COMPREHENSIVE TABLE

VOLUME A

CHAPTER I Rules of Procedure

Subchapter A General

Part

1 Definitions and Applicability

2	Rules of Conduct
3	Procedures Applicable to All Proceedings
4	Hearings
5	Discovery
6	Implementation of Provisions of the Public Officers Law
7	Implementation of State Environmental Quality Review Act
8	Declaratory Rulings
9	(Reserved)
10	Referenced Material
Subchapter B Procedures and Requirements Concerning Consumer Protections	
Part	
11	Home Energy Fair Practices Act and Energy Consumer Protection Act--Rules
12	Consumer Complaint Procedures
13	Rules Governing the Provision of Service by Gas, Electric and Steam Corporations to Nonresidential Customers
14	Rules Governing the Provision of Service by Certain Water Corporations to Residential Customers
Subchapter C Applications for Authority	
Article 1 General	
Part	
17	Matters Relative to All Applications
18	Financial Condition Defined
Article 2 Issuance of Certificates and Permits	
Part	
21	Gas, Electric, Steam, Waterworks, Telegraph and Telephone Corporations and Municipalities
Article 3 Transfer of Certificates, Permits and/or Property	
Part	
31	Gas, Electric, Steam, Waterworks, Telegraph and Telephone Corporations
Article 4 Securities	
Part	
37	Issuance of Stocks, Bonds, Notes or Other Evidences of Indebtedness: Gas, Electric, Steam, Waterworks, Telegraph and Telephone Corporations
38	Reorganizations
39	Acquisition of Capital Stock or Bonds of Gas, Electric, Steam, Waterworks, Telegraph and Telephone Corporations
Article 5 Uniform System of Accounts	

Part

46 Applications under Uniform System of Accounts

47 Applications Provided for in Notes to Accounts for Capital Stock
for Electric, Gas, Steam, Waterworks, Omnibus Corporations and
Class C Telephone Corporations

48 Material Changes in Accounting for Class A Utilities

Article 6 Miscellaneous

Part

55 Destruction of Records

56 Use of Revenues for Purposes other than Operating, Maintenance
and Depreciation Expenses, Construction, Extension, Improvement
or Maintenance, Payment of Indebtedness and Interest Thereon
or Dividends

57 Sundry Applications

58 Petitions for Exemption from Compliance with Provisions of the
Public Service Law

Subchapter D Rate Proceedings

Part

61 Rate Proceedings

Subchapter E Certificates of Environmental Compatibility and Public
Need for Steam Electric Generating Facilities

Part

70-80 (Reserved)

Subchapter F Long-Range Electric System Planning

Part

82-83 (Reserved)

84 Transmission Facilities Management

Subchapter G Certificates of Environmental Compatibility and
Public Need

Part

85 General Procedures

86 General Exhibits

87 Exhibits for Gas Transmission

88 Exhibits for Electric Transmission Filings

Subchapter H Miscellaneous

Part

89 Notification Requirements

CHAPTER II Electric Utilities

Subchapter A Service

Part

90 Consumer Deposits--Electric Corporations

- 91 Consumer Deposits--Municipal Utilities
- 92 Meters--Testing and Reporting
- 93 Approval of New Types of Electricity Meters,
Instrument Transformers and Auxiliary Devices
- 94 Use by Electric Corporation of Demand Meters and
Registers of the Indicating Type
- 95 (Reserved)
- 96 Residential Electric Submetering
- 97 Notice of Interruptions of Service
- 98 General Provisions Relating to the Extension of Facilities
by Electric Corporations and Municipalities
- 99 New Construction of Distribution Lines, Service Lines, and
Appurtenant Facilities in Certain Visually Significant
Resources Outside Residential Subdivisions
- 100 New Construction of Distribution Lines, Service Lines and
Appurtenant Facilities in Residential Subdivisions
- 101 Underground Electric Facility Construction
- 102 Installation of Non-Article VII Electric Transmission
Facilities
- 103-104 (Reserved)
- 105 Electric Utility Emergency Plans
- Subchapter B Securities
 - Part
 - 115 Notice of Issuance by Electric Corporations of Stocks,
Bonds, Notes, or Other Evidences of Indebtedness
- Subchapter C Safety
 - Part
 - 125 Reports of Accidents
 - 126 Electric Power Line Structure Safety Requirements
 - 127 Allowable Induced Voltage in Pipelines
- Subchapter D Rates and Charges
 - Part
 - 137 Penalties and Discounts--Consumers' Bills--Electric
Corporations
 - 138 Penalties and Discounts--Consumers' Bills--Municipal
Electric Utilities
 - 139 Combining Electric Service Rendered at One Location
Through Two or More Meters in Computing Bills
 - 140 Bills for Service--Electric Corporations
 - 141 Determination by Electric Corporations of Consumer Demand
 - 142 Charges for Special Services

- 143 Notice of Discontinuance and Complaint Procedures
- 144 (Reserved)
- 145 Interest on Customer Overpayments to Electric Utilities
- Subchapter E Records; Reports
 - Part
 - 150-152 (Reserved)
 - 153 Retention by Electric Corporations of Records at Principal Office
 - 154 Continuing Property Records--Electric Corporations
- Subchapter F Uniform Systems of Accounts
 - Article 1 Classes A and B
 - Part
 - 165 General Provisions
 - 166 Instructions--General
 - 167 System of Accounts Prescribed
 - Article 2 Classes C and D
 - Part
 - 180 General Provisions
 - 181 Instructions--General
 - 182 Instructions--Electrical Plant Accounts
 - 183 Instructions--Operating Revenue Accounts
 - Article 3 Municipal Electric Utilities
 - Part
 - 195 Abstracts from Law
 - 196 General Provisions
 - 197 Instructions
- Subchapter G Miscellaneous
 - Part
 - 215 Utility Contract and Procurement Procedures
 - 216 Contracts or Agreements for the Construction, Improvement, Extension or Maintenance of Utility Plant
 - 217 Numbering Poles or Structures for Carrying Overhead Wires
 - 218 Limitation of Liability Clauses--Electric Corporations

APPENDIXES

VOLUME B

CHAPTER III Gas Utilities

Subchapter A Service

Part

- 225 Consumer Deposits--Gas Corporations
- 226 Gas Meters and Accessories--Testing and Reporting

227	Approval of Types of Gas Meters and Accessories
228	Testing Gas Meters on Complaint of Customers
229	Gas Standards
230	Extension of Mains and Service Lines--Gas Corporations
231	Residential Submetering
232	Notice of Interruption of Service
233	Minimum Insulation Standards for the Provision of Gas and Electric Utility Services
Subchapter B Securities	
Part	
245	Notice of Issuance by Gas Corporations of Stocks, Bonds, Notes or Other Evidences of Indebtedness
Subchapter C Safety	
Part	
255	Transmission and Distribution of Gas
256	Inspection and Maintenance of Gas Holders
257	Liquefied Petroleum Gas Plants
258	Transportation of Liquid Petroleum
259	Liquefied Natural Gas
260	(Reserved)
261	Piping Beyond the Meter
262	Drug and Alcohol Testing
Subchapter D Rates and Charges	
Part	
270	(Reserved)
271	Penalties and Discounts--Consumers' Bills--Gas Corporations
272	Penalties and Discounts--Consumers' Bills--Municipal Gas Utilities
273	Bills for Service--Gas Corporations
274	Charges for Special Services
275	Notices of Discontinuance and Complaint Procedures
276	(Reserved)
277	Interest on Customer Overpayments to Gas Utilities
Subchapter E Records; Reports	
Part	
293	Retention by Gas Corporations of Records at Principal Office
294	Continuing Property Records--Gas Corporations
295	Accounts, Records and Reports of General Business Corporations Providing Incidental Utility Service

296 Producers of Indigenous Natural Gas--Records
Subchapter F Uniform Systems of Accounts
Article 1 Classes A and B
Part
310 General Provisions
311 Instructions--General
312 System of Accounts Prescribed
Article 2 Classes C and D
Part
320 General Provisions
321 Instructions--General
322 Instructions--Gas Plant Accounts
323 Instructions--Operating Revenue Accounts
Subchapter G Miscellaneous
Part
350 Utility Contract and Procurement Procedures
351 Contracts or Agreements for the Construction,
Improvement, Extension or Maintenance of Utility
Plant
352 Limitation of Liability Clauses--Gas Corporations
CHAPTER IV Steam Utilities
Subchapter A Service
Part
400 Installation of House Service Equipment, Operating
Conditions, and Testing of Meters and of Steam
Quality by Corporations Having 1,000 Installed
Customers' Meters
401 (Reserved)
402 Consumer Deposits--Steam Corporations
Subchapter B Securities
Part
410 Notice of Issuance by Steam Corporations of Stocks,
Bonds, Notes or Other Evidences of Indebtedness
Subchapter C Safety
Part
420 Distribution of Steam

NYCRR

CHAPTER I

Rules of Procedure

meanings specified:

(a) agency: any department, board, bureau, commission, division, office, council, committee, public benefit corporation, public authority, or other governmental entity of the State of New York.

(b) Chairman: the Chairman of the Public Service Commission.

(c) General Counsel: the Counsel to the Public Service Commission.

(d) party: any person or agency named or admitted to participate in a proceeding or properly seeking and entitled as of right to be so admitted.

(e) active party: a party included on a list of active parties prepared by a presiding officer pursuant to §4.3(b) of this Title.

(f) presiding officer: the Commissioner, or the Administrative Law Judge or other officer or employee of the Commission so authorized by the Chairman or by the Chairman's designee, presiding over a proceeding or conducting an investigation or hearing.

(g) Secretary: the Secretary to the Commission.

(h) trial staff: staff of the Department of Public Service designated to participate as a party in a particular proceeding. An individual need not appear as a witness to be considered part of trial staff.

(i) overnight delivery service: any delivery service which regularly accepts items for overnight delivery to any address in the State.

(j) web posting: publication of a document on the World Wide Web at an address that is known and accessible to all parties entitled to be provided with a copy of the document, in a format that allows the document to be downloaded, searched, saved and printed.

(k) electronic signature: an electronic sound, symbol, or process, incorporated within, attached to or logically associated with an electronic document and executed or adopted by a person with the intent to sign the document.

(l) electronic filing: delivery of a document to the Secretary by e-mail or such other electronic means as may be authorized by the Secretary.

(m) electronic service: delivery by e-mail, or such other electronic means as may be authorized by the Secretary, of:

(1) a notice of web posting providing a web address linking directly to the document being served; or

(2) the document itself in a format that permits it to be searched, saved and printed by the recipient.

(n) in writing, written: denotes a tangible or electronic record of a communication or representation, including handwriting, typewriting, printing, photocopying, photography, audio or video recording and email;

a "signed" writing includes a writing containing an electronic signature.

.SO DOC 16A-1.3

NYCRR

1.3 Applicability.

The provisions of this subchapter shall not apply to complaints and other matters arising under Subchapter B of this Chapter, except insofar as any such matter becomes the subject of a formal proceeding instituted by the Commission following a party's appeal from the decision of an informal hearing officer.

.SO DOC 16A-PT2

NYCRR

PART 2

RULES OF CONDUCT

(Statutory authority: Public Service Law, §§ 4(1), 20(1))

Sec.

2.1 Parties and representatives

2.2 Recusal

.SO DOC 16A-2.1

NYCRR

Section 2.1 Parties and representatives.

(a) A party's case may be presented personally or through a representative. A party's representative need not be an attorney, but all persons appearing before the Commission must conform to the standards of conduct required of attorneys appearing before the courts of the State of New York. Any person signing a pleading or brief or entering an appearance in any proceeding will be considered to have agreed to conform to those standards. A failure to conform to those standards will be grounds for exclusion from that and any later proceeding.

(b) When a person submits a request for permission to intervene or a notice of intent to be a party in a proceeding pursuant to §§4.3(c) or 85-2.11(b) and (c) of this Title, a request for party status shall be included, stating:

(1) the name, address, telephone number, and e-mail address on whose behalf the request for party status is being submitted;

(2) the name of such person's attorney or other representative (if applicable) upon whom service should be made; and

(3) any consent to electronic service given pursuant to §3.2(b)(1) of this Title.

.SO DOC 16A-2.2

NYCRR

2.2 Recusal.

No presiding officer shall preside over, and no member of the Commission shall participate in making a decision in, a proceeding in

which such officer or Commissioner has a personal bias or interest with respect to the matter involved. Any party may submit a motion for recusal of a presiding officer or Commissioner. Such motion shall be accompanied by an affidavit setting forth in detail the facts alleged to constitute grounds for disqualification. The motion shall be submitted to the individual whose recusal is sought, and a copy filed with the Secretary.

.SO DOC 16A-PT3

NYCRR

PART 3

PROCEDURES APPLICABLE TO ALL PROCEEDINGS

(Statutory Authority: Public Service Law, §§ 4(1), 8, 19
20(1), 22, 23, 66(10), 66(11), 80(8), 80(9),
89-c(8), 89-c(9), 94(3))

Sec.

3.1 Applications to other authorities

3.2 Service and effectiveness of Commission documents

3.3 Waivers

3.4 Subpoenas

3.5 Documents filed with the Secretary

3.6 Motion practice

3.7 Rehearings

3.8 Oral argument before the Commission

3.9 Settlement procedures

.SO DOC 16A-3.1

NYCRR

Section 3.1 Applications to other authorities.

Any person submitting an application that is subject also to the jurisdiction of a federal agency, a regulatory agency of another state, or another New York state agency shall state in the application whether a corresponding application has been submitted to that other agency (or when it will be submitted) and what action, if any, has been taken on it.

.SO DOC 16A-3.2

NYCRR

3.2 Service and effectiveness of Commission documents.

(a) (1) Every order of the Commission will be filed in the principal office of the Commission and served upon all parties to the proceeding in which it is issued, any other person requesting inclusion on the service list for such proceeding, and any person to whom, or corporation to which, the order issues a directive or prohibition (who or which shall be deemed to be a person or corporation to be affected by such order within the meaning of §23(1) of the Public Service Law). A certified copy or a copy bearing the seal of the Commission will be

provided upon request.

(2) Unless a statute, order, notice or ruling provides otherwise, such order, notice or ruling is effective upon issuance, which occurs when it is posted on the Commission's website.

(3) When a party appears by a representative, service on the representative will be deemed proper service on the party.

(b) (1) To the extent required by statute, every order of the Commission will be served personally or by mail on each party to the proceeding in which it is issued and any person to whom the order issues a directive or prohibition, unless such party (or a representative by whom the party appears, such as an attorney or corporate officer) or person consents in writing to electronic service. Such written consent shall:

- (i) be filed with the Secretary in writing;
- (ii) state that the consenting person is authorized to do so;
- (iii) state that the consenting person or party has knowingly waived the right specified in §23(1) of the Public Service Law to be served personally or by mail; and
- (iv) specify any other terms of the consent which, unless otherwise specified, will continue in force until revoked.

(2) Commission documents other than orders will be served personally, by mail, by electronic service or by overnight delivery service.

(3) Electronic service is deemed complete upon sending. Personal service is complete upon delivery. Service by mail or by overnight delivery is deemed complete at the time of sending.

.SO DOC 16A-3.3

NYCRR

3.3 Waivers.

(a) (1) Any filing deadline, method of filing, number of copies, or page limitation for any document required or authorized to be filed with the Commission (other than a document filed in response to a specific Commission order) may be modified by the Secretary for the purpose of promoting the fair, orderly, and efficient conduct of the case. The Secretary's decision with respect to any such deadline or limitation shall be non-reviewable.

(2) The Secretary shall follow reasonable procedures in administering this subdivision, including the allowance of oral requests and rulings subject to such notification requirements as the Secretary may deem reasonable in the circumstances.

(b) (1) Any request for an extension of time to comply with any requirement, other than a request governed by the preceding subdivision, may be granted by the Secretary for the purpose of promoting the fair,

orderly, and efficient conduct of the case, except that the Secretary shall refer to the Commission any such request that would constitute a major modification of the requirement.

(2) A petition for waiver pursuant to this subdivision shall be in writing and shall be filed in advance of the expiration of the time limit at issue. It shall describe in detail:

- (i) the efforts made to comply on time with the requirement;
- (ii) the circumstances alleged to have precluded timely compliance;
- (iii) other factors warranting an extension of time; and
- (iv) the amount of additional time being requested.

(c) Waivers not governed by subdivision (a) or (b) of this section may be granted only by the Commission. A petition for such a waiver shall be in writing and describe in detail the circumstances alleged to warrant the waiver.

(d) Requests for waivers pursuant to this section shall be on notice to all parties, except where the party requesting the waiver shows that time constraints or other circumstances preclude such notice.

(e) This section does not apply to requests for waiver of requirements imposed by a presiding officer in a proceeding or for waiver of the deadlines for responding to pleadings addressed to a presiding officer. Any such request shall be submitted to and ruled on by the presiding officer.

.SO DOC 16A-3.4

NYCRR

3.4 Subpoenas.

(a) Upon the application of any party to a proceeding, subpoenas and subpoenas duces tecum may be signed and issued by a Commissioner, by the presiding officer in the investigation or hearing in which the subpoena or subpoena duces tecum is requested, or by the Secretary. Normally, it is expected that requests for subpoenas will be presented to the presiding officer where one has been assigned. A copy of any request for a subpoena duces tecum shall be served on the party alleged to possess the documents requested.

(b) A subpoena duces tecum will be issued only upon written application at least seven days in advance of the hearing, setting forth the documents desired to be produced and the reasons they are reasonably related to the subject of the proceeding.

(c) Whenever a subpoena is issued at the request of any party, the cost of service thereof and the fee of the witness shall be borne by the party at whose request the witness is summoned.

(d) Except as otherwise provided in this Title, matters related to subpoenas and subpoenas duces tecum shall be governed by the provisions

of the Civil Practice Law and Rules.

.SO DOC 16A-3.5

NYCRR

3.5 Documents filed with the Secretary.

(a) Unless modified pursuant to § 3.3(a)(1), the following requirements apply to all documents filed with the Secretary.

(1) Documents shall be filed electronically unless the filing party certifies that it is unable to do so, in which case a paper document may be filed, together with the required certification signed by the filing party or the party's representative.

(2) Any paper versions requested by the Secretary must be hand-delivered no later than the day after the electronic filing or, if sent by overnight delivery service or ordinary mail, must be processed by the delivery or postal service by midnight of the same day as the filing.

(3) When a party files only paper documents pursuant to subdivision (a)(1) of this section, the party must provide a clear and permanently legible original to the Secretary, unless otherwise directed by the Secretary. The paper document must be received on or before the due date for the filing.

(b) A document presented for filing shall:

(1) be formatted for a page size of 8-1/2" by 11", with margins of no less than one inch on all four sides. (Exhibits attached to paper filings shall be folded to the same size);

(2) be produced with a font size no smaller than 11-point or its equivalent, and be double-spaced, except that footnotes and lengthy quotations may be single-spaced;

(3) for paper documents, be printed on both sides of the page;

(4) include, on the first or cover page, the caption for the proceeding and case number, if any; the title of the document; the name, address, e-mail address and telephone number of the party submitting it or the party's representative; and, if requesting the initiation of a new proceeding, a space for the case number;

(5) identify the other parties on which it was served; and

(6) be signed by or on behalf of, the submitting party. Electronic documents shall have electronic signatures as directed by the Secretary. Paper documents shall have a handwritten or printed signature. If the signature is by a representative of the party, the representative's title (if any) shall be provided.

(c) Additional requirements for electronically filed documents.

(1) Documents presented for filing electronically shall be:

(i) in a format that can be read using software that is readily

available and is in widespread use by government, business and individuals; and

(ii) be electronically searchable unless the party providing the document certifies that it does not have the capability to produce a searchable file.

(2) Formats acceptable for the filing of documents will be identified from time to time by the Secretary.

(3) Additional guidance on electronically filed documents will be provided from time to time by the Secretary.

(d) A document presented for filing electronically will be deemed filed at the time it is received by the Secretary. A document presented for filing in paper form only will be deemed filed at the time it is received at the Commission's Albany office. The Secretary, for the purpose of promoting the fair, orderly, and efficient conduct of the case, may authorize other arrangements.

(e) Service of documents:

(1) A party who presents a document for filing in a proceeding in which there are other parties shall at the same time service the document on each such party. A document requesting the institution of a new proceeding shall be served on any affected utility and on such other person or entities as the Secretary may direct.

(2) When a document is served by a party on another party, service shall be by electronic means unless the serving and receiving parties agree otherwise, or the Secretary or presiding officer, upon a showing of good cause, authorizes the use of a different means of service.

(3) Electronic service is deemed complete upon sending. If service by other means is agreed upon or authorized pursuant to paragraph (2) of this subdivision, it will be deemed complete when delivered in-hand to the addressee or when sent by United States mail or overnight delivery service.

(f) When a reply must be submitted or other action taken within a specified number of days from the service of a document, that time shall be extended by five days if service was by mail and by one day if service was made electronically or by overnight delivery.

(g) Documents filed may be amended on notice to all parties on whom the original document was served. The Secretary or presiding officer may reject any amendment upon finding that its acceptance would be unfair to other parties.

(h) The requirements of this section may not be avoided by a party's use of a "letter in lieu of a brief" or similarly styled document; but this provision shall not preclude acceptance of letters and informal

documents from the general public.

(i) A document requesting the Commission to adopt a rule pursuant to the State Administrative Procedure Act shall include a draft of the required notice of proposed rulemaking in the form required by that statute and specified by the Department of State. If the filing party is requesting the Commission to take any action on an emergency basis pursuant to §202(6) of the State Administrative Procedure Act, the document requesting such action shall include a proposed statement, in sufficient detail to satisfy the statute, of why emergency action is needed.

(j) All documents addressed to or submitted to a presiding officer which are required to be served on all parties to a proceeding, with the exception of discovery requests and responses, must also be filed with the Secretary.

.SO DOC 16A-3.6

NYCRR

3.6 Motion practice.

(a) All written motions shall, pursuant to § 3.5 of this Part, be filed with the Secretary and at the same time be served on each party to the proceeding. Oral motions may be made at hearings or in extraordinary circumstances where required by the public interest. Any oral motion not made at a hearing shall be on oral notice to all parties to the proceeding.

(b) In cases in which a presiding officer has been assigned and a recommended decision not yet been issued, motions shall be addressed to the presiding officer. In all other instances, motions shall be addressed to the Secretary.

(c) Motions shall clearly set forth the nature of the relief requested and the alleged basis for it.

(d) (1) Parties wishing to respond to motions shall do so within eight days after service unless a different time period is permitted by § 3.5(f) of this Part or is otherwise established by the presiding officer or the Secretary.

(2) The response shall be addressed to the official to whom the motion was addressed and, pursuant to § 3.5 of this Part, be filed with the Secretary and at the same time be served on each party to the proceeding.

(3) Replies to responses will not be entertained except in extraordinary circumstances or if the response itself seeks relief and effectively constitutes a counter-motion.

.SO DOC 16A-3.7

NYCRR

3.7 Rehearings.

(a) Any person interested in an order of the Commission may request rehearing within 30 days of service of the order. The petition for rehearing shall, pursuant to § 3.5 of this Part, be filed with the Secretary and at the same time be served on each party to the proceeding.

(b) Rehearing may be sought only on the grounds that the Commission committed an error of law or fact or that new circumstances warrant a different determination. A petition for rehearing shall separately identify and specifically explain and support each alleged error or new circumstance said to warrant rehearing.

(c) Any party may respond to a petition for rehearing within 15 days of the date the petition was served on the responding party, but the Commission may deny a petition before that time has elapsed. Pursuant to § 3.5 of this Part, a response shall be filed with the Secretary, and at the same time be served on each party to the proceeding. Replies to responses will not be entertained except in extraordinary circumstances.

(d) The filing of a petition for rehearing does not in itself stay or excuse compliance with an order.

.SO DOC 16A-3.8

NYCRR

3.8 Oral argument before the Commission.

(a) The Commission may authorize oral argument before it in any proceeding on its own motion or at the request of a party. In general, oral argument before the Commission will be allowed only in unusual cases, where the issues are not adequately developed in testimony and written pleadings.

(b) A party requesting oral argument before the Commission may do so in any brief to the Commission or in a separate motion filed no later than the deadline for the final authorized round of briefs. Any such request shall include an explanation of why the party believes oral argument is warranted.

(c) The issues that may be raised on oral argument, and the parties authorized to argue, shall be determined by the Commission. The time allowed each party shall be determined by the Secretary.

(d) This section does not apply to oral argument before a presiding officer, which shall be allowed to the extent and in the manner permitted by the presiding officer in any proceeding.

.SO DOC 16A-3.9

NYCRR

3.9 Settlement procedures.

(a) Notification required for settlement discussions in pending proceedings involving large utilities. {1}

(1) As soon as it appears, based upon exploratory discussion with

another party or potential party, that settlement of an issue or issues in a pending proceeding is possible, the utility shall file, with the Secretary, a notice of impending negotiation. The notice shall contain the following:

- (i) a general description of the issues that may be settled;
- (ii) a list of the persons or parties to the negotiations; and
- (iii) a certification by a duly authorized representative of the utility that all appropriate persons and parties have been or will be notified of the pendency of negotiations in a manner so as to permit a reasonable time for preparation.

(2) The Administrative Law Judge assigned to the case shall review the notice to ensure all persons who reasonably should have been notified of the pendency of the negotiations have been afforded a reasonable opportunity to participate. The Administrative Law Judge may take any action necessary to protect the rights of persons participating or desiring to participate in the negotiations or who reasonably should have been notified of the pendency of negotiations. The Administrative Law Judge shall report the results of the procedural review to the Commission.

(b) Notification required for settlement discussions in pending proceedings involving small utilities. {2} The procedures for notification of impending negotiations in cases involving small utilities shall be the same as set forth in subdivision (a) of this section except, that if an Administrative Law Judge has not been assigned to the proceeding, the Director of the appropriate Division will carry out those responsibilities assigned to the Administrative Law Judge in paragraph (a)(2) of this section.

(c) Notification required for settlement discussions in anticipation of a formal proceeding.

(1) In the event the potential to settle issues between adverse entities arises outside the context of a formal proceeding or in anticipation of a formal filing, a utility shall file a notice of intention to negotiate with the Secretary and shall give notice to all persons who participated in either of the subject utility's two most recent proceedings of the same or similar type as that in which the settlement negotiations are proposed and to any other person reasonably known to have an interest in the outcome of negotiations and can reasonably be expected to engage actively in the negotiations. The notice shall contain the same information as required by paragraph (a)(1) of this section.

(2) The utility shall be responsible to determine the list of

potential parties and, in the event of uncertainty, may seek guidance through the Secretary's Office.

(3) The responsibilities outlined in paragraph (a)(2) of this section shall be carried out by the Administrative Law Judge, if one is assigned, or by the Director of the appropriate division, if an Administrative Law Judge is not assigned.

(d) Confidentiality of settlement discussions. No discussion, admission, concession or offer to stipulate or settle, whether oral or written, made during any negotiation session concerning a stipulation or settlement shall be subject to discovery, or admissible in any evidentiary hearing against any participant who objects to its admission. Participating parties, their representatives and other persons attending settlement negotiations shall hold confidential such discussions, admissions, concessions, and offers to settle and shall not disclose them outside the negotiations except to their principals, who shall also be bound by the confidentiality requirement, without the consent of the parties participating in the negotiations. The Administrative Law Judge assigned to the case, or the Director of the appropriate division if no Administrative Law Judge has been assigned, may impose appropriate sanctions for the violation of this subdivision which may include exclusion from the settlement process.

(e) Confidentiality in mediations. The confidentiality provisions set forth in subdivision (d) of this section shall apply to a neutral and any agent or employee of the Department of Public Service participating in a mediated proceeding. A mediated proceeding is any process in which an alternative dispute resolution technique is used to resolve an issue in controversy, where a neutral may be appointed and specific parties participate. In particular, any oral or written communication prepared for the purpose of a mediated proceeding (mediation communication), shall not be required to be disclosed. A written agreement to enter into a mediated proceeding or reached as a final result of such proceeding, or any communication the parties agree is public information, is not a mediation communication.

{1} The term large utility as used in this section means Class A and B electric and gas companies and Class A telephone and water companies.

{2} The term small utilities as used in this section means Class C and D electric and gas companies, Class B telephone companies and Class B, C and D water companies. Class E water companies which have less than \$100,000 in annual gross revenues, have been excluded from these regulations.

NYCRR

PART 4

HEARINGS

(Statutory Authority: Public Service Law,
§§ 4(1), 8, 19, 20(1), 20(2), 22, 23)

Sec.

4.1 In general

4.2 Notice

4.3 Parties

4.4 Pre-hearing conference

4.5 General procedures

4.6 Postponements and adjournments

4.7 Interlocutory review

4.8 Briefs and argument to the presiding officer

4.9 Reports and recommended decisions

4.10 Exceptions

.SO DOC 16A-4.1

NYCRR

Section 4.1 In general.

Hearings will be held in cases where required by law and in such other cases as the Commission may direct. Evidentiary hearings shall be governed by the provisions of this part, except as otherwise specifically provided in this Title. Legislative-type hearings shall be conducted in accordance with such procedures as the Commission may direct.

.SO DOC 16A-4.2

NYCRR

4.2 Notice.

The time and place of each hearing may be determined by the Commission, the Secretary, or the presiding officer. Notice of hearings, specifying time, place, and purpose, will be given in accordance with statutory requirements and such additional requirements as the Commission, the Secretary, or the presiding officer may direct. Any party required to publish or otherwise issue notice shall file proof of having done so at or before the hearing.

.SO DOC 16A-4.3

NYCRR

4.3 Parties.

(a) Only the parties to a proceeding may present evidence and examine and cross-examine witnesses.

(b) (1) Parties to a proceeding shall include the applicant, petitioner, or complainant, if any; the affected utility company or certificate holder (even if not the applicant or petitioner); trial staff; appearing agencies; and other persons permitted by statute or

regulation or by the presiding officer to intervene.

(2) In cases having numerous parties, the presiding officer may promulgate a list of active parties and identify types of documents that need not be served on parties omitted from that list. Omission from that list, however, shall not otherwise affect a party's standing.

(3) To avoid unnecessary duplication, the presiding officer may require parties with similar interests to consolidate their presentations.

(c) (1) Any person may ask the presiding officer for permission to intervene. Permission will be granted if the intervention is likely to contribute to the development of a complete record or is otherwise fair and in the public interest.

(2) Permission to intervene after a hearing has commenced may be sought and granted at any time, unless the presiding officer determines that granting such permission would be unfairly prejudicial to other parties. A party intervening after the start of the hearing shall be bound by the record as developed to that point and by such conditions of intervention as the presiding officer may impose.

(d) Staff counsel shall provide the presiding officer and all parties a list of persons designated to serve as trial staff in the case as soon as it is practical to do so and shall promptly report any additions to the list. A person once included on the list may not later be deleted.

.SO DOC 16A-4.4

NYCRR

4.4 Pre-hearing conference.

(a) A presiding officer may convene a pre-hearing conference to formulate or simplify issues; arrange for the exchange of testimony and exhibits; limit the number of witnesses; set schedules; or otherwise expedite the orderly conduct of the proceeding.

(b) Facts disclosed in pre-hearing conferences shall be privileged. Except by agreement, they may not be used against participating parties unless proven by independent evidence.

.SO DOC 16A-4.5

NYCRR

4.5 General procedures.

(a) At hearings, parties to the proceeding will be afforded reasonable opportunity to present evidence and examine and cross-examine witnesses. Examination of all witnesses will be conducted orally and stenographic minutes will be taken.

(b) (1) Any party or prospective party presenting an initial or rebuttal case in a proceeding shall do so by means of prepared written testimony and exhibits, except that a presiding officer, for good cause in extraordinary circumstances, may allow direct oral testimony to be

given.

(2) Prepared written testimony, in question-and-answer form, shall be received in evidence with the same force and effect as though it were stated orally by the witnesses, provided that each of the witnesses is present at the hearing at which his or her prepared written testimony is offered and adopts that testimony under oath. If cross-examination of a witness' prepared written testimony is waived by all other parties, that witness need not be present and his or her testimony may be adopted by affidavit submitted to the presiding officer.

(3) Anyone wishing or required to submit prepared written testimony shall comply with the following requirements:

(i) The testimony shall be prepared in question-and-answer form unless the presiding officer determines that use of some other form would enhance the record.

(ii) The testimony shall be double-spaced and the top, bottom and left-hand margins shall be at least one and one-half inches.

(iii) The name of the witness shall be at the top center of each page one inch from the edge, the case number, if already assigned, shall appear in the upper left corner of each page, and the page number for each page shall be located at the bottom center one inch from the edge. The number of each line of the testimony shall be set out on the left-hand side of each page, to the right of the area constituting the margin.

(iv) A square of approximately one and one-half inches in the upper right-hand corner of each page shall be left clear for Public Service Commission use.

(4) If written testimony is not filed in the proper form, it will be treated as the presiding officer may direct, taking account of such factors as timing, extent of noncompliance, and prejudice to other parties.

(5) Exhibits shall be prepared as a document separate from the testimony and shall be identified by the initials of the sponsoring witness and a number. Pages shall be single-sided and numbered.

(c) (1) Except as otherwise provided in subdivision (d) of this section, a copy of written testimony and exhibits shall be filed with the Secretary and shall be served on the presiding officer and on each party, unless the presiding officer or a provision of this Title otherwise directs.

(2) If an exhibit consists of a drawing, map, plan, or other information that is difficult to reproduce, parties may consult with the presiding officer regarding the preferred method of service upon other

parties and shall consult directly with the Secretary as to the format requirements for filing.

(d) (1) In any case in which a major rate change (as defined in the Public Service Law) is proposed, the utility company shall submit with its tariff filing the prepared written testimony and exhibits that will comprise its initial case in support of its rate filing and shall forward a copy to the New York State Consumer Protection Board. In addition, the utility company shall serve a copy of the testimony and exhibits on each party appearing in the proceeding who so requests.

(2) At the hearing, the utility company's initial case shall be limited substantially to the material submitted with its tariff filing, except as otherwise provided in this Title or unless the presiding officer, for the purpose of promoting the fair, orderly, and efficient conduct of the case, shall rule otherwise.

(e) In proceedings set for hearing, discovery of information will be allowed in accordance with Part 5 of this Title.

(f) The presiding officer at any hearing shall have the powers granted by applicable statutes and regulations as well as all authority customarily exercised by presiding officers and not inconsistent with applicable statutes and regulations.

.SO DOC 16A-4.6 NYCRR

4.6 Postponements and adjournments.

All parties should be prepared to proceed at the first hearing called in any proceeding. Any motion to postpone the first hearing shall set forth the reasons why the postponement is needed and be filed in time to permit other parties to be notified. Any hearing may be adjourned from time to time by the presiding officer, and the first hearing may be postponed by the presiding officer even if its date was set by order of the Commission.

.SO DOC 16A-4.7 NYCRR

4.7 Interlocutory review.

(a) Interlocutory review of a ruling by a presiding officer will be available and may be sought only in extraordinary circumstances or in case a request for permission to intervene has been denied. Normally, the prospect of parties incurring additional workload in consequence of a ruling will not in itself constitute extraordinary circumstances.

(b) Any request for interlocutory review must be filed within 15 days of the issuance of the ruling to which it pertains.

(c) In addition to complying with the requirements applicable to motions generally (see § 3.6 of this Title), a motion for interlocutory review shall:

(1) identify specifically the ruling to be reviewed, and, if the ruling was issued from the bench, set forth as an appendix the pertinent pages of the transcript; and

(2) identify the extraordinary circumstances alleged to warrant interlocutory review.

(d) A party need not file an interlocutory appeal to preserve its right to object to a ruling in its briefs.

.SO DOC 16A-4.8

NYCRR

4.8 Briefs and argument to the presiding officer.

(a) Briefs shall be addressed to the presiding officer unless the Commission determines in any proceeding that briefs shall be addressed directly to it. In that event, references in this section to the presiding officer shall be deemed to refer to the Secretary.

(b) The presiding officer shall determine the number of briefs that may be written, the schedule for filing them, and the page limitations if any. Copies of exhibits may be appended to any brief without being charged against a page limitation. The presiding officer may authorize oral argument where he or she finds it warranted and determine the scope of any such argument and the procedures to be followed.

(c) Briefs shall meet the general requirements for documents filed with the Secretary, set out in § 3.5 of this Title. In addition, any brief longer than 10 pages, (exclusive of exhibits) shall include a table of contents.

(d) Pursuant to § 3.5 of this Title, each brief shall be filed with the Secretary, and at the same time be served on each party to the proceeding.

.SO DOC 16A-4.9

NYCRR

4.9 Reports and recommended decisions.

(a) In any case set for hearing, the presiding officer may submit a report to the Commission or prepare a recommended decision. If a report is submitted, the Commission may decide the case without further proceedings.

(b) If a recommended decision is prepared, the Secretary shall determine in the first instance whether to issue it for exceptions or to present it directly to the Commission. If it is presented to the Commission, the Commission may adopt it (with or without modification) without further proceedings or may direct that it be issued for exceptions. If the Commission directs issuance of a recommended decision, it may restrict exceptions to specified issues. A recommended decision that is issued for exceptions shall be served on all parties.

.SO DOC 16A-4.10

NYCRR

4.10 Exceptions.

(a) If a recommended decision is issued for exceptions, each party may file a brief on exceptions and a brief opposing exceptions, but the Secretary may determine that briefs opposing exceptions will not be entertained. Unless otherwise specifically authorized by the Secretary for the purpose of promoting the fair, orderly, and efficient conduct of the case, pleadings additional to those authorized by this section will not be entertained.

(b) Briefs on exceptions may be filed within 20 days of the issuance of the recommended decision, and briefs opposing exceptions may be filed within 15 days thereafter. The Secretary may extend or curtail these time limits at the request of a party or on the Secretary's own motion.

(c) (1) In addition to meeting the requirements of this subdivision, briefs on exceptions and briefs opposing exceptions shall comply with the requirements of § 3.5 of this Title and § 4.8 of this Part. They shall be self-contained, and may not incorporate earlier pleadings by reference.

(2) A brief on exceptions shall contain:

(i) a short statement of the case;
(ii) a summary of the party's basic position;
(iii) the grounds on which the exceptions rest; and
(iv) the argument in support of the exceptions, including references to the record and to authorities relied on. The argumentation should not simply reiterate the party's position, but should explain why the party believes the recommended decision to be in error.

(3) A brief opposing exceptions shall be directed only at exceptions raised by other parties, and may not raise issues not raised on exceptions. It shall identify each exception replied to.

(4) If only a brief on exceptions is authorized, it may not exceed 50 pages. If briefs on exceptions and opposing exceptions are authorized, they may not exceed 100 pages in total. The Secretary may modify these page limitations at the request of a party or on the Secretary's own motion.

(d) (1) All recommended decisions shall be subject to review by the Commission, in whole or in part, regardless of whether exceptions have been filed.

(2) A party's failure to except with respect to any issue shall constitute a waiver of any objection to the recommended decision's resolution of that issue. If the Commission adopts the recommended resolution, a party that has not excepted may not seek a different resolution of that issue on rehearing.

NYCRR

PART 5

DISCOVERY

(Statutory Authority: Public Service Law, §§ 4 (1),
20 (1); Public Officers Law, § 87)

Sec.

5.1 Generally

5.2 Informal discovery

5.3 Interrogatories

5.4 Requests for documents

5.5 Requests for admissions

5.6 Other discovery

5.7 Supplementation of responses

5.8 Scope of discovery

5.9 Miscellaneous procedures

5.10 Sanctions

.SO DOC 16A-5.1

NYCRR

Section 5.1 Generally.

(a) Consistent with the limitations and procedures set forth in this part, parties shall fully disclose to each other, upon request, all information (including data, records, objects, and documents) relevant and material to a proceeding in which they are participating and any information likely to lead to such information. The provisions of this part apply to formal proceedings, and do not limit any other authority of the Commission or its staff to obtain information from a utility company, or other entity.

(b) To the maximum extent possible, discovery requests and responses pursuant to this Part shall be served electronically.

.SO DOC 16A-5.2

NYCRR

5.2 Informal discovery.

(a) Parties are encouraged to communicate and exchange information informally, including by telephone or by meeting, and to use the formal procedures provided for below only as necessary.

(b) Material or information provided by one party to another through informal discovery need not, for that reason alone, be made available to third parties. Nevertheless, no party may refer to, introduce into evidence, or otherwise use at a hearing, except in its pre-filed written testimony or in response to cross-examination, any information obtained through informal discovery unless that party first shows that all other active parties received or had a reasonable opportunity to receive that response reasonably in advance of the hearing at which such use is

proposed.

.SO DOC 16A-5.3

NYCRR

5.3 Interrogatories.

(a) After a proceeding is commenced and until any cut-off point that the presiding officer may set, any party may serve written interrogatories on any other party. Each interrogatory shall be clear and concise, and, to the degree possible, employ technical terms in the way they are usually employed in Commission proceedings; encompass only questions related to each other; and be presented on a separate page. Each party's interrogatories (and document requests pursuant to § 5.4 of this Part) shall be numbered consecutively throughout the proceeding. A copy of every interrogatory shall be served on each party, and on the presiding officer, if he or she so requests.

(b) An individual knowledgeable as to the content of each response to an interrogatory may be required to testify as to its truth or accuracy. If the name of that individual is not set forth on the response, it shall be provided promptly by the responding party upon request.

(c) Except as provided below, a party to whom an interrogatory is directed shall answer each question separately in writing, and shall set forth the question immediately before its answer. Answers shall be served on the requesting party within 10 days following service of the interrogatory, and a copy shall be served on any presiding officer or party who so requests.

(d) If the interrogated party cannot prepare a response within 10 days, it shall, within the 10 days, so inform the interrogating party and state when the response will be forthcoming. Any ensuing dispute over timing of the response shall be submitted to the presiding officer for resolution.

(e) Any objection to an interrogatory shall be made in writing and served on all parties and the presiding officer within 10 days of service of the interrogatory. The interrogatory need not be answered while the objection remains pending. If the presiding officer overrules the objection, the answer to the interrogatory shall be served within five days following the issuance of the ruling or within 10 days following service of the interrogatory, whichever is later.

.SO DOC 16A-5.4

NYCRR

5.4 Requests for documents.

(a) After a proceeding is commenced and until any cut-off point that the presiding officer may set, any party may serve a written request for documents (including writings, drawings, and electronically stored information) on any other party. The request shall describe the

documents sought with reasonable particularity, though the description may be by clearly defined category rather than by item. A copy of every request shall be served on each party, and on the presiding officer, if he or she so requests.

(b) Except as provided below, a party to whom a request for a document is addressed shall furnish a copy of the document to the requesting party within 10 days of service of the request. A copy of each document shall be provided to any presiding officer or party who so requests. Electronic service of a copy of the document satisfies this obligation.

(c) If the party from which a document is sought cannot provide a copy within 10 days, it shall, within the 10 days, so inform the requesting party and state when the copy will be forthcoming. Any ensuing dispute over timing of the response shall be submitted to the presiding officer for resolution.

(d) Any objection to a document request shall be made in writing and served on all parties and the presiding officer within 10 days of service of the request. The document need not be supplied while the objection remains pending. If the presiding officer overrules the objection, the document shall be supplied within 5 days following the issuance of the ruling or within 10 days following service of the request, whichever is later.

(e) If a requested document is voluminous, the responding party may permit the requesting party to examine the document at the responding party's office and then supply a copy of only so much of the document as the requesting party finds it needs. The times, locations, and conditions for such examination shall be reasonable, and the presiding officer shall ensure that responding parties do not use this option to impose unfair burdens on requesting parties or otherwise hinder discovery.

.SO DOC 16A-5.5

NYCRR

5.5 Requests for admissions.

(a) After a proceeding is commenced and until any cut-off point that the presiding officer may set, any party may serve on any other party a request to admit the genuineness of a document, the accuracy or fairness of representation of photographs, drawings, or maps, or the truth of any statement of fact. A copy of every request shall be served on each party and the presiding officer, if he or she so requests.

(b) Responses to requests for admission shall be served within 10 days of service of the request. A copy of the response shall be served on each party and on the presiding officer.

(c) Any request for admission not denied within 10 days will be deemed

granted, except in extraordinary circumstances where the failure to deny within that time is shown to be justified.

(d) Admissions made or deemed to be made will be applicable only to the proceeding in which they are requested.

.SO DOC 16A-5.6 NYCRR

5.6 Other discovery.

The presiding officer, on request or by his or her own motion, may authorize other forms of discovery, including oral depositions and inspection of sites, facilities, or original documents. A party requesting such procedures shall show that the likely benefits cannot otherwise be obtained and outweigh the associated costs.

.SO DOC 16A-5.7 NYCRR

5.7 Supplementation of responses.

A party shall promptly amend a previous discovery response if, during the course of the proceeding, it learns that the previous response was incorrect when made or, though correct when made, is no longer so in a material respect.

.SO DOC 16A-5.8 NYCRR

5.8 Scope of discovery.

(a) Discovery requests should be tailored to the particular proceeding and commensurate with the importance of the issues to which they relate. They should be limited to materials or information that:

(1) the requesting party expects to use in cross-examination or in preparing its case;

(2) are not already possessed by or readily available to that party; and

(3) are not conveniently obtainable elsewhere. Unduly broad requests will not be allowed.

(b) Discovery that is unreasonably cumulative, repetitive, or duplicative will not be allowed.

(c) In general, a party will not be required to develop information or prepare a study for another party. In unusual circumstances, however, where a party from which discovery is sought uniquely possesses the information needed for a study and the ability to prepare the study (for example, computerized data and a program for manipulating them), a request to develop information may be granted if the information appears material and the request, considered on its own and in the context of other similar requests in the proceeding, does not appear unduly burdensome or costly. The presiding officer may condition the granting of such a request on the requesting party's agreement to bear specified costs of performing the study. In no event would a party preparing a

study for another be required to testify in support of the study or be constrained in its presentation of its own position on that account.

(d) Claims of evidentiary privilege may be raised by parties in their objections to discovery requests. In resolving claims that information is privileged or exempt from discovery, the presiding officer shall be guided but not bound by the Civil Practice Law and Rules and case law pursuant to it and may conduct in camera examinations, issue protective orders, and adopt other measures suited to the particular situation.

(e) Claims that information is exempt from discovery on the grounds it is a trade secret, confidential commercial information or critical infrastructure information shall be treated in accordance with § 6-1.4 of this Title.

(f) Requests for documents in the control of trial staff shall be subject to the provisions of this Part. If trial staff asserts the "official information privilege" pursuant to § 87(2)(g) of the Public Officers Law, that assertion will be sustained only upon a showing that the interest in the confidentiality of the document at issue outweighs the interest of the requesting party in its disclosure. Documents within the control of trial staff include those prepared by persons currently or previously designated to serve on it and those prepared by other employees of the Department and reviewed by, or in the possession of, a trial staff member in the course of his or her participation in the case in which the discovery request is made.

(g) Denial of discovery pursuant to this Part does not preclude the granting of a request for a document pursuant to the Freedom of Information Law, where warranted.

.SO DOC 16A-5.9

NYCRR

5.9 Miscellaneous procedures.

(a) Every party shall identify an individual to whom discovery requests should be referred.

(b) The determination of when service of discovery requests, objections, or responses is complete is governed by § 3.5(e)(3) of this Title.

(c) Parties should attempt to resolve discovery disputes among themselves, without involvement of the presiding officer. Problems relating to questions or answers should be communicated to the other party immediately by telephone.

(d) The presiding officer may, at the request of any party or on his or her own motion, modify the procedures set forth in this Part for the purpose of promoting the fair, orderly, and efficient conduct of the case.

.SO DOC 16A-5.10

NYCRR

5.10 Sanctions.

If a party fails or refuses to comply with a directive to disclose material, or renders incomplete or substantially misleading responses, the presiding officer may:

- (a) take as established, to the disadvantage of the recalcitrant party, specified facts related to the matter at hand;
- (b) prohibit the recalcitrant party from introducing the evidence concerning which the discovery request was made; or
- (c) take such other action as may be proper in the circumstances.

6-1.4 Special rules applicable when a presiding officer is assigned

.SO DOC 16A-6-1.1

NYCRR

Section 6-1.1 Availability of records.

(a) The public records of the Department of Public Service may be inspected, in accordance with the provisions of this Part, during regular business hours on Monday through Friday, exclusive of legal holidays, at the offices of the Department of Public Service. Records will be made available to requesting persons in hard copy or electronically as appropriate.

(b) When the requested records are to be transferred between offices or from the State record center, are in use, or are otherwise not available within five business days of receipt of a written request that reasonably describes the records, a written acknowledgment of the receipt of the request and a statement of the approximate date when the request will be granted or denied shall be furnished. When a request will be granted in whole or in part, if circumstances prevent disclosure

to the person requesting the records within 20 business days after the date of the acknowledgement of the receipt of the request, a written explanation of the inability to grant the request within 20 business days shall be provided, together with a date certain within a reasonable period, depending on the circumstances, when the request will be granted in whole or in part. If access to the records is neither granted nor denied within a reasonable time after the date of acknowledgment of receipt of a request, or if the agency fails to conform to the provisions of §89 (3) of the Public Officers Law, such failure may be construed as a denial of access that may be appealed pursuant to the appeals procedure set forth in 21 NYCRR 1401.7.

(c) A request for public inspection or copying of a record may be made electronically or by mail to the Records Access Officer, Department of Public Service. The Records Access Officer shall respond to such request by electronic mail, provided that the written request does not require a response in some other form.

(d) Appeals pursuant to the procedure set forth in 21 NYCRR 1401.7 may be submitted in electronic form or by mail to the Secretary and shall be heard by the Secretary.

.SO DOC 16A-6-1.2

NYCRR

6-1.2 Fees.

The fees for preparing and reproducing Department records shall be in accordance with a schedule of fees maintained by the Secretary and made publicly available.

.SO DOC 16A-6-1.3

NYCRR

6-1.3 Records containing trade secrets, confidential commercial information or critical infrastructure information.

(a) Definition of a trade secret. A trade secret may consist of any formula, pattern, device or compilation of information which is used in one's business, and which provides an opportunity to obtain an advantage over competitors who do not know or use it.

(b) Manner of identifying trade secrets, confidential commercial information or critical infrastructure information.

(1) Any person submitting records, pursuant to law, regulation or directive, to the Department and requesting trade secret or confidential commercial status for information contained therein, and any person or entity submitting, or otherwise making available, records to the Department and requesting critical infrastructure status for information contained therein, shall submit the records to the Department Records Access Officer in electronic form or by mail and shall clearly identify the records or portions thereof considered to be confidential. This may

be accomplished by separating and placing on or attaching to such information at the time of submission a cover sheet or other suitable form of notice, using such language as "critical infrastructure information," "confidential commercial information," "trade secret" or "proprietary". Where the request itself contains information which, if disclosed, would defeat the purpose for which the exception is sought, such information shall also be excepted from disclosure.

(2) A person submitting trade secret or confidential commercial information to the Department shall clearly state the reason(s) why the information should be excepted from disclosure, as provided for in §87(2) (d) of the Public Officers Law. In all cases, the person must show the reasons why the information, if disclosed, would be likely to cause substantial injury to the competitive position of the subject commercial enterprise. Factors to be considered include, but are not necessarily limited to:

(i) the extent to which the disclosure would cause unfair economic or competitive damage;

(ii) the extent to which the information is known by others and can involve similar activities;

(iii) the worth or value of the information to the person and the person's competitors;

(iv) the degree of difficulty and cost of developing the information;

(v) the ease or difficulty associated with obtaining or duplicating the information by others without the person's consent; and

(vi) other statute(s) or regulations specifically excepting the information from disclosure.

(3) A person or entity submitting, or otherwise making available, critical infrastructure information to the Department shall clearly state the reason(s) why the information should be excepted from disclosure, as provided in §87(2) of the Public Officers Law.

(4) A person desiring confidential status for a limited period of time shall indicate such time frame at the time the information is submitted to the Department.

(5) Failure to identify trade secret information at the time of submission may make the information accessible to others without notice to the person who submitted such information unless a specific exemption from disclosure by other statutes or regulations pertains to the information.

(c) Responsibility for custody and maintenance of confidential records.

(1) The Department Records Access Officer shall ensure compliance and

coordinate public requests for access to records as set forth in §6-1.1 of this Part.

(2) The Department Records Access Officer shall be responsible for custody of such records.

(3) The manner of designating the persons responsible for maintaining confidential information while in the possession of office personnel shall be determined by each office director so as to adequately safeguard access to the information while at the same time providing the flexibility required for daily operations.

(4) All documents containing confidential information will be maintained apart by the Department from all other records and will not be divulged to unauthorized persons so long as they remain classified as confidential.

(5) Information submitted pursuant to subdivision (b) of this section shall be excepted from disclosure and maintained apart by the agency from all other records until 15 days after entitlement to confidential status has been finally denied or such further time as ordered by a court of competent jurisdiction.

(d) Safeguarding confidential records.

(1) Each office or employee having possession of the confidential information shall take appropriate measures to safeguard such information and to protect against its disclosure.

(2) The use of simple and effective devices to identify and manage a confidential record repository shall be established so that security is maintained.

(e) Status of records prior to Department determination.

(1) Until such time as the Department makes a determination, confidential information submitted in accordance with subdivision (b) of this section shall be excepted from disclosure and be maintained apart and in a secure manner from other Department records.

(2) Confidential status shall be granted to documents submitted in accordance with subdivision (b) of this section if a prima facie case for confidentiality is made and such status shall be continued until such time as the agency, on its own initiative, or at the request of any person for a record excepted from disclosure pursuant to §89(5) of the Public Officers Law, finally determines the confidential status of the document.

(3) The initial determination with respect to the confidential status of a document shall be made by the Department Records Access Officer and the office director most immediately and directly involved with the content of the document on the basis of the information for which

confidential status is sought and written material submitted with the information, as well as any written statement of the necessity for an exception from disclosure submitted pursuant to §89(5)(b)(2) of the Public Officers Law.

(f) Requests for access to department records granted confidential status or where determination pending.

(1) A request for access to Department records granted confidential status, or where such a determination is pending, may be made by any person and shall be in writing. The department may at any time on its own initiative redetermine the classification of records granted confidential status.

(2) The Department shall give written notice to the person who originally submitted the confidential records that the record has been requested and that a determination will be made regarding access. The original requester of confidential status shall have 10 business days from receipt of the written notice to submit a statement to justify an exception from public disclosure.

(3) Within seven business days of the receipt of a statement of justification from the person who originally submitted the record, or within seven business days of the expiration of the period prescribed for submission of the statement, the Department Records Access Officer shall serve a written ruling upon the person requesting access to the record, which either grants or denies access to the record. The ruling shall state the reasons for the determination. The ruling shall also be served upon the person who originally submitted the information, and the Committee on Open Government.

(g) Appeal of negative determinations.

(1) A determination that the submitted material does not merit confidential status made under subdivision (e) or (f) of this section or the grant or denial of access to the records made under subdivision (f) of this section may be appealed in writing, in electronic form or by mail, within seven business days of receipt. The appeal is taken when it is received by the Secretary who shall hear appeals from such negative determinations. The Secretary may consult with the General Counsel and the Chief Administrative Law Judge or their designees in reaching a determination. In addition, a copy of the appeal shall be served upon the opposing party and sent to the Department Records Access Officer.

(2) The Secretary shall review the appeal and a written final determination shall be sent to the person requesting the record, if any, and the person who requested the exception within 10 business days after

receipt of the appeal, which determination specifically states the reason or reasons for such final determination. A copy of the final determination shall also be sent to the Committee on Open Government, the Department Records Access Officer and posted on the Commission's Web site.

.SO DOC 16A-6-1.4

NYCRR

6-1.4 Special rules applicable when a presiding officer is assigned.

(a) Manner of identifying trade secrets, confidential commercial information or critical infrastructure information.

(1) Whenever a party seeks disclosure of information in an administrative proceeding, the party in possession of such information may request that it be granted confidential status. A party requesting confidential status shall submit the record containing such information to the presiding officer in electronic form or by mail and shall clearly identify the portions of the record considered to be confidential.

(2) The party submitting confidential information to the presiding officer shall also submit a comprehensive brief specifying in detail the reasons why such information should be accorded confidential status as provided for in § 6-1.3 (b)(2) of this Subpart.

(3) Information submitted pursuant to this section shall be excepted from disclosure and maintained apart by the agency from all other records until 15 days after entitlement to confidential status has been finally denied or such further time as ordered by a court of competent jurisdiction.

(b) Initial determination of confidential status.

(1) After reviewing the information submitted under subdivision (a) of this section, the presiding officer shall make an initial determination of its relevance to issues in the proceeding. If such information is determined to be relevant, the presiding officer shall, within seven business days, issue a written determination granting or denying confidential status to the information or any portions thereof. The presiding officer may in any proceeding require that the information for which confidential status has been requested be submitted immediately under a protective order so that all parties may have access to the information without delay.

(2) After a determination that the information submitted is not relevant, the presiding officer shall return the information to the party who submitted it.

(3) In reaching a determination as to the status of the information, the presiding officer shall consider the information for which confidential status is sought, the material submitted by the party

pursuant to paragraph (a)(3) of this section, and any other responsive documents, material or testimony deemed necessary or proper in keeping with the claims of confidentiality.

(c) Safeguarding confidential records in administrative hearings. The presiding officer shall take appropriate measures to preserve the confidentiality of trade secrets, confidential commercial information or critical infrastructure information. Measures to be considered include, but are not necessarily limited to:

- (1) limiting access to the material;
- (2) deleting sensitive material that is not relevant to issues in the hearing;
- (3) aggregating or summarizing data in a manner that preserves the confidentiality of confidential information; and
- (4) restricting attendance during portions of a hearing at which confidential proof is to be introduced.

(d) Appeal from a determination by the presiding officer.

(1) A determination that the submitted information does not merit confidential status under subdivision (a) of this section or a determination granting or denying access to the material, including determinations with respect to the measures that will be taken to preserve the confidentiality of the information, made under subdivisions (b) and (c) of this section, may be appealed in writing, in electronic form or by mail, within seven business days of receipt of such determination. The Secretary shall hear appeals from such negative determinations. The Secretary may consult with the General Counsel and the Chief Administrative Law Judge or their designees in reaching a determination.

(2) The Secretary shall review the appeal and a written final determination shall be sent to the person requesting the record, if any, and the person who requested the exception within 10 business days after receipt of the appeal, which determination specifically states the reason or reasons for such final determination. A copy of the final determination shall also be sent to the Committee on Open Government, the Department Records Access Officer and posted on the Commission's Web site.

PERSONAL PRIVACY PROTECTION

(Statutory Authority, Public Officers

Law, § 94(2)

Sec.

- 6-2.1 Purpose and scope
- 6-2.2 Definitions
- 6-2.3 Designation and duties of privacy compliance officer
- 6-2.4 Proof of identity
- 6-2.5 Fees
- 6-2.6 Public inspection of records
- 6-2.7 Requests for records and information
- 6-2.8 Amendment of records
- 6-2.9 Denial of request for a record or amendment or correction of a record or personal information
- 6-2.10 Appeal
- 6-2.11 Statement of disagreement by data subject

.SO DOC 16A-6-2.1 NYCRR

Section 6-2.1 Purpose and scope.

(a) It is the responsibility and the intent of the Department to fully comply with the provisions of Article 6-A of the Public Officers Law, the "Personal Privacy Protection Law."

(b) The Department shall maintain in its records only such personal information that is relevant and necessary to accomplish a purpose of the agency that is required to be accomplished by statute or executive order, or to implement a program specifically authorized by law.

(c) Personal information will be collected, whenever practicable, directly from the person to whom the information pertains.

(d) The Department seeks to ensure that all records pertaining to or used with respect to individuals are accurate, relevant, timely, and complete.

(e) This Subpart provides information regarding the procedures by which members of the public may assert rights granted by the Personal Privacy Protection Law.

.SO DOC 16A-6-2.2 NYCRR

6-2.2 Definitions.

(a) Data subject. The term data subject means any natural person about whom personal information has been collected by an agency.

(b) Personal information. The term personal information means any information concerning a data subject which, because of name, number, symbol, mark or other identifier, can be used to identify that data subject.

(c) Record. The term record means any item, collection, or grouping of personal information about a data subject which is maintained and is retrievable by use of the name or other identifier of the data subject. The term record shall not include personal information which is not used

to make any determination about the data subject if it is:

- (1) a telephone book or directory which is used exclusively for telephone and directory information;
- (2) any card catalog, book, or other resource material in any library;
- (3) any compilation of information containing names and addresses only which is used exclusively for the purpose of mailing agency information;
- (4) personal information required by law to be maintained, and required by law to be used, only for statistical research or reporting purposes;
- (5) information requested by the agency which is necessary for the agency to answer unsolicited requests by the data subject for information; or

(6) correspondence files.

(d) System of records. The term system of records means any group of records under the actual or constructive control of any agency pertaining to one or more data subjects from which personal information is retrievable by use of the name or other identifier of a data subject.

.SO DOC 16A-6-2.3

NYCRR

6-2.3 Designation and duties of privacy compliance officer.

(a) The Department's Records Access Officer is hereby designated privacy compliance officer and is responsible for ensuring that the agency complies with the provisions of the Personal Privacy Protection Law and this Subpart; and for coordinating and developing the Department's response to requests for records or amendment of records.

(b) The address of the privacy compliance officer is available on the Commission's website.

(c) Upon receipt of a request from a data subject, which may be sent in electronic form, the privacy compliance officer is responsible for:

- (1) assisting a data subject in identifying and requesting personal information, if necessary;
- (2) describing the contents of systems of records orally or in writing in order to enable a data subject to learn if a system of records includes a record or personal information identifiable to a data subject requesting such record or personal information;
- (3) taking one of the following actions upon locating the record sought:

(i) making the record available for inspection in written form without codes or symbols, unless an accompanying document explaining such codes or symbols is also provided;

(ii) permitting the data subject to copy the record; or

(iii) denying access to the record in whole or in part and explaining

in writing the reasons therefor;

(4) making a copy of any record to be made available to a data subject, upon request, and upon payment of or offer to pay established fees (see § 6-1.2 of this Part), and responding to such requests by electronic mail, provided that the written request does not require a response in some other form, or permitting the data subject to copy the records;

(5) upon request, certifying that:

(i) a copy of a record is a true copy; or

(ii) the Department does not have possession of the record sought; or

(iii) the Department cannot locate the record sought after having made a diligent search; or

(iv) the information sought cannot be retrieved by use of the description thereof, or by use of the name or other identifier of the data subject without extraordinary search methods being employed by the Department.

.SO DOC 16A-6-2.4

NYCRR

6-2.4 Proof of identity.

(a) When a request is made pursuant to this Subpart in person, or when records are made available in person following a request made electronically or by mail, the Department may require appropriate identification, such as a driver's license, an identifier assigned to the data subject by the Department, a photograph or similar information that confirms that the records sought pertain to the data subject.

(b) When a request is made pursuant to this Part, by mail, the Department may require verification of a signature or inclusion of an identifier generally known only by a data subject, or similar appropriate identification.

.SO DOC 16A-6-2.5

NYCRR

6-2.5 Fees.

(a) Unless otherwise prescribed by statute, there shall be no fee charged for:

(1) inspection of records;

(2) search for records; or

(3) any certification pursuant to this Subpart.

(b) Unless otherwise prescribed by statute, written copies of records will be furnished in accordance with § 6-1.2 of this Part.

.SO DOC 16A-6-2.6

NYCRR

6-2.6 Public inspection of records.

(a) Records shall be made available both electronically and at the main office of the Department.

(b) Whenever practicable, records shall be made available at the New York City Office of the Department.

(c) The Department shall accept requests for records and produce records during regular business hours.

.SO DOC 16A-6-2.7 NYCRR

6-2.7 Requests for records and information.

All requests made pursuant to this Subpart shall be made in writing and must be accompanied by a reasonable proof of identity.

.SO DOC 16A-6-2.8 NYCRR

6-2.8 Amendment of records.

Within 30 days of a request from a data subject for correction or amendment of a record or personal information that is reasonably described and that pertains to the data subject, the Department shall:

(a) make the amendment or correction in whole or in part and inform the data subject that, on request, such correction or amendment will be provided to any person or governmental unit to which the record or personal information has been or is disclosed pursuant to paragraphs (d), (i) or (1) of subdivision one of § 96(1) of the Public Officers Law;

(b) inform the data subject in writing of its refusal to correct or amend the record, including the reasons therefor.

.SO DOC 16A-6-2.9 NYCRR

6-2.9 Denial of request for a record or amendment or correction of a record or personal information.

(a) Denial of a request for records or amendment or correction of a record or personal information shall:

(1) be in writing, explaining the reasons therefor; and

(2) identify the person to whom an appeal may be directed.

(b) A failure to grant or deny access to records within five business days of the receipt of a request or within 30 days of an acknowledgment of the receipt of a request, or a failure to respond to a request for amendment or correction of a record within 30 business days of receipt of such a request, shall be construed as a denial that may be appealed.

.SO DOC 16A-6-2.10 NYCRR

6-2.10 Appeal.

(a) Any person denied access to a record or denied a request to amend or correct a record or personal information pursuant to § 6-2.9 of this Subpart may, within 30 days of such denial, appeal in writing to the Secretary.

(b) The time for deciding an appeal shall commence upon receipt of an appeal that identifies:

- (1) the date and location of a request for a record or amendment or correction of a record or personal information;
- (2) the record that is the subject of the appeal; and
- (3) the name and return address of the appellant, including an e-mail address, if available.

(c) Within 7 business days of an appeal of a denial of access, or within 30 days of an appeal concerning a denial of a request for correction or amendment, the Secretary shall:

- (1) provide access to or correct or amend the record or personal information; or
- (2) fully explain in writing the factual and statutory reasons for further denial and inform the data subject of the right to seek judicial review of such determination pursuant to Article 78 of the Civil Practice Law and Rules.

(d) If, on appeal, a record or personal information is corrected or amended, the data subject shall be informed that, on request, the correction or amendment will be provided to any person or governmental unit to which the record or personal information has been or is disclosed pursuant to paragraph (d), (i), or (1) of subdivision one of § 96(1) of the Public Officers Law.

(e) The Department shall immediately forward to the Committee on Open Government a copy of any appeal made pursuant to this section upon receipt, the determination thereof and the reasons therefor at the time of such determination.

.SO DOC 16A-6-2.11

NYCRR

6-2.11 Statement of disagreement by data subject.

(a) If correction or amendment of a record or personal information is denied in whole or in part upon appeal, the determination rendered pursuant to the appeal shall inform the data subject of the right to:

- (1) file with the Secretary a statement of reasonable length setting forth the data subject's reasons for disagreement with the determination;
- (2) request that such a statement of disagreement be provided to any person or governmental unit to which the record has been or is disclosed pursuant to paragraph (d), (i), or (1) of subdivision (1) of § 96(1) of the Public Officers Law.

(b) Upon receipt of a statement of disagreement by a data subject, the Department shall:

- (1) clearly note any portions of the record that are disputed; and
 - (2) attach the data subject's statement as part of the record.
- (c) When providing a data subject's statement of disagreement to a

person or governmental unit in conjunction with a disclosure made pursuant to paragraph (d), (i), or (1) of subdivision one of § 96(1) of the Public Officers Law, the Department may also include a concise statement of the Secretary's reasons for not making the requested amendment or correction.

.SO DOC 16A-PT7

NYCRR

PART 7

IMPLEMENTATION OF STATE ENVIRONMENTAL QUALITY REVIEW ACT

(Statutory authority: Environmental Conservation Law, § 8-0113(3))

Sec.

7.1 Purpose

7.2 Types of actions

7.3 Environmental review procedures

.SO DOC 16A-7.1

NYCRR

Section 7.1 Purpose. This Part sets forth procedures in addition to those contained in 6 NYCRR Part 617, which are necessary for the commission's implementation of the State Environmental Quality Review Act. The terms used in this Part have the meanings given them in 6 NYCRR 617.2, unless the context otherwise requires.

.SO DOC 16A-7.2

NYCRR

7.2 Types of actions. (a) Type I actions (which are more likely to require the preparation of environmental impact statements than unlisted actions) are listed in 6 NYCRR 617.12. Type II actions (which have been determined not to have a significant adverse effect on the environment) are listed in 6 NYCRR 617.13 and in the following subdivision. Neither new programs nor major changes in priorities with respect to policies, regulations and procedures are included.

(b) The adoption of policies, regulations and procedures constitutes the undertaking of a type II action if it relates to:

(1) routine administration and management of the commission's functions, including but not limited to rules establishing procedures for the orderly conduct of business before the commission (e.g., Rules of Procedure, 16 NYCRR, Chapter I, which set forth such matters as the procedures for hearings and rehearings and the content of applications and exhibits);

(2) practices by utilities concerning administration and management of utility functions, including but not limited to rules relating to:

(i) utility reports;

(ii) the preparation of tariff schedules;

(iii) the uniform system of accounts;

- (iv) contract and procurement procedures; and
- (v) notice of issuance of securities;
- (3) practices by utilities concerning customer relations, including but not limited to rules governing:
 - (i) service standards;
 - (ii) gas standards;
 - (iii) consumer deposits;
 - (iv) bills for service;
 - (v) notice for interruptible service;
 - (vi) complaint procedures; and
 - (vii) limitations of liability;
- (4) activities by utilities concerning testing, inspection, repair and maintenance of existing facilities, including rules governing meter testing, inspection, repair and maintenance requirements; or
- (5) safety measures for design, testing, operation and maintenance of utility facilities, unrelated to siting authorization, including rules governing the reporting of accidents by electric utilities.

.SO DOC 16A-7.3

NYCRR

7.3 Environmental review procedures. (a) When the commission is the lead agency with respect to an action that may have a significant adverse effect on the environment and a hearing concerning such action is required by statute, the commission will file a copy of the draft environmental impact statement (EIS) which has been prepared, together with a notice of its completion and a notice of hearing, in accordance with the requirements of 6 NYCRR 617.10. The commission will cause the notice of hearing to be published at least 14 days in advance of the hearing in a newspaper of general circulation in the area of the potential effects of the action. The hearing will commence no less than 15, nor more than 60 days after the filing of the draft EIS.

(b) (1) The tentative or recommended decision issued in the proceeding will contain a final EIS, unless:

- (i) the action has been withdrawn; or
- (ii) on the basis of the record of the proceeding (including the draft EIS and any comments received thereon), the Administrative Law Judge issuing such decision determines that the action will not have a significant adverse effect on the environment.

(2) If the tentative or recommended decision contains a final EIS, it will be issued within 45 days of the close of the record, unless such time is extended:

- (i) where it is determined that additional time is necessary to prepare the EIS adequately;

(ii) where problems have been identified which require the material reconsideration or modification of the action; or

(iii) for other good cause.

(3) If the Administrative Law Judge has determined that the action will not have a significant adverse effect on the environment, the notice of such determination will be filed in accordance with 6 NYCRR 617.10. If the tentative or recommended decision contains a final EIS, copies of the decision (together with a notice of its completion) will be filed in accordance with 6 NYCRR 617.10.

(c) Where an action proposed by an applicant has been the subject of a final EIS, the commission will render its decision on whether or not to approve such action within 30 days after the filing of the final EIS, except for good cause.

NYCRR

PART 8

DECLARATORY RULINGS

(Statutory Authority: Public Service Law, §§ 4(1), 20(1);
State Administrative Procedure Act, §§ 204, 205, 206)

Sec.

8.1 Availability

8.2 Procedure

8.3 Effect

.SO DOC 16A-8.1

NYCRR

Section 8.1 Availability.

(a) Declaratory rulings may be issued with respect to:

(1) the applicability to any person, property, or state of facts of any rule or statute enforceable by the Commission or the validity of any such rule;

(2) whether any action by the Commission should be taken pursuant to a rule; and

(3) whether a person's compliance with a Federal requirement will be accepted as compliance with a similar State requirement applicable to that person.

(b) A declaratory ruling may also be issued whenever the Commission determines it is warranted by the public interest.

.SO DOC 16A-8.2

NYCRR

8.2 Procedure.

(a) In addition to complying with the requirements of § 3.5 of this Title, a petition for declaratory ruling shall contain:

(1) a caption and a complete statement of the facts and grounds prompting the petition, including a full disclosure of the petitioner's

interest;

(2) a clear, concise statement of:

(i) the controversy or uncertainty that is the subject of the petition; and

(ii) the petitioner's proposed resolution of that controversy or uncertainty; and

(3) citations to any statutes, rules, or other authorities involved.

(b) At the time it is filed, a petition for declaratory ruling shall be served on the affected utility company, if any, and any other entity known to be directly affected by or interested in the requested ruling. The Secretary may require service on other affected or interested persons.

(c) Responses to a petition for declaratory ruling may be filed within 21 days of the date the petition is filed, shall be served upon the petitioner, and shall comply with the requirements of § 3.5 of this Title. All respondents, as well as the petitioner, shall be considered parties.

(d) A petitioner for a declaratory ruling shall promptly correct any deficiencies in a filed petition and shall make available for the Commission's use the originals, or, if so directed, certified or verified copies, of all books, papers, and documents that may be required. Failure to do so may be grounds for declining to issue a declaratory ruling.

(e) Where a petition seeks a declaratory ruling with respect to whether an action should be taken pursuant to a rule, the ruling or a statement declining to rule will be issued within 60 days of the date the petition is filed.

.SO DOC 16A-8.3

NYCRR

8.3 Effect.

A declaratory ruling shall be identified as such, shall be binding on the Commission, and shall not be retroactively changed.

.SO DOC 16A-11.1 NYCRR

Section 11.1 Purpose.

This Part sets forth the commission's rules implementing the Home Energy Fair Practices Act (L. 1981, ch. 713) and the Energy Consumer Protection Act of 2002 (L. 2002, ch. 686). Those acts establish as State policy that the continued provision of all or any part of gas, electric and steam service to all residential customers without unreasonable qualifications or lengthy delays is necessary for the preservation of the health and general welfare and is in the public interest.

.SO DOC 16A-11.2 NYCRR

11.2 Applicability of rules.

(a) Notwithstanding any other commission rule or order to the contrary, this Part governs the rights, duties and obligations of every gas corporation, electric corporation, gas and electric corporation, steam corporation and municipality subject to the jurisdiction of the commission by virtue of articles 2, 4 and 4-A of the Public Service Law,

their residential customers and applicants for residential service. When used in this Part:

(1)(i) The term utility means any such gas corporation, electric corporation, gas and electric corporation, steam corporation, municipality, or any entity that, in any manner, sells or facilitates the sale, furnishing or provision of gas or electric commodity to residential customers; provided, however, that the term does not include any municipality that is exempt from commission regulation by virtue of section 1005(5)(g) of the Public Authorities Law.

(ii) The term distribution utility means any utility that is authorized under any general or special law, or any charter or franchise, to lay down, erect or maintain pipes, conduits, ducts, mains, poles or other gas or electricity distributing fixtures, in, on, over, or under streets, highways, or public places; provided, however, that the term does not include any municipality that is exempt from commission regulation by virtue of section 1005(5)(g) of the Public Authorities Law;

(iii) The term ESCO means an entity eligible to sell electricity and/or natural gas to end-use customers using the transmission or distribution system of a utility.

(iv) The terms terminate or termination mean ending an ESCO's provision of commodity service.

(v) The terms disconnect or disconnection mean ending distribution service (alone or in combination with commodity service) by and solely at the behest of the utility providing such service.

(vi) The terms suspend or suspension mean a customer's loss of distribution service at the request of an ESCO.

(2) The term residential customer or current residential customer includes any person who, pursuant to an application for service or an agreement for the provision of commodity supply made by such person or a third party on his or her behalf, is supplied directly with all or any part of the gas, electric or steam service at a premises used in whole or in part as his or her residence where:

(i) the distribution utility's effective tariff specifies a residential rate for such service; provided, however, that no person who is supplied service to an entire multiple dwelling or for the common areas of a multiple dwelling as defined in the Multiple Dwelling Law or the Multiple Residence Law, shall be considered a residential customer solely because the distribution utility's effective tariff specifies a residential rate;

(ii) such service is primarily used for his or her residential

purposes and the customer has so notified the utility;

(iii) the utility knows or reasonably should have known that any of such service is provided through a single meter to both units of a two-family dwelling, as defined in section 11.8 of this Part; or

(iv) such person was a residential customer, as defined in the preceding subparagraphs of the same distribution utility within 60 days of making the request, was not terminated, disconnected or suspended for nonpayment, meter-tampering or theft of services, and has moved to a different dwelling within the distribution utility's service territory so long as such person remains a residential customer as defined in the preceding subparagraphs.

(3) The term applicant, when used in this Part, shall include any person who requests all or any part of gas, electric or steam service at a premises to be used as his or her residence or the residence of a third party on whose behalf the person is requesting service, where:

(i) the distribution utility's effective tariff specifies a residential rate for such service; provided, however, that no person who requests service to an entire multiple dwelling or for the common areas of a multiple dwelling as defined in the Multiple Dwelling Law or the Multiple Residence Law, shall be considered a residential applicant solely because the distribution utility's tariff specifies a residential rate;

(ii) such service will primarily be used for the resident's residential purposes and the applicant has so notified the utility; or

(iii) the utility knows or reasonably should know that any of such service will be provided through a single meter to both units of a two-family dwelling, as defined in section 11.8 of this Part.

(b) Nothing in this Part shall modify the commission's rules or orders applicable to the provision of gas, electric or steam service to nonresidential customers.

.SO DOC 16A-11.3

NYCRR

11.3 Applications for residential service.

(a) Extension of service. (1) Consistent with the provisions of paragraphs (2)-(4) of this subdivision, every distribution utility shall provide residential service to an applicant upon his or her oral or written request.

(2) A distribution utility shall not be obligated to provide service to an applicant who owes the distribution utility money for residential service provided to a prior account in his or her name unless:

(i) the applicant makes full payment for residential service provided to any such prior account in his or her name;

(ii) the applicant agrees to make payments under a deferred payment plan of any amounts due for service to a prior account in his or her name, pursuant to section 11.10 of this Part;

(iii) the applicant has pending a billing dispute pursuant to section 11.20 of this Part with respect to any amounts due for service to a prior account in his or her name and has paid any amounts required to be paid pursuant to those provisions;

(iv) the applicant is a recipient of or an applicant for public assistance, supplemental security income benefits or additional State payments pursuant to the Social Services Law, and the distribution utility receives from an official of the social services district in which the applicant resides, or is notified by such an official that it is entitled to receive, payment for services due to a prior account in the applicant's name together with a guarantee of future payments to the extent authorized by the Social Services Law; or

(v) the commission or its authorized designee directs the provision of service.

(3) A distribution utility shall not be obligated to provide service to an applicant for seasonal or short-term service who fails to post a lawfully required deposit.

(4) A distribution utility shall be obligated to provide service to any applicant who meets the requirements of paragraphs (1) and (2) of this subdivision within five business days of receipt of a completed oral or written application for service, or such later time as may be specified by the applicant, except:

(i) where prevented by labor strikes or precluded by law;

(ii) where precluded by consideration of public safety;

(iii) where the applicant fails to pay or agree in writing to pay the material and installation costs relating to line extensions as required by Parts 98 and 230 of this Title, or otherwise fails to comply with any applicable requirements of Parts 99, 100, 103 and 233 of this Title, and the commission's minimum insulation standards for gas-heating customers contained in Op. No. 77-10 as described in section 10.3 of this Title (17 NY PSC 546; 17 NY PSC 861); or

(iv) where precluded by physical impediments including:

(a) adverse weather conditions;

(b) inability to gain access to premises in the possession of the applicant or others;

(c) incomplete construction of necessary facilities by the applicant or inspection thereof by the appropriate authorities; or

(d) incomplete construction of necessary facilities by the

distribution utility.

The distribution utility shall make reasonable efforts to eliminate conditions preventing extension of service and shall pursue completion of any facilities it must construct with due diligence.

(v) An oral application for service shall be deemed completed when an applicant who meets the requirements of paragraphs (1)-(3) of this subdivision provides his or her name, address, telephone number and address of prior account (if any) or prior account number (if any). A distribution utility may establish non-discriminatory procedures to require an applicant to provide reasonable proof of the applicant's identity. Service may be denied to applicants who fail to provide reasonable proof of identity. A distribution utility may require an applicant to complete a written application if:

(a) there are arrears at the premises to be served and service was terminated, disconnected or suspended for nonpayment or is subject to a final notice of termination, disconnection or suspension;

(b) there is evidence of meter tampering or theft of service;

(c) the meter has advanced and there is no customer of record; or

(d) the application is made by a third party on behalf of the person(s) who would receive service.

A written application may require the submission of information required in an oral application, and reasonable proof of the applicant's responsibility for service at the premises to be supplied. A distribution utility requiring a written application shall so notify an applicant as soon as practicable after the request for service is made, and in no event more than two business days after such request, and shall state the basis for requiring a written application. A written application containing the required information shall be deemed completed when received by the distribution utility.

Comment: When a written application is permitted, a distribution utility may require the applicant to provide a copy of a lease (if one exists), deed, bill of sale or other documentation to show the date the applicant became responsible for service. A distribution utility must make a diligent effort to notify promptly an applicant who will be required to submit a written application. If a distribution utility is unable to contact the applicant orally, it must, not later than the second business day after the request for service is received, send a written notice to the applicant.

(5) Subject to the requirements of paragraph (4) of this subdivision, whenever a residential customer moves to a different dwelling within the service territory of the same distribution utility and for which the

distribution utility's tariff specifies a residential rate, and requests distribution utility service within 60 days, he or she shall be eligible to receive service at the different dwelling, and such service shall be considered a continuation of service in all respects, with any deferred payment agreement honored, and with all rights; provided, however, that such customer's prior service was not terminated, disconnected or suspended for nonpayment, meter-tampering or theft of services.

(6) A distribution utility shall extend service to an applicant for residential service whose application for service has previously been denied within two business days (or such later time as may be specified by the applicant) after the following events:

- (i) elimination of all the conditions specified in paragraphs (2) - (4) of this subdivision which resulted in the denial of service; or
- (ii) by direction of the commission or its authorized designee, who may require such extension of service to be made within 24 hours.

(b) Denial of application for service--notice. (1) As used in this subdivision, the terms deny and denial shall mean any determination, by a representative of a distribution utility in response to an application for service, that service will not be initiated as requested. An application for service not approved within three business days shall be deemed denied.

(2) No distribution utility shall deny an application for service without sending to the applicant, within three business days of receipt of the application for service, written notice which:

- (i) states the reasons for the denial;
- (ii) specifies precisely what the applicant must do to qualify for service; and
- (iii) advises the applicant of the right to an investigation and review of the denial by the commission or its authorized designees if the applicant considers the denial to be without justification. The distribution utility shall advise the applicant of the appropriate address and telephone number of the commission, including the commission's hot-line number and the times of its availability.

(3) The notice required by paragraph (2) of this subdivision shall be in writing and shall be either served personally upon the applicant or mailed to the applicant at his or her current address unless a different address is specified. When the written notice is given by mail, the distribution utility shall make a reasonable effort to provide immediate notice orally.

(4) Every distribution utility shall maintain, for a period not less than one year, records of oral or written requests for service that are

denied, including the name and address of the applicant, the date of the application and the utility representative(s) who denied it.

(c) Penalty. A distribution utility failing to initiate service within the time required by this section shall forfeit and pay to the applicant the sum of \$25 per day for each day that service is not supplied unless the commission finds that the distribution utility had good cause for not initiating service in the required time.

.SO DOC 16A-11.4

NYCRR

11.4 Termination or disconnection of residential service, and suspension of distribution service pursuant to Public Service Law, section 32(5).

(a) Termination or disconnection of residential service. This subdivision sets forth termination and disconnection procedures applicable where a utility provides only distribution service and seeks to terminate the distribution service, the utility provides both distribution service and commodity supply and seeks to terminate them both or an ESCO seeks to terminate commodity supply. Where an ESCO seeks suspension of a residential customer's distribution service due to the customer's non-payment of the commodity portion of a consolidated bill, subdivision (b) of this section also applies.

(1) Conditions for termination or disconnection. A utility may terminate or disconnect residential service as provided for in these rules if the customer:

(i) fails to pay charges for services rendered at any time during the preceding 12 months; provided, however, that termination or disconnection of service for bills due for service rendered during periods in excess of the 12-month period is permitted in cases involving billing disputes during the 12-month period, estimated bills, the culpable conduct of the customer or excusable utility delays; and provided further, that the utility shall commence any such billing not more than four months after the resolution of the billing dispute, the adjustment to estimated bills, or the cessation of excusable utility delays or delays caused by the customer's culpable conduct; or

(ii) fails to pay amounts due under a deferred payment agreement;

(iii) fails to pay or agree in writing to pay equipment and installation charges relating to the initiation of service; or

(iv) fails to pay a lawfully required deposit; and

(v) is sent a final notice of termination or disconnection no less than 15 days before the termination or disconnection date shown on the notice.

(2) Final notice. A final notice of termination or disconnection shall

clearly state or include:

- (i) the earliest date on which termination or disconnection may occur;
 - (ii) the reasons for termination or disconnection, including the total amount required to be paid, and the manner in which termination or disconnection may be avoided;
 - (iii) the address and phone number of the office of the utility that the customer may contact in reference to his account;
 - (iv) the availability of utility procedures for handling complaints;
- and
- (v) a summary, prepared or approved by the commission or its authorized designee, of the protections available under this Part, together with a notice that any customer eligible for such protections should contact the utility.

The final notice of termination or disconnection may include any additional information not inconsistent with this Part. The final notice of termination from on ESCO, however, shall inform the customer that suspension of the customer's distribution service can accompany the ESCO's commodity termination, even if the customer's account for distribution service is current. In addition, the notice shall have printed on its face, in a size type capable of attracting immediate attention, language conveying the following:

THIS IS A FINAL TERMINATION NOTICE. PLEASE REFER TO THIS NOTICE WHEN PAYING THIS BILL.

OR

THIS IS A FINAL DISCONNECTION NOTICE. PLEASE REFER TO THIS NOTICE WHEN PAYING THIS BILL.

(3) Notice of termination or disconnection--time. (i) No utility shall terminate or disconnect service under this Part until at least 15 days after a final notice of termination or disconnection:

- (a) has been served personally upon the residential customer; or
- (b) has been mailed to the residential customer at the premises where service is rendered.

(ii) If an alternative address for mailing purposes has been previously provided in writing to a utility, no utility shall terminate or disconnect service under this Part until at least 15 calendar days after a final notice of termination or disconnection:

- (a) has been mailed to the premises where service is rendered and to the residential customer at the alternative address; or
- (b) has been mailed to the residential customer at the alternative

address, and according to procedures filed by the utility with the Office of Consumer Services, either:

(1) has been served personally upon an adult resident of the premises where service is rendered;

(2) has been explained by telephone to an adult resident of the premises where service is rendered; or

(3) has been posted in a conspicuous place at the premises where service is rendered.

(iii) A utility may not issue or send a final notice of termination or disconnection unless at least 20 days have elapsed from the date payment was due. A utility may specify the date payment is due, provided that such date does not occur before personal service of the bill or three days after the mailing of the bill.

(4) Termination or disconnection of service--time. A utility complying with the conditions set forth in this section may terminate or disconnect service to a residential customer for nonpayment of bills only between the hours of 8 a.m. and 4 p.m., Monday through Thursday, provided such day or the following day is not:

(i) a public holiday, as defined in the General Construction Law; or

(ii) a day on which the main business office of the utility is closed for business. No utility shall terminate or disconnect service to any residential customer for nonpayment of bills during a two-week period encompassing Christmas and New Year's Day.

(5) No termination or disconnection without verification of delinquent account.

(i) No utility shall terminate or disconnect service for nonpayment of bills rendered, unless:

(a) it shall have verified that payment has not been received at any office of the utility or at any office of an authorized collection agent through the end of the notice period required by this Part; and

(b) it shall have verified on the day termination or disconnection occurs that payment has not been posted to the customer's account as of the opening of business on that day, or shall have complied with procedures established pursuant to subparagraph (6)(ii) of this subdivision.

(ii) In the case of a utility which serves a geographic area of this State involving more than six counties the commission may grant a waiver of the requirements of subparagraph (i) of this paragraph upon approval by the commission of an alternate procedure for verification of payments which accomplishes the basic purposes of such paragraph.

(6) Rapid posting of payments in response to notices of termination or

disconnection. Every utility shall take reasonable steps to establish procedures to ensure that any payments made in response to final notices of termination or disconnection, when the customer brings the fact that such a notice has been issued to the attention of the utility or its collection agents:

(i) are posted to the customer's account on the day payment is received; or

(ii) are processed in some manner so that termination or disconnection will not occur.

(7) Payment to utility personnel. If a residential customer offers payment of the full amount that forms the basis for a scheduled termination or disconnection at the time of termination or disconnection, the utility's representative shall be obliged to accept such payment and shall not terminate or disconnect service. Whenever such payment is made, the utility representative shall provide the customer a receipt showing the date, account, name, address and amount received.

(8) No additional notice required when payment by check is subsequently dishonored. Receipt of a subsequently dishonored negotiable instrument in response to a notice of termination or disconnection or tendered to a utility representative shall not constitute payment of a residential customer's account and no utility shall be required to issue additional notice prior to termination or disconnection.

(9) Special notification of social services official. (i) After a utility has sent a final notice of termination or disconnection to a residential customer who it knows is receiving public assistance, supplemental security income benefits or additional State payments pursuant to the Social Services Law, and for whom the utility has not received a guarantee of future payment from the local social services commissioner, it shall, not more than five days nor less than three days before the intended termination or disconnection, notify an appropriate official of the local social services district that payment for utility services has not been made. Such notification shall state that the customer has been sent a final notice of termination or disconnection, specify the amount of arrears, and state the earliest date on which termination or disconnection may occur.

(ii) In the case of a customer for whom the utility has received a guarantee of future payment from the local social services commissioner, the utility shall send a notice of nonpayment stating that payment has not been made and indicating the amount of the arrears to the recipient and to the local social services commissioner at the time the account

would otherwise be subject to a final notice of termination or disconnection.

(iii) If the notification required by subparagraph (i) of this paragraph is made orally, the utility shall within one business day mail a written notification to such social services official.

(iv) Each utility shall, after consultation with an appropriate official in the social services district of each county served by the utility in whole or in part, compile and maintain a list of the social services officials who are to receive such notifications.

(v) A utility may notify an appropriate social services official that a customer it knows is receiving public assistance, supplemental security income benefits or additional State payments has failed to make timely payment for utility service, whenever it believes special circumstances affecting such customer should be brought to the immediate attention of the social services official. Such notification shall describe the special circumstances observed, specify the amount of arrears, and state the scheduled date of termination or disconnection, if one has been set.

(b) Suspension of distribution service pursuant to Public Service Law, section 32(5). This subdivision sets forth procedures applicable where an ESCO seeks suspension of a residential customer's distribution service due to the customer's non-payment of the commodity portion of a consolidated bill. Suspension pursuant to Public Service Law, section 32(5) of a residential customer's distribution service and any related services provided by the distribution utility shall be limited to only such distribution service that is used to distribute (or is related to) the commodity that is or was supplied by the requesting ESCO and for which the customer is in arrears.

(1) When requested by an ESCO, a distribution utility shall suspend its distribution service and any other related services the distribution utility may provide to a residential customer or multiple dwelling or two-family dwelling, if:

(i) the ESCO that was providing commodity supply to such customer has terminated the customer's commodity supply in compliance with all applicable provisions of subdivision (a) of this section;

(ii) the ESCO that was providing commodity supply to such customer notifies the distribution utility that commodity supply has been terminated in compliance with subdivision (a) of this section;

(iii) the ESCO's notification to the distribution utility demonstrates compliance with subdivision (a) of this section (such demonstration shall include, but not be limited to, providing a copy of the

termination notice, proof that the termination notice was timely sent and was received by the customer or the customer's representative, and proof that termination took place at a permissible time, as specified in paragraph [a][4] of this section);

(iv) except in the case of a service to a multiple dwelling pursuant to section 33 of the Public Service Law, the ESCO demonstrates that such customer was billed using a consolidated bill;

(v) the distribution utility provided distribution service to the customer at the time the ESCO terminated its commodity supply;

(vi) the ESCO confirms that it is able to and will take all actions within its control necessary to restore commodity supply to such customer in accordance with the agreement for such service between the ESCO and the customer, if the customer makes full payment of the arrears that were the basis for the termination of commodity supply;

(vii) the ESCO has not assigned its right to obtain payment of the arrears to an entity that is not a utility for purposes of article 2 of the Public Service Law; and

(viii) less than one year has elapsed since the commodity supply was terminated.

(2) The final notice of suspension from or on behalf of an ESCO shall inform the customer that suspension of the customer's distribution service can accompany the ESCO's commodity termination, even if the customer's account for distribution service is current, and shall state the amounts which must be paid to:

(i) restore commodity supply; and

(ii) if different, to end suspension of distribution service.

(3) The distribution utility shall make its best efforts to institute such suspension of distribution service promptly, consistent with applicable commission policies and practices, and shall receive reasonable compensation from the ESCO, as determined by the commission, for any costs associated with such suspension of distribution service.

Comment: Distribution utilities are not required to duplicate all HEFPA procedures, such as suspension notices, negotiations of deferred payment agreements or other related tasks, when effectuating an ESCO-initiated suspension of service; however, the distribution utility must (1) determine whether the customer or a resident at the customer's premises qualifies for special protections under Public Service Law, section 32(3) and section 11.5 of this Part and (2) collect from the customer, if possible, at the time of suspension, the amount necessary to avoid suspension. An ESCO requesting suspension more than 60 days from the date of its original suspension notice to the customer or when

suspension does not occur within 60 days from the date of the suspension notice to the customer, must send another customer suspension notice containing updated payment information or it must inform the distribution utility that it no longer seeks to suspend service.

Further, when the ESCO seeks suspension of distribution service, two notices are required: (1) a notice to the customer stating that its service is subject to suspension after 15 days, the amount to be paid to avoid suspension, the amount to be paid to resume service after suspension and, if different, the amount necessary to end suspension; and (2) a notice to the utility requesting suspension of the customer's distribution service and certifying that the provisions of Public Service Law, section 32(5)(a) have been satisfied.

.SO DOC 16A-11.5

NYCRR

11.5 Residential service--special procedures.

This section provides special protections for specified residential customers regarding the termination, disconnection or suspension and restoration of utility service in cases involving medical emergencies, the elderly, blind or disabled, and terminations, disconnections or suspensions during periods of cold weather. This section applies to all or any part of residential utility service, regardless of the type of provider.

(a) Medical emergencies. (1) No utility shall terminate, disconnect or suspend or refuse to restore service when a medical emergency, as certified by a medical doctor or local board of health, exists; provided, however, that a demonstration of the customer's inability to pay charges for service shall be required before a certificate of medical emergency can be renewed.

(2) A medical emergency exists when a resident of a customer's residence suffers from a serious illness or a medical condition that severely affects his well-being. An inability to pay charges for service is demonstrated when a customer is unable to pay past due and current utility bills because of insufficient liquid assets and current income, considering other necessary and reasonable expenses of the customer such as food, shelter and medical expenses as documented by provision of the information required in the form set forth in Appendix A-3 of this Title, or such other form approved by the commission.

(3) Certification. An initial certification of a medical emergency by a medical doctor or local board of health may be made by telephone and shall remain effective if written certification is provided thereafter to the utility within five business days. If written certification of a medical emergency is provided to a utility that uses or appears on a

consolidated bill, that utility shall notify any other utility that uses or appears on the consolidated bill immediately upon receiving such certification. Any certification of a medical emergency shall be submitted on stationery of the medical doctor or local board of health, shall be signed by the medical doctor or an official of the local board of health qualified to make a medical judgment and shall state the name and address of the certifying medical doctor or local board of health, the doctor's State registration number, the name and address of the seriously ill person, the nature of the serious illness or medical condition and an affirmation that the illness or condition exists or will be aggravated by the absence of utility service. The certificate shall be effective for 30 days from the time the utility receives an oral or written certification, whichever occurs earlier. In deciding whether the conditions for a medical emergency are met, the medical doctor or qualified official of the local board of health should use his or her best medical judgment. A utility receiving an initial certificate shall promptly so notify the customer in writing and shall provide information on renewal of certificates, including the form set forth in Appendix A-3, *infra*, or such other form approved by the commission.

(4) Certificate renewal. If the medical condition is likely to continue beyond the expiration of an initial certification, a certificate may be renewed, provided:

(i) a medical doctor or qualified official of the local board of health states in writing to the utility the expected duration of the medical emergency and explains either the nature of the medical emergency or the reason why the absence of utility service would aggravate the medical emergency; and

(ii) the customer demonstrates an inability to pay charges for service.

A customer shall, before the expiration of the initial certification, submit to the utility, the information required in the form set forth in Appendix A-3, *infra*, or such other form approved by the commission, for the purpose of demonstrating an inability to pay charges for service. A distribution utility shall, within five days of submission of such information, determine whether the customer's liquid assets and current income are insufficient to pay utility bills, considering other necessary and reasonable expenses of the customer such as food, shelter and medical expenses. Whenever a distribution utility determines that a customer has not demonstrated a financial hardship, it shall provide the customer with written notice of the determination and the customer's right to a review of the determination by the commission or its

authorized designee. A distribution utility shall stay any disconnection or suspension activity pending its determination on the customer's ability to pay and any review of such determination by the commission or its authorized designee. A renewed certificate shall remain in effect for 30 days, provided that in cases certified as chronic by a medical doctor or qualified official of the local board of health, the renewed certificate shall remain in effect for 60 days or such longer period as may be approved by the commission or its designee. The statement of financial hardship shall be completed and submitted to the distribution utility whenever a certificate is renewed.

(5) Special rule for life support systems. If a customer or a resident of the customer's premises suffers from a medical condition requiring utility service to operate a life-sustaining device, such as an iron lung or a dialysis machine, certification by a medical doctor or qualified official of a local board of health shall remain effective until terminated by the commission or its designee, provided the residential customer demonstrates an inability to pay charges for service providing the information required by Appendix A-3, *infra*, or such other form approved by the commission, on not less than a quarterly basis. Every utility shall maintain a special file on such residential customers and an appropriate identification on the meters of such customers for the purpose of ensuring that utility service is provided as long as the medical emergency and customer inability to pay continue, as determined by the commission. In addition to other applicable requirements, a utility shall provide 15 days' written notice to the commission before terminating, disconnecting or suspending service to any such customer.

(6) No utility shall terminate, disconnect or suspend service to a residential customer after the expiration of a certification of medical emergency or after the utility determines that the customer has an ability to pay charges for service without first sending the customer a final notice of termination, or disconnection or suspension 15 days prior to the date of termination, disconnection or suspension.

(7) While certification of medical emergencies remain in effect, customers shall remain liable for payment of utility service and shall make reasonable efforts to pay charges for such service. The authorized designees of the commission shall be available to offer assistance to utilities and customers for working out equitable payment arrangements in order to avoid substantial arrearages at the end of a medical emergency.

(b) Customers who are elderly, blind or disabled. (1) No utility shall

terminate, disconnect or suspend or refuse to restore service where a residential customer is known to or identified to the utility to be blind, disabled, or 62 years of age or older, and all the remaining residents of the household are 62 years of age or older, 18 years of age or under, or blind or disabled, without complying with the procedures specified in this subdivision. A person shall be considered disabled if the person has a disability, as that term is defined in the Human Rights Act (Executive Law, § 292(21)). A person shall be considered blind if the person has central visual acuity of 20/200 or less in the better eye with the use of a correcting lens. An eye which is accompanied by a limitation in the fields of vision such that the widest diameter of the visual field subtends an angle no greater than 20 degrees shall be considered as having a central visual acuity of 20/200 or less.

(2) In such cases, a utility shall make a diligent effort to contact by telephone, or in person if telephone contact is unsuccessful, an adult resident at the customer's premises at least 72 hours prior to termination, disconnection or suspension of service for the purpose of devising a plan that would preclude termination, disconnection or suspension and arrange for payment of bills. The plan may include a deferred payment agreement, and payment or a guarantee of payment by any governmental, social welfare agency or private organization. Where a utility and such customer are unable to devise a plan after such contact, the utility shall notify the local department of social services of the name and address of the customer and the date of termination, disconnection or suspension in order that social services may help to develop a plan for such customers. The utility shall continue to provide service for not less than 15 business days from the time it makes the referral, unless notified by the local department of social services that acceptable payment or other arrangements have been made. In any such case, the customer may seek the assistance of the commission's authorized designees in developing such a plan.

(3) In cases where service has been terminated, disconnected or suspended and the utility is subsequently notified by the customer or a third party on his or her behalf that he or she would be entitled to the protections established under this subdivision, the utility shall within 24 hours of such notification make a diligent effort to contact by telephone or in person an adult resident at the customer's premises for the purpose of devising a plan, as set forth in paragraph (2) of this subdivision, that would restore service and arrange for payment of bills. A utility unable to contact such person within 24 hours shall make reasonable effort to achieve contact as soon as practicable. Where

a utility and such customer are unable to devise such a plan, the utility shall notify the local department of social services of the name and address of the customer and the date of termination, disconnection or suspension in order that social services may help to develop a plan for protecting such customer.

(4) In cases where a utility has terminated, disconnected or suspended service in compliance with the provisions of paragraph (2) of this subdivision, it shall within 10 days following termination, disconnection or suspension make a diligent effort to contact, by telephone or in person, an adult resident at the customer's premises for the purpose of determining whether alternative arrangements have been made for the provision of utility service and, if none have been made, attempt to devise a plan that would restore service and arrange for payment of bills.

(c) Special procedures during cold weather periods. (1) Every utility shall develop and maintain methods to identify all residential households in its service territory whose utility service is heat-related. As used in this subdivision, heat-related service means utility service provided under a rate classification applicable to residential space heating or utility service necessary to start or operate the primary heating system. Heat-related service shall also include a safe, supplemental electrical heating device, provided the residential customer has informed the utility within the last 12 months in writing that such device is needed because inadequate heat is provided by a third party who controls the primary heating system. In other respects, the residential households covered by this subdivision do not include the dwelling units covered by sections 33 and 34 of the Public Service Law and sections 11.7 and 11.8 of this Part (i.e., multiple dwellings and residences, and two-family houses) where payment for heat-related service is not the responsibility of the residential customer.

(2) During the period beginning November 1st of each year and ending April 15th of the following year, every utility shall observe, at a minimum, the following procedures with respect to residential customers receiving heat-related utility service:

(i) A utility shall attempt to contact, by telephone or in person, the customer or an adult resident of the customer's premises at least 72 hours before the intended termination, disconnection or suspension, for the purpose of ascertaining whether a resident is likely to suffer a serious impairment to health or safety as a result of termination, disconnection or suspension. At a minimum, a utility shall attempt to

make such contact with the customer or other adult resident by telephone (if the customer has one) once during normal business hours, and if unsuccessful, during reasonable nonbusiness hours (6 p.m.-9 p.m. on weekdays or 9 a.m.-5 p.m. on Saturdays and Sundays), and if both telephone contacts are unsuccessful or the customer does not have a telephone, by an on site personal visit. At the time of termination, disconnection or suspension, a utility shall also attempt to contact, in person, the customer or other adult resident for the purpose of ascertaining whether a resident is likely to suffer a serious impairment to health or safety as a result of termination, disconnection or suspension. During such contacts, the utility's representatives shall fully explain the reasons for termination, disconnection or suspension and provide customers with information on the protections available under this Part. If communication with the person contacted is not possible because of an apparent language barrier, the utility shall take steps to assure communication before termination, disconnection or suspension.

(ii) No utility shall terminate, disconnect or suspend heat-related service for nonpayment where the utility ascertains that a resident is likely to suffer a serious impairment to human health or safety as a result of termination, disconnection or suspension, unless it has complied with subparagraph (i) of this paragraph and:

(a) the utility notifies the local social services commissioner orally and within five days in writing, on forms prescribed or accepted by the commission, that a resident is likely to suffer a serious impairment to health or safety as a result of termination, disconnection or suspension; and

(b) the local social services commissioner, after an investigation, informs the utility that the reported condition is not likely to result in a serious impairment to health or safety, or that an alternative means for protecting the person's health or safety has been devised.

During any such continuation of service, customers shall remain liable for payment of utility service and shall make reasonable efforts to pay charges for such service. A utility notifying the local social services commission shall so inform the customer and shall explain the purpose of the referral. A utility may exercise its discretion with respect to terminating, disconnecting or suspending service to the customer in the event it does not receive an oral or written report from the local social services commissioner within 15 business days after the written referral of the matter by the utility to the commissioner.

(iii) For the purposes of this section, a person is likely to suffer a

serious impairment to health or safety if the person appears to be seriously impaired and may, because of mental or physical problems, be unable to manage his or her own resources, carry out activities of daily living or protect oneself from neglect or hazardous situations without assistance from others. Indications of serious impairments include, but are not limited to:

- (a) age, infirmity or mental incapacitation;
- (b) use of life support systems, such as dialysis machines or iron lungs;
- (c) serious illness;
- (d) physical disability or blindness, as such terms are used in subdivision (b) of this section; and
- (e) any other factual circumstances which indicate severe or hazardous health situations.

The above criteria are general standards and the utility's field personnel must be trained to exercise discretion, sound judgment and common sense in ascertaining whether a serious impairment to health or safety is likely to result.

(iv) If a utility terminates, disconnects or suspends service to a customer, and the customer or a resident 18 years or older was not personally contacted by the utility before termination, disconnection or suspension of service and the customer has not contacted the utility for the purpose of requesting reconnection before 12 noon on the day following termination, disconnection or suspension of service, the utility shall immediately attempt to determine, by on site inspection, direct personal contact at the premises with the residential customer or other adult resident, or other reasonable measures, whether there is continuing occupancy and whether a serious impairment to health or safety is likely to result. If the utility determines that a serious impairment would result, it shall immediately restore service and comply with the requirements of subparagraph (iii) of this paragraph. If the utility is unable to obtain personal contact with the customer or an adult resident, and does not have reasonable grounds to believe that the customer has vacated the premises, it shall immediately refer the name and address of the customer to the local commissioner of social services, in accordance with the procedures set forth in subparagraph (iii) of this paragraph.

(v) Every utility shall designate an employee(s) to serve as a liaison with local social services departments.

(vi) Every utility shall file with the commission for its review the procedures to be followed by the utility's personnel in complying with

these special procedures.

(3) If a utility decides to terminate, disconnect or suspend service to a residential customer because of a potential health or safety problem where the meter or service laterals have been tampered with or a theft of service has occurred, it shall determine, according to the procedures set forth in subparagraphs (2)(i) and (iii) of this subdivision, whether a resident is likely to suffer a serious impairment to health or safety as a result of termination, disconnection or suspension. If the utility ascertains that a resident is likely to suffer a serious impairment, it shall observe the procedures set forth in subparagraphs (2)(ii) and (iv) of this subdivision; provided, however, that the requirement of continued service shall not apply in the event it is impractical for the utility to eliminate an unsafe condition. In any cases where a resident is likely to suffer a serious impairment and the utility terminates, disconnects or suspends service to preclude the continuation of an unsafe condition, it shall specially notify the local social services commissioner on the same day service is terminated, disconnected or suspended and request an immediate consideration of the case.

Comment: If a distribution utility discovers a meter-tampering or theft situation and determines that a resident is likely to suffer a serious impairment, it should continue service, pending review by the official or agency designated by the Social Services Law, provided that service can be rendered safely. For example, if a distribution utility discovers that the meter of a locked account is advancing, it should, in most circumstances, be able to continue service in a safe manner. In other theft cases, particularly those involving gas service, the need for rendering the condition safe may preclude the continuation of service. For example, if a gas distribution utility discovers unsafe piping, an unsafe meter bypass or substantial damage to the meter, disconnection may be the best method of eliminating the unsafe condition. If the distribution utility cannot readily repair the unsafe condition or, in the case of a gas company, cannot obtain access to the pilot lights (which would have to be relit), immediate restoration of service would not be practical. The distribution utility should specifically note, in its referrals pursuant to Social Services Law, those cases where heat-related service is not restored or continued so that the official or agency designated by the Social Services Law may give immediate attention to them.

(4) Not earlier than September first nor later than November first of each year, every distribution utility shall conduct a survey of all

former residential customers, including qualifying supplemental heating customers whose utility service is heat-related and was disconnected or suspended during the 12-month period ending on November first of that year, and has not been restored, except for abandoned buildings and customer-requested turnoffs. The purpose of the survey is to determine whether the former customer or other resident is likely to suffer a serious impairment to health or safety from a continued lack of service. If the distribution utility determines that a former customer or other resident is likely to suffer a serious impairment, it shall restore service immediately and comply with the requirements of subparagraphs (2)(ii) and (iii) of this subdivision, unless the customer refuses to permit service restoration or, in theft or tampering situations, unless it is impractical for the distribution utility to eliminate an unsafe condition. If the distribution utility is unable to obtain personal contact with the customer or an adult resident, or the customer refuses service restoration, it shall immediately refer the name and address of the former customer to the local commissioner of social services in accordance with the procedures set forth in subparagraph (2)(ii) of this subdivision, unless the distribution utility has reasonable grounds to believe that the former customer has permanently vacated the premises.

(5) Special rule for customers threatened by neglect or hazardous situations. During the cold weather period defined above, every utility shall continue utility service as prescribed herein to a residential customer where a serious impairment to health or safety is likely to result from termination, disconnection or suspension of service and the customer is unable because of mental or physical problems to manage his or her own resources or to protect himself or herself from neglect or hazardous situations without the assistance of others. Every utility shall provide the protections set forth in this paragraph to a residential customer who is identified as likely to suffer a serious impairment, as described in this subdivision, in a response to the annual notification of rights required under section 11.17 of this Part; by a local social services office, office for the aging, board of health, or other responsible agency or person; or by any utility personnel. In such situations, the utility shall transmit an oral or written notification to the local social services commissioner that explains fully the nature of the serious impairment to health or safety, including the basis for the determination that the customer is unable to protect himself or herself from neglect or hazardous situations without assistance from others. The utility shall continue service to such customer for a period not less than 15 business days from the date of

the oral or written referral, unless notified by the social services office that acceptable payment or other arrangements have been made. Doubts shall be resolved in favor of continued service. During any such continuation of service, customers shall remain liable for payment of utility service and shall make reasonable efforts to pay charges for such service.

.SO DOC 16A-11.6

NYCRR

11.6 Voluntary third-party notice.

Every utility shall permit a residential customer to designate a third party to receive all notifications relating to termination, disconnection or suspension of service or other credit actions sent to such residential customer, provided that the designated third party agrees in writing to receive such notices. The utility shall inform the third party that the authorization to receive such notices does not constitute acceptance of any liability on the third party for service provided to the customer. The utility shall promptly notify the residential customer of the refusal or cancellation of such authorization by the third party.

.SO DOC 16A-11.7

NYCRR

11.7 Service to entire multiple dwellings.

(a) No utility shall terminate, disconnect or suspend service to an entire dwelling (as defined in the Multiple Dwelling Law or the Multiple Residence Law) where the owner, person, firm or corporation to whom or which the last preceding bill has been rendered, or from whom or which the utility has received payment therefor, has failed to pay such utility bills, until it has complied with the following procedures:

(1) The utility shall give 15 days' written notice of its intention to so terminate, disconnect or suspend by personally serving such notice on the owner of the premises affected or on the person, firm or corporation to whom or which the last preceding bill was rendered, or from whom or which the utility has received payment therefor, and on the superintendent or other person in charge of the building, if it can be readily ascertained that there is such superintendent or other person in charge.

(2) The utility shall give 18 days' written notice to the owner, person, firm or corporation specified in paragraph (1) of this subdivision if such notice is mailed in a postpaid wrapper to the address of such person, firm or corporation.

(3) In addition to the notice prescribed by paragraphs (1) and (2) of this subdivision, 15 days' written notice shall be posted in the public areas of such multiple dwelling, and 18 days' notice shall be mailed to

the occupant of each unit in that multiple dwelling, to the local health officer and director of the social services district for the political subdivision in which the multiple dwelling is located; if the multiple dwelling is located in a city or village, to the mayor thereof; or if there be none, to the manager; or, if the multiple dwelling is located in a town, then to the town supervisor; and to the county executive of the county in which the multiple dwelling is located; or if there be none, then to the chairman of such county's legislative body; and, if the multiple dwelling is located in New York City, to the Department of Housing Preservation and Development. Notice to mayors, managers, town supervisors, county executives and chairmen of county legislatures may be mailed to the persons specified therein or to their designees. Notice to health officers, directors of social services, mayors, managers, supervisors, county executives and chairmen of county legislatures shall be repeated not more than four working days nor less than two working days prior to such termination, disconnection or suspension.

(4) During the cold weather period, defined in section 11.5(c)(2) of this Part, a utility intending to terminate, disconnect or suspend heat-related service, as that term is defined in section 11.5(c)(1) of this Part, to an entire multiple dwelling shall provide the written notices required under paragraphs (1)-(3) of this subdivision not less than 30 days before the intended termination, disconnection or suspension.

(5) Whenever a notice of intention to terminate, disconnect or suspend service has been made pursuant to the provisions of this section and obligations owed the utility have been satisfied, the utility shall notify, in the same manner as it gave such notice of intention, the occupant of each unit that the intention to terminate, disconnect or suspend service no longer exists.

(b) Notwithstanding the provisions contained in subdivision (a) of this section, no utility shall terminate, disconnect or suspend service to a multiple dwelling, where the owner, person, firm or corporation responsible for making payment fails to pay utility bills, as long as occupants of such multiple dwellings continue to make timely payments for such service in accordance with procedures filed by the utility and approved by the Public Service Commission. All notices referred to in subdivision (a) of this section shall contain the intended date of discontinuance of service and a utility contact, including a telephone number, who will advise occupants of the amount due for service and who will arrange meetings with occupants to attempt to work out a mechanism for avoiding termination, disconnection or suspension of service in the

event that the owner continues to fail to make requisite payments or arrangements for such payments. The notice shall inform occupants that they may seek the assistance of the commission or its authorized designee in negotiating an agreement with the utility to prevent termination, disconnection or suspension. The notice shall also refer to the provisions contained in subdivision (1) of section 235-a of the New York Real Property Law authorizing occupants to set off, against their rent, payments to utilities in such circumstances.

(c) A utility following the procedure outlined in subdivision (b) of this section, may require occupants in a multiple dwelling to pay no more than the current charges incurred by the owner, person, firm or corporation to whom or which the last preceding bill has been rendered or from whom or which the utility has received payment therefor. A current charge for purposes of this section means the amount properly billed the owner, etc., for utility service used during the most recent service billing period covered by the first bill rendered on or after the date when the termination, disconnection or suspension notice is issued. The current charges will not include any arrears for earlier billing periods that may appear on such a bill.

(d) If occupants in a multiple dwelling find they are unable to reach an agreement with the utility to avoid termination, disconnection or suspension of service, they may contact the authorized designees of the commission. After such a request is received, an authorized designee will attempt to work out such an agreement and will, if necessary, arrange a meeting with occupant representatives, the utility, and the owner, person, firm or corporation responsible for making payment for service; provided, however, that such a meeting will be required only if the authorized designee receives a written petition signed by at least 25 percent of the occupants in a multiple dwelling.

(e) The authorized designee may stay a threatened termination, disconnection or suspension of service to an entire multiple dwelling where it concludes that good faith efforts are being made by the occupants to arrange for the payment of current bills.

(f) Section 11.4 (a) (4)-(8) of this Part shall be applicable with respect to the termination, disconnection or suspension of service to entire multiple dwellings.

(g) (1) Special rules for multiple dwellings in cities of more than one million people.

(i) During the cold weather period, defined in paragraph (c)(2) of section 11.5 of this Part, a utility intending to terminate, disconnect or suspend heat-related service, as that term is defined in paragraph

(c)(1) of section 11.5 of this Part to an entire multiple dwelling located in a city of more than one million people shall, not less than 10 days prior to the earliest date termination, disconnection or suspension may occur, provide each occupant with a written notice, prepared or approved as to substance by the Public Service Commission or its staff, advising that if any occupant in the apartment has a serious illness or medical condition that would result in a serious impairment to health or safety by the loss of heat service he should immediately contact the New York City Heatline. The notice shall provide the address and telephone number of the heatline. An approved form of the notice is contained in Appendix A-4, *infra*.

(ii) Whenever, during the cold weather period, a utility is notified by the Human Resources Administration that a claim has been received that the loss of heat-related service is likely to result in a serious impairment to health or safety, it shall continue service to the building for a period not less than 15 business days from the date of the oral or written notification from the Human Resources Administration. A utility shall not thereafter terminate, disconnect or suspend heat-related service to the dwelling during the cold weather period unless it is informed by the Human Resources Administration that appropriate alternative arrangements to preclude a serious impairment to health or safety have been made or that the claim of serious impairment is without merit. A utility thereafter intending to terminate, disconnect or suspend service shall provide at least five days written notice to the occupants that heat-related service will be terminated, disconnected or suspended, and shall, if so notified by the Human Resources Administration, inform the individual of the finding of no serious impairment. Such notice shall state that any occupant may seek further review by the Public Service Commission.

(iii) If a utility is notified by the Human Resources Administration that an occupant in a multiple dwelling where the heat-related service has been terminated, disconnected or suspended by the utility is likely to suffer a serious impairment to health or safety, it shall reconnect heat-related service and continue such service as provided for in subparagraph (ii) of this paragraph.

(2) Special rules for multiple dwellings outside cities of more than one million people.

(i) During the cold weather period, defined in paragraph (c)(2) of section 11.5 of this Part, a utility intending to terminate, disconnect or suspend heat-related service, as that term is defined in paragraph (c)(1) of section 11.5 of this Part, to an entire multiple dwelling

located outside a city of more than one million people shall, not less than 10 days prior to the earliest date termination, disconnection or suspension may occur, provide each occupant with a written notice, prepared or approved as to substance by the Public Service Commission or its staff, advising the occupant that if any occupant in his apartment has a serious illness or medical condition that is likely to result in a serious impairment to health or safety by the loss of heat service he should immediately contact the utility. The notice shall provide the name and telephone number of a utility contact person. An approved form of the notice is contained in Appendix A-5, infra. Whenever an occupant so notifies a utility, the utility shall forthwith conduct an on-site interview for the purpose of ascertaining whether the occupant is likely to suffer a serious impairment to health or safety. A utility shall refer cases of likely serious impairment to the local department of social services and request the agency to investigate the cases in accordance with established procedures.

(ii) A utility referring a likely impairment case to the Department of Social Services shall continue heat-related service to the multiple dwelling or otherwise provide heat to the person likely to suffer a serious impairment for at least 15 business days after the referral. A utility that has referred such a case shall not thereafter terminate, disconnect or suspend heat-related service to the dwelling during the cold weather period unless it otherwise provides heat to the person likely to suffer a serious impairment, or unless it is informed by the local department of social services that appropriate alternative arrangements to preclude a serious impairment to health or safety have been made or that the claim of serious impairment is without merit. A utility thereafter intending to terminate, disconnect or suspend service shall provide at least five days written notice to the occupants that heat-related service will be terminated, disconnected or suspended and shall, if so notified by the Department of Social Services, inform the individual of the finding of no serious impairment. Such notice shall state that any occupant may seek further review by the Public Service Commission.

(iii) If a utility is notified by the local department of social services that an occupant in a multiple dwelling where the heat-related service has been terminated, disconnected or suspended by the utility is likely to suffer a serious impairment to health or safety, it shall reconnect heat-related service, or otherwise provide heat to such person, and continue such service as provided for in subparagraph (ii) of this paragraph.

11.8 Service to two-family dwellings.

(a) For the purpose of this section, the term two-family dwelling shall mean a building designed and occupied pursuant to local building codes exclusively by two families living independently of each other, irrespective of whether the building receives a residential or commercial rate under the utility's tariff. If a utility knows that any utility service is provided to both units of a two-family dwelling through a single meter, the utility shall not terminate, disconnect or suspend such service unless the utility complies with the requirements of this section. A utility shall be deemed to know that a two-family building contains units that are not metered separately where it is notified by the customer, occupant or other person that the building is a two-family dwelling. Each utility shall keep a record of such two-family dwellings where service is not metered separately.

(b) The utility shall give 15 days' written notice of its intention to terminate, disconnect or suspend service to a two-family dwelling that it knows contains units where service is not metered separately by mailing a copy of the notice to the owner of the premises or to the recipient of the last preceding service bill, mailing or otherwise delivering a copy of the notice to each occupied unit, and, unless precluded by physical circumstances, posting a copy of the notice in a conspicuous place at or within the dwelling.

(c) The notice shall provide the information required by section 11.4 (a)(2)(i)-(iv) of this Part, state that there are special protections for occupants of two-family dwellings where service is not metered separately, that the commission staff may be contacted for information and advice, and that subdivision (1) of section 235-a of the Real Property Law authorizes occupants to set off against their rents payments to utilities in such circumstances.

(d) Any occupant of a two-family dwelling that contains units where service is not metered separately may prevent termination, disconnection or suspension of service if:

(1) an occupant eligible for service under section 11.3 of this Part applies for and receives service, thereby making himself or herself liable for future payments, provided that such person is not an agent of the recipient of the last preceding service bill; or

(2) an occupant who chooses to pay current charges shall not be liable for any future bills rendered for utility service. In the event of such payment, the utility shall continue to render all bills to the customer of record with a copy to be sent to any occupant upon request. If

billing for the service which is not metered separately is on a monthly basis, current charges shall be defined as an amount not to exceed that due for billed service provided during the two months preceding the termination, disconnection or suspension date set forth in the notice. If the billing for the service which is not metered separately is on a bimonthly basis, then current charges shall be defined as an amount not to exceed the most recent bill for service.

(e) The commission's authorized designees shall be available to advise occupants of two-family dwellings of the protections provided by this section.

(f) Whenever a final notice of termination, disconnection or suspension of utility service has been provided under this section and the past-due bills owed to a utility for service to a two-family dwelling in which service is provided through a single meter have been satisfied, the utility shall so notify the occupants of the dwelling by mailing or otherwise delivering such notice to the occupants of such dwelling or posting such notice in a conspicuous place at or within the dwelling.

(g) During the cold weather period, defined in section 11.5(c)(2) of this Part, a utility intending to terminate, disconnect or suspend heat-related service, as that term is defined in section 11.5(c)(1), to a two-family dwelling shall provide the written notices required under subdivisions (b) and (c) of this section not less than 30 days before the intended termination, disconnection or suspension.

(h) During the cold weather period defined in section 11.5(c)(2) of this Part, a utility intending to terminate, disconnect or suspend service to a two-family dwelling shall comply with either the requirements set forth in section 11.5(c) or in section 11.7(g) of this Part.

.SO DOC 16A-11.9

NYCRR

11.9 Reconnection of service, restoration of commodity supply, and conditions for ending suspension of distribution service.

(a) Reconnection of service. This section sets forth procedures applicable where: only distribution service was provided by a utility and was disconnected or distribution service and commodity supply were provided by and disconnected by the same utility.

(1) A utility shall reconnect disconnected residential service within 24 hours, unless prevented by circumstances beyond the utility's control or unless a customer requests otherwise, in the following situations:

(i) receipt by the utility of the full amount of arrears for which service was disconnected;

(ii) agreement by the utility and the customer on a deferred payment plan and the payment of a downpayment, if required, under that plan;
(iii) upon the direction of the commission or its designee;
(iv) upon the receipt by the utility of a commitment of a direct payment or written guarantee of payment from the social services official of the social services district in which the customer resides;
or

(v) where a utility has notice that a serious impairment to health or safety is likely to result if service is not reconnected. Doubts as to whether reconnection of service is required for health or safety reasons shall be resolved in favor of reconnection.

Comment: A utility may not insist upon payment of lawful charges that did not provide the basis for disconnection before restoring service under this subdivision. Similarly, under subparagraph (ii) of this paragraph, a utility may not insist on a downpayment in excess of one half the arrears which formed the basis for the disconnection or three months' billing, whichever is less. In these circumstances, payment of other lawful charges that did not form the basis for disconnection should be part of the installment plan, unless the customer elects to pay such charge immediately.

(2) Whenever circumstances beyond the utility's control prevent reconnection of service within 24 hours of any of the events specified in paragraph (1) of this subdivision, service shall be reconnected within 24 hours after those circumstances cease to exist.

(3) Where any utility is required under these rules to reconnect service within 24 hours and fails or neglects to do so without good cause as determined by the commission or its designee, it shall forfeit to the customer the sum of \$50 per day for each day or portion thereof that service is not supplied after the date that service should have been supplied, in cases involving medical emergencies (section 11.5(a) of this Part), the elderly, blind or disabled (section 11.5(b) of this Part), heat-related service during cold weather periods (section 11.5(c)(1), (2) and (3) of this Part), or in cases where the utility has notice that the failure to reconnect service is likely to result in a serious impairment to health or safety (subparagraph (1)(v) of this subdivision). In all other cases where the utility fails or neglects to reconnect service within 24 hours as required under these rules, it shall forfeit to the customer the sum of \$25 per day for each day or portion thereof that service is not supplied after the date that service should have been supplied. In any case, the burden of showing good cause for any failure to reestablish service within 24 hours shall be upon the

utility.

Comment: Generally, a utility will be deemed to have met its burden where it demonstrates that timely reconnection was precluded by adverse weather conditions, serious physical impediments, health or safety considerations, new construction requirements, labor disputes, inability to obtain access, or legal constraints.

(b) Restoration of commodity supply. This subdivision sets forth procedures applicable where commodity was provided by and terminated by the same ESCO.

(1) An ESCO shall take all actions within its control and, where applicable, consistent with provisions of its agreement to supply commodity, to restore terminated residential service within 24 hours in the following situations:

- (i) receipt by the ESCO of the full amount of arrears for which service was terminated;
- (ii) agreement by the ESCO and the customer on a deferred payment plan and the payment of a downpayment, if required, under that plan;
- (iii) upon the direction of the commission or its designee;
- (iv) upon the receipt by the ESCO of a commitment of a direct payment or written guarantee of payment from the social services official of the social services district in which the customer resides; or
- (v) where an ESCO has notice that a serious impairment to health or safety is likely to result if service is not restored. Doubts as to whether restoration of service is required for health or safety reasons shall be resolved in favor of restoration.

(2) Where any ESCO is required under these rules to restore service within 24 hours and fails or neglects to do so without good cause as determined by the commission or its designee, it shall forfeit to the customer the sum of \$50 per day for each day or portion thereof that service is not supplied after the date that service should have been supplied, in cases involving medical emergencies (section 11.5(a) of this Part), the elderly, blind or disabled (section 11.5(b) of this Part), heat-related service during cold weather periods (section 11.5(c)(1), (2) and (3) of this Part), or in cases where the ESCO has notice that the failure to restore service is likely to result in a serious impairment to health or safety (paragraph (a)(5) of this section). In all other cases where the ESCO fails or neglects to restore service within 24 hours as required under these rules, it shall forfeit to the customer the sum of \$25 per day for each day or portion thereof that service is not supplied after the date that service should have been supplied. In any case, the burden of showing good cause for any

failure to reestablish service within 24 hours shall be upon the ESCO.

(c) Conditions for ending suspension of distribution service. This subdivision sets forth the conditions for ending the suspension of a residential customer's distribution service. Suspension of distribution service shall end upon the occurrence of any of the following conditions:

(1) receipt by a utility of the full amount of arrears for which service was terminated;

(2) agreement by a utility and the customer on a deferred payment plan and the payment of a downpayment, if required, under that plan;

(3) upon the direction of the commission or its designee;

(4) upon the receipt by a utility of a commitment of a direct payment or written guarantee in accordance with the Social Services Law;

(5) where a utility has notice that a serious impairment to health or safety is likely to result if service is not reconnected. Doubts as to whether reconnection of service is required for health or safety reasons shall be resolved in favor of reconnection; or

(6) upon the expiration of one year after such termination of commodity service, or upon the receipt of payments by or on behalf of the customer to the ESCO that requested the suspension such that the amount paid by such customer to the ESCO plus the amount previously paid the ESCO plus any charges paid to the distribution utility during the period when such customer's arrears accrued is equal to or greater than the amount such customer would have paid if the entire utility service had been obtained from the distribution utility during such period.

.SO DOC 16A-11.10

NYCRR

11.10 Deferred payment agreements.

(a) Utility's Obligations.

(1) A distribution utility must make reasonable efforts to contact eligible customers or applicants by phone, mail or in person for the purpose of offering a deferred payment agreement and negotiating terms tailored to the customer's financial circumstances, prior to making the written offer of a deferred payment agreement required under paragraph (4) of this subdivision. Consistent with provisions of its agreement to supply commodity, if applicable, and provided such provisions are consistent with other requirements of the Public Service Law, a utility must make reasonable efforts to contact eligible customers or applicants for the purpose of offering a deferred payment agreement and negotiating terms tailored to the customer's financial circumstances, prior to making the written offer of a deferred payment agreement required under paragraph (4) of this subdivision. A deferred payment agreement or

payment agreement (also referred to as the agreement in this section) is a written agreement for the payment of outstanding charges over a specific period of time, signed by both the utility and the customer or applicant.

(i) A utility must negotiate in good faith with any customer or applicant with whom it has contact so as to achieve an agreement that is fair and equitable considering the customer's financial circumstances.

(ii) A utility may require that a customer or applicant complete a form showing assets, income and expenses, and provide reasonable substantiation of the information on that form, provided that all such information shall be treated as confidential.

(iii) A payment agreement must provide for installments as low as \$10 per month and no down payment, when the customer or applicant demonstrates financial need for such terms, but need not provide for monthly installments of less than \$10.

(iv) A payment agreement may provide for any size or no down payment, and installments on any schedule over any period of time if mutually agreed to by the parties.

(2) At the time a utility notifies a customer of his or her right to an installment payment plan under section 11.13(f) or 11.14(a) or (c) of this Part, the utility must also make reasonable efforts to negotiate terms tailored to the customer's financial circumstances, in accordance with paragraph (1) of this subdivision.

(3) A utility may postpone a scheduled termination, disconnection or suspension of service up to 10 calendar days after the date stated in the final notice of termination, disconnection or suspension for the purpose of negotiating payment agreement terms, provided that the customer is clearly advised of such postponement.

(4) A utility must make a written offer of a payment agreement by providing two copies of the payment agreement form setting forth the specific terms for payment and signed by the utility to an eligible customer or applicant at the following times:

(i) not less than seven calendar days (10 days, if mailed) before the earliest date on which termination, disconnection or suspension may occur, which is either the date stated in a final notice of termination, disconnection or suspension or a date, up to 10 days thereafter, to which the utility has postponed the termination, disconnection or suspension of service while negotiating a payment agreement pursuant to paragraph (a)(3) of this section;

(ii) when payment of outstanding charges is requirement for acceptance of an application for service, in accordance with section 11.3 of this

Part;

(iii) when payment of outstanding charges is required in accordance with section 11.9 (a) or (b) of this Part; and

(iv) as required after a broken payment agreement in accordance with paragraph (e)(3) of this section.

(5) A utility must renegotiate and amend a payment agreement if the customer or applicant demonstrates that his or her financial circumstances have changed significantly because of conditions beyond his or her control.

(6) A utility must develop written payment agreement procedures and forms for evaluating the financial need of a customer or applicant, for assuring the confidential handling of such information, for arriving at fair and equitable payment terms and for training its personnel, which procedures shall be filed with the Office of Consumer Services.

(7) The commission or its authorized designee may order a utility to offer a payment agreement in accordance with this section where the parties have been unable to reach agreement or where an agreement is necessary for the fair and equitable resolution of a complaint.

(b) Eligibility.

(1) A customer or applicant is eligible for a payment agreement and must be offered one in accordance with subdivision (a) of this section, unless:

(i) the customer has broken an existing payment agreement, except as provided in paragraph (e)(3) of this section; or

(ii) the commission or its designee determines that the customer or applicant has the resources available to pay the bill.

(2) If the utility believes that a customer or applicant is not eligible for a payment agreement because he or she has the resources to pay the bill, it may seek a determination from the commission or its designee, in accordance with the following procedures:

(i) the utility must notify the customer or applicant and the commission or its designee in writing of the reason for its belief;

(ii) the utility must give the customer or applicant written notice summarizing the procedures under this paragraph in clear and understandable language;

(iii) the commission or its designee will forthwith make a determination as to whether the customer or applicant has the resources available to pay the bill;

(iv) until such a determination is made by the commission or its designee, the utility must postpone any termination, disconnection or suspension activity, restore service or provide service, as applicable,

as long as the customer or applicant pays current bills, and a down payment and monthly installments consistent with subparagraph (c)(2)(ii) of this section, or such other amounts established by the commission or its designee.

(c) Terms of agreement.

(1) A payment agreement shall obligate the customer to make timely payments of all current charges.

(2) A payment agreement shall either contain:

(i) the specific terms for payment of the amount covered by the agreement mutually agreed upon by the utility and the customer or applicant after negotiation pursuant to paragraph (a)(1) of this section; or

(ii) a down payment up to 15 percent of the amount covered by the payment agreement or the cost of one half of one month's average usage, whichever is greater; unless such amount is less than the cost of one half of one month's average usage, in which case the down payment may be up to 50 percent of such amount; and monthly installments up to the cost of one half of one month's average usage or one tenth of the balance, whichever is greater.

(3) The cost of one month's average usage shall be calculated by averaging the cost of service over the prior 12 months.

(d) Form of agreement. A payment agreement form shall in clear and understandable language and format contain the following information:

(1) that the utility is required to offer a payment agreement that the customer or applicant is able to pay, considering his or her financial circumstances, and that the agreement should not be signed if the customer or applicant is unable to pay its terms;

(2) that if the customer or applicant demonstrates financial need, alternate terms will be available, a down payment may not be required and installments may be as low as \$10 per month above current bills;

(3) that assistance to pay utility bills may be available to recipients of public assistance or supplemental security income from a local social services office;

(4) that if the customer or applicant is unable to pay the terms of the agreement, or if for any other reason the customer or applicant wishes to discuss the agreement, the customer or applicant should call the utility at a specified telephone number and that if any further assistance is needed, the customer or applicant should call the commission at a specified telephone number;

(5) that by signing and returning the form together with any required down payment to the utility within the required time period, the

customer or applicant will be entering into a payment agreement, and by doing so, will avoid termination, disconnection or suspension of service;

(6) the date by which the copy signed by the customer, and any applicable down payment, must be received by the utility in order to avoid termination, disconnection or suspension of service, if applicable; provided, however, that such date may not be less than six business days after the agreement is sent by the utility;

(7) the utility's policy if the agreement is not signed and returned as required;

(8) the total amount due, the required down payment, if any, and the exact dollar amount and due date of each installment;

(9) that if the customer or applicant fails to comply with the terms of the payment agreement, the utility will take steps to terminate, disconnect or suspend service;

(10) that the customer or applicant has a right to immediate enrollment on a levelized payment plan. This notice must be placed close to the signature line, include a conspicuous check-box option, and give a specified telephone number to call the utility for more information. A brief explanation of the levelized payment plan, consistent with section 11.11 of this Part, must accompany the agreement; and

(11) that if the customer or applicant later can demonstrate that his or her financial circumstances have changed significantly because of conditions beyond his or her control, the utility must amend the terms of the agreement to reflect such changes.

(e) Broken agreements.

(1) If a customer fails to make timely payment in accordance with a payment agreement, the utility must send a reminder notice at least eight calendar days prior to the day when a final notice of termination, disconnection or suspension will be sent, stating in conspicuous bold type that:

(i) the customer must meet the terms of the existing payment agreement by making the necessary payment within 20 calendar days of the date payment was due or a final termination, disconnection or suspension notice may be issued;

(ii) if the customer can demonstrate that he or she is unable to make payment under the terms of the payment agreement because his or her financial circumstances have changed significantly because of conditions beyond his or her control, the customer should immediately contact the utility at a specified telephone number because a new payment agreement may be available.

(2) If by the 20th calendar day after payment was due, the utility has neither received payment nor negotiated a new payment agreement, the utility may demand full payment of the total outstanding charges and send a final termination, disconnection or suspension notice in accordance with section 11.4 (a) or (b) of this Part stating in conspicuous bold type:

(i) if the customer can demonstrate that he or she is unable to make payment under the terms of the payment agreement because his or her financial circumstances have changed significantly because of conditions beyond his or her control, the customer should immediately contact the utility at a specified telephone number because a new payment agreement may be available;

(ii) that assistance to maintain utility service may be available from a local social services office;

(iii) that before the social services office will provide assistance, the customer generally must provide the utility with information showing assets, income and expenses to evaluate whether the customer is entitled to a new payment agreement; and

(iv) either the address and telephone number of the appropriate social services office, or the local social services information number.

(3) Any final termination, disconnection or suspension notice sent because the customer has broken an agreement negotiated pursuant to paragraph (a)(1) of this section and which required payment over a shorter period than the subparagraph (c)(2)(ii) of this section standard agreement for that customer would allow, must also be accompanied by a written offer of a new agreement to pay the outstanding balance in monthly installments calculated in accordance with subparagraph (c)(2)(ii) of this section.

.SO DOC 16A-11.11

NYCRR

11.11 Budget or leveled payment plans.

(a) General. Every utility shall offer residential customers a voluntary budget billing or leveled payment plan for the payment of charges. The plan shall be designed to reduce fluctuations in customers' bills due to seasonal patterns of consumption. Any such plan shall also be offered to customers who are condominium associations or cooperative housing corporations.

(b) Criteria. Unless otherwise authorized by the commission, each such plan shall be based on the customer's recent 12-month experience, adjusted for known changes. If 12 months of billing data are not available for the customer then 12 months of billing data for the premises shall be used. If 12 months of billing data are not available

for the premises then the utility shall estimate future consumption over the next 12-month period. Each such plan shall provide that bills clearly identify consumption and state the amounts that would be due without levelized or budget billing; such information need not be supplied on interim bills for customers billed on a bimonthly basis. Each such plan shall provide that bills be subject to regular review for conformity with actual billings.

(c) Commission approval. Each such plan shall be filed with the commission and any significant changes in the plan shall be submitted to the commission for review before implementation.

.SO DOC 16A-11.12

NYCRR

11.12 Residential service deposits.

(a) For the purposes of this section, a new residential customer is an applicant. A seasonal customer is a person who applies for and receives utility service periodically each year, intermittently during the year, or at other irregular intervals. A short-term customer is a person who requires service for a specified period of time that does not exceed one year. A customer who receives continuous utility service for more than one year shall not be considered a seasonal or short-term customer.

(b) Unless authorized by the commission under subdivision (e) of this section, no utility shall require any new residential customer to post a security deposit as a condition of receiving utility service, unless such new customer is a seasonal or short-term customer.

(c) (1) As of September 1, 1982, no distribution utility shall, unless authorized by the commission under subdivision (e) of this section, require a current residential customer, other than a delinquent customer, to post a security deposit, and deposits held on that day shall be returned promptly to nondelinquent residential customers, and in no event later than the next bill for service.

(2) As of June 18, 2003, no utility shall, unless authorized by the commission under subdivision (e) of this section, require a current residential customer, other than a delinquent customer, to post a security deposit. Deposits held from current, nondelinquent customers whose agreement for the provision of commodity was renewed on or continued on or after June 18, 2003 shall be returned promptly to such customers, and in no event later than the next bill for service.

(d) Notwithstanding the requirements of subdivision (c) of this section:

(1) a utility may continue to demand deposits as a condition of receiving utility service from customers who are seasonal customers or short-term customers as defined in subdivision (a) of this section; and

(2) a utility may require a deposit from a residential customer as a condition of service if that customer is delinquent in payment of his or her utility bills. A current customer is delinquent for the purpose of a deposit assessment if such customer:

(i) accumulates two consecutive months of arrears without making reasonable payment, defined as one half of the total arrears, of such charges before the time that a late payment charge, as described in section 11.15 of this Part, would become applicable, or fails to make a reasonable payment on a bimonthly bill within 50 days after the bill is due, provided that the utility requests such deposit within two months of such failure to pay; or

(ii) had utility service terminated, disconnected or suspended for nonpayment during the preceding six months.

A utility intending to require a deposit under subparagraph (i) of this paragraph shall provide a customer written notice, at least 20 days before it may assess a deposit, that the failure to make timely payment will permit the utility to require a deposit from such customer.

(3) If a utility requires a deposit from a current residential customer who is delinquent by virtue of his or her failure to make a reasonable payment of arrears, as provided in paragraph (2) of this subdivision, it shall permit such customer to pay the deposit in installments over a period not to exceed 12 months.

(4) A utility may require deposits as a condition of receiving utility service from new residential customers who fail to provide reasonable proof of identity pursuant to section 11.3 of this Part, provided a hearing has been held pursuant to Public Service Law, section 36(2) and required findings have been made by the commission.

(e) Notwithstanding the requirements of subdivisions (b) and (c) of this section, a utility may demand and hold deposits from new or current residential customers as a condition of utility service if the commission after investigation and hearing so authorizes such practice, upon a finding that the collection and maintenance of such deposits is cost-effective for the utility as a whole without regard to the utility's cash flow and the availability of capital to the utility.

(f) No utility shall require any person it knows to be a recipient of public assistance, supplemental security income, or additional State payments, to post a security deposit.

(g) No utility shall demand or hold a deposit from any new or current residential customer it knows is 62 years of age or older unless such customer has had service terminated, disconnected or suspended by the utility for nonpayment of bills within the preceding six months.

(h) In any case where customer deposits are authorized by this section, a utility may require a new or current residential customer to deposit a reasonable amount of money not greater than twice the average monthly bill for a calendar year, except in the case of electric or gas space heating customers, where deposits may not exceed twice the estimated average monthly bill for the heating season, in order to secure payment for services actually rendered or for the rental of fixtures, instruments and facilities actually supplied. Every utility shall allow every customer from whom a deposit is required, interest on the amount deposited at a rate prescribed annually by the commission in light of the current economic conditions and current charges paid for moneys borrowed by such utility, taking into account the expenses incurred by such utility in obtaining, handling, returning or crediting the sum deposited. Such interest shall be paid to the customer upon the return of the deposit, or where the deposit has been held for a period of one year, the interest shall be credited to the customer on the first billing for utility service rendered after the end of such period. If any customer is not delinquent in the payment of bills, as defined in paragraph (d)(2) of this section, during the one-year period from the payment of the deposit, the deposit shall be refunded promptly without prejudice to the utility's right to require a future deposit in the event that the customer thereafter becomes delinquent.

.SO DOC 16A-11.13

NYCRR

11.13 Meter readings and estimated bills.

(a) A utility may render an estimated bill for any billing period if:

(1) the estimated bill is calculated in accordance with a procedure approved by the commission and clearly states that it is based on an estimated reading; and

(2) the distribution utility has made a reasonable effort to obtain an actual meter reading; or

(3) circumstances beyond the control of the distribution utility made an actual reading of the meter extremely difficult;

(4) circumstances indicate a reported reading is likely to be erroneous;

(5) an estimated reading has been prescribed or authorized by the commission for a billing period between periods when actual meter readings were scheduled; or

(6) the customer is a seasonal or short-term customer, as those terms are defined in subdivision 11.12(a) of this Part. For such customers, an actual meter reading shall be taken upon disconnection or suspension of service.

(b) When a utility has rendered estimated bills to a residential customer for a period of four months or two billing periods, whichever is greater, the distribution utility shall take reasonable actions to obtain an actual meter reading. Such actions may include, but are not limited to:

(1) making an appointment with the customer or such other person who controls access to the meter for the reading at a time other than during normal business hours;

(2) offering the customer the opportunity to phone in a meter reading;
or

(3) providing a card to the customer on which he or she may record the reading and mail it to the distribution utility.

(c) When a distribution utility has not obtained an actual meter reading after bills representing six months or three billing periods of estimated bills, whichever is greater, have been rendered, it shall, unless otherwise authorized by the commission, send a notice to the customer and to the person who controls access to the meter offering a special appointment for a meter reading both during and outside of business hours.

(d) If the distribution utility receives no response after bills representing eight months or four billing periods, whichever is greater, it may send another letter advising the recipients that if no appointment is made, a charge not to exceed \$25 will be added to the next bill rendered to the person who controls and refuses to provide access, but that no charge will be imposed if an appointment is arranged and kept.

(e) If the person who controls access fails to arrange an appointment in response to a second request and the distribution utility is unable to obtain a meter reading, it may add a charge not to exceed \$25 to the bill of such person. If the distribution utility intends to obtain a court order to gain access to the meter, it shall so inform such person, by certified or registered letter. The letter shall state that the purpose of obtaining such a court order is to replace a meter or, if physically feasible, to relocate the meter or install a remote reading device. The letter shall state that the court costs and the costs of relocation will be paid by the person who controls access to the meter.

(f) Where a utility has submitted an estimated bill or bills to a residential customer that understate the actual amount of money owed by such customer for the period when estimated bills were rendered by more than 50 percent or \$100, whichever is greater, the utility shall notify the customer in writing that he or she has the right to pay the

difference between the estimated charges and the actual charges in regular monthly installments tailored to the customer's financial circumstances over a reasonable period.

(g) The commission may grant distribution utilities waivers from the requirements of subdivisions (c)-(e) of this section upon a showing of good cause. Waivers previously granted utilities in Case 26629, to the extent not inconsistent with subdivisions (a), (b) and (f) of this section, shall remain in full force and effect.

(h) Each utility shall establish procedures for carrying out the requirements of this section and shall submit such procedures and any subsequent amendments to the commission for approval. A utility may establish other reasonable procedures designed to reduce the number of estimated bills that do not conflict with the requirements of this section.

(i) Where a distribution utility gains access to a gas meter through the use of a court order but cannot restore full service because the terms of the court order do not permit the distribution utility access to all areas of the premises to relight pilot lights, the distribution utility shall lock the meter. The distribution utility shall leave written notification informing the customer how service can be promptly restored. If the customer fails to contact the distribution utility to have service restored, the distribution utility shall attempt to contact the customer, on no less than a weekly basis, until such service is restored. During the period November 1st to April 15th, inclusive, court orders obtained under this section shall not be enforced against any residential gas-heating customer if such enforcement would result in the disconnection of service or in an unsafe condition.

(j) A duly authorized agent of the distribution utility may enter any residential dwelling supplied with service by the utility at all reasonable times for the purpose of reading a meter to ascertain the quantity of gas or electricity supplied, provided such agent exhibits a photo-identification badge and written authority as prescribed in section 65(9) of the Public Service Law.

.SO DOC 16A-11.14

NYCRR

11.14 Backbilling on residential accounts.

(a) No utility shall charge a residential customer for service rendered more than six months prior to the mailing of the first bill for service to the residential customer unless the failure of the utility to bill at an earlier time was not due to the neglect of the utility or was due to the culpable conduct of the customer. If the customer remains liable for any such service and the delay in billing was not due to the

culpable conduct of the customer, the utility shall explain the reason for the late billing and shall notify the customer in writing that payments may be made under an installment payment plan tailored to the customer's financial circumstances.

(b) A utility may not adjust upward a bill previously rendered to a residential customer after 12 months from the time the service to which the adjustment pertains was provided unless:

(1) failure to bill correctly was caused by the customer's culpable conduct;

(2) failure to bill correctly was not due to the neglect of the utility;

(3) such adjustment is necessary to adjust a budget payment plan or levelized payment plan as described in section 11.10 of this Part; or

(4) there was a dispute between the utility and the customer concerning the charges for service during the 12-month period.

(c) A utility issuing a billing adjustment increase of \$100 or more under paragraphs (2), (3) and (4) of subdivision (b) of this section shall notify the customer in writing that he or she has the right to pay the adjusted bill in regular monthly installments tailored to the customer's financial circumstances over a reasonable period. An adjustment to increase previously rendered bills more than 12 months after the time service was provided, pursuant to paragraphs (b)(2), (3) and (4) of this section, shall be made within four months of the final resolution of the billing dispute.

(d) A utility adjusting any charge for service rendered 12 or more months prior to the date of issuance shall include with the bill a notice giving the reason for the adjustment.

(e) No utility may render a bill for previously unbilled service or adjust upward a bill previously rendered to a residential customer after the expiration of 24 months from the time the service to which the new billing or adjustment pertains was provided unless the culpable conduct of the customer caused or contributed to the failure of the utility to render a timely or accurate billing.

.SO DOC 16A-11.15

NYCRR

11.15 Late payment and other charges.

(a) Late payment charges. A utility may impose a one-time or continuing late payment charge, not in excess of 1 1/2 percent per month on the unpaid balance of any bill for service including any interest thereon, provided the utility:

(1) clearly shows on each bill the amount billed, whether any charge will be imposed for late payment, when the late payment charge becomes

applicable, and the time period during which the bill may be paid without the imposition of the late payment charge;

(2) does not impose a late payment charge for any bill or portion thereof which is paid within 20 days of the date payment was due, according to the standard set forth in section 11.4(a)(3) of this Part;

(3) does not impose such charge on any bill that is the subject of a pending complaint before the utility or the commission; provided, however, that a late payment charge may be imposed on the balance due where the final resolution of the complaint directs payment of the entire disputed amount to the utility; and provided further, that no such charge may be imposed for more than two months of the pendency of the complaint unless authorized by the commission or its designee.

(b) Every utility shall offer residential customers on fixed incomes the opportunity to pay their bills on a reasonable schedule that is adjusted for such customer's periodic receipt of income without such customers incurring late payment charges; provided, however, that any such offer may prescribe a late payment charge, consistent with the standards set forth in subdivision (a) of this section, where payment is not made within 20 days of the scheduled due date.

(c) Other charges. Except as provided in subdivision (a) of this section, no utility may charge any residential customer a late payment charge, penalty, fee, interest or other charge of any kind for any late payment, collection effort, service termination, disconnection or suspension or deferred payment agreement occasioned by the customer's failure to make timely payment for services. Nothing in this section shall prohibit a utility from imposing a reasonable charge pursuant to its tariff or, where applicable, its agreement for commodity supply, for other lawful purposes.

Comment: A utility eligible to request suspension pursuant to PSL § 32(5) is prohibited from recovering from a residential customer any charge paid by said utility to the distribution utility for any costs associated with suspension of distribution service.

.SO DOC 16A-11.16

NYCRR

11.16 Contents of bills.

Each utility bill to a residential customer shall provide, in clear and understandable form and language, the charges for service. Each distribution utility bill to a residential customer shall include:

(a) the name, address and account number of the customer, dates of the present and previous meter readings, whether estimated or actual, amount consumed between present and previous readings, amount owed for the latest period, the date by which payments for the latest period may be

paid without penalty, the penalty charge for late paid bills, credits from past bills and any amounts owed and unpaid from previous bills;

(b) the customer's service classification, the billed demand, the meter-multiplier constant (if applicable), and any charges or credits which are adjustments to the base charges imposed by the distribution utility's tariff for the rate classification of that customer;

(c) if the bill is issued under a budget or levelized billing plan, an identification of the type of plan, the total of the year's budget or levelized amounts billed to the end of the period covered by the current bill, the dollar amount billed for tariff items during such period, and the debit or credit balances; and

(d) an explanation of how the bill may be paid, including one or more local distribution utility offices at which it may be paid, and a statement that bills may be paid at other authorized offices or payment agencies. Nothing in this section shall preclude a distribution utility from providing pertinent messages and information on the bill, provided such information does not interfere with the presentation of the information required by this section.

.SO DOC 16A-11.17

NYCRR

11.17 Notification requirements.

(a) Annual notification of rights. Every utility shall, at the time service is initiated to a residential customer and at least annually thereafter, by a notice accompanying a regular bill or in a separate mailing, provide residential customers with a summary of their rights and obligations under the Home Energy Fair Practices Act, the Energy Consumer Protection Act of 2002 and this Part. At a minimum, the summary shall include the following:

(1) a description of the complaint-handling procedures available at the utility and the commission;

(2) the rights and obligations of residential customers relating to payment of bills, termination, disconnection and suspension of service and reconnection of service;

(3) a description of special protections afforded the elderly, blind and disabled; persons with medical emergencies; persons receiving public assistance, supplemental security income benefits or additional State payments; and persons in two-family dwellings;

(4) a request that residential customers who qualify for the protections referred to in subdivisions (b) and (c) of section 11.5 of this Part voluntarily so inform the utility;

(5) the right of a customer to designate a third party to receive copies of all notices relating to termination, disconnection and

suspension of service or other credit notices;

(6) appropriate forms that customers claiming the protections of paragraph (3), (4) or (5) of this subdivision may fill out and return;

(7) a description of the customers' rights in regard to deferred payment plans and the holding and demanding of security deposits by the utility;and

(8) a description of the utility's budget or levelized payment plans; and

(9) if a residential customer receives residential gas or electric service from two or more utilities, the residential customer need not be notified by each such utility. The distribution utility shall provide a single annual notice to residential customers.

(b) Billing information in non-English language. Every utility providing service to a county where, according to the most recent Federal census, at least 20 percent of the population regularly speaks a language other than English, shall, at the request of a customer residing in such county, send its messages on bills and notices in both English and such other language to such customer. At least once a year, every utility shall supply, to all residential customers in such county, a notice in such other language spoken regularly by at least 20 percent of the population in such county of the right to request messages on bills and notices in such other language.

(c) Notification for customers billed on time-of-use rates. Every utility which offers time-of-use rates shall provide the following information, at least twice per year, by a notice accompanying a regular bill or in a separate mailing to its customers billed on such rates:

(1) a description of the hours for which these rates are available for both standard and daylight standard time;

(2) if resetting the electric time-of-use meter is necessary to restore the effective hours of the time-of-use rates following an interruption of service, a description of procedures such customers shall follow in order to have their time-of-use electric meter reset; and

(3) if resetting the electric time-of-use meter is necessary, when the utility has knowledge of an outage, a statement within 60 days of such outage that the time-of-use rate may not be applied at the previously stated times until the time-of-use electric meter is reset.

.SO DOC 16A-11.18

NYCRR

11.18 Emergency disconnections of residences.

A distribution utility may disconnect service to a residence when an emergency may threaten the health or safety of a person, a surrounding

area or the utility's distribution system. The distribution utility shall act promptly to assure restoration of service as soon as feasible. Service shall be restored to any residence before it may be disconnected for any other reason.

.SO DOC 16A-11.19

NYCRR

11.19 Inspection and examination of distribution utility apparatus.

(a) A duly authorized agent of the distribution utility may enter any dwelling, building or other location supplied with service by the distribution utility for the purposes of inspecting and examining the meters, pipes, fittings, wires and other apparatus for regulating, supplying and/or ascertaining the quantity supplied on a nonholiday workday between 8 a.m. and 6 p.m., or at such other reasonable times as requested by a customer. At such time, the agent shall exhibit a photo-identification badge and written authority signed by the president or vice-president and secretary or assistant secretary of a distribution utility corporation, or by the mayor or clerk of a municipal corporation or by the chairman and secretary of a municipal board in control of a municipal utility.

(b) The provisions of subdivision (a) of this section shall not apply to the inspection and examination of any such equipment where an emergency may threaten the health and safety of a person, the surrounding area, or the distribution utility's distribution system.

(c) Inspection and examination of any such equipment may be conducted between the hours of 8 a.m. and 9 p.m. on any day when there is evidence of meter tampering or theft of services.

(d) An agent of the distribution utility, otherwise duly authorized to inspect and examine apparatus, may not enter locked premises without the permission of the person lawfully in control on the premises, nor use any manner of force to carry out inspection and examination, except when an emergency may threaten the health or safety of a person, the surrounding area, or the distribution utility's distribution system, or where authorized by a court order.

.SO DOC 16A-11.20

NYCRR

11.20 Complaints to the utility.

Customer complaints about bills for utility service, deposit requests or other service problems shall first be made to the utility. The utility shall allow complaints to be accepted and processed in a simple manner and form. Every utility shall promptly investigate any complaint in a fair manner and report the results to the complainant. If the report of the investigation is made orally, the utility shall offer the complainant, upon written request, the opportunity to receive the report

in writing. A utility resolving a complaint in whole or in part in its favor shall inform the complainant of the availability of the commission's complaint handling procedures, including the commission's address and telephone number. Every utility shall file with the commission its procedures for fulfilling the requirements of this section, and any changes in such procedures must be filed at least 30 days prior to implementation. A utility shall refrain from terminating, disconnecting or suspending service for nonpayment during the pendency of a complaint before the utility or the commission and for 15 days after resolution by the utility, or by the commission or its authorized designee, unless otherwise provided by the commission or its authorized designee; provided, however, that as a condition of continued service during the pendency of such dispute, a customer shall pay the undisputed portions of any bill for service, including bills for current usage, or such amounts as the commission or its authorized designee determines reasonably reflect the cost of usage to such customer.

.SO DOC 16A-11.21

NYCRR

11.21 Emergency hotline.

(a) Emergency hotline at the commission. The commission has established a toll-free telephone number that residential customers may call regarding initiation, termination, disconnection, suspension, or reconnection of service. The number is 1 (800) 342-3355 and customers may call on any business day between 7:30 a.m. and 7:30 p.m.

(b) Commission authority to order provision of service. During times that the hotline is attended, and in response to calls, an employee of the commission shall have the authority to order the reconnection, continuation or initiation of utility service whenever a reasonable question regarding the circumstances of a termination, disconnection, suspension or refusal of service exists or whenever the health or safety of a person is involved.

(c) Utility responsibility. Every utility shall submit to the commission the names and telephone numbers of employees authorized to direct compliance with orders issued under subdivision (b) of this section. Every utility shall adopt procedures necessary to comply with such orders.

.SO DOC 16A-11.22

NYCRR

11.22 Waiver.

Unless otherwise precluded by article 2 of the Public Service Law or other applicable law, the commission may, for good cause shown or upon its own motion, waive any requirement of this Part.

.SO DOC 16A-11.30

NYCRR

11.30 Definitions.

(a) Extraordinary cost means the cost, as determined by a qualified professional and shown in a written estimate signed by that professional, which also shows all relevant license numbers or professional qualifications, of installing equipment necessary to eliminate a shared meter in a dwelling or part of a dwelling which is in excess of the amount of rent for four months rental of such dwelling, or two months rental of such dwelling if the amount of service measured by the shared meter, that is used outside the shared meter customer's dwelling, is less than 20 percent of the average total monthly consumption recorded on the meter for the immediately preceding 12 month period (or if insufficient history is available, based on the best available information).

(b) Qualified professional means a person who is permitted to install or repair gas, steam or electric equipment, including rewiring or repiping, by the local code of the municipality where the meter in question is located.

(c) Legal impediment means a restriction which prevents separate metering, rewiring, or repiping due to zoning ordinances, which limit the number, type or location of meters in a building, or due to the historical significance of the structure, or any other legal prohibition against elimination of the shared meter condition.

(d) Minimal service. Whenever the quantity of service on a shared meter, that is used outside of the tenant's dwelling, is estimated to be less than 10 percent of the total monthly consumption recorded on the meter, based on average monthly service for the immediately preceding 12 month period (or if insufficient history is available, based on the best available information), or 75 kwh/month of electricity, five therms/month of gas or one mlb/month of steam, whichever is greater, the owner, tenant and any third party whose utility service was to be measured through another meter and had caused or benefitted from the shared meter condition, may negotiate a mutually acceptable agreement for the responsibility for the cost of such shared meter consumption. When the interested parties are unable to negotiate a mutually acceptable arrangement, the commission or its designee may order a remedy for a shared meter customer that it deems fair and equitable based on costs incurred and benefits received by the various parties.

.SO DOC 16A-11.31

NYCRR

11.31 Commission's designee.

The commission's designee, for the purpose of this section and Public Service Law, section 52, is the director of the department's Office of

Consumer Services.

.SO DOC 16A-11.32

NYCRR

11.32 Service to shared meter account.

(a) Only a distribution utility may disconnect service to a shared meter account. A distribution utility may not disconnect service to an occupied building at the owner's request unless a new account will be opened and disconnection of the owner's shared meter account will not result in interruption of service.

(b) A distribution utility shall not disconnect service to a shared meter account for nonpayment unless it complies with the requirements of this section.

(1) The distribution utility shall give 15 days' written notice of its intention to disconnect service to a shared meter account by mailing a copy of the notice to the owner of the premises or to the recipient of the last preceding service bill, mailing or otherwise delivering a copy of the notice to each affected dwelling unit, and, when common areas of the building will be affected, and unless precluded by physical circumstances, posting a copy of the notice in a conspicuous place at or within the building.

(2) The notice shall provide the information required by section 11.4(a)(2)(i)-(iv) of this Part, state that there are special protections for occupants of premises receiving service through a shared meter account, that the department staff may be contacted for information and advice, and that subdivision (1) of section 235-a of the Real Property Law may authorize occupants of multiple dwellings who make utility payments to prevent disconnection of service on a shared meter account to deduct such payments from their rent.

(3) Any occupant who would be affected by disconnection of a shared meter account may prevent disconnection of service by paying the current charges for such service. An occupant who chooses to pay current charges shall not be liable for any future bills rendered for utility service through the shared meter. In the event of such payment, the utility that issues the bills shall continue to render all bills to the owner and to send a copy to any occupant upon request. Current charges shall be defined as an amount not to exceed that due for billed service provided during the two months preceding the disconnection date set forth in the notice.

(4) The department's staff shall be available to advise occupants who would be affected by disconnection of shared meter accounts of the protections provided by this section.

(5) Whenever a final notice of disconnection of utility service has

been provided under this section, and disconnection has been avoided, the distribution utility shall so notify the affected occupants by mailing or otherwise delivering such notice to the occupants or posting such notice in a conspicuous place at or within the building.

(6) During the cold weather period, defined in section 11.5(c)(2) of this Part, a distribution utility intending to disconnect heat-related service, as that term is defined in section 11.5(c)(1) of this Part, to a shared meter account shall provide the written notices required under paragraphs (1) and (2) of this subdivision not less than 30 days before the intended disconnection.

(7) During the cold weather period defined in section 11.5(c) of this Part, a distribution utility intending to disconnect service to a shared meter account shall comply with the requirements set forth in sections 11.5, 11.7 and 11.8 of this Part.

.SO DOC 16A-12.0

NYCRR

Section 12.0 Applicability of Part 12 complaint procedures.

When used in this Part, the term utility includes any such gas corporation, electric corporation, gas and electric corporation, steam corporation, municipality, or any entity that, in any manner, sells or facilitates the sale, furnishing or provision of gas or electric

commodity to residential customers, including energy services companies and owners of submetered residential buildings; provided, however, that the term does not include any municipality that is exempt from commission regulation by virtue of section 1005 (5) (g) of the Public Authorities Law.

.SO DOC 16A-12.1

NYCRR

12.1 Complaints and questions.

(a) Filing. Any utility customer may file a complaint with, or ask a question of, the commission relating to his or her electric, gas, steam, telephone or water service, when the customer believes he or she has not obtained a satisfactory resolution of a dispute with a utility regulated by the commission. Complaints may involve bills for utility service, deposit requests, negotiations for deferred payment agreements, service problems, and other matters relating to utility service.

(b) Department offices. A complaint or question may be filed by telephone, letter, electronically, or in person at the commission's office in New York City, Albany or Buffalo.

(c) Complaint submissions. Once a customer has filed a complaint and provided basic information to the commission's Office of Consumer Services so the complaint can be investigated, the utility will be notified of the complaint and will be required to submit information regarding the merits of the complaint. This submission should explain its actions in the disputed matter and the extent to which those actions were consistent with the utility's procedures and tariff, commission rules, regulations, orders and opinions, and applicable State laws. The utility may be required by staff to provide copies of bills, billing statements, field reports, written documents, or other information in the possession of the utility which may be necessary to make a decision on the complaint. A customer making a complaint is responsible for providing staff with any facts that he or she possesses in support of his or her position.

(d) Inspections and tests. Should staff determine that an onsite inspection or test is required, he or she may order a test or inspection. This work may be done by staff and/or by utility staff at the direction of commission staff, depending on the nature of the complaint, time considerations and staff availability.

(e) Investigation. Staff will investigate each complaint or question and will respond to the customer, or, if possible, suggest the name, address and/or telephone number of a person or agency who might be able to respond.

.SO DOC 16A-12.2

NYCRR

12.2 Complaint files.

(a) A complaint file will be maintained at one of the commission's offices. It will contain all information in the commission's possession relating to a complaint.

(b) Customers, utilities or their representatives may look at and copy complaint files concerning cases to which they are a party. Staff will provide copies of the documents in accordance with the fee schedules in the commission's Administrative Manual. One free copy of the file will be made for those customers who state that they are unable to pay for reproduction costs.

(c) Complaint files shall be kept for at least one year after a case is closed.

.SO DOC 16A-12.3

NYCRR

12.3 Continuation of service while a complaint is at the commission.

(a) A utility shall not terminate, disconnect or suspend a customer's service, based on amounts billed that have not been paid and which are in dispute, from the time that a complaint or an appeal of a complaint is filed with the commission until 15 days after the decision is mailed or personally communicated to the customer or his or her representative.

(b) In order to continue service during the time a complaint or an appeal of a complaint is at the commission, the utility may require the customer to pay amounts of bills not in dispute. If the undisputed amount is not paid, the utility may be entitled to terminate, disconnect, or suspend the customer's service. Should there be any question as to the amount in dispute, staff will make a reasonable estimate, establishing the disputed amount.

.SO DOC 16A-12.4

NYCRR

12.4 Initial decision on complaint.

(a) When necessary information has been obtained, a staff member will make an initial decision on the complaint, based on his or her findings, applicable State laws, commission rules, regulations, orders and opinions, and utility tariffs.

(b) Staff shall call or write the customer or his or her representative to inform him or her of the decision, the reasons for the decision, and what actions must be, or may be, taken by the customer or the utility. The utility will be notified of the disposition of the complaint and of any action which it must take. A customer or utility may request a written copy of the initial decision. If the decision is communicated orally, the customer will be informed that he or she may receive the decision in written form.

.SO DOC 16A-12.5

NYCRR

12.5 Requests for informal hearing or review.

(a) (1) If the customer or the utility objects to the initial decision, a request for an informal hearing or review may be made to the commission's Office of Consumer Services in writing, by telephone or in person, explaining the basis for the request. The request should be received within 15 days after the initial decision is mailed or personally communicated.

(2) A request for an informal hearing may be denied if the relief sought by the customer or utility is beyond the power of the informal hearing officer to provide. In this case, the person requesting the hearing shall be notified as to the reason why a hearing cannot resolve the complaint, and shall be advised of the appropriate authority to address the complaint, if known. If the person requesting the hearing contends that the hearing officer does have the authority to decide the complaint, he or she may appeal to the commission in accordance with section 12.13 of this Part.

(b) A utility which appeals a staff decision must accept an informal review unless the customer agrees to participate in an informal hearing. A customer may choose either an informal hearing or review.

(c) Upon receiving a request for an informal hearing or an informal review, the customer and the utility will be notified in writing:

(1) of the date, time and location of the informal hearing at least 10 days before the date of the hearing, or that an informal review will be held;

(2) that any documents in support of their position should be brought to the informal hearing or sent to the informal reviewer within 15 days, or longer if the reviewer finds it reasonable to extend the time period, after receiving notice that a review will be conducted; and

(3) that the customer may be represented by a person of his or her choice or may request that the commission's Office of Consumer Services assign an advocate, free of charge, if available.

.SO DOC 16A-12.6

NYCRR

12.6 Description of informal hearings and reviews.

(a) Informal hearings. (1) An informal hearing is a procedure at which the utility and the customer, and/or his or her representative, appear and are provided with the opportunity to present information, discuss and resolve the complaint before an informal hearing officer. Hearings normally will be held at commission offices; however, a customer may request that an informal hearing be conducted by telephone conference call.

(2) The hearing officer is an impartial member of the commission staff

who has not had previous contact with the complaint. The hearing officer will consider the statements made by the parties at the hearing and review relevant information in the complaint file. The hearing officer will then make an independent decision and provide the customer and utility with a written statement explaining the reasons for the decision.

(b) Informal review. An informal review is a further review of the complaint by a staff member who has not previously worked on the complaint. An informal review does not require the presence of either the customer or the utility. It is an option available to the customer who disagrees with the initial decision, but who is unable or prefers not to participate in an informal hearing. Staff will review the complaint record, make an independent decision and provide the customer and the utility with a written statement explaining the reasons for the decision.

.SO DOC 16A-12.7

NYCRR

12.7 Rights of parties.

(a) Informal hearing rights. The parties to an informal hearing shall have the following rights:

(1) To represent themselves or to be represented by counsel or other person of their choice. At the request of a customer, the commission's Office of Consumer Services may assign an advocate, free of charge, if available, to assist the customer in preparing and presenting his or her complaint during an informal hearing.

(2) To examine the documents in the complaint file before the informal hearing.

(3) To have a reasonable opportunity during an informal hearing to present evidence and arguments concerning the complaint, and to challenge the evidence of and question the other party.

(4) To have the commission tape-record the hearing, with the consent of the customer. The commission will retain such tape for at least four months after the complaint is closed. The hearing officer shall inform the parties that either party may review the recording at the commission office or make a copy of the tape at his or her own expense.

(5) To have an interpreter at the hearing. If the party in need of such services is unable to obtain an interpreter, the commission will provide an interpreter where feasible, provided that the customer makes the request at least five days before the hearing.

(6) To request that information relevant to the complaint possessed by the other party be provided. The request can be made directly or through the hearing officer.

(b) Informal review rights. The parties to an informal review shall have the following rights:

(1) To present evidence and written arguments concerning the complaint. At the request of a customer, the commission's Office of Consumer Services may assign an advocate, free of charge, if available, to assist the customer in preparing his or her submission for the informal review.

(2) To examine the documents in the complaint file.

(3) To examine the evidence and arguments submitted by the other party and to submit a response to the evidence and arguments of the other party.

(4) To request the information relevant to the complaint possessed by the other party be provided. The request can be made directly or through the hearing officer.

.SO DOC 16A-12.8

NYCRR

12.8 Powers and duties of hearing officers and reviewers.

(a) Informal hearing officers and reviewers shall conduct fair and impartial hearings or reviews, and may, in carrying out this responsibility:

(1) (i) Order utilities to provide copies of information in their possession and state the form in which certain information is to be provided.

(ii) Request customers to provide information in their possession which is necessary to prove any facts that the customer offers in support of his or her position. The customer's failure to provide any such information may influence the hearing officer's decision regarding that particular fact.

(2) Order the utility to conduct meter tests and inspections, diversion of service inspections and other tests necessary for the resolution of the complaint.

(3) Regulate the course of hearings and the conduct of the parties and their representatives. In executing this responsibility, the hearing officer may allow the attendance of the media if he or she believes that this will not disrupt the hearing, and parties agree to such attendance.

(4) Question participants directly and inquire into all matters related to the case.

(b) Informal hearing officers and reviewers shall provide a party with any information regarding the merits of the case exchanged between the hearing officer and any other party, and an opportunity to respond to the hearing officer regarding such information.

(c) The hearing officer may permit any party to submit further

information, documentation or arguments that may aid the officer in reaching a determination within 15 days after an informal hearing. The hearing officer shall ensure that this information is provided to the other party, who will have an opportunity to respond. The hearing officer may grant reasonable requests to extend the time period to submit information.

.SO DOC 16A-12.9

NYCRR

12.9 Hearing postponement.

(a) The hearing officer may grant initial requests for a hearing postponement. A party requesting a second postponement will be required to provide reasonable justification for the postponement. If a party does not provide reasonable justification, as determined by the hearing officer, a new hearing date will not be set and an informal review will be conducted.

(b) The hearing officer may, at his or her own discretion, postpone or adjourn a hearing for reasonable cause. If a hearing is postponed, adequate notice will be provided to the parties.

.SO DOC 16A-12.10

NYCRR

12.10 Failure to appear.

If a customer or the utility does not appear for a scheduled hearing, without good cause, the hearing officer will accept information from the attending party, and make a determination on the dispute.

.SO DOC 16A-12.11

NYCRR

12.11 Settlement agreement.

(a) If, at any point during the informal hearing, the utility and the customer agree to settle their dispute, the agreement shall be in writing and signed by the customer, the utility representative and the hearing officer. The agreement shall state that it is binding on parties and may not be appealed.

(b) A settlement of an informal review shall be confirmed by letter from the reviewer to parties.

.SO DOC 16A-12.12

NYCRR

12.12 Informal hearing or review decision.

(a) If the parties have not been able to settle their dispute, the hearing officer or informal reviewer will make a written decision. In reaching the decision, the hearing officer shall give consideration to the evidence and facts of the case, and base the decision on his or her findings, applicable State law, commission rules, regulations, orders and opinions, and utility tariffs. The decision shall summarize the positions and arguments of the customer and the utility, the facts as established, the reasons for the decision, and, where appropriate,

include a statement of what actions must be taken by the parties.

(b) The hearing officer or reviewer shall promptly notify the parties, by first class mail, of the decision and of the parties' right to appeal in writing to the commission and the time by which an appeal must be filed.

.SO DOC 16A-12.13

NYCRR

12.13 Appeals to the commission.

(a) Filing of appeals. If a customer or utility disagrees with the decision rendered in the informal hearing or review, the customer or utility may appeal to the commission by writing to the Office of the Secretary to the Public Service Commission, 3 Empire State Plaza, Albany, N.Y. 12223-1350. The appeal should be filed within 15 days after the informal hearing or review decision is mailed.

(b) Requirements for appeals. An appeal must be in writing and be based on one or more of the following grounds:

(1) The hearing officer or reviewer made a mistake in the facts in the case or in the interpretation of laws or regulations which affected his or her decision.

(2) The hearing officer or reviewer did not consider evidence, presented at the hearing or review, which resulted in an unfavorable decision.

(3) New facts or evidence, not available at the time of the hearing or review, have become available which would have affected the decision on the complaint.

.SO DOC 16A-12.14

NYCRR

12.14 Commission determination.

(a) Parties will be notified of the commission's receipt of the appeal, and a staff member, who has not previously worked on the complaint, will be assigned to review the request. The staff member will examine all papers submitted in connection with the appeal and advise the commission on the appeal.

(b) The commission will decide the appeal and may uphold, change, reject or return the decision to the informal hearing officer or reviewer for additional consideration. If there is a factual or legal dispute, the commission may order a formal evidentiary hearing on the complaint or make such other decision as it deems appropriate.

(c) The Secretary to the Commission will notify the customer and the utility in writing of the commission's decision and action.

.SO DOC 16A-13.1 NYCRR

Section 13.1 Applicability of rules and definitions.

(a) Applicability. (1) Notwithstanding any other commission rules or orders to the contrary, this Part governs the rights, duties and obligations of every gas, electric and steam corporation or municipality subject to the jurisdiction of the commission by virtue of articles 4 and 4-A of the Public Service Law, their nonresidential customers and the applicants for such nonresidential service.

(2) Nothing in this Part shall modify the commission's rules or orders applicable to the provision of gas, electric or steam service to residential customers under Part 11 of this Title.

(b) Definitions. The following words and terms when used in this Part have the following meanings:

(1) A utility is any gas corporation, electric corporation, gas and electric corporation, steam corporation or municipality; provided, however, that the term shall not include any municipality that is exempt from commission regulation by virtue of section 1005(5)(g) of the Public Authorities Law.

(2) An applicant is a person, corporation or other entity who has requested gas, electric or steam service as a nonresidential customer.

(3) A nonresidential customer is a person, corporation or other entity, supplied by a utility with gas, electric or steam service under the utility's tariff, and pursuant to an accepted application for service, who is not a residential customer as defined in Part 11 of this Title. The word customer, when used alone in this Part, refers only to a nonresidential customer.

(4) A new customer is a customer who was not the last previous customer at the premises to be served, regardless of whether such customer previously was or is still a customer of the utility at a different location.

(5) A seasonal customer is a customer who applies for and receives utility service periodically each year, intermittently during the year, or at other irregular intervals.

(6) A short-term or temporary customer is a customer who requested service for a period of time up to two years.

(7) A demand customer is a customer who is billed for demand charges.

(8) An actual reading is one obtained by a utility employee from either the meter or a remote registration device attached thereto.

(9) An access controller is a party known to a utility to be in control of access to the metering equipment of a customer, and to have an active account of its own with the utility.

(10) A payment is considered to be made on the date when it is received by a utility or one of its authorized agents.

(11) A late payment is any payment made more than 20 calendar days after the date payment was due. Payment is due whenever specified by a utility on its bill, provided such date does not occur before personal service of the bill or three calendar days after the mailing of the bill.

(12) Arrears are charges for which payment has not been made more than 20 calendar days after payment was due.

(13) A delinquent customer is a customer who has made a late payment on two or more occasions within the previous 12-month period.

(14) A business day is any Monday through Friday when a utility's business offices are open.

(15) A deferred payment agreement is a written agreement for the payment of outstanding charges over a specified period of time. It must be signed in duplicate by a utility representative and the customer, and each must receive a copy, before it becomes enforceable by either party.

(16) A levelized payment plan is a billing plan designed to reduce

fluctuations in a customer's bill payments due to varying, but predictable patterns of consumption.

(17) A backbill is that portion of any bill, other than a leveled bill, which represents charges not previously billed for service that was actually delivered to the customer during a period before the current billing cycle. A bill based on an actual reading rendered after one or more bills based on estimated or customer readings (commonly called a catch-up bill), which exceeds by 50 percent or more the bill that would have been rendered under a utility's standard estimation program, is presumed to be a backbill.

(18) Tampered equipment is any service-related equipment that has been subjected either to unauthorized interference so as to reduce the accuracy or eliminate the measurement of a utility's service, or to unauthorized connection occurring after a utility has physically disconnected service.

(19) Utility deficiency means any action or inaction by a utility or one of its authorized agents that does not substantially conform to the rules and regulations of this Title, the utility's tariff, or the utility's written business procedures.

.SO DOC 16A-13.2

NYCRR

13.2 Applications for service.

(a) Extension of service. (1) A utility shall either provide or deny service to any applicant as soon as reasonably possible, but no later than 10 calendar days after receipt of a completed application for service or such later time as may be specified by the applicant, except:

(i) where prevented by labor strikes or other work stoppages;

(ii) where precluded by consideration of public safety;

(iii) where precluded by physical impediments, including:

(a) adverse weather conditions;

(b) inability to gain access to premises in the possession of the applicant or others;

(c) incomplete construction of necessary facilities by the applicant or inspection and certification thereof by the appropriate authorities;

or

(d) incomplete construction of necessary facilities by the utility.

(2) A utility shall make reasonable efforts to eliminate conditions preventing extensions of service and shall pursue completion of any facilities it must construct with due diligence.

(3) As a prerequisite to accepting an applicant as a customer, and providing service, a utility may require the applicant to:

(i) file a written service application containing information

sufficient to establish the applicant's identity and responsibility for the premises as either the owner or occupant, the correct service classification, and who controls access to the meter(s) if not the customer;

(ii) comply with the utility's tariff, or any applicable State, city or local laws or ordinances;

(iii) fulfill any applicable requirements of Parts 98 and 230 of this Title;

(iv) make full payment for all amounts due and payable which are not either the subject of a pending billing dispute pursuant to section 13.15 of this Part or of an existing deferred payment agreement that is in good standing, including:

(a) service provided and billed, in accordance with section 13.11 of this Part, to prior account(s) in the applicant's name or for which the applicant is legally responsible;

(b) other tariff fees, charges or penalties;

(c) reasonably chargeable material and installation costs relating to temporary or permanent line or main extensions or service laterals, as required by the utility's tariff and authorized under Parts 98 and 230 of this Title, provided these costs are itemized and given to the applicant in writing;

(d) special services billable under the utility's tariff, provided these costs are itemized and given to the applicant in writing; and

(e) a security deposit, if requested by the utility, as long as such deposit is in accordance with section 13.7 of this Part.

(4) A utility shall provide service to any accepted applicant whose application for service was previously denied solely for failure to make full payment as provided in subparagraph (3)(iv) of this subdivision, as soon as reasonably possible, but no later than three business days, or such later time as may be specified by the applicant, after payment is made, or 10 calendar days after receipt of the original application, whichever is later, except as provided in paragraph (1) of this subdivision.

(b) Service application. (1) A service application shall be available in every utility business office and shall be provided to every applicant for service for whom the filing of a written application is a prerequisite for providing service.

(2) A service application shall contain a section for determining the customer's service classification, which shall include the following:

(i) a conspicuous notice advising the customer that the questions in this section are designed to assist the utility in placing the customer

on the proper and the most beneficial service classification; that the utility may rely on this information in classifying the service; that the cost of service may vary under different service classifications; that there are eligibility requirements for each service classification; that a customer may be eligible for service under more than one classification; that one classification may be more beneficial than another; that a description of the common nonresidential service classifications accompanies the application; that the utility's tariff, which describes each service classification in detail, may be examined in every utility business office; that questions about service classification may be discussed with a customer service representative; that if the customer's use of service or equipment changes in the future, the customer must notify the utility of these changes, in order to assure that the customer is being properly billed; and that if the information provided by the customer relevant to service classification is inaccurate or incomplete, the customer may be subject to backbilling on the correct service classification, or may be precluded from receiving a refund for overcharges based on the correct service classification; and

(ii) a comprehensive series of questions relevant to identifying the customer's service classification based on the utility's tariff, such as, but not limited to, the type of business or use, the size and type of equipment on the premises, and the estimated consumption.

(3) A utility may require the submission of appropriate types of documents to substantiate the information provided in the service application, which shall be listed in the application form and shall constitute a part of the application.

(4) A service application may request any other relevant information or documents not inconsistent with this section.

(5) Any utility report relevant to the establishment of the proper service classification for the customer shall be made a part of the service application.

(6) A service application shall contain, close to the place where the applicant signs, a notice that the applicant has the right to request that the utility inspect the metering device in order to assure its accuracy, along with a place for the applicant to indicate whether such inspection is requested; provided, however, that if a utility has a written policy of not backbilling previously unbilled service when the failure to charge for such service resulted from the faulty operation or inoperation of a metering device, which faulty operation or inoperation was not due to the culpable conduct of the customer or his agent, the

above notice is not required.

(7) A service application must be signed by the applicant or an authorized agent of the applicant, and a copy must be provided to the applicant or agent. In the case of agents, a utility may require suitable proof of the authorization of the agent.

(c) Denial of application. (1) A utility shall not deny an application for service except in a written notice either delivered personally to the applicant or sent to the applicant's current business address or any alternative mailing address provided in the application.

(2) The written notice of denial shall:

(i) state the reason(s) for the denial;
(ii) specify what the applicant must do to qualify for service; and
(iii) advise the applicant of the right to an investigation and review of the denial by the commission or its authorized designee if the applicant considers the denial to be without justification, and identify the appropriate address and telephone number of the commission.

(3) A utility shall advise any applicant who submits an incomplete application, in writing and within three business days after receipt of the application, of the information and/or documents that must be submitted in order for the application to be considered complete. Such notice shall not itself be considered a denial of the application.

(4) Every utility shall maintain, for a period of not less than one year, service applications that are denied and the utility's written notice of denial.

(d) Utilities shall comply with subdivisions (a) and (b) of this section no later than March 18, 1988.

.SO DOC 16A-13.3

NYCRR

13.3 Termination of service.

(a) Conditions for termination. (1) Except as provided in paragraph (2) of this subdivision and section 13.13 of this Part, a utility may only terminate service to a customer if it provides advance final notice of the termination and fulfills all other requirements of this section when the customer:

(i) fails to pay any tariff charge due on the customer's account for which a written bill itemizing the charge, in conformance with section 13.11 of this Part, has been sent, except for charges that reflect service used more than six years prior to the time the bill first containing these charges was rendered, which charges must be pursued by other methods of collection;

(ii) fails to pay amounts due under a deferred payment agreement;

(iii) fails to pay a security deposit if in accordance with section

13.7 of this Part;

(iv) fails to provide reasonable access to the premises for necessary or proper purposes in connection with rendering of service, including meter installation, reading or testing, or the maintenance, or removal, or securing, of the utility's property, so long as the requirements of section 13.8(c) of this Part have been met, and the customer has not advised the utility that the customer does not and who does have control over access; or

(v) fails to comply with a provision of the utility's tariff which permits the utility to refuse to supply or to terminate service.

(2) A utility may terminate service to a customer without providing advance notice of the termination and without fulfilling the other requirements of this section when it finds service being supplied through tampered equipment, provided that the utility:

(i) has evidence that the customer opened the account and used the service prior to the creation of the condition or that the customer knew, or reasonably should have known, that service was not being fully billed;

(ii) has rendered a written unmetered service bill in accordance with section 13.11(e) of this Part;

(iii) has made reasonable efforts to provide to a person in charge of the premises:

(a) the written unmetered service bill; and

(b) oral notice of the conditions, if any, under which the utility will continue service, which may include the payment by cash, certified check or money order within two hours, of some portion of the bill up to, but not exceeding, 50 percent; and

(iv) has not received the required payment.

(b) Final notice of termination. (1) A final notice of termination shall state:

(i) the reason(s) for termination, including the total amount required to be paid, if any, and the manner in which termination may be avoided;

(ii) the earliest date on which termination may occur;

(iii) the address and phone number of the office of the utility that the customer may contact in reference to his account;

(iv) that utility procedures are available for considering customer complaints prior to discontinuance;

(v) that commission procedures are available for considering customer complaints when a customer is not satisfied with the utility's handling of the complaint, including the address and phone number of the appropriate commission office;

(vi) that it is a termination notice which should be brought to the attention of the utility when the bill is paid;

(vii) that payment of the charges with a check that is subsequently dishonored may result in immediate termination of service without further notice, if applicable; and

(viii) that at the time the utility goes to the premises to terminate service, it may require any payment to be made with cash, certified check or money order if the customer has, within the last 24 months, paid with a check that was dishonored.

(2) A final notice of termination may contain any additional information not inconsistent with this Part.

(3) A final notice of termination may not be issued or sent unless at least 20 calendar days have elapsed from the date payment was due, or the date given in a written notice to cure a tariff violation, or as provided in section 13.8(c)(3)(iii) of this Part where the reason for the notice is the failure to provide access, except that a final notice of termination for nonpayment may be issued or sent on or after the date payment was due in the following circumstances:

(i) when any portion of the charge that the customer has failed to pay is for unmetered service that was being supplied through tampered equipment and for which an unmetered service bill in accordance with section 13.11(e) of this Part has been rendered;

(ii) when the charge that the customer has failed to pay is the installment amount due in accordance with a deferred payment agreement;
or

(iii) when the utility has accepted a written waiver of the customer's right to be sent a termination notice in accordance with the provisions of section 13.7(d)(2) of this Part.

(4) A final notice of termination shall not be sent while a complaint is pending before the utility or the commission for nonpayment of the disputed charges or for any other reason that is the subject of the complaint as provided in section 12.3 of this Title. Nothing in this Part bars the utility from sending such notice for nonpayment of undisputed charges or for reasons not at issue in the complaint.

(c) Physical termination of service. (1) A utility shall not terminate service for the reasons set forth in paragraph (a)(1) of this section:

(i) for five calendar days after a final notice of termination has been personally served upon the customer; or

(ii) for eight calendar days after a final notice of termination has been mailed to the customer at the location where service is rendered or to any alternative address for mailing purposes previously provided to

the utility.

(2) A utility shall not terminate service under this Part on:

(i) a Saturday or Sunday;

(ii) a public holiday as defined in the General Construction Law;

(iii) a day on which the business offices of the utility are closed for business; or

(iv) a day on which the Public Service Commission is closed.

(3) On days when termination may occur, a utility may terminate service between the hours of 8 a.m. and 6 p.m., except that on days preceding the days listed in paragraph (2) of this subdivision, termination may only occur after 3 p.m. if the customer or any person in charge of the premises is informed prior to termination in a personal contact that termination is about to occur and the utility is prepared to accept a check for any payment required to avoid termination.

(4) A utility shall not terminate service unless it shall have verified on the day termination is scheduled that payment has not been posted to the customer's account as of the opening of business on that day, or shall have complied with procedures established pursuant to paragraph (d)(2) of this section.

(5) Consistent with this section, a utility shall strive to physically terminate service whenever a final notice of termination is sent.

(6) A utility shall not terminate service more than 60 calendar days after issuance of the final termination notice, unless it has, during that time, issued a termination reminder notice that states the current arrears due, if applicable. A utility shall not terminate service more than 90 calendar days after issuance of the final termination notice unless it has, during that time, issued a termination reminder notice that contains all the information required in subdivision (b) of this section.

(7) A utility shall not terminate service while a complaint is pending before the utility or the commission and for eight calendar days after resolution by the utility or by the commission or its authorized designee for nonpayment of the disputed charges or for any reason that is the subject of the complaint as provided in section 12.3 of this Title. Nothing in this Part bars a utility from termination for nonpayment of undisputed charges or for reasons not at issue in the complaint.

(d) Rapid posting of payments. Every utility shall establish written procedures to ensure that any payments made in response to final notices of termination, when the customer brings the fact that such a notice has been issued to the attention of the utility or its collection agents:

(1) are posted to the customer's account on the day payment is received; or

(2) are processed in some manner so that termination will not occur.

(e) Payment at the time of termination. (1) If a customer claims, at the time that termination for nonpayment is to take place, that payment has already been made and produces a written business record of payment, or claims that there is a complaint pending before the utility or the commission with regard to the charges demanded, the utility's field representative shall make a reasonable effort to verify this information with a utility office representative and shall not terminate service for nonpayment of any verified disputed amount.

(2) If a customer offers payment of the full amount that forms the basis for a scheduled termination at the time of termination, the utility representative shall accept such payment and not terminate service.

(3) If an eligible customer signs a deferred payment agreement, in accordance with section 13.5 of this Part, for the full amount that forms the basis for a scheduled termination and offers payment of the required down payment at the time of termination, the utility representative shall accept such down payment and not terminate service. If the utility allows the customer an extension of time to go to a business office to sign the deferred payment agreement, and the customer agrees to do so and offers payment of the required down payment, the utility representative shall accept such down payment and not terminate service; provided, however, that the utility may terminate service without further notice if the customer fails to sign the agreement within the specified time.

(4) If a customer has, within the last 24 months, paid for service with a check that was dishonored, the utility has the right to accept only cash, certified check or money order as payment under paragraph (2) or (3) of this subdivision.

(5) Whenever payment is made at the time of termination, the utility's field representative shall provide a customer with a receipt showing the date, the account number, the amount received, the form of the payment and either the name or identification number of the utility representative.

(f) Dishonored checks. Receipt of a subsequently dishonored negotiable instrument in response to a notice of termination or tendered to a utility representative, shall not constitute payment of a customer's account and no utility shall be required to issue additional notice prior to termination.

(g) Applicability. (1) Nothing in this section shall affect a utility's right to suspend, curtail or disconnect service:

(i) when there is no customer and service is being provided through tampered equipment;

(ii) when there is no customer and the utility can show that the user will require service for a period of less than one week, provided that it makes a reasonable effort to advise the user before disconnection and to provide the user an opportunity to apply for service;

(iii) when there is no customer and the utility has provided advance written notice to the occupant stating its intent to disconnect service unless the responsible party applies for service and is accepted as a customer, and advising the occupant of the location of the nearest utility business office where application can be made, either by posting 48 hours or by mailing at least 5 and no more than 30 calendar days before disconnection; or

(iv) as permitted under section 13.13 of this Part.

(2) Nothing in this section shall affect a utility's obligation to comply with the additional requirements set forth in sections 11.7 and 11.8 of this Title relating to termination of service to entire multiple dwellings and two-family homes.

.SO DOC 16A-13.4

NYCRR

13.4 Reconnection of service.

(a) Obligation to reconnect. (1) A utility shall reconnect service that has been terminated solely for nonpayment of bills for any tariff charge or a security deposit within 24 hours of the customer's request for reconnection, receipt by the utility of the lawful reconnection charge, any other charges, fees or penalties due, legal fees, court costs and disbursements, if applicable, and either:

(i) the full amount of arrears and/or a security deposit for which service was terminated, and any other tariff charges billed after the issuance of the termination notice which are in arrears at the time reconnection is requested; or

(ii) the signing of a deferred payment agreement in accordance with section 13.5 of this Part for the amounts set forth in subparagraph (i) of this paragraph, and the receipt of a down payment, if required under the agreement.

(2) A utility shall reconnect service that has been terminated solely for failure to provide access within 24 hours of the customer's request for reconnection, provided the customer has allowed access and has made a reasonable arrangement for future access.

(3) A utility shall reconnect service that has been terminated solely

for a violation of the tariff within 24 hours of a customer's request for reconnection and, at the option of the utility, either receipt by the utility of adequate notice and documentation, or a field verification by the utility, that the violation has been corrected; provided, however, that the field verification, if required, shall be arranged within two business days of the customer's request or such later time as may be specified by the customer.

(4) A utility shall reconnect service that has been terminated for two or more independent reasons when the customer has requested reconnection and has satisfied all conditions for reconnection. The reconnection shall be accomplished within the time period applicable to the last condition satisfied under paragraph (1), (2) or (3) of this subdivision.

(5) A utility shall reconnect service that has been terminated within 24 hours after the direction of the commission or its designee, which direction may occur only where the termination was in error, or the customer has filed a complaint with the commission and has either paid in full the undisputed amount established pursuant to section 12.3 of this Title, or has entered into a deferred payment agreement in accordance with section 13.5 of this Part for such amount and has paid the required down payment.

(b) Inability to reconnect. Whenever circumstances beyond a utility's control, as set forth in section 13.2(a)(1)(i)-(iii) of this Part, prevent reconnection of service within 24 hours of any of the events specified in paragraphs (a)(1) -(5) of this section, service shall be reconnected within 24 hours after those circumstances cease to exist.

.SO DOC 16A-13.5

NYCRR

13.5 Deferred payment agreements.

(a) Utility's obligations. (1) A utility shall provide a written notice offering a deferred payment agreement in accordance with this section to an eligible customer at the following times:

(i) not less than five calendar days before the date of a scheduled termination of service for nonpayment of arrears, as indicated on a final termination notice, or eight calendar days if mailed, provided the customer has been a customer for at least six months and the arrears on which the outstanding termination notice is based exceed two months' average billing; and

(ii) when it renders a backbill, which exceeds the cost of twice the customer's average monthly usage or \$100, whichever is greater; provided, however, that a utility shall not be required to offer an agreement when the customer knew, or reasonably should have known, that the original billing was incorrect.

(2) If a utility and a customer agree to terms of a deferred payment agreement in a telephone conversation, the utility shall send the customer two fully completed copies of the agreement, signed by the utility, for the customer to sign and return.

(b) Eligibility. (1) Any customer is eligible for a deferred payment agreement except the following:

(i) a customer who owes any amounts under a prior deferred payment agreement;

(ii) a customer who failed to make timely payments under a prior deferred payment agreement in effect during the previous 12 months;

(iii) a customer that is a publicly held company, or a subsidiary thereof;

(iv) a seasonal, short-term or temporary customer;

(v) an electric customer who, during the previous 12 months, had a combined average monthly billed demand for all its accounts with the utility in excess of 20 kw, or who registered any single demand on any account in excess of 40 kw;

(vi) a gas customer who during the previous 12 months had a combined total consumption for all its accounts with the utility in excess of 4,000 therms;

(vii) a steam customer who during the previous 12 months had a combined total consumption for all its accounts with the utility in excess of 1,000 Mlbs;

(viii) a customer of any two or more services (gas, electric and steam) who is ineligible under subparagraph (v), (vi) or (vii) of this paragraph; or

(ix) a customer who the utility can demonstrate has the resources to pay the bill, provided that the utility notifies the customer of its reasons and of the customer's right to contest this determination through the commission's complaint procedures.

(2) The commission or its authorized designee may order a utility to offer a deferred payment agreement in accordance with this section to a customer whom it finds this section intended to protect, when an agreement is necessary for a fair and equitable resolution of an individual complaint.

(c) Contents of offer. (1) Every offer of a deferred payment agreement shall inform the customer of the availability of a deferred payment agreement for eligible customers, set forth generally the minimum terms to which such customer is entitled, explain that more generous terms may be possible, and specify the telephone number and the times to call in order to discuss agreement.

(2) An offer pursuant to subparagraph (a)(1)(i) of this section shall also state the date by which the customer must contact the utility in order to avoid termination, and explain that the utility has the right to a larger down payment if the deferred payment agreement is not entered into until after a field visit to physically terminate service has been made.

(d) Terms of agreement. (1) A deferred payment agreement shall obligate the customer to make timely payments of all current charges.

(2) A deferred payment agreement offered pursuant to subparagraph (a)(1)(i) of this section may require the customer:

(i) to make a down payment of up to 30 percent of the arrears on which an outstanding termination notice is based, or the cost of twice the customer's average monthly usage, whichever is greater, plus the full amount of any charges billed after the issuance of the termination notice which are in arrears at the time the agreement is entered into;

or

(ii) in the event a field visit to physically terminate service has been made, to make a down payment of up to 50 percent of the arrears on which an outstanding termination notice is based, or the cost of four times the customer's average monthly usage, whichever is greater, plus the full amount of any charges billed after the issuance of the termination notice which are in arrears at the time the agreement is entered into; and

(iii) to pay the balance in monthly installments of up to the cost of the customer's average monthly usage or one sixth of the balance, whichever is greater; and

(iv) to pay late payment charges during the period of the agreement; and

(v) to pay a security deposit in three installments, 50 percent down and two monthly payments of the balance, if previously requested in accordance with section 13.7 of this Part.

(3) A deferred payment agreement offered pursuant to subparagraph (a)(1)(ii) of this section, may require the customer to pay the outstanding charges in monthly installments of up to the cost of one half of the customer's average monthly usage, or one twenty-fourth of such charges, whichever is greater.

(4) A deferred payment agreement may provide for a greater or lesser down payment, a longer or shorter period of time, and payment on any schedule, if mutually agreed upon by the parties.

(e) Form of agreement. A deferred payment agreement form shall:

(1) set forth in general the terms of the agreement;

(2) indicate the due date for each installment, and the exact dollar amount of each installment, separately itemized to show the arrears payment and the security deposit payment, as applicable;

(3) indicate whether the agreement is subject to late payment charges, and if so, either set forth the exact dollar amount of the late payment charge to be paid with each installment or, if late payment charges are to be billed on the customer's regular cycle bill, a late payment charge disclosure statement. The disclosure statement shall include the late payment charge rate, on both a monthly and an annualized basis, how it is calculated, how and when the late payment charge will be billed, what the total cost of late payment charges on the agreement will be if the agreement is fully complied with, and a notice that the total late payment charges may be greater or less than the disclosed cost if the customer makes payments either early or late;

(4) state the date by which the copy signed by the customer, and any applicable down payment, must be received by the utility in order to become enforceable; provided, however, that such date may not be less than six business days after it is sent;

(5) inform the customer of the utility's policy if the agreement is not signed and returned as required;

(6) state that if the customer fails to comply with an agreement, the utility may send an immediate termination notice; and

(7) state that the customer may obtain the assistance of the commission to assure that the agreement is in conformance with this section.

(f) Broken agreements. (1) The first time a customer fails to make timely payment in accordance with a deferred payment agreement, the utility shall give the customer a reasonable opportunity to keep the agreement in force by paying any amounts due under the agreement.

(2) Except as provided in paragraph (1) of this subdivision, if a customer fails to comply with the terms of a deferred payment agreement, the utility may demand full payment of the total outstanding charges and send a final termination notice in accordance with section 13.3(b)(3)(ii) of this Part.

(g) Utilities shall comply with this section no later than March 18, 1988.

.SO DOC 16A-13.6

NYCRR

13.6 Levelized payment plans.

(a) Obligation to offer. A utility shall provide a written notice offering a voluntary levelized payment plan designed to reduce fluctuations in payments caused by seasonal patterns of consumption to

its eligible customers at least once in each 12-month period.

(b) Eligibility. A utility shall be required to offer a levelized payment plan to all customers except:

(1) customers who have less than 12 months of billing history at the premises;

(2) seasonal, short-term or temporary customers;

(3) customers who have arrears;

(4) interruptible, temperature-controlled, or dual-fuel customers;

(5) customers who, for any reason, ceased being billed on a previous levelized payment plan before the end of the plan year in the past 24 months; or

(6) customers whose pattern of consumption is not sufficiently predictable to be estimated on an annual basis with any reasonable degree of certainty.

(c) Utility procedure. A utility shall establish a written procedure and billing system to implement this section, which procedure:

(1) sets forth a method for establishing an eligible customer's monthly or bimonthly levelized payment amount which shall take into consideration the best available relevant factors, including the utility's standard estimation factors, projected rates, fuel adjustment charges, and taxes;

(2) sets forth a method for comparing the actual cost of service rendered, as determined by actual meter readings and any rate increases or decreases, to the levelized payment amount, and for adjusting upwards or downwards the levelized payment amount to minimize the adjustment required on the final settlement bill, which comparison shall be done not less than two nor more than four times annually, and at the end of the plan year;

(3) provides that each levelized bill clearly identifies the total of the levelized payment amounts billed and the total of the actual dollar value of the consumption used during the period covered by the current bill;

(4) provides that a final levelized settlement bill, which is rendered at the end of the plan year, when the customer requests removal from the levelized payment plan, or when the utility removes the customer from the levelized payment plan:

(i) sets forth a reconciliation between the total levelized payment amount billed, the cost of service actually used and the amounts paid during the plan period; and

(ii) if payment was received in excess of the cost of service actually used during the plan period, advises the customer of the utility's

policy regarding return of the excess payment, which policy may not permit the utility to credit to the customer's account more than the levelized payment or estimated amount of the next cycle bill, and must provide for the issuance of a refund check for any balance within 30 calendar days of the rendering of the final levelized settlement bill;

(5) requires that when the levelized payment amount is revised, the customer be provided with a general description of such revision calculation, and a telephone number to call at the utility for a more detailed explanation of the revision; and

(6) limits enrollment to the plan to a time of year when the customer will not be subject to undue disadvantage.

(d) Removal of levelized payment plan. (1) A customer may request that the utility remove the customer from the levelized payment plan and reinstate regular billing at any time, in which case the utility may immediately render a final levelized settlement bill, and shall do so no later than by the time of the next cycle bill that is rendered more than 10 business days after the request.

(2) A utility may only remove a customer from its levelized payment plan if the customer becomes ineligible under subdivision (b) of this section, and provided that the utility has given the customer an opportunity to become current in payment, if delinquency is the cause of the customer's ineligibility, provided further that such opportunity need only be given once in any 12-month period.

(e) Utilities shall comply with this section no later than March 18, 1988.

.SO DOC 16A-13.7

NYCRR

13.7 Security deposits.

(a) Deposit requirement. (1) A utility may only require the payment of a security deposit from:

- (i) a new customer; or
- (ii) an existing customer:

(a) who is delinquent;

(b) whose financial condition is such that it is likely that the customer may default in the future; provided, however, that the utility must have reliable evidence of such condition, such as reports from accepted financial reporting services or credit reporting agencies;

(c) who has filed for reorganization or bankruptcy; or

(d) who has been rendered a backbill within the last 12 months for previously unbilled charges for service that came through tampered equipment.

(2) A utility shall offer an existing customer, from whom a deposit is

required under clauses (1)(ii)(a) or (b) of this subdivision, the opportunity to pay the deposit in three installments, 50 percent down and two monthly payments of the balance.

(3) A utility shall establish a written procedure covering its deposit policy and practice.

(4) A request for a deposit or deposit increase shall be in writing and shall advise the customer:

- (i) why the deposit is being requested;
- (ii) how the amount of the deposit was calculated;
- (iii) that the deposit is subject to later upward or downward revision based on the customer's subsequent billing history;
- (iv) that the customer may request that the utility review the account in order to assure that the deposit is not excessive;
- (v) the circumstances under which the deposit will be refunded;
- (vi) that the customer will receive annual notice of the interest credited to the account;
- (vii) about the available deposit alternatives; and
- (viii) that for an existing customer from whom the deposit is being requested because of delinquency or financial condition, the deposit may be paid in three installments.

(5) A utility shall issue, to every customer from whom a deposit is obtained, a receipt showing the date, the account number, the amount received, the form of the payment, and shall contain a notice explaining the manner in which interest will accrue and be paid and that the receipt is neither negotiable nor transferable.

(b) Deposit calculation. (1) The amount of a deposit shall not exceed the cost of twice the customer's average monthly usage, except in the case of customers whose usage varies widely such as space-heating or -cooling customers, or certain manufacturing and industrial processors, where the deposit shall not exceed the cost of twice the average monthly usage for the peak season.

(2) In the case of an existing customer who has 12 months or more of billing history, the amount of the deposit shall be based on service used during the previous 12-month period as evidenced by the billing history.

(3) In the case of a new customer or a customer with less than 12 months of billing history, the amount of the deposit shall be based on one or more of the following, as available:

- (i) the billing history of the customer;
- (ii) information provided in the application by the customer about the expected load and use of service;

(iii) information contained in a load study of the premises prepared by the utility; and

(iv) the billing history of the previous customer, provided there have been no significant changes in the load.

(c) Deposit review. (1) A utility shall, at the first anniversary of the receipt of the deposit and at least biennially thereafter, review the billing history of every customer who has a deposit with the utility, to assure that the amount of the deposit conforms to the limitations contained in subdivision (b) of this section. This requirement does not limit the right of a utility to review a deposit at any time.

(i) If a deposit review shows that the deposit held falls short of the amount that the utility may lawfully require by 25 percent or more, the utility may require the payment of a corresponding additional deposit amount from the customer.

(ii) If a deposit review shows that the deposit held exceeds the amount that the utility may lawfully require by 25 percent or more, the utility shall refund the excess deposit to the customer in accordance with subdivision (f) of this section.

(2) Upon request of a customer for a downward revision of the deposit, which request is substantiated both by the customer's billing history and by a permanent documented change in load and consumption, a utility shall refund any portion of the deposit in excess of the amount the utility may lawfully require in accordance with subdivision (f) of this section.

(d) Deposit alternatives. (1) A utility shall accept deposit alternatives which provide a level of security equivalent to cash, such as irrevocable bank letters of credit and surety bonds.

(2) A utility may, at its discretion, accept from the customer, in lieu of a deposit, a written promise to pay bills on receipt and a written waiver of the customer's right to be sent a final termination notice until 20 calendar days after payment is due.

(e) Interest. (1) Every cash deposit shall accrue interest at a rate prescribed at least annually by the commission in light of the current economic conditions and current charges paid for money borrowed by such utility, taking into account the expenses incurred by such utility in obtaining, handling, returning or crediting the sum deposited.

(2) Interest shall be paid to the customer upon the return of the deposit, or, where the deposit has been held for a period of one year or more, the interest shall be credited to the customer no later than the first bill rendered after the next succeeding first day of October and

at the expiration of each succeeding one-year period.

(3) Interest shall be calculated on the deposit until the day it is applied as a credit to an account or the day on which a refund check is issued. If the deposit is credited in part and refunded in part, interest shall be calculated for each portion up to the day of credit and refund.

(f) Deposit return. (1) A utility shall return a deposit or portion thereof, plus the applicable interest, in accordance with paragraphs (2) and (3) of this subdivision, as soon as reasonably possible, but no more than 30 calendar days after:

- (i) the day an account is closed;
- (ii) the issuance date of the first cycle bill rendered after a three-year period during which all bills were timely paid, provided there is no other basis for the utility to request a deposit under subparagraph (a)(1)(ii) of this section; or
- (iii) a review pursuant to subdivision (c) of this section shows that deposit reduction is warranted.

(2) A deposit or portion thereof plus the applicable interest that is subject to return under paragraph (1) of this subdivision:

- (i) shall be credited to the account it secured in the amount of any outstanding charges;
- (ii) may be credited to the account it secured in the amount of the next projected cycle bill, if applicable; and
- (iii) may be credited to any other account of the customer not secured by a deposit, in the amount of the arrears on that account.

(3) If a balance remains after a utility has credited the customer's account(s) in accordance with paragraph (2) of this subdivision, a refund check shall be issued to the customer.

(g) Utilities shall comply with this section no later than March 18, 1988.

.SO DOC 16A-13.8

NYCRR

13.8 Meter reading and estimated bills.

(a) Meter reading. (1) A utility shall make a reading attempt, to obtain an actual reading for every customer's account, on the regularly scheduled basis provided for in its tariff.

(2) A reading attempt requires that a meter reader visit the premises between 8 a.m. and 5 p.m. on a business day, and follow any routine access instructions.

(3) Where circumstances beyond a utility's control prevent the utility from making a regularly scheduled reading attempt and where the two previous consecutive cycle bills were not based on an actual reading,

the utility shall make a second similar follow-up reading attempt as soon as possible and within seven calendar days after the scheduled reading date.

(4) Where a utility did not obtain an actual reading from the meter(s) of a demand account at the time of a regularly scheduled or follow-up reading attempt, the utility shall make another reading attempt as soon as possible and within seven calendar days after its last attempt.

(5) Where a utility has billed a customer's account based on the readings of a remote registration device for six consecutive months, the utility shall, at the time of every subsequent reading attempt and, until successful, try to gain access to and read the meter.

(6) Where a utility has billed a customer's account based on customer readings for six consecutive months, and did not obtain an actual reading at the time of the next regularly scheduled or follow-up reading attempt thereafter, the utility shall, within seven calendar days after the last attempt, either make another reading attempt or an appointment with the customer to read the meter.

(7) Unless a customer does not have access to the meter or the customer will be unable to obtain a reliable meter reading, the utility shall, at the time of any unsuccessful reading attempt, leave at the premises or mail to the customer a meter-reading card for the nondemand meter.

(b) Estimated bills. (1) A utility may render an estimated bill for a regular cycle billing period only when:

- (i) the utility has failed to obtain access to the meter(s);
- (ii) circumstances beyond the control of the utility made obtaining an actual reading of the meter(s) extremely difficult, despite having access to the meter area; provided, however, that estimated bills for this reason may be rendered no more than twice consecutively without the utility advising the customer in writing of the specific circumstances and the customer's obligation to have the circumstances corrected;
- (iii) the utility has good cause for believing that an actual or customer reading obtained is likely to be erroneous; provided, however, that estimated bills for this reason may be rendered no more than twice consecutively without the utility initiating corrective action before the rendering of the next cycle bill;
- (iv) circumstances beyond the control of the utility prevented the meter reader from making a premises visit;
- (v) an actual reading was lost or destroyed; provided, however, that an estimated bill for this reason shall be rendered no more than once without the utility initiating corrective action before the rendering of

the next cycle bill;

(vi) an estimated reading has been prescribed or authorized by the commission for a particular billing cycle;

(vii) an estimated reading is the approved billing method in accordance with the utility's tariff for the billing; or

(viii) an unmetered condition was in existence during the period.

(2) Every estimated bill shall be calculated in accordance with an established formula or methodology which shall take into account the best available relevant factors for determining the customer's energy usage and, if applicable, demand usage.

(c) No-access procedure. (1) A utility shall begin providing no-access notices as described in this subdivision, commencing with:

(i) the second consecutive bill estimated pursuant to either subparagraph (b)(1)(i) or (ii) of this section in the case of accounts billed for demand;

(ii) the fourth consecutive bill estimated pursuant to either subparagraph (b)(1)(i) or (ii) of this section in the case of accounts not billed for demand; or

(iii) the 10th consecutive bill estimated pursuant to subparagraph (b)(1)(i) or (ii) of this section or based on a remote registration device or a customer reading.

(2) The no-access notices and charges described in this subdivision shall be directed only to the access controller. In any case where the access controller is not the customer of the subject account, a copy of these no-access notices shall also be sent to the customer at the same time.

(3) The series of no-access notices shall be as follows:

(i) The first notice shall advise the access controller that unless access to the customer's meter is provided on the next meter reading date, or a special appointment to read the meter is made and kept by the access controller prior to that date, a no-access charge will be added to the access controller's next bill and to every bill thereafter until access to the customer's meter is provided, but that no charge will be imposed if an appointment is arranged and kept. The notice shall advise the access controller that the utility will arrange a special appointment for a reading of the customer's meter if the access controller calls a specified telephone number. Where the access controller is not the customer of the subject account, the notice shall begin by stating that the utility records indicate that the recipient is the party who controls access to the meter of the customer, specifically identified as to address, part supplied, and account number, and that

the utility has not been provided access to the customer's meter as required.

(ii) The second notice shall advise the access controller of the no-access charge that has been added to the access controller's bill and that, unless access to the customer's meter is provided on the next meter-reading date or a special appointment to read the meter is made and kept by the access controller prior to that date, another charge will be added to the access controller's next bill. The notice shall further explain that if the access controller's service can be physically terminated without obtaining access, steps to terminate service will follow, and that in the event that the access controller's service cannot be physically terminated, steps to obtain a court order to gain access to the customer's meter will follow. The notice shall advise the access controller that the utility will arrange a special appointment for a reading of the customer's meter if the access controller calls a specified number.

(iii) The third and each successive notice shall advise the access controller of the no-access charge that has been added to the access controller's bill and, if the access controller's service can be terminated without obtaining access, shall be accompanied by a final notice of termination for nonaccess. In any case where the access controller's service cannot be physically terminated without obtaining access, the notice shall advise the access controller that the utility is seeking to obtain a court order to gain access to the customer's meter.

(4) A no-access charge as provided for in the utility's tariff shall not exceed \$100.

(5) No more than \$100 per building or premises shall be added to any single bill of the access controller even though more than one meter is located there.

(6) A utility may, at its discretion, suspend temporarily the issuance of no-access notices and/or penalties under this subdivision if the access controller contacts the utility and provides a legitimate reason for postponing the provision of access; provided, however, that such suspension may not be utilized in the case of any account that is billed for demand charges and in no event for more than 90 calendar days.

(d) Utilities shall comply with this section no later than March 18, 1988.

.SO DOC 16A-13.9

NYCRR

13.9 Backbilling.

(a) Notice. (1) Every backbill shall contain a written explanation of

the reason for the backbill that shall be sufficiently detailed to apprise the customer of the circumstances, error or condition that caused the underbilling, and, if the backbill covers more than a 24-month period, a statement setting forth the reason(s) the utility did not limit the backbill under subdivision (c) of this section.

(2) Every backbill shall contain, or be accompanied by, all required information applicable under section 13.11 of this Part.

(3) Every backbill covering more than a one-month period, other than a catch-up backbill, shall contain a notice that the customer may obtain upon request a detailed billing statement showing how the charges were calculated, including any late payment charges. All catch-up backbills shall clearly indicate how the backbill was calculated, whether as if the service were used during the current cycle, or as if redistributed back to the last actual reading.

(4) A backbill shall be accompanied by an offer of a deferred payment agreement in accordance with section 13.5 of this Part, if applicable.

(b) Limitations on backbill rendering. (1) A utility shall not render a backbill more than six months after the utility actually became aware of the circumstance, error or condition that caused the underbilling, unless a court extends the time to render a backbill.

(2) A utility shall not upwardly revise a backbill unless the first backbill explicitly stated that the utility reserved the right to do so, the revised backbill is rendered within 12 months after the utility actually became aware of the circumstance, error or condition that caused the underbilling, and:

(i) the customer knew or reasonably should have known that the original billing or the first backbill was incorrect; or

(ii) new information shows that the first backbill was incorrect.

(3) A utility shall render a downwardly revised backbill as soon as reasonably possible and within two months after the utility becomes aware that the first backbill was excessive.

(4) A utility shall not render a backbill for any underbilling when the reason for the underbilling is apparent from the customer's service application, or could have been revealed in a service application and the utility failed to obtain and retain one.

(c) Limitations on backbilling period. (1) When the failure to bill at an earlier time was due to utility deficiency, a utility shall not bill a customer for service rendered more than 12 months before the utility actually became aware of the circumstance, error or condition that caused the underbilling, unless the utility can demonstrate that the customer knew or reasonably should have known that the original billing

was incorrect.

(2) A utility shall not bill a customer for service rendered more than 24 months before the utility actually became aware of the circumstance, error or condition that caused the underbilling, unless the utility can demonstrate that the customer knew or reasonably should have known that the original billing was incorrect.

(d) Rebilling of estimated demands. (1) A utility shall not upwardly revise an estimated demand unless it can demonstrate that, for the period during which the demand was estimated, it complied with the meter-reading requirements and the no-access procedures of section 13.8 of this Part.

(2) All revised demands shall be based on the best available information, including the customer's present and historical energy consumption and load factor.

(3) No revised demand shall exceed 95 percent of the subsequent actual demand, unless the utility has, along with the estimated demand bill, offered a special appointment to read the meter, and the customer failed to arrange and keep such appointment, in which case the estimated demand may be revised up to the level of the subsequent actual demand.

(4) A utility shall downwardly revise any estimated demand that exceeds the subsequent actual demand, within 30 calendar days after such actual demand was obtained.

(5) A utility may only upwardly revise an estimated demand within 60 calendar days after the subsequent actual demand was obtained.

(e) Utilities shall comply with this section no later than March 18, 1988.

.SO DOC 16A-13.10

NYCRR

13.10 Late payment and other charges.

(a) Late payment charges. A utility may impose a continuing late payment charge as provided for in its tariff on:

(1) the balance of any bill for service, including levelized bills and any unpaid late payment charge amounts applied to previous bills, which bill is not paid within 20 calendar days of the date payment was due;

(2) the amount billed for service used that was previously unbilled because the service was being provided through tampered equipment, and the utility can demonstrate either that the condition began since the customer initiated service or that the customer actually knew or reasonably should have known the original billing was incorrect; and

(3) the balance due under a deferred payment agreement offered pursuant to section 13.5(a)(1)(i) of this Part.

(b) Other charges. Except as provided in this section, a utility may

not charge any customer a late payment charge, penalty, fee, interest or other charge of any kind for any late payment or deferred payment agreement occasioned by the customer's failure to make timely payment for services. Nothing in this section shall prohibit a utility from imposing a reasonable charge pursuant to its tariff for other lawful purposes, such as for a dishonored check, for reconnection of service, the failure to provide access, or court costs.

.SO DOC 16A-13.11

NYCRR

13.11 Contents of bills.

(a) Generally. (1) Only service(s) performed, materials furnished or other charges made by the utility, in accordance with its filed tariff, may be included and shall be itemized on the applicable bill form. Whenever the bill form, by reason of size limitations, does not permit itemization, totals may be utilized, provided the charges making up such totals are itemized and sent with the bill.

(2) Nothing in this section shall preclude a utility from providing pertinent messages and information on the bill, provided such information does not interfere with the presentation of the information required by this section.

(b) All bills. Every utility bill shall state on the portion retained by the customer:

(1) the name of the corporation, partnership or person that furnished the service; and if the service is furnished by a corporation that is owned or controlled by another company, or constitutes part of a system, the bill may so indicate by the use of a symbol or a statement to that effect;

(2) the location of the utility's principal office and one or more business offices at which the bill may be paid, and a statement that bills may be paid at other authorized offices;

(3) the service classification(s) on which the charges were based;

(4) the name of the customer, the account or meter number, and the address and location of the premises where the service was supplied;

(5) the start and end date of the billing period;

(6) the quantity of service billed, the unit of measurement used, an explanation of any calculations or factors used to determine the cost of service, a description and the cost of any other tariff charges, and the total of the current charges;

(7) the date payment is due; provided, however, that such date may not occur before personal service of the bill or three calendar days after the mailing of the bill. A phrase indicating that a bill is due upon receipt may be used in lieu of a specific date;

(8) whether any charge will be imposed for late payment, and the date by which payment must be received in order to avoid the imposition of the late payment charge;

(9) an explanation of any abbreviation or symbol used that is not in common English usage; and

(10) a telephone number to call at the utility if the customer has any questions about the bill.

(c) Cycle bills. Every utility bill issued on a regular cycle basis shall contain, in addition to the items required under subdivision (b) of this section:

(1) the registered demand for every demand meter, whether or not the customer is presently subject to a demand charge;

(2) the date of the latest payment received or the date through which any payments have been credited and the debit or credit balance carried over from the prior bill, if any;

(3) the amount of any late payment charge applied during the current billing cycle; and

(4) the next scheduled meter-reading date, except where the utility is unable to adhere to a fixed meter-reading schedule.

(d) Metered service bills. Every utility bill for metered service shall contain, in addition to the items required under subdivision (b) of this section:

(1) for every cumulative energy and demand meter, the indices being used to calculate the bill, whether they are based on an actual reading of the meter, a remote register, a customer-provided reading, or an estimated; and if estimated, the reason therefor; and

(2) the meter multiplier or constant for each meter.

(e) Unmetered service bills. Every utility bill for unmetered service, whether use of such service was authorized or unauthorized by the utility, shall contain, in addition to the items required under subdivision (b) of this section:

(1) a clear statement that the bill is for an estimated amount of service utilized but not metered; and

(2) the per-day or other basis used for calculating the amount of the service billed.

(f) Levelized bills. Every levelized bill shall contain, in addition to the items required under subdivision (b) of this section, the total service charges incurred, the total of levelized bills rendered from the beginning of the levelized year to the end of the period covered by the current bill and the amount of the difference between the two.

(g) Utilities shall comply with this section no later than March 18,

1988.

.SO DOC 16A-13.12

NYCRR

13.12 Notice requirements.

(a) Annual notice of rights. (1) A utility plant shall, at the time of application for service, and at least annually after service is initiated, provide applicants and customers with a brochure containing a detailed summary of their rights and obligations under this Part, a notice describing the commonly used nonresidential service classifications and their rates, an offer of written guidelines regarding eligibility requirements for the utility's service classifications, notice that the utility's tariff is available for review in every utility business office, and notice that some nonresidential customers may be eligible for protections under Part 11 of this Title.

(2) The notice required at the time of application for service shall be provided with the service application to an applicant from whom a written application is required, and by mail within 30 calendar days of the request for service to an applicant from whom a written application is not required.

(b) Periodic notices. (1) An accounting for the deposit held on an account, showing the interest earned during the current year and either the date the deposit was obtained or the length of time that the deposit has been held, shall be provided annually to every customer having a deposit with the utility.

(2) A notice explaining how an increase in the customer's usage might require the utility to install a demand meter and, in some cases, the customer to make electric installation modifications, shall be provided annually to every nondemand electric customer.

(3) A notice, explaining how a change in the recorded demand may cause the service classification on which the charges are based to be changed, shall be provided annually to every electric customer with a demand meter.

(4) A notice, advising the customer of any change made in the customer's service classification and reason for the change, shall be provided to the customer at the time of the change.

(5) A notice advising the customer whether the utility records show that the customer, or some other party, has control over access to the meter, that the customer has an obligation to tell the utility who controls access, and that if the utility records that show the customer has access are not corrected, the customer may be subject to future notices and penalties due to the utility's failure to obtain access,

shall be provided to every customer at the time a second consecutive estimated bill is rendered.

(6) A notice explaining the utility's right to revise estimated demand charges, that such revision may be to the customer's disadvantage and that revision of demand charges may be avoided by arranging access, shall be provided to every demand customer at least annually and whenever an estimated demand bill is rendered.

(c) Format. Notices, brochures, forms and bills required by this Part, and any other written informational material for customers, shall be in plain language and printed in a format and type size that is clear and easy to read.

(d) Filing. All notices, brochures, forms and bills required by this Part, along with the intended program for their use, shall be filed by a utility, prior to their circulation, with the Consumer Services Division.

.SO DOC 16A-13.13

NYCRR

13.13 Disconnection without notice.

(a) Emergency disconnections. A utility may only suspend, curtail or disconnect service to a building, unit or piece of equipment, without the notice required under section 13.3 of this Part, when:

(1) an emergency may threaten the health or safety of a person, a surrounding area, or the utility's generation, transportation or distribution systems;

(2) there is a need to make permanent or temporary repairs, changes or improvements in any part of the system;

(3) there is a governmental order or directive requiring the utility to do so.

(b) Notice. A utility shall, to the extent reasonably feasible under the circumstances, provide advance notice to those whose service will be interrupted for any of the above reasons.

(c) Restoration of service. A utility shall act promptly to restore service as soon as possible after disconnection under this section; provided, however, that service need not be restored to any building, unit, or piece of equipment if, at the time restoration is to occur, the utility has the lawful right to terminate service for another reason pursuant to this section or section 13.3 of this Part.

.SO DOC 16A-13.14

NYCRR

13.14 Inspection and examination of utility apparatus.

(a) Right to inspect. A duly authorized officer or agent of the utility may enter, at all reasonable times, any building or other location supplied with service by the utility, for the inspection and

examination of meters, pipes, fittings, wires and works for supplying or regulating the supply of gas, electricity or steam, and of ascertaining the quantity of gas, electricity, or steam supplied, provided such agent exhibits a photo-identification badge and written authority as provided in section 65(9) of the Public Service Law.

(b) Duty to inspect. Except to the extent prevented by circumstances beyond its control, a utility shall conduct a field inspection as soon as reasonably possible and within 60 calendar days of the following:

- (1) a request contained in a service application pursuant to section 13.2(b)(6) of this Part;
- (2) a reasonable customer request;
- (3) the issuance of a field inspection order in accordance with an automatic utility bill review program;
- (4) notification from any reasonable source that service may not be correctly metered; or
- (5) a directive by the commission or its authorized designee.

(c) Penalty. A customer who, at any time, directly or indirectly prevents or hinders a duly authorized officer or agent of the utility from entering the building or location, or from making an inspection or examination, at any reasonable time, may be billed a \$100 penalty charge for each such offense as provided in section 65(9)(b) of the Public Service Law, so long as such charge is contained in the utility's tariff.

(d) Other rights. Nothing contained in this section shall be construed to impair a utility's rights as to any other person who prevents access to utility meters and/or equipment.

.SO DOC 16A-13.15

NYCRR

13.15 Complaint-handling procedures.

(a) Complaints to a utility. (1) A utility shall establish a written procedure for the handling of customers' complaints to the utility, which shall allow for the acceptance and processing of complaints submitted in a simple manner and form. Such procedure shall require that complaints be promptly acknowledged, fairly investigated in a reasonable period of time, and that the results of such investigations be promptly reported to the complainants in plain language.

(2) A utility shall refrain from sending a final notice of termination or from terminating service after the filing of a complaint with the utility as set forth in section 13.3(b)(4) and (c)(7) of this Part.

(3) If the report of the investigation is made orally, a utility shall provide the customer with the report in writing upon request.

(4) At the time a utility communicates its final response to a

customer's complaint, it shall, if the complaint resolution is wholly or partially in the utility's favor, inform the customer of the commission's complaint-handling procedures, including the commission address and telephone number.

(b) Complaints to the commission. (1) If a customer is unable to reach a satisfactory resolution of a dispute with a utility, the customer may complain, either orally or in writing, to the commission, pursuant to Part 12 of this Title.

(2) The complaint of a customer to the commission shall be handled in accordance with the procedures set forth in Part 12 of this Title.

.SO DOC 16A-13.16 NYCRR

13.16 Severability.

If any provision of this Part is held invalid by a court of competent jurisdiction, such invalidity shall not affect other provisions which can be given effect without the invalid provision.

.SO DOC 16A-14.1

NYCRR

Section 14.1 Purpose.

This Part sets forth the commission's rules implementing the Home Energy Fair Practices Act as it applies to residential customers of waterworks corporations with annual gross revenues in excess of \$250,000 (L. 1986, ch. 176). That act establishes as State policy that the continued provision of water service to such residential customers without unreasonable qualifications or lengthy delays is necessary for the preservation of the health and general welfare and is in the public interest. Every right and duty under this Part imposes an obligation of good faith, honesty and fair dealing in its performance and enforcement. The provisions of this Part must be interpreted so as to fulfill its purpose and policy.

.SO DOC 16A-14.2

NYCRR

14.2 Applicability of rules and definitions.

(a) Applicability. (1) This Part governs the rights, duties and obligations of every waterworks corporation with annual gross revenues in excess of \$250,000 subject to the jurisdiction of the commission by virtue of article 4-B of the Public Service Law, their residential customers and applicants for residential service, regardless of any other conflicting commission rule or order.

(2) Nothing in this Part modifies the commission's rules or orders regarding the provision of water service to nonresidential customers, or residential customers of waterworks corporations with annual gross revenues equal to or less than \$250,000.

(b) Definitions. The following words and terms when used in this Part have the following meanings:

(1) An access controller is a party known to a utility to be in control of access to the metering equipment at a customer's premises and to have an active account of its own with the utility.

(2) An actual reading is one obtained by a utility employee from the meter or from a device which receives a reading transmitted from the meter itself.

(3) An applicant is a person who has made a request or has had a request made by a third party on his or her own behalf, for water service for his or her own residential use.

(4) Arrear are charges for which payment has not been made more than 20 calendar days after payment was due. A payment is considered to be made on the date when it is received by the utility or one of its authorized agents. Payment is due whenever specified by a utility on its

bill, as long as the date is not before the bill is hand-delivered to the customer, or less than three calendar days after the bill is mailed.

(5) A backbill is any bill or any portion of a bill, other than a leveled bill, which represents charges for service that was actually delivered to the customer's premises during a period before the current billing cycle, which was not previously billed.

(6) A blind person is a person who has central visual acuity of 20/200 or less in the better eye with the use of a correcting lens. An eye with a limitation in the fields of vision such that the widest diameter of the visual field subtends an angle no greater than 20 degrees, shall be considered as having a central visual acuity of 20/200 or less.

(7) A business day is any Monday through Friday when a utility's business offices are open.

(8) A cold weather period is that period of time beginning November 1st of each year and ending April 15th of the following year.

(9) The commission is the New York State Public Service Commission.

(10) The Consumer Services Division is the Consumer Services Division of the New York State Department of Public Service.

(11) Current charges, as used in section 14.7 or 14.8 of this Part, refer to the amount properly billed to a party responsible for service to a multiple dwelling, as defined in paragraph (17) of this subdivision, or a two-family dwelling, as defined in paragraph (21) of this subdivision, for the billing period covered by the first bill rendered on or after the date the required notice is posted. Current charges do not include any arrears for earlier billing periods.

(12) A deferred payment agreement or payment agreement is a written agreement for the payment of outstanding charges over a specific period of time.

(13) A delinquent customer is a customer who has made two or more consecutive late payments, as defined in paragraph (16) of this subdivision, within the previous 12 months.

(14) A disabled person is a person with a physical, mental, or medical impairment resulting from anatomical, physiological or neurological conditions which prevents the exercise of a normal bodily function or is demonstrable by medically accepted clinical or laboratory diagnostic techniques, as defined in the Human Rights Act (Executive Law, section 292(21)); or a person who is unable because of mental or physical problems to manage his or her own resources or to protect himself or herself from neglect or hazardous situations without the assistance of others.

(15) Heat-related service is water service which is necessary for the

on-going operation of a customer's primary heating system.

(16) A late payment is any payment made more than 20 calendar days after the date payment was due, in accordance with paragraph (4) of this subdivision.

(17) A multiple dwelling is a dwelling designed to be occupied by three or more families living independently of each other, as defined in the Multiple Dwelling Law or Multiple Residence Law.

(18) A residential customer is any person who, in accordance with an application for service made by such person or a third party on his or her behalf, is supplied with water service by a utility at a premises where such service is used primarily for his or her residential purposes. The word customer, when used alone in this Part, refers only to a residential customer.

(19) A seasonal, short-term or temporary customer is a customer who applies for and/or receives utility service periodically each year, intermittently during the year, or for a period of time up to one year.

(20) Tampered equipment is any service-related equipment that has been subjected to unauthorized interference that has changed or inhibited the accurate measurement of water consumption or that has been connected without authorization after a utility has physically disconnected service.

(21) A two-family dwelling is a building designed to be occupied exclusively by two families living independently of each other, where water service is not billed separately for each unit.

(22) A utility is any waterworks corporation, as defined in section 2 of the Public Service Law, having annual gross revenues in excess of \$250,000.

(23) Utility deficiency is:

(i) any action or inaction by the utility or one of its authorized agents that does not substantially conform to the rules and regulations of this Title, the utility's tariff; or

(ii) the failure of metering equipment to accurately record service, unless a customer's culpable conduct caused or contributed to such failure.

.SO DOC 16A-14.3

NYCRR

14.3 Applications for residential service.

(a) Extension of service. (1) A utility must provide service to any applicant as soon as reasonably possible, but no later than five business days after receipt of an accepted oral or written application for service or such later time as may be specified by the applicant, except:

- (i) where prevented by labor strikes or other work stoppages;
- (ii) where precluded by consideration of public safety;
- (iii) where precluded by physical impediments including:
 - (a) poor weather conditions;
 - (b) inability to gain access to premises;
 - (c) incomplete construction of necessary facilities by the applicant or inspection and certification of such facilities by the appropriate authorities; or
 - (d) incomplete construction of necessary facilities by the utility.

(2) A utility must make reasonable efforts to eliminate or correct conditions over which it has control that prevent extension of service and must attempt to complete construction of any necessary facilities with due diligence.

(3) As a prerequisite to accepting a party as a customer and providing service, a utility may require the party to:

(i) make full payment or enter into a payment agreement under section 14.10 of this Part for all amounts due and payable which are not either the subject of a pending billing dispute under section 14.19 of this Part, or covered by an existing payment agreement, including:

(a) residential service provided and billed in accordance with section 14.15 of this Part to prior accounts in the applicant's name or for which the applicant is legally responsible;

(b) other billed tariff fees, charges or penalties; and

(c) a deposit, if requested by the utility, as long as such deposit is in accordance with section 14.11 of this Part;

(ii) fulfill any applicable requirements of Parts 501 and 502 of this Title, regarding main extensions and service pipes; and

(iii) comply with the utility's tariff, and any applicable State, city or local laws, ordinances or regulations.

(4) A utility must provide service to any accepted applicant whose application for service was previously denied, unless prevented by those circumstances listed in paragraph (1) of this subdivision:

(i) as soon as reasonably possible, but no later than two business days after the requirements of paragraph (3) of this subdivision are met, or such later time as may be specified by the applicant; or

(ii) within 24 hours, if required by the commission or its designee.

(5) A customer moving within the service territory of a utility and requesting service within 60 calendar days of the closing of the customer's prior account is eligible to receive service at the new location, in accordance with this section, and such service must be considered a continuation of service in all respects, with any existing

payment agreement honored; provided, however, that such customer's prior service had not been terminated for nonpayment at the time of such request.

(b) Service application. (1) An application for service may be made either orally or in writing.

(2) A utility may require an applicant to complete a written application for service only if:

(i) service to the preceding customer at the premises to be served was terminated for nonpayment within the prior 12 months or the current account is subject to a final notice of termination;

(ii) there is evidence that service has been supplied through tampered equipment;

(iii) the meter has recorded usage during a period within the previous 12 months when there was no customer; or

(iv) the application is made by a third party for the party who would receive service.

(3) If a written application is not required as a prerequisite to providing service, an oral application for service will be considered complete when the applicant provides his or her name, address and, if the applicant has a prior account, either the address or account number, and answers questions relevant to identifying the applicant's use of water on the premises, including whether the service will be used primarily for residential purposes.

(4) A written application for service will be considered complete when information has been provided as required under paragraph (3) of this subdivision, along with proof of the applicant's identity and responsibility for the water bills for the premises, through submission of appropriate documents. Where a third party applies for service, the third party must submit proof of his or her identity and a written authorization from the applicant. All submitted documents become part of the application.

(5) A utility must make reasonable efforts to contact, either by telephone or in person, any applicant who submits an incomplete application, within one business day of receipt of the application, stating the information and/or documents that must be submitted in order for the application to be considered complete.

(c) Denial of application. (1) A utility must make reasonable efforts to immediately contact, either by telephone or in person, any applicant whose application is being denied.

(2) A utility may not deny an application for service unless a written notice was either delivered personally to the applicant or sent to the

applicant's current address or any alternative mailing address provided in the application, within three business days of receipt of the application for service. An application for service not denied within three business days of receipt is considered accepted.

(3) The denial notice must:

(i) state the reason(s) for the denial;
(ii) specify what the applicant must do to qualify for service; and
(iii) advise the applicant of the right to an investigation of the denial by the commission or its designee if the applicant considers the denial to be without justification, and state the address and telephone number of the commission.

(4) Every utility must maintain, for at least 12 months, service applications that are denied, and the corresponding denial notice.

(d) Penalty. If a utility fails to provide service to an applicant within the time required by this section, the utility must pay to the applicant \$25 per day for each day or portion of a day that service is not supplied, unless the commission or its designee determines that the utility had good cause for not providing service within the required time.

.SO DOC 16A-14.4

NYCRR

14.4 Termination of residential service.

(a) Conditions for termination. (1) Except as provided in section 14.17 of this Part and paragraph (2) of this subdivision, a utility may terminate service to a customer only if it provides advance final notice of the termination and fulfills all other requirements of this section when the customer:

(i) fails to pay any tariff charges that reflect service used during the preceding 12 months, for which a written bill in conformance with section 14.15 of this Part has been sent;

(ii) fails to pay any tariff charges that reflect service used before the preceding 12 months, for which a written bill in conformance with section 14.15 of this Part has been sent, in any of the following situations:

(a) when there was a billing dispute during the preceding 12-month period;

(b) when there was excusable utility delay;

(c) when the customer's culpable conduct caused or contributed to the delay in billing; or

(d) when the changes are necessary to adjust estimated bills;

(iii) fails to pay amounts due under a payment agreement;

(iv) fails to pay, or agree in writing to pay, equipment and

installation charges relating to the initiation of service; or

(v) fails to pay a required deposit, if in accordance with section 14.11 of this Part.

(2) A utility must not terminate service for nonpayment of bills to any person it knows to be receiving public assistance, if payment for such service is to be made directly to the utility by the department of social services or the local social services official.

(b) Final termination notice. (1) A final termination notice must state:

- (i) the earliest date termination may occur;
- (ii) the reasons for termination, including the total amount the customer must pay, and how termination may be avoided;
- (iii) that utility procedures are available for considering complaints before termination, including the address and telephone number of the appropriate utility office;
- (iv) that commission procedures are available for considering customer complaints when a customer is not satisfied with the utility's handling of the complaint, including the address and telephone number of the appropriate commission office;
- (v) a summary of the protections available under this Part, and a notice that any customer eligible for such protections should contact the utility;
- (vi) that it is a final termination notice which should be brought directly to the attention of the utility when the bill is paid;
- (vii) that payment of the charges with a check that is subsequently dishonored may result in termination of service without an additional final termination notice, if applicable;
- (viii) that at the time the utility's representative goes to the premises to terminate service, the representative may require any payment to be made with cash, certified check or money order, if the customer has, within the last 12 months, paid with a check that was dishonored;
- (ix) any charge for reconnection; and
- (x) that if the customer is a recipient of public assistance, it is possible that assistance may be available from a local social services office.

(2) A final termination notice must not be issued until at least 20 calendar days after the date payment was due.

(3) A final termination notice must not be issued for nonpayment of disputed charges while a complaint is pending before the utility or the commission as provided in section 12.3 of this Title. Nothing in this

Part prevents the utility from issuing such notice for nonpayment of undisputed charges.

(c) Physical termination of service. (1) A utility may not terminate service under this section until at least:

(i) 15 calendar days after a final termination notice has been given personally to the customer; or

(ii) 18 calendar days after a final termination notice has been mailed to the customer at the location where service is rendered, or to an alternative address, in which case paragraph (2) of this subdivision must be complied with.

(2) If an alternative address for mailing purposes has been previously provided to a utility, the utility must not terminate service under this section until at least 18 calendar days after a final termination notice has been mailed to the customer at the alternative address. If the utility still intends to terminate service as scheduled, the utility must mail notice of the scheduled termination to the premises where service is rendered 10 calendar days after the final termination notice was mailed to the alternative address.

(3) A utility may terminate service only between the hours of 8:00 a.m. and 4:00 p.m., on Mondays through Thursdays, provided that such day or the following day is not:

(i) a public holiday as defined in the General Construction Law;

(ii) a day the main business office of the utility is closed; or

(iii) a day the offices of the commission are closed.

(4) A utility may not terminate service unless:

(i) it has verified that payment has not been received at any office of the utility or at any office of an authorized collection agent through the end of the notice period required by this Part; and

(ii) it has verified on the day termination is scheduled that payment has not been posted to the customer's account as of the opening of business on that day, or has complied with procedures established under paragraph (d) (2) of this section.

(5) A utility may not terminate service more than 60 calendar days after issuance of the final termination notice unless it has, during that time, issued a new termination notice that complies with paragraph (b) (1) of this section or has updated the original notice to include the current arrears.

(6) A utility may not terminate service while a complaint is pending before the utility or the commission and for 15 calendar days after resolution by the utility or by the commission or its designee, for nonpayment of the disputed charges as provided in section 12.3 of this

Title. Nothing in this Part prevents the utility from terminating service for nonpayment of undisputed charges.

(7) A utility may not terminate service during a two-week period encompassing Christmas and New Year's Day.

(d) Rapid posting of payments. Every utility must establish and implement written procedures to ensure that any payments made in response to a final termination notice, when the customer brings the fact that such a notice has been issued to the attention of the utility or its authorized agents:

(1) are posted to the customer's account on the day payment is received; or

(2) are processed in some manner so that termination will not occur.

(e) Payment at the time of termination of service. (1) If a customer claims, at the time that termination for nonpayment is to take place, that payment has already been made and produces a written business record of payment, or claims that there is a complaint pending before the utility or the commission with regard to the charges demanded, the utility's field representative must make a reasonable effort to verify this information with a utility office representative and must not terminate service for nonpayment of any verified disputed amount.

(2) At the time of termination, if payment of the full amount that forms the basis for a scheduled termination is offered, or if a customer agrees to sign a payment agreement in accordance with section 14.10 of this Part and offers payment of any required downpayment, the utility representative must not terminate service. The utility representative may either accept payment or allow the customer an extension of time of not less than one business day to go to a business office to make payment or arrange for payment. However, if the customer fails to make payment or arrange for payment within the specified time, the utility may terminate service without further notice.

(3) If a customer has, within the last 12 months, paid for service with a check that was dishonored, the utility has the right to accept only cash, certified check, or money order as payment from that customer under paragraph (2) of this subdivision.

(4) Whenever payment is made at the time of termination, the utility's field representative must provide the customer with a receipt showing the date, the account number, the amount received, the form of the payment and either the name or identification number of the utility representative.

(f) Dishonored checks. Receipt of a subsequently dishonored check, in response to a termination notice, is not payment of a customer's account

and the utility is not required to issue additional notice before termination, as long as the final termination notice warns the customer of this, in accordance with subparagraph (b) (1) (vii) of this section.

(g) Applicability. Nothing in this section affects a utility's right to suspend, curtail or disconnect service:

(1) when there is no customer and service is being provided through tampered equipment;

(2) when there is no customer and the utility has provided advance written notice to the occupant, either by posting or mailing not more than 30 nor less than 10 calendar days before disconnection, stating:

(i) that it intends to disconnect service unless the responsible party applies for service and is accepted as a customer; and

(ii) the location of the nearest utility business office where application can be made; or

(3) as permitted under section 14.17 of this Part.

.SO DOC 16A-14.5

NYCRR

14.5 Termination of residential service-special procedures.

(a) General. (1) This section provides special protections regarding the termination and reconnection of service in cases involving medical emergencies, the elderly, blind or disabled, and heat-related service during the cold weather period.

(2) If any communication required by this section is not possible because of an apparent language barrier, the utility must take steps to assure communication before termination.

(3) For purposes of this section, when a utility is required to make a diligent effort to contact personally an individual, the utility must, at a minimum:

(i) attempt to call such person once during normal business hours and if unsuccessful, twice during reasonable nonbusiness hours (6:00 p.m. - 9:00 p.m. on weekdays or 9:00 a.m. - 5:00 p.m. on Saturdays and Sundays), if there is a telephone; and

(ii) make an onsite personal visit, if there is no telephone or if telephone contacts are unsuccessful.

(4) During any continuation of service under this section, the customer remains responsible for payment of service and must make reasonable efforts to pay charges for such service.

(5) In all contacts with customers entitled to the protections under this section, where there remains a threat of termination or termination has already occurred, the utility must notify the customer that the commission's designees are available for assistance and provide the customer with the commission's telephone number.

(b) Medical emergencies. (1) Utility's obligations. A utility must not terminate or refuse to restore service to a residence when a medical emergency exists. A medical emergency exists when a resident of a customer's premises suffers from a serious illness or medical condition that severely affects his or her well-being, as certified by a medical doctor or local board of health in accordance with this subdivision.

(2) Written certification. Written certification must:

(i) be submitted on stationery of a medical doctor or local board of health, and be signed by the medical doctor or an official of the local board of health qualified to make a medical judgment;

(ii) state the name and address of the certifying medical doctor or local board of health, and the doctor's State registration number;

(iii) state the name and address of the ill person; and

(iv) include an affirmation that the absence of water service will aggravate an existing medical emergency at a customer's premises.

(3) Procedure for initial certification. (i) Initial certification of a medical emergency may be made either in writing or by telephone by a medical doctor or local board of health.

(ii) Initial certification is effective for 30 calendar days from the date the utility receives it, as long as written certification is provided to the utility within five business days of any certification made by telephone.

(iii) Certification made only by telephone is effective for five business days from the date the utility receives it.

(iv) Within five business days of receipt of written certification, the utility must provide the customer with a written notice that must:

(a) state that the utility received such certification and that the certification is effective for 30 calendar days;

(b) advise the customer in detail of the procedures required for renewal of certification under paragraph (4) of this subdivision; including specifically a statement that if the customer does not renew the certification before the 30-day period expires and arrangements for payment are not made, the utility may proceed with termination; and

(c) be accompanied by a form to be completed showing assets, income and expenses.

(4) Procedure for renewal of certification. (i) If the medical emergency is likely to continue beyond the expiration of any written certification, the certification may be renewed, provided that, before the expiration of the initial certification:

(a) a medical doctor or official of the local board of health submits a new written certification that also states the expected duration of

the medical emergency and explains the reason the absence of service would aggravate the medical emergency; and

(b) the customer demonstrates an inability to pay charges for service, as documented by a form showing assets, income and expenses.

(ii) The utility must, within five calendar days of submission of the necessary information, determine whether the customer's assets and current income are insufficient to pay charges for service, considering other necessary and reasonable expenses of the customer.

(iii) If the utility determines that a customer has not demonstrated an inability to pay charges for service, it must provide the customer with written notice of the determination made under subparagraph (ii) of this paragraph and the customer's right to a review of the determination by the commission's designee.

(iv) If the utility determines that a customer has demonstrated an inability to pay charges for service and a new written certification has been submitted, the utility must inform the customer that certification has been renewed, and how long it will be in effect.

(v) A renewed certification remains in effect for 30 calendar days, provided that in cases certified as chronic by a medical doctor or official of the local board of health, the renewed certification remains in effect for 60 calendar days. In such cases, a customer may request that the commission's designee approve a longer period for the written certification to remain in effect, and the commission's designee may approve such longer period, stating specific conditions to be met by the customer.

(5) Termination of service. A utility may only terminate service to a customer who has submitted a certification of medical emergency after:

(i) written notice has been provided to the customer of the utility's determination either that the certification of medical emergency is no longer in effect or that the customer is able to pay charges for service;

(ii) any review of the utility's determination by the commission's designee has been completed; and

(iii) the requirements of section 14.4 of this Part have been complied with.

(c) Customers who are elderly, blind or disabled. (1) Utility's obligations. A utility must not terminate or refuse to restore service to a customer where the customer and any other remaining residents of the households are known to or identified to the utility to be blind, disabled, 62 years of age or older, or 18 years of age or under, without complying with the procedures in this subdivision.

(2) Procedure before termination of service. (i) A utility must make a diligent effort to contact personally an adult resident at the customer's premises at least 72 hours before termination of service to attempt to create a plan that would avoid termination and arrange for payment.

(ii) Where efforts at personal contact are unsuccessful or where a utility and a customer are unable to create a plan, the utility must notify the local department of social services of the name and address of the customer and the date of termination so that social services may ascertain if the customer is eligible for any assistance. The utility must continue service for at least 15 business days after providing this notice, unless notified by the local department of social services that other arrangements have been made.

(3) Procedures after termination of service. (i) In cases where service has been terminated and the utility is later notified that the customer should have received the protections under this subdivision, the utility must:

(a) make a diligent effort to contact personally an adult resident at the customer's premises, within 24 hours of such notification, to attempt to create a plan that would restore service and arrange for payment of bills; and

(b) where efforts at personal contact are unsuccessful or where the utility and the customer are unable to create a plan, notify the local department of social services of the name and address of the customer and the date of termination so that social services may ascertain if the customer is eligible for any assistance.

(ii) In cases where a utility has terminated service consistent with the provisions of paragraph (2) of this subdivision, the utility must make a diligent effort to contact personally an adult resident at the customer's premises within 10 calendar days after termination, to determine whether alternative arrangements have been made for the provision of service and, if none have been made, attempt to create a plan that would restore service and arrange for payment.

(d) Special procedures during cold weather periods for premises with heat-related service. (1) Utility's obligations.

(i) During cold weather periods, before terminating premises with heat-related service, a utility must make attempts to determine whether a resident may suffer serious impairment to health or safety as a result of termination, in accordance with the procedures set forth in paragraph (2) of this subdivision. Doubts as to whether a person may suffer serious impairment to health or safety as a result of termination must

be resolved in favor of making such a finding.

(ii) For the purposes of this subdivision, a person may suffer serious impairment to health or safety as a result of termination when there is evidence of any of the following:

(a) dependency due to age, poor physical condition or mental incapacitation;

(b) use of life support systems, such as dialysis machines or iron lungs;

(c) serious illness; or

(d) disability or blindness.

(2) Procedures. (i) A utility must not terminate service to customers known to be receiving heat-related service during cold weather periods, unless the utility has made a diligent effort to contact personally the customer or an adult resident at the customer's premises, at least 72 hours before the intended termination and, if unsuccessful, at the time of termination, in order to find out whether a resident may suffer a serious impairment to health or safety as a result of termination, to fully explain the reasons for termination and to provide the customer with information on the protections available under this Part.

(ii) Where the utility determines that a resident may suffer a serious impairment to health or safety as a result of termination, a utility must not terminate service unless:

(a) the utility notifies the local social services official orally and within five calendar days in writing, that a resident may suffer a serious impairment to health or safety as a result of termination; and

(b) the local social services official, after an investigation, informs the utility that the reported condition is not likely to result in a serious impairment to health or safety, or that an alternative means for protecting the person's health or safety has been arranged.

(iii) A utility notifying the local social services official under subparagraph (ii) of this paragraph must inform the customer of the referral and explain its purpose.

(3) Termination of service. (i) If a utility terminates service to a customer under this subdivision, and the customer or a resident 18 years or older was not personally contacted by the utility before termination of service and the customer has not contacted the utility for the purpose of requesting reconnection before 12 noon on the day following termination of service, the utility must, by onsite personal visit with the customer or other adult resident, immediately attempt to determine whether there is continuing occupancy and whether a serious impairment to health or safety may result. If the utility determines that a serious

impairment may result, it must immediately restore service. If the utility is unable to make an onsite personal visit with the customer or an adult resident, and does not have reasonable grounds to believe that the customer has vacated the premises, the utility must immediately refer the name and address of the customer to the local social services official.

(ii) If after the discovery of tampered equipment, a utility decides to terminate service to a customer because of a potential health or safety problem, it must determine, in accordance with this subdivision, whether a resident may suffer a serious impairment to health or safety as a result of termination. If the utility determines that a resident may suffer a serious impairment, it must follow the procedures set forth in this subdivision; provided, however, that continued service is not required if it is impractical for the utility to eliminate an unsafe condition. In any cases where a resident may suffer a serious impairment and the utility terminates service to preclude the continuation of an unsafe condition, the utility must specially notify the local social services official on the same day service is terminated and request an immediate consideration of the case.

.SO DOC 16A-14.6

NYCRR

14.6 Voluntary third-party notice prior to termination of service.

(a) Every utility must permit a customer to designate a third party to receive copies of all notices regarding termination of service or other credit actions sent to such customer, provided that the designated third party agrees in writing to receive such notices.

(b) The utility must inform the third party that the agreement to receive notices does not mean the third party must pay for service provided to the customer.

(c) The utility must promptly notify the customer in writing of the third party's refusal or cancellation of the agreement to receive notices.

.SO DOC 16A-14.7

NYCRR

14.7 Termination of service to entire multiple dwellings.

(a) Required notices. (1) A utility must not terminate service to an entire multiple dwelling unless it fulfills all requirements of this section and provides written notice to:

(i) the owner of the multiple dwelling or the party to whom the last preceding bill was rendered;

(ii) the superintendent or other person in charge of the multiple dwelling, if it can be readily determined that there is such superintendent or other person in charge;

(iii) the occupants of each unit;
(iv) the local health officer and the director of the social services district for the political subdivision in which the multiple dwelling is located;

(v) if the multiple dwelling is located in a city or village, the mayor thereof, or if there is none, the manager; or if the multiple dwelling is located in a town, the town supervisor; and

(vi) the county executive of the county in which the multiple dwelling is located, or if there is none, the chairperson of the county's legislative body.

(2) The notice required by this subdivision must state:

(i) the earliest date terminating may occur;

(ii) the reasons for termination, including the total amount required to be paid, and how termination may be avoided;

(iii) that there are special protections for occupants of multiple dwellings;

(iv) that occupants are authorized to set off utility payments against their rents in these circumstances, in accordance with subdivision (1) of section 235-a of the New York State Real Property Law;

(v) that utility procedures are available for arranging meetings with occupants to discuss the manner in which termination may be avoided, including the address and telephone number of the appropriate utility office; and

(vi) that commission procedures are available for assistance, including the address and telephone number of the appropriate commission office.

(3) The notice required by this subdivision must be provided in the following manner:

(i) by personally serving it or mailing it to the owner or superintendent, as required by subparagraphs (i) and (ii) of paragraph (1) of this subdivision;

(ii) by mailing it to the occupants and all local officials, as required by subparagraphs (iii), (iv), (v) and (vi) of paragraph (1) of this subdivision; and

(iii) by posting it in a conspicuous place in the public areas of the multiple dwelling.

(4) The utility must give 15 calendar days notice if personally served or posted, and 18 calendar days notice if mailed.

(5) The notice to local officials required by subparagraphs (iv) and (v) of paragraph (1) of this subdivision must be repeated not more than four nor less than two business days before termination.

(6) Whenever a notice of termination of service has been made in accordance with this subdivision and the utility no longer intends to terminate service, the utility must so notify the occupants of each unit in the same manner as it gave the original notice.

(b) Procedures to avoid termination of service. (1) A utility following the requirements of this section may require occupants in a multiple dwelling to pay no more than the current charges incurred by the party to whom the last preceding bill has been rendered, and must not terminate service if such current charges are paid.

(2) If occupants in a multiple dwelling find they are unable to reach an agreement with the utility to avoid termination of service, they may contact the commission's designee. After such a request is received, a designee will attempt to work out an agreement and will, if necessary, attempt to arrange a meeting with occupant representatives, the utility, and the party responsible for making payment for service.

(3) The commission's designee may stay a threatened termination of service to an entire multiple dwelling where it concludes that good faith efforts are being made by the occupants to arrange for the payment of current charges.

(c) Physical termination of service. Paragraphs (c) (3) through (6) and subdivisions (d) through (f) of section 14.4 are applicable to the termination of service to entire multiple dwellings.

(d) Termination of heat-related service to multiple dwellings during cold weather periods. During the cold weather period, the following procedure must be followed by a utility intending to terminate heat-related service to an entire multiple dwelling:

(1) A utility must provide the notices required by subdivision (a) of this section not less than 30 calendar days before the intended termination.

(2) A utility must provide each occupant with a written notice, not less than 10 calendar days before the earliest date termination may occur, advising the occupant that if any occupant in his or her apartment has a serious illness or medical condition that may result in a serious impairment to health or safety by the loss of heat service, he or she should immediately contact the utility. The notice must provide the name and telephone number of a utility contact person. Whenever an occupant so notifies a utility, the utility must conduct an onsite personal visit without delay, for the purpose of determining whether the occupant may suffer a serious impairment to health or safety as a result of termination. If the utility determines that an occupant may suffer a serious impairment to health or safety as a result of termination, the

utility must refer such cases to the local department of social services and request the agency to investigate.

(3) A utility referring such a case to the Department of Social Services must continue heat-related service to the multiple dwelling or otherwise provide heat to the person who may suffer a serious impairment for at least 15 business days after the referral. A utility that has referred such a case must not thereafter terminate heat-related service to the dwelling during the cold weather period unless it otherwise provides heat to the person who may suffer a serious impairment, or unless it is informed by the local department of social services that appropriate alternative arrangements to preclude a serious impairment to health or safety have been made or that the claim of serious impairment is without merit. A utility thereafter intending to terminate service must provide at least five calendar days written notice to the occupants that heat-related service will be terminated, and must, if so notified by the Department of Social Services, inform the individual of the finding of no serious impairment. Such notice must state that any occupant may seek further review by the commission.

(4) If a utility is notified by the local department of social services that an occupant in a multiple dwelling where the heat-related service has been terminated by the utility may suffer a serious impairment to health or safety, it must reconnect heat-related service, or otherwise provide heat to such person, and continue such service as provided for in paragraph (3) of this subdivision.

.SO DOC 16A-14.8

NYCRR

14.8 Termination of service to two-family dwellings.

(a) Applicability. If a utility knows that service is provided to a two-family dwelling, as defined in paragraph (b) (21) of section 14.2 of this Part, service must not be terminated unless the requirements of this section are complied with; provided, however, that where the utility knows that service is billed separately for each unit, this section does not apply. Each utility must keep a record of two-family dwellings.

(b) Required notices. (1) A utility must not terminate service to a two-family dwelling unless it fulfills all requirements of this section and provides written notice to:

(i) the owner of the premises or the party to whom the last preceding bill was rendered; and

(ii) the occupants of each unit.

(2) The notice required by this subdivision must state:

(i) the earliest date termination may occur;

- (ii) the reasons for termination, including the total amount required to be paid, and how termination may be avoided;
- (iii) that there are special protections for occupants of two-family dwellings where service is not billed separately;
- (iv) that occupants may be authorized to set off utility payments against their rents in these circumstances, in accordance with the New York State Real Property Law;
- (v) that utility procedures are available for considering complaints before termination, including the address and telephone number of the appropriate utility office; and
- (vi) that commission procedures are available for assistance, including the address and telephone number of the appropriate commission office.

(3) The notice required by this subdivision must be provided in the following manner:

- (i) by mailing it to the owner or party to whom the last preceding bill was issued;
- (ii) by personally serving it or mailing it to the occupants; and
- (iii) by posting it in a conspicuous place at or within the premises, unless prevented by physical circumstances.

(4) The utility must give 15 calendar days notice if personally served or posted, and 18 calendar days notice if mailed.

(5) Whenever a notice of termination of service has been made in accordance with this subdivision and the utility no longer intends to terminate service, the utility must so notify the occupants in the same manner as it gave the original notice.

(c) Procedures to avoid termination of service. (1) A utility following the requirements of this section may require the occupants in a two-family dwelling to pay no more than the current charges incurred by the party to whom the last preceding bill was rendered, and must not terminate service if such current charges are paid.

(2) An occupant may either:

- (i) apply for service and be accepted as a customer, if eligible to do so under section 14.3 of this Part, in which case such person will be liable for future payments; or
- (ii) choose to pay current charges only, in which case such person will not be liable for future payments and future bills must continue to be rendered to the customer with a copy sent to any occupant upon request.

(d) Physical termination of service. Paragraphs (c) (3) through (c) (6) and subdivisions (d) through (f) of section 14.4 of this Part are

applicable to the termination of service to two-family dwellings.

(e) Termination of two-family dwellings during cold weather periods. During the cold weather period, the following procedure must be followed by a utility intending to terminate heat-related service to a two-family dwelling:

(1) A utility must provide the written notices required by subdivision (a) of this section not less than 30 calendar days before the intended termination.

(2) A utility must comply with either the requirements set forth in subdivision (d) of section 14.5 of this Part or in subdivision (d) of section 14.7 of this Part.

.SO DOC 16A-14.9

NYCRR

14.9 Reconnection of service.

(a) Obligation to reconnect. A utility must reconnect service that has been terminated within 24 hours of the customer's request for reconnection, unless prevented by circumstances beyond the utility's control or unless a customer requests otherwise, under any of the following conditions:

(1) upon receipt of the full amount of arrears for which service was terminated;

(2) upon receipt of a signed payment agreement consistent with section 14.10 of this Part, covering the full amount of arrears for which service was terminated, and the receipt of a downpayment, if required under that agreement;

(3) upon the direction by the commission or its designee; or

(4) where a utility has received notice that a serious impairment to health or safety is likely to result if service is not reconnected.

Doubts as to whether reconnection is required for health or safety reasons must be resolved in favor of reconnection.

(b) Inability to reconnect. Wherever circumstances beyond the utility's control prevent reconnection of service within 24 hours of any of the events specified in subdivision (a) of this section, the utility must immediately attempt to notify the customer and reconnect service within 24 hours of the elimination of those circumstances.

(c) Penalty. (1) If a utility does not reconnect service within 24 hours as required by this section, the utility must pay the customer for each day or portion of a day that service is not supplied after the date that service should have been supplied, as follows:

(i) \$50 per day or portion of a day in cases involving medical emergencies, the elderly, blind or disabled, heat-related service during the cold weather period, or where the utility has notice that a serious

impairment to health or safety is likely to result if service is not reconnected; or

(ii) \$25 per day or portion of a day in all other cases.

(2) The penalty referred to in paragraph (1) of this subdivision will not be applicable if the commission or its designee determines that the utility had good cause for not reconnecting service within 24 hours. In such cases, the utility has the burden of showing good cause.

.SO DOC 16A-14.10

NYCRR

14.10 Deferred payment agreements.

(a) Utility's obligations. (1) A utility must provide a written offer of a payment agreement, in accordance with this section, to an eligible customer or applicant at the following times:

(i) not less than five calendar days before the date of the scheduled termination of service for nonpayment of arrears, as indicated on a final termination notice, or eight calendar days if mailed;

(ii) when payment of outstanding charges is a requirement for acceptance of an application for service, in accordance with section 14.3 of this Part; and

(iii) when it renders a backbill which is more than \$100; provided, however, that a utility is not required to offer an agreement under this subparagraph where the customer's culpable conduct caused or contributed to the underbilling.

(2) If payment of outstanding charges is a requirement for reconnection, in accordance with section 14.9 of this Part, the utility must offer the customer a payment agreement in accordance with this section. The utility must also inform the customer that he or she may opt to have the agreement include any applicable reconnection charge and/or legal fee, specifying the amount of such charge.

(3) A utility must negotiate in good faith with a customer or applicant in order to arrange a payment agreement that the customer or applicant is able to pay, considering his or her financial circumstances.

(i) A utility may require that a customer or applicant complete a form showing assets, income and expenses, and provide reasonable substantiation of the information on that form, provided that all such information shall be treated as confidential.

(ii) A payment agreement must provide for installments as low as \$10 per month and no downpayment, when the customer or applicant demonstrates financial need for such terms, but need not provide for monthly installments of less than \$10.

(iii) A payment agreement may provide for any size or no downpayment

and installments on any schedule over any period of time, and cover any outstanding charges, if mutually agreed to by the parties.

(4) A utility must renegotiate and amend a payment agreement if the customer or applicant demonstrates that his or her financial circumstances have changed significantly because of conditions beyond his or her control.

(5) A utility must develop written procedures and forms for evaluating the financial need of a customer or applicant, for assuring the confidential handling of such information, for arriving at fair and equitable payment terms and for training utility personnel, which procedures must be filed with the Consumer Services Division.

(6) The commission or its designee may order a utility to offer a payment agreement in accordance with this section where the parties have been unable to reach agreement or where an agreement is necessary for the fair and equitable resolution of a complaint.

(b) Eligibility. (1) A customer or applicant is eligible for a payment agreement and must be offered one in accordance with subdivision (a) of this section, unless:

(i) the customer is a seasonal, short-term or temporary customer;
(ii) the customer has broken an existing payment agreement; or
(iii) the commission or its designee determines that the customer or applicant has the resources available to pay the bill.

(2) if the utility believes that a customer or applicant has the resources available to pay the bill in full or where the utility and customer are unable to agree on a payment agreement covering amounts that exceed the cost of twice the customer's average yearly usage, either party may seek a determination from the commission or its designee, in accordance with the following procedures:

(i) the utility must immediately notify the customer or applicant and the commission or its designee of its position;

(ii) the utility must give the customer or applicant written notice summarizing the procedures under this paragraph in clear and understandable language;

(iii) the commission or its designee will make a determination without undue delay; and

(iv) until such a determination is made by the commission or its designee, the utility must postpone any termination activity, and restore service or provide service if so directed by the commission or its designee, as long as the customer or applicant pays current bills and terms of a payment agreement established by the commission or its designee.

(c) Contents of offer. Every offer of a payment agreement must:

- (1) inform the customer or applicant of the availability of a payment agreement for eligible customers;
- (2) set forth generally the minimum terms to which such customer or applicant is entitled;
- (3) explain that alternate terms may be possible;
- (4) state the date by which the customer must contact the utility in order to avoid termination, if applicable;
- (5) specify the utility's telephone number and the times to call in order to discuss an agreement; and
- (6) state that if further assistance is needed, the customer or applicant should call the commission at a specified telephone number.

(d) Terms of agreement. (1) A payment agreement must require the customer or applicant to pay all current bills on time.

(2) Unless otherwise agreed to by the utility and the customer, a utility is required to offer a payment agreement that covers amounts up to the cost of twice the customer's average annual usage. The downpayment may include any amount owed in excess of twice the customer's average annual usage. If the customer and utility are unable to agree upon a payment agreement under these circumstances, either party may seek a determination from the commission or its designee in accordance with paragraph (b) (2) of this section.

(3) A payment agreement offered for nonpayment of arrears, upon application for service, or upon request for reconnection, under subparagraph (a) (1) (i) or (ii) of this section, may require the customer or applicant:

(i) to make a downpayment of up to 20 percent of the amount covered by the agreement, or the cost of one month's average usage, whichever is greater; and

(ii) to pay the balance in monthly installments up to the cost of one month's average usage or one-tenth of the balance, whichever is greater.

(4) A payment agreement offered for backbilling, under subparagraph (a) (1) (iii) of this section, may require the customer to pay the outstanding charges in three or more monthly installments of up to the cost of one month's average usage or one twenty-fourth of such charges, whichever is greater.

(5) The cost of one month's average usage must be calculated by averaging the customer's cost of service over the prior year, if available.

(e) Form of agreement. The payment agreement must, in clear and understandable language and format, contain the following information:

(1) the total amount due, the required downpayment, if any, and the exact dollar amount and due date of each installment;

(2) the date by which the copy signed by the customer, and any applicable downpayment, must be received by the utility in order to become enforceable; provided, however, that such date may not be less than eight calendar days after it is sent;

(3) the utility's policy if the agreement is not signed and returned as required;

(4) that if the customer or applicant fails to comply with the terms of the payment agreement, the utility will take steps to terminate service; and

(5) that if the customer or applicant later can demonstrate his or her financial circumstances have changed significantly because of conditions beyond his or her control, the utility must amend the terms of the agreement to reflect such changes.

(f) Broken agreements. (1) If a customer fails to make timely payment in accordance with a payment agreement, the utility must send a reminder notice at least eight calendar days before the day when a final termination notice will be sent, stating that:

(i) the customer must meet the terms of the existing payment agreement by making the necessary payment within 20 calendar days of the date payment was due or a final termination notice may be issued; and

(ii) if the customer can demonstrate that he or she is unable to pay the terms of the payment agreement due to a significant change in his or her financial circumstances, because of conditions beyond his or her control, the customer should immediately contact the utility at a specified telephone number to arrange a new payment agreement.

(2) If by the 20th calendar day after payment was due, the utility has neither received payment nor negotiated a new payment agreement, the utility may demand full payment of the total outstanding charges and send a final termination notice in accordance with section 14.4 of this Part.

.SO DOC 16A-14.11

NYCRR

14.11 Residential service deposits.

(a) Deposit requirements. (1) A utility may only require the payment of a security deposit from:

(i) a seasonal, short-term or temporary customer;

(ii) a delinquent customer, as long as at least 20 calendar days before its request for a deposit, the utility provides the customer with written notice that the failure to make a specified payment before a specified date may result in a request for a deposit and states how the

deposit would be calculated; or

(iii) a customer whose service was terminated for nonpayment during the preceding six months.

(2) A utility may not require a deposit from:

(i) a customer or applicant who is known to the utility as a recipient of public assistance, supplemental security income benefits or additional State payments; or

(ii) a customer or applicant who is known to the utility as an elderly, blind or disabled person, unless that customer's service was terminated for nonpayment within the preceding six months.

(3) If a deposit is authorized by this section, the utility must offer a customer, except for a seasonal, short-term or temporary customer, the opportunity to pay the deposit in installments, considering the customer's financial circumstances in a manner consistent with section 14.10(a) (3) of this Part.

(b) Deposit calculation. (1) The amount of a deposit must not be more than the cost of twice the customer's average monthly usage, except in the case of customers whose usage varies widely, where the deposit must not be more than the cost of twice the average monthly usage for the peak season.

(2) The amount of the deposit must be based on service used during the previous 12-month period, as shown by any relevant billing history, and any relevant information concerning expected use.

(c) Deposit review. (1) A utility must, at least annually, review the billing history of every customer who has a deposit with the utility, to assure that a deposit may still be required under paragraph (a) (1) of this section and that the amount of the deposit is not more than the amount allowed in subdivision (b) of this section.

(i) If review shows that the deposit held falls short of the amount that the utility may lawfully require by 25 percent or more, the utility may require the payment of an additional deposit amount from the customer.

(ii) If a review shows that the deposit held exceeds the amount that the utility may lawfully require by 25 percent or more, the utility must return the excess deposit to the customer under subdivision (e) of this section.

(2) If a request of a customer for a downward revision of the deposit is substantiated by the customer's billing history, a utility must return any portion of the deposit that is more than the amount the utility may lawfully require, under subdivision (e) of this section.

(d) Interest. (1) Every deposit earns interest at a rate set annually

by the commission based on the current economic conditions and current charges paid for money borrowed by such utility, taking into account the expenses incurred by such utility in obtaining, handling, returning or crediting the sum deposited.

(2) The interest must be paid to the customer when the deposit is returned, in accordance with paragraph (e) (1) of this section. If the deposit has been held for 12 consecutive months or more, the interest must be credited to the customer no later than the first bill rendered after the next succeeding first day of October and at the end of each succeeding 12-month period.

(e) Deposit return. (1) A utility must return a deposit or portion of a deposit plus the applicable interest in accordance with paragraph (2) of this subdivision, as soon as reasonably possible, but no more than 30 calendar days after:

(i) the date of the first bill for service rendered after a 12-month period during which time the customer was not delinquent, provided there is no other basis for the utility to request a deposit under paragraph (a) (1) of this section;

(ii) the day an account is closed; or

(iii) a review in accordance with subdivision (c) of this section shows that deposit reduction is warranted.

(2) A deposit or portion of a deposit plus the applicable interest that is subject to return under paragraph (1) of this subdivision may be credited to the customer's account in the amount of any outstanding charges, and if any balance remains after the utility has credited the customer's account, a refund check must be issued to the customer.

.SO DOC 16A-14.12

NYCRR

14.12 Meter reading and estimated bills.

(a) Meter reading. (1) A utility must attempt to obtain an actual reading for every metered account, on a regularly scheduled basis in accordance with its tariff.

(2) An attempt to obtain a reading from either the meter or from a remote registration device requires that a meter reader follow routine reading procedures and access instructions, if applicable.

(3) Unless a customer does not have access to the meter or the customer will be unable to obtain a reliable reading, the utility must, at the time of any unsuccessful attempt to obtain an actual reading, leave at the premises or mail the customer a meter reading card.

(b) Estimated bills. (1) A utility may render an estimated bill for a regular cycle billing period only when:

(i) the utility has been unable to obtain access to the meter;

(ii) circumstances beyond the control of the utility made obtaining an actual reading of the meter extremely difficult, despite having access to the meter area; provided, however, that estimated bills for this reason may be rendered no more than twice consecutively without the utility advising the customer in writing of the specific circumstances and the customer's obligation to have the circumstances corrected;

(iii) the utility has good cause for believing that an actual reading obtained is likely to be wrong; provided, however, that estimated bills for this reason may be rendered no more than once without the utility taking corrective action before the rendering of the next cycle bill;

(iv) circumstances beyond the control of the utility prevented the utility from obtaining an actual reading;

(v) an actual reading was lost or destroyed; provided, however, that an estimated bill for this reason may be rendered no more than once without the utility taking corrective action;

(vi) an estimated reading has been ordered or authorized by the commission for a particular billing cycle;

(vii) an estimated reading has been approved as the billing method consistent with the utility's tariff for the billing period; or

(viii) an unmetered condition was in existence during the period.

(2) Every estimated bill must be calculated in accordance with an established formula which takes into account the best available relevant factors for determining the customer's usage.

(c) No access procedure. (1) A utility must begin providing no access notices as described in this subdivision with the next cycle bill issued after bills were estimated for a period of six consecutive months because of conditions listed in subparagraph (b) (1) (i) or (ii) of this section.

(2) The no access notices and charges described in this subdivision must be directed only to the access controller. In any case where the access controller is not the customer of the subject account, a copy of these no access notices must also be sent to the customer at the same time.

(3) The series of no access notices is as follows:

(i) the first notice must advise the access controller that the utility will arrange a special appointment to read the meter if the access controller calls a specified telephone number. Where the access controller is not the customer of the subject account, the notice must begin by stating that the utility records indicate that the recipient is the party who controls access to the meter of the customer, specifically identified as to address, part supplied, and account number, and that

the utility has not been provided access to the customer's meter as required;

(ii) the second notice must advise the access controller that unless access to the customer's meter is provided on the next meter reading date or a special appointment to read the meter is made and kept by the access controller before that date, a no access charge will be added to the access controller's next bill and to every bill thereafter until access to the customer's meter is provided, but that no charge will be imposed if an appointment is arranged and kept. The notice must advise the access controller that the utility will arrange a special appointment for a reading of the customer's meter if the access controller calls a specified telephone number;

(iii) the third notice must advise the access controller of the no access charge that has been added to the access controller's bill and that unless access to the customer's meter is provided on the next meter reading date or a special appointment to read the meter is made and kept by the access controller before that date, another charge will be added to the access controller's next bill. The notice must advise the access controller that the utility will arrange a special appointment for a reading of the customer's meter if the access controller calls a specified number; and

(iv) the fourth and each successive notice must advise the access controller of the no access charge that has been added to the access controller's bill.

(4) A no access charge as provided for in the utility's tariff must not exceed \$25.

(5) No more than \$25 per building or premises must be added to any single bill of the access controller even though more than one meter is located there.

(6) A utility may, at its discretion, suspend temporarily the issuance of no access notices and/or penalties under this subdivision if the access controller contacts the utility and provides a legitimate reason for postponing the provision of access.

(7) Nothing in this subdivision prevents a utility from sending appropriate no access notices to the party who controls access but does not have an active account of its own with the utility.

.SO DOC 16A-14.13

NYCRR

14.13 Backbilling.

(a) Notice. (1) Every backbill must contain a written explanation of the specific reason for the backbill, and if the bill covers more than a 24-month period, a statement as to why the billing was not limited under

subdivision (c) of this section.

(2) Every backbill must contain all required information applicable under section 14.15 of this Part.

(3) A backbill must be accompanied by an offer of a payment agreement in accordance with section 14.10 of this Part, if applicable.

(b) Limitations on issuance of backbills. (1) A utility may not issue a backbill more than six months after the utility actually became aware of the circumstance, error or condition that caused the underbilling.

(2) A utility may not upwardly revise a backbill, and must issue a downwardly revised backbill as soon as reasonably possible and within two months after the utility becomes aware that the first backbill was excessive.

(c) Limitations on backbilling period. (1) When the failure to bill earlier was due to utility deficiency, a utility must limit the backbilling period to 12 months before the utility actually became aware of and corrected the circumstance, error or condition that caused the underbilling, unless the utility can demonstrate that the customer's culpable conduct caused or contributed to the original underbilling.

(2) When the failure to bill earlier was not due to utility deficiency, a utility must limit the backbilling period to 24 months before the utility actually became aware of and corrected the circumstance, error or condition that caused the underbilling, unless the utility can demonstrate that the customer's culpable conduct caused or contributed to the original underbilling.

.SO DOC 16A-14.14

NYCRR

14.14 Late payment and other charges.

(a) Late payment charges. (1) A utility may charge for late payments, consistent with its tariff, on the balance of any bill for service, which has not been paid in full within 20 calendar days of the date payment was due.

(2) A utility may not impose a late payment charge on any bill that is the subject of a pending complaint before the utility or the commission; provided, however, that a late payment charge may be imposed if the final resolution of the complaint directs payment of the disputed amount or any portion of it to the utility.

(b) Other charges. Except as provided in this section, a utility may not charge any customer a late payment charge, penalty, fee, interest or other charge of any kind for any late payment or collection effort because the customer has failed to pay on time. Nothing in this section prevents a utility from imposing a reasonable charge for other lawful purposes, consistent with its tariff.

14.15 Contents of bills.

(a) Every utility bill must state:

- (1) the name and address of the corporation, partnership or person responsible for supplying the service;
 - (2) where the bill can be paid;
 - (3) the service classification on which the charges are based, if applicable;
 - (4) the name of the customer, the account number and the address of the premises where the service was supplied;
 - (5) the start and end date of the billing period;
 - (6) the amount of service billed with a separate itemization for minimum charges and usage, a statement of the cost of any other tariff charges and applicable taxes, and the total of the current charges, displayed in a vertical format;
 - (7) the date payment is due, as long as the date is not before the bill is hand delivered to the customer or less than three calendar days after the bill is mailed;
 - (8) the date of the latest payment received or the date through which payments have been credited, and the balance carried over from the prior bill, if any;
 - (9) whether any charge will be imposed for late payment, if applicable, and the date payment must be received by the utility, in order to avoid a late payment charge;
 - (10) the amount of any late payment charge applied during the current billing cycle, if applicable;
 - (11) an explanation of any abbreviation or symbol used that is not common English usage;
 - (12) a telephone number to call at the utility if the customer has any questions about the bill; and
 - (13) for metered accounts:
 - (i) whether the bill is based on a reading obtained from the meter itself or from a remote registration device, a customer reading, or an estimation, and if estimated, the reason for the estimation;
 - (ii) the next scheduled meter reading date, if applicable; and
 - (iii) if the bill is for previously unbilled unmetered service, that the bill is for an estimated amount of service used but previously not billed, the reason the bill was not rendered at the time the service was used, the basis used for calculating the amount of service billed, and the period of the unmetered service.
- (b) Nothing in this section prevents a utility from providing

pertinent messages and information on the bill, as long as such information does not interfere with the presentation of the information required by this section.

.SO DOC 16A-14.16

NYCRR

14.16 Notice requirements.

(a) Annual notice of rights. (1) A utility must, at the time of application for service and at least once each year after service is extended, provide applicants and customers with a brochure containing a detailed description of their rights and obligations under this Part, including the following:

(i) conspicuous notice that customers who are elderly, blind or disabled, or whose service is heat-related must so inform the utility in order to receive special protections; and

(ii) appropriate form(s) to be filled out by customers who may be eligible for special protections including but not limited to elderly, blind and disabled, public assistance recipients, and persons in two-family dwellings.

(2) The notice required at the time of application for service must be provided with the service application to an applicant from whom a written application is required and by mail, within 30 calendar days of the request for service, to an applicant from whom a written application is not required.

(b) Periodic notices. (1) If a customer has a deposit with a utility, an accounting for the deposit, showing the interest earned during the current year and the date the deposit was obtained, must be provided annually to the customer.

(2) If a utility issues bills monthly or bi-monthly, a notice offering a quarterly billing plan to customers known to be 62 years of age or older, whose average annual billing is under \$150, must be provided annually to such customers.

(3) A notice offering a fixed income billing plan must be provided annually to every customer known to be on a fixed income. Such billing plan must provide for payment of bills on a reasonable schedule considering the customer's regular receipt of income, without being charged late payment charges, as long as payment is made within 20 calendar days of the scheduled due date.

(4) A notice advising a customer of the applicable rate structure, in accordance with the utility's tariff, and offering the customer a detailed bill calculation upon request, must be provided annually to every customer.

(c) Hazardous conditions. If the utility is aware of a hazardous

condition that may affect the health and safety of consumers of its water, the utility must immediately make all reasonable efforts to contact affected parties.

(d) Billing information in a language other than English. A utility providing service to a county where at least 20 percent of the population, according to the most recent Federal census, regularly speaks a language other than English must send messages on bills and notices in both English and the other language, at the request of a customer living in the county.

(e) Format. All notices, brochures, forms and bills required by this Part, and any other written informational material for customers, including results of a complaint investigation provided under paragraph (a)(3) of section 14.19 of this Part, must be in plain language, printed in a format that is easy to read and understand, and must:

- (1) include definitions of any pertinent technical terms;
- (2) contain a size of type that is readable; and
- (3) include clear section headings, if applicable.

(f) Filing. All notices, brochures, forms and bills required by this Part, along with the intended program for their use, must be filed with the Consumer Services Division by a utility before their circulation.

.SO DOC 16A-14.17

NYCRR

14.17 Emergency disconnection of residences.

(a) Emergency disconnection. A utility may disconnect service to a premises when an emergency may threaten the health or safety of a person, the surrounding area or the utility's distribution system.

(b) Notice. A utility must, if possible, provide advance notice to those whose service will be disconnected under this section.

(c) Restoration of service. A utility must act promptly to restore service as soon as feasible after disconnection. Service must be restored to any premises which has been disconnected under this section, before it may be terminated for nonpayment of charges.

.SO DOC 16A-14.18

NYCRR

14.18 Inspection and examination of utility apparatus.

(a) Right to inspect. (1) An agent of a utility may enter, at all reasonable times, any location supplied with service by the utility for inspection and examination of its equipment related to the provision of such service.

(2) An agent of a utility may not enter locked premises without the permission of a person lawfully in control of the premises, unless explicitly authorized by court order or when an emergency may threaten the health or safety of a person, the surrounding area or the utility's

distribution system.

(b) Duty to inspect. A utility must conduct a field inspection as soon as reasonably possible, but no more than 60 calendar days after a reasonable customer request or a directive by the commission or its designee.

.SO DOC 16A-14.19

NYCRR

14.19 Complaint handling procedures.

(a) Complaints to the utility. (1) A utility must establish a written procedure for the handling of customers' complaints to the utility which allows for the acceptance and processing of complaints in a simple manner and form. Such procedure must require that complaints be promptly acknowledged, fairly investigated in a reasonable period of time, and that the results of such investigations be promptly reported to the complainants in plain language. Such procedure must also include notice to the customer of a specified telephone number for customers or applicants to call with any questions or problems.

(2) A utility must not take any steps to terminate a customer's service between the time a complaint is filed with the utility and 15 calendar days after the utility provides the customer with the results of the investigation, as long as the customer pays the undisputed portions of any bills for service, which may include bills for current usage.

(3) After the investigation is completed, a utility must promptly report the results to the customer in plain language. If the report is made orally, the utility must provide the customer with the report in writing upon request.

(4) When the utility gives its final response to a customer's complaint and the complaint resolution is wholly or partially in the utility's favor, the utility must inform the customer of the commission's complaint handling procedures, including the commission's address and telephone number.

(b) Complaints to the commission. (1) If a customer is dissatisfied with the resolution of the complaint to the utility, the customer may complain, either orally or in writing, to the commission, under Part 12 of this Title.

(2) A customer's complaint to the commission will be handled in accordance with Part 12 of this Title.

.SO DOC 16A-14.20

NYCRR

14.20 Utility compliance.

FINANCIAL CONDITION DEFINED

(Statutory authority: Public Service Law, § 66)

Sec.

18.1 Information required

.SO DOC 16A-18.1 NYCRR

Section 18.1 Information required.

Whenever a petitioner is required to state its financial condition, there shall be submitted the following information:

(a) Amount and classes of stock authorized by law or certificate of incorporation, as last amended.

(b) Where capital stock has been authorized by the commission, the case number and date of the order of such authorization.

(c) Separately for each class of stock: par value, if any; amount actually paid to the corporation for such stock; amount of premium realized thereon; number of shares and par value, if any, of stock for which subscriptions have been received but which at the date of the balance sheet had not been fully paid and issued together with the

agreed purchase price and amount of payments on such subscriptions.

(d) Terms of preference of each class of preferred stock.

(e) Separate statement for each class of nonpar stock showing amount of each item transferred thereto from surplus or other accounts, the date of such transfer and the title of the account from which the transfer was made.

(f) Where bonds, notes or other evidences of indebtedness have been authorized by the commission, the case number and date of the order of such authorization.

(g) Brief description of each mortgage upon any property of the applicant giving date of execution, name of mortgagor, name of mortgagee or trustee, amount of indebtedness authorized to be secured thereby, amount of indebtedness actually incurred and brief description of mortgaged property.

(h) Separately for each bond issue: the number and amount of bonds authorized and issued; the amount outstanding, the outstanding bonds to be subdivided between actually outstanding and nominally outstanding (reacquired); the name of the company which issued the bonds; the description of each class of bonds separately, giving date of issue, face value, rate of interest, date of maturity and how secured. If convertible bonds are authorized or outstanding, the date when the conversion privilege accrues and expires, the securities into which and the rate at which conversion may be made.

(i) Separate statement for each affiliated interest as defined by the Public Service Law; the amount of advances therefrom, the name of the creditor, the interest provisions, terms of settlement and purpose for which the advances were made; other indebtedness to each affiliated interest, except indebtedness representing ownership by an affiliated interest of mortgages or bonds described in subdivisions (f) and (g) of this section, giving classes of debt and the security, if any.

(j) Other indebtedness, classes of debt and the security, if any.

(k) Amount of interest accrued during the previous fiscal year at each of the several rates required by the terms of the outstanding indebtedness and the amount of interest accrued at each rate.

(l) Rate and amount of dividends declared upon each class of stock during each of the five years last preceding an amount of dividends paid.

(m) Statement of contingent assets and contingent liabilities with a brief description of each major item, and separately for each class of capital stock, the amount of unpaid cumulative dividends accrued.

(n) Analysis of unearned surplus showing the nature of each major item

included therein, and insofar as items in that account originated in connection with capital stock transactions, the amount therein applicable to each class of stock.

(o) Statement of the program in effect for the amortization of deferred debits and deferred credits or other balance sheet accounts, and the bases upon which are determined the debits or credits whereby such deferred debits are being amortized and whereby such deferred credits or operating reserves are being written off or created.

(p) Detailed income statement and balance sheets for latest fiscal year; also latest available income statement and balance sheets for 12 months.

Note: A reference in the petition to annual or other reports filed or to be filed with the commission will not be deemed a compliance with the provisions of this section.

.SO DOC 16A-21.1

NYCRR

Section 21.1 Summary of legal requirements.

(a) Before a public service corporation under the jurisdiction of this commission may begin construction of a gas, electric or steam plant in territory where it has not previously been authorized, an application must be made which must comply with the requirements of section 68 or 81 of the Public Service Law.

(b) If a municipality proposes to confine construction of gas or electric plants to territory within its own borders, no authority from the commission is necessary. (General Municipal Law, section 364.) If the municipality proposes to extend its gas or electric system beyond its municipal borders, a franchise must be secured from the municipality in which the construction is to be made and a certificate of authority secured from the commission.

(c) A municipality may not construct or operate a steam plant even within its own borders until securing a certificate of authority from the commission.

(d) A waterworks corporation may not begin construction of* new plant until it has filed with the commission a certified copy of an order issued by the Water Power and Control Commission approving construction. If the proposed construction parallels or duplicates mains or conduits of an existing water supply company, construction may not be begun until a certificate of convenience and necessity is secured from this commission.

* So in original. "a" inadvertently omitted

(e) Consent from the commission is not necessary before a municipality may construct a water plant. (Public Service Law, section 89-1.)

(f) Telegraph and telephone corporations formed subsequent to September 1, 1910, except radio-telephone utilities defined in Part 645 of this Title, which were in operation or which had applied to the appropriate Federal agency for an allocation of frequency on or before October 1, 1973, may not begin construction of a telegraph or telephone line until permission and approval of the commission and its certificate of public convenience and necessity have been secured. If the company proposes to construct and lay lines of electrical conductors underground, a franchise must be secured from the municipality in which such construction is to take place.

(g) An individual or partnership may not begin the construction of a telegraph or telephone line until a certificate of public convenience and necessity is secured from the commission. In all cases where required, a franchise must be secured from the municipalities in which the construction is to take place before a certificate of public

convenience and necessity will be granted.

(h) Within 30 days after the filing of a petition for a certificate of public convenience and necessity, either the director of the division of the Department of Public Service most concerned with the petition, the director's representative or counsel shall advise the petitioner of any deficiencies in such petition. The certification proceedings shall be deemed to commence on the date the petition complies with the applicable legal requirements and shall be conducted as expeditiously as possible.

.SO DOC 16A-21.2

NYCRR

21.2 Rules applicable to all petitions.

(a) The petition shall state the names of all corporations, including municipalities, rendering the kind of service for which the petitioner requests authority in the territory covered by the application.

(b) The petition shall be accompanied by a certified copy of the franchise granted by the municipality or municipalities in which the construction is proposed or authority is to be exercised, with a verified statement by a responsible official of the petitioner that all municipal consents have been secured that are required by law. Petitions by waterworks corporations shall be accompanied by a certified copy of the order of the Water Power and Control Commission authorizing construction.

(c) If the petitioner has previously secured authority from the commission to exercise the powers granted under a prior franchise that has expired, and has plant in operation, the petitioner shall request only authority to exercise the rights and privileges granted by the new franchise.

(d) If the petitioner has been granted any permit, license or authority by any Federal authority relative to the pending petition, the petitioner shall include a certified copy of such original permit, license, or authority and all amendments thereto.

(e) This section shall not apply to telephone corporations that provide service primarily over their own or leased facilities and that do not provide local exchange service. This section shall not apply to non-incumbent telephone corporations that provide local exchange service primarily over their own or leased facilities.

.SO DOC 16A-21.3

NYCRR

21.3 Evidence to be presented at hearing.

At the hearing, the applicant shall be prepared to show by competent evidence:

(a) Description and population of the territory within which it proposes to exercise authority granted by the franchise or consent and

to begin construction, including the names of all cities, towns and villages; also the dates when construction will begin and service will be provided.

(b) Description of the plant and system to be constructed and the estimated cost thereof.

(c) The manner in which the cost is to be financed. If the municipality is to be bonded, there shall be submitted a certified copy of the proposition submitted to the voters and the vote thereon.

(d) The rates to be charged for the classes of service rendered.

(e) Estimated revenues to be derived from operations covered by the petition and the estimated expenses of such operations, each to be complete and in detail for each of the first three years of service; also estimate made from an actual survey of the territory of the number of prospective customers at the end of the first, second and third years of service showing for each date the number of prospective customers in the residential, commercial and industrial classes of service.

(f) The facts upon which it relies to entitle it to exercise the rights and privileges petitioned for, including evidence of the economic feasibility of the enterprise, proof of the applicant's ability to finance the project and to render adequate service and that the proposal is in the public interest.

(g) Where similar services are being rendered in all or part of the area proposed to be served, the public need for the proposed service including, but not limited to:

(1) the adequacy of the existing service to meet the reasonable needs of the public in the territory involved;

(2) the ability and willingness of the present operator(s) to provide such reasonably adequate service; and

(3) the degree of competition desirable or required by the public interest.

(h) This section shall not apply to telephone corporations that provide service primarily over their own or leased facilities and that do not provide local exchange service. This section shall not apply to non-incumbent telephone corporations that provide local exchange service primarily over their own or leased facilities.

.SO DOC 16A-21.4

NYCRR

21.4 Certification of radio-telephone utilities.

(a) The commission shall grant a certificate of public convenience and necessity for the operation of a radio-telephone utility to any applicant:

(1) who shows that its certification:

- (i) would provide an entirely new service to the area to be served; or
 - (ii) would enhance competition in the area to be served; and
- (2) who either:
- (i) has obtained an allocation of frequency from the proper Federal authority; or
 - (ii) has applied for an allocation of frequency from the proper Federal authority.

(b) The hearing provided for in section 99 of the Public Service Law will, unless otherwise ordered, be conducted before the commission on the application, exhibits or other information submitted by the applicant. The applicant will be required to publish notice of the application for a certificate and relevant public comments on it will be accepted during the 21-day period thereafter.

(c) The application shall contain the following information:

(1) Description and population of the territory within which it proposes to exercise authority granted by the franchise or consent to begin construction, including the names of all cities, towns and villages; also the dates when construction will begin and service will be provided.

(2) General description of the plant and system to be constructed.

.SO DOC 16A-21.5

NYCRR

21.5 Amendments to radio-telephone utility certificates.

Whenever a radio-telephone utility proposes to make any change which would alter its service contours, as authorized by its certificate of public convenience and necessity, it shall petition the commission for an amendment of said certificate. Said petition shall describe in detail the proposed reliable service contour. The commission may act without hearing upon petitions which it determines will have no significant impact upon the extent of a radio-telephone utility's service territory.

.SO DOC 16A-21.6

NYCRR

21.6 Service changes.

Any new service offering, or change in an existing service offering, which does not affect a radio-telephone utility's service territory, as described in its certificate of public convenience and necessity shall be implemented by tariff filing. The certificate of public convenience and necessity need not be amended.

.SO DOC 16A-21.7

NYCRR

21.7 Certification of resellers of telephone service.

(a) The commission shall grant a certificate of public convenience and necessity for the resale of telephone services to any applicant who

exhibits, prepared testimony or other information as may be filed by the applicant or by any party or staff counsel, without oral testimony.

(2) A motion by an applicant for an expedited proceeding under paragraph (1) of this subdivision shall be made at any time before the commission acts on its application. The applicant shall serve a copy of the motion for an expedited proceeding and the public notice required by paragraph (3) of this subdivision on each person or municipality, if any, entitled to service of a copy of the application.

(3) Within 14 days after the date on which it files its motion, an applicant moving under paragraph (1) of this subdivision shall publish in a newspaper, or newspapers of general circulation, in all the areas in which the franchise sought to be granted or renewed would permit it to operate, a notice:

(i) briefly describing the subject matter of the application;

(ii) stating that the applicant has moved that the public hearing required by the Public Service Law be held before the commission on the basis of the application and such exhibits, prepared testimony and any other information as may have been filed by any party or staff counsel, and that oral testimony not be taken; and

(iii) stating that any person opposed to the granting or renewal of the franchise should, within 10 days of the date of the publication of the notice, notify in writing the secretary of the Public Service Commission at Agency Building 3, Empire State Plaza, Albany, N.Y. 12223, of the reasons for the opposition.

(b) The commission may grant a motion made under subdivision (a) of this section if:

(1) the applicant has served a copy of its motion, and the public notice required, upon each party entitled to receive a copy of the application; and

(2) no person, municipality or agency has filed with the secretary, within 10 days of the date of publication of the newspaper notice required by paragraph (3) of subdivision (a) of this section, a written objection stating substantive reasons for opposition to the granting of such a motion.

(c) If, at the hearings provided by subdivision (a) of this section, the commission finds that there is a substantive basis for opposition to the granting of the certificate, it shall order that the matter be set for further hearings.

(d) The secretary is directed to file this resolution with the Secretary of State.

NYCRR

Section 31.1 Contents of petition.

Applications under sections 70, 83, 89-h, or 99 of the Public Service Law, for approval of transfer or lease of consents, franchises, works or systems, or agreements affecting them shall be by joint or separate petitions, duly verified by all parties to the transfer or lease and shall show in detail the reasons for what is proposed, all of the facts warranting the same and that the transfer or lease is in the public interest. The petition shall state:

- (a) In case of transfer, the facts called for in subdivisions (f)-(i) and (p) of section 3.1 of this Chapter applicable to property to be transferred.
- (b) General description of the property to be transferred or leased.
- (c) List of the franchises, consents and rights to be transferred or leased, including the name of the grantor, date when granted, date of approval by this commission and number of case in which approval was granted and copy of said franchises, consents and rights duly certified by the proper official.
- (d) A certified copy of the approval of the municipality to the transfer or lease if any of the local consents or franchises involved required that they shall not be transferred or leased without the consent of the municipality granting the same.
- (e) A copy of the proposed assignment, contract, lease or agreement to be approved.
- (f) Inventory of the property proposed to be transferred or leased with the original cost of such property, original cost being the cost to

the person first devoting the property to public service, and person being an individual, a corporation, a partnership, an association, a joint stock company, a business trust or any organized group of persons whether incorporated or not, or any receiver or trustee.

(g) In said inventory, the property shall be classified according to the requirements of the system of accounts prescribed by this commission applicable to the transferor or lessor.

(h) An estimate of the accrued depreciation in the property together with a statement of the method or methods used in arriving at such estimate.

(i) The cost of said property as shown upon the balance sheet of the transferor or lessor.

(j) The depreciation and amortization reserves applicable to said property, estimated if not ascertainable from books and records.

(k) A statement of contributions toward construction of said property, such contributions to be subdivided so as to show those subject to refund and those which are not.

(l) Statement of operating revenues, expenses and taxes for each of the three calendar years preceding the date of the petition relating to the property to be transferred or leased and balance sheet of the transferor or lessor and of the transferee or lessee of the latest available date.

.SO DOC 16A-31.2

NYCRR

31.2 Evidence to be presented at hearing.

At the hearing, the applicant shall be prepared to show by competent evidence the facts upon which it relies to establish that the transaction is in the public interest, proof of the ability of the petitioner to render adequate service and that the statements in the petition are true.

Note: As the Public Service Law prohibits the capitalization of franchises, consents or rights to engage in utility business except as provided in the Public Service Law, the commission will not approve a transfer or lease where it appears that the transferee or the lessee is paying for a franchise, consent or right to engage in utility business in excess of legitimate original cost less proper amortization. Where the amount authorized to be paid exceeds the original cost less accrued depreciation of the physical property transferred or leased, together with the unamortized portion of the actual cost incurred in securing said franchise, consent or right, the commission may refuse to approve the application unless the applicant will amortize immediately said excess through charges to surplus.

NYCRR

Section 37.1 Contents of petition. The petition duly verified shall state or contain:

(a) Financial condition of the applicant (see Part 3 of this Chapter).

(b) The basis of the book cost of utility property of applicant and particularly whether it represents original cost of such property as

original cost is defined in subdivision (f) of section 31.1 of this Subchapter, if it does not represent original cost, the basis should be fully stated.

(c) Statement of whether such book cost includes any amount for a franchise, consent or right to operate as a public utility.

(d) The amount and kind of stock which the corporation desires to issue, and, if preferred, the nature and extent of the preference.

(e) The amount of bonds, notes and other evidences of indebtedness which the corporation desires to issue, date of maturity, the rate of interest, how secured, and if to be secured by a mortgage or pledge, the terms thereof.

(f) The purposes for which the funds to be derived from the issuance of such securities are to be used, and particularly the amount for each of the following:

- (1) acquisition of property;
- (2) construction, completion, extension or improvement of facilities;
- (3) improvement or maintenance of its service;
- (4) discharge or refunding of its obligations; and
- (5) reimbursement of moneys actually expended from income or from any other moneys in the treasury not obtained from the issuance of stocks, bonds, notes or other evidences of indebtedness.

(g) The funds available from sources other than the proposed financing to meet in part the purposes stated in subdivision (f) of this section, including contributions from customers or others, salvage proceeds, depreciation reserve accruals and any unused balances in prior financing applications.

(h) Copy of contract or agreement for the disposal of any of the stocks, bonds, notes or evidences of indebtedness which it is proposed to issue.

(i) Statement in detail of the estimated costs and expenses of the contemplated financing.

(j) Copy of proposed instrument if the bonds, notes or other evidences of indebtedness to be issued are to be secured by a mortgage, indenture, lease or other agreement not on file with the commission; and a certified copy shall be filed with the commissioner promptly upon execution.

(k) Statement of the financial condition of each of the corporations to be merged or consolidated, if securities are to be issued by a corporation to be formed by the merger or consolidation of two or more corporations.

(l) Proof of the consent of the stockholders under the Stock

Corporation Law and the Railroad Law if the application contemplates a mortgage.

(m) Statement as to whether required approval by other public authorities has been obtained.

(n) Whether any franchise or any right to own, operate or enjoy any franchise, or any contract for consolidation or lease is proposed to be capitalized directly or indirectly, except as the same is authorized by sections 69, 82, 89-f or 101 of the Public Service Law. If the proposal contemplates or involves the capitalization of any franchise, there shall be filed with the petition a verified copy of such franchises and an affidavit of the proper officer of the public authority granting same showing the amount that has been actually paid for such franchises and by whom such payment was made.

(o) An affidavit by the principal accounting officer of the petitioner that the accounts of the petitioner have been kept strictly in accordance with the accounting order or orders of the commission applicable thereto, and that since the effective date of such orders there have been no charges to asset accounts not in accordance therewith and that all required credits to such asset accounts have been made for the amount and in the manner prescribed therefor in such accounting orders.

.SO DOC 16A-37.2

NYCRR

37.2 Specific provisions for acquisition of property. If securities are to be issued to acquire property (the petition duly verified shall state or contain):

(a) General description of the property to be acquired.

(b) Consideration to be paid for property and copy of purchase agreement.

(c) List of franchises, consents and rights to be acquired including the name of the grantor, date when granted, date of approval by this commission and number of case in which approval was granted and copy of said franchises, consents or rights duly certified by the proper official; consent to sale if any is required.

(d) Inventory of the property proposed to be acquired with the original cost of such property, original cost being as defined in subdivision (f) of section 31.1 of this Subchapter.

(e) In said inventory, the property shall be classified according to the requirements of the system of accounts prescribed by this commission applicable to the seller.

(f) An estimate of the accrued depreciation in the property together with a statement of the method or methods used in arriving at such

estimate.

(g) The book cost, viz., amount at which said property is shown upon the balance sheet of the seller.

(h) The depreciation and amortization reserves applicable to said property, estimated if not ascertainable from books and records.

(i) A statement of contributions toward construction of said property, such contributions to be subdivided so as to show those subject to refund and those which are not.

(j) Statement of operating revenues, expenses and taxes for each of the three calendar years preceding the date of the petition relating to the property to be sold and balance sheet of the seller for the latest available date.

(k) At the hearing, the applicant shall be prepared to show by competent evidence the facts upon which it relies to establish that the transaction is in the public interest, that the property to be acquired is necessary to provide adequate service at reasonable rates and that the statements in the petition are true.

.SO DOC 16A-37.3

NYCRR

37.3 Specific provisions for construction, completion or improvement of facilities.

If securities are to be issued for the construction, completion or improvement of facilities (the petition duly verified shall state or contain):

(a) General description of the work proposed and the estimated cost thereof.

(b) Copy of construction or work agreement.

(c) Description and book cost in detail of all property which will be retired in connection with the proposed construction, with an estimate of the cost of removal and the salvage to be recovered.

(d) An affidavit by the chief accounting officer of the petitioner that no part of the cost of the work proposed is in whole or in part reasonably chargeable to operating expenses or to income, except as therein set forth.

(e) At the hearing, the applicant shall be prepared to show by competent evidence that the construction or equipment is required to render adequate service at reasonable cost and that the statements in the petition are true.

.SO DOC 16A-37.4

NYCRR

37.4 Specific provisions for improvement or maintenance of service.

If securities are to be issued for the improvement or maintenance of its service (the petition duly verified shall state or contain):

(a) Statement in detail of the purposes of the proposed expenditure and the estimated cost thereof.

(b) Copy of construction or work agreement.

(c) Description and book cost in detail of all property which will be retired in connection with the proposed construction, with an estimate of the cost of removal and the salvage to be recovered.

(d) An affidavit by the chief accounting officer of the petitioner that no part of the cost of the work proposed is in whole or in part reasonably chargeable to operating expenses or to income, except as therein set forth.

(e) Detailed statement of the reasons why the proposed expenditures should be defrayed by the issuance of securities.

(f) At the hearing, the applicant shall be prepared to show by competent evidence that it is necessary to issue the securities for the purposes proposed, that the proposed expenditures are required to provide adequate service at reasonable rates and that the statements in the petition are true.

.SO DOC 16A-37.5

NYCRR

37.5 Specific provisions for refunding of obligations or retirement of securities.

If securities are to be issued for refunding of obligations or the retirement of other securities (the petition duly verified shall state or contain):

(a) Description of obligations or securities to be refunded including par or face value thereof, interest or dividend rate, date of maturity, call premium to be paid, amount of money or other consideration actually received when refunded obligations or securities were issued, use made of said proceeds, unamortized costs of issue and unamortized premiums.

(b) Proposed disposition of unamortized costs and premiums.

(c) Unpaid interest or accrued dividends.

(d) At the hearing, applicant shall be prepared to show by competent evidence the facts upon which it relies to establish that the transaction is in the public interest and that the statements in the petition are true.

.SO DOC 16A-37.6

NYCRR

37.6 Specific provisions for reimbursement.

If securities are to be issued for reimbursement (the petition duly verified shall state or contain):

(a) Balance sheets of the corporation at the beginning and end of the period covered by reimbursement proceeding.

(b) Balances in operating property account (or its equivalent) at the

beginning and end of the period and by subaccounts.

(c) Original cost of property added to each subaccount of the operating property account (or its equivalent) for each of the years covered by the reimbursement proceeding.

(d) Credits to each subaccount for property retired in each year.

(e) Details of all other debits and credits to each of said subaccounts in each year.

(f) Analysis of retirements year by year to show book cost of each credit to operating property accounts, debit to depreciation reserve or other account, cost of removal and salvage.

(g) Analysis of credits to depreciation or retirement reserve to show the nature and source of each and basis of contra charges to expense or other account.

(h) Amount of fees in detail charged by affiliated interests, as such term is defined in the Public Service Law, which were included in the amounts required to be stated in subdivision (c) above.

(i) Funds available from other sources during the reimbursement period to meet the gross cost of additions to operating property account, including proceeds from salvage, contributions from customers and others and depreciation reserve accruals.

(j) Affidavit by petitioner's principal financial officer that proper credits to said subaccounts have been made for all property which was removed, sold, abandoned or destroyed or which for any cause ceased to be used and useful in the service of the public during the reimbursement period as required by the applicable system of accounts prescribed by this commission; that during the reimbursement period the debits to each of said subaccounts represent the original cost of the property used and useful in the service of the public; that the funds expended for purposes for which reimbursement is sought were not directly or indirectly derived from the sale of stocks, bonds, notes or other evidences of indebtedness or from open accounts of the petitioner.

(k) Purposes for which the funds to be obtained from the securities to be issued are to be used.

(l) At the hearing, applicant shall be prepared to show by competent evidence the facts upon which it relies to establish that the transaction is in the public interest and that the statements in the petition are true.

.SO DOC 16A-37.7

NYCRR

37.7 Submission of proposed consideration. All data required by the above rules or considered necessary by the commission, except the consideration, for which said securities are to be issued or sold, must

be submitted at least 20 days before final action by the commission thereon; and said consideration must be submitted before approval is given, together with an affidavit of the president of the applicant that the proposed issued is to be sold on the most advantageous terms obtainable.

.SO DOC 16A-37.8 NYCRR

37.8 Radio-telephone utilities and resellers of telephone service.

Applications pursuant to section 101 of the Public Service Law by radio-telephone utilities and resellers of telephone services need contain only a description of the securities to be issued and the purposes for which the issuance is sought.

PART 38

REORGANIZATIONS

(Statutory authority: Public Service Law,
§ 20, 142)

Sec.

38.1 General

38.2 Contents of petition

38.3 Reorganization pursuant to the Federal Bankruptcy Act

.SO DOC 16A-38.1 NYCRR

Section 38.1 General.

Applications under sections 69-a, 82-a, 89-g and 101-a of the Public Service Law are treated as capitalization matters (see Part 48 of this Subchapter) and there shall be filed a petition to which shall be annexed a copy of the proposed reorganization agreement. As a part of the petition, there shall be full information with reference to the matters which by such sections are specifically required to be considered by the commission before reorganization can be had.

.SO DOC 16A-38.2 NYCRR

38.2 Contents of petition. The petition shall include the following:

(a) The facts called for in subdivisions (f), (g), (h), and (k) of section 37.1 of this Article.

(b) Non-operating property and its present market value.

(c) Estimate of the maximum amount for reorganization costs.

(d) Balance sheets for the last five years.

(e) Income statement for the last five years.

.SO DOC 16A-38.3 NYCRR

38.3 Reorganization pursuant to the Federal Bankruptcy Act. Reorganizations of New York State public utilities pursuant to the provisions of the Federal Bankruptcy Act require the approval of the

Public Service Commission. Upon the submission of such a plan of reorganization, the commission will determine if the public interest is involved. When such a determination is made, the Federal court will be duly notified. Thereafter, public hearings will be held at which the reorganization committee of the utility must establish by competent proof that the proposed plan is in the public interest. It should appear that the securities proposed to be issued by the reorganized company do not exceed the value of the property to be held by such corporation and that the prospective earnings are sufficient to pay a return on the new securities. The approval of the commission to a reorganization plan does not relieve the reorganized company from securing necessary consents to the transfer of property, amendments of its certificate of incorporation or the issuance of securities.

.SO DOC 16A-58.1 NYCRR

Section 58.1 Applicability of Part. This Part applies to any person deemed a gas corporation, electric corporation, steam corporation or waterworks corporation for the purpose of the Public Service Law, who or which is engaged in carrying on any business other than owning, operating or managing a gas plant, electric plant, steam plant or water system, respectively, provided that such person's other business is not subject to the jurisdiction of the commission and is so conducted that its operations are to be substantially kept separate and apart from the owning, operating, managing or controlling of such gas, electric or steam plant or water system, and that the ownership, operation or control of any gas, electric or steam plant or water system by such person is wholly subsidiary and incidental to the other business carried on by it and is inconsiderable in amount and not general in its character. Any such person may petition the commission for exemption from compliance with the provisions of the Public Service Law as specified in this Part.

.SO DOC 16A-58.2 NYCRR

58.2 Contents of petition. (a) The petition shall set forth in detail

the reasons and facts which warrant the granting of the relief requested, and which establish that the exemption is in the public interest. The petition shall contain at least the following:

(1) a description of the nature and extent of both the petitioner's general business and its utility business (including the amount of revenue received from such business);

(2) the names and addresses of utility customers the petitioner wishes to serve;

(3) a description of the type, amount and anticipated duration of the utility service to be provided;

(4) a demonstration that the petitioner will be able to provide safe and adequate utility service; and

(5) the name and address of any franchised utility which is providing similar service to customers in the territory which the petitioner wishes to serve.

(b) If the petitioner seeks the commission's approval pursuant to Public Service Law, section 68, 81 or 89-e, it shall so state. The petition shall include the information required by sections 21.2 and 21.3 of this Title.

(c) If the petitioner has already received the commission's approval pursuant to Public Service Law, section 68, 81 or 89-e, the petition shall include:

(1) a list of the franchises being exercised, including:

(i) the names of the grantors, the dates when granted, the dates of approval by the commission and the numbers of the cases in which approval was granted; and

(ii) copies of any franchise duly certified by the proper official; and

(2) a description of the plant or system to be operated.

.SO DOC 16A-58.3

NYCRR

58.3 Gas service to less than 20 customers. Where the permission granted the petitioner pursuant to Public Service Law, section 68, is to supply gas only to less than 20 customers specified by the commission, the commission may, if the public interest permits, exempt such corporation from compliance with all or any of the provisions of Public Service Law, article 4, except those affecting matters of public safety and the provisions of sections 26, 65 and 68.*

*FOOTNOTE: The power of the commission to commence an enforcement proceeding, which is now set forth in section 26 of article 1 of the

Public Service Law, was previously set forth in section 74 of article 4.

.SO DOC 16A-58.4

NYCRR

58.4 Gas service to 20 or more customers; electric, steam and water service. Where the permission granted the petitioner pursuant to Public Service Law, section 68, 81 or 89-e, is to supply gas to 20 or more customers or electricity, steam or water to any number of customers specified by the commission, the commission may, if the public interest permits, exempt such corporation from making full reports and from keeping accounts as to such subsidiary and incidental business.

Rate Proceedings

PART

61 Rate Proceedings

.SO DOC 16A-PT61

NYCRR

PART 61

RATE PROCEEDINGS

(Statutory authority: Public Service Law, § 20, 142)

Note: Proceedings involving the reasonableness of existing or proposed rates vary so greatly in character and scope that it is impossible to prescribe rules of universal application that are suited to all rate proceedings. These proceedings range all the way from a simple proposal to change a rule which would increase or decrease the bills being paid by a few consumers to a broad proceeding involving all of the rates of a utility rendering service in the entire State. The former may require only one brief hearing because of the simplicity of the questions involved. The latter, as the experience of the commission has demonstrated, may consume years, require scores of hearings and thousands of pages of testimony preceded by long and tedious investigations of property, inventories and values together with extended analyses of operating costs, etc. Because of these facts, no attempt is here made to specify the data that must be supplied in all rate proceedings, but the following are of general application. Possibly the only one of universal application is the one first mentioned (see section 61.1 of this Part) which finds its origin in the Public Service Law.

Sec.

61.1 Burden of proof

61.2 Presumption as to existing rates

61.3 Matters to be established by utility

61.4 Expected changes

61.5 Establishment of original cost and accrual depreciation

61.6 Property acquired from affiliated interests

61.7 Reproduction cost

61.8 Working capital

61.9 Amounts previously charged to other than capital accounts

61.10 Restriction on rate filings

.SO DOC 16A-61.1 NYCRR

Section 61.1 Burden of proof. The burden of proof is upon the utility whose rates, rules and regulations relating thereto, charged or proposed to be charged, are being considered.

.SO DOC 16A-61.2 NYCRR

61.2 Presumption as to existing rates. The rates, rules and regulations relating thereto that are in effect when the proceeding is initiated will not be presumed to be just and reasonable.

.SO DOC 16A-61.3 NYCRR

61.3 Matters to be established by utility. (a) The utility whose rates, rules and regulations are being considered shall establish by competent testimony:

(1) the annual revenues under the existing rates, rules and regulations that are being considered and under those which said utility proposes to charge;

(2) number of units of service rendered (e.g., kilowatt-hours, M cubic feet, car miles and car hours or telephone calls) for each service classification involved, actual and proposed; and

(3) revenue per unit similarly.

(b) Such utility shall establish by competent testimony:

(1) the detailed cost of rendering the service to which such rates, rules and regulations are applicable;

(2) the cost per unit of service rendered as defined in the preceding paragraph; and

(3) other customary operating statistics.

(c) Such revenues and costs shall be:

(1) for each of the three years immediately preceding the initiation of the case;

(2) for such later periods as the progress of the proceeding will permit; and

(3) all changes in said rates, rules and regulations during the entire period shall be fully and exactly set forth.

(d) Such utility shall establish by competent testimony:

(1) comparative balance sheets at the end of the four preceding fiscal

years and the latest available month;

(2) comparative income statements for the three preceding fiscal years and for the current year through the latest available month;

(3) amount and bases of charges for depreciation or amortization included in such operating expenses;

(4) earned surplus statements for the three preceding fiscal years and for the current year through the latest available month;

(5) complete and detailed statements of the merchandising and jobbing business conducted by the utility during the three preceding fiscal years and for the current year through the latest available month, including the revenues applicable thereto, the total expenses incurred in conducting this business, taxes applicable thereto and return on the property used therefor. This testimony shall be complete and in detail and shall include all costs of every kind and description; and

(6) the gas purchasing policies and load management practices and how the company is insuring that gas costs for both the test period and rate year are prudent and from the least-cost reliable sources. Such testimony should discuss both the long- and short-term gas procurement plans as well as a description of existing gas supply contracts. This testimony should be complete and in detail, including quantities as well as costs for all sources of gas supply.

.SO DOC 16A-61.4

NYCRR

61.4 Expected changes. If the utility involved believes that there will be changes in revenues, expenses or income which should be considered in determining reasonable rates for the future, it shall present competent testimony to support such estimates. Speculative or conjectural data are not acceptable and all estimates must be explained in detail and the bases definitely established.

.SO DOC 16A-61.5

NYCRR

61.5 Establishment of original cost and accrual depreciation. Where return is involved or claimed, the utility shall establish by competent evidence the original cost of the property used and useful in the service to which the rates, rules and regulations involved in the proceeding relate and the accrued depreciation thereon. All property not so used and useful shall be excluded (note particularly of section 61.3(d)(5) of this Part). Accrued depreciation as used herein means the loss or depletion in worth or value, compared with a specified cost new, due to all causes which bring about the ultimate retirement of the property, such as wear and tear, decay, action of the elements, inadequacy, obsolescence, changes in the art, changes in demand and requirements of public authorities. Departure from newness, estimated

cost of needed repairs or that part of depreciation which may be measured by inspection alone will not be accepted as satisfactory evidence of the total amount of accrued depreciation actually existing in the property.

.SO DOC 16A-61.6 NYCRR

61.6 Property acquired from affiliated interests. In the case of property acquired from affiliated interests, as defined in section 110 of the Public Service Law, there shall be shown whenever possible the original cost of such property to the corporation or person constituting such affiliated interest and the depreciation accrued by such corporation or person at the time of sale or transfer to the utility.

.SO DOC 16A-61.7 NYCRR

61.7 Reproduction cost.

(a) Evidence of reproduction cost need not be submitted, but if presented, it shall be primary accounts and subdivisions thereof as prescribed in the applicable uniform system of accounts prescribed by this commission and the corresponding original cost and book cost of the property as defined in this section shall be shown if the book cost differs from original cost.

(b) If evidence of reproduction cost is submitted, the accrued depreciation as herein defined, that is applicable to such reproduction cost, shall be shown by primary accounts and subdivisions thereof as provided for in section 61.5 of this Part. Reproduction costs without accrued depreciation is not an element in determining the value of the property for the purpose of computing a return and will not be accepted as such.

.SO DOC 16A-61.8 NYCRR

61.8 Working capital. Any claims for working capital or other elements of value must be established by competent evidence.

.SO DOC 16A-61.9 NYCRR

61.9 Amounts previously charged to other than capital accounts. Whenever amounts previously charged to operating expenses or to income accounts or to surplus are included in claimed original cost or book cost of said property, such amounts shall be clearly set forth with the date of such charges.

.SO DOC 16A-61.10 NYCRR

61.10 Restriction on rate filings. (a) Whenever the effective date of any change to any public utility company's tariff schedule is suspended by order of the commission pending an investigation of that company's revenue requirement, no change of any other tariff schedule in force at the time of the commission's suspension order shall be accepted for

filing without the approval of the commission, except as provided by subdivision (c) of this section.

(b) No change of any tariff schedule shall be accepted for filing without the approval of the commission, unless the changed schedule:

(1) contains a tariff leaf setting forth a schedule of surcharges designed to allocate the expense of each utility gross revenue tax, imposed by a city, a village, or the State, to the customers whose service produces revenues subject to that tax; or

(2) contains no changes other than those set forth in subdivision (c) of this section.

(c) The following proposed tariff schedule changes shall not require the filing approval required in subdivision (a) of this section:

(1) changes made pursuant to or authorized by applicable orders of the commission, such as compliance filings following rate level or rate design investigations and expressly authorized second-stage rate increases;

(2) changes in formula rates, such as the fuel and gas adjustment clause, annual factor of adjustment, annual gas surcharge or refund, gross receipts tax surcharge, and two-tier telephone rate revisions;

(3) changes in special service charges, such as late payment, no access, meter recovery, connection, field collection, seasonal turn-on and turn-off, and undergrounding charges;

(4) changes designed to offer a new or expanded service or curtail an existing service, such as telephone base rate area expansions, locality zone changes, extended area service offerings and exchange area transfers; and

(5) changes in the terms and conditions of service, other than rates and charges, without substantial revenue or customer bill effects and changes made for the movement of text to other pages to accommodate other authorized changes.

(d) Petitions for the approval required by subdivisions (a) and (c) of this section shall be:

(1) submitted to the secretary with all matter to be filed in support of the proposed change, and shall explain why the filing should be accepted prior to completion of the suspension period;

(2) served upon all parties to any proceeding which is pending to investigate a suspended schedule; and

(3) approved or denied for filing, subject to such terms or conditions as the commission may prescribe.

(e) For the purposes of this section, tariff schedule shall mean any rate, charge, form of contract or agreement, rule, regulation, service,

general privilege or facility of a public utility company, or other agency subject to the commission's jurisdiction. Separate departments of public utility companies providing gas, electric and steam service under separate tariff schedules shall be considered separate entities for the purpose of this section.

Long-Range Electric System Planning

Part

82 (Reserved)

83 (Reserved)

84 Transmission Facilities Management

.SO DOC 16A-PT84 NYCRR

PART 84

TRANSMISSION FACILITIES MANAGEMENT

(Statutory authority: Public Service Law, § 65(1), 66(2))

Sec.

84.1 Aerial spraying approval

84.2 Long-range right-of-way management plan for electric transmission systems

84.3 Transmission right-of-way maintenance programs and schedules

.SO DOC 16A-84.1 NYCRR

Section 84.1 Aerial spraying approval. (a) Any electric utility in New York State that proposes to apply herbicides using the aerial application technique to manage right-of-way (ROW) vegetation shall, on a site-by-site basis for any given transmission ROW, submit a plan, with suitable maps and charts, justifying its choice of aerial herbicide treatments of ROW vegetation. At a minimum, the plan shall describe vegetation types to be treated, ROW access conditions, and measures to insure that nontarget resources such as surface and ground waters, potable water supplies and nontarget lands, such as residential and recreational areas, croplands, and other sensitive areas, will not be fouled by the herbicides. The statement shall also describe how the proposed aerial applications will achieve the ROW vegetation management goals that the company has established for the ROW system as a whole and management objectives for the affected individual ROW's.

(b) Such information shall be filed at least 60 days before the date on which the proposed aerial spraying is scheduled to begin. The proposed aerial spraying will not begin unless the affected company complies with the informational requirements specified in subdivision (a) of this section, and the commission approves the proposal. If,

however, the commission has not acted upon the proposal within 45 days after its filing, the plan shall be deemed approved.

.SO DOC 16A-84.2

NYCRR

84.2 Long-range right-of-way management plan for electric transmission systems. (a) Each member system of the New York Power Pool, except the Power Authority of the State of New York, shall, by March 31, 1981, submit for review and approval by the New York State Public Service Commission a long-range right-of-way (ROW) management plan for each respective electric transmission system comprised of transmission facilities of 34 kv and above, except where located entirely on public streets or roads. The plan, shall, at a minimum, describe each company's structure and organization for ROW management planning and program operation. The plan, with appropriate maps, charts and text, shall describe the ROW system in general terms, its location, extent, components by voltage class, ROW widths and general conditions. A statement shall be included explaining the rationale for selecting the time frame which the plan encompasses.

(b) The plan shall describe the functions of key positions in ROW management, including provisions and responsibilities for establishing and achieving long-range ROW management goals and annual right-of-way maintenance objectives.

(c) The plan should include a brief history of past and present ROW management policies and practices that would influence future management policies and practices. The management issues that the plan will address should be discussed along with the plan's goals and objectives that are established as a response to the issues.

(d) The plan should describe landowner or land-user notification procedures and restrictions concerning company ROW management plans and practices. The utilities should explain how they receive and handle restrictions and requests which modify management practices and procedures, especially those involving chemical treatments. Procedures for identifying, evaluating, reporting and responding to ROW maintenance problems should be described. Determinations of appropriate ROW treatments and maintenance schedules or cycles should be described, showing their relationship to long-range management goals and more immediate program objectives for both the ROW's as a whole and vegetation in particular.

(e) The plan should list the various ROW management techniques used by the utility and the conditions under which a given mechanical, chemical or other technique is normally considered appropriate. There should be a discussion of the clearance standards sought, costs, effectiveness,

environmental impacts, and other relevant concerns associated with use of the techniques. For chemical treatments the section should also include a discussion of combinations of treatment methods and materials, follow-up treatments, and the influence of accessibility, vegetation density, type and height, and other physical factors not described elsewhere.

(f) The approach to preparation of annual maintenance plans and schedules for individual ROW's and the steps to implement them to achieve the long-range plan goals should be discussed. The approaches that are used to determine work force size, type (e.g., company versus contractor) and capability, equipment and materials, and a description of training needs, budgets, specifications for treatments, and methods of program monitoring and evaluation should be included. Examples of forms, reports, records, etc., particularly those for cost accounting, should be provided in the plan or in appendices.

(g) The plan should contain a summary of those ROW management issues that have not yet been resolved and which are included in present or anticipated research activities involving ROW maintenance. Areas of any needed research which have not been undertaken should be briefly described.

(h) A discussion of regulations, licensing and permits should identify any needs there are for such authorizations to conduct ROW management operations.

(i) The plan should describe approximate funding levels that are needed to accomplish annual and multi-year ROW management planning goals. Any strategies involving significant increases in annual or multi-year funding levels that are deemed necessary to advance the achievement of plan goals should be included.

(j) The final section should describe provisions for periodically reviewing, evaluating and revising the long-range plan, and the time interval for such revisions.

.SO DOC 16A-84.3

NYCRR

84.3 Transmission right-of-way maintenance programs and schedules. (a) Each member system of the New York Power Pool, except the Power Authority of the State of New York, shall, by March 31, 1981, prepare and file with the commission a right-of-way (ROW) maintenance program for its transmission system which is designed to achieve the company's long-range ROW management planning goals. At a minimum, the program should contain the following elements:

(1) provisions for regular inspections of the ROW's, including the specifics of the types of inspection and the frequencies of inspection;

(2) specific quantitative criteria relating to the clearances between conductors and vegetation and the corresponding range of time in which the vegetation maintenance must be performed. These criteria are to be used by ROW inspectors in determining when maintenance is necessary;

(3) a requirement that annual schedules for the treatment of vegetation based on the results of the ROW inspections be prepared;

(4) preparation and use of standardized inspection reports to record the findings of all ROW and vegetation inspections;

(5) the preparation and use of standardized reports of all ROW maintenance and vegetation treatments. Reports must include the type, location, acreage, and date of all mechanical, chemical or other treatments; and

(6) retention, for three years, of herbicide application reports, and retention, for a period to coincide with the maintenance cycle of the company, of ROW inspection dates, maintenance schedules and maintenance activities for each ROW in the transmission system. Maintenance information may be summarized on an annual basis and recorded on the permanent record for each transmission facility.

(b) It is the commission's intention by imposing these requirements to allow the utilities to develop their own ROW maintenance programs, but yet ensure that adequate records are maintained so that staff of the department may periodically examine them and report to the commission if they find that ROW vegetation treatment is being postponed or deferred to the extent that it threatens either the performance of the line during emergencies or attainment of the goals of the long-range ROW management plan.

.SO DOC 16A-85-1.0

NYCRR

EXPLANATION: Matter in braces {} is superscript

Section 85-1.0 Definitions. As used in this Subpart, unless the context
requires otherwise:

(a) applicant means a person who files any NOI or application;

(b) application means a document filed under section 85-1.3 of this
Subpart;

(c) EM&CS&P means environmental management and construction standards
and practices filed under section 85-1.2 or 85-1.3 of this Subpart;

(d) fuel gas transmission line (line) means a pipeline extending a
distance of 1,000 feet or more, to be used to transport fuel gas at
pressures of 125 psig or more, excluding appurtenant facilities, {1} but
shall not include any such transmission line which is located wholly
underground in a city, or wholly within the right-of-way of a State,
county or town highway or village street, as those terms as defined in
article one of the Highway Law and article six of the village law, or
which replaces an existing transmission line, including appurtenant
facilities, and extends a distance of less than one mile;

(e) municipality means a county, city, town or village;

(f) NOI means a notice of intention filed under section 85-1.2 of this
Subpart;

(g) person means any individual, corporation, public benefit
corporation, political subdivision, governmental agency, municipality,
partnership, cooperative association, trust or estate;

(h) pipeline means a line which transports gas at any pressure;

(i) psig means pounds per square inch gauge;

- (j) PSL means the New York Public Service Law; and
- (k) R/W means right-of-way, which is an easement-acquired or fee-owned corridor in which a gas transmission facility is located.

FOOTNOTE: {1} Appurtenant facilities are defined in Public Service Law, section 120(4).

.SO DOC 16A-85-1.1

NYCRR

85-1.1 Environmental management and construction standards and practices.

All persons who intend to construct fuel gas transmission lines as described in this Subpart shall:

- (a) file in accordance with the requirements of § 3.5 of this Title, the EM&CS&P that will be followed to protect and minimize impact to the environment during installation and maintenance of all such lines; and
- (b) file in accordance with the requirements of § 3.5 of this Title, a certified statement agreeing to install and maintain such lines in accordance with EM&CS&P approved by the Commission.

.SO DOC 16A-85-1.2

NYCRR

EXPLANATION: Matter in braces {} is superscript

85-1.2 Filing and service of notices of intention.

(a) Any NOI filed by an applicant to construct a fuel gas transmission line less than five miles long and six inches or less in nominal diameter shall contain:

- (1) the dates on or about which the applicant intends to begin construction of the line;
- (2) a brief statement describing and locating the line (using text and a topographic map at a scale of 1:24,000 -- 1 inch = 2,000 feet -- or larger with legend), including:
 - (i) its length (and the nominal diameter of its segments), including markers required by paragraph 9 of Appendix 14-K of 16 NYCRR Part 255;{3}
 - (ii) depth at which pipe will be buried;
 - (iii) maximum allowable operating pressure (psig);
 - (iv) R/W width;
 - (v) width of any area to be cleared;
 - (vi) any known underground facilities to be crossed or paralleled;{3}
 - (vii) name or permit number of any wells to be connected to the

line;{3}

(viii) the point where the line connects to another pipeline (giving the nominal diameter of such line and the owner's name);{3}

(ix) existing or proposed access roads to be used for construction and maintenance of the line and any associated compressor station;{3}

(x) for any new or expanded compressor station,{3} a site development plan (at a scale of at least 1 inch=20 feet), showing: location; setbacks to property lines; structures (giving profile, materials and finish); grading and landscaping; drainage provisions; number, type, size and model of the compressor(s) and silencer(s); and the materials and design of any noise abatement structures; and

(xi) the name of every municipality in which any portion of the line is to be located;{3}

(3) an indication of which measures and techniques from the approved EM&CS&P to which the applicant has agreed (or any site-specific modification thereof) will be followed in an effort to minimize or avoid adverse environmental impact on sensitive resources affected by the line(s) to the maximum extent practical, which resources include:{4}

(i) existing and officially approved planned residential, commercial, industrial, institutional, recreational and agricultural land uses;{5}

(ii) ecosystem resources, including highly erodible soils,{6} wetlands, flood plains, streams, springs, wells, unique old-growth forests, active sugarbushes, productive timber stands,{7} trees listed in the Registry of Big Trees in New York State and habitats of rare, threatened and endangered species (from wetlands on, these resources can be identified in cooperation with the landowner and the Department of Environmental Conservation);

(iii) officially designated visual resources,{8} including scenic areas, roads, vistas and overlooks; and

(iv) officially designated cultural resources,{8} including archaeological sites and historic districts, places and properties.

(b) The applicant shall file and serve the NOI in accordance with the requirements of § 3.5 of this Title and serve one copy on the chief executive officer of every municipality in which any portion of the line is to be located.{9} Proof of service shall accompany the NOI.

(c) If an applicant wishes to construct and operate a line without obtaining a permit from any other State agency, municipality or agency thereof, the NOI shall contain, in addition to the information required by subdivision (a) of this section:

(1) a request that the line(s) included in it be reviewed under § 121-2(7) of the Public Service Law;

(2) a list of applicable State and local laws and regulations issued thereunder, including copies of any local ordinance, law, resolution or other action, any regulation issued thereunder, or any local standard or requirement that, as applied to the line, the applicant believes to be unreasonably restrictive in view of the existing technology, factors of cost or economics or the needs of consumers;{10} and

(3) a request that the commission make the determination set forth in § 126(1)(f) of the Public Service Law.

(d) If the NOI contains the request set forth in paragraph (c)(1) of this section, the applicant shall serve one copy on each State agency which has the authority to administer and enforce compliance with any legal provision cited in response to the requirement of paragraph (c)(2) of this section. The applicant shall serve the Commissioner unless an agency has regional offices; in such case, a copy shall also be sent also to the regional office. {11} Proof of service shall accompany the NOI.

{3} This item shall be shown on the map, which shall cover the entire project area.

{4} The applicant shall provide the name, title and qualifications of the company representatives directly responsible for seeing that all environmental requirements are fully met.

{5} Concerning agricultural land use, the applicant shall, in cooperation with the landowner(s) and Soil and Water Conservation District, consider both active and inactive fields. Active and inactive fields, by definition, are cropland, rotation hayland and cropland, hayland, livestock grazing areas, orchards and vineyards. The applicant shall also identify those areas containing practices for agricultural resources management, including strip-cropping, diversion terraces, underground tile drain lines, surface drainage ditches, and waste management conveyance and storage systems.

{6} To aid in the selection of measures and techniques for minimizing adverse environmental impact on the soil's resource, the applicant should contact the county office of the U.S. Department of Agriculture, Soil Conservation Service, to identify the soil type(s) and slope(s) and respective limitations, including the depth of the topsoil, depth from surface to bedrock, and soil drainability.

{7} Productive timber stands are viable or potential commercial forest stands composed of saplings (0-5 inches in diameter), poles (6-11

inches in diameter- and/or mature trees (12 inches plus in diameter).

- {8} Designated and listed by the State, county, town, city or incorporated village. This includes listings by the State Historic Preservation Officer and the National and State Registers for historic and cultural sites.
- {9} Provision of additional copies directly to county and town planners, and county, town, city or village highway superintendents, will expedite the certification process.
- {10} To satisfy this requirement, a list of State and local permits will usually be sufficient. This list might include wetland permits, stream-crossing permits, road-crossing permits, or any other State or municipal permit. The applicant's filing of a road-crossing permit form with the Department of Transportation does not alter the commission's jurisdiction as the ultimate decisionmaking authority with respect to the siting of fuel gas transmission lines.
- {11} Before filing copies with the commission, the applicant should contact the appropriate regional office to obtain the name and address of the official who should be served.

.SO DOC 16A-85-1.3

NYCRR

EXPLANATION: Matter in braces {} is superscript

85-1.3 Filing and service of applications.

(a) An application to construct a fuel gas transmission line which is less than 10 miles long, other than as described in § 85-1.2(a) of this Subpart, or section 120(2) of the Public Service Law, shall contain:

- (1) the information required by:
 - (i) § 85-1.2(a) of this Subpart; and
 - (ii) § 85-1.2(c)(2) of this Subpart;
- (2) a description using text and detailed construction-type map (at a scale of 1 inch = 400 feet, or larger) showing the centerline and the specific relationship of the line to such features as:
 - (i) sensitive resources which will be affected by the line, as defined in § 85-1.2(a)(3) of this Subpart;
 - (ii) property boundaries, fences, walls and hedgerows to be crossed; and
 - (iii) any dwelling within 150 feet;
- (3) a statement explaining the need for the line, including:
 - (i) a demonstration that a market{12} (or specific purchaser) for the gas will exist;
 - (ii) where the applicant will serve retail customers, a demonstration

that gas supplies will be adequate to serve existing and potential consumers during the first 10 years of the line's operation; and

(iii) a showing (if well-drilling is not contemplated in conjunction with the line) of the improvements in system reliability, capability, safety or benefits offered by the line; and

(4) any other information the applicant considers relevant.

(b) The applicant shall file and serve the application, in accordance with the requirements of § 3.5 of this Title and serve one copy each on:

(1) the central office and the appropriate regional offices of:

(i) the Department of Environmental Conservation;{13} and

(ii) the Department of Transportation;{13}

(2) the Commissioner of Agriculture and Markets;

(3) the State Archaeologist;

(4) the State Historic Preservation Officer;

(5) any other State agency which has authority to administer and enforce compliance with any legal provision listed in response to the requirement of subparagraph (a)(1)(ii) of this section; and

(6) the chief executive officer of every municipality in which any portion of the line is to be located.{14}

(c) Proof of service shall accompany the application.

{12} Where such a demonstration is made in another proceeding, either before this Commission or the Federal Energy Regulatory Commission, that demonstration may be supplied.

{13} Before serving copies, the applicant should contact the appropriate regional office to obtain the name and address of the official who should be serviced.

{14} Provision of additional copies directly to county and town planners, and county, town, city or village highway superintendents, will expedite the certification process.

.SO DOC 16A-85-1.4

NYCRR

EXPLANATION: Matter in braces {} is superscript

85-1.4 Determination of line length and system configuration. (a) In calculating the length of a line to determine whether an application or NOI should be filed:

(1) the length of a well line shall be measured from the trap or separator at the well to the point at which the gas being transported from the well commingles with other gas; and

(2) the length of any other line shall be measured from the point at which gas leaves one pipeline to the point at which it enters another

pipeline.

(b) Any NOI or application shall include every line then planned for a proposed system. A system includes all lines tying into a common point leading to market, which is usually a meter site, but may be a regulator station or compressor site. The type of document submitted will be determined by the length of the longest line included. {15}

{15} FOOTNOTE: The document filed should include a map showing all lines anticipated to be part of a given system, even though not proposed for construction at the time of the current filing.

.SO DOC 16A-85-1.5

NYCRR

85-1.5 Determination of noncompliance. If any NOI or application filed pursuant to section 85-1.2 or 85-1.3 of this Subpart fails to comply in whole or in part with the applicable provisions of the Public Service Law and these regulations, the commission or its designee will, within 14 days of receipt, advise the applicant of the noncompliance and how to comply.

.SO DOC 16A-85-1.6

NYCRR

85-1.6 Review of notices of intention. (a) Upon receipt of any NOI that complies with section 85-1.2 of this Subpart and which does not contain a request that it be reviewed under section 85-1.7 of this Subpart, the commission will determine, within 30 days of filing, whether there is a substantial public interest which requires the line(s) to be reviewed under section 85-1.7.

(b) If the commission determines that review under section 86-1.7 of this Subpart is not required, it will certify the proposed line. Failure to act within 30 days will constitute a certificate.

(c) If the commission determines that review of any line(s) is required under section 85-1.7 of this Subpart, it will conduct such review, serving copies of the NOI on other appropriate persons.

(d) If any NOI complies with section 85 1.2 of this Subpart, and contains a request that it be reviewed under section 85-1.7 of this Subpart, a substantial public interest will be deemed to exist and the commission will review the line under section 85-1.7.

.SO DOC 16A-85-1.7

NYCRR

85-1.7 Review of applications. (a) Any person may file comments with the commission on any application. The record of the certification

proceeding may be limited to the application, any comments thereon filed within 15 days of the date of service thereof, and any report by the staff of the Department of Public Service.

(b) The parties to the certification proceeding shall include the applicant and all persons served with a copy of the application or NOI reviewed under this section.

.SO DOC 16A-85-2.1

NYCRR

Section 85-2.1 Definitions.

As used in this Subchapter, other than in Subpart 85-1:

(a) The term municipality means a county, city, town or village in this State.

(b) The term secretary means the Secretary to the Public Service Commission.

(c) The term person means any individual, corporation, public benefit corporation, political subdivision, governmental agency, municipality, partnership, cooperative association, trust or estate.

(d) The term certificate means a certificate of environmental compatibility and public need.

(e) The term facility or transmission facility means:

(1) an electric transmission facility (including associated equipment) with a design capacity of:

(i) 125 kilovolts or more, to extend a distance of one mile or more; or

(ii) 100 kilovolts or more, but less than 125 kilovolts, to extend a distance of 10 miles or more; or

(2) a fuel gas transmission line extending a distance of 1,000 feet or more, to be used to transport fuel gas at pressures of 125 pounds per square inch or more, excluding appurtenant facilities.

The term facility or transmission facility does not include any electric transmission line located wholly underground in a city with a population in excess of 125,000, or a primary transmission line (as such term is used in the Federal Power Act (16 U.S.C. 791--a-828c)) approved by the Federal Energy Regulatory Commission in connection with a hydroelectric facility or any fuel gas transmission line that is located wholly underground in a city or wholly within the right-of-way of a state, county or town highway or village street (as those terms are defined in article 1 of the Highway Law and article 6 of the Village Law), or that replaces an existing transmission line, including appurtenant facilities, and extends a distance of less than one mile.

(f) The term application means the application form required by section 85-2.8 of this Subpart.

(g) The term appurtenant facilities means installations (excluding gas compressors) that are merely auxiliary or appurtenant to a fuel gas transmission line, such as: valves; drips; measuring and regulating equipment; yard and station piping; cathodic protection equipment; gas cleaning, cooling and dehydration equipment; residual refining equipment; water pumping, treatment and cooling equipment; electrical and communication equipment; and buildings.

.SO DOC 16A-85-2.2

NYCRR

85-2.2 Materials required for filing.

(a) A filing for a certificate shall contain:

(1) the application;

(2) the exhibits and information required by statute and these regulations;

(3) the testimony, in written form, and exhibits which will comprise the applicant's direct case in support of its application; and

(4) any additional information which the applicant deems necessary or

desirable.

(b) At the time the applicant presents its filing to the Secretary, the applicant shall submit in accordance with the requirements of § 3.5 of this Title. The commission or its staff may request additional copies of the filing at any time.

.SO DOC 16A-85-2.3

NYCRR

85-2.3 Acceptance, amendment or rejection of a filing.

(a) A filing shall be given a case number for tracking purposes when received by the secretary. The commission shall fix a date for commencing a public hearing:

(1) on a filing with respect to an electric transmission facility, not less than 60 nor more than 90 days after it complies with section 122 of the Public Service Law; and

(2) on a filing with respect to a gas transmission facility 10 or more miles long, not less than 20 nor more than 60 days after it complies with section 122 of the Public Service Law.

(b) Acceptance of a filing by the secretary shall not constitute a waiver of any failure to comply with the requirements of these regulations. The commission may, at any time, reject all or any part of a filing that does not conform to the requirements of these regulations.

(c) If all of the information required by these regulations is not available at the time of the filing, the applicant may petition the commission for permission to submit the unavailable information at a specified future date. Such date shall be before the date upon which the hearing is concluded. The commission may grant such a petition in whole or in part, or it may defer the matter, in whole or in part, for decision by the presiding officer.

.SO DOC 16A-85-2.4

NYCRR

85-2.4 Fund for municipal and other parties.

(a) Each application that proposes an electric transmission facility of 125kV or more shall, at the time it is provided to the Secretary, be accompanied by a fee in the amount specified herein:

(1) if the proposed route for the facility is greater than 100.0 miles in length, \$450,000;

(2) if the proposed route for the facility is greater than 50.0 and up to 100.0 miles in length, \$350,000;

(3) if the proposed route for the facility would require a new right-of-way for 10.0% or more of its length and is from 10.0 to 50.0 miles long, \$100,000; and

(4) if the proposed route for the facility would use an existing right-of-way for more than 90.0% of its length and is from 10.0 to 50.0

miles long, \$50,000.

(b) Any municipality or other party (except an applicant) may request funds to defray expenses for expert witness, consultant, administrative and legal fees (other than in connection with judicial review). Requests for funds shall be submitted to the presiding officer not later than 15 days after the issuance of a notice of the initial prehearing conference, unless otherwise specified by the presiding officer.

(c) Subject to the availability of funds, the presiding officer may fix additional dates for submission of fund requests.

(d) Each request for funds shall be submitted to the presiding officer, with copies to the other parties to the proceeding, and contain:

(1) a statement of the number of persons and the nature of the interests the requesting party represents;

(2) a statement of the availability of funds from the resources of the requesting party and from other sources and of the efforts that have been made to obtain such funds;

(3) if the requesting party represents owners or occupants of real property, the location of such real property in relation to the route proposed for the facility and any alternative route specified as reasonable in the application;

(4) the amount of funds being sought;

(5) to the extent possible, the name and qualifications of each expert to be employed;

(6) if known, the name of any other party who may, or is intending to, employ such expert;

(7) a detailed statement of the services to be provided by expert witnesses, consultants or others (and the basis for the fees requested), specifying how such services will contribute to a complete record leading to an informed decision as to the appropriateness of the facility and route;

(8) a statement as to the result of any effort made to encourage the applicant to perform any proposed studies or evaluations and the reason it is believed that an independent study is necessary; and

(9) a copy of any contract or agreement or proposed contract or agreement with each expert witness, consultant or other person.

(e) At any conference held to consider fund requests, the presiding officer shall discuss the award of funds and encourage the consolidation of requests.

(f) Not later than 15 days after the close of the initial prehearing conference, the presiding officer shall make an initial award of funds,

and from time to time thereafter may make additional awards of funds, in relation to the potential for such awards to make a contribution to a complete record leading to an informed decision as to the appropriateness of the facility and route.

(g) If after its filing the application is amended in a manner that warrants substantial additional scrutiny, the Commission may require the applicant to pay an additional intervenor fee in an amount not to exceed \$125,000, and the presiding officer may make additional awards of funds, in relation to the potential for such awards to make a contribution to a complete record leading to an informed decision as to the appropriateness of the facility and route.

(h) The presiding officer shall ultimately award, on an equitable basis, at least 50% of the funds to municipalities and up to 50% to other parties whose requests comply with the provisions of subdivisions (b) and (d) of this section, so long as the funds will contribute to a complete record leading to an informed decision as to the appropriateness of the transmission facility and route and facilitate broad public participation in the proceeding.

(i) The fee submitted with each application, as well as any fee required to be submitted when an application is amended, shall be deposited in an intervenor account, established pursuant to Section 97-tt of the State Finance Law.

(j) On a quarterly basis, unless otherwise required by the presiding officer, any municipality or other party receiving an award of funds shall:

- (1) provide an accounting of the monies that have been spent; and
- (2) submit a report to the presiding officer showing:
 - (i) the results of any studies conducted using such funds;
 - (ii) whether the purpose for which the funds were awarded has been achieved;
 - (iii) if the purpose for which the funds were awarded has not been achieved, whether reasonable progress toward the goal for which the funds were awarded is being achieved and why further expenditures are warranted.

(k) Where it appears warranted, the presiding officer may incorporate the reports referred to in subdivision (j) of this section into the hearing record as public statements.

(l) Disbursements from the intervenor account to municipal and other parties shall be made by the Department of Public Service upon audit and warrant of the Comptroller of the State on vouchers approved by the Chairman or a designee. Before any funds may be disbursed to a

municipality or other party, such party must enter into a local assistance contract with the Department of Public Service. Vouchers prepared pursuant to such local assistance contract must be submitted for payment not later than six months after any withdrawal of an application or the Commission's final decision on an application (including a decision on rehearing, if applicable). Any funds that have not been disbursed shall be returned to the applicant after the Commission's final decision on an application (including any decision on rehearing or on remand following a court order, if applicable) has been made. If an application has been withdrawn, any funds remaining shall be returned within a reasonable time.

.SO DOC 16A-85-2.5

NYCRR

85-2.5 Additional information.

(a) Upon request of the commission or the presiding officer, the applicant shall submit such additional information as may be specified.

(b) Upon the motion of any party or of staff counsel, or upon its own motion, the commission may order an applicant to provide such additional information as the commission deems necessary or desirable. A motion to the commission under this subdivision shall clearly state the additional information sought and the reasons such information is necessary or desirable.

(c) The commission may, upon the motion of any party or of staff counsel, or upon its own motion, dismiss the filing of an applicant who fails to comply with an order to supply additional information.

(d) When a filing is set for hearing, any motion for additional information shall be addressed to the presiding officer.

.SO DOC 16A-85-2.6

NYCRR

85-2.6 Consultation with staff. Applicants, other parties, and all interested groups and persons are invited and encouraged to confer on an informal basis with the staff of the commission with respect to any matter related to a filing or proposed filing. Except as expressly provided to the contrary, neither an applicant, other party, interested group or person, nor the commission staff, shall be bound by any statement made during the course of such informal consultation. The commission shall not be bound without its consent.

.SO DOC 16A-85-2.7

NYCRR

85-2.7 Incorporation by reference.

Any party or staff counsel may move to incorporate by reference information contained in any filing with this commission, or contained in any other public document. When incorporating by reference, a party or staff counsel shall clearly identify the material to be incorporated.

A party shall supply to the commission, upon request, additional copies of any material incorporated by reference.

.SO DOC 16A-85-2.8 NYCRR

85-2.8 Content of application. An application for a certificate shall contain:

- (a) a description of the proposed facility;
- (b) a statement of the location of the proposed site or right-of-way;
- (c) a summary and description of any studies which have been made of the environmental impact of the proposed project;
- (d) a statement explaining the need for the proposed facility;
- (e) a description of any reasonable alternate locations or routes for the proposed facility, including a description of the comparative merits and detriments of each location or route and a statement explaining why the primary location or route is best suited for the proposed facility; and
- (f) such other information as the applicant deems necessary or desirable.

.SO DOC 16A-85-2.9 NYCRR

85-2.9 Filing and content of applications for electric transmission facilities in national interest electric transmission corridors.

An application seeking approval of an electric transmission facility in a national interest electric transmission corridor as designated by the Secretary of the U.S. Department of Energy pursuant to section 216 of the Federal Power Act (16 U.S.C. section 824p) is considered filed on a date set forth in a letter to the applicant from the secretary, namely, the date of receipt of the application and any supplemental information necessary to bring it into compliance with all the following requirements, except any such requirements where the commission has granted permission to submit unavailable information at a future specified date pursuant to section 85-2.3(c) of this Subpart or which the commission has waived pursuant to section 85-3.3 of this Title:

- (a) section 122 of the Public Service Law;
- (b) sections 85-2.2 and 85-2.8 of this Subpart;
- (c) Part 86 of this Subchapter, except that an application for the overhead portion of a transmission facility need not contain the information required by:
 - (1) section 86.3(a)(1)(i) of this Title, so long as recent edition topographic maps (at a scale of 1:24,000) for an area of at least five miles on either side of the proposed centerline are included in Exhibit 2 of this application;
 - (2) section 86.3(a)(1)(iii) of this Title, as long as Exhibit 2 maps

show any known geologic, historic or scenic area, park, or untouched wilderness within three miles on either side of the proposed centerline;

(3) section 86.3(a)(2)(i)-(iv) of this Title, so long as Exhibit 2 maps show the relationship of the proposed facility to interconnected electric systems;

(4) section 86.3(b) of this Title, so long as all Exhibit 2 aerial photographs reflect the current situation and specify the source and date of the photography; and

(5) section 86.4(b) of this Title, so long as recent edition topographic maps (at a scale of 1:24,000) are included in Exhibit 3 of the application and indicate any alternative route considered;

(d) Part 86 of this Subchapter, except that an application for the underground portion of a transmission facility need not contain the information required by:

(1) section 86.3(a)(1)(i) of this Title, so long as recent edition topographic maps (at a scale of 1:24,000) for an area of at least one mile on either side of the proposed centerline area included in Exhibit 2 of this application;

(2) section 86.3(a)(1)(iii) of this Title, so long as Exhibit 2 maps show any known geologic, historic or scenic area, park, or untouched wilderness within one mile on either side of the proposed centerline;

(3) section 86.3(a)(2)(i)-(iv) of this Title, so long as Exhibit 2 maps show the relationship of the proposed facility to interconnected electric systems;

(4) section 86.3(b)(2) of this Title, so long as all Exhibit 2 aerial photographs reflect the current situation and specify the source and date of the photography; and

(5) section 86.4(b) of this Title, so long as recent edition topographic maps (at a scale of 1:24,000) are included in Exhibit 3 of the application and indicate any alternative route considered;

(e) Part 86 of this Subchapter, except that an application for the submarine portion of a transmission facility need not contain the information required by:

(1) section 86.3(a)(1)(i) of this Title, so long as recent edition nautical charts (published by the U.S. Department of Commerce, National Oceanic and Atmospheric Administration) depicting the location of the proposed facility are included in Exhibit 2 of this application;

(2) section 86.3(a)(1)(iii) of this Title, so long as Exhibit 2 nautical charts show any known historic resource within one mile on either side of the proposed centerline;

(3) section 86.3(a)(2)(i)-(iv) of this Title, so long as Exhibit 2

maps show the relationship of the proposed facility to interconnected electric systems;

(4) section 86.3(b)(2) of this Title; and

(5) section 86.4(b) of this Title, so long as recent edition nautical charts are included in Exhibit 3 of the application and indicate any alternative route considered;

(f) Part 86 of this Subchapter, except that an application containing a certified statement that the transmission facility discussed therein will not be proposed for inclusion in utility rate base (either directly or indirectly through a contractual arrangement with a regulated utility) need not contain the information required by section 86.10 of this title; provided, however, that if a regulated rate is sought after the filing of the application, the applicant shall provide the information required by that section; and provided further that, if an applicant raises the issue of the cost of a particular alternative as a disadvantage, it shall provide sufficient cost information to enable a comparison to be made between the proposed facility and such alternative; and

(g) Part 88 of this Subchapter.

.SO DOC 16A-85-2.10

NYCRR

85-2.10 Notice of application.

(a) A filing shall be accompanied by proof of service of a copy of the filing on:

(1) each municipality in which any portion of the facility is to be located, both as primarily and alternatively proposed;

(2) the Commissioner of Environmental Conservation;

(3) the Commissioner of Economic Development;

(4) the Commissioner of Agriculture and Markets;

(5) the Secretary of State;

(6) each member of the New York State Legislature through whose district any part of the facility, as primarily or alternatively proposed, would pass;

(7) the Commission of Parks, Recreation and Historic Preservation;

(8) in the event any portion of the proposed facility is located within its jurisdiction, the St. Lawrence - Eastern Ontario Commission; and

(9) in the event any portion of the proposed facility is located within its geographical jurisdiction, the Department of Transportation, the Adirondack Park Agency, and any other State agency having authority over the location of any portion of the proposed facility.

(b) Service upon a municipality under paragraph (a)(1) of this section

shall be addressed to the chief executive officer of the municipality and shall specify the date on or about which the filing is to be made.

(c) A filing shall be accompanied by a statement of the notice of the filing given to persons residing in municipalities on whom a copy of the filing is required to be served under paragraph (a)(1) of this section. An applicant shall, as minimum notice under this subdivision, publish once a week for two consecutive weeks prior to the filing, in a newspaper or newspapers of general circulation in all the areas through which the facility would pass, both as primarily and alternatively proposed:

- (1) a brief description of the proposed facility;
- (2) the location of the proposed right-of-way; and
- (3) the date on or about which the filing will be made.

(d) The presiding officer shall serve the applicant with a list of those persons who, in addition to those listed in subdivision (a) of this section, have become parties to the proceeding as provided in section 85-2.11(b)(2) of this Subpart. The applicant shall, within 10 days of the date of service of said list, serve a copy of the filing on each such person, and file proof of service thereof with the secretary.

.SO DOC 16A-85-2.11

NYCRR

85-2.11 Participation and intervention.

(a) The parties to a certification proceeding shall include the applicant and such of the following as make timely application for participation:

- (1) the Department of Environmental Conservation;
- (2) the Department of Economic Development;
- (3) the Department of State;
- (4) the Department of Agriculture and Markets;
- (5) the Office of Parks, Recreation and Historic Preservation;
- (6) where any portion of the facility or of any alternative is to be located within its jurisdiction, the Tug Hill Commission;
- (7) where any portion of the facility or of any alternative, is to be located within the Adirondack Park, as defined in section 9-0101(1) of the Environmental Conservation Law, the Adirondack Park Agency;
- (8) the Department of Transportation;
- (9) any municipality entitled to receive notice under section 85-2.10(a)(1) of this Subpart;
- (10) any individual resident in a municipality entitled to receive notice under section 85-2.10(a)(1) of this Subpart; and
- (11) any domestic nonprofit corporation or association, formed in whole or in part:

- (i) to promote conservation or natural beauty;
- (ii) to protect the environment, personal health or other biological values;
- (iii) to preserve historic sites;
- (iv) to promote consumer interests;
- (v) to represent the interests of commercial and industrial groups; or
- (vi) to promote the orderly development of the areas in which the facility is proposed to be located.

(b)(1) A person or organization listed in paragraphs (a)(1)-(8) of this section may participate in a certification proceeding by filing with the secretary a notice of intent to be a party at least five days prior to the date of the first scheduled hearing in the proceeding.

(2) A person or organization listed in paragraphs (a)(9)-(11) of this section may participate in a certification proceeding by filing with the secretary a notice of intent to be a party within 30 days after the date given in the published notice as the date for filing of the application.

(c) (1) In its notice of intent to be a party, a person or organization listed in subdivision (a) of this section should state its name, address, telephone number, telecopier machine number, e-mail address, the name of its attorney or qualified representative upon whom service should be made, and the basis upon which it claims to be a party.

(2) Requests for permission to intervene in a certification proceeding made by persons or organizations not listed in subdivision (a) of this section should contain the information specified in paragraph (1) of this subdivision, as well as an explanation of how such intervention would be likely to contribute to the development of a complete record or why it would otherwise be fair and in the public interest. Such requests shall be governed by the provisions of section 4.3(c) of this Title.

(d)(1) Any person or organization may petition the commission to intervene in a certification proceeding within the time specified in paragraph (b) (2) of this section, and may be allowed by the hearing examiner to participate in the proceedings if such person or organization has an interest in the proceedings, or if his participation would contribute to the appropriate resolution of the proceeding. That petition should state the name, address, telephone number, the name of the attorney or qualified representative upon whom service should be made, and the interest of the intervenor in the proceeding, and the reason for intervention. A petition for intervention shall be served upon all parties specified in paragraphs (a) (1)-(7) of this section, the executive secretary and staff counsel.

(2) Any party to the proceeding, or staff counsel, may file an answer to a petition to intervene within 10 days after the date of service of the petition. Any objection to intervention may also be made to the examiner at the first hearing. Replies to such objections may be filed with the executive secretary only if the commission so requests, or if requested or allowed by the hearing examiner.

(e) Any person who fails to comply with subdivision (b) of this section may petition for late intervention. If the hearing examiner has not issued his proposed report, such petitions shall be addressed to him. Denial of a petition for late intervention may be appealed within 10 days to the commission. After service of the hearing examiner's report, such petitions shall be addressed to the commission.

(f) The commission or hearing examiner may condition the granting of a petition for intervention or late intervention upon such terms as are just and necessary.

.SO DOC 16A-85-2.12

NYCRR

85-2.12 Service of documents.

(a) The service of documents upon parties in a certification proceeding shall be governed by section 4.3(b)(2) of this Title.

(b) Unless a party otherwise requests, the names and addresses of parties shall be placed on the secretary's service list.

(c) Briefs to the hearing examiner, unless he rules otherwise, shall be served on all parties, and briefs addressed to the commission shall be served on all parties. Unless the hearing examiner rules otherwise, other pleadings and documents shall be served only on parties directly affected or requesting them as provided in subdivision (a) of this section.

(d) Any party or staff counsel may, by motion to the hearing examiner, challenge the need of any party for all filings in the proceeding. An adverse ruling by the hearing examiner may be appealed to the commission within 10 days. Pending the determination of such appeal, the party whose need for all filings is contested shall receive all filings.

.SO DOC 16A-85-2.13

NYCRR

85-2.13 Consideration of issues.

Upon the motion of any party or of staff counsel, or upon its own motion, the commission may provide that any issue or issues raised by a filing be severed from other issues and decided separately. When an application has been set for hearing, such motion shall be addressed to the presiding officer.

.SO DOC 16A-85-2.14

NYCRR

85-2.14 Consolidation of the presentations of parties.

(a) The consolidation of the presentations of parties with similar interests shall be governed by section 4.3(b)(3) of this Title; provided, however, that the presiding officer may not require the consolidation of the representation of governmental bodies or agencies.

.SO DOC 16A-85-2.15 NYCRR

85-2.15 Dismissal of an application.

Whenever it shall appear that the statutory requirements for a certificate cannot be met, the commission may dismiss the application and terminate the proceedings upon the motion of any party or staff counsel, or upon its own motion.

.SO DOC 16A-85-2.16 NYCRR

85-2.16 Noncontested proceedings.

(a)(1) Upon the motion of any applicant, the commission may, where it appears to be in the public interest, order that the public hearing required by section 123 of the Public Service Law on an application for a certificate for an underground transmission facility or for an overhead transmission facility to be constructed on substantially the same right-of-way as an existing facility that is to be replaced be held before the commission on the application, exhibits, prepared testimony, and any other information filed by the applicant and any prepared testimony, information, or papers filed by any party or staff counsel, without oral testimony.

(2) A motion by an applicant for an expedited proceeding under paragraph (1) of this subdivision, shall be made at the time it files its application for a certificate or within 20 days thereafter. The applicant shall serve a copy of the motion for an expedited proceeding and the public notice required by paragraph (3) of this subdivision on each person or municipality entitled to service of a copy of the filing under section 85-2.10 of this Subpart.

(3) Not less than 30 nor more than 40 days after the date on which it files its application for a certificate, an applicant moving under paragraph (1) of this subdivision shall publish in a newspaper or newspapers of general circulation, in all the areas traversed by the proposed facility, a notice:

(i) briefly describing the proposed facility and the location of the proposed right-of-way;

(ii) stating that the applicant has moved that the public hearing required by section 123 of the Public Service Law be held before the commission on the basis of application, exhibits, prepared testimony, and any other information filed by any party or staff counsel, and that oral testimony not be taken; and

(iii) stating that any person opposed to the granting of the certificate should, within 10 days of the date of the publication of the notice, notify in writing the Secretary to the Public Service Commission at Three Empire State Plaza, Albany, NY 12223-1350, of the reasons for opposition.

(4) An applicant moving under paragraph (1) of this subdivision shall file any written consent required under paragraph (b)(3) of this section within 45 days of the date on which the applicant filed its application for a certificate. An applicant who fails to comply with this requirement shall be deemed to have withdrawn its motion for an expedited proceeding.

(b) The commission may grant a motion made under subdivision (a) of this section if:

(1) the applicant has served a copy of its motion and the public notice required upon each person, municipality and agency entitled to service under section 85-2.10(a) of this Subpart;

(2) no person, municipality or agency has filed with the executive secretary, within 10 days of the date of publication of the newspaper notice required by paragraph (a)(3) of this section, a written objection stating substantive reasons for opposition to the granting of such a motion; and

(3) no person or domestic nonprofit corporation or association entitled to become a party to the proceeding, under paragraphs (a)(10)-(11) of section 85-2.11 of this Subpart, has made timely application for participation, or, in the event one or more such persons, corporations or associations has been granted participation, each such person, corporation or association has consented in writing to the granting of the applicant's motion.

(c) If, at the hearing provided by subdivision (a) of this section, the commission finds that there is a substantive basis for opposition to the granting of the certificate, it shall order that the matter be set for further hearings in accordance with this Subpart.

GENERAL EXHIBITS

(Statutory authority: Public Service Law, art. VII)

Sec.

86.1 General requirements

86.2 Exhibit 1: general information regarding application

86.3 Exhibit 2: location of facilities

86.4 Exhibit 3: alternatives

- 86.5 Exhibit 4: environmental impact
- 86.6 Exhibit 5: design drawings
- 86.7 Exhibit 6: economic effects of proposed facility
- 86.8 Exhibit 7: local ordinances
- 86.9 Exhibit 8: other pending filings
- 86.10 Exhibit 9: cost of proposed facility

.SO DOC 16A-86.1 NYCRR

Section 86.1 General requirements. Each exhibit shall contain:

- (a) a title page showing:
 - (1) the applicant's name;
 - (2) the title of the exhibit; and
 - (3) the proper designation of the exhibit; and
- (b) if consisting of 10 or more pages, a table of contents citing, by page and section number or subdivision, the component elements or matters contained in the exhibit.

.SO DOC 16A-86.2 NYCRR

86.2 Exhibit 1: general information regarding application.

- (a) A corporate applicant shall state:
 - (1) name;
 - (2) address;
 - (3) telephone number; and
 - (4) the name and business address of the principal officer of the applicant.
- (b) A noncorporate applicant shall provide information similar or equivalent to the information required of a corporate applicant under subdivision (a) of this section.
- (c) If the applicant desires service of a document or other correspondence upon an agent, Exhibit I shall so state, giving the name, address and telephone number of the agent for service.

.SO DOC 16A-86.3 NYCRR

86.3 Exhibit 2: location of facilities.

- (a) The applicant shall submit detailed maps, drawings and explanations showing the right-of-way for each proposed facility. Such maps, drawings and explanations shall include:
 - (1) New York State Department of Transportation maps (1:24,000 topographic edition), showing:
 - (i) the proposed right-of-way (with control points indicated), covering an area of at least five miles on either side of the proposed facility location;
 - (ii) where the construction or reconstruction of the proposed facility would necessitate permanent clearing or other changes to the topography,

vegetation or man-made structures.

(iii) any known archaeological, geologic, historical or scenic area, park or untouched wilderness on or within three miles of the right-of-way;

(2) New York State Department of Transportation maps (scale 1:250,000) showing the relationship of the proposed facility to the applicant's overall system with respect to:

(i) the location, length and capacity of the proposed facility, and of any existing facility related to the proposed facility;

(ii) the location and function of any structure to be built on, or adjacent to, the right-of-way;

(iii) the location and designation of each point of connection between an existing and proposed facility; and

(iv) nearby, crossing or connecting rights-of-way or facilities of other utilities.

(b)(1) The applicant shall submit black-and-white or color aerial photographs of such coverage to show at least 1,200 feet on each side of the proposed right-of-way, and of such scale and detail to enable discrimination and identification of all natural and cultural features.

Such aerial photographs shall include overlays:

(i) clearly identifying the proposed right-of-way;

(ii) showing where the construction of the proposed facility would necessitate permanent clearing or other changes to the topography, vegetation or man-made structures;

(iii) showing the location of access and maintenance routes; and

(iv) showing the location of the facility on the right-of-way.

(2) Aerial photographs shall reflect the current situation. Aerial photographs of urban areas and urbanizing fringe areas shall be taken within six months of the date of filing. All aerial photographs shall indicate by whom and on what date the photographs were taken.

.SO DOC 16A-86.4

NYCRR

86.4 Exhibit 3: alternatives. (a) The applicant shall submit a statement explaining what consideration, if any, was given to:

(1) any alternative route;

(2) the expansion of any existing right of-way of the applicant or of another;

(3) any alternate method which would fulfill the energy requirements with comparable costs. Such statement shall include the comparative advantages and disadvantages of any alternative considered.

(b) The applicant shall, on New York State Department of Transportation maps, indicate any alternative route considered.

86.5 Exhibit 4: environmental impact. (a) The applicant shall submit a statement describing any study which has been made of the impact of the proposed facility on the environment. That statement shall include a description of the methods employed in making that study and a summary of its findings.

(b) The applicant shall state:

(1) what changes, if any, the construction and operation of the proposed facility might induce in the physical or biological processes of plant life or wildlife through any permanent or significant temporary change in the hydrology, topography or soil of the area;

(2) what efforts, if any, have been made to assure:

(i) that any right-of-way avoids scenic, recreational and historic areas;

(ii) that any right-of-way will be routed to minimize its visibility from areas of public view;

(iii) that any right-of-way has been planned to avoid heavily timbered areas, high points, ridge lines and steep slopes; and

(iv) that the selection of any proposed right-of-way preserves the natural landscape and minimizes conflict with any present or future planned land use;

(3) what, if any, plans have been formulated to keep any right-of-way clearing to the minimum width necessary to prevent interference of vegetation with the proposed facility;

(4) what, if any, schedule or method of clearing the right-of-way has been formulated to take into account soil stability, protection of natural vegetation, and the protection of adjacent resources (including the protection of any natural habitat for wildlife);

(5) what, if any, plans have been made to protect vegetation and topsoil not cleared, from damage from construction and operation of the facility;

(6) what, if any, provision has been made to protect fish and other aquatic life from harm from the use of explosives or pollutants in or near streams and other bodies of water;

(7) what, if any, pesticide or herbicide will be used in construction or maintenance of the proposed facility (including the volumes and manner of use);

(8) what, if any, plans have been made to locate and design appurtenant structures to minimize the environmental impact of the structures (including visual and noise disturbance); and

(9) what, if any, provisions have been made for cleanup and

restoration of the project area after construction.

(c)(1) If any portion of the proposed facility is to be constructed underground, the applicant shall state what, if any, provisions have been made to avoid clearance of the entire right-of-way. If the clearance proposed will go to the mineral soil, the applicant shall state:

- (i) the width of the clearance;
- (ii) what, if any, provisions have been made for the replacement of topsoil removal during construction;
- (iii) what, if any, provisions have been made for removing excess soil excavated during construction; and
- (iv) what, if any, plans have been made for stabilizing the cleared area with vegetation and erosion control devices.

(2) If any underground portion of the proposed facility will be constructed in or adjacent to a stream or other body of water, the applicant shall state:

- (i) what, if any, plans have been made to prevent erosion of the banks;
- (ii) what, if any, techniques (such as cofferdams) will be used; and
- (iii) what, if any, plans have been made to use the water from such streams or other bodies of water for pipe-testing or other purposes (including volumes of water involved and methods for release of water once used).

.SO DOC 16A-86.6

NYCRR

86.6 Exhibit 5: design drawings. The applicant shall submit design, profile and architectural drawings and descriptions of the proposed facility. Such drawings and descriptions shall include:

- (a) the length, width and height of any structure;
- (b) the material of construction, color and finish; and
- (c) a profile of the centerline of the right-of-way at exaggerated vertical scale.

.SO DOC 16A-86.7

NYCRR

86.7 Exhibit 6: economic effects of proposed facility. The applicant shall submit a statement describing any anticipated effects the construction or operation of the proposed facility may induce in the residential, commercial or industrial land-use patterns of any area adjacent to any portion of the proposed facility.

.SO DOC 16A-86.8

NYCRR

86.8 Exhibit 7: local ordinances.

- (a) The applicant shall submit a list of all local ordinances, laws, resolutions, regulations, standards, and other requirements applicable

to the proposed facility, together with a statement that the location of the facility as proposed conforms to all such local legal provisions, except any that the applicant requests that the commission refuse to apply because, as applied to the proposed facility, such local legal provision is unreasonably restrictive in view of the existing technology, factors of costs or economics, or the needs of consumers whether located inside or outside any particular municipality. If the applicant desires the commission to refuse to apply one or more local legal provisions, it shall submit a statement justifying the request.

(b) The statement of justification shall show that the request cannot be obviated by design changes to the proposed facility, the request is the minimum necessary, and the adverse impacts of granting the request are mitigated to the maximum extent practicable. The statement shall include a demonstration:

(1) for requests grounded in the existing technology, that there are technological limitations (including governmentally imposed technological limitations) related to necessary facility component bulk, layout, process or materials that make compliance by the applicant technically impossible, impracticable or otherwise unreasonable;

(2) for requests grounded in factors of costs or economics (likely involving economic modeling), that the costs to consumers associated with applying the local legal provision outweigh the benefits of applying such provision; and

(3) for requests grounded in the needs of consumers, that the needs of consumers for the facility outweigh the impacts on the community that would result from refusal to apply the local legal provision.

.SO DOC 16A-86.9

NYCRR

86.9 Exhibit 8: other pending filings. The applicant shall state whether it has pending, or knows of others who have pending, with this commission or with any other governmental department or agency (State or Federal), an application or filing which concerns the subject matter of the proceeding before the commission. If one or more such applications or filings is pending, the applicant shall state, for each application or filing pending, whether the granting of any such other application or filing will have any effect on the grant or denial of a certificate, and whether the granting of a certificate will have any effect upon the grant or denial of any such other application or filing.

.SO DOC 16A-86.10

NYCRR

86.10 Exhibit 9: cost of proposed facility. (a) The applicant shall provide a detailed estimate of the total capital costs of the proposed facilities covered by the application. The estimate shall show the

estimated cost of:

- (1) right-of-way;
- (2) surveys;
- (3) materials;
- (4) labor;
- (5) engineering and inspection;
- (6) administrative overhead;
- (7) fees for legal and other services;
- (8) interest during construction; and
- (9) contingencies.

(b)(1) The applicant shall include a brief statement of the source of the information used as the basis for the estimates required by subdivision (a) of this section.

(2) If not stated elsewhere, the applicant shall include data on preliminary bids, if any, for the proposed facilities, and recent experience cost data for similar facilities.

(c) Upon the demand of any party or of staff counsel, the applicant shall supply the work papers from which the estimates required by subdivision (a) of this section were made.

87.4 Exhibit G-4: construction of the facility

.SO DOC 16A-87.1

NYCRR

Section 87.1 Exhibit G-1: total gas supply. The applicant shall submit a statement of the total maximum daily and annual volumes of gas committed to it by contract and the maximum daily and annual volumes of gas available to it from its own peak shaving or local sources.

.SO DOC 16A-87.2

NYCRR

87.2 Exhibit G-2: market data. (a) The applicant shall provide:

(1) an estimate of the increased volumes of gas to be delivered by operation of the proposed pipeline;

(2) an estimate of the volumes of gas delivered to the markets to be generally served by the new pipeline during the three years immediately preceding the filing;

(3) total annual and peak day gas requirements by each classification of service listed in paragraph (4) of this subdivision;

(4) information about total past and expected future curtailment of service by the applicant for each of the following classifications of service:

- (i) residential;
- (ii) commercial;
- (iii) firm industrial;
- (iv) interruptible industrial;
- (v) residential space heating;
- (vi) commercial space heating; and
- (vii) other types of customers; and

(5) the basic factors used in estimated future requirements and the need for the new facilities, including:

- (i) peak-day and annual degree-day deficiencies; and
- (ii) peak-day and annual consumption factors for each class of consumers, with supporting historical data for each major operating district.

(b) The applicant shall supply a copy of each market survey made within the past three years for those markets which are to receive new or increased service from the proposed pipeline.

(c) The applicant shall state the franchise rights of the applicant or other persons to distribute gas in each community in which service is proposed.

.SO DOC 16A-87.3

NYCRR

87.3 Exhibit G-3: revenues; expenses; income.

(a) When the estimated revenues and expenses related to a proposed facility will significantly affect the operating revenues or operating expenses of an applicant, the applicant shall submit:

(1) the system-wide statement for the last year preceding the filing; and

(2) a pro forma system-wide and pro forma incremental statement for each of the first three full years of operation of the proposed facility, showing:

(i) annual revenues and volumes of natural gas, subdivided by classes of service and further subdivided by sales to direct industrial customers, sales to other gas utilities and other sales;

(ii) annual operating expenses, classified in accordance with the commission's Uniform System of Accounts; and

(iii) the annual depreciation, depletion, amortization taxes, utility income, and resulting rate of return on net investment and gas plant,

including working capital.

(b) When the information required by subdivision (a) of this section is not submitted, the applicant shall provide a statement in sufficient detail to show clearly the effect of the proposed facility upon operating revenues and operating expenses, together with an explanation of why the information in subdivision (a) should not be provided.

.SO DOC 16A-87.4

NYCRR

87.4 Exhibit G-4: construction of the facility. (a) The applicant shall submit a flow diagram showing daily design capacity reflecting operating conditions with only existing facilities in operation, and a flow diagram showing daily design capacity and reflecting operating conditions with both proposed and existing facilities in operation. For the portion of the system affected, both flow diagrams shall include:

(1) the diameter (normal outside diameter), wall thickness (normal wall thickness), the length of pipe installed and proposed to be installed, and the diameter and wall thickness of the installed pipe to which the connection is proposed;

(2) the type and grade of pipe;

(3) the method of fabrication;

(4) nominal yield strength and the nominal ultimate strength (psig);

(5) if used pipe is employed, a description of the inspection and reconditioning procedures;

(6) the mill test pressure (psig);

(7) the certified maximum operating pressure (psig);

(8) the calculated hoop stress;

(9) for each proposed new compressor station and existing station:

(i) the size, type and number of compressor units;

(ii) the horsepower installed and proposed to be installed;

(iii) the volume of gas to be used as fuel;

(iv) the suction and discharge pressures; and

(v) the compression ratio; and

(10) the pressure and volumes of gas at:

(i) the main inlet;

(ii) outlet connections;

(iii) each compressor station;

(iv) at each intake and takeoff point at the beginning and terminus of the existing and proposed facilities; and

(v) the intake and takeoff point of the existing facilities to which the proposed facilities are connected.

(b) The design of the proposed pipeline must meet applicable Federal and State standards, including standards set forth in sections

255.10--255.21 of the Gas Utility Regulations and regulations in Chapter III of this Title. The applicant shall state whether the design of the proposed pipeline meets such standards and regulations.

Miscellaneous

PART

89 Notification Requirements

.SO DOC 16A-PT89

NYCRR

PART 89

NOTIFICATION REQUIREMENTS

(Statutory authority: Public Service Law, §§ 20, 66, 80, 89-c, 92)
Sec.

89.1 Public dissemination of tariff filings

89.2 Notice of litigation affecting tariff schedules

89.3 Notification concerning tax refunds

.SO DOC 16A-89.1

NYCRR

Section 89.1 Public dissemination of tariff filings. Any consumer

organization may apply in writing to any utility company subject to the jurisdiction of the commission and request that it be served with a summary of any tariff filings made by such company. Each company shall keep a roster of such requests and at the time of such tariff filing shall serve such summary upon the organizations that have made such written requests.

.SO DOC 16A-89.2 NYCRR

89.2 Notice of litigation affecting tariff schedules. Every utility company subject to the jurisdiction of the commission shall promptly notify the commission of the pendency of any litigation, to which such company is a party, which affects the legality, validity or reasonableness of any provision of its tariff schedule.

.SO DOC 16A-89.3 NYCRR

89.3 Notification concerning tax refunds. (a) Every utility company, and every municipality whose rates for utility service are subject to the jurisdiction of the commission (utility), shall notify the commission, in the manner described in this section, of all tax refunds, including refunds in the form of offsets against the utility's liability to the taxing authority issuing the refund; and including, in the case of municipalities, reductions in the amounts properly chargeable as payments in lieu of taxes. This Part shall be inapplicable to ordinary operating refunds that are not attributable to negotiation or to new legislation, adjudication or rulemaking (such as refunds for overpayment of estimated taxes, and carry-backs of net operating losses and investment tax credits). For purposes of this Part, a refund is deemed to occur when the earlier of the following events occurs, regardless of the possibility of subsequent audit or litigations:

(1) the refund is authorized by decision of a competent agency or court; or

(2) the utility receives it or uses it as an offset to liability.

(b) The utility shall notify the commission within 60 days after the refund occurs if the refund:

(1) exceeds \$1,500,000; or

(2) exceeds \$1,000 and exceeds 0.2 percent of the utility's operating revenues for the most recent calendar year that ends more than four months before the refund occurs.

(c) In determining whether a refund exceeds 0.2 percent of operating revenues for purposes of paragraph (b)(2) of this section:

(1) in the case of a gas, electric, steam or combination utility, operating revenues shall be reduced by the amounts properly chargeable to the functional group of production operation and maintenance expense

accounts;

(2) in the case of a combination utility, the refund shall be deemed to exceed 0.2 percent of operating revenues if, after the refund is allocated among the gas, electric and steam departments in a manner reflecting insofar as possible the extent to which the refund is related to each department's activities, one or more of the portions thus allocated exceeds 0.2 percent of the operating revenues of the department to which it is allocated;

(3) in the case of a water utility, operating revenues shall be reduced by the amounts properly chargeable to the functional groups of source of supply, and pumping operation and maintenance, expense accounts; and

(4) in the case of a telephone utility, operating revenues shall not include interstate revenues.

(d) In determining whether a refund meets the criteria stated in subdivision (b) of this section, multiple refunds shall be treated as a single refund if they share a common cause such as a common act of negotiation, legislation, adjudication or rulemaking.

(e) If a refund does not meet the criteria stated in paragraph (b)(1) or (b)(2) of this section, it shall be reported and itemized in the utility's annual report to the commission for the year in which the refund occurs.

(f) When giving the commission any notification or report pursuant to this Part, the utility also shall either propose a method of distributing to its customers the entire amount refunded, or show why it should not make such a distribution.

CONSUMER DEPOSITS--ELECTRIC CORPORATIONS

(Statutory authority: Public Service Law, §§ 36[3], 66, 80, 89-c, 97, 117)

Sec.

90.1 Records

90.2 Index of consumers

90.3 Interest

90.4 Application of deposit to unpaid bill

90.5 Special provision for residential customers

90.6 Refunds

90.7 Certificate of deposit

90.8 Refund without certificate of deposit

90.9 Circular containing terms of deposit

90.10 Extension of service when deposit is disputed

.SO DOC 16A-90.1 NYCRR

Section 90.1 Records. Each and every electric corporation and gas and electric corporation holding consumer deposits shall keep such records as will show, with respect to each deposit:

- (a) the name of the consumer making the deposit;
- (b) the address (including street and number) of each depositor, if known;
- (c) the date of receipt of the deposit;
- (d) the amount of the deposit;
- (e) the interest accrued upon the deposit to be entered biennially or more frequently;
- (f) all credits of interest made in reduction of amounts billed for service rendered, and the dates of such credits;
- (g) all payments of interest made on each deposit, and the dates of such payments;
- (h) deductions representing sums due and unpaid to the corporation when depositor ceased to be a consumer, and the date thereof, together with such other information as any such corporation may deem necessary to make a complete record of each deposit.

.SO DOC 16A-90.2 NYCRR

90.2 Index of consumers. Each and every electric corporation and gas and electric corporation holding consumer deposits shall keep, in addition to the records prescribed in section 90.1 of this Part, an index or indices, alphabetically or geographically arranged, which shall show at all times the name of each consumer from whom a deposit has been exacted, and whose said deposit or any part thereof remains unpaid, with appropriate reference in such index to the consumer's account.

.SO DOC 16A-90.3 NYCRR

90.3 Interest.

Each and every electric corporation and gas and electric corporation holding consumer deposits shall allow to each depositor simple interest on the amount deposited. The interest rate to be applied to the amount deposited shall be a composite yield of intermediate term, A-rated corporate bonds, as reported in financial publications, less costs of administering deposits of 1.75 per centum per annum. The rate shall be updated effective January 1st each year, based upon yield information available on the first Friday of October of the preceding year. The Commission will issue an advisory letter which publicizes the

information to assure consistency. Each corporation shall credit such interest to each depositor whose deposit shall have been held for one year by paying such interest in cash or deducting it from the amount of a bill for electric service rendered such depositor.

.SO DOC 16A-90.4 NYCRR

90.4 Application of deposit to unpaid bill. Each and every electric corporation and gas and electric corporation holding consumer deposits shall render to each depositor, when and as his deposit is applied to an unpaid bill or bills, a statement showing:

- (a) the bill or bills then due and unpaid;
- (b) the amount thereof;
- (c) the amount of the deposit, together with the interest accrued thereon and the period covered thereby; and
- (d) the balance of the bill or bills remaining unpaid or the balance of the deposit and interest thereon remaining to the credit of the depositor.

.SO DOC 16A-90.5 NYCRR

90.5 Special provision for residential customers. (a) Definitions. For the purposes of this section, and when used in section 90.6 of this Part, the following definitions shall apply:

- (1) Existing residential customer is a customer who receives electric service to a dwelling unit which such customer uses for his residential purposes and where business rates do not apply to the service. An existing residential customer includes an applicant for electric service who has transferred dwelling units within a utility's service territory and for whom there is a recent payment history.
- (2) New residential customer is an applicant for electric service to a dwelling unit which such customer uses for his residential purposes and where business rates do not apply to the service, and who does not qualify as an existing residential customer.
- (3) Delinquent in payment means, unless a more liberal standard is adopted by the utility, that a residential customer has not paid in full a duly rendered bill, or an agreed-upon partial payment, for electric service 25 days after the "to date" of the bill or within a longer period agreed to by the utility. A residential customer who has not paid in full a bill, or an agreed-upon partial payment, for electric service in circumstances where disconnection for nonpayment is precluded under utility complaint procedures established under section 143.8 of this Title or commission complaint procedures under Part 11 of this Title, shall not be considered delinquent in payment.
- (4) Payment shall be considered accomplished on the date when the full

amount of the bill or an agreed-upon partial payment is received by the electric corporation or gas and electric corporation or by any of such corporation's agents; provided, however, that if payment is mailed to such corporation or its agents, payment shall be considered accomplished as of the mailing by the consumer.

(b) Credit risk standards. (1) An existing residential customer may not be considered a bad credit risk unless such customer has been delinquent in payment two or more times within a recent 12-month period, or unless such customer's electric service has been discontinued for nonpayment during the preceding 12 months.

(2) A new residential customer may not be considered non-credit-rated unless such customer is unable to provide, to the satisfaction of the utility, affirmative answers to three or more of the six questions contained in Appendix 15-A of this Title, *infra*. Each electric corporation and gas and electric corporation shall adopt procedures which provide for use of the six questions appearing in Appendix 15-A of this Title, *infra*. An electric corporation or gas and electric corporation may determine whether to require a deposit from a new residential customer in accordance with the credit risk standards provided in paragraph (1) of this subdivision; if sufficient information is available from a New York utility rendering comparable service to determine whether such customer is a bad credit risk as defined in paragraph (1) of this subdivision. If a new residential customer can establish prior satisfactory credit history with a utility rendering electric service at the customer's most recent address, the electric corporation may not obtain a security deposit from such new residential customer.

(c) Residential customer deposits. No electric corporation or gas and electric corporation may require a deposit from a residential customer unless such corporation shall establish that the residential customer is a bad credit risk or non-credit-rated in accordance with the definitions and standards prescribed in this section.

(d) No electric corporation or gas and electric corporation may require a deposit from a residential customer in excess of two times the estimated average monthly bill for a calendar year except in the case of electric or gas space heating customers where deposits may not exceed two times the estimated average monthly bill for the heating season.

.SO DOC 16A-90.6

NYCRR

90.6 Refunds. (a) Each electric corporation and gas and electric corporation holding consumer deposits shall render to each depositor, when and as his deposit is refunded, a statement showing the amount of

the deposit, together with the amount of unpaid interest accrued thereon to the date of refund and the period covered thereby; and the amount of deposit and interest refunded. Any refund may be credited to the customer's account only to the extent of the current charges and the charges for the next succeeding month, and any balance or, at the election of such corporation, the full refund, shall be made to the depositor. Each depositor, upon becoming entitled thereto by reason of nondelinquency for one year, upon ceasing to be a subscriber or as provided by subdivision (b) of this section, may withdraw his deposit and all interest thereon which has not been refunded or credited against bills for service, upon surrendering his deposit certificate (or submitting satisfactory proof of ownership of the deposit or of the right to receive the same) and the payment of all bills for which such deposit is security. The "prudent" period of deposit retention, referred to in Public Service Law, section 117, may not exceed two years of nondelinquency in payment of bills rendered.

(b) Each electric corporation and gas and electric corporation shall, before April 1, 1976, review the accounts of all existing residential customers who have made deposits. Thereafter, each corporation shall review, on not less than an annual basis, the accounts of all existing residential customers who have made deposits. If a residential customer is not a bad credit risk, as defined in paragraph (b)(1) of section 90.5 of this Part, the utility shall promptly refund to such customer the amount of the deposit and the interest thereon.

.SO DOC 16A-90.7

NYCRR

90.7 Certificate of deposit. Each and every electric corporation and gas and electric corporation holding consumer deposits shall issue to every consumer from whom a deposit may be exacted a certificate of deposit, for which shall be used a good quality of paper and on which certificate there shall be printed, in addition to the receipt for the moneys deposited, the substance of the following:

THIS RECEIPT IS NOT NEGOTIABLE OR TRANSFERABLE

Interest will be allowed on this deposit so long as it shall remain with the corporation. When this deposit has been held for one year, interest thereon will be paid in cash or credited on a bill for service rendered the depositor thereafter, but not later than the first bill rendered after the next succeeding first day of October, and at the expiration of each succeeding one-year period.

Preserve this receipt to be surrendered when deposit is returned.

.SO DOC 16A-90.8

NYCRR

90.8 Refund without certificate of deposit. Each and every electric

corporation and gas and electric corporation holding consumer deposits shall provide reasonable ways and means, in such manner as such corporation may elect, whereby a depositor who makes application for the return of his deposit and is entitled to the return thereof, but who is unable to produce the original certificate of deposit or receipt, may not be deprived of his rights.

.SO DOC 16A-90.9

NYCRR

90.9 Circular containing terms of deposit. Each and every electric corporation and gas and electric corporation holding consumer deposits shall keep on hand, for distribution to its consumers, printed circulars, over its corporate or business name, which circulars shall be entitled "TERMS AND CONDITIONS UPON WHICH CONSUMERS' DEPOSITS ARE COLLECTED, HELD, AND MAY BE WITHDRAWN", and which shall contain a copy of this Part, a copy of Public Service Law section 117 (as added by L. 1976, ch. 557), and such other pertinent information as the corporation may elect. In lieu of providing a copy of section 117 of the Public Service Law and a copy of this Part, every such corporation may provide a circular approved by the commission containing the pertinent features of these requirements. Every such corporation shall furnish a copy of said circular or a summary of the pertinent features of these requirements to the consumer or applicant for service from whom a deposit is demanded when such corporation first informs said consumer that a deposit is required. Every such corporation shall post copies of such circular or summary in prominent place(s) in each business office frequented by consumers.

.SO DOC 16A-90.10

NYCRR

90.10 Extension of service when deposit is disputed. Each and every electric corporation and electric and gas corporation shall extend service to any new applicant for service who has initiated a complaint on a deposit requested by such corporation and shall continue to supply service during the pendency of such complaint, provided that such applicant keep current on bills for service rendered and pay a reasonable amount as a deposit if the complaint challenges only the amount requested.

91.3 Records

91.4 Residential customers

.SO DOC 16A-91.1 NYCRR

91.1 Deposit.

A municipality requiring any person or corporation to whom such municipality shall supply electricity, gas or steam service to deposit a sum of money to secure payment for such service shall allow to every such depositor interest on the sum deposited so long as it shall remain with the municipality. The interest rate to be applied to the amount deposited shall be a composite yield of intermediate term, A-rated municipal bonds, as reported in financial publications, less costs of administering deposits of 1.75 per centum per annum. The rate shall be updated effective January 1st each year, based upon yield information available on the first Friday of October of the preceding year. The commission will issue an advisory letter which publicizes the information to assure consistency.

.SO DOC 16A-91.2 NYCRR

91.2 Terms.

The crediting or payment of interest upon deposits, the retention and return thereof, shall be effected in accordance with the provisions of section 36 of the Public Service Law.

.SO DOC 16A-91.3 NYCRR

91.3 Records. Records of such deposits, statements and circulars pertaining thereto, shall be maintained and issued in conformance with the requirements of Part 90 of this Title.

.SO DOC 16A-91.4 NYCRR

91.4 Residential customers.

Municipal utilities shall comply with the special provisions for residential customers contained in sections 90.5 and 90.6 of this Title.

PART 92

METERS--TESTING AND REPORTING

(Statutory authority: Public Service, § 67)

Sec.

92.1 General provisions

92.2 Definitions

92.3 Meter test facilities

92.4 Calibration

(i) Specifications for test equipment, calibration intervals, and testing of metering devices are specified in the Part 92 Operating Manual.

.SO DOC 16A-92.2

NYCRR

92.2 Definitions.

(a) A meter testing facility is a laboratory or shop maintained or used by a meter service provider that is suitably equipped to test the accuracy of electricity meters. The facility must be certified by the Public Service Commission or its designee.

(b) A standardizing laboratory is a laboratory or shop equipped to maintain basic units of electrical measurements to apply those measurements to the testing of electricity metering test equipment, and to provide traceability to the standards maintained in the National Institute of Standards and Technology. The laboratory must be certified by the commission or its designee.

(c) The national Institute of Standards and Technology (NIST) is the federal agency responsible for the maintenance of nationally recognized measurement standards.

(d) Traceability is the process by which the assigned value of a measurement is compared, directly or indirectly, through a series of calibrations to the value established by the U.S. national standard.

(e) A complaint test (request test) is an as-found accuracy test of an electricity meter meter, made by a meter service provider as a result of a complaint made to the Energy Service Company, Meter Service Provider or T&D utility by a customer.

(f) A referee test is an as-found accuracy test of an electricity a meter, made or witnessed by a representative of the commission as a result of a complaint made to the commission by a customer or at the request of an Energy Services Company, Meter Service Provider or T&D Utility. Referee tests shall be made in a manner acceptable to the commission or its designee.

(g) An as found test is a test of an electricity meter made at prescribed load points to determine its performance prior to any adjustment or disassembly.

(h) An as left test is a test of an electricity meter made at prescribed load points to determine its performance after adjustments have been made and prior to being placed in or restored to service.

(i) An in-service test is an as found test of an electricity meter made in accordance with a test program, as defined in the Part 92 Operating Manual, which is designed to establish the overall performance of the meter population.

(j) The customer is the individual or entity purchasing electrical energy for a fee based on data provided by an electricity meter. This shall include direct customers of the ISO.

(k) The New York Independent System Operator (ISO) is a New York not-for-profit corporation providing operating control over the bulk electricity transmission system within New York State.

.SO DOC 16A-92.3 NYCRR

92.3 Meter test facilities.

(a) Each meter service provider shall maintain or have access to a suitable facility for testing electricity meters that has been certified by the commission or its designee as specified in the Part 92 Operating Manual.

(b) The meter test facility shall be equipped with test equipment suitable to establish test conditions and to determine meter performance.

(c) The meter test facility shall be managed and staffed by competent personnel.

(d) The meter test facility shall be located within New York State and not impose restrictions on its use for tests which are to be witnessed by a customer, the commission or its designee through its location or access requirements.

(e) The use of commercial standardizing laboratories as Meter Test Facilities shall be allowed only where such laboratories can be shown to have the appropriate test equipment and be staffed by personnel knowledgeable in the test and maintenance of electricity meters. Commercial standardizing laboratories used as meter test facilities shall be certified by the commission or its designee.

(f) No meter test facility may be used for the test of electricity meters used for customer billing until it has been inspected and certified by the commission or its designee.

.SO DOC 16A-92.4 NYCRR

92.4 Calibration.

(a) All meters and meter test standards and instruments used to test the accuracy of electricity meters must be calibrated and be traceable to the National Institute of Standards and Technology, as specified in the Part 92 Operating Manual.

.SO DOC 16A-92.5 NYCRR

92.5 Meter records.

(a) For all energy or demand meters installed on customer's premises, records shall be maintained by the Energy Services Company, Meter Service Provider or the T&D Utility controlling the meter which identify

the year purchased, the manufacturer, the type, the identifying number, the nameplate data relative to the rating of the meter, and the year and results of the last test. Such records shall be sufficient to identify all associated meters and accessory equipment affecting the accuracy of the billing.

(b) Records for each meter shall be accessible to the commission or its designee and to any entity having direct financial interest in the data provided from that specific meter.

(c) Requests for meter records will be responded to within a time frame as specified in the Part 92 Operating Manual.

.SO DOC 16A-92.6 NYCRR

92.6 Test loads and conditions.

(a) Test conditions and loads shall be as specified in the Part 92 Operating Manual.

.SO DOC 16A-92.7 NYCRR

92.7 Tests for new meters.

(a) All new electricity meters shall be tested and adjusted to an accuracy of as near to 100% registration as practical by either the manufacturer or the meter of the Meter Service Provider before installation as specified in the Part 92 Operating Manual.

(b) Where these tests are performed by a manufacturer who maintains a standardizing laboratory, the meter service provider shall take appropriate action to assure that the watthour meters conform to the requirements as specified in the Part 92 Operating Manual.

.SO DOC 16A-92.8 NYCRR

92.8 Determination of meter performance.

(a) Meter registration shall be considered "indeterminate" when there is any doubt as to whether the accuracy of the registration can be determined. Meter registration may also be considered "indeterminate" if two successive readings taken at each load fail to agree within the specified maximum error of the meter.

(b) A meter shall be reported as "Damaged" when it is registering incorrectly due to tampering, incorrect connections, overload or damage originating from external sources.

(c) A meter shall be reported as "Not Registering" if for any reason it is found not registering at both the light load and heavy load test points.

(d) Meter accuracy may be specified as that which is measured at a single test point or as a combined accuracy based on tests taken at multiple load points. Only one method of determining performance may be used for any meter type. The appropriate method for each meter type is

specified in the Part 92 Operating Manual.

(e) Test methods used for determination of meter accuracy are specified in the Part 92 Operating Manual.

.SO DOC 16A-92.9 NYCRR

92.9 Complaint and referee tests.

(a) Where possible, a complaint test of a meter shall be made with the meter installed in place on the customer's premises, without requiring the removal of the meter in any manner from its permanent position prior to the test.

(b) A complaint test of a meter may be made at the meter testing facility in lieu of the customer's premises if conditions at the site do not allow safe operation during the test or if the technology of the device requires test conditions not readily available at a customer location.

(c) A detachable meter may be mounted in a test device designed for insertion into the meter mounting.

(d) The cover of a meter may be removed at the time of the test.

(e) Referee tests shall be subject to the same constraints and requirements as complaint tests.

(f) Referee tests shall be made in a manner acceptable to the commission or its designee.

(g) Devices and related circuits such as totalizers or relays for customer billing not detailed in this Part shall be tested, and reports of such tests shall be made, in a manner acceptable to the commission or its designee.

.SO DOC 16A-92.10 NYCRR

92.10 In-service tests.

(a) All installed meters shall be subject to in-service testing to determine the performance of the meter population. These tests must be performed as specified in the Part 92 Operating Manual.

(b) Performance standards for the meter population are specified in the Part 92 Operating Manual.

(c) Any entity operating electricity meters used for billing of customers within New York State and who are eligible to be meter service providers under the Commission's "Practices and Procedures for the Provision of Electric Metering in a Competitive Environment" will be responsible for the administration of an in-service test program for any meters that they have installed within the state. The program will be based solely on the population of meters installed in New York and shall not be affected by any meters installed in other states.

(d) Individual test programs for in-service meters will be filed with

and approved by the commission or its designee prior to their use.

(e) Reports of meter performance will be made to the commission or its designee as specified in the Part 92 Operating Manual.

.SO DOC 16A-92.11

NYCRR

92.11 Meter registers and add-ons, auxiliary devices, and data processing.

(a) Meter demand registers shall be tested as specified in the Part 92 Operating Manual.

(b) Meter add-ons, such as pulse initiators, communications modules, etc., shall be verified for performance and effect on the meter as part of the approval process for the meter on which they will be used as specified in Part 93. The tests for new meters specified in 92.7 and the in-service tests specified in 92.10 shall not apply to these add-ons.

(c) Functions performed on the raw meter data by data processing systems shall be verified for compliance with specifications, functionality, and accuracy before use. The approval requirements of Part 93, the tests for new meters specified in 92.7 and the in-service tests specified in 92.10 shall not apply to these functions.

(d) Auxiliary devices, such as pulse recorders, totalizers, etc., must be approved for use in customer billing applications as specified in Part 93. Their performance will be verified as part of the approval process. The tests for new meters specified in 92.7 and the in-service tests specified in 92.10 shall not apply to these devices.

NYCRR

PART 93

APPROVAL OF NEW TYPES OF ELECTRICITY METERS, INSTRUMENT TRANSFORMERS AND AUXILIARY DEVICES

(Statutory authority: Public Service Law, § 67(4))

Sec.

93.1 Definition of meter

93.2 Acceptable meters

93.3 Types of meters eligible for approval

93.4 Modification of types

93.5 Who may make application

93.6 Form of application

93.7 Other metering devices

93.8 Rescission of approvals

.SO DOC 16A-93.1

NYCRR

93.1 Definition of meter. For the purposes of this Part, the term meter shall include all meters and associated devices used for the determination of the units of electric service furnished to consumers.

.SO DOC 16A-93.2

NYCRR

93.2 Acceptable meters. Only types of meters which have been approved by the commission shall be used for the purposes of customer billing. The commission may approve or reject a type of meter or metering system on the basis of tests required by these rules or such tests as the commission staff may direct.

.SO DOC 16A-93.3

NYCRR

93.3 Types of meters eligible for approval. Only those types of meters which are completely and permanently assembled and classified by type by the manufacturer are eligible for approval by the commission. New types shall conform with the requirements specified in Acceptable Performance of New Types of Electricity Meters and Instrument Transformers, of the latest version of the American National Standard Code for Electricity Metering (ANSI C12).

.SO DOC 16A-93.4

NYCRR

93.4 Modification of types. Permission to use an approved type of meter is effective only for those types which are of the same electrical design and assembly as the type approved. If the manufacturer of an approved type changes its construction in a manner that may affect its operation or accuracy, the sponsoring entity or the entity intending to use the modified device shall notify the commission staff specifying the changes. If the commission staff determines that the change is significant, the meter will be considered a new type and subject to approval. Minor variations in mechanical construction which are not of such character as to affect the electrical operation will be permitted in meters of the same type, but the commission staff shall be notified and reserves the right to make the determination.

.SO DOC 16A-93.5

NYCRR

93.5 Who may make application. Any utility under the jurisdiction of the commission, any energy services company or competitive meter service provider subject to the commission's consumer protection and oversight requirements, or any nonresidential customer that qualifies for the host utility's mandatory time of use rates may make application for the approval of a type of meter intended for use in New York State. A manufacturer may also apply, provided the application is accompanied by a statement of an entity certifying that it intends to use such type of meter.

.SO DOC 16A-93.6

NYCRR

93.6 Form of application. The following shall be included in the application addressed to the commission:

- (a) name and address of applicant;

indicating types of demand meters after the commission has approved suitable types of such meters equipped with cumulative registers or other means which permit the checking of the previous reading.

.SO DOC 16A-94.3 NYCRR

94.3 Photographic record of readings. Subsequent to January 1, 1952 electric corporations shall maintain a photographic record of all readings taken from indicating types of demand meters and registers used to measure alternating current service.

96.9 Severability

.SO DOC 16A-96.1 NYCRR

Section 96.1 Definitions. The following definitions apply for purposes of this Part:

(a) Assisted Living Facilities - Multi-unit residential premises, identified as assisted living facilities and certified by the New York State Department of Health as such, which provide congregate residential housing with supportive services, including on-site monitoring, and personal care services and/or home care services in a homelike setting.

(b) Campground, recreational trailer park, marinas, and parking facilities - Facilities for use on an intermittent, temporary, or irregular basis by campground, recreational, trailer park, marina, or vehicle charging stations where electric service is delivered by the utility to the facility owner and redistributed to individual campsites, trailers, boats or plug-in electric vehicle charging stations with or without submetering.

(c) Condominium - Separate ownership of individual units in a multi-unit residential premises. Each unit owner holds title to a unit of real property and also owns a common tenancy with owners of other units for the common areas of the building, which are managed by a homeowners' association, or as established in the condominium bylaws.

(d) Cooperative Apartment - Multi-unit residential premises in which residents own a share in the corporation that owns the real estate, which entitles the shareholder to occupy a dwelling unit. Each shareholder is granted the right to occupy one housing unit through an occupancy agreement, which is similar to a lease. A board of directors manages the cooperative.

(e) Direct metering - In multi-unit residential premises, the measurement of electricity use in each unit through a meter that has been provided by the distribution utility company, wherein each individual residential unit is assigned its own meter.

(f) Electric heating - Heat provided to an entire living space with electricity primarily by means of non-portable electric heating appliances.

(g) HEFPA - The Home Energy Fair Practices Act, Public Service Law  30-53 and all Commission regulations adopted to implement such provisions.

(h) Master-metering - The measurement through a single meter of the quantity of electricity delivered to a multi-unit residential premises by a utility, wherein the owner or manager of such building is the utility customer and wherein the electricity may be redistributed to the individual residential units in the building either with or without submetering.

(i) Rate cap - The maximum rate, calculated in each billing period, that may be used to compute the charges for electric service to a submetered resident. Unless a different rate cap is set pursuant to   96.2(a) and   96.8(b) and (c) of this Part, the rate cap shall be the rates and charges of the distribution utility for delivery and commodity in that billing period to similarly situated, direct metered residential customers. Where residents are billed for time-of-use, the maximum rate for purposes of calculating the rate cap shall be the average annual residential rate.

(j) Resident - The occupant of a unit used as a home in a multi-unit residential premises.

(k) Senior Living Facility - Multi-unit residential premises in which energy-efficient housing and other services are provided, and will be provided in the future, to resident senior citizens, in which electric

usage does not vary significantly from unit to unit because units are uniform in size and in the types of appliances, and which promotes economic development.

(1) Submeterer - Any multi-unit residential premises owner or utility customer of record who purchases electricity for delivery by the utility to the premises and facilitates the sale or redistribution of such electricity for use by the premises occupants whose units are separately metered and billed based on the measurement of electricity use in each occupant's unit. Any entity acting on behalf of such owner that arranges for the installation of submeters and the billing of submetered usage to individual residents shall be considered the agent of the submeterer. The submeterer may engage the services of a submetering service provider to install meters, read meters and/or handle billing.

(m) Submetering - A system of measuring electricity use in a residential unit in a master-metered multi-unit residential premises, or campground, trailer park, marina or parking facility by means of a submeter installed on the wiring to each residential unit, campsite, trailer, boat hookup or plug-in electric vehicle charging station.

(n) Time-of-use rates - The pricing of electricity based on actual usage during particular time intervals. Time-of-use rates may be applicable to blocks of time over a 24 hour period.

(o) Time-of-use meter - A meter that registers accumulated energy consumption (data) over specific time intervals.

(p) Utility customer - For purposes of this Part, an electricity consumer whose use of electricity is directly metered by the distribution utility and is a customer of record of the distribution utility.

.SO DOC 16A-96.2

NYCRR

96.2 Electric Service to Submetered Multi-unit Residential Premises - General Provisions.

(a) Provisions Applicable to all Submetering. (1) Electric service shall only be provided to a multi-unit residential premises in which individual dwelling units in the premises receive submetered electric service if the submetering (a) is and continues to be authorized by Commission order where a Commission order was necessary, (b) is and continues to be consistent with any conditions imposed by such order, and (c) is and continues to be consistent with this Part notwithstanding previous authorization to submeter that did not include the requirements herein.

(2) If electric service is provided to a multi-unit residential premises in which the individual dwelling units in such premises receive

submetered electric service, but which, after the procedures provided for in §96.8(b) and (c), has been found to be (a) inconsistent with any conditions imposed by the Commission's order authorizing such service, or (b) inconsistent with applicable provisions of this Part, the rate cap for such service may be reduced by up to 40%. The rate cap will continue at such reduced level from the date specified in the Notice of Rate Cap Reduction until such time as the Department confirms to the submeterer that such inconsistency has been corrected. Further, when such inconsistency existed for a period of time prior to the Department's Notice of Alleged Violation, contained in §96.8, the reduced rate cap may be extended to all or a portion of such period, not exceeding two years, and the submeterer shall refund to residents the difference between the reduced rate cap established for that period pursuant to this paragraph and any charges for electric service paid by residents in such period. A rate cap reduction made pursuant to this section is appealable to the Commission within 15 days of the date of the Notice of Rate Cap Reduction.

(b) Existing Direct Metered Multi-unit Residential Premises. Except as otherwise provided in this Part, electric service provided to individual residential units in existing multi-unit residential premises through direct metering may not be discontinued or replaced by master metering. If, however, a Petition to Submeter is filed, which (1) complies with the applicable requirements of §96.5 and §96.6; (2) seeks to convert such premises from direct metering to master-metering with submetering; and (3) demonstrates that the building or complex for which master metering with submetering is sought will participate in building level demand response programs or will employ on-site co-generation plant or an alternative, advanced energy efficiency design, the conversion to submetering may be authorized by the Commission.

(c) Assisted Living and Senior Living Facilities. Electric service is authorized to be established or continued to assisted living or senior living facilities through master metering.

(d) Campgrounds, Recreational Trailer Parks, Marinas, and Parking Facilities. Electric service may be provided to the facility owner or operator of campgrounds, recreational trailer parks, marinas and parking facilities for redistribution to individual campsites, trailer, boat hookups, or plug-in electric vehicle charging stations with or without submetering. Master metering and submetering, at the facility owner's or operator's option, may be installed and used for billing without Commission approval and are not subject to submetering service conditions.

96.3 Filings Seeking Authorization to Convert Existing Master-metered Residential Rental Premises to Submetering and Submetering in New Premises.

(a) Notice of Intent to Submeter. Except when a conversion to submetering results in the cost of electric heat becoming the responsibility of the residents or when a building owner seeks authorization to install submetering in place of direct metering pursuant to §96.2(b), a master-metered multi-unit residential rental premises with submetering shall be authorized:

(1) after filing a Notice of Intent to Submeter, which includes the information, descriptions, plans, forms, certifications, and other materials and representations specified for such Notices in §96.5 of this Part;

(2) after individual notices to residents are provided pursuant to §96.3(c);

(3) upon the Commission's determination and order approving such submetering as in the public interest and consistent with the provision of safe and adequate electric service to residents. In making this determination, the Commission may rely on the Notice of Intent to Submeter and the information therein, when complete, as a rebuttable presumption that submetering at such premises is in the public interest and consistent with the provision of safe and adequate service to residents.

(b) Petition to Submeter. (1) When payment for electricity for electric heat will become the responsibility of residents, submetering will be authorized:

(i) after filing a Petition to Submeter which includes the information, descriptions, plans, forms, certifications, and other materials and representations specified for such Petitions in §96.5 of this Part;

(ii) after individual notices to residents are provided pursuant to §96.3(c) where necessary; and

(iii) upon the Commission's determination and order approving such submetering as in the public interest and consistent with the provision of safe and adequate electric service to residents. Such determinations will be considered by the Commission on a case-by-case basis. In making such determination, the Commission may rely on the Petition to Submeter, supplemental information provided with the Petition, information supplied in public comments, and staff's investigation.

(2) Replacement of direct metering with submetering shall be

authorized:

(i) after filing a Petition to Submeter which includes the information required by §96.5 of this Part and the demonstration described in §96.2(b);

(ii) after individual notices to residents are provided pursuant to §96.3(c); and

(iii) upon the Commission's determination and order approving such submetering as in the public interest and consistent with the provision of safe and adequate electric service to residents. Such determinations will be considered by the Commission on a case-by-case basis. In making such determination, the Commission may rely on the Petition to Submeter, supplemental information provided, with the Petition, information supplied in public comments, and staff's investigation.

(c) The following notice to residents is required for conversions to submeter. The submeterer shall provide or shall have provided proof, in the form of a sworn affidavit, that the following individual, written notices have been provided to all current residents:

(1) Prior to Filing a Notice of Intent to Submeter or a Petition to Submeter pursuant to this Part. Prior to submitting a Notice of Intent to Submeter or a Petition to Submeter, the prospective submeterer identified in such Notice or Petition shall provide individual notice to current residents of the prospective submeterer's intent to submit a Notice of Intent to Submeter or Petition to Submeter. Such notification to residents shall include the identification of a location in the premises where, and at times convenient to the residents, the information required to be provided to the Commission under §96.5 may be reviewed by residents. Such notification shall also include an offer to provide, upon request by a resident, a copy of such Notice or Petition.

(2) Prior to Approval. A Notice of Intent to Submeter or Petition to Submeter filed pursuant to §96.3 shall not be noticed for comment in the New York State Register until all information required in §96.5 in connection with such Notice or Petition is filed with the Secretary. Immediately upon publication of the Notice of Intent to Submeter or Petition to Submeter in the State Register, the prospective submeterer shall inform current residents individually that the Commission has commenced a proceeding and how they may submit comments to the Department of Public Service within the State Administrative Procedure Act comment period.

(3) After Submetering Approval. After submetering is authorized pursuant to this Part, the submeterer shall notify residents individually no less than 2 months prior to the actual commencement of

billing for submetered electric service. The submeterer shall file with the Secretary a copy of the notice provided to current residents of the date upon which submetering will commence. Such required notice shall include:

(i) a statement indicating that prospective residents will be notified prior to signing a lease or purchase agreement that electricity will be supplied on a submetered basis and the residents will be responsible for electric charges;

(ii) a copy of the annual notice used or to be used for compliance with PSL §44, which summarizes the residents' HEFPA rights and responsibilities, including complaint handling procedures; and

(iii) the precise manner in which submetered residents may contact the Department of Public Service Office of Consumer Services.

(d) The submeterer shall commit in writing to accept all of the conditions required by the Commission in its order authorizing submetering and in these regulations.

(e) Submeters shall be installed and submetered billing shall commence within five years of the Commission order authorizing submetering. If submetering has not commenced within five years of such Commission order, a new Notice of Intent to Submeter or Petition to Submeter shall be filed with the Commission.

(f) Authorization to submeter shall continue when ownership of a submetered premises is transferred.

.SO DOC 16A-96.4

NYCRR

96.4 Submetering in Master-metered Residential Cooperatives and Condominiums.

Master-metering with submetering in residential cooperatives or condominiums shall be authorized:

(a) after filing a Notice of Intent to Submeter which includes the information, descriptions, plans, forms, certifications, and other materials and representations specified for such Notices in §96.5 of this Part;

(b) after individual notices to owners or shareholders are provided pursuant to §96.3(c); and

(c) upon the Commission's determination and order approving such submetering as in the public interest and consistent with the provision of safe and adequate electric service to residents. In making this determination, the Commission may rely on the Notice of Intent to Submeter and the information therein, when complete, as a rebuttable presumption that submetering at such premises is in the public interest and consistent with the provision of safe and adequate service to

residents.

.SO DOC 16A-96.5

NYCRR

96.5 Notice of Intent to Submeter and Petition to Submeter - Contents.

Each Notice of Intent to Submeter or Petition to Submeter filed pursuant to this Part shall include:

(a) a description of the type of submetering system to be installed, including a demonstration in all Notices and Petitions submitted after January 1, 2016, that the submetering system, when installed, will be capable of service termination to individual units. Such description shall include the meter classification according to the manufacturer's name and proof of each submeter's conformance to the requirements in 16 NYCRR Parts 92 and 93. Authorization to submeter pursuant to this Part will be, unless modified by Commission order, contingent upon use of the named, or an identified comparable submetering system.

(b) a description of the methods to be used to calculate the bills for individual residents when submetering is implemented, including the methods to be used to determine that the submetered bills, when rendered, will comply with the rate cap as set forth in this Part.

(c) a plan for complying with the provisions of HEFPA. Such plan shall include, but is not limited to, a description or sample of the prospective submeterer's form to be used to determine residents assets, budget billing form, quarterly billing form, reminder notice, notice to social services of a resident's inability to pay, final termination notice, final suspension notice, the annual resident notification of rights, bill contents, budget or levelized payment plan, deferred payment agreement, and complaint handling procedures.

(d) a "Submeterer Identification Form," which shall contain the premises' utility company account number(s) and the name, telephone number and address of the individual or individuals responsible for billing and for resolving resident complaints. For new accounts for which account numbers are not available when the Notice of Intent to Submeter or Petition to Submeter is filed, account numbers shall be made part of the Submeterer Identification Form when available to the applicant.

(e) where applicable, a description of the method to be used to back out electric charges from rent, which shall include:

(1) a detailed description of how such monthly reduction to rent charges will be calculated; and

(2) a copy of the individual notice provided to residents explaining the basis and methodology for such rent or monthly maintenance reductions.

(f) certification by the prospective submeterer that the following shall be included in plain language in all leases or agreements governing the premises to be submetered, which shall be filed with the Commission in the Notice of Intent to Submeter or Petition to Submeter:

- (1) submetering complaint procedures,
- (2) the HEFPA rights and responsibilities of residents, and
- (3) a provision stating that submetering refunds will be credited to submetered residents affected by the submeterer's actions that led to such refunds provided that the submeterer has such contact information for such resident.

(g) proof of service that a Notice of Intent to Submeter or Petition to Submeter was sent from the prospective submeterer to the utility company providing electric service to the premises to be submetered.

(h) documentation sufficient to establish that the refrigerators in all rental dwelling units are no more than ten years old or meet the most recently adopted federal energy efficiency standards for such appliances.

(i) a description of the electric energy efficiency measures that have been or will be installed.

(j) a description of the information and education programs that have been and will be provided to residents on how to reduce electric usage. Such programs shall include information to all residents before submetering commences as well as supplemental information to residents with above-average electricity usage in the first twelve months after submetering has begun.

(k) When a Notice of Intent to Submeter or Petition to Submeter is made with respect to a premises in which 20% or more of the residents receive income-based housing assistance, such Notice or Petition shall include:

- (1) the name of each such assistance program in place at the premises, the agency administrator of each such program, the number of residents receiving assistance under each such program, whether the administrator of such program must approve the proposed submetering at such premises and, if so, when such approval was or may be granted.

- (2) the utility allowance or rent reduction applicable to residents pursuant to each such assistance program.

- (3) proof that an energy audit by a certified energy consultant has been conducted, a description of the energy efficiency plan for the premises, including, but not limited to, a refrigerator replacement plan, other specific conservation and weatherization measures that have been or will be installed, including those sponsored by the New York

State Energy Research and Development Authority and/or other organizations, and information and education programs that have been or will be provided to residents on how to reduce electric usage. If a premises owner or operator has participated in a NYSERDA and/or other program to encourage energy efficiency, the prospective submeterer shall provide formal documentation in its Notice of Intent to Submeter or Petition to Submeter describing the energy efficiency rating its premises has achieved, which appliances will be EnergyStar{R} rated, and NYSERDA certification that its energy reduction plan is complete.

(1) When a proposed conversion to submetering of an electric heat property or submetering in a new electric heat property is addressed through a Petition to Submeter, such petition shall, unless waived by the Commission for good cause shown, include:

(1) a detailed description of the manner and extent to which electric heat is or will be provided to the residential units subject to submetering.

(2) a demonstration that electricity consumption for heating in dwelling units may be controlled by the resident of each unit by the use of programmable thermostats.

(3) either a forecast based on one year of apartment-level shadow billing or a study of actual submetered data from comparably situated buildings. Such forecast or study shall demonstrate that, when submetering is introduced, more than 60% of residents are expected to pay less, after accounting for savings from energy efficiency measures, energy conservation, and assistance that may be available from the Home Energy Assistance Program or other energy assistance programs, for the submetered electricity during the first 12 months of electric service than the amount of rent reduction they will receive as a result of the introduction of submetering during this period.

(4) proof that an energy audit by a certified energy consultant has been conducted, a description of the energy efficiency plan for the premises, including, but not limited to, a refrigerator replacement plan, other specific conservation and weatherization measures that have been or will be installed, including those sponsored by the New York State Energy Research and Development Authority and/or other organizations, and information and education programs that have been or will be provided to residents on how to reduce electric usage. If a premises owner or operator has participated in a NYSERDA and/or other program to encourage energy efficiency, the prospective submeterer shall provide formal documentation in its Petition to Submeter describing the energy efficiency rating its premises has achieved, which appliances

will be EnergyStar{R} rated, and NYSERDA certification that its energy reduction plan is complete.

(5) when the Petition to Submeter is made with respect to a premises in which at least 25 of the residents receive income-based housing assistance, documentation to establish that the submeterer has registered as a Home Energy Assistance Program (HEAP) vendor. The Commission may require, when necessary, that a submeterer become a HEAP vendor.

(6) Submetering of electric in new premises shall not be subject to the filing requirements of §96.5(1)(3) or (4).

(m) when a Petition to Submeter is for a conversion from direct metering to submetering pursuant to § 96.2(b) of this Part, the Petition shall include a demonstration that the building or complex for which submetering is sought will participate in building level demand response programs or will employ on-site co-generation plant or an alternative, advanced energy efficiency design.

(n) such other or further demonstration, documentation, commitment or information which, in an order issued prior to the date on which such Notice of Intent to Submeter or Petition to Submeter is filed, the Commission shall have identified as necessary to a determination that approval of such Notice or Petition is in the public interest and consistent with the provision of safe and adequate service to residents.

.SO DOC 16A-96.6

NYCRR

96.6 Electric Submetering Service Conditions.

All submeterers, whether authorized to submeter by Commission order, rule, or past practice, shall provide or continue to provide submetered service under the following conditions unless waived in whole or in part by Commission order for good cause shown:

(a) a condition that submetering shall be in accordance with, as applicable, the Notice of Intent to Submeter, the Petition to Submeter, or similar filings made prior to the effective date of this Part, as authorized by the Commission or as modified by conditions adopted by the Commission as part of its review and approval.

(b) a condition that each submetered residential unit in a multi-unit dwelling must be provided with a submeter or related equipment that allows for the termination of submetered electric service to that unit in the event that termination of such service is consistent with the requirements of HEFPA.

(1) The requirements of this paragraph shall not apply to submetering of electricity authorized by Commission order prior to January 1, 2016 or which is the subject of a Notice of Intent to Submeter or of a

Petition to Submeter, filed with the Secretary prior to January 1, 2014;

(2) When submetering systems installed as of January 1, 2016 are replaced, any newly installed submetering systems shall be capable of service termination.

(c) a condition that the submeterer shall not charge more than the applicable rate cap and that, in the event of charges greater than the applicable rate cap, the submeterer may be directed to provide credits to residents for such overcharges plus interest as consistent with Public Service Law §118 and 16 NYCRR § 145.

(d) a condition that the submeterer shall not charge time-of-use rates when the resident has not agreed to be billed using time-of-use rates.

(e) a condition that the submeterer shall comply with the requirements imposed by HEFPA and that the submeterer shall notify residents, in either the lease to which they are a party, through their condominium or cooperative offering plan, or through other individual notice, of the consumer protections afforded the residents by HEFPA, and that the submeterer shall provide such consumer protections.

(f) a condition that the submeterer shall respond to complaints filed with the Department of Public Service and forwarded to the submeterer in accordance with the Department's complaint procedures.

(g) a condition that the lease or other residential dwelling agreement between a submeterer and a submetered resident shall not require or include binding arbitration as a means to resolve submetered service or billing complaints and that in addressing any such complaint the submeterer and the submetered resident shall follow the provisions of 16 NYCRR Part 12 - Consumer Complaint Procedures.

(h) a condition that, at any premises for which submetering of electric service is permitted, but at which, pursuant to §96.6(c), equipment that is capable of terminating electric service to individual units is not required, the submeterer shall provide, in the event that the submetered resident is in arrears for the payment of charges for electric service, each HEFPA protection associated with the termination of electric service for unpaid charges that would be available to such resident if the submetered resident had been directly metered. Such HEFPA protections shall be provided notwithstanding the fact that the submetering and related equipment does not technically allow for such termination of service. Each protection shall be provided to such resident prior to the commencement of any other civil enforcement, collection, or other proceeding based on such resident's overdue electric charges.

(i) a condition that the submeterer shall update the information

contained in the Submeterer Identification Form submitted pursuant to §96.5(d) of this Part or that is on file with the Department of Public Service by filing with the Department of Public Service notice within ten days of any personnel change.

(j) a condition that the bills to submetered residents be sent within thirty days of receipt of the distribution utility and/or Energy Services company bill for the master-metered service and that the submeterer shall retain billing records for a period of six years beginning with the effective date of this Part.

(k) a condition that cross-wiring (for example, service through a shared meter) shall not exist at premises that are submetered.

.SO DOC 16A-96.7

NYCRR

96.7 Electric Submetering Equipment Requirements.

All submeterers, whether authorized to submeter by Commission order, rule, or past practice shall provide or continue to provide submetered service under the following conditions unless waived in whole or in part by Commission order for good cause shown:

(a) all submetering products and ancillary equipment used to monitor electric flow to submetered residents and installed or replaced after January 1, 2014 must:

(1) comply with the provisions of 16 NYCRR Parts 92 and 93; and
(2) be physically compatible with the service endpoints of the premises' electrical system. Submeters shall be equipped with viewable registers, accessible to the resident so the resident may monitor their own kWh consumption or shall provide alternate mechanisms to allow residents to monitor their own consumption such as through a computer program.

(3) submeters that are calibrated to register a fixed fraction of the electricity consumed should display the meter register multiplier which will be used to determine the resident's actual kilowatt hour usage. Any register multiplier used should be indicated on resident bills.

(b) Ensuring Continued Submeter Performance - submeter inspection and testing programs shall be instituted to ensure that residents of submetered premises continue to receive reliable and accurate electric consumption measurements. The submeterer or submeterer's agent shall conduct an annual testing program to analyze a statistically significant sample of the in-service submeters in accordance with the testing procedures and standards outlined in 16 NYCRR Parts 92 and 93. Submeters that do not meet the requirements of 16 NYCRR Parts 92 and 93 shall be corrected or recalibrated as soon as practicable but no later than 1 year after testing unless otherwise ordered by the Commission.

(c) Cost of Meter Tests for all Submeters - the cost of testing a submeter's accuracy shall be borne by the submeterer to the extent described in this paragraph. A recipient of submetered service may request and receive one submeter test at no cost during a twelve month period when the request is made pursuant to a consumer complaint. A recipient of submetered service may request more than one meter test during a twelve month period and may request that the test be witnessed by Department of Public Service staff; however, if the submeter is not out of the limits as prescribed by Part 92, the person requesting more than one annual test will bear the cost of such additional meter tests.

.SO DOC 16A-96.8

NYCRR

96.8 Failure to Comply with this Part.

(a) Any failure to submeter in compliance with this Part or 16 NYCRR Parts 92 or 93, as referenced herein, may result in Commission action that (1) rescinds, suspends, limits or stays the submeterer's authorization to submeter electricity, or its authority to render bills to and collect payments from submetered residents; (2) terminates electric service to the submetered premises or orders rebilling, or billing refunds; or (3) results in a penalty action under the Public Service Law or in other Commission enforcement proceedings. Any such actions shall be taken in accordance with the Public Service Law and Commission procedures.

(b) In addition, or in the alternative, a failure to submeter in compliance with this Part or 16 NYCRR Parts 92 or 93 as referenced herein, may result in up to a 40% reduction of the rate cap. Prior to establishing a reduced rate cap, the Department of Public Service shall:

(1) provide to the submeterer a Notice of Alleged Violation stating with specificity the violations(s) of regulations, Commission orders, statute(s) or tariff(s) found after Department investigation as well as the Department's proposed rate cap;

(2) Require that the submeterer provide a copy of the Notice of Alleged Violation to residents along with information on how residents may provide comments within 10 days to the Department of Public Service regarding such Notice.

(3) Allow the submeterer 15 days from the date of the Notice of Alleged Violation to respond to such notice;

(4) Allow the submeterer 20 days from the date of such response or 30 days from the Notice of Alleged Violation to cure the failures identified therein; and

(5) Send to the submeterer a Notice of Rate Cap Reduction stating the basis for the rate cap reduction, the level of rate cap reduction and,

the date(s) upon which the rate cap reduction shall be in effect. The rate cap reduction shall be in effect no less than 20 days after the Notice of Rate Cap Reduction.

(c) Any rate cap reduction implemented by the Department of Public Service pursuant to §96.2(a)(2) (rate cap) of this Part may be appealed to the Commission within 15 days of the Notice of Rate Cap Reduction. Any such appeal will toll the period during which a Department rate cap reduction will be in effect.

(d) By undertaking to submeter pursuant to a Commission Order granting a Notice of Intent to Submeter or a Petition to Submeter issued under this Part or by continuing to submeter, the submeterer shall have consented to the jurisdiction of the Commission to impose the enforcement remedies (1) described in this Part or (2) described in the Public Service Law and applicable in the event a company, corporation or person fails to obey and comply with a provision of the Public Service Law, or a regulation or order of the Commission applicable to it.

.SO DOC 16A-96.9 NYCRR

96.9 Severability.

If any provision of this Part is adjudicated invalid by a court of competent jurisdiction, such invalidity shall not affect the other provisions which can be given full effect without the invalid provision(s).

.SO DOC 16A-PT97 NYCRR

PART 97

NOTICE OF INTERRUPTIONS OF SERVICE

(Statutory authority: Public Service Law, § 66(1))

Sec.

97.1 Definitions

97.2 Data requirements

97.3 Retention of records

97.4 Filing requirements

97.5 Information to be contained in reports

.SO DOC 16A-97.1 NYCRR

Section 97.1 Definitions.

For the purposes of this Part, the following definitions shall apply:

(a) Interruption. An interruption is the loss of service for five minutes or more, for one or more customers, which is the result of one or more component failures. For example, a downed house service is one interruption; a burned 69 kV tap that results in outages of several 13 kV primary and branch circuits that in turn cause service interruptions in one interruption; one disconnected hot leg of a tri-plex house

service, i. e., a "half-light" condition, is one interruption.

(b) Component. A component is a piece of equipment, a line, a section of line, or a group of items which is an entity for purposes of reporting, analyzing and predicting interruptions.

(c) Major storm. A major storm is a period of adverse weather during which service interruptions affect at least 10 percent of the customers in an operating area and/or result in customers being without electric service for durations of at least 24 hours.

(d) Customer. A customer is any electrical service point for which a separate bill is rendered (i.e., each meter represents a customer).

(e) Duration. Duration (reported in customer-hours) is the five-minute or greater period from the initiation of an interruption to a customer until service has been restored to that customer. Total duration is the sum of the durations in that period. Sufficient data should be kept on each interruption to be able to express the duration in customer minutes.

(f) Customers affected. A customer is affected by an interruption if that customer's electrical service is interrupted.

(g) Average number of customers served. The average number of customers served shall be the number of active metered customer accounts as of the last day of the prior year or the last day of the prior month for which electric sales revenue would be recorded under Uniform System of Accounts 440, 442, 445, 446 and 448.

.SO DOC 16A-97.2

NYCRR

97.2 Data requirements.

Each electric corporation and municipality subject to the commission's jurisdiction shall maintain service interruption records that contain at least the following information for each service interruption of five minutes or more:

- (a) the operating area in which the interruption occurred;
- (b) the circuit name or number affected; the location affected;
- (c) the date and time of the interruption (or report of the interruption if the actual time is not known);
- (d) the date and time service was restored;
- (e) the duration of the interruption;
- (f) the number of customers (billing units) affected by the interruption;
- (g) the cause of the interruption;
- (h) the weather condition at the time of the interruption; and
- (i) the system component (e.g., overhead primary main, underground radial secondary, underground network primary main, transformer, etc.)

involved.

.SO DOC 16A-97.3

NYCRR

97.3 Retention of records.

Each such electric corporation and each municipality shall maintain for at least six years a record of each interruption of service to its customers (other than public street and highway lighting customers and sales to other utilities) having a duration of five minutes or more. Said corporation or municipality shall make such records available for inspection by the department's staff and shall, when requested, provide the staff with information. These records shall be kept in a computerized form.

.SO DOC 16A-97.4

NYCRR

97.4 Filing requirements.

Each Class A electric corporation is required to file with the commission in the manner hereinafter set forth summary reports of service interruptions. Said reports shall be filed with the commission monthly, not later than the 20th of the month following the month for which the report is rendered. Corporations with multiple operating areas shall submit both corporate-wide summary reports and individual operating area summary reports in one combined filing.

.SO DOC 16A-97.5

NYCRR

97.5 Information to be contained in reports.

(a) Such reports shall provide the following:

- (1) the name of the electric corporation;
- (2) the name of the operating area for which the report is applicable;
- (3) the month for which the report is rendered;
- (4) the number of interruptions (divided according to interruption causes--see subdivision (c) of this section for cause definitions) of service for five minutes or longer to customers (other than public street and highway lighting customers and sales to other utilities) during the reporting month;
- (5) the total durations in customer-hours of those interruptions;
- (6) the approximate total number of such customers (billing units) affected thereby; and
- (7) the average number of such customers (billing units) served.

(b) Each report shall have two sections--one section with data for the month being reported and one section with data for the year-to-date.

Subdivision (c) of this section provides an illustration of a form.

(c) Sample form--monthly electric service interruption report.

Classifications of Electric Service Interruption
Causes and Definitions

Each electric corporation and municipality shall classify service interruption causes used in reporting all electric service interruptions of five minutes or longer to the Public Service Commission in accordance with the following criteria:

1. Major Storms

Interruptions resulting from a major storm. Interruptions occurring at a time of routine adverse weather should not be reported to this classification. See definition for major storm.

2. Tree Contacts

Interruptions resulting from conductors or energized equipment coming in contact with a tree (or vice versa), except when the tree or a limb is felled by lightning or by an employee, contractor or customer. An interruption caused by a tree or limb felled by a utility employee or utility contractor shall be reported under Classification 4; if felled by a customer or a nonutility contractor, Classification 6 shall be used; if felled by lightning, Classification 9 shall be used.

3. Overloads

Under this heading, report interruptions from the blowing of a transformer and/or line fuse through overload. If the interruption is the result of increased or abnormal customer loads or generation for which the customer is required to notify the utility, but failed to do so, Classification 8 should be used instead.

4. Operating or Working Errors

Under this heading, report interruptions resulting from errors by utility or utility contact personnel (including the improper or substandard installation or design of facilities or the installation of improper equipment; e.g., undersized fuses, improper relay settings, etc.). An interruption caused by a utility's employee or contractor dropping a limb on a conductor shall be reported here. If the limb were dropped by a customer or nonutility contractor, Classification 6 shall be used.

5. Apparatus or Equipment Failures

Under this heading, report interruptions resulting from the breakdown or failure of otherwise properly selected, installed, and protected equipment and facilities; e.g., transformer failures (not due to external factors), broken poles or crossarms, faulty protective devices, cracked (not by gun fire) or contaminated insulators, defective cutouts, crossed or broken line and tie wires (not caused by tree contacts or lightning), improper relay operations, substandard conditions that were not present when the facilities were initially installed (e.g., slack conductors, etc.).

6. Accidents or Events Not Under Utility's Control

Under this heading, report interruptions resulting from events not under the control of the utility or its employees or contractors, such as house fires not caused by the utility's service; gun fire; crane contacts; automobile accidents; squirrel, bird, or other animal contacts; sabotage; customer tree fellings; etc. (Lightning interruptions should be reported under cause Classification 9 even though they may not be under the utility's control. Interruptions caused by failures of apparatus and equipment shall be reported under Classifications 5 and 8 even though the failures may not be the utility's fault. Tree or limb falling interruptions caused by the utility's employees or contractors should be classified under item 4. Those caused by a customer or a nonutility contractor shall be classified here.)

7. Prearranged

Under this heading, report interruptions resulting from actions

deliberately taken by the utility upon advance notice to the customers affected (prearranged). Deliberate interruptions (lasting at least five minutes) without prior notice to the customers affected shall be reported under the classifications most directly related to the reasons the outages were needed. They shall be considered part of a forced interruption when they take place during emergency conditions to facilitate restoration.

8. Customer's Equipment or Failures

Under this heading, report interruptions resulting from the failure of a customer's equipment or from a failure of the customer to take required action such as failure to notify the utility of an increase in load when required by agreement or tariff to do so. The customer's problem must cause an interruption to other customers or cause a problem on the utility system (e.g., blown fuse) to be reportable.

9. Lightning

Under this heading, report interruptions caused by lightning, including those resulting from either direct strikes or indirect immediate effects of lightning, on transformers, oil switches, cutouts, etc., so long as the equipment hit or indirectly affected was in proper condition prior to the lightning. An interruption resulting from a lightning strike to a tree limb that then comes in contact with or knocks down conductors should be included here.

10. Causes Unknown or Unclassified

Under this heading, report interruptions for which the cause is unknown or for which none of the other classifications is appropriate. This classification shall not be used if an investigation could determine the proper cause of an interruption for which one of the other classifications would be more appropriate.

(Utilities with network systems serving ten percent or more of the load in an operating district shall use the following classifications for reporting interruptions to network customers.)

11. Service Connections

Under this heading, report network service interruptions resulting from grounds, short circuits, or broken conductors on service connections.

12. Street Mains Cable

Under this heading, report network service interruptions resulting from grounds, short circuits, or broken conductors on secondary street mains cables.

13. Apparatus or Equipment Failures

Under this heading, report network service interruptions resulting

from the breakdown or failure of otherwise properly selected, installed, and protected equipment and facilities; e.g., transformer failures (not due to overloads or other external factors), faulty splices, insulation or protective devices, defective cutouts, improper relay operations, substandard conditions that were not present when the facilities were initially installed. Also report interruptions caused by network primary failures under this classification.

14. Accidents or Events Not Under the Utility's Control

Under this heading, report network service interruptions resulting from events not under the control of the utility or its employees or contractors, such as dig-ins, sabotage, etc. Interruptions caused by failures of apparatus and equipment are reported under Classifications 13 and 16 even though the failures may not be the utility's fault.

15. Prearranged

Under this heading, report network service interruptions resulting from actions deliberately taken by the utility upon advance notice to the customers affected (prearranged). Deliberate interruptions (lasting at least five minutes) without prior notice to the customers affected shall be reported under the classifications most directly related to the reasons the outages were needed. They shall be considered as part of a forced interruption when they take place during emergency conditions to facilitate restoration.

16. Customer's Equipment or Failures

Under this heading, report network service interruptions resulting from the failure of a customer's equipment or from a failure of the customer to take required action, such as failure to notify the utility of an increase in load when required by agreement or tariff to do so.

17. Causes Unknown or Unclassified

Under this heading, report network service interruptions for which the cause is unknown or for which none of the other classifications is appropriate. This classification should not be used if an investigation could determine the proper cause of an interruption for which one of the other classifications would be more appropriate.

NYCRR

PART 98

GENERAL PROVISIONS RELATING TO THE EXTENSION OF FACILITIES

BY ELECTRIC CORPORATIONS AND MUNICIPALITIES

(Statutory authority: Public Service Law, §§31(4), 51, 65(1), 66(1))

Sec.

98.1 Definitions

98.2 Provision of electric service

98.3 Charges for providing additional facilities and for acquiring rights-of-way

98.4 Facilities beyond public rights-of-way

98.5 Facilities within public rights-of-way

98.6 Reports

98.7 Information on line extension costs

.SO DOC 16A-98.1 NYCRR

Section 98.1 Definitions.

Unless the context otherwise requires, as used in this Part and Parts 99 and 100 of this Title.

(a) The term distribution line means an electric line used to distribute electric energy, which will or may reasonably be expected to provide service to more than one customer.

(b) The term supply line means a part of a distribution line that is installed between an existing electric distribution system and an underground distribution line within a residential subdivision.

(c) The term service line means an electric line used to connect a distribution line to an individual customer's meter or point of attachment; a service line, at the utility's discretion, may be connected to two or more meters at a single premises.

(d) The term appurtenant facilities means the necessary and ancillary accessories to an electric line that enable the transportation and distribution of electric energy.

(e) The term applicant means a developer, builder, person, partnership, association, corporation or governmental agency requesting the provision of electric service either:

(1) at a premises to be used as his or her residence (residing applicant);

(2) in a residence to be used by others (non-residing applicant), provided, however, that a governmental agency applying for service on behalf of a client, who would otherwise be a residing applicant, shall be treated as a residing applicant; or

(3) at a non-residential premises;

(f) The term residential building means a structure enclosed within exterior walls or fire walls, which is built, erected and framed of component structural parts and is designed for permanent residential occupancy.

(g) The term multiple occupancy building means a structure (including row houses) enclosed within exterior walls or fire walls, which is built, erected and framed of component structural parts and is designed

to contain four or more individual dwelling units for permanent residential occupancy.

(h) The term residential subdivision means a tract of land divided into five or more lots for the construction of five or more new residential buildings, or the land on which new multiple occupancy buildings are to be constructed, the development of either of which, if required, has been approved (or was required to be approved) by governmental authorities having jurisdiction over land use, which authorities include:

- (1) the Department of State, pursuant to article 9-A of the Real Property Law;
 - (2) the Department of Environmental Conservation, pursuant to article 15, Titles 5, 15 and 27, article 17, Title 15, and article 24 of the Environmental Conservation Law;
 - (3) the Adirondack Park Agency, pursuant to sections 809 and 810 of the Executive Law and article 15, Title 27, and article 24, of the Environmental Conservation Law;
 - (4) any Department of Health, pursuant to article 11, Title 2, of the Public Health Law;
 - (5) counties, pursuant to section 239-d(7) of the General Municipal Law;
 - (6) cities pursuant to sections 32, 33, and 34 of the General City Law;
 - (7) villages, pursuant to sections 7-728, 7-730 and 7-732 of the Village Law; and
 - (8) towns, pursuant to sections 276, 277 and 278 of the Town Law;
- (i) The term public R/W means the area within the territorial limits of any street, avenue, road or way that is for any highway purpose under the jurisdiction of the State of New York or of the legislative body of any county, city, town or village that is open to public use and that may be used for the placement of utility facilities.
- (j) The term R/W (right-of-way) means a right to pass over, occupy or use another's land for placing and maintaining utility facilities.
- (k) The term new construction means the installation of new electric distribution lines, service lines and appurtenant facilities on any R/W where no such electric distribution line exists, and may also include (in connection with such installation) the addition of appurtenant facilities (other than replacement facilities) to existing distribution lines.

Note: The installation of a new facility parallel to and on the same R/W as an existing underground facility also constitutes the new

construction of such facility.

(l) The term VSR means a visually significant resource which is:

(1) designated primarily or exclusively because of its exceptional, outstanding, significant, special or unique scenic quality pursuant to State or Federal enabling legislation; and

(2) listed in section 99.2(h) of this Title;

(m) The term Commission means the Public Service Commission of New York State; and

(n) The term utility means an electric corporation or a municipality subject to the jurisdiction of the Commission.

.SO DOC 16A-98.2

NYCRR

98.2 Provision of electric service.

(a) Obligation to provide electric service. When a written request for service is made to a utility by an applicant whose property abuts on, or has access to, any public R/W (other than a controlled access highway) in which the governmental authority having jurisdiction will permit the utility to install and maintain facilities, the utility shall:

(1) render the service requested in accordance with the provisions of this Part and Parts 99 and 100 of this Title;

(2) furnish, place, construct, operate, maintain and (when determined to be necessary by the utility or the Commission) reconstruct, or replace all electric facilities within public R/W and other R/W when the utility elects to use such R/W in lieu of constructing facilities within public R/W, at its own cost and expense, subject to the provisions of this Part, and Parts 99 and 100 of this Title, which cost and expense shall include the amounts paid to governmental authorities for permits to do the work required and any additional amounts paid for the right(s) to make such elective use of other R/W; and

(3) grant the appropriate footage allowance required by the provisions of this Part.

(b) Obligations of all applicants. Before service may be rendered to any applicant, such applicant shall first have:

(1) Either:

(i) delivered to the utility, free from cost, any necessary R/W agreement(s); or

(ii) paid in advance or agreed in writing to pay the utility any charge relating to the utility's acquisition of the necessary R/W agreement(s), so long as the applicant indicates to the utility in writing that he or she has been unable to obtain such agreement(s);

(2) paid or agreed in writing to pay the utility the material and installation costs relating to any portion of distribution line, service

line and appurtenant facilities (other than those accounted for in Uniform System of Accounts 368, entitled "Line Transformers" and 370, entitled "Meters," in Subchapter F of this Title) that exceeds the portion which the utility is required to provide without contribution, which costs shall be defined in the utility's tariff;

(3) furnished reasonable security as to the performance of his or her agreement, if required to do so by the utility in accordance with its tariffs.

(c) Obligations of residing applicants. Before service is rendered to a residing applicant, such applicant shall first have:

(1) assured the utility that he or she will be a reasonably permanent customer; and

(2) agreed in writing to pay the utility the rates charged like customers.

(d) Obligations of non-residing applicants. Before service is rendered to a non-residing applicant, such applicant shall first have:

(1) cleared any R/W conveyed to the utility of tree stumps, brush and other obstructions and graded such R/W to within six inches of final grade at no charge to the utility, where electric distribution lines, service lines, or appurtenant facilities are required to be installed underground or will be placed underground at the request of the applicant;

(2) provided a survey map certified by a licensed professional engineer or land surveyor and certified to as final by the applicant, showing the location of each dwelling (if known), lot, sidewalk and roadway, if requested to do so by the utility;

(3) placed and agreed to continue to maintain survey stakes indicating grade and property lines;

(4) furnished to the utility or agreed to furnish a map showing the location of all existing and proposed underground facilities, as soon as the location of such facilities is known; and

(5) agreed to maintain the required clearance and grading during construction by the utility.

(e) Provision of required residential underground service. Where a utility is required, by the Commission or a governmental authority having jurisdiction to do so, to provide residential underground service, the cost and expense which a utility must bear, except as otherwise provided in this Part, shall include the material and installation costs for up to a total of 100 feet of underground distribution line (including supply line) and underground service line per dwelling unit served, measured from the utility's existing electric

system (from the connection point on the bottom of the riser pole for overhead to underground connections) to each applicant's meter or point of attachment with respect to each residential building. If a utility receives an application for underground residential service outside a subdivision, and a governmental authority having jurisdiction to do so has required that the facilities be installed underground, the utility may, if the cost of installing the necessary facilities will be greater than two times the cost of installing such facilities calculated using the applicable charges per foot filed pursuant to section 98.6(b) (1) of this Part and as set forth in the utility's tariff, petition the Secretary of the Commission to allow a greater contribution to the cost of installation of the facilities than this section would otherwise require, or to set up a special rate district. The petition shall set forth the relevant economic, engineering, or environmental factors. If the necessary facilities are proposed to be in a VSR, the procedures set forth in section 99.2(b)-(e) of this Title shall apply. If the building to which service is requested is located within the Adirondack Park, the utility shall send a copy of the petition to the Adirondack Park Agency. Where the application is for service to a multiple occupancy building, the utility shall bear the material and installation cost for up to 100 feet of underground line times the average number of dwelling units per floor.

(f) Provision of non-mandatory residential underground service. Where an applicant requests a residential underground service line in situations other than those described in subdivision (e) of this section, the cost and expense which a utility must bear shall include the material and installation costs equivalent to those relating to the length of overhead service line which the applicant would otherwise be entitled under subdivision (g) measured from the utility's existing electric system (from the connection point on the bottom of the riser pole for overhead to underground connections) to each applicant's meter or point of attachment with respect to each residential building.

(g) Provision of residential overhead service. Where permitted to provide residential overhead service, the cost and expense which a utility must bear shall include the material and installation costs for up to 500 feet of overhead distribution line and up to 100 feet of service line or up to 300 feet of overhead distribution line and up to 100 feet of service line for single-phase and three-phase service respectively, measured as described in subdivision (e) of this section.

(h) Provision of elective residential and non-residential underground service. Where a utility chooses to provide residential or

non-residential underground service, the cost and expense which a utility must bear shall include the material and installation costs relating to the necessary utility facilities that exceed the amount which the applicant would be required to pay if such facilities were installed overhead.

(i) Provision of mandatory or non-mandatory non-residential underground service. Where requested to provide a non-residential underground service line by an applicant, or where a governmental authority having jurisdiction to do so requires undergrounding, the cost and expense which a utility must bear shall include the material and installation costs equivalent to those contained in the utility's tariff in connection with the provision of overhead service.

(j) Provision of non-residential overhead service. Where permitted to provide non-residential overhead service, the cost and expense which a utility must bear shall include the material and installation costs for up to 500 or 300 feet of overhead distribution line, for single-phase and three-phase service, respectively.

(k) Matters reserved to utilities' tariffs. This subdivision sets forth the minimum obligations of utilities with respect to the electric facilities required to be provided without charge to or contribution by, applicants. Each utility may file, for the Commission's approval, tariff schedules to provide rules for installing, maintaining, repairing and replacing service lines and appurtenant facilities, subject to the requirements of section 100.1(d) of this Title for residential subdivisions, or to extend such minimum obligations so long as the provision of additional facilities without such charge or contribution is cost justified. Such rules will be approved based on cost justification. Each service line on the applicant's property which runs to the applicant's building shall be installed either by the utility, or by the applicant in accordance with the utility's specifications, as the utility may elect and in accord with the utility's tariff, provided, however, that the utility's tariff must permit an applicant for underground service at least to excavate the trench necessary for the underground installation of distribution and service lines within a residential subdivision in accord with section 100.1(d), and provided, further, that allocation of the costs of installation of overhead or underground service lines shall be determined in accordance with this section regardless of who installs the service line. Unless required to do otherwise by a governmental authority with jurisdiction, a utility may choose whether to underground or pad mount transformers.

(l) To the extent practicable, underground electric, communication,

and cable television facilities shall be installed in a common trench when new construction is, or can without undue difficulty, be made simultaneously. Every reasonable effort shall be made to use joint occupancy utility poles to accommodate the installation of electric, communication and cable television facilities when new overhead construction occurs.

(m) Low income applicants.

(1) in the case of an applicant for service to a primary residence, who at the time of application is a Home Energy Assistance Program recipient pursuant to Title 18 NYCRR Part 393, the utility shall pay the cost of the line extension up to 1500 feet, (in addition to the 500-foot allowance), or more if the utility agrees. If an underground extension is required, the utility shall pay the cost equivalent of up to 1500 feet of overhead line extension in addition to the 100-foot underground allowance.

(2) such applicant must own the residential building and real property on which it is located and use it as a primary residence on the effective date of these regulations.

(3) such applicant must apply to the utility for a line extension within 24 months of the effective date of these regulations.

(4) a utility, which incurs the cost of the additional extension, may defer the cost in Account 186, Miscellaneous Deferred Debits. This account shall be allowed in rate base in the utility's rate case which follows such deferral.

(5) requests for inclusion in the low income program shall be made in writing to the utility. The utility shall report quarterly to the Department of Public Service the number of requests received and their disposition.

(6) a utility, that receives an application for service under this section, shall propose and pay for alternate sources of energy for the applicant up to the cost the utility would have paid for an additional line extension, if such alternative is less costly and if the applicant agrees. If the applicant does not agree to alternate sources of energy, the utility shall send the application and its proposal to the Department's staff for review. The Department staff shall determine an appropriate resolution based on economic, convenience or environmental factors.

.SO DOC 16A-98.3

NYCRR

98.3 Charges for providing additional facilities and for acquiring rights-of-way.

(a) If, in order to provide non-residential service or residential

service to a non-residing applicant, a utility must install or provide for the installation of distribution lines, service lines and appurtenant facilities, in addition to those required to be provided without contribution under section 98.2 of this Part, the utility shall impose a lump sum charge on the applicant for such facilities that exceed the portion which the utility is required to provide without contribution to the applicant. For a non-residing applicant in a residential subdivision requiring underground service, this lump-sum charge shall be determined by subtracting the total free footage allowance from the total footage of distribution line, service line and appurtenant facilities (other than those accounted for in Accounts 368 and 370) to be installed and multiplying the remaining distribution and service footage by the applicable experienced average cost per foot of the installing utility as reported pursuant to section 98.6(b)(1) of this Part and set forth in the utility's tariff. For an applicant for non-residential service or for a non-residing applicant not in a residential subdivision requiring underground service, the lump sum charge relating to distribution lines, service lines and appurtenant facilities (other than those accounted for in Accounts 368 and 370) shall be determined as set forth in the utility's tariff.

(b) If, in order to provide service to a residing applicant, a utility must install or provide for the installation of a distribution line, a service line and appurtenant facilities (other than those accounted for in Accounts 368 and 370) in addition to those required to be provided without contribution under section 98.2 of this Part, the utility shall impose a lump sum charge or a charge subject to the provisions in subdivision (e) of this section, at the option of the applicant. For a residing applicant, the lump-sum charge relating to a distribution line, a service line and appurtenant facilities (other than those accounted for in Accounts 368 and 370) shall be determined as set forth in the utility's tariff.

(c) If an applicant for non-residential service or a non-residing applicant chooses, pursuant to section 98.2(b) (1) (ii) of this Part, to pay a utility for acquiring the necessary R/W, the utility shall impose a lump sum charge on the applicant to cover the reasonable actual costs of acquiring such R/W.

(d) If a residing applicant chooses pursuant to section 98.2(b) (1) (ii) of this Part to pay a utility for acquiring the necessary R/W, the utility shall impose on the applicant either a lump sum charge or a charge subject to the provisions of subdivision (e) of this section, at the applicant's option, to cover the reasonable actual costs of

acquiring such R/W.

(e) If a residing applicant has chosen not to pay a lump sum amount, a utility shall impose a surcharge relating to the material and installation costs of distribution lines, service lines, and appurtenant facilities (other than those accounted for in Accounts 368 and 370) and to R/W acquisition costs, subject to the following provisions:

(1) the surcharge shall be applicable for ten years, shall be computed as specified in individual utility tariffs approved by the Commission and shall be paid annually or rateably for each billing period;

(2) if more than one customer is to be served from new overhead distribution lines and the length of the lines requested exceeds such customers' aggregate entitlement (that is, the number of customers multiplied by 500 feet or 300 feet -- for single-phase and three-phase service, respectively) the excess length shall be pro-rated among the customers for purposes of calculating the surcharge in paragraph (1) of this subdivision;

(3) after the commencement of service from a new overhead distribution line whenever the aggregate entitlement of the customers then served from the line (that is, the number of customers multiplied by 500 feet or 300 feet -- for single-phase and three-phase service, respectively) equals or exceeds the length of the distribution line initially constructed, the surcharge shall terminate as to all customers served from the distribution line;

(4) whenever the total revenue in each of any two consecutive calendar years from all customers served from a new overhead distribution line exceeds 1.5 times the reasonable actual capital cost of the total distribution line, all surcharges shall cease;

(5) no surcharges shall be imposed if the total estimated revenue in each of any two consecutive calendar years from all customers served from a new distribution line exceeds 1.5 times the reasonable actual capital costs of the total distribution line; and

(6) customers who are currently paying a surcharge may, at their option convert to a 10-year surcharge, with years and amounts already paid credited, or be relieved of their surcharge, if their payments meet or exceed the installation costs of their facilities.

(f) If an applicant on whom a utility has imposed a surcharge, in accordance with subdivision (e) of this section, changes his or her ownership of the residence after the imposition of such surcharge, the utility may collect the remainder of the surcharge from any new successor owner provided the utility provides in its surcharge agreement

in bold face type: APPLICANT HEREBY AGREES TO INFORM ALL PROSPECTIVE PURCHASERS OF THIS PROPERTY THAT A UTILITY SURCHARGE IS IN EFFECT.

(g) If facilities are extended to provide service to a residing applicant who pays a lump-sum charge pursuant to subsection (b) of this section, and other applicants subsequently take service from such facilities within ten (10) years, the first residing applicant shall receive a refund in accordance with each utility's tariff.

(h) If a non-residing applicant has paid a lump-sum charge pursuant to subdivision (a) of this section and if, after the underground distribution system construction is completed, additional dwelling units are constructed and take service from such system within the residential subdivision boundaries as defined on the map submitted pursuant to section 98.2(d) of this Part, the utility shall recalculate the charge paid pursuant to subdivision (a) of this section as if the additional dwelling unit(s) had been constructed at the time of the utility's original construction within the residential subdivision and make an appropriate refund of such charge without interest. Any portion of the charge remaining unrefunded five years after the date on which the utility is first ready to render service from the distribution system shall be retained by the utility and credited to the appropriate plant accounts.

(i) Where a residing applicant has chosen to pay a surcharge pursuant to subdivision (b) of this section, such applicant shall at any time, have the option of paying the outstanding balance in a lump sum.

.SO DOC 16A-98.4 NYCRR

98.4 Facilities beyond public rights-of-way.

The portion of the electric distribution system and/or electric service line beyond the limits of a public R/W shall be provided, placed, constructed and maintained in accordance with such reasonable rules for the construction and maintenance thereof as may be filed in the tariff schedules of each utility consistent with Parts 100 and 101 of this Title. If a utility installs distribution facilities beyond the limits of a public R/W or an applicant does so pursuant to the utility's tariff, or if a utility installed distribution facilities beyond the public R/W or allowed an applicant to do so in the past, the utility shall maintain, repair and if necessary replace at its own expense such distribution facilities, provided that any necessary easements are provided by the applicant or customer. If a utility installs a service line beyond the limits of a public R/W, the utility shall maintain,

repair and if necessary replace such service line, at its own expense, to the same extent that the utility bore the cost of installing the service line, and provided that any necessary easements are provided by the applicant or customer.

.SO DOC 16A-98.5 NYCRR

98.5 Facilities within public rights-of-way.

Each utility shall hereafter be solely responsible for the maintenance and replacement of all facilities placed within a public R/W (or another R/W when such utility elects to use another R/W for the construction of distribution lines in lieu of constructing facilities in a public R/W) used by such utility for supplying electricity to its customers. If adequate maintenance requires the reconstruction or replacement of such facilities, they shall be reconstructed or replaced by the utility responsible for maintenance as hereinbefore provided.

.SO DOC 16A-98.6 NYCRR

98.6 Reports.

(a) By no later than May 1st of each year, each utility shall file a report containing the information required by this section based on pertinent construction experience from a 12-month period ending no more than four months before the date on which the utility files its report.

(b) As part of the report required by subdivision (a) of this section, each utility shall provide with respect to underground residential subdivisions:

(1) the average cost per foot of each of the following, based on all such facilities (including appurtenant facilities other than those accounted for in accounts 368 and 370) installed underground for residential subdivisions, as set forth in the utility's tariffs:

- (i) all underground supply line;
- (ii) all underground distribution line (within such subdivisions); and
- (iii) all underground service line.

(2) the length of distribution trench in new residential subdivisions shared with others;

(3) the utility's average cost per foot of such shared distribution trench;

(4) the total length of distribution trench in new residential subdivisions not shared with others;

(5) the utility's average cost per foot of such nonshared distribution trench;

(6) the total length of supply lines placed underground between existing electric systems and new residential subdivisions;

(7) the utility's average cost per foot of such supply lines placed

underground;

(8) the total length of supply lines placed aboveground between existing electric systems and new residential subdivisions;

(9) the utility's average cost per foot of such supply lines placed above-ground;

(10) the total number of service lines installed by the utility in new residential subdivisions (If the utility does not install underground service lines, indicate this and provide the total dollar amount of the credit allowed by the utility);

(11) the total length of service lines installed by the utility;

(12) the total cost of service lines installed by the utility; and

(13) the average cost per foot of service lines installed by the utility in new residential subdivisions;

(c) As part of the report required by subdivision (a) of this section, each utility shall provide the information required by subdivision (e) of this section for:

(1) overhead and underground distribution lines and service lines installed in VSRs;

(2) underground distribution lines and service lines installed in areas which are both outside VSRs and residential subdivisions, on a statistical sampling basis, as set forth in each utility's report; and

(3) overhead distribution lines and service lines installed in areas which are both outside VSRs and residential subdivisions, on a statistical sampling basis, as set forth in each utility's report.

(d) As part of the report required by subdivision (a), each utility shall provide:

(1) a frequency distribution of customers by footage interval of no more than 50 feet, of the samples described in paragraphs (c) (2) and (3) of this section;

(2) an indication of how much it spent of its maximum obligation described in section 99.2(a) of this Title.

(e) The annual report to the Commission shall include information for overhead and underground lines in the following format:

(1) No. of service lines capitalized:

(i) VSR;

(ii) Non-VSR outside residential subdivision.

(2) Total length of service lines in (1) of this subdivision:

(i) VSR;

(ii) Non-VSR outside residential subdivisions.

If the utility does not install underground service lines, indicate this and provide for service lines paid for by the utility, and the

credit allowed by the utility.

(3) Total cost of service lines in (2) of this subdivision:

(i) VSR;

(ii) Non-VSR outside residential subdivisions.

(4) Cost per foot of service line (paragraph (3) divided by paragraph (2)) of this subdivision:

(i) VSR;

(ii) Non-VSR outside residential subdivisions.

(5) Total length of distribution line capitalized:

(i) VSR;

(ii) Non-VSR outside residential subdivisions.

(6) Total cost of distribution line in paragraph (5) of this subdivision:

(i) VSR;

(ii) Non-VSR outside residential subdivisions.

(7) Cost per foot of distribution line (paragraph (6) divided by paragraph (5) of this subdivision):

(i) VSR;

(ii) Non-VSR outside residential subdivisions.

Note: The above information regarding underground and overhead distribution and service lines outside VSRs and residential subdivisions is provided on a statistical sampling basis in accordance with subdivision (c) of this section.

(f) A copy of the information sheet, required by section 98.7(a) of this Part, shall be included in the report required by this section.

.SO DOC 16A-98.7 NYCRR

98.7 Information on line extension costs.

Each utility shall prepare an information sheet describing line extension procedures and costs to be given to persons inquiring about line extensions.

.SO DOC 16A-PT99 NYCRR

PART 99

NEW CONSTRUCTION OF DISTRIBUTION LINES, SERVICE LINES, AND APPURTENANT FACILITIES IN CERTAIN VISUALLY SIGNIFICANT RESOURCES OUTSIDE RESIDENTIAL SUBDIVISIONS

(Statutory authority: Public Service Law, §§ 65 (1), 66 (1))

Sec.

99.1 Applicability

99.2 Procedures and requirements

.SO DOC 16A-99.1 NYCRR

Section 99.1 Applicability.

(a) The requirements of section 99.2(a) of this Part apply to the new construction of distribution lines, service lines and appurtenant facilities (other than pursuant to either the provisions of Part 100 of this Title that require underground construction, or to the requirement of any other governmental authority having jurisdiction to require underground construction) on public and private land in VSRs where an agency referred to in section 99.2(h) of this section:

(1) has no statutory authority to require the underground construction of a particular distribution line, service line or appurtenant facility; and

(2) has supplied to the affected utility(ies) and to the Commission a map of the particular VSR (at a scale appropriate to such VSR) showing its boundaries in sufficient detail to permit the utility to comply with the requirements of this Part.

(b) Notwithstanding the provisions of this Part, where any telephone company has been permitted to install a distribution or feeder facility necessary to furnish permanent telephone service overhead in a particular VSR, in accordance with the procedures set forth in section 608.2 of this Title, a utility may install a distribution line, service line or appurtenant facilities necessary to furnish permanent electric service overhead using the poles which were used for the telephone facility.

(c) This Part shall remain in full force and effect for a period of five years after its effective date.

.SO DOC 16A-99.2

NYCRR

99.2 Procedures and requirements.

(a) Each utility shall allocate annually to a VSR undergrounding fund an amount equal to the greater of:

(1) the average of its annual expenditures on the underground installation of new underground distribution lines, service lines or appurtenant facilities within residential subdivisions for the years 1985, 1986 and 1987; or

(2) 0.14 percent of its 1987 sales to ultimate customers. The amount to be allocated to the fund shall be adjusted for inflation each year according to the Handy-Whitman Index. The amount in the fund is the company's maximum obligation in a given year. Each utility shall install or provide for the installation of new underground distribution lines, service lines or appurtenant facilities under this Part unless it has expended its maximum obligation in a given year. Each utility shall spend up to such maximum obligation on the cost of installing such facilities underground that exceeds what an applicant for a line

extension would have paid for facilities had the area not been designated as a VSR.

Note: For example, for a 120-foot line of single phase service to a residential applicant in a VSR, with an overhead construction cost per foot of \$5 and underground construction cost per foot of \$20, the total cost of overhead construction would be \$600 and undergrounding \$2400. Overhead construction with a 500-foot allowance would cost the utility \$600 (\$5.00 per foot times 120 feet) and the applicant would pay nothing. If the utility had not spent its maximum obligation and undergrounding is appropriate, the utility would pay a total of \$2,400 from the VSR maximum obligation fund. The applicant would pay nothing.

For a 700-foot line, under the same circumstances assuming the same costs, the total cost of overhead construction with a 500-foot allowance would cost the utility \$2500 (\$5.00 per foot times 500 feet) and the applicant would pay \$1,000 (\$5.00 per foot times 200 feet). If the utility had not spent its maximum obligation, and undergrounding was appropriate, the utility would pay a total of \$13,000 from the maximum obligation fund.

The applicant would pay \$1,000.

If a utility spends in excess of its maximum obligation in a particular year, the excess shall reduce its maximum obligation of the following year by the amount of such excess. After a utility spends its maximum obligation in a particular year, additional VSR undergrounding is not required in that year. If a utility does not spend its maximum obligation in a given year, any unspent portion shall be carried over to the next year.

(b) In addition to other procedures which may apply in connection with the proposed construction of a particular distribution line, service line or appurtenant facilities:

(1) if a utility has not expended its maximum obligation as described in subdivision (a) of this section in a particular year when it chooses to propose or receives a written application for service to a premises which necessitates the new construction of a distribution line, service line or appurtenant facilities on public or private land in a VSR, the utility shall provide a written report to the agency which designated or administers the VSR, any agency having jurisdiction over affected public land and the Commission, of its intention to install, or provide for the installation of, the necessary facilities underground or overhead (including a project description and consideration of the factors set

forth in subdivision (j) of this section), at least 60 days before construction is planned to commence;

(2) notwithstanding the provisions of paragraph (1) of this subdivision, a utility may provide the written report described therein within 30 days after the commencement of construction if the necessary distribution line, service line or appurtenant facilities are installed overhead on a temporary basis, pending the review of the utility's report if the visual impact of the temporary service is mitigated, to the extent appropriate, after the procedures of this section are followed;

(3) notwithstanding the provisions of paragraph (1) of this subdivision, a utility may install permanent overhead facilities if the utility, before installation:

- (i) determines that the situation is an emergency;
- (ii) obtains the written approval of the appropriate agency(ies); and
- (iii) upon written request, obtains the written approval of the secretary of the commission.

(4) if undergrounding is otherwise required in a VSR, and if the per-foot cost of installing the necessary facilities will be greater than two times the charge per foot filed pursuant to section 98.6(b) (1) of this Title and as set forth in the utility's tariff, the utility or the applicant may petition the Secretary of the Commission to allow overhead installation.

Approvals shall be granted or denied based on economic, engineering, environmental, emergency or hardship considerations.

(c) Unless the agency(ies) described in subdivision (b) of this section provide(s) written notification in-hand to both the utility and the Commission objecting to the utility's proposal within 30 days after receipt of the utility's report, the utility may install or provide for the installation of the facilities in question as contemplated in its report. The utility may also proceed as contemplated in its report within such 30-day period if the agency(ies) provide(s) written notification to both the utility and the Commission concurring with the utility's proposal.

(d) If the agency(ies) described in subdivision (b) of this section provide(s) written notification in-hand to both the utility and the Commission objecting to the utility's proposal (including a detailed explanation of such objection) within 30 days after receipt of the utility's report, the Commission shall review the report and notification(s) filed by the utility and the agency(ies).

(e) Unless the Commission serves on the utility an order requiring the

installation of the facilities in question to be performed in a different manner than that contemplated by the utility within 30 days after the Commission's receipt of the agencies' notification pursuant to subdivision (d) of this section, the utility may install or provide for the installation of such facilities as contemplated in its report. The utility may also proceed as contemplated in its report within such 30-day period if the Commission serves on it an order concurring with the utility's proposal.

(f) If an agency referred to in subdivision (h) of this section intends to supply a map or maps of a VSR(s) listed in such subdivision to the affected utility(ies) and the Commission, such agency shall consult with such utility(ies) and the Commission's staff as to the appropriate scale(s) and other details of such map(s).

(g) If an agency referred to in subdivision (h) of this section has a VSR map prepared before the effective date of these regulations, such map may be filed with the Commission and utilities without consultation if the map otherwise complies with section 99.1(a) (2) of this Part.

(h) A VSR is:

(1) one of the following resources which is designated as having high scenic quality:

(i) scenic areas of statewide significance (in coastal areas), designated by the Secretary of State pursuant to article 42 of the Executive Law;

(ii) Adirondack park scenic vistas, designated by the Adirondack Park Agency, identified on the Private Land Use and Development Plan Map and listed in the State Land Master Plan for the Adirondack Park pursuant to article 27 of the Executive Law;

(iii) Scenic roads, designated by the Commissioner of Environmental Conservation pursuant to article 49 of the Environmental Conservation Law;

(iv) Scenic districts, designated by the Commissioner of Environmental Conservation pursuant to article 49 of the Environmental Conservation Law;

(v) State and national wild and scenic river areas administered respectively by either the Department of Environmental Conservation or the Adirondack Park Agency pursuant to article 15 of the Environmental Conservation Law, and by the Department of Interior, pursuant to 16 U.S.C. §1271; and

(vi) Areas of exceptional scenic beauty, acquired pursuant to the 1986 Environmental Quality Bond Act and administered by the Department of Environmental Conservation.

(2) any area in one of the following resources which is determined to have high scenic quality by the agency with jurisdiction over the affected resource, as long as such determination is filed with the Commission:

(i) State nature and historic preserve areas designated by the Legislature.

(ii) State parks, which were so designated for their scenic quality by the Legislature, the Department of Environmental Conservation or the Office of Parks, Recreation and Historic Preservation, including the Adirondack and Catskill Parks.

(iii) Lake George Park, except incorporated villages, administered by the Lake George Park Commission, pursuant to article 43 of the Environmental Conservation Law.

(iv) Parks within New York State administered by the Palisades Interstate Park Commission pursuant to article 9 of the Parks, Recreation and Historic Preservation Law.

(v) State historic sites owned by the Office of Parks, Recreation and Historic Preservation under article 19 of the Parks, Recreation and Historic Preservation Law and Title 9 NYCRR Part 384.

(vi) National historic sites, national seashores and national recreation areas located in New York State and operated by the National Park Service.

(i) The listing of VSRs in subdivision (h) of this section constitutes a determination that the new construction of distribution lines, service lines and appurtenant facilities underground is generally more appropriate therein than elsewhere. Neither such listing nor any agency's provision of a map of a given VSR to the affected utility and the Commission, however, shall create a presumption that construction of particular facilities underground is appropriate. The propriety of such construction shall, instead, be determined in accordance with the procedures set forth in subdivisions (b)-(e) of this section.

(j) In evaluating the utility's proposal pursuant to subdivision (e) of this section, the Commission will consider such factors as:

(1) the nature of the visual setting in the vicinity of the proposed construction, including the character of existing or proposed adjacent structures or land areas, unless a governmental authority with jurisdiction has plans to improve the scenic quality of the area in question;

(2) the probable environmental effects associated with both overhead and underground construction;

(3) any expected engineering difficulties associated with both

overhead and underground construction; and

(4) the estimated costs associated with both overhead and underground construction.

(k) In the event a utility either intends at its own discretion or is required pursuant to this Part to place a distribution line, service line or appurtenant facilities underground, it shall inform the telephone company and cable television company serving the area in which the underground construction is to be located. If a new common access route from existing facilities to the location of such underground construction will be used, the portions of the connecting facilities of the utility, the telephone company and cable television company that are located in a VSR shall be placed underground.

(l) A utility shall install any necessary distribution line, service line or appurtenant facilities, with sufficient capacity and using suitable material which, in its judgment, will assure that an applicant receives safe and adequate service. Such installation shall be undertaken as soon as is reasonably possible after compliance with the procedures contained in this Part and shall be made at a time appropriate to render service. Construction shall not be delayed by the utility except where such delay is caused by strikes, fire, flood, inclement weather, unavailability of materials, civil disorders or other conditions beyond the control of the utility.

(m) Any interested agency or person may petition the Commission to add additional categories to the VSR list of subdivision (h) of this section. The Commission will approve or disapprove the addition of a proposed category based on whether the category fits within the VSR definition in section 98.1(l) (1) of this Title.

(n) The VSR program shall be evaluated by the Commission after the program has been in effect for two years. Utilities shall submit to the Department within six months after the program has been in effect for two years, details of their experience with the program including: all locations of line extension construction in VSRs, the total length of all facilities undergrounded in VSRs, costs incurred by the utility, costs incurred by applicants for their share of line extension costs, problems encountered with the program, suggestions for changes in the program or any other information the utility deems relevant to evaluation of the VSR program. The Department of Public Service staff and/or the Commission may request, and the utilities shall provide, any information the Commission or staff deem relevant to evaluation of the VSR program.

PART 100
New CONSTRUCTION OF DISTRIBUTION LINES, SERVICE LINES
AND
APPURTENANT FACILITIES IN RESIDENTIAL SUBDIVISIONS

(Statutory authority: Public Service Law,
§ 31(4), 51, 65(1), 66(1))

100.1 New construction of underground facilities in residential subdivisions

100.2 Connection from existing electric facilities to residential subdivisions

100.3 Deposits by applicants

100.4 Cooperation by applicants

100.5 Special conditions

.SO DOC 16A-100.1

NYCRR

Section 100.1 New construction of underground facilities in residential subdivisions.

(a) This Part applies to the new construction of distribution lines, service lines and appurtenant facilities within residential subdivisions. Nothing in this Part shall be construed to compromise the ability of a state or local agency to require underground facilities in the exercise of its land use or environmental protection authority.

(b) Any distribution line, service line and appurtenant facilities necessary to furnish permanent electric service to one or more multiple occupancy buildings (including four or more dwelling units) shall be installed underground and any such facilities necessary to furnish permanent electric service within a residential subdivision in which it is planned to build five or more new residential buildings shall be installed underground if:

(1) the residential subdivision will require no more than 200 trench feet of facilities per dwelling unit planned within the residential subdivision; or

(2) a utility's tariff provides for such underground service without contribution; or

(3) a governmental authority having jurisdiction to do so has required undergrounding; or

(4) an applicant requests undergrounding.

Note: The number of dwelling units is the criterion to be used to determine whether installation is required to be underground. In order to ascertain the number of dwelling units, it is necessary to consult the approved subdivision map to determine how dwelling units are

planned. Each lot shown on the map should, in the case of a single family dwelling, be considered to contain one dwelling unit unless there is sufficient contrary evidence to render it unlikely that each lot will contain a separate dwelling unit (e.g., a foundation is constructed occupying two lots). The measurement of trench footage should be the shortest distance required to serve the homes within the residential subdivision, consistent with the utility's obligation to provide safe and adequate service.

(c) Upon receipt of a proper application, the utility shall inform the telephone company and cable television company serving the area in which the residential subdivision is located, of the receipt of such application. Upon compliance by the applicant with the requirements of this Part, the utility shall install underground electric distribution lines with sufficient capacity and suitable material which, in its judgment, will assure that the applicant will receive safe and adequate electric service. Such installation shall be undertaken by the utility as soon as is reasonably possible after receipt of a proper application and shall be made at a time appropriate to render service. Construction will not be delayed by the utility so that the applicant will be delayed in the sale or other disposal of the buildings, or lots, except where such delay is caused by strikes, fire, flood, inclement weather, unavailability of materials, civil disorders, or other conditions beyond the control of the utility. No overhead circuits, including street lighting circuits, shall thereafter be installed by a utility within a residential subdivision having underground electric distribution lines.

(d) The utility is permitted to designate the service connection point to a residential building or to a multiple occupancy building and the point at which any service line will connect to the utility's electric distribution line or equipment. Each service line within the lot line and running to the building shall be installed either by the utility, or by the applicant in accordance with the utility's specifications, as the utility may elect and in accord with the utility's tariff, provided, however, that the utility's tariff must permit the applicant at least to excavate the trench necessary for the underground installation of distribution lines, service lines or appurtenant facilities within the residential subdivision, and provided, further, that allocation of the costs of such installation shall be determined in accordance with § 98.2 regardless of who installs the service line.

(e) A utility may install overhead distribution lines in a residential subdivision or section thereof otherwise required to have underground distribution lines in accordance with subdivision (b) of this section

when:

(1) the developer of the residential subdivision is not primarily engaged in the construction of dwelling units within the residential subdivision;

(2) no governmental authority having jurisdiction to do so has required underground service; and

(3) either:

(i) five years have elapsed from the sale of the first lot within the residential subdivision to the first application for installation and the utility has no indication that there will be other new applicants in the residential subdivision within six months; or

(ii) five years have elapsed from the time of final approval of the residential subdivision or section thereof and less than 25 percent of the lots have been sold in the residential subdivision or any section thereof except where 10 percent or more of the lots in the residential subdivision or any section thereof have been sold within the last two years.

Note: The term final approval refers to authorization of a residential subdivision by governmental authorities having jurisdiction. A residential subdivision is finally approved when all necessary governmental consents have been obtained to allow the developer of the residential subdivision to sell lots and/or build residences. If a residential subdivision need only be approved by a County Health Department the final approval of that agency in accordance with its regulations when received is final. If the Town Planning Board must give its consent as well, final approval is not obtained until the Board and the Health Department have completed their processes of authorization. A section of a residential subdivision is the smallest unit of a subdivision given final governmental approval. If, for example, the developer of a subdivision submits a preliminary plan covering 100 lots but initially only 50 are finally approved, the 50 lot portion is a section of the subdivision. If the residential subdivision contains sections, the percentage of lot sales required by condition (3) must be met by every section of the subdivision and not just the section in which the distribution facilities are to be installed. In cases where overhead installation would be permissible in accordance with condition (3) (paragraph (3) of this subdivision), except that less than five years have elapsed and the utility has reason to believe that the residential subdivision will not be developed sufficiently soon to permit the orderly utilization of underground lines installed to serve the initial applicant(s), the utility may petition the Commission to

allow overhead installation. Such petition shall set forth the relevant economic, engineering, or environmental factors. The petition shall be granted or denied based on those factors. If the residential subdivision is located within the Adirondack Park, the utility shall send a copy of the petition to the Adirondack Park Agency.

(f) If a utility receives an application for service within a residential subdivision which is governed by the provisions of subdivision (b) of this section, and the per-foot cost of installing the necessary distribution lines, service lines and appurtenant facilities (other than those accounted for in Accounts 368 and 370) will be greater than two times the cost of installing such facilities as calculated using the applicable charges per foot filed pursuant to § 98.6(b) (1) of this Title and as set forth in the utility's tariff, the utility or applicant may petition the Secretary of the Commission to allow overhead installation. Such petition shall be filed in accordance with the requirements of § 3.5 of this Title and set forth the relevant economic, engineering, or environmental factors. The petition shall be reviewed by staff. The Secretary shall notify the petitioner within 60 days of receipt of the petition either that the petition is granted or that staff objects to it. If staff objects, the petition shall be referred to the Commission for further review. The petition shall be granted or denied based on economic, engineering, or environmental factors. If the residential subdivision is located within the Adirondack Park, the utility shall send a copy of the petition to the Adirondack Park Agency.

.SO DOC 16A-100.2

NYCRR

100.2 Connection from existing electric facilities to residential subdivisions.

(a) The connection from the existing electric distribution system to the underground distribution lines installed within the applicant's residential subdivision shall be made in accordance with the following requirements:

(1) a utility may, at its discretion and expense, install or provide for the installation of lengths of underground supply line in addition to that portion which is required to be provided without contribution to applicants pursuant to section 98.2 of this Title; and

(2) where any part of a supply line in excess of the footage requirements of section 98.2 of this Title is to be placed overhead, an applicant must submit a written application to the utility at least 75 days prior to the projected commencement of the construction of the supply line, and the utility must report such projected construction to the Commission no later than 45 days before such construction is

commenced, the Commission reserving the right to require the underground installation of particular lines, on the basis of the relevant economic, engineering, or environmental factors.

(b) In the event a utility either intends, at its own discretion, or is required pursuant to this Part, to place underground connecting supply lines between an existing electric system and the underground distribution lines installed within an applicant's residential subdivision, it shall inform the telephone company and cable television company serving the area in which the residential subdivision is located. If a new common access route from the existing electric system to the residential subdivision will be used, the connecting supply lines of the utility and the telephone company and cable television company shall be placed underground.

.SO DOC 16A-100.3

NYCRR

100.3 Deposits by applicants.

(a) In order to guarantee performance, a utility may require from a nonresiding applicant before construction is commenced a deposit equal to the estimated cost of construction. This deposit is in addition to the applicant's payment of its share of costs for installation and such deposit shall be returned to the applicant with interest, at the rate specified by the Commission for interest on deposits, on a pro rata basis as each new customer is connected with service from the utility.

(b) Any portion of the deposit remaining unrefunded five years after the date the utility is first ready to render service from the underground electric distribution lines shall be retained by the utility and credited to the appropriate plant accounts.

(c) Upon the mutual agreement of both a utility and an applicant, a bond may be posted in lieu of any deposit.

.SO DOC 16A-100.4

NYCRR

100.4 Cooperation by applicants.

(a) Each applicant shall cooperate with the utility providing service in an effort to keep the cost of the construction and installation of underground electric distribution lines, service lines and appurtenant facilities as low as possible, consistent with requirements for safe and adequate service, including reasonable provision for load growth and requirements of Part 101 of this Title.

(b) The utility may require that all sewers, water facilities, drainage facilities, and curbs be installed before it commences construction within a residential subdivision.

.SO DOC 16A-100.5

NYCRR

100.5 Special conditions.

(a) This section governs the new construction of distribution lines, service lines and appurtenant facilities performed pursuant to this Part.

(b) In unusual circumstances when the application of this Part appears impracticable or unjust to either party, or discriminatory to other customers, the utility providing service or the applicant may file a petition, in accordance with the requirements of § 3.5 of this Title, for a special ruling or for the approval of special conditions which may be mutually agreed upon before construction is commenced, which petition shall set forth relevant economic, engineering, and environmental factors.

(c) If the utility or the applicant believes that the new construction of underground distribution lines, service lines or appurtenant facilities within a residential subdivision would be less environmentally desirable than the new construction of overhead facilities, it may request that the secretary of the Commission grant an exception. The request shall be sent to the Secretary in accordance with the requirements of § 3.5 of this Title. The request shall:

(1) as between overhead and underground construction, compare the probable environmental effects associated with the residential subdivision and any economic, engineering, or other factors considered pertinent to the case by the utility or applicant to be served;

(2) for those instances where visual values would be diminished by underground construction, indicate factors bearing on probable retention of significant flora, including the utility's practice with respect to trimming trees in the vicinity of the overhead facilities;

(3) be mailed to the Adirondack Park agency, whenever the request will involve construction within the Adirondack Park; and

(4) be reviewed by staff. The Secretary shall notify the utility within 60 days of receipt of the request either that the request is granted or that it objects to the request. If staff objects, the request shall be referred to the Commission for further review. Requests and petitions shall be granted or denied based on environmental, economic or engineering factors.

(d) Service to a residential subdivision may be supplied overhead under the following circumstances:

(1) if no governmental authority having jurisdiction to do so has required undergrounding and the utility can provide service to the entire subdivision:

(i) by extending its facilities no more than 600 feet in a cul-de-sac where a portion of the street within the subdivision is served by

overhead facilities within or at the entrance of the cul-de-sac;

(ii) by connecting an area between existing overhead facilities for a distance of 1,200 feet or less;

Note: In order to determine whether 1,200 feet or more of facilities must be constructed to connect existing overhead facilities, the measurement should be along the route of construction. This will usually be the street within the residential subdivision.

(2) if no governmental authority having jurisdiction to do so has required undergrounding, by installing service lines to new applicants from existing overhead lines.

(e) Where a utility constructs overhead lines because of reasons in paragraph (1) of subdivision (d) of this section, it shall report such overhead construction to the commission quarterly along with a description of the project.

(f) Where a one-pole extension, including but not limited to road crossing pole extensions, would enable an existing overhead distribution line to be connected to a proposed distribution line in a residential subdivision, such extension may be installed overhead, rather than underground.

.SO DOC 16A-PT101

NYCRR

PART 101

UNDERGROUND ELECTRIC FACILITY CONSTRUCTION

(Statutory authority: Public Service Law, §§ 65, 66)

Sec.

101.1 Definitions

101.2 Clearance requirements of new underground electric facilities from gas and liquid petroleum pipelines

101.3 Clearance requirements of subsurface electric facilities constructed to replace existing facilities

101.4 Standards and practices applicable to the construction and environmental management of subsurface electric facilities

.SO DOC 16A-101.1

NYCRR

Section 101.1 Definitions.

When used in this Part, the following definitions apply:

(a) Subsurface electric facilities means all underground cable and/or conduit, transformers and other associated equipment, manholes or any other subsurface structures, including poles and anchors, utilized to furnish electric service and owned or operated by any electric utility company under the jurisdiction of the New York State Public Service Commission.

(b) Gas transmission facilities means gas pipelines that:

(1) transport gas from a production or underground storage facility to a distribution center or underground storage facility;

(2) transport gas within a storage field; or

(3) operate at a pressure of 125 psig or more.

(c) Gas distribution facilities means gas pipelines other than gas transmission facilities and includes gas service lines.

(d) Liquid petroleum pipeline means a pipeline that either:

(1) transports liquid petroleum from a production or storage facility to a distribution center or storage facility; or

(2) transports petroleum within a production field; and

(3) is certified to operate at a pressure of 200 psig or more.

(e) Land used in agricultural production (as defined in Agricultural and Markets Law, section 301), means not less than 10 acres of land used as a single operation in the preceding two years for the production of an average gross sales value of \$10,000 or more. For the purposes of this subdivision, whenever a crop is processed before sale, the average gross sales value shall be based upon the market value of such crop in its unprocessed state. Land used in agricultural production shall not include land or portions thereof used for processing or retail merchandising of such crops, livestock or livestock products. Land used in agricultural production shall also include:

(1) rented land which otherwise satisfies the requirements for eligibility for an agricultural assessment;

(2) land of not less than 10 acres used as a single operation for the production for sale of crops, livestock or livestock products, exclusive of woodland products, which does not independently satisfy the gross sales value requirement, where such land was used in such production for the preceding two years and currently is being so used under a written rental arrangement of five or more years in conjunction with land which qualifies for an agricultural assessment;

(3) land used in support of a farm operation or land used in agricultural production, constituting a portion of a parcel, as identified on the assessment roll, which also contains land qualified for an agricultural assessment;

(4) farm woodland which is part of land which is qualified for an agricultural assessment, provided, however, that such farm woodland attributable to any separately described and assessed parcel shall not exceed fifty acres. For purposes of determining average gross sales value, proceeds from the sale of woodland products from farm woodland eligible to receive an agricultural assessment may be included up to a maximum annual amount of \$2000; and

(5) land set aside through participation in a federal conservation program pursuant to title one of the federal food security act of nineteen hundred eighty-five or any subsequent federal programs established for the purposes of replenishing highly erodible land which has been depleted by continuous tilling or reducing national surpluses of agricultural commodities.

(f) Cultivated land (as defined in 1 NYCRR section 370.2 (j)) means land used for growing crops, hay, pasture, and permanent pasture for the preceding two years.

(g) Farm operator is a person who owns or leases land used in agricultural production.

(h) Double-ditching is a method of separately excavating and stockpiling the topsoil layer (i.e., the A horizon) of a respective soil from the subsoil/substratum layers.

(i) Sensitive resources means areas that are likely to be adversely affected by electric facility construction, including: wetlands; streams; waterbodies; springs; wells; rare, threatened and endangered species habitat; unique old forest stands; officially designated scenic areas; officially designated historical and cultural resources; soil resources contained in cultivated land requiring land management facilities and practices on or below the surface and specialty cropland (i.e., vineyards, apiaries, hop fields, orchards, sugar bush, etc.).

(j) Noise-sensitive uses means those land uses which may be adversely affected by noise; for example, residences, schools, churches, cemeteries, hospitals and outdoor amphitheaters.

(k) Public R/W means the area within the territorial limits of any street, avenue, road or way that is for any highway purpose under the jurisdiction of the State of New York or a legislative body of any county, city, town or village, that is open to public use and that may be used for the placement of utility facilities.

(l) R/W (right-of-way) means a right to pass over, occupy or use another's land for placing and maintaining utility facilities.

(m) Direct buried cable installation by cable plowing means a procedure using specialized equipment which, in a linked sequence of operations, opens soils to the desired depth, places or lays in a utility service cable and replaces the temporarily disturbed surface soil.

.SO DOC 16A-101.2

NYCRR

101.2 Clearance requirements of new underground electric facilities from gas and liquid petroleum pipelines.

(a) All new subsurface electric facilities shall be constructed with a

standard minimum clearance of 12 inches from gas transmission facilities.

(b) All new subsurface electric facilities shall be constructed with a standard minimum clearance of six inches from gas distribution facilities.

(c) All new subsurface electric facilities shall be constructed with a standard minimum clearance of 12 inches from liquid petroleum pipelines.

(d) The standard minimum clearances specified in subdivisions (a), (b) and (c) of this section, when not obtainable through practical means, may be reduced to an absolute minimum of four inches, provided that such reduction is agreeable to all companies involved and that protective materials suitable to all companies are placed between the power and gas or liquid petroleum facilities for the entire length of such reduced clearances.

(e) The standard minimum clearance for underground service laterals shall be four inches from the gas service pipeline. If it is not practical to achieve this clearance, it may be reduced to an absolute minimum of two inches provided that all companies involved agree to the reduction and that suitable protective materials are placed between the gas and power facilities for the entire length of the reduced clearances.

.SO DOC 16A-101.3

NYCRR

101.3 Clearance requirements of subsurface electric facilities constructed to replace existing facilities.

Whenever subsurface electric facilities are replaced for any reason, the new facilities shall be constructed in accordance with section 101.2 of this Part.

.SO DOC 16A-101.4

NYCRR

101.4 Standards and practices applicable to the construction and environmental management of subsurface electric facilities.

(a) This section consists of standards and practices which the utilities are expected to follow, to minimize adverse environmental impacts associated with the construction of subsurface electric facilities under Parts 98, 99 and 100 of this Title. In this section, any reference to subsurface electric facilities does not include poles and anchors.

(b) The standards and practices contained in this Part are not intended to supersede the jurisdiction of any federal, state or municipal agency that has permitting or other regulatory requirements intended to protect environmental resources or values which may be adversely affected by the installation of subsurface electric

facilities. To accomplish the objectives set forth in this section, each utility shall stay in contact with directly affected landowners and governmental agencies having jurisdiction.

(c) Each utility shall use its best efforts to avoid or minimize, to the maximum extent practicable, any adverse environmental effects associated with the construction (including clearing and site-restoration activities) of subsurface electric facilities by:

- (1) limiting clearing of trees, shrubs and landscaped areas in accordance with safe construction, operating and maintenance practices;
- (2) minimizing off R/W impacts by confining construction activities and access to the smallest areas possible consistent with safe and efficient construction and operation practices;
- (3) scheduling construction for those times that would minimize damage or disruption to sensitive resources, and agricultural production activities (except as otherwise agreed to by the landowner);
- (4) minimizing disturbances to sensitive resources such as streams, wetlands or rare, threatened or endangered species habitats by limiting machinery movement in or near such resources during construction and throughout the life of the facility;
- (5) selecting construction and maintenance equipment that minimizes damage to and disruption of soils;
- (6) minimizing topsoil damage and soil erosion due to grading and other soil-scarifying activities by promptly stabilizing disturbed soil and employing soil separation as appropriate, and thereby preventing erosion and siltation and minimizing compaction; and,
- (7) minimizing traffic disruption when construction vehicles travel along or cross highway R/W by providing appropriate traffic controls.

(d) The clearing, construction and site restoration practices set forth in the following provisions shall be observed by each utility where applicable:

- (1) Each utility shall take care to prevent or minimize the grading or piling of soil off the R/W, particularly in cultivated land(s) and near streams and wetlands.
- (2) Before constructing a new access road, each utility should give preference to using existing access to the R/W; however, where steep slopes (over 20 percent) are encountered along the R/W or where soils, which would not support construction equipment or would result in extensive rutting or compaction are encountered, the construction of either a temporary or permanent off R/W access road shall be considered. However, the placement of permanent access roads in cultivated land shall be avoided wherever possible, unless such roads are requested or

agreed to by the landowner or farm operator.

(3) Each utility shall endeavor to complete stream crossings in the shortest amount of time, with the least amount of adverse environmental impact.

(4) Where necessary, each utility shall properly install temporary drainage and erosion control devices during clearing and grading operations, appropriately maintain them during construction and incorporate them, where necessary, into final grading operations.

(5) Before grading and trenching, each utility shall make an on-site effort to verify the location of any buried gas lines, water lines, sewer lines, drainage tiles or other facilities which may be encountered. All such facilities removed, cut, broken or otherwise damaged during facility construction shall be restored or replaced to at least their preexisting condition, unless the affected property owner declines such restoration or replacement or where such facilities would interfere with the safe and efficient operation and maintenance of the subsurface facilities.

(6) At the project planning stage, before initiating grading or trenching operations in cultivated land on land used in agricultural production (as demonstrated by the affected farm operator), each utility shall discuss with such farm operator and the appropriate County Soil and Water Conservation District the soil characteristics of the project area, drainage, irrigation, cultivation and other land management installations and practices, flood control, the proposed depth-of-cover above the facility and the appropriateness of topsoil segregation. In such cultivated land, all cable shall be installed with a minimum 40 inches of cover. However, the farm operator may require a depth-of-cover greater than 40 inches as a condition of permitting a right-of-way across his or her land where necessary to safely accommodate such practices and projects. In such cases, where practicable, the depth-of-cover shall be included in the easement recorded in the County Records Office. All such decisions should take into account the recommended practices and standards of the United States Department of Agricultural, Soil Conservation Service, as noted in the farm operator's Farm Conservation Plan on file with the County Soil and Water Conservation District. Notwithstanding the foregoing provisions concerning depth-of-cover, facilities located within 15 feet of the edge of the travel way of any private road or within 15 feet of the edge of any public R/W shall be buried at a minimum depth of 30 inches. Cable plow installation may be used in cultivated land unless the land within the area of construction contains subsurface drain lines. In those

cases, open trenching shall be used unless the farm operator agrees to cable plow installation. A generic plan and procedure for the repair of drain lines removed, cut, broken or damaged by either method of installation shall be developed by the utility with the Soil Conservation Service and the New York State Department of Agricultural and Markets showing the method(s) for shouldering of the tile drain line repair into the undisturbed trench wall, the support of the repair tile and the maintenance of the drain line's gravity flow. In all cases of removal, cutting, breakage or damage of drain lines during construction by the utility, repairs shall be undertaken at the utility's expense.

(7) Where adverse effects to significant plantings such as ornamental shrubs and trees, as well as visual screens, cannot be avoided during construction, such plants shall be carefully removed and planted in a temporary location and then be returned as close as possible to their original location following backfilling. If such plants must be removed and are destroyed, they shall be replaced with species and varieties as close as possible in height, diameter and grade to those removed. Exceptions would be where such vegetation would interfere with the operation and maintenance of the facility, the construction is done at the request of the affected landowner, or where the affected landowner and the utility agree otherwise. If the affected property has been the subject of federal, state or local agency review jurisdiction, the involved federal, state or local agency must also agree to the extent the resulting disturbance affects a condition of a previously issued permit or other approval. Transplanting and plant replacement shall be done consistent with established horticultural practices.

(8) In areas where livestock are confined or farm equipment is operating, all trenches which will remain open overnight or on nonworking days shall be temporarily fenced or barricaded, unless the trench shoring or sheeting material extends at least 40 inches above the working surface. Where reasonably determined to be necessary by the affected landowner or farm operator, temporary access shall be constructed to permit persons, vehicles and livestock to cross safely from one side of the trench to the other.

(9) Should dewatering of the trench become necessary, all water shall be filtered and dissipated through appropriate filter material or discharged onto vegetation or graveled areas, to prevent stream siltation, sedimentation and soil erosion. No such water shall be discharged onto cultivated land in the cropping season or directly into regulated streams, ponds or wetlands. If cultivated land receives discharges outside the cropping season, measures shall be applied to

dissipate the water to prevent soil erosion.

(10) Engine-powered construction equipment shall be properly muffled and maintained to avoid producing excessive noise. Such equipment shall not be permitted to idle unnecessarily near noise-sensitive uses. Near such uses, the quietest equipment which is readily available to each utility and appropriate for the task shall be employed. If blasting is necessary, explosive charges shall be controlled to limit the sound pressure level to 127 dB.

(11) Whenever artifacts or relics which appear to have historic value are uncovered during construction, work shall be stopped immediately at the site of impact and the State Historic Preservation Office shall be notified. Work elsewhere may continue. Construction at the impact site shall not be resumed until the State Historic Preservation Office or its designated representative determines the significance of the find and, if required, develops a plan to salvage or protect such resource. If prompt clarification of the situation by such officials is not forthcoming or if complications arise, the Commission shall be notified immediately.

(12) In restoring the R/W each utility shall:

(i) recycle all waste material or dispose of it in accordance with governing rules and regulations;

(ii) grade the entire disturbed R/W to restore it to original grade and contour, unless changes made to grade and contour are agreed to by the landowner;

(iii) contact the County Soil and Water Conservation District for the most appropriate seed mix and application rates in the construction area;

(iv) utilize the most appropriate seed mix and application rate, giving consideration to compatibility with undisturbed areas of the R/W and the surrounding land and consistent with erosion, wildlife and other environmental concerns;

(v) determine the site-specific seed mix to be applied in consultation with the affected farm operator;

(vi) by the end of the workweek in which construction commences, apply mulch (and seed, if no further disturbance is planned) on all disturbed sites within 20 feet of all streams and wetlands;

(vii) stabilize all cut and fill banks by employing the most appropriate erosion control devices and techniques;

(viii) complete stream bank restoration as soon as practicable after the stream crossing installation is completed. If seasonal conditions do not permit final restoration, temporary restoration measures shall be

undertaken, with final restoration measures to follow as soon as practicable thereafter; and

(ix) repair or replace (and leave in a condition equivalent to or better than, the preexisting) all existing installations or improvements, for example, lawns, fences, walls, curbs, sidewalks, culverts, mailboxes, gates, tiles, drainage ditches, waterways, and ponds which are disturbed, damaged or destroyed during construction, unless previous arrangements with landowners or farm operators dictate otherwise.

(e) Each utility shall ensure that the construction supervisor, who is on the job, appropriately applies the foregoing standards and practices. The supervisor shall also have authority to stop any work that is inconsistent with the intent of this section and to direct appropriate remedial action. The supervisor shall obtain a competent specialist's advice on how to deal with any sensitive resources encountered.

NYCRR

PART 102

INSTALLATION OF NON-ARTICLE VII ELECTRIC TRANSMISSION FACILITIES

(Statutory authority: Public Service Law, §§ 5, 65, 66)

Sec.

102.1 Definitions

102.2 Applicability

102.3 Classes of areas

102.4 Advantage-disadvantage analysis

102.5 Reports

102.6 Effective date

.SO DOC 16A-102.1

NYCRR

Section 102.1 Definitions.

The following words and terms when used in this Part, shall have the meaning indicated:

(a) Utility. An "electric corporation" as defined in article 1 of the Public Service Law.

(b) Commission. The Public Service Commission of New York State.

(c) Transmission facilities. Items of electric plant not subject to the commission's jurisdiction under article VII of the Public Service Law used to convey electric energy at 65 kv or higher voltage for distances one mile or longer including: towers, poles and appurtenant fixtures; wire, cable and devices; conduit, tunnel, conductors and devices.

(d) Subdivision. A tract of land divided into lots for residential buildings the plan for which has been approved by governmental authorities having jurisdiction.

(e) Central business district. (1) The centrally located, prime commercial district of a municipality, the focus of main traffic arteries and mass transit composed of retail trade, offices (including governmental functions), light manufacturing and commercialized recreational activities with few or no dwellings.

(2) Normally, a town or village has only one central business district, but metropolitan districts may have more than one. Commercial areas essentially one lot deep along a thoroughfare are more aptly described as strip developments and not central business districts. Central business districts occupy a relatively small proportion of the urbanized area--not over four percent even in the smallest cities and only 0.4 percent in the largest.

.SO DOC 16A-102.2

NYCRR

102.2 Applicability.

(a)(1) After the effective date of this Part, any utility proposing to construct overhead transmission facilities as defined in this Part which are not subject to article VII of the Public Service Law shall promptly report the proposed construction to the commission, but in no event less than 60 days prior to the proposed commencement of construction. The report shall include a description of the proposed transmission facility, and a map of the areas as categorized in section 102.3 of this Part. With respect to such transmission lines that are intended to be built overhead through priority areas specified in section 102.3(a) of this Part, the report shall also include the information required by section 102.4 of this Part. In cases where construction of the proposed transmission facility has been approved by a governmental agency having jurisdiction the report shall indicate such approval and the basis thereof.

(2) No report is required under this subdivision for upgrading or rebuilding transmission facilities on existing right-of-way provided that all of the following conditions are met:

- (i) no additional rights-of-way are required;
- (ii) there is no increase in the number of structures on the right-of-way;
- (iii) the resulting structures do not carry more than two circuits;
- (iv) no substantial modification will be made to existing vegetative cover on the right-of-way; and
- (v) the height of a new tower does not exceed the height of a replaced

tower by more than 10 feet.

(b) The commission after reviewing the utility's report or after appeal by an interested party may order a formal investigation if the commission finds that overhead construction of the proposed transmission facilities may not be in the public interest or may not be required for the performance of the utility's public service responsibilities with economy, efficiency and care for the public safety, the preservation of environmental values, and the conservation of natural resources. In the absence of a response from the commission within the 60-day notice period, the utility may deem itself free to proceed with the construction.

(c) The commission shall, if it conducts a formal investigation, advise the utility promptly whether the proposed transmission facility may be placed overhead or whether all or a portion of the proposed construction should be placed underground together with its reasons for requiring underground construction.

.SO DOC 16A-102.3

NYCRR

102.3 Classes of areas.

(a) For transmission lines in the following areas, the analysis required by section 102.4 of this Part must be included in the report of proposed construction:

(1) National and State parks, preserves, reservations, landmarks, and monuments formally so designated and acquired for their natural, scenic or cultural value by appropriate State and Federal agencies. (Included would be historic landmarks, national landmarks, national monuments and trails, and wild and scenic rivers.)

(2) Historic sites formally so designated by National or State agencies but without acquisition of rights or ownership sufficient for the purpose of preservation.

(3) Central business districts in cities and villages.

(4) Developed and partly developed residential areas with an existing density of one or more dwelling units per acre, as shown on approved subdivision maps, occupying a minimum contiguous area of 20 acres, all or a portion of which would be traversed by the proposed transmission facility right-of-way.

(b) Other areas for which reports, but without the analysis required by section 102.4 of this Part, are required are:

(1) Areas of outstanding natural or scenic value which are preserved by non-profit private agencies but which have not been formally so designated by national or State agencies.

(2) Areas of outstanding cultural value (e.g., attractive pastoral

scenes, locations of noteworthy architectural and/or social import both within and outside specific sites) that have been formally designated by the appropriate governmental authority.

(3) Existing local (city, town, village and county) parks and open space areas that have been formally established by governmental or private authorities.

(4) Public and semipublic facilities such as cemeteries, educational, correctional and medical facilities and military installations.

(5) Existing light industrial and commercial areas (e.g., industrial parks, shopping centers, office building complexes).

(6) Partially developed residential areas where the subdivision will have an eventual population density of one or more dwelling units per acre, as shown on approved subdivision maps, comprising a minimum contiguous area of 20 acres or a portion of which is traversed by the proposed transmission facility right-of-way.

(7) Areas of outstanding cultural value (e.g., attractive pastoral scenes, locations of noteworthy architectural and/or social import both within and outside specific sites that lend attractiveness to a neighborhood or community) that have not been formally designated by governmental or private authority.

(8) Residential areas with less population density than those specified in preceding categories.

(9) Planned and zoned undeveloped light industrial, commercial and residential areas.

(10) Managed woodlands (e.g., commercial and other productive forests).

(11) Agricultural districts established in accordance with article 25-AA of the Agriculture and Markets Law, and other farmlands.

(12) Existing and planned heavy industrial areas.

(13) Woods and open lands other than those included within areas specified in any priority area above.

.SO DOC 16A-102.4

NYCRR

102.4 Advantage-disadvantage analysis.

(a)(1) The advantage-disadvantage analysis required by this section is designed to provide a framework by which the features or facts which support one or another mode of construction can be identified clearly. Particular circumstances which reduce or enhance the benefits or affect the costs of underground construction, identified in the advantage-disadvantage analysis, will provide the basis for decision. Examples of factors which may affect a decision to underground would include the availability of suitable existing corridors, or the

likelihood of pronounced visual impact.

(2) The advantage-disadvantage analysis required by this section shall include at a minimum the items enumerated in section 102.4 of this Part. Data and/or all pertinent information for each item must be presented for both the underground and overhead alternative. The analysis of cost should be made on a present-worth basis for both alternatives over a period long enough to allow for appropriate incremental construction. Each submission shall contain an explanation of why the proposed transmission facility or portion thereof should be placed overhead or underground.

(b) The analysis shall include:

(1) Availability of existing corridors suitable for additional transmission facilities. (The availability of suitable existing corridors through a priority area, for example, may reduce the relative benefits of underground construction.)

(2) Capital construction costs. (Costs that may be capitalized under the uniform system of accounts.)

(3) Construction expense costs. (Costs that may not be capitalized.)

(4) Right-of-way acquisition costs.

(5) Anticipated total operation and maintenance costs including power losses for the depreciable life of the plant, discounted to present-worth, when the present worth of such losses is significant in comparison to other costs (subparagraphs (ii), (iii), and (iv) of paragraph (2) of subdivision (a) of section 102.2 of this Part).

(6) Relevant technological considerations.

(7) The relative effect on vegetation, wildlife, soils, erosion, streams, and other such natural features (as noted in biological surveys, water quality ratings, and land management policies and practices) of the construction methods proposed.

(8) The relative visual impact including incremental impact compared to existing surroundings.

(9) Relative availability of right-of-way for other uses: e.g., parks, recreation, farming, transportation.

.SO DOC 16A-102.5

NYCRR

102.5 Reports.

In addition to the reports required under section 102.3 of this Part, each utility shall also report semiannually transmission facilities constructed in the preceding six months but less than one mile in length. The report shall specify which of said overhead transmission facilities were constructed in areas listed under section 102.3(a) of this Part.

.SO DOC 16A-102.6

NYCRR

102.6 Effective date.

The procedures under this Part shall take effect six months after filing in the office of the Department of State.

.SO DOC 16A-PT105

NYCRR

PART 105

ELECTRIC UTILITY EMERGENCY PLANS

(Statutory authority: Public Service Law

§ 66(21))

Sec.

105.1 Preamble

105.2 Definitions

105.3 Submission of electric emergency plans

105.4 Content of electric emergency plans

105.5 Commission review and approval

105.6 Compliance with electric emergency plans

.SO DOC 16A-105.1

NYCRR

Section 105.1 Preamble.

These electric utility emergency plans are primarily intended to ensure adequate utility response for storm and storm-like emergencies; however, some aspects of the plans will have application to virtually all electric emergencies (e.g., customer contacts, communication with the media and government officials) and should be used accordingly.

.SO DOC 16A-105.2

NYCRR

105.2 Definitions.

For the purposes of this Part, the following definition shall apply:

(a) Storm drill. A storm drill is a training exercise held by an electric utility to test the adequacy and effectiveness of its regularly assigned personnel and personnel performing job functions outside of their normal areas of responsibility in implementing the utility's service restoration procedures in the wake of a storm classified at the highest or next highest level of severity by the utility. Drills shall simulate the involvement of a majority of a utility's customers served by overhead transmission and distribution facilities or individual operating areas on a sequential basis. The purposes of the drill can be achieved through the mobilization of utility personnel with specific storm response, service restoration assignments under simulated storm conditions or through the actual preparation for an advancing storm, * which may or may not damage the overhead T&D system. However, in either case, to qualify as a drill, the participants must have carried out all of their storm response assignments under either an impending storm

scenario or a simulated storm scenario. Also the drill must involve contacts with outside agencies, local governments and others who would normally be included in service restoration responses. For actual preparations, in lieu of a drill, the company shall certify in section 105.3 of this Part that all requirements of this definition were met.

*Classified by the utility at the highest or next highest level of severity.

.SO DOC 16A-105.3

NYCRR

105.3 Submission of electric emergency plans.

Each electric corporation shall file, in accordance with the requirements of § 3.5 of this Title, with the Commission an electric emergency plan {15} that addresses storms, as well as other causes of electrical emergencies with storm-like characteristics, and that complies with the requirements of section 105.4 of this Part. On or before April 1st of each year or on such other date as the Commission may prescribe, each electric corporation shall file, in accordance with the requirements of § 3.5 of this Title, such amendments to its emergency plan as it deems necessary, or as the Commission may require, to maintain a high level of preparedness, or a statement that no amendments are contemplated. In any event, by April 1st of each year, each electric corporation shall certify in a report filed with the Secretary that within the past 12 months, it has taken the following actions:

(a) periodically verified telephone contacts with and updated its lists of names of internal and external contact persons identified in section 105.4(b)(5) of this Part; and

(b) conducted at least one storm drill or emergency exercise involving key company personnel assigned service restoration responsibilities. Submissions made under this section shall be sent to the Director of the Office of Electric, Gas and Water. Each electric corporation shall make available for public inspection its currently effective system-wide electric emergency plan at its principal corporate headquarters. Those corporations that have developed customized plans for individual operating areas shall make a currently effective customized plan available for public inspection at the principal offices of each operating area.

{15} Any corporation that has regional or division plans shall make amendments to such operating area plans as are necessary to have those plans conform with any system-wide plan. However, a corporation that has a corporate plan that meets the requirements of this Part and provides the framework for regional plans may

elect to file only the corporate plan with the Commission, provided it certify that the regional plans have been updated to comply with the corporate plan and that the requirements of section 105.3 (a) and (b) of this Part have been met for each of the regional plans.

.SO DOC 16A-105.4

NYCRR

105.4 Content of electric emergency plans.

(a) Each electric corporation's electric emergency plan shall be compiled in a loose-leaf manual to facilitate updating. The manual shall provide a current, detailed description of each corporation's service restoration plan and, to the extent practicable, shall contain the information set forth in subdivision (b) of this section.

(b) Each electric corporation's emergency plan shall include the following information:

(1) Table of contents.

(2) Introduction. A statement of the purpose, policies and objectives of the plan.

(3) Emergency classifications. Specify the criteria or guidelines used for determining the severity of electric emergencies and their classification. The guidelines should include, but need not be limited to, the geographical scope of the emergency, the estimated time required to restore general service, the type of expected damage to the electric system, i.e., from a storm or other storm-like emergency, and an indication of whether company personnel alone or company and supplementary, non-company personnel will be needed to repair system damage.

(4) Emergency response training program. State the corporation's program to provide emergency response training for those personnel assigned service restoration responsibilities that are different from their normal duties. Identify person(s) responsible for managing and evaluating the effectiveness of the program. Include procedures for conducting a minimum of one annual storm drill simulating a response to either a storm, or other storm-like electric emergency that would be classified at the highest or next highest level of severity. State the extent to which any personnel outside the company may be involved in a storm drill. Include as well, provisions for critiquing the drill procedures and for giving staff a minimum of two weeks' advance notice of a scheduled drill.

(5) Advance planning and preparation. Specify the on-going actions that the corporation expects to take throughout each year to plan and prepare for an electrical emergency. State the corporation's procedures to update at least semi-annually its lists of contact persons, with

titles, addresses, phone numbers and other pertinent data for the following:

- (i) all utility personnel assigned service restoration responsibilities;
- (ii) mutual aid companies and contractors;
- (iii) all life support and other special needs customers;
- (iv) human services agencies;
- (v) print and broadcast media;
- (vi) operators/ managers of motels, restaurants and dormitories, etc.;
- (vii) state, county and local elected officials, law enforcement officials, and emergency management and response personnel;
- (ix) medical facilities; and
- (x) vendors.

At least annually, the corporation shall verify that all of the preceding data are current. At least semiannually, the corporation shall issue updated lists of known changes to its employees that have plan implementation responsibilities. The procedures should include the corporation's plans to stockpile emergency restoration tools and supplies in loose or kit form. State also, provisions for the preparation and distribution of literature or other forms of communication with information on customer storm preparations. Such information should address storm survival without electric power and safety precautions regarding electrical hazards such as downed wires and the use of portable generators.

(6) Emergency anticipation. Identify the preparatory measures corporate management would implement in anticipation of a potential system emergency expected to affect the service territory within hours or days. Identify the criteria under which key personnel with service restoration responsibilities would either be notified of an impending emergency or deployed to assigned areas, and any special precautions that would be taken.

(7) Service restoration procedures. Provide the corporation's procedures for mobilizing its personnel, materials and equipment in order to survey system damage and implement measures to ensure timely, efficient and safe restoration of service to customers in areas damaged by a storm or other storm-like electric emergency. The procedures need to identify restoration priorities to ensure that restoration time is minimized, while ensuring critical customers' needs are met. Include a listing of the priorities for service restoration among customer groups in these procedures. Identify criteria for determining when centralized versus decentralized control is appropriate. For those severe

emergencies when field damage assessments are needed, describe the methods for making, within 24 hours, broadscale preliminary assessments of the nature and extent of system damage based on rapid surveys of damaged areas and other data sources, and for making, within 48 hours, more detailed estimates of system damage based on systematic field surveys. Describe how field reports of system damage will be integrated with damage reports or indicators from other sources, such as customer call-ins, in order to make a reasonably accurate assessment of system damage and reliable projections of the personnel, equipment, materials and time that will be needed to rapidly and safely achieve service restoration goals in all damaged areas. Provide the procedures for deploying company and mutual aid crews to work assignment areas, monitoring crew activity, reassigning crews as necessary, and releasing crews, under both centralized and decentralized command modes. Describe the methods and means that will be used to communicate with damage survey crews and service restoration crews. Identify the procedures for coordinating company restoration procedures with those of other utilities' restoration efforts and with state and local emergency management and public works agency efforts.

(8) Personnel responsibilities. Provide a narrative and chart of the organization and operational assignments of personnel to be mobilized for each emergency classification identified. State the areas of management and supervisory responsibility and functions to be performed at each emergency classification level. Include the procedures for contacting and managing all personnel assigned duties under the emergency restoration plan at both the corporate and operating division level.

(9) Customer contacts. Provide the corporation's procedures and facilities for handling the extraordinary volume of customer calls that are normally placed during emergency events. Include a description of the type of messages that may be given to call-in customers regarding projections for service restoration or other pertinent information. State the overall corporate goals for answering customer calls during electric emergencies including, but not limited to, plans for staffing levels, number of positions activated, use of pre-recorded messages, means of providing updated information to customer service representatives, and the means of monitoring calls received and answered at the utility's office and, to the extent possible, at telephone company switching offices serving the utility's office. State the procedures for contacting within 24 hours, and policies for responding to the needs of, life support customers (those who require electrically

operated machinery to sustain basic life functions) during an electrical emergency. State the procedures for contracting other special needs customers such as the elderly, the vision-impaired, the hearing and speech-impaired, the mobility-impaired and human service agencies representing these customers, along with policies for handling inquiries and requests for assistance from them. Describe the corporation's method for estimating dry ice needs during an emergency period projected to last more than 48 hours and arrangements for obtaining and distributing dry ice to designated customer groups. State also the means of making out-of-service customers aware of the availability and the location, dates, hours and amounts of dry ice to be distributed.

(10) Communications. Provide the corporation's procedures and facilities for establishing and maintaining external communications exchanges regarding damage and restoration progress with customers in general, human service agencies, the media, the Department of Public Service, the State Emergency Management Office and other state agencies, county and local governments, emergency response services, and law enforcement agencies, etc. Include the identification of any dedicated phone lines, the designation of any special company representative to act as liaison with government entities, and any special provisions that may be required for dealing with critical facilities. State the corporation's planned frequency of communication updates to the media.

(11) Outside aid. State corporate policy and criteria governing conditions under which request for service restoration aid from other utilities, contractors, government agencies or others would be made and the procedures to be followed in obtaining outside aid.

(12) Support services. Describe the actions that will be taken, and who will be responsible for implementing them to sustain and support restoration crew activities. These shall include vehicle management; foreign crew accommodations, e.g., housing, food and transportation; and distribution of warehouse supplies, e.g., materials, tools, parts and equipment needed in the restoration process.

(c) Within 60 days following completion of service restoration in an emergency where the restoration period exceeds three days, each electric corporation shall submit to the Secretary of the Public Service Commission a review of all aspects of its preparation and system restoration performance.

(d) Each electric corporation may submit such additional information and plans as it believes necessary or desirable to fulfill the purposes of this Part.

(e)(1) Each electric corporation may delete the names and phone

numbers of its employees and outside contact persons from the copies of plans filed with the Commission and available for public inspection at its corporate headquarters. Such deleted information shall be subject to inspection by the Commission or Department of Public Service employees.

(2) Any electric corporation may request that the Commission designate as confidential any information required to be submitted in emergency plans. Confidential information may include, for example, internal security matters. Such requests shall identify the specific information requested to be treated as confidential and shall explain why confidentiality is sought. Unless the Commission directs otherwise, such information shall not be included in the plans available for public inspection.

.SO DOC 16A-105.5 NYCRR

105.5 Commission review and approval.

Upon receipt and review of emergency plans or amendments filed by an electric corporation under this Part, the Commission may require any such corporation to modify such plans or amendments or otherwise prescribe conditions for approval. Approval will be based on compliance with the requirements of this Part.

.SO DOC 16A-105.6 NYCRR

105.6 Compliance with electric emergency plans.

(a) Each electric corporation shall comply with the guidelines and practices set forth in its effective emergency plans. Each electric corporation shall comply with any additional electric emergency plan requirements that may be imposed by the Commission.

(b) Under emergency conditions, an electric corporation may modify its response from that in the filed electric emergency plan to the extent required to restore service in a safe and efficient manner. However, modifications and the circumstances that caused them shall be reported in writing to the Secretary of the Commission within 60 days from restoration of full service. Minor changes such as telephone numbers, personnel changes, etc., need not be reported, but as soon as practicable should be made to the plans.

SUBCHAPTER B

Securities

PART

115 Notice of Issuance by Electric Corporations of Stocks, Bonds, Notes,
or other Evidences of Indebtedness

.SO DOC 16A-PT115 NYCRR

PART 115

NOTICE OF ISSUANCE BY ELECTRIC CORPORATIONS OF STOCKS,
BONDS, NOTES, OR OTHER EVIDENCES OF INDEBTEDNESS

(Statutory authority: Public Service
Law, § 69)

Sec.

115.1 Contents of notice

115.2 Issuance not heretofore reported

.SO DOC 16A-115.1

NYCRR

Section 115.1 Contents of notice.

Pursuant to the provisions of section 69 of the Public Service Law, as amended, every electric corporation subject to said section, after the issuance or assumption of stocks, bonds, notes or other evidences of indebtedness, including bonds, notes or other evidences of indebtedness, payable on demand or within less than 12 months, shall file with this commission a notice of such transaction within the time and in the form specified in the following.

(a) Name of reporting utility (indicate whether corporation, partnership, individual, or other party).

(b) Address of reporting utility.

(c) The name of the official responsible for statements submitted and to whom should be addressed any correspondence relating thereto.

(d) Date of the report.

(e) Period covered by the report (both dates inclusive where applicable).

(f) Information regarding securities or obligations issued.

(1) Pursuant to authority granted by order of this commission:

(i) Notice of issuance shall be filed within the period specified in the order approving the issuance of the securities or obligations.

(ii) Issuance of capital stock, in exchange for convertible securities issued pursuant to commission authorization, may be reported annually, not later than 60 days after the end of the calendar year covered by the report; such report to show only the number of shares of such stock issued during such calendar year, the securities retired by reason of the exchange, and the additional consideration realized, if any, by reason of the exchange.

(iii) For each type of security or obligation, include the following information, as appropriate:

(a) Designation of security--classified according to distinguishing characteristics, such as class of stock of par value or no par value and dividend rate of preferred stock, or character of debt obligation and interest rate or maturity date or other distinguishing characteristic.

- (b) Date of actual issue or assumption.
 - (c) Number of shares of each class of stock or principal amount of each debt obligation issued.
 - (d) Consideration realized from each class or type of security (if consideration is other than cash, give description and basis of value).
 - (e) Case number and date of order of this commission under which the security issue was authorized.
- (2) Securities issued or assumed under circumstances not requiring the formal approval of this commission, such as obligations (real estate mortgages, chattel mortgages, conditional sales agreements, promissory notes, etc.) having a term of less than 12 months:
- (i) Notice of issuance shall set forth the transaction covering obligations issued during each calendar month and shall be filed not later than 10 days after the end of the calendar month covered by such report.
 - (ii) For each type of obligation of \$10,000 face amount or more, include the following information as appropriate:
 - (a) Designation of the obligation giving descriptive distinguishing characteristics. Include description of real estate mortgage, chattel mortgage, conditional sale agreement, or any hypothecation of assets given in connection with the obligation.
 - (b) Date of actual issue or assumption.
 - (c) Name of payee.
 - (d) Principal or face amount.
 - (e) Rate of interest.
 - (f) Date of maturity (if demand so specify) or schedule of periodic payments.
 - (g) Names of endorsers, if any.
 - (h) Consideration realized from issuance of the obligation.
 - (i) Purpose for which the obligation was issued; if for cash indicate the use to which the proceeds are to be applied.
 - (j) State whether the obligation represents an increase of indebtedness or an obligation given in renewal of existing obligations or in cancellation of accounts payable. For renewals of obligations of \$10,000 face amount or more give the dates and amounts of the obligations for which the renewal obligation is in whole or in part to be substituted; for renewals of obligations of less than \$10,000 face amount, give the date or month of issuance, the rate of interest, date or month of maturity and the total amount of the obligations for which the renewal obligation is in whole or in part to be substituted. (See subparagraph (iv) of this paragraph).

(iii) For each type of obligation of less than \$10,000 face amount list the information required in subparagraph (ii) of this paragraph or group each type of obligation of less than \$10,000 face amount which is identical except for the payee, the exact date of issue or assumption within any one calendar month and the exact date of maturity within any one calendar month. Report for each group the information required in subparagraph (ii) (a), (e), (g), (h), (i) and (j) of this paragraph but substitute for subparagraph (ii) (b), (c), (d), and (f), the following; (b) month of actual issue or assumption, (c) number of obligations, (d) amount of indebtedness and (f) the month and year of maturity (if demand so specify).

(iv) Report the outstanding obligations as of the final date of the period covered by the notice of issuance. List the date of actual issue or assumption, principal or face amount and rate of interest of all obligations reported pursuant to subparagraph (ii) of this paragraph. For obligations reported pursuant to subparagraph (iii) of this paragraph, list the date or month of actual issue or assumption, the rate of interest of each obligation or group of obligations and the amount of each obligation or group of obligations outstanding.

(3) For any other class of securities, give corresponding particulars, not later than 10 days after the end of the calendar month in which issued or assumed, to the end that the commission may be fully advised as to the nature of the transaction and purpose for which obligations were incurred or securities were issued and the proceeds therefrom are to be used.

(g) Each notice of issuance of securities or obligations shall be subscribed by an executive officer of the corporation, a member of the partnership, the individual owner, or other party of the utility in behalf of which the notice is filed, and affirmed by such person as true under the penalties of perjury.

.SO DOC 16A-115.2 NYCRR

115.2 Issuance not heretofore reported.

Every such public utility which has not filed with this commission a notice of the issuance of any stocks, bonds, notes, or other evidences of indebtedness now outstanding and issued with or without the approval of this commission shall, within 30 days from the date of service of a copy of this order, file a notice of each such transaction in the form prescribed herein.

PART 125

REPORTS OF ACCIDENTS

(Statutory authority: Public Service Law,

§ 66(1))

Sec.

125.1 Definition of employee

125.2 Filing requirements

125.3 Data requirements

125.4 Format of reports

125.5 Retention of records

.SO DOC 16A-125.1 NYCRR

Section 125.1 Definition of employee. For the purpose of this Part, the term employee shall include all employees and agents of the company.

.SO DOC 16A-125.2 NYCRR

125.2 Filing requirements. Every electric corporation and every municipality subject to the commission's jurisdiction providing electric service is required to notify the commission of:

(a) all accidents (other than vehicular accidents on public highways) involving utility facilities directly related to the production, transmission, or distribution of electricity, which result in injury or death to nonemployees; and

(b) all work-related accidents (other than vehicular accidents) involving utility facilities directly related to the production, transmission, or distribution of electricity, which cause injuries to utility company employees that result in hospitalization (inpatient treatment) or death.

.SO DOC 16A-125.3 NYCRR

125.3 Data requirements. Electric service accident and injury records to be maintained by electric corporations and municipalities under this Part shall contain at least the following information for each occurrence: the date, time, and location of the accident; the name, address, sex, approximate age, and occupation (if relevant) of the injured party; the nature, extent, and cause of the injury; the status and medical prognosis (if available) of the injured party; follow-up actions proposed; and a description of the accident and its cause.

.SO DOC 16A-125.4 NYCRR

125.4 Format of reports.

(a) Immediate notification to the commission shall be by telephone for all accidents resulting in inpatient hospitalization or death on the day of the accident, providing information concerning: the location, date, and time of the incident; the name, description, and status of the injured person(s); a description of the incident; and whether or not the injured person is an employee of the utility. Telephone notification of accidents occurring after business hours shall be given the following business morning. By the 10th of each month each corporation or municipality shall file with the commission written reports of all accidents specified by section 125.2(a) or (b) of this Part, providing the information specified on Form A (set forth in subdivision (b) of this section). If insufficient information is available to complete form A within the specified time, a request for an extension on the filing deadline shall be submitted to the secretary by the 10th of each succeeding month. In the event no accidents were experienced in a given month, a form A shall be submitted to the commission by the 10th of the succeeding month with a notation to that effect.

(b) Sample Form--Accident Report.

(3) all public parks except Adirondack and Catskill State parks.

(c) Authorized officials. Authorized officials as used in this Part shall mean the chief executive officer of the local governmental unit or the chief administrator of a school.

.SO DOC 16A-126.2

NYCRR

126.2 Structure markings.

Power line lattice metal towers in populated areas shall be plainly marked with a warning sign visible from two opposite faces of the tower. Warning signs shall be located at a height that makes them clearly visible to persons on the ground approaching the tower. Warning signs will not be required on poles.

.SO DOC 16A-126.3

NYCRR

126.3 Structure access.

(a) Electric utilities shall use fences, barbed wire, or other anti-climbing shields to limit access to lattice tower power line structures adjacent to school property or playgrounds sanctioned by municipal authorities or recognized recreational bodies.

(b) Electric utilities may place anti-climbing shields on lattice tower power line structures not adjacent to school property or designated playgrounds whenever such shields would eliminate a significant hazard or at the request of an authorized official. Any authorized official may petition the commissioner to order an electric utility to place such shields if his request is refused.

(c) No ladder, step, or other intended climbing device shall be allowed less than eight feet above the ground on any power line structure except for those placed on wooden poles prior to July 1, 1977.

.SO DOC 16A-126.4

NYCRR

126.4 Safety programs.

(a) Electric utilities shall urge school systems within their service territories to conduct electrical safety education programs and shall cooperate with school officials to develop and present such programs. As a minimum, this shall include the annual transmittal of a notice to all school districts operating in the utilities' franchise areas that speakers and/or films are available from the utilities for the schools' use.

(b) Electric utilities shall distribute a description of the dangers of electric power lines in safety reminders which shall be distributed annually as customer bill inserts.

PART 127
ALLOWABLE INDUCED VOLTAGE IN PIPELINES
(Statutory authority: Public Service Law, §66(2))

Sec.

127.1 Applicability

127.2 Definitions

.SO DOC 16A-127.1 NYCRR

Section 127.1 Applicability.

After the effective date of this Part, any electric corporation subject to commission jurisdiction constructing overhead electric transmission facilities shall limit the step-and-touch voltages induced by magnetic fields of such facilities under steady state conditions to 15 volts or less at all points on existing pipelines where a person could normally touch the pipeline or a pipeline appurtenance. This does not apply to buried pipelines or to locations where access is limited by use of fences or barriers to personnel that are trained in safe practices regarding step-and-touch voltages. The short term emergency loading condition of the circuit as defined by the New York Power Pool for the electric facility shall be used in determining the magnitude of such step-and-touch voltages.

.SO DOC 16A-127.2 NYCRR

127.2 Definitions. The following words and terms when used in this Part shall have the meaning indicated:

(a) Step voltage means the root mean square voltage difference between any two points on the ground surface separated by one meter (approximately the distance of one step) in the direction of the maximum voltage gradient.

(b) Touch voltage means the root mean square voltage difference between any point on the ground where a person may stand and any point on the pipeline or its appurtenances which can be touched simultaneously by either hand.

PENALTIES AND DISCOUNTS--CONSUMERS'
BILLS--ELECTRIC CORPORATIONS

(Statutory authority: Public Service Law, § 66)

Sec.

- 137.1 Late payment charges
- 137.2 Contents of bill
- 137.3 Amount of late payment charge
- 137.4 Contents of rate schedules
- 137.5 Increase in rates prohibited

.SO DOC 16A-137.1 NYCRR

Section 137.1 Late payment charges.

Any corporation, partnership or person furnishing gas, electric, steam or water service may impose a late payment charge, either one-time or continuing interest type, because of the failure of any customer to pay a bill for such service within a specified period therein stated.

.SO DOC 16A-137.2 NYCRR

137.2 Contents of bill.

If any corporation, partnership or person furnishing gas, electric, steam or water service elects to impose a one-time charge for late payment for such service, it shall show on each bill the amount billed, the amount that will be due, including the late payment charge, when the late payment charge becomes applicable.

.SO DOC 16A-137.3 NYCRR

137.3 Amount of late payment charge.

If a one-time late payment charge is imposed, it shall not exceed 10 percent on the first \$10 (except that a minimum charge may be made of not to exceed 15 cents per bill), plus not to exceed three percent on that portion of the bill over \$10.

.SO DOC 16A-137.4 NYCRR

137.4 Contents of rate schedules.

In case a one-time late payment charge is imposed, the rate schedules shall show the rates for service, the amount due including the late payment charge when the charge becomes applicable and the period during which the bill may be paid without the imposition of the late payment

charge.

.SO DOC 16A-137.5 NYCRR

137.5 Increase in rates prohibited. No corporation, partnership or person furnishing gas, electric, steam or water service shall so revise or redraft its rate schedules in compliance with this Part as to increase the rates for service applicable to any customer as compared with the rates now in effect without special permission of the commission.

138.3 Amount of one-time payment charge

138.4 Contents of rate schedules

138.5 Increase in rates prohibited

.SO DOC 16A-138.1 NYCRR

Section 138.1 Late payment charge.

Any municipality furnishing gas, electric or steam service may impose a late payment charge, either one-time or continuing interest type, because of the failure of any customer to pay a bill for such service within a specified period therein stated.

.SO DOC 16A-138.2 NYCRR

138.2 Contents of bill. If any municipality furnishing gas, electric or steam service elects to impose a one-time charge for late payment for such service, it shall show on each bill the amount billed, the amount that will be due, including the late payment charge, when the late payment charge becomes applicable.

.SO DOC 16A-138.3 NYCRR

138.3 Amount of one-time payment charge. If a one-time payment charge is imposed, it shall not exceed an amount equal to 10 percent of the first \$10 of any bill, plus three percent of any amount of such bill in excess of \$10; provided, however, that a minimum charge may be made of not to exceed 15 cents per bill; and further provided that there may be allowed in any block of a rate schedule a late payment charge of one mill per kilowatt hour of electricity or one mill per 100 cubic feet of gas.

.SO DOC 16A-138.4 NYCRR

138.4 Contents of rate schedules. In case a one-time late payment charge is imposed, the rate schedules shall show the rates for service, the amount due including the late payment charge when the charge becomes applicable, and the period during which the bill may be paid without the imposition of the late payment charge.

.SO DOC 16A-138.5 NYCRR

138.5 Increase in rates prohibited. No municipality furnishing gas, electric or steam service shall, without special permission of this commission, so revise or amend its rate schedules, in compliance with this Part, as to increase the rates for service applicable to any customer as compared with the rates now in effect.

PART 139

COMBINING ELECTRIC SERVICE RENDERED AT ONE LOCATION

THROUGH TWO OR MORE METERS IN COMPUTING BILLS

(Statutory authority: Public Service Law, § 66(1))

Sec.

139.1 Service at single location

139.2 Two or more meters--separate computation

139.3 Two or more meters--in specified metropolitan area

139.4 Petition for combined meter reading and billing

139.5 Request of consumer for additional meters

139.6 Conjunctional billing

.SO DOC 16A-139.1 NYCRR

Section 139.1 Service at single location. Except when multiple meters are provided at the request of a customer, or when provided under the conditions or circumstances set forth in sections 139.3, 139.4 and 139.6 of this Part, all service to a customer at a single location shall be rendered through a single meter.

.SO DOC 16A-139.2 NYCRR

139.2 Two or more meters--separate computation. When a customer is served through two or more meters, as provided for in section 139.5 of this Part, the service rendered through such meters shall be computed separately and billed in accordance with the applicable filed rate schedule.

.SO DOC 16A-139.3 NYCRR

139.3 Two or more meters--in specified metropolitan area.

Within the city of New York, within that part of Westchester County comprising that franchised territory of the Westchester Lighting Company and of the Yonkers Electric Light and Power Company, and within that

part of Nassau County comprising the franchised territory of the Queens Borough Gas and Electric Company, under any of the following conditions or circumstances, the reading of two or more meters measuring the service of a single customer at a single location may be combined and the customer billed for such total use, computed as if all service had been rendered through a single meter, provided the filed rate schedule of the utility provides for such service:

(a) when the use of more than one meter is necessary to provide safe service;

(b) where the use of more than one meter is required by a municipal ordinance;

(c) when a single meter cannot correctly measure the total service rendered;

(d) when the characteristics of service of a customer were such that at the time his service connections were installed there was no single meter commercially available to correctly measure such service and multiple meters have been continued in use;

(e) when service is measured through two or more meters and the occupancy by the present customer is temporary;

(f) when two or more service connections are necessary to provide service at the least expense to the utility;

(g) when in order to render proper and reliable service without undue interruptions more than one service connection is necessary and a meter or meters are connected with each service connection; or

(h) when service of different characteristics is supplied and there is no meter commercially available to correctly measure such combined service.

.SO DOC 16A-139.4

NYCRR

139.4 Petition for combined meter reading and billing. If a corporation, municipality or interested consumer is of the opinion that combined meter reading and billing should be permitted under any or all the conditions specified in section 139.3 of this Part, such party may petition the commission for such authority or order.

.SO DOC 16A-139.5

NYCRR

139.5 Request of consumer for additional meters. Every electric corporation, gas and electric corporation and municipality shall install upon the request of a customer as many meters as such customer shall desire, provided the circuit or circuits connected to each meter are kept separate from all other circuits.

.SO DOC 16A-139.6

NYCRR

139.6 Conjunctional billing.

Nothing contained in this Part shall affect the combining of registration of two or more meters for billing purposes under a Conjunctural Billing Rider, Inter-connection Buildings Rider or Service for Construction Purposes Rider when such a rider is contained in the rate schedule of the corporation or municipality.

.SO DOC 16A-PT140

NYCRR

PART 140

BILLS FOR SERVICE--ELECTRIC CORPORATIONS

(Statutory authority: Public Service Law, § 66(1))

Note: The provisions contained in this Part must be complied with by July 1, 1976; however, prior to that date, utilities may show on their bill forms the information specified by this Part. By order dated January 7, 1976, the commission directed all companies subject to this Part to send an explanatory leaflet to its customers with the first new bill form sent; the bill forms and leaflet were also required to be filed with the commission 30 days prior to use of the new bill form.

Sec.

140.1 Contents of bill

140.2 Budget or equal payment billing

140.3 List of company offices

.SO DOC 16A-140.1

NYCRR

Section 140.1 Contents of bill. Each bill for electric service issued after June 30, 1976, on the portion that is retained by the customer, shall show, but not be limited to, the following information, except as otherwise provided by this Part:

(a) The name of the corporation, partnership or person by which the service was furnished and, except as provided by this Part, no other name.

(b) The location of the principal office and one or more company offices at which it may be paid, and a statement that bills may be paid at other authorized offices.

(c) The service classification or classifications in the rate schedules on which it is based.

(d) Any charges or credits which are adjustments to the rate schedules referred to in subdivision (c) of this section, shall be itemized and shown in dollars per type of unit billed and in total dollars.

(e) The billed demand or other similar factor (if applicable).

(f) Present meter reading (if service is metered), actual or estimated, (indicate if estimated), and date thereof.

(g) Previous meter reading (if service is metered), actual or

estimated, (indicate if estimated), and date thereof, and/or the number of days or the prorated period from the previous meter reading, actual or estimated, to the present meter reading, actual or estimated.

(h) Meter multiplier or constant (if applicable).

(i) Debit or credit balance still outstanding from prior bill, if any.

(j) Quantity billed and unit of measurement, except quantity need not be shown for interim budget billing.

(k) Gross amount of bill including any sales tax.

(l) Amount of discount and/or net amount of bill (if applicable).

(m) Date when discount period expires or late payment charge becomes effective shall be shown on the front of the bill (if applicable). The payment date is to be determined by the date of mailing or date paid at designated office.

(n) If the service be furnished by a corporation which desires to indicate that it is owned or controlled by another company, or that it constitutes part of a system, it may so indicate by the use of a small symbol or by a statement to that effect printed on the bill in small, inconspicuous type.

(o) Only service(s) performed, materials furnished or other charges made by the company, pursuant to its filed tariff, may be included and shall be itemized on the applicable bill form. Whenever the bill form, by reason of size limitations, does not permit itemization, totals may be utilized, provided the charges making up such totals are itemized in an addendum attached to or enclosed with the bill.

(p) Each bill rendered by the company shall identify the account for which service is being charged by setting forth an account or meter number or other appropriate method of identification of the address or location of the premises where the service(s) for which the bill is rendered was (were) furnished.

(q) The back of the entire bill may be used for any purposes deemed appropriate related to the service(s) rendered.

(r) As long as it does not confuse the customer, pertinent messages and information may be printed on any portion of the front of the bill.

(s) An explanation of any abbreviation or symbol used that is not in common English usage.

.SO DOC 16A-140.2

NYCRR

140.2 Budget or equal payment billing.

On either the bill or in an addendum attached to or enclosed with the bill shall be shown:

(a) Identification of the type of budget or equal payment plan if more than one plan is offered.

(b) The total of the year's budget or equal payment amounts billed to the end of the period covered by the current bill.

(c) The dollar amount billed for tariff items during the same period as in subdivision (b) of this section.

(d) Debit or credit balance to be shown as D or C on the bill and defined as follows:

D Amount due company

C Amount in customer favor

.SO DOC 16A-140.3

NYCRR

140.3 List of company offices. Each electric company shall provide annually to its customers a list of all company offices at which utility bills may be paid, if such information is not shown on its bill form.

.SO DOC 16A-PT141

NYCRR

PART 141

DETERMINATION BY ELECTRIC CORPORATIONS OF CONSUMER DEMAND

(Statutory authority: Public Service Law, § 66 (1))

Sec.

141.1 Method of determining demand

.SO DOC 16A-141.1

NYCRR

Section 141.1 Method of determining demand.

(a) Whenever the charge by any electric corporation or gas and electric corporation for electric service, including the minimum charge, is in any way dependent upon the demand of the customer, such demand shall, after January 1, 1939, be determined by a demand measuring device of a type approved by this commission, whenever the demand billed is 5 kw. or more, or whenever the total rated capacity of the customer's current consuming devices is 8 kw. or more, or whenever the customer's consumption has exceeded 800 kw.h. per month in two consecutive months during the preceding 12 months; provided:

(1) a minimum charge not exceeding \$1.33 per kw. or \$1.00 per hp. may be based on connected load, provided it is clearly specified how such connected load is to be determined;

(2) the demand of temporary installations or of devices which have a highly fluctuating or large instantaneous demand, such as X-ray apparatus and welders, may be determined by or related to the rated capacity of the apparatus, the capacity of the transformer installation required to supply adequate service to the apparatus, or by other appropriate standards;

(3) the demand of installations which have a definitely determinable and unvariable demand, such as electric signs, show windows, or water

heaters, may be determined by or related to the rated capacity, or by periodic tests;

(4) the demand for breakdown or auxiliary service, may be determined by or related to the capacity contracted for, the transformer capacity required, or other appropriate standards;

(5) in other special cases when real merit or necessity is shown, the commission may, on application, permit the use of other reasonable standards.

(b) The demand billed in any month may be related to the demand established during a preceding period or the amount specified by the customer in his application for service.

.SO DOC 16A-PT142 NYCRR

PART 142

CHARGES FOR SPECIAL SERVICES

(Statutory authority: Public Service Law, § 66(1))

Sec.

142.1 Charges for special services required to be filed

.SO DOC 16A-142.1 NYCRR

Section 142.1 Charges for special services required to be filed.

Every gas, electric, gas and electric corporation and every municipality providing gas or electric service is hereby directed and required to file amendments to its tariff schedules to be effective not later than November 15, 1948 on not less than 30 days' notice to the public and this commission setting forth the charges that will be made for each and every service performed for a customer or an applicant for service, except service directly connected with the installation of appliances sold by such corporation or municipality or directly connected with jobbing work performed as an agent under an agency contract, whereby the corporation or municipality undertakes to do jobbing work for a stipulated profit or commission; provided, however, that corporations or municipalities who now have such charges set forth in their tariff schedules need not refile such provisions.

.SO DOC 16A-PT143 NYCRR

PART 143

NOTICE OF DISCONTINUANCE AND COMPLAINT PROCEDURES

(Statutory authority: Public Service Law, § 4, 20, 66, 71, 72)

Sec.

143.1 Notice of discontinuance--time

143.2 Notice of discontinuance--format

143.3 No discontinuance without verification of delinquent account

143.4 Rapid posting of payments in response to notices of

discontinuance

143.5 Days when discontinuance of service is not permitted

143.6 No additional notice required when payment by check is subsequently dishonored

143.7 Discontinuance of service to entire multiple dwellings

143.8 Billing disputes

143.9 Publicizing complaint procedures

143.10 Hardship procedures

143.11 Reconnection

143.12 Special procedures during cold weather periods

143.13 Survey of residential customers previously disconnected for nonpayment or theft of service

143.14 Voluntary third-party notice prior to discontinuance of service

143.15 Installment plans for residential customers

.SO DOC 16A-143.1 NYCRR

Section 143.1 Notice of discontinuance--time.

(a) No electric corporation shall discontinue the supply of electricity for nonpayment of bills rendered for service or for failure to post a required deposit until:

(1) at least five days after written notice has been served personally upon the person supplied;

(2) at least eight days after mailing written notice in postpaid wrapper to the person supplied, addressed to such person at premises where service is rendered; or

(3) at least five days after the person supplied has either signed for or refused a registered letter containing written notice, addressed to such person at premises where service is rendered.

(b) If the person supplied has specified to the company in writing an alternate address for billing purposes, the notice authorized under paragraphs (2) and (3) of subdivision (a) of this section shall be sent to such alternate address rather than to the premises where service is rendered.

.SO DOC 16A-143.2 NYCRR

143.2 Notice of discontinuance--format.

(a) Every notice indicating discontinuance of service shall:

(1) clearly indicate in nontechnical language and, where practicable, in a bilingual format:

(i) the reason for service discontinuance;

(ii) the total amount required to be paid by the customer to avoid discontinuance of service, indicating the amount for which the customer's account is in arrears or the required deposit, if any, which

must be posted by the customer, or both;

(iii) a method whereby the customer may tender payment of the full sum due and owing, including any required deposit, to avoid the discontinuance of his service;

(iv) the availability of company procedures to consider customer complaints prior to discontinuance, including the address and phone number of the office of the electric company the customer may contact in reference to his account; and

(v) the earliest date on which discontinuance may be attempted; and

(2) have printed on the face thereof, in a size type capable of attracting immediate attention, the following:

"THIS IS A FINAL DISCONNECT NOTICE. TO AVOID INCONVENIENCE, BRING THIS NOTICE TO THE ATTENTION OF THE COMPANY WHEN PAYING THIS BILL."

(b) Every notice indicating discontinuance of service to residential customers shall include a statement that electric service to any person receiving financial assistance from a local social services department in certain cases may not be terminated, and that the recipient may inform the utility providing such service of his status so that the utility may ascertain the applicability of such provisions to him.

(c) Advise consumers that they should contact such corporation's business office immediately if any acute hardship, such as death in the family, recent unemployment, serious illness or infirmity, or other grave condition exists, in order that such corporation may determine whether any temporary arrangement should be employed to avoid immediate termination.

(d) Where full compliance with subdivision (a) of this section is found by the commission to be infeasible or to impose an unreasonable burden upon the company, the commission may grant a waiver of the requirements of such subdivision upon approval by the commission of an alternate arrangement which accomplishes the basic purposes of this section.

.SO DOC 16A-143.3

NYCRR

143.3 No discontinuance without verification of delinquent account.

(a) No electric corporation shall discontinue service for nonpayment of bills rendered, or for failure to post a required deposit, unless:

(1) it shall have verified that payment has not been received at any office of the company or at any office of an authorized collection agent through the end of the notice period required by this Part; and

(2) it shall have verified on the day disconnection occurs that

payment has not been posted to the customer's account as of the opening of business on that day, or shall have complied with procedures established pursuant to section 143.4(b) of this Part.

(b) In the case of a company which serves a geographical area of this State involving more than six counties, the commission may grant a waiver of the requirements of paragraph (a)(1) of this section upon approval by the commission of an alternate procedure for verification of payments which accomplishes the basic purposes of such paragraph.

.SO DOC 16A-143.4

NYCRR

143.4 Rapid posting of payments in response to notices of discontinuance. Every electric corporation shall take reasonable steps to establish procedures to insure that any payments made in response to notices of discontinuance, when the customer brings the fact that such a notice has been issued to the attention of the company or its collection agents, shall either:

(a) be posted to the customer's account on the day payment is received; or

(b) be processed in some manner so that discontinuance will not occur.

.SO DOC 16A-143.5

NYCRR

143.5 Days when discontinuance of service is not permitted. (a) No electric corporation shall discontinue service to any person for nonpayment of bills or for failure to post a required deposit on a Saturday, Sunday, public holiday, or day on which the main business office of the company is not open for business. For purposes of this section, the term public holiday refers to those holidays enumerated in the General Construction Law.

(b) No electric corporation or electric and gas corporation or municipal electric corporation shall discontinue service to any residential customer for nonpayment of bills or for failure to post a required deposit on a Friday, or on the day preceding a day on which the main business office of the company is not scheduled to be open for business, or the day immediately preceding a public holiday. No such corporation shall discontinue service to any residential customer for nonpayment of bills or for failure to post a required deposit during a two-week period encompassing Christmas and New Year's Day.

.SO DOC 16A-143.6

NYCRR

143.6 No additional notice required when payment by check is subsequently dishonored. Receipt of a subsequently dishonored negotiable instrument in response to a notice of discontinuance shall not constitute payment of the customer's account, and no electric corporation shall be required to issue additional notice prior to

discontinuance.

.SO DOC 16A-143.7

NYCRR

143.7 Discontinuance of service to entire multiple dwellings.

(a) No electric corporation shall discontinue service to an entire multiple dwelling (as defined in the Multiple Dwelling Law or the Multiple Residence Law) where the owner, person, firm or corporation to whom or which the last preceding bill has been rendered, or from whom or which the electric corporation has received payment therefor, has failed to pay such utility bills, until it has complied with the following procedure:

(1) The electric corporation must give 15 days' written notice of its intention to so discontinue by personally serving such notice on the owner of the premises affected or on the person, firm, or corporation to whom or which the last preceding bill was rendered, or from whom or which the utility has received payment therefor, and on the superintendent or other person in charge of the building, if it can be readily ascertained that there is such superintendent or other person in charge; or

(2) The electric corporation must give 18 days' written notice to the owner, person, firm or corporation specified in paragraph (1) of this subdivision if such notice is mailed in a postpaid wrapper to the address of such persons, firm or corporation.

(3) In addition to the notice prescribed by paragraphs (1) and (2) of this subdivision, 15 days' written notice shall be posted in the public areas of such multiple dwelling, and 18 days' notice shall be mailed to the "Occupant" of each unit in that multiple dwelling, to the local health officer and director of the social services district for the political subdivision in which the multiple dwelling is located; if the multiple dwelling is located in a city or village, to the mayor thereof, or if there be none, to the manager; or, if the multiple dwelling is located in a town, then to the town supervisor; and to the county executive of the county in which the multiple dwelling is located, or if there be none, then to the chairman of such county's legislative body. Notice to mayors, managers, town supervisors, county executives, and chairmen of county legislatures may be mailed to the persons specified therein or to their designees. Notice to health officers, directors of social services, mayors, managers, supervisors, county executives and chairmen of county legislatures shall be repeated not more than four working days nor less than two working days prior to such discontinuance.

(4) Whenever a notice of intention to discontinue electric service has

been made pursuant to the provisions of this section and obligations owed the electric corporation have been satisfied, the electric corporation shall notify, in the same manner as it gave such notice of intention, the occupant of each unit that the intention to discontinue electric service no longer exists.

(b) Notwithstanding the provisions contained in subdivision (a) of this section, no electric corporation shall discontinue services to a multiple dwelling, where the owner, person, firm or corporation responsible for making payment fails to pay utility bills, as long as occupants of such multiple dwellings continue to make timely payments for such service in accordance with procedures filed by the utility and approved by the Public Service Commission. All notices referred to in subdivision (a) of this section shall contain the intended date of discontinuance of service and a utility contact, including a telephone number, who will advise occupants of the amount due for electric service and who will arrange meetings with occupants to attempt to work out a mechanism for avoiding discontinuance of service in the event that the owner continues to fail to make requisite payments or arrangements for such payments. The notice shall also refer to the provisions contained in section 235-a of the New York Real Property Law authorizing occupants to set-off, against their rent, payments to utilities in such circumstances.

(c) An electric corporation, following the procedure outlined in subdivision (b) of this section, may require occupants in a multiple dwelling to pay no more than the current electric charges incurred by the owner, person, firm or corporation to whom or which the last preceding bill has been rendered or from whom or which the utility has received payment therefor. A current charge for purposes of this section means the amount properly billed the owner, etc., for electricity used during the most recent billing period covered by the first bill rendered on or after the date when the disconnect notice is issued. The current charges will not include any arrears for earlier billing periods that may appear on such a bill.

(d) If occupants in a multiple dwelling find they are unable to reach an agreement with the utility to avoid discontinuance of service, they may contact the Consumer Service Section of the commission's Power Division. After such a request is received, a representative of the Consumer Service Section of the Power Division will attempt to work out such an agreement and will, if necessary, arrange a meeting with occupant representatives, the utility, and the owner, person, firm or corporation responsible for making payment for electric service;

provided, however, that such a meeting will be required only if the Consumer Service Section receives a written petition signed by at least 25 percent of the occupants in a multiple dwelling.

(e) The Consumer Service Section may stay a threatened disconnection of service to an entire multiple dwelling where it concludes that good faith efforts are being made by the occupants to arrange for the payment of current electric bills.

(f) Whenever an owner of a multiple dwelling, or the person, firm or corporation responsible for making payment for electric service, fails to pay two consecutive bills for utility service by the time the third bill has been prepared, the utility must notify the commission within 15 days that it has invoked the procedures outlined in subdivisions (a) and (b) of this section. Unless otherwise authorized, the notification should be in the form of a semi-monthly report filed with the Consumer Service Section. Such report should be cumulative, specify the total amount due for each overdue account, the period of arrearage, and indicate if a notice of discontinuance has been sent. If these reports demonstrate a need for changes in collection procedures, the Consumer Service Section shall advise the commission.

(g) Sections 143.3 through 143.6 of this Part shall be applicable with respect to the discontinuance of service to entire multiple dwellings.

.SO DOC 16A-143.8

NYCRR

143.8 Billing disputes.

(a) Every electric corporation shall establish procedures whereby any complaint filed with such corporation by any customer thereof in regard to any bill for service rendered or any deposit required will be promptly investigated in an appropriate and fair manner, with the result of such investigation being promptly reported to the complaining customer. Such procedures shall allow the acceptance and processing of complaints submitted in simple manner and form. Regardless of whether a notice of discontinuance has previously been sent, the utility's procedures shall provide that pending the utility's investigation it shall not discontinue service or issue a notice of discontinuance; provided, however, the consumer may be required to pay the undisputed portion of a disputed bill or deposit to prevent discontinuance or the issuance of a notice of discontinuance.

(b) If, after the completion of such an investigation, the utility determines that the disputed service has been rendered, or that the disputed charge or deposit is proper, in whole or in part, the utility may require the full bill or deposit or the appropriate portion thereof to be paid; in such event, appropriate notice of the determination shall

be given to the customer, and where notice of discontinuance of service has previously been sent, or is served with the determination, such notice shall include a statement advising the customer of the availability of the commission's complaint handling procedures. The utility's procedures may provide for discontinuance of service if the customer fails to pay such required amount after receipt of proper notice, provided that a customer's service will not be discontinued until at least five days after notice of the utility's determination, where personal service is made upon the person supplied, or at least eight days after mailing of such a notice; and provided further that no discontinuance may occur if so precluded by the commission pursuant to section 11.2(d) of this Title.

(c) The utility's procedures shall provide that, where the complaint procedures of the commission have been invoked and it is determined that the disputed service has been rendered, or that the disputed charge or deposit is proper, in whole or in part, a customer's service will not be discontinued for failure to pay the amount found appropriate until at least 15 days after notice of the commission's determination.

(d) The procedures required to be established under this section shall be filed with the commission for review. The commission shall be advised of any substantial changes in such procedures 30 days prior to their proposed implementation to permit commission review.

.SO DOC 16A-143.9

NYCRR

143.9 Publicizing complaint procedures. (a) Every electric corporation shall, by a notice accompanying a regular bill or otherwise, advise each of its customers annually, unless otherwise directed by the commission, of the procedures available to the customer to register complaints in regard to service or disputed bills. Such notice shall clearly state the means by which a complaint can be made to the company and shall also advise the customer that, if after contacting the company the customer remains dissatisfied, he may contact the New York State Public Service Commission. Such notice shall further state that the Public Service Commission has a staff available to give assistance in such matters, and shall also specify an appropriate address of the Public Service Commission.

(b) Prior to circulating the notice required by subdivision (a) of this section, each utility shall submit to the commission for its approval the form of such notice and the intended program for its distribution.

.SO DOC 16A-143.10

NYCRR

143.10 Hardship procedures. Each and every electric corporation and

gas and electric corporation shall file with the commission and make available for public inspection such corporation's detailed procedures for handling hardship situations where consumers are threatened with disconnection of service. The detailed procedures to be filed under this section shall include the special procedures during the cold weather seasons required by sections 143.12 and 143.13 of this Part. Such corporations shall observe their filed procedures in conducting their disconnection activity.

.SO DOC 16A-143.11

NYCRR

143.11 Reconnection.

On or before May 31, 1978, all electric corporations shall file with the commission tariff provisions which provide that, except in extreme and unusual circumstances or where a customer requests otherwise, such corporations shall reconnect service to any disconnected residential customer not more than 24 hours after any of the following events:

(a) receipt by the electric corporation of the full amount due (to include arrears; reestablishment charges and associated taxes; collection charges and associated taxes; and a security deposit when requested in writing) for which service had been disconnected;

(b) agreement by the electric corporation to a plan by which the residential customer is obliged to satisfy the arrears; or

(c) direction by the commission or chief--Consumer Services Section, Power or Gas Division of the commission's staff, or their designees.

The direction to reconnect service under subdivision (c) of this section should only occur where it reasonably appears, in exceptional circumstances, that there is a legitimate dispute about an unpaid portion of the arrears claimed by a utility, where an apparent error in the disconnection of service has occurred, or where a serious impairment to human health or safety seems to exist.

.SO DOC 16A-143.12

NYCRR

143.12 Special procedures during cold weather periods. (a) Not later than August 15, 1978, each and every electric corporation and gas and electric corporation shall develop methods to identify all residential households in its service territory which require electric service for heating the premises or operating a heating system. Thereafter, such corporation shall maintain the capability of identifying such residential accounts for the purposes of this section.

(b) During the period beginning November 1 of each year and ending April 15 of the following year, each electric corporation shall observe, at a minimum, the following procedures with respect to residential customers whose electric service is necessary to heat the premises or

operate a heating system (as used in this section, the term customer means a residential customer whose electric service is necessary to heat the premises or operate a heating system and includes all customers residing in dwellings not included under section 116 of the Public Service Law):

(1) No such corporation shall terminate service to any customer unless, after service of a final notice of discontinuance, the corporation has attempted to communicate with the customer, or another person, 18 years of age or older, who resides with the customer, at the customer's residence. At a minimum, the attempt at personal contact shall include one visit at the premises by field personnel during normal working hours and, in the event that personal contact is not achieved, one visit by field personnel during reasonable nonbusiness periods (6 p.m.-9 p.m. on weekdays or 9 a.m.-5 p.m. on Saturdays, Sundays and holidays). If communication with the person contacted is not possible because of an apparent language barrier, the corporation shall take steps to assure communication before discontinuance. During the personal contacts, the corporation's representatives shall fully explain the reasons for discontinuance and shall attempt to ascertain whether a serious impairment to human health may result.

(2) For the purposes of this Part, a serious impairment to human health is indicated if a customer or other person residing in the premises appears to be seriously impaired and may, because of mental or physical problems, be unable to manage his or her own resources, carry out activities of daily living or protect oneself from neglect or hazardous situations without assistance from others. Indicators of serious impairment to human health include but are not limited to:

- (i) age, infirmity or mental incapacitation;
 - (ii) use of life support systems, such as dialysis machines or iron lungs;
 - (iii) serious illness;
 - (iv) physical disability, including blindness and limited mobility;
- and
- (v) any other factual circumstances which indicate severe or hazardous health situations.

The above criteria are general standards and the corporation's field personnel must be trained to exercise discretion, sound judgment and common sense in ascertaining whether a serious impairment to human health exists. Doubts should be resolved in favor of continued service.

(3) No such corporation shall terminate service for nonpayment where a customer or other person residing in the premises exhibits a serious

impairment to human health, as described in paragraph (b)(2) of this section, unless:

(i) the corporation notifies the local social services commissioner orally and within five days in writing, on forms prescribed or approved by the commission (Appendix 16 contains the suggested form), that the customer or other person residing in the premises exhibits a serious impairment to human health; and

(ii) the local social services commissioner, after an investigation, informs the corporation that the health-impairing condition does not exist or is not serious, or that an alternative means for protecting the person's health has been devised.

The corporation may exercise its own discretion with respect to terminating service to the customer in the event it does not receive an oral or written report from the local social services commissioner within 15 business days after the written referral of the matter by the corporation to the commissioner.

(4) If such a corporation terminates electric service to a customer because of nonpayment, and the customer or a person 18 years of age or older residing on the premises was not personally contacted by the corporation before termination of service and has not communicated with the corporation for the purpose of requesting reconnection before 12 noon on the day following termination of service, the corporation shall immediately attempt to determine, by onsite inspection, direct personal contact at the premises with the residential customer or other adult person, or other reasonable measures, whether there is continuing occupancy and whether a serious impairment to human health, as described in paragraph (b)(2) of this section, exists. If the corporation determines that a customer or other person residing in the premises faces impairment to his or her health, it shall immediately restore the electric service and the requirements of paragraph (b)(3) of this section shall apply. If the corporation is unable to obtain personal contact with the customer or an adult residing on the premises, and does not have reasonable grounds to believe that the customer has vacated the premises, it shall immediately refer the name and address of the customer to the local commissioner of social services, in accordance with the procedures set forth in paragraph (b)(3) of this section.

(5) Each such corporation shall designate an employee who will serve as a liaison with local social services departments.

(6) Each such corporation shall file with the commission for its review the procedures to be followed by the corporation's personnel in complying with these special procedures.

(c) If such corporation decides to disconnect electric service to a residential customer because it has established that the meter or service laterals have been tampered with or a theft of service has occurred, it shall attempt to determine, according to the procedures set forth in paragraphs (b)(1) and (2) of this section, whether a serious impairment would result from service disconnection. If such corporation ascertains that a serious impairment to human health would result, it shall observe the procedures set forth in paragraphs (b)(3) and (4) of this section; provided, however, that the requirement of continued service shall not apply in the event it is impractical for such corporation to eliminate any unsafe condition. In any case where a serious impairment is found and the corporation terminates service to preclude the continuation of an unsafe condition, it shall specially notify the local social services commissioner on the same day service is disconnected and request an immediate consideration of the case.

Comment: If a utility discovers a meter tampering or theft situation and determines that a serious impairment exists, it should continue service, pending DSS review, provided that service can be rendered safely. For example, if a utility discovers that the meter of a "locked account" is advancing, it should, in most circumstances, be able to continue service in a safe manner. In other theft cases, particularly those involving gas service, the need for rendering the condition safe may preclude the continuation of service. For example, if a gas utility discovers unsafe piping, an unsafe meter bypass or substantial damage to the meter, termination may be the best method of eliminating the unsafe condition. If the utility cannot readily repair the unsafe condition or, in the case of a gas company, cannot obtain access to the pilot lights (which would have to be relit), immediate restoration of service would not be practical. The utility should specifically note, in its referrals to DSS, those cases where heat-related service is not restored or continued so that DSS may give immediate attention to them.

.SO DOC 16A-143.13

NYCRR

143.13 Survey of residential customers previously disconnected for nonpayment or theft of service. Not earlier than September 1 nor later than November 1 of every year, each electric corporation and gas and electric corporation shall conduct a survey of all former residential customers whose electric service was used for heating the premises or operating a heating system, was terminated for nonpayment, meter or service lateral tampering, or theft of service during the 12-month period ending on November 1 of that year, and has not been restored. The purpose of the survey is to determine whether a continued lack of

service may expose the former customer or other person residing in the premises to a serious impairment to human health as defined in subdivision (b) of section 143.12 of this Part. If the corporation determines that a former residential customer or other person residing in the premises may be exposed to a serious impairment to human health as defined in subdivision (b) of section 143.12 of this Part, it shall restore the electric service immediately, unless the customer refuses to permit such corporation to restore service or, in theft or tampering situations, unless it is impractical for the corporation to eliminate an unsafe condition, and the requirements of subdivision (b) of section 143.12 of this Part shall apply. If the corporation is unable to obtain personal contact with the customer or an adult residing on the premises or the customer refuses to permit service restoration, it shall immediately refer the name and address of the former customer to the local commissioner of social services in accordance with the procedures set forth in paragraph (b)(3) of section 143.12 of this Part, unless the corporation has reasonable grounds to believe that the former customer has permanently vacated the premises.

.SO DOC 16A-143.14

NYCRR

143.14 Voluntary third-party notice prior to discontinuance of service. (a) Each and every electric, electric and gas and municipal electric corporation shall permit a residential consumer to designate a third party to receive a copy of every notice of discontinuance of service sent to such residential consumer, provided that such third party indicates in writing his or her willingness to receive such notices.

(b) Such corporations shall notify residential consumers annually of the availability of the third-party notice procedure.

.SO DOC 16A-143.15

NYCRR

143.15 Installment plans for residential customers. No such corporation shall terminate service to a customer because of the customer's failure to pay for service unless the corporation has first offered a monthly installment plan that is just and equitable. Each corporation must offer a just and equitable monthly plan to all customers whose service has been disconnected for nonpayment. To the extent practicable, the monthly installment plan should be based on the customer's ability to pay, past payment history, the amount of indebtedness, and the availability of other resources. The monthly installment plan should require a customer to pay current bills and a portion of past indebtedness. A new monthly installment plan need not be offered to a customer who is in default on an existing one.

PART 145

INTEREST ON CUSTOMER OVERPAYMENTS TO ELECTRIC UTILITIES

(Statutory authority: Public Service Law, § 118[3])

Sec.

145.1 General

145.2 Standards

145.3 Rate of interest

145.4 Limitations

.SO DOC 16A-145.1

NYCRR

Section 145.1 General.

Every electric corporation or municipality shall provide interest on customer overpayments according to the standards and criteria set forth in this Part.

.SO DOC 16A-145.2

NYCRR

145.2 Standards.

A customer overpayment is defined as payment by the customer to the utility in excess of the correct charge for electric service supplied to the customer which was caused by erroneous billing by the utility.

.SO DOC 16A-145.3

NYCRR

145.3 Rate of interest.

The rate of interest on such amounts shall be the greater of the unadjusted customer deposit rate or the applicable late payment rate, if any, for the service classification under which the customer was billed. Interest shall be paid from the date when the customer overpayment was made, adjusted for any changes in the deposit rate or late payment rate, and compounded monthly, until the date when the overpayment was refunded.

.SO DOC 16A-145.4

NYCRR

145.4 Limitations. This Part applies to refunds returned to customers after the effective date of these rules. No electric corporation or municipality shall be required to pay interest on customer overpayments that are refunded within 30 days after such overpayment is received by the electric corporation or municipality.

SUBCHAPTER E

Records; Reports

PART

150 - 152 (Reserved)

153 Retention by Electric Corporations of Records at Principal Office

154 Continuing Property Records--Electric Corporations
.SO DOC 16A-152.1 NYCRR

Section 152.1 Scope of this Part. (a) The regulations in this Part apply to all books of account and other records prepared by or on behalf of every electric, gas, steam and waterworks corporation and municipal electric, gas and steam utility, and shall become effective January 1, 1973. See item 64 of the schedule of records and periods of retention for those records which come into possession of the electric, gas, steam and waterworks corporation and municipal electric, gas and steam utility in connection with the acquisition of property, such as purchase, consolidation, merger, etc.

(b) The regulations in this Part shall not be construed as excusing compliance with any other lawful requirement for the preservation of records for periods longer than those prescribed herein.

(c) Unless otherwise specified in the schedule of records and periods of retention, duplicate copies of records may be destroyed at any time; provided, however, that such duplicate copies contain no significant information not shown on the originals.

(d) Records other than those listed in the schedule of records and periods of retention may be destroyed at the option of the electric, gas, steam and waterworks corporation and municipal electric, gas and steam utility; provided, however, that records which are used in lieu of those listed shall be preserved for the periods prescribed for the records used for substantially similar purposes. And, provided further, that retention of records pertaining to added services, functions, plant, etc., the establishment of which cannot be presently foreseen, shall conform to the principles embodied herein.

(e) Notwithstanding the provisions of the schedule of records and periods of retention, the commission may, upon the request of the company, authorize a shorter period of retention for any record listed therein upon a showing by the company that preservation of such record for a longer period is not necessary or appropriate in the public interest or for the protection of investors or consumers.

.SO DOC 16A-152.10 NYCRR

152.10 Schedule of records and periods of retention. This schedule, contained in Appendix 4-A, *infra* shows the period of time designated records shall be preserved. However, records related to plant shall be retained a minimum of 25 years unless accounting adjustments resulting from reclassification and original cost studies have been approved by the commission and approved continuing plant inventory records are maintained.

.SO DOC 16A-152.11

NYCRR

152.11 Retention periods designated "destroy at option." Use of the retention period, "destroy at option," in the regulations in this Part constitutes authorization for such destruction under the conditions specified for the particular types of records, only if such optional destruction is appropriate to limited managerial interest in such records and if such optional destruction is not in conflict with other legal retention requirements or usefulness of such records in satisfying pending regulatory actions or directives.

.SO DOC 16A-152.12

NYCRR

152.12 Records of services performed by associated companies. The electric, gas, steam and waterworks corporation or municipal electric, gas and steam utility to which the regulations in this Part apply shall assure the availability of records of services performed by associated companies for the periods indicated herein, as are necessary, to support the cost of services rendered to it by an associated company.

.SO DOC 16A-152.13

NYCRR

152.13 Index of records. At each office of the electric, gas, steam and waterworks corporation and municipal electric, gas and steam utility where records are kept or stored, such records as are herein required to be preserved shall be so arranged, filed and currently indexed that they may be readily identified and made available to representatives of the commission.

CONTINUING PROPERTY RECORDS--ELECTRIC CORPORATIONS

(Statutory authority: Public Service Law, § 66(1))

Sec.

154.1 Corporations affected

154.2 Requirements of continuing property records

154.3 Completion of continuing property records

154.4 Filing of proposed record units

154.5 Certain records required

154.6 Original cost defined

154.7 Amounts charged in previous years to operating expenses

.SO DOC 16A-154.1

NYCRR

Section 154.1 Corporations affected. Every electric or gas and electric corporation having annual electric operating revenues of \$100,000 or over shall establish, provide and maintain continuing property records of its property used wholly or partly in electric operations.

.SO DOC 16A-154.2

NYCRR

154.2 Requirements of continuing property records.

Such continuing property record shall comply with the following requirements:

(a) Such record shall be divided into continuing property record units which shall be arranged to conform with the operating property or the fixed capital accounts and shall include a description of each of such units.

(b) The original cost of each of such units shall be set forth, provided that in those cases where the original cost cannot be ascertained without unreasonable expense, such original cost shall be estimated.

(c) Except as otherwise provided herein, there shall be shown for property hereafter installed, and for present property so far as can be ascertained, either in such record or in supporting data thereto, for

each of such units, the date when charged to operating property or fixed capital, the local of the property, the manufacturer's name and any number or other identification mark imprinted thereon, the accounting company number or designation, and such other description as may be necessary to plainly identify the property and the associated original cost thereof.

(d) When transformers or meters or major units of power plant or substation equipment have been retired and subsequently reinstalled, the date when such property was first charged to operating property or fixed capital shall also be shown.

(e) Such property record shall show separately the units located in each city, village or town, and in the case of New York City in each borough, and in each power plant and substation. When a corporation desires a modification of this requirement, application should be made to the commission.

(f) There shall be shown by appropriate reference the source of all entries; and all drawings and computations and other detail records, supporting either the quantities or the cost included in the continuing property record, shall be retained.

(g) The original cost of each parcel of land and each structure owned in fee shall be set forth and no further subdivision need be shown.

(h) The original cost of easements for right-of-way shall be separately set forth for each transmission line.

(i) Transmission and distribution property (except substation equipment), consisting of a large number of similar units, may be grouped and only the average unit cost need be set forth for similar units of each size installed during a calendar year.

.SO DOC 16A-154.3

NYCRR

154.3 Completion of continuing property records. Every electric corporation or gas and electric corporation affected by this Part shall file on or before February 1, 1937, a statement setting forth the continuing property record units proposed to be used in its continuing property record.

.SO DOC 16A-154.4

NYCRR

154.4 Filing of proposed record units.

(a) The continuing property record herein ordered to be established shall be completed as to property installed prior to January 1, 1937, on or before December 31, 1937. When a corporation desires a modification of this requirement, application should be made to the commission on or before November 1, 1937.

(b) Upon the completion of the continuing property record of property

acquired prior to January 1, 1937, notice shall be given to this commission.

.SO DOC 16A-154.5 NYCRR

154.5 Certain records required. (a) Each corporation affected by this Part shall keep such records of property and property retirements as will reflect, so far as practicable, the service life of all property retired, and will permit the determination of the age of all existing property; and also such records as will reflect the salvage and cost of removal of property retired from each account including property used wholly or partly in electric operations.

(b) Each such corporation shall also maintain such records supporting its books of account as are necessary to show the reserves accumulated to provide for depreciation or ultimate retirement of its property used wholly or partly in electric operations, separately for each operating property or fixed capital account.

.SO DOC 16A-154.6 NYCRR

154.6 Original cost defined. The term original cost when used herein means the cost of such property to the person or corporation first devoting it to public service.

.SO DOC 16A-154.7 NYCRR

154.7 Amounts charged in previous years to operating expenses. Nothing herein stated shall be taken as permitting the recording in the original cost shown in the continuing property record of amounts charged in previous years to operating expenses, operating taxes or other income or surplus accounts.

165.1 Authorization of uniform system of accounts for Classes A and B

.SO DOC 16A-165.1

NYCRR

Section 165.1 - Authorization of uniform system of accounts for Classes A and B.

(a) The uniform system of accounts for electric corporations (Classes A and B) is hereby prescribed for every electric corporation (as that term is defined in the Public Service Law) that has annual operating revenues from electric operations of \$1,000,000 or more, subject to the jurisdiction of this commission; and every such electric corporation is hereby required, by no later than January 1, 2000, to keep its records and accounts in conformity therewith.

(b) During the 12 months following the date on which the uniform system of accounts becomes effective, any such electric corporation may, for purposes of comparison, keep on its books, in addition to the accounts hereby prescribed, such portion or portions of its present accounts as may be deemed desirable by any such corporation.

(c) In prescribing this system of accounts, the commission does not commit itself to the approval or acceptance of any item set out in any account for the purpose of fixing rates or in determining other matters before the commission.

(d) In the system of accounts, Commission means the Public Service

Commission of the State of New York.

INSTRUCTIONS--GENERAL

(Statutory authority: Public Service Law, § 66(4))

Sec.

166.1 Classification of utilities

166.2 Records

.SO DOC 16A-166.1

NYCRR

Section 166.1 Classification of utilities.

(a) For the purpose of applying systems of accounts prescribed by the commission, utilities are divided into four classes as follows:

Class A. Utilities having annual electric operating revenues of \$2,500,000 or more.

Class B. Utilities having annual electric operating revenues of \$1,000,000 or more, but less than \$2,500,000.

Class C. Utilities having annual electric operating revenues of \$150,000 or more, but less than \$1,000,000.

Class D. Utilities having annual electric operating revenues of \$25,000 or more, but less than \$150,000.

(b) This system of accounts applies to Class A and Class B utilities. The system of accounts applicable to Class C and Class D utilities is issued separately.

(c) The class to which any utility belongs shall originally be determined by the average of its annual electric operating revenues for the last three consecutive years. Subsequent changes in classification shall be made when the annual electric operating revenues for each of the three immediately preceding years shall exceed the upper limit, or be less than the lower limit, of the annual electric operating revenues of the classification previously applicable to the utility.

.SO DOC 16A-166.2

NYCRR

166.2 Records.

The books and records referred to in this section include not only accounting records in a limited technical sense, but all other records, such as minute books, stock books, reports, correspondence, memoranda, etc. that may be useful in developing the history of, or facts regarding, any transaction. All such records in the system of accounts discussed below shall be accessible, at all times, to the authorized representatives of the commission at a location within the State of New York, unless the company is specifically exempted by order of the commission.

SYSTEM OF ACCOUNTS PRESCRIBED

(Statutory authority: Public Service Law, § 66(4))

Sec.

167.1 System of accounts prescribed

167.2 Records for territorial subdivisions

167.3 Work order and property record system required

167.4 Spreading of income, revenue, and expense items

167.5 Revenues from the distribution of electricity of others

167.6 Gains or losses from the settlement of asset retirement obligations

.SO DOC 16A-167.1

NYCRR

Section 167.1 System of accounts prescribed.

Each Class A and Class B electric utility shall keep its accounts in conformity with the Code of Federal Regulations (Revised as of April 1, 2015), Title 18, Conservation of Power and Water Resources, Subchapter C - Accounts, Federal Power Act, Part 101, Uniform System of Accounts Prescribed for Public Utilities and Licenses Subject to the Provisions of the Federal Power Act. (As further described in Section 10.2 (b) of these regulations).

.SO DOC 16A-167.2

NYCRR

167.2 Records for territorial subdivisions.

To the extent that a utility's customer rates are based on a cost area or accounting division, the records that support those rates shall be maintained.

.SO DOC 16A-167.3

NYCRR

167.3 Work order and property record system required.

(a) The work order system shall include a work order estimate and work in progress record, which shall be supported as indicated in subdivisions (b) and (c) herein. Standing work orders may be used by Class A and B utilities for projects of relatively small value (e.g., \$100,000); except that projects upon which interest during construction is charged shall not be recorded through standing work orders. These limits may be modified by order of the commission when warranted by particular circumstances.

(b) The work order estimate shall include the following particulars:

(1) The designation number or letter and the signature of the officer or employee who authorized the work or purchase. If the authorization is by the board of directors or other body, an appropriate officer shall so state above his signature.

(2) A description and location of the work to be done (or the purchase to be made), stating the reasons the work is necessary, and the dates between which such work (or purchase) is to be accomplished. For each project for which interest during construction is charged, the date completed and the date placed in operation shall be shown either in the work order estimate or the work in progress record.

(3) Detailed estimates of the cost of the project to be supported by maps, plans, diagrams, specifications, etc., as applicable.

(4) The account or accounts to which the cost of the project is chargeable and the amount chargeable to each account.

(5) Any variations between estimates and actual costs of the project.

(6) When a project involves changes to existing property, either the work order estimate or the work in progress record shall show the year of installation of any property retired or otherwise affected and shall show or refer to other records that cover the book costs (or an estimate if not known, and a statement explaining the basis for that estimate) and the name and page of the accounting and engineering books and records covering such installation and the cost thereof.

(c) The work in progress record shall contain the following particulars:

(1) A designation number or letter that shall correspond to the number or letter on the work order estimate covering the same project. When more than one such work in progress record covers the work on a work order estimate, each record shall be numbered or lettered in such a manner as to be readily identifiable with the work order estimate for the same project.

(2) The accumulated charges applicable to each job or project, the total cost of the completed project, and the cost of removal shall be shown. When any project involves charges to more than one electric plant account, the work in progress record shall be kept so as to show the amount chargeable to each account. Every charge or credit to work in progress records shall refer to the voucher, journal, or other source from which the entry therein was made.

(3) Full details at any time of the amount carried in account 107, Construction Work in Progress-Electric, or account 108.1, Retirement Work in Progress, as applicable. The cost of completed projects shall be promptly transferred from those accounts to the accounts to which it is chargeable. Upon coming into service, completed portions involving additions to accounts shall be transferred to the appropriate account even though other portions of the work covered by the same work order are not yet completed and the work order has not been closed. Credits of

such transfers shall be made in separate columns.

(d) Requirement of the use of the work order system here outlined may be suspended by order of the commission in the case of a utility that satisfies the commission that the system it has in use for recording changes in electric plant accounts gives the equivalent detail by accounts in substantially the same form. The identification of expenditures with property must be complete and clear, and the detail of the cost of each project or job must be readily available. The total of the uncompleted projects must also be in agreement with account 107, Construction Work in Progress-Electric, or account 108.1, Retirement Work in Progress, as applicable.

(e) The work order system is required to record changes in electric plant used either wholly or in part in electric operations. Its use is recommended, however, in recording other expenditures, such as for plant in other departments, repairs, etc. When used for repairs, balances applicable thereto shall be cleared monthly to the appropriate accounts.

.SO DOC 16A-167.4 NYCRR

167.4 Spreading of income, revenue, and expense items.

When the amount of any unusual item includible in the income, operating revenue, or operating expense accounts is relatively so large that its inclusion in the accounts for the year in which the transactions occurred, would seriously distort net income, the company may request permission to include all or a part of the amount in account 186, Miscellaneous Deferred Debits, or account 253, Other Deferred Credits to be amortized over such period and through such accounts as the commission shall determine. Without permission of this commission, no such item shall be carried beyond the calendar year in which the transaction occurred.

.SO DOC 16A-167.5 NYCRR

167.5 Revenues from the distribution of electricity of others.

Revenues from the distribution of electricity to the utility's customers where the electricity is provided by a party other than the utility shall be included in account 456.2, Revenues from the Distribution of Electricity of Others. Subsidiary accounts shall be maintained to break down these revenues according to the classification of accounts under the sales of electricity revenue accounts. Records shall be maintained so that the quantity of electricity delivered and the revenue received under each rate schedule shall be readily available.

.SO DOC 16A-167.6 NYCRR

167.6 Gains or losses from the settlement of asset retirement

obligations.

Gains or losses resulting from the settlement of asset retirement obligations associated with utility plant resulting from the difference between the amount of the liability for the asset retirement obligation included in account 230, Asset Retirement Obligation, and the actual amount paid to settle the obligation shall be accounted for as follows:

(a) gains shall be credited to account 108, Accumulated Provision for Depreciation of Electric Utility Plant, and;

(b) losses shall be charged to account 108, Accumulated provision for Depreciation of Electric Utility Plant.

.SO DOC 16A-ACCTSAB

NYCRR

ACCOUNTS

Note: Each utility, upon filing a waiver of statutory notice with the commission not later than 60 days after service of a copy of the October 12, 1974 resolution, is authorized and permitted to keep its records and accounts in conformity with the Uniform Systems of Accounts as amended commencing January 1, 1975.

ASSETS AND OTHER DEBITS

1. UTILITY PLANT

101. Electric Plant in Service

A. This account shall include the original cost of electric plant included in accounts 301 to 399 prescribed herein, owned by the utility and used and useful in the service of the public in its electric operations, and having an expectation of life in service of more than one year from date of installation, including such property owned by the utility but held by nominees. (See also 106 for unclassified construction costs of completed plant actually in service.)

B. The cost of additions to and betterments of property leased from others, which are includible in this account, shall be recorded in subdivisions separate and distinct from those relating to owned property. (See electric plant instruction 168.6.)

C. This account may include the entire original cost of property which is partially used and useful in utility operations when the portion which is so used and useful is not separable from the portion which is not used and useful.

102. Electric Plant Purchased or Sold

This account shall be charged with the cost of electric plant acquired as an operating unit or system by purchase, merger, consolidation, liquidation, or otherwise, and shall be credited with the selling price

of like property transferred to others pending the distribution to appropriate accounts in accordance with electric plant instruction 168.5.

103. Experimental Electric Plant Unclassified

A. This account shall include the cost of electric plant which was constructed as a research and development plant under the provisions of paragraph C, account 107, Construction Work in Progress--Electric, and due to the nature of the plant it is desirable to operate it for a period of time in an experimental status.

B. Amounts in this account shall be transferred to account 101, Electric Plant in Service, or account 121, Nonutility Property as appropriate when the project is no longer considered as experimental.

C. The depreciation on property in this account shall be charged to account 403, Depreciation Expense, and credited to account 108, Accumulated Provision for Depreciation of Electric Plant in Service. The amounts herein shall be depreciated over a period which would correspond to the estimated useful life of the relevant project considering the experimental characteristics involved. However, when projects are transferred to account 101, Electric Plant in Service, a new depreciation rate based on the remaining service life and undepreciated amounts, shall be established.

D. Records shall be maintained with respect to each unit of experimental plant so that the full details may be obtained as to the cost, depreciation and the experimental status.

E. Should it be determined that experimental plant recorded in this account will fail to perform its function satisfactorily, the costs thereof shall be accounted for as directed or authorized by the commission.

104. Electric Plant Leased to Others

A. This account shall include the original cost of electric plant owned by the utility, but leased to others as operating units or systems, where the lessee has exclusive possession.

B. The property included in this account shall be classified according to the detailed accounts (301 to 399) prescribed for electric plant in service, and this account shall be maintained in such detail as though the property were used by the owner in its electric operations.

105. Electric Plant Held for Future Use

A. This account shall include the original cost of electric plant (except land and land rights) owned and held for future use in electric service under a definite plan for such use, to include: (1) property acquired (except land and land rights) but never used by the utility in

electric service, but held for such service in the future under a definite plan, and (2) property (except land and land rights) previously used by the utility in service, but retired from such service and held pending its reuse in the future under a definite plan, in electric service.

B. This account shall also include the original cost of land and land rights owned and held for future use in electric service under a plan for such use, to include land and land rights: (1) acquired but never used by the utility in electric service, but held for such service in the future under a plan, and (2) previously held by the utility in electric service, but retired from such service and held pending its reuse in the future under a plan, in electric service. (See Electric Plant instruction 168.7.)

C. In the event that property recorded in this account shall no longer be needed or appropriate for future utility operations, the company shall notify the commission of such condition and request approval of journal entries to remove such property from this account.

D. Gains or losses from the sale of land and land rights or other disposition of such property previously recorded in this account and not placed in utility service shall be recorded directly in accounts 411.6 or 411.7, as appropriate except when such gains or losses are significant, the company may request commission approval to transfer the amounts to account 256, Deferred Gains from Disposition of Utility Plant or account 187, Deferred Losses from Disposition of Utility Plant and amortize the amounts to account 411.6, Gains from Disposition of Utility Plant, or 411.7, Losses from Disposition of Utility Plant over such period as the commission may authorize.

E. The property included in this account shall be classified according to the detail accounts (301 to 399) prescribed for electric plant in service and the account shall be maintained in such detail as though the property were in service.

Note: Materials and supplies, meters and transformers held in reserve, and normal spare capacity of plant in service shall not be included in this account.

106. Completed Construction Not Classified--Electric

At the end of the year or such other date as a balance sheet may be required by the commission, this account shall include the total of the balances of work orders for electric plant which has been completed and placed in service but which work orders have not been classified for transfer to the detailed electric plant accounts.

Note: For the purpose of reporting to the commission, the

classification of electric plant in service by the prescribed accounts is required; the utility shall also report the balance in this account tentatively classified as accurately as practicable according to prescribed account classifications.

The purpose of this provision is to avoid any significant omissions in reported amounts of electric plant in service.

107. Construction Work in Progress--Electric

A. This account shall include the total of the balances of work orders for electric plant in process of construction.

B. Work orders shall be cleared from this account as soon as practicable after completion of the job. Further, if a project, such as a hydroelectric project, a steam station, or a transmission line, is designed to consist of two or more units or circuits which may be placed in service at different dates, any expenditures which are common to and which will be used in the operation of the project as a whole shall be included in electric plant in service upon the completion and the readiness for service of the first unit. Any expenditures which are identified exclusively with units of property not yet in service shall be included in this account.

C. Expenditures on research and development projects for construction of utility facilities are to be included in a separate subdivision in this account. Records must be maintained to show separately each project along with complete detail of the nature and purpose of the research and development project together with the related costs. Costs recorded in this account related to successful projects become a part of the cost of the project for accounting and rate purposes when the project is placed in service. Costs related to unsuccessful projects may be amortized to operating expenses with the approval of the commission.

108. Accumulated Provision for Depreciation of Electric Plant in Service

A. This account shall be credited with the following:

(1) Amounts charged to account 403, Depreciation Expense (except in connection with common utility plant), in account 416, Costs and Expenses of Merchandising, Jobbing and Contract Work, and to clearing accounts for current depreciation expense.

(2) Amounts of depreciation applicable to electric properties acquired as operating units or systems. (See electric plant instruction 168.5.)

(3) Amounts charged to account 182, Extraordinary Property Losses, when authorized by the commission.

B. At the time of retirement of depreciable electric plant in service this account shall be charged with the book cost of the property retired

and the cost of removal, and shall be credited with the salvage value and any other amounts recovered, such as insurance. (See electric plant instruction 168.10, subd. (b)(2).) When retirements, cost of removal and salvage are entered originally in retirement work orders, the net total of such work orders shall be included in a separate subaccount hereunder, titled 108.1, Retirement Work in Progress. Upon completion of the work order, the proper distribution to subdivisions of this account shall be made as provided in the following paragraph.

C. For general ledger and balance sheet purposes, this account shall be regarded and treated as a single composite provision for depreciation. For purposes of analysis, however, each utility shall maintain subsidiary records in which this account is segregated according to the primary electric plant accounts. Such subsidiary records shall reflect the current credits and debits to this account in sufficient detail to show separately for each primary electric plant account (1) the amount of provision for depreciation, (2) the book cost of property retired, (3) cost of removal, (4) salvage, and (5) other items, including recoveries from insurance. (See also, general instruction 166.12, subd. (d).)

D. When transfers of plant are made from one electric plant account to another, or from or to another utility department, or from or to nonutility property accounts, the accounting for the related accumulated provision for depreciation shall be as provided in electric plant instruction 168.12.

E. The utility is restricted in its use of the accumulated provision for depreciation to the purposes set forth above. It shall not transfer any portion of this account to retained earnings or make any other use thereof without authorization by the commission.

109. Accumulated Provision for Depreciation of Electric Plant Leased to Others

A. This account shall be credited with amounts charged to account 413, Expenses of Electric Plant Leased to Others, for current depreciation expense of property included in account 104, Electric Plant Leased to Others. Include, also, credits for depreciation applicable to plant acquired as operating units or systems, or for losses transferred to account 182, Extraordinary Property Losses.

B. The requirements of account 108, Accumulated Provision for Depreciation of Electric Plant in Service, regarding retirements chargeable thereto and of subsidiary data to be maintained shall be applicable likewise to this account.

C. The utility is restricted in its use of the accumulated provision

for depreciation to the purposes set forth above. It shall not transfer any portion of this account to retained earnings or make any other use thereof without authorization by the commission.

110. Accumulated Provision for Depreciation of Electric Plant Held for Future Use

A. This account shall be credited with amounts charged to account 421, Miscellaneous Nonoperating Income, for depreciation expense on property included in account 105, Electric Plant Held for Future Use. Include also the balance of accumulated provision for depreciation on property which may be transferred to account 105, Electric Plant Held for Future Use, from other property accounts.

B. The utility is restricted in its use of the accumulated provision for depreciation to the purposes set forth above. It shall not transfer any portion of this account to retained earnings or make any other use thereof without authorization by the commission.

Note: Normally, this account will not be used for current depreciation provisions because, as provided herein, the service life during which depreciation is computed commences with the date property is includible in electric plant in service. However, if special circumstances indicate the propriety of current accruals for depreciation, such charges shall be made to account 421, Miscellaneous Non-operating Income.

111. Accumulated Provision for Amortization of Electric Plant In Service

A. This account shall be credited with amounts charged to account 404, Amortization of Limited-term Electric Plant, for the current amortization of limited-term electric investments. It shall be credited also with amounts which may be charged to account 405, Amortization of Other Electric Plant, to account 425, Miscellaneous Amortization, to amortize intangible or other electric plant which does not have a definite or terminable life and is not subject to charges for depreciation expense.

B. When any property to which this account applies is sold, relinquished, or otherwise retired from service, this account shall be charged with the amount previously credited in respect to such property. The book cost of the property so retired less the amount chargeable to this account and less the net proceeds realized at retirement shall be included in account 421.1, Gain on Disposition of Property, or 421.2, Loss on Disposition to Property, as appropriate.

C. Records shall be maintained so as to show separately the balance applicable to each class of property which is being amortized.

D. The utility is restricted in its use of the accumulated provision

for amortization to the purposes set forth above. It shall not transfer any portion of this account to retained earnings or make any other use thereof without authorization by the commission.

112. Accumulated Provision for Amortization of Electric Plant Leased to Others

A. This account shall be credited with amounts charged to account 413, Expenses of Electric Plant Leased to Others, for the current amortization of limited-term or other investments subject to amortization included in account 104,

Electric Plant Leased to Others.

B. When any property to which this account applies is sold, relinquished, or otherwise retired from service, this account shall be charged with the amount previously credited in respect to such property. The book cost of the property so retired less the amount chargeable to this account and less the net proceeds realized at retirement shall be included in account 421.1, Gain on Disposition of Property, or account 421.2, Loss on Disposition of Property, as appropriate.

C. Records shall be maintained so as to show separately the balance applicable to each class of property which is being amortized.

D. The utility is restricted in its use of the accumulated provision for amortization to the purposes set forth above. It shall not transfer any portion of this account to retained earnings or make any other use thereof without authorization by the commission.

113. Accumulated Provision for Amortization of Electric Plant Held for Future Use

A. This account shall be credited with amounts charged to account 421, Miscellaneous Nonoperating Income, for amortization expense on property included in account 105, Electric Plant Held for Future Use. Include, also, the balance of accumulated provision for amortization on property which may be transferred to account 105, Electric Plant Held for Future Use, from other property accounts.

B. The utility is restricted in its use of the accumulated provision for amortization to the purposes set forth above. It shall not transfer any portion of this account to retained earnings or make any other use thereof without authorization by the commission.

114. Electric Plant Acquisition Adjustments

A. This account shall include amounts determined in accordance with electric plant instruction 168.5 representing the difference between (1) the amount of money actually paid (or the current money value of any consideration other than money exchanged) for electric plant acquired as an operating unit or system by purchase, merger, consolidation,

liquidation, or otherwise, plus the costs and expenses incurred in connection with the acquisition and properly related thereto the accounting disposition of which has not been otherwise provided for, and (2) the original cost, estimated if not known, of such property less credits thereto representing contributions in aid of construction and less the amount or amounts credited to accumulated provisions for depreciation and amortization with respect to such property.

B. This account shall be subdivided so as to show the amounts included herein for each property acquisition, and the amounts related to electric plant in service, electric plant held for future use, and electric plant leased to others. (See electric plant instruction 168.5.)

C. The amounts recorded in this account with respect to each property acquisition shall be disposed of, written off, or provision shall be made for the amortization thereof, as follows:

(1) Debit amounts may be charged to account 426.5, Other Deductions, or account 435, Extraordinary Deductions, as appropriate in whole or in part, or amortized through charges made in accordance with an orderly and systematic amortization program to account 425, Miscellaneous Amortization, without further direction or approval of this commission. Should the utility desire the disposition of debit amounts in any manner other than as herein provided, it shall request that the commission (i) approve disposition proposed by the utility or (ii) direct appropriate disposition according to the circumstances involved in each transaction. (See also account 406.)

(2) Credit amounts shall be disposed of in such manner as this commission may approve or direct.

115. Accumulated Provision for Amortization of Electric Plant Acquisition Adjustments

This account shall be credited or debited with amounts which are includible in account 406, Amortization of Electric Plant Acquisition Adjustments or account 425, Miscellaneous Amortization, for the purpose of providing for the extinguishment of amounts in account 114, Electric Plant Acquisition Adjustments, in instances where the amortization of account 114 is not being made by direct write-off of the account.

118.1 Common Utility Plant

This account shall include the balances in accounts for utility plant which is used in common for electric operations and other operations. (See electric plant instruction 168.13.)

118.2 Other Utility Plant

A. This account shall include the balances in accounts for utility plant, other than electric plant and common utility plant.

B. A separate account shall be maintained for each utility department.

Note: In the case of utility services for which systems of accounts are prescribed by this commission, such as gas, steam, etc., the appropriate accounts in such systems shall be used instead of this account.

119.1 Accumulated Provision for Depreciation and Amortization of Common Utility Plant

This account shall include the accumulated provision for depreciation and amortization applicable to property carried in common utility plant account 118.1. (See also general instruction 166.12 and electric plant instruction 168.13.)

119.2 Accumulated Provision for Depreciation and Amortization of Other Utility Plant

This account shall include the accumulated provision for depreciation and amortization applicable to property in account 118.2, Other Utility Plant.

Note: In the case of utility services for which systems of accounts are prescribed by this commission, such as gas, steam, etc., the appropriate accounts in such systems shall be used instead of this account.

120. Nuclear Fuel Assemblies

This account shall include, in the appropriate subaccounts hereof, the cost of nuclear fuel in utility plant owned for use by the utility in its electric operations. This account shall be maintained according to subaccounts 120.1 to 120.4 inclusive, as shown below.

120.1 Nuclear Fuel in Process

A. This account shall include the original cost to the utility of nuclear fuel material while in process of refinement, conversion, enrichment and fabrication into nuclear fuel assemblies and components including processing, fabrication and necessary shipping costs. This account shall also include the salvage value of nuclear materials which are actually being reprocessed for use and were transferred from account 120.5, Accumulated Provision for Amortization of Nuclear Fuel Assemblies. (See definition 19.)

B. This account shall be credited and account 120.2, Nuclear Fuel Materials and Assemblies in Stock, shall be debited for the cost of completed fuel assemblies delivered for use in refueling or to be held as spares.

ITEMS

1. Cost of natural uranium, uranium ores concentrates or other nuclear fuel sources, such as thorium, plutonium, and U-233.

2. Value of recovered nuclear materials being reprocessed for use.
3. Milling process costs.
4. Sampling and weighing, and assaying costs.
5. Purification and conversion process costs.
6. Costs of enrichment by gaseous diffusion or other methods.
7. Costs of fabrication into fuel forms suitable for insertion in the reactor.
8. All shipping costs of materials and components, including shipping of fabricated fuel assemblies to the reactor site.
9. Use charges on leased nuclear materials while in process of refinement, conversion, enrichment and fabrication.

120.2 Nuclear Fuel Materials and Assemblies In Stock

A. This account shall be debited and account 120.1, Nuclear Fuel in Process, shall be credited with the cost of fabricated fuel assemblies delivered for use in refueling or to be carried in stock as spares. It shall also include the original cost of fabricated fuel assemblies purchased in completed form. This account shall also include the original cost of partially irradiated fuel assemblies being held in stock for reinsertion in a reactor which had been transferred from account 120.3, Nuclear Fuel Assemblies in Reactor.

B. When fuel assemblies included in this account are inserted in a reactor, this account shall be credited and account 120.3, Nuclear Fuel Assemblies in Reactor, debited for the cost of such assemblies.

C. This account shall also include the cost of nuclear materials and by-product materials being held for future use and not actually in process of refinement, conversion, enrichment and fabrication.

120.3 Nuclear Fuel Assemblies in Reactor

A. This account shall include the cost of nuclear fuel assemblies when inserted in a reactor for the production of electricity. The amounts included herein shall be transferred from account 120.2, Nuclear Fuel Materials and Assemblies in Stock.

B. Upon removal of fuel assemblies from a reactor, the original cost of the assemblies removed shall be transferred to account 120.4, Spent Nuclear Fuel, or account 120.2, Nuclear Fuel Materials and Assemblies in Stock, as appropriate.

120.4 Spent Nuclear Fuel

A. This account shall include the original cost of nuclear fuel assemblies, in the process of cooling, transferred from account 120.3, Nuclear Fuel Assemblies in Reactor, upon removal from a reactor pending reprocessing.

B. This account shall be credited and account 120.5.4, debited for

fuel assemblies after the cooling period is over, at the cost recorded in this account.

120.5 Accumulated Provision for Amortization of Nuclear Fuel Assemblies

A. This account shall include, in the appropriate subaccounts hereof, the provision for amortization of the net cost of nuclear fuel assemblies used in the production of energy.

B. When a batch of spent fuel assemblies has been disposed of and the recoverable material, if any, determined, the amounts with respect to such batch included in the subaccounts hereof shall be cleared from said subaccounts and the remaining difference in such cleared amounts shall be debited or credited, as the case may be, to account 518.1, Nuclear Fuel.

120.5.1 Provision for Fuel Burn-up

This account shall be credited and account 518.1, Nuclear Fuel, charged with the amortization of the cost of nuclear fuel assemblies used in the production of energy.

120.5.2 Provision for Chemical Processing

A. This account shall be credited and account 518.1, Nuclear Fuel, charged periodically on a reasonable basis with the estimated cost of chemical processing and related transportation that may be incurred in connection with the disposal of spent fuel elements and the recovery of nuclear and by-product materials.

B. This account shall be charged with the actual costs incurred in connection with the disposal of spent fuel elements and the recovery of nuclear by-product materials.

120.5.3 Recovered Materials

A. This account shall be debited and account 518.1, Nuclear Fuel, credited with the estimated value of nuclear and by-product materials to be recovered from spent fuel elements. When such material has been recovered, this account shall be credited with corresponding debits to accounts 120.1, 120.2, or 150.157, as appropriate.

B. Material chargeable to account 150.157, Nuclear By-Product Materials, shall be entered at market value, estimated if not known.

C. Material chargeable to account 120.1, Nuclear Fuel in Process, or account 120.2, Nuclear Fuel Materials and Assemblies in Stock, shall be entered at current market value.

120.5.4 Retired Nuclear Fuel

This account shall be charged with amounts transferred from account 120.4, Spent Nuclear Fuel.

2. OTHER PROPERTY AND INVESTMENTS

121. Nonutility Property

A. This account shall include the book cost of land, structures, equipment or other tangible or intangible property owned by the utility, but not used in utility service and not properly includible in account 105, Electric Plant Held for Future Use.

B. This account shall be subdivided so as to show the amount of property used in operations which are nonutility in character but nevertheless constitute a distinct operating activity of the company (such as operation of an ice department) and the amount of miscellaneous property not used in operations. The records in support of each subaccount shall be maintained so as to show an appropriate classification of the property.

122. Accumulated Provision for Depreciation and Amortization of Nonutility Property

This account shall include the accumulated provision for depreciation and amortization applicable to nonutility property.

123. Investment in Associated Companies

A. This account shall include the book cost of investments in securities issued or assumed by associated companies and investment advances to such companies, including interest accrued thereon when such interest is not subject to current settlement, provided that the investment does not relate to a subsidiary company. (If the investment relates to a subsidiary company it shall be included in account 123.1, Investment in Subsidiary Companies.) Include herein the offsetting entry to the recording of amortization of discount or premium on interest bearing investments. (See account 419, Interest and Dividend Income.)

B. The account shall be maintained in such manner as to show the investment in securities of, and advances to, each associated company together with full particulars regarding any of such investments that are pledged.

Note A: Securities and advances of associated companies owned and pledged shall be included in this account, but such securities, if held in special deposits or in special funds, shall be included in the appropriate deposit or fund account. A complete record of securities pledged shall be maintained.

Note B: Securities of associated companies held as temporary cash investments are includible in account 136, Temporary Cash investments.

Note C: Balances in open accounts with associated companies, which are subject to current settlement, are includible in account 146, Accounts Receivable from Associated Companies.

Note D: The utility may write down the cost of any security in recognition of a decline in the value thereof. Securities shall be written off or written down to a nominal value if there be no reasonable prospect of substantial value.

Fluctuations in market value shall not be recorded but a permanent impairment in the value of securities shall be recognized in the accounts. When securities are written off or written down, the amount of the adjustment shall be charged to account 426.5, Other Deductions, or to an appropriate account for accumulated provisions for loss in value established as a separate subdivision of this account.

Note E: Advances made to associated companies without expectation of reimbursement shall be credited to this account and charged to account 426.5, Other Deductions.

123.1 Investment in Subsidiary Companies

A. This account shall include the cost of investments in securities issued or assumed by subsidiary companies and investment advances to such companies, including interest accrued thereon when such interest is not subject to current settlement plus the equity in undistributed earnings or losses of such subsidiary companies since acquisition. This account shall be credited with any dividends declared by such subsidiaries.

B. This account shall be maintained in such a manner as to show separately for each subsidiary: the cost of such investments in the securities of the subsidiary at the time of acquisition; the amount of equity in the subsidiary's undistributed net earnings or net losses since acquisition; advances or loans to such subsidiary; and full particulars regarding any such investments that are pledged.

124. Other Investments

A. This account shall include the book cost of investments in securities issued or assumed by nonassociated companies, investment advances to such companies, and any investments not accounted for elsewhere. Include also the offsetting entry to the recording of amortization of discount or premium on interest bearing investments. (See account 419, Interest and Dividend Income.)

B. The records shall be maintained in such manner as to show the amount of each investment and the investment advances to each person.

C. When securities with a fixed maturity date are purchased at a discount (that is, when the total cost, including brokerage fees, taxes, commissions, etc., is less than par), such discount may be amortized over the remaining life of the securities through periodic debits to the account in which the securities are carried (preferably coincident with

entries recording interest accruals) and credits to the same account in which the interest revenue is recorded. No debits shall be made in respect to discount upon securities held as investments or in special funds if there is reason to believe that such securities will be disposed of by redemption or otherwise at less than par or will not be paid at date of maturity.

D. When securities with a fixed maturity date are purchased at a premium (that is when the total cost, including brokerage fees, taxes, commissions, etc., is in excess of par), such premium may be amortized over the remaining life of the securities through periodic credits to the account in which the securities are carried (preferably coincident with entries recording interest accruals) and debits to the same account in which the interest revenue is recorded.

Note A: Securities owned and pledged shall be included in this account, but securities held in special deposits or in special funds shall be included in appropriate deposit or fund accounts. A complete record of securities pledged shall be maintained.

Note B: Securities held as temporary cash investments shall not be included in this account. (See account 136, Temporary Cash Investments.)

Note C: See note D of account 123.

125. Sinking Funds

This account shall include the amount of cash and book cost of investments held in sinking funds. A separate account, with appropriate title, shall be kept for each sinking fund. Transfers from this account to special deposit accounts may be made as necessary for the purpose of paying matured sinking-fund obligations, or obligations called for redemption but not presented, or the interest thereon.

126. Depreciation Fund

This account shall include the amount of cash and the book cost of investments which have been segregated in a special fund for the purpose of identifying such assets with the accumulated provisions for depreciation.

128. Other Special Funds

This account shall include the amount of cash and book cost of investments which have been segregated in special funds for insurance, employee pensions, savings, relief, hospital, and other purposes not provided for elsewhere. A separate account, with appropriate title, shall be kept for each fund.

Note: Amounts deposited with a trustee under the terms of an irrevocable trust agreement for pensions or other employee benefits shall not be included in this account.

3. CURRENT AND ACCRUED ASSETS

131. Cash

This account shall include the amount of current cash funds except working funds.

132. Interest Special Deposits

This account shall include special deposits with fiscal agents or others for the payment of interest.

133. Dividend Special Deposits

This account shall include special deposits with fiscal agents or others for the payment of dividends.

134. Other Special Deposits

This account shall include deposits with fiscal agents or others for special purposes other than the payment of interest and dividends. Such special deposits may include cash deposited with federal, state, or municipal authorities as a guaranty for the fulfillment of obligations; cash deposited with trustees to be held until mortgaged property sold, destroyed, or otherwise disposed of is replaced; cash realized from the sale of the accounting utility's securities and deposited with trustees to be held until invested in property of the utility, etc. Entries to this account shall specify the purpose for which the deposit is made.

Note: Assets available for general corporate purposes shall not be included in this account. Further, deposits for more than one year, which are not offset by current liabilities, shall not be charged to this account but to account 128, Other Special Funds.

135. Working Funds

This account shall include cash advanced to officers, agents, employees, and others as petty cash or working funds.

136. Temporary Cash Investments

A. This account shall include the book cost of investments, such as demand and time loans, bankers' acceptances, United States Treasury certificates, marketable securities, and other similar investments acquired for the purpose of temporarily investing cash.

B. This account shall be so maintained as to show separately temporary cash investments in securities of associated companies and of others. Records shall be kept of any pledged investments.

141. Notes Receivable

This account shall include the book cost, not includible elsewhere, of all collectible obligations in the form of notes receivable and similar evidences (except interest coupons) of money due on demand or within one year from the date of issue, except, however, notes receivable from associated companies. (See account 136, Temporary Cash Investments, and

account 145, Notes Receivable from Associated Companies.)

Note: The face amount of notes receivable discounted, sold, or transferred without releasing the utility from liability as endorser thereon, shall be credited to a separate subdivision of this account and appropriate disclosure shall be made in financial statements of any contingent liability arising from such transactions.

142. Customer Accounts Receivable

A. This account shall include amounts due from customers for utility service, and for merchandising, jobbing and contract work. This account shall not include amounts due from associated companies.

B. This account shall be maintained so as to permit ready segregation of the amounts due for merchandising, jobbing and contract work.

143. Other Accounts Receivable

A. This account shall include amounts due the utility upon open accounts, other than amounts due from associated companies and from customers for utility services and merchandising, jobbing and contract work.

B. This account shall be maintained so as to show separately amounts due on subscriptions to capital stock and from officers and employees, but the account shall not include amounts advanced to officers or others as working funds. (See account 135, Working Funds.)

144. Accumulated Provision for Uncollectible Accounts--Credit

A. This account shall be credited with amounts provided for losses on accounts receivable which may become uncollectible, and also with collections on accounts previously charged thereto. Concurrent charges shall be made to account 904, Uncollectible Accounts, for amounts applicable to utility operations, and to corresponding accounts for other operations. Records shall be maintained so as to show the write-offs of accounts receivable for each utility department.

B. This account shall be subdivided to show the provision applicable to the following classes of accounts receivable:

Utility Customers for Utility Services

Merchandising, Jobbing and Contract Work

Officers and Employees

Others

Note A: Accretions to this account shall not be made in excess of a reasonable provision against losses of the character provided for.

Note B: If provisions for uncollectible notes receivable or for uncollectible receivables from associated companies are necessary, separate subaccounts therefore shall be established under the account in which the receivable is carried.

145. Notes Receivable from Associated Companies

146. Accounts Receivable from Associated Companies

These accounts shall include notes and drafts upon which associated companies are liable, and which mature and are expected to be paid in full not later than one year from date of issue, together with any interest thereon, and debit balances subject to current settlement in open accounts with associated companies. Items which do not bear a specified due date but which have been carried for more than 12 months and items which are not paid within 12 months from due date shall be transferred to account 123, investment in Associated Companies.

Note A: On the balance sheet, accounts receivable from an associated company may be set off against accounts payable to the same company.

Note B: The face amount of notes receivable discounted, sold or transferred without releasing the utility from liability as endorser thereon, shall be credited to a separate subdivision of this account and appropriate disclosure shall be made in financial statements of any contingent liability arising from such transactions.

150. Materials and Supplies

A. This account shall include the cost and related stores expense of unissued small tools and unapplied materials and supplies, including fuel; residuals; plant materials and operating supplies; merchandise for sale; and materials and supplies held primarily for nonutility purposes. The cost shall include, when practicable the purchase price at the point of free delivery, plus customs duties, excise and other taxes on purchases, insurance, costs of inspection, special tests prior to acceptance, loading and unloading, transportation, and other directly assignable charges; also the related stores expenses for purchasing, storage, handling, and distribution of materials.

B. As far as practicable, transportation charges for materials shall be included as a part of the cost of the particular materials to which they relate; cash or other discounts on materials shall be deducted in determining the cost of the particular material, or credited to the account to which the material is charged. Where such items cannot be assigned directly to particular purchases, they may be included in the subdivisions of this account, 150.152, Fuel Stock Expenses Undistributed, or 150.163, Stores Expense Undistributed, as appropriate. Where other classes of expenses applicable to materials purchased cannot be directly assigned to particular purchases, they may be charged to account 150.152, or account 150.163, as appropriate.

C. Materials recovered in connection with construction, maintenance, or the retirement of property shall be charged to this account in

accordance with provisions set forth in account 150.154, Plant Materials and Operating Supplies.

D. Materials and supplies issued shall be credited hereto and charged to the appropriate construction, operating expense, or other account on the basis of a unit price determined by the use of cumulative average, first-in first-out, or such other method of inventory accounting as conforms with accepted accounting standards consistently applied. Stores expenses related to the materials and supplies shall be cleared from the subaccount 150.163, Stores Expense Undistributed, by adding to the cost of materials and supplies issued a suitable loading charge which will distribute the expenses equitably over the stores issues.

E. Physical inventories of materials, supplies, fuel, etc., shall be taken at least every two years. The necessary adjustments shall be made to bring this account into harmony with the actual inventories. In effecting the adjustment, large differences which can be assigned to important classes of materials shall be equitably adjusted among the accounts to which such classes of materials have been charged since the previous inventory. Other differences shall be equitably apportioned among the accounts to which materials have been charged, or included in the stores expense accounts, 150.152, Fuel Stock Expenses Undistributed, or 150.163, Stores Expense Undistributed, as appropriate.

Note A: Interest on material bills, the payment of which has been delayed, shall be charged to account 431, Other Interest Expense.

Note B: Line transformers, customer meters, and such associated devices as are retirement units, in stock or undergoing repairs shall not be included in this account, but in account 368, Line Transformers, or account 370, Meters, as appropriate.

F. Separate subaccounts of this account shall be maintained under the following titles:

150.151 Fuel Stock

This account shall include the book cost of fuel on hand.

ITEMS

1. Invoice price of fuel less any cash or other discounts.
2. Freight, switching, demurrage and other transportation charges, not including, however, any charges for unloading from the shipping medium.
3. Excise taxes, purchasing agents' commissions, insurance and other expenses directly assignable to cost of fuel.
4. Operating, maintenance and depreciation expenses and ad valorem taxes on utility-owned transportation equipment used to transport fuel from the point of acquisition to the unloading point.
5. Lease or rental costs of transportation equipment used to transport

fuel from the point of acquisition to the unloading point.

150.152 Fuel Stock Expenses Undistributed

A. This account may include the cost of labor and of supplies used and expenses incurred in unloading fuel from the shipping medium and in the handling thereof prior to its use, if such expenses are sufficiently significant in amount to warrant being treated as a part of the cost of fuel inventory rather than being charged direct to expense as incurred.

B. Amounts included herein shall be charged to expense as the fuel is used to the end that the balance herein shall not exceed the expenses attributable to the inventory of fuel on hand.

ITEMS

Labor:

1. Procuring and handling of fuel.
2. All routine fuel analyses.
3. Unloading from shipping facility and putting in storage.
4. Moving of fuel in storage and transferring from one station to another.
5. Handling from storage or shipping facility to first bunker, hopper, bucket, tank or holder of boiler house structure.
6. Operation of mechanical equipment, such as locomotives, trucks, cars, boats, barges, cranes, etc.

Supplies and Expenses:

7. Tools, lubricants and other supplies.
8. Operating supplies for mechanical equipment.
9. Transportation and other expenses in moving fuel.
10. Stores expenses applicable to fuel.

150.153 Residuals

This account shall include the book cost of any residuals produced in production or manufacturing processes.

150.154 Plant Materials and Operating Supplies

This account shall include the cost of materials purchased primarily for use in the utility business for construction, operation and maintenance purposes. It shall include also the book cost of materials recovered in connection with construction, maintenance or the retirement of property, such materials being credited to construction, maintenance, or accumulated depreciation provision respectively, and included herein as follows:

(1) Reusable materials consisting of large individual items, shall be included in this account at original cost of material only, as defined in paragraphs A and B of account 150, including transportation to point of original receipt, estimated if not known. The cost of repairing such

items shall be charged to the maintenance account appropriate for the previous use. (See also electric plant instruction 168.3, item (3).)

(2) Reusable materials consisting of relatively small items, the identity of which (from the date of original installation to the final abandonment or sale thereof) can not be ascertained without undue refinement in accounting shall be included in this account at current prices new for such items. The cost of repairing such items shall be charged to the appropriate expense account as indicated by previous use.

(3) Scrap and nonusable materials included in this account shall be carried at the estimated net amount realizable therefrom. The difference between the amounts realized for scrap and nonusable materials sold and the net amount at which the materials were carried in this account, as far as practicable, shall be adjusted to the accounts credited when the materials were charged to this account.

ITEMS

1. Invoice price of materials less cash or other discounts.
2. Freight, switching or other transportation charges when practicable to include as part of the cost of particular materials to which they relate.
3. Customs duties and excise taxes.
4. Costs of inspection and special tests prior to acceptance.
5. Insurance and other directly assignable charges.

150.155 Merchandise

This account shall include the book cost of materials, supplies, appliances, and equipment held primarily for merchandising, jobbing and contract work.

Note: Appliances held under consignment shall not be included herein, but there shall be kept a memorandum account of such appliances either at cost or at selling price, to show the appliances in stock and appliances sold.

150.156 Other Materials and Supplies

This account shall include the book cost of materials and supplies held primarily for nonutility purposes.

150.157 Nuclear By-Product Materials

A. This account shall include the market value of uranium, plutonium and other nuclear materials held by the company for sale or other disposition and that are not to be reused by the company in its electric utility operations. This account shall be debited and account 120.5.3, Recovered Materials, credited for such market value. Any difference between the amount recorded in this account and the actual amount realized from the sale of materials shall be debited or credited, as

appropriate, to account 518.1, Nuclear Fuel, at the time of such sale.

B. Significant declines in the estimated value of items carried in this account may be recognized at the time of market price declines by crediting this account and charging account 518.1.

150.163 Stores Expense Undistributed

A. This account shall include the cost of supervision, labor and expenses incurred in the operation of general storerooms, including purchasing, storage, handling and distribution of materials and supplies.

B. This account shall be cleared by adding to the cost of materials and supplies issued a suitable loading charge which will distribute the expense equitably over stores issues. The balance in the account at the close of the year shall not exceed the amount of stores expenses reasonably attributable to the inventory of materials and supplies exclusive of fuel, as any amount applicable to fuel costs should be included in account 150.152, Fuel Stock Expenses Undistributed.

ITEMS

Labor:

1. Inspecting and testing materials and supplies when not assignable to specific items.
2. Unloading from shipping facility and putting in storage.
3. Supervision of purchasing and stores department to extent assignable to materials handled through stores.
4. Getting materials from stock and in readiness to go out.
5. Inventorying stock received or stock on hand by stores employees but not including inventories by general department employees as part of internal or general audits.
6. Purchasing department activities in checking material needs, investigating sources of supply, analyzing prices, preparing and placing orders, and related activities to extent applicable to materials handled through stores. (Optional: Purchasing department expenses may be included in administrative and general expenses.)
7. Maintaining stores equipment.
8. Cleaning and tidying storerooms and stores offices.
9. Keeping stock records, including recording and posting of material receipts and issues and maintaining inventory record of stock.
10. Collecting and handling scrap materials in stores.

Supplies and Expenses:

11. Adjustments of inventories of materials and supplies but not including large differences which can readily be assigned to important classes of materials and equitably distributed among the accounts to

which such classes of materials have been charged since the previous inventory.

12. Cash and other discounts not practicably assignable to specific materials.

13. Freight, express, etc., when not assignable to specific items.

14. Heat, light and power for storerooms and store offices.

15. Brooms, brushes, sweeping compounds and other supplies used in cleaning and tidying storerooms and stores offices.

16. Injuries and damages.

17. Insurance on materials and supplies and on stores equipment.

18. Losses due to breakage, leakage, evaporation, fire or other causes, less credits for amounts received from insurance, transportation companies or others in compensation of such losses.

19. Postage, printing, stationery and office supplies.

20. Rent of storage space and facilities.

21. Communication service.

22. Excise and other similar taxes not assignable to specific materials.

23. Transportation expense on inward movement of stores and on transfer between storerooms but not including charges on materials recovered from retirements which shall be accounted for as part of cost of removal.

165. Prepayments

This account shall include amounts representing prepayments of insurance, rents, taxes, interest and miscellaneous items, and shall be kept or supported in such manner as to disclose the amount of each class of prepayment.

171. Interest and Dividends Receivable

This account shall include the amount of interest on bonds, mortgages, notes, commercial paper, loans, open accounts, deposits, etc., the payment of which is reasonably assured, and the amount of dividends declared or guaranteed on stocks owned.

Note A: Interest which is not subject to current settlement shall not be included herein but in the account in which is carried the principal on which the interest is accrued.

Note B: Interest and dividends receivable from associated companies shall be included in account 146, Accounts Receivable from Associated Companies.

172. Rents Receivable

This account shall include rents receivable or accrued on property rented or leased by the utility to others.

Note: Rents receivable from associated companies shall be included in account 146, Accounts Receivable from Associated Companies.

173. Accrued Utility Revenues

At the option of the utility, the estimated amount accrued for service rendered, but not billed at the end of any accounting period, may be included herein. In case accruals are made for unbilled revenues, they shall be made likewise for unbilled expenses, such as for the purchase of electric energy.

174. Miscellaneous Current and Accrued Assets

This account shall include the book cost of all other current and accrued assets, appropriately designated and supported so as to show the nature of each asset included herein.

4. DEFERRED DEBITS

181. Unamortized Debt Expense

A. This account shall include expenses related to the issuance or assumption of debt securities. Amounts recorded in this account shall be amortized over the life of each respective issue under a plan which will distribute the amount equitably over the life of the security. The amortization shall be on a monthly basis, and the amount thereof shall be charged to account 428, Amortization of Debt Discount and Expense. Any unamortized amounts outstanding at the time that the related debt is prematurely reacquired shall be accounted for as indicated in general instruction 166.20.

B. When the utility recognizes a mortgage recording tax as a tax deduction in the year incurred, account 410.1, Provision for Deferred Income Taxes, Utility Operating Income, shall be debited and account 283, Accumulated Deferred Income Taxes--Other, shall be credited with the amount of the related tax effect, such amount to be amortized concurrently with the related debt expense.

182. Extraordinary Property Losses

A. When authorized or directed by the commission, this account shall include extraordinary losses on property abandoned or otherwise retired from service which are not provided for by the accumulated provisions for depreciation or amortization and which could not reasonably have been foreseen and provided for, and extraordinary losses, such as unforeseen damages to property, which could not reasonably have been anticipated and which are not covered by insurance or other provisions.

B. The entire cost, less net salvage, of depreciable property retired shall be charged to accumulated provision for depreciation. If all or a portion, of the loss is to be included in this account, the accumulated provision for depreciation shall then be credited and this account

charged with the amount properly chargeable hereto.

C. Application to the commission for permission to use this account shall be accompanied by a statement giving a complete explanation with respect to the items which it is proposed to include herein, the period over which, and the accounts to which it is proposed to write off the charges, and other pertinent information.

183. Preliminary Survey and Investigation Charges

A. This account shall be charged with all expenditures for preliminary surveys, plans, investigations, etc., made for the purpose of determining the feasibility of utility projects under contemplation. If construction results, this account shall be credited and the appropriate utility plant account charged. If the work is abandoned, the charge shall be made to account 426.5, Other Deductions, or the appropriate operating expense account. (See general instruction 166.17.)

B. The records supporting the entries to this account shall be so kept that the utility can furnish complete information as to the nature and the purpose of the survey, plans, or investigations and the nature and amounts of the several charges.

Note: The amount of preliminary survey and investigation charges transferred to utility plant shall not exceed the expenditures which may reasonably be determined to contribute directly and immediately and without duplication to utility plant.

184. Clearing Accounts

A. This caption shall include undistributed balances in clearing accounts at the date of the balance sheet. Balances in clearing accounts shall be substantially cleared not later than the end of the calendar year unless items held therein relate to a future period.

B. In addition to the clearing accounts otherwise specifically provided for in this system of accounts (150.152, Fuel Stock Expenses Undistributed and 150.163, Stores Expense Undistributed), the utility shall maintain any other clearing accounts necessary as a medium through which to accumulate initial costs and expenses with respect to particular types of transactions in order to facilitate the distribution and apportionment of charges on equitable bases among the appropriate accounts to which such charges are applicable. The following clearing accounts should be used unless it can be clearly demonstrated that their use is not necessary. (See general instructions 166.2, subd. (d), and 166.14, subd. (b).)

Clearing Accounts

184.1 Building Service Expenses--Clearing

184.2 Electronic Data Processing Expenses--Clearing

184.3 Laboratory Expenses--Clearing

184.4 Shop Expenses--Clearing

184.5 Tools and Work Equipment Expenses--Clearing

184.6 Transportation Expenses--Clearing

185. Temporary Facilities

This account shall include amounts shown by work orders for plant installed for temporary use in utility service for periods of less than one year. Such work orders shall be charged with the cost of temporary facilities and credited with payments received from customers and net salvage realized on removal of the temporary facilities. Any net credit or debit resulting shall be cleared to account 451, Miscellaneous Service Revenues.

186. Miscellaneous Deferred Debits

A. This account shall include all debits not elsewhere provided for, such as miscellaneous work in progress, and unusual or extraordinary expenses, not included in other accounts, which are in process of amortization and items the proper final disposition of which is uncertain.

B. The records supporting the entries to this account shall be so kept that the utility can furnish full information as to each deferred debit.

187. Deferred Losses from Disposition of Utility Plant

This account shall include losses from the sale or other disposition of property previously recorded in account 105, Electric Plant Held for Future Use, under the provisions of paragraphs B, C, and D thereof, when such losses are significant and the company has received commission approval to amortize such amounts to account 411.7, Losses from Disposition of Utility Plant. Records shall be maintained so that amounts relating to each loss can be readily determined. (See account 105, Electric Plant Held for Future Use.)

188. Investment in Research and Development

A. This account shall include the cost of all expenditures coming within the meaning of definition (23) (ii) of the Uniform System of Accounts, except those properly includible in account 107, Construction Work in Progress.

B. Costs that are minor or of a general or recurring nature shall be transferred from this account to the appropriate operating expense function or if such costs are common to the overall operations or cannot be feasibly allocated to the various operating accounts, then such costs shall be recorded in account 930.2, Miscellaneous General Expenses.

C. When expenditures on a research project are relatively so large that their inclusion in the operating accounts in the year in which they

were incurred would seriously distort those accounts, the company may request commission approval to defer such expenditures in this account and amortize them over a future period. Without such approval, expenditures charged to this account shall not be carried beyond the year in which they are incurred.

Note: With the approval of the commission, amortization of expenditures related to specific programs or projects may commence at a date subsequent to the year initial expenditures are incurred to provide for consistency of accounting and rate treatment.

D. The entries in this account shall be so maintained as to show separately each project with complete detail of the nature and purpose of the research and development undertaken together with related costs.

E. Balances in this account will be considered for rate base treatment as if the amounts were part of the cost of plant in service.

190. Accumulated Deferred Income Taxes

A. This account, when its use has been authorized by the commission, shall be debited and account 411.1, Provision for Deferred income Taxes--Credit, Utility Operating Income, or account 411.2, Provision for Deferred Income Taxes--Credit, Other Income and Deductions, as appropriate, shall be credited with an amount equal to that by which income taxes payable for the year are higher because of the inclusion of certain items in income for tax purposes, which items for general accounting purposes will not be fully reflected in the utility's determination of annual net income until subsequent years.

B. This account shall be credited and account 410.1, Provision for Deferred Income Taxes, Utility Operating Income, or account 410.2, Provision for Deferred Income Taxes, Other Income and Deductions, as appropriate, shall be debited with an amount equal to that by which income taxes payable for the year are lower because of prior payment of taxes as provided by paragraph A above, because of difference in timing for tax purposes of particular items of income or income deductions from that recognized by the utility for general accounting purposes. Such credit to this account and debit to account 410.1 or 410.2 shall, in general, represent the effect on taxes payable in the current year of the smaller amount of book income recognized for tax purposes as compared to the amount recognized in the utility's current accounts with respect to the item or class of items for which deferred tax accounting by the utility was authorized by the commission.

C. Vintage year records with respect to entries to this account, as described above, and the account balance, shall be so maintained as to show the factor of calculation with respect to each annual amount of the

item or class of items for which deferred tax accounting by the utility is utilized.

D. The utility is restricted in its use of this account to the purposes set forth above. It shall not make use of the balance in this account or any portion thereof except as provided in the text of this account, without prior approval of the commission. Any remaining deferred tax account balance with respect to an amount for any prior year's tax deferral, the amortization of which or other recognition in the utility's income accounts has been completed, or other disposition made, shall be debited to account 410.1, Provision for Deferred Income Taxes, Utility Operating Income, or account 410.2, Provision for Deferred Income Taxes, Other Income and Deductions, as appropriate, or otherwise disposed of as the commission may authorize or direct.

LIABILITIES AND OTHER CREDITS

5. PROPRIETARY CAPITAL

201. Common Stock Issued

204. Preferred Stock Issued

A. These accounts shall include the par value or the stated value of stock without par value if such stock has a stated value, and, if not, the cash value of the consideration received for such stock without par value, of each class of capital stock actually issued, including such capital stock in account 217, Reacquired Capital Stock.

B. When the actual cash value of the consideration received is more than the par or stated value of any stock having a par or stated value, the difference shall be credited to the premium account for the particular class and series.

C. When capital stock is retired, these accounts shall be charged with the amount at which such stock is carried herein.

D. A separate ledger account, with a descriptive title, shall be maintained for each class and series of stock. The supporting records shall show the shares nominally issued, actually issued and nominally outstanding.

Note A: When a levy or assessment, except a call for payment on subscriptions, is made against holders of capital stock, the amount collected upon such levy or assessment shall be credited to account 207, Premium on Capital Stock.

Note B: No entries, other than those covered by the above provisions and those to record liquidating dividends, shall be made in any account for stocks without par value, except upon order of the commission.

202. Common Stock Subscribed

205. Preferred Stock Subscribed

A. These accounts shall include the amount of legally enforceable subscriptions to capital stock of the utility. They shall be credited with the par or stated value of the stock subscribed, or the subscription price of stock without par or stated value, exclusive of accrued dividends, if any. Concurrently, a debit shall be made to subscriptions to capital stock, included as a separate subdivision of account 143, Other Accounts Receivable, for the agreed price. Any premium on capital stock with par or stated value shall be included in the premium account.

B. The records shall be kept in such manner as to show the amount of subscriptions to each class and series of stock.

203. Common Stock Liability for Conversion

206. Preferred Stock Liability for Conversion

A. These accounts shall include the par or stated value, or the cash value of the consideration for stock without par or stated value, as appropriate, of capital stock which the utility has agreed to exchange for outstanding securities of other companies in connection with the acquisition of properties of such companies under terms which allow the holders of the securities of the other companies to surrender such securities and receive in return therefor capital stock of the accounting utility.

B. When the securities of the other companies have been surrendered and capital stock issued in accordance with the terms of the exchange, these accounts shall be charged and accounts 201, Common Stock Issued, or 204, Preferred Stock Issued, as the case may be, shall be credited.

C. The records shall be kept so as to show separately the stocks of each class and series for which a conversion liability exists.

207. Premium on Capital Stock

A. This account shall include, in a separate subdivision for each class and series of stock, the excess of the actual cash value of the consideration received on original issues of capital stock over the par or stated value and accrued dividends of such stock, together with assessments against stockholders representing payments required in excess of par or stated values.

B. Premium on capital stock shall not be set off against expenses. Further, a premium received on an issue of a certain class or series of stock shall not be set off against expenses of another issue of the same class or series.

C. When capital stock which has been actually issued is retired, the amount in this account applicable to the shares retired shall be transferred to account 210, Gain on Resale or Cancellation of Reacquired

Capital Stock.

208. Donations Received from Stockholders

This account shall include the balance of credits for donations received from stockholders consisting of capital stock of the utility, cancellation or reduction of debt of the utility, and the cash value of other assets received as a donation.

209. Reduction in Par or Stated Value of Capital Stock

This account shall include the balance of credits arising from a reduction in the par or stated value of capital stock.

210. Gain on Resale or Cancellation of Reacquired Capital Stock

This account shall include the balance of credits arising from the resale or cancellation of reacquired capital stock. (See account 217, Reacquired Capital Stock.)

211. Miscellaneous Paid-in Capital

This account shall include the balance of all other credits for paid-in capital which are not properly includible in the foregoing accounts.

Note: Amounts included in unearned surplus at the effective date of this system of accounts which cannot be classified as to the source thereof shall be included in this account.

212. Installments Received on Capital Stock

A. This account shall include in a separate subdivision for each class and series of capital stock the amount of installments received on capital stock on a partial or installment payment plan from subscribers who are not bound by legally enforceable subscription contracts.

B. As subscriptions are paid in full and certificates issued, this account shall be charged and the appropriate capital stock account credited with the par or stated value, or the consideration received for stock without par or stated value. Any premium on capital stock with par or stated value shall be included in the premium account.

214. Capital Stock Expense

A. This account shall include in a separate subdivision for each class and series of stock all commissions and expenses incurred in connection with the original issuance and sale of capital stock, including additional capital stock of a particular class or series as well as first issues. Expenses applicable to capital stock shall not be deducted from premium on capital stock.

B. When capital stock which has been actually issued by the utility is retired, the amount in this account applicable to the shares retired shall be written off to account 210, Gain on Resale or Cancellation of Reacquired Capital Stock, provided, however, that the amount shall be

charged to account 439, Adjustments to Retained Earnings, to the extent that it exceeds the balance in account 210.

C. The utility may amortize the balance in this account by systematic charges to account 425, Miscellaneous Amortization, or it may write off capital stock expense in whole or in part by charges to account 439, Adjustments to Retained Earnings.

Note: Expenses in connection with the reacquisition or resale of the utility's capital stock shall not be included herein.

215. Appropriated Retained Earnings

This account shall include the amount of retained earnings which has been appropriated or set aside for specific purposes. Separate subaccounts shall be maintained under such titles as will designate the purpose for which each appropriation was made.

216. Unappropriated Retained Earnings

This account shall include the balance, either debit or credit, of unappropriated retained earnings arising from earnings of the utility. This account shall not include any amounts representing the undistributed earnings of subsidiary companies.

216.1 Unappropriated Undistributed Subsidiary Earnings

This account shall include the balance, either debit or credit, of undistributed retained earnings of subsidiary companies since their acquisition. When dividends are received from subsidiary companies relating to amounts included in this account, this account shall be debited and account 216, Unappropriated Retained Earnings, credited.

217. Reacquired Capital Stock

A. This account shall include in a separate subdivision for each class and series of capital stock, the cost of capital stock actually issued by the utility and reacquired by it and not retired or cancelled, except, however, stock which is held by trustees in sinking or other funds.

B. When reacquired capital stock is retired or cancelled, the difference between its cost, including commissions and expenses paid in connection with the reacquisition, and its par or stated value (or the proportionate amount at which it is recorded in accounts 201 or 204 in the case of stock without par or stated value) plus any premium and less any expense applicable to the shares retired, shall be debited or credited as appropriate, to account 210, Gain on Resale or Cancellation of Reacquired Capital Stock; provided, however, that debits shall be charged to account 439, Adjustments to Retained Earnings, to the extent that they exceed the balance in account 210.

C. Subject to the specific authorization or direction of the

commission (see section 69 of Public Service Law), when reacquired capital stock is resold by the utility, the difference between the amount received on the resale of the stock, less expenses incurred in the resale, and the cost of the stock included in this account shall be accounted for as outlined in paragraph B.

6. LONG-TERM DEBT

221. Bonds

This account shall include in a separate subdivision for each class and series of bonds the face value of the actually issued and unmatured bonds which have not been retired or canceled; also the face value of such bonds issued by others the payment of which has been assumed by the utility.

222. Reacquired Bonds

A. This account shall include the face value of bonds actually issued or assumed by the utility and reacquired by it and not retired or canceled. (See section 69 of Public Service Law.) The account for reacquired debt shall not include securities which are held by trustees in sinking or other funds.

B. When bonds are reacquired, the difference between face value adjusted for unamortized discount, expense or premium and the amount paid upon reacquisition shall be accounted for in accordance with provisions set forth in general instruction 166.20.

223. Advances from Associated Companies

A. This account shall include the face value of notes payable to associated companies and the amount of open book accounts representing advances from associated companies. It does not include notes and open accounts representing indebtedness subject to current settlement which are includible in account 233, Notes Payable to Associated Companies, or account 234, Accounts Payable to Associated Companies. (See general instruction 166.14.)

B. The records supporting the entries to this account shall be so kept that the utility can furnish complete information concerning each note and open account.

224. Other Long-term Debt

A. This account shall include, until maturity, all long-term debt not otherwise provided for. This covers such items as receivers' certificates, real estate mortgages executed or assumed, assessments for public improvements, notes and unsecured certificates of indebtedness not owned by associated companies, receipts outstanding for long-term debt, and other obligations maturing more than one year from date of issue or assumption. (See balance sheet instruction 167.2.)

B. Separate accounts shall be maintained for each class of obligation, and records shall be maintained to show for each class all details as to date of obligation, date of maturity, interest dates and rates, security for the obligation, etc.

Note: Miscellaneous long-term debt reacquired shall be accounted for in accordance with the procedure set forth in account 222, Reacquired Bonds.

225. Unamortized Premium on Long-term Debt

A. This account shall include the excess of the cash value of consideration received over the face value upon the issuance or assumption of long-term debt securities.

B. Amounts recorded in this account shall be amortized over the life of each respective issue under a plan which will distribute the amount equitably over the life of the security. The amortization shall be on a monthly basis, with the amounts thereof to be credited to account 429, Amortization of Premium on Debt--Credit. (See general instruction 166.20.)

226. Unamortized Discount on Long-term Debt--Debit

A. This account shall include the excess of the face value of long-term debt securities over the cash value of consideration received therefor, related to the issue or assumption of all types and classes of debt.

B. Amounts recorded in this account shall be amortized over the life of the respective issues under a plan which will distribute the amount equitably over the life of the securities. The amortization shall be on a monthly basis, with the amounts thereof charged to account 428, Amortization of Debt Discount and Expense. (See general instruction 166.20.)

7. CURRENT AND ACCRUED LIABILITIES

231. Notes Payable

This account shall include the face value of all notes, drafts, acceptances, or other similar evidences of indebtedness, payable on demand or within a time not exceeding one year from date of issue, to other than associated companies.

232. Accounts Payable

This account shall include all amounts payable by the utility within one year, which are not provided for in other accounts.

233. Notes Payable to Associated Companies

234. Accounts Payable to Associated Companies

These accounts shall include amounts owing to associated companies on notes, drafts, acceptances, or other similar evidences of indebtedness,

and open accounts payable on demand or not more than one year from date of issue or creation.

Note: Exclude from these accounts notes and accounts which are includible in account 223, Advances from Associated Companies.

235. Customer deposits

This account shall include all amounts deposited with the utility by customers as security for the payment of bills.

236. Taxes Accrued

A. This account shall be credited with the amount of taxes accrued during the accounting period, corresponding debits being made to the appropriate accounts for tax charges. Such credits may be based upon estimates, but from time to time during the year as the facts become known, the amount of the periodic credits shall be adjusted so as to include as nearly as can be determined in each year the taxes applicable thereto. Any amount representing a prepayment of taxes applicable to the period subsequent to the date of the balance sheet, shall be shown under account 165, Prepayments.

B. If accruals for taxes are found to be insufficient or excessive, correction therefor shall be made through current tax accruals. However, if such corrections are so large as to seriously distort current expenses, see general instruction 166.7(b).

C. Accruals for taxes shall be based upon the net amounts payable after credit for any discounts, and shall not include any amounts for interest on tax deficiencies or refunds. Interest received on refunds shall be credited to account 419, Interest and Dividend Income, and interest paid on deficiencies shall be charged to account 431, Other Interest Expense.

D. The records supporting the entries to this account shall be kept, so as to show for each class of taxes, the amount accrued, the basis for the accrual, the accounts to which charged, and the amount of tax paid.

237. Interest Accrued

This account shall include the amount of interest accrued but not matured on all liabilities of the utility not including, however, interest which is added to the principal of the debt on which incurred. Supporting records shall be maintained so as to show the amount of interest accrued on each obligation.

238. Dividends Declared

This account shall include the amount of dividends which have been declared but not paid. Dividends shall be credited to this account when they become a liability.

239. Matured Long-term Debt

This account shall include the amount of long-term debt (including any obligation for premiums) matured and unpaid, without specific agreement for extension of the time of payment, and bonds called for redemption but not presented.

240. Matured Interest

This account shall include the amount of matured interest on long-term debt or other obligations of the utility at the date of the balance sheet unless such interest is added to the principal of the debt on which incurred.

241. Tax Collections Payable

This account shall include the amount of taxes collected by the utility through payroll deductions or otherwise pending transmittal of such taxes to the proper taxing authority.

Note: Do not include liability for taxes assessed directly against the utility which are accounted for as part of the utility's own tax expense.

242. Miscellaneous Current and Accrued Liabilities

This account shall include the amount of all other current and accrued liabilities not provided for elsewhere appropriately designated and supported so as to show the nature of each liability.

8. DEFERRED CREDITS

252. Customer Advances for Construction

This account shall include advances by customers for construction which are to be refunded either wholly or in part. When a customer is refunded the entire amount to which he is entitled according to the agreement or rule under which the advance was made, the balance, if any, remaining in this account shall be credited to the electric plant accounts to which the cost of the property was charged.

253. Other Deferred Credits

A. This account shall include advance billings and receipts and other deferred credit items, not provided for elsewhere, including amounts which cannot be entirely cleared or disposed of until additional information has been received.

B. Amounts for contributions in aid of construction still remaining in the account "Contributions in Aid of Construction" at the effective date of the uniform system of accounts prescribed herein shall be credited temporarily to an appropriate subdivision of this account and shall be disposed of in accordance with provisions of electric plant instruction 168.2, subdivision (e).

255. Accumulated Deferred Investment Tax Credits

A. This account shall be credited with investment tax credits allowed

in the current year on property defined in section 50 of the Internal Revenue Code of 1954, when the utility elects to defer such credits rather than to recognize in the income statement the total benefits of the tax credit as realized. The utility may not transfer amounts from this account except as authorized herein and in accounts 411.4, Investment Tax Credit Adjustments, Utility Operations; 411.5, Investment Tax Credit Adjustments, Nonutility Operations, and 420, Investment Tax Credits, or with approval of the commission. (See special instructions for accounts 411.4 and 411.5)

B. If the investment tax credits deferred in this account are to be applied as a reduction of the rate base, the utility shall amortize the amount of such deferrals by debiting this account and crediting account 420, Investment Tax Credits with a proportionate amount determined in relation to the book service life of the property to which the tax credits relate. If, however, the deferred investment tax credits are to be applied as a reduction of the cost of service, the proportionate restorations to income shall be credited to account 411.4, Investment Tax Credit Adjustments, Utility Operations.

C. Subdivisions of this account by department shall be maintained for deferred investment tax credits which are related to utility operations other than electric or to nonutility operations. Accounting procedures adopted for utility and nonutility operations are to be followed on a consistent basis.

D. Separate records shall be maintained for each year's investment tax credit for electric and other utility operations (by primary utility plant accounts) and for nonutility operations, identifying the properties giving rise to the investment tax credits for each year so that they can be amortized over the weighted average book service life of such properties.

E. The utility is restricted in its use of this account to the purposes as set forth above. Unless otherwise authorized by the commission, the utility shall not record in this account amounts of investment tax credits allowed on property other than that defined in section 50 of the Internal Revenue Code of 1954. Such amounts of investment tax credits shall be treated as a current reduction of income tax expense unless the commission has authorized other disposition.

256. Deferred Gains from Disposition of Utility Plant

This account shall include gains from the sale or other disposition of property previously recorded in account 105, Electric Plant Held for Future Use, under the provisions of paragraphs B, C and D thereof when such gains are significant and the company has received commission

approval to amortize such amounts to account 411.6, Gains from Disposition of Utility Plant. Records shall be maintained so that amounts relating to each gain can be readily determined. (See account 105, Electric Plant Held for Future Use.)

281. Accumulated Deferred Income Taxes- Accelerated Amortization

A. This account shall be credited and account 410.1, Provision for Deferred Income Taxes, Utility Operating Income, or 410.2, Provision for Deferred Income Taxes, Other Income and Deductions, as appropriate, shall be debited with an amount equal to that by which taxes on income payable for the year are lower because of the use of accelerated (five year) amortization of (1) certified defense facilities in computing such taxes, as permitted by section 168 of the Internal Revenue Code of 1954 and (2) certified pollution control facilities in computing such taxes, as permitted by section 169 of the Internal Revenue Code of 1954, as compared to the depreciation (deduction) otherwise appropriate and allowable for tax purposes according to the straight line or other nonaccelerated depreciation method and appropriate estimated useful life for such property.

B. This account shall be debited and account 411.1, Provision for Deferred Income Taxes--Credit, Utility Operating Income or 411.2, Provision for Deferred Income Taxes--Credit, Other Income and Deductions, as appropriate, shall be credited with an amount equal to that by which taxes on income payable for the year are greater because of the use in prior years of accelerated (five-year) amortization of (1) certified defense facilities and (2) pollution control facilities instead of nonaccelerated or nonliberalized depreciation otherwise appropriate for income tax purposes, and deferral of taxes in such prior years as described in paragraph A, above. Such debit to this account and credit to account 411.1 or 411.2, shall, in general, represent the effect on taxes payable for the current year of the unavailability of a depreciation deduction for tax purposes, or a reduced amount, with respect to any depreciable property for which accelerated amortization was used in prior years, as compared to the depreciation deduction otherwise available and appropriate for such property, considering its estimated useful life, according to the depreciation method ordinarily used by the utility for similar property in computing depreciation for tax purposes by a nonaccelerated or nonliberalized depreciation method.

C. Records with respect to entries to this account, as described above, and the account balance, shall be so maintained as to show the factors of calculation and the separate amounts applicable to the facilities of each certification or authorization of accelerated

amortization for tax purposes.

D. The use of this account and the accounting described above are not mandatory for any utility which, in accordance with a consistent policy, elects not to follow deferred tax accounting even though accelerated amortization is used in computing taxes on income. If, however, deferred tax accounting is initiated with respect to any certified defense facility or certified pollution control facility, the accounting shall not be suspended or discontinued on the property covered by that certificate, without approval of the commission.

E. The utility is restricted in its use of this account to the purpose set forth above. It shall not transfer the balance in this account or any portion thereof to retained earnings or make any use thereof except as provided in the text of this account without prior approval of the commission. Any remaining balance of accumulated deferred taxes with respect to any certified defense facility or certified pollution control facility for which deferred tax accounting has been followed, shall, upon expiration of the estimated useful life of the facility on which deferred tax calculations were based, or upon retirement from service of such facility or predominant part thereof be credited to account 411.1, Provision for Deferred Income Taxes--Credit, Utility Operating Income, or 411.2, Provision for Deferred Income Taxes--Credit, Other Income and Deductions, as appropriate, or otherwise be applied as the commission may authorize or direct.

F. Upon the disposition by sale, exchange, transfer, abandonment or premature retirement of plant of which there is a related balance herein, this account shall be charged with an amount equal to the related income tax expense, if any, arising from such disposition and account 411.1, Provision for Deferred Income Taxes--Credit, Utility Operating Income, or 411.2, Provision for Deferred Income Taxes--Credit Other Income and Deductions, as appropriate, shall be credited. When the remaining balance, after consideration of any related income tax expenses, is less than \$25,000 this account shall be charged and account 411.1 or 411.2, as appropriate, credited with such balance. If after consideration of any related income tax expense, there is a remaining amount of \$25,000 or more, the commission shall authorize or direct how such amount shall be accounted for at the time approval for the disposition of accounting is granted. When plant is disposed of by transfer to a wholly owned subsidiary, the related balance in this account shall also be transferred. When the disposition related to retirement of an item or items under a group method of depreciation, where there is no tax effect in the year of retirement, no entries are

required in this account if it can be determined that the related balances would be necessary to be retained to offset future group item tax deficiencies.

Note: If, in addition to an electric utility department, the utility operates another department, such as gas, steam, etc. or has nonutility property for which related deferred taxes on income are included in this account, such deferrals shall be classified so as to show separately amounts related to the utility operating income of each department and to other income and deductions.

282. Accumulated Deferred Income Taxes- Liberalized Depreciation

A. This account, when authorized by the commission, shall be used for the deferral and normalization of tax differentials resulting from the use of liberalized depreciation as permitted by section 167 of the Internal Revenue Code of 1954. It shall also be used for the deferral and normalization of tax differentials resulting from the use of the Class Life Asset Depreciation Range, as provided and required by the Revenue Act of 1971.

Note: Tax differentials resulting from the current deduction of cost of removal included in the class life asset depreciation range provisions of the Revenue Act of 1971 shall be included in account 283. Also, companies taking liberalized depreciation and flowing through the tax effect on January 1, 1972, shall continue to flow through these tax effects.

B. This account shall be credited and account 410.1, Provision for Deferred Income Taxes, Utility Operating Income, or 410.2, Provision for Deferred Income Taxes, Other Income and Deductions, as appropriate, shall be debited with an amount equal to that by which taxes on income payable for the year are lower because of the use of liberalized depreciation in computing such taxes, as permitted by section 167 of the Internal Revenue Code of 1954, as compared to the depreciation deduction otherwise appropriate and allowable for tax purposes for similar property of the same estimated useful life according to the straight line or other non-liberalized method of depreciation to include those accumulated tax deferrals arising from the use of the Class Life Asset Depreciation Range, as provided and required by the Revenue Act of 1971.

C. This account shall be debited and account 411.1, Provision for Deferred Income Taxes--Credit, Utility Operating Income, or 411.2, Provision for Deferred Income Taxes--Credit, Other Income and Deductions, as appropriate, shall be credited with an amount equal to that by which taxes on income payable for the year are greater because of the use in prior years of liberalized depreciation for income tax

purposes, and deferral of taxes in such prior years as described in paragraph B above. Such debit to this account and credit to account 411.1 or 411.2 shall, in general, represent the effect on taxes payable for the current year of the smaller amount of depreciation permitted for tax purposes for the current year with respect to any depreciable property for which liberalized depreciation including Class Life Asset Depreciation Range was used in prior years, as compared to the depreciation deduction otherwise appropriate and available for similar property of the same estimated useful life according to the straight line or other nonliberalized depreciation method ordinarily used by the utility in computing depreciation for tax purposes.

D. Records with respect to entries to this account, as described above, and the account balance, shall be so maintained as to show the factors of calculation and the separate amounts applicable to the plant additions of each vintage year for each class, group, or unit as to which different liberalized depreciation methods and estimated useful lives have been used. The underlying calculations to segregate and associate deferred tax amounts with the respective vintage years may be based on reasonable methods of approximation, if necessary, consistently applied.

E. Except for tax deferrals arising from the use of Class Life Asset Depreciation Range, the use of this account and the accounting described above are not permitted for any utility even though liberalized depreciation is used in computing taxes on income, unless prior approval of the commission is obtained. If, as authorized herein, deferred tax accounting is initiated with respect to any property, such accounting shall not be discontinued on that property without approval of the commission.

F. The utility is restricted in its use of this account to the purposes set forth above. It shall not transfer the balance in the account or any portion thereof to retained earnings or make any use thereof except as provided in the text of this account without prior approval of the commission. Any remaining deferred tax reserve balance with respect to any year's plant additions or subdivisions thereof for which liberalized depreciation accounting has been followed or, upon retirement from service of such property or predominant portion thereof, or upon expiration of the estimated useful life on which the depreciation calculations for tax purposes are based, shall be credited to account 411.1, Provision for Deferred Income Taxes--Credit, Utility Operating Income, or 411.2, Provision for Deferred Income Taxes--Credit, Other Income and Deductions, as appropriate, or otherwise applied as the

commission may authorize or direct.

G. Upon the disposition by sale, exchange, transfer, abandonment or premature retirement of plant on which there is a related balance herein, this account shall be charged with an amount equal to the related income tax expense, if any, arising from such disposition and account 411.1, Provision for Deferred Income Taxes--Credit, Utility Operating Income, or 411.2, Provision for Deferred Income Taxes--Credit, Other Income and Deductions, as appropriate, shall be credited. When the remaining balance, after consideration of any related income tax expenses, is less than \$25,000, this account shall be charged and account 411.1 or 411.2, as appropriate, credited with such balance. If after consideration of any related income tax expense, there is a remaining amount of \$25,000 or more, the commission shall authorize or direct how such amount shall be accounted for at the time approval for the disposition of accounting is granted. When plant is disposed of by transfer to a wholly owned subsidiary, the related balance in this account shall also be transferred. When the disposition relates to retirement of an item or items under a group method of depreciation where there is no tax effect in the year of retirement, no entries are required in this account if it can be determined that the related balances would be necessary to be retained to offset future group item tax deficiencies.

Note: If an addition to an electric utility department, the utility operates another department such as gas, steam, etc. or has nonutility property for which related deferred taxes on income are included in this account, such deferrals shall be classified so as to show separately amounts related to the utility operating income of each department and to other income and deductions.

283. Accumulated Deferred Income Taxes- Other

A. This account, when its use has been authorized by the commission, shall be credited and account 410.1, Provision for Deferred Income Taxes, Utility Operating Income, or 410.2, Provision for Deferred Income Taxes, Other Income and Deductions, as appropriate, shall be debited with an amount equal to that by which taxes on income payable for the year are lower because of the current use of deductions other than accelerated amortization or liberalized depreciation, in the computation of income taxes which deductions for general accounting purposes will not be fully reflected in the utility's determination of annual net income until subsequent years. However, commission approval is not required for transactions described in general instruction 166.20, subdivision (d), and in account 181, Unamortized Debt Expense. Also,

without commission approval, this account and the accounting provided herein shall be used for the deferral and amortization of the tax effects resulting from the current deduction of the cost of removal included in the Class Life Asset Depreciation Range provisions of the Revenue Act of 1971.

B. This account shall be debited and account 411.1, Provision for Deferred Income Taxes--Credit, Utility Operating Income, or 411.2, Provision for Deferred Income Taxes--Credit, Other Income and Deductions, as appropriate, shall be credited with an amount equal to that by which taxes on income payable for the year are greater because of deferral of taxes on income in previous years, as provided by paragraph A, above, because of difference in timing for tax purposes, other than with respect to accelerated amortization or liberalized depreciation. Such debit to this account and credit to account 411.1 or 411.2, shall, in general, represent the effect on taxes payable in the current year of the smaller deduction permitted for tax purposes as compared to the amount recognized in the utility's current accounts with respect to the item or class of items for which deferred tax accounting by the utility was authorized by the commission.

C. Vintage year records with respect to entries to this account, as described above, and the account balance, shall be so maintained as to show the factors of calculation with respect to each annual amount of the item or class of items for which deferred tax accounting by the utility is utilized.

D. The utility is restricted in its use of this account to the purposes set forth above. It shall not transfer the balance in the account or any portion thereof to retained earnings or to any other account or make any use thereof except as provided in the text of this account, without prior approval of the commission. Upon the disposition by sale, exchange, transfer, abandonment or premature retirement of items on which there is a related balance herein, this account shall be charged with an amount equal to the related income tax effect, if any, arising from such disposition and account 411.1, Provision for Deferred Income Taxes--Credit, Utility Operating Income, or 411.2, Provision for Deferred Income Taxes--Credit, Other Income and Deductions, shall be credited. When the remaining balance, after consideration of any related tax expenses, is less than \$25,000, this account shall be charged and account 411.1 or 411.2, as appropriate, credited with such balance. If after consideration of any related income tax expense, there is a remaining amount of \$25,000 or more, the commission shall authorize or direct how such amount shall be accounted for at the time approval

for the disposition of accounting is granted. When plant is disposed of by transfer to a wholly owned subsidiary, the related balance in this account shall also be transferred. When the disposition relates to retirement of an item or items under a group method of depreciation where there is no tax effect in the year of retirement, no entries are required in this account. If it can be determined that the related balance would be necessary to be retained to offset future group item tax deficiencies.

Note: In determining appropriate use of this account as a basis of request to the commission for authorization of its use, for the deferral of taxes, consideration shall be given to the relative importance of the amount involved, and to other items in the utility's accounts where "Prepaid tax accounting" may be appropriate, such as situations (a) where the time of taking a deduction in computing taxes on income is such that the tax deduction must be delayed or applied to a series of future years as opposed to earlier recognition of such item in determination of income in the general accounts of the utility, or (b) where inclusion of an income item is required for tax purposes but is to be recognized in whole or in part in the utility's income accounts of a subsequent year or years.

9. OPERATING RESERVES

261. Property Insurance Reserve

A. This account shall include amounts reserved by the utility for self-insurance against losses through accident, fire, flood, or other hazards to its own property or property leased from others. The amounts charged to account 924, Property Insurance, or other appropriate accounts to cover such risks shall be credited to this account. A schedule of risks covered by this reserve shall be maintained, giving a description of the property involved, the character of the risks covered and the rates used. (See general instruction 166.11.)

B. Charges shall be made to this account for losses covered by self-insurance. Details of these charges shall be maintained according to the year the casualty occurred which gave rise to the loss.

262. Injuries and Damages Reserve

A. This account shall be credited with amounts charged to account 925, Injuries and Damages, or other appropriate accounts, to meet the probable liability, not covered by insurance, for deaths or injuries to employees and others, and for damages to property neither owned nor held under lease by the utility. (See general instruction 166.11.)

B. When liability for any injury or damage is admitted by the utility either voluntarily or because of the decision of a court or other lawful

authority, such as a workmen's compensation board, the admitted liability shall be charged to this account and credited to the appropriate liability account. Details of these charges shall be maintained according to the year the casualty occurred which gave rise to the loss.

Note: Recoveries or reimbursements for losses charged to this account shall be credited hereto; the cost of repairs to property of others If provided for herein, shall be charged to this account.

263. Pensions and Benefits Reserve

A. This account shall include provisions made by the utility and amounts contributed by employees for pensions, accident and death benefits, savings, relief, hospital and other provident purposes, where the funds represented by the reserve are included in the assets of the utility either in general or in segregated fund accounts. (See general instructions 166.11 and 166.16; and operating expense account 926, Employee Pensions and Benefits.)

B. Amounts paid by the utility for the purposes for which this reserve is established shall be charged hereto.

C. A separate account shall be kept for each kind of reserve included herein.

Note: If employee pension or benefit plan funds are not included among the assets of the utility but are held by outside trustees, payments into such funds, or accruals therefor, shall not be included in this account.

265. Miscellaneous Operating Reserves

A. This account shall include all operating reserves maintained by the utility which are not provided for elsewhere.

B. This account shall be maintained in such manner as to show the amount of each separate reserve and the nature and amounts of the debits and credits thereto.

Note: This account includes only such reserves as may be created for operating purposes and does not include any reservations of retained earnings the credits of which should be carried in account 215, Appropriated Retained Earnings.

ELECTRIC PLANT ACCOUNTS

1. INTANGIBLE PLANT

301. Organization

302. Franchises and Consents

303. Miscellaneous Intangible Plant

2. PRODUCTION PLANT

A. STEAM PRODUCTION

- 310. Land and Land Rights
- 311. Structures and Improvements
- 312. Boiler Plant Equipment
- 313. Engines and Engine Driven Generators
- 314. Turbogenerator Units
- 315. Accessory Electric Equipment

- 398. Miscellaneous Equipment
- 399. Other Tangible Property

1. INTANGIBLE PLANT

- 301. Organization

This account shall include all fees paid to federal or state governments for the privilege of incorporation and expenditures incident to organizing the corporation, partnership, or other enterprise and putting it into readiness to do business.

ITEMS

1. Cost of obtaining certificates authorizing an enterprise to engage in the public utility business.
2. Fees and expenses for incorporation.
3. Fees and expenses for mergers or consolidations.
4. Office expenses incident to organizing the utility.
5. Stock and minute books and corporate seal.

Note A: This account shall not include any discounts upon securities issued or assumed; nor shall it include any costs incident to

negotiating loans, selling bonds or other evidences of debt, or expenses in connection with the authorization, issuance, or sale of capital stock.

Note B: Exclude from this account and include in the appropriate expense account the cost of preparing and filing papers in connection with the extension of the term of incorporation unless the first organization costs have been written off. When charges are made to this account for expenses incurred in mergers, consolidations, or reorganizations, amounts previously included herein or in similar accounts in the books of the companies concerned shall be excluded from this account this account*.

*So in original.

302. Franchises and Consents

A. This account shall include amounts paid to the federal government, to a state or to a political subdivision thereof in consideration for franchises, consents, or certificates, running in perpetuity or for a specified term of more than one year, together with necessary and reasonable expenses incident to procuring such franchises, consents, or certificates. It shall include necessary and reasonable expenses incident to obtaining permission and approval to exercise such rights and privileges when the applications therefor are acted upon favorably by the regulatory body. Such expenses include fees for legal and other professional service, expenses of witnesses, cost of newspaper and other advertisements, etc., and pay and expenses of employees engaged in preparing exhibits and other data for hearings. If an application for a franchise, consent, or certificate is denied, expenditures incident to the application shall be charged to account 426.5, Other Deductions, or account 435, Extraordinary Deductions, as appropriate.

B. If a franchise, consent, or certificate is acquired by assignment, the charge to this account in respect thereof shall not exceed the amount paid therefor by the utility to the assignor, nor shall it exceed the amount paid by the original grantee, plus the expense of acquisition to such grantee. Any excess of the amount actually paid by the utility over the amount above specified shall be charged to account 426.5, Other Deductions.

C. When any franchise has expired, the book cost thereof shall be credited hereto and charged to account 426.5, Other Deductions, or to account 111, Accumulated Provision for Amortization of Electric Plant in Service, as appropriate.

D. Records supporting this account shall be kept so as to show separately the book cost of each franchise or consent.

Note: Annual or other periodic payments under franchises shall not be included herein but in the appropriate operating expense account.

303. Miscellaneous Intangible Plant

A. This account shall include the cost of patent rights, licenses, privileges, and other intangible property necessary or valuable in the conduct of the utility's electric operations and not specifically chargeable to any other account.

B. When any item included in this account is retired or expires, the book cost thereof shall be credited hereto and charged to account 426.5, Other Deductions, or account 111, Accumulated Provision for Amortization of Electric Plant in Service, as appropriate.

C. This account shall be maintained in such a manner that the utility can furnish full information with respect to the amounts included herein.

2. PRODUCTION PLANT

A. Steam Production

310. Land and Land Rights

This account shall include the cost of land and land rights used in connection with steam power generation. (See electric plant instruction 168.7.)

311. Structures and Improvements

This account shall include the cost in place of structures and improvements used in connection with steam power generation. (See electric plant instruction 168.8.)

Note: Include steam production roads and railroads in this account.

312. Boiler Plant Equipment

This account shall include the cost installed of furnaces, boilers, coal and ash handling and coal preparing equipment, steam and feed water piping, boiler apparatus and accessories used in the production of steam, mercury, or other vapor, to be used primarily for generating electricity.

ITEMS

1. Ash handling equipment, including hoppers, gates, cars, conveyors, hoists, sluicing equipment, including pumps and motors, sluicing water pipe and fittings, sluicing trenches and accessories, etc., except sluices which are a part of a building.

1a. Sintering plant equipment.

2. Boiler feed system, including feed water heaters, evaporator condensers, heater drain pumps, heater drainers, deaerators, and vent condensers, boiler feed pumps, surge tanks, feed water regulators, feed water measuring equipment, and all associated drives.

3. Boiler plant cranes and hoists and associated drives.
4. Boilers and equipment, including boilers and baffles, economizers, superheaters, soot blowers, foundations and settings, water walls, arches, grates, insulation, blowdown system, drying out of new boilers, also associated motors or other power equipment.
5. Breeching and accessories, including breeching, dampers, soot spouts, hoppers and gates, cinder eliminators, breeching insulation, soot blowers and associated motors.
6. Coal handling and storage equipment, including coal towers, coal lorries, coal cars, locomotives and tracks when devoted principally to the transportation of coal, hoppers, downtakes, unloading and hoisting equipment, skip hoists and conveyors, weighing equipment, magnetic separators, cable ways, housings and supports for coal handling equipment.
7. Draft equipment including air preheaters and accessories, induced and forced draft fans, air ducts, combustion control mechanisms, and associated motors or other power equipment.
8. Gas burning equipment, including holders, burner equipment and piping, control equipment, etc.
9. Instruments and devices, including all measuring, indicating, and recording equipment for boiler plant service together with mountings and supports.
10. Lighting systems (not chargeable to structures).
11. Oil burning equipment, including tanks, heaters, pumps with drive, burner equipment and piping, control equipment, etc.
12. Pulverized fuel equipment, including pulverizers, necessary motors, primary air fans, cyclones and ducts, dryers, pulverized fuel bins, pulverized fuel conveyors and equipment, burners, burner piping, priming equipment, air compressors, motors, etc.
13. Stacks, including foundations and supports, stack steel and ladders, stack brick work, stack concrete, stack lining, stack painting (first), when set on separate foundations, independent of substructure or superstructure of building.
14. Station piping, including pipe, valves, fittings, separators, traps, desuperheaters, hangers, excavation, covering, etc., for station piping system, including all steam, condensate, boiler feed and water supply piping, etc., but not condensing water, plumbing, building heating, oil, gas, air piping or piping specifically provided for in account 313.
15. Stoker or equivalent feeding equipment, including stokers and accessory motors, clinker grinders, fans and motors, etc.

16. Ventilating equipment.

17. Water purification equipment, including softeners and accessories, evaporators and accessories, heat exchangers, filters, tanks for filtered or softened water, pumps, motors, etc.

18. Water supply systems, including pumps, motors, strainers, raw water storage tanks, boiler wash pumps, intake and discharge pipes and tunnels not a part of a building.

19. Wood fuel equipment, including hoppers, fuel hogs and accessories, elevators and conveyors, bins and gates, spouts, measuring equipment and associated drives.

Note A: When the system for supplying boiler or condenser water is elaborate, as when it includes a dam, reservoir, canal, pipe line, cooling ponds, or where gas or oil is used as a fuel for producing steam and is supplied through a pipe line system owned by the utility, the cost of such special facilities shall be charged to a subdivision of account 311, Structures and Improvements.

Note B: This account shall not include boilers or steam pipes whose primary purpose is the heating of structures.

313. Engines and Engine Driven Generators

This account shall include the cost installed of steam engines, reciprocating or rotary, and their associated auxiliaries; and engine driven main generators, except turbogenerator units.

ITEMS

1. Air cleaning and cooling apparatus, including blowers, drive equipment, air ducts not a part of building, louvers, pumps, hoods, etc.

2. Belting, shafting, pulleys, reduction gearing, etc.

3. Circulating pumps, including connections between condensers and intake and discharge tunnels.

4. Cooling system, including towers, pumps, tank, and piping.

5. Condensers, including condensate pumps, air and vacuum pumps, ejectors, unloading valves and vacuum breakers, expansion devices, screens, etc.

6. Cranes, hoists, etc., including items wholly identified with items listed herein.

7. Engines, reciprocating or rotary.

8. Fire extinguishing systems.

9. Foundations and settings, specially constructed for and not expected to outlast the apparatus for which provided.

10. Generators--main, A.C. or D.C., including field rheostats and connections for self-excited units, and excitation systems when identified with the generating unit.

11. Governors.
 12. Lighting systems (not chargeable to structures).
 13. Lubricating systems, including gauges, filters, tanks, pumps, piping, motors, etc.
 14. Mechanical meters, including gauges, recording instruments, sampling and testing equipment.
 15. Piping--main exhaust, including connections between generator and condenser and between condenser and hotwell.
 16. Piping--main steam, including connections from main throttle valve to turbine inlet.
 17. Platforms, railings, steps, gratings, etc., appurtenant to apparatus listed herein.
 18. Pressure oil system, including accumulators, pumps, piping, motors, etc.
 19. Throttle and inlet valve.
 20. Tunnels, intake and discharge, for condenser system, when not a part of a structure.
 21. Water screens, motors, etc.
 314. Turbogenerator Units
- This account shall include the cost installed of main turbine driven units and accessory equipment used in generating electricity by steam.

ITEMS

1. Air cleaning and cooling apparatus, including blowers, drive equipment, air ducts not a part of building, louvers, pumps, hoods, etc.
2. Circulating pumps, including connections between condensers and intake and discharge tunnels.
3. Condensers, including condensate pumps, air and vacuum pumps, ejectors, unloading valves and vacuum breakers, expansion devices, screens, etc.
4. Cooling system, including towers, pumps, tanks, and piping.
5. Cranes, hoists, etc., including items wholly identified with items listed herein.
6. Excitation system, when identified with main generating units.
7. Fire extinguishing systems.
8. Foundations and settings, specially constructed for and not expected to outlast the apparatus for which provided.
9. Generator hydrogen, gas piping and detrainment equipment.
10. Governors.
11. Lighting systems (not chargeable to structures).
12. Lubricating systems, including gauges, filters, water separators, tanks, pumps, piping, motors, etc.

13. Mechanical meters, including gauges, recording instruments, sampling and testing equipment.
14. Moisture separators for turbine steam.
15. Piping--main exhaust, including connections between turbogenerator and condenser and between condenser and hotwell.
16. Piping--main steam, including connections from main throttle valve to turbine inlet.
17. Platforms, railings, steps, gratings, etc., appurtenant to apparatus listed herein.
18. Pressure oil systems, including accumulators, pumps, piping, motors, etc.
19. Steelwork, specially constructed for apparatus listed herein.
20. Throttle and inlet valve.
21. Tunnels, intake and discharge, for condenser system, when not a part of structure, water screens, etc.
22. Turbine lubricating oil (initial charge).
23. Turbogenerators--main, including turbine and generator, field rheostats and electric connections for self-excited units.
24. Water screens, motors, etc.

315. Accessory Electric Equipment

This account shall include the cost installed of auxiliary generating apparatus, conversion equipment, and equipment used primarily in connection with the control and switching of electric energy produced by steam power, and the protection of electric circuits and equipment, except electric motors used to drive equipment included in other accounts. Such motors shall be included in the account in which the equipment with which they are associated is included.

ITEMS

1. Auxiliary generators, including boards, compartments, switching equipment, control equipment, and connections to auxiliary power bus.
2. Excitation system, including motor, turbine and dual drive, exciter sets and rheostats, storage batteries and charging equipment, circuit breakers, panels and accessories, knife switches and accessories, surge arresters, instrument shunts, conductors and conduit, special supports for conduit, generator field and exciter switch panels, exciter bus tie panels, generator and exciter rheostats, etc., special housing, protective screens, etc.
3. Generator main connections, including circuit breakers and accessories, disconnecting switches and accessories, operating mechanisms and interlocks, current transformers, potential transformers, protective relays, isolated panels and equipment, conductors and

conduit, special supports for generator main leads, grounding switch, etc., special housings, protective screens, etc.

4. Station buses including main, auxiliary, transfer, synchronizing and fault ground buses, including circuit breakers and accessories, disconnecting switches and accessories, operating mechanisms and interlocks, reactors and accessories, voltage regulators and accessories, compensators, resistors, starting transformers, current transformers, potential transformers, protective relays, storage batteries and charging equipment, isolated panels and equipment, conductors and conduit, special supports, special housings, concrete pads, general station grounding system, special fire extinguishing system, and test equipment.

5. Station control system, including station switchboards with panel wiring, panels with instruments and control equipment only, panels with switching equipment mounted or mechanically connected, truck type boards complete, cubicles, station supervisory control boards, generator and exciter signal stands, temperature recording devices, frequency control equipment, master clocks, watt-hour meters and synchronoscope in the turbine room, station totalizing wattmeter, boiler room load indicator equipment, storage batteries, panels and charging sets, instrument transformers for supervisory metering, conductors and conduit, special supports for conduit, switchboards, batteries, special housing for batteries, protective screens, doors, etc.

Note A: Do not include in this account transformers and other equipment used for changing the voltage or frequency of electric energy for the purposes of transmission or distribution.

Note B: When any item of equipment listed herein is used wholly to furnish power to equipment included in another account, its cost shall be included in such other account.

Note C: Step-up transforming equipment for the purpose of changing generated voltage to transmission voltage shall not be included in this account.

Note D: Equipment comprising a distribution station shall not be included in this account even though located in or at a generating station.

Note E: When a substantial item of equipment such as a transformer, a circuit breaker, or a rotary converter, which is readily identifiable by serial number or other distinguishing mark is removed from a plant, and there is reasonable probability of its reuse, only the cost of installation and associated minor items shall be retired, but no retirement shall be made of the cost of the item itself. The cost of

such equipment shall be carried in a separate subaccount.

316. Miscellaneous Power Plant Equipment

This account shall include the cost installed of miscellaneous equipment in and about the stream generating plant devoted to general station use, and which is not properly includible in any of the foregoing stream power production accounts.

ITEMS

1. Compressed air and vacuum cleaning systems, including tanks, compressors, exhausters, air filters, piping, etc.
2. Cranes and hoisting equipment, including cranes, cars, crane rails, monorails, hoists, etc., with electric and mechanical connections.
3. Fire extinguishing equipment for general station use.
4. Foundations and settings specially constructed for and not expected to outlast the apparatus for which provided.
5. Locomotive cranes not includible elsewhere.
6. Locomotives not includible elsewhere.
7. Marine equipment, including boats, barges, etc.
8. Miscellaneous belts, pulleys, countershafts, etc.
9. Miscellaneous equipment, including atmospheric and weather indicating devices, intrasite communication equipment, laboratory equipment, signal systems, callophones, emergency whistles and sirens, fire alarms, insect control equipment, and other similar equipment.
10. Railway cars not includible elsewhere.
11. Refrigerating systems, including compressors, pumps, cooling coils, etc.
12. Station maintenance equipment, including lathes, shapers, planers, drill presses, hydraulic presses, grinders, etc., with motors, shafting, hangers, pulleys, etc.
13. Ventilating equipment, including items wholly identified with apparatus listed herein.

Note A: When any item of equipment listed herein is used wholly in connection with equipment included in another account, its cost shall be included in such other account.

Note B: Office equipment, desks, chairs, etc., shall not be included herein but in account 391, Office Furniture and Equipment.

B. Nuclear Production

320. Land and Land Rights

This account shall include the cost of land and land rights used in connection with nuclear power generation. (See electric plant instruction 168.7.)

321. Structures and Improvements

This account shall include the cost in place of structures and improvements used in connection with nuclear power generation. (See electric plant instruction 168.8.)

Note: Include vapor containers and nuclear production roads and railroads in this account.

322. Reactor Plant Equipment

This account shall include the cost installed of reactors, reactor fuel handling and storage equipment, pressurizing equipment, coolant charging equipment, purification and discharging equipment, radioactive waste treatment and disposal equipment, boilers, steam and feed water piping, reactor and boiler apparatus and accessories and other reactor plant equipment used in the production of steam to be used primarily for generating electricity, including auxiliary superheat boilers and associated equipment in systems which change temperatures or pressure of steam from the reactor system.

ITEMS

1. Auxiliary superheat boilers and associated fuel storage, handling preparation and burning equipment, etc. (See account 312, Boiler Plant Equipment, for items, but exclude water supply, water flow lines, and steam lines, as well as other equipment not strictly within the superheat function.)
2. Boiler feed system, including feed water heaters, evaporator condensers, heater drain pumps, heater drainers, deaerators, and vent condensers, boiler feed pumps, surge tanks, feed water regulators, feed water measuring equipment, and all associated drivers.
3. Boilers and heat exchangers.
4. Foundations and settings, specially constructed for and not expected to outlast the apparatus for which provided.
5. Instruments and devices, including all measuring, indicating and recording equipment for reactor and boiler plant service together with mountings and supports.
6. Lighting systems associated with specific items of equipment.
7. Moderators, such as heavy water, graphite, etc., (initial charge).
8. Radioactive waste treatment and disposal equipment, including tanks, ion exchangers, incinerators, condensers, chimneys, and diluting fans and pumps.
9. Reactor coolant or moderator circulation charging, purification, and discharging equipment, including tanks, pumps, heat exchangers, demineralizers, and storage.
10. Reactor coolant; primary and secondary systems (initial charge).
11. Reactor emergency poison container and injection system.

12. Reactor fuel element failure detection system.
13. Reactor fuel handling equipment, including manipulating and extraction tools, underwater viewing equipment, seal cutting and welding equipment, fuel transfer equipment and fuel disassembly machinery.
14. Reactor including shielding control rods and mechanisms.
15. Reactor plant cranes and hoists and associated drives.
16. Reactor pressurizing and pressure relief equipment, including pressurizing tanks and immersion heaters.
17. Station piping, including pipes, valves, fittings, separators, traps, desuperheaters, hangers, excavation, covering, etc., for station piping system, including all-reactor coolant, steam, condensate, boiler feed and water supply piping, etc., but not condensing water, plumbing, building heating, oil, gas, or air piping.
18. Ventilating equipment.
19. Water purification equipment, including softeners, demineralizers, and accessories, evaporators and accessories, heat exchangers, filters, tanks for filtered or softened water, pump, motors, etc.
20. Water supply systems, including pumps, motors, strainers, raw-water storage tanks, boilers* wash pumps, intake and discharge pipes and tunnels not a part of a building.

*So in original. Comma inadvertently omitted.

Note: When the system for supplying boiler or condenser water is elaborate, as when it includes a dam, reservoir, canal, pipe lines, or cooling ponds, the cost of such special facilities shall be charged to a subdivision of account 321, Structures and Improvements.

323. Turbogenerator Units

This account shall include the cost installed of main turbine driven units and accessory equipment used in generating electricity by steam.

ITEMS

1. Air cleaning and cooling apparatus, including blowers, drive equipment, air ducts not a part of building, louvers, pumps, hoods, etc.
2. Circulating pumps, including connections between condensers, and intake and discharge tunnels.
3. Condensers, including condensate pumps, air and vacuum pumps ejectors, unloading valves and vacuum breakers, expansion devices, screens, etc.
4. Cooling system, including towers, pumps, tanks and piping.
5. Cranes, hoists, etc., including items wholly identified with items listed herein.
6. Excitation system when identified with main generating units.
7. Fire extinguishing systems.

8. Foundations and settings, especially constructed for and not expected to outlast the apparatus for which provided.
9. Generator hydrogen gas piping system and hydrogen detrainment equipment and bulk hydrogen gas storage equipment.
10. Governors.
11. Lighting systems associated with specific items of equipment.
12. Lubricating systems, including gauges, filters, water separators, tanks, pumps, piping, motors, etc.
13. Mechanical meters, including gauges, recording instruments, sampling and testing equipment.
14. Moisture separators for turbine steam.
15. Piping--main exhaust, including connections between turbogenerator and condenser and between condenser and hotwell.
16. Piping--main steam, including connections from main throttle valve to turbine inlet.
17. Platforms, railings, steps, gratings, etc., appurtenant to apparatus listed herein.
18. Pressure oil systems, including accumulators, pumps, piping, motors, etc.
19. Steelwork, specially constructed for apparatus listed herein.
20. Throttle and inlet valve.
21. Tunnels, intake and discharge, for condenser system when not a part of structure, water screens, etc.
22. Turbine lubricating oil (initial charge).
23. Turbogenerators--main, including turbine and generator, field rheostats and electric connections for self-excited units.
24. Water screens, motors, etc.

324. Accessory Electric Equipment

This account shall include the cost installed of auxiliary generating apparatus, conversion equipment, and equipment used primarily in connection with the control and switching of electric energy produced by nuclear power, and the protection of electric circuits and equipment, except electric motors used to drive equipment included in other accounts. Such motors shall be included in the account in which the equipment with which they are associated is included.

ITEMS

1. Auxiliary generators, including boards, compartments, switching equipment, control equipment, and connections to auxiliary power bus.
2. Excitation system, including motor, turbine and dual-drive exciter sets and rheostats, storage batteries and charging equipment, circuit breakers, panels and accessories, knife switches and accessories, surge

arresters, instrument shunts, conductors and conduit, special supports for conduit, generator field and exciter switch panels, exciter bus tie panels, generator and exciter rheostats, etc., special housing, protective screens, etc.

3. Generator main connections, including circuit breakers and accessories, disconnecting switches and accessories, operating mechanisms and interlocks, current transformers, potential transformers, protective relays, isolated panels and equipment, conductors and conduit, special supports for generator main leads, grounding switch, etc., special housings, protective screens, etc.

4. Station buses, including main, auxiliary, transfer, synchronizing and fault ground buses, including circuit breakers and accessories, disconnecting switches and accessories, operating mechanisms and interlocks, reactors and accessories, voltage regulators and accessories, compensators, resistors, starting transformers, current transformers, potential transformers, protective relays, storage batteries and charging equipment, isolated panels and equipment, conductors and conduit, special supports, special housings, concrete pads, general station grounding system, fire extinguishing system, and test equipment.

5. Station control system, including station switchboards with panel wiring, panels with instruments and control equipment only, panels with switching equipment mounted or mechanically connected, truck-type boards complete, cubicles, station supervisory control boards, generator and exciter signal stands, temperature recording devices, frequency control equipment, master clocks, watt-hour meters and synchronoscope in the turbine room, station totalizing wattmeter, boiler-room load indicator equipment, storage batteries, panels and charging sets, instrument transformers for supervisory metering, conductors and conduit, special supports for conduit, switchboards, batteries, special housing for batteries, protective screens, doors, etc.

Note A: Do not include in this account transformers and other equipment used for changing the voltage or frequency of electric energy for the purposes of transmission or distribution.

Note B: When any item of equipment listed herein is used wholly to furnish power to equipment included in another account, its cost shall be included in such other account.

Note C: Step-up transforming equipment for the purpose of changing generated voltage to transmission voltage shall not be included in this account.

Note D: Equipment comprising a distribution station shall not be

included in this account even though located in or at a generating station.

Note E: When a substantial item of equipment such as a transformer, a circuit breaker, or a rotary converter, which is readily identifiable by serial number or other distinguishing mark is removed from a plant, and there is reasonable probability of its reuse, only the cost of installation and associated minor items shall be retired, but no retirement shall be made of the cost of the item itself. The cost of such equipment shall be carried in a separate subaccount.

325. Miscellaneous Power Plant Equipment

This account shall include the cost installed of miscellaneous equipment in and about the nuclear generating plant devoted to general station use, and which is not properly includible in any of the foregoing nuclear power production accounts.

ITEMS

1. Compressed air and vacuum cleaning systems, including tanks, compressors, exhausters, air filters, piping, etc.
 2. Cranes and hoisting equipment, including cranes, cars, crane rails, monorails, hoists, etc., with electric and mechanical connections.
 3. Fire extinguishing equipment for general station use.
 4. Foundations and settings specially constructed for and not expected to outlast the apparatus for which provided.
 5. Locomotive cranes not includible elsewhere.
 6. Locomotives not included elsewhere.
 7. Marine equipment, including boats, barges, etc.
 8. Miscellaneous belts, pulleys, countershafts, etc.
 9. Miscellaneous equipment, including atmospheric and weather indicating devices, intrasite communication equipment, laboratory equipment, signal systems, callophones, emergency whistles and sirens, fire alarms, insect-control equipment, and other similar equipment.
 10. Railways* cars or special shipping containers not includible elsewhere.
- * So in original. "Railways" should be "Railway".
11. Refrigerating systems, including compressors, pumps, cooling coils, etc.
 12. Station and area radiation monitoring equipment.
 13. Station maintenance equipment, including lathes, shapers, planers, drill presses, hydraulic presses, grinders, etc., with motors, shafting, hangers, pulleys, etc.
 14. Ventilating equipment, including items wholly identified with apparatus listed herein.

Note A: When any item of equipment listed herein is used wholly in connection with equipment included in another account, its cost shall be included in such other account.

Note B: Office equipment, desks, chairs, etc., shall not be included herein but in account 391, Office Furniture and Equipment.

C. Hydraulic Production

330. Land and Land Rights

This account shall include the cost of land and land rights used in connection with hydraulic power generation. (See electric plant instruction 168.7.)

331. Structures and Improvements

This account shall include the cost in place of structures and improvements used in connection with hydraulic power generation. (See electric plant instruction 168.8.)

332. Reservoirs, Dams and Waterways

This account shall include the cost in place of facilities used for impounding, collecting, storage, diversion, regulation, and delivery of water used primarily for generating electricity.

ITEMS

1. Bridges and culverts (when not a part of roads or railroads).
2. Clearing and preparing land.
3. Dams, including wasteways, spillways, flash boards, spillway gates with operating and control mechanisms, tunnels, gate houses, and fish ladders.
4. Dikes and embankments.
5. Electric system, including conductors, control system, transformers, lighting fixtures, etc.
6. Excavation, including shoring, bracing, bridging, refill, and disposal of excess excavated material.
7. Foundations and settings specially constructed for and not expected to outlast the apparatus for which provided.
8. Intakes, including trash racks, rack cleaners, control gates and valves with operating mechanisms, and intake house when not a part of station structure.
9. Platforms, railings, steps, gratings, etc., appurtenant to structures listed herein.
10. Power lines wholly identified with items included herein.
11. Retaining walls.
12. Water conductors and accessories, including canals, tunnels, flumes, penstocks, pipe conductors, forebays, tailraces, navigation locks and operating mechanisms, water-hammer and surge tanks, and

supporting trestles and structures.

13. Water storage reservoirs, including dams, flashboards, spillway gates and operating mechanisms, inlet and outlet tunnels, regulating valves and valve towers, silt and mud sluicing tunnels with valve or gate towers, and all other structures wholly identified with any of the foregoing items.

333. Water Wheels, Turbines and Generators

This account shall include the cost installed of water wheels and hydraulic turbines (from connection with penstock or flume to tailrace) and generators driven thereby devoted to the production of electricity by water power or for the production of power for industrial or other purposes, if the equipment used for such purposes is a part of the hydraulic power plant works.

ITEMS

1. Exciter water wheels and turbines, including runners, gates, governors, pressure regulators, oil pumps, operating mechanisms, scroll cases, draft tubes, and draft-tube supports.

2. Fire extinguishing equipment.

3. Foundations and settings, specially constructed for and not expected to outlast the apparatus for which provided.

4. Generator cooling system, including air cooling and washing apparatus, air fans and accessories, air ducts, etc.

5. Generators--main, A.C. or D.C., including field rheostats and connections for self-excited units and excitation system when identified with generating unit.

6. Lighting systems (not chargeable to structures).

7. Lubricating systems, including gauges, filters, tanks, pumps, piping, etc.

8. Main penstock valves and appurtenances, including main valves, control equipment, bypass valves and fittings, and other accessories.

9. Main turbines and water wheels, including runners, gates, governors, pressure regulators, oil pumps, operating mechanisms, scroll cases, draft tubes, and draft-tube supports.

10. Mechanical meters and recording instruments.

11. Miscellaneous water wheel equipment, including gauges, thermometers, meters, and other instruments.

12. Platforms, railings, steps, gratings, etc., appurtenant to apparatus listed herein.

13. Scroll case filling and drain system, including gates, pipe, valves, fittings, etc.

14. Water actuated pressure regulator system, including tanks and

housings, pipes, valves, fittings and insulations, piers and anchorage, and excavation and backfill.

334. Accessory Electric Equipment

This account shall include the cost installed of auxiliary generating apparatus, conversion equipment, and equipment used primarily in connection with the control and switching of electric energy produced by hydraulic power and the protection of electric circuits and equipment, except electric motors used to drive equipment included in other accounts. Such motors shall be included in the account in which the equipment with which they are associated is included.

ITEMS

1. Auxiliary generators, including boards, compartments, switching equipment, control equipment, and connections to auxiliary power bus.

2. Excitation system, including motor, turbine, and dual drive exciter sets and rheostats, storage batteries and charging equipment, circuit breakers, panels and accessories, knife switches and accessories, surge arresters, instrument shunts, conductors and conduit, special supports for conduit, generator field and exciter switch panels, exciter bus tie panels, generator and exciter rheostats etc., special housings, protective screens, etc.

3. Generator main connections, including circuit breakers and accessories, disconnecting switches and accessories, operating mechanisms and interlocks, current transformers, potential transformers, protective relays, isolated panels and equipment, conductors and conduit, special supports for generator main leads, grounding switch, etc., special housings, protective screens, etc.

4. Station buses, including main, auxiliary, transfer, synchronizing, and fault ground buses, including circuit breakers and accessories, disconnecting switches and accessories, operating mechanisms and interlocks, reactors and accessories, voltage regulators and accessories, compensators, resistors, starting transformers, current transformers, potential transformers, protective relays, storage batteries, and charging equipent*, isolated panels and equipment, conductors and conduit, special supports, special fire extinguishing system, and test equipment.

* So in original. "equipent" should be "equipment".

5. Station control system, including station switchboards with panel wiring, panels with instruments and control equipment only, panels with switching equipment mounted or mechanically connected, truck-type boards complete, cubicles, station supervisory control devices, frequency control equipment, master clocks, watt-hour meter, station totalizing

wattmeter, storage batteries, panels and charging sets, instrument transformers for supervisory metering, conductors and conduit, special supports for conduit, switchboards, batteries, special housings for batteries, protective screens, doors, etc.

Note A: Do not include in this account transformers and other equipment used for changing the voltage or frequency of electric energy for the purposes of transmission or distribution.

Note B: When any item of equipment listed herein is used wholly to furnish power to equipment included in another account, its cost shall be included in such other account.

Note C: Step-up transforming equipment for the purpose of changing generated voltage to transmission voltage shall not be included in this account.

Note D: Equipment comprising a distribution station shall not be included in this account even though located in or at a generating station.

Note E: When a substantial item of equipment such as a transformer, a circuit breaker, or a rotary converter, which is readily identifiable by serial number or other distinguishing mark is removed from a plant, and there is reasonable probability of its reuse, only the cost of installation and associated minor items shall be retired, but no retirement shall be made of the cost of the item itself. The cost of which equipment shall be carried in a separate subaccount.

335. Miscellaneous Power Plant Equipment

This account shall include the cost installed of miscellaneous equipment in and about the hydroelectric generating plant devoted to general station use, and which is not properly includible in any other hydraulic production accounts.

ITEMS

1. Compressed air and vacuum cleaning systems, including tanks, compressors, exhausters, air filters, piping, etc.
2. Cranes and hoisting equipment, including cranes, cars, crane rails, monorails, hoists, etc., with electric and mechanical connections.
3. Fire extinguishing equipment for general station use.
4. Foundations and settings, specially constructed for and not expected to outlast the apparatus for which provided.
5. Locomotive cranes not includible elsewhere.
6. Locomotives not includible elsewhere.
7. Marine equipment, including boats, barges, etc.
8. Miscellaneous belts, pulleys, countershafts, etc.
9. Miscellaneous equipment, including atmospheric and weather

indicating devices, intrasite communication equipment, laboratory equipment, insect control equipment, signal systems, callophones, emergency whistles and sirens, fire alarms, and other similar equipment.

10. Railway cars not includible elsewhere.

11. Refrigerating system, including compressors, pumps, cooling coils, etc.

12. Station maintenance equipment, including lathes, shapers, planers, drill presses, hydraulic presses, grinders, etc., with motors, shafting, hangers, pulleys, etc.

13. Ventilating equipment, including items wholly identified with apparatus listed herein.

Note A: When any item of equipment listed herein is used wholly in connection with equipment included in another account, its cost shall be included in such other account.

Note B: Office equipment, desks, chairs, etc., shall not be included herein but in account 391, Office Furniture and Equipment.

336. Roads, Railroads and Bridges

This account shall include the cost of roads, railroads, trails, bridges, and trestles used primarily as production facilities. It includes also those roads, etc., necessary to connect the plant with highway transportation systems, except when such roads are dedicated to public use and maintained by public authorities.

ITEMS

1. Bridges, including foundations, piers, girders, trusses, flooring, etc.

2. Clearing land.

3. Railroads, including grading, ballast, ties, rails, culverts, hoists, etc.

4. Roads, including grading, surfacing, culverts, etc.

5. Structures, constructed and maintained in connection with items listed herein.

6. Trails, including grading, surfacing, culverts, etc.

7. Trestles, including foundations, piers, girders, trusses, flooring, etc.

Note A: Roads intended primarily for connecting employees' houses with the power plant shall not be included herein but in account 331, Structures and Improvements.

Note B: The cost of temporary roads, bridges, etc., necessary during the period of construction but abandoned or dedicated to public use upon completion of the plant, shall not be included herein but shall be charged to the accounts appropriate for the construction.

D. Other Production

340. Land and Land Rights

This account shall include the cost of land and land rights used in connection with other power generation. (See electric plant instruction 168.7.)

341. Structures and Improvements

This account shall include the cost in place of structures and improvements used in connection with other power generation. (See electric plant instruction 168.8.)

342. Fuel Holders, Producers and Accessories

This account shall include the cost installed of fuel handling and storage equipment used between the point of fuel delivery to the station and the intake pipe through which fuel is directly drawn to the engine, also the cost of gas producers and accessories devoted to the production of gas for use in prime movers driving main electric generators.

ITEMS

1. Blower and fans.
2. Boilers and pumps.
3. Economizers.
4. Exhauster outfits.
5. Flues and piping.
6. Pipe system.
7. Producers.
8. Regenerators.
9. Scrubbers.
10. Steam injectors.
11. Tanks for storage of oil, gasoline, etc.
12. Vaporizers.

343. Prime Movers

This account shall include the cost installed of diesel or other prime movers devoted to the generation of electric energy, together with their auxiliaries.

ITEMS

1. Air-filtering system.
2. Belting, shafting, pulleys, reduction gearing, etc.
3. Cooling system, including towers, pumps, tanks, and piping.
4. Cranes, hoists, etc., including items wholly identified with apparatus listed herein.
5. Engines, diesel, gasoline, gas, or other internal combustion.
6. Foundations and settings specially constructed for and not expected to outlast the apparatus for which provided.

7. Governors.
8. Ignition system.
9. Inlet valve.
10. Lighting systems (not chargeable to structures).
11. Lubricating systems, including filters, tanks, pumps, and piping.
12. Mechanical meters, including gauges, recording instruments, sampling and testing equipment.
13. Mufflers.
14. Piping.
15. Starting systems, compressed air, or other, including compressors and drives, tanks, piping, motors, boards and connections, storage tanks, etc.
16. Steelwork, specially constructed for apparatus listed herein.
17. Waste heat boilers, antifructuators, etc.

344. Generators

This account shall include the cost installed of diesel or other power driven main generators.

ITEMS

1. Cranes, hoists, etc., including items wholly identified with such apparatus.
2. Fire extinguishing equipment.
3. Foundations and settings, specially constructed for and not expected to outlast the apparatus for which provided.
4. Generator cooling system, including air cooling and washing apparatus, air fans and accessories, air ducts, etc.
5. Generators--main, A.C. or D.C., including field rheostats and connections for self-excited units and excitation system when identified with the generating unit.
6. Lighting systems (not chargeable to structures).
7. Lubricating system, including tanks, filters, strainers, pumps, piping, coolers, etc.
8. Mechanical meters, and recording instruments.
9. Platforms, railings, steps, gratings, etc., appurtenant to apparatus listed herein.

Note: If prime movers and generators are so integrated that it is not practical to classify them separately, the entire unit may be included in account 344, Generators.

345. Accessory Electric Equipment

This account shall include the cost installed of auxiliary generating apparatus, conversion equipment, and equipment used primarily in connection with the control and switching of electric energy produced in

other power generating stations, and the protection of electric circuits and equipment, except electric motors used to drive equipment included in other accounts. Such motors shall be included in the account in which the equipment with which they are associated is included.

ITEMS

1. Auxiliary generators, including boards, compartments, switching equipment, control equipment, and connections to auxiliary power bus.
2. Excitation system, including motor, turbine and dual-drive exciter sets and rheostats, storage batteries and charging equipment, circuit breakers, panels and accessories, knife switches and accessories, surge arrestors, instrument shunts, conductors and conduit, special supports for conduits, generator field and exciter switch panels, exciter bus tie panels, generator and exciter rheostats, etc., special housings, protective screens, etc.
3. Generator main connections, including circuit breakers and accessories, disconnecting switches and accessories operating mechanisms and interlocks, current transformers, potential transformers, protective relays, isolated panels and equipment, conductors and conduit, special supports for generator main leads, grounding switch, etc., special housing, protective screens, etc.
4. Station control system, including station switchboards with panel wiring, panels with instruments and control equipment only, panels with switching equipment mounted or mechanically connected, trunk-type boards complete, cubicles, station supervisory control boards, generator and exciter signal stands, temperature-recording devices, frequency control equipment, master clocks, watt-hour meter, station totalizing wattmeter, storage batteries, panels and charging sets, instrument transformers for supervisory metering, conductors and conduit, special supports for conduit, switchboards, batteries, special housing for batteries, protective screens, doors, etc.
5. Station buses, including main, auxiliary, transfer, synchronizing and fault ground buses, including circuit breakers and accessories, disconnecting switches and accessories, operating mechanisms and interlocks, reactors and accessories, voltage regulators and accessories, compensators, resistors, starting transformers, current transformers, potential transformers, protective relays, storage batteries and charging equipment, isolated panels and equipment, conductors and conduit, special supports, special housings, concrete pads, general station ground system, special fire extinguishing system, and test equipment.

Note A: Do not include in this account transformers and other

equipment used for changing the voltage or frequency of electric energy for the purposes of transmission or distribution.

Note B: When any item of equipment listed herein is used wholly to furnish power to equipment included in another account, its cost shall be included in such other account.

Note C: Step-up transforming equipment for the purpose of changing generated voltage to transmission voltage shall not be included in this account.

Note D: Equipment comprising a distribution station shall not be included in this account even though located in or at a generating station.

Note E: When a substantial item of equipment such as a transformer, a circuit breaker, or a rotary converter, which is readily identifiable by serial number or other distinguishing mark is removed from a plant, and there is reasonable probability of its reuse, only the cost of installation and associated minor items shall be retired, but no retirement shall be made of the cost of the item itself. The cost of such equipment shall be carried in a separate subaccount.

346. Miscellaneous Power Plant Equipment

This account shall include the cost installed of miscellaneous equipment in and about the other power generating plant, devoted to general station use, and not properly includible in any of the foregoing other power production accounts.

ITEMS

1. Compressed air and vacuum cleaning systems, including tanks, compressors, exhausters, air filters, piping, etc.
2. Cranes and hoisting equipment, including cranes, cars, crane rails, monorails, hoists, etc., with electric and mechanical connections.
3. Fire extinguishing equipment for general station use.
4. Foundations and settings, specially constructed for and not expected to outlast the apparatus for which provided.
5. Miscellaneous equipment, including atmospheric and weather indicating devices, intrasite communication equipment, laboratory equipment, signal systems, callophones, emergency whistles and sirens, fire alarms, and other similar equipment.
6. Miscellaneous belts, pulleys, countershafts, etc.
7. Refrigerating system including compressors, pumps, cooling coils, etc.
8. Station maintenance equipment, including lathes, shapers, planers, drill presses, hydraulic presses, grinders, etc., with motors, shafting, hangers, pulleys, etc.

9. Ventilating equipment, including items wholly identified with apparatus listed herein.

Note A: When any item of equipment listed herein is used wholly in connection with equipment included in another account, its cost shall be included in such other account.

Note B: Office equipment, desks, chairs, etc., shall not be included herein but in account 391, Office Furniture and Equipment.

3. TRANSMISSION PLANT

350. Land and Land Rights

This account shall include the cost of land and land rights used in connection with transmission operations. (See electric plant instructions 168.7 and 168.14.)

352. Structures and Improvements

This account shall include the cost in place of structures and improvements used in connection with transmission operations. (See electric plant instructions 168.8 and 168.14.)

353. Station Equipment

This account shall include the cost installed of transforming, conversion, and switching equipment used for the purpose of changing the characteristics of electricity in connection with its transmission or for controlling transmission circuits. (See electric plant instruction 168.14.)

ITEMS

1. Bus compartments, concrete, brick, and sectional steel, including items permanently attached thereto.

2. Conduit, including concrete and iron duct runs not a part of a building.

3. Control equipment, including batteries, battery charging equipment, transformers, remote relay boards, and connections.

4. Conversion equipment, including transformers, indoor and outdoor, frequently changers, motor generator sets, rectifiers, synchronous converters, motors, cooling equipment, and associated connections.

5. Fences.

6. Fixed and synchronous condensers, including transformers, switching equipment, blowers, motors and connections.

7. Foundations and settings, specially constructed for and not expected to outlast the apparatus for which provided.

8. General station equipment, including air compressors, motors, hoists, cranes, test equipment, ventilating equipment, etc.

9. Platforms, railings, steps, gratings, etc., appurtenant to apparatus listed herein.

10. Primary and secondary voltage connections, including bus runs and supports, insulators, potheads, lightning arresters, cable and wire runs from and to outdoor connections or to manholes and the associated regulators, reactors, resistors, surge arresters, and accessory equipment.

11. Switchboards, including meters, relays, control wiring, etc.

12. Switching equipment, indoor and outdoor, including circuit breakers and operating mechanisms, truck switches, and disconnect switches.

13. Tools and appliances.

Note A: Office equipment, desks, chairs, etc., shall not be included herein but in account 391, Office Furniture and Equipment.

Note B: When a substantial item of equipment such as a transformer, a circuit breaker, or a rotary converter, which is readily identifiable by serial number or other distinguishing mark is removed from a station, and there is reasonable probability of its reuse, only the cost of installation and associated minor items shall be retired, but no retirement shall be made of the cost of the item itself. The cost of such equipment shall be carried in a separate subaccount.

Note C: When a transformer of 100 k.v.a. or less is rewound or otherwise substantially rebuilt, it shall be retired. The rebuilt unit shall be charged to electric plant at not more than the cost of a similar new unit as of the year of rebuilding and shall be recorded as of that year. The salvage credited to the accumulated provision for depreciation for the reused portions of the retired unit shall not exceed the difference between the cost of a new unit and the cost of rebuilding. Any excess expenditure over the amount includible in the electric plant account shall be charged to the maintenance account appropriate for the equipment. When a transformer of more than 100 k.v.a. is rebuilt, a retirement shall be made equal to the expenditure for rebuilding (but if the rebuilding cost exceeds the book cost, not more than the book cost shall be retired) and the full rebuilding cost shall be charged to electric plant as of the year when incurred. If the rebuilding increases the capacity of the unit, the amount to be retired as the computed cost of rebuilding shall be reduced by the excess of the costs actually incurred over the estimated cost of rebuilding without increasing the capacity.

354. Towers and Fixtures

This account shall include the cost installed of towers and appurtenant fixtures used for supporting overhead transmission conductors. (See electric plant instruction 168.14.)

ITEMS

1. Anchors, guys, braces.
2. Brackets.
3. Crossarms, including braces.
4. Excavation, backfill, and disposal of excess excavated material.
5. Foundations.
6. Guards.
7. Insulator pins and suspension bolts.
8. Ladders and steps.
9. Railings, etc.
10. Towers.

355. Poles and Fixtures

This account shall include the cost installed of transmission line poles, wood, steel, concrete, or other material, together with appurtenant fixtures used for supporting overhead transmission conductors. (See electric plant instruction 168.14.)

ITEMS

1. Anchors, head arm and other guys, including guy guards, guy clamps, strain insulators, pole plates, etc.
2. Brackets.
3. Crossarms and braces.
4. Excavation and backfill, including disposal of excess excavated material.
5. Extension arms.
6. Gaining, roofing, stenciling, and tagging.
7. Insulator pins and suspension bolts.
8. Paving.
9. Pole steps.
10. Poles, wood, steel, concrete, or other material.
11. Racks complete with insulators.
12. Reinforcing and stubbing.
13. Settings.
14. Shaving and painting.

Note: Accounting for the sale of part interest in a pole shall be by crediting the amount received against the gross additions when the sale is made within the calendar year in which the pole was installed; thereafter by treating the fractional interest in the pole sold as a retirement and the amount received as salvage. Records shall be maintained so as to identify retirements of this nature (showing dates installed and sold) separately from physical retirements of fractionally owned poles.

356. Overhead Conductors and Devices

This account shall include the cost installed of overhead conductors and devices used for transmission purposes. (See electric plant instruction 168.14.)

ITEMS

1. Circuit breakers.
2. Conductors, including insulated and bare wires and cables.
3. Ground wires and ground clamps.
4. Insulators, including pin, suspension, and other types.
5. Lightning arresters.
6. Switches.
7. Other line devices.

Note: Large switching or control stations containing equipment of the character listed under account 353, Station Equipment, shall be included in that account even though such equipment is used solely for switching or control and does not change the characteristics of electric energy.

357. Underground Conduit

This account shall include the cost installed of underground conduit and tunnels used for housing transmission cables or wires. (See electric plant instructions 168.10, subd. (i) and 168.14.)

ITEMS

1. Conduit, concrete, brick or tile, including iron pipe, fiber pipe, Murray duct, and standpipe on pole or tower.
2. Excavation, including shoring, bracing, bridging, backfill, and disposal of excess excavated material.
3. Foundations and settings specially constructed for and not expected to outlast the apparatus for which provided.
4. Lighting systems.
5. Manholes, concrete or brick, including iron or steel, frames and covers, hatchways, gratings, ladders, cable racks and hangers, etc., permanently attached to manholes.
6. Municipal inspection.
7. Pavement disturbed, including cutting and replacing pavement, pavement base and sidewalks.
8. Permits.
9. Protection of street openings.
10. Removal and relocation of subsurface obstructions.
11. Sewer connection, including drains, traps, tide valves, check valves, etc.
12. Sumps, including pumps.
13. Ventilating equipment.

358. Underground Conductors and Devices

This account shall include the cost installed of underground conductors and devices used for transmission purposes. (See electric plant instructions 168.10, subd. (i) and 168.14.)

ITEMS

1. Armored conductors, buried, including insulators, insulating materials, splices, potheads, trenching, etc.
2. Armored conductors, submarine, including insulators, insulating materials, splices in terminal chambers, potheads, etc.
3. Cables in standpipe, including pothead and connection from terminal chamber of manhole to insulators on pole.
4. Circuit breakers.
5. Fireproofing, in connection with any items listed herein.
6. Hollow core oil filled cable, including straight or stop joints, pressure tanks, auxiliary air tanks, feeding tanks, terminals, potheads and connections, ventilating equipment, etc.
7. Lead and fabric covered conductors, including insulators, compound filled, oil filled, or vacuum splices, potheads, etc.
8. Lightning arresters.
9. Municipal inspection.
10. Permits.
11. Protection of street openings.
12. Racking of cables.
13. Switches.
14. Other line devices.

Note: Large switching or control stations containing equipment of the character listed under account 353, Station Equipment, shall be included in that account even though such equipment is used solely for switching or control and does not change the characteristics of electric energy.

359. Roads and Trails

This account shall include the cost of roads, trails, and bridges used primarily as transmission facilities. (See electric plant instruction 168.14.)

ITEMS

1. Bridges, including foundation piers, girders, trusses, flooring, etc.
2. Clearing land.
3. Roads, including grading, surfacing, culverts, etc.
4. Structures, constructed and maintained in connection with items included herein.
5. Trails, including grading, surfacing, culverts, etc.

Note: The cost of temporary roads, bridges, etc., necessary during the period of construction but abandoned or dedicated to public use upon completion of the plant, shall be charged to the accounts appropriate for the construction.

4. DISTRIBUTION PLANT

360. Land and Land Rights

This account shall include the cost of land and land rights used in connection with distribution operations. (See electric plant instruction 168.7.)

Note: Do not include in this account the cost of permits to erect poles, towers, etc., or to trim trees. (See account 364, Poles, Towers and Fixtures, and account 365, Overhead Conductors and Devices.)

361. Structures and Improvements

This account shall include the cost in place of structures and improvements used in connection with distribution operations. (See electric plant instruction 168.8.)

362. Station Equipment

This account shall include the cost installed of station equipment, including transformer banks, etc., which are used for the purpose of changing the characteristics of electricity in connection with its distribution. (See electric plant instruction 168.14.)

ITEMS

1. Bus compartments, concrete, brick and sectional steel, including items permanently attached thereto.
2. Conduit, including concrete and iron duct runs not part of building.
3. Control equipment, including batteries, battery charging equipment, transformers, remote relay boards, and connections.
4. Conversion equipment, indoor and outdoor, frequency changers, motor generator sets, rectifiers, synchronous converters, motors, cooling equipment, and associated connections.
5. Fences.
6. Fixed and synchronous condensers, including transformers, switching equipment, blowers, motors, and connections.
7. Foundations and settings, specially constructed for and not expected to outlast the apparatus for which provided.
8. General station equipment, including air compressors, motors, hoists, cranes, test equipment, ventilating equipment, etc.
9. Platforms, railings, steps, gratings, etc., appurtenant to apparatus listed herein.
10. Primary and secondary voltage connections, including bus runs and

supports, insulators, potheads, lightning arresters, cable and wire runs from and to outdoor connections or to manholes and the associated regulators, reactors, resistors, surge arresters, and accessory equipment.

11. Switchboards, including meters, relays, control wiring, etc.

12. Switching equipment, indoor and outdoor, including circuit breakers and operating mechanisms, truck switches, disconnect switches.

Note A: The cost of rectifiers, series transformers, and other special station equipment devoted exclusively to street lighting service shall not be included in this account, but in account 373, Street Lighting and Signal Systems. Station meters may be included in account 370, Meters, when of a type subject to general use.

Note B: When a substantial item of equipment such as a transformer, a circuit breaker, or a rotary converter, which is readily identifiable by serial number or other distinguishing mark is removed from a station, and there is reasonable probability of its reuse, only the cost of installation and associated minor items shall be retired, but no retirement shall be made of the cost of the item itself. The cost of such equipment shall be carried in a separate subaccount.

Note C: Office equipment, desks, chairs, etc., shall not be included herein but in account 391, Office Furniture and Equipment.

Note D: When a transformer of 100 k.v.a. or less is rewound or otherwise substantially rebuilt, it shall be retired. The rebuilt unit shall be charged to electric plant at not more than the cost of a similar new unit as of the year of rebuilding and shall be recorded as of that year. The salvage credited to the accumulated provision for depreciation for the reused portions of the retired unit shall not exceed the difference between the cost of a new unit and the cost of rebuilding. Any excess expenditure over the amount includible in the electric plant account shall be charged to the maintenance account appropriate for the equipment. When a transformer of more than 100 k.v a. is rebuilt, a retirement shall be made equal to the expenditure for rebuilding (but if the rebuilding cost exceeds the book cost, not more than the book cost shall be retired) and the full rebuilding cost shall be charged to electric plant as of the year when incurred. If the rebuilding increases the capacity of the unit, the amount to be retired as the computed cost of rebuilding shall be reduced by the excess of the costs actually incurred over the estimated cost of rebuilding without increasing the capacity.

363. Storage Battery Equipment

This account shall include the cost installed of storage battery

equipment used for the purpose of supplying electricity to meet emergency or peak demands.

ITEMS

1. Batteries, including elements, tanks, tank insulators, etc.
2. Battery room connections, including cable or bus runs and connections.
3. Battery room flooring, when specially laid for supporting batteries.
4. Charging equipment, including motor generator sets and other charging equipment and connections, and cable runs from generator or station bus to battery room connections.
5. Miscellaneous equipment, including instruments, water stills, etc.
6. Switching equipment, including end-cell switches and connections, boards and panels, used exclusively for battery control, not part of general station switchboard.
7. Ventilating equipment, including fans and motors, louvers, and ducts not part of building.

Note A: Storage batteries used for control and general station purposes shall not be included in this account but in the account appropriate for their use.

Note B: Office equipment, desks, chairs, etc., shall not be included herein but in account 391, Office Furniture and Equipment.

364. Poles, Towers and Fixtures

This account shall include the cost installed of poles, towers, and appurtenant fixtures used for supporting overhead distribution conductors and service wires. (See electric plant instruction 168.14.)

ITEMS

1. Anchors, head arm, and other guys, including guy guards, guy clamps, strain insulators, pole plates, etc.
2. Brackets.
3. Crossarms and braces.
4. Excavation and backfill, including disposal of excess excavated material.
5. Extension arms.
6. Foundations.
7. Guards.
8. Insulator pins and suspension bolts.
9. Paving.
10. Permits for construction. (See note to electric plant instruction 168.7, subd. (d).)
11. Pole steps and ladders.

12. Poles, wood, steel, concrete, or other material.
13. Racks complete with insulators.
14. Railings.
15. Reinforcing and stubbing.
16. Settings.
17. Shaving, painting, gaining, roofing, stenciling, and tagging.
18. Towers.
19. Transformer racks and platforms.

Note: Accounting for the sale of part interest in a pole shall be by crediting the amount received against the gross additions when the sale is made within the calendar year in which the pole was installed; thereafter by treating the fractional interest in the pole sold as a retirement and the amount received as salvage. Records shall be maintained so as to identify retirements of this nature (showing dates installed and sold) separately from physical retirements of fractionally owned poles.

365. Overhead Conductors and Devices

A. This account shall include the cost installed of overhead conductors and devices used for distribution purposes. (See electric plant instruction 168.14.)

B. The records supporting this account shall be kept so that the utility can readily determine the number of feet of wire subdivided as follows:

- (1) Primary Alternating Current
- (2) Secondary Alternating Current
- (3) Direct Current

ITEMS

1. Circuit breakers.
2. Conductors, including insulated and bare wires and cables.
3. Ground wires, clamps, etc.
4. Insulators, including pin, suspension, and other types, and tie wire or clamps.
5. Lightning arresters.
6. Railroad and highway crossing guards.
7. Splices.
8. Switches.
9. Tree trimming, initial cost including the cost of permits therefor.
10. Other line devices.
11. Permits for construction. (See note to electric plant instruction 168.7, subd. (d).)

Note A: The cost of conductors and devices used solely for street

lighting or signal systems shall not be included in this account but in account 373, Street Lighting and Signal Systems.

Note B: "Primary" lines comprise cables, wires, and accessory line devices from the distribution center, generating station, or other point of origin of the distribution line to the line transformer or network transformer or to the service connections of high tension customers. "Secondary" lines comprise cables, wires, and accessory line devices from the line transformer or network transformer to the service connection leading to premises of customers.

Note C: The cost of protective devices, except network protectors, on distribution lines may be included wholly in either account 365, Overhead Conductors and Devices, 367, Underground Conductors and Devices, as appropriate, or wholly in account 368, Line Transformers; provided that each utility shall notify the commission of the accounting practice adopted, which shall be consistently followed for all such equipment. No change in such accounting practice shall be made without approval of the commission.

Note D: Large switching or control stations containing equipment of the character listed under account 362, Station Equipment, shall be included in that account even though such equipment is used solely for switching or control and does not change the characteristics of electric energy.

366. Underground Conduit

This account shall include the cost installed of underground conduit and tunnels used for housing distribution cables or wires. (See electric plant instructions 168.10, subd. (i) and 168.14.)

ITEMS

1. Conduit, concrete, brick and tile, including iron pipe, fiber pipe, Murray duct, and standpipe on pole or tower.
2. Excavation, including shoring, bracing, bridging, backfill, and disposal of excess excavated material.
3. Foundations and settings specially constructed for and not expected to outlast the apparatus for which constructed.
4. Lighting systems.
5. Manholes, concrete or brick, including iron or steel frames and covers, hatchways, gratings, ladders, cable racks and hangers, etc., permanently attached to manholes.
6. Municipal inspection.
7. Pavement disturbed, including cutting and replacing pavement, pavement base, and sidewalks.
8. Permits for construction. (See note to electric plant instruction

168.7, subd. (d).)

9. Protection of street openings.

10. Removal and relocation of subsurface obstructions.

11. Sewer connections, including drains, traps, tide valves, check valves, etc.

12. Sumps, including pumps.

13. Ventilating equipment.

Note A: The cost of underground conduit used solely for street lighting or signal systems shall be included in account 373, Street Lighting and Signal System.

Note B: The utility shall maintain maps or other records from which readily can be determined the following:

(1) Transmission

(2) Distribution

(3) Street lighting

(4) Other purposes

(5) Vacant

367. Underground Conductors and Devices

A. This account shall include the cost installed of underground conductors and devices used for distribution purposes. (See electric plant instructions 168.10, subd. (i) and 168.14.)

B. The records supporting this account shall be kept so that the utility can readily determine the number of feet of wire subdivided as follows:

(1) Primary Alternating Current

(2) Secondary Alternating Current

(3) Direct Current Feeders and Mains

(4) Edison Tube

ITEMS

1. Armored conductors, buried, including insulators, insulating materials, splices, potheads, trenching, etc.

2. Armored conductors, submarine, including insulators, insulating materials, splices in terminal chamber, potheads, etc.

3. Cables in standpipe, including pothead and connection from terminal chamber or manhole to insulators on pole.

4. Circuit breakers.

5. Fireproofing, in connection with any items listed herein.

6. Hollow core oil filled cable, including straight or stop joints, pressure tanks, auxiliary air tanks, feeding tanks, terminals, potheads and connections, etc.

7. Lead and fabric covered conductors, including insulators, compound

filled, oil filled or vacuum splices, potheads, etc.

8. Lightning arresters.

9. Municipal inspection.

10. Permits for construction. (See note to electric plant instruction 168.7. subd. (d).)

11. Protection of street openings.

12. Racking of cables.

13. Switches.

14. Other line devices.

Note A: The cost of underground conductors and devices used solely for street lighting or signal systems shall be included in account 373, Street Lighting and Signal Systems.

Note B: "Primary" lines comprise cables, wires, and accessory line devices from the distribution center, generating station, or other point of origin of the distribution line to the line transformer or network transformer or to the service connections of high tension customers. "Secondary" lines comprise cables, wires, and accessory line devices from the line transformer or network transformer to the service connection leading to premises of customers.

Note C: The cost of protective devices, except network protectors, on distribution lines may be included wholly in either account 365, Overhead Conductors and Devices, 367, Underground Conductors and Devices, as appropriate, or wholly in account 368, Line Transformers; provided that each utility shall notify the commission of the accounting practice adopted, which shall be consistently followed for all such equipment. No change in such accounting practice shall be made without approval of the commission.

Note D: Large switching or control stations containing equipment of the character listed under account 362, Station Equipment, shall be included in that account even though such equipment is used solely for switching or control and does not change the characteristics of electric energy.

368. Line Transformers

A. This account shall include the cost of overhead and underground distribution line transformers, pole-type and underground voltage regulators, and network protectors owned by the utility, for use in transforming electric energy to secondary voltages (i.e., voltages, usually 660 volts or less, at which the energy is ordinarily supplied to low tension customers), whether actually in service or held in reserve, also the cost of auto, phase changing, and sign lighting transformers for use in connection with service connections to customers' premises.

This account shall include the cost of labor employed, materials used and expenses incurred in connection with the first installation of line transformers, voltage regulators, etc., the cost of which is included in this account.

B. When a line transformer or other retirement unit is permanently retired from service, the cost thereof and the cost of its installation included herein shall be credited to this account.

C. The records covering line transformers shall be so kept that the utility can furnish the number of transformers of various capacities in service, those in reserve, the location and the use of each transformer, and whether underground or overhead.

D. In respect to installation costs, this account may be subdivided into two subaccounts: subdivision 1 to include the labor, transportation and other components of cost (see electric plant instruction 168.3) applicable thereto involved in placing the transformers, network protectors, voltage regulators or other items included herein; subdivision 2 to include the cost installed of associated items of equipment includible in this account such as lightning arresters, cutouts, grounds, wiring and other permanent attachments. When this is done, the entire amount included in subdivision 2 at a location shall be considered one or more retirement units to be retired only when a complete retirement unit is removed or the location abandoned.

ITEMS

1. Ground wires.
2. Installation, labor of (first installation only).
3. Network protectors.
4. Transformer cut-out boxes, installed (first set).
5. Transformer lightning arresters, installed (first set).
6. Transformers, line and network.
7. Voltage regulators.

Note A: The cost of removing and resetting line transformers shall not be charged to this account but to account 583, Overhead Line Expenses or account 584, Underground Line Expenses, as appropriate. These accounts shall be credited with the salvage recovered from minor items when a line transformer is removed from service but not permanently retired.

Note B: Do not include in this account transformers of a type for use exclusively in connection with street lighting and signal systems. (See account 373, Street Lighting and Signal Systems.)

Note C: When a line transformer of 100 k.v.a. or less is rewound or otherwise substantially rebuilt, it shall be retired. The rebuilt unit shall be charged to electric plant at not more than the cost of a

similar new unit as of the year of rebuilding and shall be recorded as of that year. The salvage credited to the accumulated provision for depreciation for the reused portions of the retired unit shall not exceed the difference between the cost of a new unit and the cost of rebuilding. Any excess expenditure over the amount includible in the electric plant account shall be charged to the maintenance account appropriate for the equipment. When a line transformer of more than 100 k.v.a. is rebuilt, a retirement shall be made equal to the expenditure for rebuilding (but if the rebuilding cost exceeds the book cost, not more than the book cost shall be retired) and the full rebuilding cost shall be charged to electric plant as of the year when incurred. If the rebuilding increases the capacity of the unit, the amount to be retired as the computed cost of rebuilding shall be reduced by the excess of the cost actually incurred over the estimated cost of rebuilding without increasing the capacity.

Note D: Minor items shall be included in this account only when in service or associated with a unit of property held in reserve; otherwise they shall be carried in account 150.154, Plant Materials and Operating Supplies.

Note E: The cost of protective devices, except network protectors, on distribution lines may be included wholly in either account 365, Overhead Conductors and Devices, 367, Underground Conductors and Devices, as appropriate, or wholly in this account; provided that each utility shall notify the commission of the accounting practice adopted, which shall be consistently followed for all such equipment.

Note F: All labor and other cost incurred in installing and removing transformers, voltage regulators, network protectors, etc., in connection with first installations, permanent removals, reinstallations, relocations, etc., of line transformers may be charged initially to an appropriate suspense account. The amount includible in this account for first installations (which may be determined on the basis of estimated unit costs) shall be charged monthly to this account, for transformers installed during the month, and concurrently credited to the suspense account to which the costs were charged initially. The balance in the suspense account shall then be cleared to account 583, Overhead Line Expenses or account 584, Underground Line Expenses, as appropriate.

Note G: The cost installed of transformers of small capacity, such as fractional k.v.a. types, for which the foregoing accounting requirements are burdensome, may be included, either as minor items or as retirement units, in the account which is charged with the cost of the equipment

with which the transformers are associated.

369. Services

This account shall include the cost installed of overhead and underground conductors leading from a point where wires leave the last pole of the overhead system or the distribution box or manhole, or the top of the pole of the distribution line, to the point of connection with the customer's outlet or wiring. Conduit used for underground service conductors shall be included herein. (See electric plant instruction 168.10, subd. (i).)

ITEMS

1. Brackets.
2. Cables and wires.
3. Conduit.
4. Insulators.
5. Municipal inspection.
6. Overhead to underground, including conduit or standpipe and conductor from last splice on pole to connection with customer's wiring.
7. Pavement disturbed, including cutting and replacing pavement, pavement base, and sidewalks.
8. Permits.
9. Protection of street openings.
10. Service switch.
11. Suspension wire.

Note A: When a line transformer is located on private property, the conductors on the high side thereof shall be included in this account only when the transformer is installed for the exclusive use of the individual customer.

Note B: When one or more conductors are added to an existing service, the original service shall not be retired.

370. Meters

A. This account shall include the cost of meters, devices and appurtenances attached thereto, for use in measuring the electricity delivered to its users, whether actually in service or held in reserve; this account shall also include the cost of labor employed, materials used, and expenses incurred in connection with the first installation of meters, devices and appurtenances attached thereto.

B. When a meter is permanently retired from service, the amount at which it is included herein and the cost of its installation included herein shall be credited to this account and concurrently charged to the appropriate related accumulated provisions for depreciation.

ITEMS

1. Alternating current watthour meters.
2. Current limiting devices.
3. Demand indicators.
4. Demand meters.
5. Direct current watthour meters.
6. Graphic demand meters.
7. Installation, labor of (first installation only).
8. Instrument transformers.
9. Maximum demand meters.
10. Meter badges and their attachments.
11. Meter boards and boxes.
12. Meter fittings, connections, and shelves (first set).
13. Meter switches and cut-outs.
14. Prepayment meters.
15. Protective devices.
16. Testing new meters.

Note A: This account shall not include meters for recording the output of a generating station or a transmission substation. It includes only those meters to record the energy delivered to customers, including company use, and for use elsewhere on the distribution system if of a type available for general use.

Note B: The cost of removing and resetting meters shall be charged to account 586, Meter Expenses, to which account shall be credited the salvage recovered from minor items when a meter is removed from service but not permanently retired.

Note C: The utility shall maintain a statistical record to show separately the number of each type and size of meter or group of types and sizes as carried in the continuing property record. Underlying records shall be kept so that the utility can determine readily for each such classification the number of meters in service (subdivided between active and cut-out) and the number of meters carried herein but not in service, the latter to include meters undergoing repairs.

Note D: Minor items shall be included in this account only when in service or associated with a unit of property held in reserve; otherwise they shall be carried in account 150.154, Plant Materials and Operating Supplies.

Note E: When a demand register or attachment is attached to or removed from a watthour meter, no retirement shall be made unless the item (i.e., meter, demand register or attachment) is permanently retired from service. The cost of labor and minor items used in attaching or detaching demand devices, and also the cost of making test after

conversion is completed, shall be debited to account 597, Maintenance of Meters. Minor items removed in making the conversion shall be credited to account 597, Maintenance of Meters, at the amount at which they are charged to account 150.154, Plant Materials and Operating Supplies.

Note F: Charges made to customers for connection, disconnection or reconnection of meters shall be credited to account 451, Miscellaneous Service Revenues.

371. Installations on Customers' Premises

This account shall include the cost installed of equipment on the customer's side of a meter when the utility incurs such cost and when the utility retains title to and assumes full responsibility for maintenance and replacement of such property. This account shall not include leased equipment, for which see account 372, Leased Property on Customers' Premises.

ITEMS

1. Cable vaults.
2. Commercial lamp equipment.
3. Foundations and settings specially provided for equipment included herein.
4. Frequency changer sets.
5. Motor generator sets.
6. Motors.
7. Switchboard panels, high and low tension.
8. Wire and cable connections to incoming cables.

Note A: Do not include in this account any costs incurred in connection with merchandising, jobbing or contract work activities.

Note B: It is intended that only equipment used in furnishing special service or service of a character different from that normally supplied shall be included in this account, but not equipment of a different size or type when such difference is due merely to the size of the installation.

372. Leased property on Customers' Premises

This account shall include the cost of electric motors, transformers, and other equipment on customers' premises (including municipal corporations) leased or loaned to customers, but not including property held for sale.

Note A: The cost of setting and connecting such appliances or equipment on the premises of customers and the cost of resetting or removal shall not be charged to this account but to operating expense account 587, Customer Installations Expenses.

Note B: Do not include in this account any costs incurred in

connection with merchandising, jobbing or contract work activities.

373. Street Lighting and Signal Systems

This account shall include the cost installed of equipment used wholly for public street and highway lighting or traffic, fire alarm, police, and other signal systems. (See electric plant instruction 168.10, subd.

(i).)

ITEMS

1. Armored conductors, buried or submarine, including insulators, insulating materials, splices, trenching, etc.

2. Automatic control equipment.

3. Conductors, overhead or underground, including lead or fabric covered, parkway cables, etc. including splices, insulators, etc.

3a. Conduit runs used solely for street lighting or signal systems, not including ducts in a bank part of which is used or held for use for other purposes.

4. Lamps, arc, incandescent, or other types, including glassware, suspension fixtures, brackets, etc.

5. Municipal inspection.

6. Ornamental lamp posts.

7. Pavement disturbed, including cutting and replacing pavement, pavement base, and sidewalks.

8. Permits.

9. Posts and standards.

10. Protection of street openings.

11. Relays or time clocks.

12. Series contactors.

13. Switches.

14. Transformers, pole or underground.

15. Transformers, rectifiers, and other special station equipment devoted exclusively to street lighting and signal systems. (See note C below.)

16. Service connections, including conduit and conductors. (See note C below.)

Note A: This account shall not include poles available for supporting distribution conductors. Line transformers and meters of types which can be used for general customers may be carried in accounts 368 and 370 even though in street lighting or signal system service.

Note B: When a substantial item of equipment such as a transformer or regulator, which is readily identifiable by serial number or other distinguishing mark is removed from service and there is reasonable probability of its reuse, only the cost of installation and associated

minor items shall be retired, but no retirement shall be made of the cost of the item itself. The cost of such equipment shall be carried in a separate subaccount.

Note C: The cost of transformers, rectifiers, and other equipment located at stations and devoted exclusively to street lighting or signal system service may be included in the account for station equipment provided such equipment is so recorded and noted in the continuing property record that it can be identified and its original cost readily determined; otherwise such equipment shall be included in this account.

5. GENERAL PLANT

389. Land and Land Rights

This account shall include the cost of land and land rights used for electric plant purposes, the cost of which is not properly includible in other land and land rights accounts. (See electric plant instruction 168.7.)

390. Structures and Improvements

This account shall include the cost in place of structures and improvements used for electric plant purposes, the cost of which is not properly includible in other structures and improvements accounts. (See electric plant instruction 168.8.)

391. Office Furniture and Equipment

A. This account shall include the cost installed of all office furniture and equipment owned by the utility and devoted to electric service, and not permanently attached to buildings. Articles of slight value or short service life acquired subsequent to the commencement of operations shall be charged to the appropriate operating expense account and not to this account. (See note to electric plant instruction 168.3, (a) (3).)

B. If the utility has equipment includible in this account at more than one location, separate records shall be maintained for each location.

ITEMS

1. Book cases and shelves.
2. Desks, chairs, and desk equipment.
3. Drafting room equipment.
4. Electronic data processing equipment.
5. Filing, storage, and other cabinets.
6. Floor covering.
7. Library and library equipment.
8. Mechanical office equipment such as accounting machines, typewriters, etc.

9. Safes.
10. Showcases and equipment for display of merchandise.
11. Signs, display and advertising.
12. Tables.

392. Transportation Equipment

This account shall include the cost of transportation vehicles used for utility purposes.

ITEMS

1. Airplanes.
2. Automobiles.
3. Bicycles.
4. Electrical vehicles.
5. Motor trucks.
6. Motorcycles.
7. Repair cars or trucks.
8. Tractors and trailers.
9. Other transportation vehicles.

Note: Compressors, hoists, concrete mixers, etc., so mounted on a vehicle that they can be removed readily, thereby making the vehicle available for transportation of other material or equipment, shall be included in account 394, Tools, Shop and Garage Equipment, and the vehicle shall be included in this account; minor incidental equipment, such as pumps for drying manholes or tool racks and boxes which interfere little with the use of the vehicle for other transportation, shall, together with the vehicle, be included in this account.

393. Stores Equipment

A. This account shall include the cost installed of equipment used for the receiving, shipping, handling, and storage of materials and supplies when not an integral part of the housing structure. (See note to electric plant instruction 168.3, (a) (3).)

B. If the utility has equipment includible in this account at more than one location, separate records shall be maintained for each location.

ITEMS

1. Chain falls.
2. Counters.
3. Cranes (portable).
4. Elevating and stacking equipment (portable).
5. Hoists.
6. Lockers.
7. Scales.

8. Shelving.
9. Storage bins.
10. Trucks, hand and power driven.
11. Wheelbarrows.

394. Tools, Shop and Garage Equipment

A. This account shall include the cost of tools, implements, and equipment used in construction, repair work, general shops and garages and not specifically provided for or includible in other accounts. (See note to electric plant instruction 168.3, (a) (3).)

B. If the utility has equipment includible in this account at more than one location, separate records shall be maintained for each location.

C. The records shall be maintained in such manner as to show the items of garage equipment in a separate subdivision of this account.

ITEMS

1. Air compressors.
2. Anvils.
3. Automobile repair shop equipment.
4. Battery charging equipment.
5. Belts, shafts and countershafts.
6. Boilers.
7. Cable pulling equipment.
8. Concrete mixers.
9. Derricks.
10. Drill presses.
11. Electric equipment.
12. Engines.
13. Forges.
14. Foundations and settings specially constructed for equipment in this account and not expected to outlast the equipment for which provided.
15. Furnaces.
16. Gas producers.
17. Gasoline pumps, oil pumps and storage tanks.
18. Greasing tools and equipment.
19. Hoists.
20. Ladders.
21. Lathes.
22. Machine tools.
23. Motor driven tools.
24. Motors.

25. Pipe threading and cutting tools*.

* So in original. "tools" should be "tools".

26. Pneumatic tools.

27. Pumps.

28. Riveters.

29. Smithing equipment.

30. Tool racks.

31. Vises.

32. Welding apparatus.

33. Work benches.

Note: Office equipment, desks, chairs, etc., shall not be included herein but in account 391, Office Furniture and Equipment.

395. Laboratory Equipment

A. This account shall include the cost installed of laboratory equipment used for general laboratory purposes and not specially provided for or includible in other departmental or functional plant accounts. (See note to electric plant instruction 168.3, (a) (3).)

B. If the utility has equipment includible in this account at more than one location, separate records shall be maintained for each location.

ITEMS

1. Ammeters.

2. Current batteries.

3. Frequency changers.

4. Galvanometers.

5. Inductometers.

6. Laboratory standard millivolt meters.

7. Laboratory standard volt meters.

8. Meter-testing equipment.

9. Millivolt meters.

10. Motor generator sets.

11. Panels.

12. Phantom loads.

13. Portable graphic ammeters, voltmeters, and wattmeters.

14. Portable loading devices.

15. Potential batteries.

16. Potentiometers.

17. Rotating standards.

18. Standard cell, reactance, resistor, and shunt.

19. Switchboards.

20. Synchronous timers.

21. Testing panels.
22. Testing resistors.
23. Transformers.
24. Voltmeters.
25. Other testing, laboratory, or research equipment not provided for elsewhere.

Note: Office equipment, desks, chairs, etc., shall not be included herein but in account 391, Office Furniture and Equipment.

396. Power Operated Equipment

This account shall include the cost of power operated equipment used in construction or repair work exclusive of equipment includible in other accounts. Include, also, the tools and accessories acquired for use with such equipment and the vehicle on which such equipment is mounted.

ITEMS

1. Air compressors, including driving unit and vehicle.
2. Back filling machines.
3. Boring machines.
4. Bulldozers.
5. Cranes and hoists.
6. Diggers.
7. Engines.
8. Pile drivers.
9. Pipe cleaning machines.
10. Pipe coating or wrapping machines.
11. Tractors--crawler type.
12. Trenchers.
13. Other power operated equipment.

Note: It is intended that this account include only such large units as are generally self-propelled or mounted on moveable equipment.

397. Communication Equipment

This account shall include the cost installed of telephone, telegraph and wireless equipment for general use in connection with the utility's electric operations.

ITEMS

1. Carrier terminal equipment including repeaters, power supply equipment, transmitting and receiving sets.
2. Microwave equipment, including power supply equipment, transmitters, amplifiers, paraboloids, towers, reflectors, receiving equipment, etc.
3. Radio equipment, fixed and mobile, including antenna, power

equipment, transmitters and receivers, and portable receiver-transmitter units.

4. Telephone equipment including switchboards, power and testing equipment, conductors, pole lines, etc.

398. Miscellaneous Equipment

This account shall include the cost of equipment, apparatus, etc., used and useful in electric operations, which is not includible in any other account. (See note to electric plant instruction 168.3, (a) (3).)

ITEMS

1. Hospital and infirmary equipment.
2. Kitchen equipment.
3. Operator's cottage furnishings.
4. Radios.
5. Recreation equipment.
6. Restaurant equipment.
7. Soda fountains.
8. Other miscellaneous equipment.

Note: Miscellaneous equipment of the nature indicated above wherever practicable shall be assigned to the utility plant accounts on a functional basis.

399. Other Tangible Property

A. This account shall include the cost of tangible electric plant not provided for elsewhere.

B. A separate subdivision of this account shall be maintained for each class of property in which the utility has a relatively large investment, and records shall be kept so as to show separately the cost of each major item.

Net Income

1. UTILITY OPERATING INCOME

400. Operating Revenues

There shall be shown under this caption the total amount included in the electric operating revenue accounts provided herein.

401. Operation Expense

There shall be shown under this caption the total amount included in the electric operation expense accounts provided herein.

402. Maintenance Expense

There shall be shown under this caption the total amount included in the electric maintenance expense accounts provided herein.

402.1 Joint Expense

There shall be shown under this caption the total amount included in the electric joint expense accounts provided herein.

403. Depreciation Expense

A. This account shall include the amount of depreciation expense for all classes of depreciable electric plant in service and on the portion of depreciable common utility plant in service applicable to electric operations, except such depreciation expense as is chargeable to account 416, Costs and Expenses of Merchandising, Jobbing and Contract Work, and to clearing accounts.

B. The utility shall keep such records of property and property retirements as will reflect the service life of property which has been retired and aid in estimating probable service life by mortality, turnover, or other appropriate methods; and also such records as will reflect the percentage of salvage and cost of removal for property retired from each account, or subdivision thereof, for depreciable utility plant.

Note A: Depreciation expense applicable to property included in account 104, Electric Plant Leased to Others, shall be charged to account 413, Expenses of Electric Plant Leased to Others.

Note B: Depreciation expense applicable to transportation equipment, shop equipment, tools, work equipment, power operated equipment and other general equipment may be charged to clearing accounts as necessary in order to obtain a proper distribution of expenses between construction and operation.

Note C: Depreciation expense applicable to transportation equipment used for transportation of fuel from the point of acquisition to the unloading point shall be charged to account 150.151 Fuel Stock.

404. Amortization of Limited-term Electric Plant

This account shall include amortization charges applicable to amounts included in the electric plant accounts for limited-term franchises, licenses, patent rights, limited-term interests in land, and expenditures on leased property where the service life of the improvements is terminable by action of the lease. The charges to this account shall be such as to distribute the book cost of each investment as evenly as may be over the period of its benefit to the utility. (See account 111, Accumulated Provision for Amortization of Electric Plant in Service.)

405. Amortization of Other Electric Plant

A. When authorized by the commission, this account shall include charges for amortization of intangible or other utility plant in service which does not have a definite or terminable life and which is not subject to charges for depreciation expense.

B. This account shall be supported in such detail as to show the amortization applicable to each investment being amortized, together with the book cost of the investment and the period over which it is being written off.

406. Amortization of Electric Plant Acquisition Adjustments

This account shall be debited or credited, as the case may be, with amounts includible in operating expenses, pursuant to approval or order of the commission, for the purpose of providing for the extinguishment of the amounts in account 114, Electric Plant Acquisition Adjustment, and in the appropriate subdivision of account 118.1, Common Utility Plant. (See balance sheet account 114, Electric Plant Acquisition Adjustments, paragraph C.)

407. Amortization of Property Losses

This account shall be charged with amounts credited to account 182, Extraordinary Property Losses, when the commission has authorized the

amount in the latter account to be amortized by charges to electric operating expenses.

Special Instructions
Accounts 408.1 and 408.2

A. These accounts shall include the amounts of ad valorem, gross revenue or gross receipts taxes, State unemployment insurance, franchise taxes, Federal excise taxes, social security taxes and all other taxes assessed by Federal, State, county, municipal or other local governmental authorities except Federal income taxes.

B. These accounts shall be charged in each accounting period with the amounts of taxes which are applicable thereto, with concurrent credits to account 236, Taxes Accrued, or account 165, Prepayments, as appropriate. When it is not possible to determine the exact amounts of taxes, the amounts shall be estimated and adjustments made in current accruals as the actual tax levies become known.

C. The charges to these accounts shall be made or supported so as to show the amount of each tax and the basis upon which each charge is made. In the case of a utility rendering more than one utility service, taxes of the kind includible in these accounts shall be assigned directly to the utility department the operation of which gave rise to the tax insofar as practicable. Where the tax is not attributable to a specific utility department, it shall be distributed among the utility departments or nonutility operations on an equitable basis, after appropriate study to determine such basis.

Note A: Special assessments for street and similar improvements shall be included in the appropriate utility plant or non-utility property account.

Note B: Taxes specifically applicable to construction shall be included in the cost of construction.

Note C: Gasoline and other sales taxes shall be charged as far as practicable to the same account as the materials on which the tax is levied.

Note D: Social security and other forms of so-called payroll taxes shall be distributed to utility departments and to nonutility functions on a basis related to payroll. Amounts applicable to construction shall be charged to the appropriate plant account.

Note E: Interest on tax refunds or deficiencies shall not be included in this account but in account 419, Interest and Dividend Income or 431, Other Interest Expense, as appropriate.

Note F: Taxes assumed by the utility on property leased from others for use in utility operations shall be charged to the appropriate rent

expense or clearing account.

Note G: Taxes characterized as franchise taxes levied by taxing authorities against the utility for the privilege of exercising its corporate franchise or carrying on its business in such corporate or organized capacity shall be included in this account.

Note H: Amounts payable annually or more frequently under the terms of franchises, shall be included in account 927, Franchise Requirements.

Note I: Taxes assumed by the utility on interest paid to holders of utility's bonds or other indebtedness in respect to income and other taxes levied against such income of security holders, shall be charged to account 431, Other Interest Expense.

Note J: Ad valorem taxes on utility-owned transportation equipment used to transport fuel from the point of acquisition to the unloading point shall be charged to account 150.151, Fuel Stock.

408.1. Taxes Other Than Income Taxes, Utility Operating Income

This account shall include those taxes other than income taxes which relate to utility operating income. This account shall be maintained so as to allow ready identification of the various classes of taxes relating to Utility Operating Income (by department), Utility Plant Leased to Others and Other Utility Operating Income.

408.2. Taxes Other Than Income Taxes, Other Income and Deductions

This account shall include those taxes other than income taxes which relate to Other Income and Deductions.

Special Instructions

Accounts 409.1, 409.2 and 409.3

A. These accounts shall include the amounts of Federal income taxes on income properly accruable during the period covered by the income statement to meet the actual liability for such taxes. Concurrent credits for the tax accrual shall be made to account 236, Taxes Accrued, and as the exact amounts of taxes become known, the current tax accruals shall be adjusted by charges or credits to these accounts, unless such adjustments are properly includible in account 439, Adjustments to Retained Earnings, so that these accounts as nearly as can be ascertained shall include the actual taxes payable by the utility. (See general instruction 166.7(b) for prior period adjustments.)

B. The accruals for income taxes shall be apportioned among utility departments and to Other Income and Deductions so that, as nearly as practicable, each tax shall be included in the expenses of the utility department or Other Income and Deductions, the income from which gave rise to the tax. The income tax effect of amounts recorded in account 439, Adjustments to Retained Earnings shall be recorded in that account.

The tax effect relating to interest charges shall be allocated between utility and nonutility operations. The basis for this allocation shall be the ratio of net investment in utility plant (including amounts in account 106, Completed Construction not Classified--Electric and account 107, Construction Work in Progress--Electric) to net investment in nonutility plant.

409.1. Income Taxes, Utility Operating Income

This account shall include the amount of those Federal income taxes which relate to utility operating income. This account shall be maintained so as to allow ready identification of tax effects (both positive and negative) relating to Utility Operating Income (by department), Utility Plant Leased to Others and Other Utility Operating Income.

409.2. Income Taxes, Other Income and Deductions

This account shall include the amount of those Federal income taxes both (positive and negative) which relate to Other Income and Deductions.

409.3. Income Taxes, Extraordinary Items

This account shall include the amount of those Federal income taxes (both positive and negative) which relate to Extraordinary Items.

Special Instructions

Accounts 410.1, 410.2, 411.1 and 411.2

A. Accounts 410.1 and 410.2 shall be debited, and Accumulated Deferred Income Taxes shall be credited, with amounts equal to any current deferrals of taxes on income or any allocations of deferred taxes originating in prior periods, as provided by the texts of accounts 190, 281, 282 and 283. There shall not be netted against entries required to be made to these accounts any credit amounts appropriately includible in account 411.1 or 411.2.

B. Accounts 411.1 and 411.2 shall be credited, and Accumulated Deferred Income Taxes shall be debited with amounts equal to any allocations of deferred taxes originating in prior periods or any current deferrals of taxes on income, as provided by the texts of accounts 190, 281, 282 and 283. There shall not be netted against entries required to be made to these accounts any debit amounts appropriately includible in account 410.1 or 410.2.

410.1. Provision for Deferred Income Taxes, Utility Operating Income

This account shall include the amounts of those deferrals of taxes and allocations of deferred taxes, which relate to Utility Operating Income (by department).

410.2. Provision for Deferred Income Taxes, Other Income and Deductions

This account shall include the amounts of those deferrals of taxes and allocations of deferred taxes which relate to Other Income and Deductions.

411.1. Provision for Deferred Income Taxes--Credit, Utility Operating Income

This account shall include the amounts of those allocations of deferred taxes and deferrals of taxes, credit, which relate to Utility Operating Income (by department).

411.2. Provision for Deferred Income Taxes--Credit, Other Income and Deductions

This account shall include the amounts of those allocations of deferred taxes and deferrals of taxes, credit, which relate to Other Income and Deductions.

Special Instructions
Accounts 411.4 and 411.5

A. These accounts shall be debited and account 255, Accumulated Deferral Investment Tax Credits shall be credited with the total amount of investment tax credits allowed on property defined in section 50 of the Internal Revenue Code of 1954 which the utility used in the calculation of reported current year's income taxes charged to accounts 409.1, Income Taxes, Utility Operating Income, and 409.2, Income Taxes, Other Income and Deductions, as appropriate, when the utility elects to defer such credits.

B. Account 411.4 shall be debited and account 420, Investment Tax Credits shall be credited with one-half (or such other portion as determined by the commission in the utility's most recent rate case) of the total amount of investment tax credits allowed on property defined in section 50 of the Internal Revenue Code of 1954 which the utility used in the calculation of reported current year's income taxes charged to account 409.1, Income Taxes, Utility Operating Income, when the utility's accounting does not provide for the deferral of such tax credits, and all benefits of the tax credits are to be recognized in the current income statement as realized.

C. When a utility has deferred investment tax credits and when such credits are to be applied as a reduction of the cost of service, account 411.4 shall be credited and account 255 shall be debited with a proportionate amount of such credits determined in relation to the book service life of the property to which they relate. If, however, the deferred tax credits are applied as a reduction of the rate base, account 420, Investment Tax Credits, shall be used in similar manner. Deferred investment tax credits related to nonutility property shall be

amortized by crediting account 411.5 and debiting account 255 with a proportionate amount as determined above.

411.4. Investment Tax Credit Adjustments, Utility Operations

This account shall include the amount of those investment tax credit adjustments related to property used in Utility Operations (by department).

411.5. Investment Tax Credit Adjustments, Nonutility Operations

This account shall include the amount of those investment tax credit adjustments related to property used in Nonutility Operations.

411.6. Gains from Disposition of Utility Plant

This account shall include, as approved by the commission, amounts relating to gains from the disposition of future use utility plant including amounts which were previously recorded in and transferred from account 105, Electric Plant Held for Future Use, under the provisions of paragraphs B, C, and D thereof. Income taxes relating to gains recorded in this account shall be recorded in account 409.1, Income Taxes, Utility Operating Income.

411.7. Losses from Disposition of Utility Plant

This account shall include, as approved by the commission, amounts relating to losses from the disposition of future use utility plant including amounts which were previously recorded in and transferred from account 105, Electric Plant Held for Future Use, under the provisions of paragraphs B, C, and D thereof. Income taxes relating to losses recorded in this account shall be recorded in account 409.1, Income Taxes, Utility Operating Income.

411.8. Miscellaneous Adjustments of Income Taxes--Utility Operating Income

This account shall include adjustments of prior years Federal income tax related to utility operations. (See § 166.7) This account shall also be used for other tax adjustments which the commission may authorize or direct to be recorded herein.

412. Revenues from Electric Plant Leased to Others

413. Expenses of Electric Plant Leased to Others

A. These accounts shall include respectively, revenues from electric property constituting a distinct operating unit or system leased by the utility to others, and which property is properly includible in account 104, Electric Plant Leased to Others, and the expenses attributed to such property.

B. The detail of expenses shall be kept or supported so as to show separately the following:

Operation.

Maintenance.

Depreciation.

Amortization.

Note: Related taxes shall be recorded in account 408.1, Taxes Other Than Income Taxes, Utility Operating Income, or account 409.1, Income Taxes, Utility Operating Income, as appropriate.

414. Other Utility Operating Income

A. This account shall include the revenues received and expenses incurred in connection with the operations of utility plant, the book cost of which is included in account 118.2, Other Utility Plant.

B. The expenses shall include every element of cost incurred in such operations, including depreciation, rents, insurance, and taxes (except income taxes).

Note A: Related taxes shall be recorded in account 408.1, Taxes Other Than Income Taxes, Utility Operating Income, or account 409.1, Income Taxes, Utility Operating Income, as appropriate.

Note B: In the case of utility services for which systems of accounts are prescribed by this commission, such as gas, steam, etc., the appropriate accounts in such systems shall be used instead of this account.

2. OTHER INCOME

415. Revenues from Merchandising, Jobbing and Contract Work

416. Costs and Expenses of Merchandising, Jobbing, and Contract Work

A. These accounts shall include respectively all revenues derived from the sale of merchandise and jobbing or contract work, including any profit or commission accruing to the utility on jobbing work performed by it as agent under contracts whereby it does jobbing work for another for a stipulated profit or commission and all expense incurred in such activities.

B. Records in support of these accounts shall be so kept as to permit ready summarization of revenues, costs and expenses by such major items as are feasible.

ITEMS

Account 415:

1. Revenues from sale of merchandise and from jobbing and contract work.

2. Discounts and allowances made in settlement of bills for merchandise and jobbing work.

Account 416:

Labor:

1. Canvassing and demonstrating appliances in homes and other places

for the purpose of selling appliances.

2. Demonstrating and selling activities in sales rooms.
3. Installing appliances on customer premises where such work is done only for purchasers of appliances from the utility.
4. Installing wiring, pipe, or other property work on a jobbing or contract basis.
5. Preparing advertising materials for appliance sales purposes.
6. Receiving and handling customer orders for merchandise or for jobbing services.
7. Cleaning and tidying sales rooms.
8. Maintaining display counters and other equipment used in merchandising.
9. Arranging merchandise in sales rooms and decorating display windows.
10. Reconditioning repossessed appliances.
11. Bookkeeping and other clerical work in connection with merchandise and jobbing activities.
12. Supervising merchandise and jobbing operations.

Materials and Expenses:

13. Advertising in newspapers, periodicals, radio, television, etc.
14. Cost of merchandise sold and of materials used in jobbing work.
15. Stores expenses on merchandise and jobbing stock.
16. Fees and expenses of advertising and commercial artists' agencies.
17. Printing booklets, dodgers, and other advertising data.
18. Premiums given as inducement to buy appliances.
19. Light, heat, and power.
20. Depreciation of equipment used primarily for merchandise and jobbing operations.
21. Rent of sales rooms or of equipment.
22. Transportation expense in delivery and pickup of appliances by utility's facilities or by others.
23. Stationery and office supplies and expenses.
24. Losses from uncollectible merchandise and jobbing accounts.

Note: Related taxes shall be recorded in account 408.2, Taxes Other Than Income Taxes, Other Income and Deductions, or account 409.2, Income Taxes, Other Income and Deductions, as appropriate.

417. Revenues from Nonutility Operations

417.1. Expenses of Nonutility Operations

A. These accounts shall include revenues and expenses applicable to operations which are nonutility in character but nevertheless constitute a distinct operating activity of the enterprise as a whole, such as the

operation of an ice department or the operation of a servicing organization for furnishing supervision, management, engineering, and similar services to others.

B. The expenses shall include all elements of costs incurred in such operations, and the accounts shall be maintained so as to permit ready summarization as follows:

Operation.

Maintenance.

Rents.

Depreciation.

Amortization.

Note: Related taxes shall be recorded in account 408.2, Taxes Other Than Income Taxes, Other Income and Deductions, or account 409.2, Income Taxes, Other Income and Deductions, as appropriate.

418. Nonoperating Rental Income

A. This account shall include all rent revenues and related expenses of land, buildings, or other property included in account 121, Nonutility Property, which is not used in operations covered by accounts 417 or 417.1.

B. The expenses shall include all elements of costs incurred in the ownership and rental of property and the accounts shall be maintained so as to permit ready summarization as follows:

Operation.

Maintenance.

Rents.

Depreciation.

Amortization.

Note: Related taxes shall be recorded in account 408.2, Taxes Other Than Income Taxes, Other Income and Deductions, or account 409.2, Income Taxes, Other Income and Deductions, as appropriate.

418.1. Equity in Earnings of Subsidiary Companies

This account shall include the utility's equity in the earnings or losses of subsidiary companies for the year.

419. Interest and Dividend Income

A. This account shall include interest revenues on securities, loans, notes, advances, special deposits, tax refunds and all other interest-bearing assets, and dividends on stocks of other companies, whether the securities on which the interest and dividends are received are carried as investments or included in sinking or other special fund accounts.

B. If any interest or dividends are required to be retained in a

special fund and the fund is represented by a reserve, the amount of such accretion to the fund shall concurrently be credited to the appropriate reserve account and charged to account 436, Appropriations of Retained Earnings.

C. This account may include the pro rata amount necessary to extinguish (during the interval between the date of acquisition and the date of maturity) the difference between the cost to the utility and the face value of interest-bearing securities. Amounts thus credited or charged shall be concurrently included in the accounts in which the securities are carried.

D. Where significant in amount, expenses, excluding operating taxes and income taxes, applicable to security investments and to interest and dividend revenues thereon shall be charged hereto.

Note A: Interest accrued, the payment of which is not reasonably assured, dividends receivable which have not been declared or guaranteed, and interest or dividends upon reacquired securities issued or assumed by the utility shall not be credited to this account.

Note B: Related taxes shall be recorded in account 408.2, Taxes Other Than Income Taxes, Other Income and Deductions, or account 409.2, Income Taxes, Other Income and Deductions, as appropriate.

419.1. Allowance for Funds Used During Construction

This account shall include concurrent credits for allowance for funds used during construction based upon the net cost for the period of construction of borrowed funds used for construction purposes and a reasonable rate upon the utility's own funds when so used. (See Electric Plant Instruction 168.3 (a), (17).)

420. Investment Tax Credits

A. This account shall be credited with investment tax credit amounts determined in accordance with the following:

1. By amounts equal to the authorized debits to account 411.4, Investment Tax Credit Adjustments, Utility Operations, for investment tax credits used in calculating income taxes for the current year when the utility's accounting does not provide for the deferral of such credits.

2. By amounts equal to the debits to account 255, Accumulated Deferred Investment Tax Credits, for the amortization of the deferred tax credits over the book service life of the property to which the tax credits relate when such credits are to be applied as a reduction of the rate base.

421. Miscellaneous Nonoperating Income

This account shall include all revenue and expense items except taxes,

properly includible in the income account and not provided for elsewhere. Related taxes shall be recorded in account 408.2, Taxes Other Than Income Taxes, Other Income and Deductions, or account 409.2, Income Taxes, Other Income and Deductions, as appropriate.

ITEMS

1. Fees collected in connection with the exchange of coupon bonds for registered bonds.

2. Gain on disposition of investments and reacquisition and resale or retirement of utility's debt securities and investments.

3. Profits from operations of others realized by the utility under contracts.

4. Profit on sale of timber or other natural resources (see electric plant instruction 168.7(c)).

421.1. Gain on Disposition of Property

This account shall be credited with the gains on the sale, conveyance, exchange, or transfer of utility or other property to another. Amounts relating to gains on land and land rights held for future use recorded in account 105, Electric Plant Held for Future Use will be accounted for as prescribed in paragraphs B, C, and D thereof. (See electric plant instructions 168.5(f), 168.7(e) and 168.10(e).) Income taxes on gains recorded in this account shall be recorded in account 409.2, Income Taxes, Other Income and Deductions.

3. OTHER INCOME DEDUCTIONS

421.2. Loss on Disposition of Property

This account shall be charged with the loss on the sale, conveyance, exchange, or transfer of utility or other property to another. Amounts relating to losses on land and land rights held for future use recorded in account 105, Electric Plant Held for Future Use will be accounted for as prescribed in paragraphs B, C, and D thereof. (See electric plant instructions 168.5(f), 168.7(e) and 168.10(e).) The reduction in income taxes attributable to losses recorded in this account shall be recorded in account 409.2, Income Taxes, Other Income and Deductions.

425. Miscellaneous Amortization

This account shall include amortization charges not includible in other accounts which are properly deductible in determining the income of the utility before interest charges. Charges includible herein, if significant in amount, must be in accordance with an orderly and systematic amortization program.

ITEMS

1. Amortization of utility plant acquisition adjustments, or of intangibles included in utility plant in service when not authorized to

be included in utility operating expenses by the commission. (See account 114, Electric Plant Acquisition Adjustments.)

2. Amortization of amounts in account 182, Extraordinary Property Losses, when not authorized to be included in utility operating expenses by the commission.

3. Amortization of capital stock expenses in accordance with a systematic amortization program.

426. Miscellaneous Income Deductions

This account shall include miscellaneous expense items which are nonoperating in nature but which are properly deductible before determining total income before interest charges. The account shall be maintained according to subaccounts shown below:

426.1. Donations

This account shall include all payments or donations for charitable, social or community welfare purposes.

426.2. Life Insurance

This account shall include all payments for life insurance of officers and employees where company is beneficiary (net premiums less increase in cash surrender value of policies). (See account 926.2, Employee Welfare Expenses--note A.)

426.3. Penalties

This account shall include payments by the company for penalties or fines for violation of any regulatory statutes by the company or its officials.

426.4. Expenditures for Certain Civic, Political and related Activities

This account shall include expenditures for the purpose of influencing public opinion with respect to the election or appointment of public officials, referenda, legislation, or ordinances (either with respect to the possible adoption of new referenda, legislation or ordinances or repeal or modification of existing referenda, legislation or ordinances) or approval, modification or revocation of franchises; or for the purpose of influencing the decisions of public officials or advancing the political objective of the utility, but shall not include such expenditures which are directly related to appearances before regulatory or other governmental bodies in connection with the reporting utility's existing or proposed operations.

426.5. Other Deductions

This account shall include other miscellaneous expenses which are nonoperating in nature, but which are properly deductible before determining total income before interest charges.

ITEMS

1. Loss relating to investments in securities written off or written down.
2. Loss on sale of investments.
3. Loss on reacquisition, resale or retirement of utility's debt securities.
4. Preliminary survey and investigation expenses related to abandoned project, when not written off to the appropriate operating expense account.

4. INTEREST CHARGES

427. Interest on Long-term Debt

A. This account shall include the amount of interest on outstanding long-term debt issued or assumed by the utility, the liability for which is included in account 221, Bonds, or account 224, Other Long-term Debt.

B. This account shall be so kept or supported as to show the interest accruals on each class and series of long-term debt.

Note: This account shall not include interest on nominally issued or nominally outstanding long-term debt, including securities assumed.

428. Amortization of Debt Discount and Expense

A. This account shall include the amortization of unamortized debt discount and expense on outstanding long-term debt. Amounts charged to this account shall be credited concurrently to accounts 181, Unamortized Debt Expense, and 226, Unamortized Discount on Long-term Debt--Debit.

B. This account shall be so kept or supported as to show the debt discount and expense on each class and series of long-term debt.

429. Amortization of Premium on Debt--Credit.

A. This account shall include the amortization of unamortized net premium on outstanding long-term debt. Amounts credited to this account shall be charged concurrently to account 225, Unamortized Premium on Long-term Debt.

B. This account shall be so kept or supported as to show the premium on each class and series of long-term debt.

430. Interest on Debt to Associated Companies

A. This account shall include interest accrued on amounts included in account 223, Advances from Associated Companies, and on all other obligations to associated companies.

B. The records supporting the entries to this account shall be so kept as to show to whom the interest is to be paid, the period covered by the accrual, the rate of interest and the principal amount of the advances or other obligations on which the interest is accrued.

431. Other Interest Expense

This account shall include all interest charges not provided for elsewhere.

ITEMS

1. Interest on notes payable on demand or maturing one year or less from date and on open accounts, except notes and accounts with associated companies.
2. Interest on customers' deposits.
3. Interest on claims and judgments, tax assessments, and assessments for public improvements past due.
4. Income and other taxes levied upon bondholders of utility and assumed by it.

5. EXTRAORDINARY ITEMS

434. Extraordinary Income

This account shall be credited with nontypical, noncustomary, infrequently recurring gains, which would significantly distort the current year's income computed before extraordinary items, if reported other than as extraordinary items. Income tax relating to the amounts recorded in this account shall be recorded in account 409.3, Income Taxes, Extraordinary Items. (See general instruction 166.7(a).)

435. Extraordinary Deductions

This account shall be debited with nontypical, noncustomary, infrequently recurring losses, which would significantly distort the current year's income computed before extraordinary items, if reported other than as extraordinary items. Income tax relating to the amounts recorded in this account shall be recorded in account 409.3, Income Taxes, Extraordinary Items. (See general instruction 166.7(a).)

RETAINED EARNINGS ACCOUNTS

433. Balance Transferred from Income

436. Appropriations of Retained Earnings

437. Dividends Declared--Preferred Stock

438. Dividends Declared--Common Stock

439. Adjustments to Retained Earnings

This group of accounts (433 and 436 to 439) in combination, is designed to show the net changes in account 216, Unappropriated Retained Earnings, during the accounting period. (See appropriated retained earnings instruction 169.1)

433. Balance Transferred from Income

This account shall include the net credit or debit transferred from income for the year.

436. Appropriations of Retained Earnings

This account shall include appropriations of retained earnings.

ITEMS

1. Appropriations required under terms of mortgages, orders of courts, contracts, or other agreements.

2. Appropriations required by action of regulatory authorities.

3. Other appropriations made at option of utility for specific purposes.

437. Dividends Declared--Preferred Stock

438. Dividends Declared--Common Stock

A. These accounts shall include amounts declared payable out of retained earnings as dividends on actually outstanding capital stock issued by the utility.

B. Dividends shall be segregated for each class and series of capital stock as to those payable in cash, stock and other forms. If not payable in cash, the medium of payment shall be described with sufficient particularity to identify it.

439. Adjustments to Retained Earnings

A. This account shall include significant nonrecurring transactions relating to prior periods. Other than transactions of capital stock as specified in paragraph B below, all entries to this account must receive prior commission approval. These transactions are limited to those adjustments which (1) can be specifically identified with and related to the business activities of particular prior periods, and (2) are not attributable to economic events occurring subsequent to the date of the financial statements for the prior period, and (3) depend primarily on determinations by persons other than the management, and (4) were not susceptible of reasonable estimation prior to such determination. This account shall also include the related income tax effects on items included herein. All items included in this account shall be sufficiently described in the entries relating thereto as to permit ready analysis.

B. Adjustments, charges or credits due to losses on reacquisition, resale or retirement of the company's own capital stock shall be included in this account. (See account 210, Gain on Resale or Cancellation of Reacquired Capital Stock, for the treatment of gains.)

ITEMS

1. Significant nonrecurring adjustments or settlements of income taxes.

2. Significant amounts resulting from litigation or similar claims.

3. Significant amounts relating to adjustments or settlement of utility revenue under rate processes.

4. Significant adjustments to plant in service, depreciation and

amortization as a result of commission direction.

5. Write-off of unamortized capital stock expenses.

OPERATING REVENUE ACCOUNTS

1. SALES OF ELECTRICITY

440. Residential Sales

442. Commercial and Industrial Sales

444. Public Street and Highway Lighting

445. Other Sales to Public Authorities

446. Sales to Railroads and Railways

447. Sales for Resale

448. Interdepartmental Sales

2. OTHER OPERATING REVENUES

450. Forfeited Discounts

451. Miscellaneous Service Revenues

453. Sales of Water and Water Power

454. Rent from Electric Property

455. Interdepartmental Rents

456. Other Electric Revenues

1. SALES OF ELECTRICITY

440. Residential Sales

A. This account shall include the net billing for electricity supplied for residential or domestic purposes, including farm customers supplied under residential rates, and to religious bodies.

B. Records shall be maintained so that the quantity of electricity sold and the revenue received under each rate schedule shall be readily available.

Note: When electricity supplied through a single meter is used for both residential and commercial purposes, the total revenue shall be included in this account or in account 442, Commercial and Industrial Sales, according to the rate schedule which is applied. If the same rate schedules are applicable to both residential and commercial service, classification shall be according to principal use.

442. Commercial and Industrial Sales

A. This account shall include the net billing for electricity supplied to commercial and industrial customers.

B. Records shall be maintained so that the quantity of electricity sold and revenue received under each rate schedule shall be readily available. Records supporting the entries to this account shall be so maintained that the quantity of electricity sold and the charges made therefor for each customer for each month or other appropriate billing period are readily available.

Note: When electricity supplied through a single meter is used for both commercial and residential purposes, the total revenue shall be included in this account or in account 440, Residential Sales, according to the rate schedule which is applied. If the same rate schedules are applicable to both residential and commercial service, classification shall be according to principal use.

444. Public Street and Highway Lighting

A. This account shall include the net billing for electricity supplied and services rendered for the purposes of lighting streets, highways, parks and other public places, or for traffic or other signal system service, for municipalities or other divisions or agencies of State or federal governments.

B. Records shall be maintained so that the quantity of electricity sold and the revenue received from each customer shall be readily available. In addition, the records shall be maintained so as to show the revenues from (1) contracts which include both electricity and services, and (2) contracts which include sales of electricity only.

445. Other Sales to Public Authorities

A. This account shall include the net billing for electricity supplied to municipalities or divisions or agencies of federal or state governments, (including electricity supplied for the operation of publicly owned railroads and railways) under special contracts or agreements or service classifications applicable only to public authorities, except such revenues as are includible in accounts 444 and 447.

B. Records shall be maintained so as to show the quantity of electricity sold and the revenue received from each customer.

446. Sales to Railroads and Railways

A. This account shall include the net billing for electricity supplied to railroads and interurban and street railways, for general railroad use, including the propulsion of cars or locomotives, where such electricity is supplied under separate and distinct rate schedules.

B. Records shall be maintained so that the quantity of electricity sold and the revenue received from each customer shall be readily available.

Note: Revenues from incidental use of electricity furnished under a contract for propulsion of cars or locomotives shall be included herein.

447. Sales for Resale

A. This account shall include the net billing for electricity supplied to other electric utilities or to public authorities for resale purposes.

B. Records shall be maintained so as to show the quantity of electricity sold and the revenue received from each customer.

Note: Revenues from electricity supplied to other public utilities for use by them and not for distribution, shall be included in account 442, Commercial and Industrial Sales, unless supplied under the same contract as and not readily separable from revenues includible in this account.

448. Interdepartmental Sales

A. This account shall include amounts charged by the electric department at tariff or other specified rates for electricity supplied by it to other utility departments.

B. Records shall be maintained so that the quantity of electricity supplied each other department and the charges therefor shall be readily available.

2. OTHER OPERATING REVENUES

450. Forfeited Discounts

This account shall include the amounts which the utility allows its customers on condition that they pay their electric bills on or before a specified date and which are forfeited by the customers because of failure to pay within the specified time.

451. Miscellaneous Service Revenues

This account shall include revenues for all miscellaneous services and charges billed to customers which are not specifically provided for in other accounts.

ITEMS

1. Fees for changing, connecting or disconnecting service.
2. Profit on maintenance of appliances, wiring, piping or other installations on customers' premises.
3. Net credit or debit (cost less net salvage and less payment from customers) on closing or work orders for plant installed for temporary service of less than one year. (See account 185, Temporary Facilities.)
4. Recovery of expenses in connection with current diversion cases. (Billing for the electricity consumed shall be included in the appropriate electric revenue account.)

453. Sales of Water and Water Power

A. This account shall include revenues derived from the sale of water for irrigation, domestic, industrial or other uses, or for the development by others of water power or for headwater benefits; also, revenues derived from furnishing water power for mechanical purposes when the investment in the property used in supplying such water or water power is carried as electric plant in service.

B. The records for this account shall be kept in such manner as to

permit an analysis of the rates charged and the purposes for which the water was used.

Note: This account shall be used only when water or mechanical power is actually delivered to the customers' premises. When electricity is generated on the utility's premises, the revenue therefrom shall be credited to the appropriate account for sales of electric energy.

454. Rent from Electric Property

A. This account shall include rents received for the use by others of land, buildings, and other property devoted to electric operations by the utility.

B. When property owned by the utility is operated jointly with others under a definite arrangement for sharing the actual expenses among the parties to the arrangement, any amount received by the utility for interest or return or in reimbursement of taxes or depreciation on the property shall be credited to this account. (See operating expense instruction 172.5.)

Note A: Do not include rent from property constituting an operating unit or system in this account. (See account 412, Revenues From Electric Plant Leased to Others, and income account instruction 170.3.

Note B: Amounts received from others for the transmission of electric energy shall be credited to account 456, Other Electric Revenues.

455. Interdepartmental Rents

This account shall include rents credited to the electric department on account of rental charges made against other departments (gas, water, etc.) of the utility. In the case of property operated under a definite arrangement to allocate the costs among the departments using the property, any reimbursement to the electric department for interest or return and depreciation and taxes shall be credited to this account.

456. Other Electric Revenues

This account shall include revenues derived from electric operations not includible in any of the foregoing accounts.

ITEMS

1. Compensation for minor or incidental services provided for others such as customer billing, engineering, etc.
2. Profit or loss on sale of material and supplies not ordinarily purchased for resale and not handled through merchandising and jobbing accounts.
3. Sale of steam, but not including sales made by a steam-heating department or transfers of steam under joint facility operations.
4. Revenues from transmission of electricity of others over transmission facilities of the utility.

5. Rentals from property included in account 372, Leased Property on Customers' Premises.

6. Include in a separate subaccount revenues in payment for rights and/or benefits received from others which are realized through research and development ventures.

EXPENSE ACCOUNTS

1. POWER PRODUCTION EXPENSES

A. Steam Power Generation

Operation

500. Operation Supervision and Engineering

This account shall include the cost of labor and expenses incurred in the general supervision and direction of the operation of steam power generating stations. Direct supervision of specific activities, such as fuel handling, boiler-room operations, generator operations, etc., shall be charged to the appropriate account. (See operating expense instruction 172.1.)

Note: The cost of fuel analysis shall be charged to account 150.152, Fuel Stock Expense Undistributed.

501. Fuel

A. This account shall include the cost of fuel used in the production of steam for the generation of electricity, including expenses in unloading fuel from the shipping media and handling thereof up to the point where the fuel enters the first boiler plant bunker, hopper, bucket, tank or holder of the boiler-house structure. Records shall be maintained to show the quantity, b.t.u. content and cost of each type of fuel used.

B. The cost of fuel and related fuel stock expenses shall be charged initially to appropriate fuel accounts carried under accounts 150.151, Fuel Stock, and 150.152, Fuel Stock Expenses Undistributed, and cleared to this account on the basis of fuel used. See accounts 150.151 and 150.152 for basis of fuel costs and includible items of fuel stock expenses.

ITEMS

Labor:

1. Supervising purchasing and handling of fuel.
2. All routine fuel analyses.

3. Unloading from shipping facility and putting in storage.
4. Moving of fuel in storage and transferring fuel from one station to another.
5. Handling from storage or shipping facility to first bunker, hopper, bucket, tank or holder of boilerhouse structure.
6. Operation of mechanical equipment, such as locomotives, trucks, cars, boats, barges, cranes, etc.

Materials and Expenses:

7. Cost of fuel including freight, switching, demurrage and other transportation charges.
8. Excise taxes, insurance, purchasing commissions and similar items.
9. Stores expenses to extent applicable to fuel.
10. Transportation and other expenses in moving fuel in storage.
11. Tools, lubricants and other supplies.
12. Operating supplies for mechanical equipment.
13. Residual disposal expenses less any proceeds from sale of residuals, including those resulting from operation of sintering plant equipment.
14. Operating, maintenance, and depreciation expenses and ad valorem taxes on utility-owned transportation equipment used to transport fuel from the point of acquisition to the unloading point.
15. Lease or rental costs of transportation equipment used to transport fuel from the point of acquisition to the unloading point.

Note: Abnormal fuel handling expenses occasioned by emergency conditions shall be charged to expense as incurred.

502. Steam Expenses

This account shall include the cost of labor, materials used and expenses incurred in production of steam* for electric generation. This includes all expenses of handling and preparing fuel beginning at the point where the fuel enters the first boiler plant bunker, hopper, tank or holder of the boiler-house structure.

* So in original. "stream" should be "steam".

ITEMS

Labor:

1. Supervising steam production.
2. Operating fuel conveying, storage, weighing and processing equipment within boiler plant.
3. Operating boiler and boiler auxiliary equipment.
4. Operating boiler feed water purification and treatment equipment.
5. Operating ash-collecting and disposal equipment located inside the plant.

6. Operating boiler plant electrical equipment.
7. Keeping boiler plant log and records and preparing reports on boiler plant operation.
8. Testing boiler water.
9. Testing, checking, and adjusting meters, gauges, and other instruments and equipment in boiler plant.
10. Cleaning boiler plant equipment when not incidental to maintenance work.
11. Repacking glands and replacing gauge glasses where the work involved is of a minor nature and is performed by regular operating crews. Where the work is of a major character, such as that performed on high-pressure boilers, the item should be considered as maintenance.

Materials and Expenses:

12. Chemicals and boiler inspection fees.
13. Lubricants.
14. Boiler feed water purchased and pumping supplies.

503. Steam from Other Sources

This account shall include the cost of steam purchased, or transferred from another department of the utility or from others under a joint facility operating arrangement, for use in prime movers devoted to the production of electricity.

Note: The records shall be so kept as to show separately for each company from which steam is purchased, the point of delivery, the quantity, the price, and the total charge. When steam is transferred from another department or from others under a joint operating arrangement, the utility shall be prepared to show full details of the cost of producing such steam, the basis of the charge to electric generation and the extent and manner of use by each department or party involved.

504. Steam Transferred--Credit

A. This account shall include such portion of the cost of producing steam as is charged to other electric operating expense accounts, or to others or to a coordinate department under a joint facility arrangement.

B. The records supporting the entries to this account shall be so kept that the utility can furnish readily an explanation of the bases of the credits to this account and the amounts charged to (1) other electric accounts, (2) other utility departments, and (3) outside parties under a joint facility arrangement. The records shall show, likewise, the amounts of steam production operation and steam production maintenance expenses, respectively, chargeable to each of the foregoing. (See operating expense instruction 172.5, subd. (b).)

505. Electric Expenses

This account shall include the cost of labor, materials used and expenses incurred in operating prime movers, generators, and their auxiliary apparatus, switch gear and other electric equipment to the points where electricity leaves for conversion for transmission or distribution.

ITEMS

Labor:

1. Supervising electric production.
2. Operating turbines, engines, generators and exciters.
3. Operating condensers, circulating water systems and other auxiliary apparatus.
4. Operating generator cooling system.
5. Operating lubrication and oil control system, including oil purification.
6. Operating switchboards, switch gear and electric control and protective equipment.
7. Keeping electric plant log and records and preparing reports on electric plant operations.
8. Testing, checking and adjusting meters, gauges, and other instruments, relays, controls and other equipment in the electric plant.
9. Cleaning electric plant equipment when not incidental to maintenance work.
10. Repacking glands and replacing gauge glasses.

Materials and Expenses:

11. Lubricants and control system oils.
12. Generator cooling gases.
13. Circulating water purification supplies.
14. Cooling water purchased.
15. Motor and generator brushes.

506. Miscellaneous Steam Power Expenses

This account shall include the cost of labor, materials used and expenses incurred which are not specifically provided for or are not readily assignable to other steam generation operation expense accounts.

ITEMS

Labor:

1. General clerical and stenographic work.
2. Guarding and patrolling plant and yard.
3. Building service.
4. Care of grounds including snow removal, cutting grass, etc.
5. Miscellaneous labor.

Materials and Expenses:

6. General operating supplies, such as tools, gaskets, packing waste, gauge glasses, hose, indicating lamps, record and report forms, etc.
7. First-aid supplies and safety equipment.
8. Employees' service facilities expenses.
9. Building service supplies.
10. Communication service.
11. Miscellaneous office supplies and expenses, printing and stationery.
12. Transportation expenses.
13. Meals, traveling, and incidental expenses.
14. Research and development expenses.

507. Rents

This account shall include all rents of property of others used, occupied or operated in connection with steam power generation. (See operating expense instruction 172.3.)

Maintenance

510. Maintenance Supervision and Engineering

This account shall include the cost of labor and expenses incurred in the general supervision and direction of maintenance of steam generation facilities. Direct field supervision of specific jobs shall be charged to the appropriate maintenance account. (See operating expense instruction 172.1.)

511. Maintenance of Structures

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of steam structures, the book cost of which is includible in account 311, Structures and Improvements. (See operating expense instruction 172.2.)

512. Maintenance of Boiler Plant

A. This account shall include the cost of labor, materials used and expenses incurred in the maintenance of steam plant, the book cost of which is includible in account 312, Boiler Plant Equipment. (See operating expense instruction 172.2.)

B. For the purpose of making charges hereto and to account 513, Maintenance of Electric Plant, the point at which steam plant is distinguished from electric plant is defined as follows:

- (1) Inlet flange of throttle valve on prime mover.
- (2) Flange of all steam extraction lines on prime mover.
- (3) Hotwell pump outlet on condensate lines.
- (4) Inlet flange of all turbine-room auxiliaries.
- (5) Connection to line side of motor starter for all boiler-plant

equipment.

513. Maintenance of Electric Plant

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of electric plant, the book cost of which is includible in accounts 313, Engines and Engine Driven Generators, 314, Turbogenerator Units, and 315, Accessory Electric Equipment. (See operating expense instruction 172.2 and paragraph B of account 512.)

514. Maintenance of Miscellaneous Steam Plant

This account shall include the cost of labor, materials used and expenses incurred in maintenance of miscellaneous steam generation plant, the book cost of which is includible in account 316, Miscellaneous Power Plant Equipment. (See operating expense instruction 172.2.)

Joint Expenses

515.1 Joint Expenses--Debit

A. This account shall include amounts for the cost of operation and maintenance payable by the electric department to others, or to a coordinate department, for joint facilities used, occupied or operated in connection with steam power generation. (See operating expense instruction 172.5.)

B. The records supporting the entries to this account shall be so kept that the utility can furnish a complete explanation of the debits to this account, including the following:

- (1) Charges from others
- (2) Charges from coordinate departments

Note: Charges for steam produced in joint facilities shall not be included in this account but in account 503, Steam from Other Sources.

515.2 Joint Expenses--Credit

A. This account shall include such portion of the cost of operating and maintaining joint facilities operated by the electric department in connection with steam power generation as is charged to others or to a coordinate department. (See operating expense instruction 172.5.)

B. The records supporting the entries to this account shall be so kept that the utility can furnish a complete explanation of the credits to this account, including the following:

- (1) Charges to others
- (2) Charges to coordinate departments

Note: Credits for steam transferred, produced in joint facilities, shall not be included in this account but in account 504, Steam Transferred--Credit.

B. Nuclear Power Generation Operation

517. Operation Supervision and Engineering

This account shall include the cost of labor and expenses incurred in the general supervision and direction of the operation of nuclear power generating stations. Direct supervision of specific activities, such as fuel handling, reactor operations, generator operations, etc., shall be charged to the appropriate account. (See operating expense instruction 172.1.)

518.1 Nuclear Fuel

A. This account shall include the cost of nuclear fuel used for the production of steam in the generation of electricity by nuclear process.

B. This account shall be debited and appropriate subdivisions of account 120.5 Accumulated Provision for Amortization of Nuclear Fuel Assemblies, credited for the amortization of the net cost of nuclear fuel assemblies used in the production of energy. The net cost of nuclear fuel assemblies subject to amortization shall be the cost of nuclear fuel assemblies plus or less the expected net salvage of uranium, plutonium, and other by-products and unburned fuel. The utility shall adopt the necessary procedures to assure that charges to this account are distributed according to the thermal energy produced in such periods.

C. This account shall also include the costs involved when nuclear fuel is leased.

D. This account shall be debited or credited as appropriate for significant changes in the estimated value of uranium, plutonium, and other by-products contained in account 150.157, Nuclear By-Product Materials, and the amount realized upon the final disposition of the materials. Significant declines in the estimated value of items carried in account 150.157 may be recognized at the time of market price declines by charging this account and crediting account 150.157. When the declining change occurs while the fuel is recorded in account 120.3, Nuclear Fuel Assemblies in Reactor, the effect shall be amortized over the remaining life of the fuel.

518.2 Other Fuel

This account shall include the cost of other fuels, used for ancillary steam facilities, including superheat.

519. Coolants and Water

This account shall include the cost of labor, materials used and expenses incurred for heat transfer materials and water used for steam and cooling purposes.

ITEMS

Labor:

1. Operation of water supply facilities.
2. Handling of coolants and heat transfer materials.

Materials and Expenses:

3. Chemicals.
4. Additions to, or refining of, fluids used in reactor system.
5. Lubricants.
6. Pumping supplies and expenses.
7. Miscellaneous supplies and expenses.
8. Purchased water.

Note: Do not include in this account water for general station use or the initial charge for coolants, heat transfer or moderator fluids, chemicals or other supplies capitalized.

520. Steam Expenses

This account shall include the cost of labor, materials used and expenses incurred in production of steam through nuclear processes, and similar expenses for operation of any auxiliary superheat facilities.

ITEMS

Labor:

1. Supervising steam production.
2. Fuel handling including removal, insertion, disassembly and preparation for cooling operations and shipment.
3. Testing instruments and gauges.
4. Health, safety, monitoring and decontamination activities.
5. Waste disposal.
6. Operating steam boilers and auxiliary steam superheat facilities.

Materials and Expenses:

7. Chemical supplies.
8. Charts, logs, etc.
9. Health, safety, monitoring and decontamination supplies.
10. Boiler inspection fees.
11. Lubricants.

521. Steam from Other Sources

This account shall include the cost of steam purchased or transferred from another department of the utility or from others under a joint facility operating arrangement for use in prime movers devoted to the production of electricity.

Note: The records shall be so kept as to show separately, for each company from which steam is purchased, the point of delivery, the quantity, the price, and the total charge. When steam is transferred

from another operating department, the utility shall be prepared to show full details of the cost of producing such steam, the basis of the charges to electric generation, and the extent and manner of use by each department involved.

522. Steam Transferred--Credit

A. This account shall include such portion of the cost of producing steam as is charged to other electric operating expense accounts, or to others or to a coordinate department under a joint facility arrangement.

B. The records supporting the entries to this account shall be so kept that the utility can furnish readily an explanation of the bases of the credits to this account and the amounts charged to (1) other electric accounts, (2) other utility departments, and (3) outside parties under a joint facility arrangement. The records shall show, likewise, the amounts of steam production operation and steam production maintenance expenses, respectively, chargeable to each of the foregoing. (See operating expense instruction 172.5, subd. (b).)

523. Electric Expenses

This account shall include the cost of labor, materials used and expenses incurred in operating turbogenerators, steam turbines and their auxiliary apparatus, switch gear and other electric equipment to the points where electricity leaves for conversion for transmission or distribution.

ITEMS

Labor:

1. Supervising electric production.
2. Operating turbines, engines, generators and exciters.
3. Operating condensers, circulating water systems and other auxiliary apparatus.
4. Operating generator cooling system.
5. Operating lubrication and oil control system, including oil purification.
6. Operating switchboards, switch gear and electric control and protective equipment.
7. Keeping plant log and records and preparing reports on electric plant operations.
8. Testing, checking and adjusting meters, gauges, and other instruments, relays, controls and other equipment in the electric plant.
9. Cleaning electric plant equipment when not incidental to maintenance.
10. Repacking glands and replacing gauge glasses.

Materials and Expenses:

11. Lubricants and control system oils.

12. Generator cooling gases.

13. Log sheets and charts.

14. Motor and generator brushes.

524. Miscellaneous Nuclear Power Expenses

This account shall include the cost of labor, materials used and expenses incurred which are not specifically provided for or are not readily assignable to other nuclear generation operation accounts.

ITEMS

Labor:

1. General clerical and stenographic work.

2. Plant security.

3. Building service.

4. Care of grounds, including snow removal, cutting grass, etc.

5. Miscellaneous labor.

Materials and Expenses:

6. General operating supplies, such as tools, gaskets, hose, indicating lamps, record and report forms, etc.

7. First-aid, supplies and safety equipment.

8. Employees' service facilities expenses.

9. Building service supplies.

10. Communication service.

11. Miscellaneous office supplies and expenses, printing and stationery.

12. Transportation expenses.

13. Meals, traveling, and incidental expenses.

14. Research and development expenses.

525. Rents

This account shall include all rents of property of others used, occupied or operated in connection with nuclear generation. (See operating expense instruction 172.3.)

Maintenance

528. Maintenance Supervision and Engineering

This account shall include the cost of labor and expenses incurred in the general supervision and direction of maintenance of nuclear generation facilities. Direct field supervision of specific jobs shall be charged to the appropriate maintenance account. (See operating expense instruction 172.1.)

529. Maintenance of Structures

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of structures, the book cost of

which is includible in account 321, Structures and Improvements. (See operating expense instruction 172.2.)

530. Maintenance of Reactor Plant Equipment

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of reactor plant, the book cost of which is includible in account 322, Reactor Plant Equipment. (See operating expense instruction 172.2.)

531. Maintenance of Electric Plant

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of electric plant, the book cost of which is includible in accounts 323, Turbogenerator Units, and 324, Accessory Electric Equipment. (See operating expense instruction 172.2.)

532. Maintenance of Miscellaneous Nuclear Plant

This account shall include the cost of labor, materials used and expenses incurred in maintenance of miscellaneous nuclear generating plant, the book cost of which is includible in account 325, Miscellaneous Power Plant Equipment. (See operating expense instruction 172.2.)

Joint Expenses

533.1 Joint Expenses--Debit

A. This account shall include amounts for the cost of operation and maintenance payable by the electric department to others, or to a coordinate department, for joint facilities used, occupied or operated in connection with nuclear generation. (See operating expense instruction 172.5.)

B. The records supporting the entries to this account shall be so kept that the utility can furnish a complete explanation of the debits to this account, including the following:

- (1) Charges from others
- (2) Charges from coordinate departments

Note: Charges for steam produced in joint facilities shall not be included in this account but in account 521, Steam from Other Sources.

533.2 Joint Expenses--Credit

A. This account shall include such portion of the cost of operating and maintaining joint facilities operated by the electric department in connection with nuclear generation as is charged to others or to a coordinate department. (See operating expense instruction 172.5.)

B. The records supporting the entries to this account shall be so kept that the utility can furnish a complete explanation of the credits to this account, including the following:

- (1) Charges to others

(2) Charges to coordinate departments

Note: Credits for steam transferred, produced in joint facilities, shall not be included in this account but in account 522, Steam Transferred--Credit.

C. Hydraulic Power Generation

Operation

535. Operation Supervision and Engineering

This account shall include the cost of labor and expenses incurred in the general supervision and direction of the operation of hydraulic power generating stations. Direct supervision of specific activities, such as hydraulic operation, generator operation, etc., shall be charged to the appropriate account. (See operating expense instruction 172.1.)

536. Water for Power

This account shall include the cost of water used for hydraulic power generation.

ITEMS

1. Cost of water purchased from others, including water tolls paid reservoir companies.
2. Periodic payments for licenses or permits from any governmental agency for water rights, or payments based on the use of the water.
3. Periodic payments for riparian rights.
4. Periodic payments for headwater benefits or for detriments to others.
5. Cloud seeding.

537. Hydraulic expenses

This account shall include the cost of labor, materials used and expenses incurred in operating hydraulic works, including reservoirs, dams and waterways, and in activities directly relating to the hydroelectric development outside the generating station.

ITEMS

Labor:

1. Supervising hydraulic operation.
2. Removing debris and ice from trash racks, reservoirs and waterways.
3. Patrolling reservoirs and waterways.
4. Operating intakes, spillways, sluiceways, and outlet works.
5. Operating bubbler, heater or other de-icing systems.
6. Ice and log jam work.
7. Operating navigation facilities.
8. Operations relating to conservation of game, fish, forests, etc.
9. Insect control activities.

Materials and Expenses:

10. Insect control materials.
11. Lubricants, packing, and other supplies used in operation of hydraulic equipment.
12. Supplies and expenses in conservation of game, fish, forests, etc.
13. Transportation expenses.

538. Electric Expenses

This account shall include the cost of labor, materials used and expenses incurred in operating prime movers, generators and their auxiliary apparatus, switchgear, and other electric equipment, to the point where electricity leaves for conversion for transmission or distribution.

ITEMS

Labor:

1. Supervising electric production.
 2. Operating prime movers, generators and auxiliary equipment.
 3. Operating generator cooling system.
 4. Operating lubrication and oil control systems*, including oil purification.
- * So in original. "ssystems" should be "system".
5. Operating switchboards, switchgear, and electric control and protection equipment.
 6. Keeping plant log and records and preparing reports on plant operations.
 7. Testing, checking and adjusting meters, gauges, and other instruments, relays, controls, and other equipment in the plant.
 8. Cleaning plant equipment when not incidental to maintenance work.
 9. Repacking glands.

Materials and Expenses:

10. Lubricants and control system oils.
 11. Motor and generator brushes.
- #### 539. Miscellaneous Hydraulic Power Generation Expenses

This account shall include the cost of labor, materials used and expenses incurred which are not specifically provided for or are not readily assignable to other hydraulic generation operation expense accounts.

ITEMS

Labor:

1. General clerical and stenographic work.
2. Guarding and patrolling plant and yard.
3. Building service.
4. Care of grounds including snow removal, cutting grass, etc.

5. Snow removal from roads and bridges.

6. Miscellaneous labor.

Materials and Expenses:

7. General operating supplies, such as tools, gaskets, packing, waste, hose, indicating lamps, record and report forms, etc.

8. First-aid supplies and safety equipment.

9. Employees' service facilities expenses.

10. Building service supplies.

11. Communication service.

12. Office supplies, printing and stationery.

13. Transportation expenses.

14. Fuel.

15. Meals, traveling, and incidental expenses.

16. Research and development expenses.

540. Rents

This account shall include all rents of property of others used, occupied or operated in connection with hydraulic power generation, including amounts payable to the United States for the occupancy of public lands and reservations for reservoirs, dams, flumes, forebays, penstocks, power houses, etc., but not including transmission right-of-way. (See operating expense instruction 172.3.)

Maintenance

541. Maintenance Supervision and Engineering

This account shall include the cost of labor and expenses incurred in the general supervision and direction of the maintenance of hydraulic power generating stations. Direct field supervision of specific jobs shall be charged to the appropriate maintenance account. (See operating expense instruction 172.1.)

542. Maintenance of Structures

This account shall include the cost of labor, materials used and expenses incurred in maintenance of hydraulic structures, the book cost of which is includible in account 331, Structures and Improvements. (See operating expense instruction 172.2.)

543. Maintenance of Reservoirs, Dams and Waterways

This account shall include the cost of labor, materials used and expenses incurred in maintenance of plant includible in account 332, Reservoirs, Dams and Waterways. (See operating expense instruction 172.2.)

544. Maintenance of Electric Plant

This account shall include the cost of labor, materials used and expenses incurred in maintenance of electric plant includible in

accounts 333, Water Wheels, Turbines and Generators, and 334, Accessory Electric Equipment. (See operating expense instruction 172.2.)

545. Maintenance of Miscellaneous Hydraulic Plant

This account shall include the cost of labor, materials used and expenses incurred in maintenance of miscellaneous hydraulic plant, the book cost of which is includible in accounts 335, Miscellaneous Power Plant Equipment, and 336, Roads, Railroads and Bridges. (See operating expense instruction 172.2.)

Joint Expenses

545.1 Joint Expenses--Debit

A. This account shall include amounts for the cost of operation and maintenance payable by the electric department to others, or to a coordinate department, for joint facilities used, occupied or operated in connection with hydraulic power generation. (See operating expense instruction 172.5.)

B. Annual charges from others for maintenance, depreciation, interest or return on investment applicable to headwater improvements owned by such others and made under licenses or permits from governmental agencies shall be charged in their entirety to this account.

C. The records supporting the entries to this account shall be so kept that the utility can furnish a complete explanation of the debits to this account, including the following:

- (1) Charges from others
- (2) Charges from coordinate departments

545.2 Joint Expenses--Credit

A. This account shall include such portion of the cost of operation and maintenance expenses applicable to joint facilities operated by the electric department in connection with hydraulic power generation as is charged to others or to a coordinate department. (See operating expense instruction 172.5.)

B. Annual charges against others for their proportion of maintenance expenses applicable to headwater improvements owned by the utility and made under licenses or permits from governmental agencies shall be included in this account. The amount of such annual charges, representing depreciation and interest or return on investment, shall be credited to account 454, Rent from Electric Property.

C. The records supporting the entries to this account shall be so kept that the utility can furnish a complete explanation of the credits to this account, including the following:

- (1) Charges to others
- (2) Charges to coordinate departments

D. Other Power Generation Operation

546. Operation Supervision and Engineering

This account shall include the cost of labor and expenses incurred in the general supervision and direction of the operation of other power generating stations. Direct supervision of specific activities, such as fuel handling, engine and generator operation, etc., shall be charged to the appropriate account. (See operating expense instruction 172.1.)

547. Fuel

This account shall include the cost delivered at the station (see account 150.151, Fuel Stock) of all fuel, such as gas, oil, kerosene, and gasoline used in other power generation.

548. Generation Expenses

This account shall include the cost of labor, materials used and expenses incurred in operating prime movers, generators and electric equipment in other power generating stations, to the points where electricity leaves for conversion for transmission or distribution.

ITEMS

Labor:

1. Supervising other power generation operation.
2. Operating prime movers, generators and auxiliary apparatus and switching and other electric equipment.
3. Keeping plant log and records and preparing reports on plant operations.
4. Testing, checking, cleaning, oiling and adjusting equipment.

Materials and Expenses:

5. Dynamo, motor, and generator brushes.
6. Lubricants and control system oils.
7. Water for cooling engines and generators.

549. Miscellaneous Other Power Generation Expenses

This account shall include the cost of labor, materials used and expenses incurred in the operation of other power generating stations which are not specifically provided for or are not readily assignable to other generation expense accounts.

ITEMS

Labor:

1. General clerical and stenographic work.
2. Guarding and patrolling plant and yard.
3. Building service.
4. Care of grounds, including snow removal, cutting grass, etc.
5. Miscellaneous labor.

Materials and Expenses:

6. Building service supplies.
7. First-aid supplies and safety equipment.
8. Communication service.
9. Employees' service facilities expenses.
10. Office supplies, printing and stationery.
11. Transportation expense.
12. Meals, traveling, and incidental expenses.
13. Fuel for heating.
14. Water for fire protection or general use.
15. Miscellaneous supplies, such as hand tools, drills, saw blades, files, etc.
16. Research and development expenses.

550. Rents

This account shall include all rents of property of others used, occupied or operated in connection with other power generation. (See operating expense instruction 172.3.)

Maintenance

551. Maintenance Supervision and Engineering

This account shall include the cost of labor and expenses incurred in the general supervision and direction of the maintenance of other power generating stations. Direct field supervision of specific jobs shall be charged to the appropriate maintenance account. (See operating expenses instruction 172.1.)

552. Maintenance of Structures

This account shall include the cost of labor, materials used and expenses incurred in maintenance of facilities used in other power generation, the book cost of which is includible in account 341, Structures and Improvements, and account 342, Fuel Holders, Producers and Accessories. (See operating expense instruction 172.2.)

553. Maintenance of Generating and Electric Plant

This account shall include the cost of labor, materials used and expenses incurred in maintenance of plant, the book cost of which is includible in accounts 343, Prime Movers, 344, Generators, and 345, Accessory Electric Equipment. (See operating expense instruction 172.2.)

554. Maintenance of Miscellaneous Other Power Generation Plant

This account shall include the cost of labor, materials used and expenses incurred in maintenance of other power generation plant, the book cost of which is includible in account 346, Miscellaneous Power Plant Equipment. (See operating expense instruction 172.2.)

Joint Expenses

554.1 Joint Expenses--Debit

A. This account shall include amounts for the cost of operation and maintenance payable by the electric department to others, or to a coordinate department, for joint facilities used, occupied or operated in connection with other power generation. (See operating expense instruction 172.5.)

B. The records supporting the entries to this account shall be so kept that the utility can furnish a complete explanation of the debits to this account, including the following:

- (1) Charges from others
- (2) Charges from coordinate departments

554.2 Joint Expenses--Credit

A. This account shall include such portion of the cost of operating and maintaining joint facilities operated by the electric department in connection with other power generation as is charged to others or to a coordinate department. (See operating expense instruction 172.5.)

B. The records supporting the entries to this account shall be so kept that the utility can furnish a complete explanation of the credits to this account, including the following:

- (1) Charges to others
- (2) Charges to coordinate departments

E. Other Power Supply Expenses

555. Purchased Power

A. This account shall include the cost at point of receipt by the utility of electricity purchased for resale. It shall include, also, net settlements for exchange of electricity or power, such as economy energy, off-peak energy for on-peak energy, spinning reserve capacity, etc. In addition, the account shall include the net settlements for transactions under pooling or interconnection agreements wherein there is a balancing of debits and credits for energy, capacity, etc. Distinct purchases and sales shall not be recorded as exchanges and net amounts only recorded merely because debit and credit amounts are combined in the voucher settlement.

B. The records supporting this account shall show, by months, the demands and demand charges, kilowatt-hours and prices thereof under each purchase contract and the charges and credits under each exchange or power pooling contract.

556. System Control and Load Dispatching

This account shall include the cost of labor and expenses incurred in load dispatching activities for system control. Utilities having an interconnected electric system or operating under a central authority which controls the production and dispatching of electricity may

apportion these costs to this account and accounts 561, Load Dispatching (Transmission), and 581, Load Dispatching (Distribution).

ITEMS

Labor:

1. Allocating loads to plants and interconnections with others.
2. Directing switching.
3. Arranging and controlling clearances for construction, maintenance, test and emergency purposes.
4. Controlling system voltages.
5. Recording loadings, water conditions etc.
6. Preparing operating reports and data for billing and budget purposes.
7. Obtaining reports on the weather and special events.

Expenses:

8. Communication service provided for system control purposes.
9. System record and report forms.
10. Meals, traveling, and incidental expenses.
11. Obtaining weather and special events reports.

557. Other Expenses

A. This account shall be charged with any production expenses, including expenses incurred directly in connection with the purchase of electricity, which are not specifically provided for in other production expense accounts. Charges to this account shall be supported so that a description of each type of charge will be readily available.

B. Recoveries from insurance companies, under use and occupancy provisions of policies, of amounts in reimbursement of excessive or added production costs for which the insurance company is liable under the terms of the policy shall be credited to this account.

Joint Expenses

558.1 Joint Expenses--Debit

A. This account shall include amounts payable by the electric department to others or to a coordinate department for joint facilities used, occupied or operated in connection with the production of electric energy when it is impracticable to allocate such payments to the joint production expenses--debit accounts under steam power generation, nuclear power generation, hydraulic power generation, or other power generation. (See operating expense instruction 172.5.)

B. The records supporting the entries to this account shall be so kept that the utility can furnish a complete explanation of the debits to this account, including the following:

- (1) Charges from others

(2) Charges from coordinate departments

558.2 Joint Expenses--Credit

A. This account shall include such portion of the cost of operating and maintaining joint facilities operated by the electric department in connection with the production of electric energy as is charged to others or to a coordinate department when it is impracticable to allocate such cost to the joint production expenses--credit accounts under steam power generation, nuclear power generation, hydraulic power generation, or other power generation. (See operating expense instruction 172.5.)

B. The records supporting the entries to this account shall be so kept that the utility can furnish a complete explanation of the credits to this account, including the following:

(1) Charges to others

(2) Charges to coordinate departments

2. TRANSMISSION EXPENSES

Operation

560. Operation Supervision and Engineering

This account shall include the cost of labor and expenses incurred in the general supervision and direction of the operation of the transmission system. Direct supervision of specific activities, such as station operation, line operation, etc., shall be charged to the appropriate account. (See operating expense instruction 172.1.)

561. Load Dispatching

This account shall include the cost of labor, materials used and expenses incurred in load dispatching operations pertaining to the transmission of electricity.

ITEMS

Labor:

1. Directing switching.
2. Arranging and controlling clearances for construction, maintenance, test and emergency purposes.
3. Controlling system voltages.
4. Obtaining reports on the weather and special events.
5. Preparing operating reports and data for billing and budget purposes.

Expenses:

6. Communication service provided for system control purposes.
7. System record and report forms.
8. Meals, traveling, and incidental expenses.
9. Obtaining weather and special events reports.

562. Station Expenses

This account shall include the cost of labor, materials used and expenses incurred in operating transmission substations and switching stations. If transmission station equipment is located in or adjacent to a generating station, the expenses applicable to transmission station operations shall nevertheless be charged to this account.

ITEMS

Labor:

1. Supervising station operation.
2. Adjusting station equipment where such adjustment primarily affects performance, such as regulating the flow of cooling water, adjusting current in fields of a machine or changing voltage of regulators, changing station transformer taps.
3. Inspecting, testing and calibrating station equipment for the purpose of checking its performance.
4. Keeping station log and records and preparing reports on station operation.
5. Operating switching and other station equipment.
6. Standing watch, guarding, and patrolling station and station yard.
7. Sweeping, mopping, and tidying station.
8. Care of grounds, including snow removal, cutting grass, etc.

Materials and Expenses:

9. Building service expenses.
10. Operating supplies, such as lubricants, commutator brushes, water and rubber goods.
11. Station meter and instrument supplies, such as ink and charts.
12. Station record and report forms.
13. Tool expense.
14. Transportation expenses.
15. Meals, traveling, and incidental expenses.

563. Overhead Line Expenses

564. Underground Line Expenses

A. These accounts shall include the cost of labor, materials used and expenses incurred in the operation of transmission lines.

B. If the expenses are not substantial for both overhead and underground lines, these accounts may be combined.

ITEMS

Labor:

1. Supervising line operation.
2. Inspecting and testing lightning arresters, circuit breakers, switches, and grounds.

3. Load tests of circuits.
4. Routine line patrolling.
5. Routine voltage surveys made to determine the condition or efficiency of transmission system.
6. Transferring loads, switching and reconnecting circuits and equipment for operating purposes. (Switching for construction or maintenance purposes is not includible in this account.)
7. Routine inspection and cleaning of manholes, conduit, network and transformer vaults.
8. Electrolysis surveys.
9. Inspecting and adjusting line-testing equipment, such as voltmeters, ammeters, wattmeters, etc.
10. Regulation and addition of oil or gas in high-voltage cable systems.

Materials and Expenses:

11. Transportation expenses.
 12. Meals, traveling, and incidental expenses.
 13. Tool expenses.
 14. Operating supplies, such as instrument charts, rubber goods, etc.
565. Transmission of Electricity by Others

This account shall include amounts payable to others for the transmission of the utility's electricity over transmission facilities owned by others.

566. Miscellaneous Transmission Expenses

This account shall include the cost of labor, materials used and expenses incurred in transmission map and record work, transmission office expenses, and other transmission expenses not provided for elsewhere.

ITEMS

Labor:

1. General records of physical characteristics of lines and stations, such as capacities, etc.
2. Ground resistance records.
3. Janitor work at transmission office buildings, including care of grounds, snow removal, cutting grass, etc.
4. Joint pole maps and records.
5. Line load and voltage records.
6. Preparing maps and prints.
7. General clerical and stenographic work.
8. Miscellaneous labor.

Materials and Expenses:

9. Communication service.
10. Building service supplies.
11. Map and record supplies.
12. Transmission office supplies and expenses, printing and stationery.
13. First-aid supplies.
14. Research and development expenses.

567. Rents

This account shall include rents for property of others used, occupied or operated in connection with the operation of the transmission system. Include herein rentals paid for, railroad crossings, rights-of-way, payments to governmental bodies and others for use of public or private lands, and reservations for rights-of-way; and also amounts payable for depreciation, taxes, interest or return, under joint facility agreements. (See operating expense instruction 172.3 and 172.5.)

Maintenance

568. Maintenance Supervision and Engineering

This account shall include the cost of labor and expenses incurred in the general supervision and direction of maintenance of the transmission system. Direct field supervision of specific jobs shall be charged to the appropriate maintenance account. (See operating expense instruction 172.1.)

569. Maintenance of Structures

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of structures, the book cost of which is includible in account 352, Structures and Improvements. (See operating expense instruction 172.2.)

570. Maintenance of Station Equipment

This account shall include the cost of labor, materials used and expenses incurred in maintenance of station equipment, the book cost of which is includible in account 353, Station Equipment. (See operating expense instruction 172.2.)

571. Maintenance of Overhead Lines

This account shall include the cost of labor, materials used and expenses incurred in maintenance of transmission plant, the book cost of which is includible in accounts 354, Towers and Fixtures, 355, Poles and Fixtures, 356, Overhead Conductors and Devices, and 359, Roads and Trails. (See operating expense instruction 172.2.)

ITEMS

1. Work of the following character on poles, towers and fixtures:
 - a. Installing or removing additional clamps or strain insulators on

guys in place.

b. Moving line or guy pole in relocation of the same pole or section of line.

c. Painting poles, towers, crossarms or pole extensions.

d. Readjusting and changing position of guys or braces.

e. Realigning and straightening poles, crossarms, braces, and other pole fixtures.

f. Reconditioning reclaimed pole fixtures.

g. Relocating crossarms, racks, brackets, and other fixtures on poles.

h. Repairing or realigning pins, racks, or brackets.

i. Repairing pole supported platform.

j. Repairs by others to jointly owned poles.

k. Shaving, cutting rot, or treating poles or crossarms in use or salvaged for reuse.

l. Stubbing poles already in service.

m. Supporting fixtures and conductors and transferring them to new poles during pole replacements.

n. Maintenance of pole signs, stencils, tags, etc.

2. Work of the following character on overhead conductors and devices:

a. Overhauling and repairing line cutouts, line switches, line breakers, etc.

b. Cleaning insulators and bushings.

c. Refusing cutouts.

d. Repairing line oil circuit breakers and associated relays and control wiring.

e. Repairing grounds.

f. Resagging, retying, or rearranging position or spacing of conductors.

g. Standing by phones, going to calls, cutting faulty lines clear, or similar activities at times of emergencies.

h. Sampling, testing, changing, purifying, and replenishing insulating oil.

i. Repairing line testing equipment.

j. Transferring loads, switching and reconnecting circuits and equipment for maintenance purposes.

k. Trimming trees and clearing brush.

l. Chemical treatment of right-of-way areas when occurring subsequent to construction of line.

3. Work of the following character on roads and trails:

a. Repairing roadway, bridges, etc.

b. Trimming trees and brush to maintain previous roadway clearance.

- c. Snow removal from roads and trails.
- d. Maintenance work on publicly owned roads and trails when done by utility at its expense.

572. Maintenance of Underground Lines

This account shall include the cost of labor, materials used and expenses incurred in maintenance of transmission plant, the book cost of which is includible in accounts 357, Underground Conduit, and 358, Underground Conductors and Devices. (See operating expense instruction 172.2.)

ITEMS

1. Work of the following character on underground conduit:
 - a. Cleaning ducts, manholes, and sewer connections.
 - b. Minor alterations of handholes, manholes, or vaults.
 - c. Refastening, repairing, or moving racks, ladders, or hangers in manholes, or vaults.
 - d. Plugging and shelving or replugging ducts.
 - e. Repairs to sewers and drains, walls and floors, rings and covers.
2. Work of the following character on underground conductors and devices:
 - a. Repairing oil circuit breakers, switches, cutouts, and control wiring.
 - b. Repairing grounds.
 - c. Retraining and reconnecting cables in manhole, including transfer of cables from one duct to another.
 - d. Repairing conductors and splices.
 - e. Repairing or moving junction boxes and potheads.
 - f. Refireproofing of cables and repairing supports.
 - g. Repairing electrolysis preventive devices for cables.
 - h. Repairing cable bonding systems.
 - i. Sampling, testing, changing, purifying and replenishing insulating oil.
 - j. Transferring loads, switching and reconnecting circuits and equipment for maintenance purposes.
 - k. Repairing line testing equipment.
 - l. Repairs to oil or gas equipment in high-voltage cable system and replacement of oil or gas.

573. Maintenance of Miscellaneous Transmission Plant

This account shall include the cost of labor, materials used and expenses incurred in maintenance of owned or leased plant which is assignable to transmission operations and is not provided for elsewhere. (See operating expense instruction 172.2.)

Joint Expenses

574.1 Joint Expenses--Debit

A. This account shall include amounts for the cost of operation and maintenance payable by the electric department to others, or to a coordinate department, for joint facilities used, occupied or operated in connection with the transmission of electric energy. (See operating expense instruction 172.5.)

B. The records supporting the entries to this account shall be so kept that the utility can furnish a complete explanation of the debits to this account, including the following:

- (1) Charges from others
- (2) Charges from coordinate departments

574.2 Joint Expenses--Credit

A. This account shall include such portion of the cost of operating and maintaining joint facilities operated by the electric department in connection with the transmission of electric energy as is charged to others or to a coordinate department. (See operating expense instruction 172.5.)

B. The records supporting the entries to this account shall be so kept that the utility can furnish a complete explanation of the credits to this account, including the following:

- (1) Charges to others
- (2) Charges to coordinate departments

3. DISTRIBUTION EXPENSES

Operation

580. Operation Supervision and Engineering

This account shall include the cost of labor and expenses incurred in the general supervision and direction of distribution system operations. Direct supervision of specific activities, such as station operation, line operation, meter department operation, etc., shall be charged to the appropriate account. (See operating expense instruction 172.1.)

581. Load Dispatching

This account (the keeping of which is optional with the utility) shall include the cost of labor, materials used and expenses incurred in load dispatching operations pertaining to the distribution of electricity.

ITEMS

Labor:

1. Directing switching.
2. Arranging and controlling clearances for construction, maintenance, test and emergency purposes.
3. Controlling system voltages.

4. Preparing operating reports.
5. Obtaining reports on the weather and special events.

Expenses:

6. Communication service provided for system control purposes.
7. System record and report forms.
8. Meals, traveling, and incidental expenses.

Note: If this account is not kept by the utility, all load dispatching labor and expenses shall be included in transmission expenses, account 561, Load Dispatching.

582. Station Expenses

This account shall include the cost of labor, materials used and expenses incurred in the operation of distribution substations.

ITEMS

Labor:

1. Supervising station operation.
2. Adjusting station equipment where such adjustment primarily affects performance, such as regulating the flow of cooling water, adjusting current in fields of a machine, changing voltage of regulators, or changing station transformer taps.
3. Keeping station log and records and preparing reports on station operation.
4. Inspecting, testing, and calibrating station equipment for the purpose of checking its performance.
5. Operating switching and other station equipment.
6. Standing watch, guarding and patrolling station and station yard.
7. Sweeping, mopping, and tidying station.
8. Care of grounds, including snow removal, cutting grass, etc.

Materials and Expenses:

9. Building service expenses.
10. Operating supplies, such as lubricants, commutator brushes, water, and rubber goods.
11. Station meter and instrument supplies, such as ink and charts.
12. Station record and report forms.
13. Tool expense.
14. Transportation expense.
15. Meals, traveling, and incidental expenses.

Note: If the utility owns storage battery equipment used for supplying electricity to customers in periods of emergency, the cost of operating labor and of supplies, such as acid, gloves, hydrometers, thermometers, soda, automatic cell fillers, acid proof shoes, etc., shall be included in this account. If significant in amount, a separate subdivision shall

be maintained for such expenses.

583. Overhead Line Expenses

584. Underground Line Expenses

These accounts shall include, respectively, the cost of labor, materials used and expenses incurred in the operation of overhead and underground distribution lines.

ITEMS

Labor:

1. Supervising line operation.
2. Changing line transformer taps.
3. Inspecting and testing lightning arresters, line circuit breakers, switches, and grounds.
4. Inspecting and testing line transformers for the purpose of determining load, temperature, or operating performance.
5. Patrolling lines.
6. Load tests and voltage surveys of feeders, circuits, and line transformers.
7. Removing line transformers and voltage regulators with or without replacement.
8. Installing line transformers or voltage regulators with or without change in capacity provided that the cost of first installation of these items is included in account 368, Line Transformers.
9. Voltage surveys, either routine or upon request of customers, including voltage tests at customer's main switch.
10. Transferring loads, switching and reconnecting circuits and equipment for operation purposes.
11. Electrolysis surveys.
12. Inspecting and adjusting line testing equipment.

Materials and Expenses:

13. Tool expense.
14. Transportation expense.
15. Meals, traveling, and incidental expense.
16. Operating supplies, such as instrument charts, rubber goods, etc.

585. Street Lighting and Signal System Expenses

This account shall include the cost of labor, materials used and expenses incurred in: (1) the operation of street lighting and signal system plant which is owned or leased by the utility; and (2) the operation and maintenance of such plant owned by customers where such work is done regularly as a part of the street lighting and signal system service.

ITEMS

Labor:

1. Supervising street lighting and signal systems operation.
2. Replacing lamps and incidental cleaning of glassware and fixtures in connection therewith.
3. Routine patrolling for lamp outages, extraneous nuisances or encroachments, etc.
4. Testing lines and equipment including voltage and current measurement.
5. Winding and inspection of time switch and other controls.

Materials and Expenses:

6. Street lamp renewals.
7. Transportation and tool expense.
8. Meals, traveling, and incidental expenses.

586. Meter Expenses

This account shall include the cost of labor, materials used and expenses incurred in the operation of customer meters and associated equipment.

ITEMS

Labor:

1. Supervising meter operation.
2. Clerical work on meter history and associated equipment record cards, test cards and reports.
3. Disconnecting and reconnecting, removing and reinstalling, sealing and unsealing meters and other metering equipment in connection with initiating or terminating services including the cost of obtaining meter readings, if incidental to such operation.
4. Consolidating meter installations due to elimination of separate meters for different rates of service.
5. Changing or relocating meters, instrument transformers, time switches, and other metering equipment.
6. Resetting time controls, checking operation of demand meters and other metering equipment, when done as an independent operation.
7. Inspecting and adjusting meter testing equipment.
8. Inspecting and testing meters, instrument transformers, time switches, and other metering equipment on premises or in shops excluding inspecting and testing incidental to maintenance.

Materials and Expenses:

9. Meter seals and miscellaneous meter supplies.
10. Transportation expenses.
11. Meals, traveling, and incidental expenses.
12. Tool expenses.

Note: The cost of the first setting and testing of a meter is chargeable to utility plant account 370, Meters.

587. Customer Installations Expenses

This account shall include the cost of labor, materials used and expenses incurred in work on customer installations in inspecting premises and in rendering services to customers of the nature of those indicated by the list of items hereunder.

ITEMS

Labor:

1. Supervising customer installations work.
2. Inspecting premises, including check of wiring for code compliance.
3. Investigating, locating, and clearing grounds on customers' wiring.
4. Investigating service complaints, including load tests of motors and lighting and power circuits on customers' premises; field investigations of complaints on bills or of voltage.
5. Installing, removing, renewing, and changing lamps and fuses.
6. Radio, television and similar interference work including erection of new aerials on customers' premises and patrolling of lines, testing of lightning arresters, inspection of pole hardware, etc., and examination on or off premises of customers' appliances, wiring, or equipment to locate cause of interference.
7. Installing, connecting, reinstalling or removing leased property on customers' premises.
8. Testing, adjusting, and repairing customers' fixtures and appliances in shop or on premises.
9. Cost of changing customers' equipment due to changes in service characteristics.
10. Investigation of current diversion including setting and removal of check meters and securing special readings thereon; special calls by employees in connection with discovery and settlement of current diversion; changes in customer wiring and any other labor cost identifiable as caused by current diversion.

Materials and Expenses:

11. Lamp and fuse renewals.
12. Materials used in servicing customers' fixtures, appliances and equipment.
13. Power, light, heat, telephone, and other expenses of appliance repair department.
14. Tool expense.
15. Transportation expense, including pickup and delivery charges.
16. Meals, traveling, and incidental expenses.

17. Rewards paid for discovery of current diversion.

Note A: Amounts billed customers for any work, the cost of which is charged to this account, shall be credited to this account. Any excess over costs resulting therefrom shall be transferred to account 451, Miscellaneous Service Revenues.

Note B: Do not include in this account expenses incurred in connection with merchandising, jobbing and contract work.

588. Miscellaneous Distribution Expenses

This account shall include the cost of labor, materials used and expenses incurred in distribution system operation not provided for elsewhere.

ITEMS

Labor:

1. General records of physical characteristics of lines and substations, such as capacities, etc.
2. Ground resistance records.
3. Joint pole maps and records.
4. Distribution system voltage and load records.
5. Preparing maps and prints.
6. Service interruption and trouble records.
7. General clerical and stenographic work except that chargeable to account 586, Meter Expenses.
8. Operating records covering poles, transformers, manholes, cables, and other distribution facilities. Exclude meter records chargeable to account 586, Meter Expenses, and station records chargeable to account 582, Station Expenses, and stores records chargeable to account 150.163, Stores Expenses Undistributed.
9. Janitor work at distribution office buildings including snow removal, cutting grass, etc.

Materials and Expenses:

10. Communication service.
11. Building service expenses.
12. Miscellaneous office supplies and expenses, printing, and stationery, maps and records and first-aid supplies.
13. Research and development expenses.

589. Rents

This account shall include rents for property of others used, occupied or operated in connection with the operation of the distribution system. Include herein rentals paid for railroad crossings, rights-of-way, payments to governmental bodies and others for use of public or private lands, reservations for rights-of-way; and also amounts payable for

depreciation, taxes, interest or return, under joint facility agreement.
(See operating expense instruction 172.3 and 172.5.)

Maintenance

590. Maintenance Supervision and Engineering

This account shall include the cost of labor and expenses incurred in the general supervision and direction of maintenance of the distribution system. Direct field supervision of specific jobs shall be charged to the appropriate maintenance account. (See operating expense instruction 172.1.)

591. Maintenance of Structures

This account shall include the cost of labor, materials used and expenses incurred in maintenance of structures, the book cost of which is includible in account 361, Structures and Improvements. (See operating expense instruction 172.2.)

592. Maintenance of Station Equipment

This account shall include the cost of labor, materials used and expenses incurred in maintenance of distribution plant, the book cost of which is includible in accounts 362, Station Equipment, and 363, Storage Battery Equipment. (See operating expense instruction 172.2.)

593. Maintenance of Overhead Lines

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of overhead distribution line facilities, the book cost of which is includible in accounts 364, Poles, Towers and Fixtures, 365, Overhead Conductors and Devices, and 369, Services. (See operating expense instruction 172.2.)

ITEMS

1. Work of the following character on poles, towers, and fixtures:
 - a. Installing additional clamps or removing clamps or strain insulators on guys in place.
 - b. Moving line or guy pole in relocation of pole or section of line.
 - c. Painting poles, towers, crossarms, or pole extensions.
 - d. Readjusting and changing position of guys or braces.
 - e. Realigning and straightening poles, crossarms, braces, pins, racks, brackets, and other pole fixtures.
 - f. Reconditioning reclaimed pole fixtures.
 - g. Relocating crossarms, racks, brackets, and other fixtures on poles.
 - h. Repairing pole supported platform.
 - i. Repairs by others to jointly owned poles.
 - j. Shaving, cutting rot, or treating poles or crossarms in use or salvaged for reuse.
 - k. Stubbing poles already in service.

1. Supporting conductors, transformers, and other fixtures and transferring them to new poles during pole replacement.
 - m. Maintaining pole signs, stencils, tags, etc.
2. Work of the following character on overhead conductors and devices:
 - a. Overhauling and repairing line cutouts, line switches, line breakers, and capacitor installations.
 - b. Cleaning insulators and bushings.
 - c. Refusing line cutouts.
 - d. Repairing line oil circuit breakers and associated relays and control wiring.
 - e. Repairing grounds.
 - f. Resagging, retying, or rearranging position or spacing of conductors.
 - g. Standing by phones, going to calls, cutting faulty lines clear, or similar activities at times of emergency.
 - h. Sampling, testing, changing, purifying, and replenishing insulating oil.
 - i. Transferring loads, switching, and reconnecting circuits and equipment for maintenance purposes.
 - j. Repairing line testing equipment.
 - k. Trimming trees and clearing brush.
 - l. Chemical treatment of right-of-way area when occurring subsequent to construction of line.
3. Work of the following character on overhead services:
 - a. Moving position of service either on pole or on customers' premises.
 - b. Pulling slack in service wire.
 - c. Retying service wire.
 - d. Refastening or tightening service bracket.

594. Maintenance of Underground Lines

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of underground distribution line facilities, the book cost of which is includible in accounts 366, Underground Conduit, 367, Underground Conductors and Devices, and 369, Services. (See operating expense instruction 172.2.)

ITEMS

1. Work of the following character on underground conduit:
 - a. Cleaning ducts, manholes, and sewer connections.
 - b. Moving or changing position of conduit or pipe.
 - c. Minor alterations of handholes, manholes, or vaults.
 - d. Refastening, repairing, or moving racks, ladders, or hangers in

manholes or vaults.

e. Plugging and shelving ducts.

f. Repairs to sewers, drains, walls, and floors, rings and covers.

2. Work of the following character on underground conductors and devices:

a. Repairing circuit breakers, switches, cutouts, network protectors, and associated relays and control wiring.

b. Repairing grounds.

c. Retraining and reconnecting cables in manholes including transfer of cables from one duct to another.

d. Repairing conductors and splices.

e. Repairing or moving junction boxes and potheads.

f. Refireproofing cables and repairing supports.

g. Repairing electrolysis preventive devices for cables.

h. Repairing cable bonding systems.

i. Sampling, testing, changing, purifying, and replenishing insulating oil.

j. Transferring loads, switching and reconnecting circuits and equipment for maintenance purposes.

k. Repairing line testing equipment for maintenance purposes.

l. Repairing oil or gas equipment in high voltage cable systems and replacement of oil or gas.

3. Work of the following character on underground services:

a. Cleaning ducts.

b. Repairing any underground service plant.

595. Maintenance of Line Transformers

This account shall include the cost of labor, materials used and expenses incurred in maintenance of distribution line transformers, the book cost of which is includible in account 368, Line Transformers. (See operating expense instruction 172.2.)

596. Maintenance of Street Lighting and Signal Systems

This account shall include the cost of labor, materials used and expenses incurred in maintenance of plant, the book cost of which is includible in account 373, Street Lighting and Signal Systems. (See operating expense instruction 172.2.)

597. Maintenance of Meters

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of meters and meter testing equipment, the book cost of which is includible in accounts 370, Meters, and 395, Laboratory Equipment, respectively. (See operating expense instruction 172.2.)

598. Maintenance of Miscellaneous Distribution Plant

A. This account shall include the cost of labor, materials used and expenses incurred in maintenance of plant, the book cost of which is includible in account 371, Installations on Customers' Premises, and any other plant the maintenance of which is assignable to the distribution function and is not provided for elsewhere. (See operating expense instruction 172.2.)

B. This account shall be subdivided so as to show separately the cost of maintenance (when the cost is borne by the utility) of electric property leased to customers, the book cost of which is included in account 372, Leased Property on Customers' Premises.

Joint Expenses

599.1 Joint Expenses--Debit

A. This account shall include amounts for the cost of operation and maintenance payable by the electric department to others, or to a coordinate department, for joint facilities used, occupied or operated in connection with the distribution of electric energy. (See operating expense instruction 172.5.)

B. The records supporting the entries to this account shall be so kept that the utility can furnish a complete explanation of the debits to this account, including the following:

- (1) Charges from others
- (2) Charges from coordinate departments

599.2 Joint Expenses--Credit

A. This account shall include such portion of the cost of operating and maintaining joint facilities operated by the electric department in connection with the distribution of electric energy as is charged to others or to a coordinate department. (See operating expense instruction 172.5.)

B. The records supporting the entries to this account shall be so kept that the utility can furnish a complete explanation of the credits to this account, including the following:

- (1) Charges to others
- (2) Charges to coordinate departments

4. CUSTOMER ACCOUNTS EXPENSES

Operation

901. Supervision

This account shall include the cost of labor and expenses incurred in the general direction and supervision of customer accounting and collecting activities. Direct supervision of a specific activity shall be charged to account 902, Meter Reading Expenses, or account 903,

Customer Records and Collection Expenses, as appropriate. (See operating expense instruction 172.1.)

902. Meter Reading Expenses

This account shall include the cost of labor, materials used and expenses incurred in reading customer meters, and determining consumption when performed by employees engaged in reading meters.

ITEMS

Labor:

1. Addressing forms for obtaining meter readings by mail.
2. Changing and collecting meter charts used for billing purposes.
3. Inspecting time clocks, checking seals, etc., when performed by meter readers and the work represents a minor activity incidental to regular meter reading routine.
4. Reading meters, including demand meters, and obtaining load information for billing purposes. Exclude and charge to account 586, Meter Expenses, or to account 903, Customer Records and Collection Expenses, as applicable, the cost of obtaining meter readings, first and final, if incidental to the operation of removing or resetting, sealing, or locking, and disconnecting or reconnecting meters.
5. Computing consumption from meter reader's book or from reports by mail when done by employees engaged in reading meters.
6. Collecting from prepayment meters when incidental to meter reading.
7. Maintaining record of customers' keys.
8. Computing estimated or average consumption when performed by employees engaged in reading meters.

Materials and Expenses:

9. Badges, lamps, and uniforms.
10. Demand charts, meter books and binders and forms for recording readings, but not the cost of preparation.
11. Postage and supplies used in obtaining meter readings by mail.
12. Transportation, meals, and incidental expenses.

903. Customer Records and Collection Expenses

This account shall include the cost of labor, materials used and expenses incurred in work on customer applications, contracts, orders, credit investigations, billing and accounting, collections and complaints.

ITEMS

Labor:

1. Receiving, preparing, recording and handling routine orders for service, disconnections, transfers or meter tests initiated by the customer, excluding the cost of carrying out such orders, which is

chargeable to the account appropriate for the work called for by such orders.

2. Investigations of customers' credit and keeping of records pertaining thereto, including records of uncollectible accounts written off.

3. Receiving, refunding or applying customer deposits and maintaining customer deposits, line extension, and other miscellaneous records.

4. Checking consumption shown by meter readers' reports where incidental to preparation of billing data.

5. Preparing address plates and addressing bills and delinquent notices.

6. Preparing billing data.

7. Operating billing and bookkeeping machines.

8. Verifying billing records with contracts or rate schedules.

9. Preparing bills for delivery, and mailing or delivering bills.

10. Collecting revenues, including collection from prepayment meters unless incidental to meter reading operations.

11. Balancing collections, preparing collections for deposit, and preparing cash reports.

12. Posting collections and other credits or charges to customer accounts and extending unpaid balances.

13. Balancing customer accounts and controls.

14. Preparing, mailing, or delivering delinquent notices and preparing reports of delinquent accounts.

15. Final meter reading of delinquent accounts when done by collectors incidental to regular activities.

16. Disconnecting and reconnecting service because of nonpayment of bills.

17. Receiving, recording, and handling of inquiries, complaints, and requests for investigations from customers, including preparation of necessary orders, but excluding the cost of carrying out such orders, which is chargeable to the account appropriate for the work called for by such orders.

18. Statistical and tabulating work on customer accounts and revenues, but not including special analyses for sales department, rate department, or other general purposes, unless incidental to regular customer accounting routines.

19. Preparing and periodically rewriting meter reading sheets.

20. Determining consumption and computing estimated or average consumption when performed by employees other than those engaged in reading meters.

Materials and Expenses:

21. Address plates and supplies.
22. Cash overages and shortages.
23. Commissions or fees to others for collecting.
24. Payments to credit organizations for investigations and reports.
25. Postage.
26. Transportation expenses, including transportation of customer bills and meter books under centralized billing procedure.
27. Transportation, meals, and incidental expenses.
28. Bank charges, exchange, and other fees for cashing and depositing customers' checks.
29. Forms for recording orders for services, removals, etc.
30. Charges made direct or apportioned through clearing accounts for costs covering the use of electronic data processing equipment and other mechanical equipment, whether owned or rented from others, properly assignable to this account in connection with the customer records and collection functions.

Note: The cost of work on meter history and meter location records is chargeable to account 586, Meter Expenses.

904. Uncollectible Accounts

This account shall be charged with amounts sufficient to provide for losses from uncollectible utility revenues. Concurrent credits shall be made to account 144, Accumulated Provision for Uncollectible Accounts--Credit. Losses from uncollectible accounts shall be charged to account 144.

905. Miscellaneous Customer Accounts Expenses

This account shall include the cost of labor, materials used and expenses incurred not provided for in other accounts.

ITEMS

Labor:

1. General clerical and stenographic work.
2. Miscellaneous labor.

Materials and Expenses:

3. Communication service.
4. Miscellaneous office supplies and expenses and stationery and printing other than those specifically provided for in accounts 902 and 903.

906. Rents

This account shall include rents of property of others used in connection with customers' accounting and collecting. (See account 903, and operating expense instructions 172.3 and 172.5.)

5. CUSTOMER SERVICE EXPENSES

Operation

909. Supervision

This account shall include the cost of labor and expenses incurred in the general direction and supervision of customer service activities, the object of which is to promote safe, efficient and economical use of the utility's service. Direct supervision of a specific activity, such as customer assistance and informational advertising shall be charged to the account wherein the costs of such activity are included. (See operating expense instruction 172.1.)

910. Customer Assistance Expenses

A. This account shall include the cost of labor, materials used and expenses incurred in providing instructions or assistance to present customers, the object of which is to promote safe, efficient and economical use of the utility's service.

B. Wherever allocations are used to arrive at the amount to be included in this account and account 916, Demonstrating and Selling Expenses, the method and basis of allocation shall be reflected by underlying records.

ITEMS

Labor:

1. Direct supervision of department.
2. Processing customer inquiries relating to the proper use of present electric equipment, the replacement of such equipment and information related to such equipment.
3. Advice directed to customers as to how they may achieve the best heating, lighting and safety results with respect to existing electric equipment.
4. Demonstrations, exhibits, lectures and other programs designed to instruct customers in the economical or efficient use of electric service.
5. Engineering and technical advice requested by customers without prior solicitation by the utility in connection with the present or future use of utility service.

Materials and Expenses:

6. Supplies and expenses pertaining to demonstrations, exhibits, lectures and other programs.
7. Loss in value on equipment and appliances used for demonstration purposes.
8. Office supplies and expenses.
9. Transportation, meals and incidental expenses.

Note: Do not include in this account expenses that are already provided for in accounts 587, Customer Installations Expenses and 416, Costs and Expenses of Merchandising, Jobbing and Contract Work.

911. Informational Advertising Expenses

A. This account shall include the cost of labor, materials used and expenses incurred in advertising activities which primarily convey concrete information as to what the utility urges or suggests customers should do in utilizing electric service to protect health and safety, to promote environmental protection, to utilize their electric equipment safely and economically, or to conserve electric energy. Include also in this account advertising activities relating to actions by the electric utility which bear directly on its provision of service to the customer.

B. Entries relating to informational advertising included in this account shall contain or refer to supporting documents which identify the specific advertising message. If references are used, copies or scripts of the advertising message shall be readily available.

C. Where informational advertising is undertaken by an association on behalf of its members, or by a holding company on behalf of its subsidiaries, the amount of expense for such advertising charged to any member or subsidiary which is a New York electric utility and included in this account, shall be determined in accordance with the text of this account as set forth herein.

ITEMS

Labor:

1. Direct supervision of informational advertising activities.
2. Preparing informational advertising materials for newspapers, periodicals, billboards, etc., and preparing and conducting informational motion pictures, radio and television programs.
3. Preparing informational booklets, bulletins, etc., used in direct mail advertising.
4. Preparing informational window and other displays.
5. Clerical and stenographic work.
6. Investigating advertising agencies and media and conducting negotiations in connection with the placement and subject matter of informational advertising.

Materials and Expenses:

7. Advertising in newspapers, periodicals, billboards, radio, etc., for informational advertising purposes.
8. Fees and expenses of advertising agencies and commercial artists related to informational advertising.
9. Postage on direct mail informational advertising.

10. Printing of informational booklets, dodgers, bulletins, etc.
 11. Supplies and expenses in preparing informational advertising materials.
 12. Office supplies and expenses.
 13. Novelties for general distribution.
- Below are examples of the advertising includible in this account:
14. Instructions in the proper use of equipment, owned by the utility or the customer, which makes use of the utility's service.
 15. Information as to new rates, billing practices, new inspection or meter reading schedules.
 16. Notification of emergency conditions and procedures to be followed during the emergency.
 17. Advice concerning hazards associated with the utility's electric service.
 18. Appeals for conservation of power with suggestions of measures the customer may take.

Note: Exclude from this account and charge to account 930.2, Miscellaneous General Expenses, the cost of publication of stockholder reports, dividend notices, bond redemption notices, financial statements, and other notices of a general corporate character. Exclude also all expenses of promotional institutional or goodwill, and political advertising. (See account 917, Promotional Advertising Expenses, account 930.1, Institutional or Goodwill Advertising Expenses, and account 426.4, Expenditures for Certain Civic, Political and Related Activities.)

912. Miscellaneous Customer Service Expenses

This account shall include the cost of labor, materials used and expenses incurred in connection with customer service activities which are not includible in other customer service expense accounts.

ITEMS

Labor:

1. General clerical and stenographic work not assigned to specific functions.
2. Miscellaneous labor.

Materials and Expenses:

3. Communication service.
4. Printing, postage and office supplies expenses applicable to customer service activities, except those chargeable to account 911, Informational Advertising Expenses.

913. Rents

This account shall include rents properly includible in operating

expenses for property of others used by customer service organizations for customer service activities. (See operating expenses instructions 172.3 and 172.5)

6. SALES PROMOTION EXPENSES

Operation

915. Supervision

This account shall include the cost of labor and expenses incurred in the general direction and supervision of sales promotion activities, except merchandising, the object of which is to promote or retain the use of utility services by present or prospective customers. Direct supervision of a specific activity, such as, demonstrating, selling or promotional advertising shall be charged to the account wherein the costs of such activity are included. (See operating expense instruction 172.1)

916. Demonstrating and Selling Expenses

A. This account shall include the cost of labor, materials used and expenses incurred in promotional, demonstrating, and selling activities, except by merchandising, designed to promote or retain the use of utility services by present or prospective customers.

B. Wherever allocations are used to arrive at the amount to be included in this account and account 910, Customer Assistance Expenses, the method and basis of allocation shall be reflected by underlying records.

ITEMS

Labor:

1. Demonstrating uses of utility services.
2. Conducting cooking schools, preparing recipes, and related home service activities.
3. Exhibitions, displays, lectures, and other programs designed to promote use of utility services.
4. Experimental and developmental work in connection with new and improved appliances and equipment, prior to general public acceptance.
5. Solicitation of new customers or of additional business from old customers, including commissions paid employees.
6. Engineering and technical advice to present or prospective customers in connection with promoting or retaining the use of utility services.
7. Special customer canvasses when their primary purpose is the retention of business or the promotion of new business.

Materials and Expenses:

8. Cooperative promotions with appliance dealers, builders, and

electrical and plumbing contractors designed to promote or retain the use of utility service.

9. Inducements offered directly to customers and incentive awards given to employees in connection with promoting or retaining the use of utility services.

10. Supplies and expenses pertaining to demonstration and experimental and developmental activities.

11. Booth and temporary space rental.

12. Loss in value on equipment and appliances used for demonstration purposes.

13. Transportation, meals and incidental expenses.

Note: A separate subdivision of this account shall be maintained to record the cost of programs designed primarily to induce industry to locate within the company's service territory.

917. Promotional Advertising Expenses

A. This account shall include the cost of labor, materials used and expenses incurred in advertising designed to promote or retain the use of utility service, except advertising the sale of merchandise by the utility.

B. Entries relating to promotional advertising included in this account shall contain or refer to supporting documents which identify the specific advertising message. If references are used, copies or scripts of the advertising message shall be readily available.

C. Where promotional advertising is undertaken by an association on behalf of its members, or by a holding company on behalf of its subsidiaries, the amount of expense for such advertising charged to any member or subsidiary which is a New York electric utility and included in this account, shall be determined in accordance with the text of his account as set forth herein.

ITEMS

Labor:

1. Direct supervision of sales promotional activities.
2. Preparing promotional advertising material for newspapers, periodicals, billboards, etc., and preparing and conducting promotional motion pictures, radio and television programs.
3. Preparing booklets, bulletins, etc., used in direct mail promotional advertising.
4. Preparing window and other displays.
5. Clerical and stenographic work.
6. Investigating advertising agencies and media and conducting negotiations in connection with the placement and subject matter of

promotional advertising.

Materials and Expenses:

7. Promotional advertising in newspapers, periodicals, billboards, radios, etc.

8. Promotional advertising matters such as posters, bulletins, booklets and related items.

9. Fees and expenses of advertising agencies and commercial artists related to promotional advertising.

10. Novelties for general distribution.

11. Postage on direct mail promotional advertising.

12. Premiums distributed generally, such as recipe books, etc., when not offered as inducement to purchase appliances.

13. Printing of promotional booklets, dodgers, bulletins, etc.

14. Supplies and expenses in preparing promotional advertising materials.

15. Office supplies and expenses.

Note A: The cost of advertisements which set forth the value or advantages of utility service without reference to specific appliances, or, if reference is made to appliances, invites the reader to purchase appliances from his dealer, or refer to appliances not carried for sale by the utility, shall be considered sales promotion advertising and charged to this account. However, advertisements which are limited to specific makes of appliances sold by the utility and prices, terms, etc., thereof, without referring to the value or advantages of utility service, shall be considered as merchandise advertising and the cost shall be charged to Account 416, Costs and Expenses of Merchandising, Jobbing and Contract Work.

Note B: Advertisements which substantially mention or refer to the value or advantages of utility service, together with specific reference to makes of appliances sold by the utility and the price, terms, etc., thereof, and designed for the joint purpose of increasing the use of utility service and the sales of appliances shall be considered as a combination advertisement and the costs shall be distributed between this account and account 416, Costs and Expenses of Merchandising, Jobbing and Contract Work on the basis of space, time, or other proportional factors.

Note C: A separate subdivision of this account shall be maintained to record costs of advertising designed primarily to induce industry to locate within the company's service territory.

918. Miscellaneous Sales Promotion Expenses

This account shall include the cost of labor, materials used and

expenses incurred in connection with sales promotion activities, except merchandising, which are not includible in other sales promotion expense accounts.

ITEMS

Labor:

1. General clerical and stenographic work not assigned to specific functions.
2. Special analysis of customer accounts and other statistical work for sales purposes not a part of the regular customer accounting and billing routine.
3. Miscellaneous Labor.

Materials and Expenses:

4. Communication service.
5. Printing, postage and office supplies and expenses applicable to sales promotion activities, except those chargeable to account 917, Promotional Advertising Expenses.

919. Rents

This account shall include rents properly includible in operating expenses for property of others used by the sales promotion organizations for promotional, demonstrating, and sales promotional activities except merchandising. (See operating expenses instructions 172.3 and 172.5)

Note: Rent expense in connection with merchandising is includible in account 416, Costs and Expenses of Merchandising, Jobbing and Contract Work.

7. ADMINISTRATIVE AND GENERAL EXPENSES

Operation

920. Administrative and General Salaries

A. This account shall include the compensation (salaries, bonuses, and other consideration for services, but not including directors' fees) of officers, executives, and other employees of the utility properly chargeable to utility operations and not chargeable directly to a particular operating function.

B. This account may be subdivided in accordance with a classification appropriate to the departmental or other functional organization of the utility.

921. Office Supplies and Expenses

A. This account shall include office supplies and expenses incurred in connection with the general administration of the utility's operations which are assignable to specific administrative or general departments and are not specifically provided for in other accounts. This includes

the expenses of the various administrative and general departments, the salaries and wages of which are includible in account 920.

B. This account may be subdivided in accordance with a classification appropriate to the departmental or other functional organization of the utility.

ITEMS

1. Automobile service, including charges through clearing account.
2. Bank messenger and service charges.
3. Books, periodicals, bulletins and subscriptions to newspapers, newsletters, tax services, etc.
4. Building service expenses for administrative and general purposes.
5. Communication service expenses.
6. Cost of individual items of office equipment used by general departments which are of small value or short life.
7. Membership fees and dues in trade, technical, and professional associations paid by utility for employees. (Company memberships are includible in account 930.2.)
8. Office supplies and expenses.
9. Payment of court costs, witness fees, and other expenses of legal department.
10. Postage, printing and stationery.
11. Meals, traveling, and incidental expenses.

Note: Office expenses which are clearly applicable to any group of operating expenses other than the administrative and general group shall be included in the appropriate account in such group. Further, general expenses which apply to the utility as a whole rather than to a particular administrative function shall be included in account 930.2, Miscellaneous General Expenses.

922. Administrative Expenses Transferred--Credit

This account shall be credited with administrative expenses recorded in accounts 920 and 921 which are transferred to construction costs or to nonutility accounts. (See electric plant instruction 168.4.)

923. Outside Services Employed

A. This account shall include the fees and expenses of professional consultants and others for general services which are not applicable to a particular operating function or to other accounts. It shall include also the pay and expenses of persons engaged for a special or temporary administrative or general purpose in circumstances where the person so engaged is not considered as an employee of the utility.

B. This account shall be so maintained as to permit ready summarization according to the nature of service and the person

furnishing the same.

ITEMS

1. Fees, pay and expenses of accountants and auditors, actuaries, appraisers, attorneys, engineering consultants, management consultants, negotiators, public relations counsel, tax consultants, etc.

2. Supervision fees and expenses paid under contracts for general management services.

Note: Do not include inspection and brokerage fees and commissions chargeable to other accounts or fees and expenses in connection with security issues which are includible in the expenses of issuing securities.

924. Property Insurance

A. This account shall include the cost of insurance or reserve accruals to protect the utility against losses and damages to owned or leased property used in its utility operations. It shall include also the cost of labor and related supplies and expenses incurred in property insurance activities.

B. Recoveries from insurance companies or others for property damages shall be credited to the account charged with the cost of the damage. If the damaged property has been retired, the credit shall be to the appropriate account for accumulated provision for depreciation.

C. Records shall be kept so as to show the amount of coverage for each class of insurance carried, the property covered, and the applicable premiums. Any dividends distributed by mutual insurance companies shall be credited to the accounts to which the insurance premiums were charged.

ITEMS

1. Premiums payable to insurance companies for fire, storm, burglary, boiler explosion, lightning, fidelity, riot, and similar insurance.

2. Amounts credited to account 261, Property Insurance Reserve, for similar protection.

3. Special costs incurred in procuring insurance.

4. Insurance inspection service.

5. Insurance counsel, brokerage fees, and expenses.

Note A: The cost of insurance or reserve accruals capitalized shall be charged to construction either directly or by transfer to construction work orders from this account.

Note B: The cost of insurance or reserve accruals for the following classes of property shall be charged as indicated:

(1) Materials and supplies and stores equipment, to account 150.163, Stores Expense Undistributed or appropriate materials account.

(2) Transportation and other general equipment to appropriate clearing accounts that may be maintained.

(3) Electric plant leased to others, to account 413, Expenses of Electric Plant Leased to Others.

(4) Nonutility property, to the appropriate nonutility income account.

(5) Merchandise and jobbing property, to account 915, Costs and Expenses of Merchandising, Jobbing and Contract Work.

Note C: The cost of labor and related supplies and expenses of administrative and general employees, who are only incidentally engaged in property insurance work, may be included in accounts 920 and 921, as appropriate.

925. Injuries and Damages

A. This account shall include the cost of insurance or reserve accruals to protect the utility against injuries and damages claims of employees and others, losses of such character not covered by insurance, and expenses incurred in settlement of injuries and damages claims. It shall also include the cost of labor and related supplies and expenses incurred in injuries and damages activities.

B. Reimbursements from insurance companies or others for expenses charged hereto on account of injuries and damages and insurance dividends or refunds shall be credited to this account.

ITEMS

1. Premiums payable to insurance companies for protection against claims from injuries and damages by employees or others, such as public liability, property damages, casualty, employee liability, etc., and amounts credited to account 262, Injuries and Damages Reserve, for similar protection.

2. Losses not covered by insurance or reserve accruals on account of injuries or death to employees or others and damages to the property of others.

3. Fees and expenses of claim investigators.

4. Payment of awards to claimants for court costs and attorneys' services.

5. Medical and hospital service and expenses for employees as the result of occupational injuries, or resulting from claims of others.

6. Compensation payments under workmen's compensation laws.

7. Compensation paid while incapacitated as the result of occupational injuries. (See note A.)

8. Cost of safety, accident prevention and similar educational activities.

Note A: Payments to or in behalf of employees for accident or death

benefits, hospital expenses, medical supplies or for salaries while incapacitated for service or on leave of absence beyond periods normally allowed, when not the result of occupational injuries, shall be charged to account 926, Employee Pensions and Benefits.

Note B: The cost of injuries and damages or reserve accruals capitalized shall be charged to construction directly or by transfer to construction work orders from this account.

Note C: Exclude here from the time and expenses of employees (except those engaged in injuries and damages activities) spent in attendance at safety and accident prevention educational meetings, if occurring during the regular work period.

Note D: The cost of labor and related supplies and expenses of administrative and general employees, who are only incidentally engaged in injuries and damages activities, may be included in accounts 920 and 921, as appropriate.

Note E: Losses or insurance premiums paid in connection with transportation and garage equipment shall be charged to the appropriate accounts for transportation expenses.

926. Employees Pensions and Benefits

This account shall include employee pensions, welfare expenses and the costs incurred in the administration of the pension and welfare department. The account shall be maintained according to subaccounts shown below:

926.1 Employee Pensions

A. This account shall include pensions payable currently to retired employees or their beneficiaries. (See general instruction 166.16.)

B. This account shall include the cost of advance provision for pensions to be paid to retired employees or their beneficiaries. Such cost represents amounts payable to a trust fund or to an insurance company where the following conditions are met:

- (1) Pension plan is definite and formally adopted.
- (2) Amounts paid are irrevocably dedicated to pension purposes.
- (3) A program of advance provision based on actuarial studies or on other recognized and acceptable systematic method of computation or allocation is undertaken.

C. This account shall include any payments under the pension plan, in addition to the current accruals specified in paragraph B, such as payments computed in relation to a prior service period, but such amounts may, with the approval of the commission, be spread over a period of years, if their inclusion when paid would seriously distort the expenses of that year.

D. Incidental benefits payable on withdrawal or death under a definite and formally adopted pension plan may be considered as pensions within the intent of paragraphs A and B.

Note A: Credit to this account the portion of pension costs which is applicable to nonutility operations, or which is charged to construction and retirement work orders, and to clearing or other accounts unless such amounts are distributed directly to the accounts concerned in the first instance.

Note B: Social security and unemployment benefit taxes shall be included in account 408, Taxes Other Than Income Taxes, or other appropriate accounts. (See account 408, paragraph D.)

Note C: Each utility making charges to this subaccount under provisions of paragraph B above shall have filed with this commission a copy of its pension plan and pension trust agreement or contract with an insurance company for the purchase of annuities, together with a description of its program of advance provision for pension costs. Any material change in these items shall be reported promptly to the commission.

Note D: A complete record of the computation of the amounts paid as advance provision for pensions shall be maintained.

Note E: No charges shall be made to this account in anticipation of discretionary pension payments in the future.

Note F: Upon adoption of an accrual plan of accounting, pension payments to employees retired before the adoption of such plan shall be charged to an existing pension reserve until such reserve is exhausted, unless the reserve is eliminated by payment of an equivalent amount into the pension trust fund.

926.2 Employee Welfare Expenses

A. This account shall include the expenses incurred in conducting employees' educational and recreational activities; the cost of employees' relief and benefits (other than pensions, and injuries and damages chargeable to account 925, Injuries and Damages) and the cost of life insurance for employees when the utility is not the beneficiary.

B. This account shall not include any charges representing amounts used or to be used for the purchase of securities of the accounting company or any associated company, whether contributed by the accounting company or deducted from salaries and wages of employees, unless and until such amounts have actually been realized and paid to the employees in cash or its equivalent subject to their free disposition. To the extent that the securities thus purchased have an actual market value, the amounts paid for them may be carried meanwhile in account 128, Other

Special Funds; otherwise such amounts shall be charged to account 426, Miscellaneous Income Deductions. (See general instruction 166.7(b).)

Note A: When the utility is the beneficiary of insurance on officers or employees, the cash surrender value shall be included in account 174, Miscellaneous Current and Accrued Assets, and the excess of cost of insurance over such cash surrender value shall be charged to account 426, Miscellaneous Income Deductions.

Note B: See subaccount 926.1, note B.

Note C: Credit to this account the portion of welfare expenses which is applicable to nonutility operations or which is charged to construction and retirement work orders, and to clearing or other accounts unless such amounts are distributed directly to the accounts concerned in the first instance.

926.3 Pension and Welfare Administration

This account shall include the salaries of persons engaged in the administration of the pension and welfare department and the expenses incurred in such administration.

Note A: The cost of labor and related supplies and expenses of administrative and general employees who are only incidentally engaged in welfare and pension activities may be included in the accounts appropriate for their major duties.

Note B: Credit to this account the portion of the cost of the administration of the welfare and pension department which is applicable to amounts transferred to nonutility operations or which are charged to construction and retirement work orders or to clearing or other accounts, unless such administrative costs are distributed directly to the accounts concerned in the first instance.

927. Franchise Requirements

A. This account shall include payments to municipal or other governmental authorities, and the cost of materials, supplies and services furnished such authorities without reimbursement in compliance with franchise, ordinance, or similar requirements; provided, however, that the utility may charge to this account at regular tariff rates, instead of cost, utility service furnished without charge under provisions of franchises. (See also account 302, Franchises and Consents.)

B. When no direct outlay is involved, concurrent credit for such charges shall be made to account 929, Duplicate Charges--Credit.

C. The account shall be maintained so as to readily reflect the amounts of cash outlays, utility service supplied without charge, and other items furnished without charge.

Note A: Franchise taxes shall not be charged to this account but to account 408.1, Taxes Other Than Income Taxes, Utility Operating Income.

Note B: Any amount paid as initial consideration for a franchise running for more than one year shall be charged to account 302, Franchises and Consents.

928. Regulatory Commission Expenses

A. This account shall include all expenses (except pay of regular employees only incidentally engaged in such work) properly includible in utility operating expenses, incurred by the utility in connection with formal cases before regulatory commissions, or other regulatory bodies, or cases in which such a body is a party, including payments made to a regulatory commission for fees assessed against the utility for pay and expenses of such commission, its officers, agents, and employees.

B. Amounts of regulatory commission expenses which by approval or direction of the commission are to be spread over future periods shall be charged to account 186, Miscellaneous Deferred Debits, and amortized by charges to this account.

C. The utility shall be prepared to show the cost of each formal case.

ITEMS

1. Salaries, fees, retainers, and expenses of counsel, solicitors, attorneys, accountants, engineers, clerks, attendants, witnesses, and others engaged in the prosecution of, or defense against petitions or complaints presented to regulatory bodies, or in the valuation of property owned or used by the utility in connection with such cases.

2. Office supplies and expenses, payments to public service or other regulatory commissions, stationery and printing, traveling expenses, and other expenses incurred directly in connection with formal cases before regulatory commissions.

Note A: Exclude from this account and include in other appropriate operating expense accounts, expenses incurred in the improvement of service, additional inspection, or rendering reports, which are made necessary by the rules and regulations, or orders, of regulatory bodies.

Note B: Do not include in this account amounts includible in account 302, Franchises and Consents, account 181, Unamortized Debt Expense, or account 214, Capital Stock Expense. Expenses incident to securing certificates of convenience and necessity from regulatory bodies shall be charged to account 302, Franchises and Consents. Costs and expenses incident to securing authorization for issuance of long term debt or capital stock shall be charged to account 181, Unamortized Debt Expense, or account 214, Capital Stock Expense, as appropriate.

Note C: Do not include in this account costs incident to the

acquisition of franchises, consents or certificates, or to construction or acquisition of electric property, which are chargeable to the electric plant accounts. Costs incurred in connection with property purchases shall be accounted for as provided in electric plant instruction section 168.5. (See also account 183.)

Note D: Do not include in this account expenses in connection with investigations by legislative bodies or cases to which the utility is not a party.

Note E: The cost of maintaining continuing property records of electric plant shall not be included herein but in other operation and maintenance expense accounts appropriate for the class of expenditure.

929. Duplicate Charges--Credit

This account shall include concurrent credits for charges which may be made to operating expenses or to other accounts for the use of utility service from its own supply. Include, also, offsetting credits for any other charges made to operating expenses for which there is no direct money outlay.

930.1 Institutional or Goodwill Advertising Expenses

A. This account shall include the cost of labor, materials used and expenses incurred in advertising and related activities which by their content or presentation clearly indicate that they serve only to improve the image of the utility itself or the area or community it serves.

B. Entries relating to institutional or goodwill advertising included in this account shall contain or refer to supporting documents which identify the specific advertising message. If references are used, copies or scripts of the advertising message shall be readily available.

C. Where institutional or goodwill advertising is undertaken by an association on behalf of its members, or by a holding company on behalf of its subsidiaries, the amount of expense for such advertising charged to any member or subsidiary which is a New York electric utility and included in this account shall be determined in accordance with the text of this account as set forth herein.

ITEMS

Labor:

1. Supervision of institutional or goodwill advertising activities.
2. Preparing advertising material for newspapers, periodicals, billboards, etc., and preparing or conducting motion pictures, radio and television programs.
3. Preparing booklets, bulletins, etc., used in direct mail advertising.
4. Preparing window and other displays.

5. Clerical and stenographic work.
6. Investigating advertising agencies and media conducting negotiations in connection with the placement and subject matter of advertising.

Materials and Expenses:

7. Advertising in newspapers, periodicals, billboards, radio, etc.
8. Advertising matter such as posters, bulletins, booklets and related items.
9. Fees and expenses of advertising agencies and commercial artists.
10. Postage and direct mail advertising.
11. Printing of booklets, dodgers, bulletins, etc.
12. Supplies and expenses in preparing advertising materials.
13. Office supplies and expenses.
14. Novelties for general distribution.

Below are examples of the advertising includible in this account:

15. Pronouncements primarily lauding the utility or the area or community it serves.
16. Advertising activities to inform the public of the utility's consciousness of, or involvement in, health, safety, conservation or environmental programs.
17. Advertising activities to inform the public of the utility's participation in programs to improve the economic condition of the area or community it serves.
18. Advertising activities to inform the public of the utility's role of good citizenship in the area or community it serves.
19. Information and routine data supplied by the utility to local governments, planning agencies, civic groups, businesses, and the general public which is not includible in account 911, Informational Advertising Expenses.

930.2 Miscellaneous General Expenses

A. This account shall include the cost of labor and expenses incurred in connection with the general management of the utility not provided for elsewhere.

B. This account shall be maintained or supported in such manner as to readily disclose the principal types of items included herein, as corporate and fiscal expenses, association dues, contributions, etc.

ITEMS

Labor:

1. Miscellaneous labor not elsewhere provided for.

Expenses:

2. Industry association dues for company memberships.

3. Contributions for conventions and meetings of the industry.
4. Research and development expenses not charged to other operation and maintenance expense accounts on a functional basis.
5. Communication service not chargeable to other accounts.
6. Current trustee, registrar, and transfer agent fees and expenses.
(See note below.)
7. Stockholders meeting expenses.
8. Dividend and other financial notices.
9. Printing and mailing dividend checks.
10. Directors' fees and expenses.
11. Publishing and distributing annual reports to stockholders.
12. Public notices of financial, operating, and other data required by regulatory statutes, not including, however, notices required in connection with security issues or acquisitions of property.

Note: Fees and expenses incurred in connection with original or additional issues of stocks or bonds shall be charged to account 214, Capital Stock Expense, or to account 181, Unamortized Debt Discount and Expense, as appropriate.

931.1 General Rents

This account shall include rent properly includible in electric operating expenses covering the property of others used, occupied or operated in connection with the administrative and general functions of the utility; and also amounts payable for depreciation, taxes, interest or return, under joint facility agreements. (See operating expense instructions 172.3 and 172.5 and account 931.2.)

931.2 Expenses of Data Processing Equipment

This account shall include expenses properly includible in electric operating expenses charged direct or through clearing accounts for costs covering the use of electronic data processing equipment and other mechanical equipment, whether owned or rented from others, in connection with the administrative and general functions of the utility. (See operating expense instructions 172.3 and 172.5 and account 931.1.)

Maintenance

932. Maintenance of General Plant

A. This account shall include the cost of maintenance of general plant. (See operating expense instruction 172.2.)

B. This account shall be subdivided as indicated below:

932.1 Maintenance of Structures

This account shall include the cost of maintenance of general buildings, the book cost of which is included in account 390, Structures and Improvements.

932.2 Maintenance of Office Furniture and Equipment

This account shall include the cost of maintenance of office furniture and equipment, the book cost of which is included in account 391, Office Furniture and Equipment.

932.3 Maintenance of Communication Equipment

This account shall include the cost of maintenance of communication equipment for general use in connection with the utility's operations, the book cost of which is included in account 397, Communication Equipment.

932.4 Maintenance of Miscellaneous Equipment

This account shall include the cost of maintenance of miscellaneous property not provided for elsewhere including miscellaneous general equipment, the book cost of which is included in account 398, Miscellaneous Equipment.

Note: Maintenance of plant included in other general equipment accounts shall be included herein unless charged to clearing accounts or to the particular functional maintenance expense account indicated by the use of the equipment.

Joint Expenses

933.1 Joint Expense--Debit

A. This account shall include amounts for the cost of operation and maintenance payable by the electric department to others, or to a coordinate department, for joint facilities used, occupied or operated in connection with administrative and general functions of the utility. (See operating expense instruction 172.5.)

B. The records supporting the entries to this account shall be so kept that the utility can furnish a complete explanation of the debits to this account, including the following:

- (1) Charges from others
- (2) Charges from coordinate departments

933.2 Joint Expenses--Credit

A. This account shall include such portion of the cost of operating and maintaining joint facilities operated by the electric department in connection with its administrative and general functions as is chargeable to others, or to a coordinate department. (See operating expense instruction 172.5.)

B. The records supporting the entries to this account shall be so kept that the utility can furnish a complete explanation of the credits to this account, including the following:

- (1) Charges to others
- (2) Charges from coordinate departments

180.0 Order authorizing uniform system of accounts for classes C and D

180.1 Definitions

.SO DOC 16A-180.0

NYCRR

Section 180.0 Order authorizing uniform system of accounts for classes C and D.

(a) The Uniform System of Accounts for Electric Corporations (Classes C and D) is hereby prescribed for every electric corporation (as that term is defined in the Public Service Law) which has annual operating revenues from electric operations in excess of \$25,000 but not exceeding \$1,000,000, and for every lessor and inchoate and dormant electric corporation subject to the jurisdiction of this commission, and that every such electric corporation be required and hereby is required, on and after January 1, 1969, to keep its records and accounts in conformity therewith.

(b) During the 12 months following the date on which said uniform system of accounts becomes effective, any such electric corporation may, for purposes of comparison, keep on its books, in addition to the accounts hereby prescribed, such portion or portions of its present accounts as may be deemed desirable by any such corporation.

(c) Each electric corporation for which this uniform system of accounts is prescribed shall classify, set forth, and carry all assets, liabilities, capital stock, and surplus existing as of the effective date of this uniform system of accounts, as prescribed in such system of accounts.

(d) Each such electric corporation shall prepare and file in triplicate with the commission not later than six months after the

effective date of this uniform system of accounts, summary statements showing:

(1) the closing balance of each balance sheet account carried on the books directly preceding the effective date of this system of accounts prescribed herein, the title of each account under this system of accounts to which any portion thereof was transferred, and the amount so transferred, and

(2) the opening balance of each account under this system of accounts, the title of each account from which any portion thereof was transferred, and the amount so transferred.

Reserves existing at the effective date of this system of accounts accumulated to provide for losses upon retirement or withdrawal of property from service, depreciation, amortization or replacement of fixed capital or operating property shall be transferred to the accounts prescribed herein for depreciation and amortization reserves.

(e) In prescribing this system of accounts, the commission does not commit itself to the approval or acceptance of any item set out in any account, for the purpose of fixing rates or in determining other matters before the commission.

.SO DOC 16A-180.1

NYCRR

180.1 Definitions. (a) When used in this system of accounts:

(1) Accounts means the accounts prescribed in this system of accounts.

(2) Associated companies means companies or persons that, directly or indirectly, through one or more intermediaries, control, or are controlled by, or are under common control with, the accounting company.

(3) Control (including the terms controlling, controlled by, and under common control with) means the possession, directly or indirectly, of the power to direct or cause the direction of the management and policies of a company, whether such power is exercised through one or more intermediary companies, or alone, or in conjunction with, or pursuant to an agreement, and whether such power is established through a majority or minority ownership or voting of securities, common directors, officers, or stockholders, voting trusts, holding trusts, associated companies, contract, or any other direct or indirect means.

(4) Commission or this commission means the Public Service Commission of the State of New York.

(5) Company. (See par. (10) below.)

(6) Cost means the amount of money actually paid for property or services or the cash value at the time of the transaction of any consideration other than money. (See, however, electric plant instruction § 182.1.)

- (7) Electric corporation. (See Public Service Law.)
- (8) Long-term debt means notes or other obligations having a life of more than one year from date of creation or assumption (except obligations representing advances from associated companies), and all unmatured bonds and receivers' certificates.
- (9) Original cost, as applied to electric plant, means the cost of such property to the person first devoting it to public service.
- (10) Person means an individual, a corporation, a partnership, an association, a joint-stock company, a business trust, or any organized group of persons, whether incorporated or not, or any receiver or trustee.
- (11) Utility or utility company as used herein and when not otherwise indicated in the context, means any electric corporation. (See Public Service Law.)

.SO DOC 16A-181.1

NYCRR

Section 181.1 Classification of utilities.

(a) For the purpose of applying the system of accounts prescribed herein, utilities are divided into two classes as follows:

Class C: Utilities having annual electric operating revenues of more than \$150,000 but not more than \$1,000,000. Such utilities shall keep the accounts prescribed herein which are applicable to their operations.

Class D: Utilities having annual electric operating revenues of more than \$25,000 but not more than \$150,000. Such utilities shall keep all

the accounts prescribed herein which are applicable to their operations, except those accounts in which the letter D does not appear in the prefix.

(b) The class to which any utility belongs shall be determined by the average of its annual electric operating revenues for the three years next preceding the effective date of this system of accounts. If the average of its electric operating revenues for the three years ended December 31 of any year following the effective date of this system of accounts is greater than the maximum specified for the class within which the utility has theretofore been included, such utility shall for the succeeding year keep the accounts prescribed for such higher class.

(c) Any utility, which because of its revenues falls within a given class, may, at its option, adopt the system of accounts prescribed for a higher class. Notice of such action shall be promptly filed with the commission.

.SO DOC 16A-181.2

NYCRR

181.2 Records.

(a) Each utility shall so keep its books of account, and all other books, records, and memoranda which support in any way the entries in such books of account, as to be able to furnish readily full information as to any item included in any account. Each entry shall be supported by such detailed information as will permit a ready identification, analysis, and verification of all the facts relevant thereto.

(b) The books and records referred to herein include not only accounting records in a limited technical sense, but all other records such as minute books, stock books, reports, correspondence, memoranda, engineering records, calculations, drawings, etc., which may be useful in developing the history of or facts regarding any transaction.

(c) Except as authorized by this commission, all operating, accounting or financial papers, records, books, invoices, stubs, maps, or documents or any papers or records which support entries to any of the accounts or which are necessary for an analysis shall be retained permanently. All such records shall be accessible, at all times, to the authorized representatives of the commission at a location within the State of New York.

(d) Subdivisions of any account in the system of accounts prescribed herein and clearing, temporary, or experimental accounts may be kept, provided that such subdivisions or additional accounts do not impair the integrity of the prescribed accounts. The titles of all subdivisions or subaccounts shall refer by number and title to the account or accounts of which they are subdivisions.

(e) All charges to the accounts prescribed in this system for electric plant, income, operating revenues and operating expenses shall be just and reasonable and any payments by the utility in excess of just and reasonable charges shall be included in account 1538, Miscellaneous Income Deductions.

(f) The numbers prefixed to account titles are to be considered as part of the titles. Each utility may, however, adopt a different system of account numbers provided that the numbers herein prescribed shall appear in the descriptive headings of the ledger accounts. When the same account number is used in systems of accounts prescribed for different classes of operations conducted by one utility, the initial letters E, G, O, R, S, and W may be prefixed to identify the account with electric, gas, omnibus, rail line, steam heating, or water, respectively. Accounts for common utility plant and operations shall be designated by the word "Common."

.SO DOC 16A-181.3

NYCRR

181.3 Accounting period. Each utility in Class C shall keep its books on a monthly basis, so that all transactions applicable thereto, as nearly as may be ascertained, shall be entered monthly in the books of the utility. Each utility in Class D shall keep its books on either a monthly or quarterly basis; when the quarterly basis is used provisions contained herein relative to monthly entries shall be regarded as calling for quarterly entries. A trial balance shall be taken after the monthly or quarterly postings have been made, and each utility shall close its books at the end of each calendar year.

.SO DOC 16A-181.4

NYCRR

181.4 Submission of questions.

To maintain uniformity of accounting, utilities shall submit questions of doubtful interpretation to the commission for consideration and decision. Utilities shall also ask for instructions, if occasion arises, regarding the accounting for such transactions as spreading over a number of months relatively large income or expense items which if included in the accounts for a single month would seriously distort the accounts; the disposition of items which relate to transactions which occurred prior to the current calendar year but which were not recorded in the books of account in the prior year and which are relatively so large that inclusion in the accounts for a single year would seriously distort the accounts; and expenditures for replacement of units of property leased from others. Ordinary delayed items shall be charged or credited to the same accounts which would have been charged or credited if the items had not been delayed.

.SO DOC 16A-181.5

NYCRR

181.5 Accounting to be on accrual basis. (a) The utility is required to keep its accounts on the accrual basis. This requires the inclusion in its accounts on an estimated basis of all known transactions of appreciable amount which affect the accounts, even though bills covering such transactions have not been received or rendered. When the bills are received or rendered, appropriate adjustments shall be made.

(b) Also when payments are made for items such as insurance, rents, taxes, or interest, the amount applicable to future periods shall be charged to account 1132, Prepayments, and spread over the periods to which applicable by credits to account 1132, Prepayments, and charges to the accounts appropriate for the expenditure.

.SO DOC 16A-181.6

NYCRR

181.6 Interpretation of lists of items. List of items appearing in the texts of the accounts or elsewhere herein are for the purpose of more clearly indicating the application of the prescribed accounting. The lists are intended to be representative, but not exhaustive. The appearance of an item in a list warrants inclusion of the item in the account mentioned only when the text of the account also indicates inclusion, in as much as the same item frequently appears in more than one list. The proper entry in each instance must be determined by the texts of the accounts.

.SO DOC 16A-181.7

NYCRR

181.7 Transactions with associated companies. (a) Each utility shall so keep its accounts and records as to be able to furnish accurately and expeditiously statements of all transactions with associated companies, showing the general nature of the transactions, the amounts involved therein and the amounts included in each account prescribed herein with respect to such transactions.

(b) Dividends, rebates, or earnings from associated companies or mutual service companies representing refunds of the excess charges made by such companies over the cost to them, shall be cleared through account 1901, Charges by Associated Companies--Clearing, and shall be credited so far as practicable to the same accounts to which the corresponding charges were made, including proper distinction between construction and operating expenses. Credits applicable to operating expenses which it is impracticable to allocate among the accounts to which the corresponding charges have been made, shall be to account 1806, Duplicate Charges--Credit.

.SO DOC 16A-181.8

NYCRR

181.8 Depreciation accounting. (a) Depreciation, as applied to

electric plant, means the net loss in service value not restored by current maintenance, incurred in connection with the consumption or prospective retirement of electric plant in the course of service from causes which are known to be in current operation and against which the utility is not protected by insurance. Among the causes to be given consideration are wear and tear, decay, action of the elements, inadequacy, obsolescence, changes in the art, changes in demand, and requirements of public authorities.

(b) Each utility shall record each month (see also general instruction § 181.3, above) the estimated amount of depreciation on electric plant accrued during that month, by crediting the appropriate subdivision of account 1250, Reserve for Depreciation of Utility Plant, and charging the accounts for the depreciation expense as follows:

Account in Which Included	Subdivision of Account 1250 to be Credited	Account to be Charged
1101 Electric Plant in Service	1250.1 Reserve for Depreciation of Electric Plant in Service	1503 Depreciation (See notes hereunder.)
1102 Electric Plant Leased to Others	1250.2 Reserve for Depreciation of Electric Plant Leased to Others	1508.2 Expenses of Electric Plant Leased to Others
1104 Electric Plant Held for Future Use	1250.4 Reserve for Depreciation of Electric Plant Held for Future Use	The question to be submitted to the Commission
1106 Unclassified Electric Plant	1250.6 Reserve for Depreciation of Unclassified Electric Plant	1503 Depreciation (See notes hereunder.)

Note A: To the extent that any electric property is used in construction, the depreciation thereon shall be charged to account 1103, Construction Work in Progress; if clearing accounts are used, depreciation of plant (except structures) the maintenance and operation of which are charged to clearing accounts, shall be charged to such clearing accounts.

Note B: The accounting for depreciation of utility plant in other departments carried in account 1108, Other Utility Plant (§ 190.1), which are subject to regulation by the commission shall be in accordance with the effective system of accounts applicable to such operations.

Note C: Depreciation accruals on Common plant (see note B under Utility Plant) shall be currently distributed on an equitable basis to

the departments making use thereof; the reserve applicable to common plant shall be carried by Class C utilities in subdivisions of account 1250, Reserve for Depreciation of Utility Plant, applicable to the plant account wherein the common plant is carried.

Note D: See also account 1250, Reserve for Depreciation of Utility Plant and electric plant instruction ÷ 182.2.

.SO DOC 16A-181.9

NYCRR

181.9 Distribution of pay and expenses of employees. (a) The charges to electric plant, operating expense and other accounts for services and expenses of employees engaged in activities chargeable to various accounts, such as construction and operations (or in more than one type of electric operation, such as production and distribution) shall be based upon the actual time engaged in the respective classes of work, or, in case that method is impracticable, upon the basis of a study of the time actually engaged during a representative period.

(b) The pay and expenses of general officers shall be charged to the actual work on which they are engaged, to the particular operations over which they have direct supervision, or, if their jurisdiction is over the entire electric operation, to the appropriate accounts provided in the Administrative and General group in operating expenses.

(c) Except as otherwise specifically provided in this system of accounts or by order of the commission, no amounts for salaries or wages shall be included in charges to electric plant, cost of removal, or electric operating expenses, except employees' welfare and pension expenses includible in account 1800, Other General Expenses, which are not paid to employees affected subject to their free disposition. Payroll deductions made under a statute or order of a court; or for such purposes as group insurance, purchase of appliances or homes, etc., authorized by written order of the employee without coercion of any kind, may be included.

.SO DOC 16A-181.10

NYCRR

181.10 Accounting for other departments. This system of accounts is designed for use by electric utilities. If the utility, in addition to its electric operations, operates other departments, such as gas or water, it shall keep such accounts for the other departments as may be prescribed by this commission, and in the absence of prescribed accounts, it shall keep such accounts as are proper or necessary to reflect the results of operating each such other department. It is not intended that proprietary and similar accounts which apply to the utility as a whole shall be departmentalized. (See also general instruction, ÷ 181.2, subd. (f).)

.SO DOC 16A-181.11

NYCRR

181.11 Allocation of costs between electric plant and operating expenses to be made currently. Each utility shall determine currently the costs which are applicable to the electric plant accounts and in the case of costs involving allocations, the amount which is applicable to other accounts, such as operating expenses, taxes, depreciation reserve (cost of plant removal), other balance sheet accounts, and income or surplus accounts; the intent of this provision being that such costs shall be allocated to the accounts to which they are applicable when they are incurred.

.SO DOC 16A-181.12

NYCRR

181.12 Employee pensions and benefits.

(a) All costs of employee pensions and benefits, whether such costs represent pensions payable currently to retired employees or their beneficiaries, advance provision for future payments, or both, are includible in the charges of each accounting period, provided:

(1) the pension program under which the costs are determined is reasonable;

(2) amounts paid are irrevocably dedicated to pension purposes; and

(3) any program of systematic advance provision is based on actuarial studies or other recognized and acceptable systematic method of computation and allocation.

Pension payments and accruals are includible in account 1800, Other General Expenses; however, a utility may distribute to construction and retirement projects and to clearing and other accounts an applicable portion of the pension and benefits costs.

(b) No charge shall be made to any account in this system of accounts to reflect the advance provision for employee pension and benefits costs or to augment incomplete provision at a given date for amounts computed in relation to service prior to that date, unless full particulars of the program shall have been filed with the commission together with copies of supporting documents. Filings shall be promptly made also of any material changes in pension or other benefits programs subsequent to the initial presentation to the commission. Acceptance by the commission of such data, as filed, shall not be interpreted as constituting approval of a pension and employee benefits program, or of documents associated therewith, or of any accounting made thereunder by the utility.

(c) The utility shall keep supporting records which will disclose as of the end of each account period:

(1) the amounts disbursed by the company during the period, direct to

pensioners or their beneficiaries;

(2) the amounts paid into the fund dedicated to future pension payments; and for each of such classes of disbursements, the accumulated total from the beginning of the year;

(3) the amount accumulated in the pension fund as provision for future pension payments; and

(4) at each year end the amount by which pension commitments under the plan as then in effect, even though subject to future amendment or termination, computed in relation to employee service to that date, (generally the "actuarial liability") exceed the amount in the pension fund.

.SO DOC 16A-PT182

NYCRR

PART 182

INSTRUCTIONS--ELECTRIC PLANT ACCOUNTS

(Statutory authority: Public Service Law, § 66 (4))

Sec.

182.1 Electric plant to be recorded at original cost

182.2 Additions and retirements of electric plant

182.3 Components of construction cost

182.4 Land and land rights

182.5 Structures and improvements

182.6 Work order system required (Class C utilities only)

182.7 Transfers of property

182.8 Expenditures on property leased for use in electric operations

.SO DOC 16A-182.1

NYCRR

Section 182.1 Electric plant to be recorded at original cost.

(a) All amounts included in subaccounts 1301-1390 of accounts 1101 to 1104 for electric plant (except as otherwise provided in account 1302, Franchises and Consents shall be the original cost (see § 180.1, subd.

(a) (9)) of such electric plant. (See also paragraphs B and C of account 1106.)

(b) When the term cost is used in the detailed electric plant accounts (1301-1390), it shall mean the original cost unless otherwise specified and shall include not only the materials, supplies, labor, services and other items consumed or employed in the construction and installation of electric plant, but also the cost of preliminary studies, plans, surveys, engineering, supervision and general expenses, which contribute directly and immediately to electric plant without duplication of such costs.

(c) When the consideration given for property is other than cash, the value of such consideration shall be determined on a cash basis. In the

entry recording such transaction the actual consideration shall be described with sufficient particularity to identify it. The utility shall be prepared to furnish the commission the particulars of its determination of the cash value of the consideration, if other than cash.

(d) When property is purchased under a plan involving deferred payments, no charge shall be made to the electric plant accounts for interest, insurance, or other expenditures occasioned solely by such form of payment.

(e) Electric plant contributed to the utility or constructed by it from contributions to it of cash or its equivalent shall be charged to the electric plant accounts at cost (see § 180.1, subd. (a) (6)) to the utility (i.e., original cost less the portion thereof contributed by or on behalf of customers). Records shall be kept so that the utility can readily furnish information as to the source, purpose, and amount of each contribution, the property to which each contribution relates, and the conditions, if any, upon which each contribution was made.

Note A: Amounts received for construction which are ultimately to be refunded, wholly or in part, shall be credited to account 1241, Customer Advances for Construction. When the amount to be refunded has been finally determined, the balance, if any, remaining in account 1241 shall be debited thereto and credited to the electric plant accounts to which the cost of the property was charged.

.SO DOC 16A-182.2

NYCRR

182.2 Additions and retirements of electric plant.

(a) For the purpose of avoiding undue refinement in accounting for additions to and retirements and replacements of electric plant, all property shall be considered as consisting of (1) units of property or retirement units and (2) minor items. Units of property means those items of electric plant which are sufficiently distinct or important so that when they are retired with or without being replaced by other units of the same type or use, they are accounted for by crediting the amount at which they are carried on the books to the electric plant account in which included. All other items are to be considered as minor items. These retirement units should not be confused with continuing property record units filed by Class C utilities; the latter are units for which the cost will be shown separately in the continuing property records. Whenever units of property are mentioned in this system of accounts, the terms refer to retirement units and not to continuing property record units. Each utility may adopt its own list of units of property for the purpose of this instruction until such time as the commission shall

prescribe a list of units.

(b) Units of property. (1) When a unit of property is added to electric plant, the cost thereof shall be added to the appropriate electric plant account.

(2) When a unit of property is retired from electric plant (i.e., is removed, sold, abandoned, destroyed or otherwise ceases to be used or useful in electric service), whether or not replaced by another unit of the same type or use, the amount at which it is carried on the books shall be credited to the electric plant account in which it is included (determined in the manner set forth in subdivision (d), below) and charged to the depreciation reserve provided for such property.

(c) Minor items of property. (1) When a minor item of property which does not replace a similar item is added to electric plant, the cost thereof shall be charged to the appropriate maintenance account and no entry shall be made in the electric plant or depreciation reserve accounts.

(2) When a minor item is retired and replaced independently of the unit of property of which it is a part, the cost of replacement shall be charged to the appropriate maintenance account and no entry shall be made in the electric plant or depreciation reserve accounts. The removal and replacement of poles shall be handled as additions and retirements of property and not as maintenance.

(3) When a minor item the book cost of which does not exceed \$50 is retired and not replaced, if the book cost of such minor item is included with or spread over one or more units of property so that it will be accounted for through the retirement of such one or more units of property, no separate credit to the electric plant account shall be made; otherwise, however, the book cost of such minor item shall be credited to the appropriate electric plant account and charged to account 1250, Reserve for Depreciation of Utility Plant.

Note A: For example, if a pole is a unit and the cost of attachments, such as crossarms, guys, etc., is spread on an average basis over all the poles or is included as a part of the cost of the pole to which they are attached, no separate credit to the plant account shall be made when such an attachment (the book cost of which is less than \$50) is retired, even though not replaced. Any labor in connection with the removal shall be charged to the appropriate maintenance account, and any salvage for material recovered shall be credited to the appropriate maintenance account.

(d) Determination of amount to be credited to plant accounts. Electric plant retired shall be credited to the plant accounts at the amount at

which such property is included therein, including all components of construction costs, such as engineering, supervision, interest and taxes during construction, etc. The amount shall be determined from the utility's records and if this can not be done, it shall be estimated.

When it is impracticable to determine the amount carried on the books for each item, due to the relatively large number or small cost thereof, the average of such items, with due allowances for any differences in size, character and year of installation (if known) shall be used.

(e) Land retired. When land is retired the amount at which it is carried on the books shall be credited to the appropriate land account. If the land is sold, the difference between the amount at which it is carried on the books and the sale price of the land (less commissions and other expenses of making the sale) shall be credited or debited to account 1250, Reserve for Depreciation of Utility Plant.

.SO DOC 16A-182.3

NYCRR

182.3 Components of construction cost.

(a) The cost of construction properly includible in the electric plant accounts shall include, when applicable and when actually incurred, the cost of contract work, labor, materials and supplies, transportation, engineering and supervision, law expenditures, compensation and other insurance and injuries and damages applicable to construction, taxes and interest during construction, permits and privileges, use of construction facilities, cost of keeping construction records, and other analogous elements applicable to the construction and acquisition of electric plant. The costs includible in the principle items are:

(1) Contract work includes amounts paid for work performed under contract by other companies, firms, or individuals, costs incident to the award of such contracts, and the inspection of such work. The cost of work performed by the utility on projects when part of the work is performed by the utility itself and part is performed by others under contract shall be included as labor, materials, transportation, general administration, engineering services, etc.

(2) Labor includes the pay and expenses of employees of the utility engaged on construction work, and also workmen's compensation insurance, payroll taxes and similar items of expense.

(3) Materials and supplies includes the purchase price at the point of free delivery plus customs duties, excise taxes, the cost of inspection, loading and transportation, the related stores expenses and the cost of fabricated materials from the utility's shop. In determining the cost of materials and supplies used for construction, proper credit shall be made for unused materials and supplies, for materials recovered from

temporary structures used in performing the work involved, and for discounts allowed and realized in the purchase of materials and supplies.

(4) Transportation includes the cost of transporting employees, materials and supplies, tools, purchase equipment, and other work equipment (when not under own power) to and from points of construction. It includes amounts paid to others as well as the cost of operating the utility's own transportation equipment.

(5) Engineering and supervision includes the portion of the pay and expenses of general officers, engineers, surveyors, draftsmen, inspectors, superintendents and their assistants applicable to construction work and the amounts paid to other companies, firms or individuals engaged by the utility to plan, design, prepare estimates, supervise, inspect, or give general advice and assistance in connection with construction work.

(6) Law expenditures includes the general law expenditures incurred in connection with construction and the court and legal costs directly related thereto.

(7) Interest during construction includes the net cost of borrowed funds used for construction purposes and a reasonable rate upon the utility's own funds when so used. Interest during construction shall be charged to the individual job upon which the funds are expended and shall be credited to account 1536, Interest Charged to Construction--Credit. The period for which interest may be capitalized shall be limited to the period of construction. No interest shall be included in these accounts upon expenditures for construction projects which have been abandoned.

(8) Taxes during construction includes taxes on physical property (including land) during the period of construction and other taxes properly includible in construction costs before the facilities become available for service.

Note A: The cost of property includes the cost of preliminary surveys and studies and the cost of preparing plans and specifications at the time of construction for construction projects which are undertaken, and also the cost of keeping the construction accounts during the construction period, together with the cost of maps, books, files and other systems employed and permanently preserved in support of such construction costs.

The cost of property does not include the cost incurred subsequent to the construction period of preparing, installing or maintaining maps, inventories, accounting and other financial records of property for use

in the operation of a constructed plant, the cost of the preparation of inventories, appraisals, or other studies, nor costs incurred in the establishment or revision of accounting routine.

.SO DOC 16A-182.4

NYCRR

182.4 Land and land rights.

(a) Land and land rights (accounts 1310, 1350 and 1370) means land owned in fee by the utility and rights, interests, and privileges held by the utility in land owned by others, such as leaseholds, easements, water rights, rights of way, and other like interests in land.

(b) Separate entries shall be made for the acquisition, transfer, or retirement of each parcel of land, and each land right, or water right, having a life of more than one year. A record shall be maintained showing the nature of ownership, full legal description, area, map reference, purpose for which used, city, village, county, and tax district in which situated, from whom purchased or to whom sold, payment given or received, other costs, contract date and number, date of recording deed, book and page of record. Entries transferring or retiring land or land rights shall refer to the original entry recording its acquisition.

(c) Entries to the electric plant accounts for limited-term interests in land shall make specific reference to the lease, contract or arrangement under which each interest is held or used, together with a concise statement of the terms of the lease, contract or arrangement.

(d) The cost of buildings and other improvements (other than public improvements) shall not be included in the land accounts. If at the time of acquisition of an interest in land such interest extends to buildings or other improvements (other than public improvements), which are then devoted to electric operations, the land and improvements shall be separately appraised and the cost allocated to land and buildings or improvements on the basis of the appraisals. If the improvements are removed or wrecked without being used in electric operations, the cost thereof and the cost of removing or wrecking shall be charged and the salvage credited to the account in which the cost of the land is recorded.

(e) The principal items to be included in the accounts for land and land rights are as follows:

- (1) Bulkheads, not requiring maintenance or replacement
- (2) Cost of acquisition of land including mortgages and other liens assumed (but not subsequent interest thereon after the property is placed in service)
- (3) Clearing (first cost), the land of brush, trees and debris; and

also tree trimming (first cost) when not chargeable to other electric plant accounts

- (4) Condemnation proceedings, including court and counsel costs
- (5) Consents and abutting damages, payments for
- (6) Conveyancers' and notaries' fees
- (7) Fees, commissions, etc., to brokers, agents and others in connection with the acquisition of the land or land rights
- (8) Grading the land, except when directly occasioned by the building of a structure
- (9) Leases, cost of voiding upon purchase to secure possession of land
- (10) Removing, relocating, or reconstructing property of others, in order to acquire quiet possession
- (11) Special assessments levied by public authorities for public improvements on the basis of benefits for new roads, new bridges, new sewers, new curbing, new pavements, and other public improvements, but not taxes levied to provide for the maintenance of such improvements
- (12) Surveys in connection with the acquisition
- (13) Taxes assumed, accrued to date of transfer of title
- (14) Title, examining, clearing, insuring, and registering in connection with the acquisition, and defending against claims relating to the period prior to the acquisition

.SO DOC 16A-182.5

NYCRR

182.5 Structures and improvements.

(a) Structures and improvements (accounts 1311, 1351 and 1371) means all permanent buildings and structures to house, support or safeguard property or persons, and improvements of a permanent character on or to land, including all fixtures permanently attached to and made a part of buildings or structures and which can not be removed therefrom without cutting into the walls, ceilings or floors, or without in some way impairing the buildings.

(b) Structures and improvements are of two types, Buildings and Other Structures. The principal items includible under Buildings are:

- (1) Architects' plans
- (2) Ash pits (when located within the building proper)
- (3) Boilers, furnaces, piping, wiring, fixtures and machinery for heating, lighting, signaling, ventilating and plumbing
- (4) Bulkheads, including dredging, riprap fill, piling, decking, concrete, fenders, etc., when exposed and subject to maintenance and replacement
- (5) Chimneys
- (6) Coal bins and bunkers

- (7) Commissions and fees to brokers, agents, architects and others
- (8) Conduit
- (9) Damages to abutting property during construction
- (10) Door checks and door stops
- (11) Drainage and sewerage systems
- (12) Elevators, cranes, hoists, etc., and the machinery for operating them, when not specifically provided for in other accounts
- (13) Excavation, including shoring, bracing, bridging, refill, and disposal of excess excavated material
- (14) Fire protection systems when forming a part of a structure
- (15) Floor covering (permanently attached)
- (16) Foundations and piers for machinery, constructed as a permanent part of a building or other item listed herein
- (17) Grading when directly occasioned by the building of a structure
- (18) Leases, voiding, upon purchase, to secure possession of structures
- (19) Leased property, expenditures on (See electric plant instruction ÷ 182.8.)
- (20) Lighting fixtures and outside lighting systems
- (21) Painting, at time of construction
- (22) Partitions, including movable
- (23) Permits and privileges
- (24) Platforms, railings, and gratings when constructed as a part of a structure
- (25) Power boards for services to a building
- (26) Refrigerating systems for general use
- (27) Retaining walls
- (28) Scales, connected to and forming a part of a structure
- (29) Screens
- (30) Sprinkling systems
- (31) Stacks--brick, steel, or concrete, when set on foundation forming part of general foundation and steelwork of a building
- (32) Storage facilities constituting a part of a building
- (33) Storm doors and windows
- (34) Subways, areaways, and tunnels directly connected to and forming part of a structure
- (35) Tanks constructed as part of a building when not includible in account 1312 or account 1332
- (36) Tunnels, intake and discharge, when constructed as part of a structure
- (37) Vaults constructed as part of a building

(38) Water supply system for a building

(39) Window shades and ventilators

(c) Items not included in Buildings:

(1) Do not include in the cost of buildings any lighting, heating, or other fixtures temporarily attached for purposes of display or demonstration.

(2) The cost of specially provided foundations not expected to outlast the machinery or apparatus for which provided, and the cost of angle irons, castings, etc., installed at the base of an item of equipment, shall be charged to the same account as the cost of the machinery, apparatus, or equipment.

(3) Minor buildings and structures, such as valve towers, patrolmen's towers, telephone stations, etc., which are used directly in connection with or form a part of a reservoir, dam, waterway, etc., shall be considered a part of the facility in connection with which constructed or operated and the cost thereof shall be accounted for accordingly.

(4) When furnaces and boilers are used primarily for furnishing steam for some particular department and only incidentally for furnishing steam for heating a building and operating the equipment therein, the entire cost of such furnaces and boilers shall be charged to the appropriate equipment account, and no part to the building account.

(5) Where the structure of a dam forms also the foundation of the power plant building, such foundation shall be considered a part of the dam.

(6) Minor structures at substations shall be included in account 1352, Station Equipment.

(d) Items includible under "Other Structures":

(1) Athletic field structures

(2) Docks

(3) Fences and fence curbs (not including protective fences isolating individual items of equipment, which should be charged to the appropriate equipment account)

(4) Gas and oil supply systems, including pipe lines, holders, boosters, etc.

(5) Intra-site communication system poles, pole fixtures, wires and cables

(6) Landscaping, lawns, shrubbery, etc.

(7) Roadways, railroads, bridges, and trestles, intra-site, except railroads provided for in equipment accounts

(8) Sewer systems for general use

(9) Sidewalks, curbs and streets constructed by the utility

- (10) Tanks when constructed as distinct structural units
- (11) Water front improvements
- (12) Water supply piping, hydrants and wells
- (13) Yard drainage systems
- (14) Yard lighting systems
- (15) Yard surfacing, gravel, concrete, or oil

.SO DOC 16A-182.6

NYCRR

182.6 Work order system required (Class C utilities only). (a) Each utility shall record all changes, such as installations, additions, retirements or replacements in electric plant used wholly or partly in electric operations by means of a work order or job order system. Such work orders and supporting records shall be permanently preserved.

(b) All installations, additions, retirements, or replacements shall be covered by work orders. Standing work orders may be used for projects of less than \$250 each, such as for poles, transformers, services, and meters.

(c) The work order shall include the following particulars:

(1) A work order number;

(2) A description and the location of the work to be done (or the purchase to be made), the dates between which such work (or purchase) is to be accomplished, the date when the work was begun and the date when finished, the estimated cost of the project, together with maps, plans, diagrams, specifications, etc., applicable to the project;

(3) The accumulated charges applicable to each particular job or project and the total cost of the completed project; the cost of removal shall also be shown. When any project involves charges to more than one account, the work order shall be so kept as to show the amount chargeable to each account. Every charge or credit on work orders shall refer to the voucher, journal, or other source from which the entry therein was made.

(d) The cost of completed projects shall be promptly transferred to the accounts to which chargeable.

Note A: Requirement of the use of the Work Order System here outlined may be suspended by order of the commission in the case of a utility which satisfies the commission that the system which it has in use for recording changes in electric plant accounts gives the equivalent detail by accounts in substantially the same form. The identification of expenditures with property must be complete and clear, and the detail of the cost of each project or job must be readily available.

.SO DOC 16A-182.7

NYCRR

182.7 Transfers of property. (a) When property is transferred from one

account for electric plant to another, from one utility department to another, such as from electric to gas, or, in the case of Class C utilities, to or from accounts 1101, Electric Plant in Service, 1102, Electric Plant Leased to Others, and 1104, Electric Plant Held for Future Use, the transfer shall be recorded by transferring the book cost thereof from the one account, department or division to the other, and likewise any related amounts carried in the depreciation and amortization reserves and other accounts shall be transferred in accordance with the segregation of such reserves and other accounts. When property (except customers' meters and line transformers) in connection with which installation costs have been incurred is physically transferred it shall be accounted for as provided in electric plant instruction section 182.2.

(b) When property subject to depreciation is transferred from the electric plant accounts to account 1110, Other Physical Property, the transfer shall be accomplished by crediting the electric plant accounts and charging the depreciation reserve with the book cost of the item transferred; the depreciation reserve shall then be credited and account 1110, Other Physical Property, charged with the fair value of the property transferred.

.SO DOC 16A-182.8

NYCRR

182.8 Expenditures on property leased for use in electric operations.

(a) The cost of additions and betterments, excluding replacements by lessee of units of property installed by lessor, to property leased from others shall be charged to separate subdivisions of the electric plant accounts appropriate for the class of property leased. Depreciation thereon shall be computed on a basis consistent with the duration of the lease.

(b) The cost of initial repairs and rearrangements to adapt the property for use in electric operations shall be charged to a subdivision of account 1132, Pre-payments, and amortized over the life of the lease through credits to that account with concurrent debits to the rent account appropriate for the class of property involved.

(c) If, in the case of leased property, replacements of units of property installed by the lessor become necessary, the utility shall make application to the commission for instructions regarding the accounting procedure to be followed and shall submit full particulars of the nature and extent of the replacements.

(d) When expenditures on property leased from others for use in electric operations are relatively minor, or the period of the lease is less than one year, the cost shall be charged to the account appropriate

for the cost of repairs of such plant.

NYCRR

PART 183

INSTRUCTIONS--OPERATING REVENUE ACCOUNTS

(Statutory authority: Public Service Law, § 66(4))

Sec.

183.1 Purpose of operating revenue accounts

183.2 Basis of credits to operating revenue accounts

183.3 Commissions on electric sales

183.4 Electricity supplied without direct charge

183.5 Electricity or steam used by utility

183.6 Supporting records

.SO DOC 16A-183.1

NYCRR

Section 183.1 Purpose of operating revenue accounts.

The operating revenue accounts (1600 to 1615) are designed to show the amounts of money which the utility becomes entitled to receive from furnishing electric utility service and from service incidental thereto, including amounts for services rendered but not yet billed when the utility exercises its option to record in account 1133, Miscellaneous Current and Accrued Assets, such accrued electric revenue.

.SO DOC 16A-183.2

NYCRR

183.2 Basis of credit to operating revenue accounts. Credits to the operating revenue accounts shall be made on the basis of the net tariff rates. Discounts forfeited for delayed payments shall be credited to account 1612, Customers' Forfeited Discounts. Corrections of overcharges and overcollections theretofore credited, authorized abatements and allowances, and other corrections shall be charged to the revenue accounts to which they relate.

.SO DOC 16A-183.3

NYCRR

183.3 Commission on electric sales.

If the utility distributes all or a part of its electric energy through an agent but the sales are made to customers under rate schedules filed by the utility, the utility shall credit its revenue accounts with the full amount of sales to customers. The commission paid to the agent shall be charged to account 1800, Other General Expenses, and any distribution expenses charged by the agent shall be debited to the appropriate expense accounts. Agents shall credit the amount of commissions earned to operating revenue account 1615, Miscellaneous Electric Revenues.

.SO DOC 16A-183.4

NYCRR

183.4 Electricity supplied without direct charge.

Electricity supplied to municipalities, or to other governmental units, without charge, in accordance with franchise and similar requirements, shall be charged to account 1805, Franchise Requirements, and credited concurrently to account 1806, Duplicate Charges--Credit.

.SO DOC 16A-183.5 NYCRR

183.5 Electricity or steam used by utility. (a) If the utility desires to charge the appropriate accounts in any of its electric operations with the cost of electricity or steam used from its own supply, the credit therefor shall not be made to operating revenue accounts, but to account 1806, Duplicate Charges--Credit.

(b) Electricity supplied by the utility to other departments shall be credited to account 1607, Interdepartmental Sales; steam supplied from the production plant to other departments shall be credited to account 1742, Steam Produced--Credit, except when such production of electricity or steam is treated as a joint facility, in which case it shall be accounted for as provided in accounts 1808-1809.

.SO DOC 16A-183.6 NYCRR

183.6 Supporting records. Each utility shall so keep the records supporting the entries to each electric sales account that it can furnish (a) the name of each customer, (b) the quantity of electric energy furnished to each customer, (c) the amount charged for electric energy furnished each customer, and (d) the service classifications under which the charge is made. Each utility shall also be prepared to report upon request, within a reasonable time, for each month or other billing period and for each year, the quantity of energy sold and the charges therefor, by service classifications.

ASSETS AND OTHER DEBITS

UTILITY PLANT

Note A: In accounts 1101, 1102, and 1104 for electric plant are to be carried the totals of the detailed plant accounts 1301-1390 in which the utility's plant is required to be carried on the utility's plant ledger.

Note B: If the utility is engaged in more than one utility service, such as electric, gas or steam, and any of its utility plant is used in common for several utility services or for other services, the original cost of such plant may be carried in a separate subdivision of the plant accounts, whereto the word "Common" shall be suffixed to designate such property as common.

D 1100. Electric Plant

This account shall include items provided for in accounts 1101 to 1104, below.

C 1101. Electric Plant in Service

This account shall include the original cost of electric plant owned and used and useful by the utility in the service of the public in its electric operations. The original cost of such plant not owned, including additions to and betterments of property leased from others, shall be included in separate subdivisions of this account. (See electric plant instruction § 182.8.)

C 1102. Electric Plant Leased to Others

This account shall include the original cost of electric plant owned by the utility and leased to others as operating units or systems when the lessee has exclusive possession, such as an entire production plant,

distribution system, or office building.

C 1103. Construction Work in Progress

This account shall include the expenditures on electric plant in process of construction but not ready for service at the date of the balance sheet.

C 1104. Electric Plant Held for Future Use

This account shall include the original cost of electric plant owned and held for future use in electric service under a definite plan for such use. This includes property acquired but never used by the utility in electric service, but held for such service in the future under a definite plan, and property previously used by the utility in electric service, but retired from such service and held pending its reuse in electric service in the future under a definite plan.

Note: Materials and supplies and transformers and meters held in reserve shall not be included in this account.

D C 1105. Electric Plant Acquisition Adjustments

A. With respect to electric plant acquired prior to the effective date hereof and still in service at that date, this account shall include (unless otherwise ordered by this commission) the difference between the amount carried on the books therefor as of the effective date hereof, and the original cost thereof when such difference is not clearly includible in any other account.

B. With respect to electric plant acquired after December 31, 1938, as an operating unit or system by purchase, merger, consolidation, liquidation or otherwise, this account shall include (unless otherwise ordered by this commission) the difference between (a) the cost to the accounting utility of such electric plant, and (b) the original cost thereof less credit representing contributions (see par. B of account 1265, Contributions in Aid of Construction, (infra) and electric plant instruction § 182.1, subd. (e)), less the amount or amounts credited to the depreciation reserves of the accounting utility at the time of acquisition with respect to such electric plant and less the amount in account 1265, Contributions in Aid of Construction.

C. Whenever practicable, this account shall be subdivided by Class C utilities according to the character of the amounts included herein and so as to show the amounts applicable to electric plant in service, electric plant leased to others, and electric plant held for future use.

D. A record shall be kept of the amounts in this account for each property acquisition after the effective date hereof.

E. With respect to the amount applicable to electric plant acquired prior to the effective date hereof, and to each property acquisition

thereafter, the utility shall notify the commission as to its program for depreciation, amortization, or other disposition of the amounts included in this account.

D C 1106. Unclassified Electric Plant

A. Pending the classification of electric plant at the effective date of this system of accounts in accordance with the accounts prescribed herein, as provided in paragraph B hereof, each utility shall maintain its present accounts with respect to such property which shall be summarized under the title of this account.

B. Not later than six months after the effective date hereof, each utility in Class C shall submit to the commission the entries it proposes to make to carry out the provisions of this system of accounts with reference to the original cost of its electric plant as of the effective date hereof. It shall submit also a comparative balance sheet showing the accounts and amounts appearing in its books as of the effective date of this system of accounts and the accounts and respective amounts as of the same date after the proposed entries shall have been made.

C. Nothing herein stated shall be taken as permitting the recording as part of the original cost of electric plant of amounts charged in previous years to operating expenses, operating taxes or other income or surplus accounts.

D. There shall also be included in a separate subdivision of this account:

(1) the cost of electric plant acquired as an operating unit or system by purchase, merger, consolidation, liquidation or otherwise, pending the distribution thereof to the appropriate accounts in accordance with orders of this commission; and

(2) the credit for the sale price of electric plant constituting an operating unit or system sold, conveyed or transferred to another through sale, merger, consolidation, or otherwise, pending the completion of the accounting for the transaction and an order of this commission for the accounting of such sale.

D C 1108. Other Utility Plant

A. There shall be included under this caption the balances in accounts for utility plant other than electric plant, as for example, gas, steam, etc.

B. A separate account shall be kept for each utility department.

Note: In the case of utility services for which systems of accounts are prescribed by this commission, the appropriate accounts in such systems shall be used.

INVESTMENT AND FUND ACCOUNTS

D C 1110. Other Physical Property

A. This account shall include the cost to the utility of land, structures, and equipment owned by the utility and not includible in utility plant accounts (1100-1108).

B. The records supporting the entries to this account shall be so kept that the utility can furnish information as to the nature and cost of each kind of property, from whom it was acquired, its location, and its use.

D C 1114. Miscellaneous Investments and Special Funds

A. This account shall include assets, such as:

- (1) Investments in securities issued or assumed by others;
- (2) Advances to others, except advances to associated companies (see account 1115) including interest accrued thereon; and
- (3) Assets held in sinking funds, depreciation funds, and other special funds, such as:
 - (a) Cash
 - (b) Securities issued by others or other assets, at cost, except as provided in paragraphs C and D
 - (c) Live securities, issued or assumed by the utility, at cost
 - (d) Securities of the utility issued to trustees without intervening sale, at face value
- (4) Special deposits for more than one year, such as for rent, performance of contracts, etc.

B. The records shall be so kept as to show the amount of each investment and the investment advances to each person.

C. Except as otherwise provided, the investments included in this account shall be recorded at cost at the time of acquisition. Cost does not include any amount paid for accrued interest or dividends. The utility may write down the cost of any investment in recognition of a decline in the value thereof, and if there be no reasonable prospect of substantial value it shall be written off or written down to a nominal value. Fluctuations in market value shall not be recorded but a permanent impairment in the value shall be recognized in the accounts. When investments are written off, or written down the amount of the adjustment shall be charged to account 1538, Miscellaneous Income Deductions, or to account 1414, Miscellaneous Debits to Surplus, except that if a reserve has been created therefor, it shall be to such reserve account.

D. If securities with a fixed maturity date are purchased at a discount or at a premium, such discount or premium may be written off

over the remaining life of the securities through periodic debits or credits to this account with concurrent credits or debits to account 1524, Interest Revenues.

Note A: Securities pledged shall be so indicated.

Note B: This account shall not include advances to or open accounts with associated companies. (See account 1115, Owing by Associated Companies.)

OWING BY ASSOCIATED COMPANIES

D C 1115. Owing by Associated Companies

A. This account shall include debit balances in all accounts with associated companies, and notes and drafts upon which associated companies are liable, together with interest thereon.

B. This account shall be so kept as to show for each associated company the amounts receivable on notes separately from amounts receivable on open accounts, and the due date of each item.

Note: The face amount of notes receivable from associated companies discounted or sold without releasing the utility from liability as endorser thereon, shall not be credited to this account, but to account 1221, Notes Receivable Discontinued.

CURRENT AND ACCRUED ASSETS

D C 1120. Cash and Working Funds

This account shall include cash on hand and in bank and cash advanced to officers, agents, employees, and others as petty cash or working funds. Special cash deposits for payment of interest, dividends, or other special purposes shall be included in this account in separate subdivisions which shall specify the purpose for which each such special deposit is made.

Note: Deposits for more than one year shall not be charged to this account but to account 1114, Miscellaneous Investments and Special Funds.

D C 1124. Notes Receivable

This account shall include the cost of all collectible obligations in the form of notes receivable and similar evidences (except interest coupons) of money due on demand or within one year from the date of issue, which are not includible in other accounts.

Note A: Notes receivable from associated companies shall not be included herein but in account 1115, Owing by Associated Companies.

Note B: When notes receivable are discounted, sold or transferred, unless transferred without recourse, an entry shall be made debiting account 1120, or other applicable accounts, and crediting account 1221, Notes Receivable Discounted. If notes receivable are placed in a bank

for collection, no entry need be made therefor in the general ledger, but a memorandum entry to state the fact shall be made to the note record.

D C 1125. Accounts Receivable

A. This account shall include amounts due on open accounts from customers for utility services (including merchandising, jobbing and contract work) and from others than customers, except amounts due from associated companies.

B. Utilities shall subdivide this account to show separately: (1) amounts due from customers, (2) amounts due from officers and employees (except working fund advances which are includible in account 1120, but including amounts due for utility service), and (3) amounts due from others.

D C 1131. Materials and Supplies

A. This account shall include the cost of unissued small tools and unapplied materials and supplies (except line transformers and meters). The cost shall include, when practicable, the purchase price at the point of free delivery, plus customs duties, excise and other taxes on purchases, freight, insurance, costs of inspection, special tests prior to acceptance, loading and unloading, transportation and other directly assignable charges.

B. If inward transportation charges on materials are not included as a part of the cost of the particular materials to which they relate, they shall be charged to account 1810, Stores, Shop and Laboratory Expenses, unless account 1902, Stores Expenses--Clearing, is used, in which case they shall be therein included.

C. Cash or other discounts on materials shall be deducted, when practicable, in determining the cost of the particular material, or credited to the account to which the material is charged. Discounts which are not so handled shall be credited to account 1810, Stores, Shop and Laboratory Expenses, unless account 1902, Stores Expenses--Clearing, is used, in which case they shall be therein included.

D. Materials recovered in connection with construction, maintenance, or the retirement of property which are not intended to be reused, shall be designated as "scrap" and charged to this account at amounts which it is estimated will be realized therefrom; if they are intended to be reused, they shall be charged to this account at the average price at which like materials are carried, except that large individual items of equipment, such as substation equipment, shall be carried at original cost.

E. When materials are issued for use, this account shall be credited

with either the actual cost of the material issued or the average cost of all items of the same kind and size, not including "scrap" material. Scrap material shall be credited to this account when sold or otherwise disposed of at the amount at which such materials were charged into the account. Account 1250, Reserve for Depreciation of Utility Plant, shall be adjusted for the difference between the amount charged hereto and the amount received therefor if material was recovered from retirement of property, and the appropriate maintenance account shall be adjusted if such material was recovered on maintenance work.

F. Inventories of materials, supplies, fuel, etc., shall be taken at least annually and the necessary adjustments shall be made to bring this account into harmony with the actual inventories. In effecting the adjustments, differences shall be equitably apportioned among the accounts to which materials have been charged since the preceding inventory, or included in account 1810, Stores, Shop and Laboratory Expenses, unless account 1902, Stores Expenses--Clearing, is used, in which case they shall be therein included.

Note: Appliances held under consignment shall not be included herein, but there shall be kept a memorandum account of such appliances either at cost or at selling price, to show the appliances in stock and appliances sold.

D C 1132. Prepayments

A. When a payment is made in advance of the period to which the expenditure applies, the amount thereof shall be charged to this account. Each month or other accounting period to which the item applies an entry shall be made crediting this account and charging the appropriate account with its proper portion of the prepayment.

B. Representative items includible herein are prepaid insurance, rents (see electric plant instruction 182.8), taxes and interest. The account shall be so kept or supported as to disclose the balance of each class of prepayments.

Note: For example, an insurance premium amounting to \$1200 is paid on a policy running for a year in the future. The amount of the premium shall be charged to this account, and each month or other accounting period, entries shall be made transferring from this account to the appropriate operating expense or other account the portion of the premium which is applicable to the period.

D C 1133. Miscellaneous Current and Accrued Assets

This account shall include the following classes of items:

(1) Interest, dividends and rents receivable, except from associated companies;

(2) Estimated amounts accrued to the utility for service rendered but not billed as of the end of any accounting period; (this is optional.)

(3) Cash surrender value of life insurance policies under which the utility is the beneficiary; and (See note to account 1800, Other General Expenses.)

(4) Other assets not includible in accounts 1120 to 1132, or 1115, which are readily convertible into cash or are held for current use in operations or construction.

DEFERRED DEBITS

D C 1140. Unamortized Debt Discount and Expense

A. Discount on bonds or other debt is the excess of the face value of the securities plus interest accrued at the date of sale over the cash value of the consideration received from their sale; when the amount (or cash value of the consideration) received exceeds the face value and accrued interest, the excess is the premium. Expenses incurred in connection with the issue are items such as fees for drafting mortgages, taxes and fees for issuing and recording, commissions or fees paid for selling bonds, cost of obtaining governmental authorization, etc.

B. When discount and expenses are incurred on an issue of long-term debt (see §180.1 (a) (8)) or when expenses on an issue are greater than the premiums on such issue, the amount thereof shall be included in this account. A separate subdivision shall be kept for each class and series of long-term debt.

C. The discount and expense (or expense less premium if a net debit) on each issue shall be written off over the life of the issue to which it applies under a plan that will equitably distribute the amounts over the life of the bonds or other long-term debt. This may be done by monthly charges to account 1531, Amortization of Debt Discount and Expense, and credits to this account. The utility may, however, charge off discount and expense (or expenses less premium if a net debit) over a shorter period by charges to account 1414, Miscellaneous Debits to Surplus.

D. When bonds or other long-term debt are reacquired, any balance included in this account representing discount and expense (or expense less premium if a net debit) on the reacquired debt shall be credited to this account and debited to account 1414, Miscellaneous Debits to Surplus. The difference between the face value of the bonds or other long-term debt and the amount for which they were reacquired shall be carried to Surplus. (See also account 1153, Reacquired Long-term Debt.)

D C 1146. Miscellaneous Deferred Debits

A. This account shall include the following classes of items:

(1) Expenditures for preliminary surveys, plans, investigations, etc., made for the purpose of determining the feasibility of projects under contemplation. If construction results, this account shall be credited with the amount applicable thereto and the appropriate electric plant accounts shall be charged with an amount which does not exceed the expenditures which may reasonably be determined to contribute directly and immediately and without duplication to electric plant. If the work is abandoned, the charge shall be to account 1538, Miscellaneous Income Deductions, or account 1414, Miscellaneous Debits to Surplus, unless otherwise authorized or directed by this commission.

(2) Extraordinary property losses which require abandonment or retirement of property in advance of adequate provision therefor through reserves or otherwise, such as destruction by floods, condemnation for public use, etc. When such losses are incurred the utility shall make application to this commission to prescribe the accounting therefor and shall submit all the relevant facts concerning the case.

(3) Undistributed balances in clearing accounts (see accounts 1901 to 1905) at the date of the balance sheet. Balances in clearing accounts shall be substantially cleared not later than the end of the calendar year unless items held therein relate has future period.

(4) Balances representing expenditures for work in progress other than on utility plant. This includes jobbing and contract work in progress.

(5) Other debit balances, the proper final disposition of which is uncertain, and unusual or extraordinary expenses, not included in other accounts, which are in process of being written off.

B. The records supporting the entries to this account shall be so kept that the utility can furnish full information as to each deferred debit included herein.

CAPITAL STOCK EXPENSE

D C 1151. Capital Stock Expense

A. There shall be reported by this caption all balances in the accounts for expenses incurred in connection with the issuance and sale of capital stocks.

B. The accounts hereunder shall be so kept as to show separately the expense on each class and series of capital stocks.

C. Credits made to this account to write off capital stock expense (if the utility desires to write off such expense) shall be offset by debits to account 1414, Miscellaneous Debits to Surplus.

D. When capital stock is reacquired, this account shall be credited and account 1414, Miscellaneous Debits to Surplus, shall be charged with the amount of expenses included herein applicable to such reacquired

stock.

REACQUIRED SECURITIES

D C 1152. Reacquired Capital Stock

A. This account shall include the par value of capital stock which had been issued by the utility and is reacquired by it and not retired or canceled, but is held by the utility. Stock without par value shall be included in this account at the proportionate amount at which the particular class and series of stock is included in account 1200, Common Capital Stock, or account 1201, Preferred Capital Stock.

B. The difference between the amount paid for capital stock reacquired and the amount at which such reacquired stock is charged to this account in accordance with paragraph A, above, shall be carried to account 1401, Miscellaneous Credits to Surplus, or account 1414, Miscellaneous Debits to Surplus, as appropriate, to which shall also be transferred any premium or expense applicable to the capital stock reacquired.

C. When reacquired capital stock is retired or canceled, this account shall be credited and account 1200 or 1201, as applicable, shall be charged with the amounts at which such stock is included therein. When reacquired capital stock is resold by the utility (see Public Service Law, § 69), the par value (or amount included in this account for stock without par value) of the stock resold shall be credited to this account.

D. This account shall be so kept or supported as to show the amount herein applicable to each class and series of stock.

D C 1153. Reacquired Long-term Debt

A. This account shall include the par or face value of bonds or other long-term debt which had been issued or assumed by the utility and is reacquired by it and held under conditions which do not permit the utility to treat such securities as paid, retired, or canceled, but which permit the resale of the securities (see Public Service Law, § 69). It shall not include securities which are held by trustees in sinking or other funds.

B. The difference between the amount paid for bonds or other long-term debt reacquired and their par or face value shall be debited or credited, as appropriate, to account 1414, Miscellaneous Debits to Surplus, or 1401, Miscellaneous Credits to Surplus, to which shall also be transferred any discount, premium or expense applicable to the reacquired bonds or other long-term debt.

C. When reacquired bonds or other long-term debt are resold by the utility (see Public Service Law, § 69), the par or face value thereof shall be credited to this account. When reacquired bonds or other

long-term debt are retired or canceled, this account shall be credited and the appropriate long-term debt account shall be charged with the par or face value thereof.

D. This account shall be so kept or supported as to show the amount herein applicable to each class and series of long-term debt.

LIABILITIES AND OTHER CREDITS

CAPITAL STOCK

D C 1200. Common Capital Stock

D C 1201. Preferred Capital Stock

A. These accounts shall include the par value of capital stock with par value and the cash value of the consideration received for non-par stock, of each class of capital stock which has been issued and is outstanding, and also the capital stock in account 1152, Reacquired Capital Stock.

B. When the actual cash value of the consideration received is more than the par value of any stock having par value, the excess shall be credited to account 1203, Premiums and Assessments on Capital Stock.

C. When capital stock is retired and canceled, these accounts shall be charged with the amount at which such stock is carried herein.

D. A separate ledger account, with a descriptive title, shall be kept for each class and series of stock. The supporting records shall show the shares in the hands of the public and those reacquired by the company and not resold.

Note A: When a levy or assessment, except a call for payment on subscriptions, is made against holders of capital stock, the amount collected upon such levy or assessment on capital stock with par value shall be credited to account 1203, Premiums and Assessments on Capital Stock, and a levy or assessment on capital stock without par value shall be included in these accounts.

Note B: No entries, other than those covered by the above provisions and those to record liquidating dividends, shall be made in any account for non-par stocks, except upon order of this commission.

D C 1203. Premiums and Assessments on Capital Stock

A. This account shall include the excess of actual cash value of the consideration received over the par value and accrued dividends, of par value stock issue together with assessments against stockholders representing payments required in excess of par value. (Assessments on stock without par value shall be included in account 1200 or 1201, as appropriate.)

B. A separate account shall be kept for premiums and assessments on each class and series of par stock.

C. When capital stock is reacquired or retired, the amount in this account with respect to the shares of such stock reacquired or retired shall be debited hereto.

D C 1205. Installments Received on Capital Stock

A. This account shall include the amount of installments received on capital stock subscribed for on a partial or instalment payment plan.

B. As subscriptions are paid in full and certificates issued, this account shall be charged and account 1200, Common Capital Stock, account 1201, Preferred Capital Stock, or account 1152, Reacquired Capital Stock (if reacquired stock is resold), credited with the par value of such capital stock having par value, and with the consideration received for capital stock without par value. Premiums on capital stock with par value shall be transferred to account 1203, Premiums and Assessments on Capital Stock.

Note: The records supporting the entries to this account shall be so kept that the corporation can furnish the name and address of each subscriber, the amount and kind of capital stock subscribed, the date of subscription, the date that each payment is due and the date that each is paid, the nature of each payment (whether cash or other consideration) and any other information that is necessary to make the history of the subscription complete.

NON-CORPORATE PROPRIETORSHIP

D C 1206. Non-corporate Proprietorship

This account shall include the investment in an unincorporated utility by the proprietor thereof, and shall be charged with all withdrawals from the business by its proprietor. At the end of each calendar year the net income for the year as developed in the income account shall be transferred to this account. There shall also be entered in this account such items as in corporate organizations are handled through Surplus. (See optional accounting procedure provided in note C hereunder.)

Note A: Amounts payable to the proprietor as just and reasonable compensation for services performed shall not be charged to this account but to appropriate operating expense or other accounts.

Note B: When the utility is owned by a partnership, a separate account shall be kept to show the net equity of each member therein and the transactions affecting the interest of each such partner.

Note C: This account may be restricted to the amount considered by the proprietor to be the permanent investment in the business, subject to change only by additional investment by the proprietor or the withdrawal of portions thereof not representing net income. When this option is taken the surplus accounts shall be maintained and entries thereto shall

be made in accordance with the texts thereof.

LONG-TERM DEBT

D C 1210. Bonds

This account shall include the face value of unmatured bonds which have been issued and have not been retired or canceled; also the face value of such bonds issued by others the payment of which has been assumed by the utility. The account shall be so kept as to show the face value of each class and series outstanding.

Note A: The accounting for discount, expense, and premium on long-term debt, is set forth in accounts 1140, Unamortized Debt Discount and Expense, and 1240, Unamortized Premium on Debt.

Note B: Matured long-term debt shall be included in account 1225, Matured Long-term Debt.

D C 1211. Receivers' Certificates

A. This account shall include the face value of certificates of indebtedness issued by receivers in possession of the property and acting under the orders of a court.

B. A separate subdivision shall be kept for each issue of receivers' certificates.

Note: Matured receivers' certificates shall be included in account 1225, Matured Long-term Debt.

D C 1213. Miscellaneous Long-term Debt

A. This account shall include until maturity all notes or other obligations (except advances from associated companies) having a life of more than one year after issue or assumption. This includes such items as real estate mortgages, executed or assumed, assessments for public improvements due later than one year after date, etc.

B. Separate accounts shall be kept for each class of obligation, and records shall show separately for each class all details as to date of obligation, date of maturity, interest dates and rates, security for the obligation, etc.

Note: Matured long-term debt shall be included in account 1225, Matured Long-term Debt.

DEBTS TO ASSOCIATED COMPANIES

D C 1214. Debts to Associated Companies

This account shall include all amounts owed to associated companies on notes, drafts, acceptances or other similar evidences of indebtedness and open accounts payable, and also interest on obligations included herein, and shall be so kept as to show separately the amount payable to each associated company on (1) notes, (2) open accounts.

CURRENT AND ACCRUED LIABILITIES

D C 1220. Notes Payable

This account shall include the face value of all notes, drafts, acceptances, or other similar evidences of indebtedness to other than associated companies, payable on demand or which by their terms are payable within a time not exceeding one year from the date of issue.

D C 1221. Notes Receivable Discounted

This account shall include the face amount of notes receivable discounted or sold without releasing the utility from liability as endorser thereon.

D C 1222. Accounts Payable

This account shall include all open accounts payable by the utility within one year and which are not provided for in other accounts.

D C 1224. Dividends Declared

This account shall include the amount of dividends which have been declared but not paid. Dividends shall be credited to this account when they become a liability.

D C 1225. Matured Long-term Debt

When any debt carried in account 1210, Bonds, 1211, Receivers' Certificates, or 1213, Miscellaneous Long-term Debt, matures but is not paid or for which no specific agreement for extension of the time of payment is made, it shall be transferred to this account; bonds called for redemption but not presented, shall also be included herein.

D C 1227. Customers' Deposits

This account shall include all amounts deposited with the utility by customers as security for the payment of bills.

D C 1228. Taxes Accrued

A. This account shall be credited each month with the amount of taxes applicable thereto when payment of such taxes is to be made in a subsequent period. Concurrently, debits shall be made to the appropriate accounts for tax charges. In the absence of precise information as to the amount of the tax the monthly credits to this account will necessarily be based upon estimates; when the actual amount of the tax becomes known, the amounts of the periodic accruals shall be adjusted so as to include as nearly as can be determined in each year the taxes applicable thereto.

B. The records supporting the entries to this account shall be so kept that the utility can furnish information as to the amount of each class of taxes accrued, the basis for each tax accrual, the accounts to which charged, and the amount of each class of taxes paid.

D C 1229. Interest Accrued

This account shall include the amount of interest accrued on long-term

debt and other liabilities of the utility, except interest on debt to associated companies, which shall be included in account 1214, Debts to Associated Companies, and except interest which is added to the principal of the debt on which incurred.

Note: This account shall be so kept as to show the amount of matured interest on each obligation.

D C 1230. Other Current and Accrued Liabilities

This account shall include liabilities of a current character (those which are either matured at the date of the balance sheet or become due on demand or within one year from date of issuance or assumption except bonds, receivers' certificates, and debts to associated companies) or which have accrued but are not payable at the date of the balance sheet, other than those for which accounts 1220 to 1229 above have been provided.

DEFERRED CREDITS

D C 1240. Unamortized Premium on Debt

A. This caption shall include credit balances representing the premiums less expenses, when a net credit, on each issue of long-term debt, including receivers' certificates. (See account 1140 for definitions of premium and debt expenses.)

B. The net credit of the premium less expense on each issue shall be written off over the life of the issue under a plan that will equitably distribute the amounts over the life of the securities by debits to this account and credits to account 1532, Amortization of Premium on Debt--Credit.

C. When bonds or other long-term debt are reacquired, any balance included in this account representing premium (less expense) on the debt shall be wiped out by a debit to this account and a credit to account 1401, Miscellaneous Credits to Surplus. (See also account 1153, Reacquired Long-term Debt.)

D C 1241. Customer Advances for Construction

A. This account shall include such advances by customers for construction as are to be refunded wholly or in part. When a customer is refunded the entire amount to which he is entitled according to the agreement or rule under which the advance was made, the balance, if any, remaining in this account shall be debited hereto and credited to the electric plant accounts to which the cost of the property was charged.

B. Separate subdivisions shall be kept for each utility service.

D C 1242. Other Deferred Credits

This account shall include advanced billings and receipts and other deferred credit items not provided for elsewhere; also amounts which can

not be entirely cleared or disposed of until additional information has been received, or which should be credited to income or to surplus accounts in the future.

RESERVES

D C 1250. Reserve for Depreciation of Utility Plant

A. This account shall be credited with the following:

(1) Amounts representing currently accruing depreciation on utility plant (See general instruction ÷ 181.8.);

(2) Amounts charged to account 1414, Miscellaneous Debits to Surplus, for past accrued depreciation of utility plant;

(3) Accrued depreciation upon utility properties acquired as operating units or systems;

(4) Amounts charged upon approval of the commission to account 1146, Miscellaneous Deferred Debits.

B. Class C utilities shall subdivide this account as follows:

C 1250.1 Reserve for Depreciation of Electric Plant in Service

C 1250.2 Reserve for Depreciation of Electric Plant Leased to Others

C 1250.4 Reserve for Depreciation of Electric Plant Held for Future

Use

C 1250.6 Reserve for Depreciation of Unclassified Electric Plant

C 1250.8 Reserve for Depreciation of Other Utility Plant

C. Class C utilities shall keep further subdivisions of the foregoing accounts to show the amounts applicable to each electric plant account (1302-1390); and also subdivisions for "Common" plant.

D. This account shall be charged with the amount carried on the books for plant retired, including intangible plant having a terminable life as provided in paragraph F hereunder (except items in account 1301, Organization) and with the cost of removal, and shall be credited with the salvage realized and any other amounts recovered, such as insurance. (See also par. (2) of account 1146, Miscellaneous Deferred Debits.)

E. The reserves shall be so kept as to show separately for each subdivision (1) the amount of the accrual for depreciation, (2) the amount at which property retired was carried on the books, (3) cost of removal, (4) salvage, and (5) other items, including recoveries from insurance.

F. This account shall include also the provision for writing off the cost of intangible plant having a terminable life (except items in account 1301, Organization). When any franchise, license, patent right, limited-term interest in land or land right expires, is sold, relinquished or otherwise retired from service, this account shall be charged with the amount previously credited hereto in respect to such

property. The amount included in accounts 1101-1104 and 1106, for property so retired, less the amount chargeable to this account, and less the proceeds realized shall be included in the appropriate surplus account.

Note: The utility is restricted in its use of the reserve to the purposes set forth above. It shall not divert any portion of the reserve to Surplus or make any other use thereof without the approval of this commission.

D C 1252. Reserve for Amortization of Electric Plant Acquisition Adjustments

This account shall be credited (or debited) with amounts which are charged (or credited) to account 1505, Amortization of Electric Plant Acquisition Adjustments, to account 1538, Miscellaneous Income Deductions, or to Surplus, for the purpose of providing for the extinguishment of amounts carried in account 1105, Electric Plant Acquisition Adjustments.

D C 1254. Reserve for Uncollectible Accounts

This account shall be credited each month with estimated amounts required to provide for losses on accounts receivable which may become uncollectible, and also with collections on accounts previously charged hereto. Concurrent charges shall be made to account 1783, Uncollectible Accounts, for amounts applicable to electric operations, and to corresponding accounts for other operations.

Note: Accretions to this reserve shall not be made in excess of a reasonable provision against losses of the character provided for.

D C 1255. Reserve for Insurance, Injuries and Damages

A. This account shall be credited, and account 1798, Insurance, Injuries and Damages, or other appropriate account, charged each month with amounts which the utility estimates are required for self-insurance against losses through accident, fire, flood, or other hazards to its own property or property leased from others, and for probable liability, not covered by insurance, for deaths or injuries to employees and others, and for damages to property not owned or held under lease. A schedule of risks covered by this reserve shall be maintained, giving a description of the property involved, the risks covered, and the rates used.

B. Charges shall be made to this account for:

(1) Losses to property owned or leased from others, covered by self-insurance

(2) Liability for any injury or damage which is admitted by the utility either voluntarily or because of the decision of a court or

other lawful authority, such as a workmen's compensation board; the amount of the liability pending its payment shall be credited to the appropriate liability account.

Note A: Accretions to this reserve shall not be made in excess of a reasonable provision against losses of the character provided for.

Note B: Recoveries or reimbursements for losses charged to this account shall be credited hereto.

D C 1258. Miscellaneous Reserves

A. This account shall include all reserves which are not provided for elsewhere in this system of accounts, such as reserves for pensions, accident and death benefits, relief or other provident purposes, etc., and for depreciation of property carried in account 1110, Other Physical Property.

B. This account shall be so kept as to show the amount of each separate reserve and the nature and amounts of the debits and credits hereto.

CONTRIBUTIONS IN AID OF CONSTRUCTION

D C 1265. Contributions in Aid of Construction

A. This account shall include those contributions for construction purposes made prior to January 1, 1947 in cash, services or property by States, municipalities or other governmental agencies, individuals and others which have not been transferred to other accounts.

B. Amounts in this account at December 31, 1946 which are refundable wholly or in part shall be transferred to account 1241, Customer Advances for Construction. Unless otherwise ordered by the commission, non-refundable amounts in this account at December 31, 1946 which can be identified with property in electric plant accounts shall be transferred to the appropriate accounts. Amounts not identified with property in electric plant accounts may be distributed to electric plant accounts under a plan approved by the commission; otherwise the amounts remain in this account. Except as provided herein, amounts in this account shall not be transferred to any other account without the approval of the commission.

C. The records supporting the entries to this account shall be so kept that the utility can furnish information as to the purpose of each contribution, the conditions, if any, upon which it was made, and the amount of contributions from (a) States, (b) municipalities, (c) customers, and (d) others.

D. This account shall be subdivided according to departments (electric, gas, etc.) of the utility.

SURPLUS

D C 1271. Surplus

This account shall include the total of balances of accounts 1400 to 1414. The balance may be either a credit or a debit.

ELECTRIC PLANT ACCOUNTS
INTANGIBLE PLANT

D C 1301. Organization

D C 1302. Franchises and Consents

D C 1303. Miscellaneous Intangible Plant

PRODUCTION PLANT

D C 1310. Land and Land Rights

D C 1311. Structures and Improvements

D C 1312. Steam Power Equipment

D C 1322. Reservoirs, Dams and Waterways

D C 1323. Hydraulic Power Equipment

D C 1332. Internal Combustion Engine Power Equipment

TRANSMISSION AND DISTRIBUTION PLANT

D C 1350. Land and Land Rights

D C 1351. Structures and Improvements

D C 1352. Station Equipment

D 1354. Overhead Lines

C 1354.1 Poles, Towers and Fixtures

C 1354.2 Overhead Conductors and Devices

C 1354.3 Overhead Services

D 1356. Underground Lines

C 1356.1 Underground Conduit

C 1356.2 Underground Conductors and Devices

C 1356.3 Underground Services

D C 1358. Line Transformers

D C 1360. Meters

D C 1361. Installations on Customers' Premises

D C 1362. Leased Property on Customers' Premises

D C 1363. Street Lighting and Signal Systems

GENERAL PLANT

D C 1370. Land and Land Rights

D C 1371. Structures and Improvements

D C 1372. Office Furniture and Equipment

D C 1373. Transportation Equipment

D C 1379. Other General Equipment

D C 1390. Other Tangible Property

INTANGIBLE PLANT

D C 1301. Organization

This account shall include fees paid to Federal or State governments for the privilege of incorporation and expenditures for organizing the corporation, partnership or other enterprise and putting it into readiness to do business.

ITEMS

1. Cost of obtaining certificates authorizing an enterprise to engage in the public utility business (except costs includible in account 1302 (õ 190.3))

2. Fees and expenses for incorporation

3. Fees and expenses for mergers or consolidations

4. Office expenses incident to organizing the utility

5. Stock and minute books and corporate seal

Note A: This account shall not include any discounts upon securities issued or assumed; nor shall it include any costs incident to negotiating loans, selling bonds or other evidences of debt, or expenses in connection with the authorization, issuance, or sale of capital stock.

Note B: Exclude from this account and include in the appropriate expense account the cost of preparing and filing papers in connection with the extension of the term of incorporation unless the first organization costs have been written off. When charges are made to this account for expenses incurred in mergers, consolidations, or reorganizations, amounts previously carried on the books of the corporations merged, consolidated, or reorganized shall not be included in this account.

D C 1302 Franchises and Consents

A. This account shall include only amounts paid to the Federal government, to a State or to a political subdivision thereof in consideration for franchises, consents, or certificates, running in perpetuity or for a specified term of more than one year.

B. If a franchise, consent, or certificate is acquired by assignment, the charge to this account in respect thereof shall not exceed the amount paid therefor by the utility to the assignor, nor shall it exceed the amount paid by the original grantee. Any excess of the amount actually paid by the utility over the amount above specified shall be charged to account 1414, Miscellaneous Debits to Surplus.

C. When any franchise has expired, the amount included therefor in this account shall be credited hereto.

Note: Annual or other periodic payments under franchises shall not be included herein but in the appropriate operating expense account.

D C 1303. Miscellaneous Intangible Plant

A. This account shall include the cost of patent rights, licenses, privileges, and other intangible property necessary or valuable in the conduct of the utility's electric operations and not specifically chargeable to any other account.

B. When any item included in this account is retired or expires, the amount included herein for the item shall be credited hereto.

C. This account shall be so kept that the utility can furnish full information with respect to the amounts included herein.

Note: Expenses incident to procuring franchises, consents, or certificates shall not be included herein.

PRODUCTION PLANT

Note: When generation is principally by a given type of motive power but supplemental equipment is available for emergency use, the production plant may, with the exception of facilities identified wholly with a particular type of motive power, be classified in accordance with the major use thereof.

D C 1310 Land and Land Rights

This account shall include the cost of land and land rights used in connection with electric generation. (See electric plant instruction 182.4.)

D C 1311. Structures and Improvements

This account shall include the cost in place of structures and improvements used in connection with electric generation. (See electric plant instruction 182.5.)

D C 1312. Steam Power Equipment

This account shall include the cost installed of equipment in steam production plants used in generating electricity, such as:

(1) Furnaces, boilers, coal and ash handling equipment, steam and feed water piping, water supply and purification systems, boiler apparatus and accessories

(2) Steam engines, reciprocating or rotary, and their associated auxiliaries; generators, engine driven and turbine driven

(3) Accessory and other equipment in steam plants

Note A: Include office furniture and equipment, desks, chairs, etc., in account 1372, Office Furniture and Equipment.

Note B: This account shall not include boilers or steam pipes whose primary purpose is the heating of structures.

D C 1322. Reservoirs, Dams and Waterways

This account shall include the cost in place of facilities used for impounding, collecting, storage, diversion, regulation and delivery of water used primarily for generating electricity. This includes

reservoirs, dams and waterways with all construction appurtenant thereto, such as spillways, flash boards, gates, canals, tunnels, gate houses, fish ladders, intakes, flumes, penstocks, forebays, tailraces, and all other construction identified therewith.

Note: Include office furniture and equipment, desks, chairs, etc., in account 1372, Office Furniture and Equipment.

D C 1323. Hydraulic Power Equipment

This account shall include the cost installed of equipment in hydraulic power plants used in generating electricity, such as:

(1) Water wheels and hydraulic turbines and generators driven thereby and their accessories

(2) Accessory and other equipment in hydraulic power plants

D C 1332. Internal Combustion Engine Power Equipment

This account shall include the cost installed of equipment in internal combustion engine power production plants used in generating electricity, such as:

(1) Fuel handling and storage equipment, and gas producers and accessories devoted to the production of gas for use in internal combustion engines driving electric generators

(2) Diesel or other internal combustion engines with their auxiliaries

(3) Generators and their accessories

(4) Accessory and other equipment in internal combustion engine production plants

Note: Include office furniture and equipment, desks, chairs, etc., in account 1372, Office Furniture and Equipment.

TRANSMISSION AND DISTRIBUTION PLANT

D C 1350. Land and Land Rights

This account shall include the cost of land and land rights used in connection with transmission or distribution operations. (See electric plant instruction § 182.4.)

D C 1351. Structures and Improvements

This account shall include the cost in place of structures and improvements used in connection with transmission or distribution operations. (See electric plant instruction § 182.5.)

D C 1352. Station Equipment

This account shall include the cost installed of transforming, conversion, and switching equipment, including transformer banks, etc., used for the purpose of changing the characteristics of electricity in connection with its transmission or distribution, and equipment for controlling the electric circuits.

Note A: The cost of rectifiers, series transformers and other special

station equipment devoted exclusively to street lighting or signal system service shall not be included in this account, but in account 1363, Street Lighting and Signal Systems.

Note B: Include office furniture and equipment, desks, chairs, etc., in account 1372, Office Furniture and Equipment.

D 1354. Overhead lines

A. This account shall include the cost installed of overhead transmission and distribution lines, including:

(1) Poles, towers and appurtenant fixtures, such as anchors, guys, crossarms, brackets, guards, pins, pole steps, transformer racks and platforms, pole plates, etc.

(2) Wire and cable, circuit breakers, insulators, clamps, lightning arresters and ground wires, switches and other line devices, except transformers

(3) Services, i.e., conductors leading from last pole to the connection with customer's service outlet and wiring

B. The costs chargeable to this account include also such items as permits, municipal inspection, protection of street openings, etc.

C. Class C utilities shall subdivide this account as follows:

C 1354.1 Poles, Towers and Fixtures, to include plant provided for in item (1) above

C 1354.2 Overhead Conductors and Devices, to include plant provided for in item (2) above

C 1354.3 Overhead Services, to include plant provided for in item (3) above

Note A: The cost of plant used solely for street lighting or signal systems shall not be included in this account but in account 1363, Street Lighting and Signal Systems.

D 1356. Underground Lines

A. This account shall include the cost installed of underground transmission and distribution lines, including:

(1) Conduit, including foundations, manholes, lighting systems, sewer connections, ventilating equipment, etc.

(2) Wire and cable, circuit breakers, insulators, clamps, lightning arresters, switches, and other line devices, except transformers

(3) Services, i.e., conductors leading from distribution box or manhole to the connection with customer's service outlet or wiring

B. The costs chargeable to this account include also such items as permits, municipal inspection, protection of street openings, etc.

C. Class C utilities shall subdivide this account as follows:

C 1356.1 Underground Conduit, to include plant provided for in item

(1) above

C 1356.2 Underground Conductors and Devices, to include plant provided for in item (2) above

C 1356.3 Underground Services, to include plant provided for in item (3) above

Note A: The cost of plant used solely for street lighting or signal systems shall not be included in this account but in account 1363, Street Lighting and Signal Systems.

Note B: The cost of cutting and replacing pavement, pavement base, and sidewalks, shall be included in a separate subdivision of this account.

D C 1358. Line Transformers

A. This account shall include the cost installed of overhead and underground distribution line transformers and pole type and underground voltage regulators owned by the utility, for use in transforming electricity to the voltage at which it is to be used by the customer, and the cost of transformers held in reserve. The installation cost includible herein is the first installation only.

B. When a transformer is permanently retired from service, the installed cost thereof shall be credited to this account.

C. The records covering line transformers shall be so kept that the utility can furnish the number of transformers of various types and capacities in service and those in reserve, and the location and the use of each transformer.

ITEMS

1. Installation, labor of (first installation only)
2. Network protectors, installed
3. Transformers, line and network
4. Transformer cut-out boxes, installed
5. Transformer lightning arresters, installed
6. Voltage regulators

Note A: The cost of removing and resetting line transformers shall not be charged to this account but to account 1762, Operation Labor, or account 1765, Labor on Street Lighting and Signal Systems, as appropriate. The cost of line transformers used solely for street lighting or signal systems shall be included in account 1363, Street Lighting and Signal Systems.

Note B: When a line transformer is rewound or when the cores and coils are replaced, its entire cost shall be credited to this account and charged to the depreciation reserve. The rewound transformer (or one wherein cores and coils were replaced) shall be charged to this account at the cost of an equivalent new transformer. There shall then be

credited to the depreciation reserve as salvage the difference between the cost of an equivalent new transformer and the cost of such rewinding or new cores and coils.

Note C: Minor items, such as cut-out boxes, network protectors, lightning arresters, etc., shall be included in this account only when in service or associated with a line transformer or voltage regulator held in reserve; otherwise they shall be carried in account 1131, Materials and Supplies.

D C 1360. Meters

A. This account shall include the cost installed of meters or devices and appurtenances thereto, for use in measuring the electricity delivered to its users, and the cost of meters held in reserve. The installation cost includible herein is the first installation only.

B. When a meter is permanently retired from service, the installed cost thereof shall be credited to this account.

C. The records covering meters shall be so kept that the utility can furnish information as to the number of meters of various types and capacities in service and in reserve as well as the location of each meter owned.

ITEMS

1. Meters
2. Current limiting devices
3. Demand indicators
4. Instrument transformers
5. Meter badges and their attachments, installed
6. Testing new meters
7. Installation, labor of (first installation only)
8. Meter boards and boxes, installed
9. Meter fittings and materials used in installation
10. Meter switches and cut-outs, installed
11. Protective devices, installed

Note A: This account shall not include meters for recording output of a generating station, substation meters, etc. It includes only meters for use to record energy delivered to customers.

Note B: The cost of removing and resetting meters shall be charged to account 1763, Labor on Customers' Premises.

Note C: The utility shall keep statistical records to show separately the number of installations the cost of which is included herein, and the number of meter installations which prior to the effective date of this system of accounts was charged to operating expenses.

Note D: Minor items such as meter badges and their attachments shall

be included in this account only when in service or associated with a meter held in reserve; otherwise they shall be carried in account 1131, Materials and Supplies.

Note E: Charges made to customers for connection, disconnection or reconnection of meters shall be credited to account 1615, Miscellaneous Electric Revenues.

D C 1361. Installations on Customers' Premises

This account shall include the cost installed of equipment on the customer's side of a meter when the utility incurs such cost and when the utility retains title to and assumes full responsibility for maintenance and replacement of such property. This account shall not include equipment leased to customers. (See account 1362, Leased Property on Customers' Premises.)

ITEMS

1. Cable vaults
2. Commercial lamp equipment
3. Foundations and settings specially provided for equipment included herein
4. Frequency changer sets
5. Motor generator sets
6. Motors
7. Switchboard panels, high or low tension
8. Wire and cable connections to incoming cables

Note: Do not include in this account any costs incurred in connection with merchandising, jobbing, or contract work activities.

D C 1362 Leased Property on Customers' Premises

This account shall include the cost of electric motors, transformers, and other equipment on customers' premises (including municipal corporations), leased to customers, but not including property held for sale.

Note A: The cost of setting and connecting such appliances or equipment on the premises of customers and the cost of resetting or removal shall not be charged to this account but to operating expense account 1763, Labor on Customers' Premises.

Note B: Do not include in this account any costs incurred in connection with merchandising, jobbing, or contract work activities.

D C 1363. Street Lighting and Signal Systems

This account shall include the cost installed of equipment used wholly for public street and highway lighting or traffic, fire alarm, police, and other signal systems.

ITEMS

1. Armored conductors, buried or submarine, including insulators, insulating materials, splices, trenching, etc.
2. Automatic control equipment
3. Conductors, overhead or underground, including lead or fabric covered, parkway cables, etc., including splices, insulators, etc.
4. Conduit runs used solely for street lighting or signal systems, not including ducts in a bank, part of which is used or held for use for other purposes
5. Lamps, arc, incandescent, or other types, including glassware, suspension fixtures, brackets, etc.
6. Municipal inspection
7. Ornamental lamp posts
8. Pavement disturbed, including cutting and replacing pavement, pavement base, and sidewalks
9. Permits
10. Poles and towers and appurtenant attachments
11. Posts and standards
12. Protection of street openings
13. Relays or time clocks
14. Series contactors
15. Switches
16. Transformers, pole or underground
17. Transformers, rectifiers, and other special station equipment devoted exclusively to street lighting and signal systems

GENERAL PLANT

D C 1370. Land and Land Rights

This account shall include the cost of land and land rights used for electric plant purposes, the cost of which is not properly includible in other land and land rights accounts. (See electric plant instruction ò 182.4.)

D C 1371. Structures and Improvements

This account shall include the cost in place of structures and improvements used for electric plant purposes, the cost of which is not properly includible in other structures and improvements accounts. (See electric plant instruction ò 182.5.)

D C 1372. Office Furniture and Equipment

A. This account shall include the cost installed of all office furniture and equipment owned by the utility and devoted to electric service, and not permanently attached to buildings. Articles of slight value or short service life acquired subsequent to the commencement of operations shall be charged to the appropriate operating expense account

and not to this account.

B. If the utility has equipment includible in this account at more than one location, separate records shall be maintained for each location.

ITEMS

1. Book cases and shelves
2. Desks, chairs, etc.
3. Drafting room equipment
4. Filing, storage, and other cabinets
5. Floor covering
6. Library and library equipment
7. Mechanical office equipment such as accounting machines, typewriters, etc.
8. Safes
9. Tables

D C 1373. Transportation Equipment

This account shall include the cost of transportation and garage equipment when such equipment is not an integral part of the housing structure. This account shall be subdivided as follows:

1373.1 Vehicles

1373.2 Garage and Repair Equipment

ITEMS

1. Automobile repair shop equipment
2. Automobiles
3. Battery charging equipment
4. Bicycles
5. Drays
6. Electric vehicles
7. Gasoline and oil pumps (portable)
8. Gasoline storage tanks
9. Greasing tools and equipment
10. Horses, wagons, and harness
11. Horseshoeing equipment
12. Marine equipment
13. Motorcycles
14. Motor trucks
15. Oil storage tanks
16. Repair cars or trucks
17. Tractors
18. Trailers
19. Trucks

20. Other garage or stable equipment

Note: Office furniture and equipment shall be included in account 1372, Office Furniture and Equipment.

D C 1379. Other General Equipment

This account shall include the cost installed of the following equipment:

(1) Equipment used for the receiving, shipping, handling and storage of materials and supplies when not an integral part of the housing structure

(2) Equipment specially provided for general shops when such equipment is not an integral part of the housing structure

(3) Laboratory equipment used for general laboratory purposes and not specially provided for or includible in other departmental or functional plant accounts

(4) Tools, implements, and equipment used in construction or repair work exclusive of equipment includible in other equipment accounts

(5) Other general equipment, apparatus, etc., used in the utility's electric operations, and which is not includible in any other account

Note A: General equipment of the nature indicated above whenever practicable shall be assigned to the electric plant accounts on a functional basis. Thus, to illustrate, laboratory equipment used at the power generating station only, shall be included in account 1312, 1323 or 1332, as applicable.

Note B: Office furniture and equipment shall be included in account 1372, Office Furniture and Equipment.

D C 1390. Other Tangible Property

A. This account shall include the cost of tangible electric plant not provided for elsewhere.

B. A separate subdivision of this account shall be kept for each class of property in which the utility has a relatively large investment, and records shall be so kept as to show separately the cost of each major item.

SURPLUS ACCOUNTS

CREDITS

D C 1400. Credit Balance Transferred from income Account

D C 1401. Miscellaneous Credits to Surplus

DEBITS

D C 1410. Debit Balance Transferred from Income Account

D C 1411. Dividend Appropriations--Preferred Stock

D C 1412. Dividend Appropriations--Common Stock

D C 1413. Miscellaneous Reservations of Surplus

D C 1414. Miscellaneous Debits to Surplus
(Total of surplus accounts to be carried as balance sheet account 1271)

CREDITS

D C 1400. Credit Balance Transferred from Income Account
This account shall include the net credit balance transferred from the income account for the year.

D C 1401. Miscellaneous Credits to Surplus

A. This account shall include all credits affecting the surplus or deficit not provided for elsewhere. Among the items which shall be credited to this account are:

- (1) Credits for amounts previously written off through charges to surplus
- (2) Delayed income, operating revenue, and operating expense credits as provided in general instruction, section 181.4
- (3) Profits on reacquirement of the utility's securities (See accounts 1152 and 1153.)
- (4) Surplus arising from donations by stockholders of the utility's capital stock
- (5) Surplus arising from a reduction of the par value of the utility's capital stock
- (6) Surplus arising from forgiveness of debt of the utility

B. All items included in this account shall be sufficiently described in the entries relating thereto as to identify them with all accounts affected, and if the credits relate to prior years, the amount applicable to each year shall be shown.

DEBITS

D C 1410. Debit Balance Transferred from Income Account
This account shall include the net debit balance transferred from the income account for the year.

D C 1411. Dividend Appropriations--Preferred Stock

D C 1412. Dividend Appropriations--Common Stock

A. These accounts shall include amounts declared payable out of surplus or earnings as dividends on outstanding capital stock issued by the utility.

B. Dividends shall be segregated as to those payable in cash and otherwise. If not payable in cash, the medium of payment shall be described with sufficient particularity to identify it.

C. This account shall be so kept or supported as to show separately the dividends on each class and series of stock.

D C 1413. Miscellaneous Reservations of Surplus

A. This account shall include the reservations or appropriations of surplus for purposes not provided for elsewhere in this system of accounts.

B. The entries to this account shall show the nature of each reservation of surplus.

D C 1414. Miscellaneous Debits to Surplus

A. This account shall include amounts chargeable to surplus not provided for elsewhere. Among the items which shall be charged hereto are:

(1) Amounts charged to surplus to cover past accrued depreciation and amortization not provided for;

(2) Decline in value of investments (See account 1114);

(3) Delayed income, operating revenue, and operating expense debits as provided in general instruction section 181.4;

(4) Payments of amounts previously credited to surplus;

(5) Losses on reacquirement of the utility's securities (See accounts 1152 and 1153);

(6) Losses which are not properly chargeable to operating expenses or income and for which reserves have not been provided.

B. All items included in this account shall be sufficiently described in the entries relating thereto as to identify them with all accounts affected, and if the charges relate to prior years, the amount applicable to each year shall be shown.

INCOME ACCOUNTS

The income accounts (1501 to 1540) are designed to show for each month and each calendar year the operating revenues and expenses, the other income, the income deductions, the net income, the miscellaneous reservations of net income and the amount of income or loss remaining for transfer to Surplus.

ELECTRIC OPERATING INCOME

D C 1501. Operating Revenues

Under this caption shall be included the total operating revenues credited to the revenue accounts 1600 to 1615, derived by the utility from its electric operations during the period covered by the income account.

D C 1502. Operation and Maintenance

Under this caption shall be included the total expenses shown in accounts 1700 to 1811, incurred by the utility in its electric operations during the period covered by the income account.

D C 1503. Depreciation

A. This account shall include the depreciation expense applicable to electric operations, on plant carried in accounts 1101 and 1106, for the period covered by the income account, except such depreciation expense

as is charged to clearing accounts or to construction work in progress.

B. Class C utilities shall keep supporting records to show the amount of depreciation charges applicable to each electric plant account.

D C 1505. Amortization of Electric Plant Acquisition Adjustments

This account shall be debited or credited, as the case may be, with amounts which the commission shall have determined are includible in operating revenue deductions for the purpose of providing for the extinguishment of the amount in account 1105, Electric Plant Acquisition Adjustments. Account 1252, Reserve for Amortization of Electric Plant Acquisition Adjustments, shall be concurrently credited or debited.

D C 1506. Property Losses Chargeable to Operations

This account shall be charged with amounts credited to account 1146, Miscellaneous Deferred Debits, when the commission has authorized an extraordinary loss included in the latter account to be written off by charges to operations.

D C 1507. Operating Taxes

A. This account shall include the amount of Federal, State, county, municipal and other taxes, including payroll taxes (but excluding taxes on net income, excess profits, undivided profits, excess dividends, or capital stock) which are properly chargeable to electric operations, and except taxes includible in account 1789, Merchandising, Jobbing and Contract Work, or in clearing accounts. (See account 1228, Taxes Accrued.)

B. This account shall be charged each month with the amount of taxes which are applicable thereto, and concurrent credits shall be made to account 1228, Taxes Accrued. (See also account 1132, Prepayments.)

C. Taxes assumed by the utility on property leased from others for use in electric operations shall be considered as additional rent and so charged.

D. This account shall be so kept as to show the amount of each kind of tax, and the basis upon which each charge is made.

Note: The following items shall not be charged to this account but shall be treated as specified below:

(1) Gasoline or other sales taxes shall be added to the cost of the materials on which levied

(2) Taxes chargeable to other utility operations shall be assigned to such operations; taxes applicable to non-utility operations shall be charged to account 1521, Income from Non-utility Operations

(3) Annual or more frequent payments under the terms of franchises, shall be included in account 1805, Franchise Requirements

(4) Special assessments for street and similar improvements shall be

included in the electric plant account in which the property with which the taxes are identified is included

(5) Taxes applicable to electric construction shall be charged to account 1103, Construction Work in Progress; taxes on labor charged to cost of removal shall be charged to account 1250, Reserve for Depreciation of Utility Plant

(6) Taxes on net income, excess profits, undivided profits, excess dividends, or capital stock, shall be charged to account 1539, Income Taxes

D C 1508. Income from Electric Plant Leased to Others

A. This account shall include all rental income from electric property leased by the utility to others, and which property is included in account 1102, Electric Plant Leased to Others.

B. This account shall be subdivided as follows:

1508.1 Revenues from Electric Plant Leased to Others

1508.2 Expenses of Electric Plant Leased to Others

C. This account shall be so kept or supported as to show separately the following for each lease:

1. Rentals
2. Expenses
3. Depreciation
4. Taxes
5. Uncollectible rents

D C 1509. Other Utility Operating Income

Under this caption shall be included (1) the revenues derived from and (2) operation and maintenance, depreciation, rents and taxes incurred in the operation of utility plant, the book cost of which is included in account 1108, Other Utility Plant.

Note: In the case of utility services for which systems of accounts are prescribed by this commission, such as gas, water, etc., the appropriate accounts in such systems shall be used instead of this account.

OTHER INCOME

D C 1521. Income from Non-utility Operations

A. This account shall include the revenues derived from and the expenses incurred in non-utility operations.

B. The expenses shall include every element of cost (except return on investment) incurred in such operations, including depreciation, rents, taxes, insurance, etc.

D C 1523. Dividend Revenues

This account shall include the revenues derived by the utility from

dividends on stocks of other companies.

Note: No dividends on reacquired securities issued or assumed by the utility shall be included in this account.

D C 1524. Interest Revenues

This account shall include interest revenues on investments, loans, notes, advances, special deposits, etc.

D C 1526. Miscellaneous Non-operating Income

This account shall include all revenue items properly includible in the income account other than from operations (utility and non-utility), interest, or dividends. It shall also include all expenses incurred in connection with such revenues.

INCOME DEDUCTIONS

D C 1530. Interest on Long-term Debt

A. This account shall include in each accounting period the amount of interest applicable thereto on outstanding long-term debt issued or assumed by the utility, the liability for which is included in account 1210, Bonds, account 1211, Receivers' Certificates, or account 1213, Miscellaneous Long-term Debt. No interest shall be accrued on required debt carried in account 1153, Reacquired Long-term Debt.

B. Amounts charged to this account shall be credited to account 1229, Interest Accrued.

C. This account shall be so kept or supported by other records as to show the interest accruals on each class and series of long-term debt.

D C 1531. Amortization of Debt Discount and Expense

This account shall include in each accounting period the portion of unextinguished debt discount and expense on outstanding long-term debt which is applicable to such period. The amount shall be computed as provided in account 1140, Unamortized Debt Discount and Expense, to which account concurrent credit shall be made.

D C 1532. Amortization of Premium on Debt--Credit

This account shall include in each accounting period the portion of unextinguished premium (or premium less expenses, when a net credit) on outstanding long-term debt which is applicable to such period. The amount shall be computed as provided in account 1240, Unamortized Premium on Debt, to which account concurrent debit shall be made.

D C 1534. Interest on Debt to Associated Companies

A. This account shall include in each accounting period interest on debt to associated companies and shall be so kept as to show the amount of interest on each such debt.

B. Amounts charged to this account shall be credited to account 1214, Debts to Associated Companies.

D C 1535. Other Interest Charges

This account shall include in each accounting period all interest not provided for in account 1530 or 1534, and shall be so kept as to show the amount of interest charges on each debt.

D C 1536. Interest Charged to Construction--Credit

When interest is charged to construction in accordance with electric plant instruction, paragraph (7) of subdivision (a) of section 182.3, concurrent credit shall be made to this account.

D C 1538. Miscellaneous Income Deductions

This account shall include miscellaneous debits to income not provided for elsewhere.

ITEMS

1. Decline in value of investments
2. Donations
3. Expenditures for associated companies for which the utility will not be reimbursed
4. Charges not includible in account 1505, Amortization of Electric Plant Acquisition Adjustments, to write off amounts in account 1105, Electric Plant Acquisition Adjustments, and other items being written off which are not elsewhere provided for
5. Penalties or fines for violations of law
6. Expenses in connection with interest and dividend revenues
7. Taxes assumed on interest

D C 1539. Income Taxes

This account shall include taxes on net income, excess profits, undivided profits, excess dividends, and capital stock.

DISPOSITION OF NET INCOME

D C 1540. Miscellaneous Reservations of Net Income

A. This account shall include reservations of net income, such as may be required under the terms of mortgages, deeds of trust, orders of a court, contracts, or other agreements, and other reservations of net income.

B. Amounts charged to this account shall be credited concurrently to the appropriate reserve account.

C. The entries in this account shall show the nature of each reservation of income.

OPERATING REVENUE ACCOUNTS

SALES OF ELECTRIC ENERGY

D C 1600. Residential Sales

D C 1602. Commercial and Industrial Sales

D C 1603. Public Street and Highway Lighting

- D C 1604. Other Sales to Public Authorities
- D C 1605. Sales to Other Electric Utilities
- D C 1606. Sales to Railroads and Railways
- D C 1607. Interdepartmental Sales
- D C 1608. Other Sales

OTHER ELECTRIC REVENUES

- D C 1610. Rent from Electric Operating Property
- D C 1612. Customers' Forfeited Discounts
- D C 1613. Sales of Water and Water Power
- D C 1614. Servicing of Customers' Installations
- D C 1615. Miscellaneous Electric Revenues

SALES OF ELECTRIC ENERGY

- D C 1600. Residential Sales

A. This account shall include revenues from electric energy supplied to residential customers, including farm customers supplied under residential rates, and to religious bodies.

B. When electric energy supplied through a single meter is used for both residential and commercial purposes, the total revenue shall be included in this account or in account 1602, Commercial and Industrial Sales, according to the principal use.

- D C 1602. Commercial and Industrial Sales

A. This account shall include revenues from electric energy supplied for commercial and industrial purposes.

B. When electricity supplied through a single meter is used for both commercial and residential purposes, the total revenue shall be included in this account or in account 1600, Residential Sales, according to the principal use.

- D C 1603. Public Street and Highway Lighting

This account shall include revenues from electric energy supplied and services rendered for the purpose of lighting streets, highways, parks and other public places for municipalities or other divisions or agencies of State or Federal governments.

- D C 1604. Other Sales to Public Authorities

This account shall include the revenues from electric energy supplied to municipalities or divisions or agencies of federal or state governments, under special contracts or agreements or service classifications applicable only to public authorities, except such revenues as are includible in account 1603 and 1605.

- D C 1605. Sales to Other Electric Utilities

A. This account shall include revenues from electric energy supplied to other electric utilities or to public authorities for distribution to

others. (See also account 1738, Electricity Purchased.)

B. Revenues from electric energy supplied to other public utilities for use by them and not for distribution shall be included in account 1602, Commercial and Industrial Sales, unless supplied under the same contract as and not readily separable from revenues includible in this account.

Note: The records supporting the entries to this account shall show separately for each contract the point of delivery, the maximum demand, the kilowatt-hours supplied, the basis for the charge, and the total charge to the distributor. When electricity is delivered to a utility at more than one point, like detail shall be furnished for each point of delivery.

D C 1606. Sales to Railroads and Railways

This account shall include revenues from electric energy supplied to railroads, and interurban and street railways, for general railroad use, including the propulsion of cars or locomotives, when such energy is supplied under separate and distinct contracts or service classifications.

Note: Revenues from electricity supplied to railroads or street railways for other purposes shall be credited to account 1602, unless supplied under the same contract as and not readily separable from revenues includible in this account.

D C 1607. Interdepartmental Sales

A. This account shall include the total amounts charged to other departments of the utility by the electric department for energy supplied by the latter.

B. The utility shall be prepared to furnish the basis and the computations of the charges to other departments.

D C 1608. Other Sales

This account shall include revenues derived from electric energy supplied users and which are not properly includible in revenue accounts 1600 to 1607, inclusive, including private street lighting.

OTHER ELECTRIC REVENUES

D C 1610. Rent from Electric Operating Property

A. This account shall include rents for the use by others of land, buildings and other property devoted to electric operations by the utility. This covers such matters as rent from pole attachments, buildings, stations, land, etc.

B. This account shall be so kept as to show the nature of the property for which rent was received and the basis of the charges for the use thereof.

Note: Do not include in this account rents from property included in account 1102, Electric Plant Leased to Others. (See account 1508, Income from Electric Plant Leased to Others.)

D C 1612. Customers' Forfeited Discounts

This account shall include the amounts which the utility allows its customers on condition that they pay their electric bills on or before a specified date and which are forfeited because of failure to pay within the specified time.

D C 1613. Sales of Water and Water Power

A. This account shall include revenues derived from the sale of water for irrigation, domestic, industrial or other uses, or for the development by others of water power; also, revenues derived from furnishing water power for mechanical purposes when the investment in the property used in supplying such water or water power is carried in account 1101, Electric Plant in Service.

B. The records for this account shall be so kept as to permit an analysis of the rates charged and the purposes for which the water was used, such as public water supply, development of electricity by other utilities, industrial uses, irrigation, etc.

Note: This account shall be used only when water or mechanical power is actually delivered to the customers' premises. When electricity is generated on the utility's premises, the revenue therefrom shall be credited to the appropriate account for sales of electric energy.

D C 1614. Servicing of Customers' Installations

This account shall include revenues accruing to the utility from charges to customers on account of the maintenance of appliances, wiring, piping, or other installations on customers' side of meters.

D C 1615. Miscellaneous Electric Revenues

This account shall include revenues derived from electric operations not includible in any of the foregoing accounts. This covers such items as fees and charges for changing, connecting and disconnecting service, profit on the sale of unused materials and supplies not ordinarily purchased for resale, commissions on sales or distribution of others' electric energy (sold under rates filed by such others), management or supervision fees, sale of steam (except when the utility furnishes steam-heating service), and rentals from property included in account 1362, Leased Property on Customers' Premises.

OPERATION AND MAINTENANCE ACCOUNTS
PRODUCTION EXPENSES

Note: If the utility generates electricity in two or more plants or by two or more processes, separate production expense accounts shall be

kept for each plant or process.

- D C 1811. Transportation Expenses

PRODUCTION EXPENSES

Note: If the utility generates electricity in two or more plants or by two or more processes, separate production expense accounts shall be kept for each plant or process.

D 1700. Supervision and Labor

This account shall include items provided for in accounts 1701, 1702 and 1703.

C 1701. Supervision

This account shall include the cost of supervising and directing the operation and maintenance of generating stations.

C 1702. Operation Labor

This account shall include the pay of employees for the time during which they are engaged in operating the production plant.

C 1703. Maintenance Labor

This account shall include the pay of employees or others for the time during which they are engaged in making repairs to the production plant. This includes, in addition to labor on actual repairs, such work as routine inspection and testing, replacing or adding minor items of plant (see electric plant instruction 182.2, subd. (c)), testing for, locating and clearing trouble, restoring the condition of damaged property, etc., but not replacing items of property designated as "units of property."

D C 1710. Fuel

A. This account shall include the cost delivered at stations of coal, oil, gasoline, gas, or other fuel used in the production of electric

energy. It shall also include the net cost of, or amount realized from, the disposal of ashes.

B. Records shall be kept to show the quantity. B.t.u. content, if available, and cost of each type of fuel used.

D C 1720. Water Purchased for Power

This account shall include the cost of water purchased for hydraulic power generation.

ITEMS

1. Cost of water purchased from others
2. Periodic payments for licenses or permits from any governmental agency for water rights
3. Periodic payments for riparian rights

Note: Exclude from this account and include in account 1731, Operation Supplies and Expenses, water purchased for condensers, and for cooling engines, and for general station use.

D 1730. Materials, Supplies and Expenses

This account shall include items provided for in accounts 1731 and 1732.

C 1731. Operation Supplies and Expenses

This account shall include the cost of all supplies, tools, etc., used, and miscellaneous expenses incurred, in generating stations, but not repair materials, parts, etc.

ITEMS

1. Boiler inspection fees
2. Dynamo brushes
3. Fireroom tools
4. Gauge glasses
5. Hand hole gaskets
6. Heat
7. Light
8. Log sheets and charts
9. Manhole gaskets
10. Meter supplies
11. Packing
12. Steam and air hose
13. Tools (hand)
14. Washers
15. Waste
16. Water for steam generation, for condensers, for cooling engines, for fire protection and for general station use
17. Wipers

Note: Exclude herefrom and include in account 1732 supplies and expenses in connection with repairs to the generating station.

C 1732. Maintenance Materials, Supplies and Expenses

This account shall include materials and supplies used and expenses incurred in repairing and maintaining the generating stations.

ITEMS

1. Bills from others for repairs, inspection, adjustment or other maintenance of plant, structures or equipment
2. Materials and supplies used in making repairs, adding or replacing minor items of property (see electric plant instruction ò 182.2, subd. (c))
3. Minor items added to plant
4. Transportation, shop and store expenses, if clearing accounts are used

Note: Materials recovered in connection with repair and maintenance work which is charged to this account, shall be credited hereto; repairing such materials for reuse shall be charged hereto.

D C 1735. Rents

A. This account shall include all rents for property of others used, occupied, or operated in connection with the generation of electricity. Taxes paid on such property shall be charged hereto. (See also electric plant instruction ò 182.8.)

B. If the leased property is used by more than one department of the utility, the rental (and taxes) shall be apportioned to the departments making use of the property on an equitable basis. If a portion of the rented property is subleased, the revenue therefrom shall be included in account 1610, Rent from Electric Operating Property.

D C 1736. Steam Purchased

This account shall include the cost of steam purchased for use in steam engines and turbines devoted to the production of electricity; and also charges for steam transferred to electric generation from another operating department of the company.

Note: The records shall be so kept as to show separately for each company from which steam is purchased, the point of delivery, the quantity, the price, and the total charge. When steam is transferred from another operating department, the utility shall be prepared to show full details of the cost of producing such steam, the basis of the charges to electric generation, and the extent and manner of use by each department involved.

D C 1738. Electricity Purchased

A. This account shall include the cost at the point of delivery to the

utility of electricity purchased for resale, including charges for readiness to serve. This account shall be so kept as to show the following:

- (1) Readiness to serve or "standby" charges when determinable
- (2) Firm power purchased
- (3) Dump or surplus power purchased

B. The records shall also show, by months, the demands and demand charges and kilowatt-hours and prices thereof under each purchase contract.

C. When electricity is interchanged with others, this account shall show the gross amount which would be payable for electricity received if no electricity had been furnished to the person supplying the electricity, and the gross amount which would be receivable if no electricity were received from the person to whom electricity was supplied.

D C 1740. Other Production Expenses

This account shall be charged with any production expenses, including expenses incurred directly in connection with the purchase of power, which are not specifically provided for in the other production expense accounts.

D C 1742. Steam Produced--Credit

This account shall include credits for steam produced in the electric department and transferred to another operating department of the utility, except when such production is treated as a joint facility, in which case it shall be accounted for as provided in accounts 1808-1809.

Note A: The utility shall keep records to show the basis for determining the amounts to be credited to this account.

Note B: The accounting for steam used by the electric department itself shall be in accordance with operating revenue instruction 183.5.

TRANSMISSION AND DISTRIBUTION EXPENSES

D 1760. Supervision and Labor

This account shall include items provided for in accounts 1761 to 1765.

C 1761. Supervision

This account shall include the cost of supervising and directing the operation and maintenance of the transmission and distribution systems.

C 1762. Operation Labor

This account shall include the pay of employees for the time during which they are engaged in operating the transmission and distribution systems, except labor on work on customers' premises (chargeable to

account 1763) and labor on street lighting and signal systems (chargeable to account 1765). (See also note hereunder.)

ITEMS

1. Clearing brush and other refuse along rights of way
2. Cleaning ducts, manholes, sewers, etc.
3. Inspecting, testing, removing and resetting line transformers, except the first setting of a transformer (See account 1358.)
4. Keeping maps and other records of transmission and distribution lines
5. Load dispatching
6. Operation of substations
7. Patrolling and testing lines
8. Trimming trees along rights of way
9. Transportation
10. Voltage surveys

Note: Maintenance labor shall be included in account 1763 or 1764 as appropriate.

C 1763. Labor on Customers' Premises

This account shall include the pay of employees for the time during which they are engaged in inspecting, testing, repairing, removing and resetting or changing the location of meters or instrument transformers and accessory equipment located on customers' premises, investigating service complaints, and also lamp service and other work on customers' premises.

Note: The cost of the first installation of a meter shall not be charged to this account but to electric plant account 1360, Meters.

C 1764. Maintenance Labor

This account shall include the pay of employees engaged in repairing and maintaining transmission and distribution substations and overhead and underground lines, including line transformers and devices, but not meters or street lighting and signal systems.

ITEMS

1. Cutting and replacing pavement, pavement base, and sidewalks in connection with repairs
2. Inspecting and testing after repairs have been made
3. Inspecting, testing and reporting on the condition of lines to determine the need for repairs, minor replacements and changes
4. Replacing or adding minor items of plant (See electric plant instruction 182.2, subd. (c).)
5. Repairing materials for reuse
6. Restoring the condition of damaged line property (See notes below.)

7. Routine work to prevent trouble, such as pulling up slack, tightening guys and raking guy stubs, straightening poles and crossarms, etc.

8. Testing for, locating, and clearing line trouble

9. Training employees for line maintenance work

Note A: Meter repair labor shall be included in account 1763; street lighting and signal system repair labor shall be included in account 1765.

Note B: The cost of maintenance does not include the cost of replacing items of property designated as "units of property."

C 1765. Labor on Street Lighting and Signal Systems

This account shall include the pay of employees for the time during which they are engaged in work on the street lighting and signal systems, including traffic, fire, and police signal systems.

ITEMS

1. Clearing brush and other refuse

2. Cleaning ducts, manholes, and sewers

3. Cleaning fixtures

4. Renewing of lamps

5. Repairs to system

6. Restoring the condition of damaged property (See note below.)

7. Routine inspection and tests

8. Testing lines and clearing trouble

9. Trimming trees

10. Voltage surveys

11. Transportation

Note: The cost of maintenance does not include the cost of replacing items of property designated as "units of property."

D 1770. Materials, Supplies and Expenses

This account shall include items provided for in accounts 1771, 1772 and 1773.

C 1771. Operation Supplies and Expenses

This account shall include the cost of all supplies, tools, etc., used and miscellaneous expenses incurred in operating the transmission and distribution systems, except materials, supplies and expenses used in maintenance and on the street lighting and signal systems.

Note: All materials and supplies used and expenses incurred on street lighting and signal systems are chargeable to account 1773, Street Lighting and Signal System Materials, Supplies and Expenses; maintenance materials and supplies used and expenses incurred on other transmission and distribution property are chargeable to account 1772, Maintenance

Materials, Supplies and Expenses.

C 1772. Maintenance Materials, Supplies and Expenses

This account shall include the cost of materials and supplies used and expenses incurred in repairing and maintaining transmission and distribution system property, except the street lighting and signal systems, but including materials and supplies used and expenses incurred in work on customers' premises.

ITEMS

1. Crossarms, braces, anchors, pins, bolts, pole steps, and other pole repair materials
2. Meter repair materials
3. Minor items added to plant
4. Oil for transformers
5. Paving repair materials
6. Replacing cut-out boxes and lightning arresters
7. Transportation, shop and stores expenses if clearing accounts are used
8. Wire and cable, lightning arresters, clamps, switches and other conductor repair materials
9. Work done by others

C 1773. Street Lighting and Signal System Materials, Supplies and Expenses This account shall include the cost of materials and supplies used and expenses incurred in operating, repairing and maintaining the street lighting and signal systems, including traffic, fire, and police signal systems. This includes, in addition to materials and supplies used on repairs to street lighting and signal system property, such items as lamps, glassware, relays, time clocks, etc., but does not include the cost of replacing items designated as "units of property."

D C 1776. Rents

A. This account shall include all rents for property of others used, occupied, or operated in connection with the transmission or distribution system. Taxes paid on such property shall be charged hereto. (See also electric plant instruction ÷ 182.8.)

B. If the leased property is used by more than one department of the utility, the rental (and taxes) shall be apportioned on an equitable basis to the departments making use of the property. If a portion of the rented property is subleased, the revenue therefrom shall be included in account 1610, Rent from Electric Operating Property.

CUSTOMERS' ACCOUNTING AND COLLECTING EXPENSES

D 1780. Meter Reading, Accounting and Collecting

This account shall include items provided for in accounts 1781 and

1782 below.

C 1781. Meter Reading

This account shall include the pay of employees engaged in reading customers' meters, and the cost of supplies used and expenses incurred in connection therewith.

ITEMS

1. Badges
2. Forms for recording readings
3. Lamps
4. Meter readers, pay of
5. Transportation
6. Uniforms

C 1782. Accounting and Collecting

This account shall include the pay and expenses of employees engaged on customers' applications, contracts, orders, complaints, and inquiries, and in making credit investigations, billing, collecting customers' bills, and bookkeeping; and the cost of supplies used and expenses incurred in connection therewith.

ITEMS

1. Accounts, customers', keeping of
2. Address plates
3. Billing
4. Bookkeeping
5. Books
6. Cashier, pay of
7. Commissions, fees, or salaries of collectors
8. Delivery of bills
9. Disconnection for non-payment of bills
10. Office supplies
11. Postage
12. Stationery and printing
13. Statistical work on customers' accounts
14. Tabulating sales
15. Transportation

D C 1783. Uncollectible Accounts

This account shall be charged each month with amounts sufficient to provide for losses from uncollectible electric revenues. Concurrent credits shall be made to account 1254, Reserve for Uncollectible Accounts. Losses from uncollectible accounts shall be charged to such reserve.

D C 1784. Rents

A. This account shall include rents for property of others used, occupied, or operated in connection with customers' accounting and collecting, such as for a commercial office. Taxes paid on such property shall be charged hereto. (See also electric plant instruction ÷ 182.8.)

B. If the leased property is used by more than one department of the utility, the rents (and taxes) shall be apportioned on an equitable basis to the departments making use of the property. If a portion of the rented property is subleased, the revenue therefrom shall be included in account 1610, Rent from Electric Operating Property.

Note: If the commercial office and the general office occupy space jointly, and the allocation of the rental to each office is not practicable, the entire amount for office rental may be included in account 1803, General Rents.

SALES PROMOTION EXPENSES

D C 1786. Sales Expenses

This account shall include the cost of labor employed and expenses incurred for the purpose of promoting the sale of electricity, other than merchandising, jobbing or contract work activities.

ITEMS

1. Advertising
2. Demonstrating use of appliances
3. Salaries and commissions of solicitors

D C 1789. Merchandising, Jobbing and Contract Work

A. This account shall include expenses of merchandising, jobbing and contract work; also all revenues derived from the sale of electric merchandise, and jobbing or contract work, including any profit or commissions accruing to the utility from jobbing work performed by it as agent under agency contracts whereby it undertakes to do jobbing work for another for a stipulated profit or commission.

B. This account shall be subdivided as follows:

1789.1 Revenue from Merchandising, Jobbing and Contract Work

1789.2 Cost of Merchandising, Jobbing and Contract Work

ADMINISTRATION AND GENERAL EXPENSES

D C 1790. Salaries of General Officers

This account shall include the compensation (salaries, bonuses and other consideration for services) of officers and executives of the utility, properly chargeable to electric operations and not chargeable directly to a particular electric function.

Note: Directors' fees, even though paid to officers, shall be charged to account 1800, Other General Expenses.

D C 1791. Other General Office Salaries

This account shall include the compensation of employees engaged in the general offices properly chargeable to electric operations and not chargeable directly to a particular electric function.

D C 1793. General Office Expenses

This account shall include the expenses of general officers and general office employees, and the cost of office supplies and office expenses in connection with the general administrative functions of the utility's electric operations.

ITEMS

1. Books and periodicals for office use
2. Building service (not including rent)
3. Meals and hotel bills
4. Membership fees and dues in trade, technical and professional associations
5. Office supplies
6. Postage
7. Printing
8. Stationery
9. Telephone, telegrams, etc.
10. Traveling expenses

D 1795. Special Services

A. This account shall include amounts payable to any corporation, firm or individual, other than officers and employees of the utility, for special services to the electric department for general supervision and management services and expenses, and for legal and other special services and expenses.

ITEMS

1. Services:
 - (a) Auditing and accounting
 - (b) Legal
 - (c) Management
 - (d) Rates
 - (e) Secretarial
 - (f) Statistical
 - (g) Supervisory
2. Expenses:
 - (a) Hotel
 - (b) Meals
 - (c) Printing
 - (d) Stationery
 - (e) Traveling

B. Class C utilities shall subdivide this account as follows:

C 1795.1 Management and Supervision

C 1795.2 Legal Services

C 1795.3 Other Special Services

C. Records supporting this account shall be so kept as to show: (1) the basis of each fee, (2) the amount of the fee, and (3) the person to whom the fee is paid or payable.

Note A: Legal or other special services in connection with formal cases before regulatory commissions, or in cases in which such a commission is a party, shall be charged to account 1797, Regulatory Commission Expenses, or when specifically applicable to injury or damage cases to account 1798, Insurance, Injuries and Damages, or other appropriate account.

Note B: Legal or other special services incident to the construction of electric property shall be charged to the appropriate utility plant accounts. Legal services incident to the issuance of long-term debt or capital stock shall be charged to account 1140, Unamortized Debt Discount and Expense, account 1240, Unamortized Premium on Debt, or account 1151, Capital Stock Expense, as appropriate.

D C 1797. Regulatory Commission Expenses

A. This account shall include all expenses (except pay of regular employees only incidentally engaged in such work), properly includible in electric operating expenses, incurred by the utility in connection with formal cases before regulatory commissions, or other regulatory bodies or cases in which such a body is a party, including payments made to a regulatory commission for fees assessed against the accounting utility for pay and expenses of such commission, its officers, agents, and employees and also including payments to the United States for the administration of the Federal Power Act.

B. Amounts of regulatory commission expenses which are spread over future periods shall be charged to account 1146, Miscellaneous Deferred Debits, and amortized by charges to this account. (See general instruction ð 181.4.)

C. The utility shall be prepared to report the cost of each formal case.

D. The costs which may be partly chargeable to this account and partly to the other accounts enumerated in notes A and B to account 1795 shall be equitably apportioned, and the basis of allocation to the several accounts shall be submitted to this commission.

ITEMS

1. Salaries, fees, retainers, and expenses of counsel, solicitors,

attorneys, accountants, engineers, clerks, attendants, witnesses, and others engaged in the prosecution of, or defense against, petitions or complaints presented to regulatory bodies, or in the valuation of property owned or used by the utility in connection with such cases

2. Expenses: Engineering supplies, office expenses, payments to public service or other regulatory commissions, stationery and printing, traveling expenses, and other expenses incurred directly in connection with formal cases before regulatory commissions

Note A: Exclude from this account and include in other appropriate operating expense accounts, expenses incurred in the improvement of service, additional inspection, or rendering reports, which are made necessary by the rules and regulations, or orders, of regulatory bodies.

Note B: Do not include in this account costs incident to the construction of electric property, which are chargeable to the tangible electric plant accounts. Costs incurred in connection with property purchases shall be accounted for as provided in paragraph D of account 1106, Unclassified Electric Plant. Costs incurred incident to the issuance of long-term debt shall be charged to account 1140, Unamortized Debt Discount and Expense, or account 1240, Unamortized Premium on Debt, as applicable; costs incurred incident to the issuance of capital stock shall be charged to account 1151, Capital Stock Expense.

Note C: Do not include in this account expenses in connection with investigations by legislative bodies or cases to which the utility is not a party.

D C 1798. Insurance, Injuries and Damages

A. This account shall include the cost of insurance to protect the utility against the following losses and damages:

(1) Losses and damages to owned or leased property used in its electric operations such as by fire, storm, burglary, boiler explosion, lightning, etc.

(2) Protection against claims for injuries or deaths to employees or others, or damages to the property of others, including public liability, property damage, boiler, casualty, employees, liability, etc.

(3) Other losses which occur in connection with electric operations, and payments and expenses on account of damages for non-performance of contractual obligations

B. Amounts may be accrued monthly sufficient to meet the probable liability for such losses, concurrent credits being made to account 1255, Reserve for Insurance, Injuries and Damages, in which case losses sustained shall be charged to the reserve. This includes payments to attorneys, investigators and adjusters, court costs, etc.

C. Reimbursements from insurance companies or others for expenses charged hereto on account of property damages or for injuries and damages, and insurance dividends or refunds, shall be credited to this account.

Note A: If clearing accounts 1902 to 1905 are kept, the applicable items provided for in this account shall be included in such clearing accounts.

Note B: The utility shall so keep its records as to show the amount of coverage for each class of insurance carried, the property covered, the applicable premiums, and the distribution of the costs to specific operations or functions. If the utility carries reserves for self-insurance, it shall keep records to show the types of losses against which such reserves are maintained, and the basis of the accruals to the reserves for each risk covered.

D C 1800. Other General Expenses

A. This account shall include such items of expense applicable to the electric department, not provided in other accounts, as the cost of publishing and distributing annual reports to stockholders; advertising notices of stockholders' meetings dividend and other corporate and financial notices of a general character; association dues; contributions for conventions and meetings of the industry; fees of transfer agents, registrars of stock and fiscal agents; director's fees; fees for filing annual reports and tariff schedules; commissions paid under agency sales contracts expenses incurred in accident, welfare, educational and recreational work; cost of life insurance for employees when the utility is not the beneficiary; pensions payable currently to retired employees or their beneficiaries and the cost of advance provision for pensions to be paid to retired employees or their beneficiaries, except payroll taxes, (see general instruction § 181.12); cost of employees' relief and benefits; and any other miscellaneous expenses connected with the general management and not otherwise provided for.

B. This account shall not include any charges representing amounts used or to be used for the purchase of securities of the accounting company or any associated company, whether contributed by the accounting company or deducted from salaries and wages of employees, unless and until such amounts have actually been realized and paid to the employees in cash or its equivalent subject to their free disposition. To the extent that the securities thus purchased have an actual market value, the amounts paid for them may be carried meanwhile in account 1114 Miscellaneous Investments and Special Funds; otherwise such amounts

shall be charged to account 1538, Miscellaneous Income Deductions. (See general instruction ÷ 181.7.)

Note A: When the utility is the beneficiary of insurance on officers or employees, the cash surrender value shall be included in account 1133, Miscellaneous Current and Accrued Assets, and the excess of cost of the insurance over such cash surrender value shall be charged to account 1538, Miscellaneous Income Deductions.

Note B: No charges shall be made to this account or distributed to other accounts to cover advance provision for future pension payments, unless the controlling plan has been filed with the commission; and no charges shall be made in anticipation of discretionary pension payments in the future.

Note C: Records shall be kept so that the amounts paid for pensions and the amounts paid as advance provision for future pensions can be readily determined.

Note D: Upon adoption of an accrual plan of accounting, pension payments to employees retired before the adoption of such plan shall be charged to an existing pension reserve until such reserve is exhausted, unless any such existing reserve is eliminated by payment of an equivalent amount into the pension trust fund.

D C 1802. Operation and Maintenance of General Property

This account shall include the cost of operating and maintaining general buildings and general office furniture and equipment.

D C 1803. General Rents

A. This account shall include rent, covering the property of others used, occupied, or operated in connection with the general and administrative functions of the utility, such as general offices. Taxes paid on such property shall be charged hereto. (See also electric plant instruction ÷ 182.8.)

B. If the leased property is used by more than one department of the utility, the rental (and taxes) shall be apportioned on an equitable basis to the departments making use of the property. If a portion of the rented property is subleased, the revenue therefrom shall be included in account 1610, Rent from Electric Operating Property.

Note: If the commercial office and the general office occupy space jointly and the allocation of the rental to each office is not practicable, the entire amount of such rental may be included in this account.

D C 1805. Franchise Requirements

A. This account shall include payments to municipal or other governmental authorities, and the cost of materials, supplies and

services furnished such authorities without reimbursement in compliance with franchise, ordinance, or similar requirements, provided, however, that the utility may charge to this account at regular tariff rates, instead of cost, electricity furnished without charge under provisions of franchises.

B. When no direct outlay is involved, concurrent credits for such charges shall be to account 1806, Duplicate Charges--Credit.

Note A: Taxes shall not be charged to this account. (See account 1507, Operating Taxes.*

* So in original. Closing parentheses inadvertently omitted.

Note B: The cost of plant, supplies, etc., given as an initial consideration for a franchise running for more than one year shall be charged to account 1302, Franchises and Consents.

D C 1806. Dupilcate Charges--Credit

A. This account shall include concurrent credits for charges which are made to account 1805, Franchise Requirements, to the extent that such charges do not represent direct outlays. It shall also include concurrent credits for charges made to operating expense or other accounts of the electric department for electricity or steam for heating for which there is no direct money outlay.

B. This account shall be so kept as to disclose the nature and amount of each item included herein.

D C 1807. Administrative and General Expenses Transferred--Credit

A. This account shall be credited with amounts recorded in the administrative and general expenses which are properly includible in construction costs, covering the portion of the pay and expenses of general officers, clerks, and others when engaged on construction work.

B. The records supporting this account shall be so kept as to show the basis of determining the amounts transferred to construction.

Note: See electric plant instruction, paragraph (5) of subdivision (a) of section 182.3.

D C 1808. Joint Expenses--Debit

D C 1809. Joint Expenses--Credit

A. A joint facility for the purpose of this system of accounts is defined as any property occupied or used jointly by the utility and another or others under a definite arrangement whereby the actual costs are shared between or among the parties. Property of the utility occupied or used under a similar definite arrangement between the electric department and a coordinate department or departments shall likewise be considered as a joint facility.

B. Amounts payable by the electric department to others or to a

coordinate department for joint facilities used, occupied, or operated in connection with electric operations (except steam transferred from another operating department which shall be charged to account 1736, Steam Purchased) shall be charged to account 1808, Joint Expenses--Debit; amounts receivable under the arrangement shall be credited to account 1809, Joint Expenses--Credit.

C. These accounts shall also include interdepartmental rents receivable or payable even though such rents are not determined on the basis of costs of operation and maintenance of property jointly used.

D. The records supporting the entries to these accounts shall be so kept that the utility can furnish a complete explanation of the items therein.

D C 1810. Stores, Shop and Laboratory Expenses

A. This account shall include the cost of labor employed and expenses incurred in the operation and maintenance of the electric storerooms, shops and laboratories if such expenses are not allocated, either directly or through the medium of a clearing account, to the accounts benefited.

B. This account, when kept, shall include costs covered by the text and items listed in accounts 1902, Stores Expenses--Clearing, and 1905, Shop and Laboratory Expenses--Clearing, except depreciation, insurance, and rents. (See accounts 1503, 1798 and 1803.)

Note A: The cost of repairs to transformers, meters and other plant made at the shop shall not be included herein but in the accounts appropriate for such maintenance. (See account 1763, Labor on Customers' Premises, account 1764, Maintenance Labor, and account 1765, Labor on Street Lighting and Signal Systems, and the applicable accounts for maintenance materials.)

Note B: Stores, shop and laboratory expenses applicable to construction shall not be included in operating expenses.

D C 1811. Transportation Expenses

A. This account shall include the cost of labor employed and expenses incurred in the operation and maintenance of transportation equipment if such expenses are not allocated, either directly or through the medium of a clearing account, to the accounts benefited. For item list and optional accounting, see account 1903, Transportation Expenses--Clearing.

B. This account, when kept, shall include costs covered by the text and items listed in account 1903, Transportation Expenses--Clearing.

Note: Transportation expenses applicable to construction shall not be included in operating expenses.

CLEARING ACCOUNTS
REQUIRED

D C 1901. Charges by Associated Companies--Clearing

OPTIONAL

1902. Store Expenses--Clearing

1903. Transportation Expenses--Clearing

1905. Shop and Laboratory Expenses--Clearing

Note: Utilities which do not use accounts 1902 to 1905 shall keep accounts 1810, Stores, Shop and Laboratory Expenses, and 1811, Transportation Expenses.

D C 1901. Charges by Associated Companies--Clearing (Required)

A. This account shall include all charges made by associated companies against the utility for any purpose whatsoever (except interest), including charges for management, supervision, purchasing, construction, accounting, engineering, legal, financial, rent, advertising, materials and supplies, equipment and other property, commissions, taxes and other items, together with credits applicable thereto as provided in general instruction section 181.7.

B. This account shall be cleared by charging the appropriate accounts with the expenditures applicable thereto.

C. The records supporting this account shall be so kept as to show the nature of each charge together with the account or accounts to which each charge is cleared.

Note: The mandatory use of this account may be suspended upon order of the commission if equivalent information is readily obtainable from other records of the utility.

1902. Stores Expense--Clearing (Optional)

A. This account shall include the cost of labor and expenses incurred in the operation and maintenance of the storerooms (other than those identified only with a particular function) including storage, handling and distribution of materials and supplies.

B. Cash discounts shall be credited hereto when such discounts can not be applied to the cost of particular materials.

C. This account shall be cleared by adding to the cost of materials and supplies a suitable loading charge which will distribute the expense equitably over stores issues.

ITEMS

1. Adjustments of inventories of materials and supplies
2. Collecting and handling scrap materials in stores
3. Depreciation of storeroom equipment
4. Discount on materials, when not assignable to specific items

5. Freight, express, etc., when not assignable to specific items
6. Heat, light and power for storerooms and stores offices
7. Injuries and damages
8. Inspecting and testing materials and supplies, when not assignable to specific items
9. Insurance on materials and supplies and on stores equipment
10. Losses due to breakage, leakage, evaporation, fire and other causes. Credit any amounts received from insurance, transportation companies or others in compensation of such losses
11. Maintenance of stores equipment
12. Pay and expenses of storekeepers, clerks and others employed in storerooms or in store offices
13. Purchasing agents' fees, portion applicable to items carried through this account
14. Purchasing agents' pay and expenses, portion applicable to items carried through this account
15. Rents (See also electric plant instruction ÷ 182.8.)
16. Transporting materials into storehouse, when not assignable to specific items.

Note: Large differences in the accounts disclosed by inventories, which can readily be assigned to important classes of materials, shall be equitably adjusted among the accounts to which such classes of materials have been charged since the preceding inventory. Other differences shall be equitably apportioned among the accounts to which materials have been charged, or included in this account.

1903. Transportation Expenses--Clearing (Optional)

A. This account shall include the cost of labor and expenses incurred in the operation and maintenance of the electric general transportation equipment, including direct taxes and depreciation on transportation equipment.

B. This account shall be cleared by apportionment to operating expense, electric plant, or other accounts benefited on a basis which will distribute the expenses equitably. Credits to this account shall be made in such detail as to permit ready analysis.

ITEMS

1. Depreciation of transportation equipment
2. Feed and bedding for horses and mules
3. Fuel and lubricants for vehicles (including sales and excise taxes thereon)
4. Freight, express, drayage, etc., on fuel, repair parts, etc.
5. Heat, light and power for garage and garage office

6. Injuries and damages
7. Insurance on garage equipment and transportation equipment including public liability and property damage
8. License fees for vehicles and drivers
9. Maintenance of transportation and garage equipment
10. Operation of garages and stables
11. Pay and expenses of drivers, mechanics, etc.
12. Rent of garage buildings and grounds (See also electric plant instruction ÷ 182.8.)
13. Rent of vehicles and other rents
14. Taxes, direct, such as on gasoline, oil, tires, etc.
15. Tires, tubes and chains

1905. Shop and Laboratory Expenses--Clearing (Optional)

A. This account shall include the cost of labor and expenses incurred in the operation and maintenance of shops and laboratories of the utility, other than those identified wholly with a particular function.

B. This account shall be cleared by apportionment to operating expense, electric plant, or other accounts benefited on a basis which will distribute the expenses equitably. Credits to this account shall be made in such detail as to permit ready analysis.

C. If a laboratory is maintained at a generating station in connection with the operation of the station, the costs incident to its operation and maintenance shall be charged to the appropriate production expense account.

ITEMS

1. Charts
2. Collecting and handling scrap materials
3. Depreciation of equipment
4. Heat, light and power
5. Injuries and damages
6. Insurance on equipment and supplies
7. Pay and expenses of superintendents, machinists, chemists and other employees in shops or laboratories
8. Rents (See also electric plant instruction ÷ 182.8.)
9. Repairs to equipment
10. Testing supplies

.SO DOC 16A-195.1

NYCRR

Section 195.1 Authority for uniform system of accounts. This uniform system of accounts for municipal electric utilities is established and issued by the Public Service Commission under the following provision of the Public Service Law (chapter 48 of the Consolidated Laws):

Section 66. The commission shall...4. "Have power, in its discretion, to prescribe uniform methods of keeping accounts, records and books, to be observed by gas corporations and electric corporations and by municipalities engaged in the manufacture, sale and distribution of gas and electricity for light, heat or power. It may also in its discretion prescribe, by order, forms of accounts, records and memoranda to be kept by such persons, corporations and municipalities. Notice of alterations by the commission in the required method or form of keeping a system of accounts shall be given to such persons or corporations by the commission at least six months before the same shall take effect. Any other and additional forms of accounts, records and memoranda kept by such corporations shall be subject to examination by the commission."

.SO DOC 16A-195.2

NYCRR

195.2 Electric plant defined. (a) The Public Service Law defines "electric plant" as follows:

Section 2, Subdivision 12. "The term 'electric plant,' when used in this chapter, includes all real estate, fixtures and personal property operated, owned, used or to be used for or in connection with or to facilitate the generation, transmission, distribution, sale or furnishing of electricity for light, heat or power; and any conduits, ducts or other devices, materials, apparatus or property for containing, holding or carrying conductors used or to be used for the transmission of electricity for light, heat or power."

(b) Whenever the term "electric plant" is used in this system of accounts it shall be understood to have the inclusive meaning given it by the definition quoted above.

Section 196.0 Order authorizing uniform system of accounts for municipal electric utilities.

(a) The uniform system of accounts for municipal electric utilities is hereby prescribed for every municipality operating an electric plant subject to the jurisdiction of this commission, and every such municipality be required and hereby is required, on and after March 1, 1936, to keep its records and accounts in conformity therewith, with the option of adopting and placing in effect such system of accounts at the beginning of the fiscal year of any municipality next preceding such date.

(b) Any municipality may, for purposes of comparison with prior years keep on its books, in addition to the accounts hereby prescribed, such portion or portions of its present accounts as may be deemed desirable.

(c) Each municipality for which this uniform system of accounts is prescribed shall classify, set forth, and carry all assets, liabilities, and surplus existing as of the effective date of this uniform system of accounts as prescribed in such system of accounts.

(d) Each municipality shall prepare and file in triplicate with the commission not later than six months after the effective date of this uniform system of accounts, summary statements showing:

(1) the closing balance of each balance sheet account under the system of accounts followed prior to the adoption of the system of accounts prescribed herein, the title of each account under this system of accounts to which any portion thereof was transferred, and the amount so

transferred, and (2) the opening balance of each account under this system of accounts, the title of each account from which any portion thereof was transferred, and the amount so transferred.

(2) Reserves or portions thereof existing at the effective date of this system of accounts which had been accumulated through charges to operating expenses wholly or partly to provide for retirement losses, depreciation, amortization, or replacement of fixed capital shall be transferred to the accounts prescribed herein for depreciation and amortization reserves.

(e) Each municipality shall immediately proceed to redistribute the balances in its fixed capital accounts so as to bring the classification of such property into conformity with the operating property or other accounts prescribed in this system of accounts. Summary statements of the journal entries necessary for such redistribution shall be filed with the commission in triplicate not later than six months after the effective date of this uniform system of accounts. These statements shall be so arranged as to show:

(1) the closing balance of each fixed capital account under the system of accounts previously followed, the title of each account under this system of accounts to which any portion thereof was transferred, and the amount so transferred, and (2) the opening balance of each account under this system of accounts, the title of each account from which any portion thereof was transferred, and the amount so transferred.

(f) In prescribing this system of accounts, the commission does not commit itself to the approval or acceptance of any item set out in any account, for the purpose of fixing rates or in determining other matters before the commission. The prescribed system of accounts is designed to set out the facts in connection with the financing, construction, income, expenditures, and transactions between the electric utility and the municipality itself or any other department thereof, etc., and therefrom the commission will determine, in connection with such matters as may be under advisement from time to time, just what consideration shall be given to the various items in the several accounts.

.SO DOC 16A-196.1

NYCRR

196.1 Definitions.

(a) When used in this system of accounts:

(1) Accounts or these accounts means the accounts of this system of accounts.

(2) Actually issued as applied to securities means those which have been sold to bona fide purchasers for a valuable consideration (including those issued in exchange for other securities or other

property) so that the purchasers secured them free from control by the issuing utility.

(3) Actually outstanding as applied to securities means those which have been actually issued and are neither retired nor held by or for the utility, and also securities held by trustees for sinking or other funds.

(4) Book cost means the amount at which property is recorded on the books of the utility without deduction of related reserve or reserves.

(5) Book liability means the amount at which a liability is recorded on the books of the utility.

(6) Book value when applied to operating property means the book cost (see par. (4) of this subd.) less related depreciation and amortization reserves. When applied to other property, the term means the book cost less reserves for loss in value.

(7) Commission or the commission means the Public Service Commission of the State of New York.

(8) Cost means the amount of money actually paid for property or services, or the current money value of any consideration other than money.

(9) Cost of removal means the cost of demolishing, dismantling, tearing down, or otherwise removing operating property, including the cost of transportation and handling incident thereto.

(10) Date of installation means the date at which operating property is ready for service.

(11) Date of retirement means the date at which operating property is withdrawn from service.

(12) Debt expense means all expense in connection with the issuance and sale of evidences of debt, such as fees for drafting legal papers in connection therewith; fees and taxes for issuing or recording evidences of debt; cost of engraving and printing bonds and certificates of indebtedness; fees paid trustees; specific costs of obtaining governmental authority; fees for legal services; costs of special elections called to pass on the question of issuance of debt; and other like costs.

(13) Depreciation as applied to depreciable operating property means the loss (or gain) in service value (see par. (39) of this subd.) not restored by current repairs, incurred in connection with the consumption or prospective retirement of operating property from causes inherent in current operations against which the utility is not protected by insurance, and the effect of which can be forecast with a reasonable approach to accuracy. Among the causes to be given consideration are

wear and tear, decay, action of the elements, obsolescence, changes in the art, inadequacy, changes in demand, and requirements of public authority.

(14) Discount as applied to debt of the utility means the excess of the par value plus interest accrued at the date of the sale over the current money value of the consideration received.

(15) Distribution system. (See § 197.35.)

(16) Electric operations or electric service means the service of supplying electricity, together with the generation, transmission, and distribution thereof, when such service is in whole or in part subject to the jurisdiction of the commission; and services incidental thereto.

(17) Electric plant. (See Abstracts from Law, §195.2.)

(18) Group plan as applied to depreciation accounting means the plan under which depreciation charges are accrued upon the book cost of all depreciable property, regardless of the age of the particular items of that property, and upon the retirement of any depreciable property its entire service value is charged to the depreciation reserves whether or not the particular item has attained the average service life.

(19) Lessor municipality means a municipality owning, either solely or jointly, but not operating a municipal electric utility (see par. (23) of this subd.).

(20) Long term debt means obligations having a life of more than one year from date of creation of assumption, and all bonds.

(21) Minor items as applied to depreciable electric or general operating property means any part or element which is not designated as a unit of property (see par. (42) of this subd.).

(22) Municipality means a county, city, village, town, or lighting district organized as provided by a general or a special legislative act.

(23) Municipal electric utility means an electric plant (see Abstracts from Law, § 195.2) operated and/or owned by a municipality or municipalities, which provides electric service (see par. (16) of this subd.) to others than the government of such municipality or municipalities.

(24) Net salvage value means the salvage value (see par. (37) of this subd.) of property retired after deducting the cost of removal.

(25) Nominally issued as applied to securities means those which have been signed, certified, or otherwise executed, and placed with the proper officer for sale, or pledged, but which have neither been sold nor issued direct to trustees of sinking funds in accordance with mortgage requirements.

(26) Nominally outstanding as applied to securities means those which, after being actually issued, have been reacquired by or for the utility but not retired, except those held for sinking or other funds.

(27) Non-operating property means all physical property owned by the municipality and definitely identified with and in the custody of or under the supervision of persons responsible for the operation of the municipal electric utility, which property is not used in electric operations or other operations under the jurisdiction of the commission but which it is not practicable to exclude from the books and financial statements of the municipal electric utility.

(28) Operating municipality means a municipality operating either solely or jointly a municipal electric utility (see par. (23) of this subd.).

(29) Operating property means the property, both tangible and intangible, which is used (see par. (43) of this subd.) for the purposes of supplying electric service or other service subject to the jurisdiction of the commission, and which has an expectation of life in service of more than one year from date of installation.

(30) Operating property--electric means the operating property used (see par. (43) of this subd.) by the municipal electric utility in the conduct of its electric operations (see par. (16) of this subd.) or leased to others for such operations.

(31) Operating property--general means the operating property used (see par. (43) of this subd.) in operations which can not be definitely assigned to a particular department or class of operations subject to the jurisdiction of the commission. If the utility conducts more than one class of operations, the property used in common by two or more departments subject to the jurisdiction of the commission may be classified as Operating Property--General.

(32) Operating property--other operations means the operating property used (see par. (43) of this subd.) by the utility in the conduct of operations other than electric operations (see par. (16) of this subd.) which are subject to the jurisdiction of the commission.

(33) Original cost means the actual money cost (or the current money value of any consideration other than money) of property at the time when it was first devoted to the public service, whether by the accounting utility or by a predecessor public utility.

(34) Premium as applied to securities of the utility means the excess of the current money value of the consideration received at their sale over the sum of their par value and interest accrued at the date of their sale.

(35) Property retired as applied to operating property means property which has worn out, been removed, sold, abandoned, destroyed, or has become unserviceable, or unnecessary, or has been otherwise withdrawn from service.

(36) Replacing or replacement, when not otherwise indicated in the context means the acquisition, construction, or installation of property in place of property retired, together with the removal of the property retired.

(37) Salvage value means the amount received for property retired, if sold, less any expenses incurred in connection with such sale or in preparing the property for sale; or, if retained, the amount at which the material recovered is chargeable to account 123, Materials and Supplies, or other appropriate account.

(38) Service life means the period between the date of installation (see par. (10) of this subd.) of operating property and the date of its retirement. (See par. (11) of this sec.)

(39) Service value means the difference between the book cost (see par. (4) of this subd.) and the net salvage value (see par. (24) of this subd.) of operating property.

(40) Straight-line method as applied to depreciation accounting means the plan under which the service value (see par. (39) of this subd.) of property is charged to operating expense or other accounts and credited to the depreciation reserves through equal monthly charges as nearly as may be during its service life.

(41) Transmission system. (see par. (37) of this subd.)

(42) Units of property means those items of operating property which, when retired and replaced, are accounted for by crediting the book cost thereof to the operating property account in which it is included and charging to operating property the cost of the superseding property. (see § 197.23, subd. (b) (1).)

(43) Used as applied to operating property means actually and necessarily in current service or ready for and reasonably required to be currently held for future service.

(44) Utility or the utility means the accounting municipal electric utility as defined in paragraph (23) of this subdivision.

.SO DOC 16A-196.2

NYCRR

196.2 Records.

(a) Each utility (see § 196.1, subd. (a) (44)) shall keep a complete set of accounting books concerning the electric plant and the operations thereof, separate and distinct from other municipal accounts and transactions, except that such books may also include the entries for

any other property or operations subject to the jurisdiction of the commission; and all other books and records which support in any way the entries to such accounting books so that it can readily furnish at any time full information as to any account. Moreover, it shall support each entry to each account with such detailed information as will provide a ready analysis, identification, and verification of the facts recorded therein.

(b) The books referred to herein include not only books of account in a limited technical sense but all other records such as minute books, resolutions or ordinances or minutes of municipal bodies, records of elections relating to the municipal utility, and working papers, engineering studies, operating records, etc., which will be useful in developing the history of any transaction or authorization.

(c) Except as authorized by the commission, all operating, accounting, or financial papers, records, books, invoices, stubs, maps, or documents shall be retained permanently.

(d) All such records shall be accessible, at all times, to the authorized representatives of the commission at a location within the State of New York.

.SO DOC 16A-196.3

NYCRR

196.3 Accounts to be kept by double entry method. All the accounts defined in this system of accounts must be kept by the double entry method.

.SO DOC 16A-196.4

NYCRR

196.4 Subdivisions of accounts. Subdivisions of any account in this system of accounts may be kept, and upon order of the commission shall be kept. The title of each such subdivision shall clearly indicate the account of which it is a part. When an account is subdivided in the general ledger, an account need not also be raised for the total of the subdivisions. When such subdivisions are carried in subsidiary ledgers, however, the general ledger shall contain the controlling accounts therefor so that a complete general ledger trial balance may be obtained.

.SO DOC 16A-196.5

NYCRR

196.5 Account numbers not a part of title. (a) The numbers prefixed to account titles herein are solely for convenience of reference and are not part of the titles.

(b) When the same account number or title is used in connection with more than one department of the municipality under the jurisdiction of the commission, there may be prefixed a letter to identify the account with the department to which it relates; for example, the letter E for

electric, G for gas, etc.

.SO DOC 16A-196.6

NYCRR

196.6 Accounting period. Each utility in Class A, Class B, or Class C shall keep its books on a monthly basis so that for each month all transactions applicable thereto shall be promptly carried to the general ledger. Each utility in Class D shall keep its books either on a monthly or quarterly basis. When a quarterly basis is used provisions contained herein relative to monthly entries shall be regarded as calling for quarterly entries. A trial balance shall be taken after the monthly or quarterly postings have been made, and each utility shall close its books as of the end of its fiscal year.

.SO DOC 16A-196.7

NYCRR

196.7 Submission of questions. To maintain uniformity of accounting, utilities shall promptly submit all questions of doubtful interpretation to the commission for consideration and decision.

.SO DOC 16A-196.8

NYCRR

196.8 Classification of utilities. (a) For the purpose of applying the system of accounts herein prescribed, municipal electric utilities are hereby grouped into the following four classes:

Class A. Utilities having average annual electric operating revenues of \$500,000 or over

Class B. Utilities having average annual electric operating revenues of \$100,000 or over, but under \$500,000

Class C. Utilities having average annual electric operating revenues of \$25,000 or over, but under \$100,000

Class D. Utilities having average annual electric operating revenues of less than \$25,000

(b) In order that frequent changes may be avoided, the class to which any utility belongs may be determined by the average of its annual electric operating revenues for the three fiscal years next preceding the effective date of this system of accounts. If, at the end of any fiscal year following, the average of its annual electric operating revenues for the three next preceding fiscal years is greater than the maximum for the class in which the utility has been grouped, it shall automatically be grouped in the higher class in which it falls because of such increased annual revenues. Any utility engaged in new undertakings, the annual revenue from which is not known in advance, shall be classed in accordance with a reasonable estimate of its prospective revenues.

(c) Any utility may, at its option, place itself in any group higher than the one in which it falls on the basis of its average annual

electric operating revenues. Notice of such action shall be promptly filed with the commission.

.SO DOC 16A-196.9

NYCRR

196.9 Applicability of accounts.

(a) This uniform system of accounts is prescribed for all operating utilities subject to the jurisdiction of the commission. Except as otherwise indicated in the text of the accounts, the balance sheet, operating property, income, surplus, and revenue accounts are identical for each of the four classes.

(b) The classification of operating expenses is adapted to utilities in the various classes, and the accounts are combined or subdivided to meet the needs of each class.

(c) Each utility shall keep, so far as they are applicable to its business, at least the accounts provided for the class to which it belongs. It may also keep subdivisions thereof, whether those prescribed for utilities of a higher class or others, as provided in section 196.4. The letters A, B, C, and D which precede account numbers indicate the classes of utilities which shall keep these accounts.

(d) This uniform system of accounts is also prescribed for electric plants (see Abstracts from Law, § 195.2) owned but not operated by municipalities which plants furnish electric service (see § 196.1, subd. (a) (16)) to others than the municipality owning such plant, so far as it is applicable thereto.

.SO DOC 16A-197.1 NYCRR

Section 197.1 Balance sheet accounts, purpose of. By balance sheet accounts are meant those titles under which the ledger accounts are combined and summarized to show, as of a given date, the assets, liabilities, contributions from the municipality, and surplus or deficit.

.SO DOC 16A-197.2 NYCRR

197.2 Clearing accounts, purpose of. (a) The clearing accounts are designed to facilitate the distribution of certain expenditures which usually affect both construction and operations or which affect electric operations and other operations of the municipal electric utility. Clearing accounts other than those provided herein may be kept.

(b) Balances in clearing accounts shall be fully cleared not later than the end of the fiscal year unless items held therein unquestionably relate to a future period, except that items incurred during the last

month of a fiscal year may be carried over to be cleared in the following month.

.SO DOC 16A-197.3

NYCRR

197.3 Contingent assets and liabilities. (a) Contingent assets represent a possible source of value to the utility contingent upon the fulfillment of conditions regarded as uncertain. Contingent liabilities include items which may under certain conditions become obligations of the utility but which are neither direct nor assumed liabilities at the date of the balance sheet. In the annual report to the commission, contingent assets and contingent liabilities shall not be included in the balance sheet but shall be shown in a supplementary statement accompanying it.

.SO DOC 16A-197.4

NYCRR

197.4 Current assets. (a) Current assets are cash, those assets that are readily convertible into money or are held for current use in operations or construction, advance payments made by the utility benefit of which is to be realized within a relatively short period, current claims against others payment of which is reasonably assured, and amounts accruing to the utility which are subject to current settlement.

(b) In the group of accounts designated as current assets (accounts 121 to 131 there shall not be included any item the amount of collectibility of which is not reasonably assured or for which provision has not been made in account 266, Reserve for Uncollectible Accounts. Items of current character but of doubtful value may be carried in these accounts at a nominal value or included in account 145, Miscellaneous Expense, at book cost or nominal value, or written off, as may be appropriate.

(c) Adjustments to accomplish the writing down of items of doubtful value not covered by reserves shall be made through account 514, Miscellaneous Debits to Surplus, or other appropriate account.

.SO DOC 16A-197.5

NYCRR

197.5 Current liabilities. Current liabilities are those obligations the amount of which is definitely determined or closely estimated which are either matured at the date of the balance sheet or become due within a year from date of issuance or assumption or upon demand, except bonds, which shall be classed as long term debt (see § 196.1, subd. (a) (20)), regardless of the period for which they are to run.

.SO DOC 16A-197.6

NYCRR

197.6 Delayed items. (a) The term delayed items means items relating to transactions which occurred before the current fiscal year. It includes adjustments of errors in the income, operating revenue, and

operating expense accounts of prior years.

(b) Delayed items shall be charged or credited to the same accounts which should have been charged or credited if the items had been taken up or adjusted in the period to which they pertain. When the amount of a delayed item is relatively so large that its inclusion in the accounts for a single month would seriously distort those accounts, it may be distributed in equal amounts to the accounts for the current and remaining months of the fiscal year.

(c) If the amount of any delayed item is relatively so large that its inclusion in the accounts for a single year would seriously distort those accounts, the utility, if so authorized by order of the commission, may carry to Surplus as much of the amount as may be authorized. In requesting such authority, the utility shall file with the commission the full particulars concerning each such item and the reasons which in its judgment indicate the propriety of such accounting.

.SO DOC 16A-197.7

NYCRR

197.7 Depreciation accounting.

(a) Computation and filing of depreciation rates.

(1) Each utility shall determine and file with this commission not later than six months following the date when it becomes subject to this system of accounts, a statement showing composite annual percentage rates considered applicable to the book cost of each class of depreciable property or subdivision thereof (see subd. (c) hereunder) used wholly or partly in electric operations, which rates shall be based upon the estimated service values and service lives developed by a study of the utility's history and experience, the history and experience of other utilities and electric corporations, and such engineering and other information as may be available in respect of probable future conditions. These percentage rates shall be computed in conformity with the group plan of accounting for depreciation and shall be such that the loss in service value of the property will be distributed in equal monthly charges during the service life of the property in accordance with the straight-line method (see § 196.1, subd. (a) (44)). When a class of depreciable property covers two or more distinct types of property with different service lives and/or net salvage values, the service lives and net salvage values shall be separately determined for each such type of property. When this is done the composite annual rates shall be computed so as to produce a charge to operating expenses for each class of depreciable property which will be equal to the sum of the amounts chargeable for each of the various types of depreciable property included in such class. The composite annual rates so filed shall be

accompanied by a statement subscribed by the responsible municipal official or other duly authorized representative of the utility showing the bases therefor and the methods employed in their computation, including the estimated service life and net salvage value at retirement of each class, or subdivision thereof, of depreciable property, and the date when such rates become effective. The utility shall be prepared to submit evidence showing the correctness and applicability under the principles and methods herein prescribed of such rates, and to compute and submit at any time, upon direction of this commission, revised rates when existing rates are deemed inapplicable.

(2) If in the judgment of the utility any composite rate filed with the commission becomes no longer currently applicable, the utility shall in like manner file revised annual composite depreciation rates which in its judgment should be established.

(3) The utility shall keep such records of property and property retirements as will reflect the service life of property which has been retired, or will permit the determination of probable service life by appropriate methods; and also such records as will reflect the percentage of salvage value, or net salvage value, as appropriate, for property retired from each class, or subdivision thereof, of depreciable operating property used wholly or partly in electric operations.

(b) Depreciation charges. (1) Charges for currently accruing depreciation on Operating Property--Electric shall be made monthly to the various operating expense accounts provided for such charges, to clearing accounts, or to account 432, Deductions from Rent Revenues--Electric (see paragraph (3) hereunder), with concurrent credits to account 261, Depreciation Reserves. Charges for Operating Property--General (used partly in electric operations) shall be apportioned among the depreciation expense accounts or clearing accounts provided for electric operations and the corresponding accounts for other operations (see § 196.1, subd. (a) (32)). In computing the monthly charges, one-twelfth of the composite annual rate applicable to each class of depreciable operating property (see subd. (c) hereunder) shall be applied to the balance at the beginning of the month in each account or subdivision thereof covering such depreciable operating property.

(2) Depreciation charges shall be made upon property used but not owned only to the extent that the cost of such property is included in the operating property accounts (see § 197.17, subd. (a)) and shall be made upon the same basis as for owned depreciable property. Any additional reserve required to meet losses expected to be incurred through reversion of such property to the lessor prior to the expiration

of its service life shall be provided through charges to account 790, Amortization of Intangible Property, and credits to account 262, Amortization Reserves. For treatment of depreciation upon leased property, see subdivision (d) of section 197.28.

(3) Depreciation charges on electric property constituting a distinct operating unit leased to others for electric operations, when the lessee has exclusive possession, shall be made to account 432, Deductions from Rent Revenues-Electric, with concurrent credits to account 261, Depreciation Reserves.

(4) In computing depreciation charges, a separate composite annual rate shall be used for each class, or subdivision thereof, of depreciable Operating Property--Electric and Operating Property--General. Such composite rates shall be those filed in accordance with paragraphs (1) and (2) of subdivision (a) of this section, unless otherwise ordered by the commission. Until the filing of such rates, each utility shall use such provisional composite rates as will in its judgment approximate as closely as is reasonably possible the rates to be filed.

(c) Classes of depreciable electric operating property. (1) The classes of depreciable electric operating property, upon which composite depreciation rate shall be based, and the accounts covering such operating property are as follows:

Steam Power Plant Land* and all in account 312, 5 structures, into one class. (account 311 (1))

Hydro-Electric Power Plant Land* (account 311 (2))

Internal Combustion Power Plant Land* (account 311 (3))

Transmission System Land and Rights of Way* (account 311 (5))

Distribution System Land and Rights of Way* (account 311 (6))

Office Land* (account 311 (7))

Shop Land* (account 311 (8))

Transportation Land* (account 311 (10))

Miscellaneous Land* (account 311 (11))

Steam Power Plant Structures (account 312 (1))

Hydro-Electric Power Plant Structures (account 312 (2))

Internal Combustion Power Plant Structures (account 312 (3))

Transmission System Structures (account 312 (5))

Distribution System Structures (account 312 (6))

Office Structures (account 312 (7))

Shop Structures (account 312 (8))

Stores Structures (account 312 (9))

Transportation Structures (account 312 (10))
Miscellaneous Structures (account 312 (11))
Boiler Plant Equipment (account 321)
Engine Driven Generator Units--Steam (account 322)
Turbo-Generators--Steam (account 323)
Accessory Electric Equipment--Steam (account 324)
Miscellaneous Power Plant Equipment--Steam (account 325)
Reservoirs, Dams, and Waterways (account 331)
Roads, Trails, and Bridges (account 332)
Water Wheels, Turbines, and Generators (account 333)
Accessory Electric Equipment--Hydro (account 334)
Miscellaneous Power Plant Equipment--Hydro (account 335)
Engine Driven Generator Units--Internal Combustion (account 342)
Accessory Electric Equipment--Internal Combustion (account 344)
Miscellaneous Power Plant Equipment--Internal Combustion (account 345)
Transmission Roads and Trails (account 351)
Transmission Substation Equipment (account 352)
Transmission Overhead Conductors (account 353)
Transmission Underground Conductor (account 354)
Poles, Towers, and Fixtures (account 358)
Underground Conduits (account 359)
Distribution Substation Equipment (account 361)
Storage Battery Equipment (account 362)
Distribution Overhead Conductors (account 363)
Distribution Underground Conductors (account 364)
Line Transformers (account 365)
Overhead Services (account 366)
Underground Services (account 367)
Consumers' Meters (account 368)
Consumers' Meter Installation (account 369)
Other Property on Consumers' Premises (account 370)
Street Lighting and Signal System Equipment** (account 371)
Office Equipment (account 381)
Stores Equipment (account 382)
Shop Equipment (account 383)
Transportation Equipment (account 384)
Communication Equipment (account 385)
Laboratory Equipment (account 386)
General Tools and Implements (account 387)
Miscellaneous General Equipment (account 388)
Miscellaneous Tangible Property (account 391)

FOOTNOTES: * Except for interests in land with limited terms, such as leaseholds, water rights, water diversion rights, rights of way, and easements. Class C and Class D utilities may combine all operating property in account 311, Land, into one class.

** Utilities may subdivide to show Street Lighting Equipment separately from Signal System Equipment.

(2) In case the utility carries any operating property in account 392, Undistributed Operating Property, the depreciation provisions herein set forth shall apply thereto. The depreciation charges for such property shall be made to the same accounts as if it were distributed among the operating property accounts appropriate to its character and use.

(d) Depreciation of other than electric property. (1) The instructions for depreciation of operating property as outlined herein shall apply to Operating Property--Electric and to Operating Property--General. The accounting for depreciation on operating property in other operating departments which are subject to regulation by the commission shall be in accordance with the effective systems of accounts applicable to such operations.

(2) Separate expense and reserve accounts shall be maintained for each operating department for recording depreciation upon operating property. Depreciation on non-operating property shall be charged to account 449, Non-operating Revenue Deductions, and credited to an appropriate subdivision of account 267, Miscellaneous Reserves.

NYCRR

197.8 Discount or premium on owned securities of others. (a) When securities with a fixed maturity date are purchased at a discount (that is, when the total cost, including brokerage fees, taxes, commissions, etc., is less than par), such discount may be spread over the remaining life of the securities through periodic debits to the account in which the securities are carried (preferably coincident with entries recording interest accruals) and credits to account 444, Miscellaneous Non-operating Revenues.

(b) In like manner, when securities with a fixed maturity date are purchased at a premium (that is, when the total cost, including brokerage fees, taxes, commissions, etc., is in excess of par), such premium may be amortized over the remaining life of the securities through periodic credits to the account in which the securities are carried (preferably coincident with entries recording interest accruals)

and debits to account 449, Non-operating Revenue Deductions.

(c) No debits shall be made in respect of discount upon securities held as investments or in special funds unless there is reason to believe that such securities will be redeemed at not less than par and at a date not later than their maturity.

.SO DOC 16A-197.9

NYCRR

197.9 Discount or premium and expense on long term debt. (a) A separate subdivision shall be maintained in account 141, Unamortized Debt Discount and Expense, for the excess of discount and debt expense over any premium related to each class of long term debt issued or assumed. (See pars. (12), (14) and (34) of subd. (a) of § 196.1.)

(b) Corresponding subdivisions shall be maintained in account 271, Unamortized Premium on Debt, for the excess of the premium over any discount and debt expense related to each class of long term debt issued or assumed.

(c) Each month there shall be credited to each subdivision of account 141, Unamortized Debt Discount and Expense, the amount applicable to such month under a plan the application of which will equitably distribute the balance therein over the life of the security. Amounts thus credited shall be concurrently charged to account 453, Amortization of Debt Discount and Expense.

(d) Correspondingly, each month there shall be charged to each subdivision of account 271, Unamortized Premium on Debt, the portion of such credit balance which is applicable to that month. Amounts thus charged shall be concurrently credited to account 454, Release of Premium on Debt--Cr.

(e) The utility may extinguish at any time through Surplus all or any part of the balance remaining in any subdivision of account 141, Unamortized Debt Discount and Expense, or account 271, Unamortized Premium on Debt.

(f) Except as provided in subdivision (c), (d) and (e) of this section, the balance in each of these accounts or subdivisions thereof shall be carried until the reacquisition of the securities to which it relates. At that time (unless otherwise ordered by the commission) a portion of the balance in the account or subdivision for the particular class of long term debt reacquired shall be transferred to account 502, Miscellaneous Credits to Surplus or account 514, Miscellaneous Debits to Surplus, as may be appropriate. Such portion shall be based on the relation of the amount of the particular issue of long term debt reacquired to the total outstanding before its reacquisition. This provision shall not apply to securities held alive in sinking or other

funds.

(g) Except as provided in paragraph (10) of subdivision (e) of section 197.21, no discount or expense on long term debt shall be included in any account as a part of the cost of acquiring any property or as a part of the cost of operation.

.SO DOC 16A-197.10

NYCRR

197.10 Distribution of pay and expenses of employees. (a) The charges to property accounts, operating expenses, or other accounts for services and expenses of employees engaged in both construction and operation or in more than one class of operations, shall be based upon the actual time engaged in each service, or in case that is impracticable, upon percentages based on study of the time actually engaged during a representative period.

(b) The pay and expenses of general officers of the municipal electric utility and of general municipal officers and employees shall be included in the accounts of the municipal electric utility to the extent that they are actually engaged in such work based upon the actual time so engaged, and shall be charged to the actual work on which they are engaged, to the particular operations over which they have direct supervision, or to the appropriate accounts provided in the administrative and general group in operating expenses.

(c) Salaries of officers or employees and incidental expenses which can be distributed equitably upon a predetermined basis may be distributed through clearing accounts.

.SO DOC 16A-197.11

NYCRR

197.11 Employer pensions and benefits. (a) All cost of employee pensions and benefits, whether such costs represent pensions payable currently to retired employees or their beneficiaries, advance provision for future payments, or both, are includible in the charges of each accounting period. A utility may distribute to construction and retirement projects and to clearing and other accounts an applicable portion of the pension and benefits costs.

(b) Costs of accident and health insurance, hospital and surgical insurance, disability and lump sum separation allowances, and similar employee benefits, together with costs of operating educational and recreational facilities are also includible in account 785.1, Employees' Welfare Expenses.

.SO DOC 16A-197.12

NYCRR

197.12 Income accounts, purpose of. The income accounts (401 to 460) are designed to show for each month the amounts of operating revenues and operating expenses applicable to electric and other operations

subject to the jurisdiction of the commission; the returns upon securities owned and from property not used in operations; the amounts accrued for taxes, uncollectible revenues, and use of moneys, and for exclusive use of properties of others constituting a distinct operating unit; and reservations and appropriations of income.

.SO DOC 16A-197.13

NYCRR

197.13 Insurance. (a) The amount of insurance premiums paid in advance shall be included in the appropriate subdivision of account 128, Prepayments, and equitably distributed to the appropriate accounts during the period to which the premiums relate (except minor premiums which may be charged direct, and premiums chargeable to construction).

(b) If the utility does not carry full insurance, monthly charges may be made to account 783.1, Insurance, account 783.2, Injuries and Damages, or other appropriate account, with concurrent credits to account 264, Insurance Reserve, or account 265, Injuries and Damage Reserve, to maintain reserves to cover losses against which the utility is not otherwise insured. (See also ÷ 197.33.)

.SO DOC 16A-197.14

NYCRR

197.14 Item lists, interpretation of. Lists of items appearing in the texts of the several accounts are given for the purpose of indicating the application of the prescribed accounting in specific cases. The lists are not to be considered as comprising all items includible in the several accounts, but merely as representative of them. On the other hand, the appearance of an item in a list warrants the inclusion of such item in the account concerned only when the text of the account also indicates inclusion, in as much as the same item frequently appears in more than one list. The proper entry in each instance must be determined by the texts of the accounts.

.SO DOC 16A-197.15

NYCRR

197.15 Jobbing work. The revenue from appliance sales and from jobbing work, such as wiring, installation of appliances, servicing appliances, etc., shall be credited to account 772, Appliance Selling and Jobbing, and the cost of such appliances and jobbing work, including direct labor, shall be charged thereto. Such cost shall include the proportion of superintendence, shop, transportation, stores, and other expenses applicable thereto; except that such allocations are not mandatory for Class D utilities.

.SO DOC 16A-197.16

NYCRR

197.16 Joint expenses.

(a) In accounting for operating expenses incurred under arrangements between the municipal electric utility and others for joint use of

facilities, the creditor in the first instance shall charge the entire expense to the appropriate accounts or to a clearing account. The portions borne by the debtor shall be credited by the creditor to the accounts previously charged therefor and charged by the debtor to the same accounts to which they would be charged if incurred directly to the debtor.

(b) Any allowance for profit or return and taxes on property used under the arrangement shall be credited by the creditor to account 621, Rent from Electric Property and charged by the debtor to the appropriate rent expense account.

(c) Bills covering charges by another party or by another department of the operating municipality under joint arrangements shall be so rendered or analyzed as to make possible allocation of the several elements thereof to the appropriate accounts.

(d) Operating expenses incurred for facilities operated by the operating municipality and used jointly by the municipal electric utility and any other department of the operating municipality shall be treated so that there will be available the details of the charges and the basis of the distribution to each department.

(e) Complete details or copies of contracts or agreements covering joint operations shall be filed with the commission. Such data shall include a statement outlining the reasons for the basis of allocation used.

Note: When production operations are conducted under joint arrangements, the statistics for electricity produced shall be reported in a consistent manner so that each participant will report its share of the quantity of electricity produced.

.SO DOC 16A-197.17

NYCRR

197.17 Leased property, expenditures on. (a) Except as provided in subdivision (b) following, the cost of initial improvements (including rearrangements, additions, and betterments) to property leased from others made in the course of preparing the property for electric operations, and the cost of any subsequent additions to and betterments of such leased property, not including replacements, shall be charged to the operating property accounts (see note under accounts 101-109, Operating Property) appropriate for the class of property leased. Amortization and depreciation on such expenditures shall be provided for in the manner set forth in paragraph (2) of subdivision (b) of section 197.7.

(b) When the alterations to leased electric property otherwise chargeable to the property accounts are of relatively minor cost or the

period of the lease is less than one year, the cost shall be charged to the accounts chargeable with the cost of repairs to such property.

.SO DOC 16A-197.18 NYCRR

197.18 Merchandising and jobbing. (See ÷ 197.15.)

.SO DOC 16A-197.19 NYCRR

197.19 Operating expense accounts, purpose of. The operating expense accounts (701 to 793) are designed to show the cost of electric service exclusive of taxes, uncollectible revenues, and return on investment. (See also ÷ 197.33.)

.SO DOC 16A-197.20 NYCRR

197.20 Operating property accounts, purpose of. (a) The operating property accounts are designed to show the original cost (see ÷ 196.1, subd. (a) (33)) of property used (see ÷ 196.1, subd. (a) (43)) in operations, which ordinarily has a service life of more than one year. Operating property used in common by the municipal electric utility and by another department of the operating municipality shall be included in the operating property accounts if the major use is by the electric utility. This shall govern even if the property was acquired through the use of general municipal funds, in which case credit therefor shall be to account 280, Contributions--Operating Municipality.

(b) Every debit or credit to operating property accounts shall be made so as to be readily identifiable with the particular item or items of property to which it relates. When two or more items are acquired under a single undivided contract the records shall show that fact, and shall also show the portion thereof fairly applicable to each such item. (See ÷ 197.22.)

(c) When property ordinarily having a service life of more than one year is installed for temporary use in operations, it shall be accounted for in the same manner as property having a service life of more than one year.

Note: Portable articles purchased from another public utility, but not acquired as a part of a going plant, may be charged to appropriate accounts at cost to the purchasing utility.

.SO DOC 16A-197.21 NYCRR

197.21 Operating property accounts, basis of charges to.

(a) Amounts chargeable to operating property accounts shall be the reasonable and necessary cost (see ÷ 196.1, subd. (a) (8)) of property constructed or installed by the accounting utility and the original cost (see ÷ 196.1, subd. (a) (33) and note to ÷ 197.20) of operating property acquired from a predecessor public utility (see ÷ 197.27). Existing book balances may be carried until the completion of the inventory and the

determination of original cost as required under section 197.22. At that time proposed journal entries to adjust the differences, if any, between book cost as previously carried and original cost shall be filed with the commission. No change (except correction of errors) shall be made in the book cost of any item except upon order of the commission. Nothing herein stated shall be taken as permitting the recording as part of the original cost of operating property of amounts which in previous years were charged to operating expenses, operating taxes or to other income or surplus accounts.

(b) When the consideration given for property is anything other than money, the current money value of such consideration shall be used. In the entry recording such a transaction the actual consideration shall be described with sufficient particularity to identify it. The utility shall be prepared to furnish to the commission the particulars of its determination of the money value of the consideration if other than money.

(c) The cost of hand tools and other individual items of small value and short life shall be charged to the appropriate operating expense or clearing accounts according to the use thereof, except that if such items are consumed directly in construction work, the cost may be included as part of the cost of the constructed unit.

(d) When property is purchased under any plan involving deferred payments, no charges shall be made to operating property accounts for interest, insurance, or other expenditures incidental to such form of payment.

(e) The cost of the construction or acquisition of property chargeable to the operating property accounts shall include the cost of direct labor, indirect labor, materials, transportation, contract work, engineering and supervision, law expenditures, injuries and damages, taxes, interest during construction, permits and privileges, rent of construction facilities, compensation and other insurance applicable to construction, and other analogous elements applicable to the construction and acquisition of property. The cost includible in the principal items are as follows:

(1) Direct labor includes the pay and expenses of employees directly engaged in construction work and of foremen in direct charge thereof.

(2) Indirect labor includes the portion of the pay and expenses of employees indirectly connected with construction work, such as timekeepers, store keepers, and general office employees, applicable to construction work. (See § 197.10.)

(3) Materials includes the purchase price at the point of free

delivery plus customs duties, excise taxes, and the costs of inspecting, loading, and transporting, and related stores expense. In determining the cost of materials used for construction, proper allowance shall be made for unused portions of materials recovered in performance of the work involved, and for discounts allowed in the purchase of materials.

(4) Transportation includes the cost of transporting purchased equipment and of transporting employees, materials and supplies, tools, and service equipment to and from points of construction. It includes amounts paid therefor to others and the cost of transportation service rendered by vehicles owned by the utility.

(5) Contract work includes amounts paid for work performed under contract and expenses incurred by the utility in connection with such work, including inspection, engineering and supervision, and costs incident to the award of contracts.

(6) Engineering and supervision includes the portion of the pay and expenses of general officers, engineers, surveyors, draftsmen, and superintendents, and their assistants, applicable to construction work.

(7) Employee pensions and benefits includes the portion of the cost of employee pensions and benefits which is applicable to construction work.

(8) Law expenditures includes the general law expenditures incurred in connection with the construction or acquisition of property and the court and legal costs directly related thereto.

(9) Injuries and damages includes expenditures or losses in connection with construction work on account of injuries to persons or damages to property of others.

(10) Taxes includes taxes actually paid on physical property during construction and before the facilities are ready for service. This includes taxes on land for the period during which it is included in account 110, Construction Work in Progress, until a structure thereon is ready for service or the land is otherwise used in operations. (See note A under account 311, Land.)

(11) Interest includes the net current cost of borrowed funds, or funds furnished by the operating or lessor municipality, used for construction purposes and the same rate upon the utility's own funds so used. Such interest shall be charged each month upon the balance at the beginning of the month in account 110, Construction Work in Progress, and credited to account 455, Interest Charged to Property--Cr. The period for which interest may be so charged shall be limited to the duration of the construction work and shall not extend beyond the time when the property becomes ready for service. In case construction work is suspended, interest charges may not be continued for more than six

months thereafter, except upon order of the commission.

Note: Class D utilities are required to include the costs set forth in subdivision (e), paragraphs (2), (4), (6), (7), (8), (9), (10), and (11) only for major construction projects.

.SO DOC 16A-197.22

NYCRR

197.22 Operating property--continuing property record required (Class A and Class B utilities only). (a) Not later than the effective date of this system of accounts each Class A and B utility shall begin in the preparation of a continuing property record of operating property used in electric operations, subdivided so as to show separately the operating property located in each city, village, or town. Such record of property acquired prior to the effective date of this system of account shall be completed not later than two years after the effective date thereof.

(b) The continuing property record shall be arranged in conformity with the operating property accounts and shall show a description of the property and the original cost (see § 196.1, subd. (a) (33)) thereof, except that for such portion of the property, the original cost of which can not be determined without excessive expense, the original cost shall be estimated. In the case of future additions, and so far as reasonably feasible for present property, there shall be shown (either in such continuing property record or in other records referred to therein) for each item of one or more units the date of acquisition (or construction by the accounting utility or any predecessor thereof), the date when first placed in service, the location of the property, and in the case of movable items, the manufacturer's name and any number or other identifying mark imprinted thereon, the number or designation used by the utility, and such other particulars as may be necessary for complete identification. The continuing property record shall show as of the end of each fiscal year, for each prior year's construction, the surviving balance for each continuing property record unit, in terms of both quantities and dollars. Property consisting of a large number of similar items may be grouped and within such groups for each fiscal year the average cost of similar units may be used.

(c) In the case of large items, such as structures, boiler plant equipment, and turbo-generators, the original cost of each unit or group of units comprising a piece of property acquired as a whole, shall be determined when feasible, and otherwise it shall be estimated. In the case of land and structures the original cost of each parcel of land and each structure is sufficient.

(d) The record shall show all essential details and the related costs

of equipment in each generating station, substation, transformer station, and transmission line.

(e) Each utility shall file, not later than six months after the effective date of this system of accounts, a statement of the units to be shown separately in the continuing property record. Such units need not be identical with the "Units of Property" to be filed as provided in paragraph (1) of subdivision (b) of section 197.23.

.SO DOC 16A-197.23

NYCRR

197.23 Operating property retired.

(a) Except as otherwise provided in paragraph (2) of subdivision (b), and subdivision (c) hereunder, the book cost of depreciable operating property retired (see § 196.1, subd. (a) (35)) shall be charged in its entirety to account 261, Depreciation Reserves, together with the cost of removal. To that account shall be credited salvage value and amounts recovered as insurance or otherwise, including amounts provided in account 264, Insurance Reserve.

(b) For the purpose of avoiding undue refinement in accounting for the replacement of small items of property, depreciable Operating Property--Electric and Operating Property--General shall be grouped into (1) units of property, and (2) minor items, and the accounting for retirements and replacements of each group shall be as follows:

(1) Units of property. Not later than six months following the date when it becomes subject to this system of accounts, each utility shall file with the commission a statement subscribed by the responsible municipal official or other duly authorized representative showing for each account or subdivision thereof in Operating Property--Electric (and Operating Property--General) a list of the types and quantities of property which are accounted for as units of property. Any revision thereof shall be filed in like manner. The book cost of any unit of property retired shall be credited to the appropriate operating property account and charged to account 261, Depreciation Reserves, whether or not replaced. The cost of property installed in place of property retired shall be charged to the appropriate operating property account.

(2) Minor items. (i) This group includes any part or element which is not designated as a unit of property. The book cost of any minor item of property retired and not replaced shall be credited to the operating property account wherein included and charged to account 261, Depreciation Reserves, except that, if the book cost of a minor item of property has been or will be accounted for by its inclusion in the unit of property of which it is a part when such unit is retired, no separate credit to the operating property account is required when such minor

item is retired.

(ii) If minor items of property are retired and replaced (apart from the unit of property of which they form a part or with which they are associated), no entry shall be made in the operating property account or in account 261, Depreciation Reserves. The cost of the replacement shall be charged to the account appropriate for the cost of repairs to the property, except that, if the replacement effects a substantial betterment (the primary aim of which is to make the property affected more useful, more efficient, or of greater capacity), there shall be charged to the appropriate operating property account the access cost of the replacement over the estimated cost at current prices of replacing without betterment the minor items retired.

(c) Determination of book cost. The book cost of operating property retired shall be the amount at which such property is included in the operating property accounts including all items set forth in paragraphs (1) to (10) of subdivision (e) of section 197.21. Such costs shall be determined from the utility's records when this can be done, as in the case of land, structures, boilers, engines, generating station and substation equipment, transportation, office, and other equipment, and other items of operating property for which individual cost records are available. When the actual book cost can not be determined from the records, it shall be estimated. When it is impracticable to determine the book cost of each item due to the relatively large number or small cost thereof, the average book cost of the items, with due allowance for differences in size, character or year of installation, shall be used as the book cost of the items retired, except that utilities in Classes C and D need not take account of year of installation. The continuing property record, when completed, shall be used in accounting for retirements.

(d) The accounting for the retirement of items included in account 302, Franchises and Consents, account 303, Miscellaneous Intangible Property, and intangible elements with limited terms included in account 311, Land, shall be as provided in the texts of account 262, Amortization Reserves, and account 790, Amortization of Intangible Property.

(e) When operating property constituting an operating unit or system is sold, the book cost of the property shall be credited to the appropriate operating property accounts. The amounts (estimated if not known) carried with respect thereto in the depreciation and amortization reserve accounts and account 263, Contributions for Extensions, shall be cleared for such reserves. Unless otherwise ordered by the commission,

the difference, if any, between (1) the net amount of such debit and credit items, and (2) the consideration received for the property, shall be included, if a debit, in account 514, Miscellaneous Debits to Surplus, or, if a credit, in account 502, Miscellaneous Credits to Surplus.

(f) If the cause of retirement of depreciable Operating Property--Electric or Operating Property--General is one for which provision has not been made in the depreciation reserves and the loss is not covered by insurance, or if the retirement could not reasonably have been foreseen and provided for, the utility, upon order of the commission, may credit account 261, Depreciation Reserves, and charge account 143, Suspense to be Amortized, with the unprovided for loss in service value and distribute it through charges to account 789, Deferred Retirement Losses, over such period as the commission may order.

.SO DOC 16A-197.24

NYCRR

197.24 Operating revenue accounts, purpose of. (a) The operating revenue accounts (601 to 622) are designed to show the amounts of money which the utility becomes lawfully entitled to receive from furnishing electric service and from services incident thereto, and may include amounts for service rendered but not yet billed.

(b) Unless otherwise authorized by order of the commission, the records supporting the entries to electric operating revenue accounts shall be kept so that there will be readily available the detail thereof separately for each city, village, or town.

(c) If the utility desires to charge the appropriate accounts with the cost of electricity used from its own supply in any of its electric operations, the credit therefor shall not be made to operating revenue accounts but to account 729, Duplicate Production Charges--Cr., or account 793, Duplicate Miscellaneous Charges--Cr.

(d) Electricity supplied to municipalities other than the operating municipality without charge, in accordance with franchise requirements, shall be accounted for as provided in account 791, Franchise Requirements.

(e) Electricity supplied to officers or employees of the municipal electric utility without charge or at less than tariff rates, shall be included in operating revenue accounts at tariff rates, with concurrent charges to the accounts to which the pay of such officers or employees is charged. Electricity so supplied to municipal officers or employees not on the payroll of the municipal electric utility shall be included in operating revenue accounts as provided above with concurrent debits to account 280, Contributions--Operating Municipality.

(f) Electricity or other service supplied by the municipal electric utility to the operating municipality (including any function or department thereof except those which are under the jurisdiction of the commission) shall be credited to the appropriate revenue accounts at the cost of rendering such service. (See § 197.33, subs. (c) and (d).) When the amount received for such service is greater or less than such cost, the difference shall be credited or charged, as the case may be, to account 280, Contributions--Operating Municipality.

Note: Electricity supplied or services rendered to any department of the operating municipality which is under the jurisdiction of the commission shall be accounted for as provided in account 726, Production Expenses Transferred--Cr., and account 792, Miscellaneous Expenses Transferred--Cr.

.SO DOC 16A-197.25

NYCRR

197.25 Operating revenue accounts, basis of entries.

(a) Credits to the various revenue accounts shall be made monthly upon the basis of either: (1) gross tariff rates, or (2) net tariff rates, for electricity supplied or service rendered. If at gross rates, discounts taken shall be charged, or, if at net rates, discounts not taken shall be credited, to the same account. For basis of credits to cover electricity supplied to the operating municipality, see sections 197.24 and 197.33.

(b) The utility shall keep its records so that it can show separately for each class of service under option (1) the discounts taken, or under option (2) the discounts not taken. Corrections of overcharges and overcollections theretofore credited; authorized abatements, allowances, and other corrections to bring charges into conformity with service classifications as filed with the commission shall be charged to the revenue accounts to which they relate.

.SO DOC 16A-197.26

NYCRR

197.26 Production expenses--steam, allocation of. (a) If steam produced primarily for generating electricity is utilized in electric operations for other purposes or by another operating department subject to the jurisdiction of the commission, the entire cost shall be charged in the first instance to the operating expense accounts provided herein for cost of steam production, and the amount applicable to the steam transferred, including repairs and depreciation, shall be credited to account 705, Steam Transferred--Cr.

(b) If another operating department subject to the jurisdiction of the commission is charged with any amount in addition to that which is credited to account 705, Steam Transferred--Cr., in accordance with

subdivision (a), such additional amount shall be credited to account 621, Rent from Electric Property.

(c) Steam supplied by the municipal electric utility to the operating municipality (including any function or department thereof except those which are under the jurisdiction of the commission) shall be credited to account 622, Miscellaneous Electric Revenues, at the cost of production. When the amount received for such service is greater or less than such cost, the difference shall be credited or charged, as the case may be, to account 280, Contributions--Operating Municipality.

.SO DOC 16A-197.27

NYCRR

197.27 Property purchased. (a) When any electric plant or portion thereof constituting a distinct operating unit is purchased, the constituent elements thereof shall be appraised on the basis of original cost (see § 196.1, subd. (a) (33)) and a copy of such appraisal forwarded to the commission together with proposed journal entries allocating such original cost to the appropriate operating property or other accounts according to the nature of the property acquired. Such entries shall also cover any additional assets acquired or liabilities assumed and any incidental expenditures incurred in connection with the transaction. Full supporting details, including the purchase price and amount of contributions for extensions, if any, shall be furnished with such proposed entries.

(b) Accrued depreciation and amortization to date of purchase shall be determined, and a verified statement relative thereto, together with full supporting details, shall be submitted.

(c) Pending approval of the proposed journal entries, the cost of the electric plant and expenditures incidental to its purchase shall be carried in a suitably designated subdivision of account 145, Miscellaneous Expense, or, upon order of the commission, in account 392, Undistributed Operating Property, and allocation to operating property and other accounts shall be made only upon order of the commission.

(d) In a transaction involving the transfer and acquisition of property, the purchaser shall have available, so far as possible, all existing records and other evidence relating to the purchase, construction, and improvement of the property involved.

.SO DOC 16A-197.28

NYCRR

197.28 Rents. (a) Provision is made in the various operating expense accounts for rents payable for items of property or equipment other than those constituting a distinct operating unit of which the utility has exclusive possession. By exclusive possession is meant occupancy when the lessor furnishes no building or janitor service. (See account 433,

Rent for Lease of Electric Plant--Dr.) Taxes paid by the lessee upon leased property shall be included in the tax account of the lessee.

(b) When a portion of property or equipment rented from others for use in connection with electric operations is subleased, the revenue derived from such subleasing shall be credited to account 621, Rent from Electric Property.

(c) Rents receivable from utility-owned electric property constituting a distinct operating unit, in the exclusive possession of the lessee for electric operations, shall be credited to account 431, Rent from Lease of Electric Plant--Cr. Other rentals from utility-owned electric property shall be credited to account 621, Rent from Electric Property. All expenditures, together with provision for depreciation, applicable to property the rentals from which are included in account 431, Rent from Lease of Electric Plant--Cr., shall be charged to account 432, Deductions from Rent Revenues--Electric.

(d) When the lessee is responsible for the currently accruing depreciation upon leased property not carried in its accounts (see § 197.17), it shall charge such depreciation to account 433, Rent for Lease of Electric Plant--Dr., with concurrent credits to account 267, Miscellaneous Reserves. Replacements of such property shall be charged to such reserve.

.SO DOC 16A-197.29

NYCRR

197.29 Repairs, cost of.

(a) The cost of repairs chargeable to the various operating expense accounts includes labor employed, materials used, and expenses incurred in all current maintenance (not including depreciation and amortization), such as:

(1) Inspecting, testing, and reporting on the condition of operating property specifically to determine the need for repairs, minor replacements, rearrangements, and changes

(2) Testing for, locating, preventing, and clearing trouble

(3) Restoring condition of property damaged by wear and tear, decay, or action of the elements

(4) Replacing minor items of operating property (see also § 197.23, subd. (b)(2)(ii))

(5) Rearranging and changing the location of property not retired

(6) Restoring the condition of property damaged by storms, breakage, floods, fire, accident, or other casualties (see also subd. (b))

(7) Repairing materials for re-use

(8) Maintenance work on rights of way for transmission or distribution system

(9) Reconstructing or remodeling items of construction and equipment not resulting in a betterment (see § 197.23, subd. (b) (2) (ii))

(10) Cutting and replacing pavement, pavement base, and sidewalks in connection with repairs

(11) Training employees for repair work

(12) Inspecting and testing after repairs have been made

(13) Related costs of local plant administration, general plant administration, and engineering, supervision, transportation, shop and stores expenses, and use of tools and implements (see accounts 802-808); except that such allocations are not mandatory for Class D utilities.

(b) The cost of repairs does not include the cost of replacing (see § 196.1, subd. (a) (36)) items of property designated as Units of Property (see § 197.23, subd. (b)(1)).

(c) Materials recovered in connection with repairs to property shall be credited to the same account to which the repair cost was charged.

(d) If employees engaged in plant construction or operation are also required to make repairs, an equitable proportion of their pay and expenses shall be charged to the account appropriate for the cost of such repairs. (See § 197.10.)

(e) If the book cost of any property is carried in account 392, Undistributed Operating Property, the repairs to such property shall be charged to the accounts provided for repairs to property of the same nature and use the book cost of which is carried in other operating property accounts. Repairs to property leased from others shall be treated in like manner.

.SO DOC 16A-197.30

NYCRR

197.30 Separate records for each plant. (a) Unless otherwise authorized by order of the commission, separate records shall be maintained for the book cost of property comprising each electric plant owned or operated. The term plant as here used covers each separate generating station, substation, transformer station and transmission line, and the distribution system located in each city, village, or town.

(b) In like manner, expenses of operation and maintenance (accounts 701-734 shall be separately recorded for each plant as defined above, except transmission lines located wholly within a single city, village, or town, and distribution systems, provided that when a large number of small plants of the same nature are located so that two or more are operated as a unit under circumstances which make impracticable the segregation of such expenses, they may be kept for the group instead of for each plant.

(c) Expenses of operation and maintenance of the distribution, street lighting, and signal system property and transmission lines located wholly within a single city, village, or town, and the accounting, collecting, and sales activities (accounts 731-774) shall be kept separately for each city, village, or town, except that, with the approval of the commission, expenses for two or more such territories which are contiguous and are operated as a unit, may be combined.

Note: The segregation provided for in paragraph A hereof is not required to be established immediately, but shall be established as soon as is reasonably practicable and not later than the completion of the continuing property record provided for in section 197.22.

.SO DOC 16A-197.31

NYCRR

197.31 Spreading of income, revenue, and expense items. When the amount of any unusual item includible in an income, operating revenue, or operating expense account for a single month is relatively so large that its inclusion in the accounts for that month would seriously distort those accounts, it may be included, upon order of the commission, in account 145, Miscellaneous Suspense, or account 272, Miscellaneous Unadjusted Credits, as appropriate, and distributed to such accounts and over such period as the commission, by order, may direct.

.SO DOC 16A-197.32

NYCRR

197.32 Surplus accounts, purpose of. The Surplus account is the collective title for a small group of accounts which form the connecting link between the income account and the balance sheet. The several accounts thereof (501 to 514) are designed to show the changes in the surplus or deficit during each fiscal year resulting from:

(a) the operations and other transactions during the period reflected in the income accounts,

(b) appropriations or other reservations of surplus for specific purposes,

(c) accounting adjustments not properly attributable to the period (see also §197.6, subd. (b)), and

(d) miscellaneous losses and gains not provided for elsewhere.

.SO DOC 16A-197.33

NYCRR

197.33 Transactions with the municipality. (a) In order that the books of the municipal electric utility may show accurately the results of electric operations, each municipal electric utility shall credit the appropriate account with the cost of property, services, materials, supplies, use of space or equipment, etc., furnished to the operating municipality or any department thereof. (See also account 280,

Contributions--Operating Municipality, and §§ 197.24, subd. (f), 197.26, subd. (c).)

(b) Similarly, the accounts for electric operations shall include the cost of all items applicable thereto, including expenses of the municipal electric utility paid out of funds of the operating or lessor municipality, and services, materials, water supply, supplies, use of space or equipment, paving, inspection service, etc., furnished by the operating or lessor municipality or any department thereof. (See also account 280, Contributions--Operating Municipality.)

(c) The offsetting credit or debit for the transactions covered in subdivisions (a) and (b) hereof shall be to account 280, Contributions--Operating Municipality, which may show either a credit or a debit balance.

(d) These provisions are intended to make possible an accurate determination of the results of operations of the municipal electric utility by the inclusion in the operating accounts of all applicable items whether or not they are represented by actual payments. Thus, if an office of a municipal electric utility is located in a general municipal building and if no rent is paid to the operating municipality for such space, the appropriate account for such rent shall be debited with an equitable amount and the offsetting credit shall be to account 280, Contributions--Operating Municipality. If a general municipal officer or employee collects accounts receivable for electricity and the municipal electric utility does not pay from its funds any part of his salary and expenses, an equitable portion of his pay and expenses shall be charged to the appropriate electric operating expense account and the offsetting credit shall be to account 280, Contributions--Operating Municipality. In like manner, if the municipal electric utility furnishes any service such as street lighting, power for pumping water, etc., for which no payment is received from the operating municipality, the cost to the plant of such service shall be accounted for as provided in subdivision (a) hereof and sections 197.24 and 197.26, and charged to account 280, Contributions--Operating Municipality. If payments for items enumerated in subdivisions (a) and (b) consist of a nominal amount, the difference between the cost of the service rendered and the amount paid therefor by the municipality shall be accounted for in like manner.

(e) As of the effective date of this system of accounts, there shall be determined through an analysis of all transactions from the date of the first expenditure for the municipal electric utility, the amount representing the net balance which would result if the transactions

covered in this instruction and in account 280, Contributions--Operating Municipality, had been treated as provided herein. This net balance shall be placed on the books as a credit or a debit (as the case may be) to account 280, Contributions--Operating Municipality, and a copy of the journal entries showing detail and source of the information shall be filed with the commission not later than one year after the effective date of this system of accounts.

.SO DOC 16A-197.34

NYCRR

197.34 Transfers of property between departments. (a) Transfers of property between operating departments for each of which this commission has prescribed a system of accounts shall be recorded by transferring the book cost (see § 196.1, subd. (a) (4)) thereof from operating property of one department to that of the other, and likewise any related amounts carried in the depreciation and/or amortization reserves of the department in which such property had previously been carried.

(b) Transfers from Operating Property--Electric or Operating Property--General to operating departments of the municipal electric utility not subject to the jurisdiction of this commission, or to the operating or lessor municipality, or to non-operating property accounts, shall be treated as retirements (see § 197.23) and the amount credited to account 261, Depreciation Reserves, shall be the current fair market value of the property transferred, except that land, with or without improvements, transferred to account 112, Non-operating Property, to be held for sale, shall be accounted for as if carried in Operating Property--Electric or Operating Property--General, until sold.

(c) Property transferred from operating departments not subject to the jurisdiction of this commission or from non-operating property accounts or from the operating or lessor municipality, to Operating Property--Electric or Operating Property--General, shall be charged to such account at the original cost plus net carrying charges, if any, for the period during which it has been held for future use in electric service, with credits to the appropriate accounts for the accrued depreciation and/or amortization to date of transfer computed by the straight-line method. In such cases, the utility shall submit to the commission for approval the proposed journal entries to record the changes in property accounts and in reserves involved, together with full supporting details.

Note: The above provisions shall not apply to transfers made in the ordinary course through account 123, Materials and Supplies, which shall be treated as provided in section 197.23 and account 261, Depreciation Reserves.

.SO DOC 16A-197.35

NYCRR

197.35 Transmission and distribution systems. (a) Transmission system means all substances, lines, and appurtenances thereto used principally for inter-connection or transfer of electricity from a primary source of power to a distribution substation (including any transformer other than a line transformer). In the case of power purchased, the point of delivery or receipt shall be considered a primary source. Transmission system shall also include high tension network conductors from the primary source of power to the primary side of the network transformers. If any lines or equipment operating at a voltage of less than 5,000 volts are included herein, a statement shall be filed with the commission describing such lines or equipment in detail and stating the reasons for classifying them as transmission items.

(b) Distribution system means all substations, lines, and appurtenances thereto used principally for the transfer of electricity from the generating station or the transmission system to the service connection leading to premises of consumers, including the distribution substations. If any lines or equipment operating at a voltage in excess of 10,000 volts are included herein, a statement shall be filed with the commission describing such lines or equipment in detail and stating the reasons for classifying them as distribution items.

.SO DOC 16A-197.36

NYCRR

197.36 Unaudited items. When the amount of any item affecting these accounts can not be accurately determined in time for inclusion in the accounts of the fiscal year in which the transaction occurs, the amount of the item shall be estimated and included in the proper accounts. When the item is audited the necessary adjustments shall be made through the accounts in which the estimate was recorded. If, during the interval between the date of inclusion of the item in the accounts and the date on which it is audited, a substantial difference from the initial estimate is determined, appropriate adjustments shall be made in the current accounts to cover such difference. The utility is not required to anticipate small items which would not appreciably affect these accounts.

.SO DOC 16A-197.37

NYCRR

197.37 Units of property. (See ÷ 196.1, subd. (a) (42) and ÷ 197.23, subd. (b)(1))

.SO DOC 16A-197.38

NYCRR

197.38 Work order system required (Class A and Class B utilities only). (a) Class A and Class B utilities shall record all changes in operating property used wholly or partly in electric operations by means

of a work order or job order system. Such work orders and supporting records shall be permanently preserved. The work order system shall include a work order estimate and a work in progress record, and shall contain the particulars described below.

(b) All installations, additions, retirements, or replacements shall be covered by a work order estimate and a work in progress record. Standing work orders may be used for projects of less than \$1,000 by Class A utilities and for projects of less than \$500 by Class B utilities. These limits may be modified by special order of the commission when warranted by particular circumstances.

(c) The work order estimate shall include the following particulars:

(1) A designation number or letter and the signature of the officer or employee who authorized the work or purchase. If authorization is by a board of the operating or lessor municipality or other body, the proper officer shall so state over his signature.

(2) A description and the location of the work to be done (or the purchase to be made), the dates between which such work (or purchase) is to be accomplished, the date when the work was begun, and the date when finished.

(3) Detailed estimates of the cost of the project, together with maps, plans, diagrams, specifications, etc., applicable.

(4) The account or accounts to which the cost of the project is chargeable and the amount chargeable to each account.

(5) Any variations between estimates and actual costs of the project.

(6) When a retirement, replacement, betterment, or rearrangement of property is involved, the work order estimate shall show or refer to other records which cover the book cost (estimated if not known, and the basis of the estimate to be stated) and the date of installation of the property withdrawn, enlarged, rearranged, improved, or replaced, and the name and page of the accounting and engineering books and records covering such installation and the cost thereof. If a work order system was in use at the time such property was installed, reference thereto shall be made by number or other designation.

(d) The work in progress record shall contain the following particulars:

(1) A designation number or letter which shall correspond to the number or letter on the work order estimate covering the same project. When more than one such work in progress record covers the work on a work order estimate, each shall be numbered or lettered in such manner as to be readily identifiable with the work order estimate for the same project.

(2) The accumulated charges applicable to each particular job or project separately for each of the items set forth in subdivision (e) of section 197.21, and the total cost of the completed project. The cost of dismantling and the salvage realized shall also be shown. When any project involves charges to more than one operating property account, a separate work in progress record shall be kept for the work chargeable to each account. Every charge or credit on work in progress records shall refer to the voucher, journal, or other source from which the entry therein was made.

(3) Full details at any time of the amount carried in account 110, Construction Work in Progress. The cost of completed projects shall be promptly transferred from that account to the accounts to which chargeable. Upon coming into service, completed portions involving additions to operating property accounts shall be transferred to the appropriate accounts although other portions of the work covered by the same work order are not yet completed and the work order has not been closed. Credits for such transfers shall be made in separate columns.

Note A: Requirement of the use of the work order system here outlined may be suspended by order of the commission in the case of a utility which satisfies the commission that the system which it has in use for recording changes in operating property accounts gives the equivalent detail by accounts in substantially the same form. The identification of expenditures with property must be complete and clear, and the detail of the cost of each project or job (see § 197.21 (e) (1-10)) must be readily available. The total of the uncompleted projects must also be in agreement with account 110, Construction Work in Progress.

Note B: The work order system is required to record changes in Operating Property--Electric and Operating Property--General. Its use is recommended, however, for recording other expenditures, such as for operating property in other departments, repairs, etc. When used for repairs, balances applicable thereto shall be cleared monthly to the appropriate accounts.

FIXED ASSETS

101-109. Operating Property

A. Accounts representing operating property shall include the cost (see ò 197.21) of property which has an expected life in service of more than one year which is used (see ò 196.1, subd. (a) (43)) in operations, or which, in the case of electric operating property, is leased to others for electric operations. Separate accounts shall be maintained for each operating department subject to the jurisdiction of this commission, and separate subdivisions shall be maintained for electric operating property constituting a distinct operating unit leased to others for electric operations when the lessee has exclusive possession (see ò 197.28); for electric operating property jointly owned; and for electric operating property operated under joint agreement. If the utility has two or more operating departments subject to the jurisdiction of the commission, operating property which is not assignable to a particular department or class of service may be carried in accounts corresponding to those prescribed for electric operating property under an account having the title Operating Property--General.

B. Separate subdivisions hereunder shall be maintained for the book cost of each separate plant owned or operated. (See ò 197.30.)

C. Gas operating property shall be accounted for as prescribed in the Uniform System of Accounts for Gas Corporations.

Note A: The cost of additions to and betterments of property leased from others shall be recorded in the operating property accounts, but they shall be maintained in subdivisions entirely separate and distinct from those relating to owned property. (See ò 197.17.)

Note B: For treatment of operating property paid for out of general funds, see sections 197.20 and 197.33.

110. Construction Work in Progress

This account shall include the cost of construction projects not ready for service at the date of the balance sheet. It shall include all elements of cost as set forth in paragraphs (1) to (10) of subdivision (e) of section 197.21. The detail thereof shall be as provided in section 197.38.

112. Non-operating Property

This account shall include the cost to the utility of physical property other than that used in connection with its several operating departments subject to the jurisdiction of the commission and which is described in paragraph (27) of subdivision (a) of section 196.1.

Note: Electric property and equipment leased to others for electric operations shall be retained in operating property.

INVESTMENTS

113. Loans to Operating Municipality

This account shall include notes, loans, and advances to the operating or lessor municipality when they are subject to repayment but are not subject to current settlement; and interest accrued on notes and advances included in this account when such interest is not subject to current settlement.

Note: Advances to the operating or lessor municipality which are not subject to repayment shall be included in account 280, Contributions--Operating Municipality; those subject to current settlement shall be included in account 124, Receivables from Operating Municipality.

114. Miscellaneous Investments

A. This account shall include the cost (except as otherwise provided hereunder) of the utility's investment in securities, if such securities are not included in any special fund account; of long term special deposits (see note B under account 129, Special Deposits); and any other investments not elsewhere provided for. The account shall be kept so as to show separately for each investment, the amount and detail of each class of securities held.

B. When investments carried in this account depreciate in value and the change is considered by the utility to be of long duration, the amount at which they are carried on the books shall be reduced to their fair current value by credits to this account and concurrent charges to account 514, Miscellaneous Debits to Surplus.

C. When securities with a fixed maturity date are purchased at either

a discount or a premium, such discount or premium may be amortized over the remaining life of the securities as provided in section 197.8.

Note A: Securities pledged shall be shown separately from securities unpledged.

Note B: Securities borrowed by the utility and pledged shall not be included in this account.

115. Sinking Funds

A. This account shall include the following items when held by trustees or other fiscal agents in charge of sinking funds, or by the utility itself when they are segregated in a distinct fund, for the purpose of redeeming outstanding obligations:

(1) Cash

(2) Securities of others (including those issued by the operating or lessor municipality which are not included in the liability accounts of the municipal electric utility), or other assets, at cost except as otherwise provided herein

(3) Live securities, issued or assumed by the utility, at cost

(4) Amounts deposited with trustees on account of mortgaged property sold, when held for the redemption of securities

B. A separate subdivision shall be kept for each fund, the title of which shall designate the obligation in support of which the fund was created.

C. When securities of others, with a fixed maturity date, are purchased for the sinking fund at either a discount or a premium, such discount or premium may be amortized over the remaining life of the securities as provided in section 197.8.

Note A: Should the constituents of a sinking fund change substantially in value and such change be considered by the custodian to be of long duration, it may be reflected by suitable entries in this account and in the corresponding reserve account or in Surplus, as may be appropriate.

Note B: Sinking funds which are set up in accordance with provisions of Section 127 of the Village Law shall be included in the account herein appropriate to the purpose for which such fund has been created; for example, if a sinking fund is set up to provide for replacement of depreciable property, it shall be included in account 116, Depreciation Fund; if for employees' pensions, it shall be included in account 117, Miscellaneous Special Funds.

116. Depreciation Fund

A. This account shall include the amount of cash and the cost (except as otherwise provided hereunder) of securities of others (including those issued by the operating or lessor municipality which are not

included in the liability accounts of the municipal electric utility), and other current assets which have been specifically set aside for the purpose of providing a fund for the replacement of units of depreciable property.

B. When assets carried in this fund depreciate in value and the change is considered by the utility to be of long duration, the amount at which they are carried on the books shall be reduced to their fair current value by credits to this account and concurrent charges to account 514, Miscellaneous Debits to Surplus.

C. When securities with a fixed maturity date are purchased for the depreciation fund at either a discount or a premium, such discount or premium may be amortized over the remaining life of the securities as provided in section 197.8.

117. Miscellaneous Special Funds

A. This account shall include the amount of cash and the cost (except as otherwise provided hereunder) of securities of others (including those issued by the operating or lessor municipality which are not included in the liability accounts of the municipal electric utility), and other assets in insurance, employees' pension, savings, relief, hospital, and other funds which have been raised and specifically set aside or invested for purposes not provided for elsewhere. A separate subdivision shall be provided for each fund.

B. When assets carried in these funds depreciate in value and the change is considered by the utility to be of long duration, the amount at which they are carried on the books shall be reduced to their fair current value by credits to this account and concurrent charges to account 514, Miscellaneous Debits to Surplus.

C. When securities with a fixed maturity date are purchased for special funds at either a discount or a premium, such discount or premium may be amortized over the remaining life of the securities as provided in section 197.8.

CURRENT ASSETS

121. Cash

This account shall include the amount of current funds available for use on demand in the hands of financial officers and agents, in offices, or deposited in banks or with trust companies; and cash in transit.

Note: Checks shall be carried in this account only pending the next deposit in the usual course of business following their receipt; otherwise they shall be carried as accounts receivable.

122. Working Funds

This account shall include amounts advanced to officers, agents,

employees, and others as working funds from which certain expenditures are to be made and accounted for.

123. Materials and Supplies

A. This account shall include the cost of unissued small tools and of all unapplied material and supplies, including tools, repair parts, fuel, etc. The cost shall include the purchase price at the point of free delivery plus customs duties, excise taxes, and the cost of transporting to the storeroom, including loading and unloading. When the cost of transportation is small relative to the purchase price and can not be readily assigned, it may be charged to account 802, Stores--Clearing. Cash and other discounts shall be deducted, when practicable, in determining the cost of the particular material to which they relate or shall be credited to the account to which the material is charged. Discounts which can not be so handled shall be credited to account 802, Stores--Clearing. (Utilities in Class D, see also account 785.2,

Miscellaneous General Expenses.)

B. When any materials or supplies the cost of which has been charged to this account are issued for use, the amount at which they stand charged herein shall be credited to this account and charged to the appropriate construction, operating expense, or other account. Such amount may be based upon the average cost of all items of a given type included in this account at the beginning of the month.

C. Materials recovered in connection with construction, maintenance, or the retirement of property shall be charged to this account as follows:

(1) Re-usable materials consisting of large individual items, such as parts of structures or machinery, shall be included in this account on the basis of original cost, estimated if not known. The cost of repairing such items shall be charged to the appropriate expense account as indicated by previous use.

(2) Re-usable materials consisting of relatively small items the identity and original cost of which (from date of original installation to the final abandonment or sale thereof) can not be maintained without excessive cost of handling and undue refinement in accounting, shall be included in this account upon the basis of current prices new for such items. The cost of repairing such items shall be charged to the appropriate expense account as indicated by previous use.

(3) Scrap and non-usable materials shall be carried at the estimated salvage value. So far as practicable the difference between the amounts realized and the amounts at which the materials are carried in this

account shall be adjusted in the depreciation reserves, repair accounts, or other accounts which were credited when the materials were charged to this account.

D. Subdivisions of this account shall be maintained so that it will be possible to show materials and supplies which are held primarily for use in electric operations, those held for merchandise operations (see note C below), those held primarily for use in other classes of operations, those held for sale, and those which because of their nature can not be identified with any one of the four foregoing purposes.

Note A: Interest charged on material bills, the payment of which is delayed, shall be charged to account 452, Miscellaneous Interest Deductions.

Note B: Inventories of materials and supplies shall be taken at intervals of one year or less, and the necessary adjustment shall be made to bring this account into harmony with the actual inventory. In effecting this adjustment, differences which may practicably be assigned to important classes of materials shall be equitably distributed among the accounts to which such classes of materials are ordinarily chargeable. Other differences shall be equitably apportioned among the accounts to which materials have been charged since the last inventory, or carried to account 802, Stores--Clearing. (Utilities in Class D, see also account 785.2, Miscellaneous General Expenses.)

Note C: The cost of merchandise carried in stock for the purpose of sale shall be carried in a separate subdivision of this account. Appliances held under consignment shall not be included herein, but there shall be kept a memorandum account of such appliances either at cost or at selling price, to show the appliances in stock and appliances sold. Materials and supplies to be used in jobbing operations need not be separately shown.

Note D: The cost of line transformers and consumers' meters may be carried in this account until their initial installation, but thereafter shall be excluded from this account and carried in the appropriate operating property account.

124. Receivables from Operating Municipality

This account shall include all obligations from the operating or lessor municipality which are subject to current settlement, such as current balances on open accounts, notes, drafts, etc.; also interest thereon.

Note A: Loans and advances which are not subject to current settlement shall be included in account 113, Loans to Operating Municipality, if subject to repayment; if not subject to repayment, they shall be

included in account 280, Contributions--Operating Municipality.

Note B: Balances in this account may be netted with balances in account 241, Payables to Operating Municipality, if such items are netted in settlement, but not otherwise.

125. Accounts Receivable

A. This account shall include amounts owing by consumers and by other debtors (except the operating or lessor municipality), against each of which there is a debit balance representing current transactions. It shall include amounts owing for electricity, merchandise, wiring or other jobbing work; accounts and claims upon which responsibility is acknowledged by concerns or individuals; amounts owing by public authorities other than the operating or lessor municipality; amounts of collectible judgments; and amounts owing by electric companies. This account does not include negotiables. (See § 197.4.)

B. This account shall be subdivided as follows:

- (1) General Consumers
- (2) Merchandise and Jobbing
- (4) Electric Companies including other Municipal Electric Utilities
- (5) Public Authorities (other than the Operating Municipality)
- (6) Officers and Employees (except items which are includible under subdivisions (1) and (2) which are settled currently)
- (7) Others
- (8) Unbilled Service Rendered

Note A: The amount to be reported under this account shall be the sum of all debit balances, not the net balance between this account and account 242, Accounts Payable.

Note B: This account shall not include cash in the hands of employees or representatives charged with the collection or custody of current revenues; nor amounts advanced to officers, employees, or others as working funds.

Note C: In annual reports to the commission the utility may be required to submit an analysis of this account showing separately for each of the above groups the length of time for which balances have been carried in individual accounts.

126. Notes Receivable

This account shall include the amount of notes and bills receivable which are the property of the utility and which by their terms do not run for a period in excess of one year, upon which concerns or individuals other than the operating or lessor municipality are liable. This includes demand notes, drafts, etc., issued by others than banks, and time notes, drafts, etc., by whomever issued.

127. Interest and Dividends Receivable

This account shall include the amount of current interest accrued to the date of the balance sheet on bonds, mortgages, notes, and other commercial paper owned, on loans made, open accounts, bank deposits, etc., and the amount of dividends receivable on stocks owned. (See § 197.4.)

Note A: Interest which is not subject to current payment and interest accrued on receivables from the operating or lessor municipality shall be included in the account in which is carried the principal on which the interest accrued.

Note B: No interest on securities issued or assumed by the utility shall be included in this account.

128. Prepayments

This account shall include the balances representing payment of items in advance of their accrual, the benefit of which is to be realized subsequent to the time of such payment. Entries shall be made each month transferring from this account to the appropriate accounts the portion of each prepayment which is applicable to that month. The account shall be kept so that there can be determined readily the amounts applicable to the following:

- (1) Taxes and Licenses
- (2) Insurance
- (3) Interest
- (4) Rents
- (5) Miscellaneous

129. Special Deposits

This account shall include the balances of short term deposits of moneys and bank credits in the hands of fiscal agents or others for special purposes. This includes cash deposited with Federal, State, or municipal authorities as a guaranty for the fulfilment of obligations; and deposits in lieu of mortgaged property sold if such deposits are refundable when equivalent property is acquired. Entries to this account shall specify the purposes for which the deposit is made. When such purposes are satisfied through expenditure of funds or otherwise so that the deposit is released, this account shall be credited with the amount of the deposit.

Note A: This account shall not include any assets available for general utility purposes.

Note B: Deposits for more than one year not offset by current liabilities shall not be charged to this account but to account 114, Miscellaneous Investments.

131. Miscellaneous Current Assets

This account shall include all current and accrued assets not includible under any of the foregoing accounts. (See ò 197.4.)

DEFERRED DEBITS

141. Unamortized Debt Discount and Expense

This account shall include the total of the net debit balances representing the excess of the discount and expense over the premium in connection with the issuance of each class of the utility's long term debt. Separate subdivisions shall be maintained in respect of each issue of obligations. (See ò 197.9.)

Note: All or any part of such discount and expense may, if desired, be amortized more rapidly through charges, either at time of issuance or later, to account 514, Miscellaneous Debits to Surplus.

143. Suspense to be Amortized

A. This account shall include losses in service value of property retired from causes for which provision has not been made in the depreciation reserves and losses from retirements which could not reasonably have been foreseen and provided for. (See ò 197.23, subd. (f) and account 789, Deferred Retirement Losses.) The utility's application for permission to make such use of this account shall give full particulars concerning the property retired, the reason for which it is retired, the amounts provided in respect thereto in the depreciation and amortization reserves, the amount chargeable to this account, and the period over which, in its judgment, such amount should be distributed.

B. This account shall also include any excess cost to the utility of property purchased over the amount which is determined by the commission to be the difference between (1) the amount chargeable to Operating Property--Electric or Operating Property--General, and (2) the accrued depreciation and amortization related thereto at the date of acquisition. (See also ò 197.27.)

C. This account shall also include other debit items which are subject to amortization by order of the commission.

D. Charges shall be made to this account only upon order of the commission and shall be written off over such period and in such manner as the commission may by order prescribe.

Note: This account shall be kept so as to show separately the nature and balance of each item included herein.

144. Clearing Accounts

A. This account shall include the balances in accounts (801 to 808) maintained to carry temporarily the cost of operating and maintaining such facilities as office buildings, storehouses, transportation

structures and equipment, shops, etc.; such overhead or burden costs as it is desirable to apportion to the construction, operating, and other accounts involved; and charges by the operating municipality.

B. Balances in these accounts shall be fully cleared not later than the end of the fiscal year unless items therein unquestionably relate to a future period, except that items incurred in the last month of the year may be carried over to be cleared in the first month of the next year.

145. Miscellaneous Suspense

This account shall include all debit balances (other than those provided for in accounts 141 to 144 and 146) in suspense accounts that can not be entirely cleared and disposed of until additional information is received. This includes cost of jobbing work unbilled (see § 197.15); amounts on deposit with banks which have failed, pending determination of loss; amounts paid for options pending final disposition; expenditures for plans and investigations made for determining the feasibility of projects under contemplation, pending further disposition; and expenditures for valuations, inventories, and appraisals made in connection with the contemplated purchase or sale of property.

Note: This account shall be kept so as to show separately the nature and balance of each major item included herein.

146. Regulatory Commission Suspense

A. This account shall include all expenses incurred by the utility in connection with formal cases before Federal or State regulatory commissions, or other regulatory bodies, or cases in which such a body is a party. This includes such items as:

(1) Fees, retainers, and expenses of counsel, solicitors, attorneys, accountants, engineers, clerks, attendants, witnesses, and others whose services are secured for the defense or prosecution of proceedings, petitions, or complaints presented to regulatory bodies.

(2) The pay of officers and employees specifically assigned to or engaged in the valuation of property owned or used by the utility, in connection with such cases, and the cost of similar work performed by others.

(3) Office and traveling expenses; stationery, printing, and engineering supplies; and other expenses and supplies including expenses of officers and employees upon matters covered by this account even though no portion of their pay is assignable hereto.

B. Amounts charged hereto shall be distributed to other accounts only over such period and in such manner as the commission may by order

prescribe.

C. No debits for any expenditures described in paragraph A hereof shall be made to any other account in this system of accounts except by clearing through this account.

Note: Expenses incurred for the improvement of service, additional inspection, or rendering reports, which are made necessary by the rules and regulations, or orders, of regulatory bodies, shall be charged to appropriate operating expense accounts.

COMPANY SECURITIES OWNED

151. Reacquired Securities

A. When securities have been actually issued (see § 196.1, subd. (a) (2)) by the utility (or after such issuance by another debtor have been assumed by the utility) and after such issuance (or assumption) have been reacquired by the utility and are neither retired nor properly includible in sinking or other funds, they shall be charged at face value to this account.

C. Suitable entries shall be made to eliminate from related discount and premium accounts any amounts applicable to the particular securities reacquired, and any further differences between the price at which the securities have been reacquired and the amount chargeable to this account shall be adjusted through Surplus.

D. Subdivisions shall be maintained under this account for each class of reacquired securities.

Note: This account shall not include securities that are merely guaranteed by the utility.

DEFICIT

161. Deficit

The debit balance, if any, in Surplus shall be shown under this title. (See § 197.32.)

LONG TERM DEBT

231. Bonds

A. This account shall include the face value of unmatured bonded debt issued by the municipal electric utility and not retired and canceled, including all bonds issued by the operating or lessor municipality the proceeds of which were used (or are specifically set aside to be used) to acquire property or pay expenses included in these accounts; of similar unmatured bonds of others, the payment of which has been assumed by the utility; and of bonds so issued or assumed the maturity of which has been extended by specific agreement.

B. This account shall show the amount of bonded debt of each class for which the municipal electric utility is liable for repayment separately

from the amount for which the operating or lessor municipality is liable.

C. The obligations included herein shall be recorded so as to show the amount of each issue of bonds within each class of bonded debt.

D. A separate subdivision shall be maintained for each class of bonds, and no two issues of bonds shall be considered to be of the same class unless identical as to nature of security, rate of interest, interest dates, and date of maturity, except that parts of any bonded debt issue agreeing in other characteristics but maturing serially may be treated as being of the same class. The title of each subdivision shall show the essential characteristics of the bonds covered.

232. Equipment Obligations--Long Term

A. This account shall include the face value of unmatured obligations having a life of more than one year from date of issuance (or in case of notes maturing serially, a series any part of which matures more than one year from date of issuance), which are secured by lien on specific equipment. This includes equipment bonds, equipment notes, chattel mortgages, and other obligations for which equipment is pledged as security or is held under a "conditional sales agreement."

B. A separate subdivision shall be maintained for each class of long term equipment obligations, and no two issues shall be considered to be of the same class unless identical as to nature of equipment covered, rate of interest, interest dates, and date of maturity, except that parts of any issue agreeing in other characteristics but maturing serially may be treated as being of the same class.

233. Miscellaneous Long Term Debt

This account shall include all long term debt of the municipal electric utility not otherwise provided for, including that issued by the operating or lessor municipality the proceeds of which were used (or are specifically set aside to be used) to acquire property or pay expenses included in these accounts. This covers such items as real estate mortgages executed or assumed, assessments for public improvements, notes and unsecured certificates of indebtedness, receipts outstanding for long term debt, and other obligations maturing more than one year after date of issuance or assumption by the utility.

Note: Separate subdivisions shall be maintained for each class of obligations included in this account, and records shall be maintained to show separately for each issue all details as to date of issuance, date of maturity, interest dates and rates, security for obligation, etc.

CURRENT AND ACCRUED LIABILITIES

241. Payables to Operating Municipality

This account shall include all credit balances on open accounts, notes, and drafts owing to the operating or lessor municipality which are subject to current settlement.

Note A: Liabilities to the operating or lessor municipality which are not subject to current settlement and those which are not subject to repayment shall be included in account 280, Contributions--Operating Municipality.

Note B: Balances in this account may be netted with balances in account 124, Receivables from Operating Municipality, if such items are netted in settlement, but not otherwise.

242. Accounts Payable

This account shall include the amount of current vouchers, accrued payrolls, and accounts owing to creditors other than the operating or lessor municipality.

243. Notes Payable

A. This account shall include the face value of outstanding obligations in the form of notes, drafts, and acceptances, including equipment obligations and other similar evidences of indebtedness, which are not payable to the operating or lessor municipality and which by their terms do not run for a period in excess of one year.

244. Consumers' Deposits

This account shall include the amounts deposited with the utility by consumers as security for the payment of bills. Deposits refunded shall be charged to this account, and amounts applied to uncollectible or worthless bills shall be credited to the account of the consumer involved and charged to this account.

245. Matured Interest

This account shall include the amount of matured and unpaid interest on debt of the utility except when such interest is added to the principal. (See accounts 241 and 249.)

246. Matured Long Term Debt

This account shall include the face value of long term debt matured and unpaid without specific agreement for extension of the time of payment, including unrepresented bonds called for redemption.

248. Taxes Accrued

This account shall be credited each month with the amount of taxes actually payable which accrued during the month, with concurrent debits to the appropriate accounts for tax charges. As credits to this account will necessarily be based upon estimates, they shall be adjusted from time to time during the year so that the tax charge accounts may show, as nearly as possible, the taxes actually payable and applicable to the

year. Payments of taxes for which accruals have been made shall be debited to this account.

Note A: The utility shall keep subdivisions of this account for each kind of tax.

Note B: Instead of keeping this account, utilities in Classes C and D may charge taxes to account 403, Taxes--Electric, or other appropriate account, as payments are made.

249. Interest Accrued

A. This account shall include the amount of interest accrued to the date of the balance sheet, but not payable until after that date, on all indebtedness of the utility or of the operating or lessor municipality for which the utility is liable, except interest which is added to the principal. When interest is paid it shall be charged to this account and credited to cash or other suitable account. Records shall be kept so as to show separately for each item of indebtedness the interest accruals thereon.

B. When interest matures without being paid, it shall be charged to this account and credited to account 245, Matured Interest. Payments to trustees (or other agents of the holders of bonds or other securities) of the interest accrued thereon, which operate under the terms of the securities (or of mortgages supporting such securities) as a release from further liability for such interest, shall be considered equivalent to payments of interest made directly to bondholders.

Note: Interest accrued upon any judgment against the utility shall not be credited to this account, but to the account to which judgment stands credited.

251. Advance Billing and Payments

This account shall include the amount of advance billing which is to be credited to revenue accounts in future months, and advance payments for service (but not contributions for extensions) made by prospective consumers prior to the establishment of service. Amounts included in this account shall be credited to the appropriate revenue accounts in the month in which the service is rendered, or cleared from this account as refunds are made.

252. Miscellaneous Current Liabilities

This account shall include all current and accrued liabilities not includible in any of the foregoing accounts. (See § 197.5.)

RESERVES

261. Depreciation Reserves

A. This account shall be concurrently credited with amounts charged to operating expenses, clearing accounts, account 432, Deductions from Rent

Revenues--Electric, or account 435, Deductions from Rent Revenues--Other Operations, for currently accruing depreciation (see § 196.1, subd. (a) (13)) of operating property (see also § 197.7). It shall also be credited with any amounts which the utility may charge to account 514, Miscellaneous Debits to Surplus, or transfer to this account for depreciation accrued but not provided for prior to the effective date of this system of accounts.

B. At the time of retirement of depreciable operating property this account shall be charged with the book cost of the property retired and the cost of removal, and shall be credited with the salvage value (see § 196.1, subd. (a) (37)) and amounts recovered as insurance or otherwise. It shall be credited with amounts chargeable upon order of the commission to account 143, Suspense to be Amortized as provided in subdivision (f) of section 197.23.

C. This account shall be subdivided so as to show separately the amount applicable to each operating department.

D. For ledger and balance sheet purposes the depreciation reserves applicable to Operating Property--Electric and Operating Property--General, respectively, shall be regarded and treated as single composite reserves. For purposes of analysis, however, each utility shall maintain subsidiary records in which each of these reserves is broken down into component parts corresponding to the classes, or subdivisions thereof, of depreciable property (see § 197.7, subd. (c)). These subsidiary records shall show the current credits and debits to the reserves by such classes, or subdivisions thereof, of depreciable electric property in sufficient detail to show separately for each class (1) cost of operating property retired, (2) cost of removal, (3) salvage, (4) other items, including recoveries from insurance.

E. When transfers of operating property are made from one operating department to another or from or to non-operating property, the accounting shall be as provided in section 197.34.

Note: The utility is restricted in its use of the reserve to the purposes set forth above. It shall not divert any portion of the reserve to Surplus or make any other use thereof without the approval of the commission.

262. Amortization Reserves

A. This account shall be credited with such amounts as are concurrently charged to account 790, Amortization of Intangible Property, or other appropriate account for the amortization of leaseholds, water rights, franchises, consents, licenses, privileges, patents, and other intangible property having a terminable life, and for

losses expected to be incurred through the reversion of improvements on leased property to the lessor prior to the expiration of their service lives. (See § 197.7, subd. (b) (2).)

B. This account shall be concurrently credited with amounts charged to account 514, Miscellaneous Debits to Surplus, to provide a reserve for the amortization of intangible property which does not have a terminable life.

C. When any water right, leasehold, franchise, consent, privilege, or patent expires, is sold or relinquished, or is otherwise retired from service, this account shall be charged with the amount previously credited hereto in respect of such property. The difference between the proceeds realized and the book value (see § 196.1, subd. (a) (6)) of the property retired shall be charged or credited to account 790, Amortization of Intangible Property.

D. Records shall be maintained so as to show separately the balances applicable to each item of intangible property which is being amortized.

E. This account shall be credited with such amounts as are necessary to reflect, as of the effective date of this system of accounts, the expired portion of the life of franchises, consents, patent rights, leaseholds, easements, rights of way, and other interests in land, or other intangible property which has a terminable life, the cost of which is included in operating property. To the extent that provision has not previously been made, the amounts credited to this reserve shall be concurrently debited to Surplus.

Note: The utility is restricted in its use of the reserve to the purposes set forth above. It shall not divert any portion of the reserve to Surplus or make any other use thereof without the approval of the commission.

263. Contributions for Extensions

A. This account shall include contributions to the utility by consumers, governmental bodies other than the operating or lessor municipality, or organizations, of property the cost of which is included in Operating Property--Electric or Operating Property--General, or of money or labor connected directly or indirectly with the construction or acquisition of such property, made for the purpose of establishing or extending the service rendered by the utility or for any other purpose. The records shall be kept so that the amount of the contribution and description of property to which it specifically relates will be readily available.

B. This account shall include any contributions or payments made by consumers in connection with the installation of services the cost of

which is included in operating property.

C. Debits (other than correction of errors) shall be made to this account only when contributions are repaid.

Note A: Advances or loans upon which interest is paid shall not be included in this account.

Note B: Operating property paid for from funds advanced by governmental bodies, of which a portion or all is not subject to repayment, shall be included in operating property accounts at the full cost of the property so acquired, and the portion of the advances not to be repaid shall be included in this account.

264. Insurance Reserve

A. This account shall include amounts reserved by the utility, in case it does not carry insurance, for losses through accident, fire, flood, or other hazards to its own property or property leased from others. The amounts charged to account 783.1, Insurance, or other appropriate accounts to cover such risks shall be credited to this account. A schedule of risks covered by this reserve shall be maintained, giving a description of the property involved and the character of the risks covered and the rates used.

B. Charges shall be made to this account for the cost to the utility of repairing damaged property owned or leased from others, the cost to the utility of replacing damaged or destroyed property leased from others, and the book value (see § 196.1, subd. (a) (6)) of the utility's property destroyed or so badly damaged as to require its retirement.

Note: All repairs shall be charged in the first instance to the account appropriate for the repair, and all retirements shall be charged to account 261, Depreciation Reserves, to which account shall be credited amounts chargeable to this account. (See § 196.2 (a).)

265. Injuries and Damages Reserve

A. This account shall be credited with amounts charged to account 783.2, Injuries and Damages, or other appropriate account, to meet the probable liability, not covered by insurance, for deaths or injuries to employees and others, and for damages to property not owned or held under lease by the utility.

B. When liability for any injury or damage is admitted by the utility either voluntarily or because of the decision of a court or other lawful authority, such as a workmen's compensation board, the amount awarded shall be charged to this account. If such a liability is to be discharged over a period in excess of one year, the amount thereof shall be credited to account 233, Miscellaneous Long Term Debt; if payment is to be made in less than one year, to account 252, Miscellaneous Current

Liabilities.

Note A: The utility shall keep records supporting entries to this account so that it can furnish full information as to the nature and amount of each charge hereto.

Note B: Recoveries or reimbursements from others shall be credited to this account; cost of repairs to property of others shall be charged to this account. The accounting for repairs and replacements of property leased from others shall be as provided in paragraph B of account 264, Insurance Reserve, and note thereunder.

266. Reserve for Uncollectible Accounts

A. This account shall be credited each month with amounts reserved for losses on accounts receivable which may become uncollectible. Concurrent charges shall be made to account 404, Uncollectible Revenues--Electric, for amounts applicable to electric operations; to corresponding accounts for other operations subject to the jurisdiction of the commission; and to account 449, Non-operating Revenue Deductions, for similar provision for non-operating revenue.

B. This account shall be subdivided as follows:

- (1) General Consumers--Electric
- (2) Merchandise and Jobbing--Electric
- (4) Other Operations (separately for each operating department)
- (5) Others

C. Losses from uncollectible accounts shall be charged, and collections of accounts previously written off shall be credited, to the appropriate subdivision.

267. Miscellaneous Reserves

This account shall include amounts reserved by the utility for purposes which are not provided for in any of the preceding reserve accounts, including amounts reserved for depreciation of non-operating property.

Note: A separate subdivision shall be set up in respect of each such reserve, and the utility may be required to show a complete analysis thereof in its annual reports to the commission.

DEFERRED CREDITS

271. Unamortized Premium on Debt

This account shall include all credit balances representing the excess of the premium over the discount and expense in connection with the issuance of each class of the utility's long term debt. Separate subdivisions shall be maintained in respect of each issue of obligations. (See § 197.9.)

Note: If in connection with an individual issue of debt the expenses

incurred exceed the premium realized, the net debit balance shall be carried in account 141, Unamortized Debt Discount and Expense.

272. Miscellaneous Unadjusted Credits

This account shall include the credit balances in suspense accounts that can not be entirely cleared and disposed of until additional information is received.

Note: Subdivisions shall be maintained for each class of items carried under this account.

SURPLUS

280. Contributions--Operating Municipality

A. The balance in this account shall represent the net contributions, whether in cash, property, or services, made to the municipal electric utility by the operating or lessor municipality or vice versa, from the date when the first expenditures in connection with the municipal electric utility were incurred to the date of the balance sheet. (See also § 197.33.) If the balance is a debit it shall be shown in the short column and below it the balance in account 281, Surplus, and the net figure shall be carried to the liability side of the balance sheet.

B. There shall be credited to this account amounts of cash received from the general fund of the operating or lessor municipality (other than payments for property or services, or repayment of loans) not includible in account 241, Payables to Operating Municipality, for which liability for repayment is not set upon the books of the municipal electric utility; the original cost of property purchased from general funds, of which the municipal electric utility makes sole or major use and the cost (see § 197.33) of any services rendered to the municipal electric utility by the operating or lessor municipality or by any department thereof, less any amounts paid for such services.

C. This account shall be debited with cash payments made by the municipal electric utility to the operating or lessor municipality (other than payments for property or services, loans or repayment of loans); with the fair present value of property transferred from the municipal electric utility to the operating or lessor municipality; and with the cost (see § 197.33) of service rendered to the operating or owning municipality less any amounts received as payment for such services.

D. The balance in this account as of the effective date of this system of account shall be determined and journal entries setting up such balances shall be filed with the commission as provided in section 197.33.

281. Surplus

The credit balance, if any, in Surplus shall be shown under this title. (See § 197.33.)

OPERATING PROPERTY ACCOUNTS

- 301. Organization
- 302. Franchises and Consents
- 303. Miscellaneous Intangible Property
- 311. Land
- 312. Structures
- 321. Boiler Plant Equipment
- 322. Engine Driven Generator Units--Steam
- 323. Turbo-Generators--Steam
- 324. Accessory Electric Equipment--Steam
- 325. Miscellaneous Power Plant Equipment--Steam
- 331. Reservoirs, Dams, and Waterways
- 332. Roads, Trails, and Bridges
- 333. Water Wheels, Turbines, and Generators
- 334. Accessory Electric Equipment--Hydro
- 335. Miscellaneous Power Plant Equipment--Hydro
- 342. Engine Driven Generator Units--Internal Combustion
- 344. Accessory Electric Equipment--Internal Combustion
- 345. Miscellaneous Power Plant Equipment--Internal Combustion
- 351. Transmission Roads and Trails
- 352. Transmission Substation Equipment
- 353. Transmission Overhead Conductors
- 354. Transmission Underground Conductors
- 358. Poles, Towers, and Fixtures
- 359. Underground Conduits
- 361. Distribution Substation Equipment
- 362. Storage Battery Equipment
- 363. Distribution Overhead Conductors
- 364. Distribution Underground Conductors
- 365. Line Transformers
- 366. Overhead Services
- 367. Underground Services
- 368. Consumers' Meters
- 369. Consumers' Meter Installation
- 370. Other Property on Consumers' Premises
- 371. Street Lighting and Signal System Equipment
- 381. Office Equipment
- 382. Stores Equipment
- 383. Shop Equipment

- 384. Transportation Equipment
- 385. Communication Equipment
- 386. Laboratory Equipment
- 387. General Tools and Implements
- 388. Miscellaneous General Equipment
- 391. Miscellaneous Tangible Property
- 392. Undistributed Operating Property
- 301. Organization

A. This account shall include expenditures in connection with the organization of the municipal electric utility, including expense of any special election at which the enterprise was approved.

B. Expenditures incidental to such elections relating to proposed extensions of the plant and service shall be included herein only if the extensions are authorized.

302. Franchises and Consents

A. This account shall include amounts actually paid to the State or any political subdivision thereof, except the operating or lessor municipality, or to the Federal government in consideration of franchises, consents or certificates running in perpetuity or for a specified term of more than one year, together with necessary reasonable expenses incident to procuring such franchises, consents, or certificates of permission and approval.

B. If a franchise, consent, or certificate is acquired by assignment, the charge to this account must not exceed the amount actually paid therefor by the utility to the assignor nor the amount actually paid to the grantor thereof (see Public Service Law, § 69) plus the expense of acquisition to the assignee. (See § 197.27.)

C. When any franchises or consents have expired, credits to this account shall be made representing the amounts at which such items (including expenses of acquisition) are carried herein.

Note: This account shall not include periodic or other regularly recurring payments made to any political subdivision for the right to operate within its boundaries.

303. Miscellaneous Intangible Property

A. This account shall include the cost (see § 197.21) of patent rights, licenses, privileges, and other intangible property necessary or valuable to the economical conduct of electric operations and not specifically assignable to any other account.

B. The records supporting the entries to this account shall be kept so that the utility can furnish information as to each intangible item of property charged hereto, the principal from whom it was acquired and the

agents who represented such principal, and the term of the life of each item.

C. When any item of intangible property expires or is canceled, this account shall be credited with such amounts as may be included in respect thereto.

311. Land

A. This account shall include the cost (see § 197.21), including the amount of mortgages or other liens assumed, of land or interest in land used in electric operations, having a life of more than one year. This includes the first cost of acquiring leaseholds of land, easements, water rights, water diversion rights, and rights of way, but not rents payable periodically in consideration of rights so obtained. Water rights include rights of pondage, flowage, or submersion.

B. The cost of buildings and other improvements or of leaseholds of structures or equipment shall not be included in this account. If at the time of acquisition of an interest in land it extends to buildings or other improvements thereon which are used in electric operations, such improvements (except as provided in § 197.27) shall be appraised at their fair cash value for use in such operations. The appraised value shall be excluded from this account and charged to the appropriate subdivisions of account 312, Structures. If the improvements are removed or wrecked without being used in the electric operations, the total cost including the cost of removing or wrecking shall be charged and the salvage value credited to the land account.

C. Net proceeds from the sale of timber, wood, or other property purchased with rights of way or other land shall be credited to this account.

D. Class A and Class B utilities shall subdivide this account as shown below, and all utilities shall keep their records so as to show separately the cost of each parcel of land or interest therein devoted to electric operations. Land used for more than one purpose shall be classified under the subdivision of this account indicative of its principal use.

- (1) Steam Power Plant Land
- (2) Hydro-Electric Power Plant Land
- (3) Internal Combustion Power Plant Land
- (5) Transmission System Land and Rights of Way
- (6) Distribution System Land and Rights of Way
- (7) Office Land
- (8) Shop Land
- (9) Stores Land

(10) Transportation Land

(11) Miscellaneous Land

ITEMS

(See § 197.14)

Clearing land of brush, trees, and debris, when not in connection with any construction

Condemnation proceedings, including court costs and special counsel fees

Consents and abutting damages, payment for

Conveyancers' and notaries' fees

Easements and rights of way, cost of, and expenses of acquisition

Fees and commissions to brokers or agents

Flowage rights

Forestation or trees, first planting

Grading, when not a part of construction

Leases having a life of more than one year, cost of, and expenses incidental to acquiring

Leases, voiding, to secure possession of land

Pondage rights

Relocating property of others

Rights of way, including costs of locating

Sidewalks on public streets abutting utility's property

Special assessments on the basis of benefits for new roads, new bridges, new pavements, new sewers, and other public improvements (but not any taxes levied to provide for maintenance of such improvements)

Submersion rights

Surveys

Taxes assumed, accrued prior to date of transfer of title

Title, examining, registering, clearing, insuring, and defending against claims relating to period prior to purchase

Water diversion rights, cost of, and expenses of acquisition

Water rights, cost of, and expenses of acquisition

Note A: When land is acquired in excess of that required for electric operations, or for which there is not a definite plan for its use in electric operations, the cost of such land shall be charged to account 280, Contributions--Operating Municipality, if it is not intended that it be used for electric operations at any future time; if land is purchased for investment it shall be charged to account 112, Non-operating Property. If land originally charged to account 112, Non-operating Property, or to account 280, Contributions--Operating Municipality, is later used for electric operations, it shall be charged

to construction work in progress or Operating Property--Electric (or Operating Property--General if partly used in other operations) at its cost when acquired. Interest and taxes actually paid (less any income received) for the period from the date of acquisition to the date of transfer may be added to the cost, provided that such charges shall not be made for a period exceeding one year except upon order of the commission.

Note B: Assessments for public improvements upon which payments are deferred shall be charged to this account in full and the unpaid balance carried in the appropriate liability account. Interest on unpaid balances shall be charged to the appropriate income deduction account.

312. Structures

A. This account shall include the cost in place (see § 197.21) of structures used in electric operations. This includes buildings or constructions to house, support, or safeguard property or persons, with all appurtenant fixtures permanently attached thereto; improvements to land; and other structures or constructions not specifically provided for elsewhere.

B. Class A and Class B utilities shall subdivide this account as shown below, and all utilities shall keep their records so as to show separately the cost of each structure included in this account. Structures used for more than one purpose shall be classified under the subdivision of this account indicative of their principal use.

- (1) Steam Power Plant Structures
- (2) Hydro-Electric Power Plant Structures
- (3) Internal Combustion Power Plant Structures
- (5) Transmission System Structures (including substation buildings)
- (6) Distribution System Structures (including substation buildings)
- (7) Office Structures
- (8) Shop Structures
- (9) Stores Structures
- (10) Transportation Structures
- (11) Miscellaneous Structures

ITEMS

(See § 197.14)

Architects' plans

Ash pits

Awnings

Boilers, furnaces, piping, wiring, fixtures, and machinery for heating, lighting, signaling, ventilating, and plumbing

Bridges and culverts

Bulkheads, including dredging, rip-rap fill, piling, decking, concrete, fenders, etc.

Chimneys

Clearing land for structures included herein

Coal bins and bunkers

Commissions and fees to brokers, agents, architects, and others

Conduits (not to be removed with their contents)

Damages to abutting property during construction

Door checks and door stops

Drainage and sewerage systems

Elevators, cranes, hoists, etc., and the machinery for operating them

Excavation, including shoring, bracing, bridging, refill, and disposal of excess excavated material

Fences and hedges

Fire protection systems

Floor covering (permanently attached)

Foundations and piers for machinery, constructed as a permanent part of a building or other unit listed herein

Grading and preparing grounds for buildings, including landscaping of grounds after construction

Improvements to leased buildings (see § 197.17)

Leases, voiding, to secure possession of structures

Monuments and bench marks

Outside lighting systems

Painting, first

Partitions, including movable

Permits and privileges

Platforms, railings and gratings, when constructed as part of structure

Power boards for service to a building

Railroad sidings for general use

Refrigerating systems

Retaining walls

Roads

Scales, connected to and forming part of the structure

Screens

Sidewalks, pavements, and driveways on building grounds

Sprinkling systems

Stacks--brick, steel, or concrete, when set on foundations forming part of general foundation and steelwork of building

Storage facilities constituting part of a building

Storm doors and windows

Subways, areaways, and tunnels, directly connected to and forming party* of the structure

* So in original. "party" should be "part"

Tunnels, intake and discharge, when constructed as part of the structure

Vaults constructed as part of the building

Water supply system for a building or general utility purposes

Wharves

Window shades and ventilators

Note A: Do not include in this account lighting, heating, or other fixtures temporarily attached for purposes of display or demonstration.

Note B: When part of a structure is removed in order to build an extension thereto, the cost of the part removed shall be credited to this account and charged, with the cost of removal, to account 261, Depreciation Reserves.

Note C: The cost of additions and betterments, including initial improvements, to leased structures shall be charged to a subdivision of the appropriate subdivision of this account. (See ò 197.17.)

Note D: The cost of specially provided foundations not expected to outlast the machinery or apparatus for which they are provided, and the cost of angle irons, castings, etc., installed at the base of an item of equipment, shall be charged to the same account as the cost of the machinery, apparatus, or equipment.

321. Boiler Plant Equipment

This account shall include the cost installed (see ò 197.21) of furnaces, boilers, steam and feed water piping, boiler apparatus, and accessories used in the production of steam (or mercury or other binary vapor) to be used primarily for generating electricity.

ITEMS

(See ò 197.14)

Air cleaning and filtering systems, including equipment and connections devoted to boiler plant use

Air preheaters, including fans and drives, and ducts not part of building

Ash disposal equipment, including sluiceways not part of building, pumps and piping, ash pit crane, ash bucket conveyors and drives, ash cars, trestles, and tracks

Boilers, including valves attached thereto, casings, linings, water walls, safety valves, soot blowers, soot hoppers, ash hoppers, superheaters, and feed water regulators

Cinder and duct catcher system, including mechanical and electric types

Coal handling and storage equipment, including coal towers, coal lorries, coal cars, locomotives and tracks when devoted principally to transport of coal, hoppers, down-takes, unloading and hoisting equipment, skip hoists and conveyors, weighing equipment, crushers, magnetic separators, cable ways, housings and supports for coal handling equipment

Combustion Control system, including apparatus installed for the regulation and control of the supply of fuel or air to boilers

Cranes, hoists, etc., wholly identified with apparatus listed herein

Desuperheaters and reducing valves

Draft apparatus, including forced, induced, and other draft systems with blowers, fans, and air ducts not part of building

Economizers

Feed water heaters, including primary and stage

Flues, uptakes, and breeching, whether or not stacks are included in this account

Foundations and settings, specially constructed for and not expected to outlast the apparatus for which provided

Furnaces

Lighting systems

Mechanical meters, including gauges, recording instruments, sampling and testing equipment

Mechanical stokers and clinker grinders, including drives (steam or electric)

Oil burning equipment, including tanks, heaters, pumps with drive, burner equipment, and piping

Piping system, including main steam piping to throttle valve of engine or turbine, auxiliary steam piping, piping for main and auxiliary exhaust, make-up water, feed water, drip, blowoff, fresh or salt water piping (for station use), and valve control system

Platforms, railings, steps, gratings, etc., appurtenant to apparatus listed herein

Pulverized fuel bins and hoppers

Pulverized fuel burning equipment, including fuel ignition apparatus and piping

Pulverizing equipment, including pulverizing mills, dryers, down-takes, separators, dust collection system, compressed air or mechanical transport equipment

Pumps and driving units, for feed water, heater condensate, fresh or

salt water for general station use, drip, injectors

Stacks--brick, steel, and concrete, when set on separate foundations and independent of substructure and superstructure of building

Steam regenerators

Steelwork, specially constructed for apparatus listed herein

Tanks, including surge, weighing, return, blowoff, and feed water storage

Ventilating equipment, including items wholly identified with apparatus listed herein

Water purification system, including purifiers, settling tanks, filters, chemical mixing and dosing apparatus, etc.

Note A: This account shall not include boilers or steam pipes whose primary purpose is the heating of structures.

Note B: When the system for supplying boiler or condenser water is elaborate, as when it includes a dam, reservoir, canal, or pipe line, the cost shall not be charged to this account but to a subdivision of subdivision (1), Steam Power Plant Structures, of account 312, Structures.

Note C: Holders for gas and large storage tanks for fuel oil, etc., used for steam power production, shall be included in subdivision (1), Steam Power Plant Structures, of account 312, Structures.

322. Engine Driven Generator Units--Steam

A. This account shall include the cost installed (see § 197.21) of main engine driven units used in generating electricity from steam (or mercury or other binary vapor), and accessory equipment.

B. When the engine and generator are installed as separate units, this account shall be subdivided as follows:

(1) Prime Movers

(2) Generators

ITEMS

(See § 197.14)

Air cleaning and cooling apparatus, including blowers, drive equipment (steam or electric), air ducts not part of building, louvres, pumps, hoods, fresh or salt water piping to common header

Belting, shafting, pulleys, reduction gearing, etc.

Circulating pumps, including piping between condenser and common header of in-take and discharge system

Condensers, including condensate pumps, air and vacuum pumps, ejectors, unloading valves, and vacuum breakers

Cooling system, including towers, pumps, tanks, and piping

Cranes, hoists, etc., including items wholly identified with apparatus

listed herein

Engine driven units--main, including field rheostats and electric connections for self-excited units

Engines--reciprocating or rotary

Excitation system, when identified with main generating units

Foundations and settings, especially constructed for and not expected to outlast the apparatus for which provided

Generators--main, including field rheostats and electric connections for self-excited units

Governors

Lighting systems

Lubricating systems, including filters, tanks, pumps, and piping

Mechanical meters, including gauges, recording instruments, sampling and testing equipment

Piping--main exhaust, including connections between engine and condenser and between condenser and hot well

Piping--main steam, including connections from main throttle valve to cylinder

Platforms, railings, steps, gratings, etc., appurtenant to apparatus listed herein

Pressure oil systems, including accumulators, pumps, piping, etc.

Steam receivers, including piping between high and low pressure cylinders

Steelwork, specially constructed for apparatus listed herein

Throttle or inlet valve

Tunnels, intake and discharge, for condenser system, when not a part of structure

323. Turbo-Generators--Steam

A. This account shall include the cost installed (see § 197.21) of main turbine driven units used in generating electricity from steam (or mercury or other binary vapor), and accessory equipment.

B. When the turbine and generator are installed as separate units, this account shall be subdivided as follows:

(1) Prime Movers

(2) Generators

ITEMS

(See § 197.14)

Air cleaning and cooling apparatus, including blowers, drive equipment (steam or electric), air ducts not part of building, louvres, pumps, hoods, fresh or salt water piping to common header

Condensers, including condensate pumps, air and vacuum pumps,

ejectors, unloading valves, and vacuum breakers

Cooling system, including towers, pumps, tanks, and piping

Cranes, hoists, etc., including items wholly identified with apparatus listed herein

Excitation system, when identified with main generating units

Foundations and settings, especially constructed for and not expected to outlast the apparatus for which provided

Governors

Lighting systems

Lubricating systems, including filters, tanks, pumps, and piping sampling and testing equipment

Mechanical meters, including gauges, recording instruments, sampling and testing equipment

Piping--main exhaust, including connections between turbo-generator and condenser and between condenser and hot well

Piping--main steam, including connections from main throttle valve to cylinder

Platforms, railings, steps, gratings, etc., appurtenant to apparatus listed herein

Pressure oil systems, including accumulators, pumps, piping, etc.

Steelwork, specially constructed for apparatus listed herein

Throttle or inlet valve

Tunnels, intake and discharge, for condenser system, when not a part of structure

Turbo-generators--main, including field rheostats and electric connections for self-excited units

324. Accessory Electric Equipment--Steam

This account shall include the cost installed (see § 197.21) of accessory electric equipment used primarily in connection with the generation of electricity by steam; and also auxiliary generating equipment for the supply of electricity for auxiliaries and general station use.

ITEMS

(See § 197.14)

Auxiliary generators, including boards, compartments, switching equipment, control equipment, connections to auxiliary power bus

Batteries--control, including charging equipment, control equipment and connections

Belting, shafting, pulleys, reduction gearing, etc.

Conduits, including concrete and iron duct runs not part of building

Foundations and settings, specially constructed for and not expected

to outlast the apparatus for which provided

Frequency changers and motor generators, for system or station ties, including starting equipment, enclosures, tap changing transformers, main high tension connections to compartments, control equipment and connections, air cleaning and cooling equipment, lubricating systems, oil draining and replenishing system.

High tension compartments--brick, concrete, or sectionalized steel, including all items permanently attached

High tension connections, including neutral and grounding system; cable and copper bus runs from generators to compartment potheads; potheads; feeder runs from compartments to station vaults, manholes, or overhead construction adjoining stations

High tension equipment--indoor and outdoor, including oil circuit breakers, truck switches, disconnect switches, reactors, current and potential transformers

Lighting systems

Main and control equipment, including turbine signal stands and connections, and connections for turbo-generator

Mechanical drives for auxiliary generators, including steam or internal combustion, with piping, valves, shafting, etc.

Motor generator sets, frequency changers, including transformers, boards, compartments, switching equipment, control equipment, connections to main or auxiliary buses

Motors

Platforms, railings, steps, gratings, etc., appurtenant to apparatus listed herein

Protective equipment, including lightning arresters, relays, circuit breakers, switches, reactors, etc.

Rotary converters

Steelwork, specially constructed for apparatus listed herein

Switchboards--main, auxiliary, excitation, control, feeder, etc., including frames, panels, instruments, switches, wiring

Test equipment, including apparatus permanently attached

Transformer banks for station ties or generators, including air cleaning and cooling equipment, ventilating system not part of a general system, control equipment and connections, compartments, switching equipment and connections, oil draining and replenishing system

Transformers, including switching equipment, boards, compartments, connections to main and auxiliary buses

Ventilating equipment, including items wholly identified with apparatus listed herein

Note: When any unit of equipment listed herein is wholly used to furnish power to equipment included in another account, its cost shall be included in such account.

325. Miscellaneous Power Plant Equipment--Steam

This account shall include the cost installed (see § 197.21) of miscellaneous equipment devoted to general station use in steam power generating stations, which is not includible in the foregoing accounts.

ITEMS

(See § 197.14)

Compressed air and vacuum cleaning systems, including tanks, compressors, exhausters, air filters, piping, etc.

Cranes and hoisting equipment, including cranes, cars, crane rails, monorails, hoist, etc., with electric and mechanical connections

Foundations and settings, specially constructed for and not expected to outlast the apparatus for which provided

Miscellaneous equipment, including sampling and testing equipment, signal systems, callophones, emergency whistles and sirens, telautographs, fire alarms, atmospheric and weather indicating devices, and other similar equipment

Refrigerating system, including compressors, pumps, cooling coils, etc.

Station maintenance equipment, including lathes, shapers, planers, drill presses, hydraulic presses, grinders, etc., with motors, shafting, hangers, pulleys, etc.

Transportation equipment, used exclusively for power plant purposes

Ventilating equipment, including items wholly identified with apparatus listed herein

Note A: When any unit of equipment listed herein is wholly used in connection with equipment included in another account, its cost shall be included in such account.

Note B: Office equipment such as desks, chairs, typewriters, calculating machines, etc., shall be included in account 381, Office Equipment.

331. Reservoirs, Dams, and Waterways

A. This account shall include the cost in place (§ 197.21) of permanent constructions used for the impounding, collecting, storing, regulating, and delivery of water to the water wheels and from the draft tubes to the tailraces, primarily for generating electricity.

B. Class A and Class B utilities shall subdivide this account as follows:

(1) Reservoirs, Dams, and Intakes

- (2) Navigation Facilities
- (3) Waterways
- (4) Forebays, Penstocks, and Tailraces

ITEMS

(See ò 197.14)

Bridges and culverts

Clearing and preparing land

Dams, including wasteways, spillways, flashboards, spillway gates with operating and control mechanisms, tunnels, gate houses, and fish ladders

Embankments

Excavation, including shoring, bracing, bridging, refill, and disposal of excess excavated material

Foundations and settings, specially constructed for and not expected to outlast the apparatus for which provided

Intakes, including trash rack, rack cleaners, control gates and valves with operating mechanisms, intake house when not part of station structure

Lighting systems

Platforms, railings, steps, gratings, etc., appurtenant to structures and equipment listed herein

Power lines wholly identified with items included herein

Raising and relocating public roads and bridges

Retaining walls

Water conductors and accessories, including canals, navigation locks and operating mechanisms, tunnels, flumes, penstocks, pipe conductors, forebays, tailraces, water-hammer and surge tanks, and supporting trestles and structures

Water storage reservoirs, including dams, flashboards, spillway gates and operating mechanism, inlet and outlet tunnels, regulating valves and valve towers, silt and mud sluicing tunnels with valve or gate towers, and all other structures wholly identified with any of the foregoing items

Note A: Nozzles and valves at water wheels shall be charged to account 333, Water Wheels, Turbines, and Generators.

Note B: When the structure of a dam forms also the foundation of the power plant buildings, such foundation shall be considered a part of the dam.

332. Roads, Trails, and Bridges

This account shall include the cost (see ò 197.21) of permanent roads, trails, bridges, and railroads, which are not immediately adjacent to the generating plant proper, used primarily in connection with the

production of electricity by water power.

ITEMS

(See § 197.14)

Bridges, including foundations, piers, girders, trusses, flooring, etc.

Clearing land

Railroads, including grading, ballast, ties, rails, culverts, hoists, etc.

Roads, including grading, surfacing, culverts, etc.

Structures, constructed and maintained in connection with items listed herein

Trails, including grading, surfacing, culverts, etc.

Trestles, including foundations, piers, girders, trusses, flooring, etc.

Note: This account shall include the cost of only such private roads, trails, railroads, bridges, etc., as it is necessary to maintain and use in the operation and maintenance of the hydraulic power plant. The cost of those used for construction but abandoned upon completion thereof shall be included in the accounts to which such construction was charged.

333. Water Wheels, Turbines, and Generators

A. This account shall include the cost installed (see § 197.21) of main water wheels and hydraulic turbines (from connection with penstock or flume to tailrace) and generators driven thereby used in generating electricity by water power.

B. When the generator and prime mover are installed as separate units, this account shall be subdivided as follows:

(1) Prime Movers

(2) Generators

ITEMS

(See § 197.14)

Air cleaning and cooling apparatus, including blowers, drive equipment, air ducts not part of building, louvres, pumps, hoods, fresh water piping to common header

Belting, shafting, pulleys, reduction gearing, etc.

Cranes, hoists, etc., including items wholly identified with apparatus listed herein

Excitation system, when identified with main generating units

Foundations and settings, specially constructed for and not expected to outlast the apparatus for which provided

Generators--main, including field rheostats and electric connections

for self-excited units

Governors

Lighting systems

Lubricating Systems

Mechanical meters, including gauges, recording instruments, water flow meters, water flow registers, etc.

Nozzles--main and auxiliary

Platforms, railings, steps, gratings, etc., appurtenant to apparatus listed herein

Pressure regulators

Relief valves

Steelwork, specially constructed for apparatus listed herein

Turbines and water wheels--main

Turbo-generator and water wheel units--main, including field rheostats and electric connections for self-excited units

334. Accessory Electric Equipment--Hydro

This account shall include the cost installed (see § 197.21) of accessory electric equipment used primarily in connection with the generation of electricity by water power; and also auxiliary generating equipment for the supply of electricity for auxiliaries and general station use.

ITEMS

(See § 197.14)

Auxiliary generators, including boards, compartments, switching equipment, control equipment, connections to auxiliary power bus

Batteries--control, including charging equipment, control equipment and connections

Belting, shafting, pulleys, reduction gearing, etc.

Conduits, including concrete and iron duct runs not part of building

Foundations and settings, specially constructed for and not expected to outlast the apparatus for which provided

Frequency changers and motor generators, for system or station ties, including starting equipment, enclosures, tap changing transformers, main high tension connections to compartments, control equipment and connections, air cleaning and cooling equipment, lubricating systems, oil draining and replenishing system

High tension compartments--brick, concrete, or sectionalized steel, including all items permanently attached

High tension connections, including neutral and grounding system; cable and copper bus runs from generators to compartment potheads; potheads; feeder runs from compartments to station vaults, manholes, or

overhead construction adjoining stations

High tension equipment--indoor and outdoor, including oil circuit breakers, truck switches, disconnect switches, reactors, current and potential transformers

Lighting systems

Main and control equipment, including turbine signal stands and connections for turbo-generator

Mechanical drives for auxiliary generators, including steam or internal combustion, with piping, valves, shafting, etc.

Motor generator sets, frequency changers, including transformers, boards, compartments, switching equipment, control equipment, connections to main or auxiliary buses

Motors

Platforms, railings, steps, gratings, etc., appurtenant to apparatus listed herein

Protective equipment, including lightning arresters, relays, circuit breakers, switches, reactors, etc.

Rotary converters

Steelwork, specially constructed for apparatus listed herein

Switchboards--main, auxiliary, excitation, control, feeder, etc., including frames, panels, instruments, switches, wiring

Test equipment, including apparatus permanently attached

Transformer banks for station ties or generators, including air cleaning and cooling equipment, ventilating system not part of a general system, control equipment and connections, compartments, switching equipment and connections, oil draining and replenishing system

Transformers, including switching equipment, boards, compartments, connections to main and auxiliary buses

Ventilating equipment, including items wholly identified with apparatus listed herein

Note: When any unit of equipment listed herein is wholly used to furnish power to equipment included in another account, its cost shall be included in such account.

335. Miscellaneous Power Plant Equipment-Hydro

This account shall include the cost installed (see § 197.21) of miscellaneous equipment devoted to general station use in water power plants which is not includible in the foregoing accounts.

ITEMS

(See §197.14)

Compressed air and vacuum cleaning systems, including tanks, compressors, exhausters, air filters, piping, etc.

Cranes and hoisting equipment, including cranes, cars, crane rails, monorails, hoists, etc., with electric and mechanical connections

Foundations and settings, specially constructed for and not expected to outlast the apparatus for which provided

Miscellaneous equipment, including sampling and testing equipment, signal systems, callophones, emergency whistles and sirens, telautographs, fire alarms, atmospheric and weather indicating devices, and other similar equipment

Refrigerating system, including compressors, pumps, cooling coils, etc.

Station maintenance equipment, including lathes, shapers, planers, drill presses, hydraulic presses, grinders, etc., with motors, shafting, hangers, pulleys, etc.

Transportation equipment used exclusively for power plant purposes

Ventilating equipment, including items wholly identified with apparatus listed herein

Note A: When any unit of equipment listed herein is wholly used in connection with equipment included in another account, its cost shall be included in such account.

Note B: Office equipment such as desks, chairs, typewriters, calculating machines, etc., shall be included in account 381, Office Equipment.

342. Engine Driven Generator Units--Internal Combustion

A. This account shall include the cost installed (see § 197.21) of Diesel or other internal combustion engines and generators driven thereby used in generating electricity.

B. When the prime mover and generator are installed as separate units, this account shall be subdivided as follows:

- (1) Prime Movers
- (2) Generators

ITEMS

(See §197.14)

Air cleaning and cooling apparatus, including blowers, drive equipment, air ducts not part of building, louvres, pumps, hoods, fresh or salt water piping to common header

Belting, shafting, pulleys, reduction gearing, etc.

Compressed air or other starting systems, including compressors and drives, tanks, piping, motors, boards and connections, storage tanks, etc.

Cooling system, including towers, pumps, tanks, and piping

Cranes, hoists, etc., including items wholly identified with apparatus

listed herein

Engine driven units-main, diesel, gasoline, gas, or other internal combustion, including field rheostats and electric connections for self-excited units

Engines-diesel, gasoline, gas, or other internal combustion

Excitation system, when identified with main generating units

Foundations and settings, specially constructed for and not expected to outlast the apparatus for which provided

Generators--main, including field rheostats and electric connections for self-excited units

Governors

Ignition system

Inlet valve

Lighting systems

Lubricating systems, including filters, tanks, pumps, and piping

Mechanical meters, including gauges, recording instruments, sampling and testing equipment

Mufflers

Piping

Platforms, railings, steps, gratings etc., appurtenant to apparatus listed herein

Steelwork, specially constructed for apparatus listed herein

344. Accessory Electric Equipment--Internal Combustion

This account shall include the cost installed (see § 197.21) of accessory electric equipment used primarily in connection with the generation of electricity by Diesel or other internal combustion engines, and also for the supply of electricity for auxiliaries and general station use.

ITEMS

(See § 197.14)

Auxiliary generators, including boards, compartments, switching equipment, control equipment, connections to auxiliary power bus

Batteries--control, including charging equipment, control equipment and connections

Belting, shafting, pulleys, reduction gearing, etc.

Conduits, including concrete and iron duct runs not part of building

Foundations and settings, specially constructed for and not expected to outlast the apparatus for which provided

Frequency changers and motor generators, for system or station ties, including starting equipment, enclosures, tap changing transformers, main high tension connections to compartments, control equipment and

connections, air cleaning and cooling equipment, lubricating systems, oil draining and replenishing system High tension compartments--brick, concrete, or sectionalized steel, including all items permanently attached High tension connections, including neutral and grounding system; cable and copper bus runs from generators to compartment potheads; potheads; feeder runs from compartments to station vaults, manholes, or overhead construction adjoining stations

High tension equipment--indoor and outdoor, including oil circuit breakers, truck switches, disconnect switches, reactors, current and potential transformers

Lighting systems

Main and control equipment, including signal stands and connections for generators Mechanical drive for auxiliary generators, including steam or internal combustion, with piping, valves, shafting, etc.

Motor generator sets, frequency changers, including transformers, boards, compartments, switching equipment, control equipment, connections to main or auxiliary buses

Motors

Platforms, railings, steps, gratings, etc., appurtenant to apparatus listed herein

Protective equipment, including lightning arresters, relays, circuit breakers, switches, reactors, etc.

Rotary converters

Steelwork, specially constructed for apparatus listed herein

Switchboards--main, auxiliary, excitation, control, feeder, etc., including frames, panels, instruments, switches, wiring

Test equipment, including apparatus permanently attached

Transformer banks for station ties or generators, including air cleaning and cooling equipment, ventilating system not part of a general system, control equipment and connections, compartments, switching equipment and connections, oil draining and replenishing system

Transformers, including switching equipment, boards, compartments, connections to main and auxiliary buses

Ventilating equipment, including items wholly identified with apparatus listed herein

Note: When any unit of equipment listed herein is wholly used to furnish power to equipment included in another account, its cost shall be included in such account.

345. Miscellaneous Power Plant Equipment--Internal combustion

A. This account shall include the cost installed (see § 197.21) of miscellaneous equipment devoted to general station use in internal

combustion power plants which is not includible in the foregoing accounts.

B. This account shall also include the cost of equipment used in the production of oil or gas for use in internal combustion engines.

ITEMS

(See § 197.14)

Compressed air and vacuum cleaning systems, including tanks, compressors, exhausters, air filters, piping, etc.

Cranes and hoisting equipment, including cranes, cars, crane rails, monorails, hoists, etc., with electric and mechanical connections

Foundations and settings, specially constructed for and not expected to outlast the apparatus for which provided

Gas production equipment, including wells, producers, economizers, regenerators, vaporizers, steam injectors, scrubbers, exhauster outfits, seals, boilers and pumps, flues and piping, blower engines, ash disposal equipment, coal and coke storage and handling equipment, etc.

Miscellaneous equipment, including sampling and testing equipment, signal systems, callophones, emergency whistles and sirens, telautographs, fire alarms, atmospheric and weather indicating devices, and other similar equipment

Oil production equipment

Refrigerating system, including compressors, pumps, cooling coils, etc.

Station Maintenance equipment, including lathes, shapers, planers, drill presses, hydraulic presses, grinders, etc., with motors, shafting, hangers, pulleys, etc.

Storage tanks, pumps and drive, piping, heaters, etc.

Supply and exhaust equipment, including tanks and holders, exhausters, piping to inlet of engine, exhaust pipe from engine

Ventilating equipment, including items wholly identified with apparatus listed herein

Note A: When any unit of equipment included within the scope of paragraph A hereof is wholly used in connection with equipment included in another account, its cost shall be included in such account.

Note B: Office equipment such as desks, chairs, typewriters, calculating machines, etc., shall be included in account 381, Office Equipment.

Note C: Holders for gas and large storage tanks for oil, gasoline, etc., shall be included in subdivision (3), internal Combustion Power Plant Structures, of account 312, Structures.

351. Transmission Roads and Trails

This account shall include the cost (see ÷ 197.21) of permanent roads, trails, and bridges used primarily in connection with the operation or maintenance of the transmission system whether located on the transmission line right of way or elsewhere

ITEMS

(See ÷ 197.14)

Bridges, including foundations, piers, girders, trusses, flooring, etc.

Clearing land

Railroads, including grading, ballast, ties, rails, culverts, hoists, etc.

Roads, including grading, surfacing, culverts, etc.

Structures, constructed and maintained in connection with items listed herein

Trails, including grading, surfacing, culverts, etc.

Trestles, including foundations, piers, girders, trusses, flooring, etc.

Note: This account shall include the cost of only such private roads, trails, bridges, etc., as it is necessary to maintain and use in the operation and maintenance of the transmission system. The cost of those used for construction but abandoned upon completion thereof, shall be included in the accounts to which such construction was charged.

352. Transmission Substation Equipment

This account shall include the cost installed (see ÷ 197.21) of substation equipment and transformers which are used for the purpose of changing the characteristics of electricity in connection with its transmission and which both receive and send out the electricity on transmission lines. (See ÷ 197.35.)

ITEMS

(See ÷ 197.14)

Batteries--control, including charging equipment and connections

Bus compartments--concrete, brick, and sectionalized steel, including items permanently attached thereto

Conduits, including concrete and iron duct runs not part of building

Equipment for general station use, including transformers, batteries, motor generators, blowers, etc., and connections

Fences

Fixed or rotary condensers, including transformers, switching equipment, blowers, and connections

Foundations and settings, specially constructed for and not expected to outlast the apparatus for which provided

Frequency changers and motor generators, including switching equipment, transformers, and connections

Lighting systems

Meters, station

Motors

Operators' boards, including instruments, boards, and connections

Platforms, railings, steps, gratings, etc., appurtenant to apparatus listed herein

Primary and secondary voltage connections, including bus runs and supports, insulators, potheads, lighting arresters, grounding system, cable and wire runs from and to outdoor connections or to manhole

Rectifiers

Regulators and reactors

Remote control equipment, including relays, boards, cabinets, and connections

Remote control wire and cable controlling equipment included in this account, and poles, towers, and fixtures or conduits used exclusively for such wire or cable

Steelwork, specially constructed for apparatus listed herein

Switching equipment--indoor and outdoor, including oil circuit breakers, truck switches, disconnect switches, syphon system

Test equipment, including apparatus permanently attached

Transformers--indoor and outdoor, including connections to high and low voltage switching equipment, oil draining and replenishing system

Ventilating equipment, including items wholly identified with apparatus listed herein

Note: This account shall not include any equipment located in generating stations or substations, or any transformers, which receive electricity from transmission lines or generating stations, and send out electricity on distribution lines.

353. Transmission Overhead Conductors

This account shall include the cost installed (see § 197.21) of overhead conductors and line devices used on transmission lines. (See § 197.35.)

ITEMS

(See § 197.14)

Conductors, including insulated and bare wires and cables

Insulators, including pin, suspension, and other types

Line devices, including ground wires, disconnect or sectionalizing switches, lighting arresters, circuit breakers, etc.

Railroad crossing guards

Splices

Note A: This account shall not include switches or lightning arresters installed in generating stations or substations for the protection of equipment therein.

Note B: This account shall not include pothead, or conductors in standpipe attached to pole or tower from insulators on pole to underground manholes and terminal chambers.

354. Transmission Underground Conductors

This account shall include the cost installed (see § 197.21) of underground conductors and line devices used on transmission lines. (See § 197.35.)

ITEMS

(See § 197.14)

Armored conductors--buried, including insulators, insulating materials, splices, potheads, trenching, etc.

Armored conductors--submarine, including insulators, insulating materials, splices in terminal chamber, potheads, etc.

Cables in standpipe, including pothead and connection from terminal chamber or manhole to insulators on pole

Fireproofing, in connection with any items listed herein

Hollow core oil filled cable, including straight or stop joints, pressure tanks, auxiliary air tanks, feeding tanks, terminals, potheads and connections, ventilating equipment, etc.

Lead and fabric covered conductors, including insulators, compound filled, oil filled, or vacuum splices, potheads, etc.

Line devices, including manual and automatic, disconnect or sectionalizing switches, circuit breakers, relays, etc.

Municipal inspection, payment for (See also § 197.33.)

Pavement disturbed, including cutting and replacing pavement, pavement base, and sidewalks (See also § 197.33.)

Permits (See also § 197.33.)

Protection of street openings

Racking of cables

Note A: This account shall not include switches or lightning arresters installed in generating stations or substations for the protection of equipment therein.

358. Poles, Towers, and Fixtures

A. This account shall include the cost installed (see § 197.21) of poles and other structures and appurtenant fixtures used for supporting overhead conductors.

B. This account shall be subdivided as follows:

- (1) Poles (or towers) supporting transmission conductors only
- (2) Poles (or towers) which do not support transmission conductors

ITEMS

(See § 197.14)

Towers, including anchors and guys; braces; brackets; crossarms; excavation, back-fill, and disposal of excess excavated material; grounds for tower structures; foundations; guards; railings, etc.; insulator pins and suspension bolts; ladders; steps

Wood, tubular steel, and concrete poles, including anchor; head, arm, and other guys (including guy guards, strain insulators, guy clamps, pole plates, etc.); brackets; crossarms and braces; excavation, backfill, and disposal of excess excavated material; extension arms, insulator pins; paving; pole steps; settings; transformer platforms; first cost of shaving, painting, galing, roofing, stenciling, and tagging

Note A: The subdivisions indicated above relate to the accounting utility's use only, and such use shall control the accounting for its property irrespective of any use made of the same property by others either under joint ownership or lease.

Note B: The utility shall maintain a statistical record to show separately for each pole or tower the number and size of the conductors used for (a) transmission, (b) distribution, (c) street lighting, (d) signal systems, and (e) other purposes. This record shall also show the percentage of ownership.

359. Underground Conduits

A. This account shall include the cost installed (see § 197.21) of underground conduits and tunnels used for housing cables and wires.

B. This account shall be subdivided as follows:

- (1) Conduit banks used for transmission conductors only
- (2) Conduit banks used for distribution conductors only
- (3) Conduit banks used for street lighting and/or signal system conductors only
- (4) Conduit banks used for two or more of the above classes of conductors
- (5) Conduit banks unoccupied and/or rented to others

ITEMS

(See § 197.14)

Conduits--concrete, brick, and tile, including iron pipe, fibre pipe, Murray Duct, standpipe on pole or tower

Excavation, including shoring, bracing, bridging, backfill, and disposal of excess excavated material

Foundations and settings, specially constructed for and not expected to outlast the apparatus for which provided

Lighting systems

Manholes--concrete or brick, including iron or steel frames and covers, hatchways, gratings, ladders, cable racks and hangers, etc., permanently attached to manholes

Municipal inspection (See also § 197.33.)

Pavement disturbed, including cutting and replacing pavement, pavement base, and sidewalks (See also § 197.33.)

Permits (See also § 197.33.)

Protection of street openings

Removal and relocation of subsurface obstructions (See also § 197.33.)

Sewer connections, including drains, traps, tide valves, check valves, etc.

Structures, housing underground line transformers and accessories

Sumps, including pumps

Transformer vaults

Ventilating equipment

Note A: The subdivisions indicated above relate to the accounting utility's use only, and such use shall control the accounting for its property irrespective of any use made of the same property by others either under joint ownership or lease.

Note B: The utility shall maintain a statistical record to show separately for each bank of conduit included in class (4) the number of ducts used by it for each purpose listed above, the number used for other purposes, and the number vacant.

Note C: Do not include in this account underground conduits on power plant or substation sites used primarily for cables included in account 324, 334, 344, or 352.

361. Distribution Substation Equipment

This account shall include the cost installed (see § 197.21) of substation equipment which is used for the purpose of changing the characteristics of electricity in connection with its distribution (see § 197.35), and transformers other than line transformers.

ITEMS

(See § 197.14)

Batteries--control, including charging equipment and connections

Bus compartment--concrete, brick, and sectionalized steel, including items permanently attached thereto

Conduits, including concrete and iron duct runs not part of building.

Equipment for general station use, including transformers, batteries,

motor generators, blowers, etc., and connections

Fences

Fixed or rotary condensers, including transformers, switching equipment, blowers, and connections

Foundations and settings, specially constructed for and not expected to outlast the apparatus for which provided

Frequency changers and motor generators, including switching equipment, transformers, and connections

Lighting systems

Motors

Operators' boards, including instruments, boards, and connections

Platforms, railings, steps, gratings, etc., appurtenant to apparatus listed herein

Primary and secondary voltage connections, including bus runs and supports, insulators, potheads, lightning arresters, grounding system, cable and wire runs from and to outdoor connections or to manhole

Rectifiers

Regulators and reactors

Remote control equipment, including relays, boards, cabinets, and connections

Remote control wire and cable controlling equipment included in this account, and poles, towers, and fixtures or conduits used exclusively for such wire or cable

Rotary converters, including switching equipment, transformers, starting equipment, and connections

Steelwork, specially constructed for items listed herein

Switching equipment--indoor and outdoor, including oil circuit breakers, truck switches, disconnect switches, syphon system

Test equipment, including apparatus permanently attached

Transformers--indoor and outdoor, including connections to high and low voltage switching equipment, oil draining and replenishing system

Ventilating equipment, including items wholly identified with apparatus listed herein

Note A: This account shall not include line transformers installed for stepping down current from primary distribution voltage to the voltage at which it is used by the consumers.

Note B: This account shall include the cost of one or more transformers which the utility has installed at the point where current is taken from its transmission or distribution line by a large power consumer, when such transformers are used to step down the current from the voltage at which it is carried on the utility's line to the voltage

at which it is delivered to such consumer to be transformed or converted within the consumers' own plant.

362. Storage Battery Equipment

This account shall include the cost installed (see ÷ 197.21) of storage battery equipment used for the purpose of supplying electricity to meet emergency or peak demands of consumers.

ITEMS

(See ÷ 197.14)

Batteries, including elements, tanks, tank insulators, etc.

Battery room connections, including cable or bus runs and connections

Battery room flooring, when specially laid for supporting batteries

Charging equipment, including motor generator sets and other charging equipment and connections, cable runs from generator or substation bus to battery room connections

Miscellaneous equipment, including instruments, water stills, etc.

Switching, equipment, including end cell switches and connections, boards and panels, used exclusively for battery control, not part of general station switchboard

Ventilating equipment, including fans and motors, louvres, ducts not part of building

Note: Storage batteries used for control and general station purposes shall not be included in this account but in the account appropriate for their use.

363. Distribution Overhead Conductors

A. This account shall include the cost installed (see ÷ 197.21) of overhead conductors and line devices used on distribution lines. (See ÷ 197.35.)

B. This account shall be subdivided by utilities in Classes A, B, and C as follows:

- (1) Primary Alternating Current
- (2) Secondary Alternating Current
- (3) Direct Current

ITEMS

(See ÷ 197.14)

Conductors, including insulated and bare wire and cables

Insulators, including pin, suspension, and other types

Line devices, including ground wires, sectionalizing switches, circuit breakers, line cut-outs, fuse boxes, lightning arresters, etc.

Splices

Note A: Primary lines comprise cables, wires, and accessory line devices from the substation or other point of origin of the distribution

line to the line transformer or network transformer or to the service connections of high tension consumers "secondary" lines comprise cables, wires, and accessory line devices from the line transformer or network transformer to the service connection leading to premises of consumers.

Note B: The cost of conductors used solely for street lighting or signal systems shall not be included in this account.

Note C: This account shall not include pothead, or conductors in standpipe attached to pole or tower from insulators on pole to underground manholes and terminal chambers.

Note D: The cost of protective devices, except network protectors, on distribution lines may be included wholly in either account 363, Distribution Overhead Conductors, 364, Distribution Underground Conductors, as appropriate, or wholly in account 365, Line Transformers; provided that each utility shall notify the commission of the accounting practice adopted, which shall be consistently followed for all such equipment.

364. Distribution Underground Conductors

A. This account shall include the cost installed (see § 197.21) of underground conductors and line devices used on distribution lines. (See § 197.35.)

B. This account shall be subdivided by utilities in Classes A, B, and C as follows:

- (1) Primary Alternating Current
- (2) Secondary Alternating Current
- (3) Direct Current Feeders and Mains
- (4) Edison tube

ITEMS

(See § 197.14)

Armored conductors--buried, including insulators, insulating materials, splices, pot-heads, trenching, etc.

Armored conductors--submarine, including insulators, insulating materials, splices in terminal chamber, potheads, etc.

Cables in standpipe, including pothead and connection from terminal chamber or manhole to insulators on pole

Edison junction boxes, including compound, splicing materials, trenching, etc.

Edison tube, including coupling boxes and bells, compound, splicing materials, trenching, etc.

Fireproofing in connection with any items listed herein

Lead and fabric covered conductors, including insulators, splices, potheads, etc.

Line devices, including manual and automatic, disconnect or sectionalizing switches, circuit breakers, relays, etc.

Manhole type junction boxes

Municipal inspection (See also § 197.33.)

Pavement disturbed, including cutting and replacing pavement, pavement base, and sidewalks (See also § 197.33.)

Permits (See also § 197.33.)

Protection of street openings

Racking of cables

Note A: Primary lines comprise cables, wires, and accessory line devices from the substation or other point of origin of the distribution line to the line transformer or network transformer or to the service connections of high tension consumers. Secondary lines comprise cables, wires, and accessory line devices from the line transformer or network transformer to the service connection leading to premises of consumers.

Note B: The cost of conductors used solely for street lighting or signal systems shall not be included in this account.

Note C: The cost of protective devices, except network protectors, on distribution lines may be included wholly in either account 363, Distribution Overhead Conductors, 364, Distribution Underground Conductors, as appropriate, or wholly in account 365, Line Transformers; provided that each utility shall notify the commission of the accounting practice adopted, which shall be consistently followed for all such equipment.

365. Line Transformers

A. This account shall include the cost of overhead and underground distribution line transformers, pole-type and underground voltage regulators and net work protectors owned by the utility, for use in transforming electric energy to secondary voltages (i.e., voltages, usually 660 volts or less, at which the energy is ordinarily supplied to low tension consumers), whether actually in service or held in reserve, also the cost of auto, phase changing, and sign lighting transformers for use in connection with service connections to consumers' premises. This account shall include the cost of labor employed, materials used and expenses incurred in connection with the first installation of line transformers, voltage regulators, etc., the cost of which is included in this account.

B. This account shall be subdivided to show separately according to location:

- (1) Overhead
- (2) Underground

C. When a line transformer or other retirement unit is permanently retired from service, the cost thereof and the cost of its installation included herein shall be credited to this account.

D. The records covering line transformers shall be so kept that the utility can furnish the number of transformers of various capacities in service and those in reserve, and the location and the use of each transformer.

E. In respect to installation costs, this account may be divided into two subaccounts: subdivision 1 to include the labor, transportation and other components of costs (see § 197.21) applicable thereto involved in placing the transformers, network protectors, or voltage regulators included herein; subdivision 2 to include the cost installed of associated items of equipment includible in this account such as lightning arresters, cut outs, grounds, wiring and other permanent attachments. When this is done, the entire amount included in subdivision 2 at a location shall be considered one or more retirement units to be retired only when a complete retirement unit is removed or the location abandoned.

ITEMS

(See § 197.14)

Capacitors

Ground connections

Installation, labor of (first installation only)

Network protectors

Transformer cut-out boxes, installed (first set)

Transformer lightning arresters, installed (first set)

Transformers, line and network

Voltage regulators

Note A: The cost of line transformers may be excluded from this account and carried in account 123, Materials and Supplies, until their initial installation.

Note B: The cost of transformers used solely for street lighting or signal systems shall not be included in this account.

Note C: The cost of protective devices, except network protectors, on distribution lines may be included wholly in either account 363, Distribution Overhead Conductors, 364, Distribution Underground Conductors, as appropriate, or wholly in this account; provided that each utility shall notify the commission of the accounting practice adopted, which shall be consistently followed for all such equipment.

Note D: Minor items shall be included in this account only when in service or associated with a unit of property held in reserve; otherwise

they shall be carried in account 123, Materials and Supplies.

366. Overhead Services

A. This account shall include the cost installed (see § 197.21) of overhead conductors leading from the last pole of the transmission or distribution line to the point of connection with the consumer's wiring, when the utility incurs such cost or when the utility assumes full responsibility for maintenance and replacement of property paid for by the consumer.

ITEMS

(See § 197.14)

Brackets

Cables and wires

Insulators

Poles and attachments, located on consumer's premises and used solely for service to such consumer

Service switch

Suspension wire

Note A: When a consumer pays all or part of the cost of the service and such cost is properly includible in this account, the amount borne or contributed by the consumer shall be credited to account 263, Contributions for Extensions.

Note B: The utility shall maintain statistical records showing separately the number of alternating and the number of direct current services, subdivided between high tension and low tension, and the total circuit feet in each class, and further classified to show:

(a) Services whereto meters are connected.

(b) Services whereto no meters are connected.

367. Underground Services

A. This account shall include the cost installed (see § 197.21) of underground conductors leading from a point where wires leave the distribution box or manhole, or the last pole of the transmission or distribution line, to the point of connection with the consumer's wiring, when the utility incurs such cost or when the utility assumes full responsibility for maintenance and replacement of property paid for by the consumer.

ITEMS

(See § 197.14)

Cables and wires

Conduit

Overhead to underground, including conduit or standpipe, and conductor from last splice on pole to connection with consumer's wiring

Municipal inspection (See also ò 197.33.)

Pavement disturbed, including cutting and replacing pavement, pavement base, and sidewalks (See also ò 197.33.)

Permits (See also ò 197.33.)

Protection of street openings

Service switch

Note A: When a consumer pays all or part of the cost of the service and such cost is properly includible in this account, the amount borne or contributed by the consumer shall be credited to account 263,

Contributions for Extensions.

Note B: The utility shall maintain statistical records showing separately the number of alternating and the number of direct current services, subdivided between high tension and low tension, and the total circuit feet in each class, and further classified to show:

(a) Services whereto meters are connected.

(b) Services whereto no meters are connected.

368. Consumers' Meters

This account shall include the cost (see ò 197.21) of meters or devices and appurtenances thereto owned by the utility for use in measuring the electricity delivered to individual consumers.

ITEMS

(See ò 197.14)

Alternating current watthour meters

Current limiting devices

Demand indicators

Demand meters

Direct current watthour meters

Graphic demand meters

Instrument transformers

Maximum demand meters

Meter badges and their attachments

Meter boards

Meter fittings, connections, and shelves (first set)

Meter switches and cut-outs

Prepayment meters

Protective devices

Testing new meters

Note A: The cost of setting, removing, or resetting consumers' meters shall not be charged to this account. (See account 369, Consumers' Meter installation, and account 741.52, Removing and Resetting Meters.)

Note B: The utility shall maintain a statistical record to show

separately for each type and capacity of meter the number of utility-owned meters installed on consumers' premises (subdivided between active and cut out), and the cost thereof; the number of utility-owned meters carried herein but not installed on consumers' premises, including meters undergoing repairs, and the cost thereof; and the number of meters owned by consumers. (See also account 263, Contributions for Extensions.)

Note C: The cost of consumers' meters may be excluded from this account and carried in account 123, Materials and Supplies, until their initial installation.

369. Consumers' Meter Installation

A. This account shall include the cost (õ 197.21) to the utility of the first setting of meters or devices and appurtenances thereto used in measuring electricity delivered to individual consumers, the book cost of which is included in account 368, Consumers' Meters; also the cost to the utility of installations of meters owned by consumers. (See also account 263, Contributions for Extensions.)

B. When any metered service is discontinued and the meter removed and not immediately replaced (except in the case of seasonal consumers), this account shall be credited with an amount representing the actual or the average meter installation cost, if such installation cost is included herein.

Note A: The cost of removing consumers' meters and of setting meters substituted for them shall not be charged to this account but to account 741.52, Removing and Resetting Meters.

Note B: The utility shall maintain statistical records to show for meters in service separately for utility-owned meters and meters owned by consumer (1), the number of installations the cost of which is included herein, and (2), the number of meter installations which prior to the effective date of this system of accounts were charged to operating expenses.

Note C: Charges made to consumers for connection, disconnection, or reconnection of meters shall be credited to account 622, Miscellaneous Electric Revenues.

370. Other Property on Consumers' Premises

This account shall include the cost (see õ 197.21), including first setting and connecting, of equipment owned by the utility installed on consumers' premises which is not elsewhere provided for. (See also account 371, Street Lighting and Signal System Equipment.)

ITEMS

(See õ 197.14)

Appliances leased to consumers
Arc lights
Cable vaults
Foundations and settings, specially provided for equipment installed
Frequency changer sets
Lamps (bulbs) leased to consumers or supplied under tariff rates,
first installation
Motor generator sets
Motors
Switchboard panels, high or low tension
Wire and cable connections to incoming cables

371. Street Lighting and Signal System Equipment

A. This account shall include the cost installed (see § 197.21) to the utility of property used wholly for street lighting and/or traffic, fire alarm, police, and other signal systems if the utility pays for repairs and replacements thereof. If repairs and replacements are made by the operating municipality, the costs of such equipment shall not be included herein.

B. This account shall be subdivided as follows:

- (1) Overhead Systems
- (2) Underground Systems

ITEMS

(See § 197.14)

Armored conductors--buried or submarine, including insulators, insulating materials, splices, trenching, etc.

Automatic control equipment

Conductors--overhead or underground, including lead or fabric covered, parking cables, etc., including splices, insulators, etc.

Lamps--arc, incandescent, or other types, including glassware, suspension fixtures, brackets, etc.

Municipal inspection (See also § 197.33.)

Ornamental lamp posts

Pavement disturbed, including cutting and replacing pavement, pavement base, and sidewalks (See also § 197.33.)

Permits (See also § 197.33.)

Posts and standards

Protection of street openings

Relays or time clocks

Series contactors

Switches

Transformers, pole or underground

Note A: When readily accessible, cost of private street lighting equipment shall be carried in a separate subdivision of this account.

Note C: Utilities may subdivide this account to show the cost of street lighting equipment separately from signal system equipment.

381. Office Equipment

A. This account shall include the cost installed (see ò 197.21) of utility-owned furniture and office equipment whether used in offices or elsewhere when such equipment is not an integral part of the housing structure.

B. If the utility has equipment included in this account at more than one location, separate records shall be maintained for each location.

ITEMS

(See ò 197.14)

Addressing machines	Filing cabinets
Benches	Fire extinguisher equipment
Billing machines	Heaters and lamps (movable)
Book cases	Kitchen equipment
Card punching and sorting machines	Lighting fixtures (movable)
Carpets	Linoleum
Cash registers	Lockers
Chairs and stools	Pneumatic tube system
Checkwriters	Pulmotors
Chronograph systems	Rugs
Clocks	Safes (movable)
Computing machines	Tables
Counters	Teletypewriters
Desks	Time clocks
Equipment in drafting, rest, dining, recreation, and medical rooms	Typewriters Vacuum cleaners
Fans	Water coolers

Note A: Small articles of slight value or of short life shall not be charged to this account but to the appropriate expense account.

382. Stores Equipment

A. This account shall include the cost installed (see ò 197.21) of utility-owned equipment used in storehouses when such equipment is not an integral part of the housing structure.

B. If the utility has storehouses at more than one location, separate records shall be maintained for each location.

ITEMS

(See ò 197.14)

Chain falls	Scales
-------------	--------

Counters	Shelving
Cranes (portable)	Storage bins
Furniture	Time registers and time clocks
Hoists	Trucks, hand
Lockers	Wheelbarrows

383. Shop Equipment

A. This account shall include the cost installed (see § 197.21) of utility-owned equipment used in shops when such equipment is not an integral part of the housing structure.

B. If the utility has shops at more than one location, separate records shall be maintained for each location.

ITEMS

(See § 197.14)

Anvils	Gas producers
Belts, shafts and countershafts	Lathes
Boilers	Lockers
Cranes and hoists	Machine tools
Drill presses	Motor driven hand tools
Electric equipment	Motors and engines
Engines	Pipe cutting and threading machines
Forges	Pneumatic tools
Foundations and settings, specially constructed for and not expected to outlast apparatus for which provided	Smithing equipment Time registers and time clocks Tool racks
Furnaces	Vices
Furniture	Work benches

Note A: The cost of small portable tools and implements, such as hammers, screw drivers, saws, wrenches, files, jacks, wire cutters, climbing irons, shovels, etc., shall not be charged to this account. Such items shall be carried in account 123, Materials and Supplies, until issued for use, when such account shall be credited and the appropriate work order or account charged with the cost of tools or implements so issued.

384. Transportation Equipment

A. This account shall include the cost installed (see § 197.21) of utility-owned transportation and garage equipment when such equipment is not an integral part of the housing structure.

B. If the utility has garages at more than one location, separate records shall be maintained for each location.

ITEMS

(See § 197.14)

Airplanes and other aviation equipment	Horses, wagons, and harness
Automobile repair shop equipment	Horseshoeing equipment
Automobiles	Motorcycles
Barges, scows, and tankers	Motor trucks
Battery charging outfits	Oil storage tanks
Drays	Repair cars or trucks
Electric vehicles	Tractors
Gasoline and oil pumps (portable)	Trailers
Gasoline storage tanks	Trucks
Greasing tools	Tugs
	Other garage or stable equipment

Note A: Transportation equipment used wholly for one purpose may be included in the account appropriate for such use.

Note B: The accounting for transportation service furnished to the utility by equipment owned by the operating or lessor municipality shall be as provided in section 197.33.

385. Communication Equipment

This account shall include the cost installed (see § 197.21) of utility-owned telephone, telegraph, and wireless lines and equipment when such equipment is not an integral part of the housing structure.

ITEMS

(See § 197.14)

Antennae	Extension cords
Booths	Gongs
Cables	Hand sets, manual and dial
Distributing boards	Insulators
Intercommunicating sets	Switchboards
Loading coils	Telautograph circuit connections
Operators' desks	Telegraph receiving sets
Poles and fixtures used wholly for telephone or telegraph wire	Testing instruments
Radio transmitting and receiving sets	Towers
Sending keys	Underground conduits used wholly for telephone or telegraph wire and cable wires
Storage batteries	

386. Laboratory Equipment

A. This account shall include the cost installed (see § 197.21) of utility-owned laboratory equipment when such equipment is not an

integral part of the housing structure.

B. If the utility has laboratories at more than one location, separate records shall be maintained for each location.

ITEMS

(See § 197.14)

Ammeters	Potential batteries
Current batteries	Potentiometers
Frequency changers	Rotating standards
Galvanometers	Standard cell, reactance, resistor, and shunt
Inductometers	
Laboratory standard milli-voltmeters	Switchboards
Laboratory standard voltmeters	Synchronous timers
Milli-voltmeters	Testing panels
Motor generator sets	Testing resistors
Panels	Transformers
Phantom loads	Voltmeters
Portable graphic ammeters, voltmeters, and wattmeters	Other testing, laboratory or research equipment not provided for elsewhere
Portable loading devices	

387. General Tools and Implements

This account shall include the cost (see § 197.21) of utility-owned equipment used in construction or repair work outside of shops.

ITEMS

(See § 197.14)

Air compressors, including driving unit and vehicle	Derricks
Boilers	Engines
Cable pulling equipment	Forges
Concrete mixers and distributors	Furnaces
Ladders	Hoists
Lathes	Riveters
Motors	Steam hammers
Pile drivers	Steam shovels
Pipe machines	Surveying and leveling equipment
Power saws	Tool carts
Pumps	Trenching machines

Note A: The cost of small portable tools and implements, such as hammers, saws, wrenches, files, jacks, wire cutters, climbing irons, etc., shall not be charged to this account. Such items shall be carried

in account 123, Materials and Supplies, until issued for use, when such account shall be credited and the appropriate work order or other account charged with the cost of tools or implements so issued.

Note B: The accounting for use by the utility of tools and equipment owned by the operating or lessor municipality shall be as provided in section 197.33.

388. Miscellaneous General Equipment

This account shall include the cost installed (see ð 197.21) of miscellaneous general equipment which can not properly be assigned to any other account and which is not a part of any housing structure.

391. Miscellaneous Tangible Property

A. This account shall include the cost (see ð 197.21) to the utility of tangible electric operating property which can not properly be assigned to any other account.

B. A separate subdivision of this account shall be maintained for each class of property in which the utility has a relatively large investment, and records shall be kept so as to show separately the cost of each major item.

392. Undistributed Operating Property

A. When a utility purchases or sells any property or equipment as a whole or otherwise finds it necessary because of incomplete financial records to make a general readjustment of electric operating property accounts, temporary charges or credits to this account may be made on order of the commission, and the distribution of the amounts involved shall be made to the appropriate accounts only on order of the commission.

B. Balances in accounts previously carried representing operating property owned as of the effective date of this system of accounts, which were not classified by prescribed accounts prior to January 1, 1934, of which can not be allocated to the accounts prescribed herein, may be carried temporarily in this account. Proposed journal entries distributing such balances to the appropriate accounts, based on an inventory and appraisal at original cost (see ð 196.1, subd. (a) (33)) of the property involved, shall be filed with the commission not later than two years after the effective date of this system of accounts. Entries effecting such distribution shall be made only upon order of the commission.

OPERATING INCOME

- 401. Operating Revenues--Electric

This account shall include the total revenues, as provided in accounts 601 to 622, derived by the utility from its electric operations during the period covered by the income account. (See §§ 197.24, 197.25, 197.33.)

- 402. Operating Expenses--Electric

This account shall include the total expenses, as provided in accounts 701 to 793 incurred by the utility in its electric operations during the period covered by the income account. (See §§ 197.19, 197.30, 197.33.)

- 403. Taxes--Electric

A. This account shall include all taxes actually payable which relate to electric property, operations, and privileges for the period covered by the income account. (See also account 248, Taxes Accrued.)

B. Taxes on property leased from others for use in electric operations shall be included in this account when the lessee is obligated under the terms of the lease to pay such taxes in addition to a stipulated rent.

C. This account shall be charged each month with the amount of taxes which are applicable thereto, and concurrent credits shall be made to account 248, Taxes Accrued, or account 128, Prepayments. When it is not possible to determine the actual taxes to be accrued they shall be estimated and one-twelfth of the estimated annual amount shall be charged to this account monthly, with adjustments as the actual tax levies become known.

D. Utilities in Classes C and D may charge taxes to this account as they are paid instead of on the accrual basis provided in the preceding paragraphs.

Note A: Taxes on operating property other than that used in connection with electric operations shall be charged to the tax account of the appropriate operating department. Taxes on non-operating property shall be charged to account 449, Non-operating Revenue Deductions. Licenses, registration fees, and gasoline or other sales taxes borne by the utility shall be charged to appropriate operating expenses, property, or clearing accounts. Amounts payable annually or more frequently under the terms of franchises or consents, shall be included in account 791, Franchise Requirements.

Note B: Special assessments for street and other improvements and special benefit taxes shall be included in property, operating expense, or other accounts, as may be appropriate.

Note C: The records shall be kept so as to show separately the amount of each class of taxes included in this account, and the basis on which it is levied.

404. Uncollectible Revenues--Electric

This account shall be charged each month with amounts sufficient to provide for losses from uncollectible electric revenues, and concurrent credits shall be made to account 266, Reserve for Uncollectible Accounts. Losses thereafter sustained shall be charged to such reserve.

421. Operating Revenues--Other Operations

This account shall include the revenues derived by the utility during the period covered by the income account from operations which are subject to the jurisdiction of the commission, other than electric service. Insofar as such operations are subject to regulation, the utility shall keep the accounts relating thereto in accordance with the effective systems of accounts for the several classes of operations.

Note: The utility shall keep separately the revenues applicable to

each such operation.

422. Operating Expenses--Other Operations

This account shall include the expenses incurred by the utility during the period covered by the income account in connection with operations which are subject to the jurisdiction of the commission, other than electric service. In so far as such operations are subject to regulation, the utility shall keep the accounts relating thereto in accordance with the effective systems of accounts for the several classes of operations.

Note: The utility shall keep separately the expenses applicable to each such operation.

423. Taxes--Other Operations

A. This account shall include taxes actually payable which are applicable to operations which are subject to the jurisdiction of the commission, other than electric service. Insofar as such operations are subject to regulation, the utility shall keep the accounts relating thereto in accordance with the effective systems of accounts for the several classes of operations; except that utilities in Classes C and D may charge taxes to this account as they are paid instead of on the accrual basis.

B. This account shall be charged each month with the amount of taxes which are applicable thereto, and concurrent credits shall be made to account 248, Taxes Accrued or account 128, Prepayments. When it is not possible to determine the actual taxes, they shall be estimated and one-twelfth of the estimated annual amount shall be charged to this account monthly, with adjustments as the actual tax levies become known.

Note: The records shall be kept so as to show separately for each such operation the amount of each class of taxes included in this account, and the basis on which it is levied.

424. Uncollectible Revenues--Other Operations

A. This account shall be charged with amounts previously credited to operating revenue accounts for operations which are subject to the jurisdiction of the commission, other than electric service, which become uncollectible. In so far as such operations are subject to regulation, the utility shall keep the accounts relating thereto in accordance with the effective systems of accounts for the several classes of operations.

B. When losses from uncollectible revenues are provided for through a reserve, this account shall be charged with amounts so provided and concurrent credits shall be made to a subdivision of account 266, Reserve for Uncollectible Accounts. Losses thereafter sustained shall be

charged to such reserve.

Note: The utility shall keep separately the uncollectible revenues applicable to each such operation.

431. Rent from Lease of Electric Plant--Cr.

This account shall include the rent from electric property constituting a distinct operating unit leased to others for electric operations, when the lessee has exclusive possession. (See ò 197.28.)

Note: Rent from property carried in Operating Property--Electric, other than that covered in the text of this account, shall be credited to account 621, Rent from Electric Property.

432. Deductions from Rent Revenues--Electric

A. This account shall include the expenses, including repairs and depreciation, applicable to property the rents from which are included in account 431, Rent from Lease of Electric Plant--Cr.; and also taxes on such property and uncollectible rents.

B. This account shall be subdivided to show separately for each lease the following items:

- (1) Expenses
- (2) Depreciation and amortization
- (3) Taxes actually payable
- (4) Uncollectible Rents

433. Rent for Lease of Electric Plant--Dr.

This account shall include rents payable for property constituting a distinct operating unit leased from others for use in electric operations, when the utility has exclusive possession. (See ò 197.28.)

Note: Taxes payable upon leased property covered herein shall be included in account 403, Taxes--Electric.

434. Rent from Other Operating Property--Cr.

This account shall include the rent from operating property in department subject to the jurisdiction of the commission, other than electric property constituting a distinct operating unit leased to others, when the lessee has exclusive possession. (See ò 197.28.)

435. Deduction from Rent Revenues--Other Operations

This account shall include the expenses, including repairs and depreciation applicable to property the rents from which are included in account 434, Rent from Other Operating Property--Cr.; and also taxes on such property and uncollectible rents.

436. Rent for Other Operating Property--Dr.

This account shall include rents payable for property constituting a distinct operating unit leased from others for use in operations subject to the jurisdiction of the commission other than electric service, when

the utility has exclusive possession.

Note: Taxes payable upon leased property covered herein shall be included in account 423, Taxes--Other Operations.

NON-OPERATING INCOME

441. Revenues from Non-operating Property

This account shall include rent and other revenues derived by the utility from non-operating applicable to the period covered by the income account. (See § 196.1 subd. (a) (27) and account 112, Non-operating Property.)

442. Interest Revenues

A. This account shall include interest accruing to the utility except interest on current funds employed primarily in the conduct of the business for which the utility is organized. If it be required that interest on a special fund represented a reserve is to be added to such fund and equivalent appropriation made to the reserve, such interest shall be credited to this account and such appropriation shall be charged to account 459, Contractual Appropriations of Income, or account 460, Miscellaneous Deductions from income, as appropriate.

B. Interest accrued shall not be credited to this account unless its payment is reasonably assured; otherwise credits to this account shall be based upon the interest actually collected.

Note A: This account shall be kept so as to show separately the interest revenue from each investment.

Note B: No interest upon reacquired securities issued or assumed by the utility shall be credited to this account.

443. Dividend Revenues

This account shall include revenues derived by the utility from dividends on stocks. Accruals of dividends may be included herein if their payment is reasonably assured. If it be required that dividends from stock held in a special fund represented by a reserve are to be added to such fund and equivalent appropriations made to the reserve, such dividends shall be credited to this account and such appropriations shall be charged to account 459, Contractual Appropriations of Income, or account 460, Miscellaneous Deductions from Income, as appropriate.

444. Miscellaneous Non-operating Revenues

A. This account shall include revenues accruing to the utility in accordance with the terms of any contract by which the utility is entitled to participate in profits resulting from the operations of others.

B. This account shall also include amounts periodically debited to investment and special fund accounts whereby the excess of the face

amount of securities with a fixed date of maturity and accrued interest to date of purchase over the cost to the utility will be spread over the remaining life of the securities. No credits shall be made to this account in respect of discount upon securities so held unless there is reason to believe that the securities will be paid in full not later than their maturity date. The utility may defer entries in respect of such discount until the date of maturity or of redemption, at which time adjustment shall be made through Surplus.

C. This account shall also include all other non-operating revenues not provided for in the foregoing accounts.

Note: Profits from the operations of others do not include any dividends on stock.

449. Non-operating Revenue Deductions

A. This account shall include expenses, taxes, and uncollectible bills, applicable to the period covered by the income account, in connection with non-operating property or in connection with revenues which are includible in accounts 441 to 444.

B. This account shall also include amounts periodically credited to investment or special fund accounts whereby the excess of the cost to the utility over the face amount of securities and accrued interest thereon will be spread over the remaining life of the securities. The utility may defer entries in respect of such premium until the date of maturity or redemption, at which time adjustment shall be made through Surplus. (See § 197.8).

INCOME DEDUCTIONS

451. Interest on Long Term Debt

This account shall be charged each month with the interest accrued on unmatured outstanding long term debt (see § 196.1, subd. (a) (20)) issued or assumed. This account shall not include interest on nominally outstanding long term debt (including securities assumed) held by the utility in its treasury.

Note A: The amount charged to this account shall be concurrently credited to account 249, interest Accrued, or account 128, Prepayments.

Note B: This account shall be kept so that the utility will be able to furnish the interest accruals for each class or subdivision of long term debt.

452. Miscellaneous Interest Deductions

A. This account shall be charged each month with the interest accrued on all short term and other obligations of the utility not chargeable to account 451, interest on Long Term Debt, and not specifically provided for elsewhere.

B. This includes interest on unpaid taxes, on consumers' deposits, and on other similar obligations.

Note: This account shall be kept so that the utility will be able to furnish the interest accruals for each class of debt for which interest is charged hereto.

453. Amortization of Debt Discount and Expense

This account shall include each month the portion of the unamortized debt discount and expense on outstanding long term debt, which is applicable to the month. This portion shall be determined according to a rule the uniform application of which during the interval between the issuance and maturity of such debt will completely amortize the net discount at which the debt was issued and the debt expense connected therewith. (See also § 197.9.)

454. Release of Premium on Debt--Cr.

This account shall include each month the portion of the unamortized net premium on outstanding long term debt, which is applicable to the month. This portion shall be determined according to a rule the uniform application of which during the interval between the issuance and maturity of such debt will completely amortize the net premium at which the debt was issued. (See also § 197.9.)

455. Interest Charged to Property--Cr.

This account shall include concurrent credits for amounts charged to account 110, Construction Work in Progress, or other fixed asset accounts, for interest during construction. (See § 197.21, subd. (e), par. (10).)

456. Miscellaneous Amortization

A. This account shall include such amounts as the utility may be required by order of the commission to charge hereto. (See account 143, Suspense to be Amortized.)

B. This account shall also include provision for amortization of any excess of book cost (see § 196.1, subd. (a) (4)) over original cost (see § 196.1, subd. (a) (33)) of operating property.

Note: For instructions as to amortization of items of intangible operating property, see account 262, Amortization Reserves, and account 790, Amortization of Intangible Property.

459. Contractual Appropriations of Income

This account shall include appropriations of income when specifically required under the terms of ordinances, mortgages, deeds of trust, orders of courts, contracts, or other agreements.

Note: Appropriations of income resting in the discretion of the utility, i.e., not required by mortgages, contracts, etc., shall be

charged to account 460, Miscellaneous Deductions from Income.

460. Miscellaneous Deductions from Income

This account shall include deductions from income for purposes not provided for elsewhere and not specifically required under terms of ordinances, mortgages, contracts, etc. This includes donations to others than the operating or lessor municipality and expenses of issuing obligations other than long term debt.

SURPLUS ACCOUNTS

Surplus (Account 281), or Deficit (Account 161)

501. Balance Transferred from Income

502. Miscellaneous Credits to Surplus

512. Appropriations to Reserves

514. Miscellaneous Debits to Surplus

SURPLUS (ACCOUNT 281), OR DEFICIT (ACCOUNT 161)

An account shall be maintained in the general books of the utility and the balance therein, if a debit, shall appear on the asset side of the balance sheet under account 161, Deficit, and if a credit, on the liability side of the balance sheet under account 281, Surplus.

501. Balance Transferred from Income

This account shall include the net balance developed in the Income Account.

502. Miscellaneous Credits to Surplus

This account shall include all credits affecting the utility's surplus or deficit not elsewhere provided for, such as:

(a) Adjustments or cancellation of balance sheet accounts (except accounts with the operating or lessor municipality)

(b) Cancellation of balance sheet accounts representing unclaimed wages or other liabilities written off because of inability to locate the creditor

(c) Profits derived from sale of miscellaneous investments or non-operating property (the accounting for profit on operating property sold shall be as provided in account 261, Depreciation Reserves)

(d) Credits resulting from difference between the cost of securities reacquired and the amount chargeable to account 151, Reacquired Securities

(e) Unamortized premium on long term debt reacquired before maturity (see §197.9, subd. (f)).

512. Appropriations to Reserves

This account shall include appropriations of Surplus to reserves made by action of the board of directors or other governing body of the municipal electric utility, and not chargeable to account 459,

Contractual Appropriations of Income.

Note: All other appropriations to reserves or-for other purposes shall be charged to account 460, Miscellaneous Deductions from Income, or other appropriate income account.

514. Miscellaneous Debits to Surplus

This account shall include all debits affecting the utility's surplus or deficit not elsewhere provided for, such as:

- (a) Adjustments or cancellation of balance sheet accounts (except accounts with the operating or lessor municipality)
- (b) Losses or deficits which are not properly chargeable to operating expenses or income and for which no reserves have been provided
- (c) Losses resulting from the sale of miscellaneous investments or non-operating property
- (d) Debits resulting from difference between the cost of securities reacquired and the amount chargeable to account 151, Reacquired Securities
- (e) Unextinguished discount and expense on long term debt reacquired before maturity (see § 197.9, subd. (f)).

OPERATING REVENUE ACCOUNTS

Electric Service Revenues

- 601. Residential Sales
- 602. Commercial Sales
- 603. Industrial Sales
- 604. Public Street Lighting--Operating Municipality
- 605. Public Street Lighting--Other
- 606. Other Sales to Operating Municipality
- 607. Other Sales to Other Public Authorities
- 608. Sales to Other Distributors
- 609. Sales to Railroads and Street Railroads

Other Electric Revenues

- 621. Rent from Electric Property
- 622. Miscellaneous Electric Revenues

ELECTRIC SERVICE REVENUES

601. Residential Sales

This account shall include revenues from electricity supplied for residential purposes.

Note A: The records supporting the entries to this account shall be kept so that the number of kilowatt-hours sold and the revenue therefrom will be available for each service classification.

Note B: When electricity supplied through a single meter is used for both residential and commercial purposes, the total revenue may be

included in either this account or account 602, Commercial Sales.

602. Commercial Sales

This account shall include revenues from electricity supplied for commercial purposes.

Note A: The records supporting the entries to this account shall be kept so that the number of kilowatt-hours sold and the revenue therefrom will be available for each service classification.

Note B: When electricity supplied through a single meter is used for both residential and commercial purposes, the total revenue may be included in either this account or account 601, Residential Sales.

603. Industrial Sales

This account shall include revenues from electricity supplied for industrial purposes.

Note: The records supporting the entries to this account shall be kept so that the number of kilowatt-hours sold and the revenue therefrom will be available for each service classification.

604. Public Street Lighting--Operating Municipality

This account shall include revenues from electricity supplied and services rendered for the purpose of lighting streets, parks, and other public places by means of electricity for the operating municipality. (For basis of credits to this account, see section 197.33.)

Note: The records supporting the entries to this account shall be kept so that the number of kilowatt-hours supplied at each rate will be available.

605. Public Street Lighting--Other

This account shall include revenues from electricity supplied and services rendered for the purpose of lighting streets, parks, and other public places by means of electricity for municipalities other than the operating municipality, or other subdivisions or agencies of State or Federal governments.

Note: The records supporting the entries to this account shall be kept so that the number of kilowatt-hours supplied under each contract or rate will be available.

606. Other Sales to Operating Municipality

This account shall include revenues from electricity supplied to the operating municipality for purposes other than street lighting. (For basis of credits to this account, see section 197.33.)

Note: The records supporting the entries to this account shall be kept so that the number of kilowatt-hours supplied for each type of use and at each rate will be available.

607. Other Sales to Other Public Authorities

This account shall include revenues from electricity supplied for purposes other than street lighting or redistribution, to municipalities other than the operating municipality, or other subdivisions or agencies of State or Federal governments, under special contracts or agreements or service classifications applicable only to public authorities.

Note: The records supporting the entries to this account shall be kept so that the number of kilowatt-hours supplied under each contract or rate will be available.

608. Sales to Other Distributors

This account shall include revenues from electricity supplied to private electric companies or to public authorities for redistribution.

Note A: When the contract is a reciprocal one, i.e., when either party thereto may take electricity from the other, the gross amount receivable for electricity supplied to the other party shall be included herein in each accounting period and the gross amount payable for electricity received from the other party shall be charged to account 721, Electricity Purchased.

Note B: The records supporting the entries to this account shall show separately for each contract the point of delivery, the maximum demand upon the utility, the kilowatt-hours supplied, the basis for the charge, and the total charge to the distributor. When electricity is delivered to a distributor at more than one point, like detail shall be furnished for each point of delivery.

Note C: Revenues from electricity supplied to other public utilities for use by them shall be credited to account 602 or 603, unless supplied under the same contract as and not readily separable from revenues included in this account.

609. Sales to Railroads and Street Railroads

This account shall include revenues derived from electricity supplied to railroads and street railroads, for use primarily in propulsion of their cars.

Note: Revenues from electricity supplied to railroads or street railroads for other purposes shall be credited to account 602 or 603, unless supplied under the same contract as and not readily separable from revenues included in this account.

OTHER ELECTRIC REVENUES

621. Rent from Electric Property

A. This account shall include revenues from the rent of electric operating property except when such rental is under lease or agreement which gives the lessee exclusive possession of a distinct operating unit. (See also account 431, Rent from Lease of Electric Plant- Cr., ò

197.28.)

B. When the utility operates or maintains property for the joint benefit of itself and others, or for the joint benefit of the electric and other operating departments, under an arrangement for the apportionment of expenses upon the basis of relative benefits, any profits element or return and taxes upon the property involved shall be included in this account. Such profit or return on investment must be over and above all operating expenses, including provision for depreciation and amortization of the property involved. (See § 197.16.)

Note A: Rent from real estate held as an investment shall be included in account 441, Revenues from Non-operating Property.

Note B: When rent revenue is derived from property used jointly for electric and other operations, such revenue shall be equitably allocated among the departments involved.

622. Miscellaneous Electric Revenues

This account shall include revenues incidental to electric operations not specifically provided for elsewhere, including interest on funds used in operations; sales to others of excess water, hydraulic power, or steam; commissions on sales or distribution of others' electricity (sold under schedules filed by such other distributors); and charges for the connection, disconnection, or reconnection of meters.

Note: A separate subdivision shall be maintained for each class of revenues includible in this account which is substantial in amount.

700 PRODUCTION EXPENSES

ELECTRIC GENERATION--STEAM POWER

D C B 701 Supervision and Labor

A 701.1 Supervision and Engineering

This account shall include the pay and expenses of officers,
superintendents, and other employees engaged in supervising and

directing the operation of the steam power generating stations; assistants, chemists, general foremen, and clerical help on records; such portion of the salaries and expenses of the engineering staff, consulting operating engineers, and draftsmen, as may be applicable; and related office supplies and expenses (but not rent). (See 197.10.)

A 701.2 Boiler Labor

This account shall include the pay of employees in boiler rooms and elsewhere about the premises engaged in making steam.

ITEMS

(See § 197.14)

Boiler house engineer and assistants	Weighers
Feed-pump men	Labor employed:
Firemen	Blowing flues
Furnace operators	Cleaning boilers
Helpers	Handling coal and ashes within
Stoker attendants	boiler plant
Stokers	Pulverizing coal
Watchmen	Testing steam meters and gauges
Water tenders	and other instruments

Note: Do not include maintenance labor in this account.

A 701.3 Engine Labor

This account shall include the pay of employees engaged in operating prime movers, including steam engines, steam turbines, and auxiliary apparatus operated in connection therewith.

ITEMS

(See § 197.14)

Chief engineers and assistants	Watch engineers and assistants
Machinists and helpers	Wipers
Oilers	

Note: Do not include maintenance labor in this account.

A 701.4 Electric Labor

This account shall include the pay of employees engaged in operating electric generating and accessory equipment, including switchboards, feeder terminal boards, and other electric equipment, to the point where the electricity leaves the station for transmission or distribution.

ITEMS

(See § 197.14)

Dynamomen	Generator attendants
Electricians	Switchboard operators and assistants
Foremen and assistants	Wipers
Gallerymen	Wiremen

Note: Do not include maintenance labor in this account.

A 701.6 Miscellaneous Labor

This account shall include the pay of employees engaged in operating steam power generating stations which is not chargeable to the foregoing accounts.

ITEMS

(See § 197.14)

Elevator men	Watchmen
Janitors	Yard and building cleaners
Messengers	

Note: Do not include maintenance labor in this account.

D 702 Power Plant Supplies and Expenses

C B A 702.1 Fuel

This account shall include the cost delivered at station (see account 123, Materials and Supplies) of coal, oil, gas, or other fuel used in steam power generating stations. It shall also include the net cost of or amount realized from disposal of ashes.

Note: Records shall be maintained to show the quantity and cost of fuel used.

C B A 702.2 Water

This account shall include the cost of water for boilers, condensers, and for cooling engines. If water is purchased from sources other than the operating municipality, the charge shall be at the contract price or the meter rate; if purchased from the operating municipality, the charge shall be as provided in section 197.33; if pumped by the utility, the cost of pumping shall be charged to this account.

ITEMS

(See § 197.14)

	Water supply system operators
Employees:	Supplies:
Filter cleaners	Boiler compounds
General labor	Chemicals
Pumping station operators	Lubricants
Screen operators	Supplies, miscellaneous
Pumping supplies	

Note: Do not include in this account water used for general station purposes or the cost of maintaining water supply system.

C B 702.3 Miscellaneous Supplies and Expenses

A 702.32 Lubricants

This account shall include the cost of lubricants for machinery in steam power generating stations, including recovery of oil from waste

and the cost of handling and filtering.

Note A: Oil used in pumping water shall be charged to account 702.2, Water.

Note B: Do not include in this account oil for transformers, grease or oil for automobiles, trucks, and wagons, or oil for lamps or for similar purposes.

A 702.33 Production Supplies

This account shall include the cost of small tools and supplies used in the operation of steam power generating stations.

ITEMS

(See § 197.14)

Dynamo brushes	Steam and air hose
Fire room tools	Tools, hand
Gauge glasses	Washers
Handhole gaskets	Waste
Manhole gaskets	Wipers
Packing	

Note: Do not include in this account maintenance materials, fuel, or water.

A 702.34 Station Expense

This account shall include miscellaneous expenses incurred in operating steam power generating stations not elsewhere provided for.

ITEMS

(See § 197.14)

Boiler inspection fees	Meter supplies
Building service (but not rent)	Stationery and office supplies
Communication service	Transportation
Log sheets and charts	Water for fire protection or general use

D C 703 Repairs to Power Plant

B A 703.1 Repairs to Power Plant Structures

This account shall include the cost of repairs to buildings, structures, fixtures, and grounds, the book cost of which is included in account 311 (1), Steam Power Plant Land, and account 312 (1), Steam Power Plant Structures. (See § 197.10.)

Note: Repair items are indicated in section 197.29.

B 703.2 Repairs to Boiler Plant Equipment

A 703.21 Repairs to Furnaces and Boilers

This account shall include the cost of repairs to boilers and furnaces, the book cost of which is included in account 321, Boiler Plant Equipment, including brick work, water walls, stacks, boiler

foundations, flues and breeching, grate and stoker bars, valves and superheaters. (See § 197.10.)

Note: Repair items are indicated in section 197.29.

A 703.22 Repairs to Boiler Apparatus

This account shall include the cost of repairs to feed water, coal, and ash handling systems, and auxiliary apparatus in the boiler room, the book cost of which is included in account 321, Boiler Plant Equipment, such as air preheaters, ash disposal and coal handling equipment, combustion control system, draft apparatus, foundations, feed water apparatus, stokers and grinders with drives, piping pulverizing equipment, pumps, and water purification system. (See § 197.10.)

Note: Repair items are indicated in section 197.29.

A 703.23 Repairs to Steam Accessories

This account shall include the cost of repairs to the piping system in connection with the making of steam and delivery thereof to the prime movers, the book cost of which is included in account 321, Boiler Plant Equipment, such as main steam piping to throttle valve of engine, auxiliary steam main and auxiliary exhaust, make-up water, feed water, drip, blowoff and valve control system, pipe covering, valves, and fittings. (See § 197.10.)

Note: Repair items are indicated in section 197.29.

B 703.3 Repairs to Generator Units

A 703.31 Repairs to Prime Movers

This account shall include the cost of repairs to main steam engines and steam turbines the book cost of which is included in account 322, Engine Driven Generator Units--Steam, and account 323, Turbo-Generators--Steam. (See § 197.10.)

Note: Repair items are indicated in section 197.29.

A 703.32 Repairs to Generators

This account shall include the cost of repairs to main steam driven generators and main exciters, the book cost of which is included in account 322, Engine Driven Generator Units--Steam, and account 323, Turbo-Generators--Steam.

Note: Repair items are indicated in section 197.29.

B A 703.6 Repairs to Accessory Electric Equipment

This account shall include the cost of repairs to electric equipment the book cost of which is included in account 324, Accessory Electric Equipment--Steam. (See § 197.10.)

Note: Repair items are indicated in section 197.29.

B A 703.7 Repairs to Miscellaneous Power Plant Equipment

This account shall include the cost of repairs to miscellaneous

equipment the book cost of which is included in account 325, Miscellaneous Power Plant Equipment--Steam. (See § 197.10.)

Note: Repair items are indicated in section 197.29.

D C B A 704 Steam from Other Sources

A. This account shall include the cost of steam purchased for use in steam engines and turbines devoted to the production of electricity. If steam is purchased from the operating municipality the charge shall be as provided in section 197.33.

B. This account shall also include charges for steam transferred to electric generation when such steam is produced primarily for use in another operating department of the utility. (See also § 197.26.)

Note: This account shall be kept so as to show separately for each party from which steam is purchased, the point of delivery, the quantity, the price, and the total charge. When steam is transferred from another operating department, the utility shall be prepared to show full details of the cost of producing such steam, the basis of the charges to electric generation, and the extent and manner of use by each department involved.

D C B A 705 Steam Transferred--Cr.

This account shall include credits for steam transferred to another operating department of the utility or of the municipality when such steam is produced primarily for use in electric generation.

Note: The basis of credits to this account shall be clearly indicated. Such credits shall consist of the equitable proportion of the total cost of steam produced, including repairs and depreciation of power plant property and equipment. Any allowance in addition to the amount properly creditable to this account shall be included in account 621, Rent from Electric Property. (See also 197.33.)

D C B A 706 Depreciation of Power Plant

A. This account shall include the depreciation charges for the following classes of depreciable steam power generating property (except such as are chargeable to account 432, Deductions from Rent Revenues--Electric):

Steam Power Plant Land (account 311 (1))

Steam Power Plant Structures (account 312 (1))

Boiler Plant Equipment (account 321)

Engine Driven Generator Units Steam (account 322)

Turbo-Generators--Steam (account 323)

Accessory Electric Equipment--Steam (account 324)

Miscellaneous Power Plant Equipment--Steam (account 325)

B. The depreciation charges shall be computed in accordance with

subdivision (b) of section 197.7 and shall be concurrently credited to account 261, Depreciation Reserves.

D C B A 707 Production Rents

A. This account shall include rents includible in operating expenses (see § 197.28) for property of the operating municipality (see § 197.33) or of others used in connection with steam power generation.

B. This account shall be kept so as to show the rent for leased production property separately from rent for facilities operated under arrangements for the joint use of facilities of another; and also rents paid to the operating municipality separately from rents paid to others.

ELECTRIC GENERATION--HYDRAULIC POWER

D C B 708 Supervision and Labor

A 708.1 Supervision and Engineering

This account shall include the pay and expenses of officers, superintendents, and other employees engaged in supervising and directing the operation of hydraulic power generating stations; assistants, general foremen, and clerical help on records; such portion of the salaries and expenses of the engineering staff, consulting operating engineers, and draftsmen, as may be applicable; and related office supplies and expenses (but not rent). (See § 197.10.)

A 708.2 Hydraulic Labor

This account shall include the pay of employees engaged in operating hydraulic works, including reservoirs, dams, and waterways, and water wheels and turbines.

ITEMS

(See § 197.14)

Cleaners at reservoirs and screens Foremen

Flume patrolmen Intake operators

Note: Do not include maintenance labor in this account.

A 708.4 Electric Labor

This account shall include the pay of employees engaged in operating electric generating and accessory equipment, including switchboards, feeder terminal boards, and other electric equipment, to the point where the electricity leaves the station for transmission or distribution.

ITEMS

(See § 197.14)

Dynamomen Generator attendants

Electricians Switchboard operators and assistants

Foremen and assistants Wipers

Gallerymen Wiremen

Note: Do not include maintenance labor in this account.

operating hydraulic power generating stations not elsewhere provided for.

ITEMS

(See ÷ 197.14)

Building service (but not rent)	Meter supplies
Communication service	Stationery and office supplies
Log sheets and charts	Transportation

D C 710 Repairs to Power Plant

B A 710.1 Repairs to Power Plant Structures

This account shall include the cost of repairs to buildings, structures, fixtures, and grounds, the book cost of which is included in account 311 (2), Hydro-Electric Power Plant Land, and account 312 (2), Hydro-Electric Power Plant Structures. (See ÷ 197.10.)

Note: Repair items are indicated in section 197.29.

B 710.2 Repairs to Reservoirs, Dams, and Waterways

A 710.21 Repairs to Reservoirs, Dams, and Intakes

This account shall include the cost of repairs to reservoirs, dams, and intakes with their appurtenant structures, and facilities such as gates, raising and lowering apparatus, wasteways, spillways, fish ladders, etc., the book cost of which is included in account 331 (1), Reservoirs, Dams, and intakes. (See ÷ 197.10.)

Note: Repair items are indicated in section 197.29.

A 710.22 Repairs to Navigation Facilities

This account shall include the cost of repairs to locks, booms, sluices, regulating gates, and other appurtenant structures and facilities for navigation purposes, the book cost of which is included in account 331 (2), Navigation Facilities. (See ÷ 197.10.)

Note: Repair items are indicated in section 197.29.

A 710.23 Repairs to Waterways

This account shall include the cost of repairs to canals, ditches, flumes, tunnels, pipe lines, and other appurtenant structures and facilities, the book cost of which is included in account 331 (3), Waterways. (See ÷ 197.10.)

Note: Repair items are indicated in section 197.29.

A 710.24 Repairs to Forebays, Penstocks, and Tailraces

This account shall include the cost of repairs to forebays, penstocks, tailraces, and other appurtenant structures and facilities, the book cost of which is included in account 331 (4), Forebays, Penstocks, and Tailraces. (See ÷ 197.10.)

Note: Repair items are indicated in section 197.29.

B A 710.3 Repairs to Roads, Trails, and Bridges

This account shall include the cost of repairs to permanent roads, trails, bridges, and railways, the book cost of which is included in account 332, Roads, Trails, and Bridges. (See ÷ 197.10.)

Note: Repair items are indicated in section 197.29.

B A 710.4 Repairs to Water Wheels and Turbines

This account shall include the cost of repairs to hydraulic facilities from the connection with penstock or flume to tailrace of all main hydraulic turbines and water wheels the book cost of which is included in account 333, Water Wheels, Turbines, and Generators. (See ÷ 197.10.)

Note: Repair items are indicated in section 197.29.

B A 710.5 Repairs to Generators

This account shall include the cost of repairs to main water driven generators and main exciters the book cost of which is included in account 333, Water Wheels, Turbines, and Generators. (See ÷ 197.10.)

Note: Repair items are indicated in section 197.29.

B A 710.6 Repairs to Accessory Electric Equipment

This account shall include the cost of repairs to electric equipment the book cost of which is included in account 334, Accessory Electric Equipment--Hydro. (See ÷ 197.10.)

Note: Repair items are indicated in section 197.29.

B A 710.7 Repairs to Miscellaneous Power Plant Equipment

This account shall include the cost of repairs to miscellaneous equipment the book cost of which is included in account 335, Miscellaneous Power Plant Equipment--Hydro. (See ÷ 197.10.)

Note: Repair items are indicated in section 197.29.

D C B A 711 Depreciation of Power Plant

A. This account shall include the depreciation charges for the following classes of depreciable hydraulic power generation property (except such as are chargeable to account 432, Deductions from Rent Revenues--Electric):

Hydro-Electric Power Plant Land (account 311 (2))

Hydro-Electric Power Plant Structures (account 312 (2))

Reservoirs, Dams, and Waterways (account 331)

Roads, Trails, and Bridges (account 332)

Water Wheels, Turbines, and Generators (account 333)

Accessory Electric Equipment--Hydro (account 334)

Miscellaneous Power Plant Equipment--Hydro (account 335)

B. The depreciation charges shall be computed in accordance with subdivision (b) of section 197.7 and shall be concurrently credited to account 261, Depreciation Reserves.

D C B A 712 Production Rents

A. This account shall include rents includible in operating expenses (see § 197.28) for property of the operating municipality (see § 197.33) or of others used in connection with hydraulic power generation; and also assessments for current operation, maintenance, and interest in connection with government dams, structures, or head water improvements, or amounts payable for cost of administration under Federal or State water power authorities.

B. This account shall be kept so as to show the rent for leased production property separately from rent for facilities operated under arrangements for the joint use of facilities of another; and also rents paid to the operating municipality separately from rents paid to others.

ELECTRIC GENERATION--INTERNAL COMBUSTION ENGINE
POWER

D C B 713 Supervision and Labor

A 713.1 Supervision and Engineering

This account shall include the pay and expenses of officers, superintendents, and other employees engaged in supervising and directing the operation of internal combustion engine power generating stations, assistants, chemists, general foremen, and clerical help on records; such portion of the salaries and expenses of the engineering staff, consulting operating engineers, and draftsmen, as may be applicable; and related office supplies and expenses (but not rent). (See § 197.10.)

A 713.3 Engine Labor

This account shall include the pay of employees engaged in operating prime movers, including Diesel, gasoline, gas, or other internal combustion engines and auxiliary apparatus operated in connection therewith.

ITEMS

(See § 197.14)

Chief engineers and assistants	Watch engineers and assistants
Machinists and helpers	Wipers
Oilers	

Note: Do not include maintenance labor in this account.

A 713.4 Electric Labor

This account shall include the pay of employees engaged in operating electric generating and accessory equipment, including switchboards, feeder terminal boards, and other electric equipment, to the point where the electricity leaves the station for transmission or distribution.

ITEMS

(See § 197.14)

Filter cleaners	Boiler compounds
General labor	Chemicals
Pumping station operators	Lubricants
Screen operators	Pumping supplies
	Supplies, miscellaneous

Note: Do not include in this account water used for general station purposes or the cost of maintaining the water supply system.

A 714.32 Lubricants

This account shall include the cost of lubricants for machinery in internal combustion engine power generating stations, including recovery of oil from waste and the cost of handling and filtering.

Note A: Oil used in pumping water shall be charged to account 714.31, Water.

Note B: Do not include in this account oil for transformers, grease or oil for automobiles, trucks, or wagons, or oil for lamps or similar purposes.

A 714.33 Production Supplies

This account shall include the cost of small tools and supplies used in the operation of internal combustion engine power generating stations.

ITEMS

(See § 197.14)

Dynamo brushes	Tools, hand
Gauge glasses	Washers
Handhole gaskets	Waste
Manhole gaskets	Wipers
Packing	

Note: Do not include in this account maintenance materials, fuel, or water.

A 714.34 Station Expense

This account shall include miscellaneous expenses incurred in operating internal combustion engine power generating stations not elsewhere provided for.

ITEMS

(See § 197.14)

Building service (but not rent)	Meter supplies
Communication service	Stationery and office supplies
Log sheets and charts	Transportation

D C 715 Repairs to Power Plant

B A 715.1 Repairs to Power Plant Structures

This account shall include the cost of repairs to buildings,

structures, fixtures, and grounds, the book cost of which is included in account 311 (3), internal Combustion Power Plant Land, and of account 312 (3), Internal Combustion Power Plant Structures. (See § 197.10.)

Note: Repair items are indicated in section 197.29.

B 715.3 Repairs to Engine Driven Generator Units

A 715.31 Repairs to Prime Movers

This account shall include the cost of repairs to Diesel, gas, oil, and other internal combustion engines, the book cost of which is included in account 342, Engine Driven Generator Units--Internal Combustion. (See § 197.10.)

Note: Repair items are indicated in section 197.29.

A 715.32 Repairs to Generators

This account shall include the cost of repairs to main internal combustion engine driven generators and main exciters, the book cost of which is included in account 342, Engine Driven Generator Units Internal Combustion. (See § 97.10.)

Note: Repair items are indicated in section 197.29.

B A 715.6 Repairs to Accessory Electric Equipment

This account shall include the cost of repairs to electric equipment the book cost of which has included in account 344, Accessory Electric Equipment--Internal Combustion. (See § 197.10.)

Note: Repair items are indicated in section 197.29.

B A 715.7 Repairs to Miscellaneous Power Plant Equipment

This account shall include the cost of repairs to miscellaneous equipment the book cost of which is included in account 345, Miscellaneous Power Plant Equipment--Internal Combustion. (See § 197.10.)

Note: Repair items are indicated in section 197.29.

D C B A 716 Gas for Power

A. This account shall include the cost of gas purchased which is used for internal combustion power generation.

B. This account shall also include charges for gas transferred to electric operations when such gas is produced primarily for use in another operating department of the utility or of the municipality. (See § 197.33.)

Note: This account shall be kept so as to show separately for each party from which gas is purchased, the point of delivery, the quantity, the price, and the total charge. When gas is transferred from another operating department, the utility shall be prepared to show full details of the cost of producing such gas, the basis of the charges to electric operations, and the extent and manner of use by each department

involved.

* So in original. "ke" should be "be".

D C B A 717 Depreciation of Power Plant

A. This account shall include the depreciation charges of the following classes of depreciable internal combustion power generating property (except such as are chargeable to account 432, Deductions from Rent Revenues Electric):

Internal Combustion Power Plant Land (account 311 (3))

Internal Combustion Power Plant Structures (account 312 (3))

Engine Driven Generator Units--Internal Combustion (account 342)

Accessory Electric Equipment--Internal Combustion (account 344)

Miscellaneous Power Plant Equipment--Internal Combustion (account 345)

B. The depreciation charges shall be computed in accordance with subdivision (b) of section 197.7 and shall be concurrently credited to account 261, Depreciation Reserves.

D C B A 718 Production Rents

A. This account shall include rents includible in operating expenses (see § 197.28) for property of the operating municipality (see § 197.33) or of others used in connection with internal combustion power generation.

B. This account shall be kept so as to show the rent for leased production property separately from rent for facilities operated under arrangements for the joint use of facilities of another; and also rents paid to the operating municipality separately from rents paid to others.

OTHER PRODUCTION EXPENSES

D C B A 721 Electricity Purchased

This account shall include the cost at the point of delivery of electricity purchased for resale, including charges for readiness to serve and amounts payable to others for their electricity sold by the accounting utility under agency agreements.

Note A: When the contract is a reciprocal one, i.e., when either party thereto may take electricity from the other, the amount payable for the gross quantity of electricity received from the other party shall be charged hereto in each accounting period and the amount receivable for for* the gross quantity supplied to the other party shall be included in the appropriate revenue account.

* So in original.

Note B: The records supporting the entries to this account shall be kept so as to show for each party from which electricity is obtained, the point of delivery, the maximum demand, the quantity purchased, the basis of charges, and the amount payable therefor.

D C B A 722 Purchased Electricity Expense

This account shall include the cost of operating the equipment used in measuring and testing purchased electricity and any other expenses incidental to the purchase of electricity which are not otherwise provided for.

D C B A 726 Production Expenses Transferred--Cr.

This account shall include concurrent credits for charges representing production expenses of electricity supplied to another coordinate department.

Note: Basis of credits to this account shall be clearly indicated. Such credits shall consist of the equitable proportion of the total production cost, including repairs and depreciation of production property. Any allowance in addition to the amount properly creditable to this account shall be included in account 621, Rent from Electric Property. (See also § 197.33.)

D C B A 729 Duplicate Production Charges--Cr.

This account shall include concurrent credits for charges made for electricity consumed in generating stations.

730 TRANSMISSION EXPENSES

D 731 Transmission System Operation

C B A 731.1 Transmission Supervision and Engineering

This account shall include the pay and expenses of officers, superintendents, and other employees engaged in supervising and directing the operation of the transmission system (see § 197.35); assistants, general foremen, and clerical help on records; such portion of the salaries and expenses of the engineering staff, consulting operating engineers, and draftsmen, as may be applicable; and related office supplies and expenses (but not rent). (See § 197.10.)

C B 731.2 Operation of Transmission Substations

A 731.21 Transmission Substation Labor

This account shall include the pay of employees in transmission substations (see § 197.35), including routine inspecting and testing of equipment operated.

Note: Do not include maintenance labor in this account.

A 731.22 Transmission Substation Supplies and Expenses

This account shall include the cost of supplies used and expenses incurred in the operation of transmission substations. (See § 197.35.)

ITEMS

(See § 197.14)

Building service (but not rent)	Records, substation
Communication service	Stationery and office supplies

Lubricants and waste Tools
Meter supplies Water

Note: Do not include maintenance materials in this account.

C B 731.4 Operation of Transmission Lines

A 731.41 Central Load Dispatching Labor

This account shall include the pay of system operators, load dispatchers, and their assistants engaged in the operation of a central load dispatching system.

A 731.42 Operation of Overhead Transmission Lines

This account shall include the pay and expenses of employees engaged in the operation of the overhead transmission lines (see § 197.35), and supplies and small tools used in connection therewith.

ITEMS

(See § 197.14)

Clearing brush and other refuse Transportation
Patrolling Trimming trees
Shop expenses Voltage surveys
Testing lines

Note: Do not include in this account maintenance labor or materials.

A 731.43 Operation of Underground Transmission Lines

This account shall include the pay and expenses of employees engaged in the operation of underground transmission lines (see § 197.35), and supplies and small tools used in connection therewith.

ITEMS

(See § 197.14)

Cleaning subway ducts, manholes, Testing lines
and sewer connections Transportation
Patrolling Voltage surveys
Shop expenses

Note: Do not include in this account maintenance labor or materials.

A 731.45 Miscellaneous Transmission Line Operation Expense

This account shall include miscellaneous supplies used and expenses incurred not provided for in the foregoing transmission line operating accounts. (See § 197.35.)

Note: Do not include in this account maintenance labor or materials.

D C 732 Repairs to Transmission System

B A 732.1 Repairs to Transmission System Structures

This account shall include the cost of repairs to transmission structures, fixtures, and grounds, the book cost of which is included in account 311 (5), Transmission System Land and Rights of Way, and account 312 (5), Transmission System Structures. (See § 197.10.)

Note: Repair items are indicated in section 197.29.

B A 732.2 Repairs to Transmission Roads and Trails

This account shall include the cost of repairs to roads, trails, and bridges, the book cost of which is included in account 351, Transmission Roads and Trails. (See § 197.10.)

Note: Repair items are indicated in section 197.29.

B A 732.3 Repairs to Transmission Substation Equipment

This account shall include the cost of repairs to substation equipment the book cost of which is included in account 352, Transmission Substation Equipment. (See § 197.10.)

Note: Repair items are indicated in section 197.29.

B A 732.4 Repairs to Transmission Overhead Conductors

This account shall include the cost of repairs to overhead conductors and line devices the book cost of which is included in account 353, Transmission Overhead Conductors. (See § 197.10.)

Note: Repair items are indicated in section 197.29.

B A 732.5 Repairs to Transmission Underground Conductors

This account shall include the cost of repairs to underground conductors and line devices the book cost of which is included in account 354, Transmission Underground Conductors. (See § 197.10.)

Note: Repair items are indicated in section 197.29.

D C B A 733 Depreciation of Transmission Property

A. This account shall include the depreciation charges for the following classes of depreciable transmission system property (except such as are chargeable to account 432, Deductions from Rent Revenues--Electric):

Transmission System Land and Rights of Way (account 311 (5))

Transmission System Structures (account 312 (5))

Transmission Roads and Trails (account 351)

Transmission Substation Equipment (account 352)

Transmission Overhead Conductors (account 353)

Transmission Underground Conductors (account 354)

B. The depreciation charges shall be computed in accordance with subdivision (b) of section 197.7 and shall be concurrently credited to account 261, Depreciation Reserves.

D C B A 734 Transmission Rents

A. This account shall include rents includible in operating expenses (see § 197.28) for property of the operating municipality (see § 197.33) or of others used in connection with the operation or maintenance of the transmission system, including annual payments to state or federal governments for use and occupancy of public lands and reservations for

transmission rights of way.

B. This account shall be kept so as to show the rent for leased transmission property separately from rent for facilities operated under arrangements for the joint use of facilities of another; and also rents paid to the operating municipality separately from rents paid to others.

735 MAINTENANCE OF POLES, TOWERS, FIXTURES AND CONDUITS

D C B A 736 Repairs to Poles, Towers, and Fixtures

This account shall include the cost of repairs to poles, towers, and fixtures the book cost of which is included in account 358, Poles, Towers, and Fixtures. (See § 197.10.)

Note: Repair items are indicated in section 197.29.

D C B A 737 Repairs to Underground Conduits

This account shall include the cost of repairs to conduits the book cost of which is included in account 359, Underground Conduits. (See § 197.10.)

Note: Repair items are indicated in section 197.29.

D C B A 738 Depreciation of Poles, Towers, Fixtures, and Conduits

A. This account shall include the depreciation charges for the following classes of depreciable property (except such as are chargeable to account 432, Deductions from Rent Revenues--Electric):

Poles, Towers, and Fixtures (account 358)

Underground Conduits (account 359)

B. The depreciation charges shall be computed in accordance with subdivision (b) of section 197.7 and shall be concurrently credited to account 261, Depreciation Reserves.

740 DISTRIBUTION EXPENSES

D 741 Distribution System Operation

C B A 741.1 Distribution Supervision and Engineering

This account shall include the pay and expenses of officers, superintendents, and other employees engaged in supervising and directing the operation of the distribution system (see § 197.35); assistants, general foremen, and clerical help on records; such portion of the salaries and expenses of the engineering staff, consulting operating engineers, and draftsmen, as may be applicable; and related office supplies and expenses (but not rent). (See § 197.10.)

C B 741.2 Operation of Distribution Substations

A 741.21 Distribution Substation Labor

This account shall include the pay of employees in distribution substations (see § 197.35), including routine inspecting and testing of equipment operated.

Note: Do not include maintenance labor in this account.

A 741.22 Distribution Substation Supplies and Expenses

This account shall include the cost of supplies used and expenses incurred in the operation of distribution substations. (see ÷ 197.35.)

ITEMS

(See ÷ 197.14)

Building service (but not rent)	Stationery and office supplies
Communication service	Tools
Lubricants and waste	Transportation
Meter supplies	Water
Records, substation	

Note: Do not include maintenance materials in this account.

C B 741.3 Operation of Storage Batteries

A 741.31 Storage Battery Labor

This account shall include the pay of battery men, inspectors, and testers engaged in the operation of storage batteries the book cost of which is included in account 362, Storage Battery Equipment.

A 741.32 Storage Battery Supplies and Expenses

This account shall include the cost of supplies used and expenses incurred in the operation of storage batteries the book cost of which is included in account 362, Storage Battery Equipment.

ITEMS

(See ÷ 197.14)

Acid	Paint
Automatic cell fillers	Rubber hose
Brooms	Shoes
Brushes for boosters and compensators	Soda
Distilled water for cells	Sponges
Gloves	Thermometers
Hydrometers	Waste
Mops	

Note: Do not include maintenance materials in this account.

C B 741.4 Operation of Distribution Lines

A 741.42 Operation of Overhead Distribution Lines

This account shall include the pay and expenses of employees engaged in the operation of overhead distribution lines (see ÷ 197.35) and services, and supplies and small tools used in connection therewith.

ITEMS

(See ÷ 197.14)

Clearing brush and other refuse	Transportation
Patrolling	Trimming trees

expenses incurred in removing and resetting or changing location of meters on consumers' premises.

Note: The cost of the first setting of meters on a new service line shall be charged to account 369, Consumers' Meter Installation.

C B A 741.6 Service on Consumers' Premises

This account shall include the cost of labor and materials used and expenses incurred in work on consumers' premises other than those included in accounts 741.44, Removing and Resetting Line Transformers, 741.52, Removing and Resetting Meters, and 742.81, Testing Consumers' Meters.

ITEMS

(See § 197.14)

Changing location of lamps

Improving character of service

Inspecting premises

Installing, removing, and renewing lamps

Investigating and adjusting consumers' service complaints

Moving appliances

Repairing wiring, fixtures, and appliances

Testing consumers' equipment

Note A: Damages to consumers' equipment by employees of the utility, whether incidental to the work or the result of negligence, shall be charged to the job on which the employees were engaged at the time such damage occurred.

Note B: Expenses incidental to taking routine demands shall be charged to account 742.81, Testing Consumers' Meters; those incidental to taking demand and power factor readings for billing purposes shall be charged to account 761.22, Meter Reading.

D 742 Repairs to Distribution System

C 742.1 Repairs to Distribution Structures and Equipment

B A 742.11 Repairs to Distribution System Structures

This account shall include the cost of repairs to buildings, fixtures, and grounds, the book cost of which is included in account 311 (6), Distribution System Land and Rights of Way, account 312 (6), Distribution System Structures. (See § 197.10.)

Note: Repair items are indicated in section 197.29.

B A 742.13 Repairs to Distribution Substation Equipment

This account shall include the cost of repairs to distribution substation equipment, the book cost of which is included in account 361, Distribution Substation Equipment. (See § 197.10.)

Note: Repair items are indicated in section 197.29.

B A 742.14 Repairs to Storage Battery Equipment

This account shall include the cost of repairs to supplementary and standby storage battery equipment, the book cost of which is included in account 362, Storage Battery Equipment. (See § 197.10.)

Note: Repair items are indicated in section 197.29.

C B 742.4 Repairs to Overhead Distribution Conductors

A 742.41 Repairs to Alternating Current Distribution Overhead Conductors

This account shall include the cost of repairs to alternating current overhead conductors and line devices, the book cost of which is included in subdivisions (1) and (2) of account 363, Distribution Overhead Conductors. (See § 197.10.)

Note: Repair items are indicated in section 197.29.

A 742.42 Repairs to Direct Current Overhead Conductors

This account shall include the cost of repairs to direct current overhead conductors and line devices, the book cost of which is included in subdivision (3) of account 363, Distribution Overhead Conductors. (See § 197.10.)

Note: Repair items are indicated in section 197.29.

C B 742.5 Repairs to Underground Distribution Conductors

A 742.51 Repairs to Alternating Current Distribution Underground Conductors

This account shall include the cost of repairs to underground alternating current conductors and line devices, the book cost of which is included in subdivisions (1) and (2) of account 364, Distribution Underground Conductors. (See § 197.10.)

Note: Repair items are indicated in section 197.29.

A 742.52 Repairs to Direct Current Underground Feeders and Mains, and Edison Tube

This account shall include the cost of repairs to underground direct current feeders, mains, Edison Tube, and line devices, the book cost of which is included in subdivisions (3) and (4) of account 364, Distribution Underground Conductors. (See § 197.10.)

Note: Repair items are indicated in section 197.29.

C B 742.6 Repairs to Line Transformers

A 742.61 Repairs to Overhead Line Transformers

This account shall include the cost of repairs to overhead line transformers the book cost of which is included in account 365 (1), Line Transformers--Overhead. (See § 197.10.)

Note: Repair items are indicated in section 197.29.

A 742.62 Repairs to Underground Line Transformers

This account shall include the cost of repairs to underground line transformers the book cost of which is included in account 365 (2), Line Transformers--Underground. (See § 197.10.)

Note: Repair items are indicated in section 197.29.

C B 742.7 Repairs to Services

A 742.71 Repairs to Overhead Services

This account shall include the cost of repairs to services the book cost of which is included in account 366, Overhead Services. (See § 197.10.)

Note: Repair items are indicated in section 197.29.

A 742.72 Repairs to Underground Services

This account shall include the cost of repairs to services the book cost of which is included in account 367, Underground Services. (See § 197.10.)

Note: Repair items are indicated in section 197.29.

C B 742.8 Testing and Repairing Consumers' Meters

A 742.81 Testing Consumers' Meters

This account shall include the cost of routine testing and inspection of meters, including demand meters, on consumers' premises or in meter shops, and the preparation of test cards and load cars.

Note: The cost of the first test of meters and auxiliary equipment shall be charged to the account to which such meters are charged.

A 742.82 Repairs to Consumers' Meters

This account shall include the cost of repairs to meters, devices, and appurtenances thereto, the book cost of which is included in account 368, Consumers' Meters, and account 369, Consumers' Meter Installation. (See § 197.10.)

Note: Repair items are indicated in section 197.29.

C B A 742.9 Repairs to Other Property on Consumers' Premises

This account shall include the cost of repairs to property on consumers' premises, the book cost of which is included in account 370, Other Property on Consumers Premises. (See § 197.10.)

Note: Repair items are indicated in section 197.29.

D C B A 743 Depreciation of Distribution Property

A. This account shall include the depreciation charges for the following classes of depreciable distribution property (except such as are chargeable to account 432, Deductions from Rent Revenues--Electric):

Distribution System Land and Rights of Way (account 311 (6))

Distribution System Structures (account 312 (6))

Distribution Substation Equipment (account 361)

Storage Battery Equipment (account 362)

Distribution Overhead Conductors (account 363)
Distribution Underground Conductors (account 364)
Line Transformers (account 365)
Overhead Services (account 366)
Underground Services (account 367)
Consumers' Meters (account 368)
Consumers' Meter Installation (account 369)
Other Property on Consumers' Premises (account 370)

B. The depreciation charges shall be computed in accordance with subdivision (b) of section 197.7 and shall be concurrently credited to account 261, Depreciation Reserves.

D C B A 744 Distribution Rents

A. This account shall include rents includible in operating expenses (see § 197.28) for property of the operating municipality (see § 197.33) or of others used in connection with the operation or maintenance of the distribution system (see § 197.35*, including annual payments to State or Federal governments for use and occupancy of public lands and reservations for distribution rights of way.

* So in original. Closing parentheses inadvertently omitted.

B. This account shall be kept so as to show the rent for leased distribution property separately from rent for facilities operated under arrangements for the joint use of facilities of another; and also rents paid to the operating municipality separately from rents paid to others.

750 STREET LIGHTING AND SIGNAL SYSTEM EXPENSES

D 751 Street Lighting and Signal System Operation

C B A 751.1 Street Lighting and Signal System Supervision and Engineering

This account shall include the pay and expenses of officers, superintendents, and other employees engaged in supervising and directing the operation of street lighting and signal systems; assistants, general foremen, and clerical help on records; such portion of the salaries and expenses of the engineering staff, consulting operating engineers, and draftsmen, as may be applicable; and related office supplies and expenses (but not rent). (See also §§ 197.10, 197.33.)

Note: The utility may keep expenses applicable to street lighting separate from expenses applicable to signal system operations.

C B 751.2 Operation of Street Lighting and Signal Systems

A 751.21 Operation of Overhead Street Lighting and Signal Systems

This account shall include the cost of labor and materials used and expenses incurred in the operation of overhead street lighting and

signal systems, including traffic, fire and police signal systems.

ITEMS

(See § 197.14)

Clearing brush and other refuse Transportation

Patrolling Trimming trees

Testing lines Voltage surveys

Note A: Do not include in this account maintenance labor or materials.

Note B: The utility may keep expenses applicable to street lighting separate from expenses applicable to signal system operations.

A 751.22 Operation of Underground Street Lighting and Signal Systems

This account shall include the cost of labor and materials used and expenses incurred in the operation of street lighting and signal systems, including traffic, fire, and police signal systems.

ITEMS

(See § 197.14)

Cleaning subway ducts, manholes, Testing lines
and sewer connections Transportation

Patrolling Voltage surveys

Note A: Do not include in this account maintenance labor or materials.

Note B: The utility may keep expenses applicable to street lighting separate from expenses applicable to signal system operations.

D C B A 752 Repairs to Street Lighting and Signal System Equipment

A 752.1 Repairs to Overhead Street Lighting and Signal System Equipment

This account shall include the cost of repairs to overhead street lighting and signal system equipment the book cost of which is included in account 371 (1), Street Lighting and Signal System Equipment--Overhead.

Note A: Repair items are indicated in Section 197.29.

Note B: The utility may keep expenses applicable to street lighting separate from expenses applicable to signal system operations.

A 752.2 Repairs to Underground Street Lighting and Signal System Equipment

This account shall include the cost of repairs to underground street lighting and signal system equipment the book cost of which is included in account 371 (2), Street Lighting and Signal System Equipment--Underground.

Note A: Repair items are indicated in section 197.29.

Note B: The utility may keep expenses applicable to street lighting separate from expenses applicable to signal system operations.

D C B A 753 Depreciation of Street Lighting and Signal System Equipment

A. This account shall include the depreciation charges for street lighting and signal system equipment the book cost of which is included in account 371, Street Lighting and Signal System Equipment (except such as are chargeable to account 432, Deductions from Rent Revenues--Electric).

B. The depreciation charges shall be computed in accordance with subdivision (b) of section 197.7 and shall be concurrently credited to account 261, Depreciation Reserves.

Note: The utility may keep expenses applicable to street lighting separate from expenses applicable to signal system operations.

D C B A 754 Street Lighting and Signal System Rents

A. This account shall include rents includible in operating expenses (see § 197.28) for property of the operating municipality (see § 197.33) or of others used in connection with the operation or maintenance of street lighting or signal systems.

B. This account shall be kept so as to show the rents for such property separately from rent for facilities operated under arrangements for the joint use of facilities of others; and also rents paid to the operating municipality separately from rents paid to others.

Note: The utility may keep expenses applicable to street lighting separate from expenses applicable to signal system operations.

760 CONSUMERS' ACCOUNTING AND COLLECTING EXPENSES

D C 761 Consumers' Accounting and Collecting Labor and Supplies

Note: When duties of individual employees are so diversified that distribution of pay to this account and to account 771, Sales Labor and Supplies, and account 781, General Office Salaries and Expenses, is impracticable, Class D utilities may charge such pay to the account or accounts to which the major portion of the time of such employees is applicable. Office supplies and expenses may be accounted for in like manner.

B A 761.1 Consumers' Accounting and Collecting Supervision

This account shall include the pay and expenses of officers and employees engaged in supervising and directing work on consumers' contracts, orders, inquiries, and accounts, and in meter reading and collecting; and related office supplies and expenses (but not rent). (See § 197.10.)

B 761.2 Consumers' Orders, Meter Reading, and Collecting

A 761.21 Consumers' Orders

This account shall include the pay and expenses of employees engaged in work on consumers' applications, contracts, orders, and inquiries;

and supplies used and expenses incurred in connection therewith. (See §§ 197.10, 197.33.)

ITEMS

(See § 197.14)

Employees on:	Inquiries
Complaints	Filing in connection with above
Contracts	Typing in connection with above
Expenses:	Repairs to furniture and office
Books	equipment
Building service (but not rent)	Stationery
Office supplies	Transportation
Postage	

A 761.22 Meter Reading

This account shall include the pay and expenses of employees engaged in reading consumers' meters, and supplies used and expenses incurred in connection therewith. (See §§ 197.10, 197.33.)

ITEMS

(See § 197.14)

Badges	Meter readers, pay of
Building service (but not rent)	Transportation
Forms for recording readings	Uniforms
Lamps	

A 761.23 Collecting

This account shall include the pay and expenses of employees engaged in collecting consumers' bills, and supplies used and expenses incurred in connection therewith. (See §§ 197.10, 197.33.)

ITEMS

(See § 197.14)

Building service (but not rent)	Postage
Commissions, fees, or salaries of collectors	Repairs to furniture and office equipment
	Stationery and printing
Disconnection for non-payment of bills	Transportation
Office supplies	

B A 761.3 Consumers' Billing and Accounting

This account shall include the pay and expenses of employees engaged in consumers' billing and accounting, and supplies used and expenses incurred in connection therewith. (See §§ 197.10, 197.33.)

ITEMS

(See § 197.14)

Accounts, consumers' keeping of	Office supplies
---------------------------------	-----------------

Addressograph plates	Postage
Billing	Repairs to furniture and office equipment
Bookkeeping	Stationery and printing
Books	Statistical work on consumers' accounts

Building service (but not rent) Tabulating sales
 Delivery of bills Transportation
 B A 761.4 Miscellaneous Consumers' Accounting and Collecting Expenses

This account shall include the labor and materials used and expenses incurred in consumers' accounting and collecting which are not chargeable to the foregoing accounts.

D C B A 764 Consumers' Accounting and Collecting Rents

This account shall include rents includible in operating expenses (see § 197.28) for property of the operating municipality (see § 197.33) or of others used in connection with consumers' accounting and collecting.

770 SALES EXPENSES

D C 771 Sales Labor and Supplies

Note: When duties of individual employees are so diversified that distribution of pay to this account and to account 761, Consumers' Accounting and Collecting Labor and Supplies, and account 781, General Office Salaries and Expenses, is impracticable, Class D utilities may charge such pay to the account or accounts to which the major portion of the time of such employees is applicable. Office supplies and expenses may be accounted for in like manner.

B A 771.1 Sales Supervision

This account shall include the pay and expenses of officers and employees engaged in supervising and directing the sales department and the solicitation of new business; assistants, salesmen, stenographers, and clerical help on records; and related office supplies and expenses (but not rent). (See §§ 197.10, 197.33.)

B 771.2 Demonstration, Advertising, and Other Sales Expenses

A 771.21 Demonstration

This account shall include the labor and materials used and expenses incurred in demonstrating the proper use of appliances or other equipment.

ITEMS

(See § 197.14)

Employees:	Expenses:
Demonstrators	Building service (but not rent)

Instructors
Typists and clerks

Communication service
Demonstration supplies
Electric service
Transportation

A 771.22 Advertising

This account shall include the labor and materials used and expenses incurred in connection with advertising for the purpose of promoting the sale of electricity.

ITEMS

(See § 197.14)

Advertising in newspapers, periodicals, etc.

Advertising manager and assistants

Clerks

Materials and expenses in preparing:

Advertisements

Booklets

Bulletins

Dodgers

Posters

Stenographers and typists

Note B: Advertisements not directly connected with the promotion of the sale of electricity, such as advertisements in connection with employment, changes in rates, cases before regulatory commissions or courts, the sale of bonds, or other securities, or general public relations, shall not be included in this account but in account 785, Other General Expenses, or other appropriate account.

A 771.23 Miscellaneous Sales Expenses

This account shall include labor and materials used and expenses incurred in soliciting new business other than those chargeable to the foregoing accounts. (See also § 197.33.)

ITEMS

(See § 197.14)

Canvassers, pay and expenses Estimates, cost of preparing

Commissions Installations, technical advice on

D C B A 772 Appliance Selling and Jobbing

A. This account shall include revenues derived from the sale by the utility or its employees or agents, of goods or appliances which operate by means of electricity; also the performance, by the utility or by its employees, of jobbing or contract work, such as wiring and installing appliances, constructing at consumers' expense services not includible in operating property, etc.

B. This account shall also include the profit or commission accruing to the utility on merchandise sales or on jobbing for others as agent.

C. To this account shall be charged the cost of merchandise sold and jobbing work done for its own account.

D C B A 774 Sales Department Rents

This account shall include rents includible in operating expenses (see § 197.28) for property of the operating municipality (see § 197.33) or of others used for the sales department.

780 ADMINISTRATIVE AND GENERAL EXPENSES

D C 781 General Office Salaries and Expenses

Note: When duties of individual employees are so diversified that distribution of pay to this account and to account 761, Consumers' Accounting and Collecting Labor and Supplies, and account 771, Sales Labor and Supplies, is impracticable, Class D utilities may charge such pay to the account or accounts to which the major portion of the time of such employees is applicable. Office supplies and expenses may be accounted for in like manner.

B A 781.1 Executive Department

This account shall include the pay, office, traveling, and other expenses of officers who are engaged in the general administration or management of the utility, and the pay and expenses of their assistants and office forces.

ITEMS

(See § 197.14)

Salaries:

Managers, general and division

Members of governing board

Municipal officers, whose duties include supervision of the plant and who devote part of their time thereto, equitable portion of (See also § 197.33.)

Secretary

Superintendents

Assistants authorized to act for officers

Office and staff forces (e.g., staff assistants, secretaries, stenographers, clerks, messengers, office boys, etc.) of officers and employees of executive department

Expenses:

Books and periodicals

Building service (but not rent)

Communication service

Meals, including payments therefor on account of overtime work

Office supplies
Postage
Printing
Repairs to furniture and office equipment
Stationery
Transportation

Note A: Do not include in this account amounts payable to organizations for service chargeable to account 782, Management Service.

Note B: If officers or assistants supervise particular departments of electric operations or other operations, or are engaged in specific work other than supervision of the entire electric system, their pay and expenses shall be apportioned to the appropriate accounts for electric operations or other operations. (See also § 197.33.)

B A 781.2 Treasury and Accounting Departments

This account shall include the pay, office, traveling, and other expenses of officers, assistants and office forces, of the treasury and general accounting departments, except such as are chargeable to consumers' accounting and collecting or to other departments of electric operations.

ITEMS

(See § 197.14)

Salaries:

Accountants (other than on consumers' accounts or on work in other departments of electric operations)
Accounting and audit fees
Auditors
Bookkeepers (other than on consumers' accounts or in departmental offices)
Cashiers (other than on consumers' accounts)
Chief accountant
Comptroller
Members of governing board
Municipal officers, whose duties include supervision of the plant, and who devote part of their time thereto, equitable portion of (See § 197.33.)
Office manager
Paymasters
Treasurer
Assistants authorized to act for officers
Office and staff forces (e.g., staff assistants, secretaries, clerks, stenographers, messengers, office boys, etc.) of officers and

employees of treasury and accounting departments

Expenses:

Books and periodicals

Building service (but not rent)

Communication service

Meals, including payments therefor on account of overtime work

Office supplies

Postage

Printing, including bond certificates for transfer purposes (see also note D hereunder)

Repairs to furniture and office equipment

Stationery

Transportation

Note A: Do not include in this account amounts payable to organizations for services chargeable to account 782, Management Service.

Note B: If officers or assistants supervise particular departments of electric operations or other operations, or are engaged in specific work other than supervision of the entire electric system, their pay and expenses shall be apportioned to the appropriate accounts for electric operations or other operations. (See §§ 197.10, 197.33.)

Note C: This account may be subdivided to show expenses applicable to the treasury department separately from those which apply to the accounting department.

Note D: The cost of printing bonds in connection with new or additional issues shall be charged to account 141, Unamortized Debt Discount and Expense, or account 271, Unamortized Premium on Debt, as appropriate.

B A 781.3 Law Department

This account shall include, except as provided elsewhere (see notes A and B hereunder), the pay and expenses of officers, assistants, office forces, and other employees of the law department of the municipal electric utility; fees and retainers, supplies, and expenses of attorneys not regularly employed; court costs; and supplies and expenses of the law office of the municipal electric utility.

ITEMS

(See § 197.14)

Salaries:

Attorneys and assistants

Clerks

Counsel

Law clerks
Solicitors
Special counsel
Other employees of law department
Expenses:
Building service (but not rent)
Communication service
Cost of law suits
Cost of preparing and printing agreements, briefs, reports, etc.
Court costs
Court fees
Law books, periodicals, and subscriptions to special services
Law forms and law office supplies
Meals, including payment therefor on account of overtime work
Office supplies and expenses
Payments to attorneys who are not regular employees
Postage
Premiums on court or other bonds
Printing
Repairs to furniture and office equipment
Stationery
Tax reports, claims, etc., when handled by legal staff
Transcripts of testimony, copies of exhibits, etc.
Transportation
Traveling expenses of attorneys, witnesses, etc.
Witness fees

Note A: The pay of general law department officers and employees engaged in formal cases before regulatory commissions, or in cases in which such a commission is a party, or when specifically assigned to injury or damage cases, shall be charged to account 146, Regulatory Commission Suspense, account 783.2, Injuries and Damages, or other appropriate account.

Note B: Law expenses incident to the construction of electric property or the acquisition of certificates from federal or state commissions or securing from local authorities franchises or consents shall be charged to the appropriate operating property accounts. (For law expenses in connection with property purchased, see section 197.27.) Law expenses incident to the issuance of long term debt shall be charged to account 141, Unamortized Debt Discount and Expense, or account 271, Unamortized Premium on Debt.

Note C: See also section 197.33.

B A 781.4 Other General Office Salaries

This account shall include the pay of officers, assistants, office forces, and other employees engaged in the general office of the electric department and not elsewhere provided for.

Note: Salaries which are clearly applicable to any group of operating expenses other than Administrative and General shall not be included in this account.

B A 781.5 Other General Office Supplies and Expenses

This account shall include the expenses incurred and the cost of supplies for the electric general office, including office building service. (See also 197.33.)

ITEMS

(See ÷ 197.14)

- Books
- Building service (but not rent)
- Communication service
- Forms for office use
- Office supplies
- Postage
- Printing
- Repairs to office equipment
- Stationery
- Subscriptions to newspapers, periodicals, and clipping bureaus
- Transportation
- Waste baskets

Note A: Office expenses which are clearly applicable to any group of operating expenses other than Administrative and General shall not be included in this account.

Note B: The cost of repairs to general office structures shall be charged to account 787, Repairs to General Property.

Note C: Exclude herefrom and include in accounts 761-774, the expenses of the consumers' accounting and collecting and sales departments of the utility.

D C B A 782 Management Service

This account shall include all fees and incidental expenses payable by the utility to organizations or persons other than its own employees or employees of the operating municipality, for continuously rendered management and supervision services. (See also ÷ 197.33.)

Note A: The records supporting this account shall be kept so as to show the bases for the charges hereto, and the payee.

D C 783 Insurance, Injuries, and Damages

B A 783.1 Insurance

This account shall include the cost of insurance to protect the utility against losses and damages to owned or leased property used in its electric operations except as provided in note C hereunder. This

includes the premiums payable to insurance companies or amounts credited to account 264, Insurance Reserve, for fire, storm, burglary, boiler, explosion, lightning, and other insurance; and special costs incurred in procuring insurance, such as notarial fees, insurance inspection service; and the pay, traveling, and office expenses of officers, clerks, and other employees of an insurance department.

Note A: Recoveries from insurance companies or others for property damages shall be credited to the account charged with the cost of the repairs. If the damaged property is retired, the credit shall be to account 261, Depreciation Reserves.

Note B: The utility shall keep its records so as to show the amount of coverage for each class of insurance carried, the property covered, and the premiums applicable thereto; and the distribution of the costs to specific operations or departments.

Note C: The cost of insurance to protect the utility against losses and damages to the following classes of owned or leased property used in electric operations shall be charged as follows:

Materials and supplies and stores equipment, to account 802, Stores--Clearing.

Shop and laboratory equipment, to account 803, Shop and Laboratory--Clearing.

Transportation and garage equipment, to account 804, Transportation--Clearing.

Insurance on other property may be distributed to the accounts herein in accordance with the use of the property insured.

Note D: See also section 197.33.

B A 783.2 Injuries and Damages

A. This account shall include losses (except as provided in note D herein) not covered by insurance, on account of injuries or deaths to employees or others, which occur in connection with electric operations, including payments and expenses on account of damages to the property of others in connection with such operations whether by fire, flood, storm, or other cause. Amounts may be accrued monthly sufficient to meet the probable liability for such losses, with concurrent credits to account 265, Injuries and Damages Reserve, in which case such losses shall be charged to the reserve.

B. This account shall also include:

(1) Pay and expenses of officers and employees regularly engaged in or specifically assigned to work in connection with injuries to employees or others, damages to property of others, etc. (See section 197.10.)

(2) Payments to attorneys, investigators, and adjusters, court costs,

etc.

(3) Insurance premiums for protection against claims from injuries and damages, including public liability, property damage, workmen's compensation, boiler, casualty, etc. (except as provided in note D herein)

C. Reimbursements from insurance companies or others for expenses charged hereto on account of injuries and damages, and insurance dividends or refunds, shall be credited to this account.

Note A: Accruals to this account may be made upon the basis of a percentage of revenue, quantity of electricity sold, or other appropriate basis.

Note B: Payments to or on behalf of employees, including accident and death benefits, salaries, hospital expenses, medical supplies, and also salaries, fees, and expenses of surgeons, doctors, nurses, etc., when provided for through a plan for employees' benefits, shall be charged to account 785.1, Employees' Welfare Expenses.

Note C: No part of the salaries of officers or employees of the law department shall be included in this account for merely incidental services in connection with injury and damage claims. (See § 197.10.)

Note D: Losses or insurance in connection with transportation and garage equipment shall be charged to account 804, Transportation--Clearing. The utility may distribute other losses to the accounts provided for the operation in connection with which the losses were incurred. (See also clearing accounts 802-808.)

Note E: See also section 197.10.

D C B A 784 Regulatory Commission Expenses

This account shall include expenses incurred by the utility in connection with formal cases before federal or state regulatory commissions, or cases in which such a body is a party, which by order of the Commission are chargeable hereto. (See account 146, Regulatory Commission Suspense.)

D C 785 Other General Expenses

B A 785.1 Employees' Welfare Expenses

A. This account shall include pensions paid to retired employees or their beneficiaries and the costs incurred because of membership of employees of the utility in New York State Employees' Retirement System.

B. This account shall include the cost incurred in conducting employees' accident prevention, educational and recreational activities, the cost of employees' relief and benefits (other than injuries and damages chargeable to account 783.2, Injuries and Damages and the cost of life and other insurance underwritten or paid by the utility on

employees for the benefit of such employees or their beneficiaries*.

* So in original. Closing parentheses inadvertently omitted.

Note A: Any municipality which, after the effective date of this order, joins the New York State Employees' Retirement System for the benefit of the employees of any utility department subject to the jurisdiction of the Public Service Commission, shall promptly notify the Commission of that action, giving the effective date of membership, and submit a copy of the report of the State actuary.

Note B: No charges shall be made to this account in anticipation of discretionary pension payments in the future.

Note C: See also sections 197.11 and 197.33.

B A 785.2 Miscellaneous General Expenses

A. This account shall include all general expenses connected with electric operations not provided for elsewhere. This includes fees and expenses payable to trustees; dues in associations of public utilities; expenses in connection with publishing and mailing reports and notices to governing bodies or to citizens of the operating municipality, etc.; cash overages and shortages; badges and uniforms of employees; and other like items.

B. Class D utilities which do not keep clearing accounts 802 to 808 shall charge to this account the cost of items includible in such clearing accounts except when the expenditures are chargeable to operating property accounts (see § 197.21), or are clearly applicable to a particular account. Repairs shall be charged to account 787, Repairs to General Property; and depreciation shall be charged to account 788, Depreciation of General Property.

Note: See also section 197.33.

D C B A 786 General Rents

This account shall include the rent accrued each month on all items of property of the municipality (see § 197.33) or of a general character, such as office buildings, office space, shops, storehouses, etc., used in electric operations, except rent for property constituting a distinct operating unit of which the utility has exclusive possession. (See also account 433, Rent for Lease of Electric Plant--Dr.)

Note A: Revenues from subleasing property the rent for which is included in this account shall be credited to account 621, Rent from Electric Property (§ 200.5).

D C B A 787 Repairs to General Property

This account shall include the cost of repairs to office buildings, storehouses, shops, laboratories, garages, and the grounds appurtenant thereto, or other property, the book cost of which is included in

subdivisions (7), (8), (9), (10), and (11) of account 311, Land, or subdivisions (7), (8), (9), (10), and (11) of account 312, Structures, account 385, Communication Equipment, account 388, Miscellaneous General Equipment, and account 391, Miscellaneous Tangible Property.

Note A: Repair items are indicated in section 197.29.

Note B: See also § 197.33.

Note C: Repairs to office equipment shall be charged to the same account as supplies and expenses of the office or other room in which such equipment is located.

Note D: If account 808, General Tools and Implements--Clearing, is not used, repairs to general tools and implements shall be included in this account.

D C B A 788 Depreciation of General Property

A. This account shall include the depreciation charges for the following classes of depreciable general structures and grounds and general equipment (except such as are chargeable to account 432, Deductions from Rent Revenues--Electric*:

* So in original. Closing parentheses inadvertently omitted.

- Office Land (account 311 (7))
- Shop Land (account 311 (8))
- Stores Land (account 311 (9))
- Transportation Land (account 311 (10))
- Miscellaneous Land (account 311 (11))
- Office Structures (account 312 (7))
- Shop Structures (account 312 (8))
- Stores Structures (account 312 (9))
- Transportation Structures (account 312 (10))
- Miscellaneous Structures (account 312 (11))
- Office Equipment (account 381)
- Communication Equipment (account 385)
- Miscellaneous General Equipment (account 388)
- Miscellaneous Tangible Property (account 391)

B. This account shall also include the portion applicable to electric operations of the depreciation charges upon similar property in Operating Property--General, which is partly used in electric operations.

C. The depreciation charges shall be computed in accordance with subdivision (b) of section 197.7 and shall be concurrently credited to account 261, Depreciation Reserves.

Note B: If account 808, General Tools and Implements--Clearing, is not used, depreciation charges for general tools and implements (account

387), shall be included in this account.

D C B A 789 Deferred Retirement Losses

This account shall include the portion of the unamortized service value of electric or general operating property retired which, by order of the Commission, the utility is required to charge hereto each month with concurrent credits to account 143, Suspense to be Amortized. (See § 197.23, subd. (b).)

D C B A 790 Amortization of Intangible Property

A. This account shall include amortization charges for limited term leaseholds, rights of way, water diversion rights, water rights, patent rights, licenses, and cost of and expenses incidental to the acquisition of franchises, consents, permits, privileges, etc., which are included in accounts 302, Franchises and Consents, 303, Miscellaneous Intangible Property, and 311, Land. Such charges shall be computed so as to distribute the book cost of each item evenly throughout its life.

B. This account shall also include the portion applicable to electric operations of the amortization charges upon similar property in Operating Property--General, which is partly used in electric operations.

C. The amounts charged to this account shall be concurrently credited to account 262, Amortization Reserves.

D. This account shall also be charged or credited with the loss or profit at the retirement of any item of intangible property listed above as provided in account 262, Amortization Reserves.

D C B A 791 Franchise Requirements

A. This account shall include annual or more frequent payments to municipal or other governmental authorities (except the operating municipality), and the cost of services and materials furnished such authorities, in compliance with franchises, ordinances, or similar requirements, to the extent that payment therefor is not received. (See also § 197.33.)

B. The utility may charge to this account at regular tariff rates, instead of cost, electricity furnished without charge under provisions of franchises to others than the operating municipality.

C. When no direct outlay is involved, concurrent credit for such charges shall be to account 793, Duplicate Miscellaneous Charges--Cr.

D C B A 792 Miscellaneous Expenses Transferred--Cr.

This account shall include such part of operating costs (except steam and other production costs), borne in the first instance by the electric department, as is properly chargeable to another coordinate department of the utility, such as a gas department. This is not intended to

prohibit the direct apportionment of expenses between departments, and so far as practicable, that shall be done. (See also § 197.33.)

D C B A 793 Duplicate Miscellaneous Charges--Cr.

This account shall include concurrent credits for charges which are made to account 791, Franchise Requirements, to the extent that such charges do not represent direct outlays. It shall also include concurrent credits for charges which are made to operating expense accounts other than production expenses, for electricity used by or services rendered to the electric department for which there is no direct money outlay.

Note: Exclude from this account any transactions with the operating municipality. (See § 197.33.)

803. Shop and Laboratory--Clearing

804. Transportation--Clearing

805. Building Service

807. Engineering--Clearing

808. General Tools and Implements--Clearing

REQUIRED

801. Charges by Operating Municipality

A. This account shall include all amounts payable by the utility or which were credited to the operating municipality for any purpose whatsoever. This includes contributions in cash or property, charges for or incident to management, purchasing, construction, accounting, engineering, and other services, rentals, advertising, portions of

salaries and expenses of officers or employees of the operating municipality, printing, insurance, portions of expenses of the operating municipality which are also a benefit to the utility, materials, commissions, taxes, and all other items. This includes all such items, whether the ultimate distribution through this account is to property, operating expense, or other accounts. Items for which no payment is to be made shall be credited to account 280, Contributions-Operating Municipality.

B. This account shall be cleared by charging to the appropriate accounts the expenditures applicable thereto.

C. No debits for any expenditures described in paragraph A hereof shall be made to any other account in this system of accounts except by clearing through this account.

Note B: The mandatory use of this account may be suspended upon order of the commission if equivalent information is readily obtainable from other sources in the utility's records.

802. Stores--Clearing

A. This account shall be charged with the cost of supervision, labor, and expenses applicable to the operation of the utility's storerooms, including the purchase, storage, handling, and distribution of materials and supplies; and also repairs and depreciation of stores equipment. (See also § 197.33.)

B. Credit to this account cash discounts when such discounts can not be applied to particular materials.

C. This account shall be cleared by crediting hereto amounts sufficient to distribute the stores expenses over the cost of the materials handled.

ITEMS

(See § 197.14)

Adjustment of inventories of materials and supplies (see account 123, Materials and Supplies)

Books, stationery, postage, and office supplies

Building service (but not rent)

Collecting and handling scrap materials in stores

Communication service

Delivery charges

Depreciation of stores equipment (account 382)

Discount on materials, not assignable to specific items

Fees and expenses for purchasing service

Freight, expressage, etc., not assignable to specific items

Heat, light, and power

Injuries and damages
Inspecting and testing materials and supplies, not assignable to specific items
Insurance on stores materials and supplies and on stores equipment
Losses due to breakage, leakage, evaporation, fire, and other causes
Pay and expenses of purchasing agents, storekeepers, clerks, and others employed in storerooms or in stores offices
Repairs to stores equipment
Transporting materials into storehouse, not assignable to specific items
Unloading cost

Note: Transportation charges on materials recovered from plant shall be charged to the account to which the cost of removal was charged.

803. Shop and Laboratory--Clearing

A. This account shall be charged with the cost of supervision, labor, and expenses applicable to the operation of the shops and the laboratories of the utility. (See also § 197.33.)

B. This account shall be cleared by crediting hereto amounts sufficient to distribute the shop and laboratory expenses to the operating expense or other accounts to which the amounts included herein are applicable.

ITEMS

(See § 197.14)

Books and stationery
Building service (but not rent)
Charts
Collecting and handling scrap materials
Communication service
Depreciation of shop and laboratory equipment (accounts 383 and 386)
Electric service
Heat, light, and power
Injuries and damages
Inspecting and testing pipe
Insurance on shop and laboratory equipment
Pay and expenses of superintendents, machinists, chemists, and others employed in shops and laboratories
Periodicals
Repairs to shop and laboratory equipment
Testing supplies

Note: When the expenses in connection with a shop or laboratory are chargeable to a single account, they may be charged directly to such

account.

804. Transportation--Clearing

A. This account shall be charged with the cost of supervision, labor, and expenses applicable to the operation of the transportation equipment of the utility. (See also § 197.33.)

B. This account shall be cleared by apportionment to property, operating expense, or other accounts on the basis of time and/or mileage of vehicles, with due regard to differences in size and character of vehicles.

ITEMS

(See § 197.14)

Building service (but not rent)

Communication service

Depreciation of transportation and garage equipment (account 384)

Electric service

Feed and bedding for horses

Fuel and lubricants for vehicles, including sales taxes thereon

Injuries to persons and damages to property of others in the operation of transportation equipment, including cost of insurance protection therefor

Insurance

License fees for vehicles and drivers

Operation of garages and stables

Pay of drivers

Rent of vehicles

Repairs to transportation and garage equipment

Shop and laboratory expenses

Tires, tubes, and chains

Note A: Records supporting this account shall show the extent and nature of usage of each transportation unit for which charges are handled through this account.

Note B: Expenses incurred in operating transportation equipment used wholly for one purpose may be charged directly to the account appropriate for such purpose.

OPTIONAL

805. Building Service

A. This account, when used, shall include the expenses of operating offices and buildings, whether owned or rented from others. (See also § 197.33.)

B. This account shall be cleared by apportionment to the operating expense and other accounts on the basis of the use made of such

property.

ITEMS

(See section 197.14)

Cleaning	Light
Communication service	Pay and expenses of superintendents
Elevator service	Power
Fuel	Refrigeration
Heat	Towels
Injuries and damages	Water
Janitor service	

Note: This account shall be kept so as to show the cost of building service separately for each building operated.

807. Engineering--Clearing

A. This account, when used, shall include the pay and expenses of officers, engineers, their assistants, and others employed in engineering duties, except when chargeable directly to specific work on construction, operation, or repairs. (See also § 197.10 and 197.33.)

B. This account shall be cleared by apportionment to the appropriate accounts for construction, repairs, or operation in electric or other departments on the basis of service rendered, determined by the time devoted to particular work.

ITEMS

(See § 197.14)

Books and periodicals	Repairs to instruments and office furniture and equipment
Building service (but not rent)	
Communication service	Stationery and printing
Engineers, assistants, and other employees	Supplies, engineering
	Tools and instruments of small value and short life

Office supplies

Postage	Transportation
---------	----------------

808. General Tools and Implements--Clearing

A. This account, when used, shall include the cost of supervision, labor, and expenses applicable to the operation of general construction and repair equipment the book cost of which is included in account 387, General Tools and Implements. (See also § 197.33.)

B. This account shall be cleared by apportionment to property,

operating expense, or other accounts on the basis of use of such equipment.

ITEMS

(See section 197.14)

Building service (but not rent)

Communication service

Depreciation of general tools and implements (account 387)

Electric service

Fuel and lubricants for equipment, including sales taxes thereon

Injuries to persons and damages to property of others in the operation of general tools and implements, including cost of insurance protection therefor

Insurance

License fees for equipment

Operation of buildings housing general tools and implements

Pay of operators

Rent of general tools and implements

* So in original. "an" should be "and"

Repairs to general tools and implements

Shop expenses

Note A: Records supporting this account shall show the extent and nature of usage of each unit of equipment for which charges are handled through this account.

Note B: Expenses incurred in operating general tools and implements used wholly in work chargeable to one account may be charged directly to such account.

Note C: If this account is not used, repairs to and depreciation of property carried in account 387, General Tools and Implements, shall be included in account 787, Repairs to General Property, and account 788, Depreciation of General Property, respectively.

215.1 Utility contract and procurement procedures

215.2 Filing of changes in procedures

.SO DOC 16A-215.1

NYCRR

Section 215.1 Utility contract and procurement procedures.

(a) Every electric corporation subject to the jurisdiction of this Commission with annual gross operating revenues in excess of \$5,000,000 shall file, in accordance with the requirements of § 3.5 of this Title, with this Commission the procedures which govern the contracting for and procurement of services, equipment or materials to be used in its utility operations. The statement shall:

(1) Describe the circumstances in which cost estimates will be prepared and the procedures for awarding a contract which exceeds such an estimate. Such estimates, when prepared:

(i) Shall be related to market conditions and trends as well as the utility's own experience; and

(ii) Where competitive bidding is employed, shall remain confidential until after the bids are opened.

(2) Where competitive bidding is employed, specify the procedures used in preparing and maintaining lists of qualified bidders by geographical area, type of material or service provided, and degree of capability, including:

(i) The criteria used for including or excluding bidders;

(ii) A description of the circumstances in which all bidders on such a list will not be solicited in instances where the utility uses competitive bidding; and

(iii) A provision that in the absence of such a list, all requests to be allowed to bid that are not honored, shall be reviewed within the utility.

(3) Where competitive bidding is employed, specify the procedure to be employed to ensure that sealed bids are opened at the time and place specified.

(4) Specify the procedure employed in making awards in the absence of bids or, where competitive bidding is employed, to a person other than the low bidder.

(5) Specify the procedures employed in reviewing contract expenditures, relating such expenditures to any cost estimate, the amount of the award and existing market conditions.

(6) Include a requirement for disclosure to the utility of any

ownership or beneficial interest in potential suppliers by employees involved in specifying or procuring services, equipment and materials, which requirement shall provide that no employee in the purchasing department nor anyone with authority to review or approve a purchasing decision shall have such an interest, except in accordance with such rules as the utility may develop and file with this Commission.

.SO DOC 16A-215.2 NYCRR

215.2 Filing of changes in procedures.

Each such electric, gas and steam corporation shall file with this commission any change in these procedures at least 30 days before they are to be effective, unless otherwise authorized by this commission.

PART 216

CONTRACTS OR AGREEMENTS FOR THE CONSTRUCTION, IMPROVEMENT, EXTENSION OR MAINTENANCE OF UTILITY PLANTS

(Statutory authority: Public Service Law, § 115)

Sec.

216.1 Filing of proposed contract

216.2 Subcontract on cost-plus basis

216.3 Emergency contract

216.4 Quarterly filing of contract

216.5 Waiver of rule

.SO DOC 16A-216.1 NYCRR

Section 216.1 Filing of proposed contract.

(a) Every public utility company subject to the jurisdiction of this Commission shall file, in accordance with the requirements of § 3.5 of this Title, with this Commission one copy of every proposed cost-plus contract or agreement, including those contracts or agreements in which the payment to be made by the utility is based on time and material consumed regardless of the number of units completed, for the construction, improvement or extension of its plant, works or system exceeding in amount \$100,000 in any calendar year, and a list of any other offers received, and such contract or agreement shall not become effective until it has been on file with this Commission for 30 days, or until the Commission has notified the utility that such contract or agreement may be made effective immediately. If during the 30 day period, the Commission determines that it is in the public interest for the contract or agreement for the work proposed to be performed to be let after public bidding, the Commission will notify the public utility company, and the filed contract or agreement will not become effective.

In such circumstances the public utility shall proceed to make a public offering of the proposed work in accordance with the direction of the Commission.

(b) When the accumulated amount of all other such contracts or agreements awarded to a single contractor in any calendar year has exceeded \$100,000, a list of such contracts, including any other offers received, shall be filed, in accordance with the requirements of § 3.5 of this Title, with the Commission by March 1 of the succeeding year.

.SO DOC 16A-216.2

NYCRR

216.2 Subcontract on cost-plus basis.

In view of the fact that a so-called subcontract covering any part of the work to be performed under a cost-plus contract or agreement entered into by a public utility company is, in effect, the contract or agreement of the public utility company within the meaning of § 115 of the Public Service Law, every such subcontract on a cost-plus basis, proposed to be let under a principal contract or agreement which is subject to § 216.1 hereof, shall be filed, in accordance with the requirements of § 3.5 of this Title, with the Commission in accordance with the requirements of provisions of such section. All such contracts or agreements shall contain suitable provisions to give effect to the provisions of this Part. This section shall not apply to a subcontract which provides by its terms that the maximum payment thereunder shall not exceed the sum of \$5,000.

.SO DOC 16A-216.3

NYCRR

216.3 Emergency contract.

In case a storm, flood, accident or similar emergency requires that a contract or agreement be made without complying with the foregoing provisions of this Part in order to maintain or restore the company's service, immediate notice shall be given to the Commission by telephone of the making of such contract or agreement, and a copy thereof shall be filed, in accordance with the requirements of § 3.5 of this Title, as soon as possible, but not later than 10 days after the making thereof, and such contract or agreement shall be exempted from the other provisions of this Part.

.SO DOC 16A-216.4

NYCRR

216.4 Quarterly filing of contract.

Every public utility company subject to the jurisdiction of this commission shall file with this commission quarterly, one copy of every contract or agreement for the construction, improvement, extension or maintenance of its plant, works or system exceeding in amount \$1,000,000 in any calendar year, and a list of any other offers received.

.SO DOC 16A-216.5

NYCRR

216.5 Waiver of rule.

Any public utility company may apply to this commission for a waiver or modification of all or part of the requirements of this Part upon a showing that compliance therewith would be impracticable or unduly burdensome in connection with a particular project, contract or agreement.

NYCRR

PART 217

NUMBERING POLES OR STRUCTURES FOR CARRYING OVERHEAD WIRES

(Statutory authority: Public Service Law, § 115)

Sec.

217.1 (First District) Marking or numbering poles or structures for carrying overhead wires

217.2 (Second District) Stenciling and numbering poles and structures for carrying overhead wire

.SO DOC 16A-217.1

NYCRR

Section 217.1 ((First district) Marking or numbering poles or structures for carrying overhead wires.) (a) Prior to January 1, 1915 each and every electrical corporation, railroad corporation and street railroad corporation within the First District owning or using poles, pillars or other structures for carrying overhead wires or for the support of overhead tracks shall mark the same with the initial of its name, or other distinguishing mark of ownership, and also with a number, such numbers to be consecutive along each street, avenue, highway or private right of way.

(b) In case two or more of said corporations jointly own such a structure, such distinguishing mark of ownership of each corporation shall be placed thereon.

(c) This section shall apply to all said structures as are now or may be hereafter erected and also to all changes in the ownership thereof.

(d) Said marks and numbers shall be of such size and so spaced as to be easily read from the ground at a distance of six feet; and that on or before July 1, 1914 said corporations shall file with the commission a sketch or drawing showing both the design and size of said marks and numbers.

(e)(1) This section shall not apply to poles, pillars or other structures in railroad stations.

(2) Poles, pillars or other structures supporting or forming a part of elevated or subsurface railroads need not be marked to designate

ownership.

(3) If any of said poles, pillars or other structures are now marked with stenciled numbers they need not be marked as to ownership until such numbers require repainting.

(4) Where there is a double line of said poles, pillars or other structures owned or used by the same corporation in any street, avenue, highway or private right of way, only one pole, pillar or other structure supporting the same cross girder or span need be marked and numbered.

(5) If for any reason it shall be found impracticable for any of said corporations to number its poles, pillars or other structures consecutively on any street, avenue, highway or private right of way, such corporation shall not be required so to do, provided, however, that if there are or will be any duplicate numbers on any such street, avenue, highway or private right of way such corporation shall file a plan or schedule showing how such poles, pillars or other structures are now or will be numbered.

Note: The above section 217.1 was originally promulgated as Case No. 1789 (First District).

.SO DOC 16A-217.2

NYCRR

217.2 (Second District) Stenciling and numbering poles and structures for carrying overhead wire.

(a) Each and every electrical corporation, municipality, telephone corporation, telegraph corporation, railroad corporation, and street railroad corporation owning poles, towers, or frames, hereinafter termed structures, in streets, highways, or public places, or on private rights of way, for supporting and carrying overhead electric wire system for the transmission or distribution of electric energy for light, heat, or power, or for the operation of electric cars or trains, or for telephoning or telegraphing, or for supporting electric lamps or fixtures, shall on or before January 1, 1913, stencil each such structure, except as hereinafter provided, as follows: to wit,

(1) with the initials of its name, abbreviation of its name, corporate symbol, or other distinguishing mark by which the owner of each such structure readily and definitely may be determined;

(2) with a number by which the location of each such structure may be described.

(b) The manner of making such stencils shall be preferably with paint, otherwise with metal tags, badges, or stamps as each such corporation may elect to use; and that the characters of the stencil shall be of such size and so spaced and hereafter maintained as to be easily read

from the surface of the ground at a distance of six feet from the structure.

(c) In the case of two or more companies jointly owning any such structure, the distinguishing mark of each company shall be placed on such structure but not more than one number necessarily shall be placed thereon.

(d) In the case of such structures carrying or supporting overhead trolley wires where there is a double line of structures, one on each side of the railroad track, such stencil need be affixed to but one line of such structures.

(e) In the case of such structures erected upon private rights of way or on the public highways, of such character that the construction may be deemed to be a through or trunk line, such stencil need be affixed only to every fifth structure; provided however that each and every such structure situate within the limits of any city, village, or hamlet shall be stenciled, except as otherwise provided in subdivision (d) herein. Where every fifth structure is stenciled, the commission suggests that that number of the mile from the starting point of the construction be placed on the structure stenciled, and also the number of every fifth structure within that mile. And the commission further suggests that all such structures situate within the limits of every city, village, and hamlet shall be numbered consecutively along each street, avenue, or highway for the distance upon which structures are located.

(f) The requirements herein shall apply to all existing and future constructed structures and to all changes in the ownership of structures.

(g) Every such corporation shall file with this commission on or before May 1, 1912, a statement showing-

(1) The initials, abbreviation of name, corporate symbol, or other distinguishing mark intended to be used;

(2) The means of stenciling to be employed: to wit, paint, metal tags, badges, or stamps;

(3) The method intended to be followed in numbering structures: to wit, within the limits of cities, villages, and hamlets; and upon through or trunk lines.

Note: The above section 217.2 was originally promulgated as Case No. 2499 (Second District).

.SO DOC 16A-PT218

NYCRR

PART 218

LIMITATION OF LIABILITY CLAUSES--ELECTRIC CORPORATIONS

(Statutory authority: Public Service Law, § 66(1))

Sec.

218.1 Prohibition of certain limitation of liability provisions

.SO DOC 16A-218.1

NYCRR

Section 218.1 Prohibition of certain limitation of liability provisions. Every gas corporation, electric corporation and gas and electric corporation shall, where necessary, amend its filed tariff schedules by eliminating therefrom:

(a) Provision attempting to relieve such corporation from liability arising from the gross negligence or willful misconduct of its officers, agents or servants.

(b) Provisions limiting the liability of the corporation for damages resulting from its own negligence in connection with the property owned, installed or maintained by a customer or leased by a customer from a third party.

(c) Provisions limiting the liability of the company for any damages resulting from the negligence of the company in connection with the supplying or use of electricity or gas or from the presence or operation of the company's structures, equipment, wires, pipes, appliances or devices on the consumer's premises.

.SO DOC 16A-APA-3

NYCRR

APPENDIX A-3

(cf. § 11.5(a))

A Model Letter and Form for Documentation of Inability to Pay Utility Bills

We have received an initial certificate of medical emergency, under which we must continue to provide you with utility service for 30 days, starting _____ and continuing until the beginning of business on _____.

At the expiration of that period, we can, under the provisions of law (sec. 32 [3][a], Public Service Law) and Public Service Commission's regulations (16 NYCRR 11.5[a]), terminate your utility service UNLESS the medical condition persists AND you do not have enough ready cash or income to meet your past due and current utility bills and still meet your other necessary expenses such as food, housing and medical treatment.

We enclose a form that you can use to provide the information we need to make a determination, as required by law, whether you are unable to pay past due and current bills. We will continue to provide you with utility service while we consider the information you provide.

If we determine that you have NOT demonstrated that you are unable to

pay past due and current bills, we will notify you in writing and inform you how you can seek review of our determination by the Public Service Commission.

If we determine that you have NOT shown that you have a financial hardship, we will offer you a deferred payment agreement, so that you can pay past due bills and installments while you meet all current bills. And if you DO show a financial hardship, we will try to work out an arrangement so that you will not accumulate substantial past due bills.

If you have any questions, you can call (local utility office/customer representative) at xxx-xxxx. If you are not satisfied with our response, you also can call the Public Service Commission during regular business hours at xxx-xxxx, or, in an emergency, you can call the Public Service Commission until 7:30 p.m., Monday through Friday at 1-800-342-3355.

Section 225.1 Records.

Each and every gas corporation and gas and electric corporation holding consumer deposits shall keep such records as will show, with respect to each deposit:

- (a) the name of the consumer making the deposit;

225.4 Application of deposit to unpaid bill.

Each and every gas corporation and gas and electric corporation holding consumer deposits shall render to each depositor, when and as his deposit is applied to an unpaid bill or bills, a statement showing:

- (a) the bill or bills then due and unpaid;
- (b) the amount thereof;
- (c) the amount of the deposit, together with the interest accrued thereon and the period covered thereby; and
- (d) the balance of the bill or bills remaining unpaid or the balance of the deposit and interest thereon remaining to the credit of the depositor.

.SO DOC 16B-225.5

NYCRR

225.5 Special provision for residential customers.

(a) Definitions. For the purposes of this section, and when used in section 225.6 of this Part, the following definitions shall apply:

(1) Existing residential customer is a customer who receives gas service to a dwelling unit which such customer uses for his residential purposes and where business rates do not apply to the service. An existing residential customer includes an applicant for gas service who has transferred dwelling units within a utility's service territory and for whom there is a recent payment history.

(2) New residential customer is an applicant for gas service to a dwelling unit which such customer uses for his residential purposes and where business rates do not apply to the service, and who does not qualify as an existing residential customer.

(3) Delinquent in payment means, unless a more liberal standard is adopted by the utility, that a residential customer has not paid in full a duly rendered bill, or an agreed-upon partial payment, for gas service 25 days after the "to date" of the bill or within a longer period agreed to by the utility. A residential customer who has not paid in full a bill, or an agreed-upon partial payment, for gas service in circumstances where disconnection for nonpayment is precluded under utility complaint procedures established under section 275.8 of this Title or commission complaint procedures under Part 11 of this Title, shall not be considered delinquent in payment;

(4) Payment shall be considered accomplished on the date when the full amount of the bill or an agreed-upon partial payment is received by the gas corporation or gas and electric corporation or by any of such corporation's agents; provided, however, that if payment is mailed to such corporation or its agents, payment shall be considered accomplished as of the mailing by the consumer.

(b) Credit risk standards. (1) An existing residential customer may not be considered a bad credit risk unless such customer has been delinquent in payment two or more times within a recent 12-month period, or unless such customer's gas service has been discontinued for nonpayment during the preceding 12 months.

(2) A new residential customer may not be considered non-credit-rated unless such customer is unable to provide, to the satisfaction of the utility, affirmative answers to three or more of the six questions contained in Appendix 15-B of this Title. Each gas corporation and gas and electric corporation shall adopt procedures which provide for use of the six questions appearing in Appendix 15-B of this Title. A gas corporation or gas and electric corporation may determine whether to require a deposit from a new residential customer in accordance with the credit risk standards provided in paragraph (1) of this subdivision if sufficient information is available from a New York utility rendering comparable service to determine whether such customer is a bad credit risk as defined in paragraph (1) of this subdivision. If a new residential customer can establish prior satisfactory credit history with a utility rendering gas service at the customer's most recent address, the gas corporation may not obtain a security deposit from such new residential customer.

(c) Residential customer deposits. No gas corporation or gas and electric corporation may require a deposit from a residential customer unless such corporation shall establish that the residential customer is a bad credit risk or non-credit-rated in accordance with the definitions and standards prescribed in this section.

(d) No gas corporation or gas and electric corporation may require a deposit from a residential customer in excess of two times the estimated average monthly bill for a calendar year, except in the case of electric or gas space heating customers where deposits may not exceed two times the estimated average monthly bill for the heating season.

.SO DOC 16B-225.6

NYCRR

225.6 Refunds.

(a) Each gas corporation and gas and electric corporation holding consumer deposits shall render to each depositor, when and as his deposit is refunded, a statement showing the amount of the deposit, together with the amount of unpaid interest accrued thereon to the date of refund and the period covered thereby; and the amount of deposit and interest refunded. Any refund may be credited to the customer's account only to the extent of the current charges and the charges for the next succeeding month and any balance, or, at the election of such

corporation, the full refund shall be made to the depositor. Each depositor, upon becoming entitled thereto by reason of nondelinquency for one year, upon ceasing to be a consumer or as provided by subdivision (b) of this section, may withdraw his deposit and all interest thereon which has not been refunded or credited against bills for service upon surrendering his deposit certificate (or submitting satisfactory proof of ownership of the deposit or of the right to receive the same) and the payment of all bills for which such deposit is security. The "prudent" period of deposit retention, referred to in Public Service Law section 117, may not exceed two years of nondelinquency in payment of bills rendered.

(b) Each gas corporation and gas and electric corporation shall, before April 1, 1976, review the accounts of all existing residential customers who have made deposits. Thereafter, each corporation shall review, on not less than an annual basis, the accounts of all existing residential customers who have made deposits. If a residential customer is not a bad credit risk, as defined in section 225.5(b)(1) of this Part, the utility shall promptly refund to such customer the amount of the deposit and the interest thereon.

.SO DOC 16B-225.7

NYCRR

225.7 Certificate of deposit.

Each and every gas corporation and gas and electric corporation holding consumer deposits shall issue to every consumer from whom a deposit may be exacted a certificate of deposit, for which shall be used a good quality of paper and on which certificate there shall be printed, in addition to the receipt for the money deposited, the substance of the following:

THIS RECEIPT IS NOT NEGOTIABLE OR TRANSFERABLE
Interest will be allowed on this deposit so long as it shall remain with the corporation. When this deposit has been held for one year, interest thereon will be paid in cash or credited on a bill for service rendered the depositor thereafter, but not later than the first bill rendered after the next succeeding first day of October, and at the expiration of each succeeding one-year period. Preserve this receipt to be surrendered when deposit is returned.

.SO DOC 16B-225.8

NYCRR

225.8 Refund without certificate of deposit.

Each and every gas corporation and gas and electric corporation holding consumer deposits shall provide reasonable ways and means, in such manner as such corporation may elect, whereby a depositor who makes application for the return of his deposit and is entitled to the return

thereof, but who is unable to produce the original certificate of deposit or receipt, may not be deprived of his rights.

.SO DOC 16B-225.9 NYCRR

225.9 Circular containing terms of deposit.

Each and every gas corporation and gas and electric corporation holding consumer deposits shall keep on hand for distribution to its consumers printed circulars, over its corporate or business name, which circulars shall be entitled "TERMS AND CONDITIONS UPON WHICH CONSUMERS' DEPOSITS ARE COLLECTED, HELD, AND MAY BE WITHDRAWN", and which shall

contain a copy of this Part, a copy of Public Service Law section 117 (as added by L. 1976, ch. 557) and such other pertinent information as the corporation may elect. In lieu of providing a copy of section 117 of the Public Service Law and a copy of this Part, every such corporation may provide a circular approved by the commission containing the pertinent features of these requirements. Every such corporation shall furnish a copy of said circular or a summary of the pertinent features of these requirements to the consumer or applicant for service from whom a deposit is demanded when such corporation first informs said consumer that a deposit is required. Every such corporation shall post copies of such circular or summary in prominent places in each business office requested by consumers.

.SO DOC 16B-225.10 NYCRR

225.10 Extension of service when deposit is disputed.

Each and every gas corporation and gas and electric corporation shall extend service to any new applicant for service who has initiated a complaint on a deposit requested by such corporation and shall continue to supply service during the pendency of such complaint, provided that such applicant keep current on bills for service rendered and pay a reasonable amount as a deposit if the complaint challenges only the amount requested.

.SO DOC 16B-PT226 NYCRR

.SO DOC 16B-226.1 NYCRR

Section 226.1 General provisions.

This Part contains the requirements for testing and maintaining the accuracy of gas meters and related devices used either for customer billing applications or to measure gas that affects a utility revenue stream required to be reported to the Commission.

.SO DOC 16B-226.2 NYCRR

226.2 Definitions.

The following definitions shall apply wherever the defined terms are used in Parts 226, 227, and 228 of this Title:

(a) Accessory. Any meter reading device, which is mechanically attached to a meter and could affect its accuracy, used to display or transmit meter information to a remote location or any associated meter correction device, either remote or attached, used to adjust the reading of a meter index.

(b) Bell prover. A test-standard using a calibrated cylindrical container or bell in which a quantity of air is collected using oil as a sealing medium. The bell prover is connected to a meter under test and the quantity of air that passes through the meter, as measured by the meter, is compared with the change in the quantity of air within the bell to determine the meter's accuracy.

(c) Certification. The verification of a test-standard's accuracy by this commission, by its designee, or by commission approved procedures, conducted with standards or equipment that trace their accuracy to the National Institute of Standards and Technology.

(d) Correction device. An accessory used to adjust the measured volume to a volume at standard conditions.

(e) Cubic foot bottle. A specially constructed and calibrated bottle

that can measure exactly one cubic foot of air. The calibration of the bottle is certified by the National Institute of Standards and Technology.

(f) (1) Cubic foot, metered. The quantity of gas that occupies one cubic foot when under pressure and temperature conditions existing in the meter.

(2) Cubic foot, standard. The quantity of gas that under a pressure of 14.73 pounds per square inch absolute and at a temperature of 60°F occupies a volume of one cubic foot.

(g) Differential test. A comparison of the difference in pressure readings between the inlet and outlet of a rotary meter at a gas flow rate within the meter's rated capacity range, with those supplied by the manufacturer or taken at installation.

(h) Fixed pressure factor measurement. A correction method system, used only in conjunction with pressure regulated installations, that employs a billing multiplier to adjust the measured volume of gas delivered to standard pressure conditions.

(i) Flow rate tests.

(1) Check-rate test. A meter test conducted with a flow rate at the lower end of the meter's rated capacity range.

(2) Open-rate test. A meter test conducted with a flow rate at the higher end of the meter's rated capacity range.

(j) Gas meter. Any device used to measure the units of gas passing through it.

(1) Domestic meter. A gas meter with a rated capacity of 500 CFH or less.

(2) Large volume meter. A gas meter with a rated capacity over 500 CFH.

(k) Meter accuracy. The degree to which a meter correctly measures the units of gas passing through it, determined by comparing the registration on the meter with that registered by a test-standard.

(1) Percent proof. The volume indicated by the test-standard divided by the volume indicated by the meter x 100.

(2) Percent accuracy. The volume indicated by the meter divided by the volume indicated by the test-standard x 100.

(l) Meter class. A designation for different ranges of meter rated capacities.

(m) Meter index. The meter mechanism that displays the quantity of gas that has been delivered through the meter.

(n) Meter tests.

(1) In-test. A test of a meter made soon after its removal from a

customer's premises or at said premises and prior to any disassembly or adjustment.

(2) Out-test. A test of a meter made prior to its use at a customer's premises.

(o) Non-working reference standard. A certified reference meter or other device used to check the accuracy of a test-standard.

(p) Prover. A type of test-standard for measuring the accuracy of gas meters.

(q) Rangeability. The manufacturer's stated ratio of maximum flow rate to minimum flow rate for a given meter.

(r) Rated capacity.

(1) Diaphragm type meters. The rated capacity of a diaphragm type gas meter is the approximate number of cubic feet per hour of 0.60 specific gravity gas (air = 1.00), at standard conditions, that the meter is designed to pass when the average differential pressure between the inlet and outlet of the meter is 0.5 inch of water column.

(2) Other types of meters. The rated capacity of other types of gas meters will be the nameplate capacity specified for that particular type of meter or as otherwise specified in the commission's order approving it.

(s) Sampling. A statistically valid method of obtaining a representative quantity of meters from a homogenous lot or group.

(t) Sonic nozzle prover. A test-standard for testing gas meters using nozzles calibrated to indicate the time required for the passage of one cubic foot of air at their corresponding sonic flow rates. The sonic nozzle prover is connected to the meter under test. The time necessary to pass a given number of cubic feet on the meter is compared with the time indicated on the nozzle.

(u) Supercompressibility. Deviation of a gas from the ideal gas laws.

(v) Standard conditions. The standard base conditions of pressure and temperature to which natural gas volumes are referenced.

(w) Strapping. A method of checking a bell prover by determining the relations between displaced volume and linear movement of a bell prover by means of measuring scale length, bell circumference, and displacement. The calibration of all measuring equipment used to take these measurements must be traceable to the National Institute of Standards and Technology.

(x) Test-standard. Any certified device used for determining the accuracy of a meter or accessory.

(y) Transfer prover. A test-standard for testing gas meters consisting of a master meter, an electronic control panel, pressure and temperature

correcting gauges, a blower, flow control valves, and exhaust silencers. The test is conducted by connecting the transfer prover with the meter under test. The quantity of air indicated on the meter under test is compared with the quantity of air measured on the transfer prover.

(z) Utility. Includes all gas corporations as defined in the Public Service Law.

.SO DOC 16B-226.3

NYCRR

226.3 Gas meter and accessory requirements -- general.

Gas meters and accessories shall conform to the following:

(a) Approved type. Meters and accessories shall be of types approved by this commission in accordance with Part 227 of this Title.

(b) Meter identification. Each meter purchased after August 19, 1995 shall bear the following information in a permanent form on the meter before installation:

Name of utility or logo

Manufacturer's name or trademark

Meter serial number

Type designation/Model Number

Meter class and/or rated capacity

Year of manufacture

Indication if remanufactured

Maximum allowable operating pressure (MAOP)

If a gas meter is temperature compensating, a durable red indicator shall be visible on the meter stating that the meter is "temperature compensating".

(c) Correction device identification. Each meter correction device purchased after August 19, 1995 shall bear the following information in a durable form:

Name of utility or logo (if correction device remotely located from meter)

Manufacturer's name or trademark

Equipment serial number

Type Designation/Model Number

Year of Manufacture

(d) Labeling. Each gas meter found to conform to this commission's requirements shall have affixed to it a label or tag indicating the year of its most recent out-test. Each meter which has been repaired shall have the type of repair indicated. This repair identification may be indicated on the label or with other adequate marking.

(e) In lieu of the requirements in subdivisions (b) and (d) above, indication of remanufacture and type of repair need not be labeled on

the meter if such is maintained by the utility in readily available computerized meter history records.

(f) Tampering devices. Each gas meter placed in service after August 19, 1995, to the extent possible, shall have devices or incorporate processes to indicate evidence of tampering.

.SO DOC 16B-226.4 NYCRR

226.4 Testing facilities -- general.

(a) Minimum facilities. Each utility shall have meter testing facilities that are adequately maintained, are provided with suitable equipment and kept in proper condition for testing gas meters and auxiliary devices, and include at least one bell prover with a capacity not under five cubic feet.

(b) Notification. Each utility shall keep the Department staff informed of the location of each test facility where its meters and accessories are tested, any change in the facility which may affect the accuracy of its testing, and the number, type, and the most recent certification date of each test-standard at that location.

(c) Temperature. Each meter test location shall be maintained to minimize temperature fluctuations and assure temperature equilibrium between the room air, the testing equipment including the prover(s), the sealing medium in each bell prover and the air or other testing medium supplied to each bell prover and the meters under test. Any temperature variation shall be limited to 1µF or less between the items listed above.

(d) Temperature test conditions for testing temperature compensating gas meters:

(1) Ambient temperature. The ambient temperature test condition is the existing temperature that the gas meter is exposed to at the time of a meter test. With utility shop testing, the ambient temperature is the normal proving room temperature.

(2) Average winter temperature. The average winter temperature test is an approved gas meter test condition that represents the average temperature environment that an outdoor gas meter is expected to be exposed to during the winter. This temperature is specified as 20µF for all utilities.

(3) Extreme temperature. The extreme temperature test condition for winter and summer are specified gas meter test conditions of 0µF and 100µF, respectively.

(e) Tests and inspections. All meter testing facilities shall be available for inspection, certification and reasonable use by the department staff.

226.5 Test-standards.

(a) All meter test-standards shall be of types approved by this commission in accordance with Part 227 of this Title or, if not required to be approved in accordance with Part 227, whose accuracy is traceable to the National Institute of Standards and Technology. Certification will be conducted by this commission, by its designee, or by commission approved procedures conducted with standards or equipment that trace their accuracy to the National Institute of Standards and Technology.

(b) Test-standard certification frequency.

(1) Bell provers shall be certified initially and at least once every two years.

(2) Transfer provers shall be certified initially and at least once every two years. This certification requirement may be extended to once every five years provided that an annual comparison test between the transfer prover meter and a non-working reference standard agree to within ± 0.25 percent proof at no less than 16 points between 10 and 120 percent of the rated capacity of the transfer prover.

(3) Sonic nozzle provers shall be certified initially and at least once every two years. This certification requirement may be extended to once every five years provided that an annual comparison test between the sonic nozzle prover and a non-working reference standard agree to within ± 0.25 percent proof of the most recently certified sonic nozzle calibration proof.

(4) A non-working reference standard meter shall be certified initially and at least once every five years. Its accuracy should be established at no less than 16 points between 10 and 120 percent of its rated capacity.

(5) Temperature and pressure test-standards shall be certified initially and at least once every five years.

(6) Auxiliary equipment. Any type of auxiliary equipment connected to a test-standard shall be installed and tested in accordance with manufacturers' instructions or in a manner acceptable to the commission or its designee.

(c) Additional meter test-standard requirements.

(1) The capacity of the meter test-standard shall meet the open rate test requirements of the meter being tested.

(2) Each certified meter test-standard shall be provided with a certificate bearing the serial number, date of certification, correction factor(s) and test limitations, if any.

(3) Each meter test-standard shall be recertified after being damaged,

repaired, adjusted or disassembled where such could in any way affect its previous accuracy calibration. Also, each bell prover shall be recertified if moved.

(4) Only meter test-standards with an error of less than ± 0.25 percent shall be used without applying a correction factor.

(5) Each bell prover shall be adjusted to a static pressure in the order of 1.5 inches of water column above or below atmospheric pressure.

(6) Each transfer prover or sonic nozzle test-standard shall be adjusted to the same pressure and temperature or corrected for any pressure and temperature difference between it and the meter under test.

(7) Each meter test-standard shall be tested for connection-fitting tightness prior to its use.

(8) A nonvolatile sealing medium meeting the applicable specifications of the American National Standards Institute (ANSI) standard set forth in section 227(c) of this Title shall be used in all bell provers.

.SO DOC 16B-226.6

NYCRR

226.6 Gas meters and accessories - test flow rates, out-test accuracy standards and test requirements. Gas meters and related accessories utilized by a utility shall conform to the following out-test accuracy standards and test requirements at the specified flow rates. Only meters determined to be free of leaks and found upon test to comply with the following, where the test results are expressed to the nearest 0.1 percent proof, shall be labelled as out-tested and placed in service at a customer's premises:

(a) Test flow rates.

(1) The check rate test for diaphragm, rotary and turbine meters is conducted at a flow rate not less than 10 percent nor more than 40 percent of rated capacity.

(2) The open rate test is conducted at a flow rate as follows:

(i) Diaphragm meters - not less than 80 percent nor more than 120 percent of rated capacity.

(ii) Rotary and turbine meters - not less than 60 nor more than 100 percent of the rated capacity.

(b) Out-test accuracy standards.

(1) Non-temperature compensating diaphragm, rotary and turbine gas meters. At the check and open rates, the percent proof shall be not less than 99.0 percent nor more than 101.0 percent. For diaphragm meters the open rate test result shall not differ from the check rate result by more than one percent.

(2) Temperature compensating diaphragm, rotary and turbine gas meters.

(i) Ambient temperature test. At the check and open rates, the percent

proof shall be not less than 99.0 percent nor more than 101.0 percent. For diaphragm meters the open rate test result shall not differ from the check rate result by more than one percent.

(ii) Average winter temperature test. At the check and open rates, the percent proof shall be not less than 99.0 percent nor more than 102.0 percent. For diaphragm meters the open rate test result shall not differ from the check rate result by more than one percent.

(3) Orifice meters. The overall cumulative error of the metering system shall be not greater than ± 1 percent throughout its operating range.

(4) Meters with correction devices. The percent proof, at test conditions, shall be not less than 99.0 percent nor more than 101.0 percent.

(c) Out-test requirements.

(1) Non-temperature compensating gas meters.

(i) Each non-temperature compensating meter shall be out-tested prior to its installation.

(ii) In lieu of the test requirements in subparagraph (i) of this paragraph, new non-temperature compensating meters may be out-tested on an approved sampling basis by the utility if the manufacturer's test equipment has been certified in accordance with section 226.5 of this Part and the manufacturer has certified that each meter has been tested prior to delivery.

(2) Temperature compensating gas meters.

(i) Each temperature compensating meter shall be out-tested at both the ambient and average winter temperature test conditions.

(ii) In lieu of the test requirements in subparagraph (i) of this paragraph, new temperature compensating meters may be out-tested on an approved sampling basis at the ambient and average winter temperature conditions by the utility, if the manufacturer's test equipment has been certified in accordance with section 226.5 of this Part and the manufacturer has certified that each meter has been tested prior to delivery.

(iii) In lieu of the test requirements in subparagraph (i) of this paragraph, temperature compensating meters being returned to service after maintenance shall be out-tested at ambient temperature conditions provided that a commission approved sample of such meters is also tested at the average winter temperature conditions.

(3) Correction devices.

(i) Each correction device shall be tested and calibrated prior to installation at various pressures and/or temperature conditions

representative of the device's range(s) (including the conditions expected to prevail at the sites where it may be placed in service), or upon installation at the pressure and temperature conditions at the site.

(ii) After being placed in service, the correction device shall be either monitored through a review of meter reading records at least once every six months to determine proper operation or be tested at least once every two years as set forth in subparagraph (i) of this paragraph.

.SO DOC 16B-226.7

NYCRR

226.7 Gas meters - customer installations.

(a) Pressure and temperature corrections. At each meter location where the metered volume of gas is corrected to standard conditions, the correction shall be made by use of an appropriate approved type meter and/or correction device. For this purpose, standard conditions shall be 14.73 pounds per square inch absolute and 60 degrees Fahrenheit. All meter installations measuring at delivery pressures in excess of 30 pounds per square inch gauge shall have their measurement recordings corrected for supercompressibility or assure the same accuracy as specified for meters with correction devices in section 226.6(b) (4).

(b) Installation of temperature correcting equipment. At each outdoor meter location or location where the meter is exposed to temperatures equivalent to an outdoor environment, an appropriate approved type meter or accessory that corrects the metered volume of gas to a standard temperature of 60 degrees Fahrenheit, as prescribed in subdivision (a) of this section, shall be installed.

(c) A meter with an index reading other than zero may be placed in service, provided that meter and billing records are kept in a manner permitting verification of the readings as of the time of removal from the prior premises and installation at the succeeding premises.

(d) Operating pressure.

(1) Gas meters shall not be used at an operating pressure that exceeds the manufacturer's maximum allowable operating pressure for the meter.

(2) Rebuilt or repaired tinned case meters shall not be used at a pressure greater than 50 percent of the pressure used to test the meter after rebuilding.

.SO DOC 16B-226.8

NYCRR

226.8 Domestic meters - in-test programs.

(a) Domestic meter in-test program. After installation, all domestic meters shall receive an in-test at least once every seven years, except as otherwise provided in subdivisions (b) and (c) of this section.

In-tests of meters shall be made at ambient temperature conditions at

the same open and check test flow rates as used for out-tests specified in subdivision (a) of section 226.6. Where possible, all intests shall be performed within 60 working days after removal from customers' premises.

(b) Alternate domestic meter in-test program.

(1) Initial notification. In lieu of the schedule of testing set forth in subdivision (a) of this section, any utility may apply to Department staff for approval to adopt the alternate domestic meter in-test program described in this subdivision. The initial application for approval and any subsequent revisions shall include full formulation of said program complying with paragraphs (2) through (9) of this subdivision.

(2) Categories and test groups. All meters in use shall be segregated into categories based on delivered volume and grouped into test groups based upon performance.

(i) All meters shall be first grouped into Category A. Any utility having more than 100,000 domestic meters in service may further separate those meters servicing minimum bill customers into Category B and those registering 360 CCF or less in the preceding calendar year into Category C. A minimum bill customer shall be any customer whose average monthly consumption registered on the meter during the preceding calendar year did not exceed the minimum consumption indicated in the initial block of the utility's rate schedule for residential customers.

(ii) The meters in each category shall be grouped into test groups as follows:

TEST GROUPS	
CALCULATED ANNUAL TEST RATE (%)	
0	2.00
1	4.00-4.99
2	5.00-5.99
3	6.00-7.99
4	8.00 and above
5	Approved Retirement Program

Test group 5 shall be composed of all meters included in an approved retirement program. In the event that a utility has more than one retirement program in progress each program will be clearly identified and reported on separate forms. The total number of meters required for test within test groups one, two, three and five in any category shall be determined on the basis of the combined calculated test rate of all meter types within the group. Each type of meter within test group four shall be tested at its calculated test rate in accordance with Table 1

of Appendix 7-A of this Title, *infra*.

(iii) Meter types within each test group shall be identifiable by manufacturer and size. In addition, each participating utility shall maintain test data segregated by manufacturer, case, size, and age group to assist in the analysis of meter performance.

(3) Meters in use shall be segregated into age groups in one year increments as follows: "Age Group 1" will include meters last tested within 0 - 12 months, "Age Group 2" will include meters last tested within 13 - 24 months, etc.

(4) Minimum overall test rate. Except as provided in paragraph (6) of this subdivision, the required annual test rate will be used to determine the minimum number of meters to be tested from each test group for each approved utility in an ensuing calendar year and shall be based upon meter performance at the check rate during the preceding calendar year. For example, the performance of meters at each approved utility in calendar year 1993 will determine the test rate for each meter test group and the number of meters required to be tested at the utility in calendar year 1995.

(i) Category A. Each approved utility shall test its domestic meters as follows:

(a) Except as provided for in subparagraph (iv) of this paragraph, the required annual rate of test for each meter type shall not be less than four percent. The annual rate of test shall be determined by using a base of 4.0 percent of such meters in service where 100 percent of the meters are within \pm 2.0 percent of 100 percent proof. For each one percent of the meters found over 2.0 percent slow, the test rate shall increase 0.133 percent. For each one percent of the meters found over 2.0 percent fast, the test rate shall increase 0.267 percent.

(b) The required annual rate of test for a meter type in an ensuing year shall be based on the preceding year's check rate performance of those meters last tested eight or more years prior. For those meter types in Category A where the utility submits data indicating that more than 50 percent of the in-service meters were last tested within the previous eight years, the required annual rate of test for a meter type in the ensuing calendar year shall be based on the performance of meters in all age groups tested in the preceding calendar year.

(c) Where the calculated test rate is between 8 and 14 percent, the test rate shall be determined from Table 1 of Appendix 7-A of this Title, *infra*.

(d) Where the calculated test rate exceeds 14 percent in Table 1 of Appendix 7-A of this Title, *infra*, the following test rate shall apply:

test rate = $2x+y-36$, where x = percentage of meters fast and y = percentage of meters slow.

(ii) Category B. Each approved utility may include meters servicing minimum bill customers separately in Category B and test them as follows:

(a) The minimum number of Category B meters to be tested on an annual basis shall be two percent of the utility's total number of minimum bill meters in service. In addition, on an annual basis, two percent of the total number of such meters in service shall be inspected for physical integrity and labeled on the customer's premises by qualified personnel. The meters inspected and labeled shall be those in service 10 or more years, the majority to be selected from those longest in service. In lieu of the number required for inspection, an equal number in service 10 or more years may be tested.

(b) The utility shall submit an annual summary report of those meters removed for fault and found to be faulty. Each reason for removal shall be segregated and reported separately, and will include the following: leak, does not pass gas, does not register, and meters found on inspection to be unserviceable.

(iii) Category C. With the exclusion of those meters qualifying for the option provided in Category B, each approved utility may include meters registering 360 CCF or less in the preceding calendar year separately in Category C and test them as follows:

(a) Except as provided for in subparagraph (iv) of this paragraph, the annual rate of test for each meter type in an ensuing year shall be determined by using a base of 3.5 percent of the qualifying meters in service where 100 percent of the meters in the preceding year are within + 2.0 percent of 100 percent proof. For each one percent of the meters found over 2.0 percent slow, the test rate shall increase 0.067 percent. For each one percent of the meters found over 2.0 percent fast, the test rate shall increase 0.133 percent.

(b) Where the calculated annual test rate is between 5.5 and 8.5 percent, the test rate shall be determined from Table 2 of Appendix 7-A of this Title, *infra*.

(c) Where the calculated annual test rate exceeds 8.5 percent in Table 2 of Appendix 7-A of this Title, *infra*, the following test rate shall apply: test rate = $2x+y-41.5$, where x = percentage of meters fast and y = percentage of meters slow.

(iv) For meter types where 98 percent upon in-test are found to be within \pm 1.5 percent of 100 percent proof in a preceding year, the test rate for the ensuing year shall be 2.0 percent of those type meters in

service.

(5) The meters tested shall be from all age groups, the majority to be selected from those longest in service.

(6) The required meter tests for Categories A and B shall include a minimum of one percent or 100 meters, whichever is less, for each age group in service. In addition, a sufficient number of meters shall be selected from the oldest age groups to comply with paragraph (4) of this subdivision.

(7) Meters removed from service for reasons other than the requirements set forth in paragraphs (4) and (6) of this subdivision may be included for compliance therewith, provided that:

(i) The number of meters removed for fault or found faulty that may be credited against the test requirements for any meter type shall not exceed the number of the meters tested and found to be in sound condition; and

(ii) Meters that are removed and found to be inoperative or leaking shall be reported as such.

(8) Upon submission of a program satisfactory to the department staff, as described in subdivision (c) of this section, any utility may retire, or accelerate the repair of, any group of meters identifiable by make, type, or any other factor which affects performance. The number of meters that are removed in excess of the number that is required may be credited to those meters with a history of superior test rates. The number credited to each test group shall be limited to quantities which will assure a 2-percent sample of the superior performing meters.

(9) Any utility that does not meet its annual test requirements, in any test group, shall schedule such deficits in the following year's test requirements. Where a utility has exceeded its test requirements in any test group, such meters may be credited toward any deficits in the current year requirements, providing that the credits are applied to those meters with a history of superior test rates. A maximum of 2 percent or 200 meters, whichever is less, in any test group, may be credited towards the following year's test requirements.

(c) Retirement program. If a utility files with the department staff a satisfactory retirement program for any group of meters identifiable by make, type or any other factor which affects performance, the annual testing requirements of said type meter may be made as follows for the program's duration as set forth in the filing:

PERIOD OF RETIREMENT PROGRAM, YEARS	MINIMUM PERCENT OF RETIRED METERS TO BE TESTED PER YEAR
Not more than 15	20.0

Not more than 10	15.0
Not more than 5	10.0
Not more than 2	0.0

.SO DOC 16B-226.9 NYCRR

226.9 Large volume meters - in-test programs.

(a) Large volume meter in-test program. After installation, all large volume meters shall receive an in-test at least once every seven years, except as otherwise provided in subdivisions (b) and (c) of this section. In-tests of meters shall be made at ambient temperature conditions at the same open and check test flow rates as used for out-tests specified in section 226.6 (a) of this Part. Where possible, each in-test shall be performed within 60 working days after removal from a customer's premises.

(b) Alternate large volume meter in-test program.

(1) Initial notification. In lieu of the schedule of testing set forth in subdivision (a) of this section, any utility may apply to department staff for approval to adopt the alternate large volume meter in-test program described in this subdivision. The initial application for approval and any subsequent revisions shall include full formulation of said program complying with paragraphs (2) through (8) of this subdivision.

(2) Test groups. Test groups shall be formed in accordance with sections 226.8(b)(2)(ii), (iii) and (3) of this Part.

(3) Each approved utility shall test its large volume meters as follows:

(i) Except as provided in paragraph (5) of this subdivision, the required annual test rate will be used to determine the minimum number of meters to be tested from each test group for each approved utility in an ensuing calendar year and shall be based on meter performance at the check rate during the three preceding calendar years. For example, the performance of meters in the calendar years 1991-1993 shall determine the test rate for the meters in the calendar year 1995. The required annual test rate for each meter type shall be 4 percent of such meters in service where 100 percent of the meters are within +2.0 percent of 100 percent proof. For each 1 percent of the meters found over 2.0 percent slow, the test rate shall increase 0.133 percent. For each 1 percent of the meters found over 2.0 percent fast, the test rate shall increase 0.267 percent.

(ii) Where the calculated test rate is between 8 and 14 percent, the test rate shall be determined from Table 1 of Appendix 7-A of this Title, *infra*.

(iii) Where the calculated test rate exceeds 14 percent in Table 1 of Appendix 7-A of this Title, *infra*, the following test rate shall apply: test rate = $2x+y-36$, where x = percentage of meters fast and y = percentage of meters slow.

(4) The meters tested shall be from all age groups, the majority to be selected from those longest in service since last test.

(5) Meters tested for reasons other than the requirements set forth in paragraphs (3) and (4) of this subdivision may be included for compliance therewith, provided that:

(i) The number of meters removed for fault, or found faulty, that may be credited against the test requirements for any meter type shall not exceed the number of meters tested and found to be in sound conditions; and

(ii) Meters found to be inoperative or leaking shall be reported as such.

(6) No annual rate of test shall decrease from the required annual rate of the preceding year by a factor greater than 3 percent per year during each of the first 2 years of participation in the alternate large volume accuracy maintenance in-test program.

(7) Upon submission of a program satisfactory to the department staff, as described in subdivision (c) of this section, any utility may retire or accelerate the repair of any group of meters identifiable by make, type or any other factor which affects performance. The number of meters that are removed in excess of the number that is required may be credited to those meters with a history of superior test rates. The number credited to each test group shall be limited to quantities which will assure a 2 percent sample of the superior test rate meters. Meters to be retired shall be in-tested at the rate specified in subdivision (c) of this section. In-test results for retirement and accelerated repair programs shall be reported separately.

(8) Any utility that does not meet its annual test requirements, in any test group, shall schedule such deficits in the following year's test requirements. Where a utility has exceeded its test requirements in any test group, such meters may be credited toward any deficits in current year requirements, providing that the credits are applied to meters with a history of superior performance. A maximum of 2 percent or 200 meters, whichever is less, in any test group may be credited toward the following year's test requirements, provided that they are credited to those meters having superior test rates.

(9) Rotary meter differential testing. In lieu of paragraph (5) of this subdivision, a utility may elect to differential test rotary type

meters as an indicator of meter condition. An increase of 50% in the pressure differential reading between the inlet and outlet of the meter from readings supplied by the manufacturer or readings taken at the time of the meter's installation will require maintenance to the meter to bring it back into specification or the performance of an in-test. Differential tests shall be done at least once every 10 years or at one half the meter's scheduled in-test interval, whichever is greater.

(c) Retirement program. If a utility files with the department staff a satisfactory retirement program for any group of meters identifiable by make, type or any factor which affects performance, the annual testing requirements of said type meter may be made as follows for the program's duration set forth in the filing:

PERIOD OF RETIREMENT PROGRAM, YEARS	MINIMUM PERCENT OF RETIRED METERS TO BE TESTED PER YEAR
Not more than 15	20.0
Not more than 10	15.0
Not more than 5	10.0
Not more than 2	0.0

.SO DOC 16B-226.10

NYCRR

226.10 Orifice meters - general conditions and accuracy maintenance requirements.

(a) General conditions. Orifice meters shall be installed to comply with American Gas Association Report No. 3, Orifice Metering of Natural Gas and Other Related Hydrocarbon Fluids, Third Edition, Part 1 General Equations and Uncertainty Guidelines (1990), Part 2 Specification and Installation Requirements (1991), Part 3 Natural Gas Applications (1992), and Part 4 Background, Development, Implementation Procedure, and Subroutine Documentation for Empirical Flange-Tapped Discharge Coefficient Equation (1992), available from American Gas Association, 1515 Wilson Boulevard, Arlington, Virginia 22209-2470.

(b) Test and inspection programs.

(1) The differential, static pressure and temperature recording gauges, integrating mechanism, and other pertinent components shall be tested annually.

(2) Periodic inspections of meter tubes and orifice plates, no less frequent than annually, shall be scheduled to insure compliance with original installation specifications.

.SO DOC 16B-226.11

NYCRR

226.11 Fixed pressure factor measurement installations - general conditions and installation and accuracy maintenance requirements. For customers receiving gas at pressures higher than the normal delivery

pressure, the utility may apply to department staff for approval to utilize the fixed pressure factor measurement method of determining corrected actual gas usage. The fixed pressure factor measurement method, where a constant elevated pressure is supplied to a meter, is a means of correcting volume indicated on the meter index to base pressure conditions as specified in the utility's tariff schedule.

(a) Fixed pressure factor measurement methodology. Where fixed pressure factor measurement is used, the amount of gas consumption shall be multiplied either mechanically or by a calculated factor derived from the following formula:

$$\text{Billing Multiplier} = \frac{(P_B + P_M)}{P_B}$$

Where P_b is the average barometric pressure for the utility's service area(s), measured in PSI. P_m is the delivery or metering pressure measured in PSIG and P_B is the base condition pressure defined in the utility's tariff schedule.

(b) Correction for average barometric pressure. Where the average barometric pressure varies by more than 0.10 PSIA within the utility's franchise territory, the average barometric pressure for that geographic location shall be calculated based on that location's elevation above sea level.

(c) Fixed pressure measurement installation requirements. At each installation where fixed pressure factor measurement is utilized, the following installation requirements must be met:

(1) The outlet set pressure to the customer's meter will be maintained under operating conditions to within \pm 1.0 percent of the absolute set pressure.

(2) Each pressure regulator shall be protected in a manner that would clearly indicate any unauthorized tampering with the outlet pressure adjustment screw.

(3) All fixed pressure factor measurement installations shall be clearly identified with the pressure regulation outlet set pressure and the billing multiplier.

(d) Fixed pressure factor accuracy maintenance requirements. The utility shall, at each fixed pressure factor measurement installation, verify the pressure regulation outlet set pressure initially and at periodic intervals, no less frequent than annually, thereafter. No fixed pressure factor measurement installation shall be installed or left in service where the resulting overall measurement proof is less than 99.0 percent nor more than 101.0 percent.

(e) Fixed pressure factor measurement records. The utility shall

maintain records of all active fixed pressure factor measurement installations and the results of any maintenance performed at each installation.

.SO DOC 16B-226.12

NYCRR

226.12 Periodic reports and records.

(a) Periodic reports.

(1) In-tests made pursuant to sections 226.8 and 226.9 of this Part shall be reported quarterly. Each such report shall be filed with this commission not later than 30 days following the end of the respective reporting period on sheets similar to Form B for domestic meters and Form E for large meters of Appendix 7-A of this Title, *infra*.

(2) The annual summary report of domestic and large gas meters in-tested during the preceding year or years shall be filed with the commission not later than 60 days following the end of the respective reporting period on sheets similar to Forms C, D, and F of Appendix 7-A of this Title, *infra*. The reports are to be submitted identifying manufacturer, case, and size and any other factor which affects performance.

(3) Each utility shall keep a record of inspections, repairs and tests made to all correction devices. Such records will be made available to the commission or its designee upon request.

(4) Where a utility elects to transmit the above required data through electronic or computer discs, it must first obtain approval from the department staff that the system will be compatible with data processing equipment available to staff.

(b) Records. Each utility shall maintain records as stipulated in Part 292 and Appendix 4-A, *infra* of this Title.

227.3 Application for approval

227.4 Modification of approved devices

.SO DOC 16B-227.1

NYCRR

Section 227.1 Definitions.

Unless the specific context otherwise requires, as used in this Part:

(a) The term meter means any meter or meter testing device used for

the determination of the units of gas furnished.

(b) The term accessory means any remote meter reading device or any associated metering device, either remote or attached, used to display, transmit or adjust the reading of a meter index.

(c) The term acceptable devices means those types of meters or accessories, eligible to be submitted for approval, that shall be capable of conforming to requirements intended to determine their reliability and acceptable accuracy insofar as they can be demonstrated by tests; displacement meters shall meet or exceed the requirements specified in the appropriate American National Standards Institute (ANSI) B109.1-1986-Diaphragm Type Gas Displacement Meters (500 cubic feet per hour capacity and under), ANSI B109.2-1986 Diaphragm Type Gas Displacement Meters (over 500 cubic feet per hour capacity) or ANSI B109.3-1986-Rotary Type Gas Displacement Meters. Those standards are available as described in section 10.3(g) of this Title.

(d) The term approved devices means those types of meters or accessories which have been approved by the commission for use in customer billing and in connection with measuring gas that affects a utility revenue stream required to be reported to the commission.

.SO DOC 16B-227.2 NYCRR

227.2 Selection of devices for approval.

One or more units of equipment covered by the application, as determined by staff, shall be made available for testing and may be retained for such purpose by the commission. Such units shall be intended for actual use and not include experimental models.

.SO DOC 16B-227.3 NYCRR

227.3 Application for approval.

(a) An application for approval shall be filed by the first utility intending to use the meter or accessory in New York with the Secretary to the Commission, in accordance with the requirements of § 3.5 of this Title.

(b) An application for approval shall contain:

- (1) name and address of applicant;
- (2) name and address of manufacturer;
- (3) manufacturer's type designation;
- (4) complete technical description covering construction details, materials and principles of operation;
- (5) test data observed and/or prepared by the applicant;
- (6) test data certified by the manufacturer;
- (7) photographs (8 X 10 inches, exploded view) and/or manufacturer's drawings;

(8) the general customer category or specific application for which the utility intends to use the meter or accessory; and

(9) the approximate cost per unit.

.SO DOC 16B-227.4 NYCRR

227.4 Modification of approved devices.

(a) Permission to use an approved device is effective only for those types which are of the same design and construction as the type approved. If the manufacturer of an approved device changes its materials, construction, or design in a manner that may affect its operation, accuracy or safety, the sponsoring utility or the utility intending to use the modified device shall notify the commission staff, specifying the changes.

(b) The commission will evaluate the effects of the modification and determine whether the device remains acceptable, and if so, whether the existing approval is adequate or should be amended, and will so notify the utility.

.SO DOC 16B-PT228 NYCRR

PART 228

TESTING GAS METERS ON COMPLAINT OF CUSTOMERS

(Statutory authority: Public Service Law, § 67)

Sec.

228.1 Restriction against removing meter

228.2 Requirements for referee test

228.3 Referee test result

228.4 Adjustment of bills for fast meters

.SO DOC 16B-228.1 NYCRR

228.1 Restriction against removing meter.

If a customer shall have made a complaint involving the accuracy of a meter to the utility, said meter shall not be removed unless:

(a) the meter shall have failed to provide safe and adequate service;

(b) said customer shall have made request to the utility for a

complaint test; or

(c) a warrant of this commission, directing that said meter be removed for a referee test, shall have been received by said utility.

.SO DOC 16B-228.2 NYCRR

228.2 Requirements for referee test.

Whenever any utility receives notice from this commission that a customer has requested a referee test of his or her gas meter, the utility shall replace the meter within 10 days unless it is of a type usually tested in the field. In the latter case, the utility shall provide appropriate personnel and equipment to assist in the

field-testing of the accuracy of the meter by this Commission. If a meter cannot be made available for a referee test within the time specified, written notice shall be sent to this Commission giving the causes for the delay.

.SO DOC 16B-228.3

NYCRR

228.3 Referee test result.

(a)(1) The result of a referee test shall be the average of three tests at the check rate where the test results are expressed to the nearest 0.1 percent.

(2) A meter shall be deemed accurate if the average of the three referee tests is within ± 2.0 percent of 100 percent proof. The proof of a meter is the percent registration found when the meter is tested. A proof of 100 percent indicates the meter is accurate. A proof of less than 100 percent indicates the meter is fast (+) and registers more volume than actually passed through the meter. A proof of more than 100 percent indicates the meter is slow (-) and registers less volume than actually passed through the meter.

.SO DOC 16B-228.4

NYCRR

228.4 Adjustment of bills for fast meters.

If, upon conducting a referee test, a gas meter is found to be registering more than two percent fast (98.0% proof), the customer's bills shall be adjusted for that amount that deviates from 100 percent proof for one half of the quantity registered since the last test of the meter for a period not to exceed six years. Where the same meter has served more than one customer since last test, the original test date shall still apply; however, the current customer's bills shall not be adjusted beyond his or her turn-on date. However, if a customer can provide copies of his or her bills beyond the six-year period, the bills will be used up to the time of last meter test. If it can be established that the error is due to an accident or other cause, the approximate date of which can be determined, the bill shall be adjusted back to such date, or a maximum of six years. If, however, the consumer has suffered no damage from said error by virtue of the fact that the meter has registered a quantity of gas less than that allowed for the minimum rate of the applicable rate schedule, no adjustment will be made. No refund will be made if the meter error was caused by the customer's action.

.SO DOC 16B-229.1

NYCRR

Section 229.1 Definitions.

(a) The term heating value per cubic foot shall be defined as being identical to that of total calorific value provided by the current relevant code of the American Society for Testing and Materials. It may be expressed on a wet or dry basis and so labeled. The factor for converting heating value per cubic foot on the wet basis to the dry basis at 60 degrees Fahrenheit, and the same pressure base conditions, is 1.0177. Except where noted, the wet basis of measurement is inferred in the remainder of this Part.

(b) One therm is equal to 100,000 British thermal units.

(c) Therm billing is defined as a method of billing consumers, for the actual amount of energy used, in units of therms.

.SO DOC 16B-229.2 NYCRR

229.2 Average heating value. (a) Average heating value for all gas distributed in each municipality or part thereof on a volumetric basis shall have a continuous:

(1) monthly average heating value of not less than 1,000 British thermal units per cubic foot or that amount specified by the company in its tariff schedule;

(2) three-day average heating value of not less than 980 British thermal units per cubic foot or 98 percent of that amount specified by the company in its tariff schedule.

(b) Where therm billing is employed, subdivision (a) of this section does not apply.

.SO DOC 16B-229.3 NYCRR

229.3 Equipment and testing procedures. Each company shall provide each of its testing stations required by subdivisions (a) through (d) of section 229.50 of this Part with equipment fully complying and standardized, maintained, adjusted and calibrated in full compliance with procedures acceptable to this commission.

.SO DOC 16B-229.4 NYCRR

229.4 Required tests. (a) Unless tests are made as provided for under subdivision (c) of this section, each company shall install a recording calorimeter at each of its testing stations required by subdivisions (a) through (d) of section 229.50 of this Part, the installation of said recording calorimeter to be subject to acceptance by this commission. Each recording calorimeter shall be maintained and operated by each company in such a manner as to continuously record the heating value of all distributed gas. Each recording calorimeter shall be calibrated weekly with a certified standard gas with a heating value that was determined by comparison with that of a standard methane, accurate to within 1.0 British thermal unit per cubic foot, certified by the National Bureau of Standards.

(b) The results of the calibration shall be recorded. Each said recording calorimeter shall be adjusted if it is determined to be in error.

(c) Other methods of determining heating value of distributed gas may be used providing they have been approved by this commission before they are used.

.SO DOC 16B-229.5 NYCRR

229.5 Records. (a) Each company shall compute and record both daily and monthly the average heating value of the distributed gas tested at each of its testing stations as required by subdivisions (a) through (d) of section 229.50 of this Part and as determined by the tests required by section 229.4 of this Part. For every testing station where a recording calorimeter is maintained and operated, a continuous record of the heating value of the distributed gas, as determined by the recording calorimeter, shall be maintained and the corrected averaged heating value of the distributed gas shall be computed and recorded both daily and monthly from the continuous record, except that for each day that the corrected maximum heating value exceeds the corrected minimum heating value by two or more percent of the latter, the corrected average, minimum and maximum heating value of the distributed gas shall be computed and recorded from the continuous record. A copy of each heating value record shall be maintained at its originating testing stations.

(b) Where therm billing is employed, all records of calibration and tests made to determine the accuracy of the therm billing factor shall be maintained by the company.

.SO DOC 16B-229.10

NYCRR

229.10 Hydrogen sulfide.

(a) Allowable concentration. The gas distributed by each company shall contain no quantity of hydrogen sulfide greater than that permitted by subdivision (b) of this section.

(b) Equipment and testing procedure. (1) Each company shall provide each of its testing stations required by section 229.50 of this Part with equipment for the qualitative determination of the hydrogen sulfide content of gas fully complying with the provisions of this Part. In each instance of evidence of or doubt or difference of opinion regarding the presence of hydrogen sulfide in the distributed gas, or where directed by this commission, the company shall provide said testing stations with equipment for the quantitative determination of the hydrogen sulfide content of gas fully complying and maintained in full compliance with the provisions of paragraphs 65 through 87 of the relevant effective code of the American Petroleum Institute, the presently effective code being entitled "Recommended Practice for Measuring, Sampling, and Testing Natural Gas (RP 50A, Third Edition)" (the presently effective code hereinafter referred to as APIRP 50 A).

(2) Each company shall make all of the determinations of the hydrogen sulfide content of the distributed gas required by subdivision (c) of this section in full compliance with the following procedure and record

the results thereof:

A strip of white filter paper moistened with a fresh solution containing five percent by weight of lead acetate shall be exposed to the distributed gas for one minute in a previously purged apparatus, fully complying and maintained in full compliance with the form recommended therefor by the second edition of Circular 48 of the National Bureau of Standards entitled "Standard Methods of Gas Testing" (hereinafter referred to as NBS C 48), through which the gas flows at a rate of approximately five cubic feet per hour. The gas shall not directly impinge upon the test strip during the test. At the end of the stated time, the test strip thus exposed shall be compared with a second test strip similarly prepared but not exposed to the gas. If the exposed strip is ascertained to be not noticeably darker than the comparison strip, the gas shall be considered to be free of hydrogen sulfide. If the exposed strip is ascertained to be noticeably darker than the comparison strip or if there is any doubt or difference of opinion regarding the color of the exposed strip, the gas shall be quantitatively tested for hydrogen sulfide in full compliance with the provisions of APIRP 50 A.

(c) Required tests. Each company shall make and record the results of one daily test of the hydrogen sulfide content of the distributed gas on each of not less than five days per calendar week at each of its testing stations required by subdivisions (a) through (d) of section 229.50 of this Part, except that, where there is evidence of the presence of hydrogen sulfide in said gas, three such tests shall be made daily at intervals of not less than three hours until said tests indicate the continued absence of hydrogen sulfide in the gas for a period of at least one week. At a testing station testing distributed gas obtained from a company's standby source, said company need not make a test of the hydrogen sulfide content of said gas during any day that the gas is obtained from said standby source for a total of less than one hour.

.SO DOC 16B-229.11

NYCRR

229.11 Total sulfur. (a) Allowable concentration. The gas distributed by each company shall contain not more than 30 grains of total sulfur per 100 cubic feet of gas volume measured at a temperature of 60 degrees Fahrenheit and an absolute pressure of 30 inches of mercury column.

(b) Equipment, testing procedure and required tests. (1) In each instance of evidence of or doubt or difference of opinion regarding the presence of total sulfur in the distributed gas, or where directed by this commission, each company shall:

(i) provide its testing stations required by subdivisions (a) through

(d) of section 229.50 of this Part with equipment for the quantitative determination of the total sulfur content of gas fully complying and maintained in full compliance with any one of the foms* recommended therefor by NBS C 48, or with the provisions of the relevant effective code of the American Society for Testing and Materials, the presently effective code being entitled "Standard Method of Test for Total Sulfur in Fuel Gases (D 1072-56)", and including a calibrated integrating dry displacement meter whose index may be read to 0.001 cubic foot;

* So in original. "foms" should be "forms"

(ii) make all of the quantitative determinations of the total sulfur content of the distributed gas that may be required by this commission likewise in full compliance with either code; and

(iii) quantitatively determine and record the total sulfur content of the distributed gas at its testing stations required by subdivisions (a) through (d) of section 229.50 of this Part as directed by this commission.

(2) Where said company is periodically supplied with reports regarding the total sulfur content of said gas, the information in said reports shall be filed with this commission at the time of the filing of the monthly reports required by section 229.61 of this Part. Said reports shall also include suitable identifying data, such as the source of each gas sample tested, the date that it was taken, the date, method and location of test, etc., and sufficient information to demonstrate that each sample is representative of the gas delivered to the company.

.SO DOC 16B-229.12

NYCRR

229.12 Ammonia. (a) Allowable concentration. The gas distributed by each company shall contain not more than five grains of ammonia per 100 cubic feet of gas volume measured at a temperature of 60 degrees Fahrenheit and an absolute pressure of 30 inches of mercury column.

(b) Equipment, testing procedure and required tests. In each instance of evidence of or doubt or difference of opinion regarding the presence of ammonia in the distributed gas, each company may be required to make suitable tests therefor with suitable equipment and a suitable testing procedure at its testing stations required by subdivisions (a) through (d) of section 229.50 of this Part as directed by this commission.

.SO DOC 16B-229.20

NYCRR

229.20 Equipment and testing procedure.

Within 30 days of the effective date hereof, each company distributing natural gas shall advise this commission, by a letter signed by a responsible official of the company, of the manner in which the specific gravity of said gas is determined at or before each respective source of

the gas. Each company's statement shall include the locations where said determinations are made, the name of the transmission corporation or company making said determinations at each location, information indicating that the samples tested in said determinations at each location are representative of the gas distributed by the company, the types of specific gravity equipment used in said determinations at each location and a summary of the procedure employed at each location for making said determinations and verifying their accuracy.

(a) Determination for metering purposes. (1) Where a company distributes natural gas that has had its specific gravity determined by the relevant transmission corporation in a manner adequate for orifice and other types of velocity metering at a testing station fully complying with the provisions of subdivision (b) of section 229.50, and section 229.51, with its total chemical composition unchanged from the location of specific gravity determination to the location of consumption, specific gravity equipment need not be installed in its testing station testing said gas provided that said company is periodically supplied with reports regarding the specific gravity of the gas. Said reports shall also include suitable identifying data such as the source of each gas sample tested, the date that it was taken, the date, method and location of test, etc. and sufficient information to demonstrate that each sample is representative of the gas delivered to the company, that its specific gravity has been determined in a manner adequate for orifice and other types of velocity metering and that the equipment used to determine the specific gravity of the gas is periodically adjusted and calibrated in accordance with the provisions of subdivision (a) of section 229.21.

(2) Where a company distributes gas that has not had its specific gravity determined in a manner adequate for orifice and other types of velocity metering at a testing station fully complying with the provisions of subdivision (b) of section 229.50, and section 229.51 or that does not have its total chemical composition unchanged from the location of specific gravity determination to the location of consumption, part of which is distributed to a consumer with an orifice or other type of velocity meter, said company shall

(i) provide each of its testing stations testing said gas required herein by subdivisions (a) through (d) of section 229.50 with a recording gravitometer fully complying and standardized, maintained, adjusted and calibrated in full compliance with the provisions thereof of the relevant effective code of the American Society for Testing Materials, the presently effective code being entitled "Standard Methods

of Test for Specific Gravity of Gaseous Fuels (D 1070-52)" (the presently effective code hereinafter referred to as ASTM D 1070), and the recommendations therefor of pages 76 through 95 of Miscellaneous Publication M 177 of the National Bureau of Standards entitled "Tests of Instruments for the Determination, Indication, or Recording of the Specific Gravities of Gases" (hereinafter referred to as NBS M 177) and (ii) operate said recording gravitometer likewise in full compliance with said codes.

(b) Automatic and manual determination. In each instance not described herein by subdivision (a), each company shall

(1) provide each of its testing stations required herein by subdivisions (a) through (d) of section 229.50 with specific gravity equipment fully complying and standardized, maintained, adjusted and calibrated in full compliance with the relevant provisions therefor of ASTM D 1070 and/or the relevant recommendations therefor of NBS M 177 and those of the manufacturer's instructions therefor that do not conflict with either ASTM D 1070 or NBS M 177 and

(2) operate said specific gravity equipment likewise in full compliance with said codes.

.SO DOC 16B-229.21

NYCRR

229.21 Required tests. (a) Determination for metering purposes. Where a company is required by the provisions of subdivision (a) of section 229.20 herein to provide any of its testing stations required herein by subdivisions (a) through (d) of section 229.50 with a recording gravitometer for the purpose of determining the specific gravity of the distributed gas in a manner adequate for orifice and other types of velocity metering, said company shall continuously record the specific gravity of the distributed gas therewith. Each said recording gravitometer shall be calibrated once each calendar month at intervals of not more than 35 days and the results recorded. Each said recording gravitometer shall be adjusted if it is determined to be in error.

(b) Automatic determination. Where the tests set forth in subdivision (a) are not required, the company shall determine the specific gravity of the distributed gas either in compliance with subdivision (c) herein or continuously determine the specific gravity of the distributed gas with automatic specific gravity equipment at the testing stations required herein by subdivisions (a) through (d) of section 229.50 in compliance with this rule. Where the automatic specific gravity equipment is of an indicating type, the specific gravity of the distributed gas shall be read and recorded daily therefrom. In all instances, automatic specific gravity equipment shall be calibrated once

each alternate calendar month at intervals of not more than 70 days and the results recorded.

(c) Manual determination. Unless tests are made in conformity with subdivisions (a) or (b) herein, each company shall determine and record the specific gravity of the distributed gas with manual specific gravity equipment at the testing stations required herein by subdivisions (a) through (d) of section 229.50 except that at a testing station testing gas obtained from a stand-by source, said tests need not be made during any day that gas be obtained from said stand-by source for a total of less than one hour.

.SO DOC 16B-229.22

NYCRR

229.22 Records. The average specific gravity of the distributed gas tested at each of its testing stations required herein by subdivisions (a) through (d) of section 229.50, as determined by the tests required herein by section 229.21, shall be computed and recorded for each day and each calendar month by each company. In each instance of a testing station where a recording gravitometer is maintained and operated, a continuous record of the specific gravity of the distributed gas, as determined by said recording gravitometer, shall be maintained and the corrected average specific gravity of the distributed gas be computed and recorded for each day and each calendar month from said continuous record except that for each day that the corrected maximum specific gravity exceeds the corrected minimum specific gravity by two or more per cent of the latter, the corrected average, maximum and minimum specific gravity of the distributed gas be computed and recorded from said continuous record. A copy of each specific gravity record shall be maintained at its originating testing station.

.SO DOC 16B-229.30

NYCRR

229.30 Equipment.

Each company shall provide each of its testing stations required herein by subdivisions (a) through (d) of section 229.50 with appropriate equipment for the determination of the partial chemical composition (percentages of carbon dioxide, illuminants, oxygen and carbon monoxide) of gas.

.SO DOC 16B-229.31

NYCRR

229.31 Required tests and testing procedure. (a) Where a company is periodically supplied with reports regarding the chemical composition of the natural gas purchased from a transmission corporation, the information in said reports shall be filed with this commission at the time of the filing of the monthly reports required herein by section 229.61. Said reports shall also include suitable identifying data such

as the source of each gas sample tested, the date that it was taken, the date, method and location of test, etc. and sufficient information to demonstrate that each sample is representative of the gas delivered to the company.

(b) In all other instances, each company shall make and record the results of determinations of the chemical composition of the distributed gas at each of its testing stations required herein by subdivisions (a) through (d) of section 229.50 at such intervals and using such methods as may be acceptable to or required by this commission.

.SO DOC 16B-229.40

NYCRR

229.40 Combustible additives.

Within 30 days of the effective date hereof, each company shall advise this commission, by a letter signed by a responsible official of the company, of the extent and circumstances under which it adds supplement and/or substitute gas to the gas usually distributed. If, at any time subsequent to said filing with this commission, a company proposes new or additional sources of supplement and/or substitute gas at existing or new locations, said company shall amend its filing, by a letter signed by a responsible official of the company, to advise this commission of the proposed sources of gas at least 90 days prior to the effective date of said change except that, in instances of sudden emergency where such prior notice of the proposed sources of gas proves impossible, such notice of the proposed sources of gas shall be given to this commission, by a telegram over the name of a responsible official of the company, at the earliest possible date.

.SO DOC 16B-229.41

NYCRR

229.41 Non-combustible additives. Where a company proposes the addition of air or any other extraneous non-combustible gas other than water vapor to the gas previously authorized for distribution by this commission, said addition shall not be made without the specific authorization thereof of this commission.

.SO DOC 16B-229.42

NYCRR

229.42 Standards of interchangeability. In order to establish the quality and proportions in which any supplement, substitute or diluent gas may be added to the gas usually distributed, each company shall be guided by the relevant effective publications of the American Gas Association, Bureau of Mines, Institute of Gas Technology and National Bureau of Standards in the design, construction and operation of manufactured gas plants and gas mixing stations and the compositions and proportions of said gases.

.SO DOC 16B-229.43

NYCRR

229.43 Verification of interchangeability.

To assure that the burning qualities of the distributed gas do not vary sufficiently to adversely affect the safety and/or efficiency of any appliances, each company shall maintain and operate suitable test equipment, during the periods when its manufactured gas plant and/or gas mixing station is operating, to compare the burning qualities of the distributed gas with those of the gas with which its consumers' appliances have been adjusted. The types and adjustments of said test equipment shall be representative of those of its consumers' appliances. The performance of said test equipment shall be observed at frequent intervals whenever supplement, substitute or diluent gas is added to the gas usually distributed and be considered to be indicative of the actual interchangeability of the gases involved. Records shall be kept of the periodic observation of the performance of said test equipment.

.SO DOC 16B-229.50

NYCRR

229.50 Number and location.

Within 30 days of the effective date hereof, each company shall advise this commission, by a letter signed by a responsible official of the company, of the location of each of the testing stations to be provided, maintained and operated by the company and the source of the gas that each of said testing stations purports to test. If, at any time subsequent to said filing with this commission, a company obtains additional or new sources of gas, said company shall amend its filing at least 90 days prior to the effective date of said change, by a letter signed by a responsible official of the company, to advise this commission of the additional or new sources and the testing stations to be provided, maintained and operated for testing the gas to be obtained therefrom. All testing stations shall meet the following requirements:

(a) Single company testing stations. (1) Where a company purchases or produces gas at one or more locations, testing stations shall be provided, maintained and operated by said company, with one testing station for each separate ultimate source of gas, located between the location of conditioning of said gas and the point of mixture of the gas with gas from any other source. All of the tests required herein shall apply to said testing stations.

(2) Where a company has two or more sources of gas supplying one distribution system, said company may be required to provide and maintain such additional testing stations on its distribution system as may be necessary to enable this commission's staff to verify the quality of the mixture of gases being delivered to consumers' premises.

(b) Joint testing stations. (1) Where a company purchases gas, having

a common ultimate source, at one or more locations or where two or more companies obtain their gas supply from one or more common ultimate sources, said companies may provide, maintain and operate joint testing stations, with one such testing station for each separate ultimate source of gas, located prior to the point of mixture of the gas with gas from any other source. All of the tests required herein shall apply to said testing stations.

(2) One or more companies may designate one testing station for each separate ultimate source of gas, provided, maintained and operated by the transmission corporation from which said companies purchase their gas, as a testing station meeting the provisions herein, provided that the gas tested by said testing station is continuously representative of that delivered to said companies, that said testing station is located within the State of New York or 40 miles thereof and that said companies shall assure this commission that said testing station continuously meets the provisions of the rules and regulations herein. All of the tests required herein shall apply to such testing stations.

(c) Underground storage fields. Where a company obtains part of its gas supply from an underground storage field in which the chemical composition of the gas may be so altered as to depart from the standards established herein, the company shall take such remedial measures as may be necessary and shall provide, maintain and operate a testing station for making tests appropriate for the determination of the compliance of said gas with the provisions of the rules and regulations herein.

(d) Small districts. (1) Where a company distributes manufactured gas to 100 or less consumers or natural and/or mixed gas to 1,000 or less consumers, said mixed gas being composed of not less than 70 per cent natural gas as gaged by its thermal content on the basis of the annual gas send-out to the consumers of said gas, said company need not provide the testing stations required herein by subdivisions (a) through (d) of section 229.50.

(2) Where natural gas produced in the State of New York, representing less than 10 percent of the thermal content of the annual gas send-out to the consumers of said gas, feeds into a company's general transmission and distribution system at various isolated locations, said company need not provide a testing station therefor.

(3) Any company exempted by this section from providing a testing station in any district shall provide and maintain suitable sampling facilities to enable the staff of this commission to obtain samples of gas from the system and determine the pressure in said system.

229.51 Equipment, maintenance and availability. Each company shall provide each of its testing stations required herein by subdivisions (a) through (d) of section 229.50 of this Part with suitable equipment, including apparatus, reagents and facilities for testing gas, together with all necessary accessories and appurtenances, as required herein and maintain said equipment in good condition. The contents of each said testing station shall be subject to acceptance by this commission. Access to each said testing station shall be available at all times to the staff of this commission for the purpose of making gas tests and/or inspections of the testing station.

.SO DOC 16B-229.52 NYCRR

229.52 Gas sampling. Where a company makes any of the tests required herein on gas that is sampled at a location other than that of the test, said gas shall be sampled in full compliance with the provisions of the relevant effective code of the American Society for Testing Materials, the presently effective codes being entitled "Standard Method of Sampling Natural Gas (D 1145-53)" and "Standard Method of Sampling Manufactured Gas (D 1247-54)."

.SO DOC 16B-229.60 NYCRR

229.60 Records.

Each company shall retain all of its records of the tests required herein on suitable forms for a period of not less than two years for examination and inspection by the staff of this commission.

.SO DOC 16B-229.61 NYCRR

229.61 Reports. Each company shall file a report for each calendar month with the office of this commission in the City of New York or in the City of Albany not more than 20 days after the expiration of the calendar month including the results of all tests and computations required herein, full relevant information for each testing station required herein, an explanation for each instance of noncompliance with the rules and regulations herein that may have occurred and a statement regarding each relevant emergency that may have occurred. Said report shall be furnished on a form, corresponding to that illustrated in form B and form C, Appendix 7-B of this Title, and provided by the company, be signed by a responsible official of the company.

.SO DOC 16B-229.70 NYCRR

229.70 Revision of other publications referred to herein.

For the purpose of complying with the rules and regulations herein, each company shall be governed, insofar as the same are herein made applicable, by the provisions of the publications of the American Gas Association, American Petroleum Institute, American Society for Testing

Materials, Bureau of Mines, Institute of Gas Technology and National Bureau of Standards referred to herein which were in effect December 31, 1956. Upon the filing by a company of copies of an amended or revised edition of any of said publications with this commission, said amended or revised edition shall replace the edition referred to herein as a standard in the applicability of the rules and regulations herein, effective 90 days after the date of said filing, unless otherwise directed by this commission.

PART 230

EXTENSION OF MAINS AND SERVICE LINES--GAS
CORPORATIONS

(Statutory authority: Public Service Law, §§ 65(1), 66(1))

Sec.

230.1 Definitions

230.2 Provision of gas service

230.3 Charges for additional facilities

230.4 Furnishing of rights-of-way or agreement to pay costs

230.5 Installation before service required

230.6 Inspection, maintenance and replacement of facilities

.SO DOC 16B-230.1

NYCRR

Section 230.1 Definitions. Unless the context otherwise requires, as used in this Part:

(a) The term main means a pipeline located on a public or private right-of-way which is generally available or used to transport gas to more than one service line.

(b) The term service line means a piping, including associated metering and pressure reducing appurtenances, that transports gas below grade from a main to the first accessible fitting inside the wall of a customer's building when a meter is located within the building; if a meter is located outside the building, the service line will be deemed to terminate at the outside of the building foundation wall.

(c) The term public right-of-way means the territorial limits of any street, avenue, road or way (other than a limited access thoroughfare) that is for any highway purpose under the jurisdiction of the State of New York or the legislative body of any county, city, town or village and is open to public use.

(d) The term adjusted gas revenue means the revenue realized from the applicable service classification rates and charges, minus revenue taxes, the minimum charge and the cost of gas.

.SO DOC 16B-230.2

NYCRR

230.2 Provision of gas service. (a) Utility obligation to provide gas service. When an application for gas service is made to a gas corporation by the owner or occupant of a building situated on property abutting on or having access to any public right-of-way in which the governmental authority having jurisdiction will permit the corporation to install and maintain facilities, the corporation shall render the service requested in accordance with the provisions of this Part. If due to unusual circumstances the actual cost per foot of a particular installation is greater than two times the corporation's average cost per foot of new installations for service for the 12 months ended September 30th of the previous year, it may apply to the commission for relief from so much of this Part as it deems necessary in order to provide the service.

(b) Obligations of all applicants. An applicant shall first have:

(1) assured the corporation that he/she will be a reasonably permanent customer;

(2) agreed in writing to pay to the corporation:

(i) the material and installation costs relating to any portion of the service line, service connections and appurtenant facilities located on his/her property that exceeds the portion which the corporation is required to install without charge;

(ii) any surcharge relating to the portion of the main and appurtenant facilities that exceeds the portion which the corporation is required to install without charge; and

(iii) the rates charged like customers; and

(3) furnished reasonable security as to the performance of his/her agreement, if required to do so by the corporation.

(c) Residential applicant--nonheating. If an applicant requests residential nonheating service, the gas corporation shall furnish, place and construct all mains, service lines, service connections and appurtenant facilities necessary to render the service requested. The cost and expense which the corporation must bear shall include:

(1) the material and installation costs relating to up to 100 feet of main, service line measured from the centerline of the public right-of-way (or the main if it is closer to the customer and development will be limited to one side of the right-of-way for at least 10 years), service connections and appurtenant facilities, but not less than 100 feet of main (if necessary) plus the length of service line necessary to reach the edge of the public right-of-way; and

(2) the amounts paid to governmental authorities for permits to do the work required and all paving charges that are legally imposed by any

governmental authority for the repair or replacement of any street or sidewalk disturbed in the course of such installation.

(d) Residential applicant--heating. If an applicant requests residential heating service, the corporation shall furnish, place and construct all mains, service lines, service connections and appurtenant facilities necessary to render the service requested. The cost and expense which the corporation must bear shall include:

(1) the material and installation costs relating to:

- (i) up to 100 feet of main and appurtenant facilities; and
- (ii) up to 100 feet of service line measured from the centerline of the public right-of-way (or the main if it is closer to the customer and development will be limited to one side of the right-of-way for at least 10 years), service connections and appurtenant facilities; but not less than the length of service line necessary to reach the edge of the public right-of-way; and

(2) the amounts legally imposed by governmental authorities for obtaining required work permits and for repairing or replacing disturbed pavement.

(e) Nonresidential applicant. If an applicant which will be a firm, nondual-fuel customer requests service other than residential service, the corporation shall furnish, place and construct all mains, service lines, service connections and appurtenant facilities necessary to render the service requested. The cost and expense which the corporation must bear shall include:

(1) the material and installation costs relating to:

- (i) up to 100 feet of main and appurtenant facilities; and
- (ii) any service line, service connections and appurtenant facilities located in the public right-of-way; and

(2) the amounts legally imposed by governmental authorities for obtaining required work permits and for repairing or replacing disturbed pavement.

(f) Matters reserved for utilities' tariffs. This section sets forth the minimum obligations of gas corporations with respect to the facilities required to be provided without charge to applicants for residential service and firm, nondual-fuel nonresidential service. Each corporation may, in its tariff schedules, extend such obligation, to the extent the provision of additional facilities without charge is cost-justified. Each corporation's obligations with respect to applicants for interruptible or dual-fuel nonresidential service shall be governed by tariffs approved by the commission.

230.3 Charges for additional facilities. (a) If, in order to provide service to an applicant, the gas corporation must install mains and appurtenant facilities in addition to those required to be provided without charge under section 230.2 of this Part, the corporation shall impose a surcharge subject to the following provisions.

(1) The surcharge relating to mains and appurtenant facilities including return, depreciation, taxes and maintenance shall not exceed 20 percent per year of the actual reasonable cost of such facilities that exceeds the portion which the corporation is required to install without charge to an applicant, if the corporation lays a main of four inches or less in nominal diameter (in the case of low pressure distribution) or of two inches or less in nominal diameter (in the case of high pressure distribution). If the corporation lays a main greater than four inches in nominal diameter (in the case of low pressure distribution) or greater than two inches in nominal diameter (in the case of high pressure distribution), the surcharge shall not exceed 20 percent per year of the estimated reasonable cost of a four-inch main (in the case of low pressure distribution), unless the estimated consumption of the proposed customer(s) requires the installation of a larger-sized main, in which event the surcharge shall not exceed 20 percent per year of the actual reasonable cost of such main. The surcharge shall commence when gas service is first available to an applicant and shall be paid ratably for each billing period.

(2) The surcharge shall be reduced by 50 percent of adjusted gas revenues, but the credit shall not exceed the amount of the surcharge as determined above.

(3) Whenever more than one customer is connected to a main extension, the surcharge shall be so adjusted that the corporation shall not receive in any one calendar year a greater percentage from all customers served from the main extension than that applicable to such extension. The surcharge shall also be reasonably allocated among the customers being served from the main extension, taking into account the portion of mains and appurtenant facilities which the corporation is required to provide without charge to each customer served from such facilities.

(4) Each surcharge shall cease:

(i) whenever the length of a main extension required to be provided without charge to all customers served from such extension shall equal or exceed the total length of such extension;

(ii) whenever the total adjusted gas revenue from all customers served from a main extension shall equal or exceed 40 percent of the cost of such extension in excess of that required to be provided without charge,

in each of any two consecutive calendar years; or

(iii) after a period of 10 years following its commencement.

(5) Should the adjusted gas revenue from all customers served from a main extension exceed the carrying cost of the entire extension, any surcharges (or contributions) paid by such customers during the preceding five years shall be refunded to such customers.

(6) No surcharge shall be imposed if the total adjusted gas revenue from all customers served from a main extension is estimated to exceed 40 percent of the actual reasonable cost of such extension in each of any two consecutive calendar years.

(b) If, in order to provide service to an applicant, the gas corporation must install service lines, service connections and appurtenant facilities in addition to those required to be provided without charge under section 230.2 of this Part, the corporation may impose a charge for material and installation costs as set forth in its tariff approved by the commission.

.SO DOC 16B-230.4

NYCRR

230.4 Furnishing of rights-of-way or agreement to pay costs. (a) Each applicant or customer shall execute and deliver to the gas corporation from which service is requested or by which service is being provided, free from cost, satisfactory permanent easements or rights-of-way to permit the corporation to provide service.

(b) The corporation shall not be obliged to provide service to any applicant or customer which has neither:

(1) delivered to the corporation satisfactory permanent easements of rights-of-way; nor

(2) requested that the corporation obtain such easements or rights-of-way, agreed to pay any costs which the corporation incurs in obtaining them and (if required to do so by the corporation) furnished reasonable security as to the performance of his agreement.

.SO DOC 16B-230.5

NYCRR

230.5 Installation before service required.

Whenever a gas corporation installs service lines, service connections or appurtenant facilities at the request of an applicant who does not immediately desire service, the applicant shall bear the entire reasonable expense of providing, placing and constructing such facilities but shall be entitled to a refund whenever gas service is begun for such part of the expense as the corporation is herein before required to assume. The refund shall be the cost of the service lines and appurtenances, less depreciation at the rate of three percent per year.

.SO DOC 16B-230.6

NYCRR

230.6 Inspection, maintenance and replacement of facilities. (a) Each gas corporation shall be solely responsible for the inspection, testing, operation, maintenance, replacement and reconstruction of all mains, service lines, service connections and appurtenant facilities which it uses to supply gas to customers.

(b) The corporation shall bear the cost of inspecting, testing and operating all facilities. It shall bear the cost of maintaining, replacing or reconstructing all main and appurtenant facilities. It shall also bear the cost of maintaining, replacing or reconstructing the service line and appurtenant facilities necessary to serve each as if such customer were an applicant for service, unless an act or omission of the customer necessitates the replacement or reconstruction.

(c) If an act or omission of any customer who had installed facilities necessitates the replacement or reconstruction of such facilities, the customer shall pay to the corporation the cost of replacement or reconstruction.

PART 231

RESIDENTIAL SUBMETERING

(Statutory authority: Public Service
Law, § 66)

Sec.

231.1 Prohibition of residential submetering required

.SO DOC 16B-231.1

NYCRR

Section 231.1 Prohibition of residential submetering required. (a) New York State Electric & Gas Corporation, Republic Light, Heat and Power Co., Inc., and the City of Dunkirk shall file appropriate amendments to their tariff schedules, to become effective on January 1, 1955 on not less than 30 days' notice to the public and this commission, prohibiting the submetering, remetering or resale of gas or electricity for residential purposes.

(b) All gas corporations, electric corporations, gas and electric corporations and municipalities other than those named in subdivision (a) of this section, which have not filed with this commission tariff provisions prohibiting the submetering of gas or electricity for residential purposes shall, within 30 days, after service of this Part, file appropriate amendments to their tariff schedules, to become effective on not less than 30 days' notice to the public and this commission, prohibiting the submetering, remetering or resale of gas or electricity for residential purposes.

PART 232

NOTICE OF INTERRUPTION OF SERVICE

(Statutory authority: Public Service Law,
§§ 65(1), 66(2))

Sec.

232.1 Definition of interruption of service

232.2 Report of interruption of service

232.3 Time of filing

232.4 Contents

.SO DOC 16B-232.1

NYCRR

Section 232.1 Definition of interruption of service. For the purposes of the reporting requirements set forth in this Part, an interruption of service shall be the temporary inability to supply gas safely to a customer caused by or related to one or more of the following conditions:

- (a) third party damages;
- (b) leaks on mains (corrosion, material defect etc.);
- (c) water, freeze-up or dry stoppage in gas main or service;
- (d) loss in pressure due to inadequate system design or capacity or overpressure conditions which make the continued use of gas appliances hazardous;
- (e) high pressure customers interrupted when line pressure is reduced to make repairs;
- (f) damage by utility personnel, utility personnel error or improper operating practice;
- (g) problem on supplier's system; and
- (h) any other similar interruption caused by damage or failure of utility facilities.

.SO DOC 16B-232.2

NYCRR

232.2 Report of interruption of service.

Each gas utility and each municipality providing a gas service is required to file with the commission in the manner hereinafter set forth a report of each unscheduled interruption to service upon the distribution systems of such corporation or municipality.

So in original. "company" inadvertently omitted.

.SO DOC 16B-232.3

NYCRR

232.3 Time of filing. Said reports shall be filed with the commission weekly, not later than Wednesday of the week following that for which the report is rendered; all such reports of interruptions shall be filed with the Public Service Commission, Agency Building 3, Empire State

PART 233
MINIMUM INSULATION STANDARDS FOR THE PROVISION
OF GAS AND ELECTRIC UTILITY SERVICE
(Statutory authority: Public Service Law,
§§ 5(2R), 65(1), 66(2))

Sec.

233.1 Definitions

MINIMUM STANDARDS FOR NEW DWELLINGS

233.2 Applicability and compliance

233.3 Waivers

233.4 Certificate of compliance

233.5 Compliance procedures

233.6 Penalties for noncompliance

MINIMUM INSULATION STANDARDS FOR EXISTING DWELLINGS
CONVERTING TO
UTILITY GAS OR ELECTRIC SPACE HEAT

233.7 Applicability and conditions

233.8 Waivers

233.9 Certificate of compliance

233.10 Penalties for noncompliance

.SO DOC 16B-233.1 NYCRR

Section 233.1 Definitions.

(a) Dwelling. A building designed or used as the living unit for one or more families. For the purposes of this standard, mobile homes shall not be considered dwellings.

(b) Historical building. Any building or structure designated historically significant by the State or local governing body, or listed (or determined by the Secretary of the Interior to be eligible to be listed) in The National Register of Historic Places.

.SO DOC 16B-233.2 NYCRR

233.2 Applicability and compliance.

(a) All new dwellings in the State of New York for which an application for a building permit was made and plans were filed on or after January 1, 1979, and all new dwellings within the State for which construction was begun on or after January 1, 1979, will not be eligible

for gas and electric service unless these dwellings comply with the New York State Energy Conservation Construction Code. Compliance with this code will be satisfied under any of the following circumstances:

(1) a building permit is obtained for the dwelling from a building code authority or similar authority empowered by local law to issue building permits;

(2) an affirmation is given by the contractor or builder on a certificate of compliance (see Appendix B-1 of this Title) that the construction of the dwelling will comply with the Energy Conservation Construction Code within 30 days after occupancy; or

(3) a modification or variance from the requirements of the Energy Conservation Construction Code is issued by the State Board of Review as constituted pursuant to the Executive Law.

(b) For any dwelling constructed after April 1, 1977 but before January 1, 1979, gas and electric service will not be provided without compliance with the minimum insulation standards promulgated by the commission in Opinion 77-10 (Case 26286), as amended (as described in section 10.3 of this Title).

.SO DOC 16B-233.3

NYCRR

233.3 Waivers. For any dwelling subject to the requirements of section 233.2(b) of this Part, a waiver from these requirements may be granted by:

(a) the utility, when the overall heat loss for the building envelope does not exceed the total heat loss which would result from conformance to the individual requirements. The heat loss calculations shall be certified by a licensed engineer or architect;

(b) the utility, if the applicant for service can establish through two estimates, one of which may be a utility audit, that the purchase price and installation charge (excluding financing charges) will be greater than seven times the anticipated annual savings to be obtained, based on the present cost of the fuel currently used in the dwelling;

(c) the Public Service Commission for just cause, in unusual circumstances, if the applicant for gas or electric utility service has been denied a waiver pursuant to subdivision (a) or (b) of this section.

A copy of each variance granted or denied by the utility shall be made available to the commission, and each applicant denied a variance shall be promptly informed by the utility of the right to appeal to the commission.

.SO DOC 16B-233.4

NYCRR

233.4 Certificate of compliance. (a) A certificate of compliance (see Appendix B-1 of this Title), shall be used in all areas of the State

where no local authority exists, to assure compliance with the insulation requirements of the Energy Conservation Construction Code.

(b) Each certificate of compliance shall be signed by the builder or contractor, and the owner shall receive a copy of such certificate.

.SO DOC 16B-233.5

NYCRR

233.5 Compliance procedures. (a) In areas where there is no local building code authority, upon a complaint by a dwelling owner or tenant concerning noncompliance with the provisions of section 233.2 of this Part, the utility will perform an onsite inspection to determine conformance with the standards concerning roofs, walls, foundation walls, floors, windows and doors. The result of this inspection will be provided in writing to the owner (and tenant when applicable) of the building.

(b) Whenever the utility finds, as a result of such inspection or notification by the local building code authority, more than one outstanding complaint against any particular contractor, wherein a dwelling constructed by such contractor or builder was found to be in noncompliance with the applicable standards, the utility shall refuse to provide gas or electric service to any construction site of that contractor or builder until all existing violations are corrected. The utility shall undertake random inspections of the future construction work of a past noncomplying contractor or builder until such time as the utility is satisfied that the applicable standards are being met.

.SO DOC 16B-233.6

NYCRR

233.6 Penalties for noncompliance. (a) In the event the utility finds that any dwelling fails to comply with subdivision (a) or (b) of section 233.2 of this Part, the utility shall impose a 25-percent surcharge on any bill for electric or gas service to the customer until such violations are corrected.

(b) The effective date of the surcharge rate shall be:

(1) immediately after notice, in the event the owner is directly responsible for the noncompliance; or

(2) ninety days after notice, in the event the owner has not contributed to the deficiencies. No surcharge shall be applied if the owner brings the building into compliance within 90 days.

(c) In the event the owner is not billed for the provision of utility service, no surcharges will be applied to the bills of the nonowner occupants of the dwelling. Instead, after notification to the owner that the building is not in compliance, a surcharge will be billed to the owner. The surcharge will be 25 percent of the utility bills for the dwelling that is not in compliance.

(d) In the event that circumstances prevent collecting the surcharge amount from the owner of the noncomplying building, the utility may refuse future connections for service to new tenants in the dwelling until it is brought into compliance.

(e) Furthermore, if the owner is an occupant of the dwelling but is not billed for any gas or electric utility service, the surcharge will be imposed on the bill for service to the unit occupied by the owner.

.SO DOC 16B-233.7 NYCRR

233.7 Applicability and conditions.

An existing dwelling will not be supplied gas or electric service for the purpose of converting to gas or electric space heat unless:

(a) the roof/ceiling has at least six inches of insulation or insulation with an R value of 19 or greater;

(b) the dwelling has storm windows, or thermal windows with multiple glazing; and

(c) the entrances have storm doors or thermal doors.

.SO DOC 16B-233.8 NYCRR

233.8 Waivers. (a) The utility may waive the requirements in section 233.7 of this Part where:

(1) the applicant for service can establish through two estimates, one of which may be a utility audit, that the purchase price and installation charge (excluding interest charges) will be greater than seven times the anticipated annual savings to be obtained (based on the present cost of the fuel currently used in the building);

(2) the dwelling is an historical building; or

(3) other measures have been taken so that the overall heat loss for the building envelope does not exceed the total heat loss which would result from conformance with the minimum requirements of section 233.7 of this Part. Such a heat loss calculation must be certified by a licensed architect or engineer.

(b) In the case of a dwelling having a flat roof, or having four or more stories and converting to gas service in a temperature-controlled service classification, compliance with the roof insulation standard will not be required if four or more inches of insulation are already in place or if insulation can be installed only by means of cutting an opening in the roof.

(c) In the case of a dwelling having six or more stories, storm windows will not be required as long as the utility certifies that the dwelling's windows are caulked and weatherstripped. This certification shall be made in writing to the commission. A storm window will not be required on any window opening onto a fire escape.

(d) Copies of waivers granted or denied by a utility shall be made available to the commission. Applicants denied waivers shall be informed of their right to appeal that denial to the commission.

(e) The commission may grant a waiver of the requirements of section 233.7 of this Part for just cause after an applicant for gas or electric service has been denied a waiver by the utility.

.SO DOC 16B-233.9

NYCRR

233.9 Certificate of compliance. (a) A dwelling's compliance with section 233.7 of this Part shall be certified either by (1) the owner, (2) a contractor of the owner's choice who has inspected the building, or (3) a utility representative who has inspected the building at the owner's request. (See Appendix B-2 of this Title.)

(b) The utility will provide the certificate of compliance to the applicant at the time of application for service, so that the applicant will be apprised of the requirements for service and the methods by which compliance can be certified.

.SO DOC 16B-233.10

NYCRR

233.10 Penalties for noncompliance. (a) The utility shall impose a 25-percent surcharge on any bill for electric or gas service to any dwelling which has been converted to gas heat, or any dwelling which has converted to electric space heat and which does not comply with the standards set forth in section 233.7 of this Part.

(b) The effective date of the surcharge rate shall be:

(1) immediately after notice, in the event the owner is directly responsible for the noncompliance; or

(2) ninety days after notice, in the event the owner has not contributed to the deficiencies. No surcharge shall be applied if the owner brings the building into compliance within 90 days.

(c) In the event the owner is not billed for the provision of utility service, no surcharges will be applied to the bills of the nonowner occupants of the dwelling. Instead, after notification to the owner that the building is not in compliance, a surcharge will be billed to the owner. The surcharge will be 25 percent of the utility bills for the dwelling that is not in compliance.

(d) In the event that circumstances prevent collecting the surcharge amount from the owner of the noncomplying building, the utility may refuse future connections for service to new tenants in the dwelling until it is brought into compliance.

(e) Furthermore, if the owner is an occupant of the dwelling but is not billed for any gas or electric utility service, the surcharge will be imposed on the bill for service to the unit occupied by the owner.

245.2 Issuance not heretofore reported

.SO DOC 16B-245.1

NYCRR

Section 245.1 Contents of notice.

Pursuant to the provisions of section 69 of the Public Service Law, as amended, every gas corporation subject to said section, after the issuance or assumption of stocks, bonds, notes or other evidences of indebtedness, including bonds, notes or other evidences of indebtedness, payable on demand or within less than 12 months, shall file with this commission a notice of such transaction within the time and in the form specified in the following:

- (a) Name of reporting utility (indicate whether corporation, partnership, individual, or other party).
- (b) Address of reporting utility.
- (c) The name of the official responsible for statements submitted and to whom should be addressed any correspondence relating thereto.
- (d) Date of the report.
- (e) Period covered by the report (both dates inclusive where applicable).

(f) Information regarding securities or obligations issued.

(1) Pursuant to authority granted by order of this commission:

(i) Notice of issuance shall be filed within the period specified in the order approving the issuance of the securities or obligations.

(ii) Issuance of capital stock, in exchange for convertible securities issued pursuant to commission authorization, may be reported annually, not later than 60 days after the end of the calendar year covered by the report; such report to show only the number of shares of such stock issued during such calendar year, the securities retired by reason of the exchange, and the additional consideration realized, if any, by

reason of the exchange.

(iii) For each type of security or obligation, include the following information, as appropriate:

(a) Designation of security--classified according to distinguishing characteristics, such as class of stock of par value or no par value and dividend rate of preferred stock, or character of debt obligation and interest rate or maturity date or other distinguishing characteristic.

(b) Date of actual issue or assumption.

(c) Number of shares of each class of stock or principal amount of each debt obligation issued.

(d) Consideration realized from each class or type of security (if consideration is other than cash, give description and basis of value).

(e) Case number and date of order of this commission under which the security issue was authorized.

(2) Securities issued or assumed under circumstances not requiring the formal approval of this commission, such as obligations (real estate mortgages, chattel mortgages, conditional sales agreements, promissory notes, etc.) having a term of less than 12 months:

(i) Notice of issuance shall set forth the transaction covering obligations issued during each calendar month and shall be filed not later than 10 days after the end of the calendar month covered by such report.

(ii) For each type of obligation of \$10,000 face amount or more, include the following information as appropriate:

(a) Designation of the obligation giving descriptive distinguishing characteristics. Include description of real estate mortgage, chattel mortgage, conditional sale agreement, or any hypothecation of assets given in connection with the obligation.

(b) Date of actual issue or assumption.

(c) Name of payee.

(d) Principal or face amount.

(e) Rate of interest.

(f) Date of maturity (if demand so specify) or schedule of periodic payments.

(g) Names of endorsers, if any.

(h) Consideration realized from issuance of the obligation.

(i) Purpose for which the obligation was issued; if for cash indicate the use to which the proceeds are to be applied.

(j) State whether the obligation represents an increase of indebtedness or an obligation given in renewal of existing obligations or in cancellation of accounts payable. For renewals of obligations of

\$10,000 face amount or more, give the dates and amounts of the obligations for which the renewal obligation is in whole or in part to be substituted; for renewals of obligations of less than \$10,000 face amount, give the date or month of issuance, the rate of interest, date or month of maturity and the total amount of the obligations for which the renewal obligation is in whole or in part to be substituted. (See subparagraph (iv) of this paragraph.)

(iii) For each type of obligation of less than \$10,000 face amount list the information required in subparagraph (ii) of this paragraph or group each type of obligation of less than \$10,000 face amount which is identical except for the payee, the exact date of issue or assumption within any one calendar month and the exact date of maturity within any one calendar month. Report for each group the information required in subparagraph (ii) (a), (e), (g), (h), (i) and (j) of this paragraph but substitute for subparagraph (ii) (b), (c), (d) and (f), the following; (b) month of actual issue or assumption, (c) number of obligations, (d) amount of indebtedness and (f) the month and year of maturity (if demand so specify).

(iv) Report the outstanding obligations as of the final date of the period covered by the notice of issuance. List the date of actual issue or assumption, principal or face amount and rate of interest of all obligations reported pursuant to subparagraph (ii) of this paragraph. For obligations reported pursuant to subparagraph (iii) of this paragraph, list the date or month of actual issue or assumption, the rate of interest of each obligation or group of obligations and the amount of each obligation or group of obligations outstanding.

(3) For any other class of securities, give corresponding particulars, not later than 10 days after the end of the calendar month in which issued or assumed, to the end that the commission may be fully advised as to the nature of the transaction and purpose for which obligations were incurred or securities were issued and the proceeds therefrom are to be used.

(g) Each notice of issuance of securities or obligations shall be subscribed by an executive officer of the corporation, a member of the partnership, the individual owner, or other party of the utility in behalf of which the notice is filed, and affirmed by such person as true under the penalties of perjury.

.SO DOC 16B-245.2

NYCRR

245.2 Issuance not heretofore reported.

Every such public utility which has not filed with this commission a notice of the issuance of any stocks, bonds, notes, or other evidences

of indebtedness now outstanding and issued with or without the approval of this commission shall, within 30 days from the date of service of a copy of this order, file a notice of each such transaction in the form prescribed herein.

REQUIREMENTS FOR CORROSION CONTROL

255.451 Scope

255.452 Applicability to converted pipelines

255.453 General

255.454 (Reserved)
255.455 External corrosion control: buried or submerged pipelines
installed after July 31, 1971
255.456 (Reserved)
255.457 External corrosion control: buried or submerged pipelines
installed before August 1, 1971
255.458 (Reserved)
255.459 External corrosion control: examination of buried pipeline when
exposed
255.460 (Reserved)
255.461 External corrosion control: protective coating
255.462 (Reserved)
255.463 External corrosion control: cathodic protection
255.464 (Reserved)
255.465 External corrosion control: monitoring
255.466 (Reserved)
255.467 External corrosion control: electrical isolation
255.468 (Reserved)
255.469 External corrosion control: test stations
255.470 (Reserved)
255.471 External corrosion control: test leads
255.472 (Reserved)
255.473 External corrosion control: interference currents
255.474 (Reserved)
255.475 Internal corrosion control: general
255.476 Internal Corrosion control: design and construction of
transmission line
255.477 Internal corrosion control: monitoring
255.478 (Reserved)
255.479 Atmospheric corrosion control: general
255.480 (Reserved)
255.481 Atmospheric corrosion control: monitoring
255.482 (Reserved)
255.483 Remedial measures: general
255.484 (Reserved)

255.1015 GDPIM plan requirements for a master meter or a small liquefied petroleum gas (LPG) operator

.SO DOC 16B-255.1

NYCRR

255.1 Scope.

(a) This Part prescribes minimum safety requirements for the design, fabrication, installation, inspection, testing and operation and maintenance of gas transmission and distribution systems, including gas gathering lines, gas pipelines, gas compressor stations, gas metering and regulating stations, gas mains, service lines, gas storage equipment of the closed pipe type fabricated or forged from pipe or fabricated from pipe and fittings, and gas storage lines not covered by 49 CFR 192.

(b) Every person engaged in the transportation of gas via pipeline

within the State of New York shall comply with the rules set forth in this Part.

(c) This Part is based on and includes many of the requirements set forth in title 49, Code of Federal Regulations, part 192 Department of Transportation Regulations for Transportation of Natural and Other Gas By Pipeline: Minimum Federal Safety Standards. The rules and regulations expressed or implied by this Part meet or exceed those Minimum Federal Safety Standards.

(d) This Part does not apply to:

(1) design and fabrication of pressure vessels covered by the ASME Boiler and Pressure Vessel Code;

(2) piping with metal temperatures above 450 μ F (232 μ C) or below minus 20 μ F (-29 μ C);

(3) the design, fabrication and installation of aboveground or inside piping and appliances beyond the outlet of the customer's meter set assembly (refer to Part 261 and NFPA 54);

(4) piping in oil refineries or natural gasoline extraction plants, gas treating plant piping other than the main gas stream piping in dehydration and all other processing plants installed as part of the gas transmission system, gas manufacturing plants, industrial plants or mines;

(5) vent piping to operate at substantially atmospheric pressures for waste gases of any kind;

(6) wellhead assemblies, including traps or separators, heaters, control valves, and flow lines of less than 100 feet (30.5 meters) in length between the wellhead and trap or separator, or casing and tubing in gas or oil wells (flowlines of greater than 100 feet (30.5 meters) in length between the wellhead and trap or separator are considered to be gathering lines);

(7) proprietary items of equipment, apparatus or instruments;

(8) heat exchangers;

(9) liquid petroleum transportation piping systems; and

(10) prefabricated units which employ plate and longitudinal welds as contrasted to pipe.

(11) any pipeline that transports only petroleum gas or petroleum gas/air mixtures to

(i) fewer than 10 customers, if no portion of the system is located in a public place; or

(ii) a single customer, if the system is located entirely on the customer's premises.

.SO DOC 16B-255.2

NYCRR

255.2 Retroactivity. (a) Except where otherwise indicated, this Part will not be applied retroactively to existing installations insofar as design, fabrication, installation and testing are concerned.

(b) However, all the provisions of this Part will be applicable to any recertification, upgrading, or reconstruction. Recertifications and upgradings are also specifically subject to the provisions of sections 255.552 through 255.557 of this Part.

(c) Existing installations will conform to the requirements of this Part's predecessor in effect at the time of installation.

(d) Provisions of this Part are applicable to the operation and maintenance of existing and new installations.

.SO DOC 16B-255.3

NYCRR

255.3 Definitions.

(a) As used in this Part:

(1) Abandoned means permanently removed from service.

(2) Abnormal operating condition means a condition identified by the operator that may indicate a malfunction of a component or deviation from normal operations that may indicate a condition exceeding design limits or result in a hazard(s) to persons, property, or the environment.

(3) Active corrosion means continuing corrosion that, unless controlled, could result in a condition that is detrimental to public safety.

(4) Alarm means an audible or visible means of indicating to the controller that equipment or processes are outside operator-defined, safety-related parameters.

(5) Approved means prior approval must be granted by the department, except in emergency situations.

(6) Building of public assembly means any school, hospital, nursing home, institution licensed by New York State for the care of children, or any factory which normally employs 75 or more persons; or any other building with a nominal capacity of 75 or more persons to which the public is regularly admitted. Structures which are used solely as office buildings or residential apartments and normally have no other utilization in excess of the 75-person limit are excluded from this definition.

(7) Control room means an operations center staffed by personnel charged with the responsibility for remotely monitoring and controlling a pipeline facility.

(8) Controller means a qualified individual who remotely monitors and controls the safety-related operations of a pipeline facility via a

SCADA system from a control room, and who has operational authority and accountability for the remote operational functions of the pipeline facility.

(9) Covered tasks are all activities, identified by the operator, that:

- (i) are performed on a pipeline facility;
- (ii) are operations and maintenance tasks;
- (iii) are performed as a requirement of this Part; and
- (iv) affect the operation or integrity of the pipeline.

(10) Customer meter means the meter that measures the transfer of gas from an operator to a consumer.

(11) Department. For this Part, department shall mean the Department of Public Service, Office of Electric, Gas and Water, Pipeline Safety Section, or its successor, Three Empire State Plaza, Albany, NY 12223-1350, (518) 474-5453, Safety@dps.ny.gov.

(12) Distribution line means a pipeline other than a gathering or transmission line.

(13) Electrical survey means a series of closely spaced pipe-to-soil readings over pipelines which are subsequently analyzed to identify locations where a corrosive current is leaving the pipeline.

(14) Evaluation means a process, established and documented by the operator, to determine an individual's ability to perform a covered task by any of the following: written examination; oral examination; work performance history review; observation during:

- (i) performance on the job;
- (ii) on the job training;
- (iii) simulations or other forms of assessment.

(15) Excess of flow valve means a device installed in or near the service tee to prevent gas from flowing downstream in the event of failure of the service between the tee and meter. When the gas flow through the device exceeds a designated rate, the valve automatically closes and stops all or a major portion of the gas flow.

(16) Field regulator means a pressure regulating device with an outlet pressure in pounds per square inch serving two through ten residential gas customers. This regulator is also known as a farm tap regulator.

(17) Follow-up inspection means an inspection performed after an outside leak repair procedure has been completed in order to determine the effectiveness of the repair. It includes retests of all positive inside leak indications and outside readings from the original classification.

(18) Gas means natural gas or other fuel gas, including liquefied

petroleum gas distributed as a vapor or gas which is toxic or corrosive.

(19) Gathering line means a pipeline that transports gas from a current production facility to a transmission line, main, or directly to an end user.

(20) High pressure distribution system means a distribution system in which the gas pressure in the main must be reduced before delivery to a customer.

(21) Hoop stress means the stress in a pipe wall, acting circumferentially in a plane perpendicular to the longitudinal axis of the pipe and produced by the pressure of the fluid in the pipe.

(22) Hot tap means a branch piping connection made to an operating pipeline or other facility while it is under gas pressure.

(23) Leakage investigation means a survey conducted for the purpose of determining the extent of potential hazard and classifying a leak in accordance with section 255.807 of this Part. It involves the driving or boring of holes at sufficient depth and testing the atmosphere in these holes and other available openings with a properly calibrated combustible gas indicator (CGI) or approved equivalent device.

(24) Leakage survey means a systematic survey made for the purpose of locating leaks in a gas piping system using an approved instrument which continuously analyzes atmospheric samples near ground level and is capable of detecting the presence of gas in parts per million in air.

(25) Listed specification means a specification set forth in section I of Appendix 14-B of this Title.

(26) Long-term hydrostatic strength means the estimated hoop stress in psi in a plastic pipe wall that will cause failure of the pipe at an average 100,000 hours when subjected to a constant hydrostatic pressure.

(27) Low-pressure distribution system means a distribution system in which the gas pressure in the main is substantially the same as the pressure provided to the typical customer.

(28) Main means a distribution line that serves as a common source of supply for more than one service line.

(29) Maximum actual operating pressure means the maximum pressure that occurs on a system during normal operations over a period of one year.

(30) Maximum allowable operating pressure means the maximum pressure at which a pipeline or segment of a pipeline may be operated under this Part.

(31) Maximum certified operating pressure means the maximum pressure at which a pipeline may be operated, as certified by the original filing under section 255.302(b) of this Part, a predecessor rule thereof, or as modified in accordance with section 255.555 or 255.611 of this Part.

(32) Municipality means a city, county, or other political subdivision of New York State.

(33) Operator means a person who engages in the transportation of gas.

(34) Person means any individual, firm, joint venture, partnership, corporation, association, State, municipality, cooperative association, or joint stock association, and including any trustee, receiver, assignee or personal representative thereof.

(35) Pipe means any pipe or tubing used in the transportation of gas.

(36) Pipeline means all parts of those physical facilities through which gas is transported, including pipe, valves, and other appurtenances attached to pipe, compressor units, metering stations, regulator stations, delivery stations, holders, and fabricated assemblies.

(37) Pipeline environment includes soil resistivity (high or low), soil moisture (wet or dry), soil contaminants that may promote corrosive activity, and other known conditions that could affect the probability of active corrosion.

(38) Pipeline facility means new and existing pipeline, rights-of-way, and any equipment, facility, or building used in the transportation of gas or in the treatment of gas during the course of transportation.

(39) Plastic means a material which contains as an essential ingredient one or more organic polymeric substances of large molecular weight, is solid in its finished state and, at some stage of its manufacture or processing, can be shaped by flow. The two general types of plastic referred to in this Part are thermoplastic and thermosetting.

(40) Qualified means that an individual has been evaluated and can:

- (i) perform assigned covered tasks; and
- (ii) recognize and react to abnormal operating conditions.

(41) Reading means any sustained deviation on a properly calibrated combustible gas indicator (CGI) or approved equivalent instrument taken in a sample point expressed in percent LEL (lower explosive limit) or percent gas-in-air.

(42) Secondary stress means stress created in the pipe wall by loads other than internal fluid pressure. For example, backfill loads, traffic loads, beam action in a span, loads at supports and at connections to the pipe.

(43) Service line means the piping, including associated metering and pressure reducing appurtenances, that transports gas below grade from a main or transmission line to the outlet of the customer meter or at the connection to a customer's piping, whichever is further downstream where a meter is located within the building; if a meter is located outside

the building, the service line will be deemed to terminate at the outside of the building foundation wall.

(44) Service regulator means the device on a service line that controls the pressure of gas delivered from a higher pressure to the pressure provided to the customer. A service regulator may serve one customer or multiple customers through a meter header or manifold.

(45) SMYS means specified minimum yield strength.

(46) Stub means a service line that terminates at or before the property line.

(47) Supervisory control and data acquisition (SCADA) system means a computer-based system or systems used by a controller in a control room that collects and displays information about a pipeline facility and may have the ability to send commands back to the pipeline facility.

(48) Thermoplastic means a plastic which is capable of being repeatedly softened by increase of temperature and hardened by decrease of temperature.

(49) Thermosetting plastic means a plastic which is capable of being changed into a substantially infusible or insoluble product when cured by application of heat or chemicals.

(50) Transmission line means a pipeline, other than a gathering line, that:

(i) transports gas from a gathering line or storage facility to a distribution center or storage facility, or directly to a large volume user that is not downstream from a distribution center; or

(ii) operates at a hoop stress of 20 percent or more of SMYS; or

(iii) transports gas within a storage field.

Note:

A large volume customer may receive similar volumes of gas as a distribution center, and includes factories, power plants, and institutional users of gas.

(51) Transportation of gas means the gathering, transmission, or distribution of gas by pipeline, or the storage of gas.

(52) Welder means a person who performs manual or semiautomatic welding.

(53) Welding operator means a person who operates machine or automatic welding equipment.

(54) Master meter system means a pipeline system for distributing gas within, but not limited to, a definable area, such as a mobile home park, housing project, or apartment complex, where the operator purchases metered gas from an outside source for resale through a gas distribution pipeline system. The gas distribution pipeline system

supplies the ultimate consumer who either purchases the gas directly through a meter or by other means, such as by rents.

.SO DOC 16B-255.4 NYCRR

255.4 Notifications and reports.

Unless otherwise indicated in this Part, submission of any notification, program, plan, letter of intent, procedure, or written or telephonic report as required by any provision of this Part shall be to the Department.

.SO DOC 16B-255.5 NYCRR

255.5 Class locations.

(a) Except as provided in paragraphs (d) (2) and (e) (2) of this section, the class location is determined by the number of buildings intended for human occupancy in the class location unit. The class location unit is an area that extends 220 yards (201.17 meters) on either side of the centerline of any continuous one-mile (1.61 kilometers) length of pipeline. For the purposes of this section, each separate dwelling unit in a multiple dwelling building is counted as a separate building intended for human occupancy.

(b) A Class 1 location is any class location unit that has 10 or fewer buildings intended for human occupancy.

(c) A Class 2 location is any class location unit that has more than 10 but fewer than 46 buildings intended for human occupancy.

(d) A Class 3 location is:

(1) any class location unit that has 46 buildings or more intended for human occupancy; or

(2) any area where the pipeline lies within 100 yards (91.44 meters) of either a building or a small, well defined outside area that is occupied by 20 or more persons during normal use (such as a playground, recreation area, outdoor theater, or other place of public assembly).

(e) A Class 4 location is:

(1) any class location unit that has 100 or more buildings intended for human occupancy and where wall to wall pavement is prevalent; or

(2) any class location unit where buildings with four or more stories aboveground are prevalent.

(f) The boundaries of the class location unit determined in accordance with subdivisions (a) through (e) of this section may be extended according to the following:

(1) When a cluster of buildings intended for human occupancy otherwise requires a Class 2, 3 or 4 location, the class location unit ends 220 yards (201.17 meters) from the nearest building in the cluster.

(2) When the number of buildings with four or more stories requires a

Class 4 location, the class location unit ends 220 yards (201.17 meters) from the nearest building with four or more stories.

NYCRR

255.7 Incorporation by reference.

(a) Any documents or parts thereof incorporated by reference in this Part are a part of this regulation as though set out in full herein.

(b) All incorporated documents are available for inspection at the Department. In addition, the documents are available at the addresses provided in section 10.3 of Title 16 of the Official Compilation of Codes, Rules and Regulations of the State of New York (16 NYCRR).

(c) The full titles for the publications incorporated by reference in this Part are provided in section 10.3 of this Title. Numbers in parentheses indicate applicable editions. Earlier editions of documents listed or editions of documents formerly listed may be used for materials and components manufactured, designed, or installed in accordance with those earlier editions at the time they were listed.

(d) Some standards and specifications cited in Appendices 14-A and 14-B of this Title are supplemented by specific requirements elsewhere in this Part. Users of this Part are advised against attempting direct application of any of these standards without carefully observing this Part's reference to that standard.

.SO DOC 16B-255.9

NYCRR

255.9 Gathering lines.

(a) Except as specified in subdivision (b) of this section, each gathering line shall be designed, constructed, tested, operated and maintained as specified in subdivision (f) of this section.

(b) Gathering lines or any portion thereof located within the following areas shall be designed, constructed, tested, operated and maintained in accordance with the provisions of this Part applicable to steel transmission lines:

(1) within 150 feet (45.72 meters) of an existing residence or place of public assembly;

(2) within the limits of any city, or incorporated village; or

(3) within a designated residential or commercial area such as a subdivision, business or shopping center, or community development.

(c) Prior to the start of construction of any gathering line, notification in compliance with the following paragraphs shall be filed:

(1) At least 30 days prior to the start of construction for any gathering line intended to operate at a pressure of 125 PSIG (862 kPa) or more, the notice must be a letter of intent and a report of specifications similar in format to Appendix 7-G of this Part.

(2) At least 48 hours prior to the start of construction for any gathering line intended to operate at a pressure of less than 125 PSIG (862 kPa), the notice is to be a letter of intent giving the company name, address, and specific location of the intended construction.

(3) Any person intending to construct a gathering line in an area used for commercial farm purposes in at least two of the last five years regardless of the proposed operating pressure of the line, must complete the information requested in Appendices 7-G and 7-G(a) of this Title and provide one copy each of Appendices 7-G and 7-G(a) of this Title to the affected farmland operator and the local county soil and water conservation district at least 48 hours in advance of the start of construction. The person shall retain a copy of Appendices 7-G and 7-G(a) of this Title for review by any interested party in the future.

(d) Notwithstanding any other provisions of this Part, where natural gas is gathered from production facilities, transported off the property on which the production facilities are located, and sold directly to an end user, the following shall apply:

(1) The portion of the pipeline that is downstream of the point at which no additional gas enters the pipeline from a production facility or, in cases involving a single production facility, that is downstream of the point at which the pipeline enters a public right-of-way, or adjacent private right-of-way, is a transmission line if it operates at a hoop stress of 20 percent or more of SMYS or, otherwise, a distribution line. Such transmission or distribution lines shall fully comply with the applicable requirements contained in this Part for such lines.

(2) In cases where gas is transported directly from production facilities and sold to a single end-user, that portion of the pipeline which is downstream of the end-user's property line is a service line and shall comply with the applicable requirements contained in this Part.

(3) Any person who intends to transport and sell gas from a production facility directly to an end-user shall report such intent as part of the notification required by subdivision (c) of this section.

(e) Any person operating a gathering line (regardless of the pipeline material) which was originally constructed to operate at a pressure of less than 125 PSIG (862 kPa) who proposes to increase the operating pressure of such line to 125 PSIG (862 kPa) or more shall comply with the requirements of sections 255.552, 255.553 and 255.555 of this Part.

(f) Any gathering line, except as specified in subdivision 255.9 (b), shall be designed, constructed, tested, operated and maintained in

conformance with sound engineering practices, including the following criteria.

(1) All joints shall be visually inspected for defects and shall have a neat workmanlike appearance. Qualified welders and plastic joiners shall be employed.

(2) Except as provided in paragraph 255.9 (f) (3), all pipe shall be installed with a minimum of 24 inches (610 millimeters) of cover. Where solid rock is encountered, the minimum cover may be reduced to 12 inches (305 millimeters). In areas subject to erosion or in locations where future grading is likely, such as at road, highway, railroad and ditch crossings, additional protection shall be provided.

(3) Notwithstanding paragraph (2) of this subdivision, in areas actively cultivated for commercial farm purposes in at least two out of the last five years, as identified by the farmland operator, all pipe shall be installed with a minimum 40 inches (1016 millimeters) of cover. The farmland operator can also designate such support land areas, not under active cultivation but subject to land management practices such as, but not limited to, drainage and soil erosion control systems. The farmland operator may allow less than 40 inches (1016 millimeters) of cover if less conforms with normal agricultural practices, including land fitting (e.g., plowing, subsoiling, disking, etc.) and prospective agricultural engineering projects taking into account and the recommended practices and standards of the United States Department of Agriculture, Soil Conservation Service, contained in its National Handbook of Conservation Practices and its National Engineering Manual. The farmland operator may require a depth-of-cover greater than 40 inches (1016 millimeters) as a condition of permitting a right-of-way across his or her land where necessary to safely accommodate such practices and projects. Information about soil types and applicable agricultural engineering standards and practices may be obtained from the U.S. Department of Agriculture, Soil Conservation Service office, located in the county in which the gathering line is to be installed.

*Information about soil types and applicable agricultural engineering standards and practices may be obtained from the U.S. Department of Agriculture, Soil Conservation Service office, located in the county in which the gathering line is to be installed.

(4) Each gathering line must be protected from washouts, floods, unstable soil, landslides or other hazards that may cause the pipeline to be exposed, to move, or to sustain abnormal loads.

(5) A suitable conductive wire shall be installed with plastic pipe to facilitate locating it with an electronic pipe locator. Other approved

suitable material or means may be employed for accomplishing this purpose.

(6) The maximum allowable operating pressure for plastic pipelines is to be determined in accordance with either of the formulas in section 255.121 of this Part, subject to the limitations of sections 255.123(b) through (d) of this Part.

(7) All deleterious defects, gouges, dents and grooves shall be eliminated prior to testing.

(8) The pipeline shall be subjected to a minimum pressure test of 100 PSIG (689 kPa) or 1 1/2 MAOP, whichever is greater, for two hours. However, the maximum test pressure for plastic pipe may not be more than three times the design pressure of the pipe. Where reservoir pressure of the field is less than these pressures, the reservoir pressure may be the test pressure.

(9) Test medium shall be air, inert gas or water. Other approved media may be used.

(10) Regardless of installation date, pipeline markers complying with the requirements of section 255.707(d)-(e) of this Part shall be installed at each crossing of a public road, railroad, navigable waterway, and wherever else it is necessary to identify the location of the gathering line to reduce the possibility of damage or interference. In areas used for commercial farm purposes in at least two of the last five years, pipeline markers shall be installed at points which adequately identify the location and direction of the pipeline. Such location points shall be determined in consultation with the farmland operator.

(11) Maps shall be prepared documenting the location of the line and critical valves.

(12) The pipelines shall be patrolled a minimum of every two years for washouts and other hazardous conditions, including a check for area population development change.

(13) The line shall be surveyed for leakage at least once every five years.

(14) The adequacy of over pressure protection devices shall be verified annually to ensure safe operation of the line.

(15) To abandon the gathering system in place, all sources of gas must be disconnected from the system, the system shall be purged with air or inert gas and the ends sealed.

(16) Sufficient documentation shall be maintained to demonstrate compliance with these regulations.

255.11 Petroleum gas systems.

(a) Each plant that supplies petroleum gas by pipeline to a natural gas distribution system must meet the requirements of this Part and NFPA 58 and NFPA 59 (as described in section 10.3 of this Title).

(b) Each pipeline subject to this Part that transports only petroleum gas or petroleum gas/air mixtures must meet the requirements on NFPA 58 and 59 (as described in section 10.3 of this Title).

(c) In the event of a conflict between this Part and NFPA 58 and NFPA 59, NFPA 58 and NFPA 59 prevails.

.SO DOC 16B-255.13

NYCRR

255.13 General.

(a) The rules and regulations of this Part are considered adequate for safety under conditions normally encountered in the gas industry. However, these rules and regulations cannot specifically provide for all abnormal or unusual conditions; nor can they specifically detail all methods for achieving compliance. Approved alternate methods may be used provided that all work performed within the scope of this Part shall meet or exceed the safety standards expressed or implied herein.

(b) In complying with this Part, operators shall use methods that are reasonable and proper for the anticipated operating conditions and that can reasonably be expected to provide a level of safety equivalent to or greater than that which would result from following the generally accepted standards of the gas industry. The Gas Piping Technology Committee Guide (GPTC) for Gas Transmission and Distribution Piping Systems is, except where in conflict with provisions of this Part, representative of this level of practice.

(c) Waiver. If a waiver of or deviation from the application of any rules prescribed in this Part is indicated because of special facts, application may be made to the Public Service Commission for waiver of or deviation from the rules and regulations in this Part. Each request shall include a full and comprehensive justification for such requested waiver or deviation, together with a proposed alternate rule to be considered for application to the conditions requiring the waiver or deviation.

(d) This Part is concerned with the safety of the general public and employee safety to the extent that it is affected by basic design, quality of the materials and workmanship, requirements for testing, and maintenance of gas transmission and distribution facilities. Existing industrial safety regulations pertaining to work area, safety devices, and safe work practices are not intended to be supplanted by this Part.

.SO DOC 16B-255.14

NYCRR

255.14 Conversion to service subject to this Part.

(a) A steel pipeline previously used in other than natural gas service qualifies for use under this Part if the operator prepares and follows a written procedure to carry out the following requirements.

(1) The design, construction, operating, and maintenance history of the pipeline must be reviewed and, where sufficient historical records are not available, appropriate tests must be performed to determine if the pipeline is in satisfactory condition for safe operation.

(2) The pipeline right-of-way, all aboveground segments of the pipeline, and appropriately selected underground segments must be visually inspected for physical defects and operating conditions which reasonably could be expected to impair the strength or tightness of the pipeline.

(3) All known unsafe defects and conditions must be corrected in accordance with this Part.

(4) The pipeline must be tested in accordance with sections 255.503 through 255.517 of this Part to substantiate the maximum allowable operating pressure permitted by this Part.

(b) Each operator must keep for the life of the pipeline a record of investigations, tests, repairs, replacements, and alterations made under the requirements of subdivision (a) of this section.

(c) An operator converting a pipeline from service not previously covered by this part must notify the department of intent to conversion of service 60 days prior to when conversion occurs and to PHMSA as required by 49 CFR section 191.22.

255.15 Rules of regulatory construction. (a) As used in this Part:

- (1) includes means including but not limited to;
- (2) may means is permitted to or is authorized to;
- (3) may not means is not permitted to or is not authorized to; and
- (4) shall is used in the mandatory and imperative sense.

(b) In this Part:

- (1) words indicating the singular include the plural;
- (2) words indicating the plural include the singular; and
- (3) words indicating the masculine gender include the feminine.

.SO DOC 16B-255.17

NYCRR

255.17 Preservation of records.

(a) Notwithstanding the requirements of Part 293 or Part 733 of this Title, the minimum period of retention of records required by this Part shall be at least three years. Longer periods of retention may be mandated by section 255.517 of this Part, Part 293 and Part 733 of this

Title. Longer periods of retention that reflect and align with each inspection or compliance cycle in this Part are required.

(b) All records pertaining to any pipeline designed to operate at 125 psig (862 kPa) or more shall be kept in files reserved for that pipeline only and retained for as long as the line remains in service.

(c) All records or copies thereof, shall be kept on file in the State of New York and accessible to the staff of the Department of Public Service.

.SO DOC 16B-255.51

NYCRR

255.51 Scope. Sections 255.53 through 255.65 of this Part prescribe the minimum requirements for the selection and qualification of pipe and components for use in pipelines.

.SO DOC 16B-255.53

NYCRR

255.53 General. Materials for pipe and components must be:

(a) able to maintain the structural integrity of the pipeline under temperature and other environmental conditions that may be anticipated;

(b) chemically compatible with any gas that they transport and with any other material in the pipe with which they are in contact; and

(c) qualified in accordance with the applicable requirements of this Part.

.SO DOC 16B-255.55

NYCRR

255.55 Steel pipe.

(a) New steel pipe is qualified for use under this Part if:

(1) it was manufactured in accordance with a listed specification;

(2) it meets the requirements of section II or III of Appendix 14-B of this Title; or

(3) it is used in accordance with subdivision (c) of this section.

(b) Used steel pipe is qualified for use under this Part if:

(1) it was manufactured in accordance with a listed specification and it meets the requirements of paragraph II-C of Appendix 14-B of this Title;

(2) it meets the requirements of section II or III of Appendix 14-B of this Title;

(3) it has been used in an existing line of the same or higher pressure and meets the requirements of paragraph II-C of Appendix 14-B of this Title; or

(4) it is used in accordance with subdivision (c) of this section.

(c) New or used steel pipe may be used at a pressure resulting in a hoop stress of less than 6,000 psi (41 MPa) where no close coiling or close bending is to be done.

(d) New steel pipe that has been cold expanded must comply with the

mandatory provisions of API Specification 5L (as described in Section 10.3 of this Title).

(e) New steel pipe that has been cold expanded must comply with the mandatory provisions of API Spec 5L (as described in section 10.3 of this Title).

.SO DOC 16B-255.57 NYCRR

255.57 Cast iron or ductile iron pipe. Cast and ductile iron pipe is prohibited from use in new or replacement installations.

.SO DOC 16B-255.59 NYCRR

255.59 Plastic pipe.

(a) New plastic pipe is qualified for use under this Part if:

(1) when the pipe is manufactured, it is manufactured in accordance with the latest listed edition of a listed specification; and

(2) it is resistant to chemicals with which contact may be anticipated.

(b) Acrylonitrile-butadiene-styrene (ABS) thermoplastic material is prohibited from use in new or replacement installations.

(c) Used plastic pipe is prohibited from use in new or replacement installations. This does not prohibit the reactivation of a plastic pipeline.

(d) Rework and/or regrind material is not allowed in plastic pipe produced after March 6, 2015 used under this Part.

(e) For the purpose of paragraph (a) (1) of this section, where pipe of a diameter included in a listed specification is impractical to use, pipe of a diameter between the sizes included in a listed specification may be used if it:

(1) meets the strength and design criteria required of pipe included in that listed specification; and

(2) is manufactured from plastic compounds which meet the criteria for material required of pipe included in that listed specification.

.SO DOC 16B-255.63 NYCRR

255.63 Marking of materials.

(a) Each valve, fitting, length of pipe, and other component must be marked:

(1) as prescribed in the specification or standard to which it was manufactured, except that thermoplastic fittings made of plastic materials other than polyethylene must be marked in accordance with ASTM D 2513 (as described in section 10.3 of this Title); or

(2) To indicate size, material, manufacturer, pressure rating, and temperature rating, and as appropriate, type, grade, and model (as described in section 10.3 of this Title).

(b) Surfaces of pipe and components that are subject to stress from internal pressure may not be field die stamped.

(c) If any item is marked by die stamping, the die must have blunt or rounded edges that will minimize stress concentrations.

.SO DOC 16B-255.65 NYCRR

255.65 Transportation of pipe.

(a) In a pipeline to be operated at a hoop stress of 20 percent or more of SMYS, an operator may not install pipe having an outer diameter to wall thickness ratio of 70 to 1, or more, that is transported by railroad unless the transportation is performed in accordance with API RP5L1, (as described in section 10.3 of this Title).

(b) Ship or barge. In a pipeline to be operated at a hoop stress of 20 percent or more of SMYS, an operator may not use pipe having an outer diameter to wall thickness ratio of 70 to 1, or more, that is transported by ship or barge on both inland and marine waterways unless the transportation is performed in accordance with API RP 5LW, (as described in Section 10.3 of this Title).

(c) Truck. In a pipeline to be operated at a hoop stress of 20 percent or more of SMYS, an operator may not use pipe having an outer diameter to wall thickness ratio of 70 to 1, or more, that is transported by truck unless the transportation is performed in accordance with API RP 5LT (as described in section 10.3 of this Title).

.SO DOC 16B-255.101 NYCRR

255.101 Scope.

Sections 255.103 through 255.125 of this Part prescribe the minimum requirements for the design of pipe.

.SO DOC 16B-255.103 NYCRR

255.103 General. Pipe must be designed with sufficient wall thickness, or must be installed with adequate protection to withstand anticipated external pressures and loads that will be imposed on the pipe after installation.

.SO DOC 16B-255.105 NYCRR

255.105 Design formula for steel pipe.

(a) The design pressure for steel pipe is determined in accordance with the following formula:

$$P = (2 St/D) \times F \times E \times T$$

P = Design pressure in pounds per square inch (kPa) gauge.

S = Yield strength in pounds per square inch (kPa) determined in accordance with section 255.107 of this Part.

D = Nominal outside diameter of the pipe in inches (millimeters).

t = Nominal wall thickness of the pipe in inches (millimeters).

F = Design factor determined in accordance with section 255.111 of this Part.

E = Longitudinal joint factor determined in accordance with section 255.113 of this Part.

T = Temperature derating factor determined in accordance with section 255.115 of this Part.

(b) If steel pipe that has been subjected to cold expansion to meet the SMYS is subsequently heated, other than by welding or stress relieving as a part of welding, the design pressure is limited to 75 percent of the pressure determined under subdivision (a) of this section if the temperature of the pipe exceeds 900 μ F (482 μ C) at any time or is held above 600 μ F (316 μ C) for more than one hour.

.SO DOC 16B-255.107 NYCRR

255.107 Yield strength (S) for steel pipe.

(a) For pipe that is manufactured in accordance with a specification listed in section I of Appendix 14-B of this Title, the yield strength to be used in the design formula in section 255.105 of this Part is the SMYS stated in the listed specification, if that value is known.

(b) For pipe that is manufactured in accordance with a specification not listed in section I of Appendix 14-B of this Title and whose specification or tensile properties are unknown, the yield strength to be used in the design formula in section 255.105 of this Part is one of the following:

(1) if the pipe is tensile tested in accordance with section II-D of Appendix 14-B to this Title, the lower of either 80 percent of the average yield strength determined by the tensile tests, or the lowest yield strength determined by the tensile tests; or

(2) if the pipe is not tensile tested as provided in paragraph (1) of this subdivision, 24,000 psi (165 MPa).

.SO DOC 16B-255.109 NYCRR

255.109 Nominal wall thickness (t) for steel pipe.

(a) If the nominal wall thickness for steel pipe is not known, it is determined by measuring the thickness of each piece of pipe at quarter points on one end.

(b) However, the nominal wall thickness used may not be more than 1.14 times the smallest measurement taken on pipe less than 20 inches (508 millimeters) in outside diameter, nor more than 1.11 times the smallest measurement taken on pipe 20 inches (508) millimeters) or more in outside diameter.

.SO DOC 16B-255.111 NYCRR

255.111 Design factor (F) for steel pipe.

(a) Except as otherwise provided in subdivisions (b), (c) and (d) of this section, the design factor to be used in the design formula in section 255.105 of this Part is determined in accordance with the following table:

Class Location	Design Factor (F)
1	0.72
2	0.60
3	0.50
4	0.40

(b) A design factor of 0.60 or less must be used in the design formula in section 255.105 of this Part for steel pipe in Class I locations that:

- (1) crosses, without a casing, the right-of-way of an unimproved public road;
- (2) crosses, without a casing, or makes a parallel encroachment on, the right-of-way of either a hard surfaced road, a highway, a public street or a railroad;
- (3) is supported by a vehicular, pedestrian, railroad, or pipeline bridge; or
- (4) is used in a fabricated assembly, (including separators, mainline valve assemblies, cross-connections, and river crossing headers) or is used within five pipe diameters in any direction from the last fitting of a fabricated assembly, other than a transition piece or an elbow used in place of a pipe bend which is not associated with a fabricated assembly.

(c) For Class 2 locations, a design factor of 0.50, or less, must be used in the design formula in section 255.105 of this Part for uncased steel pipe that crosses the right-of-way of a hard surfaced road, a highway, a public street, or a railroad.

(d) For Class 1 and Class 2 locations, a design factor of 0.50, or less, must be used in the design formula in section 255.105 of this Part for:

- (1) Steel pipe in a compressor station, regulating station, or measuring station; and
- (2) Steel pipe, including a pipe riser, on a platform located offshore or in inland navigable waters.

.SO DOC 16B-255.113

NYCRR

255.113 Longitudinal joint factor (E) for steel pipe.

(a) The longitudinal joint factor to be used in the design formula in section 255.105 of this Part is determined in accordance with the

following table:

Specification*	Pipe Class	Longitudinal Joint Factor (E)
ASTM A 53/A 53M	Seamless	1.00
	Electric resistance welded	1.00
	Furnace butt welded60
ASTM A 106	Seamless	1.00
ASTM A 211	Spiral welded steel pipe80
ASTM A 333	Seamless	1.00
	Electric resistance welded	1.00
ASTM A 381	Double submerged arc welded	1.00
ASTM A 671	Electric fusion welded	1.00
ASTM A 672	Electric fusion welded	1.00
ASTM A 691	Electric fusion welded	1.00
API Spec 5L	Seamless	1.00
	Electric resistance welded	1.00
	Electric flash welded	1.00
	Submerged arc welded	1.00
	Furnace butt welded60
Other	Pipe over four inches (102 millimeters)80
	Pipe four inches (102 millimeters) or less60

*As described in section 10.3 of this Title.

(b) If the type of longitudinal joint cannot be determined, the joint factor to be used must not exceed that designated for Other.

.SO DOC 16B-255.115

NYCRR

255.115 Temperature derating factor (I) for steel pipe.

(a) The temperature derating factor to be used in the design formula in section 255.105 is determined as follows:

Gas Temp. in degrees Fahrenheit (Celsius)	Temperature derating factor (I)
250 (121) or less.....	1.000
300 (149).....	0.967
350 (177).....	0.933
400 (204).....	0.900
450 (232).....	0.867

(b) For intermediate gas temperatures, the derating factor is

determined by interpolation.

.SO DOC 16B-255.121

NYCRR

255.121 Design of plastic pipe.

The design pressure for plastic pipe is determined by either of the following formulas, subject to the limitations of section 255.123 of this Part:

$$P = 2 St \times DF$$
$$(D - t)$$
$$P = 2S \times DF$$
$$(5DR - 1)$$

Where:

P = Design pressure, psig (kPa).

S = For thermoplastic pipe, the HDB determined in accordance with the listed specification at a temperature equal to 73µF (23µC), 100µF (38µC), 120µF (49µC), or 140µF (60µC). In the absence of an HDB established at the specified temperature, the HDB of a higher temperature may be used in determining a design pressure rating at the specified temperature by arithmetic interpolation using the procedure in Part E of PPI TR-3 entitled, Policy for Determining Long-Term Strength (LTHS) by Temperature Interpolation, as published in the technical report TR-3 "HDB/PBD/MRS Policies" (as described in section 10.3 of this Title). For reinforced thermosetting plastic pipe, 11,000 psi (75.8 MPa). (Note: Arithmetic interpolation is not allowed for PA-11 pipe.)

t = Specified wall thickness, inches (millimeters).

D = Specified outside diameter, inches (millimeters).

SDR = Standard dimension ratio, the ratio of the average specified outside diameter to the minimum specified wall thickness, corresponding to a value from a common numbering system that was derived from the American National Standards Institute preferred number series 10.

DF = 0.32 or

0.40 for PA-11 pipe produced after January 23, 2009 with nominal size (IPS or CTS) 4-inch or less, and a SDR of 11 or greater (i.e. thicker pipe wall)

255.123 Design limitations for plastic pipe.

(a) Except as provided for in paragraph (e) and paragraph (f) of this

section and in paragraph 255.9(f) (6) for gathering lines, the design pressure may not exceed a gauge pressure of 100 psig (689kPa).

(b) Plastic pipe may not be used where operating temperatures of the pipe will be:

(1) below $-20\mu\text{F}$ ($-29\mu\text{C}$), or $-40\mu\text{F}$ ($-40\mu\text{C}$) if all pipe and pipeline components whose operating temperature will be below $-20\mu\text{F}$ ($-29\mu\text{C}$) have a temperature rating by the manufacture consistent with that operating temperature; or

(2) in the case of thermoplastic pipe, above the temperature at which the long-term hydrostatic strength used in the design formula under section 255.121 of this Part is determined, except that thermoplastic pipe manufactured before May 18, 1978, may be used at temperatures up to $100\mu\text{F}$ ($38\mu\text{C}$); or

(3) in the case of reinforced thermosetting plastic pipe up to $150\mu\text{F}$ ($66\mu\text{C}$).

(c) The wall thickness for thermoplastic pipe may not be less than 0.062 inches (1.57 millimeters).

(d) The wall thickness for reinforced thermosetting plastic pipe may not be less than that listed in the following table:

Nominal diameter inches (millimeters)	Minimum wall thickness inches (millimeters)
2 (51).....	0.060 (1.52)
3 (76).....	0.060 (1.52)
4 (102).....	0.070 (1.78)
6 (152).....	0.100 (2.54)

(e) The design pressure for thermoplastic pipe produced after July 14, 2004, may exceed a gauge pressure of 100 psig (689kPa) provided that:

(1) the design pressure does not exceed 125 psig (862 kPa);

(2) the material is a polyethylene (PE) pipe with the designation code as specified within ASTM D2513-09a (as described in Part 10.3 of this Title);

(3) the pipe size is nominal pipe size (IPS) 12 or less; and

(4) the design pressure is determined in accordance with the design equation defined in section 121 of this Part.

(f) The design pressure for polyamide-11 (PA-11) pipe produced after January 23, 2009 may exceed a gauge pressure of 100 PSIG (689 kPa) provided that:

(1) The design pressure does not exceed 200 PSIG (1379 kPa);

(2) The pipe size is nominal pipe size (IPS or CTS) 4-inch or less;
and

(3) The pipe has a standard dimension ratio of SDR-11 or grater (i.e.,
thicker pipe wall).

.SO DOC 16B-255.125

NYCRR

255.125 Design of copper pipe.

(a) Copper pipe used in mains must have a minimum wall thickness of
0.065 inches (1.65 millimeters) and must be hard drawn.

(b) Copper pipe used in service lines must have a minimum wall
thickness as specified for type "L" pipe in ASTM B 88.

(c) Copper pipe used in mains and service lines may not be used at
pressures in excess of 100 psig(689 kPa).

(d) Copper pipe that does not have an internal corrosion resistant
lining may not be used to carry gas that has an average hydrogen sulfide
content of more than 0.3 grains per 100 standard cubic feet (2.83 cubic
meters) of gas. Standard conditions refers to 60 μ F and 14.7 PSIA (15.6
 μ C and one atmosphere) of gas.

.SO DOC 16B-255.141

NYCRR

255.141 Scope.

Sections 255.143 through 255.193 of this Part prescribe the minimum
requirements for the design and installation of pipeline components and
facilities, other than overpressure protection.

.SO DOC 16B-255.143

NYCRR

255.143 General requirements.

(a) Each component of a pipeline must be able to withstand operating
pressures and other anticipated loadings without impairment of its
serviceability with unit stresses equivalent to those allowed for
comparable material in pipe in the same location and kind of service.
However, if design based upon unit stresses is impractical for a
particular component, design may be based upon a pressure rating
established by the manufacturer by pressure testing that component or a
prototype of the component.

(b) The design and installation of pipeline components and facilities
must meet applicable requirements for corrosion control found in this
Part.

.SO DOC 16B-255.144

NYCRR

255.144 Qualifying metallic components. Notwithstanding any
requirement of this Part which incorporates by reference an edition of a
document listed in Section 10.3 or Appendix 14B of this Title, a
metallic component manufactured in accordance with any other edition of
that document is qualified for use under this Part if:

(a) it can be shown through visual inspection of the cleaned component that no defect which might impair the strength or tightness of the component exists; and

(b) the edition of the document under which the component was manufactured has equal or more stringent requirements than an edition of that document currently or previously incorporated by reference (as described in Section 10.3 or Appendix 14B of this Title) for pressure testing, materials, and pressure and temperature ratings.

255.145 Valves.

(a) Except for cast iron and plastic valves, each valve must meet the minimum requirements, or the equivalent, of ANSI/API 6D (as described in section 10.3 of this Title). A valve may not be used under operating conditions that exceed the applicable pressure-temperature ratings contained in those standards.

(b) Each cast iron and plastic valve must comply with the following:

(1) The valve must have a maximum service pressure rating for temperatures that equal or exceed the maximum service temperature.

(2) The valve must be tested as part of the manufacturing, as follows:

(i) With the valve in the fully open position, the shell must be tested with no leakage to a pressure at least 1.5 times the maximum service rating.

(ii) After the shell test, the seat must be tested to a pressure not less than 1.5 times the maximum service pressure rating. Except for swing check valves, test pressure during the seat test must be applied successively on each side of the closed valve with the opposite side open. No visible leakage is permitted.

(iii) After the last pressure test is completed, the valve must be operated through its full travel to demonstrate freedom from interference.

(c) Each valve must be able to meet the anticipated operating conditions.

(d) No valve having shell (body, bonnet, cover, and/or end flange) components made of ductile iron may be used at pressures exceeding 80 percent of the pressure ratings for comparable steel valves at their listed temperature. However, a valve having shell components made of ductile iron may be used at pressures up to 80 percent of the pressure ratings for comparable steel valves at their listed temperature, if:

(1) the temperature-adjusted service pressure does not exceed 1,000 PSIG (6.9 MPa); and

(2) welding is not used on any ductile iron component in the

fabrication of the valve shells or their assembly.

(e) No valve having shell (body, bonnet, cover, and/or end flange) components made of cast iron, malleable iron, or ductile iron may be used in the gas pipe components of compressor stations.

.SO DOC 16B-255.147

NYCRR

255.147 Flanges and flange accessories.

(a) Each flange or flange accessory must meet the minimum requirements of ASME/ANSI B16.5 or MSS SP-44 (as described in section 10.3 of this Title), or the equivalent.

(b) Each flange assembly must be able to withstand the maximum pressure at which the pipeline is to be operated and to maintain its physical and chemical properties at any temperature to which it is anticipated that it might be subjected in service.

(c) Each flange on a flanged joint in cast iron pipe must conform in dimensions, drilling, face and gasket design to ASME/ANSI B16.1 (as described in section 10.3 of this Title) and be cast integrally with the pipe, valve, or fitting.

(d) Bolts or stud-bolts used shall extend completely through the nuts.

.SO DOC 16B-255.149

NYCRR

255.149 Standard fittings. (a) The minimum metal thickness of threaded fittings may not be less than specified for the pressures and temperatures in the applicable standards referenced in this Part, or their equivalent.

(b) Each steel butt-welded fitting must have pressure and temperature ratings based on stresses for pipe of the same or equivalent material.

(c) The actual bursting strength of the fitting must at least equal the computed bursting strength of pipe of the designated material and wall thickness, as determined by a prototype that was tested to at least the pressure required for the pipeline to which it is being added.

.SO DOC 16B-255.150

NYCRR

255.150 Passage of internal inspection devices. (a) Except as provided in subdivision (b) of this section, each new transmission line and each pipe section, valve, fitting or other line component of a transmission line that is replaced must be designed and constructed to accommodate the passage of instrumented internal inspection devices.

(b) This section does not apply to:

- (1) manifolds;
- (2) station piping such as at compressor stations, meter stations, or regulator stations;
- (3) piping associated with storage facilities, other than a continuous run of transmission line between a compressor station and storage

facilities;

(4) cross-overs;

(5) sizes of pipe for which an instrumented internal inspection device is not commercially available; and

(6) transmission lines, operated in conjunction with a distribution system, which are installed in Class 4 locations.

.SO DOC 16B-255.151

NYCRR

255.151 Tapping.

(a) Each mechanical fitting used to make a hot tap must be designed for at least the operating pressure of the pipeline.

(b) Where a ductile iron pipe is tapped, the extent of full-thread engagement and the need for the use of outside-sealing service connections, tapping saddles, or other fixtures must be determined by service conditions.

(c) Where the diameter of a threaded tap in cast iron or ductile iron pipe exceeds 25 percent of the nominal diameter of the pipe, the pipe must be reinforced, except that a 1 1/4-inch (32 millimeters) tap may be made in a four-inch (102 millimeters) cast iron or ductile iron pipe, without reinforcement. In cast iron pipe of a nominal diameter of six inches (152 millimeters) or less, all threaded taps for service line connections must be reinforced.

.SO DOC 16B-255.153

NYCRR

255.153 Components fabricated by welding.

(a) Except for branch connections and assemblies of standard pipe and fittings joined by circumferential welds, the design pressure of each component fabricated by welding, whose strength cannot be determined, must be established in accordance with paragraph UG-101 of the ASME Boiler and Pressure Vessel Code (BPVC) (Section VIII, Division 1) (as described in section 10.3 of this Title).

(b) Each prefabricated unit that uses plate and longitudinal seams must be designed, constructed, and tested in accordance with section 1 of the ASME BPVC (Section VIII, Division 1 or Section VIII, Division 2) (as described in section 10.3 of this Title), except for:

(1) manufactured butt-welded fittings;

(2) pipe that has been produced and tested under a specification listed in Appendix 14-B of this Title;

(3) partial assemblies such as split rings or collars; or

(4) prefabricated units that the manufacturer certifies have been tested to at least twice the maximum pressure to which they will be subjected under the anticipated operating conditions.

(c) Orange-peel bull plugs and orange-peel swages may not be used on

pipelines that are to operate at a pressure of 125 psig (862 kPa) or more.

(d) Except for flat closures designed in accordance with the ASME BPVC (Section VIII, Division 1 or 2) (as described in section 10.3 of this Title), flat closures and fish tails may not be used on pipe that either operates at 100 psig (689 kPa) or more, or is more than 3 inches (76 millimeters) nominal diameter.

(e) A component having a design pressure established in accordance with subdivision (a) or subdivision (b) of this section and subject to the strength testing requirements of 49 CFR §192.505(b) must be tested to at least 1.5 times the MAOP.

.SO DOC 16B-255.155

NYCRR

255.155 Welded branch connections.

(a) Each welded branch connection made to pipe in the form of a single connection, or in a header or manifold as a series of connections, must be designed to ensure that the strength of the pipeline system is not reduced, taking into account the stresses in the remaining pipe wall due to the opening in the pipe or header, the shear stresses produced by the pressure acting on the area of the branch opening, and any external loadings due to thermal movement, weight, and vibration.

(b) The reinforcement required in a welded branch connection shall be determined by the rule that the metal area available for reinforcement shall be equal to or greater than the required area as defined in Rules For Reinforcement Of Welded Branch Connections and examples 1 and 2 in Appendix 14-G of this Title.

(c) If a reinforcement member is required, and the branch diameter is such that a localized type of reinforcement member would extend around more than half the circumference of the header, then a complete encirclement type of reinforcement member shall be used, regardless of the design hoop stress, or a smoothly contoured wrought steel tee of proven design may be used.

.SO DOC 16B-255.157

NYCRR

255.157 Extruded outlets. Each extruded outlet must be suitable for anticipated service conditions and must be at least equal to the design and strength of the pipe and other fittings in the pipeline to which it is attached.

.SO DOC 16B-255.159

NYCRR

255.159 Flexibility. Each pipeline must be designed with enough flexibility to prevent thermal expansion or contraction from causing excessive stresses in the pipe or components, excessive bending or unusual loads at joints, or undesirable forces or moments at points of

connection to equipment, or at anchorage or guide points.

.SO DOC 16B-255.161

NYCRR

255.161 Supports and anchors.

(a) Each pipeline and its associated equipment must have enough anchorage or support to:

- (1) prevent undesigned-for strain on connected equipment;
- (2) resist longitudinal forces caused by a bend or offset in the pipe;

and

- (3) prevent or damp out excessive vibration.

(b) Each exposed pipeline must have enough support or anchorage to protect the exposed pipe joints from the maximum end force caused by internal pressure and any additional forces caused by temperature expansion or contraction or by the weight of the pipe and its contents.

(c) Each support or anchor on an exposed pipeline must be made of durable, non-combustible material and must be designed and installed in compliance with the following:

(1) Free expansion and contraction of the pipeline between supports or anchors may not be restricted.

- (2) Provision must be made for the service conditions involved.

(3) Movement of the pipeline may not cause disengagement of the support equipment.

(d) Each support on an exposed pipeline operated at a stress level of 50 percent or more of SMYS must comply with the following:

- (1) A structural support may not be welded directly to the pipe.

(2) The support must be provided by a member that completely encircles the pipe.

(3) If an encircling member is welded to a pipe, the weld must be continuous and cover the entire circumference.

(e) Each underground pipeline that is connected to an unyielding line or other fixed object must have enough flexibility to provide for possible movement, or it must have an anchor that will limit the movement of the pipeline.

(f) Each underground pipeline that is being connected to new branches must have a firm foundation for both the header and the branch to prevent lateral and vertical movement.

.SO DOC 16B-255.163

NYCRR

255.163 Compressor stations: design and construction.

(a) Each main compressor building of a compressor station must be located on property under the control of the operator. It must be far enough away from adjacent property, not under control of the operator, to minimize the possibility of catching on fire from a conflagration at

structures on adjacent property. There must be enough open space around the main compressor building to allow the free movement of firefighting equipment.

(b) Each building on a compressor station site must be made of noncombustible materials if it contains either:

(1) pipe more than two inches (51 millimeters) in diameter that is carrying gas under pressure; or

(2) gas handling equipment other than gas utilization equipment used for domestic purposes.

(c) Each operating floor of a main compressor building must have at least two separated and unobstructed exits located so as to provide a convenient possibility of escape and an unobstructed passage to a place of safety. Each door latch on an exit must be of a type which can be readily opened from the inside without a key. Each swinging door located in an exterior wall must be mounted to swing outward.

(d) Each fence around a compressor station must have at least two gates located so as to provide a convenient opportunity for escape to a place of safety, or have other facilities affording a similarly convenient exit from the area. Each gate located within 200 feet (61 meters) of any compressor plant building must open outward and, when occupied, must be openable from the inside without a key.

(e) Electrical equipment and wiring installed in compressor stations must conform to the National Electric Code, NFPA-70 (as described in section 10.3 of this Title), so far as that code is applicable.

.SO DOC 16B-255.165

NYCRR

255.165 Compressor stations: liquid removal.

(a) Where entrained vapors in gas may liquefy under the anticipated pressure and temperature conditions, the compressor must be protected against the introduction of those liquids in quantities that could cause damage.

(b) Each liquid separator used to remove entrained liquids at a compressor station must:

(1) have a manually operable means of removing these liquids;

(2) have either automatic liquid removal facilities, an automatic compressor shut-down device, or a high liquid level alarm where slugs of liquid could be carried into the compressors; and

(3) be manufactured in accordance with section VIII of the ASME Boiler and Pressure Vessel Code (BPVC) (as described in section 10.3 of this Title), and the additional requirements of subdivision (e) of section 255.153 of this Part except that liquid separators constructed of pipe and fittings without internal welding must be fabricated with a design

factor of 0.4, or less.

.SO DOC 16B-255.167

NYCRR

255.167 Compressor stations: emergency shutdown.

Except for unattended field compressor stations of 1,000 horsepower (746 kilowatts) or less, each compressor station must have an emergency shutdown system that meets the following:

(a) It must be able to block gas out of the station and blow down the station piping.

(b) It must discharge gas from the blow down piping at a location where the gas will not create a hazard.

(c) It must provide means for extinguishing gas fires and for the shutdown of gas compressing equipment, and electrical facilities in the vicinity of gas headers and in the compressor building, except that electrical circuits that supply emergency lighting required to assist station personnel in evacuating the compressor building and the area in the vicinity of the gas headers must remain energized and electrical circuits needed to protect equipment from damage may remain energized.

(d) It must be operable from at least two locations, each of which is:

(1) outside the gas area of the station;

(2) near the exit gates, if the station is fenced, or near emergency exits, if not fenced; and

(3) not more than 500 feet (152.4 meters) from the limits of the station.

(e) If a compressor station supplies gas directly to a distribution system with no other adequate sources of gas available, the emergency shutdown system must be designed so that it will not function at the wrong time and cause an unintended outage on the distribution system.

.SO DOC 16B-255.169

NYCRR

255.169 Compressor stations: pressure limiting devices. (a) Each compressor station must have pressure relief or other suitable protective devices of sufficient capacity and sensitivity to ensure that the maximum allowable operating pressure of the station piping and equipment is not exceeded by more than 10 percent.

(b) Each vent line that exhausts gas from the pressure relief valves of a compressor station must extend to a location where the gas may be discharged without hazard.

(c) A pressure relief valve shall be installed in the discharge line of each positive-displacement transmission compressor between the gas compressor and the first discharge block valve. The relieving capacity shall be equal to or greater than the capacity of the compressor.

.SO DOC 16B-255.171

NYCRR

255.171 Compressor stations: additional safety equipment. (a) Each compressor station must have adequate fire protection facilities. If fire pumps are a part of these facilities, their operation may not be affected by the emergency shutdown system.

(b) Each compressor station prime mover, other than an electrical induction or synchronous motor, must have an automatic device to shut down the unit before the speed of either the prime mover or the driven unit exceeds a maximum safe speed.

(c) Each compressor unit in a compressor station must have a shutdown or alarm device that operates in the event of inadequate cooling or lubrication of the unit.

(d) Each compressor station gas engine that operates with pressure gas injection must be equipped so that stoppage of the engine automatically shuts off the fuel and vents the engine distribution manifold.

(e) Each muffler for a gas engine in a compressor station must have vent slots or holes in the baffles of each compartment to prevent gas from being trapped in the muffler.

(f) All fuel gas lines within a compressor station, serving the various buildings and residential areas, shall be provided with master shut-off valves located outside of any building or residential area.

.SO DOC 16B-255.173

NYCRR

255.173 Compressor stations: ventilation. Each compressor station building must be ventilated to ensure that employees are not endangered by the accumulation of gas in rooms, sumps, attics, pits, or other enclosed places.

.SO DOC 16B-255.179

NYCRR

255.179 Valves on pipelines to operate at 125 psig (862 kPa) or more.

(a) Each pipeline to operate at 125 psig (862 kPa) or more must have sectionalizing block valves spaced according to the following:

(1) Each point on the pipeline in a Class 4 location must be within 1/2 mile (.805 kilometer) of a valve.

(2) Each point on the pipeline in a Class 3 location must be within two miles (3.22 kilometers) of a valve.

(3) Each point on the pipeline in a Class 2 location must be within 3 1/2 miles (5.63 kilometers) of a valve.

(4) Each point on the pipeline in a Class 1 location must be within five miles (8.05 kilometers) of a valve.

(b) Each sectionalizing block valve and operating device on a pipeline to operate at 125 PSIG (862 kPa) or more must:

(1) be readily accessible and protected from tampering and damage; and

(2) be supported to prevent settling of the valve or movement of the

pipe to which it is attached.

(c) Each section of a pipeline to operate at 125 PSIG 862 (kPa) or more must have a blow-down valve with enough capacity to allow the line to be blown down as rapidly as practicable or other approved means to reduce the pressure.

(d) Each blow-down discharge must be located so the gas can be blown to the atmosphere without hazard and, if the line is adjacent to an overhead electric line, so that the gas is directed away from the electrical conductors.

.SO DOC 16B-255.181

NYCRR

255.181 Distribution line valves.

(a) Each high pressure distribution system must have valves spaced so as to reduce the time to shut down a section of main in an emergency. The valve spacing is determined by the operating pressure, the size of the mains, and the local physical conditions as well as the number and type of consumers that might be affected by a shutdown.

(b) Each regulator station controlling the flow or pressure of gas in a distribution system must have a valve installed on the inlet piping at a distance from the regulator station sufficient to permit the operation of the valve during an emergency.

(1) Such distance must be at least 50 feet (15.2 meters) but no more than 1,000 feet (304.8 meters) from the regulator.

(2) Under unique circumstances which make it impractical to locate the valve at least 50 feet (15.2 meters) from the regulator, a lesser, approved spacing may be used.

(c) Except for single feed systems, regulator stations reducing the pressure from pounds to pounds must also have an emergency valve installed on the station's outlet piping in compliance with paragraphs (b) (1) and (2) of this section.

(d) Each valve on a main installed for operating or emergency purposes must:

(1) be placed in a readily accessible location so as to facilitate its operation in an emergency;

(2) have an operating stem or mechanism that is readily accessible;
and

(3) if the valve is installed in a buried box or enclosure, be installed so as to avoid transmitting external loads to the main.

(e) Each station bypass valve or valve that separates systems operating at different pressures must be identified to prevent unauthorized or inadvertent operation, or be equipped with a device designed to prevent unauthorized operation.

.SO DOC 16B-255.183

NYCRR

255.183 Vaults: structural design requirements.

(a) Each underground vault or pit for valves, pressure relieving, pressure limiting, or pressure regulating equipment, must be able to meet the loads which may be imposed upon it, and to protect installed equipment.

(b) There must be enough working space so that all of the equipment required in the vault or pit can be properly installed, operated, and maintained.

(c) Each pipe entering, or within, a regulator vault or pit must be steel for sizes 10 inches (254 millimeters) and less, except that control and gauge piping may be copper. Where pipe extends through the vault or pit structure, provision must be made to prevent the passage of gasses or liquids through the opening and to avert strains in the pipe.

(d) In the design of vaults and pits for pressure limiting, pressure relieving, and pressure regulating equipment, consideration shall be given to the protection of the installed equipment from damage, such as that resulting from an explosion within the vault or pit, which may cause portions of the roof or cover to fall into the vault.

(e) Vault or pit openings shall be located so as to minimize the hazards of tools or other objects falling upon the regulator, piping, or other equipment. The control piping and the operating parts of the equipment installed shall not be located under a vault or pit opening where workmen can step on them when entering or leaving the vault or pit, unless such parts are suitably protected.

(f) Whenever a vault or pit opening is to be located above equipment which could be damaged by a falling cover, a circular cover shall be installed or other suitable precautions taken.

.SO DOC 16B-255.185

NYCRR

255.185 Vaults: accessibility. Each vault must be located in an accessible location and, so far as practical, away from:

- (a) street intersections or points where traffic is heavy or dense;
- (b) points of minimum elevation, catch basins, or places where the access cover will be in the course of surface waters; and
- (c) water, electric, steam or other facilities.

.SO DOC 16B-255.187

NYCRR

255.187 Vaults: sealing, venting and ventilation.

(a) Each underground vault or closed top pit containing either a pressure regulating or reducing station, or a pressure limiting or relieving station, must be sealed, vented or ventilated.

(b) When the internal volume exceeds 200 cubic feet (5.66 cubic

meters), each of the following apply:

(1) The vault or pit must be ventilated with two ducts, each having at least the ventilating effect of a pipe four inches (102 millimeters) in diameter.

(2) The ventilation must be enough to minimize the formation of combustible atmosphere in the vault or pit.

(3) The ducts must be high enough above grade to disperse any gas-air mixtures that might be discharged.

(c) When the internal volume is more than 75 cubic feet (2.12 cubic meters) but less than 200 cubic feet (5.66 cubic meters), the following apply:

(1) If the vault or pit is sealed, each opening must have a tight-fitting cover without open holes through which an explosive mixture might be ignited, and there must be a means for testing the internal atmosphere before removing the cover.

(2) If the vault or pit is vented, there must be a means of preventing external sources of ignition from reaching the vault atmosphere.

(3) If the vault or pit is ventilated, subdivision (b) or (d) of this section applies.

(d) If a vault or pit covered by subdivision (c) of this section is ventilated by openings in the covers or gratings and the ratio of the internal volume, in cubic feet, to the effective ventilating area of the cover or grating, in square feet, is less than 20 to 1, no additional ventilation is required.

.SO DOC 16B-255.189

NYCRR

255.189 Vaults: drainage and waterproofing. (a) Each vault must be designed so as to minimize the entrance of water. Nevertheless, vault equipment shall be designed to operate safely, if submerged.

(b) A vault containing gas piping may not be connected by means of a drain connection to any other underground structure.

(c) All electrical equipment in vaults must conform to the applicable requirements of Class 1, Group D, of the National Electrical Code, NFPA 70 (as described in section 10.3 of this Title).

.SO DOC 16B-255.190

NYCRR

255.190 Calorimeter or calorimixer structures. (a) Unmanned structures housing calorimeters or calorimixers shall be designed so that the egress shall be directly to and from the outside, and all air movements shall be directly to and from the outside atmosphere. All associated devices which may vent gas shall be vented through piping to the outside atmosphere.

(b) Unmanned rooms with such gas burning equipment shall be equipped

with sensing devices which provide for both the automatic shutdown of the gas supply to such rooms and the signalling of an alarm at a continuously manned post. All alarms shall be immediately investigated.

(c) Combustible material associated with such gas-burning equipment shall be stored safely, and in a manner which separates them from sources of ignition.

.SO DOC 16B-255.191

NYCRR

255.191 Design pressure of plastic fittings.

(a) Thermosetting fittings for plastic pipe must conform to ASTM D 2517 (as described in section 10.3 of this Title).

(b) Thermoplastic fittings for plastic pipe must conform to ASTM D 2513 for plastic materials other than polyethylene or ASTM D2513-09a for polyethylene plastic materials (as described in section 10.3 of this Title).

(c) The design pressure of polyvinyl chloride (PVC) Schedules-40 and 80 thermoplastic fittings must be obtained from the following table:

Size inches	Schedule	PVC Type II Class Location			PVC Type I Class Location		
		1	2 & 3	4	1	2 & 3	4
1/2	40	100	100	100	100	100	100
	80	100	100	100	100	100	100
3/4	40	100	100	96	100	100	100
	80	100	100	100	100	100	100

6	40	56	44	35	100	88	71
	80	89	70	56	100	100	100

Note: These pressure ratings are the same value as the design pressure of the corresponding pipe size and schedule in the same class location, as determined by the formula given in section 255.121 of this Part and the limitations of section 255.123.

.SO DOC 16B-255.193 NYCRR

255.193 Valve installation in plastic pipe. Each valve installed in plastic pipe must be designed so as to protect the plastic material against excessive torsional or shearing loads when the valve or shut-off is operated, and from any other secondary stresses that might be exerted through the valve or its enclosure.

.SO DOC 16B-255.194 NYCRR

255.194 Scope.

Sections 255.195 through 255.203 of this Part prescribe the minimum requirements for the design and installation of overpressure protection devices.

.SO DOC 16B-255.195 NYCRR

255.195 Protection against accidental overpressuring. (a) Except as provided in section 255.197 of this Part, each pipeline that is connected to a gas source so that the maximum allowable operating pressure could be exceeded as the result of pressure control failure or of some other type of failure, must have pressure relieving or pressure limiting devices that meet the requirements of sections 255.199 and 255.201 of this Part.

(b) Additionally, each distribution system that is supplied from a source of gas that is at a higher pressure than the maximum allowable operating pressure for the system must:

(1) have pressure regulation devices capable of meeting the pressure, load, and other service conditions that will be experienced in normal operation of the system; and that could be activated in the event of failure of some portion of the system; and

(2) be designed so as to prevent accidental overpressuring.

.SO DOC 16B-255.197 NYCRR

255.197 Control of the pressure of gas delivered from high pressure distribution systems.

(a) If the maximum actual operating pressure of the distribution system is 60 psig (414 kPa) or less and a service regulator having the

following characteristics is used, no other pressure limiting device is required.

(1) The regulator is capable of reducing distribution line pressure to pressures recommended for household appliances.

(2) It has a single port valve with proper orifice for the maximum gas pressure at the regulator inlet.

(3) The valve seat is made of resilient material designed to withstand abrasion by the gas, impurities in gas, cutting by the valve, and also to resist permanent deformation when it is pressed against the valve port.

(4) The pipe connections to the regulator do not exceed two inches (51 millimeters) in diameter.

(5) The regulator, under normal operating conditions, is able to regulate the downstream pressure within the necessary limits of accuracy and to limit the build-up of pressure under no-flow conditions to prevent a pressure that would cause the unsafe operation of any connected and properly adjusted gas utilization equipment.

(6) The regulator is self-contained with no external static or control lines.

(7) The regulator is of a type including a relief valve which is vented to the atmosphere with the relief valve set to open so that the pressure of the gas going to the customer does not exceed the maximum safe pressure as established by this Part.

(b) If the maximum actual operating pressure of the distribution system is 60 psig (414 kPa) or less, and a service regulator is used that does not have all of the characteristics listed in subdivision (a) of this section or if the gas contains materials that seriously interfere with the operation of service regulators, there must be suitable protective devices to prevent unsafe overpressuring of the customer's appliances if the service regulator fails.

(c) If the maximum actual operating pressure of the distribution system exceeds 60 psig (414 kPa), unless higher pressure is needed by the customer or it is impractical or unsafe to regulate the pressure outside, one of the following methods must be used to regulate and limit the pressure of gas delivered to the customer.

(1) A service regulator having the characteristics listed in subdivision (a) of this section, and another regulator located upstream from the service regulator. The upstream regulator may not be set to maintain a pressure higher than 60 psig (414 kPa). A device must be installed between the upstream regulator and the service regulator to limit the pressure on the inlet of the service regulator to 60 psig (414

kPa) or less in case the upstream regulator fails to function properly. This device may be either a relief valve or an automatic shut-off that closes if the pressure on the inlet of the service regulator exceeds the set pressure (60 psig (414 kPa) or less), and remains closed until manually reset.

(2) A service regulator and a monitoring regulator set to limit, to a maximum safe value, the pressure of the gas delivered to the customer.

(3) A service regulator with a relief valve set to open so that the pressure of gas going to the customer does not exceed a maximum safe value. The relief valve may either be built into the service regulator or it may be a separate unit installed downstream from the service regulator. Either of these combinations may be used alone only in those cases where the inlet pressure on the service regulator does not exceed the manufacturer's safe working pressure rating of the service regulator, and may not be used where the inlet pressure on the service regulator exceeds 125 psig (862 kPa). For higher inlet pressure, the methods in paragraph (1) or (2) of this subdivision must be used.

(4) A service regulator and an automatic shut-off device that closes upon a rise in pressure downstream from the regulator and remains closed until manually reset.

(5) Any service line operating at 125 psig (862 kPa) or more serving customers requiring regulation of the line pressure is to be equipped with either an excess flow valve or must have the first stage regulator located at least 50 feet (15.2 meters) from the building or, if 50 feet (15.2 meters) cannot be attained without entering the roadway, located at the property line.

NYCRR

255.199 Requirements for design of pressure relief and limiting devices.

(a) Except for rupture discs, each pressure relief or pressure limiting device must:

(1) be constructed of materials such that the operation of a device will not be impaired by corrosion;

(2) have valves and valve seats that are designed not to stick in a position that will make the device inoperative;

(3) be designed and installed so that it can be readily operated to determine if the valve is free, can be tested to determine the pressure at which it will operate, and can be tested for leakage when in the closed position;

(4) have its support made of noncombustible material;

(5) have discharge stacks, vents, or outlet ports designed to prevent

accumulation of water, ice, or snow, located where gas can be discharged into the atmosphere without undue hazard;

(6) be designed and installed so that the size of the opening, pipe, and fittings located between the system to be protected and the pressure-relieving device, and the size of the vent line, are adequate to prevent hammering of the valve and to prevent impairment of relief capacity;

(7) where installed at a district regulator station to protect a pipeline system from overpressuring, be designed and installed in compliance with subdivision (b) of this section to prevent any single incident such as an explosion in a vault or damage by a vehicle from affecting the operation of both the overpressure protection device and the district regulator;

(8) except for a valve that will isolate the system under protection from its source of pressure be designed to prevent unauthorized operation of any stop valve that will make the pressure relief valve or pressure-limiting device inoperative; and

(9) where gas pressures are reduced in two or more stages to supply pipelines except field regulators, be designed and installed in compliance with subdivision (b) of this section so that any single incident in one stage will not adversely affect another stage.

(b) For new installations, and for existing above ground stations supplying low-pressure pipelines, the minimum separation distance between the overpressure protection device and the regulator or between stages of regulation shall be:

(1) 50 feet (15.2 meters); or

(2) where it is impracticable because of interfering subsurface structures, not less than 25 feet (7.6 meters) upon approval of the Department.

(c) The requirements contained in subdivision (b) of this section do not apply to those existing stations which, due to their locations or other station protection design features, are adequately protected against any credible single incident affecting the operation of both the overpressure protection device and the district regulator, or which supply integrated distribution systems employing multiple overpressure protection devices of sufficient capacity to prevent overpressuring of the distribution system.

(d) Notwithstanding the installation date or the retroactivity provided by section 255.2(a) of this Part, when overpressure protection is provided by a monitor regulator, a means must be provided to verify that the regulator is functioning properly.

NYCRR

255.201 Required capacity of pressure relieving and limiting stations.

(a) Each pressure-relief or pressure-limiting station or group of stations installed in a low pressure distribution system must have enough capacity, and must be set to operate, to ensure that the pressure may not cause the unsafe operation of any connected and properly adjusted gas utilization equipment.

(b) Each pressure-relief or pressure-limiting station or group of stations installed in pipelines other than low-pressure distribution systems must have enough capacity, and must be set to operate to limit the pressure according to the following paragraphs.

(1) If the maximum allowable operating pressure is 60 PSIG (414 kPa) or more, the pressure may not exceed the maximum allowable operating pressure plus 10 percent, or the pressure that produces a hoop stress of 75 percent of SMYS, whichever is lower.

(2) If the maximum allowable operating pressure is 12 PSIG (83 kPa) or more, but less than 60 PSIG (414 kPa), the pressure may not exceed the maximum allowable operating pressure plus 6 PSIG (41.4 kPa).

(3) If the maximum allowable operating pressure is less than 12 PSIG (83 kPa), the pressure may not exceed the maximum allowable operating pressure plus 50 percent.

(c) When more than one pressure-regulating or compressor station feeds into a pipeline, relief valves or other protective devices must be installed at each station to ensure that the complete failure of the largest capacity regulator or compressor, or any single run of lesser capacity regulators or compressors in that station, will not impose pressures on any part of the pipeline or distribution system in excess of those for which it was designed, or against which it was protected, whichever is lower.

(d) Relief valves or other pressure-limiting devices must be installed at or near each regulator station in a low-pressure distribution system, with a capacity to limit the maximum pressure in the main to two PSIG (14 kPa).
