates and any studies, identifying the author and date thereof, used in the analysis;

(b) the anticipated volumes of such wastes to be released to the environment during construction and under any operating condition of the facility;

(c) the treatment processes to eliminate or minimize wastes to be released to the environment;

(d) the manner of collection, handling, storage, transport and disposal for wastes retained and not released at the site, or to be disposed of;

(e) for wind power facilities, impacts due to blade throw, tower collapse, audible frequency noise, low-frequency noise, ice throw and shadow flicker;

(f) maps of the study area and analysis showing relation of the proposed facility site to public water supply resources; community emergency response resources and facilities including police, fire and emergency medical response facilities and plans; emergency communications facilities; hospitals and emergency medical facilities; designated evacuation routes; existing known hazard risks including flood hazard zones, storm surge zones, areas of coastal erosion hazard, landslide hazard areas, areas of geologic, geomorphic or hydrologic hazard; dams, bridges and related infrastructure; explosive or flammable materials transportation or storage facilities; contaminated sites; and other local risk factors;

(g) all significant impacts on the environment, public health, and safety associated with the information required to be identified pursuant to subdivisions a through f of this section, including all reasonably related short-term and long-term effects;

(h) any adverse impact on the environment, public health, and safety that cannot be avoided should the proposed facility be constructed and operated, and measures for monitoring and measuring such impacts;

(i) any irreversible and irretrievable commitment of resources that would be involved in the construction and operation of the facility;

(j) any measures proposed by the applicant to minimize such impacts;

(k) any measures proposed by the applicant to mitigate or offset such impacts; and

(1) any monitoring of such impacts proposed by the applicant.

.SO DOC 16C-1001.16 NYCRR

1001.16 Exhibit 16: pollution control facilities.

(a) If applicable, Exhibit 16 shall contain:

(1) Copies of completed applications for permits to be issued by the DEC pursuant to Federal recognition of State authority, or pursuant to federally delegated or approved authority, in accordance with the Clean Water Act, the Clean Air Act and the Resource Conservation and Recovery Act, and permits pursuant to Section 15-1503, Title 9 of Article 27, and Articles 17 and 19 of the ECL.

(2) Such evidence as shall enable the Commissioner of DEC to evaluate the facility's pollution control technologies and to reach a determination to issue, subject to appropriate conditions and limitations, permits for such technologies.

(3) Such evidence as shall enable the Board to evaluate the facility's pollution control technologies and to make the findings and determinations required by PSL Section 168.

(4) A representation and description of all fuel waste byproducts to be produced as a result of construction and operation of the facility and its interconnections and related facilities, including a description and plan as appropriate for the handling, storage and disposal of all fuel waste byproducts. Ash produced from the combustion or gasification of coal, wood, biomass, municipal solid waste or similar fuels shall be included in the definition of fuel waste byproduct for the purposes of this subdivision.

(b) Following commercial operation of a certified Major Electric Generating Facility, renewal applications for permits to be issued by the DEC pursuant to Federal recognition of State authority, or pursuant to federally delegated or approved authority, in accordance with the Clean Water Act, the Clean Air Act and the Resource Conservation and Recovery Act, and permits pursuant to Section 15-1503, Title 9 of Article 27, and Articles 17 and 19 of the ECL, will be submitted to and acted upon by the DEC without copies being submitted to the Board or findings and determinations being made by the Board.

.SO DOC 16C-1001.17 NYCRR

1001.17 Exhibit 17: air emissions.

If applicable, Exhibit 17 shall contain:

(a) A demonstration of the facility's compliance with applicable federal, state, and local regulatory requirements regarding air

emissions.

(b) An assessment of existing ambient air quality levels and air quality trends for pollutants in the region surrounding the facility, including air quality levels and trends taken from regional air quality summaries and air quality trend reports.

(c) For emissions of the following substances by combustion sources at the facility, a table indicating the rate and amount of emissions with the name of the substance in the first column, the hourly emission rate in the second column, and the annual potential to emit in the third column:

- (1) sulfur dioxide (SO₂);
- (2) oxides of nitrogen (NO_x);
- (3) carbon dioxide (CO₂);
- (4) carbon monoxide (CO);
- (5) particulate matter (PM 2.5, PM 10, total PM);
- (6) volatile organic compounds (VOCs);
- (7) elemental lead;
- (8) mercury; and
- (9) a set of non-criteria (i.e. toxic) pollutants to be emitted from

the proposed facility as determined in consultation with DOH and DEC.

(d) An assessment of the potential impacts to ambient air quality that may result from pollutant emissions from the facility, including:

(1) an estimation of the maximum potential air concentrations (short-term and long-term) of appropriate pollutants determined in consultation with DOH and DEC;

(2) a comparison of the maximum predicted air concentrations to ambient air quality standards and guidelines and ambient background concentrations for non-criteria pollutants for both short-term and long-term exposures for any appropriate pollutant determined in consultation with DOH and DEC;

(3) where warranted as determined in consultation with DOH and DEC, cumulative source impact analyses for any appropriate pollutant in accordance with air permitting requirements and 6 NYCRR Part 487; and

(e) An offsite consequence analysis for any ammonia that shall be stored onsite, including an analysis of an accidental release scenario for ammonia performed to meet the requirements of the U.S. Environmental Protection Agency's regulations implementing Section 112(r) of the Clean Air Act.

.SO DOC 16C-1001.18

NYCRR

1001.18 Exhibit 18: safety and security.

Exhibit 18 shall contain:

(a) A preliminary plan for site security of the proposed facility during construction of such facility, including site plans and descriptions of the following site security features:

- (1) access controls including fences, gates, bollards and other structural limitations;
- (2) electronic security and surveillance facilities;
- (3) security lighting, including specifications for lighting and controls to address work-site safety requirements and to avoid off-site light trespass; and
- (4) setback considerations for facility components which may present hazards to public safety.

(b) A preliminary plan for site security of the proposed facility during operation of such facility, including site plans and descriptions of the following site security features:

- (1) access controls including fences, gates, bollards and other structural limitations;
- (2) electronic security and surveillance facilities;
- (3) security lighting, including specifications for lighting and controls to address work-site safety requirements and to avoid off-site light trespass;
- (4) lighting of facility components to ensure aircraft safety;
- (5) setback considerations for facility components which may present hazards to public safety; and
- (6) a description of a cyber security program for the protection of digital computer and communication systems and networks that support the facility demonstrating compliance with current standards issued by a standards setting body generally recognized in the information technology industry, including, but not limited to, the federal Department of Commerce's National Institute of Standards and Technology, the North American Electric Reliability Corporation, or the International Organization for Standardization, and providing for periodic validation of compliance with the applicable standard by an independent auditor.

(c) A preliminary safety response plan to ensure the safety and security of the local community, including:

- (1) an identification of contingencies that would constitute a safety or security emergency;
- (2) emergency response measures by contingency;
- (3) evacuation control measures by contingency; and
- (4) community notification procedures by contingency.

(d) A statement that the applicant has provided a copy of the plans

required in subdivisions (a), (b), and (c) of this section to, and requested review of such plans and comment by, the New York State Division of Homeland Security and Emergency Services.

(e) If the facility is to be located within any part of a city with a population over one million, a statement that the applicant has provided a copy of the plans required in subdivisions (a), (b), and (c) of this section to, and requested review of such plans and comment by, the local office of emergency management.

(f) A description of all on-site equipment and systems to be provided to prevent or handle fire emergencies and hazardous substance incidents.

(g) A description of all contingency plans to be implemented in response to the occurrence of a fire emergency or a hazardous substance incident.

(h) A statement that the Applicant has provided a copy of the plans required in subdivision (c) of this section to, and requested review of such plans and comment by, local emergency first responders serving the area of the facility site, and a review of any responses received.

.SO DOC 16C-1001.19

NYCRR

1001.19 Exhibit 19: Noise and vibration.

Exhibit 19 shall contain:

A study of the noise impacts of the construction and operation of the facility, related facilities and ancillary equipment. The name and qualifications to perform such analyses of the preparer of the study shall be stated. If the results of the study are certified in any manner by a member of a relevant professional society, the details of such certification shall be stated. If any noise assessment methodology standards are applied in the preparation of the study, an identification and description of such standards shall be stated. The study shall include:

(a) A map of the study area showing the location of sensitive sound receptors in relation to the facility, related facilities and ancillary equipment (including any related substations). The sensitive sound receptors shown shall include residences, outdoor public facilities and areas, hospitals, schools and other noise-sensitive receptors.

(b) An evaluation of ambient pre-construction baseline noise conditions, including A-weighted/dBA sound levels, prominent discrete (pure) tones, at representative potentially impacted noise receptors, using actual measurement data recorded in winter and summer and during day and night as a function of time and frequency using a suitable and suitably calibrated sound level meter (SLM) and octave band frequency spectrum analyzer, or similar equipment. The ambient pre-construction

baseline sound level should be filtered to exclude seasonal and intermittent noise.

(c) An evaluation of future noise levels during construction of the facility and related facilities including predicted A-weighted/dBA sound levels, at potentially impacted and representative noise receptors, using computer noise modeling.

(d) An estimate of the noise level to be produced by operation of the facility, related facilities and ancillary equipment assuming wind-induced background noise or stable atmospheric conditions, as appropriate, and not assuming any attenuation of sound that transiently occurs due to weather or temperature.

(e) An evaluation of future noise levels during operation of the facility, related facilities and ancillary equipment including predicted A-weighted/dBA sound levels, prominent discrete (pure) tones, and amplitude modulated sound, at potentially impacted and representative noise receptors, using computer noise modeling, and an analysis of whether the facility will produce significant levels of low frequency noise or infrasound.

(f) A statement in tabular form of the A-weighted/dBA sound levels indicated by measurements and computer noise modeling at the representative external property boundary lines of the facility and related facilities and ancillary equipment sites, and at the representative nearest and average noise receptors, for the following scenarios:

(1) Daytime ambient noise level - a single value of sound level equivalent to the level of sound exceeded for 90% of the time during the daytime hours (7 am - 10 pm) of a year (L((90))).

(2) Summer nighttime ambient noise level - a single value of sound level equivalent to the level of sound exceeded for 90% of the time during the nighttime hours (10 pm - 7 am) during the summer (L((90))).

(3) Winter nighttime ambient noise level - a single value of sound level equivalent to the level of sound exceeded for 90% of the time during the nighttime hours (10 pm - 7 am) during the winter (L((90))).

(4) Worst case future noise level during the daytime period - the daytime ambient noise level (L((90))), plus the noise level from the proposed new sources modeled as a single value of sound level equivalent to the level of sound exceeded for 10% of the time by such sources under normal operating conditions by such sources in a year (L((10))).

(5) Worst case future noise level during the summer nighttime period - the summer nighttime ambient noise level (L((90))), plus the noise level from the proposed new sources modeled as a single value of sound level

equivalent to the level of sound exceeded for 10% of the time by such sources under normal operating conditions by such sources in a year (L(10)).

(6) Worst case future noise level during the winter nighttime period - the winter nighttime ambient noise level (L(90)), plus the noise level from the proposed new sources modeled as a single value of sound level equivalent to the level of sound exceeded for 10% of the time by such sources under normal operating conditions by such sources in a year (L(10)).

(7) Daytime ambient average noise level - a single value of sound level equivalent to the energy-average ambient sound levels (Leq) during daytime hours (7 am - 10 pm); and

(8) Typical facility noise levels - the noise level from the proposed new sources modeled as a single value of sound level equivalent to the level of the sound exceeded 50% of the time by such sources under normal operating conditions by such sources in a year (L50).

(9) Typical future noise level during the daytime period - the energy-average ambient sound level during daytime hours (Leq), plus the noise level from the proposed new sources modeled as a single value of sound level equivalent to the level of the sound exceeded 50% of the time by such sources under normal operating conditions by such sources in a year (L50).

(g) A description of the noise standards applicable to the facility, including any local requirements, and noise design goals for the facility at representative potentially impacted noise receptors, including residences, outdoor public facilities and areas, hospitals, schools, other noise-sensitive receptors, and at representative external property boundary lines of the facility and related facilities and ancillary equipment sites.

(h) A tabular comparison of the noise standards applicable to the facility, including any local requirements, and noise design goals for the facility, and the degree of compliance indicated by computer noise modeling at the representative external property boundary lines of the facility and related facilities and ancillary equipment sites, and at the representative nearest and average noise receptors.

(i) An identification and evaluation of reasonable noise abatement measures for construction activities, including a description of a complaint-handling procedure that shall be provided during the construction period.

(j) An identification and evaluation of reasonable noise abatement measures for the final design and operation of the facility including

the use of alternative technologies, alternative designs, and alternative facility arrangements.

(k) An evaluation of the following potential community noise impacts: hearing damage (as addressed by applicable Occupational Safety and Health Administration standards); indoor and outdoor speech interference; interference in the use of outdoor public facilities and areas; community complaint potential; the potential for structural damage; and the potential for interference with technological, industrial or medical activities that are sensitive to vibration or infrasound.

(1) A description of post-construction noise evaluation studies that shall be performed to establish conformance with operational noise design goals.

(m) An identification of practicable post-construction operational controls and other mitigation measures that will be available to address reasonable complaints, including a description of a complaint-handling procedure that shall be provided during periods of operation.

(n) The computer noise modeling values used for the major noise-producing components of the facility shall fairly match the unique operational noise characteristics of the particular equipment models and configurations proposed for the facility. The software input parameters, assumptions, and associated data used for the computer modeling shall be provided.

.SO DOC 16C-1001.20

NYCRR

1001.20 Exhibit 20: cultural resources.

Exhibit 20 shall contain:

(a) A study of the impacts of the construction and operation of the facility, interconnections and related facilities on archaeological resources, including:

(1) a summary of the nature of the probable impact on any archaeological/cultural resources identified addressing how those impacts shall be avoided or minimized;

(2) a Phase IA archaeological/cultural resources study for the Area of Potential Effect (APE) for the facility site and any areas to be used for interconnections or related facilities, including a description of the methodology used for such study;

(3) a Phase IB study, if required, as determined in consultation with OPRHP;

(4) where warranted based on Phase I study results as determined in consultation with OPRHP, a Phase II study based on intensive archaeological field investigations shall be conducted to assess the

boundaries, integrity and significance of cultural resources identified in Phase I studies. Phase II shall be designed to obtain detailed information on the integrity, limits, structure, function, and cultural/historic context of an archaeological site, as feasible, sufficient to evaluate its potential eligibility for listing on the State or National Register of Historic Places. The need for and scope of work for such investigations shall be determined in consultation with OPRHP and DPS;

(5) a statement demonstrating that all archaeological materials recovered during the facility cultural resources investigation shall be cleaned, catalogued, inventoried and curated according to New York Archaeological Council standards; that to the extent possible, recovered artifacts shall be identified as to material, temporal or cultural/chronological associations, style and function; and that the facility archaeologists shall provide temporary storage for artifacts until a permanent curatorial facility is identified; and

(6) an Unanticipated Discovery Plan that shall identify the actions to be taken in the unexpected event that resources of cultural, historical, or archaeological importance are encountered during the excavation process. This plan shall include a provision for work stoppage upon the discovery of possible archaeological or human remains. In addition, the plan shall specify the degree to which the methodology used to assess any discoveries follows the most recent Standards for Cultural Resource Investigations and Curation of Archaeological Collections in New York State. Such an assessment, if warranted, shall be conducted by a professional archaeologist, qualified according to the standards of the New York State Archaeological Council.

(b) A study of the impacts of the construction and operation of the facility and the interconnections and related facilities on historic resources, including the results of field inspections and consultation with local historic preservation groups to identify sites or structures listed or eligible for listing on the State or National Register of Historic Places within the viewshed of the facility and within the study area, including an analysis of potential impact on any standing structures which appear to be at least 50 years old and potentially eligible for listing in the State or National Register of Historic Places, based on an assessment by a person qualified pursuant to federal regulation (36 C.F.R. 61).

.SO DOC 16C-1001.21

NYCRR

1001.21 Exhibit 21: geology, seismology and soils.

Exhibit 21 shall contain:

A study of the geology, seismology, and soils impacts of the facility consisting of the identification and mapping of existing conditions, an impact analysis, and proposed impact avoidance and mitigation measures, including:

(a) a map delineating existing slopes (0-3%, 3-8%, 8-15%, 15-25%, 25-35%, 35% and over) on and within the drainage area potentially influenced by the facility site and interconnections;

(b) a proposed site plan showing existing and proposed contours at two-foot intervals, for the facility site and interconnections, at a scale sufficient to show all proposed buildings, structures, paved and vegetative areas, and construction areas;

(c) a description and preliminary calculation of the quantity of cut and fill necessary to construct the facility, including separate calculations for topsoil, sub-soil and rock, and including a plan to identify the presence of invasive species in spoil material and to prevent the introduction and/or spread of invasive species by the transport of fill material to or from the site of the facility or interconnections;

(d) a description and preliminary calculation of the amount of fill, gravel, asphalt, and surface treatment material to be brought in to the facility site and interconnections;

(e) a description and preliminary calculation of the proposed type and amount of cut material or spoil to be removed from the facility site and interconnections;

(f) a description of excavation techniques to be employed;

(g) a delineation of temporary cut or fill storage areas to be employed;

(h) a description of the characteristics and suitability for construction purposes of the material excavated for the facility and of the deposits found at foundation level, including factors such as soil corrosivity, bedrock competence, and subsurface hydrologic characteristics;

(i) a preliminary plan describing all blasting operations including location, minimum blasting contractor qualifications, hours of blasting operations, estimates of amounts of rock to be blasted, warning measures, measures to ensure safe transportation, storage and handling of explosives, use of blasting mats, conduct of a pre-blasting condition survey of nearby buildings and improvements, and coordination with local safety officials;

(j) an assessment of potential impacts of blasting to environmental features, above-ground structures and below-ground structures such as

pipelines and wells;

(k) an identification and evaluation of reasonable mitigation measures regarding blasting impacts, including the use of alternative technologies and/or location of structures, and including a plan for securing compensation for damages that may occur due to blasting;

(l) a description of the regional geology, tectonic setting and seismology of the facility vicinity.

(m) an analysis of the expected impacts of construction and operation of the facility with respect to regional geology, if such can be determined;

(n) an analysis of the impacts of typical seismic activity experienced in the facility area based on current seismic hazards maps, on the location and operation of the facility identifying potential receptors in the event of failure, and if the facility is proposed to be located near a young fault or a fault that has had displacement in Holocene time, demonstration of a suitable setback from such fault;

(o) a map delineating soil types on the facility and interconnections sites;

(p) a description of the characteristics and suitability for construction purposes of each soil type identified above, including a description of the soil structure, texture, percentage of organic matter, and recharge/infiltration capacity of each soil type and a discussion of any de-watering that may be necessary during construction and whether the facility shall contain any facilities below grade that would require continuous de-watering;

(q) maps, figures, and analyses delineating depth to bedrock and underlying bedrock types, including vertical profiles showing soils, bedrock, water table, seasonal high groundwater, and typical foundation depths on the facility site, and any area to be disturbed for roadways to be constructed and all off-site interconnections required to serve the facility, including an evaluation for potential impacts due to facility construction and operation, including any on-site wastewater disposal system, based on information to be obtained from available published maps and scientific literature, review of technical studies conducted on and in the vicinity of the facility, and on-site field observations, test pits and/or borings as available;

(r) an evaluation to determine suitable building and equipment foundations, including:

(1) a preliminary engineering assessment to determine the types and locations of foundations to be employed. The assessment shall investigate the suitability of such foundation types as spread footings,

caissons, or piles, including a statement that all such techniques conform to applicable building codes or industry standards;

(2) if piles are to be used, a description and preliminary calculation of the number and length of piles to be driven, the daily and overall total number of hours of pile driving work to be undertaken to construct the facility, and an assessment of pile driving impacts on surrounding properties and structures due to vibration; and

(3) identification of mitigation measures regarding pile driving impacts, if applicable, including a plan for securing compensation for damages that may occur due to pile driving; and

(s) an evaluation of the vulnerability of the facility site and the operation of the facility to an earthquake event and a tsunami event.

.SO DOC 16C-1001.22

NYCRR

1001.22 Exhibit 22: terrestrial ecology and wetlands.

Exhibit 22 shall contain:

(a) An identification and description of the type of plant communities present on the facility site, the interconnections, and adjacent properties based upon field observations and data collection consistent with the nature of the site and access availability to adjacent properties.

(b) An analysis of the temporary and permanent impact of the construction and operation of the facility and the interconnections on the vegetation identified, including a mapped depiction of the vegetation areas showing the areas to be removed or disturbed, and including a plan to identify the presence of invasive species and to prevent the introduction and/or spread of invasive species.

(c) An identification and evaluation of reasonable avoidance measures or, where impacts are unavoidable, mitigation measures, including the use of alternative technologies, regarding vegetation impacts identified.

(d) A characterization of the facility site and any areas to be disturbed for interconnections as to the vegetation, wildlife (including mammals, birds, amphibians, terrestrial invertebrates, and reptiles) and wildlife habitats, that occur in, on, or in the vicinity, based on reconnaissance or multi-season surveys and data collection appropriate to the nature of the site, supplemented by available data from the New York Natural Heritage Program, New York State (NYS) Amphibian and Reptile Atlas Project, the NYS Breeding Bird Atlas and range maps, Breeding Bird Survey Routes, Christmas Bird Counts and other similar reference sources, including an identification and depiction of any Significant Coastal Fish and Wildlife Habitat Areas designated by

DOS/DEC and any unusual habitats or significant natural communities that could support state or federally listed endangered or threatened species or species of special concern.

(e) A list of the species of mammals, birds, amphibians, terrestrial invertebrates, and reptiles reasonably likely to occur on, or in the vicinity of the facility site and areas to be disturbed for interconnections based on site observations and supplemented by publicly available sources.

(f) An analysis of the impact of the construction and operation, including air emissions if any, of the facility and interconnections on vegetation, wildlife, wildlife habitats, and wildlife travel corridors, including a detailed assessment of direct and indirect impacts and identification and evaluation of the expected environmental impacts of the facility on declining species, Species of Greatest Conservation Need (SGCN), and species protected by State and Federal law and the habitats of such species. Given the provisions of §3-0301(2)(r) of the Environmental Conservation Law and §15 of the Public Service Law, information that identifies the locations of habitats of such species or any other species or unique combination of species of flora or fauna where the destruction of such habitat or the removal of such species therefrom would impair their ability to survive, shall not be disclosed to the public, and shall only be disclosed to the parties to a proceeding pursuant to an appropriate protective order.

(g) An identification and evaluation of reasonable avoidance measures or, where impacts are unavoidable, mitigation measures, including the use of alternative technologies, regarding impacts to vegetation, wildlife and wildlife habitat.

(h) For proposed wind-powered facilities:

(1) an identification and evaluation of the expected environmental impacts of the facility on avian and bat species and the habitats that support them based on information gathered during pre-construction studies conducted at the proposed site and other nearby sites, analysis of known or predicted species and species migration corridors present on site, and including a description of the extent, methodology and results of all such pre-construction studies;

(2) an identification and description of a period of post-construction operations monitoring for potential direct and indirect impacts to avian and bat species and habitats, including a description of the extent, methodology and timing of such post-construction operations monitoring; and

(3) a plan to avoid or, where unavoidable, minimize and mitigate any

such impacts during construction and operation of the facility based on existing information, the results of pre- and post-construction monitoring, and any known post-construction impacts that may occur.

(i) A map showing delineated boundaries based on on-site identification of all federal, state and locally regulated wetlands present on the facility site and within 500 feet of areas to be disturbed by construction, including the interconnections; and predicted presence and extent of wetlands on the remainder of site properties and adjacent properties within 500 feet of areas to be disturbed by construction. For adjacent properties without accessibility, initial surveys may be based on remote-sensing data, interpretation of published wetlands and soils mapping and aerial photography.

(j) A description of the characteristics of all federal, state and locally regulated wetlands delineated as above, including the Cowardin classification, and a description of the vegetation, soils, and hydrology data collected for each of wetland sites identified, based on actual on-site wetland observations.

(k) A qualitative and descriptive wetland functional assessment, including seasonal variations, for all wetlands delineated as above for groundwater recharge/discharge, floodflow alteration, fish and shellfish habitat, sediment/toxicant retention, nutrient removal, sediment/shoreline stabilization, wildlife habitat, recreation, uniqueness/heritage, visual quality/aesthetics, and protected species habitat.

(l) An analysis of all off-site wetlands that may be hydrologically or ecologically influenced by development of the facility site and the wetlands delineated as above, observed in the field where accessible to determine their general characteristics and relationship, if any, to wetlands delineated as above.

(m) An identification of all temporary and permanent impacts on the wetlands or their regulated adjacent areas.

(n) An identification and evaluation of reasonable avoidance measures or, where impacts are unavoidable mitigation measures to be employed regarding the wetlands and adjacent areas impacts, including the use of alternative technologies and control of potential phosphorus and nitrogen sources from the facility. Where appropriate, mitigation shall include plans for compensatory mitigation. Such plans shall contain sections on grading, planting, and monitoring for success.

(o) An identification of state and federal endangered or threatened species on the facility site or that could be subject to impacts from facility construction, operation, or maintenance, including incidental

takings, and an endangered or threatened species mitigation plan.

(p) An invasive species prevention and management plan indicating the presence of invasive species and measures that will be implemented to minimize the introduction of new invasive species and spread of existing invasive species during soil disturbance, vegetation management, transport of materials, and landscaping/revegetation.

(q) An analysis of the temporary and permanent impacts of the construction and operation of the facility and the interconnections on agricultural resources, including the acres of agricultural land temporarily impacted, the number of acres of agricultural land that will be permanently converted to nonagricultural use, and mitigation measures to minimize the impact to agricultural resources.

.SO DOC 16C-1001.23

NYCRR

1001.23 Exhibit 23: water resources and aquatic ecology.

Exhibit 23 shall contain the following with regard to:

(a) Groundwater:

(1) Hydrologic information reporting depths to high groundwater and bedrock, including a site map showing depth to high groundwater and bedrock in increments appropriate for the facility site.

(2) A map based on publicly available information showing all areas within the study area delineating all groundwater aquifers and groundwater recharge areas, and identifying groundwater flow direction, groundwater quality, and the location, depth, yield and use of all public and private groundwater wells or other points of extraction of groundwater, and including delineation of wellhead and aquifer protection zones.

(3) An analysis and evaluation of potential impacts (during normal and drought conditions) from the construction and/or operation of the facility on drinking water supplies, groundwater quality and quantity in the facility area, including potential impacts on public and private water supplies, including private wells within a one mile radius of the facility site, and wellhead and aquifer protection zones.

(b) Surface Water:

(1) A map and identification of all surface waters, including intermittent streams, within the study area.

(2) A description of the New York State listed Water Classification and Standards physical water quality parameters, flow, biological aquatic resource characteristics (including species, habitat, and presence of aquatic invasive species) and other characteristics of such surface waters, including intermittent streams, within the study area.

(3) An identification of any downstream surface water drinking-water

supply intakes within one mile, or if none within one mile, an identification of the nearest one (giving location of the intakes by longitude and latitude) that could potentially be affected by the facility or interconnections, including characterization of the type, nature, and extent of service provided from the identified source.

(4) An analysis of the impact of the construction and operation of the facility and interconnections on such surface waters, including impacts to drinking water supplies, and an identification and evaluation of reasonable avoidance measures and, where impacts are unavoidable, mitigation measures regarding impacts on such surface waters, including the precautions that will be taken to avoid or minimize dredging.

(5) An identification and evaluation of reasonable avoidance measures, and where impacts are unavoidable, mitigation measures, including the use of water storage, stormwater reuse, and offsetting water conservation, regarding groundwater impacts.

(c) Stormwater:

(1) A Stormwater Pollution Prevention Plan (SWPPP) for the collection and management of stormwater discharges from the project prepared in accordance with the applicable SPDES General Permit for Stormwater Discharges from Construction Activity (SPDES General Permit) and the most current version of the New York State Standards and Specifications for Erosion and Sediment Control. If the project is not eligible for coverage under the SPDES General Permit, a completed application for a State Pollutant Discharge Elimination System (SPDES) Permit for the collection and management of stormwater discharges from the project.

(2) To the extent not covered in paragraph (1) above, a preliminary plan, prepared in accordance with the most current version of the New York State Standards and Specifications for Erosion and Sediment Control, that identifies the post construction erosion and sediment practices that will be used to manage stormwater runoff from the developed project site. This can include runoff reduction/green infrastructure practices, water quality treatment practices, and practices that control the volume and rate of runoff.

(d) Chemical and Petroleum Bulk Storage:

(1) A description of the spill prevention and control measures to be in place for ammonia storage, fuel oil storage, wastewater storage, and other chemical, petroleum or hazardous substances stored on site, including an evaluation of alternatives and mitigation measures.

(2) An identification whether the storage of ammonia, fuel oil, wastewater, other chemicals, petroleum or hazardous substances, or disposal of solid wastes on site is subject to regulation under the

State of New York's chemical and petroleum bulk storage programs, and if so, a demonstration of compliance with such regulations.

(3) An identification whether the storage of ammonia, fuel oil, wastewater, other chemicals, petroleum or hazardous substances on site is subject to regulation under local law (County, City, Town or Village), and if so, a demonstration of the degree of compliance with such local laws.

(e) Aquatic Species and Invasive Species:

(1) An analysis of the impact of the construction and operation of the facility on biological aquatic resources, including species listed as endangered, threatened, or species of special concern in 6 NYCRR Part 182, and including the potential for introducing and/or spreading invasive species.

(2) An identification and evaluation of reasonable avoidance measures and, where impacts are unavoidable, mitigation measures regarding impacts on such biological aquatic resources, including species and invasive species impacts (if any) and assure compliance with applicable water quality standards (6 NYCRR Part 703).

(f) Cooling Water:

(1) a description of the proposed cooling water system, including the selected cooling technology, the source of cooling water, the cooling water intake structure location and design, the daily maximum cooling water design flow and all the anticipated construction and operational costs of the cooling water system;

(2) a description of the volume and location of the cooling water discharge, the anticipated maximum discharge temperature and maximum delta T, and a description of the anticipated thermal plume; and

(3) a description of the practices that will be employed to avoid pathogen growth (including legionella), an assessment of whether such practices conform to recommendations of the Cooling Tower Institute, and the identification of any potential biocides to be used in the cooling water system.

(4) a description of the taxonomic identification and life history information of all species and life stages of fish and shellfish potentially susceptible to impingement and entrainment by the proposed cooling water intake structure including the estimated number of all species and life stages to be impinged and entrained.

(5) an identification and evaluation of mitigation measures taken to minimize adverse environmental impacts to aquatic life as a result of the location, design, construction, and capacity of the cooling water intake structure.

1001.24 Exhibit 24: visual impacts.

Exhibit 24 shall contain:

(a) A visual impact assessment (VIA) to determine the extent and assess the significance of facility visibility. The components of the VIA shall include identification of visually sensitive resources, viewshed mapping, confirmatory visual assessment fieldwork, visual simulations (photographic overlays), cumulative visual impact analysis, and proposed visual impact mitigation. The VIA shall address the following issues:

- (1) the character and visual quality of the existing landscape;
 - (2) visibility of the facility, including visibility of facility operational characteristics, such as visible plumes from the exhaust stacks;
 - (3) visibility of all above-ground interconnections and roadways to be constructed within the facility study area as determined by the viewshed analysis;
 - (4) appearance of the facility upon completion, including building/structure size, architectural design, facade colors and texture, and site lighting;
 - (5) lighting (including lumens, location and direction of lights for facility area and/or task use, and safety including worker safety and tall structure marking requirements) and similar features;
 - (6) representative views (photographic overlays) of the facility, including front, side and rear views, indicating approximate elevations;
 - (7) nature and degree of visual change resulting from construction of the facility and above-ground interconnections;
 - (8) nature and degree of visual change resulting from operation of the facility;
 - (9) analysis and description of related operational effects of the facility such as visible plumes, shading, glare, and shadow flicker;
 - (10) proposed mitigation and mitigation alternatives based on an assessment of mitigation strategies, including screening (landscaping), architectural design, visual offsets, relocation or rearranging facility components, reduction of facility component profiles, alternative technologies, facility color and design, lighting options for work areas and safety requirements, and lighting options for stack lighting if required by the Federal Aviation Administration; and
 - (11) a description of all visual resources that would be affected by the facility.
- (b) The viewshed analysis component of the VIA shall be conducted as

follows:

(1) Viewshed maps depicting areas of project visibility within the facility study area shall be prepared and presented on a 1:24,000 scale recent edition topographic base map. A line of sight profile shall also be done for resources of statewide concern located within the VIA study area. The viewshed maps shall provide an indication of areas of potential visibility based on topography and vegetation and the highest elevation of facility structures. The potential screening effects of vegetation shall also be shown. The map(s) shall be divided into foreground, midground and background areas based on visibility distinction and distance zone criteria. Visually-sensitive sites, cultural and historical resources, representative viewpoints, photograph locations, and public vantage points within the viewshed study area shall be included on the map(s) or an overlay. An overlay indicating landscape similarity zones shall be included.

(2) The VIA shall include a detailed description of the methodology used to develop the viewshed maps, including software, baseline information, and sources of data.

(3) The viewshed mapping shall be used to determine the sensitive viewing areas and locations of viewer groups in the facility vicinity. These shall include recreational areas, residences, businesses, historic sites (listed or eligible for listing on the State or National Register of Historic Places), and travelers (interstate and other highway users).

(4) The applicant shall confer with municipal planning representatives, DPS, DEC, OPRHP, and where appropriate, APA in its selection of important or representative viewpoints. Viewpoint selection is based upon the following criteria:

(i) representative or typical views from unobstructed or direct line-of-sight views;

(ii) significance of viewpoints, designated scenic resources, areas or features (which features typically include, but are not limited to: landmark landscapes; wild, scenic or recreational rivers administered respectively by either the DEC or the APA pursuant to ECL Article 15 or Department of Interior pursuant to 16 USC Section 1271; forest preserve lands, scenic vistas specifically identified in the Adirondack Park State Land Master Plan, conservation easement lands, scenic byways designated by the federal or state governments; Scenic districts and scenic roads, designated by the Commissioner of Environmental Conservation pursuant to ECL Article 49 scenic districts; Scenic Areas of Statewide Significance; state parks or historic sites; sites listed on National or State Registers of Historic Places; areas covered by

scenic easements, public parks or recreation areas; locally designated historic or scenic districts and scenic overlooks; and high-use public areas;

(iii) level of viewer exposure, i.e., frequency of viewers or relative numbers, including residential areas, or high volume roadways;

(iv) proposed land uses;

(v) input from local public sources; and

(vi) building/structure data collected for each potentially eligible property prepared in a format acceptable to OPRHP and DPS and submitted to OPRHP and DPS for review prior to completing the viewpoint selection.

(5) Photographic simulations of the facility and interconnections shall be prepared from the representative viewpoints to demonstrate the post-construction appearance of the facility. Where vegetation screening is relied on for project mitigation, leaf-off and leaf-on simulation shall be provided. Representative viewpoints shall be established in consultation with DEC, DPS, OPRHP, and APA where appropriate.

(6) Additional revised simulations illustrating mitigation shall be prepared for those observation points for which mitigation is proposed in the application.

(7) Each set of existing and simulated views of the facility shall be compared and rated and the results of the visual impact assessment shall be summarized. Documentation of the steps followed in the rating and assessment methodology shall be provided including results of rating impact panels and a description of the qualifications of the individuals serving on the panels. Where visual impacts from the proposed facility are identified, potential mitigation measures shall be outlined, and the extent to which they effectively minimize such impact shall be discussed.

(8) As applicable to the proposed facility technology, the analysis shall include analyses of overall appearance and operational characteristics of the facility and related facilities, including stack and cooling tower plume visibility, shading, glare, shadow flicker, or related visible effects of facility operation, including an assessment of the predicted extent, frequency, and duration of any such visible effects created by the facility.

.SO DOC 16C-1001.25

NYCRR

1001.25 Exhibit 25: effect on transportation.

Exhibit 25 shall contain:

(a) A conceptual site plan, drawn at an appropriate scale, depicting all facility site driveway and roadway intersections, showing:

(1) for generation facility sites other than for wind turbines,

horizontal and vertical geometry, the number of approach lanes, the lane widths, shoulder widths, traffic control devices by approaches, and sight distances;

(2) for wind turbine sites, access road locations and widths, including characterizations of road intersection suitability.

(b) A description of the pre-construction characteristics of the roadways in the vicinity of the facility, including:

(1) a review of existing data on vehicle traffic, use levels and accidents;

(2) a review of transit facilities and routes, including areas of school bus service;

(3) an identification of potential approach and departure routes to and from the facility site for police, fire, ambulance and other emergency vehicles;

(4) a review of available load bearing and structural rating information for expected facility traffic routes; and

(5) in congested urbanized areas, the results of twenty-four hour traffic volume counts and peak turning movement counts for typical weekday morning, weekday afternoon, and Saturday peaks, at representative critical intersections.

(c) An estimate of the trip generation characteristics of the facility during both construction and operation, including:

(1) for each major phase of construction, and for the operation phase, an estimate of the number and frequency of vehicle trips, including time of day and day of week arrival and departure distribution, by size, weight and type of vehicle;

(2) an identification of approach and departure routes to and from the facility site out to a 5-mile distance for vehicles carrying water, fuel oil, bulk fuels (including wood, biomass, coal and municipal solid waste), chemicals or hazardous materials for construction or operation of the facility;

(3) for major cut or fill activity (spoil removal or deposition at the facility site and affected interconnection areas), a separate estimate of the number and frequency of vehicle trips, including time of day and day of week arrival and departure distribution, and including a delineation of approach and departure routes, by size, weight and type of vehicle; and

(4) an identification of approach and departure routes to and from the facility site for construction workers and employees of the facility.

(d) An analysis and evaluation of the traffic and transportation impacts of the facility, including:

(1) a comparison of projected future traffic conditions with and without the proposed facility, the analysis to be conducted separately for the peak construction impacts of the facility and for the typical operations of the completed facility, including in congested urbanized areas a calculation and comparison of the level of service for each representative intersection, giving detail for each turning movement;

(2) an evaluation of the adequacy of the road system to accommodate the projected traffic, the analysis to be conducted separately for the peak construction impacts of the facility and for the typical operations of the completed facility, the analysis to also include an identification of the extent and duration of traffic interferences during construction of the facility and any interconnections;

(3) an assessment of over-size load deliveries, and the adequacy of roadway systems to accommodate oversize and over-weight vehicles; improvements necessary to accommodate oversize or overweight deliveries; impacts associated with such improvements; and mitigation measures appropriate to minimize such impacts;

(4) an identification and evaluation of practical mitigation measures regarding traffic and transportation impacts, including time restrictions, the use of alternative technologies, the construction of physical roadway improvements, the installation of new traffic control devices, and the repair of local roads due to damage by heavy equipment or construction activities during construction or operation of the facility; and

(5) a description of all road use and restoration agreements between the applicant and landowners, municipalities, or other entities, regarding repair of local roads damaged by heavy equipment or construction activities during construction or operation of the facility.

(e) An analysis and evaluation of the impacts of the facility on airports and airstrips, railroads, subways, buses and any other mass transit systems in the vicinity of the facility. The analysis and evaluation shall include impacts on military training and frequent military operations in the National Airspace System and Special Use Airspace designated by the Federal Aviation Administration.

(f) If any construction or alteration is proposed that requires a Notice of Proposed Construction to be submitted to the administrator of the Federal Aviation Administration (FAA) in accordance with 14 Code of Federal Regulations, Part 77 pursuant to 49 U.S.C., Section 44718 (generally required for all construction or alteration of more than 200 feet in height above the ground level, and for certain other

construction or alteration near or at civilian public airports and heliports and military airports and heliports or in instrument approach areas as defined by the FAA):

(1) The application shall include a statement that the applicant has:

(i) received an informal Department of Defense review of the proposed construction or alteration in accordance with 32 Code of Federal Regulations, Section 211.7; or

(ii) received a formal Department of Defense review of the proposed construction or alteration in accordance with 32 Code of Federal Regulations, Section 211.6.

(2) If such construction or alteration is proposed to be located:

(i) Within 12 miles of the nearest point of the nearest runway of a commercial service, cargo service, reliever or general aviation (public use) airport or a military airport with at least one runway more than 3,200 feet in actual length; or

(ii) Within 6 miles of the nearest point of the nearest runway of a commercial service, cargo service, reliever or general aviation (public use) airport or a military airport with its longest runway no more than 3,200 feet in actual length; or

(iii) Within 3 miles of the nearest point of the nearest point of the nearest landing and takeoff area of a commercial service, cargo service, reliever or general aviation (public use) heliport or military heliport:

The application shall include a statement that the applicant has consulted with the operators of such airports and heliports that are non-military facilities, has provided a detailed map and description of such construction or alteration to such operators, and has requested review of and comment on such construction or alteration by such operators.

The application shall include a statement that the applicant has provided a detailed map and description of such construction or alteration to the operators (Base Commanders) of such airports and heliports that are military facilities.

(3) The application shall include a detailed description of the responses received in such reviews and consultations required in paragraphs (1) and (2) of this Subdivision, including specifically whether and why such operators believe such construction or alteration should be:

(i) unrestricted;

(ii) subject to site-specific requirements; or

(iii) excluded from certain areas.

1001.26 Exhibit 26: effect on communications.

Exhibit 26 shall contain:

(a) An identification of all existing broadcast communication sources within a two-mile radius of the facility and the electric interconnection between the facility and the point of interconnection, unless otherwise noted, including:

- (1) AM radio;
- (2) FM radio;
- (3) television;
- (4) telephone;
- (5) microwave transmission (all affected sources, not limited to a two-mile radius);
- (6) emergency services;
- (7) municipal/school district services;
- (8) public utility services;
- (9) Doppler/weather radar (all affected sources, not limited to a two-mile radius);
- (10) air traffic control (all affected sources, not limited to a two-mile radius);
- (11) armed forces (all affected sources, not limited to a two-mile radius);

(12) GPS;

(13) LORAN (all affected sources, not limited to a two-mile radius);

and

(14) amateur radio licenses registered to users.

(b) An identification of all existing underground cable and fiber optic major transmission telecommunication lines within a two-mile radius of the facility and the electric interconnection between the facility and the point of interconnection.

(c) A statement describing the anticipated effects of the proposed facility and the electric interconnection between the facility and the point of interconnection on the communications systems required to be identified pursuant to subdivision (a) and (b) of this section, including the potential for:

- (1) structures to interfere with broadcast patterns by re-radiating the broadcasts in other directions;
 - (2) structures to block necessary lines-of-sight;
 - (3) physical disturbance by construction activities;
 - (4) adverse impacts to co-located lines due to unintended bonding; and
 - (5) any other potential for interference.
- (d) An evaluation of the design configuration of the proposed facility

and electric interconnection between the facility and the point of interconnection demonstrating that there shall be no adverse effects on the communications systems required to be identified pursuant to subdivision (a) and (b) of this section.

(e) A description of post-construction activities that shall be undertaken to identify and mitigate any adverse effects on the communications systems required to be identified pursuant to subdivision (a) and (b) of this section that occur despite the design configuration of the proposed facility and electric interconnection between the facility and the point of interconnection.

(f) For wind power facilities, an evaluation of the design configuration of the proposed facility and electric interconnection between the facility and the point of interconnection demonstrating that there shall be no adverse effects on or interference with radar or instrument systems used for air traffic control, guidance, weather, or military operations including training.

.SO DOC 16C-1001.27

NYCRR

1001.27 Exhibit 27: socioeconomic effects.

Exhibit 27 shall contain:

(a) An estimate of the average construction work force, by discipline, for each quarter, during the period of construction; and an estimate of the peak construction employment level.

(b) An estimate of the annual construction payroll, by trade, for each year of construction and an estimate of annual direct non-payroll expenditures likely to be made in the vicinity of the facility (materials, services, rentals, and similar categories) during the period of construction.

(c) An estimate of the annual secondary employment and economic activity likely to be generated in the vicinity of the facility by the construction of the plant. This analysis shall state the basis of any economic multiplier factor or other assumption used.

(d) An estimate of the number of jobs and the on-site payroll, by discipline, during a typical year once the plant is in operation, and an estimate of other expenditures likely to be made in the vicinity of the facility during a typical year of operation.

(e) An estimate of the annual secondary employment and economic activity likely to be generated in the vicinity of the facility by its operation.

(f) An estimate of incremental school district operating and infrastructure costs due to the construction and operation of the facility, this estimate to be made after consultation with the affected

school districts.

(g) An estimate of incremental municipal, public authority, or utility operating and infrastructure costs that will be incurred for police, fire, emergency, water, sewer, solid waste disposal, highway maintenance and other municipal, public authority, or utility services during the construction and operation phases of the facility (this estimate to be made after consultation with the affected municipalities, public authorities, and utilities).

(h) An identification of all jurisdictions (including benefit assessment districts and user fee jurisdictions) that levy real property taxes or benefit assessments or user fees upon the facility site, its improvements and appurtenances and any entity from which payments in lieu of taxes will or may be negotiated.

(i) For each jurisdiction, an estimate of the incremental amount of annual taxes (and payments in lieu of taxes, benefit charges and user charges) it is projected would be levied against the post-construction facility site, its improvements and appurtenances.

(j) For each jurisdiction, a comparison of the fiscal costs to the jurisdiction that are expected to result from the construction and operation of the facility to the expected tax revenues (and payments in lieu of taxes, benefit charge revenues and user charge revenues) generated by the facility.

(k) An analysis of whether all contingency plans to be implemented in response to the occurrence of a fire emergency or a hazardous substance incident can be fulfilled by existing local emergency response capacity, and in that regard identifying any specific equipment or training deficiencies in local emergency response capacity (this analysis to be made after consultation with the affected local emergency response organizations).

(l) A detailed statement indicating how the proposed facility and interconnections are consistent with each of the state smart growth public infrastructure criteria specified in ECL 6-0107, or why compliance would be impracticable.

.SO DOC 16C-1001.28

NYCRR

1001.28 Exhibit 28: environmental justice.

Exhibit 28 shall contain:

(a) An identification and evaluation of significant and adverse disproportionate environmental impacts of the proposed facility, if any, resulting from its construction and operation, including any studies which were used in the evaluation identifying the author and dates thereof, in a manner that is in accordance with any requirements for the

contents of an Article 10 application contained in 6 NYCRR Part 487.

(b) Separately stated for all significant and adverse disproportionate environmental impacts of the proposed facility resulting from its construction and operation required to be identified pursuant to subdivision (a) of this section, a description of:

(1) The specific measures the applicant proposes to take to avoid such impacts to the maximum extent practicable for the duration that the Certificate is granted, including a description of the manner in which such impact avoidance measures will be verified and a statement of the cost of such measures.

(2) If such impacts cannot be avoided, measures the applicant proposes to take to minimize such impacts to the maximum extent practicable for the duration that the Certificate is granted, including a description of the manner in which such impact mitigation measures will be verified and a statement of the cost of such measures.

(3) If such impacts cannot be avoided, the specific measures the applicant proposes to take to offset such impacts to the maximum extent practicable for the duration that the Certificate is in effect, including a description of the manner in which such impact offset measures will be verified and a statement of the cost of such measures.

(c) A qualitative and where possible quantitative analysis demonstrating that the scope of avoidance, mitigation and offset measures is appropriate given the scope of significant and adverse disproportionate environmental impacts of the proposed facility resulting from its construction and operation.

.SO DOC 16C-1001.29

NYCRR

1001.29 Exhibit 29: site restoration and decommissioning.

Exhibit 29 shall contain:

(a) A statement of the performance criteria proposed for site restoration in the event the facility cannot be completed and for decommissioning of the facility, including a discussion of why the performance criteria are appropriate. Among other things, the statement shall address:

- (1) safety and the removal of hazardous conditions;
- (2) environmental impacts;
- (3) aesthetics;
- (4) salvage and recycling;
- (5) potential future uses for the site; and
- (6) the useful life of the facility

(b) A plan for the decommissioning and restoration of the facility site including how such decommissioning and restoration shall be funded

and a schedule for the conduct of decommissioning and site restoration activities.

(c) For wind-powered generation facilities and other facilities to be located on lands owned by another, a description of all site restoration, decommissioning and guaranty/security agreements between the applicant and landowner, municipality, or other entity, including provisions for turbines, foundations, and electrical collection, transmission, and interconnection facilities.

(d) For nuclear power facilities, a plan for a trust fund to ensure:

(1) sufficient funding will be available to decommission the non-radiological portions of the facility and restore the site assuming a reasonable life expectancy for the facility and the commencement of decommissioning upon the cessation of operation of the facility; and

(2) segregation of funds such that radiological decommissioning and site restoration activities do not exhaust funds needed to decommission the non-radiological portions of the facility and to restore the site.

.SO DOC 16C-1001.30

NYCRR

1001.30 Exhibit 30: nuclear facilities.

(a) If the applicant's proposal is for a nuclear power facility, it shall (contemporaneously with the filing of its Article 10 application) file with the Secretary one electronic and two paper copies and shall serve on the Commissioner of DEC one paper copy of its combined license application (including environmental report and preliminary safety analysis report) filed or to be filed with the U.S. Nuclear Regulatory Commission (NRC). If the NRC application is not available at the time the applicant files its Article 10 application, the applicant shall file and serve it as soon as it is available. On a continuing basis, the applicant shall file with the Secretary a copy of:

(1) any filing it makes with the NRC;

(2) any filing it makes with any other governmental entity with respect to its NRC application;

(3) if the filings referenced in paragraphs (1) and (2) of this subdivision were made in response to requests for additional information, such requests; and

(4) any decisions of the NRC with respect to its NRC application.

(b) The applicant shall periodically notify the Secretary and each party of the status of its NRC application.

(c) If a nuclear power facility is proposed, Exhibit 30 shall contain:

Information assessing the impacts on public health, public safety and the environment from radiation or radiological contamination attributable to testing, operation and decommissioning of the nuclear

facility or on-site temporary or permanent storage of spent nuclear fuel and other related radioactive wastes or residue, as well as information assessing emergency planning, except the provision of this information shall not result in litigation in the Article 10 proceeding of any issue solely within the jurisdiction of the NRC.

.SO DOC 16C-1001.31

NYCRR

1001.31 Exhibit 31: local laws and ordinances.

Before preparing the exhibit required by this section, the Applicant shall consult with the municipalities or other local agencies whose requirements are the subject of the exhibit to determine whether the Applicant has correctly identified all such requirements and to determine whether any potential request by the Applicant that the Board elect to not apply any such local requirement could be obviated by design changes to the proposed facility, or otherwise.

As the information to be included in the application pursuant to this section will be used by parties to determine their positions in the issues conference and the remainder of the hearing phase of the proceeding, the lists should be created with care so as not to cause any party to needlessly expend resources due to a misclassification. For local procedural requirements supplanted by PSL §172, the Applicant shall not request that the Board elect not to apply them.

Misclassification of items or the inclusion of unnecessary or inappropriate items may be grounds for finding the application not in compliance. Applicants must carefully screen their lists to correctly reflect local actions not for the construction or operation of the proposed major electric generating facility.

Exhibit 31 shall contain:

(a) A list of all local ordinances, laws, resolutions, regulations, standards and other requirements applicable to the construction or operation of the proposed major electric generating facility (includes interconnection electric transmission lines and fuel gas transmission lines that are not subject to review under Article VII of the PSL) that are of a procedural nature. These local procedural requirements are supplanted by PSL Article 10 unless the Board expressly authorizes the exercise of the procedural requirement by the local municipality or agency.

(b) A list of all local procedural requirements required to be identified pursuant to subdivision (a) of this section for which the Applicant requests that the Board expressly authorize the exercise of the procedural requirement by the local municipality or agency, including a statement why such local exercise would be desirable or

appropriate.

(c) Identification of the city, town, village, county, or State agency qualified by the Secretary of State that shall review and approve the building plans, inspect the construction work, and certify compliance with the New York State Uniform Fire Prevention and Building Code, the Energy Conservation Construction Code of New York State, and the substantive provisions of any applicable local electrical, plumbing or building code. If no other arrangement can be made, the Department of State should be identified. The statement of identification shall include a description of the preliminary arrangement made between the Applicant and the entity that shall perform the review, approval, inspection, and compliance certification, including arrangements made to pay for the costs thereof including the costs for any consultant services necessary due to the complex nature of such facilities. If the applicable city, town or village has adopted and incorporated the New York State Uniform Fire Prevention and Building Code for administration into its local electric, plumbing and building codes, the Applicant may make a request pursuant to subdivision (b) of this section that the Board expressly authorize the exercise of the electric, plumbing and building permit application, inspection and certification processes by such city, town or village.

(d) A list of all local ordinances, laws, resolutions, regulations, standards and other requirements applicable to the construction or operation of the proposed major electric generating facility (includes interconnection electric transmission lines and fuel gas transmission lines that are not subject to review under Article VII of the PSL) that are of a substantive nature, together with a statement that the location of the facility as proposed conforms to all such local substantive requirements, except any that the applicant requests that the Board elect to not apply. Copies of zoning, flood plain and similar maps, tables and/or documents shall be included in the exhibit when such are referenced in such local substantive requirements. Pursuant to PSL § 168(3)(e), the Board must find that the facility is designed to operate in compliance with these local substantive requirements, all of which shall be binding upon the applicant, unless the Board elects to not apply them by finding that, as applied to the proposed facility such are unreasonably burdensome in view of the existing technology or the needs of or costs to ratepayers whether located inside or outside of such municipality.

(e) A list of all local substantive requirements required to be identified pursuant to subdivision (d) of this section for which the

Applicant requests that the Board elect to not apply them by finding that, as applied to the proposed facility such are unreasonably burdensome in view of the existing technology or the needs of or costs to ratepayers whether located inside or outside of such municipality. For each local substantive requirement identified, a statement justifying the request shall be provided. The statement of justification shall show with facts and analysis the degree of burden caused by the requirement, why the burden should not reasonably be borne by the Applicant, that the request cannot reasonably be obviated by design changes to the proposed facility, the request is the minimum necessary, and the adverse impacts of granting the request are mitigated to the maximum extent practicable. The statement shall include a demonstration:

(1) for requests grounded in the existing technology, that there are technological limitations (including governmentally imposed technological limitations) related to necessary facility component bulk, height, process or materials that make compliance by the applicant technically impossible, impractical or otherwise unreasonable;

(2) for requests grounded in factors of costs or economics (likely involving economic modeling), that the costs to consumers associated with applying the local substantive requirement outweigh the benefits of applying such provision; and

(3) for requests grounded in the needs of consumers, that the needs of consumers for the facility outweigh the impacts on the community that would result from refusal to apply the local substantive requirement.

(f) A list of all local ordinances, laws, resolutions, regulations, standards and other requirements applicable to the interconnection to or use of water, sewer, telecommunication and steam lines in public rights of way that are of a procedural nature. These local procedural requirements are not supplanted unless the Board elects to not apply them by finding that, as applied to the proposed facility interconnections such are unreasonably burdensome in view of the existing technology or the needs of or costs to ratepayers whether located inside or outside of such municipality.

(g) A list of all local ordinances, laws, resolutions, regulations, standards and other requirements applicable to the interconnection to or use of water, sewer, telecommunication and steam lines in public rights of way that are of a substantive nature. These local substantive requirements are not supplanted unless the Board elects to not apply them by finding that, as applied to the proposed facility interconnections such are unreasonably burdensome in view of the

existing technology or the needs of or costs to ratepayers whether located inside or outside of such municipality.

(h) A list of all local procedural or substantive requirements required to be identified pursuant to subdivisions (f) and (g) of this section for which the Applicant requests that the Board elect to not apply them by finding that, as applied to the proposed facility interconnections such are unreasonably burdensome in view of the existing technology or the needs of or costs to ratepayers whether located inside or outside of such municipality. For each local procedural or substantive requirement identified, a statement justifying the request shall be provided. The statement of justification shall show with facts and analysis the degree of burden caused by the requirement, why the burden should not reasonably be borne by the Applicant, that the request cannot reasonably be obviated by design changes to the proposed facility, the request is the minimum necessary, and the adverse impacts of granting the request are mitigated to the maximum extent practicable. The statement shall include a demonstration:

(1) for requests grounded in the existing technology, that there are technological limitations (including governmentally imposed technological limitations) related to necessary facility component bulk, height, process or materials that make compliance by the applicant technically impossible, impractical or otherwise unreasonable;

(2) for requests grounded in factors of costs or economics (likely involving economic modeling), that the costs to consumers associated with applying the local substantive requirement outweigh the benefits of applying such provision; and

(3) for requests grounded in the needs of consumers, that the needs of consumers for the facility outweigh the impacts on the community that would result from refusal to apply the local substantive requirement.

(i) A summary table of all local substantive requirements required to be identified pursuant to subdivisions (d) and (g) of this section in two columns listing the provisions in the first column and a discussion or other showing demonstrating the degree of compliance with the substantive provision in the second column.

(j) An identification of the zoning designation or classification of all lands constituting the site of the proposed facility and a statement of the language in the zoning ordinance or local law by which it is indicated that the proposed facility is a permitted use at the proposed site. If the language of the zoning ordinance or local law indicates that the proposed facility is a permitted use at the proposed site subject to the grant of a special exception, a statement of the criteria

in the zoning ordinance or local law by which qualification for such a special exception is to be determined.

.SO DOC 16C-1001.32

NYCRR

1001.32 Exhibit 32: state laws and regulations.

Before preparing the exhibit required by this section, the Applicant shall consult with the state agencies and authorities whose requirements are the subject of the exhibit to determine whether the Applicant has correctly identified all such requirements.

As the information to be included in the application pursuant to this section will be used by parties to determine their positions in the issues conference and the remainder of the hearing phase of the proceeding, the lists should be created with care so as not to cause any party to needlessly expend resources due to a misclassification. Misclassification of items or the inclusion of unnecessary or inappropriate items may be grounds for finding the application not in compliance. Applicants must carefully screen their lists to correctly reflect state actions not for the construction or operation of the proposed major electric generating facility.

Exhibit 32 shall contain:

(a) A list of all state approvals, consents, permits, certificates, or other conditions for the construction or operation of the proposed major electric generating facility (including interconnection electric transmission lines and fuel gas transmission lines that are not subject to review under Article VII of the PSL) of a procedural nature. These state procedural requirements are supplanted by PSL Article 10, except for permits to be issued by the DEC pursuant to Federal recognition of State authority, or pursuant to federally delegated or approved authority, in accordance with the Clean Water Act, the Clean Air Act and the Resource Conservation and Recovery Act, and permits pursuant to Section 15-1503, Title 9 of Article 27, and Articles 17 and 19 of the ECL, unless the Board expressly authorizes the exercise of such authority by the state agency.

(b) A list of all state procedural requirements required to be identified pursuant to subdivision (a) of this section for which the Applicant requests that the Board expressly authorize the exercise of such authority by the state agency, including a statement why such exercise would be desirable or appropriate.

(c) A list of all state approvals, consents, permits, certificates, or other conditions for the construction or operation of the proposed major electric generating facility (including interconnection electric transmission lines and fuel gas transmission lines that are not subject

to review under Article VII of the PSL) of a substantive nature, together with a statement that the facility as proposed conforms to all such state substantive requirements. Pursuant to PSL § 168(3) (e), the Board must find that the facility is designed to operate in compliance with these state substantive requirements, all of which shall be binding upon the applicant.

(d) A summary table of all state substantive requirements required to be identified pursuant to subdivision (c) of this section in two columns listing the provisions in the first column and a discussion or other showing demonstrating the degree of compliance with the substantive provision in the second column.

(e) A list of all state approvals, consents, permits, certificates, or other conditions for the construction or operation of any proposed offsite interconnections and ancillary features that are not encompassed within the definition of Major Electric Generating Facility. These state actions not for the construction or operation of the proposed major electric generating facility are not supplanted by PSL Article 10 and may be state procedural requirements or state substantive requirements.

.SO DOC 16C-1001.33 NYCRR

1001.33 Exhibit 33: other applications and filings.

Exhibit 33 shall contain:

(a) A statement whether the applicant has pending, or knows of others who have pending, with the Commission or with any other governmental department, agency or court of competent jurisdiction (State or Federal), any application or filing which concerns the subject matter of the proceeding before the Board. If any such applications or filings are pending, the applicant shall state, for each such application or filing, whether the granting of any such application or filing will have any effect on the grant or denial of a Certificate, and whether the grant or denial of a Certificate will have any effect upon the grant or denial of any such other application or filing. The applicant shall notify the Secretary, presiding examiner and each party of any significant change in the status of each such application or filing.

(b) The application shall identify any Federal permit, consent, approval or license that will be required for the construction or operation of the facility. The application shall specify the date on which an application for any such approval was made or the estimated date on which it will be made. The applicant shall notify the Secretary, presiding examiner and each party of any significant change in the status of each such application.

.SO DOC 16C-1001.34 NYCRR

1001.34 Exhibit 34: electric interconnection.

Exhibit 34 shall contain:

A detailed description of the proposed electric interconnection including:

- (a) the design voltage and voltage of initial operation;
- (b) the type, size, number and materials of conductors;
- (c) the insulator design;
- (d) the length of the transmission line;
- (e) the typical dimensions and construction materials of the towers;
- (f) the design standards for each type of tower and tower foundation;
- (g) for underground construction, the type of cable system to be used and the design standards for that system;
- (h) for underground construction, indicate on a profile of the line the depth of the cable and the location of any oil pumping stations and manholes;
- (i) equipment to be installed in any proposed switching station or substation including an explanation of the necessity for any such switching station or substation;
- (j) any terminal facility; and
- (k) the need for cathodic protection measures.

.SO DOC 16C-1001.35

NYCRR

1001.35 Exhibit 35: electric and magnetic fields.

Exhibit 35 shall contain:

- (a) For the entire right-of-way of the proposed power line providing the electrical interconnection between the proposed facility and the existing electric transmission and distribution system, identify every right-of-way segment having unique electric and magnetic field (EMF) characteristics due to structure types and average heights, rights-of-way widths, and co-location of other transmission facilities in the right-of-way.
- (b) For each identified right-of-way segment, provide both "base case" and "proposed" cross-sections to scale showing:
 - (1) all overhead electric transmission, sub-transmission and distribution facilities including the proposed facility showing structural details and dimensions and identifying phase spacing, phasing, and any other characteristics affecting EMF emissions;
 - (2) all underground electric transmission, sub-transmission and distribution facilities;
 - (3) all underground gas transmission facilities;
 - (4) all right-of-way boundaries; and
 - (5) structural details and dimensions for all structures (dimensions,

phase spacing, phasing, and similar categories) and include a Station number identifying the location.

(c) A set of the aerial photos/drawings enhanced by showing the exact location of each:

- (1) identified right-of-way segment;
- (2) cross-section; and
- (3) nearest residence or occupied non-residential building in each identified right-of-way segment with a stated measurement of the distance between the edge of right-of-way and the nearest edge of the residence or building.

(d) An EMF study with calculation tables and field strength graphs for each identified right-of-way segment cross-section, as follows:

- (1) the study must be signed and stamped/sealed by a licensed professional engineer registered and in good standing in the State of New York;
- (2) provide the name of the computer software program used to model the facilities and make the calculations;
- (3) regarding electric fields, model the circuits at rated voltage and provide electric field calculation tables and field strength graphs calculated at one meter above ground level with 5 foot measurement intervals depicting the width of the entire right-of-way and out to 500 feet from the edge of the right-of-way on both sides, including digital copies of all input assumptions and outputs for the calculations;
- (4) regarding magnetic fields, model the circuit phase currents equal to the summer normal, summer short term emergency (STE Sum), winter-normal, and winter short term emergency (STE Win) loading conditions and provide magnetic field calculation tables and field strength graphs calculated at one meter above ground level with 5 foot measurement intervals depicting the width of the entire right-of-way and out to 500 feet from the edge of the right-of-way on both sides, including digital copies of all input assumptions and outputs for the calculations;
- (5) regarding magnetic fields, also model the circuit phase currents equal to the maximum average annual load estimated to be occurring on the power lines within ten years after the proposed facility is put in operation and provide magnetic field calculation tables and field strength graphs calculated at one meter above ground level with 5 foot measurement intervals depicting the width of the entire right-of-way and out to 500 feet from the edge of the right-of-way on both sides, including digital copies of all input assumptions and outputs for the calculations; and

(6) regarding magnetic fields, also model a "base case" with the circuit phase currents equal to the maximum average annual load currently estimated to be occurring on the existing power lines within the right-of-way (without construction or operation of the proposed facility) and provide magnetic field calculation tables and field strength graphs calculated at one meter above ground level with 5 foot measurement intervals depicting the width of the entire right-of-way and out to 500 feet from the edge of the right-of-way on both sides, including digital copies of all input assumptions and outputs for the calculations.

.SO DOC 16C-1001.36

NYCRR

1001.36 Exhibit 36: gas interconnection.

If a gas interconnection is proposed for the facility, Exhibit 36 shall contain:

(a) A study of gas supply options, capacity, and system impact, including:

(1) A detailed description of the proposed gas pipeline interconnection, including all interconnecting facilities, pipeline route, size, operating pressure, volume of gas required to serve the facility, the need for new on-site compression, and identifying who shall construct, own and operate the pipeline facilities.

(2) An analysis demonstrating that there shall be sufficient gas supply and gas transmission capacity to support the requirements of the facility.

(3) An estimate of the peak hour, peak day, seasonal and annual natural gas requirements of the facility.

(4) An identification of the nature and extent of the natural gas capacity and transportation service as firm, interruptible, or both.

(5) An evaluation of the potential impacts of the facility on the gas distribution system of the Local Distribution Company (LDC).

(6) A discussion of the impact of the facility use of gas on wholesale supplies and prices in the region using the same transmission facilities as the facility.

(b) A description and preliminary design details for the gas interconnection including:

(1) class criteria for the interconnection pipeline location;

(2) location and design of valves;

(3) a plan for pressure testing of the station piping facilities, indicating applicable code, standards and procedures for testing and release of test medium; and

(4) the need for cathodic protection measures.

1001.37 Exhibit 37: back-up fuel.

If a back-up fuel is proposed for the facility, Exhibit 37 shall contain:

(a) A description of the circumstances under which fuel oil shall be burned in the facility and a description of all onsite facilities and interconnections required for the transportation, storage and combustion of fuel oil, including:

(1) a chemical analysis of the back-up fuel;

(2) an estimate of the rate of fuel oil consumption at full power output;

(3) a description of any fuel oil storage tank(s), including the storage capacity of the tank(s) and a description of any secondary containment structures proposed to be constructed around the tank and off loading areas and any other facilities or measures proposed to prevent, contain or clean up oil spills;

(4) an estimate of the maximum period that the plant could burn oil without refueling;

(5) a description of the proposed method of oil delivery and on site oil delivery infrastructure or offsite interconnections and an estimate of the maximum rate of delivery, given the transportation methods and facilities proposed;

(6) an estimate of the expected frequency and duration of oil firing of the facility and a discussion of the assumptions and analyses used to arrive at this estimate; and

(7) a statement of the number of days of back-up fuel supply to be maintained including a discussion as to whether such number will be sufficient to conform to Commission policies on minimum back-up fuel supply quantities.

(b) If it is proposed to store more than 400,000 gallons of fuel oil at the facility site:

(1) a copy of any Spill Prevention, Countermeasures and Control (SPCC) Plan required pursuant to federal regulations;

(2) an application for a Major Petroleum Facility License pursuant to Article 12 of the Navigation Law, Section 174 (licenses), 17 NYCRR Part 30 (Oil Spill Prevention and Control- Licensing of Major Facilities), 6 NYCRR Part 610 (Certification of Onshore Major Facilities), and 6 NYCRR Parts 612 through 614 (Petroleum Bulk Storage Regulations).

(c) An identification and evaluation of reasonable alternatives to the use of fuel oil as a back-up fuel, including the feasibility of not having fuel oil back-up capability.

(d) A discussion of the impact of the facility use of fuel oil on wholesale supplies and prices in the affected region.

(e) If it is proposed to use a back-up fuel other than fuel oil, an identification of the proposed back-up fuel and such information for the identified back-up fuel as is required for fuel oil as a back-up fuel pursuant to subdivisions (a) through (d) of this section, to the degree such information is applicable.

.SO DOC 16C-1001.38

NYCRR

1001.38 Exhibit 38: water interconnection.

If a water interconnection is proposed for the facility, Exhibit 38 shall contain:

(a) An estimate of the hourly and daily peak, and the hourly and daily average water supply needs and consumptive water losses of the facility, in gallons, for each day of a typical year, broken down by power production and domestic uses, with daily, monthly and annual totals.

(b) An estimate of the daily peak, daily average, and fire suppression peak and average flow rate needs of the facility in gallons per minute and a demonstration that an adequate water supply is available (both quantity and pressure) for fire protection during both normal and drought periods.

(c) A description of the methodology used (i.e., estimate, comparison, data, calculation) to prepare the water supply needs and minimum and maximum flow rate estimates stating all factors used.

(d) A description of the water chemistry requirements for water to be supplied to the facility, indicating any requirements that are more stringent than New York State standards for potable water, and describing any additional water treatment that shall be necessary to obtain the desired chemistry.

(e) An identification of the public water supply source or sources, including an identification of the well field(s) in the localized zone, proposed to be used by the facility, including:

(1) studies to assess the available capacity of the water supply source and an analysis of the impacts, in terms of quantity, quality, and pressure during both normal and drought periods of the facility's water use on the water supply system, including an identification of the well field(s) in the localized zone;

(2) an identification of all infrastructure requirements necessary to serve the facility including treatment requirements;

(3) the impact of the facility on excess infrastructure capacity, including distribution piping, mains, pumps, storage, or additional supply during both normal and maximum system demands;

(4) if use of surface water or an on-site well is proposed for water supply for the facility, a qualitative analysis of the water balance and an assessment of the impacts of the removal of the maximum daily withdrawal for the facility, particularly during drought periods, on stream flows and the ecological balance of waterbodies, including hydrogeological studies to clearly demonstrate the effect of this withdrawal on any contaminant plumes that have the potential to be influenced by the proposed well. These studies must state all methods used to promote that this withdrawal will not adversely affect any public or private wells.

(5) if new surface water withdrawal is proposed for water supply for the facility, an identification and description of any water treatment facilities and intake structures including a demonstration that each facility represents Best Technology Available, if applicable; and

(6) an identification and description of any facility water treatment facilities.

(f) A detailed description of the proposed water interconnection, including all interconnecting facilities, line route, size, functions, design details, and operating characteristics.

(g) A description of the status of negotiations, and a copy of agreements that have been executed, with municipalities, public authorities, companies or individuals for providing water to the facility, including permitting implications/modification requirements and restrictions, if any, imposed by the provider, and a preliminary description of how the interconnection and any necessary system upgrades are to be installed, owned, maintained and funded.

(h) An identification and evaluation of other reasonable water supply alternatives and mitigation measures to avoid or minimize water supply impacts, including a contingency plan, if required, for water use curtailment during times of drought or water emergency, describing thresholds for water use curtailment.

(i) A description and evaluation of compliance with any requirements regarding water withdrawals contained in applicable state regulations, the Great Lakes Compact, or any requirements of the Susquehanna and Delaware River Basin Commissions.

.SO DOC 16C-1001.39

NYCRR

1001.39 Exhibit 39: wastewater interconnection.

The information provided in this exhibit shall be presented in a manner that distinguishes between sanitary wastewater, process wastewater, and intermingled sanitary and process wastewater. If a sanitary or process wastewater sewer interconnection is proposed for the

facility, Exhibit 39 shall contain:

(a) A detailed description of the proposed wastewater sewer interconnection, including all interconnecting facilities, line route, size, functions, and operating characteristics.

(b) A separate water balance diagram for hourly and daily peak and hourly and daily average water use operating conditions for the facility that shows in detail all water sources, plant water uses, water treatment facilities, wastewater treatment facilities, wastewater discharges and which effluents shall be discharged, and where, including information on the characteristics (e.g. volume, temperature, constituent concentrations) of each water withdrawal and discharge under all operating conditions.

(c) An identification and evaluation of reasonable mitigation measures regarding wastewater generation and disposal impacts, including the use of on-site subsurface disposal.

(d) An identification and description of all reasonable discharge or disposal methods for wastewater generated from the facility, including a review of options for discharging to municipal sewer systems, aquifer recharge areas, in-ground discharges, or other process wastewater disposal, as well as, where applicable, an analysis of the impacts on water quality and quantity in affected groundwater and surface water resources, and an analysis of the impacts of any out-of-aquifer transfers.

(e) A description of available capacity and any limitations on wastewater disposal capacity.

(f) If a municipal or private sewage treatment system is proposed to be used, a description of the status of negotiations, or a copy of agreements that have been executed, with municipalities, companies or individuals for receiving wastewater from the facility including any restrictions or conditions of approval placed on the facility for wastewater disposal, if any, imposed by the provider, and a description of how the interconnection and any necessary system upgrades will be installed, owned, maintained and funded.

(g) For each proposed discharge, an identification and description of any facility wastewater treatment facilities and discharge structures, including a demonstration that each facility and/or effluent discharge will meet all applicable effluent limitations or pretreatment standards, as well as all applicable New York State water quality standards, during construction and operation.

(h) A completed application for the State Pollutant Discharge Elimination System (SPDES) Permit and a demonstration that the discharge

complies with all applicable technology-based and/or water-quality based effluent limits.

.SO DOC 16C-1001.40

NYCRR

1001.40 Exhibit 40: telecommunications interconnection.

If a telecommunications interconnection is proposed for the facility, Exhibit 40 shall contain:

(a) A detailed description of the proposed telecommunications interconnection, including all interconnecting facilities, line route, design details, size, functions, and operating characteristics.

(b) An analysis demonstrating that there will be sufficient capacity to support the requirements of the facility.

(c) A description of the status of negotiations, or a copy of agreements that have been executed, with companies or individuals for providing the communications interconnection including any restrictions or conditions of approval placed on the facility imposed by the provider, and a description of how the interconnection and any necessary system upgrades will be installed, owned, maintained and funded.

.SO DOC 16C-1001.41

NYCRR

1001.41 Exhibit 41: applications to modify or build adjacent.

If the applicant is claiming that its application qualifies for treatment pursuant to PSL § 165(4)(b), Exhibit 41 shall contain:

(a) A statement whether the application is to:

(1) modify by an increase of more than 25 MW the nameplate capacity of an existing electric generating facility already having a nameplate generating capacity of 25 MW or more; or

(2) construct a new facility adjacent or contiguous to an existing facility.

(b) A statement that the applicant is the owner of the affected existing major electric generating facility.

(c) For applications to modify existing facilities, a statement that after the modification the applicant will be the owner of the modified existing major electric generating facility.

(d) For applications to construct new facilities adjacent or contiguous to an existing facility, a statement that after the new construction the applicant will be the owner of both the existing facility and the new major electric generating facility.

(e) For applications to construct new facilities adjacent or contiguous to an existing facility, a map drawn to scale demonstrating that the new facility is proposed to be located on the same parcel of real property as the existing facility, on a separate parcel of real property sharing a common border with the parcel of the existing

facility, or on separate parcels of real property separated by no more than 500 feet from the parcel of the existing facility.

(f) For emissions of the following substances, a table demonstrating a decrease in the rate of emissions with the name of the substance in the first column, the current hourly emission rate in the second column, the future hourly emission rate in the third column, and the percentage decrease in the rate of emission in the fourth column:

- (1) sulfur dioxide (SO₂);
- (2) oxides of nitrogen (NO_x);
- (3) carbon dioxide (CO₂);
- (4) carbon monoxide (CO);
- (5) particulate matter (PM 2.5, PM 10 and total PM);
- (6) volatile organic compounds (VOCs);
- (7) elemental lead; and
- (8) mercury.

For facilities that are partially replaced or modified, the percentage decrease shall be calculated by comparing the potential to emit of each such contaminant of the existing unit that is to be modified or replaced as of the date of application to the future potential to emit each such contaminant of the modified or replacement unit as proposed in the application. For facilities that are sited physically adjacent or contiguous to an existing facility, the percentage decrease shall be calculated by comparing the potential to emit of each such contaminant of the existing facility as of the date of application to the future potential to emit each such contaminant of the existing and new facility combined as proposed in the application.

(g) For emissions of the following substances, a table demonstrating a decrease in the total annual emissions on a pounds-per-year basis with the name of the substance in the first column, the current actual three-year average annual emissions in the second column, the future annual potential to emit in the third column, and the percentage decrease in the annual amount of emissions in the fourth column:

- (1) sulfur dioxide (SO₂);
- (2) oxides of nitrogen (NO_x);
- (3) carbon dioxide (CO₂);
- (4) carbon monoxide (CO);
- (5) particulate matter (PM 2.5, PM 10 and total PM);
- (6) volatile organic compounds (VOCs);
- (7) elemental lead; and
- (8) mercury.

The percentage reduction shall be calculated by comparing the past

actual emissions of each of the relevant contaminants emitted by the existing facility averaged over the three years preceding the date of application, to the annualized potential to emit each such contaminant of the modified facility or of the combined existing and new facility as proposed in the application.

(h) Information sufficient to demonstrate the introduction of a new cooling water intake structure where such structure withdraws water at a rate equal to or less than closed-cycle cooling would for the modified or replacement unit, or the existing and new facility combined, whichever is applicable.

(i) A table demonstrating a decrease in the heat rate with the current actual heat rate of the existing facility in the first column, the future heat rate for the modified or replacement unit, or the existing and new facility combined, whichever is applicable, in the second column, and the percentage decrease in the heat rate in the third column.

COMPLIANCE FILINGS

(Statutory authority: Public Service Law, § 161(1))

Sec.

1002.1 Purpose

1002.2 General procedures

1002.3 General requirements

1002.4 Reporting and inspections

.SO DOC 16C-1002.1

NYCRR

Section 1002.1 Purpose.

This Part establishes procedures and requirements for assuring that the applicant will comply with the terms, conditions, limitations, or modifications of the construction and operation of the facility authorized in the certificate.

.SO DOC 16C-1002.2

NYCRR

1002.2 General procedures.

(a) The applicant may not commence construction of the facility or interconnections until the applicant has accepted the Certificate in accordance with Section 1000.14 of this subchapter.

(b) The applicant may not commence construction of all or any portion of the facility or interconnections for which the Board has required approval of a compliance filing as a condition precedent to such construction until the applicant has submitted the required compliance filing for that portion of the facility and received approval of it by

the Board, or by the Commission after the Board's jurisdiction has ceased.

(c) The applicant shall file an electronic copy and ten paper copies of any compliance filing with the Board, or the Commission after the Board's jurisdiction has ceased, by filing it with the Secretary at the Albany, New York Offices of the DPS and shall serve copies as follows:

- (1) one paper copy on the DEC project manager;
- (2) one paper copy on each affected DEC regional office;
- (3) three paper copies on the DEC at its central office;
- (4) one paper copy on any other party specified in the certificate or order requiring the compliance filing; and
- (5) an electronic copy on every party to the proceeding.

(d) Any interested person or party may file comments regarding any compliance filing within 21 days of the filing and service of such compliance filing done in accordance with subdivision (c) of this section.

(e) A compliance filing may not be used to request an amendment to a Certificate. If the Secretary determines that a request in a compliance filing is a request for an amendment to a Certificate, the Secretary shall issue a letter denying further processing of such request as a compliance filing.

(f) Compliance filings will not be effective until approved by the Board or by the Commission after the Board's jurisdiction has ceased.

(g) Approval may be made subject to specified terms, conditions, limitations, or modifications.

(h) Decisions on compliance filings will generally be made at the next available session of the Board or the Commission, as the case may be, provided the compliance filing is received sufficiently in advance of such sessions that there is adequate time in the circumstances to receive comments and process the matter, unless additional information is required to make the determination or the nature of the compliance filing warrants additional time for deliberation or analysis.

(i) The standard of review for compliance filings shall be whether the compliance filing reasonably assures compliance with the Certificate.

(j) After a compliance filing is approved, an applicant may request a change in what was so approved as a result of a compliance filing by requesting either a major change or a minor change. Requests for a major change in what was so approved as a result of a compliance filing shall be filed, served and reviewed in the same manner as an original compliance filing pursuant to subdivisions (c) through (i) of this section. Requests for a change in what was approved as a result of a

compliance filing in which there is no discernable potential for increased adverse environmental impact and in which there will be no change in the specified terms, conditions, limitations, or modifications applicable to a prior approval shall be deemed a minor change. A minor change may be requested by filing an electronic copy with the Secretary at the Albany, New York Offices of the DPS and serving an electronic copy on the DEC project manager. The Secretary shall determine whether DPS or the DEC project manager has an objection to the proposed minor change. If there is such an objection, the Secretary shall issue a letter denying further processing of such request as a minor change. If there is no such objection, the Secretary shall issue a letter stating that the minor change may be implemented.

.SO DOC 16C-1002.3 NYCRR

1002.3 General requirements.

The compliance filing shall contain:

- (a) a description of and citation to the requirement in a certificate or an order for which compliance is to be demonstrated;
- (b) a description of how the applicant will comply with the requirements of the certificate or order; and
- (c) final maps, plans, diagrams, drawings, studies, reports or other documents demonstrating compliance.

.SO DOC 16C-1002.4 NYCRR

1002.4 Reporting and inspections.

(a) The Board, or the Commission after the Board's jurisdiction has ceased, may require the applicant to file written information reports on the construction or operation and the facility and the interconnections. Unlike compliance filings, the information reports are not submitted for approval or action by the Board or the Commission. The applicant shall file an electronic copy with the Board, or the Commission after the Board's jurisdiction has ceased, by filing it with the Secretary at the Albany, New York Offices of the DPS and shall serve electronic copies on all parties to the proceeding, except that access must be provided in hard copy to any party upon request.

(b) The site and all construction records shall be open to inspection by representatives of the Chairperson of the Board, or the Commission after the Board's jurisdiction has ceased, during normal working hours. Information requested by such representatives shall be provided in a timely fashion and, in all cases, at least 10 days prior to the initiation of any activity with regard to which the information is requested. If any activity on which information is requested has already been initiated, such information shall be provided within three business

days of the request.

APPENDIX 6-B
DECLARATION OF POLICY
RE

UTILITY EMPLOYEE PENSION COSTS

Consistent with our opinion of March 9, 1950, we hold that employee pensions are elements of current labor costs and as such constitute a present benefit.

The treatment of costs of employee pensions in the determination of rates has been given consideration and the following general policy will govern in such proceedings.

1. All costs of a reasonable pension plan, not provided heretofore, will be allowed as operating expenses in determining rates. Where advance provision is being made for future pension payments, however, a portion of the charge may be considered deferrable to a later period, if in the judgement of the Commission an unreasonable proportion of the pension cost is being charged currently.

2. In determining, for a utility subject to Federal income tax and making advance provision for pension payments, whether its pension plan is a reasonable one, the Commission will give consideration to whether the plan is approved by or acceptable to the Commissioner of Internal Revenue for tax proposes.

3. Under ordinary circumstances no portion of the pension charges will be disallowed on the ground that it relates exclusively to a prior service period. However, where the adoption of a comprehensive program of advance provision is unreasonably deferred, the charges may be disallowed to the extent that the recognized liability on the date of adoption is increased and the increase is directly attributable to the

extended lapse of time.

4. Ordinarily a utility will not be permitted to spread over a period of less than ten years provision for that portion of pension costs which are considered to arise from service prior to the date at which provision for future pension payments had been commenced or shall hereafter be commenced. The particular period is to be determined in each case with due regard to the financial burden involved.

5. While paragraph 1 recognizes all employee pension costs as operating expenses, this does not prohibit a utility from allocating to construction and retirement work orders and to clearing and other accounts an applicable portion of the cost of employee pensions.

.SO DOC 16C-AP6-C

NYCRR

APPENDIX 6-C

OPINION OF THE COMMISSION -- DECLARATION OF POLICY RE

EMPLOYEE PENSION COSTS

Eddy, Commissioner:

The problem of the accounting treatment of pensions is one of increasing importance. This Commission last passed directly on the problem in Case 11800 involving the Village of Lake Placid. The Utility Workers Union, CIO, requested this Commission to reconsider its previous attitude as expressed in that case, and for that reason this proceeding was brought dealing with all of the prescribed accounting systems for the various utilities under the jurisdiction of the Commission.

It was announced at the hearing that tentatively the Commission, after having taken the briefs of the parties, would prepare proposed changes in its accounting regulations. Such changes are in the course of preparation, and will be considered at a future hearing.

There are presently before the State Legislature certain proposed amendments to the Public Service Law dealing with the problem. Since it does not presently seem possible to afford an adequate hearing on the proposed changes before the Legislature adjourns, the Commission feels that a general statement of the principles by which this Commission will be guided should presently be made.

There has been throughout the last thirty years a very great change in the social thinking of this country in respect to pensions. At one time, as defined by the Court of Appeals (see 268 N.Y. 228), pensions were regarded as a "gratuity of the sovereign". Gradually that concept has changed until today pensions are regarded not as a favor or a gift but as part of the compensation of the employee. We think there can be no better statement than that quoted by the Circuit Court of Appeals for

the Seventh Circuit in the Inland Steel case, 170 F.2d 247:

" . . . we are convinced and find that the term 'wages' as used in Section 9(a) must be construed to include emoluments of value, like pension and insurance benefits, which may accrue to employees out of their employment relationship . . . Realistically viewed, this type of wage enhancement or increase, no less than any other, becomes an integral part of the entire wage structure, and the character of the employee representative's interest in it, and the terms of its grant, is no different than in any other case where a change in the wage structure is effected."

By the same token, with the change in concept of the nature of a pension there has likewise been a change in the accounting concept. In November of 1948 and subsequent to our decision in the Lake Placid case, the Committee on Accounting Procedure of the American Institute of Accountants, dealing with accounting for annuity costs based on past services, said:

"1. When costs incurred under pension plan are based in part on services performed prior to the adoption of the plan, the problem arises whether that portion of the costs which are attributable to such services are applicable to the past or to the present and future periods and, accordingly, whether they should be charged to income. This bulletin deals with the accounting treatment of such costs arising out of past services when incurred under pension plans involving payments to outside agencies such as insurance companies and trustees.

"2. The committee has undertaken a statement on this subject at this time because of the trend toward expansion of pension plans to cover a wider and much larger group of employees, often at substantially increased costs, and in order to narrow the area of difference in the accounting treatment accorded in actual practice to annuity costs based on past services. Self-administered and informal plans which do not require payments to outside agencies are not specifically dealt with because of their special features and lack of uniformity. The principals set forth herein, however, are generally applicable to those plans as well.

"3. Charges with respect to pension costs based on past services have often been made to surplus on the grounds that such payments are indirectly compensation for services and, since the services upon which the payments are computed were performed in the past, the compensation should not be permitted to affect any period or periods other than those in which the services involved were performed. In other cases all annuity costs based on past services have been charged to income in the

period of the plan's inauguration as a current cost of originating the plan. In still other cases the position has been taken that a pension plan cannot bring the anticipated benefits in the future unless past as well as future services are given recognition and, accordingly, annuity costs based on past services have been spread over a period of present and future years. The last method is the one permitted under provisions of the Internal Revenue Code.*

"4. The committee believes that, even though the calculation is based on past services, costs of annuities based on such services are generally incurred in contemplation of present and future services, not necessarily of the individual affected but of the organization as a whole and, therefore, should be charged to the present and future periods benefited. This believe is based on the assumption that although the benefits flowing from pension plans are intangible, they are nevertheless real. The element of past services is one of the important considerations of most pension plans and costs incurred on account of such services contribute to the benefits gained by the adoption of a plan. It is usually expected that such benefits will include better employee morale, the removal of super-annuated employees from the payroll, and the attraction and retention of more desirable personnel, all of which should result in improved operations.

"5. The committee, accordingly, is of the opinion that:

(a) Cost of annuities based on past services should be allocated to current and future period; provided, however, that if they are not sufficiently material in amount to distort the results of operations in a single period, they may be absorbed in the current year.

(b) Costs of annuities based on past services should not be charged to surplus."

"6. The committee does not intend that its recommendations shall require (a) a change in policy calling for charges to income rather than charges to reserves previously provided, or (b) that any recognition be given in the accounts of current or future periods to pension costs written off prior to the issuance of this bulletin."

* See IRC Sec. 23(p)(1)(A).

We must, therefore, conclude not only as a matter of modern economic thinking, but as required by law and accepted practice that pensions are wages and constitute a present benefit. Hence, we must expressly overrule the decision in the Lake Placid case and hold that upon the establishment of a pension plan, whether based on past or future services, or both, the entire charge becomes an operating expense, not an income deduction or a charge to surplus.

We think certain fundamental principles should be stated:

First: If we are to treat pensions as a part of wages, it is essential that the company claiming the deduction as an operating expense will have irrevocably committed itself to the obligation. Title must have passed to the beneficiaries.

Second: The pension plan must be a reasonable one, carry with it the assurance that the obligations which it purports to create can and will be fulfilled and meet the standards of this Commission. If pensions are wages, the matter of pensions is a matter of collective bargaining between the company and its men over which we have no control. However, in a rate proceeding where payments are excessive, while we cannot fix the compensation, we can disallow excessive payments for the purpose of fixing rates. It follows then if pensions are part of compensation, unreasonable payments should likewise not be allowed as a part of operating expenses.

Third: The inclusion in operating expenses should, of course, be made in the year when provisions should be made for it. The definition of the proper year is one of the most vexing problems presented in this matter and, except to state the general principle, this question will be left for further consideration. As in the case of many other operating expenses, there well may be instances in which the Commission should give its approval to amortizing payments over a longer period than the current year in which payment is made.

Fourth: We feel that where companies have undertaken to pay pensions, even if the plan be styled a so-called voluntary plan under which the company may claim it has no legal liability, there exists a high moral responsibility and, as a practical matter, a voluntary plan of long standing cannot be terminated without destroying good labor relations or by compensating the employees in some other form. Where liabilities exist that should be made known by footnotes to the balance or other appropriate entries.

It has been argued that the present provisions in the Uniform System for electric and gas companies are adequate to take care of the problems before us provided we interpret them as they interpreted here in relation to past services. If there is any ambiguity in those provisions, they will in the future be interpreted in accordance with this memorandum until such time as the revision is complete.

With the exception of some portions of the bus industry the relations between labor and management in the utilities in this state are uniformly excellent. In general the workers in the utilities have a high standard of morale. In the utility field above all others a breakdown in

good labor relations most seriously affects the public. As previously stated, we have no control over the process of collective bargaining, nor should we attempt to exercise any such control. We must, however, make our determinations in the regulation of utilities so as to remove any obstructions from the path of collective bargaining and to adopt those policies which promote good labor relations, and therefore, better service to the public. For this reason alone, even if we were not compelled to make the determination by the modern legal concept of pensions, we should adopt the principles enunciated here.

I am in accord with Commissioner Arkwright to the extent that any increase in operating expenses tends toward an increase in rates. However, if we are correct in our view that pensions are a form of wages, and if in the course of collective bargaining, the employees of a utility desire a pension rather than benefits in pay, the granting of pensions in any form, will produce no different rates than those that would be produced by an equivalent change in wage scales.

March 9, 1950.

Approved by the Commission March 9, 1950, Commissioner Arkwright in the negative filing a memorandum dated March 9, 1950.

ARKWRIGHT, Commissioner:

I do not oppose retirement of pension plans.

The members of this Commission, and of the prior Commission, were and are in complete accord as to their desirability and the good that necessarily flows from them.

The only point of difference, and the only problem presented, relates to the accumulation of funds to provide for services rendered in the past, by employees to a company and to whether present and future consumers should have to pay costs that previous consumers might have had to pay, if such plans were in effect.

The matter has been before this Commission on several other occasions, and has been most carefully considered. In newly established pension plans, or in these already established where proper actuarial provisions are provided for to take care of retroactive service, the cost thereof must be met. A determination has now been made that these costs should not be paid by the utility or by contributions of the employees, but should be passed on to the public, present and future. This means that, throughout the state, where such plans may be set up, or are in being, these costs must be passed on in the form of increased rates, to the users of gas, electricity, water, and transportation, whether railroad, bus, or freight.

The previous holding of the Commission in no way passed these costs on

to the public. It in no way prevented the utility and its employees by agreement and by contributions among themselves from inaugurating and maintaining any kind of retirement or pension plan, whether with accumulated back costs or not. Thus an accumulation of what amounts to past debt, or expenses in connection therewith, was not passed on to current and prospective customers and riders, and their rates were thereby not increased.

In my opinion, the public interest is best served by not passing these particular costs on to the public.

March 9, 1950.

NYCRR

APPENDIX 7-H

Derivation of Historical and Current Average Cost of Gas and Net Gas Adjustment

GAC calculated on _____, using supplier rates in effect on _____, [and] WITH DEMAND COSTS BASED ON NORMALIZED gas quantities for the

twelve months ended _____, AND COMMODITY COSTS BASED ON ESTIMATED

SALES FOR THE MONTH OF _____. HISTORICAL COST OF GAS BASED ON ACTUAL

GAS QUANTITIES FOR THE TWELVE MONTHS ENDED _____.

Applicable to Service Classification No(s). _____

INSTRUCTIONS: The format of this Appendix should be used to calculate both the historical average cost of gas (using applicable portions of Sections A-E on a historical company-wide basis) and the current average cost of gas for GAC purposes (using applicable portions of Sections A-D and F-H on a repriced, gas department basis only).

A. SOURCES OF GAS

1. List required data by individual source within each category, or summaries by category and attach a detailed listing for each category.
2. Include subtotals for each category.
3. All transportation or costs other than actual gas purchase costs must be matched with the related gas supplies, so that the report will show city-gate delivered costs for each source.

Source (Category)	Rate or ---Cost of Gas----				Total
	Cost	Demand	Commodity		
	Units	(\$/unit)	\$	\$	\$

(Unit adjustment to be applied to customer bills.)

INTRODUCTION

In December 1996, the Department of Public Service inaugurated a new

Electronic Tariff System (ETS) which is intended to:

- facilitate the filing of utility tariffs and related documents,
- partially automate the administration of tariff filings by Department staff, and
- improve accessibility to utility tariffs for all users.

The following guidelines are intended to assist utility personnel in the preparation and submission of electronic tariffs.

Because this guide is meant to supersede tariff filing requirements formerly specified in 16 NYCRR, provisions are also required to accommodate the continued submission of tariffs in paper format, pending conversion to an electronic submission. Accordingly, applicable provisions of 16 NYCRR are also included herein to address the requirements of paper tariff submissions.

PROVISIONS APPLICABLE TO ELECTRONIC TARIFF FILINGS

ETS FILING REQUIREMENTS

Systems and computer programs employed by the Department of Public Service in ETS impose certain requirements on electronic tariff filings.

Among the more basic of these requirements are:

- all documents must be submitted in WordPerfect 5.1/5.2 format
- each document must be contained in a separate file, and the file format and name must conform to the rules described below
- all documents associated with a particular filing must be attached to a single E-Mail message
- all submissions must include a letter of transmittal
- use of graphics should be avoided

In addition to these basic requirements, there are additional requirements unique to each type of document that may be included in a tariff submission.

LETTER OF TRANSMITTAL

ETS requires that each filing be accompanied by a LETTER OF TRANSMITTAL. The LETTER OF TRANSMITTAL will consist of a single WordPerfect document which may be one or more pages in length. The LETTER OF TRANSMITTAL must include LETT as the first four characters of the document name; the remaining one to four characters to the left of the period, as well as the three letter suffix to the right of the period may contain any valid characters permitted by DOS's 8.3 naming convention. For example, LETT01.WPF is a valid name (despite having only six characters to the left of the period). TRANSMITTAL.FIRST is not because: a) it does not contain LETT as the first four characters of the name, b) more than eight characters exist to the left of the period

(perhaps due to the use of Windows 95 capability for longer names) contrary to DOS's 8.3 naming convention, and c) the suffix to the right of the period contains more than the allowed three characters.

All electronic documents, including the LETTER OF TRANSMITTAL must, at a minimum, contain two specific header lines which are not required on hard copy submissions (as discussed below, other header lines may also be required in electronic filings). Each header line will begin with a label which must be capitalized. The first header line must contain only the ..DID: label, which should be left justified. No other text is permitted on this line! The remaining space is reserved for use by the Department's document retrieval system which will assign a unique document identification number essential to its proper functioning.

The second line of every electronic document, including the LETTER OF TRANSMITTAL must contain the label..TXT: which also must be left justified. Unlike the first line additional text may follow this label on the second line. For a LETTER OF TRANSMITTAL, however, the remainder of this line will usually be left blank, with the text of the letter beginning on succeeding lines.

NOTE: WordPerfect formatting commands should not be contained within a document header. Formatting commands may precede the ..DID: label if required to format the header information, but preferably should appear at the beginning of the first line following all header information to ensure proper formatting of the document's text.

The remainder of the electronic LETTER OF TRANSMITTAL document should be comprised of the text of the letter. Generally, the LETTER OF TRANSMITTAL should contain only text. Embedded graphics, such as a company logo, will not be retained intact and should be avoided. An example of a letter of transmittal is shown in Figure 1.

Figure 1
SAPA NOTICE

Certain filings propose changes to utility tariffs which require official notification through publication in the State Register pursuant to the State Administrative Procedures Act (SAPA). Filings which require SAPA notification should include a draft of a proposed notice. For electronic filings, the draft SAPA notice will consist of a single WordPerfect document which may be one or more pages in length. The document name for a draft SAPA notice must include SAPA as the first four characters to the left of the period; the remainder of the name as well as the three letter suffix to the right of the period may contain any valid characters permitted by DOS's 8.3 naming convention (e.g. SAPAPROP.WPD).

As with the electronic LETTER OF TRANSMITTAL, a draft SAPA notice must contain two header lines. The first line must contain only the ..DID: label which should be capitalized and left justified. The second line of a draft SAPA notice must contain the label ..TXT: which also must be capitalized and left justified. While it is permitted for additional text to follow this label on the second line, for a draft SAPA notice the remainder of the line will probably be blank, with the text of the draft SAPA notice beginning on succeeding lines.

The remainder of the draft SAPA notice should be comprised of the text of the notice. An example of a draft SAPA notice is shown in Figure 2.

TARIFF LEAF

Individual tariff leaves comprise the bulk of a utility's tariff. ETS requires that each TARIFF LEAF consist of a single page, and that each TARIFF LEAF be contained in a separate WordPerfect document. There are no restrictions with respect to the naming of a TARIFF LEAF document except that it comport with DOS's 8.3 naming convention.

As with all electronic documents, a TARIFF LEAF must contain two header lines. The first line must contain only the ..DID: label, which should be capitalized and left justified. The second line of every TARIFF LEAF document must contain the label ..TXT: which also must be capitalized and left justified. Certain additional information is also required in the header of an electronic TARIFF LEAF in the lines immediately following the ..DID: and ..TXT: labels. All required information must be preceded by an identifying tag as follows:

PSC NO: this tag will appear on the second line, and will be separated from the ..TXT: label by at least one space. The tag should be followed by one space, and then the applicable schedule to which the filed TARIFF LEAF applies, followed by another space and one of the permitted schedule types (e.g. 123 GAS). The schedule type must be one of the following: COMMUNICATIONS, ELECTRICITY, GAS, STEAM, OR WATER. Capitalization and proper spelling are critical.

LEAF: this tag must also appear on the second line, separated from the PSC NO: tag (and following entry) by at least one space. This tag should also be followed by one space and then the number of the TARIFF LEAF. Leaf numbers may only contain numbers between 0 and 9, and periods. Letters and special characters are not allowed. An initial tariff filing may only contain sequentially numbered leaves; e.g. 1, 2, 3,

Subsequently, new leaves may be added to the existing tariff through the use of leaf numbers next in sequence (e.g. if the last TARIFF LEAF currently in effect is labeled LEAF: 22, new leaves may be added beginning with LEAF: 23), or may be inserted between existing leaves by expanding the numbering sequence.

For example, if it is necessary to add a leaf between existing LEAF: 6 and LEAF: 7, the new TARIFF LEAF should be designated as LEAF: 6.1. If the material being inserted requires more than one TARIFF LEAF, the numbering sequence should continue with LEAF: 6.2, etc. Likewise, a new TARIFF LEAF between LEAF: 6.1 and LEAF: 6.2, should be designated as LEAF: 6.1.1. Each TARIFF LEAF, including the cover, must be numbered using this numbering

convention.

COMPANY: this tag will appear left justified on the third line of a TARIFF LEAF, and will be followed by one space and the official company name.

REVISION: this tag will also appear on the third line, separated from the company name by at least one space. The tag will be followed by one space and then the revision number of the TARIFF LEAF. The original of each leaf will be designated as REVISION: 0. Subsequent revisions to a particular TARIFF LEAF would be sequentially designated, e.g. REVISION: 1, REVISION: 2, etc.

INITIAL EFFECTIVE DATE: this tag must appear on the fourth line, left justified, and be followed by one space and the initial effective date of the TARIFF LEAF. The date must be in the format mm/dd/yy and zero filled; e.g., 06/04/96. (Note: calendar year 2000 will be represented as 00, 2001 as 01, etc.)

SUPERSEDING REVISION: this tag must also be on the fourth line, separated from the INITIAL EFFECTIVE DATE: tag (and following entry) by at least one space, and be followed by one space and the revision number of the TARIFF LEAF that the new leaf is superseding. If the TARIFF LEAF is an original, the space following this tag should be left blank. For example, SUPERSEDING REVISION: 6 would be appropriate for a new leaf designated as REVISION: 7.

STAMPS: this tag must appear on the fifth line. Generally, no additional company generated text may appear following this tag. The notable exception to this exists when the TARIFF LEAF is issued at the direction of the Commission. Under such circumstances, the tag may be followed by one space and the notation: Issued in compliance with order in C. NN-C-NNNN (where N represents a numerical value and C a character value) dated (display date in form: mm/dd/yy). This line should be followed by eight (8) blank lines to provide room for department staff to add all applicable stamps, such as to note postponements, suspensions, cancellations, etc.

RECEIVED: STATUS: EFFECTIVE: these three tags must appear on the line following the eighth blank line. The tags must be separated by at least one space. All information {1} relative to the date the filing was received, its status, and its effective date will be added by Department staff.

All lines following this header information may be used by the company for the text of the TARIFF LEAF. However, the first non-blank line of

such text on each page (including cover page) must consist of a simple topical heading, such as P.S.C. No. 123 - Electric, Table of Contents, General Provisions, or Service Classification No. 1 (as noted above, the first line of text should also begin with WordPerfect formatting commands as may be required). A topical heading must not run over to subsequent lines, although subsequent lines may further define the topic. For example, the first line might be designated as Service Classification No. 1, and might be further defined by having the term Residential Service displayed on the second line. The same topical heading may appear on more than one page, and may include one of the following case insensitive notations, as may be appropriate: CONTINUED, -CONTINUED, CONT'D, CONTD, -CONTD, (CONTINUED), (CONT'D), OR (CONTD).

Figure 3 exemplifies a typical electronic TARIFF LEAF.

ADDENDUM

Each electronically filed tariff ADDENDUM must be contained in a separate WordPerfect document which may be more than one page in length. The document name must include ADDE as the first four characters. The remaining four characters to the left of the period and the three letter suffix to the right may contain any characters permitted by DOS's 8.3 file naming convention.

As with all documents, an electronically filed ADDENDUM must have only the ..DID: label left justified on the first line, and must have at the very left of the second line the ..TXT: label. Certain additional information must also be present in the initial lines of an ADDENDUM. All required information must be preceded by an identifying tag as follows:

PSC NO: this tag will appear on the second line, and will be separated from the ..TXT: label by at least one space. The tag will be followed by one space, and then the applicable schedule to which the ADDENDUM being filed applies, followed by another space and the schedule type. (e.g. 123 GAS). The schedule type must be one of the following: COMMUNICATIONS, ELECTRICITY, GAS, STEAM, OR WATER. Capitalization and proper spelling are critical.

ADDENDUM TYPE: this tag will also appear on the second line, separated from the PSC NO: tag (and following entry) by at least one space. This tag will also be followed by one space and then up to a four character designation of the company's choosing.

COMPANY: this tag will appear left justified on the third line of an ADDENDUM, and will be followed by one space and the official company name.

ADDENDUM NO: this tag will also appear on the third line, separated from the company name by at least one space. The tag will be followed by one space and then the ADDENDUM number.

ADDENDUM numbers must be sequentially numbered within any given

ADDENDUM TYPE: For example, if the last filed XYZ ADDENDUM was ADDENDUM NO: 12, the next XYZ ADDENDUM must be ADDENDUM NO: 13.

INITIAL EFFECTIVE DATE: this tag must appear on the fourth line, left justified, and be followed by one space and the initial effective date of the ADDENDUM. The date must be in the format mm/dd/yy.

STAMPS: this tag must appear on the fifth line. Generally, no additional company generated text may appear following this tag.

The notable exception to this exists when the ADDENDUM is issued

at the direction of the Commission. Under such circumstances, the tag may be followed by one space and the notation: Issued in compliance with order in C. NN-C-NNNN (where N represents a numerical value and C a character value) dated (display date in form: mm/dd/yy). This line should be followed by eight (8) blank lines to provide room for department staff to add all applicable stamps.

RECEIVED: STATUS: EFFECTIVE: these three tags must appear on the line following the eighth blank line. The tags must be separated by at least one space. All information relative to the date the filing was received, its status, and its effective date will be added by Department staff.

All lines following this header information may be used by the company for the text of the ADDENDUM, although the first line should indicate the topic of the addendum. Figure 4 exemplifies an electronic tariff ADDENDUM.

STATEMENT

Each electronically filed tariff STATEMENT must be contained in a separate WordPerfect document which may be more than one page in length. The document name must include STATE as the first four characters. The remaining four characters to the left of the period and the three letter

suffix to the right may contain any characters permitted by DOSS 8.3 file naming convention.

An electronic STATEMENT must have only the ..DID: label left justified on the first line, and must have at the very left of the second line the ..TXT: label. Certain additional information must also be present in the initial lines of a STATEMENT. All required information must be preceded by an identifying tag as follows:

PSC NO: this tag will appear on the second line, and will be separated from the ..TXT: label by at least one space. The tag will be followed by one space, and then the applicable schedule to which the STATEMENT being filed applies, followed by another space and the schedule type. (e.g. 123 GAS). The schedule type must be one of the following: COMMUNICATIONS, ELECTRICITY, GAS, STEAM, OR WATER. Capitalization and proper spelling are critical.

STATEMENT TYPE: this tag will also appear on the second line, separated from the PSC NO: tag (and following entry) by at least one space. This tag will also be followed by one space and then up to a four character designation of the company's choosing (Note: certain designations, such as GAC, FAC and RTS are commonly used, but other designations are permitted).

COMPANY: this tag will appear left justified on the third line of a STATEMENT, and will be followed by one space and the official company name.

STATEMENT NO: this tag will also appear on the third line, separated from the company name by at least one space. The tag will be followed by one space and then the STATEMENT number.

STATEMENT numbers must be sequentially numbered within any given

STATEMENT TYPE: For example, if the last filed GAS STATEMENT was numbered 12, the next GAS STATEMENT must be numbered 13.

INITIAL EFFECTIVE DATE: this tag must appear on the fourth line, left justified, and be followed by one space and the initial effective date of the STATEMENT. The date must be in the format mm/dd/yy.

STAMPS: this tag must appear on the fifth line. Generally, no additional company generated text may appear following this tag. The notable exception to this exists when the STATEMENT is issued at the direction of the Commission. Under such circumstances, the tag may be followed by one space and the notation: Issued in compliance with order in C. NN-C-NNNN (where N represents a numerical value and C a character value) dated

(display date in form: mm/dd/yy). This line must then be followed by eight (8) blank lines to provide room for Department staff to add all applicable stamps, such as to note postponements, suspensions, cancellations, etc.

RECEIVED: STATUS: EFFECTIVE: these three tags must appear on the line following the eighth blank line. The tags must be separated by at least one space. All information relative to the date the filing was received, its status, and its effective date will be added by Department staff.

All lines following this header information may be used by the company for the text of the STATEMENT. Figure 5 exemplifies an electronic tariff STATEMENT.

SUPPLEMENT

Each electronically filed tariff SUPPLEMENT must be contained in a separate WordPerfect document which may be more than one page in length. The document name must include SUPP as the first four characters. The remaining four characters to the left of the period and the three letter suffix to the right may contain any characters permitted by DOS's 8.3 file naming convention.

As with other documents, an electronic SUPPLEMENT must have only the

..DID: label left justified on the first line, and must have at the very left of the second line the ..TXT: label. Certain additional information must also be present in the initial lines of a SUPPLEMENT. All required information must be preceded by an identifying tag as follows:

PSC NO: this tag will appear on the second line, and will be separated from the ..TXT: label by at least one space. The tag will be followed by one space, and then the applicable schedule to which the SUPPLEMENT being filed applies, followed by another space and the schedule type. (e.g. 123 GAS). The schedule type must be one of the following: COMMUNICATIONS, ELECTRICITY, GAS, STEAM, OR WATER. Capitalization and proper spelling are critical.

SUPPLEMENT TYPE: this tag will also appear on the second line, separated from the PSC NO: tag (and following entry) by at least one space. This tag will also be followed by one space and then one of the allowable SUPPLEMENT types: ADOP (adoption), CANC (cancellation), POST (postponement), or SUSP (suspension).

COMPANY: this tag will appear left justified on the third line of a SUPPLEMENT, and will be followed by one space and the official company name.

SUPPLEMENT NO: this tag will also appear on the third line, separated from the company name by at least one space. The tag will be followed by one space and then the SUPPLEMENT number.

SUPPLEMENT numbers must be sequentially numbered within any given SUPPLEMENT TYPE: For example, if the last filed POST SUPPLEMENT was numbered 12, the next POST SUPPLEMENT must be numbered 13.

INITIAL EFFECTIVE DATE: this tag must appear on the fourth line, left justified, and be followed by one space and the initial effective date of the SUPPLEMENT. The date must be in the format mm/dd/yy.

STAMPS: this tag must appear on the fifth line. Generally, no additional company generated text may appear following this tag. The notable exception to this exists when the SUPPLEMENT is issued at the direction of the Commission. Under such circumstances, the tag may be followed by one space and the notation: Issued in compliance with order in C. NN-C-NNNN (where N represents a numerical value and C a character value) dated (display date in form: mm/dd/yy). This line must then be followed by eight (8) blank lines to provide room for Department staff to add all applicable stamps, such as to note

postponements, suspensions, cancellations, etc.

RECEIVED: STATUS: EFFECTIVE: these three tags must appear on the line following the eighth blank line. The tags must be separated by at least one space. All information relative to the date the filing was received, its status, and its effective date will be added by Department staff.

All lines following this header information may be used by the company for the text of the SUPPLEMENT. Figure 6 exemplifies an electronic tariff SUPPLEMENT.

of

SUPPLEMENT

ISSUED BY: I. M. DEBOSS, PRESIDENT, BIG TOWN, NEW YORK

Figure 6

E-MAIL

All electronically filed tariffs are to be submitted by means of E-Mail. The following should be observed when making an E-Mail submission:

- The originators E-Mail address (as it will appear in the From portion of an E-Mail submission) must be registered with the Department of Public Service. If different from the issuing E-Mail address, the address to which feedback from the Department relative to any action taken on a filing must also be registered. Please consult the attached list for specific Department contacts to register an E-Mail address.

- As noted above, a tariff filing is likely to consist of a number of individual documents, each containing a separate one page tariff leaf, or individual documents comprising a letter of submission, a tariff addendum, supplement or statement, or a SAPA notice. Regardless of the number of documents comprising a particular filing, all must be attached to the same E-Mail message. (NOTE: Because some E-Mail software restricts the number of attachments, it may be necessary to obtain different software which can accommodate this requirement. We regret any inconvenience this may cause.)
- Attachments may be submitted in MIME or UUENCODE format. Usually, this is a function of the specific E-Mail package being used, and does not normally require user intervention.
- All official E-Mail documents should be sent to:
edi-tariff@dps.state.ny.us

TEST SUBMISSIONS

The initial conversion of utility tariff schedules to ETS will require close coordination between the utility and staff. Utilities should consult with staff relative to a mutually agreeable schedule prior to the submission of an original tariff schedule. Once the original tariff schedule is on file, the company is then free to submit changes without prior notification of staff.

To prepare for the transition of a tariff schedule to ETS, the company may find it desirable to submit test documents to ensure compatibility between company and Department systems. Staff welcomes the opportunity to work with the company in such testing. Again, please consult the attached list of staff contacts to coordinate a testing schedule. Once all parties are satisfied of system compatibility, a mutually agreeable date for the submission of the official schedule can be established.

Staff appreciates your cooperation during the transition period.

PROVISIONS APPLICABLE TO PAPER TARIFF FILINGS

HARD COPY TARIFF FILING REQUIREMENTS

The following procedures supplement 16 NYCRR and apply to the filing of hard copy tariffs with the New York State Public Service Commission.

LETTER OF TRANSMITTAL

The Letter of Transmittal will be typed in the format for an electronic filing as shown in Figure 1 of this Appendix except that the ..DID: and ..TXT: labels are not required and should not be included.

SAPA NOTICE

The SAPA notice will typed in the format for an electronic filing as

shown in Figure 2 of this Appendix except that the ..DID: and ..TXT: labels are not required and should not be included.

TARIFF AMENDMENTS, SUPPLEMENTS, STATEMENTS AND ADDENDA
NUMBER OF COPIES:

- (a) Electric, gas and steam corporations and municipalities shall file three copies of all amendments, supplements, statements and addenda (five copies if applicable to the Metropolitan district).
- (b) Telephone corporations shall file three copies of all amendments, supplements and statements.
- (c) Water-works corporations shall file four copies of all amendments, supplements and statements.

ACKNOWLEDGMENT OF FILING RECEIPT

If acknowledgment of receipt of a utility's filing is desired, the company's letter of transmittal shall be in duplicate and shall be accompanied by a self-addressed envelope.

NUMBERING OF TARIFF LEAF:

When a complete schedule is filed, each leaf, except the front cover, which in all cases shall be considered Leaf No. 1, shall be issued as an original leaf consecutively numbered. Example: Original Leaf No. 2, Original Leaf No. 3, etc.

When a leaf is first revised, the new leaf shall be designated as First Revised Leaf No. ____ superseding Original Leaf No. ____, etc.

When changes or additions require more space, one or more leaves shall be issued to which the same leaf number shall be given with a letter suffix. For example, if changes are made in original Leaf No. 2 and more than one leaf is required to show the changed or new matter, the new leaf shall be issued as First Revised Leaf No: 2 superseding Original Leaf No. 2, and the added leaf shall be issued as Original Leaf No. 2-A, a second added leaf shall be issued as Original Leaf No. 2-B, etc.

FORMAT FOR TARIFF LEAF

Tariff Leaves shall be typed in the format shown on Figure 7.

ACME COMPANY P.S.C. NO.I-GAS Original Leaf No. ____
TWENTY-THIRD Revised Leaf No. 19
Superseding TWENTY-SECOND Revised Leaf No. 19
SERVICE CLASSIFICATION

NO. 1

APPLICABLE TO USE OF SERVICE FOR:

Commercial purposes except as provided for in Service Classifications No. 1.

CHARACTER OF SERVICE:

Continuous natural gas, approximately 1,045 BTU per cubic foot, normal

pressure not less than 4 inches.

RATE: (Per Month)

\$3.28 per Mcf, except as provided under Special Provision.

GAS COST ADJUSTMENT:

The charges set forth under "Rate" herein shall be subject to a gas cost adjustment per 1.000 per cubic feet of gas supplied hereunder when changes from the base cost of gas occur (as explained on leaves Nos. 16A, 16B and 16C)

MINIMUM MONTHLY CHARGE:

\$1.50.

GROSS REVENUE TAX SURCHARGE:

The base rates and charges under this service classification, including minimum charge, are increased by .25% to recover the tax expense imposed by Section 186-a of the New York Tax Law above the amount included in base rates.

TERMS OF PAYMENT:

Bills at the above rate are subject to a late payment charge in accordance with the provisions of General Information Rule III.

Date of Issue SEPTEMBER 29, 1998 Date Effective OCTOBER 1, 1998

Issued by: I.M. DEBOSS, PRESIDENT, BIG TOWN, NEW YORK

Figure 7

FORMAT FOR ADDENDUM

Tariff Addendum shall be typed in the format shown on Figure 8.

FORMAT FOR SUPPLEMENTS

Tariff Supplements shall be typed in the format shown on Figure 9.

FORMAT FOR STATEMENTS

Tariff Statements shall be typed in the format shown on Figure 10.

APPENDIX 9-A

TESTING OF METERS; REPORTS OF TESTS

INSTRUCTIONS FOR REPORTING METER TESTS ON REVISED FORM

NO. 2

STATUS OF METER TESTING

The data required under this heading is self-explanatory and is the same as that previously reported under the same heading on Revised Form No. I.

GENERAL INSTRUCTIONS

Revised Quarterly Report, Form 2, is designed to reveal the results of meter testing and to furnish certain data relating to meters prepared for service. The primary purpose is to determine the results of the testing of so-called Time and Registration Limit meters and to ascertain the manner in which such meters are being prepared for return to service. For the purpose of this report Time and Registration Limit meters are those meters which have reached or exceeded the limits shown in subdivision (b) of section 500.1 of the rules and regulations governing the testing of water meters, as ordered by the Public Service Commission. For example, a 5/8-inch meter in service 5 years or a 2-inch meter in service 4 years without having been tested is a Time Limit meter and likewise any 5/8-inch meter in service through which 750,000 gallons of water have passed without testing of the meter is designated as a Registration Limit meter. Of course, many meters are removed from service for reasons other than because they are Time or Registration Limit meters, as for example, a 5/8-inch meter removed from a vacant house after two years of service. Such meters are accordingly classed as

"Other Meters" and, whereas Form 2 [following] indicates that information is required as to the test results of such meters upon removal (Table A), data is not requested regarding the preparation of such meters for service (Table B). A 6-inch current meter tested once each year would be classed as a Time Limit meter, but if a particular 6-inch meter is tested for a second time in any one year, the second test would be included under "Other Meters" since the second test was not required in accordance with P.S.C. regulations and is therefore not strictly a Time Limit test. In other words, meters removed from service for testing or meters tested in the field for the purpose of complying with the P.S.C. regulations regarding time and registration intervals are classed Time or Registration Limit Meters; all other meters removed for test or tested in the field after having been in service are classed as "Other Meters". It is important to note that if a meter should stop registering and should also be a Time Limit meter, it should be so identified in both respects as the Form requires a recording of such information, and the cause of removal for such a meter should be "Stopped--Time Limit" and not merely "Stopped". Obviously, this will provide information as to whether stopped or non-registering meters have exceeded the time or registration limits or not, as the case may be. Similarly for frozen meters, the proper sub-designation should be given, although the added sub-designation "Time or Registration Limit" in such cases is not quite so important.

The form provides space to indicate whether the meter upon testing passed the P.S.C. test. Thus, if the test result meets the requirements indicated in the paragraphs relating to "Tests of Meters" of the P.S.C. Regulations, it is recorded as "Passed P.S.C. Test". For example, a 5/8-inch meter is removed from service and classified as "Time Limit". It is tested at the shop with the following results:

Rate of flow G.P.M.	Accuracy of registration per cent
20.0	98.5
2.0	101.0
0.25	Steady Movement

This meter would be recorded as "Passed P.S.C. Test", since it did not fall below 98.0 per cent and did not exceed 101.0 per cent at the selected rates within "Normal Test Flow Limits" and it also showed proper sensitivity at the "Minimum Test Flow" of 0.25 g.p.m. If this meter had recorded 97.0 per cent at 20.0 g.p.m. or if it had exceeded 101.0 per cent at 2.0 g.p.m. or if it had failed to move at all at 0.25

g.p.m., it would then have failed in one of the three instances to meet the P.S.C. test requirements. All requirements of the Regulation have to be met in order to classify the meter as "Passed P.S.C. Test".

TABLE A

This part of the form shows the results of the routine testing of meters and also indicates the number of "non-registering" meters brought into the shop or found stopped in the field. The data required appears to be self-explanatory.

The number of new meters tested for the given period is shown in Column (b) and all such meters either passed the P.S.C. test or were re-gearred or calibrated to meet the test requirements. Column (c) shows the number of Time Limit meters tested and Column (d) indicates how many "Passed the P.S.C. Test" requirements with the obvious conclusion that the difference failed to pass. Columns (i), (j) and (k) show the number of Time and Registration Limit Meters which were brought in because stopped, those in Column (k) having been frozen and the others having stopped from other causes. Columns (l) and (m) Other Meters are to show those which were neither Time nor Registration Limit Meters and were found stopped or frozen.

TABLE B

Table B explains how Time and Registration Limit meters were prepared for reinstallation in service and how many meters were retired. Column (o) shows the number of Time Limit meters made ready for service, that is, they were tested and perhaps re-gearred or repaired to meet the P.S.C. test requirements pertaining to all meters ready for service. There may or may not be any direct relation between the meters shown in Table A and those shown in Table B. It is recognized that a number of meters during any one quarterly period may be tested and the results reported for that quarter, but that the repair work or preparation of such meters for service may not be done until the next quarter and should thus be reported in the proper quarterly report; hence, meters, made ready for service shown in Table B, may or may not be the same meters for which test results are shown in Table A. In general where field tests are concerned, there will be a relation between Tables A and B as field work on any particular meter is generally completed in one day.

The report shows the number of Time Limit Meters [Column (o)] made ready for service, and the manner in which they were made ready is indicated in Columns (p), (q) and (r). Those shown in Column (p) are meters which upon removal from service passed the P.S.C. test requirements and were considered as again ready for service without any

extensive repairs beyond perhaps wiping off or painting the main casing or perhaps the replacement of a broken register box glass or a defective register box screw or perhaps even a new or repaired register; however, the meters were not disassembled so that the internal working parts could be examined, such as gear trains, chambers, discs, pistons, and so forth. Also, the only test performed was the one which indicated that the meters upon removal tested within the requirements.

Column (q) shows the number of meters that failed to pass the P.S.C. test requirement but it was possible to re-gear the meters to bring them within the requirements; also, that no extensive repairs were made. The only difference between the meters shown in Column (q) as compared with those shown in Column (p) is that it was necessary to re-gear and hence re-test those in Column (q).

Column (r) shows the number of meters, whether or not they passed or failed the P.S.C. test requirements, which were disassembled and completely examined or overhauled with the performance of any necessary repairs or replacement of major or minor parts. Such meters, of course, would be retested after being reassembled and would be calibrated to meet all P.S.C. requirements. Practice in certain companies dictate that all meters be disassembled and all parts examined, regardless of whether the meters passed or failed to pass the test when removed from service or when tested in service. The purpose of the report is to reflect the practice and results of the particular company making the report. The fact that columns are provided for reporting the manner of preparing meters for return to service according to the company's practice in no way indicates approval of such practice. The figures shown in Column (s) are not related to those shown in Column (o). Column (s) merely gives information as to the number of meters retired. These are in addition to the number returned to service. Columns (t) to (x) require similar data for Registration Limit meters.

Meters retired which have reached neither the Time Limit nor the Registration Limit should be entered in Column (x) and be denoted by a double asterisk (**). The total of the meters entered in Columns (s) and (x) should equal the total number of meters which, during the period, were retired on the company's books.

NYCRR

APPENDIX 15-B

SAMPLE QUESTIONS FOR DEPOSIT REQUESTS

An applicant for gas service shall be asked the following six questions:

1. Employer's name, address and telephone number and applicant's position.

2. Applicant's length of time with present employer. If applicant has less than two years with present employer, previous employment should be obtained or reason(s) for not being previously employed.

3. Whether the applicant owns or rents his place of residence. If renting, the length of occupancy of the premises should be determined.

4. Bank account(s)-types and where located.

5. Whether the applicant has credit cards, charge accounts, loans or other credit references.

6. Whether the applicant has sources of income other than from employment.

The following guidelines for determining what are positive and negative answers should be used:

1. If the applicant is employed, that is considered a positive answer.

The applicant's position is of importance only to the extent that it helps identify the applicant during a credit check with the employer.

Position should not be given any weight since it could result in discriminatory treatment of certain individuals who are forced to take low paying positions. Employment of a spouse, with whom the applicant is

residing, would be considered equivalent to employment of the applicant.

2a. If the applicant has been employed by the present employer for two years, that is considered a positive answer.

2b. If the applicant has been employed by the present employer for less than two years, but has been employed by only one other employer during the past two years, that is considered a positive answer.

2c. If the applicant has been employed by the present employer for less than two years and has no previous employment having recently graduated from high school or college or having recently been discharged from military duty, or having been recently widowed, separated or divorced, the response should be considered positive.

3. If the applicant owns his or her home, or has occupied the premises for two or more years, or has occupied the premises and the preceding residence for two or more years, that should be considered a positive answer. (A utility may choose not to require a deposit of homeowners for that reason alone provided it applies that standard uniformly.)

4. If the applicant has had a bank account for more than one year, which is substantiated by the bank to be in good standing, that should be considered a positive answer.

5. If the applicant has credit cards, charge accounts, or has been extended credit by a bank, commercial concern or individual, it would be considered a positive response unless subsequent investigation proved the applicant unworthy of credit.

6. If the applicant indicates other sources of income such as stocks, real estate, welfare, pension, alimony, etc., this would be considered a positive answer.

A MODEL LETTER AND FORM FOR DOCUMENTATION
OF INABILITY TO PAY UTILITY BILLS
UNDER 16 NYCRR 633.5

We have received an initial certificate of medical emergency, under which we must continue to provide you utility service for 30 days, starting _____ and continuing until the beginning of business on _____.

At the expiration of that period, we can, under the provisions of the Public Service Commission's regulations (633.5), terminate your utility service UNLESS the medical condition persists AND you do not have enough ready cash or income to meet your past-due and current utility bills and still meet your other necessary expenses such as food, housing, heating and medical treatment.

We enclose a form that you can use to provide the information we need to make a determination, as required by regulation, whether you are unable to pay past-due and current bills. We will continue to provide you utility service while we consider the information you provide.

If we determine that you have NOT demonstrated that you are unable to pay past-due and current bills, we will notify you in writing and inform you how you can seek review of our determination by the Public Service Commission.

If we determine that you have NOT shown that you have a financial hardship, we will offer you a deferred payment agreement, so that you can pay past-due bills and installments while you meet all current bills. And if you DO show a financial hardship, we will try to work out an arrangement so that you will not accumulate substantial past-due bills.

If you have any questions, you can call (local utility office/customer representative) at XXX-XXXX. If you are not satisfied with our response,

you also can call the Public Service Commission between the hours of 9:00 a.m. and 4:45 p.m., Monday through Friday, at 1-800-342-3377.

Very truly yours,
