(a) This section applies to the design of instrument, control, and sampling piping and components. It does not apply to permanently closed systems, such as fluid-filled temperature-responsive devices.

(b) All materials employed for pipe and components must be designed to meet the particular conditions of service and the following paragraphs:

(1) Each takeoff connection and attaching boss, fitting, or adapter

must be made of material suitable to withstand the maximum service pressure and temperature of the pipe or equipment to which it is attached, and be designed to satisfactorily withstand all stresses without failure by fatigue.

(2) Except for takeoff lines that can be isolated from sources of pressure by other valving, a shut-off valve must be installed in each takeoff line as near as practicable to the point of takeoff. Blow-down valves must be installed where necessary.

(3) Brass or copper material may not be used for metal temperatures greater than 400°F (204°C).

(4) Pipe or components that may contain liquids must be protected by heating or other means from damage due to freezing.

(5) Pipe or components in which liquids may accumulate must have drains or drips.

(6) Pipe or components subject to clogging from solids or deposits must have suitable connections for cleaning.

(7) The arrangement of pipe, components, and supports must provide safety under anticipated operating stresses.

(8) Each joint between sections of pipe, and between pipe and valves or fittings, must be made in a manner suitable for the anticipated pressure and temperature condition. Slip type expansion joints may not be used. Expansion must be allowed for by providing flexibility within the system itself.

(9) Each control line must be protected from anticipated causes of damage and must be designed and installed to prevent damage to any one control line from making both the regulator and the over-pressure protective device inoperative.

.SO DOC 16B-255.221

NYCRR

255.221 Scope.

(a) Sections 255.225 through 255.245 of this Part prescribe minimum requirements for welding steel materials in pipelines.

(b) These sections do not apply to welding that occurs during the manufacture of steel pipe or steel pipeline components.

.SO DOC 16B-255.225

NYCRR

255.225 Qualification of welding procedures.

(a) Welding must be performed by a qualified welder or welding operator in accordance with welding procedures qualified under section 5, section 12, Appendix A or Appendix B of API Standard 1104 (as described in section 10.3 of this Title), or section IX of the ASME Boiler and Pressure Vessel Code (ASME BPVC) (as described in section 10.3 of this Title) to produce welds meeting the requirements of this

subpart. The quality of the test welds used to qualify welding procedures shall be determined by destructive testing in accordance with the applicable welding standard(s).

The quality of the test welds used to qualify welding procedures shall be determined by destructive testing in accordance with the referenced welding standard(s).

(b) Each welding procedure must be recorded in detail, including the results of the qualifying tests. This record must be retained and followed whenever the procedure is used.

.SO DOC 16B-255.227

NYCRR

255.227 Qualification of welders.

(a) Except as provided in subdivision (b) of this section, each welder or welding operator must be qualified in accordance with section 6, section 12, Appendix A or Appendix B of API Standard 1104 (as described in section 10.3 of this Title), or section IX of the ASME Boiler and Pressure Vessel Code (ASME BPVC)(as described in section 10.3 of this Title). However, a welder or welding operator qualified under an earlier edition than listed in section 10.3 of this Title may weld but may not requalify under that earlier edition.

(b) A welder may qualify to perform welding on pipe to be operated at a pressure of less than 125 PSIG (862 kPa) by performing an acceptable test weld, for the welding process to be used, under the test set forth in section I of Appendix 14-F of this Title. Each welder who is to make a welded service line connection to a main must first perform an acceptable test weld under section II of Appendix 14-F of this Title as a requirement of the qualifying test.

.SO DOC 16B-255.229

NYCRR

255.229 Limitations on welders.

(a) No welder or welding operator whose qualification is based on nondestructive testing may weld compressor station pipe and components.

(b) No welder or welding operator may weld with a particular welding process unless, within the preceding 6 calendar months, he has engaged in welding with that process.

(c) A welder qualified under subdivision 255.227(a) of this Part:

(1) may not weld on pipe to be operated at a pressure of 125 psig or more unless within the preceding six calendar months the welder has had one weld tested and found acceptable under section 6, 9, 12 or Appendix A of API Std 1104 (as described in section 10.3 of this Title).

Alternatively, welders or welding operators may maintain an ongoing qualification status by performing welds tested and found acceptable under the above acceptance criteria at least twice each calendar year,

but a intervals not exceeding 7 1/2 months. A welder or welding operator qualified under an earlier edition of a standard listed in section 10.3 of this Title may weld, but may not requalify under that earlier edition; and

(2) may not weld on pipe to be operated at a pressure less than 125 psig unless the welder or welding operator is tested in accordance with paragraph (c)(1) of this section or re-qualifies under paragraph (d)(1) or (d)(2) of this section.

(d) A welder qualified under subdivision 255.227(b) of this Part may not weld unless:

(1) within the preceding 15 calendar months, the welder has requalified, except that the welder or welding operator must requalify at least once each calendar year; or

(2) within the preceding 7 1/2 calendar months, but at least twice each calendar year, the welder or welding operator has had:

(i) a production weld cut out, tested and found acceptable in accordance with the qualifying test; or

(ii) a production weld tested and found acceptable under section 6 of API Standard 1104 (as described in section 10.3 of this Title); or

(iii) for welders who work only on service lines two inches (51 millimeters) or smaller in diameter, two sample welds tested and found acceptable in accordance with the test in section III of Appendix 14-F to this Title.

(e) Welder requalification tests shall be required if there is good cause to question a welder's ability.

.SO DOC 16B-255.230

NYCRR

255.230 Quality assurance program. (a) Each operator shall conduct an unannounced spot check of each welder's field welds at least once each calendar year to assess the quality of welding. Such spot checks shall include destructive or nondestructive tests of a field weld. Should an unannounced spot check of a welder identify unacceptable welds, a follow-up unannounced spot check shall be conducted within three months or as soon as possible thereafter.

(b) A field weld chosen during the unannounced spotcheck may be used to maintain the welder's qualification if tested and found acceptable under section 3 or 6 of API Standard 1104 (as described in section 10.3 of this Title) for welders qualified under section 255.227(a) of this Part.

(c) In the case of welders qualified under section 255.227(b) of this Part, the spot check must follow the test procedures set forth in Appendix 14-F of this Title.

(d) This unannounced test may be used to satisfy the requirement to have a weld tested during the six months preceding welding as required in section 255.229(c) or (d) (2) of this Part.

.SO DOC 16B-255.231

NYCRR

255.231 Protection from weather. The welding operation must be protected from weather conditions that would impair the quality of the completed weld.

.SO DOC 16B-255.233

NYCRR

255.233 Miter joints. (a) A miter joint on steel pipe to be operated at a pressure that produces a hoop stress of 30 percent or more of SMYS may not deflect the pipe more than three degrees.

(b) A miter joint on steel pipe to be operated at a pressure that produces a hoop stress of less than 30 percent, but more than 10 percent, of SMYS may not deflect the pipe more than 12 1/2 degrees and must be a distance equal to one pipe diameter or more away from any other miter joint, as measured from the crotch of each joint.

(c) A miter joint on steel pipe to be operated at a pressure that produces a hoop stress of 10 percent or less of SMYS may not deflect the pipe more than 90 degrees.

.SO DOC 16B-255.235

NYCRR

255.235 Preparation for welding. (a) Before beginning any welding, the welding surfaces must be clean and free of any material that may be detrimental to the weld, and the pipe or component must be aligned to provide the most favorable condition for depositing the root bead. This alignment must be preserved while the root bead is being deposited.

(b) See Appendix 14-J of this Title for acceptable preparation for butt welding pipe of unequal thicknesses.

.SO DOC 16B-255.241

NYCRR

255.241 Inspection and test of welds.

(a) Visual inspection of welding must be conducted by an individual qualified by appropriate training and experience to ensure that the welding is performed in accordance with the welding procedure and the weld is acceptable under subdivision (c) of this section.

(b) The butt welds on each pipeline with a nominal diameter greater than two inches (51 millimeters) to be operated at 125 PSIG (862 kPa) or more must be nondestructively tested in accordance with section 255.243 of this Part.

(c) The acceptability of a weld that is nondestructively tested or visually inspected is determined according to the standards in section 9 or Appendix A of API Standard 1104 (as described in section 10.3 of this Title). However, if a girth weld is unacceptable under those standards

for a reason other than a crack, and if the Appendix A to API Std 1104 applies to the weld, the acceptability of that weld may be further determined under that Appendix.

.SO DOC 16B-255.243

NYCRR

255.243 Nondestructive testing-pipeline to operate at 125 PSIG (862 kPa) or more.

(a) Nondestructive testing of welds must be performed by any process, other than trepanning, that will clearly indicate defects that may affect the integrity of the weld.

(b) Nondestructive testing of welds must be performed in accordance with written procedures and by persons who have been trained and qualified in the established procedures and with the equipment employed in testing.

(c) Procedures must be established for the proper interpretation of each nondestructive test of a weld to ensure the acceptability of the weld under section 255.241(c) of this Part.

(d) The following percentages of each day's field butt welds, selected at random by the operator, must be nondestructively tested over their entire circumference:

- (1) in Class 1 locations, at least 10 percent;
- (2) in Class 2 locations, at least 15 percent;
- (3) in Class 3 and Class 4 locations, 100 percent;
- (4) in Class 1 or 2 locations at crossings of major or navigable rivers, at crossings of major roads, and within railroad or public highway rights-of-way, including tunnels, bridges, and overhead road crossings, 100 percent; and
- (5) at pipeline tie-ins, including tie-ins of replacement sections, 100 percent.

(e) Except for a welder or welding operator whose work is isolated from the principal welding activity, a sample of each welder's work for each day must be nondestructively tested.

(f) Each operator must retain, for the life of the pipeline, a record showing by milepost, engineering station, or by geographic feature, the number of girth welds made, the number nondestructively tested, the number rejected, and the disposition of the rejects.

.SO DOC 16B-255.244

NYCRR

255.244 Welding inspector.

(a) No person may carry out the inspection of joints in welded pipelines required by sections 255.241 and 255.243 of this Part unless that person has been qualified by appropriate training or experience in evaluating the acceptability of welded joints per the requirements of

section 6, Standards of Acceptability, of API Standard 1104 (as described in section 10.3 of this Title).

(b) Each gas corporation shall establish, and keep on file for inspection, the methods it uses to verify the qualifications of each technician responsible for the interpretation of each nondestructive test of a weld.

(c) When inspecting pipelines to be operated at 125 PSIG (862 kPa) or more, a welder may not inspect his own welds for the purpose of determining the acceptability of the welds as required by section 255.241 of this Part.

.SO DOC 16B-255.245

NYCRR

255.245 Repair or removal of defects.

(a) Each weld that is unacceptable under section 255.241 (c) must be removed or repaired. A weld must be removed if it has a crack that:

(1) is more than eight percent of the weld length or two inches (51 millimeters) in length whichever is less; or

(2) penetrates either the root or second bead.

(b) Each weld that is repaired must have the defect removed down to sound metal and the segment to be repaired must be preheated if conditions exist which would adversely affect the quality of the weld repair. After repair, the segment of the weld that was repaired must be inspected to ensure its acceptability. Repairs on pipelines to operate at 125 PSIG (862 kPa) or more must be nondestructively inspected and meet the standards in section 6 of API Standard 1104 (as described in section 10.3 of this Title).

(c) If the repair is not acceptable, the weld must be removed.

.SO DOC 16B-255.271

NYCRR

255.271 Scope.

(a) Sections 255.273 through 255.287 of this Part prescribe minimum requirements for joining materials in pipelines, other than by welding.

(b) These sections do not apply to joining during the manufacture of pipe or pipeline components.

.SO DOC 16B-255.273

NYCRR

255.273 General.

(a) The pipeline must be designed and installed so that each joint will sustain the longitudinal pullout or thrust forces caused by contraction or expansion of the piping or by anticipated external or internal loading.

(b) Each joint must be made in accordance with written procedures that have been proved by test or experience to produce strong gas-tight joints.

(c) Each joint must be inspected to ensure compliance with this Part.
.SO DOC 16B-255.279 NYCRR

255.279 Copper pipe. (a) Copper pipe may not be butt welded or threaded, except that copper pipe used for joining screw fittings or valves may be threaded if the wall thickness is equivalent to the comparable size of standard wall pipe.

(b) The filler material used for brazing shall be a copper-phosphorous or silver base alloy.

.SO DOC 16B-255.281 NYCRR

255.281 Plastic pipe. (a) A plastic pipe joint that is joined by solvent cement, adhesive or heat fusion may not be disturbed until it has properly set.

(b) Plastic pipe may not be joined by a threaded joint or miter joint.

(c) The quality of the joints shall be checked visually. If there is any reason to believe the joint is defective, it shall be removed and replaced.

(d) Each solvent cement joint on plastic pipe must comply with the following criteria:

(1) The mating surfaces of the joint must be clean, dry, and free of material which might be detrimental to the joint.

(2) The solvent cement must conform to ASTM Specification D2513 (as described in section 10.3 of this Title).

(3) The safety requirements of Appendix A of ASTM Specification D2513 (as described in section 10.3 of this Title) must be met.

(4) The joint may not be heated to accelerate the setting of the cement.

(e) Each heat-fusion joint on plastic pipe must comply with the following criteria:

(1) A butt heat-fusion joint must be joined by a device that holds the heater element square to the ends of the piping, compresses the heated ends together, and holds the piping in proper alignment while the plastic hardens.

(2) A socket heat-fusion joint must be joined by a device that heats the mating surfaces of the joint uniformly and simultaneously to essentially the same temperature.

(3) An electrofusion joint must be joined utilizing the equipment and techniques of the fittings manufacturer or equipment and techniques shown, by testing joints to the requirements of section 255.283(a) (1) (iii) of this Part, to be at least equivalent to those of the fitting manufacturer.

(4) Heat may not be applied with a torch or other open flame.

(f) Each adhesive joint on plastic pipe must comply with the following criteria:

(1) The adhesive must conform to ASTM Specification D2517 (as described in section 10.3 of this Title).

(2) The materials and adhesive must be compatible with each other.

(g) Each compression type mechanical joint on plastic pipe must comply with the following criteria:

(1) The gasket material in the coupling must be compatible with the plastic.

(2) A rigid internal tubular stiffener, other than a split tubular stiffener, must be used in conjunction with the coupling.

.SO DOC 16B-255.283

NYCRR

255.283 Plastic pipe: qualifying joining procedures.

(a) Heat fusion, solvent cement, and adhesive joints. Before any written procedure established under section 255.273(b) of this Part is used for making plastic pipe joints by a heat fusion, solvent cement, or adhesive method, the procedure must be qualified by subjecting specimen joints, made according to the procedure, to the following tests:

(1) The burst test requirements of:

(i) in the case of thermoplastic pipe, paragraph 6.6 (Sustained Pressure Test) or paragraph 6.7 (Minimum Hydrostatic Burst Pressure) of ASTM D2513-99 for plastic materials other than polyethylene or ASTM D2513-09a for polyethylene plastic materials (as described in section 10.3 of this Title); or

(ii) in the case of thermosetting plastic pipe, paragraph 8.5 (Minimum Hydrostatic Burst Pressure) or paragraph 8.9 (Sustained Static Pressure Test) of ASTM Specification D2517 (as described in section 10.3 of this Title).

(iii) in the case of electrofusion fittings for polyethylene (PE) pipe and tubing, paragraph 9.1 (Minimum Hydraulic Burst Pressure Test), paragraph 9.2 (Sustained Pressure Test), paragraph 9.3 (Tensile Strength Test), or paragraph 9.4 (Joint Integrity Tests) of ASTM F1055 (as described in section 10.3 of this Title).

(2) For procedures intended for lateral pipe connections, subject a specimen joint made by pipe sections joined at right angles according to the procedure to a force on the lateral pipe until failure occurs in the specimen. If failure initiates outside the joint area, the procedure qualifies for use.

(3) For procedures intended for nonlateral pipe connections, follow the tensile test requirements of ASTM Specification D638 (as described in section 10.3 of this Title), except that the test may be conducted at

ambient temperature and humidity. If the specimen elongates no less than 25 percent or failure initiates outside the joint area, the procedure qualifies for use.

(b) Before any written procedure established under section 255.273(b) of this Part is used for making mechanical plastic pipe joints that are designed to withstand tensile forces, the procedure must be qualified by subjecting five specimen joints made according to the procedure to the following tensile test criteria:

(1) Use an apparatus for the test as specified in ASTM Specification D638 (as described in section 10.3 of this Title) (except for conditioning).

(2) The specimen must be of such length that the distance between the grips of the apparatus and the end of the stiffener does not affect the joint strength.

(3) The speed of testing is 0.20 inches (5.1 millimeters) per minute, plus or minus 25 percent.

(4) Pipe specimens less than four inches (102 millimeters) in diameter are qualified if the pipe yields to an elongation of no less than 25 percent or failure initiates outside the joint area.

(5) Pipe specimens four inches (102 millimeters) and larger in diameter shall be pulled until the pipe is subjected to a tensile stress equal to or greater than the maximum thermal stress that would be produced by a temperature change of 100 μ F (38 μ C) or until the pipe is pulled from the fitting. If the pipe pulls from the fitting, the lowest value of the five test results or the manufacturer's rating, whichever is lower, must be used in the design calculations for stress.

(6) Each specimen that fails at the grips must be retested using new pipe.

(7) Results obtained pertain only to the specific outside diameter, and material of the pipe tested, except that testing of a heavier wall pipe may be used to qualify pipe of the same material but with a lesser wall thickness.

(c) A copy of each written procedure being used for joining plastic pipe must be available to the persons making and inspecting joints.

(d) Pipe or fittings manufactured before July 1, 1980, may be used in accordance with procedures that the manufacturer certifies will produce a joint as strong as the pipe.

.SO DOC 16B-255.285

NYCRR

255.285 Plastic pipe: qualifying persons to make joints.

(a) No person may make a plastic pipe joint unless that person has been qualified under the applicable joining procedure by:

(1) appropriate training or experience in the use of the procedure;
and

(2) making a specimen joint from pipe sections joined according to the procedure that passes the inspection and test set forth in subdivisions (b) and (c) of this section.

(b) The specimen joint must be visually examined during and after assembly or joining and found to have the same appearance as a joint or photographs of a joint that is acceptable under the procedure.

(c) Additionally, in the case of a heat fusion, solvent cement, or adhesive joint, the joint must be:

(1) tested under any one of the test methods listed under section 255.283(a) of this Part applicable to the type of joint and material being tested; or

(2) examined by ultrasonic inspection and found not to contain flaws that would cause failure; or

(3) cut into at least three longitudinal straps, each of which is visually examined and found not to contain voids or discontinuities on the cut surfaces of the joint area and deformed by bending, torque, or impact, and if failure occurs, it must not initiate in the joint area.

(d) A person must be requalified under an applicable procedure once each calendar year at intervals not exceeding 15 months, or after any production joint is found unacceptable by testing under section 255.507 or 255.511 of this Part, by inspection by other than the joiner, or a combination of both.

(e) Each operator shall establish a method to determine that each person making joints in plastic pipelines is qualified in accordance with this section.

.SO DOC 16B-255.287

NYCRR

255.287 Plastic pipe: inspection of joints. No person may carry out the inspection of joints in plastic pipes required by sections 255.273 (c) and 255.285 (b) of this Part unless that person has been qualified by appropriate training or experience in evaluating the acceptability of plastic pipe joints made under the applicable joining procedure.

.SO DOC 16B-255.301

NYCRR

255.301 Scope.

Sections 255.302 through 255.327 of this Part prescribe minimum requirements for constructing transmission lines and mains.

.SO DOC 16B-255.302

NYCRR

255.302 Notification requirements.

(a) At least 30 days prior to the start of construction or reconstruction of any transmission line or main designed to operate at

125 PSIG (862 kPa) or more, each operator shall file a letter of intent and a report of specifications identical with Form A of Appendix 7-D of this Title. The letter of intent need not include said specifications where the length of the line is less than the following:

Class location	Length
Class 1	1,000 feet (304.8 meters)
Class 2	500 feet (152.4 meters)
Class 3	250 feet (76.2 meters)
Class 4	100 feet (30.5 meters)

(b) Before any pipeline designed to operate at 125 PSIG (862 kPa) or more is placed in operation, a report shall be filed certifying the maximum allowable operating pressure to which the line is intended to be subjected and also certifying that the line has been constructed and tested in accordance with the requirements of the rules herein prescribed.

.SO DOC 16B-255.303 NYCRR

255.303 Compliance with construction standards.

All construction work performed on piping systems in accordance with the requirements of this Part shall be done under construction standards which shall be readily available for inspection by the Department. The construction standards shall cover all phases of the work and shall be in sufficient detail to cover the requirements of this Part.

.SO DOC 16B-255.305 NYCRR

255.305 Inspection: general. (a) Each transmission line and main must be inspected during construction to ensure that it is constructed in accordance with this Part.

(b) Inspections shall be made at sufficiently frequent intervals to assure the required quality of workmanship.

(c) Inspectors shall be qualified by either experience or training and shall have the authority to order the repair or removal and replacement of any component that fails to meet the standards of this Part.

(d) The operator shall maintain a current list of designated inspectors.

.SO DOC 16B-255.307 NYCRR

255.307 Inspection of materials. Each length of pipe and each other component must be visually inspected at the site of installation to ensure that it has not sustained any visually determinable damage that could impair its serviceability. These inspections must be made:

(a) prior to the coating operation for field coated pipe; and

(b) as the pipe is lowered into the ditch.

.SO DOC 16B-255.309 NYCRR

255.309 Repair of steel pipe.

(a) Each imperfection or damage that impairs the serviceability of the length of steel pipe must be repaired or removed.

(b) If a repair is made by grinding, the remaining wall thickness must at least be equal to either:

(1) the minimum thickness required by the tolerances in the specification to which the pipe was manufactured; or

(2) the nominal wall thickness required for the design pressure of the pipeline.

(c) Each of the following dents must be removed from steel pipe to be operated at a pressure of 125 PSIG (862 kPa) or more, unless the dent is repaired by a method that reliable engineering tests and analyses show can permanently restore the serviceability of the pipe:

(1) a dent that contains a stress concentrator such as a scratch, gouge, groove or arc burn;

(2) a dent that affects a longitudinal weld or a circumferential weld;

(3) a dent that has a depth of more than one-quarter inch (6.4 millimeters) in pipe 12 3/4 inches (324 millimeters) or less in outer diameter; or

(4) a dent that has a depth of more than two percent of the nominal pipe diameter in pipe over 12 3/4 inches (324 millimeters) in outer diameter.

(d) For the purpose of this section, a dent is a depression that produces a gross disturbance in the curvature of the pipe wall without reducing the pipewall thickness. The depth of a dent is measured as the gap between the lowest point of the dent and a prolongation of the original contour of the pipe.

(e) Each arc burn on steel pipe to be operated at a pressure of 125 PSIG (862 kPa) or more must be repaired or removed.

(f) Complete removal of the metallurgical notch created by an arc burn can be determined by grinding away the visible evidence of the arc burn and then swabbing the ground area with a 20 percent solution of ammonium persulfate. A blackened spot is evidence of a metallurgical notch and indicates that additional grinding is necessary.

(g) A gouge, groove, arc burn or dent may not be repaired by insert patching or by pounding out.

(h) Each gouge, groove, arc burn or dent that is removed from a length of pipe must be removed by cutting out the damaged portion as a cylinder.

(i) Notches or laminations on pipe ends shall not be repaired on pipe to be operated at a pressure of 125 PSIG (862 kPa) or more. The damaged

portion shall be removed as a cylinder and the pipe end rebeveled.

.SO DOC 16B-255.311 NYCRR

255.311 Repair of plastic pipe. Each imperfection or damage that would impair the serviceability of plastic pipe must be repaired or removed.

.SO DOC 16B-255.313 NYCRR

255.313 Bends and elbows.

(a) Each field bend in steel pipe must comply with the following criteria:

(1) A bend must not impair the serviceability of the pipe.

(2) Each bend must have a smooth contour and be free from buckling, cracks, or any other mechanical damage.

(b) On pipe containing a longitudinal weld, the longitudinal weld must be as near as practicable to the neutral axis of the bend unless:

(1) the bend is made with an internal bending mandrel; or

(2) the pipe is 12 inches (305 millimeters) or less in outside diameter or has a diameter to wall thickness ratio less than 70.

(c) Each circumferential weld of steel pipe which is located where the stress during bending causes a permanent deformation in the pipe must be nondestructively tested after the bending process.

(d) Wrought-steel welding elbows and transverse segments of these elbows may not be used for changes in direction on steel pipe that is two inches (51 millimeters) or more in diameter unless the arc length, as measured along the crotch, is at least one inch (125 millimeters).

.SO DOC 16B-255.315 NYCRR

255.315 Wrinkle bends in steel pipe.

A wrinkle bend may not be made on steel pipe to be operated at a pressure of 125 PSIG (862 kPa) or more.

.SO DOC 16B-255.317 NYCRR

255.317 Protection from hazards. (a) When pipelines must be installed where they will be subjected to natural hazards, such as washouts, floods, unstable soil, landslides, or other conditions which may cause serious movement of, or abnormal loads, on the pipeline, reasonable precaution shall be taken to protect the pipeline, such as increasing the wall thickness, constructing revetments, preventing erosion, installing anchors, etc.

(b) Where pipelines cross areas which are normally underwater or subject to flooding (i.e., lakes, bays, swamps), sufficient weight or anchorage shall be applied to the line to prevent flotation.

(c) Because submarine river crossings may be subject to washouts due to the natural hazards of stream bed changes, high water velocities, deepening of the channel, or changing of the channel location in the

stream bed, design attention shall be given to protect the pipeline at such crossings. The crossing shall be located in stable bank and bed locations. The depth of the line, location of the bends in the banks, wall thickness of the pipe, weighting of the line shall be selected based on the characteristics of the river.

(d) Where pipelines are exposed, such as at spans, trestles, and bridge crossings, the pipelines and mains shall be reasonably protected by distance or barricades from accidental damage by vehicular traffic or other causes.

.SO DOC 16B-255.319

NYCRR

255.319 Installation of pipe in a ditch. (a) When installed in a ditch, each transmission line and main must be installed so that the pipe fits the ditch so as to minimize stresses and protect the pipe coating from damage.

(b) When a ditch for a transmission line or main is backfilled, it must be backfilled in a manner that:

- (1) provides firm support under the pipe; and
- (2) prevents damage to the pipe coating from equipment or from the backfill material.

.SO DOC 16B-255.321

NYCRR

255.321 Installation of plastic pipe.

(a) Plastic pipe must be installed below ground level unless otherwise permitted by subdivisions (1) and (m) of this section.

(b) Plastic pipe that is installed in a vault or any other below grade enclosure must be completely encased in gas-tight metal pipe and fittings that are adequately protected from corrosion.

(c) Plastic pipe must be installed so as to minimize shear or tensile stresses.

(d) Thermoplastic pipe that is not encased must have a minimum wall thickness of 0.090 inch (2.29 millimeters), except that pipe with an outside diameter of 0.875 inch (22.3 millimeters) or less may have a minimum wall thickness of 0.062 inch (1.58 millimeters).

(e) Plastic pipe that is not encased must have an electrically conductive wire or other approved means of locating the pipe. Tracer wire may not be wrapped around the pipe and contact with the pipe must be minimized but is not prohibited. Tracer wire or other metallic elements installed for pipe locating purposes must be resistant to corrosion damage, either by use of coated copper wire or by other means.

(f) Plastic pipe that is being encased must be inserted into the casing pipe in a manner that will protect the plastic. The leading end of the plastic must be closed before insertion. The casing must be

prepared to the extent necessary to remove sharp edges, projections, or abrasive material which could damage the plastic.

(g) Care shall be exercised to avoid rough handling of plastic pipe and tubing. It shall not be pushed or pulled over sharp projections, dropped or have other objects dropped upon it.

(h) Caution shall be taken to prevent kinking or buckling, and any kinks or buckles which occur shall be removed by cutting out as a cylinder.

(i) Squeeze-offs of plastic may be made to control flows in accordance with manufacturer's recommendations and a proven procedure without replacement of the pipe section. However, each squeeze-off must be adequately marked on the pipe to preclude further squeeze-off at that location.

(j) The piping shall be installed with sufficient slack to provide for possible contraction. Cooling may be necessary before the last connection is made under extremely high temperature conditions.

(k) That portion of the plastic piping exposed due to the removal of a section of the casing or which spans disturbed earth shall be of sufficient strength to withstand the external loading and shearing forces or it shall be protected with a suitable bridging piece.

(1) Uncased plastic pipe may be temporarily installed above ground level under the following conditions:

(1) The operator must be able to demonstrate that the cumulative above ground exposure of the pipe does not exceed the manufacturer's recommended maximum period of exposure or 2 years, whichever is less.

(2) The pipe is located where damage by external forces is unlikely or is otherwise protected against such damage.

(3) The pipe adequately resists exposure to ultraviolet light and high and low temperatures.

(m) Plastic pipe may be installed on bridges provided that it is:

(1) installed with protection from mechanical damage, such as installation in a metallic casing;

(2) protected from ultraviolet radiation; and

(3) not allowed to exceed the pipe temperature limits specified in section 123 of this Part.

.SO DOC 16B-255.323

NYCRR

255.323 Casing. (a) The casing must be designed to withstand the superimposed loads.

(b) If there is a possibility of water entering the casing, the ends must be sealed.

(c) If the ends of an unvented casing are sealed and the sealing is

strong enough to retain the maximum allowable operating pressure of the pipe, the casing must be designed to hold this pressure at a stress level of not more than 72 percent of SMYS.

(d) If vents are installed on a casing, the vents must be protected from the weather to prevent water from entering the casing.

.SO DOC 16B-255.325

NYCRR

255.325 Underground clearance.

(a) Each transmission line shall be installed with at least 12 inches (305 millimeters) of clearance from any other underground structure not associated with the transmission line. If this clearance cannot be attained, a minimum clearance of two inches (51 millimeters) must be attained provided the transmission line is protected from damage that might result from the proximity of the other structure.

(b) Each distribution main shall be installed with at least six inches (152 millimeters) of clearance from any other underground structure to allow proper maintenance and to protect against damage that might result from proximity to other structures. If this clearance cannot be attained, the main may be installed with a minimum clearance of two inches (51 millimeters), provided the main is suitably protected from damage that might result from the proximity of the other structure.

(c) In addition to meeting the requirements of subdivisions (a) and (b) of this section, each plastic pipeline must be installed with sufficient clearance, or must be insulated, from any source of heat so as to prevent the heat from impairing the serviceability of the pipe.

.SO DOC 16B-255.327

NYCRR

255.327 Cover.

(a) Except as provided in subdivisions (d), (e) and (f) of this section, each buried transmission line, or distribution main operating at 125 psig (862 kPa) or more in a Class 3 or 4 location, must be installed with a minimum cover as follows:

	Normal Soil	Consolidated Rock
Location	Inches (Millimeters)	
Class 1 locations	30 (762)	18 (457)
Class 2, 3, and 4 locations	36 (914)	24 (610)
Drainage ditches of public roads and railroad crossings	36 (914)	24 (610)

(b) Except as provided in subdivisions (c), (d), (e) and (f) of this section, each buried distribution main, other than those specified in subdivision (a) of this section, must be installed with at least 24 inches (610 millimeters) of cover.

(c) Where a new distribution main is being inserted into an existing pipeline, the minimum depth of cover may be 18 inches (457 millimeters) provided openings are properly bridged to provide protection from shearing action and external damage.

(d) Where an underground structure prevents the installation of a transmission line or main with the minimum cover, the transmission line or main may be installed with less cover if it is provided with additional protection to withstand anticipated external loads.

(e) All pipe which is installed in areas actively cultivated for commercial farm purposes in at least two out of the last five years, as identified by the farmland operator, shall be installed with a minimum cover of 40 inches (1,016 millimeters) unless the farmland operator agrees to or requires a different depth.

(f) All pipe which is installed in a navigable river, stream, or harbor must have a minimum cover of 48 inches (1,219 millimeters) in soil or 24 inches (610 millimeters) in consolidated rock between the top of the pipe and the underwater natural bottom (as determined by recognized and generally accepted practices). However, less than the minimum cover is permitted in accordance with subdivision (d) of this section.

.SO DOC 16B-255.351

NYCRR

255.351 Scope.

Sections 255.353 through 255.379 of this Part prescribe minimum requirements for installing customer meters, service regulators, service lines, service line valves, and service line connections to mains.

.SO DOC 16B-255.353

NYCRR

255.353 Customer meters and regulators: location.

(a) Each meter and service regulator must be installed in a readily accessible location and be protected from corrosion and other damage, including any vehicular damage that may be anticipated.

(b) Each service regulator on new and replacement service lines, except for replacements by insertion, must be installed outside of the building, unless it is impractical or unsafe. Where the service regulator must be installed within the building, it is to be located as near as practical to the point of service line entrance. For service line replacements where the service regulator must remain inside, the regulator shall be tested and inspected in accordance with section 255.744(d) and (e) of this Part.

(c) The upstream regulator in a series must be located outside the building, unless it is located in a separate metering or regulating building.

(d) Each meter installed within a building must be located in a ventilated place and not less than three feet (914 millimeters) from any source of ignition or any source of heat which might damage the meter.

(e) When installing a new gas service for which gas pressure regulating and associated gas cleaning equipment and appurtenances is required for a building of public assembly, or apartment building, or building within an apartment, industrial or commercial complex, each with a capacity for normal occupancy of 75 or more persons, the following requirements shall be met:

(1) When outside installation is impracticable, regulations applicable to indoor installations with high pressure services shall pertain.

(2) The associated gas cleaning equipment and appurtenances may be located in the same area as the metering and/or pressure regulation equipment.

(3) Where practicable, the regulating and gas cleaning equipment shall be installed within a separate room that is designed for two-hour fire resistance, and is effectively sealed off from the remaining space in the building.

(4) In the case of indoor installations, special effort shall be made to prevent and indicate tampering by unauthorized persons.

(5) In all the above installations and on doors or accesses leading to all the above installations, a conspicuous notice shall be posted indicating the instructions for actions to be taken and the telephone number of the proper person to be called in the event a gas odor is detected.

.SO DOC 16B-255.355

NYCRR

255.355 Customer meters and regulators: protection from damage.

(a) If the customer's equipment or supplemental gas supply might create either a vacuum or a back pressure, a device must be installed to protect the distribution system. Commingling of a customer's supplemental gas supply with utility supplied gas is permissible provided the customer verifies that the supplemental gas is interchangeable with the gas supplied by the utility.

(b) The outside terminal of each service regulator vent and relief vent must:

(1) be rain and insect resistant;

(2) be located at a place where gas from the vent can escape freely into the atmosphere and away from any opening into the building (a minimum of 18 inches (457 millimeters), where practical); and

(3) be protected from damage caused by submergence in areas where flooding or ice accumulation may occur.

(c) Each pit or vault that houses a customer meter or regulator at a place where vehicular traffic is anticipated, must be able to support that traffic.

.SO DOC 16B-255.357

NYCRR

255.357 Customer meters and service regulators: installation.

(a) Each meter and each regulator must be installed so as to minimize anticipated stresses upon the connecting piping and the meter.

(b) When close all-thread nipples are used, the wall thickness remaining after the threads are cut must meet the minimum wall thickness requirements of this Part.

(c) Connections made of lead or other easily damaged material may not be used in the installation of meters or regulators.

(d) Each regulator that might release gas in its operation must be vented to the outside atmosphere.

.SO DOC 16B-255.359

NYCRR

255.359 Customer meter installations: operating pressure.

(a) A meter may not be used at a pressure that is more than 67 percent of the manufacturer's shell test pressure.

(b) Each newly installed meter manufactured after November 12, 1970, must have been tested to a minimum of 10 PSIG (69 kPa).

(c) A rebuilt or repaired tinned steel case meter may not be used at a pressure that is more than 50 percent of the pressure used to test the meter after rebuilding or repairing.

.SO DOC 16B-255.361

NYCRR

255.361 Service lines: installation.

(a) Each buried service line shall be installed with at least 18 inches (457 millimeters) of cover. However, where an underground structure prevents installation at those depths, the service line must be able to withstand any anticipated external load and suitable protection must be provided. Also, if service inserts of existing service lines are installed this requirement is not applicable.

(b) Each service line must be properly supported on undisturbed or well-compacted soil, and material used for backfill must be free of materials that could damage the pipe or its coating.

(c) Where condensate in the gas might cause interruption in the gas supply to the customer, the service line must be graded so as to drain into the main or into drips at the low points in the service line.

(d) Each service line must be installed so as to minimize anticipated piping strain and external loading.

(e) Each underground service line installed below grade through the outer foundation wall of a building must:

(1) be encased in a rigid sleeve with suitable protection from shearing action or backfill settlement;

(2) in the case of a metal service line, be protected against corrosion; and

(3) be sealed at the foundation wall to prevent leakage into the building.

(f) When an underground service line is installed under a building, the following requirements apply:

(1) It must be encased in a gas-tight conduit.

(2) The conduit and the service line must, if the service line supplies the building it underlies, extend into a normally usable and accessible part of the building.

(3) The space between the conduit and the service line must be sealed to prevent gas leakage into the building and, if the conduit is sealed at both ends, a vent line from the annular space must extend to a point where gas would not be a hazard, and extend above grade, terminating in a rain and insect resistant fitting.

(g) All service lines shall be constructed with a clearance of not less than four inches (102 millimeters), whenever practical, from any subsurface structures not directly associated with the pipeline. If it is not practicable to achieve this clearance, a minimum clearance of two inches (51 millimeters) shall be maintained and the pipeline shall be protected from damage that might result from the proximity of the other structure.

(h) When steel or plastic pipe is to be installed as a service line in a bore, care shall be exercised to prevent damage to the coating or pipe during installation.

(i) Locating underground service lines. Each underground nonmetallic service line that is not encased must have a means of locating the pipe that complies with subdivision (e) of section 321 of this Part.

.SO DOC 16B-255.363

NYCRR

255.363 Service lines: valve requirements.

(a) Each service line must have a service line valve that meets the applicable requirements of this Part. A valve incorporated in a meter bar that allows the meter to be bypassed may not be used as a service line valve. All such exposed valves must be of tamper proof construction.

(b) A soft seat service line valve may not be used if its ability to control the flow of gas could be adversely affected by exposure to anticipated heat.

(c) Each service line valve on a high pressure service line, installed

aboveground or in an area where the blowing of gas would be hazardous, must be designed and constructed to minimize the possibility of the removal of the core of the valve with other than specialized tools.

(d) On service lines designed to operate at pressures in excess of 60 PSIG, (414 kPa), the service line valve shall be the equivalent of a pressure lubricated valve or a needle type valve. Other types of valves may be used where tests by the manufacturer or by the user indicate that they are suitable for this kind of service.

.SO DOC 16B-255.365 NYCRR

255.365 Service lines: location of valves.

(a) Each service line valve must be installed upstream of the regulator or, if there is no regulator, upstream of the meter.

(b) Each service line must have a shut-off valve in a readily accessible location that, if feasible, is outside of the building. The valve must be located outside the building:

- (1) where the regulator is located within the customer's building;
- (2) on service lines to buildings of public assembly; or
- (3) on service lines two inches (51 millimeters) or greater in diameter.

(c) Each underground service line valve must be located in a covered durable curb box or standpipe that allows ready operation of the valve and is supported independently of the service line.

.SO DOC 16B-255.367 NYCRR

255.367 Service lines: general requirements for connections to main piping. (a) Each service line connection to a main should be located at the top of the main or, if that is not practical, at the side of the main, unless a suitable protective device is installed to minimize the possibility of dust and moisture being carried from the main into the service line.

(b) Each compression-type service line to main connection must:

- (1) be designed and installed to effectively sustain the longitudinal pullout or thrust forces caused by contraction or expansion of the piping, or by anticipated external or internal loading; and
- (2) if gaskets are used in connecting the service line to the main connection fitting, have gaskets that are compatible with the kind of gas in the system.

.SO DOC 16B-255.369 NYCRR

255.369 Service lines: connections to cast iron or ductile iron mains.

(a) Each service line connected to a cast iron or ductile iron main must be connected by a mechanical clamp, by drilling and tapping the main, or by another method meeting the requirements of section 255.273 of this

Part.

(b) If a threaded tap is being inserted, the requirements of section 255.151(b)-(c) of this Part must also be met.

(c) Service line connections shall not be brazed directly to cast iron or ductile iron mains.

(d) Service lines must meet the electrical isolation requirements of section 255.467(b) of this Part.

.SO DOC 16B-255.371 NYCRR

255.371 Service lines: steel. Each steel service line to be operated at less than 100 PSIG (689 kPa) must be constructed of pipe designed for a minimum of 100 PSIG (689 kPa).

.SO DOC 16B-255.373 NYCRR

255.373 Service lines: cast iron and ductile iron. Cast iron or ductile iron pipe shall not be used for new or replacement service lines.

.SO DOC 16B-255.375 NYCRR

255.375 Service lines: plastic. (a) Each plastic service line outside a building must be installed below ground level, except that:

(1) it may be installed in accordance with section 255.321(1) of this Part; and

(2) It may terminate above ground level and outside the building if:

(i) the aboveground part of the plastic service line is protected against deterioration and external damage.

(ii) the plastic service line is not used to support external loads.

(b) Each plastic service line inside a building must be protected against external damage and must not be exposed.

.SO DOC 16B-255.377 NYCRR

255.377 Service lines: copper. Each copper service line installed within a building must be protected against external damage.

.SO DOC 16B-255.379 NYCRR

255.379 New service lines not in use. Each service line that is not placed in service upon completion of installation must comply with one of the following until the customer is supplied with gas:

(a) The valve that is closed to prevent the flow of gas to the customer must be of tamper-proof construction and be provided with a locking device or other means designed to prevent the opening of the valve by persons other than those authorized by the operator.

(b) A mechanical device or fitting that will prevent the flow of gas must be installed in the service line or in the meter assembly. The mechanical device or fitting shall be of a type that cannot be removed except by properly authorized employees of the operator.

(c) The customer's piping must be physically disconnected from the gas supply and the open pipe ends sealed.

.SO DOC 16B-255.381

NYCRR

255.381 Service lines: excess flow valve performance standards.

(a) Excess flow valves (EFVs) to be used on service lines that operate continuously throughout the year at a pressure not less than 10 psig (69 kPa) must be manufactured and tested by the manufacturer according to an industry specification, or the manufacturer's written specification, to ensure that each valve will:

(1) function properly up to the maximum operating pressure at which the valve is rated;

(2) function properly at all temperatures reasonably expected in the operating environment of the service line;

(3) at 10 PSIG (69 Kpa) close at, or not more than 50 percent above, the rated closure flow rate specified by the manufacturer and upon closure, reduce the gas flow to the level indicated:

(i) for an excess flow valve designed to allow pressure to equalize across the valve, no more than 5 percent of the manufacturer's specified closure flow rate, up to a maximum of 20 cubic feet (0.566 cubic meters) per hour; or

(ii) for an excess flow valve designed to prevent equalization of pressure across the valve, no more than 0.4 cubic feet (0.011 cubic meters) per hour; and

(4) not close when the pressure is less than the manufacturer's minimum specified operating pressure and the flow rate is below the manufacturer's minimum specified closure flow rate.

(b) An excess flow valve must meet the applicable requirements of this Part regarding materials and design of pipeline components.

(c) An operator must mark or otherwise identify the presence of an excess flow valve in the service line.

(d) An operator shall locate an excess flow valve as near as practical to the fitting connecting the service line to its source of gas supply.

(e) An operator should not install an excess flow valve on a service line where the operator has prior experience with contaminants in the gas stream, where these contaminants could be expected to cause the excess flow valve to malfunction or where the excess flow valve would interfere with necessary operation and maintenance activities on the service, such as blowing liquids from the line.

.SO DOC 16B-255.383

NYCRR

255.383 Excess flow valve customer installation.

(a) Definitions. As used in this section:

(1) Branched service line means a gas service line that begins at the existing service line or is installed concurrently with the primary service line but serves a separate residence.

(2) Replaced service line means a gas service line where the fitting that connects the service line to the main is replaced or the piping connected to this fitting is replaced.

(3) Service line serving single-family residence means a gas service line that begins at the fitting that connects the service line to the main and serves only one single-family residence (SFR).

(b) Installation required. An excess flow valve (EFV) installation must comply with the performance standards in section 255.381 of this Part. After April 14, 2017, each operator must install an EFV on any new or replaced service line serving the following types of services before the line is activated:

(1) A single service line to one SFR;

(2) A branched service line to a SFR installed concurrently with the primary SFR service line (i.e., a single EFV may be installed to protect both service lines);

(3) A branched service line to a SFR installed off a previously installed SFR service line that does not contain an EFV;

(4) Multifamily residences with known customer loads not exceeding 1,000 SCFH per service, at time of service installation based on installed meter capacity, and

(5) A single, small commercial customer served by a single service line with a known customer load not exceeding 1,000 SCFH, at the time of meter installation, based on installed meter capacity.

(c) Exceptions to excess flow valve installation requirement. An operator need not install an excess flow valve if one or more of the following conditions is present:

(1) the service line does not operate at a pressure of 10 psig (69 kPa) or greater throughout the year;

(2) the operator has prior experience with contaminants in the gas stream that could interfere with the EFV operation or cause loss of service to a residence;

(3) an EFV could interfere with necessary operation or maintenance activities, such as blowing liquids from the line; or

(4) an EFV meeting performance standards in section 255.381 of this Part is not commercially available to the operator.

(d) Customer's right to request an EFV. Existing service line customers who desire an EFV on service lines not exceeding 1,000 SCFH and who do not qualify for one of the exceptions in subdivision (c) of

this section may request an EFV to be installed on their service lines. If an eligible service line customer requests an EFV installation, an operator must install the EFV at a mutually agreeable date.

(e) Operator notification of customers concerning EFV installation. Operators must notify customers of their right to request an EFV in the following manner:

(1) Except as specified in subdivision (c) and paragraph (e)(5) of this section, each operator must provide written or electronic notification to customers of their right to request the installation of an EFV. Electronic notification can include emails, Web site postings, and e-billing notices.

(2) The notification must include an explanation for the service line customer of the potential safety benefits that may be derived from installing an EFV. The explanation must include information that an EFV is designed to shut off the flow of natural gas automatically if the service line breaks.

(3) The notification must include a description of EFV installation and replacement costs. The notice must alert the customer that costs for maintaining and replacing an EFV may later be incurred, and what those costs will be to the extent known.

(4) The notification must indicate that if a service line customer requests installation of an EFV and the load does not exceed 1,000 SCFH and the conditions of subdivision (c) of this section are not present, the operator must install an EFV at a mutually agreeable date.

(5) Operators of master-meter systems and liquefied petroleum gas (LPG) operators with fewer than 100 customers may continuously post a general notification in a prominent location frequented by customers.

(f) Operator evidence of customer notification. An operator must make available to the Department a copy of the notice or notices currently in use.

(g) Reporting. Each operator must report the EFV measures detailed in the annual report required by 49 CFR 191.11.

.SO DOC 16B-255.385

NYCRR

255.385 Manual service line shut-off valve installation.

(a) Definitions. As used in this section, manual service line shut-off valve means a curb valve or other manually operated valve located near the service line that is safely accessible to operator personnel or other personnel authorized by the operator to manually shut off gas flow to the service line, if needed.

(b) Installation requirement. The operator must install either a manual service line shut-off valve or, if possible, based on sound

engineering analysis and availability, an EFV for any new or replaced service line with installed meter capacity exceeding 1,000 SCFH.

(c) Accessibility and maintenance. Manual service line shut-off valves for any new or replaced service line must be installed in such a way as to allow accessibility during emergencies. Manual service shut-off valves installed under this section are subject to regularly scheduled maintenance, as documented by the operator and consistent with the valve manufacturer's specification.

.SO DOC 16B-255.451 NYCRR

255.451 Scope.

Sections 255.452 through 255.491 of this Part prescribe minimum requirements for the protection of metallic pipelines from external, internal, and atmospheric corrosion.

.SO DOC 16B-255.452 NYCRR

255.452 Applicability to converted pipelines. Notwithstanding the date the pipeline was installed or any earlier deadlines for compliance, each pipeline, which qualifies for use under this Part in accordance with section 255.14 of this Part, must meet the corrosion control requirements specifically applicable to pipelines installed before August 1, 1971, and all other applicable requirements within one year after the pipeline is readied for service. However, the corrosion control requirements specifically applicable to pipelines installed after July 31, 1971, apply if the pipeline substantially meets those requirements before it is readied for service or it is a segment which is replaced, relocated or substantially altered.

.SO DOC 16B-255.453 NYCRR

255.453 General. Each operator shall establish procedures as required by section 255.605(b) of this Part to implement these requirements. These procedures, including those for the design, installation, operation, and maintenance of cathodic protection systems, must be carried out by, or under the direction of, a person qualified by experience and training in pipeline corrosion control methods.

.SO DOC 16B-255.455 NYCRR

255.455 External corrosion control: buried or submerged pipelines installed after July 31, 1971.

(a) Except as provided in subdivisions (b), (c) and (f) of this section, each buried or submerged pipeline installed after July 31, 1971, must be protected against external corrosion.

(1) It must have an external protective coating meeting the requirements of section 255.461 of this Part.

(2) It must have a cathodic protection system designed to protect the

pipeline in its entirety, installed and placed in operation within one year after completion of construction.

(b) An operator need not comply with subdivision (a) of this section, if the operator can demonstrate by tests, investigation, or experience in the area of application, including, as a minimum, soil resistivity measurements and tests for corrosion accelerating bacteria, that a corrosive environment does not exist.

(1) However, within six months after an installation made pursuant to the preceding sentence, the operator shall conduct tests, including pipe-to-soil potential measurements with respect to either a continuous reference electrode or an electrode using close spacing, not to exceed 20 feet (6.1 meters), and soil resistivity measurement at all potential profile peak locations, to adequately evaluate the potential profile along the entire pipeline.

(2) If the tests made indicate that a corrosive condition exists, the pipeline must be cathodically protected in accordance with paragraph (a) (2) of this section.

(c) An operator need not comply with subdivision (a) of this section, if the operator can demonstrate by tests, investigation or experience that:

(1) for a copper pipeline, a corrosive environment does not exist; or
(2) for a temporary pipeline with an operating period of service not to exceed five years beyond installation, corrosion during the five-year period of service of the pipeline will not be detrimental to public safety.

(d) Notwithstanding the provisions of subdivision (b) or (c) of this section, if a pipeline is externally coated, it must be cathodically protected in accordance with paragraph (a) (2) of this section.

(e) Aluminum may not be installed in a buried or submerged pipeline if that aluminum is exposed to an environment with a natural pH in excess of eight. For lower values of pH aluminum may not be installed unless tests or experience indicate its suitability in the particular environment involved.

(f) This section does not apply to electrically isolated, metal alloy fittings in plastic pipelines, if:

(1) for the size fitting to be used, an operator can show by tests, investigation, or experience in the area of application that adequate corrosion control is provided by alloyage; and

(2) the fitting is designed to prevent leakage caused by localized corrosion pitting.

255.457 External corrosion control: buried or submerged pipelines installed before August 1, 1971.

(a) Except for buried piping at compressor, regulator, and measuring stations, each buried or submerged transmission line, or distribution main to be operated at a pressure of 125 PSIG (862 kPa) or more in a Class 3 or 4 location, installed before August 1, 1971, that has an effective external coating must be cathodically protected along the entire area that is effectively coated. For the purposes of this Part, a pipeline does not have an effective external coating if its cathodic protection current requirements are substantially the same as if it were bare. The operator shall make tests to determine the cathodic protection current requirements.

(b) Except for cast iron or ductile iron, each of the following buried or submerged pipelines installed before August 1, 1971, must be cathodically protected or replaced in the areas in which active corrosion is found:

- (1) bare or ineffectively coated transmission lines;
- (2) bare or coated pipes at compressor, regulator, and measuring stations; or
- (3) bare or coated distribution lines, except coated distribution mains to be operated at a pressure of 125 PSIG (862 kPa) or more in a Class 3 or 4 location.

.SO DOC 16B-255.459

NYCRR

255.459 External corrosion control: examination of buried pipeline when exposed.

Whenever any portion of an existing underground steel facility is exposed by the operator, a galvanic type anode shall be attached to that facility if consistent with good corrosion control practices. Whenever an operator has knowledge that any portion of a buried pipeline is exposed, the exposed portion must be examined for evidence of external corrosion if the pipe is bare, or if the coating is deteriorated. If external corrosion is found, the operator shall investigate circumferentially and longitudinally beyond the exposed portion (by visual examination, approved indirect method, or both) to determine whether there is additional corrosion, and remedial action must be taken to the extent required by the applicable subdivisions of sections 255.483, 255.485, 255.487, and 255.489 of this Part.

.SO DOC 16B-255.461

NYCRR

255.461 External corrosion control: protective coating.

(a) Each external protective coating, whether conductive or insulating, applied for the purpose of external corrosion control must:

(1) be applied on a properly prepared surface;
(2) have sufficient adhesion to the metal surface to effectively resist underfilm migration of moisture;
(3) be sufficiently ductile to resist cracking;
(4) have sufficient strength to resist damage due to handling and soil stress; and
(5) have properties compatible with any supplemental cathodic protection.

(b) Each external protective coating which is an electrically insulating type must also have low moisture absorption and high electrical resistance.

(c) Each external protective coating must be inspected just prior to lowering the pipe into the ditch and backfilling, and any damage detrimental to effective corrosion control must be repaired.

(d) Electrical tests appropriate for the type of coating shall be used on pipelines to operate at 125 PSIG (862 kPa) or more to detect defects in the coating which may not be revealed by a visual inspection. Where such tests are not practical, electrical tests, after installation, shall be conducted.

(e) Electrical tests of pipe coating on distribution mains, other than those covered by subdivision (d) of this section, shall be conducted where practical.

(f) Each external protective coating must be protected from damage resulting from adverse ditch conditions or damage from supporting blocks.

(g) If coated pipe is installed by boring, driving or other similar method, precautions must be taken to minimize damage to the coating during installation.

.SO DOC 16B-255.463

NYCRR

255.463 External corrosion control: cathodic protection. (a) Each cathodic protection system required by this Part must provide a level of cathodic protection that complies with one or more of the applicable criteria contained in Appendix 14-D of this Title. If none of these criteria are applicable, the cathodic protection system must provide a level of cathodic protection at least equal to that provided by compliance with one or more of these criteria.

(b) If amphoteric metals are included in a buried or submerged pipeline containing a metal of different anodic potential:

(1) the amphoteric metals must be electrically isolated from the remainder of the pipeline and be cathodically protected; or

(2) the entire buried or submerged pipeline must be cathodically

protected at a cathodic potential that meets the requirements of Appendix 14-D of this Title for amphoteric metals.

(c) The amount of cathodic protection must be controlled so as not to damage the protective coating or the pipe.

.SO DOC 16B-255.465

NYCRR

255.465 External corrosion control: monitoring.

(a) Pipe-to-soil electrical potential tests or other acceptable electrical tests shall be conducted over each pipeline 100 feet (30.5 meters), or longer that is under cathodic protection at least once each calendar year, but with intervals not exceeding 15 months, to determine whether the cathodic protection meets the requirements of section 255.463 of this Part. These should also be conducted for pipelines shorter than 100 feet (30.5 meters). However, if tests at those intervals are impractical for separately protected short sections of mains or transmission lines, not in excess of 100 feet (30.5 meters), or separately protected service lines, these pipelines may be surveyed on a sampling basis.

(b) Each cathodic protection rectifier or other impressed current power source must be inspected six times each calendar year, but at intervals not exceeding 2 1/2 months, to ensure that it is operating.

(c) Each reverse current switch, each diode, and each interference bond whose failure would jeopardize structure protection must be electrically checked for proper performance six times each calendar year, but at intervals not exceeding 2 1/2 months. Each other interference bond must be checked at least once each calendar year, but at intervals not exceeding 15 months.

(d) Each operator shall take prompt remedial action to correct any deficiencies indicated by the monitoring.

(e) After the initial evaluation required by sections 255.455(b)-(c) and 255.457(b) of this Part, each operator must, not less than every 3 years at intervals not exceeding 39 months, reevaluate its unprotected pipelines and cathodically protect them in accordance with this Part in areas in which active corrosion is found. The operator must determine the areas of active corrosion by electrical survey. However, on distribution lines and where an electrical survey is impractical on transmission lines, areas of active corrosion may be determined by other means that include review and analysis of leak repair and inspection records, corrosion monitoring records, exposed pipe inspection records, and the pipeline environment.

(f) The operator shall determine the areas of active corrosion by electrical survey, or where electrical survey is impractical, by using

the required leakage survey (see section 255.723(b) of this Part) in conjunction with an analysis of the corrosion and leak history records, or by other approved means.

.SO DOC 16B-255.467

NYCRR

255.467 External corrosion control: electrical isolation.

(a) Each buried or submerged pipeline must be electrically isolated from other underground metallic structures, unless the pipeline and the other structures are electrically interconnected and cathodically protected as a single unit.

(b) One or more insulating devices must be installed where electrical isolation of a portion of a pipeline is necessary to facilitate the application of corrosion control.

(c) Except for unprotected copper inserted in a ferrous pipe, each pipeline must be either electrically isolated from any metallic casing that is part of the underground system or, if isolation is not achieved because it is impractical, must be treated by other measures to minimize corrosion of the pipeline inside the casing.

(d) Inspection and electrical tests must be made to assure that electrical isolation is adequate.

(e) An insulating device may not be installed in an area where a combustible atmosphere is anticipated unless precautions are taken to prevent arcing.

(f) Where a pipeline is located in close proximity to electrical transmission tower footings, ground cables or counterpoise, or in other areas where fault currents or unusual risk of lightning may be anticipated, it must be provided with protection against damage due to fault currents or lightning, and protective measures must also be taken at insulating devices.

(g) For any pipeline constructed after December 1, 1993, that is located parallel and in close proximity to or crosses underneath an overhead high-voltage (69 kV or higher) electric transmission facility, the step-and-touch voltages induced by magnetic fields of overhead electric lines under steady state conditions shall be limited to 15 volts or less at all points where a person could normally touch the pipeline or a pipeline appurtenance. This does not apply to buried pipelines or to locations where access is limited by use of fences or barriers to personnel that are trained in safe practices regarding step-and-touch voltages. The short term emergency loading condition of the circuit as defined by the New York Independent System Operator for the electric facility shall be used in determining the magnitude of such step-and-touch voltages.

(1) Step voltage means the root mean square voltage difference between any two points on the ground surface separated by one meter (approximately the distance of one step) in the direction of the maximum voltage gradient.

(2) Touch voltage means the root mean square voltage difference between any point on the ground where a person may stand and any point on the pipeline or its appurtenances which can be touched simultaneously by either hand.

.SO DOC 16B-255.469

NYCRR

255.469 External corrosion control: test stations. Each pipeline under cathodic protection required by this Part must have sufficient test stations or other contact points for electrical measurement to determine the adequacy of cathodic protection.

.SO DOC 16B-255.471

NYCRR

255.471 External corrosion control: test leads. (a) Each test lead wire must be connected to the pipeline so as to remain mechanically secure and electrically conductive.

(b) Each test lead wire must be attached to the pipeline so as to minimize stress concentration on the pipe.

(c) Each bared test lead wire and bared metallic area at point of connection to the pipeline must be coated with an electrical insulating material compatible with the pipe coating and the insulation on the wire.

.SO DOC 16B-255.473

NYCRR

255.473 External corrosion control: interference currents.

(a) Each operator whose pipeline system is subjected to stray currents shall have in effect a continuing program to minimize the detrimental effects of such currents.

(b) Each impressed current type cathodic protection system or galvanic anode system must be designed and installed so as to minimize any adverse effects on existing adjacent underground metallic structures.

.SO DOC 16B-255.475

NYCRR

255.475 Internal corrosion control: general.

(a) Corrosive gas may not be transported by pipeline, unless the corrosive effect of the gas on the pipeline has been investigated and steps have been taken to minimize internal corrosion.

(b) Whenever any pipe is removed from a pipeline for any reason, the internal surface must be inspected for evidence of corrosion. If internal corrosion is found, the following requirements apply:

(1) The adjacent pipe must be investigated to determine the extent of internal corrosion.

(2) Replacement must be made to the extent required by the applicable requirements of section 255.485, 255.487 or 255.489 of this Part.

(3) Steps must be taken to minimize the internal corrosion.

.SO DOC 16B-255.476

NYCRR

255.476 Internal corrosion control: Design and construction of transmission line.

(a) Design and construction. Except as provided in paragraph (b) of this section, each new transmission line and each replacement of line pipe, valve, fitting, or other line component in a transmission line must have features incorporated into its design and construction to reduce the risk of internal corrosion. At a minimum, unless it is impracticable or unnecessary to do so, each new transmission line or replacement of line pipe, valve, fitting, or other line component in a transmission line must:

(1) Be configured to reduce the risk that liquids will collect in the line;

(2) Have effective liquid removal features whenever the configuration would allow liquids to collect; and

(3) Allow use of devices for monitoring internal corrosion at locations with significant potential for internal corrosion.

(b) Exceptions to applicability. The design and construction requirements of paragraph (a) of this section do not apply to pipeline installed or line pipe, valve, fitting or other line component replaced before May 23, 2007.

(c) Change to existing transmission line. When an operator changes the configuration of a transmission line, the operator must evaluate the impact of the change on internal corrosion risk to the downstream portion of an existing onshore transmission line and provide for removal of liquids and monitoring of internal corrosion as appropriate.

(d) Records. An operator must maintain records demonstrating compliance with this section. Provided the records show why incorporating design features addressing paragraph (a)(1), (a)(2), or (a)(3) of this section is impracticable or unnecessary, an operator may fulfill this requirement through written procedures supported by as-built drawings or other construction records.

.SO DOC 16B-255.477

NYCRR

255.477 Internal corrosion control: monitoring. If corrosive gas is being transported, coupons or other suitable means must be used to determine the effectiveness of the steps taken to minimize internal corrosion. Each coupon or other means of monitoring internal corrosion must be checked two times each calendar year, but at intervals not

exceeding 7 1/2 months.

.SO DOC 16B-255.479

NYCRR

255.479 Atmospheric corrosion control: general.

(a) Each operator must clean and coat each pipeline or portion of pipeline that is exposed to the atmosphere, except pipelines under subdivision (c) of this section.

(b) Coating material must be suitable for the prevention of atmospheric corrosion.

(c) Except portions of pipelines in offshore splash zones or soil-to-air interfaces, the operator need not protect from atmospheric corrosion any pipeline for which the operator demonstrates by test, investigation, or experience appropriate to the environment of the pipeline that a corrosive atmosphere does not exist.

.SO DOC 16B-255.481

NYCRR

255.481 Atmospheric corrosion control: monitoring.

(a) Each operator must inspect each pipeline or portion of pipeline that is exposed to the atmosphere for evidence of atmospheric corrosion, as follows:

If the pipeline is located: Then the frequency of inspection is:

Onshore At least once every 3 calendar years, but with intervals not exceeding 39 months

Offshore At least once each calendar year, but with intervals not exceeding 15 months

(b) During inspections the operator must give particular attention to pipe at soil-to-air interfaces, under thermal insulation, under disbonded coatings, at pipe supports, in splash zones, at deck penetrations, and in spans over water.

(c) If atmospheric corrosion is found during an inspection, the operator must provide protection against the corrosion as required by section 479 of this Part.

.SO DOC 16B-255.483

NYCRR

255.483 Remedial measures: general. (a) Each segment of metallic pipe that replaces pipe removed from a buried or submerged pipeline because of external corrosion must have a properly prepared surface and must be provided with an external protective coating that meets the requirements of section 255.461 of this Part.

(b) Each segment of metallic pipe that replaces pipe removed from a buried or submerged pipeline because of external corrosion must be

cathodically protected in accordance with this Part.

(c) Except for cast iron or ductile iron pipe, each segment of buried or submerged pipe that is required to be repaired because of external corrosion must be cathodically protected in accordance with this Part.

(d) Whenever the annual electrical testing required by section 255.465(a) of this Part reveals that the pipeline or segment of pipeline does not meet the cathodic protection criteria required by section 255.463 of this Part, the operator must complete action to reestablish cathodic protection to the required level prior to the next annual testing or within one calendar year.

(e) When an area of active corrosion is identified, the operator shall provide cathodic protection to the level required by section 255.463 of this Part within one calendar year or replace the section of pipeline within two calendar years.

.SO DOC 16B-255.485

NYCRR

255.485 Remedial measures: transmission lines.

(a) Each segment of transmission line with general corrosion and with a remaining wall thickness less than that required for the maximum allowable operating pressure of the pipeline must be replaced or the operating pressure reduced commensurate with the strength of the pipe based on actual remaining wall thickness. However, if the area of general corrosion is small, the corroded pipe may be repaired by a method that reliable engineering tests and analyses show can permanently restore the serviceability of the pipe. Corrosion pitting so closely grouped as to affect the overall strength of the pipe is considered general corrosion.

(b) Each segment of transmission line pipe with localized corrosion pitting to a degree where leakage may result must be replaced or repaired, or the operating pressure reduced commensurate with the strength of the pipe based on the actual remaining wall thickness in the pits.

(c) Under subdivisions (a) and (b) of this section, the strength of transmission line pipe based on actual remaining wall thickness may be determined by the procedure in ASME B31G (as described in section 10.3 of this Title), or the procedure PRCI PR 3-805 (R-STRENG) (as described in section 10.3 of this Title). Both procedures apply to corroded regions that do not penetrate the pipe wall, subject to the limitations prescribed in the procedures.

.SO DOC 16B-255.487

NYCRR

255.487 Remedial measures: distribution lines other than cast iron or ductile iron lines.

(a) Except for cast iron or ductile iron pipe, each segment of a generally corroded pipeline with a remaining wall thickness less than that required for the maximum allowable operating pressure of the pipeline, or a remaining wall thickness less than 30 percent of the nominal wall thickness, must be replaced. However, if the area of general corrosion is small, the corroded pipe may be repaired by a method that reliable engineering tests and analyses show can permanently restore the servicability of the pipe. Corrosion pitting so closely grouped as to affect the overall strength of the pipe is considered general corrosion.

(b) Except for cast iron or ductile iron pipe, each segment of distribution main with localized corrosion pitting to a degree where leakage might result must be replaced or repaired.

.SO DOC 16B-255.489

NYCRR

255.489 Remedial measures: cast iron and ductile iron pipelines. (a) Each segment of cast iron or ductile iron pipe on which general graphitization is found to a degree where a fracture or any leakage might result, must be replaced.

(b) Each segment of cast iron or ductile iron pipe on which localized graphitization is found to a degree where any leakage might result, must be replaced or repaired, or sealed by internal sealing methods adequate to prevent or arrest any leakage.

.SO DOC 16B-255.490

NYCRR

255.490 Direct assessment.

Each operator that uses direct assessment as defined in section 255.903 of this Part on an onshore transmission line made primarily of steel or iron to evaluate the effects of a threat in the first column must carry out the direct assessment according to the standard listed in the second column. These standards do not apply to methods associated with direct assessment, such as close interval surveys, voltage gradient surveys, or examination of exposed pipelines, when used separately from the direct assessment process.

Threat	Standard
External corrosion	255.925
Internal corrosion in pipelines that transport dry gas	255.927
Stress corrosion cracking	255.929

(a) For lines not subject to the Pipeline Integrity Management requirements of this Part, the terms "covered segment" and "covered pipeline segment" in sections 255.925, 255.927, and 255.929 of this Part refer to the pipeline segment on which direct assessment is performed.

(b) In section 255.925(b) of this Part, the provision regarding detection of coating damage applies only to pipelines subject to the Pipeline Integrity Management requirements of this Part.

.SO DOC 16B-255.491

NYCRR

255.491 Corrosion control records. (a) Each operator shall maintain records or maps to show the location of cathodically protected piping, cathodic protection facilities, other than unrecorded galvanic anodes installed before August 1, 1971, and the neighboring structures bonded to the cathodic protection system.

(b) Each of the following records must be retained for the period indicated:

(1) Each record or map required by subdivision (a) of this section, and each record related to sections 255.465(a), 255.465(e), and 255.475(b), and must be retained for as long as the pipeline remains in service.

(2) Records of each test, survey, or inspection required by this Part, in sufficient detail to demonstrate the adequacy of corrosion control measures or that a corrosive condition does not exist must be retained for at least 5 years.

.SO DOC 16B-255.501

NYCRR

255.501 Scope.

Sections 255.503 through 255.517 of this Part prescribe minimum leak-test and strength-test requirements for pipelines.

.SO DOC 16B-255.503

NYCRR

255.503 General requirements.

(a) No person may operate a new segment of pipeline, or return to service a segment of pipeline that has been reconstructed, relocated, replaced, or reactivated until it has been tested in accordance with this Part to substantiate the proposed maximum allowable operating pressure and each leak has been located and eliminated.

(b) The test medium must be liquid, air, natural gas or inert gas that is:

- (1) compatible with the material of which the pipeline is constructed;
- (2) relatively free of sedimentary materials; and
- (3) except for natural gas, nonflammable.

(c) If air, natural gas, or inert gas is used as the test medium, the following maximum hoop stress limitations apply:

Maximum hoop stress allowed as
percentage of SMYS

Class	Natural	Air or inert
Location	gas	gas

1.....	80	80
2.....	30	75
3.....	30	50
4.....	30	40

(d) Each weld used to tie-in a test segment of pipeline is excepted from the test requirements of this Part.

(e) If a component other than pipe is the only item being replaced or added to a pipeline, a strength test after installation is not required, if the manufacturer of the component certifies that:

(1) The component was tested to at least the pressure required for the pipeline to which it is being added;

(2) The component was manufactured under a quality control system that ensures that each item manufactured is at least equal in strength to a prototype and that the prototype was tested to at least the pressure required for the pipeline to which it is being added; or

(3) The component carries a pressure rating established through applicable ASME/ANSI, Manufacturers Standardization Society of the Valve and Fittings Industry, Inc. (MSS) specifications, or by unit strength calculations as described in section 255.143 of this Part.

.SO DOC 16B-255.505

NYCRR

255.505 Strength test requirements for steel pipelines to operate at 125 PSIG (862 kPa) or more.

(a) Each segment of a steel pipeline that is to operate at a pressure of 125 PSIG (862 kPa) or more must be strength tested in accordance with this section to substantiate the proposed maximum allowable operating pressure.

(b) The test pressure shall be at least equal to 90 percent of SMYS or 1.5 times the maximum allowable operating pressure whichever is less.

(c) The test medium may be water, inert gas or air. For facilities to be operated above 20 percent SMYS in any class location or facilities to be operated at 125 PSIG (862 kPa) or more in a Class 4 location the medium may only be water unless there are no buildings intended for human occupancy within 300 feet (91.4 meters) of the pipeline facilities being tested and prior approval is granted by the Department to use air or inert gas as the test medium.

(d) Except as provided in subdivisions (f) and (g) of this section, the strength test must be conducted by maintaining the pressure at or above the test pressure for at least 12 hours after stabilization.

(e) A calibrated recording pressure gauge that will indicate increments of five PSIG (34.5 kPa) or less, where practicable, shall be attached to the test section. The gauge must be calibrated at least

hourly for the first and last two hours of the test. Calibration is against a dead-weight tester, or equivalent device, attached to the test section.

(f) For a short length of pipeline which has not been backfilled and where, throughout its entire length, its entire circumference can be readily examined visually for the detection of leakage, the duration of the test may be reduced to four hours following stabilization.

(g) At least five business days prior to starting the test, the operator shall make notification. In order to maintain continuity of service during emergencies, shorter notice is permissible.

(h) Tests under this section are not considered as satisfactorily accomplished unless certified by an inspector of the Department.

.SO DOC 16B-255.507

NYCRR

255.507 Test requirements for pipelines to operate at less than 125 PSIG (862 kPa).

(a) Except for service lines, each segment of a pipeline that is to be operated at less than 125 PSIG (862 kPa) must be tested in accordance with this section.

(b) The test pressure shall be 90 PSIG (621 kPa) or 1.5 times the maximum operating pressure whichever is greater; however, the maximum test pressure for plastic pipelines may not be more than three times the design pressure for the pipe determined under section 255.121 of this Part, at a temperature not less than the pipe temperature during the test. During the test, the temperature of thermoplastic material may not be more than 100 μ F (38 μ C), or the temperature at which the material's long-term hydrostatic strength has been determined under the listed specification, whichever is greater.

(c) The test medium shall be water, inert gas or air.

(d) Except as provided in subdivision (f) of this section, the test must be conducted by maintaining the pressure at or above the test pressure for at least one hour after stabilization.

(e) A calibrated pressure gauge that will indicate increments of two psig (14kPa) or less shall be attached to the test section.

(f) For plastic insertions of less than 1,500 feet (457.2 meters) length, the test duration may be 30 minutes prior to insertion followed by a 30-minute test after insertion and an inspection of all visible portions of the pipe for damage.

.SO DOC 16B-255.511

NYCRR

255.511 Test requirements for service lines.

(a) Except for steel service lines greater than two inches (51 millimeters) in nominal diameter that are to operate at 125 PSIG (862

kPa) or more, each segment of a service line must be leak tested in accordance with this section before being placed into service.

(b) Steel service lines greater than two inches (51 millimeters) in nominal diameter that are to operate at 125 PSIG (862 kPa) or more must be tested in accordance with sections 255.505 (a)-(f) of this Part.

(c) Except for copper service lines, the test pressure shall be 90 PSIG (621 kPa) or 1.5 times the maximum operating pressure, whichever is greater; however, the maximum test pressure and material temperature during the test must be in accordance with section 255.507 (b) of this Part.

(d) For copper service lines, the test pressure shall be 50 PSIG (345 kPa) or 1.5 times the maximum operating pressure, whichever is greater; however, the maximum test pressure may not be more than three times the design pressure for the pipe.

(e) The test medium shall be water, inert gas or air.

(f) The test duration shall be as follows:

(1) for service lines two inches (51 millimeters) and smaller to operate at less than 125 PSIG (862 kPa), 15 minutes;

(2) for service lines two inches (51 millimeters) and smaller to operate at 125 PSIG (862 kPa) or more, two hours; or

(3) for service lines greater than two inches (51 millimeters) to operate at less than 125 PSIG (862 kPa), 30 minutes.

(g) The limits of the test shall be from the main to one of the following points:

(1) In the case of an inside meter or meter-regulator setting:

(i) for each segment of a service line intended to be operated at a pressure of less than 1 psig, the first fitting inside the wall of the customer's structure through which the service enters. Each segment of an interior service line operating below 1 psig must be leak-tested at the operating pressure when placed in service, in lieu of the test required under subdivision (c) of this section; or

(ii) for each segment of a service line intended to be operated at a pressure of at least 1 psig, to the first fitting upstream of the meter. Interior piping intended to be operated at a pressure of at least 1 psig (6.9 kPa) but not more than 40 psig (276 kPa), may be given a leak test at a pressure of not less than 50 psig (345 kPa), in lieu of the test required under subdivision (c) of this section.

(2) in the case of an outside meter or meter-regulator setting, to the meter riser valve, if any, or the first fitting on the riser upstream of the regulator where one is installed; or

(3) in the case of an inside meter with an outside regulator; to the

first fitting on the riser upstream of the regulator.

(h) The service line connection to the main need not be included in these tests if it is not feasible to be so. However, it must be given a leakage test at operating pressure when placed in service.

(i) The test indicator for service line tests shall be a calibrated pressure gauge marked in five PSIG (34.5 kPa) increments for service lines to operate at 100 PSIG (689 kPa) or more. For tests on lines to operate at less than 100 PSIG (689 kPa), the test indicator must be such that any loss of pressure can be readily detected.

.SO DOC 16B-255.515 NYCRR

255.515 Environmental protection and safety requirements.

(a) In conducting tests under this Part, each operator shall ensure that every reasonable precaution is taken to protect its employees and the general public during the testing. The operator shall take all practicable steps to keep persons not working on the testing operation outside of the testing area until the pressure is reduced to or below the proposed maximum allowable operating pressure.

(b) The operator shall ensure that the test medium is disposed of in a manner that will minimize damage to the environment.

.SO DOC 16B-255.517 NYCRR

255.517 Records.

(a) Each operator shall make, and retain for the useful life of the pipeline, a record of each test performed under sections 255.505 and 255.507 of this Part.

The record must contain at least the following information:

(1) the operator's name, the name of the operator's employee responsible for making the test, and the name of any test company used;

(2) test medium used;

(3) test pressure;

(4) test duration;

(5) pressure record charts; or other record of pressure readings

(6) elevation variations, whenever significant for the particular test; and

(7) leaks and failures noted and their disposition.

(b) Each operator must maintain a record of each test required by section 255.511 of this Part for at least 5 years.

.SO DOC 16B-255.551 NYCRR

255.551 Scope.

Sections 255.552 through 255.557 of this Part prescribe minimum requirements for qualifying a pipeline for an increased maximum allowable operating pressure.

255.552 Notification requirements.

(a) The maximum allowable operating pressure of any transmission line, or main operating at a pressure of 125 PSIG (862 kPa) or above, shall not be raised or lowered without submitting a letter of intent at least 60 days prior to any proposed change of said certified pressure. Where the letter of intent indicates a decrease in the maximum allowable operating pressure, a statement of explanation is to be included. All procedures involved in the recertification project shall be in accordance with these requirements. In the event of an emergency, verbal permission may be obtained, but the written application must be filed promptly.

(b) In addition, any operator proposing to increase the maximum allowable operating pressure of a pipeline which was originally constructed to operate at a pressure of less than 125 PSIG (862 kPa) to a pressure of 125 PSIG (862 kPa) or more shall comply with the reporting requirement of subdivision (a) of this section. If the increase in pressure is proposed within three years of the initial operation of a pipeline which, at the higher pressure proposed, would fall within the definition of major utility transmission facility as set forth in section 120(2) of the Public Service Law, a hearing will be held on the proposed increase, unless such hearing is waived by the commission on the application of staff of the Department. In addition with respect to any such increase, the operator shall, in addition to the reporting requirements set forth above, provide in writing to staff the basis of the need for the increase, a discussion of how the increase will serve the public interest, convenience and necessity, and such assurance as staff may require, including documentation, that no undue hazard will result from operation of the line at the higher pressure.

(c) At least 60 days prior to increasing the maximum allowable operating pressure of a distribution system above the limits set below, the operator shall submit a letter of intent. In the event of an emergency, verbal permission may be obtained, but the written notification must be filed promptly.

(1) If the maximum allowable operating pressure is between 1/2 PSIG (3.4 kPa) and 60 PSIG (414 kPa), notice is required for an increase in pressure greater than six PSIG (41.4 kPa).

(2) If the maximum allowable operating pressure is between 60 PSIG (414 kPa) and 124 PSIG (855 kPa), notice is required for an increase in pressure greater than 10 percent of the maximum allowable operating pressure.

(3) Converting a low pressure distribution system to a high-pressure system not to exceed 124 PSIG (855 kPa).

.SO DOC 16B-255.553

NYCRR

255.553 General requirements.

(a) The pressure must be increased gradually, at a rate that can be controlled.

(b) Prior to the first pressure increase and at the end of each incremental increase, the pressure must be held constant while the entire segment of the pipeline that is affected is leakage surveyed.

(c) Each hazardous leak detected must be repaired before a further pressure increase is made. All leaks must be repaired as soon as possible following completion of the upgrading.

(d) Each operator who upgrades a segment of pipeline shall retain for the life of the segment a record of each investigation required by this Part, of all work performed, and of each pressure test conducted, in connection with the upgrading.

(e) Each operator who upgrades a segment of pipeline shall establish a written procedure that will ensure compliance with each applicable requirement of this Part.

(f) Except as provided in section 255.555(c) of this Part, the new maximum allowable operating pressure may not exceed the maximum that would be allowed under sections 255.619 and 255.621 of this Part for a new segment of pipeline constructed of the same materials in the same location. However, when upgrading a steel pipeline, if any variable necessary to determine the design pressure under the design formula (section 255.105 of this Part) is unknown, the MAOP may be increased as provided in subparagraph 255.619(a)(1) of this Part.

.SO DOC 16B-255.555

NYCRR

255.555 Upgrading to a pressure of 125 PSIG (862 kPa) or more in steel pipelines.

(a) Unless the requirements of this section have been met, no person may subject any segment of a steel pipeline to a pressure that is 125 PSIG (862 kPa) or more and that is above the established maximum allowable operating pressure.

(b) Before increasing the operating pressure above the previously established maximum allowable operating pressure, the operator shall comply with the following requirements:

(1) Review the design, operating, and maintenance history, and previous testing of the segment of pipeline and determine whether the proposed increase is safe and consistent with the requirements of this Part.

(2) Make any repairs, replacements, or alterations in the segment of pipeline that are necessary for safe operation at the increased pressure.

(3) Verify the condition of the pipe through the use of test excavations.

(4) Either prove compliance with the nondestructive testing requirements of sections 255.241(b) and 255.243(d) of this Part for the current class location or nondestructively test a sufficient number of welds to achieve compliance with the minimum percentages listed in section 255.243(d) of this Part for the current class location.

(5) Where nondestructive testing is required, the operator shall select welds within 150 feet (45.72 meters) of habitable structures until the minimum percentage is achieved.

(6) Establish adequate cathodic protection in compliance with section 255.463 of this Part.

(c) After complying with subdivision (b) of this section, an operator may increase the maximum allowable operating pressure of a segment of pipeline constructed before September 12, 1970 to the highest pressure that is permitted under section 255.619 of this Part, using as a test pressure the highest pressure to which the segment of pipeline was previously subjected (either in a strength test or in actual operation).

(d) After complying with subdivision (b) of this section, an operator that does not qualify under subdivision (c) of this section may increase the previously established maximum allowable operating pressure if at least one of the following requirements are met:

(1) The segment of pipeline is successfully tested in accordance with the requirements of this Part for a new line of the same material in the same location.

(2) An increased maximum allowable operating pressure may be established for a segment of pipeline in a Class 1 location if the line has not previously been tested, and if:

(i) it is impractical to test it in accordance with the requirements of this Part;

(ii) the new maximum operating pressure does not exceed 80 percent of that allowed for a new line of the same design in the same location; and

(iii) the operator determines that the new maximum allowable operating pressure is consistent with the condition of the segment of pipeline and the design requirements of this Part.

(e) Where a segment of pipeline is upgraded in accordance with subdivision (c) or paragraph (d) (2) of this section, the increase in pressure must be made in increments that are equal to:

- (1) 10 percent of the pressure before the upgrading; or
- (2) 25 percent of the total pressure increase, which ever produces the fewer number of increments.

.SO DOC 16B-255.557

NYCRR

255.557 Upgrading to a pressure less than 125 PSIG (862 kPa).

(a) Unless the requirements of this section have been met, no person may subject a segment of steel or plastic pipeline to a higher maximum allowable operating pressure that is less than 125 PSIG (862 kPa).

(b) Increasing the maximum allowable operating pressure for cast iron, ductile iron, and wrought iron pipeline segments is prohibited without prior approval.

(c) Before increasing the operating pressure above the previously established maximum allowable operating pressure, the operator shall comply with the following requirements:

- (1) review the design, operating and maintenance history of the segment of pipeline;
- (2) make a leakage survey (if it has been more than one year since the last survey) and repair any leaks that are found;
- (3) make any repairs, replacements or alterations in the segment of pipeline that are necessary for safe operation at the increased pressure;
- (4) for effectively coated steel systems, establish adequate cathodic protection in compliance with section 255.463 of this Part;
- (5) for ineffectively coated or bare steel systems, perform a review for active corrosion, isolate and cathodically protect all coated segments and all services, and where active corrosion exists establish adequate cathodic protection in compliance with section 255.463 of this Part;
- (6) reinforce or anchor offsets, bends and dead ends in pipe joined by compression couplings or bell and spigot joints to prevent failure of the pipe joint, if the offset, bend, or dead end is exposed in an excavation;
- (7) isolate the segment of pipeline in which the pressure is to be increased from any adjacent segment that will continue to be operated at a lower pressure; and
- (8) if the pressure in mains or service lines, or both, is to be higher than the pressure delivered to the customer, install a service regulator of adequate capacity on each service line and test each new or existing service regulator to verify that it is functioning properly and adequately vented in compliance with sections 255.355(b) and 255.744(e) of this Part. Pressure may be increased as necessary to test each

regulator, after a regulator has been installed on each pipeline subject to the increased pressure.

(d) After complying with subdivision (c) of this section, the increase in maximum allowable operating pressure must be made in increments that are equal to 10 PSIG (69 kPa) or 25 percent of the total pressure increase, whichever produces the fewer number of increments. Whenever the requirements of paragraph (c) (8) of this section apply, there must be at least two approximately equal incremental increases.

.SO DOC 16B-255.601

NYCRR

255.601 Scope.

Sections 255.603 through 255.629 of this Part prescribe minimum requirements for the operation of pipeline facilities.

.SO DOC 16B-255.603

NYCRR

255.603 General provisions. (a) No person may operate a segment of pipeline unless it is operated in accordance with this Part.

(b) Each operator shall prepare and file a detailed written operating and maintenance plan for complying with all the provisions of this Part before operations of a pipeline system commence; it must be reviewed and updated by the operator at intervals not exceeding 15 months, but at least once each calendar year. Appropriate parts of the plan must be kept at locations where operations and maintenance activities are conducted. Revisions to these written procedures shall be submitted at least 30 days prior to the effective date. Minor revisions that do not affect the intent of the procedure may be implemented immediately and submitted on a quarterly basis.

(c) Each operator shall establish and maintain the maps of its transmission lines and distribution mains and maps or records of its service lines as necessary to administer its operating and maintenance plan.

(d) Each operator shall satisfactorily conform with the submitted.

(e) The Commission may require an operator to amend its operating and maintenance plan as necessary to provide a reasonable level of safety.

.SO DOC 16B-255.604

NYCRR

255.604 Operator qualification.

This section prescribes the minimum requirements for operator qualification of individuals performing covered tasks on a pipeline facility.

(a) Each operator shall have and follow a written qualification program. The program shall include provisions to:

(1) Identify covered tasks;

(2) Ensure through evaluation that individuals performing covered

tasks are qualified;

(3) Allow individuals that are not qualified pursuant to this section to perform a covered task if directed and observed by an individual that is qualified;

(4) Evaluate an individual if the operator has reason to believe that the individual's performance of a covered task contributed to an incident requiring the submission of a report pursuant to 255.801(d) or is otherwise significant in the judgement of the operator;

(5) Evaluate an individual if the operator has reason to believe that the individual is no longer qualified to perform a covered task;

(6) Communicate changes that affect covered tasks to individuals performing those tasks;

(7) Identify those covered tasks and the intervals at which evaluation of the individual's qualifications is needed;

(8) After December 16, 2004, provide training, as appropriate, to ensure that individuals performing covered tasks have the necessary knowledge and skills to perform the tasks in a manner that ensures the safe operations of pipeline facilities; and

(9) After December 16, 2004, provide notification to the department if the operator significantly modifies the program after the department has verified that it complies with this section. Such notification shall also be made to U.S. Department of Transportation in accordance with 49 CFR § 192.805(i).

(b) Each operator shall maintain records that demonstrate compliance with this section.

(1) Qualification records shall include:

(i) Identification of qualified individual(s);

(ii) Identification of the covered tasks the individual is qualified to perform;

(iii) Date(s) of current qualifications; and

(iv) Qualification method(s).

(2) Records supporting an individual's current qualification shall be maintained while the individual is performing the covered task. Records of prior qualification and records of individuals no longer performing covered tasks shall be retained for a period of five years.

(c) Operators shall have a written qualification program by April 27, 2001.

(d) Operators must complete the qualification of individuals performing covered tasks by October 28, 2002.

(e) Work performance history may be used as a sole evaluation method for individuals who were performing a covered task prior to August 27,

1999.

(f) After October 28, 2002, work performance history may not be used as a sole evaluation method.

(g) After December 16, 2004, observation of on-the-job performance may not be used as the sole method of evaluation.

.SO DOC 16B-255.605

NYCRR

255.605 Essentials of operating and maintenance plan.

Each operator shall include, as a minimum, the following in its operating and maintenance plan as applicable:

(a) detailed instructions for employees covering operating and maintenance procedures during normal operations and repairs;

(b) procedures required to be included by the provisions of the welding, joining, corrosion control, upgrading, operations, maintenance, and accidents and leaks sections of this Part;

(c) specific programs relating to facilities presenting the greatest hazard to public safety either in an emergency or because of extraordinary construction or maintenance requirements;

(d) provision for periodic inspections to ensure that operating pressures are appropriate for the class location;

(e) precautions to be taken when excavation is performed in the vicinity of any underground gas facility;

(f) procedures to correct, within specified time frames, deficiencies found during any inspections, evaluations, reviews, etc. required by this Part;

(g) criteria employed to determine business districts for the purpose of compliance with section 255.723(b)(1) of this Part;

(h) criteria employed to identify those conditions at leak hazard locations which necessitate that the interval between surveillances be shortened; and

(i) details of how an operator plans to comply with any requirement of this Part that is written in nonspecific language. For example, section 255.805(b) of this Part states that "Each operator shall... establish a means by which it determines the appropriate surveillance interval at leak locations under frost conditions..." the details required by this subdivision would necessitate the operator to specify the established means.

(j) instructions enabling personnel who perform operation and maintenance activities to recognize conditions that may be safety-related conditions that are subject to the reporting requirements of section 255.831 of this Part.

(k) Procedures for making construction records, maps, and operating

history available to appropriate personnel;

(l) Procedures for start up and shut down of any section of pipeline in a manner designed to assure operation within the maximum allowable operating pressure limits prescribed by this Part, plus the build-up allowed for operation of pressure limiting and control devices;

(m) Procedures for maintaining compressor stations, including provisions for isolating units or sections of pipe and for purging before returning to service;

(n) Procedures for starting, operating, and shutting down gas compressor units;

(o) Procedures for periodic review of the work done by operator personnel to determine the effectiveness and adequacy of the procedures used in normal operation and maintenance and modifying the procedures when deficiencies are found;

(p) Procedures for adequate precautions in excavated trenches to protect personnel from the hazards of unsafe accumulations of vapor or gas, and making available when needed at the excavation, emergency rescue equipment including a breathing apparatus and a rescue harness and line; and

(q) Responding promptly to a report of a gas odor inside or near a building, unless the operator's emergency procedures under paragraph 255.615(a)(3) specifically apply to these reports.

(r) For transmission lines, other than those operated in connection with the operator's distribution system, procedures for the following to provide safety when operating design limits have been exceeded:

(1) responding to, investigating and correcting the cause of:

(i) unintended closure of valves, or shutdowns;

(ii) increase or decrease in pressure or flow rate outside normal operating limits;

(iii) loss of communications;

(iv) operation of any safety device; and

(v) any other foreseeable malfunction of component, deviation from normal operation, or personnel error which may result in a hazard to persons or property.

(2) checking variations from normal operation, after abnormal operation has ended, at sufficient critical locations in the system to determine continued integrity and safe operation.

(3) notifying responsible operator personnel when notice of an abnormal operation is received.

(4) periodically reviewing the response of operator personnel to determine the effectiveness of the procedures controlling abnormal

operation and taking corrective action where deficiencies are found.

(s) Implementing the applicable control room management procedures required by section 255.631.

.SO DOC 16B-255.609

NYCRR

255.609 Change in class location: required study.

At least once every five years or whenever an increase in population density indicates either a change in class location for a segment of an existing steel pipeline operating at a hoop stress that is more than 40 percent of SMYS or that the hoop stress corresponding to the established maximum allowable operating pressure for a segment of existing pipeline is not commensurate with the present class location, the operator shall immediately make a study to determine:

(a) the present class location for the segment involved;

(b) the design, construction, and testing procedures followed in the original construction, and a comparison of these procedures with those required for the present class location by the applicable provisions of this Part;

(c) the physical condition of the segment to the extent it can be ascertained from available records;

(d) the operating and maintenance history of the segment;

(e) the maximum actual operating pressure and the corresponding operating hoop stress, taking pressure gradient into account, for the segment of pipeline involved; and

(f) the actual area affected by the population density increase, and physical barriers or other factors which may limit further expansion of the more densely populated area.

.SO DOC 16B-255.611

NYCRR

255.611 Change in class location: confirmation or revision of maximum allowable operating pressure. (a) Within 60 days after the required study is completed, the operator shall submit a program for redesigning and/or testing the respective pipeline segments, or appropriate reduction of the maximum certified operating pressures thereof, to conform to the respective then current class locations, in accordance with this Part, or declare that the design, testing, and operation of the respective pipeline segments conform to the respective then current class locations.

(b) Where the hoop stress corresponding to the established maximum allowable operating pressure of a segment of pipeline is not commensurate with the present class location, and the segment is in satisfactory physical condition, the maximum allowable operating pressure of that segment of pipeline must be confirmed or revised.

(1) If the segment involved has been previously tested in place to at least 90 percent of its SMYS for a period of not less than eight hours, the maximum allowable operating pressure must be confirmed or reduced so that the corresponding hoop stress will not exceed 72 percent of SMYS in Class 2 locations, 60 percent of SMYS in Class 3 locations, or 50 percent of SMYS in Class 4 locations.

(2) If the segment involved has not been previously tested in place as described in paragraph (1) of this subdivision, the maximum allowable operating pressure must be reduced so that the corresponding hoop stress is not more than that allowed by this Part for new segments of pipelines in the existing class location.

(3) If the segment of pipeline involved has not been qualified for operation under paragraph (1) or (2) of this subdivision, it must be tested in accordance with the applicable requirements of this Part, and its maximum allowable operating pressure must then be established so as to be equal to or less than each of the following:

(i) The maximum allowable operating pressure after the requalification test is 0.8 times the test pressure for Class 2 locations, 0.667 times the test pressure for Class 3 locations, and 0.555 times the test pressure for Class 4 locations.

(ii) The maximum allowable operating pressure confirmed or revised in accordance with the section, may not exceed the maximum allowable operating pressure established before the confirmation or revision.

(iii) The corresponding hoop stress may not exceed 72 percent of SMYS in Class 2 locations, 60 percent of SMYS in Class 3 locations, or 50 percent of SMYS in Class 4 locations.

(c) Confirmation or revision of the maximum allowable operating pressure of segment of pipeline in accordance with this section does not preclude the application of sections 255.553 and 255.555 of this Part.

(d) Confirmation or revision of the maximum allowable operating pressure that is required as a result of a study under section 255.609 of this Part must be completed within 18 months of the change in class location.

(e) Pressure reduction under paragraph (b)(2) of this section within the 18-month period does not preclude establishing a maximum allowable operating pressure under paragraph (b) (3) of this section at a later date.

.SO DOC 16B-255.613

NYCRR

255.613 Continuing surveillance.

(a) Each operator shall have a procedure for continuing surveillance of its facilities to determine and take appropriate action concerning

changes in class location, failures, leakage history, corrosion, substantial changes in cathodic protection requirements, and other unusual operating and maintenance conditions.

(b) If a segment of pipeline is determined to be in unsatisfactory condition but no immediate hazard exists, the operator shall initiate a program to recondition or phase out the segment involved, or, if the segment cannot be reconditioned or phased out, reduce the maximum allowable operating pressure in accordance with section 255.619(a) and (b) of this Part.

.SO DOC 16B-255.614

NYCRR

255.614 Damage prevention program. (a) Each operator of a buried pipeline shall carry out a written program to prevent damage to that pipeline by excavation activities in accordance with 16 NYCRR Part 753, Protection of Underground Facilities. Each operator of a buried pipeline, except for gathering lines in Class 1 and 2 locations, must participate in the one-call notification system that covers the areas of the State in which those pipeline facilities are located.

(b) Where the operator has reason to believe damage could be done by the excavation activities, the pipeline must be inspected as frequently as necessary during and after the activities to verify the integrity of the pipeline.

(c) In the case of blasting, each inspection must include a leakage survey.

.SO DOC 16B-255.615

NYCRR

255.615 Emergency plans.

(a) Each operator shall establish written procedures to minimize the hazard resulting from a gas pipeline emergency. At a minimum, the procedures must provide for the following:

- (1) receiving, identifying and classifying notices of events which require immediate response by the operator;
- (2) establishing and maintaining adequate means of communication with appropriate fire, police and other public officials;
- (3) prompt and effective response to a notice of each type of emergency, including the following:
 - (i) gas detected inside or near a building;
 - (ii) fire located near or directly involving a pipeline facility;
 - (iii) explosion occurring near or directly involving a pipeline facility; and
 - (iv) natural disaster;
- (4) the availability of personnel, equipment, tools and materials, as needed at the scene of an emergency;

- (5) actions directed toward protecting people first and then property;
 - (6) emergency shutdown and pressure reduction in any section of the operator's pipeline system necessary to minimize hazards to life or property;
 - (7) making safe any actual or potential hazard to life or property;
 - (8) notifying appropriate fire, police and other public officials of gas pipeline emergencies and coordinating with them both planned responses and actual responses during an emergency;
 - (9) safely restoring any service outage; and
 - (10) beginning action under section 255.827 of this Part, if applicable, as soon after the end of the emergency as possible.
- (11) Actions required to be taken by a controller during an emergency in accordance with section 255.631.

(b) Each operator shall:

- (1) furnish its supervisors who are responsible for emergency action a copy of that portion of the latest edition of the emergency procedures established under subdivision (a) of this section as necessary for compliance with those procedures;
- (2) train the appropriate operating personnel to assure that they are knowledgeable of the emergency procedures and verify that the training is effective; and
- (3) review employee activities to determine whether the procedures were effectively followed in each emergency.

(c) Each operator shall establish and maintain liaison with appropriate fire, police and other public officials to:

- (1) learn the responsibility and resources of each government organization that may respond to a gas pipeline emergency;
- (2) acquaint the officials with the operator's ability in responding to a gas pipeline emergency;
- (3) identify the types of gas pipeline emergencies of which the operator notifies the officials;
- (4) plan how the operator and officials can engage in mutual assistance to minimize hazards to life or property; and
- (5) offer annual training, at mutually acceptable locations, to volunteer fire departments regarding the appropriate response to gas-related emergencies and to police departments regarding the recognition of gas-related emergencies. For nonvolunteer fire departments, annually offer to assist the training coordinator in developing training programs for gas safety-related matters.

.SO DOC 16B-255.616

NYCRR

255.616 Customer education and information program.

(a) Except for an operator of a petroleum gas system covered under paragraph (j) of this section, each pipeline operator must develop and implement a written continuing public education program that follows the guidance provided in the American Petroleum Institute's (API) Recommended Practice (RP) 1162 (as described in section 10.3 of the Title).

(b) The operator's program must follow the general program recommendations of API RP 1162 (as described in section 10.3 of the Title) and assess the unique attributes and characteristics of the operator's pipeline and facilities.

(c) The operator must follow the general program recommendations of API RP 1162 (as described in section 10.3 of the Title), unless the operator provides justification in its program or procedural manual as to why compliance with all or certain provisions of the recommended practice is not practicable and not necessary for safety.

(d) The operator's program must specifically include provisions to educate the public, appropriate government organizations, and persons engaged in excavation related activities on:

(1) use of a one-call notification system prior to excavation and other damage prevention activities;

(2) possible hazards associated with unintended releases from a gas pipeline facility;

(3) physical indications that such a release may have occurred;

(4) steps that should be taken for public safety in the event of a gas pipeline release; and

(5) procedures for reporting such an event.

(e) The program must include activities to advise affected municipalities, school districts, businesses, and residents of pipeline facility locations.

(f) The program and the media used must be as comprehensive as necessary to reach all areas in which the operator transports gas.

(g) The program must be conducted in English and in other languages commonly understood by a significant number and concentration of the non-English speaking population in the operator's area.

(h) Operators in existence on June 20, 2005, must have completed their written programs no later than June 20, 2006. As an exception, operators of petroleum gas or petroleum gas/air distribution systems having less than 25 customers must have completed development and documentation of their programs no later than June 20, 2007. The operator of a petroleum gas system covered under paragraph (j) of this section must complete development of its written procedure by June 13, 2008.

(i) The operator's program documentation and evaluation results must be available for periodic review by appropriate regulatory agencies.

(j) Unless the operator transports gas as a primary activity, the operator of a master meter or a petroleum gas system is not required to develop a public awareness program as prescribed in subdivisions (a) through (g) of this section. Instead the operator must develop and implement a written procedure to provide its customers public awareness messages twice annually. If the petroleum gas system is located on property the operator does not control, the operator must provide similar messages twice annually to persons controlling the property. The public awareness message must include:

- (1) A description of the purpose and reliability of the pipeline;
- (2) An overview of the hazards of the pipeline and prevention measures used;
- (3) Information about damage prevention;
- (4) How to recognize and respond to a leak; and
- (5) How to get additional information.

(k) In addition, the program shall include annual distribution of plain language literature, news releases and commercial messages to advise the public of the importance of the inspection and cleaning of flues and chimneys on a periodic basis, regardless of the fuel used (particularly whenever converting to gas usage), and to provide information on identifying symptoms of carbon monoxide exposure including recommended remedial measures.

.SO DOC 16B-255.619

NYCRR

255.619 Maximum allowable operating pressure: steel or plastic pipelines.

(a) Except as provided in subdivision (c) of this section, no person may operate a segment of steel or plastic pipeline at a pressure that exceeds the lowest of the following:

(1) the design pressure of the weakest element in the segment, determined in accordance with this Part;

(2) the pressure obtained by dividing the pressure to which the segment was tested after construction as follows:

(i) for plastic pipe in all locations, the test pressure is divided by a factor of 1.5;

(ii) for steel pipe operated at 100 PSIG (689 kPa) or more, the test pressure is divided by a factor determined in accordance with the following table:

Factors		
Installed	Installed	Converted

Class Location	before (Nov. 12, 1970)	after (Nov. 11, 1970)	under 255.14
1.....	1.1	1.1	1.25
2.....	1.25.....	1.25	1.25
3.....	1.4	1.5	1.5
4.....	1.4.....	1.5	1.5

(3) the highest actual operating pressure to which the segment was subjected during the five years preceding July 1, 1970, unless the segment was tested in accordance with section 255.505 or 255.507 of this Part during the five-year period or the segment was upgraded in accordance with section 255.555 or 255.557 of this Part; The MAOP must not exceed the MAOP on August 30, 2011 if the MAOP is determined using this method.

(4) for furnace butt welded steel pipe, a pressure equal to 60 percent of the mill test pressure to which the pipe was subjected;

(5) for steel pipe other than furnace butt welded pipe, a pressure equal to 85 percent of the highest test pressure to which the pipe has been subjected, whether by mill test or by post installation test; or

(6) the pressure determined by the operator to be the maximum safe pressure after considering the history of the segment, particularly known corrosion and the actual operating pressure.

(b) No person may operate a segment to which paragraph (a)(6) of this section is applicable, unless overpressure protective devices are installed on the segment in a manner that will prevent the maximum allowable operating pressure from being exceeded, in accordance with section 255.195 of this Part.

(c) Notwithstanding the other requirements of this section, an operator may operate a segment of pipeline found to be in satisfactory condition, considering its operating and maintenance history, at the highest actual operating pressure to which the segment was subjected during the five years preceding July 1, 1970, subject to the requirements of section 255.611 of this Part.

(d) Notwithstanding the limitation of paragraph (a) (3) of this section, an operator may maintain a previously established maximum allowable operating pressure for a cathodically protected steel or plastic pipeline provided that, when the pressure is increased above the highest pressure to which it has been subjected during the last five years, it is leakage surveyed and all leaks found are repaired in accordance with this Part.

.SO DOC 16B-255.621

NYCRR

255.621 Maximum allowable operating pressure: high-pressure

distribution systems.

(a) No person may operate a segment of a high-pressure distribution system at a pressure that exceeds the lowest of the following pressures, as applicable:

(1) the design pressure of the weakest element in the segment, determined in accordance with this Part;

(2) 60 PSIG (414 kPa), for a segment of a distribution system otherwise designated to operate at over 60 PSIG (414 kPa), unless the service lines in the segment are equipped with service regulators or other pressure limiting devices in series that meet the requirements of section 255.197(c) of this Part;

(3) 25 PSIG (172 kPa) in segments of cast iron pipe in which there are unreinforced bell and spigot joints;

(4) the pressure limits to which a joint could be subjected without the possibility of its parting; or

(5) the pressure determined by the operator to be the maximum safe pressure after considering the history of the segment, particularly known corrosion and the actual operating pressures.

(b) No person may operate a segment of pipeline to which paragraph (a) (5) of this section applies, unless overpressure protective devices are installed on the segment in a manner that will prevent the maximum allowable operating pressure from being exceeded, in accordance with section 255.195 of this Part.

.SO DOC 16B-255.623

NYCRR

255.623 Maximum and minimum allowable operating pressure: low-pressure distribution systems.

(a) No person may operate a low-pressure distribution system at a pressure high enough to make unsafe the operation of any connected and properly adjusted low-pressure gas burning equipment.

(b) No person may operate a low-pressure distribution system at a pressure lower than the minimum pressure at which the safe and continuing operation of any connected and properly adjusted low-pressure gas burning equipment can be assured.

(c) Each operator shall maintain a pressure throughout its low-pressure distribution systems, as measured at the consumer's end of the service line, of not less than 4 inches nor more than 12 inches of water column gauge.

(d) The maximum daily pressure variation shall not exceed a total range of 50 percent of the maximum gauge pressure experienced during the day at any point in the low-pressure distribution system, as measured at the consumer's end of the service line. Overpressure protection devices

may be set at levels above the normal maximum operating pressure. The capacity of overpressure protection devices shall be sufficient to prevent a pressure buildup in excess of two PSIG 14 (kPa) on the low-pressure distribution system.

.SO DOC 16B-255.625

NYCRR

255.625 Odorization of gas.

(a) All gas transported in transmission lines, and distribution mains operating at 125 PSIG (862 kPa) or more, except gas in route to storage fields via a transmission pipeline line that transported gas without an odorant from that line before May 5, 1975, is to be adequately odorized in compliance with subdivision 255.625 (c) of this section so as to render it readily detectable by the public and employees of the operator at all gas concentrations of one fifth of the lower explosive limit and above.

(b) All gas transported in distribution mains, except as provided for in subdivision (a) of this section, and service laterals is to be adequately odorized in compliance with subdivision (c) of this section so as to render it readily detectable by the public and employees of the operator at all gas concentrations of one tenth of the lower explosive limit and above.

(c) In the concentrations at which it is used, the odorant in combustible gases must comply with the following requirements:

(1) The odorant may not be deleterious to persons, materials or pipe.

(2) The products of combustion from the odorant may not be toxic when breathed nor may they be corrosive or harmful to those materials to which the products of combustion will be exposed.

(3) The odorant may not be soluble in water to an extent greater than 2.5 parts to 100 parts by weight.

(d) Odorization equipment must be designed and maintained so as to ensure the required odorant level in the gas under varying conditions. The equipment must be installed so that it does not cause a nuisance to nearby residents by the escape of odorant fumes.

(e) Each operator shall establish procedures to conduct periodic sampling of combustible gases to assure the proper concentration of odorant in accordance with this section. An appropriate record of all odorization practices shall be maintained.

(f) Every operator shall maintain records setting forth the types of odorizing equipment and odorants used, the ratios of odorant to gas, and the locations of odorization stations.

255.629 Purging of pipelines. All purging shall be carried out in accordance with Purging Principles and Practice (as described in section 10.3 of this Title), published by the American Gas Association, Inc.

.SO DOC 16B-255.631

NYCRR

255.631 Control room management.

(a) General.

(1) This section applies to each operator of a pipeline facility with a controller working in a control room who monitors and controls all or part of a pipeline facility through a SCADA system. Each operator must have and follow written control room management procedures that must implement the requirements of this section, except that for each control room where an operator's activities are limited to either or both of:

(i) Distribution with less than 250,000 services, or

(ii) Transmission without a compressor station, the operator must have and follow written procedures that implement only paragraphs (d) (regarding fatigue) and (i) (regarding compliance and deviations) of this section.

(2) The procedures required by this section must be integrated, as appropriate, with operating and emergency procedures required by sections 255.605 and 255.615. An operator must develop the procedures no later than August 1, 2011 and must implement the procedures according to the following schedule. The procedures required by paragraphs (b), (c)(5), (d)(2) and (d)(3), (f) and (g) of this section must be implemented no later than October 1, 2011. the procedures required by paragraphs (c)(1) through (4), (d)(1), (d)(4) and (e) of this section must be implemented no later than August 1, 2012. The training procedures required by paragraph (h) of this section must be implemented no later than August 1, 2012, except that any training required by another paragraph of this section must be implemented no later than the deadline for that paragraph.

(b) Roles and responsibilities. Each operator must define the roles and responsibilities of a controller during normal, abnormal, and emergency operating conditions. To provide for a controller's prompt and appropriate response to operating conditions, an operator must define each of the following:

(1) A controller's authority and responsibility to make decisions and take actions during normal operations;

(2) A controller's role when an abnormal operating condition is detected, even if the controller is not the first to detect the

condition, including the controller's responsibility to take specific actions and to communicate with others;

(3) A controller's role during an emergency, even if the controller is not the first to detect the emergency, including the controller's responsibility to take specific actions and to communicate with others;

(4) A method of recording controller shift-changes and any hand-over of responsibility between controllers; and

(5) The roles, responsibilities and qualifications of others with the authority to direct or supersede the specific technical actions of a controller.

(c) Provide adequate information. Each operator must provide its controllers with the information, tools, processes and procedures necessary for the controllers to carry out the roles and responsibilities the operator has defined by performing each of the following:

(1) Implement sections 1, 4, 8, 9, 11.1, and 11.3 of API RP 1165 (as described in Section 10.3 of this Title), whenever a SCADA system is added, expanded or replaced, unless the operator demonstrates that certain provisions of sections 1, 4, 8, 9, 11.1, and 11.3 of API RP 1165 are not practical for the SCADA system used;

(2) Conduct a point-to-point verification between SCADA displays and related field equipment when field equipment is added or moved and when other changes that affect pipeline safety are made to field equipment of SCADA displays;

(3) Test and verify an internal communication plan to provide adequate means for manual operation of the piping safely, at least once each calendar year, but at intervals not to exceed 15 months;

(4) Test any backup SCADA systems at least once each calendar year, but at intervals not to exceed 15 months; and

(5) Establish and implement procedures for when a different controller assumes responsibility, including the content of information to be exchanged.

(d) Fatigue mitigation. Each operator must implement the following methods to reduce the risk associated with controller fatigue that could inhibit a controller's ability to carry out the roles and responsibilities the operator has defined:

(1) Establish shift lengths and schedule rotations that provide controllers off-duty time sufficient to achieve eight hours of continuous sleep;

(2) Educate controllers and supervisors in fatigue mitigation strategies and how off-duty activities contribute to fatigue;

(3) Train controllers and supervisors to recognize the effects of fatigue; and

(4) Establish a maximum limit on controller hours-of-service, which may provide for an emergency deviation from the maximum limit if necessary for the safe operation of a pipeline facility.

(e) Alarm management. Each operator using a SCADA system must have a written alarm management plan to provide for effective controller response to alarms. An operator's plan must include provisions to:

(1) Review SCADA safety-related alarm operations using a process that ensures alarms are accurate and support safe pipeline operations;

(2) Identify at least once each calendar month points affecting safety that have been taken off scan in the SCADA host, have had alarms inhibited, generated false alarms, or that have had forced or manual values for periods of time exceeding that required for associated maintenance or operating activities;

(3) Verify the correct safety-related alarm set-point values and alarm descriptions at least once each calendar year, but at intervals not to exceed 15 months;

(4) Review the alarm management plan required by this paragraph at least once each calendar year, but at intervals not exceeding 15 months, to determine the effectiveness of the plan;

(5) Monitor the content and value of general activity being directed to and required of each controller at least once each calendar year, but at intervals not to exceed 15 months, that will assure controllers have sufficient time to analyze and react to incoming alarms; and

(6) Address deficiencies identified through the implementation of paragraphs (e)(1) through (e)(5) of this section.

(f) Change management. Each operator must assure that changes that could affect control room operations are coordinated with the control room personnel by performing each of the following:

(1) Establish communications between control room representatives, operator's management, and associated field personnel when planning and implementing physical changes to pipeline equipment or configuration;

(2) Require its field personnel to contact the control room when emergency conditions exist and when making field changes that affect control room operations; and

(3) Seek control room or control room management participation in planning prior to implementation of significant pipeline hydraulic or configuration changes.

(g) Operating experience. Each operator must assure that lessons learned from its operating experience are incorporated, as appropriate,

into its control room management procedures by performing each of the following:

(1) Review incidents that must be reported pursuant to 49 CFR part 191 to determine if control room actions contributed to the event and, if so, correct, where necessary, deficiencies related to:

- (i) Controller fatigue;
- (ii) Field equipment;
- (iii) The operation of any relief device;
- (iv) Procedures;
- (v) SCADA system configuration; and
- (vi) SCADA system performance.

(2) Include lessons learned from the operator's experience in the training program required by this section.

(h) Training. Each operator must establish a controller training program and review the training program content to identify potential improvements at least once each calendar year, but at intervals not to exceed 15 months. An operator's program must provide for training each controller to carry out the roles and responsibilities defined by the operator. In addition, the training program must include the following elements:

(1) Responding to abnormal operating conditions likely to occur simultaneously or in sequence;

(2) Use of a computerized simulator or non-computerized (tabletop) method for training controllers to recognize abnormal operating conditions;

(3) Training controllers on their responsibilities for communication under the operator's emergency response procedures;

(4) Training that will provide a controller a working knowledge of the pipeline system, especially during the development of abnormal operating conditions;

(5) For pipeline operating setups that are periodically, but infrequently used, providing an opportunity for controllers to review relevant procedures in advance of their application; and

(6) Control room team training and exercises that include both controllers and other individuals, defined by the operator, who would reasonably be expected to operationally collaborate with controllers (control room personnel) during normal, abnormal or emergency situations. Operators must comply with the team training requirements under this subdivision by no later than January 23, 2018.

(i) Compliance and deviations. An operator must maintain for review during inspection:

(1) Records that demonstrate compliance with the requirements of this section; and

(2) Documentation to demonstrate that any deviation from the procedures required by this section was necessary for the safe operation of a pipeline facility.

.SO DOC 16B-255.701 NYCRR
255.701 Scope.

Sections 255.703 through 255.757 of this Part prescribe minimum requirements for maintenance of pipeline facilities.

.SO DOC 16B-255.703 NYCRR
255.703 General.

(a) No person may operate a segment of pipeline, unless it is maintained in accordance with this Part.

(b) Each segment of pipeline that becomes unsafe must be replaced, repaired or removed from service.

(c) The provisions of: sections 255.705, 255.706, 255.709, 255.711, 255.713, 255.715, 255.717 and 255.719 of this Part shall pertain, as applicable, to all transmission lines, and all distribution mains operating at 125 PSIG (862 kPa) or more in Class 3 and 4 locations.

.SO DOC 16B-255.705 NYCRR
255.705 Transmission lines: patrolling.

(a) Each operator shall have a patrol program to observe surface conditions on and adjacent to transmission line rights-of-way, and distribution line rights-of-way where the distribution line operates at 125 PSIG (862 kPa) or more in a Class 3 or 4 location, for indications of leaks, construction activity, and other factors affecting safety and operation.

(b) The frequency of patrols is determined by the size of the line, the operating pressures, the class location, terrains, weather, and other relevant factors, but intervals between patrols may not be longer than prescribed in the following tables:

		Maximum interval between patrols	
Class	location	At highway and	At all other locations
	of line	railroad crossings	
1,2.....		7 1/2 months; but at least twice each calendar year.	15 months; but at least once each calendar year.
3		4 1/2 months; but at least four times each calendar year.	7 1/2 months; but at least twice each calendar year.

4.....4 1/2 months; but
at least four times
each calendar year.

4 1/2 months; but
at least four times
each calendar year.

.SO DOC 16B-255.706

NYCRR

255.706 Transmission lines: leakage surveys.

(a) A leakage survey of each transmission line, and distribution main operating at 125 PSIG (862 kPa) or more in a Class 3 or 4 location, must be conducted at intervals not exceeding 15 months, but at least once each calendar year.

(b) Leaks located shall be investigated promptly, and necessary action shall be taken in accordance with sections 255.805 and 255.807 of this Part.

.SO DOC 16B-255.707

NYCRR

255.707 Line markers for mains and transmission lines. (a) Except as provided in subdivision (b) of this section, a line marker must be placed and maintained as close as practical over each buried main and transmission line:

(1) at each crossing of a public road, railroad and navigable waterway; and

(2) wherever else necessary to identify the location of the main or transmission line to reduce the possibility of damage or interference.

(b) Line markers are not required for buried mains in Class 3 or 4 locations where a damage prevention program is in effect under section 255.614 of this Part. Line markers are not required for buried transmission lines in Class 3 or 4 locations where placement of a marker is impractical.

(c) Line markers must be placed and maintained along each section of a main and transmission line that is located aboveground in an area accessible to the public.

(d) The following must be written legibly on a background of sharply contrasting color on each line marker other than at navigable waterways:

(1) the word "Warning," "Caution" or "Danger" followed by the words "Gas" (or name of gas transported) "Pipeline," all of which, except for markers in heavily developed urban areas, must be in letters at least one inch high with one-quarter inch stroke; and

(2) the name of the operator and a telephone number (including area code) where the operator can be reached at all times.

(e) Each line marker at a navigable waterway shall have the following characteristics:

(1) a sign, rectangular in shape, with a narrow strip along each edge colored international orange and the area between lettering on the sign

and boundary strips colored white;

(2) written on the sign in block style, black letters the word "Warning," "Caution" or "Danger" followed by the words "Do not anchor or dredge" and the words "Gas Pipeline Crossing";

(3) the name of the operator and the telephone number (including area code) where the operator can be reached at all times; and

(4) in overcast daylight, the sign is visible and the writing required by paragraph (2) of this subdivision is legible, from approaching or passing vessels that may damage or interfere with the pipeline.

.SO DOC 16B-255.709

NYCRR

255.709 Transmission lines: recordkeeping.

Each operator shall keep records covering each leak discovered, repair made, and line break for as long as the segment of transmission line, or distribution main operating at 125 PSIG (862 kPa) or more in a Class 3 or 4 location, involved remains in service. (See section 255.17 of this Part.)

.SO DOC 16B-255.711

NYCRR

255.711 Transmission lines: general requirements for repair procedures.

(a) Temporary repairs. Each operator must take immediate temporary measures to protect the public whenever:

(1) a leak, imperfection, or damage that impairs its serviceability is found in a segment of steel transmission line, or distribution main operating at 125 PSIG (862 kPa) or more in a Class 3 or 4 location; and

(2) it is not feasible to make a permanent repair at the time of discovery.

(b) Permanent repairs. An operator must make permanent repairs on its pipeline system according to the following:

(1) Non integrity management repairs: The operator must make permanent repairs as soon as feasible.

(2) Integrity management repairs: When an operator discovers a condition on a pipeline covered under Subpart O-Gas Transmission Pipeline Integrity Management, the operator must remediate the condition as prescribed by paragraph 255.933(d).

(c) Welded patch. Except as provided in paragraph 255.717(b)(3), no operator may use a welded patch as a means of repair.

.SO DOC 16B-255.713

NYCRR

255.713 Transmission lines: permanent field repair of imperfections and damages.

(a) Each imperfection or damage that impairs the serviceability of a segment of steel transmission line, or distribution main operating at

125 PSIG (860 kPa) or more in a Class 3 or 4 location, must be repaired according to the following requirements:

(1) If it is feasible to take the segment out of service, the imperfection or damage must be removed by cutting out a cylindrical piece of pipe and replacing it with pipe of similar or greater design strength.

(2) If it is not feasible to take the segment out of service, the imperfection or damage must be repaired by a method that reliable engineering tests and analyses show can permanently restore the serviceability of the pipe.

(b) If the segment is not taken out of service, the operating pressure must be reduced to a safe level during the repair operations.

.SO DOC 16B-255.715

NYCRR

255.715 Transmission lines: permanent field repair of welds.

Each weld that is unacceptable under section 255.241(c) of this Part must be repaired according to the following requirements:

(a) If it is feasible to take the segment of transmission line, or distribution main operating at 125 PSIG (862 kPa) or more in a Class 3 or 4 location, out of service, the weld must be repaired in accordance with the applicable requirements of section 255.245 of this Part.

(b) A weld may be repaired in accordance with section 255.245 of this Part while the segment is in service if:

- (1) the weld is not leaking;
- (2) the pressure in the segment is reduced so that it does not produce a stress that is more than 20 percent of SMYS; and
- (3) grinding of the defective area can be limited so that at least 1/8-inch thickness in the pipe weld remains.

(c) A defective weld which cannot be repaired in accordance with subdivision (a) or (b) of this section must be repaired by installing a full encirclement welded split sleeve of appropriate design.

.SO DOC 16B-255.717

NYCRR

255.717 Transmission lines: permanent field repair of leaks.

Each permanent field repair of a leak on a transmission line, or distribution main operating at 125 PSIG (862 kPa) or more in a Class 3 or 4 location, must be made according to the following requirements:

(a) If feasible, the segment must be taken out of service and repaired by cutting out a cylindrical piece of pipe and replacing it with pipe of similar or greater design strength.

(b) If it is not feasible to take the segment out of service, repairs must be made by one of the following methods:

- (1) Install a full encirclement welded split sleeve of appropriate

design.

(2) If the leak is due to a corrosion pit, the repair may be made by installing a properly designed bolt-on-leak clamp; if the leak is due to a corrosion pit and is on pipe with a SMYS of not more than 40,000 psi (267 MPa), the repair may be made by fillet welding a steel plate patch with rounded corners, of the same or greater thickness than the pipe, and not more than one-half of the diameter of the pipe in size.

(3) Apply a method that reliable engineering tests and analyses show can permanently restore the serviceability of the pipe.

.SO DOC 16B-255.719

NYCRR

255.719 Transmission lines: testing of repairs.

(a) If a segment of transmission line, or distribution main operating at 125 PSIG (862 kPa) or more in a Class 3 or 4 location, is repaired by cutting out the damaged portion of the pipe as a cylinder, the replacement pipe must be tested to the pressure required for a new line installed in the same location. This test may be made on the pipe before it is installed provided nondestructive tests meeting the requirements of section 255.243 of this Part are made on all field girth butt welds after installation.

(b) Emergency pipe when retained in stock shall be tested before storage at 90 percent of SMYS or one and one-half times the certified operating pressure, whichever is less. Such pipe shall be appropriately marked and test records retained.

(c) Each repair made by welding in accordance with sections 255.713, 255.715 and 255.717 of this Part must be examined in accordance with section 255.241 of this Part.

.SO DOC 16B-255.721

NYCRR

255.721 Distribution systems: patrolling.

(a) The frequency of patrolling mains must be determined by the severity of the conditions which could cause failure or leakage, and the consequent hazards to public safety.

(b) Mains in places or on structures where anticipated physical movement or external loading could cause failure or leakage must be patrolled at intervals not exceeding 4 1/2 months, but at least four times each calendar year.

(c) Distribution lines operating at 125 PSIG (862 kPa) or more in Class 3 and 4 locations must comply with the transmission patrolling requirements in section 255.705 of this Part.

.SO DOC 16B-255.723

NYCRR

255.723 Distribution systems: leakage surveys and procedures.

(a) Each operator of a distribution system shall provide for periodic

leakage surveys in its operating and maintenance plan. Leaks located by these surveys shall be investigated promptly and necessary action shall be taken in accordance with sections 255.805 and 255.807 of this Part.

(b) The type and scope of the leakage control program must be determined by the nature of the operations and the local conditions, but it must meet the following minimum requirements.

(1) A leakage survey with leak detector equipment shall be conducted at intervals not exceeding 15 months, but at least once each calendar year, in business districts within the operator's gas franchise area including tests of the atmosphere of gas, electric, telephone, sewer, and water system manholes, at cracks in pavement, at the curblines, in the sidewalk, and at other locations providing an opportunity for finding gas leaks.

(2) Leakage surveys of the distribution system outside of business districts, must be made as frequently as necessary, but at least once every 5 calendar years at intervals not exceeding 63 months.

(3) If the operator employs leakage history to determine areas of active corrosion, the leakage survey frequency shall at least once every 3 calendar years at intervals not exceeding 39 months on mains and service lines.

(c) Distribution lines operating at 125 PSIG (862 kPa) or more and located in Class 3 and 4 locations must comply with the transmission line leakage survey requirements in section 255.706 of this Part.

.SO DOC 16B-255.725

NYCRR

255.725 Test requirements for reinstating service lines. (a) Except as provided in subdivision (e) of this section, each disconnected service line must be tested in accordance with this section before being reinstated; however, if provisions are made to maintain continuous service, such as by installation of a bypass, any part of the original service line used to maintain continuous service need not be tested. The limits of the test shall be in accordance with section 255.511(g) of this Part.

(b) For each service line to be operated at a pressure of not more than 20 PSIG (138 kPa), the test pressure shall be 50 PSIG (345 kPa) or three times the maximum allowable operating pressure, whichever is greater.

(c) For each service line to be operated at more than 20 PSIG (138 kPa) but not more than 60 PSIG (414 kPa), the test pressure shall be 90 PSIG (621 kPa).

(d) For each service line to be operated at more than 60 PSIG (414 kPa), the test pressure shall be 1.5 times the maximum allowable

operating pressure.

(e) All exposed connections on low-pressure service lines temporarily disconnected from the main because of main renewals or other planned work shall be soap-tested at operating pressure and the entire service line shall be checked for leakage with a combustible gas indicator both at the time of turn on and on the following day.

.SO DOC 16B-255.726

NYCRR

255.726 Inactive service lines.

(a) All inactive service lines, including stubs, must be inspected, leakage surveyed and maintained according to the applicable provisions of this Part.

(b) Inactive steel service lines not under cathodic protection, including stubs, may remain under the conditions established by section 255.727(d) of this Part for a period of not more than six years subject to the following conditions:

(1) During the third year of inactivity, the operator must conduct a survey for potential future use and, if there is no definite plan for future use, disconnect the service at the main or in compliance with subdivision (d) of this section, purge the service and seal the open end.

(2) In active service lines for which there is a definite plan for future use may remain under the conditions established by section 255.727(d) of this Part for an additional three-year period provided the operator either reactivates the service or disconnects the service at the main or in compliance with subdivision (d) of this section, purges the service and seals the open ends by the end of the sixth year of inactivity.

(c) Whenever the service connection to the main is located under pavement, an inactive service line may be disconnected in an unpaved area but no closer than 10 feet (3 meters) to the building subject to the following requirements:

(1) Records of inactive service stubs shall be maintained and the locations of these facilities shall be clearly noted on maps or records of the gas distribution system. This information will be used in marking these facilities prior to third-party excavation activities and for use in leakage survey and leakage investigation procedures.

(2) Any steel service stub shall have an appropriately sized sacrificial anode attached consistent with good cathodic protection practices.

(d) Whenever an inactive service line or service stub is exposed at the main in association with other operation, maintenance, or

construction activities, it must be disconnected at the main, purged, and the open end sealed unless there is a definite plan for future use.

(e) Whenever an inactive service line or service stub is found to be leaking or is damaged, it must be disconnected at the main, purged, and the open end sealed.

.SO DOC 16B-255.727

NYCRR

255.727 Abandonment or inactivation of facilities.

(a) Each operator shall provide in its operating and maintenance plan for abandonment or deactivation of pipelines, including provisions for meeting each of the requirements of this section.

(b) Each pipeline abandoned in place must be disconnected from all sources and supplies of gas; purged of gas; and sealed at the ends except that the pipeline need not be purged when the volume of gas is so small that there is no potential hazard.

(c) Except for service lines, each inactive pipeline that is not being maintained under this Part must be disconnected from all sources and supplies of gas; purged of gas; and sealed at the ends except that the pipeline need not be purged when the volume of gas is so small that there is no potential hazard.

(d) Whenever service to a customer is discontinued, one of the following apply:

(1) The valve that is closed to prevent the flow of gas to the customer must be provided with a locking device or other means designed to prevent the opening of the valve by persons other than those authorized by the operator.

(2) A mechanical device or fitting that will prevent the flow of gas must be installed in the service line or in the meter assembly.

(3) The customer's piping must be physically disconnected from the gas supply and the open pipe ends sealed.

(e) If air is used for purging, the operator shall ensure that a combustible mixture is not present after purging.

(f) Each abandoned vault must be filled with a suitable compacted material.

(g) For each abandoned pipeline facility that crosses over, under or through a commercially navigable waterway, the last operator of that facility shall file a report upon abandonment of that facility in accordance with 49 CFR 192.727(g) (as described in section 10.2 of this Title).

.SO DOC 16B-255.729

NYCRR

255.729 Compressor stations: procedures for gas compressor units. Each operator shall establish starting, operating, and shutdown procedures

for gas compressor units.

.SO DOC 16B-255.731

NYCRR

255.731 Compressor stations: inspection and testing of relief devices.

(a) Except for rupture discs, each pressure relieving device in a compressor station must be inspected and tested in accordance with sections 255.739 and 255.743 of this Part, and must be operated periodically to determine that it opens at the correct set pressure.

(b) Any defective or inadequate equipment found must be promptly repaired or replaced.

(c) Each remote control shutdown device must be inspected and tested at intervals not exceeding 15 months, but at least once each calendar year, to determine that it functions properly.

.SO DOC 16B-255.732

NYCRR

255.732 Compressor stations: additional inspections. (a) All stations shall be inspected for excessive vibration in control piping. All suspect configurations shall be corrected promptly.

(b) All automatic combustible gas alarm and automatic shut-off valve systems in compressor stations shall be inspected weekly.

.SO DOC 16B-255.733

NYCRR

255.733 Compressor stations: isolation of equipment for maintenance or alterations. Each operator shall establish procedures for maintaining compressor stations, including provisions for isolating units or sections of pipe and for purging before returning to service.

.SO DOC 16B-255.735

NYCRR

255.735 Compressor stations: storage of combustible materials.

(a) Flammable or combustible materials in quantities beyond those required for everyday use, or other than those normally used in compressor buildings, must be stored a safe distance from the compressor building.

(b) Above ground oil or gasoline storage tanks must be protected in accordance with NFPA-30 (as described in section 10.3 of this Title).

.SO DOC 16B-255.736

NYCRR

255.736 Compressor stations: Gas detection.

(a) Each compressor building in a compressor station must have a fixed gas detection and alarm system, unless the building is:

(1) constructed so that at least 50 percent of its upright side area is permanently open; or

(2) located in an unattended field compressor station of 1,000 horsepower (746kW) or less.

(b) Except where shutdown of the system is necessary for maintenance under subdivision (c) of this section, each gas detection and alarm

system required by this section must:

(1) continuously monitor the compressor building for a concentration of gas in air of not more than 25 percent of the lower explosive limit; and

(2) if that concentration of gas is detected, warn persons about to enter the building and persons inside the building of the danger.

(c) Each gas detection and alarm system required by this section must be maintained to function properly. The maintenance must include performance tests.

.SO DOC 16B-255.737

NYCRR

255.737 Pipe-type and bottle-type gas holders. Whenever a pipe-type or bottletype gas holder is found, it shall be removed or abandoned unless specific approval is granted for its continued use.

.SO DOC 16B-255.739

NYCRR

255.739 Pressure-limiting and -regulating stations: inspection and testing.

(a) Each pressure-limiting station, relief device (except rupture discs), and pressure-regulating station and its equipment must be subjected, at intervals not exceeding 15 months, but at least once each calendar year, to inspections and tests to determine that:

(1) it is in good mechanical condition;

(2) it is adequate from the standpoint of capacity and reliability of operation for the service in which it is employed;

(3) except as provided in subdivision (b) of this section, it is set to function at the correct pressure consistent with the pressure limits of section 255.201(b) of this part; and

(4) it is properly installed and protected from dirt, liquids or other conditions that might prevent proper operation.

(b) For steel pipelines whose MAOP is determined under section 192.619(c) of this Part, if the MAOP is 60 psi (414 kPa) gage or more, the control or relief pressure limit is as follows:

If the MAOP produces a hoop stress that is:

Greater than 72 percent of SMYS Then the pressure limit is: MAOP plus 4 percent.

SMYS

Unknown as a percentage of SMYS A pressure that will prevent unsafe operation of the pipeline considering its operating and maintenance history and MAOP.

(c) If during the annual or any other regulating station inspection,

the inspector finds that the regulator is not adequately protected from dirt or liquids, or does not respond properly to performance tests, an internal inspection shall be conducted and parts thereof overhauled to the extent necessary.

(d) The operating condition of all operating pressure regulator stations except field regulators shall be inspected at least once each month. Such inspection shall include proper tests for gas leaks. A test with a combustible gas indicating instrument shall be conducted in all operating regulator stations contained in vaults, pits or other enclosed below grade and any unventilated aboveground building areas.

(e) All stations shall be inspected periodically for excessive vibration in control piping. All suspect configuration shall be corrected promptly.

(f) All combustible gas alarm systems shall be inspected in accordance with the manufacturer's recommended instructions.

.SO DOC 16B-255.740

NYCRR

255.740 Pressure regulating, limiting, and overpressure protection - Individual service lines directly connected to production, gathering, or transmission pipelines.

(a) This section applies, except as provided in subdivision (c) of this section, to any service line directly connected to a production, gathering, or transmission pipeline that is not operated as part of a distribution system.

(b) Each pressure regulating or limiting device, relief device (except rupture discs), automatic shutoff device, and associated equipment must be inspected and tested at least once every three calendar years, not exceeding 39 months, to determine that it is:

- (1) In good mechanical condition;
- (2) Adequate from the standpoint of capacity and reliability of operation for the service in which it is employed;
- (3) Set to control or relieve at the correct pressure consistent with the pressure limits of section 255.197 of this Part; and to limit the pressure on the inlet of the service regulator to 60 psi (414kPa) gauge or less in case the upstream regulator fails to function properly; and
- (4) Properly installed and protected from dirt, liquids, or other conditions that might prevent proper operation.

(c) This section does not apply to equipment installed on service lines that only serve engines that power irrigation pumps.

.SO DOC 16B-255.741

NYCRR

255.741 Pressure-limiting and -regulating stations: telemetering or recording gauges.

(a) Each distribution system supplied by more than one district pressure-regulating station must be equipped with telemetering or recording pressure gauges to indicate the gas pressure in the district.

(b) On distribution systems supplied by a single district pressure-regulating station, the operator shall determine the necessity of installing telemetering or recording gauges in the district, taking into consideration the number of customers supplied, the operating pressures, the capacity of the installation, and other operating conditions.

(c) For low-pressure distribution systems, the telemetering or recording pressure gauges are to be located at, or near each district regulator outlet and the probable locations of minimum pressures in each part of the system.

(d) The accuracy of each recording pressure gauge provided and maintained by each operator at the locations required herein shall be tested at intervals not exceeding 15 months, but at least once each calendar year. The results of the tests shall be recorded.

(e) Each chart removed from a recording pressure gauge shall be reviewed for indications of abnormally high or low pressure. If there are indications of abnormally high or low pressure, the regulator and the auxiliary equipment must be inspected and the necessary measures taken to correct any unsatisfactory operating conditions.

(f) Each chart removed from a recording pressure gauge shall be marked with the name of the operator, the location of the gauge, the date that it was placed upon the gauge, and the date that it was removed from the gauge prior to its filing.

.SO DOC 16B-255.743

NYCRR

255.743 Pressure-limiting and -regulating stations: testing relief device. (a) Overpressure protection devices shall be tested in place annually to determine if they are in proper working condition. They are to be subjected to such maintenance and overhaul as may be indicated by said tests. Overpressure protection devices used solely for the protection of "fuel piping" as, for example, to compressors at the compressor stations, shall be tested and inspected in like manner.

(b) Nonworking monitoring regulator equipment shall be subject to an annual performance test and shall be internally inspected and overhauled if so required by the results of the test.

(c) An annual review of the required capacity of the relieving equipment at each station shall be made and these required capacities compared with the calculated or experimentally determined recorded relieving capacity of the installed equipment for the operating

conditions under which it works.

(d) If the relieving equipment is of insufficient capacity, a new or additional device shall be installed to provide the additional capacity required or the station regulator capacity reduced commensurate with the existing relief capacity.

.SO DOC 16B-255.744

NYCRR

255.744 Service regulators and vents: inspection. (a) Each operator shall inspect each service regulator when it is installed, at the time of periodic meter change, and at the time a service which has been inactive for a period of two years or more is reactivated to service.

(b) An operator may elect to inspect service regulators at intervals not to exceed 20 years in lieu of inspection at the time of periodic meter change.

(c) Service regulators serving multiple meter installations need not be inspected at the time of each individual meter change, however, each associated regulator shall be inspected at least once each 20 years.

(d) The inspection of the service regulator shall include the following tests:

(1) An outlet pressure test shall be taken under minimum load conditions. Minimum load condition, for purposes of this paragraph, shall mean no load or pilot load only. The pressure limits of this test shall be as established by this Part.

(2) The operational pressure test shall be taken on the outlet side of the regulator with one or more appliances in operation. The acceptable limits of pressure shall be as established by this Part.

(e) Each operator shall inspect each service regulator associated vent whenever the service regulator is inspected. This inspection shall include a test for the presence of gas, proper location of vent terminus, proper size, and proper installation of a weather-insect resistant fitting and verification by an inside the building inspection that the vent line piping is continuous and is properly connected to the regulator. Immediate remedial action shall be taken if any of these items do not pass inspection.

.SO DOC 16B-255.745

NYCRR

255.745 Valve maintenance: transmission lines.

(a) Each transmission line valve must be inspected and partially operated at intervals not exceeding 15 months, but at least once each calendar year.

(b) Each operator must take prompt remedial action to correct any valve found inoperable.

(c) The location of all valves in transmission lines shall be

designated on appropriate records, drawings or maps in relation to aboveground structures, so that the valves and associated access covers can be readily located when the ground is covered with snow and ice. Since there may be changes or alterations in aboveground structures over a period of time, the accuracy of the reference points established shall be verified at the time of the periodic inspection.

(d) At the time of the periodic inspection, valves will be checked for external leakage.

.SO DOC 16B-255.747

NYCRR

255.747 Valve maintenance: distribution systems.

(a) Each valve, the use of which may be necessary for the safe shutdown or sectionalization of a distribution system, must be inspected and partially operated at intervals not exceeding 15 months, but at least once each calendar year. Included are the principal shut-off valves at district regulator stations and pressure-limiting devices.

(b) Each operator must take prompt remedial action to correct any valve found inoperable, unless the operator designates an alternative valve.

(c) The location of all valves in distribution systems that may be required during an emergency shall be designated on appropriate records, drawings or maps, in relation to aboveground structures, so that the valves and associated access covers can be readily located when the ground is covered with snow and ice. Since there may be changes or alterations in aboveground structures over a period of time, the accuracy of the reference points established shall be verified at the time of the periodic inspection.

(d) At the time of the periodic inspection, valves will be checked for external leakage.

.SO DOC 16B-255.748

NYCRR

255.748 Valve maintenance: service line valves.

(a) Except as provided in subdivision (b) of this section, buried high-pressure service line valves or exposed exterior high-pressure service line valves shall be inspected in conjunction with the service regulator inspection required under section 255.744 of this Part.

(b) Buried service line valves used for compliance with section 255.365(b)(2) of this Part shall be inspected at intervals not exceeding 15 months, but at least once each calendar year, for accessibility, key alignment and external leakage.

(c) Each buried service line valve inspection shall determine accessibility, key alignment and tests for external leakage. Each exposed exterior service line valve shall be inspected for accessibility

and external leakage.

.SO DOC 16B-255.749

NYCRR

255.749 Vault maintenance.

(a) Each vault housing pressure-regulating and pressure-limiting equipment, and having a volumetric internal content of 200 cubic feet (5.66 cubic meters) or more, must be inspected at intervals not exceeding 15 months, but at least once each calendar year, to determine that it is in good physical condition and adequately ventilated.

(b) If gas is found in the vault, the equipment in the vault must be inspected for leaks, and any hazardous leaks found must be repaired immediately.

(c) The ventilating equipment must also be inspected to determine that it is functioning properly.

(d) Each vault cover must be inspected to assure that it does not present a hazard to public safety.

.SO DOC 16B-255.751

NYCRR

255.751 Prevention of accidental ignition. Each operator shall take the following minimum steps to minimize the danger of accidental ignition of gas in any structure or area where the presence of gas constitutes a hazard of fire or explosion.

(a) When a hazardous amount of gas is being vented into open air, each potential source of ignition must be removed from the area and a fire extinguisher must be provided.

(b) Gas or electric welding or cutting may not be performed on pipe or on pipe components that contain a combustible mixture of gas and air in the area of work.

(c) Warning signs are to be posted where appropriate.

(d) Precautions to prevent uncontrolled or unsafe static electric discharges from plastic pipe are to be taken.

.SO DOC 16B-255.753

NYCRR

255.753 Caulked bell and spigot joints.

(a) Each cast iron caulked bell and spigot joint that is subject to pressures of 25 psig (172kPa) or more must be sealed with a material or device which:

(1) does not reduce the flexibility of the joint;

(2) permanently bonds, either chemically, mechanically or both, with the bell and spigot metal surfaces or adjacent pipe metal surfaces; and

(3) seals and bonds in a manner that meets the strength, environmental, and chemical compatibility requirements of subdivisions 255.53 (a) and (b) and section 255.143 of this Part.

(b) Each cast iron caulked bell and spigot joint that is exposed for

any reason, must be sealed by a means other than caulking.

.SO DOC 16B-255.755

NYCRR

255.755 Protecting cast iron pipelines. When an operator has knowledge that the support for a segment of a buried cast iron pipeline is disturbed, the following actions must be taken.

(a) That segment of the pipeline must be protected, as necessary, against damage during the disturbance by:

- (1) vibrations from heavy construction equipment, trains, trucks, buses or blasting;
- (2) impact forces by vehicles;
- (3) earth movement;
- (4) apparent future excavations near the pipeline; or
- (5) other foreseeable outside forces which may subject that segment of the pipeline to bending stress.

(b) As soon as feasible, appropriate steps must be taken to provide permanent protection for the disturbed segment from damage that might result from external loads, including compliance with applicable requirements of sections 255.317, 255.319 and 255.361(b)-(d) of this Part.

.SO DOC 16B-255.756

NYCRR

255.756 Replacement of exposed or undermined cast iron piping.

(a) When any cast iron pipe, eight inches or less in nominal diameter, has been or will be exposed and undermined by an excavation 36 inches (914 millimeters) or greater in width, the purpose of which is for work other than normal gas operation and maintenance work being performed on the exposed cast iron main, one of the following actions must be taken in the listed order of preference:

- (1) the cast iron main is to be replaced prior to the third-party construction activity occurring; or
- (2) the cast iron main is to be surveilled for leakage daily until the contractor allows access to the excavation area for replacement. After access is allowed, the operator is to immediately replace the affected cast iron main or maintain daily surveillance with an open vent hole and replace the cast iron main as soon as practical.

(b) For right angle crossings of cast iron mains, the length replaced shall be equal to at least the width of the excavation plus twice the distance from the top of the main to the bottom of the trench.

(c) For crossings of cast iron mains at other than right angles, the length of the replacement shall be increased so that all cast iron pipe will be removed from within the trench settlement area under the gas main, assuming an angle of repose of 45 degrees from the bottom of the

trench.

(d) Where replacement of cast iron main is required it shall extend approximately equally on both sides of said excavations.

.SO DOC 16B-255.757

NYCRR

255.757 Replacement of cast iron mains paralleling excavations. (a) If an excavation is made parallel to any cast iron gas main, eight inches or less in nominal diameter, and said excavation is not adequately shored to protect the cast iron main against movement, the cast iron main must be replaced where more than half the pipe diameter lies above a line projected at an angle above the horizontal equal to the angle of repose for the soil conditions being encountered, starting from the bottom of the excavation at the side nearest the main.

(b) Replacement is to be completed prior to the third-party construction activity, if possible. Otherwise, replacement is to commence immediately after the contractor allows access to the excavation area for replacement and the area is to be maintained under daily leakage survey until replacement is complete.

.SO DOC 16B-255.801

NYCRR

255.801 Reports of accidents.

(a) Each operator shall report all accidents where gas facilities may be involved, which cause injury or death to any person or damage to property, or could cause concern because of coverage by news media.

(b) All incidents involving carbon monoxide (CO) that result in an investigation by the company shall also be reported.

(c) All such accidents and CO incidents shall be immediately reported by telephone through the gas emergency notification system.

(d) Within 30 days written account shall be submitted for each incident that involved gas facilities and:

(1) a death, or personal injury necessitating inpatient hospitalization; or

(2) estimated property damage, including cost of gas lost, of the operator, or others, or both, of \$50,000 or more.

(e) This report shall set forth a chronological sequence of events including a detailed description of the:

(1) accident (incident);

(2) response, action and investigation by the operator; and

(3) results and findings of the investigations.

(f) Such written account for a CO incident shall only be required when it resulted in either an injury or fatality.

(g) Where applicable, a copy of the report sent to the Office of Pipeline Safety, United States Department of Transportation shall be

submitted by the operator.

.SO DOC 16B-255.803

NYCRR

255.803 Emergency lists of operator personnel. Each operator shall submit a list during January of each year indicating the names, addresses, and home and business telephone numbers of responsible officials who may be contacted in the event of an emergency. The list shall also be submitted to all municipalities within which the operator's facilities are located. In the event of any changes in the list within the year, immediate notification thereof shall be given to all recipients.

.SO DOC 16B-255.805

NYCRR

255.805 Leaks: general. (a) Any notification of a gas leak or gas odor, or any notification of damage to facilities by contractors or other outside sources shall constitute the need for prompt action.

(b) Each operator shall be responsible for the leak investigation, classification, and repair of each leak found on its below-grade system and shall establish a means by which it determines the appropriate surveillance interval at leak locations under frost conditions.

(c) Leaks found to be on exposed piping or facilities need not be classified; however, each operator shall establish procedures for immediate elimination of potential hazards resulting therefrom.

(d) The purpose of the leak classification system is to determine the degree or extent of the potential hazard which results from gas leakage and to prescribe remedial actions therefor.

(e) Classifications shall be made only by individuals who possess training, experience, and knowledge in the field of leak classification and investigation, including extensive association with actual leakage work. The judgment of the aforementioned individuals, based upon all pertinent information and a complete leakage investigation at the scene, will form the basis for the classification.

(f) Percentages of gas-in-air included hereafter are based on natural gas. Where liquefied petroleum, manufactured or other gases are involved, appropriate adjustment shall be made as may be required, consistent with the lower explosive limit (LEL) of such gas or mixture of gases.

(g) Prior to downgrading a leak without any repair, at least one additional surveillance at the normal interval is required to verify that a lower class of hazard exists. Except for leaks downgraded to type 3 classification, which do not require a time limit for repair, if a leak is reclassified to a lower hazard level, the original date of discovery determines the time period for repair. In no case shall the

time limit for required repair of any leak exceed one year from the date of discovery. This requirement does not apply to leaks classified as type 2 or 2A based on consideration of frost conditions nor to leaks, at the time of discovery, classified at a higher level pending a further, more complete investigation of the leak hazard area.

(h) When a leak is upgraded to a higher hazard level, the time period for repair is the remaining time based on its original classification or the time allowed for its new classification, whichever is less. This does not apply to leaks classified at a higher hazard level based on consideration of frost conditions nor to leaks, at the time of discovery, classified at a lower level pending a further, more complete investigation of the leak hazard area.

.SO DOC 16B-255.807

NYCRR

255.807 Leaks: records. (a) A gas leak record, identified by number, shall be used to depict the entire history of a leak from the time of discovery through the follow-up inspection.

(b) The record shall contain information as to the nature of the repair and follow-up results.

(c) Leaks shall only be classified or reclassified by a responsible and experienced individual whose name shall appear on the record.

(d) The gas leak record shall contain an adequate number of readings from the sample points tested during the leakage investigation to depict the extent of hazardous gas migration, expressed in percent gas-in-air or percent LEL found at the time of classification, reclassification if applicable, surveillance investigations, during leak repair activities, after completion of repairs, and at any follow-up inspections.

.SO DOC 16B-255.809

NYCRR

255.809 Leaks: instrument sensitivity verification. Each instrument utilized for leakage surveys and investigations must be tested against a known sample or in accordance with the manufacturer's recommended instructions as follows:

(a) after any repair or replacement of parts other than normal maintenance;

(b) once every three months for CGI's and solid-state leak detection instruments and yearly for hydrogen flame ionization (HFI) instruments; and

(c) any time it is suspected that the calibration has changed.

.SO DOC 16B-255.811

NYCRR

255.811 Leaks: type 1 classification. (a) A type 1 leak is one which, due to its location and/or relative magnitude, constitutes a potentially hazardous condition to the public or buildings.

(b) A type 1 leak requires an immediate effort to protect life and property.

(c) Continuous action shall be thereafter taken until the condition is no longer hazardous.

(d) Completion of repairs shall be scheduled on a regular day-after-day basis, or the condition kept under daily surveillance until the source of the leak has been corrected.

(e) Type 1 leaks include, but are not limited to:

(1) damage by contractors or outside sources resulting in leakage;
(2) any indication on a combustible gas indicator (CGI) of natural gas entering buildings or tunnels;

(3) any reading on a CGI within five feet (1.5 meters) of a building wall;

(4) any reading of four percent or greater gas-in-air on a CGI within manholes, vaults or catch basins (sampling will be conducted with the structure in its normal condition as nearly as physically possible); or

(5) any leak which, in the judgment of the operating personnel at the scene, is regarded as potentially hazardous.

.SO DOC 16B-255.813

NYCRR

255.813 Leaks: Type 2A classification. (a) A type 2A leak does not present an immediately hazardous condition to the public or buildings, but is of a nature that requires frequent surveillance and scheduled repair.

(b) Type 2A leaks shall be repaired within a period not to exceed six months.

(c) Type 2A leaks shall be maintained under surveillance with a frequency not to exceed two weeks until repaired.

(d) Type 2A leaks include, but are not limited to:

(1) any reading of 10 percent or greater gas-in-air in any area continuously paved from the curb to the building wall, which is more than five feet (1.5 meters) but within 30 feet (9.1 meters) of the building and inside the curblin or shoulder of the road;

(2) any reading, in an unpaved area, of 20 percent or greater gas-in-air which is more than five feet (1.5 meters) but within 20 feet (6.1 meters) of the building and inside the curb or shoulder of the road; or (3) any leak, other than type 1, which, under frost or other conditions, in the judgment of the operating personnel at the scene should be classified as a type 2A.

.SO DOC 16B-255.815

NYCRR

255.815 Leaks: type 2 classification.

(a) A type 2 leak does not present an immediate hazardous condition to

the public or buildings, but is of a nature requiring scheduled repair.

(b) Type 2 leaks shall be repaired within a period not to exceed one year, except that leaks classified under paragraph (d)(5) of this section shall be repaired within six months.

(c) Type 2 leaks shall be maintained under surveillance with a frequency not to exceed two months, except that leaks classified under paragraph (d) (5) of this section shall be surveilled every two weeks.

(d) Type 2 leaks include, but are not limited to:

(1) any reading less than 10 percent gas-in-air between the building and the curblin in any area continuously paved which is more than five feet (1.5 meters) but within 30 feet (9.1 meters) of the building and inside the curblin or shoulder of the road; or

(2) any reading less than 20 percent gas-in-air in any unpaved area which is more than five feet (1.5 meters) from but within 20 feet (6.1 meters) of a building and inside the curblin or shoulder of the road; or

(3) any reading of 30 percent or greater gas-in-air in an unpaved area which is more than 20 feet (6.1 meters) from but within 50 feet (15.2 meters) of a building and inside the curblin or shoulder of the road; or

(4) any reading of 30 percent or greater gas-in-air in a paved area which is more than 30 feet (9.1 meters) from but within 50 feet (15.2 meters) of a building and inside the curblin or shoulder of the road; or

(5) any reading above one percent but below four percent gas-in-air, within manholes, vaults or catch basins (sampling will be conducted with the structure in its normal condition as nearly as is physically possible).

.SO DOC 16B-255.817

NYCRR

255.817 Leaks: type 3 classification. (a) A type 3 leak is not immediately hazardous at the time of detection and can be reasonably expected to remain that way.

(b) A type 3 leak is any leak not classified as type 1, 2A or 2.

(c) Type 3 leaks shall be reevaluated during the next required leakage survey or annually, whichever is less.

.SO DOC 16B-255.819

NYCRR

255.819 Leaks: follow-up inspection. (a) Each operator shall, upon completing a type 1, type 2A or type 2 leak repair to its underground facilities, conduct a follow-up inspection at least 14 days after but within 30 days of the repair to validate said repair.

(b) Follow-up inspections are not required for leak repairs completed

by the replacement or insertion of an entire length of pipe or service line, or for the repair of leakage caused by contractor or third-party damage, provided a complete reevaluation of the leak area after completion of repairs verifies that no further indications of leakage exist.

(c) Remedial measures such as lubrication of valves or tightening of packing nuts on valves which seal leaks may be considered to be routine maintenance work and do not require a follow-up inspection.

(d) Appropriate records shall be kept.

.SO DOC 16B-255.821

NYCRR

255.821 Leaks: nonreportable reading. Whenever an operator conducts an annual leakage survey of all mains, or a portion of the mains, in its distribution system, any sustained reading of four percent or less gas-in-air on a CGI at an isolated test point outside the curblin e or shoulder of the road can be considered a nonreportable reading except where found in manholes, vaults or catch basins.

.SO DOC 16B-255.823

NYCRR

255.823 Interruptions of service. (a) Any major interruption of service furnished by any pipeline, or the failure of any major equipment thereof, or any other interruption or failure of such facilities which could cause public concern because of coverage by news media, is to be immediately reported by telephone.

(b) Within 30 days, a written report of the interruption or failure shall be submitted including the chronological sequence of events related to the interruption, including a detailed description of the:

- (1) interruption;
- (2) response, action and investigation by the operator; and
- (3) results and findings of the investigation.

(c) Where applicable, a copy of the report sent to the Office of Pipeline Safety, United States Department of Transportation is to be submitted by the operator.

(d) This requirement does not apply to scheduled interruptions of service, or interruptions in accordance with the provisions of contracts between the operator and its customers.

(e) This requirement is in addition to reporting requirements of Part 232 of this Title.

.SO DOC 16B-255.825

NYCRR

255.825 Logging and analysis of gas emergency reports. (a) Each operator shall appropriately record each report received by it as to a gas leak or emergency on a suitably numbered service record.

(b) A daily log shall be kept and maintained on file recording the

receipt and handling of each such report and shall contain the following information:

- (1) cross-reference to the related service record number;
- (2) location of leak or emergency;
- (3) time report first received by operator;
- (4) description or code designation as to type of leak or emergency;
- (5) time crew first dispatched to designated location; and
- (6) time of arrival of such personnel at location.

(c) In addition, every operator shall maintain a record of the time of arrival of the repair crew called to the scene of a gas leak or emergency.

(d) Every operator shall submit, on or before the 15th day of each calendar month, a summary analysis of its performance in responding to reports of gas leaks, as reflected in the daily log sheets for the preceding calendar month, which shall be furnished in a format identical to Form A of Appendix 7-E of this Title, and which shall be signed by a responsible official.

.SO DOC 16B-255.827 NYCRR

255.827 Facility failure investigation.

(a) Each operator shall establish procedures to analyze each failure or accident for the purpose of determining its cause and to minimize the possibility of a recurrence. This plan shall include a procedure to select samples of the failed facility or equipment for laboratory examination when necessary.

(b) The procedures shall also provide for complete cooperation with the Department staff, in testing or surveying, including using independent consultants, any equipment or systems deemed necessary by staff for the investigation and analysis of any failure or accident to determine its cause and to minimize the possibility of recurrence.

.SO DOC 16B-255.829 NYCRR

255.829 Annual report. Each operator shall submit a copy of the annual report sent to the Office of Pipeline Safety, United States Department of Transportation not later than March 15th of each year.

.SO DOC 16B-255.831 NYCRR

255.831 Reporting safety-related conditions.

Each operator shall submit a report on the existence of any of the applicable safety-related conditions involving facilities in service in accordance with sections 23 and 25 of title 49, Code of Federal Regulations, Part 191, Transportation of Natural and Other Gas by Pipeline; Annual Reports, Incident Reports, and Safety Related Condition Reports (as described in section 10.2 of this Title).

.SO DOC 16B-255.901

NYCRR

255.901 Scope.

Sections 255.901 through 255.951 of this Part prescribe minimum requirements for an integrity management program on any gas transmission pipeline covered under this Part. For gas transmission pipelines constructed of plastic, only the requirements in Sections 255.917, 255.921, 255.935 and 255.937 of this Part apply.

.SO DOC 16B-255.903

NYCRR

255.903 Definitions.

The following definitions apply to sections 255.901 through 255.951 of this Part:

(a) Assessment is the use of testing techniques as allowed in sections 255.901 through 255.951 of this Part to ascertain the condition of a covered pipeline segment.

(b) Confirmatory direct assessment is an integrity assessment method using more focused application of the principles and techniques of direct assessment to identify internal and external corrosion in a covered transmission pipeline segment.

(c) Covered segment or covered pipeline segment means a segment of gas transmission pipeline located in a high consequence area. The terms gas and transmission line are defined in section 255.3 of this Part.

(d) Direct assessment is an integrity assessment method that utilizes a process to evaluate certain threats (i.e., external corrosion, internal corrosion and stress corrosion cracking) to a covered pipeline segment's integrity. The process includes the gathering and integration of risk factor data, indirect examination or analysis to identify areas of suspected corrosion, direct examination of the pipeline in these areas, and post assessment evaluation.

(e) High consequence area means an area established by one of the methods described in paragraphs (1) or (2) as follows:

(1) An area defined as-

(i) A Class 3 location under section 255.5 of this Part; or

(ii) A Class 4 location under section 255.5 of this Part; or

(iii) Any area in a Class 1 or Class 2 location where the potential impact radius is greater than 660 feet (200 meters), and the area within a potential impact circle contains 20 or more buildings intended for human occupancy; or

(iv) Any area in a Class 1 or Class 2 location where the potential impact circle contains an identified site.

(2) The area within a potential impact circle containing-

(i) 20 or more buildings intended for human occupancy, unless the

exception in paragraph (4) applies; or

(ii) An identified site.

(3) Where a potential impact circle is calculated under either paragraphs (1) or (2) of this subdivision to establish a high consequence area, the length of the high consequence area extends axially along the length of the pipeline from the outermost edge of the first potential impact circle that contains either an identified site or 20 or more buildings intended for human occupancy to the outermost edge of the last contiguous potential impact circle that contains either an identified site or 20 or more buildings intended for human occupancy. (See Figure 1 in Appendix 14-E.)

(4) If in identifying a high consequence area under subparagraph (1)(iii) of this subdivision or subparagraph (2)(i) of this subdivision, the radius of the potential impact circle is greater than 660 feet (200 meters), the operator may identify a high consequence area based on a prorated number of buildings intended for human occupancy within a distance of 660 feet (200 meters) from the centerline of the pipeline until December 17, 2006. If an operator chooses this approach, the operator must prorate the number of buildings intended for human occupancy based on the ratio of an area with a radius of 660 feet (200 meters) to the area of the potential impact circle (i.e., the prorated number of buildings intended for human occupancy is equal to $20 \times 660 \text{ feet (or 200 meters)} / \text{potential impact radius in feet or meters} \{2\}$).

(f) Identified site means each of the following areas:

(1) An outside area or open structure that is occupied by twenty (20) or more persons on at least 50 days in any twelve (12)-month period. (The days need not be consecutive.) Examples include but are not limited to, beaches, playgrounds, recreational facilities, camping grounds, outdoor theaters, stadiums, recreational areas near a body of water, or areas outside a rural building such as a religious facility; or

(2) A building that is occupied by twenty (20) or more persons on at least five (5) days a week for ten (10) weeks in any twelve (12)-month period. (The days and weeks need not be consecutive.) Examples include, but are not limited to, religious facilities, office buildings, community centers, general stores, 4-H facilities, or roller skating rinks; or

(3) A facility occupied by persons who are confined, are of impaired mobility, or would be difficult to evacuate. Examples include but are not limited to hospitals, prisons, schools, day-care facilities, retirement facilities or assisted-living facilities.

(g) Potential impact circle is a circle of radius equal to the

potential impact radius (PIR).

(h) Potential impact radius (PIR) means the radius of a circle within which the potential failure of a pipeline could have significant impact on people or property. PIR is determined by the formula $r = 0.69 \times (\text{square root of } (p \times d^2))$, where 'r' is the radius of a circular area in feet surrounding the point of failure, 'p' is the maximum allowable operating pressure (MAOP) in the pipeline segment in pounds per square inch and 'd' is the nominal diameter of the pipeline in inches.

Note: 0.69 is the factor for natural gas. This number will vary for other gases depending upon their heat of combustion. An operator transporting gas other than natural gas must use section 3.2 of ASME/ANSI B31.8S (as described in section 10.3 of this Title) to calculate the impact radius formula.

(i) Remediation is a repair or mitigation activity an operator takes on a covered segment to limit or reduce the probability of an undesired event occurring or the expected consequences from the event.

.SO DOC 16B-255.905

NYCRR

255.905 High consequence areas.

(a) General. To determine which segments of an operator's transmission pipeline system are covered by sections 255.901 through 255.951 of this Part, an operator must identify the high consequence areas. An operator must use methods defined in paragraph (1) or (2) of subdivision (f) of section 255.903 of this Part to identify a high consequence area. An operator must use the method to its entire pipeline system, or an operator may apply one method to individual portions of the pipeline system. An operator must describe in its integrity management program which method it is applying to each portion of the operator's pipeline system. The description must include the potential impact radius when utilized to establish a high consequence area. (See Appendix 14-E.I for guidance on identifying high consequence areas.)

(b) (1) Identified sites. An operator must identify an identified site, for purposes of sections 255.901 through 255.951 of this Part, from information the operator has obtained from routine operation and maintenance activities and from public officials with safety or emergency response or planning responsibilities who indicate to the operator that they know of locations that meet the identified site criteria. These public officials could include officials on a local emergency planning commission or relevant Native American tribal officials.

(2) If a public official with safety or emergency response or planning

responsibilities informs an operator that it does not have the information to identify an identified site, the operator must use one of the following sources, as appropriate, to identify these sites.

- (i) Visible marking (e.g., a sign); or
 - (ii) The site is licensed or registered by a Federal, State, or local government agency; or
 - (iii) The site is on a list (including a list on an internet web site) or map maintained by or available from a Federal, State, or local government agency and available to the general public.
- (c) Newly identified areas. When an operator has information that the area around a pipeline segment not previously identified as a high consequence area could satisfy any of the definitions in section 255.903 of this Part, the operator must complete the evaluation using method (1) or (2). If the segment is determined to meet the definition as a high consequence area, it must be incorporated into the operator's baseline assessment plan as a high consequence area within one year from the date the area is identified.

.SO DOC 16B-255.907

NYCRR

255.907 General.

(a) General. No later than December 17, 2004, an operator of a covered pipeline segment must develop and follow a written integrity management program that contains all the elements described in section 255.911 of this Part and that addresses the risks on each covered transmission pipeline segment. The initial integrity management program must consist, at a minimum, of a framework that describes the process for implementing each program element, how relevant decisions will be made and by whom, a time line for completing the work to implement the program element, and how information gained from experience will be continuously incorporated into the program. The framework will evolve into a more detailed and comprehensive program. An operator must make continual improvements to the program.

(b) Implementation Standards. In carrying out sections 255.901 through 255.951 of this Part, an operator must follow the requirements of sections 255.901 through 255.951 of this Part and of ASME/ANSI B31.8S (as described in section 10.3 of this Title) and its appendices, where specified. An operator may follow an equivalent standard or practice only when the operator demonstrates the alternative standard or practice provides an equivalent level of safety to the public and property. In the event of a conflict between sections 255.901 through 255.951 of this Part and ASME/ANSI B31.8S, the requirements in sections 255.901 through 255.951 of this Part control.

.SO DOC 16B-255.909

NYCRR

255.909 Changes to an integrity management program.

(a) General. An operator must document any change to its program and the reasons for the change before implementing the change.

(b) Notification. An operator must notify the Department and OPS, in accordance with section 255.949 of this Part, of any change to the program that may substantially affect the program's implementation or may significantly modify the program or schedule for carrying out the program elements. An operator must provide the notification within 30 days after adopting this type of change into its program.

.SO DOC 16B-255.911

NYCRR

255.911 Required elements.

An operator's initial integrity management program begins with a framework (see section 255.907 of this Part) and evolves into a more detailed and comprehensive integrity management program, as information is gained and incorporated into the program. An operator must make continual improvements to its program. The initial program framework and subsequent program must, at minimum, contain the following elements. (When indicated, refer to ASME/ANSI B31.8S (as described in section 10.3 of this Title) for more detailed information on the listed element.)

(a) An identification of all high consequence areas, in accordance with section 255.905 of this Part.

(b) A baseline assessment plan meeting the requirements of section 255.919 and 255.921 of this Part.

(c) An identification of threats to each covered pipeline segment, which must include data integration and a risk assessment. An operator must use the threat identification and risk assessment to prioritize covered segments for assessment (section 255.917 of this Part) and to evaluate the merits of additional preventive and mitigative measures (section 255.935 of this Part) for each covered segment.

(d) A direct assessment plan, if applicable, meeting the requirements of section 255.923 of this Part, and depending on the threat assessed, of section 255.925, 255.927, or 255.929 of this Part.

(e) Provisions meeting the requirements of section 255.933 of this Part for remediating conditions found during an integrity assessment.

(f) A process for continual evaluation and assessment meeting the requirements of section 255.937 of this Part.

(g) If applicable, a plan for confirmatory direct assessment meeting the requirements of section 255.931 of this Part.

(h) Provisions meeting the requirements of section 255.935 of this Part for adding preventive and mitigative measures to protect the high

consequence area.

(i) A performance plan as outlined in ASME/ANSI B31.8S, section 9 that includes performance measures meeting the requirements of section 255.945 of this Part.

(j) Record keeping provisions meeting the requirements of section 255.947 of this Part.

(k) A management of change process as outlined in ASME/ANSI B31.8S, section 11.

(l) A quality assurance process as outlined in ASME/ANSI B31.8S, section 12.

(m) A communication plan that includes the elements of ASME/ANSI B31.8S, section 10, and that includes procedures for addressing safety concerns raised by-

(1) the Department; and

(2) OPS

(n) Procedures for providing (when requested), by electronic or other means, a copy of the operator's risk analysis or integrity management program to-

(1) the Department; and

(2) OPS

(o) Procedures for ensuring that each integrity assessment is being conducted in a manner that minimizes environmental and safety risks.

(p) A process for identification and assessment of newly-identified high consequence areas. (See sections 255.905 and 255.921 of this Part.)

.SO DOC 16B-255.913

NYCRR

255.913 Deviation from the requirements of this part.

(a) General. ASME/ANSI B31.8S (as described in section 10.3 of this Title) provides the essential features of a performance-based or a prescriptive integrity management program. An operator that uses a performance-based approach that satisfies the requirements for exceptional performance in paragraph (b) of this section may deviate from certain requirements in sections 255.901 through 255.951 of this Part, as provided in subdivision (c) of this section.

(b) Exceptional performance. An operator must be able to demonstrate the exceptional performance of its integrity management program through the following actions.

(1) To deviate from any of the requirements set forth in subdivision (c) of this section, an operator must have a performance-based integrity management program that meets or exceeds the performance-based requirements of ASME/ANSI B31.8S and includes, at a minimum, the following elements-

- (i) A comprehensive process for risk analysis;
- (ii) All risk factor data used to support the program;
- (iii) A comprehensive data integration process;
- (iv) A procedure for applying lessons learned from assessment of covered pipeline segments to pipeline segments not covered by sections 255.901 through 255.951 of this Part;
- (v) A procedure for evaluating every incident, including its cause, within the operator's sector of the pipeline industry for implications both to the operator's pipeline system and to the operator's integrity management program;
- (vi) A performance matrix that demonstrates the program has been effective in ensuring the integrity of the covered segments by controlling the identified threats to the covered segments;
- (vii) Semi-annual performance measures beyond those required in section 255.945 of this Part that are part of the operator's performance plan. (See section 255.911 (i) of this Part.) An operator must submit these measures, by electronic or other means, on a semi-annual frequency to the Department and OPS in accordance with section 255.951 of this Part; and
- (viii) An analysis that supports the desired integrity reassessment interval and the remediation methods to be used for all covered segments.

(2) In addition to the requirements for the performance-based plan, an operator must-

(i) Have completed at least two integrity assessments on each covered pipeline segment the operator is including under the performance based approach, and be able to demonstrate that each assessment effectively addressed the identified threats on the covered segment.

(ii) Remediate all anomalies identified in the more recent assessment according to the requirements in section 255.933 of this Part, and incorporate the results and lessons learned from the more recent assessment into the operator's data integration and risk assessment.

(c) Deviation. Once an operator has demonstrated that it has satisfied the requirements of subdivision (b) of this section, the operator may deviate from the prescriptive requirements of ASME/ANSI B31.8S and of sections 255.901 through 255.951 of this Part only in the following instances.

(1) The time frame for reassessment as provided in section 255.939 of this Part except that reassessment by some method allowed under sections 255.901 through 255.951 of this Part (e.g., confirmatory direct assessment) must be carried out at intervals no longer than seven years;

(2) The time frame for remediation as provided in section 255.933 of this Part if the operator demonstrates the time frame will not jeopardize the safety of the covered segment.

.SO DOC 16B-255.915

NYCRR

255.915 Knowledge and training.

(a) Supervisory personnel. The integrity management program must provide that each supervisor whose responsibilities relate to the integrity management program possesses and maintains a thorough knowledge of the integrity management program and of the elements for which the supervisor is responsible. The program must provide that any person who qualifies as a supervisor for the integrity management program has appropriate training or experience in the area for which the person is responsible.

(b) Persons who carry out assessments and evaluate assessment results. The integrity management program must provide criteria for the qualification of any person-

(1) Who conducts an integrity assessment allowed under sections 255.901 through 255.951 of this Part; or

(2) Who reviews and analyzes the results from an integrity assessment and evaluation; or

(3) Who makes decisions on actions to be taken based on these assessments.

(c) Persons responsible for preventive and mitigative measures. The integrity management program must provide criteria for the qualification of any person-

(1) Who implements preventive and mitigative measures to carry out sections 255.901 through 255.951 of this Part, including the marking and locating of buried structures; or

(2) Who directly supervises excavation work carried out in conjunction with an integrity assessment.

.SO DOC 16B-255.917

NYCRR

255.917 Identification of potential threats to pipeline integrity and use of the threat identification in an integrity program.

(a) Threat identification. An operator must identify and evaluate all potential threats to each covered pipeline segment. Potential threats that an operator must consider include, but are not limited to, the threats listed in ASME/ANSI B31.8S (as described in section 10.3 of this Title), section 2 which are grouped under the following four categories:

(1) Time dependent threats such as internal corrosion, external corrosion, and stress corrosion cracking;

(2) Static or resident threats, such as fabrication or construction

defects;

(3) Time independent threats such as third party damage and outside force damage; and

(4) Human error.

(b) Data gathering and integration. To identify and evaluate the potential threats to a covered pipeline segment, an operator must gather and integrate existing data and information on the entire pipeline that could be relevant to the covered segment. In performing this data gathering and integration, an operator must follow the requirements in ASME/ANSI B31.8S, section 4. At a minimum, an operator must gather and evaluate the set of data specified in Appendix A to ASME/ANSI B31.8S, and consider both on the covered segment and similar non-covered segments, past incident history, corrosion control records, continuing surveillance records, patrolling records, maintenance history, internal inspection records and all other conditions specific to each pipeline.

(c) Risk assessment. An operator must conduct a risk assessment that follows ASME/ANSI B31.8S, section 5, and considers the identified threats for each covered segment. An operator must use the risk assessment to prioritize the covered segments for the baseline and continual reassessments (sections 255.919, 255.921, 255.937 of this Part), and to determine what additional preventive and mitigative measures are needed (section 255.935 of this Part) for the covered segment.

(d) Plastic transmission pipeline. An operator of a plastic transmission pipeline must assess the threats to each covered segment using the information in sections 4 and 5 of ASME B31.8S, and consider any threats unique to the integrity of plastic pipe.

(e) Actions to address particular threats. If an operator identifies any of the following threats, the operator must take the following actions to address the threat.

(1) Third party damage. An operator must utilize the data integration required in subdivision (b) of this section and ASME/ANSI B31.8S, Appendix A7 to determine the susceptibility of each covered segment to the threat of third party damage. If an operator identifies the threat of third party damage, the operator must implement comprehensive additional preventive measures in accordance with section 255.935 of this Part and monitor the effectiveness of the preventive measures. If, in conducting a baseline assessment under section 255.921 of this Part, or a reassessment under section 255.937 of this Part, an operator uses an internal inspection tool or external corrosion direct assessment, the operator must integrate data from these assessments with data related to

any encroachment or foreign line crossing on the covered segment, to define where potential indications of third party damage may exist in the covered segment. An operator must also have procedures in its integrity management program addressing actions it will take to respond to findings from this data integration.

(2) Cyclic fatigue. An operator must evaluate whether cyclic fatigue or other loading condition (including ground movement, suspension bridge condition) could lead to a failure of a deformation, including a dent or gouge, or other defect in the covered segment. An evaluation must assume the presence of threats in the covered segment that could be exacerbated by cyclic fatigue. An operator must use the results from the evaluation together with the criteria used to evaluate the significance of this threat to the covered segment to prioritize the integrity baseline assessment or reassessment.

(3) Manufacturing and construction defects. If an operator identifies the threat of manufacturing and construction defects (including seam defects) in the covered segment, an operator must analyze the covered segment to determine the risk of failure from these defects. The analysis must consider the results of prior assessments on the covered segment. An operator may consider manufacturing and construction related defects to be stable defects if the operating pressure on the covered segment has not increased over the maximum operating pressure experienced during the five years preceding identification of the high consequence area. If any of the following changes occur in the covered segment, an operator must prioritize the covered segment as a high risk segment for the baseline assessment or a subsequent reassessment.

(i) Operating pressure increases above the maximum operating pressure experienced during the preceding five years;

(ii) MAOP increases; or

(iii) The stresses leading to cyclic fatigue increase.

(4) ERW pipe. If a covered pipeline segment contains low frequency electric resistance welded pipe (ERW), lap welded pipe or other pipe that satisfies the conditions specified in ASME/ANSI B31.8S, Appendices A4.3 and A4.4, and any covered or noncovered segment in the pipeline system with such pipe has experienced seam failure, or operating pressure on the covered segment has increased over the maximum operating pressure experienced during the preceding five years, an operator must select an assessment technology or technologies with a proven application capable of assessing seam integrity and seam corrosion anomalies. The operator must prioritize the covered segment as a high risk segment for the baseline assessment or a subsequent reassessment.

(5) Corrosion. If an operator identifies corrosion on a covered pipeline segment that could adversely affect the integrity of the line (conditions specified in section 255.931 of this Part), the operator must evaluate and remediate, as necessary, all pipeline segments (both covered and non-covered) with similar material coating and environmental characteristics. An operator must establish a schedule for evaluating and remediating, as necessary, the similar segments that is consistent with the operator's operating and maintenance procedures established under 49 CFR Part 192 for testing and repair.

.SO DOC 16B-255.919

NYCRR

255.919 Baseline assessment plan.

An operator must include each of the following elements in its written baseline assessment plan:

(a) Identification of the potential threats to each covered pipeline segment and the information supporting the threat identification. (See section 255.917 of this Part);

(b) The methods selected to assess the integrity of the line pipe, including an explanation of why the assessment method was selected to address the identified threats to each covered segment. The integrity assessment method an operator uses must be based on the threats identified to the covered segment. (See section 255.917 of this Part) More than one method may be required to address all the threats to the covered pipeline segment;

(c) A schedule for completing the integrity assessment of all covered segments, including risk factors considered in establishing the assessment schedule;

(d) If applicable, a direct assessment plan that meets the requirements of section 255.923 of this Part, and depending on the threat to be addressed, of sections 255.925, 255.927, or 255.929 of this Part; and

(e) A procedure to ensure that the baseline assessment is being conducted in a manner that minimizes environmental and safety risks.

.SO DOC 16B-255.921

NYCRR

255.921 Conducting a baseline assessment.

(a) Assessment methods. An operator must assess the integrity of the line pipe in each covered segment by applying one or more of the following methods depending on the threats to which the covered segment is susceptible. An operator must select the method or methods best suited to address the threats identified to the covered segment (See section 255.917 of this Part).

(1) Internal inspection tool or tools capable of detecting corrosion,

and any other threats to which the covered segment is susceptible. An operator must follow ASME/ANSI B31.8S (as described in section 10.3 of this Title), section 6.2 in selecting the appropriate internal inspection tools for the covered segment;

(2) Pressure test conducted in accordance with the testing requirements of this Part. An operator must use the test pressures specified in Table 3 of section 5 of ASME/ANSI B31.8S, to justify an extended reassessment interval in accordance with section 255.939 of this Part;

(3) Direct assessment to address threats of external corrosion, internal corrosion, and stress corrosion cracking. An operator must conduct the direct assessment in accordance with the requirements listed in section 255.923 of this Part and with, as applicable, the requirements specified in sections 255.925, 255.927 or 255.929 of this Part;

(4) Other technology that an operator demonstrates can provide an equivalent understanding of the condition of the line pipe. An operator choosing this option must notify the Department and OPS 180 days before conducting the assessment, in accordance with section 255.949 of this Part.

(b) Prioritizing segments. An operator must prioritize the covered pipeline segments for the baseline assessment according to a risk analysis that considers the potential threats to each covered segment. The risk analysis must comply with the requirements in section 255.917 of this Part.

(c) Assessment for particular threats. In choosing an assessment method for the baseline assessment of each covered segment, an operator must take the actions required in section 255.917(e) of this Part to address particular threats that it has identified.

(d) Time period. An operator must prioritize all the covered segments for assessment in accordance with section 255.917(c) of this Part and subdivision (b) above. An operator must assess at least 50% of the covered segments beginning with the highest risk segments, by December 17, 2007. An operator must complete the baseline assessment of all covered segments by December 17, 2012.

(e) Prior assessment. An operator may use a prior integrity assessment conducted before December 17, 2002 as a baseline assessment for the covered segment, if the integrity assessment meets the baseline requirements in this Part and subsequent remedial actions to address the conditions listed in section 255.933 of this Part have been carried out. In addition, if an operator uses this prior assessment as its baseline

assessment, the operator must reassess the line pipe in the covered segment according to the requirements of sections 255.937 and 255.939 of this Part.

(f) Newly identified areas. When an operator identifies a new high consequence area (see section 255.905 of this Part), an operator must complete the baseline assessment of the line pipe in the newly identified high consequence area within ten (10) years from the date the area is identified.

(g) Newly installed pipe. An operator must complete the baseline assessment of a newly installed segment of pipe covered by this Part within ten (10) years from the date the pipe is installed. An operator may conduct a pressure test in accordance with paragraph (a)(2) of this section, to satisfy the requirement for a baseline assessment.

(h) Plastic transmission pipeline. If the threat analysis required in section 255.917(d) of this Part on a plastic transmission pipeline indicates that a covered segment is susceptible to failure from causes other than third-party damage, an operator must conduct a baseline assessment of the segment in accordance with the requirements of this section and of section 255.917 of this Part. The operator must justify the use of an alternative assessment method that will address the identified threats to the covered segment.

.SO DOC 16B-255.923

NYCRR

255.923 Direct assessment.

(a) General. An operator may use direct assessment either as a primary assessment method or as a supplement to the other assessment methods allowed under sections 255.901 through 255.951 of this Part. An operator may only use direct assessment as the primary assessment method to address the identified threats of external corrosion (EC), internal corrosion (IC), and stress corrosion cracking (SCC).

(b) Primary method. An operator using direct assessment as a primary assessment method must have a plan that complies with the requirements in:

(1) ASME/ANSI B31.8S (as described in section 10.3 of this Title), section 6.4; NACE SP 0502 (as described in section 10.3 of this Title); and section 255.925 of this Part if addressing external corrosion (EC).

(2) ASME/ANSI B31.8S, section 6.4 and appendix B2, and section 255.927 of this Part if addressing internal corrosion (IC).

(3) ASME/ANSI B31.8S, appendix A3, and section 255.929 if addressing stress corrosion cracking (SCC).

(c) Supplemental method. An operator using direct assessment as a supplemental assessment method for any applicable threat must have a

plan that follows the requirements for confirmatory direct assessment in section 255.931 of this Part.

.SO DOC 16B-255.925

NYCRR

255.925 External corrosion direct assessment (ECDA).

(a) Definition. ECDA is a four-step process that combines preassessment, indirect inspection, direct examination, and post assessment to evaluate the threat of external corrosion to the integrity of a pipeline.

(b) General requirements. An operator that uses direct assessment to assess the threat of external corrosion must follow the requirements in this section, in ASME/ANSI B31.8S (as described in section 10.3 of this Title), section 6.4 and in NACE SP 0502 (as described in section 10.3 of this Title). An operator must develop and implement a direct assessment plan that has procedures addressing preassessment, indirect inspection, direct examination, and post-assessment. If the ECDA detects pipeline coating damage, the operator must also integrate the data from the ECDA with other information from the data integration (section 255.917(b) of this Part) to evaluate the covered segment for the threat of third party damage, and to address the threat as required by section 255.917(e)(1) of this Part.

(1) Preassessment. In addition to the requirements in ASME/ANSI B31.8S section 6.4 and NACE SP 0502, section 3, the plan's procedures for preassessment must include:

(i) provisions for applying more restrictive criteria when conducting ECDA for the first time on a covered segment; and

(ii) the basis on which an operator selects at least two different, but complementary indirect assessment tools to assess each ECDA Region.

If an operator utilizes an indirect inspection method that is not discussed in Appendix A of NACE SP 0502, the operator must demonstrate the applicability, validation basis, equipment used, application procedure, and utilization of data for the inspection method.

(2) Indirect inspection. In addition to the requirements in ASME/ANSI B31.8S section 6.4 and NACE SP 0502, section 4, the plan's procedures for indirect examination of the ECDA regions must include:

(i) provisions for applying more restrictive criteria when conducting ECDA for the first time on a covered segment;

(ii) criteria for identifying and documenting those indications that must be considered for excavation and direct examination. Minimum identification criteria include the known sensitivities of assessment tools, the procedures for using each tool, and the approach to be used for decreasing the physical spacing of indirect assessment tool readings

when the presence of a defect is suspected;

(iii) criteria for defining the urgency of excavation and direct examination of each indication identified during the indirect examination. These criteria must specify how an operator will define the urgency of excavating the indication as immediate, scheduled or monitored; and

(iv) criteria for scheduling excavation of indications for each urgency level.

(3) Direct examination. In addition to the requirements in ASME/ANSI B31.8S section 6.4 and NACE SP 0502, section 5, the plan's procedures for direct examination of indications from the indirect examination must include:

(i) provisions for applying more restrictive criteria when conducting ECDA for the first time on a covered segment;

(ii) criteria for deciding what action should be taken if either:

(a) corrosion defects are discovered that exceed allowable limits (Section 5.5.2.2 of NACE RP0502), or

(b) root cause analysis reveals conditions for which ECDA is not suitable (Section 5.6.2 of NACE SP 0502);

(iii) criteria and notification procedures for any changes in the ECDA Plan, including changes that affect the severity classification, the priority of direct examination, and the time frame for direct examination of indications; and

(iv) criteria that describe how and on what basis an operator will reclassify and reprioritize any of the provisions that are specified in section 5.9 of NACE RP0502.

(4) Post assessment and continuing evaluation. In addition to the requirements in ASME/ANSI B31.8S section 6.4 and NACE SP 0502, section 6, the plan's procedures for post assessment of the effectiveness of the ECDA process must include:

(i) measures for evaluating the long term effectiveness of ECDA in addressing external corrosion in covered segments; and

(ii) criteria for evaluating whether conditions discovered by direct examination of indications in each ECDA region indicate a need for reassessment of the covered segment at an interval less than that specified in section 255.939 of this Part. (See Appendix D of NACE SP 0502.)

.SO DOC 16B-255.927

NYCRR

255.927 Internal corrosion direct assessment (ICDA).

(a) Definition. Internal Corrosion Direct Assessment (ICDA) is a process an operator uses to identify areas along the pipeline where

fluid or other electrolyte introduced during normal operation or by an upset condition may reside, and then focuses direct examination on the locations in covered segments where internal corrosion is most likely to exist. The process identifies the potential for internal corrosion caused by microorganisms, or fluid with CO₂, O₂, hydrogen sulfide or other contaminants present in the gas.

(b) General requirements. An operator using direct assessment as an assessment method to address internal corrosion in a covered pipeline segment must follow the requirements in this section and in ASME/ANSI B31.8S (as described in section 10.3 of this Title), section 6.4 and appendix B2. The ICDA process described in this section applies only for a segment of pipe transporting nominally dry natural gas, and not for a segment with electrolyte nominally present in the gas stream. If an operator uses ICDA to assess a covered segment operating with electrolyte present in the gas stream, the operator must develop a plan that demonstrates how it will conduct ICDA in the segment to effectively address internal corrosion, and must provide notification in accordance with section 255.921 (a)(4) or 255.937(c)(4) of this Part.

(c) The ICDA plan. An operator must develop and follow an ICDA plan that provides for preassessment, identification of ICDA regions and excavation locations, detailed examination of pipe at excavation locations, and post-assessment evaluation and monitoring.

(1) Reassessment. In the preassessment stage, an operator must gather and integrate data and information needed to evaluate the feasibility of ICDA for the covered segment, and to support use of a model to identify the locations along the pipe segment where electrolyte may accumulate, to identify ICDA regions, and to identify areas within the covered segment where liquids may potentially be entrained. This data and information includes, but is not limited to-

- (i) All data elements listed in appendix A2 of ASME/ANSI B31.8S;
- (ii) Information needed to support use of a model that an operator must use to identify areas along the pipeline where internal corrosion is most likely to occur. (See paragraph (a) of this section.) This information includes, but is not limited to, location of all gas input and withdrawal points on the line; location of all low points on covered segments such as sags, drips, inclines, valves, manifolds, dead-legs, and traps; the elevation profile of the pipeline in sufficient detail that angles of inclination can be calculated for all pipe segments; and the diameter of the pipeline, and the range of expected gas velocities in the pipeline;
- (iii) Operating experience data that would indicate historic upsets in

gas conditions, locations where these upsets have occurred, and potential damage resulting from these upset conditions; and

(iv) Information on covered segments where cleaning pigs may not have been used or where cleaning pigs may deposit electrolytes.

(2) ICDA region identification. An operator's plan must identify where all ICDA Regions are located in the transmission system, in which covered segments are located. An ICDA Region extends from the location where liquid may first enter the pipeline and encompasses the entire area along the pipeline where internal corrosion may occur and where further evaluation is needed. An ICDA Region may encompass one or more covered segments. In the identification process, an operator must use the model in GRI 02-0057, "Internal Corrosion Direct Assessment of Gas Transmission Pipelines-Methodology," (as described in section 10.3 of this Title). An operator may use another model if the operator demonstrates it is equivalent to the one shown in GRI 02-0057. A model must consider changes in pipe diameter, locations where gas enters a line (potential to introduce liquid) and locations downstream of gas draw-offs (where gas velocity is reduced) to define the critical pipe angle of inclination above which water film cannot be transported by the gas.

(3) Identification of locations for excavation and direct examination. An operator's plan must identify the locations where internal corrosion is most likely in each ICDA Region. In the location identification process, an operator must identify a minimum of two locations for excavation within each ICDA Region within a covered segment and must perform a direct examination for internal corrosion at each location, using ultrasonic thickness measurements, radiography, or other generally accepted measurement technique. One location must be the low point (e.g., sags, drips, valves, manifolds, dead-legs, traps) within the covered segment nearest to the beginning of the ICDA Region. The second location must be further downstream, within a covered segment, near the end of the ICDA Region. If corrosion exists at either location, the operator must-

(i) Evaluate the severity of the defect (remaining strength) and remediate the defect in accordance with section 255.933 of this Part;

(ii) As part of the operator's current integrity assessment either perform additional excavations in each covered segment within the ICDA Region, or use an alternative assessment method allowed by sections 255.901 through 255.951 of this Part to assess the line pipe in each covered segment within the ICDA Region for internal corrosion; and

(iii) Evaluate the potential for internal corrosion in all pipeline

segments (both covered and non-covered) in the operator's pipeline system with similar characteristics to the ICDA Region containing the covered segment in which the corrosion was found, and as appropriate, remediate the conditions the operator finds in accordance with section 255.933 of this Part.

(4) Post-assessment evaluation and monitoring. An operator's plan must provide for evaluating the effectiveness of the ICDA process and continued monitoring of covered segments where internal corrosion has been identified. The evaluation and monitoring process includes-

(i) Evaluating the effectiveness of ICDA as an assessment method for addressing internal corrosion and determining whether a covered segment should be reassessed at more frequent intervals than those specified in section 255.939 of this Part. An operator must carry out this evaluation within a year of conducting an ICDA; and

(ii) Continually monitoring each covered segment where internal corrosion has been identified using techniques such as coupons, UT sensors or electronic probes, periodically drawing off liquids at low points and chemically analyzing the liquids for the presence of corrosion products. An operator must base the frequency of the monitoring and liquid analysis on results from all integrity assessments that have been conducted in accordance with the requirements of sections 255.901 through 255.951 of this Part, and risk factors specific to the covered segment. If an operator finds any evidence of corrosion products in the covered segment, the operator must take prompt action in accordance with one of the two following required actions and remediate the conditions the operator finds in accordance with section 255.933 of this Part.

(A) Conduct excavations of covered segments at locations downstream from where the electrolyte might have entered the pipe; or

(B) Assess the covered segment using another integrity assessment method allowed by sections 255.901 through 255.951 of this Part.

(5) Other requirements. The ICDA plan must also include-

(i) Criteria an operator will apply in making key decisions (e.g., ICDA feasibility, definition of ICDA Regions, conditions requiring excavation) in implementing each stage of the ICDA process;

(ii) Provisions for applying more restrictive criteria when conducting ICDA for the first time on a covered segment and that become less stringent as the operator gains experience; and

(iii) Provisions that analysis be carried out on the entire pipeline in which covered segments are present, except that application of the remediation criteria of section 255.933 of this Part may be limited to

covered segments.

.SO DOC 16B-255.929

NYCRR

255.929 Direct assessment for stress corrosion cracking (SCCDA).

(a) Definition. Stress Corrosion Cracking Direct Assessment (SCCDA) is a process to assess a covered pipe segment for the presence of SCC primarily by systematically gathering and analyzing excavation data for pipe having similar operational characteristics and residing in a similar physical environment.

(b) General requirements. An operator using direct assessment as an integrity assessment method to address stress corrosion cracking in a covered pipeline segment must have a plan that provides, at minimum, for-

(1) Data gathering and integration. An operator's plan must provide for a systematic process to collect and evaluate data for all covered segments to identify whether the conditions for SCC are present and to prioritize the covered segments for assessment. This process must include gathering and evaluating data related to SCC at all sites an operator excavates during the conduct of its pipeline operations where the criteria in ASME/ANSI B31.8S (as described in section 10.3 of this Title), Appendix A3.3 indicate the potential for SCC. This data includes at minimum, the data specified in ASME/ANSI B31.8S, Appendix A3.

(2) Assessment method. The plan must provide that if conditions for SCC are identified in a covered segment, an operator must assess the covered segment using an integrity assessment method specified in ASME/ANSI B31.8S, Appendix A3, and remediate the threat in accordance with ASME/ANSI B31.8S, Appendix A3, section A3.4.

.SO DOC 16B-255.931

NYCRR

255.931 Confirmatory direct assessment (CDA).

An operator using the confirmatory direct assessment (CDA) method as allowed in section 255.937 of this Part must have a plan that meets the requirements of this section and of sections 255.925 (ECDA) and 255.927 of this Part (ICDA).

(a) Threats. An operator may only use CDA on a covered segment to identify damage resulting from external corrosion or internal corrosion.

(b) External corrosion plan. An operator's CDA plan for identifying external corrosion must comply with section 255.925 of this Part with the following exceptions.

(1) The procedures for indirect examination may allow use of only one indirect examination tool suitable for the application.

(2) The procedures for direct examination and remediation must provide that-

(i) All immediate action indications must be excavated for each ECDA region; and

(ii) At least one high risk indication that meets the criteria of scheduled action must be excavated in each ECDA region.

(c) Internal corrosion plan. An operator's CDA plan for identifying internal corrosion must comply with section 255.927 of this Part except that the plan's procedures for identifying locations for excavation may require excavation of only one high risk location in each ICDA region.

(d) Defects requiring near-term remediation. If an assessment carried out under subdivision (b) or (c) of this section reveals any defect requiring remediation prior to the next scheduled assessment, the operator must schedule the next assessment in accordance with NACE SP 0502 (as described in section 10.3 of this Title), sections 6.2 and 6.3. If the defect requires immediate remediation, then the operator must reduce pressure consistent with section 255.933 of this Part until the operator has completed reassessment using one of the assessment techniques allowed in section 255.937 of this Part.

.SO DOC 16B-255.933

NYCRR

255.933 Addressing integrity issues.

(a) General requirements. An operator must take prompt action to address all anomalous conditions that the operator discovers through the integrity assessment. In addressing all conditions, an operator must evaluate all anomalous conditions and remediate those that could reduce a pipeline's integrity. An operator must be able to demonstrate that the remediation of the condition will ensure that the condition is unlikely to pose a threat to the integrity of the pipeline until the next reassessment of the covered segment. If an operator is unable to respond within the time limits for certain conditions specified in this section, the operator must temporarily reduce the operating pressure of the pipeline or take other action that ensures the safety of the covered segment. If pressure is reduced, an operator must determine the temporary reduction in operating pressure using ASME/ANSI B31G (as described in section 10.3 of this Title) Pipeline Research Council, International, PR-3-805 ("RSTRENG"; as described in section 10.3 of this Title) or reduce the operating pressure to a level not exceeding 80% of the level at the time the condition was discovered. A reduction in operating pressure cannot exceed 365 days without an operator providing a technical justification that the continued pressure restriction will not jeopardize the integrity of the pipeline.

(b) Discovery of condition. Discovery of a condition occurs when an operator has adequate information about a condition to determine that

the condition presents a potential threat to the integrity of the pipeline. A condition that presents a potential threat includes, but is not limited to, those conditions that require remediation or monitoring listed under paragraphs (1) through (3) of subdivision (d) of this section. An operator must promptly, but no later than 180 days after conducting an integrity assessment, obtain sufficient information about a condition to make that determination, unless the operator demonstrates that the 180-day period is impracticable.

(b) Discovery of condition. Discovery of a condition occurs when an operator has adequate information about a condition to determine that the condition presents a potential threat to the integrity of the pipeline. A condition that presents a potential threat includes, but is not limited to, those conditions that require remediation or monitoring listed under paragraphs (1) through (3) of subdivision (d) of this section. An operator must promptly, but no later than 180 days after conducting an integrity assessment, obtain sufficient information about a condition to make that determination, unless the operator demonstrates that the 180-day period is impracticable.

(c) Schedule for evaluation and remediation. An operator must complete remediation of a condition according to a schedule that prioritizes the conditions for evaluation and remediation. Unless a special requirement for remediating certain conditions applies, as provided in subdivision (d) of this section, an operator must follow the schedule in ASME/ANSI B31.8S (as described in section 10.3 of this Title), section 7, Figure 4. If an operator cannot meet the schedule for any condition, the operator must justify the reasons why it cannot meet the schedule and that the changed schedule will not jeopardize public safety. An operator must notify the Department and OPS in accordance with section 255.949 of this part if it cannot meet the schedule and cannot provide safety through a temporary reduction in operating pressure or other action.

(d) Special requirements for scheduling remediation.

(1) Immediate repair conditions. An operator's evaluation and remediation schedule must follow ASME/ANSI B31.8S, section 7 in providing for immediate repair conditions. To maintain safety, an operator must temporarily reduce operating pressure in accordance with paragraph (a) of this section or shut down the pipeline until the operator completes the repair of these conditions. An operator must treat the following conditions as immediate repair conditions:

(i) A calculation of the remaining strength of the pipe shows a predicted failure pressure less than or equal to 1.1 times the maximum allowable operating pressure at the location of the anomaly. Suitable

remaining strength calculation methods include, ASME/ANSI B31G; PRCI PR-3-805 RSTRENG; or an alternative equivalent method of remaining strength calculation. These documents are incorporated by reference and available at the addresses listed in section 10.3 of this Title.

(ii) A dent that has any indication of metal loss, cracking or a stress riser.

(iii) An indication or anomaly that in the judgment of the person designated by the operator to evaluate the assessment results requires immediate action.

(2) One-year conditions. Except for conditions listed in paragraphs (d)(1) and (d)(3) of this section, an operator must remediate any of the following within one year of discovery of the condition:

(i) A smooth dent located between the 8 o'clock and 4 o'clock positions (upper 2/3 of the pipe) with a depth greater than 6% of the pipeline diameter (greater than 0.50 inches (13 millimeters) in depth for a pipeline diameter less than Nominal Pipe Size (NPS) 12).

(ii) A dent with a depth greater than 2% of the pipeline's diameter (0.250 inches (6 millimeters) in depth for a pipeline diameter less than NPS 12) that affects pipe curvature at a girth weld or at a longitudinal seam weld.

(3) Monitored conditions. An operator does not have to schedule the following conditions for remediation, but must record and monitor the conditions during subsequent risk assessments and integrity assessments for any change that may require remediation:

(i) A dent with a depth greater than 6% of the pipeline diameter (greater than 0.50 inches (13 millimeters) in depth for a pipeline diameter less than NPS 12) located between the 4 o'clock position and the 8 o'clock position (bottom 1/3 of the pipe).

(ii) A dent located between the 8 o'clock and 4 o'clock positions (upper 2/3 of the pipe) with a depth greater than 6% of the pipeline diameter (greater than 0.50 inches (13 millimeters) in depth for a pipeline diameter less than Nominal Pipe Size (NPS) 12), and engineering analyses of the dent demonstrate critical strain levels are not exceeded.

(iii) A dent with a depth greater than 2% of the pipeline's diameter (0.250 inches (6 millimeters) in depth for a pipeline diameter less than NPS 12) that affects pipe curvature at a girth weld or a longitudinal seam weld, and engineering analyses of the dent and girth or seam weld demonstrate critical strain levels are not exceeded. These analyses must consider weld properties.

255.935 Preventive and mitigative measures to protect the high consequence areas.

(a) General requirements. An operator must take additional measures beyond those already required by this Part to prevent a pipeline failure and to mitigate the consequences of a pipeline failure in a high consequence area. An operator must base the additional measures on the threats the operator has identified to each pipeline segment. (See section 255.917 of this Part) An operator must conduct, in accordance with one of the risk assessment approaches in ASME/ANSI B31.8S (as described in section 10.3 of this Title), section 5, a risk analysis of its pipeline to identify additional measures to protect the high consequence area and enhance public safety. Such additional measures include, but are not limited to, installing Automatic Shut-off Valves or Remote Control Valves, installing computerized monitoring and leak detection systems, replacing pipe segments with pipe of heavier wall thickness, providing additional training to personnel on response procedures, conducting drills with local emergency responders and implementing additional inspection and maintenance programs.

(b) Third party damage and outside force damage.

(1) Third party damage. An operator must enhance its damage prevention program, as required under section 255.614 of this Part, with respect to a covered segment to prevent and minimize the consequences of a release due to third party damage. Enhanced measures to an existing damage prevention program include, at a minimum-

(i) Using qualified personnel (see section 255.915 of this Part) for work an operator is conducting that could adversely affect the integrity of a covered segment, such as marking, locating, and direct supervision of known excavation work.

(ii) Collecting in a central database information that is location specific on excavation damage that occurs in covered and non covered segments in the transmission system and the root cause analysis to support identification of targeted additional preventative and mitigative measures in the high consequence areas. This information must include recognized damage that is not required to be reported as an incident under sections 255.801 (a) and 255.831 of this Part.

(iii) Participating in one-call systems in locations where covered segments are present.

(iv) Monitoring of excavations conducted on covered pipeline segments by pipeline personnel. If an operator finds physical evidence of encroachment involving excavation that the operator did not monitor near a covered segment, an operator must either excavate the area near the

encroachment or conduct an above ground survey using methods defined in NACE RP-0502 (as described in section 10.3 of this Title). An operator must excavate, and remediate, in accordance with ANSI/ASME B31.8S and section 255.933 of this Part any indication of coating holidays or discontinuity warranting direct examination.

(2) Outside force damage. If an operator determines that outside force (e.g., earth movement, floods, unstable suspension bridge) is a threat to the integrity of a covered segment, the operator must take measures to minimize the consequences to the covered segment from outside force damage. These measures include, but are not limited to, increasing the frequency of aerial, foot or other methods of patrols, adding external protection, reducing external stress, and relocating the line.

(c) Automatic shut-off valves (ASV) or Remote control valves (RCV). If an operator determines, based on a risk analysis, that an ASV or RCV would be an efficient means of adding protection to a high consequence area in the event of a gas release, an operator must install the ASV or RCV. In making that determination, an operator must, at least, consider the following factors - swiftness of leak detection and pipe shutdown capabilities, the type of gas being transported, operating pressure, the rate of potential release, pipeline profile, the potential for ignition, and location of nearest response personnel.

(d) Pipelines operating below 30% SMYS. An operator of a transmission pipeline operating below 30% SMYS located in a high consequence area must follow the requirements in paragraphs (1) and (2) of this subdivision. An operator of a transmission pipeline operating below 30% SMYS located in a Class 3 or Class 4 area but not in a high consequence area must follow the requirements in paragraphs (1), (2) and (3) of this subdivision.

(1) Apply the requirements in subparagraphs (i) and (iii) of paragraph (1) of subdivision (b) of this section to the pipeline; and

(2) Either monitor excavations near the pipeline, or conduct patrols as required by section 255.705 of this Part of the pipeline at bi-monthly intervals. If an operator finds any indication of unreported construction activity, the operator must conduct a follow up investigation to determine if mechanical damage has occurred.

(3) Perform semi-annual leak surveys (quarterly for unprotected pipelines or cathodically protected pipe where electrical surveys are impractical).

(e) Plastic transmission pipeline. An operator of a plastic transmission pipeline must apply the requirements in subparagraphs (i), (iii) and (iv) of paragraph (1) of subdivision (b) of this section to

the covered segments of the pipeline.

.SO DOC 16B-255.937

NYCRR

255.937 Continual process of evaluation and assessment.

(a) General. After completing the baseline integrity assessment of a covered segment, an operator must continue to assess the line pipe of that segment at the intervals specified in section 255.939 of this Part and periodically evaluate the integrity of each covered pipeline segment as provided in subdivision (b) of this section. An operator must reassess a covered segment on which a prior assessment is credited as a baseline under section 255.921(e) of this Part by no later than December 17, 2009. An operator must reassess a covered segment on which a baseline assessment is conducted during the baseline period specified in section 255.921(d) of this Part by no later than seven years after the baseline assessment of that covered segment unless the evaluation under subdivision (b) of this section indicates earlier reassessment.

(b) Evaluation. An operator must conduct a periodic evaluation as frequently as needed to assure the integrity of each covered segment. The periodic evaluation must be based on a data integration and risk assessment of the entire pipeline as specified in section 255.917 of this Part. For plastic transmission pipelines, the periodic evaluation is based on the threat analysis specified in section 255.917(d) of this Part. For all other transmission pipelines, the evaluation must consider the past and present integrity assessment results, data integration and risk assessment information (section 255.917 of this Part), and decisions about remediation (section 255.933 of this Part) and additional preventive and mitigative actions (section 255.935 of this Part). An operator must use the results from this evaluation to identify the threats specific to each covered segment and the risk represented by these threats.

(c) Assessment methods. In conducting the integrity reassessment, an operator must assess the integrity of the line pipe in the covered segment by any of the following methods as appropriate for the threats to which the covered segment is susceptible (see section 255.917 of this Part), or by confirmatory direct assessment under the conditions specified in section 255.931 of this Part.

(1) Internal inspection tool or tools capable of detecting corrosion, and any other threats to which the covered segment is susceptible. An operator must follow ASME/ANSI B31.8S (as described in section 10.3 of this Title), section 6.2 in selecting the appropriate internal inspection tools for the covered segment.

(2) Pressure test conducted in accordance with the testing

requirements of this Part. An operator must use the test pressures specified in Table 3 of section 5 of ASME/ANSI B31.8S, to justify an extended reassessment interval in accordance with section 255.939 of this Part.

(3) Direct assessment to address threats of external corrosion, internal corrosion, or stress corrosion cracking. An operator must conduct the direct assessment in accordance with the requirements listed in section 255.923 of this Part and with as applicable, the requirements specified in section 255.925, 255.927 or 255.929 of this Part;

(4) Other technology that an operator demonstrates can provide an equivalent understanding of the condition of the line pipe. An operator choosing this option must notify the Department and OPS 180 days before conducting the assessment, in accordance with section 255.949 of this Part.

(5) Confirmatory direct assessment when used on a covered segment that is scheduled for reassessment at a period longer than seven years. An operator using this reassessment method must comply with section 255.931 of this Part.

.SO DOC 16B-255.939

NYCRR

255.939 Reassessment intervals.

An operator must comply with the following requirements in establishing the reassessment interval for the operator's covered pipeline segments.

(a) Pipelines operating at or above 30% SMYS. An operator must establish a reassessment interval for each covered segment operating at or above 30% SMYS in accordance with the requirements of this section. The maximum reassessment interval by an allowable reassessment method is seven years. If an operator establishes a reassessment interval that is greater than seven years, the operator must, within the seven-year period, conduct a confirmatory direct assessment on the covered segment, and then conduct the follow-up reassessment at the interval the operator has established. A reassessment carried out using confirmatory direct assessment must be done in accordance with section 255.931 of this Part. The table that follows this section sets forth the maximum allowed reassessment intervals.

(1) Pressure test or internal inspection or other equivalent technology. An operator that uses pressure testing or internal inspection as an assessment method must establish the reassessment interval for a covered pipeline segment by-

(i) Basing the interval on the identified threats for the covered segment (see section 255.917 of this Part) and on the analysis of the

results from the last integrity assessment and from the data integration and risk assessment required by section 255.917 of this Part; or

(ii) using the intervals specified for different stress levels of pipeline (operating at or above 30 percent SMYS) listed in ASME/ANSI B31.8S, section 5, table 3 (as described in section 10.3 of this Title).

(2) External Corrosion Direct Assessment. An operator that uses ECDA that meets the requirements of sections 255.901 through 255.951 of this Part must determine the reassessment interval according to the requirements in paragraphs 6.2 and 6.3 of NACE RP0502 (as described in section 10.3 of this Title).

(3) Internal Corrosion or SCC Direct Assessment. An operator that uses ICDA or SCCDA in accordance with the requirements of sections 255.901 through 255.951 of this Part must determine the reassessment interval according to the following method. However, the reassessment interval cannot exceed those specified for direct assessment in ASME/ANSI B31.8S, section 5, Table 3.

(i) Determine the largest defect most likely to remain in the covered segment and the corrosion rate appropriate for the pipe, soil and protection conditions;

(ii) Use the largest remaining defect as the size of the largest defect discovered in the SCC or ICDA segment; and

(iii) Estimate the reassessment interval as half the time required for the largest defect to grow to a critical size.

(b) Pipelines Operating Below 30% SMYS. An operator must establish a reassessment interval for each covered segment operating below 30% SMYS in accordance with the requirements of this section. The maximum reassessment interval by an allowable reassessment method is seven years. An operator must establish reassessment by at least one of the following-

(1) Reassessment by pressure test, internal inspection or other equivalent technology following the requirements in paragraph (a)(1) of this section except that the stress level referenced in subparagraph (a)(1)(ii) of this section would be adjusted to reflect the lower operating stress level. If an established interval is more than seven years, the operator must conduct by the seventh year of the interval either a confirmatory direct assessment in accordance with section 255.931 of this Part, or a low stress reassessment in accordance with section 255.941 of this Part.

(2) Reassessment by ECDA following the requirements in paragraph (a)(2) of this section.

(3) Reassessment by ICDA or SCCDA following the requirements in

paragraph (a)(3) of this section.

(4) Reassessment by confirmatory direct assessment at 7-year intervals in accordance with section 255.931 of this Part, with reassessment by one of the methods listed in paragraphs (1) through (3) of subdivision (b) of this section by year 20 of the interval.

(5) Reassessment by the low stress assessment method at 7-year intervals in accordance with section 255.941 of this Part with reassessment by one of the methods listed in paragraphs (1) through (3) of subdivision (b) of this section by year 20 of the interval.

(6) The following table sets forth the maximum reassessment intervals. Also refer to Appendix 14-E.II for guidance on Assessment Methods and Assessment Schedule for Transmission Pipelines Operating Below 30% SMYS. In case of conflict between the rule and the guidance in the Appendix, the requirements of the rule control.

An operator must comply with the following requirements in establishing a reassessment interval for a covered segment:

MAXIMUM REASSESSMENT INTERVAL

Assessment method	Pipeline operating at or above 50% SMYS	Pipeline operating at or above 30% SMYS, up to 50% SMYS	Pipeline operating below 30% SMYS
Internal Inspection Tool, Pressure Test or Direct Assessment...	10 years(*).....	15 years(*).....	20 years(**)
Confirmatory Direct Assessment...	7 years.....	7 years.....	7 years
Low Stress Reassessment..	Not applicable....	Not applicable...	7 years + ongoing actions

specified in
§ 255.941

(*) A Confirmatory direct assessment as described in § 255.931 must be conducted by year 7 in a 10-year interval and years 7 and 14 of a 15-year interval.

(**) A low stress reassessment or Confirmatory direct assessment must be conducted by years 7 and 14 of the interval.

.SO DOC 16B-255.941

NYCRR

255.941 Low stress reassessment.

(a) General. An operator of a transmission line that operates below 30% SMYS may use the following method to reassess a covered segment in accordance with section 255.939 of this Part. This method of reassessment addresses the threats of external and internal corrosion. The operator must have conducted a baseline assessment of the covered segment in accordance with the requirements of sections 255.919 and 255.921 of this Part.

(b) External corrosion. An operator must take one of the following actions to address external corrosion on the low stress covered segment.

(1) Cathodically protected pipe. To address the threat of external corrosion on cathodically protected pipe in a covered segment, an operator must perform an electrical survey (i.e. indirect examination tool/method) at least every 7 years on the covered segment. An operator must use the results of each survey as part of an overall evaluation of the cathodic protection and corrosion threat for the covered segment. This evaluation must consider, at minimum, the leak repair and inspection records, corrosion monitoring records, exposed pipe inspection records, and the pipeline environment.

(2) Unprotected pipe or cathodically protected pipe where electrical surveys are impractical. If an electrical survey is impractical on the covered segment an operator must-

(i) Conduct leakage surveys as required by section 255.706 of this Part, at 4-month intervals; and

(ii) Every 18 months, identify and remediate areas of active corrosion by evaluating leak repair and inspection records, corrosion monitoring records, exposed pipe inspection records, and the pipeline environment.

(c) Internal corrosion. To address the threat of internal corrosion on a covered segment, an operator must-

(1) Conduct a gas analysis for corrosive agents at least once each calendar year;

(2) Conduct periodic testing of fluids removed from the segment. At least once each calendar year test the fluids removed from each storage field that may affect a covered segment; and

(3) At least every seven (7) years, integrate data from the analysis and testing required by paragraphs (1) and (2) of subdivision (c) with applicable internal corrosion leak records, incident reports, safety related condition reports, repair records, patrol records, exposed pipe reports, and test records, and define and implement appropriate remediation actions.

.SO DOC 16B-255.943

NYCRR

255.943 Deviation from reassessment intervals.

(a) Waiver from reassessment interval in limited situations. In the following limited instances, the Department and OPS may allow a waiver from a reassessment interval required by section 255.939 of this Part if the Department and OPS find a waiver would not be inconsistent with pipeline safety.

(1) Lack of internal inspection tools. An operator who uses internal inspection as an assessment method may be able to justify a longer reassessment period for a covered segment if internal inspection tools are not available to assess the line pipe. To justify this, the operator must demonstrate that it cannot obtain the internal inspection tools within the required reassessment period and that the actions the operator is taking in the interim ensure the integrity of the covered segment.

(2) Maintain product supply. An operator may be able to justify a longer reassessment period for a covered segment if the operator demonstrates that it cannot maintain local product supply if it conducts the reassessment within the required interval.

(b) How to apply. If one of the conditions specified in paragraph (1) or (2) of subdivision (a) of this section applies, an operator may seek a waiver of the required reassessment interval. An operator must apply for a waiver in accordance with 49 U.S.C. section 60118(c), at least 180 days before the end of the required reassessment interval, unless local product supply issues make the period impractical. If local product supply issues make the period impractical, an operator must apply for the waiver as soon as the need for the waiver becomes known.

.SO DOC 16B-255.945

NYCRR

255.945 Measuring program effectiveness.

(a) General. An operator must include in its integrity management program methods to measure whether the program is effective in assessing and evaluating the integrity of each covered pipeline segment and in

protecting the high consequence areas. These measures must include the four overall performance measures specified in ASME/ANSI B31.8S (as described in section 10.3 of this Title), section 9.4, and the specific measures for each identified threat specified in ASME/ANSI B31.8S, Appendix A. An operator must submit the four overall performance measures as part of the annual report required by 49 CFR Section 191.17.

(b) External Corrosion Direct Assessment. In addition to the general requirements for performance measures in subdivision (a) of this section, an operator using direct assessment to assess the external corrosion threat must define and monitor measures to determine the effectiveness of the ECDA process. These measures must meet the requirements of section 255.925 of this Part.

.SO DOC 16B-255.947

NYCRR

255.947 Records.

An operator must maintain, for the useful life of the pipeline, records that demonstrate compliance with the requirements of sections 255.901 through 255.951 of this Part. At minimum, an operator must maintain the following records for review during an inspection.

(a) A written integrity management program in accordance with section 255.907 of this Part;

(b) Documents supporting the threat identification and risk assessment in accordance with section 255.917 of this Part;

(c) A written baseline assessment plan in accordance with section 255.919 of this Part;

(d) Documents to support any decision, analysis and process developed and used to implement and evaluate each element of the baseline assessment plan and integrity management program. Documents include those developed and used in support of any identification, calculation, amendment, modification, justification, deviation and determination made, and any action taken to implement and evaluate any of the program elements;

(e) Documents that demonstrate personnel have the required training, including a description of the training program, in accordance with sections 255.915 of this Part;

(f) Schedule required by section 255.933 of this Part that prioritizes the conditions found during an assessment for evaluation and remediation, including technical justifications for the schedule;

(g) Documents to carry out the requirements in sections 255.923 through 255.929 of this Part for a direct assessment plan;

(h) Documents to carry out the requirements in section 255.931 of this Part, for confirmatory direct assessment;

(i) Verification that an operator has provided any documentation or notification required by sections 255.901 through 255.951 of this Part to be provided to the Department and OPS.

.SO DOC 16B-255.949 NYCRR

255.949 Notifications requirements.

An operator must submit any notification required by sections 255.901 through 255.951 of this Part. Such notification must also be submitted to the U.S. Department of Transportation in accordance with 49 CFR section 192.949.

.SO DOC 16B-255.951 NYCRR

255.951 Reporting requirements.

An operator must submit any report required by sections 255.901 through 255.951 of this Part to the Department. Such reports must also be submitted to the U.S. Department of Transportation in accordance with 49 CFR section 192.951.

.SO DOC 16B-255.1001 NYCRR

Section 255.1001 Definitions that apply to sections 255.1003 through 255.1015.

The following definitions apply to a GDPIM plan:

(a) Excavation Damage means any impact that results in the need to repair or replace an underground facility due to a weakening, or the partial or complete destruction, of the facility, including, but not limited to, the protective coating, lateral support, cathodic protection or the housing for the line device or facility.

(b) Hazardous Leak means a leak as defined in section 255.811 of this Part.

(c) Gas Distribution Pipeline Integrity Management Plan or GDPIM plan means a written explanation of the mechanisms or procedures the operator will use to implement its GDPIM management program and to ensure compliance with sections 255.1003 through 255.1015.

(d) Gas Distribution Pipeline Integrity Management Program or GDPIM program means an overall approach by an operator to ensure the integrity of its gas distribution system.

(e) Mechanical fitting means a mechanical device used to connect sections of pipe. The term "Mechanical fitting" applies only to:

- (1) Stab Type fittings;
- (2) Nut Follower Type fittings;
- (3) Bolted Type fittings; or
- (4) Other Compression Type fittings.

(f) Small LPG Operator means an operator of a liquefied petroleum gas (LPG) distribution pipeline that serves fewer than 100 customers from a

single source.

.SO DOC 16B-255.1003

NYCRR

255.1003 General requirements of a GDPIM plan.

(a) Unless exempted in subdivision (b) of this section, Sections 255.1003 through 255.1015 of this Part prescribe the minimum requirements for a GDPIM program for any gas distribution pipeline covered under this Part, including liquefied petroleum gas systems. A gas distribution operator, other than a master meter operator or small LPG operator, must follow the requirements in sections 255.1005 through 255.1013 of this Part. A master meter operator or small LPG operator of a gas distribution pipeline must follow the requirements in section 255.1015 of this Part.

(b) Exceptions. Sections 255.1003 through 255.1015 of this Part do not apply to an individual service line directly connected to a transmission, gathering, or production pipeline.

.SO DOC 16B-255.1005

NYCRR

255.1005 Implementation requirements of a GDPIM plan.

No later than August 2, 2011 a gas distribution operator must develop and implement a GDPIM program that includes a written GDPIM plan as specified in section 255.1007.

.SO DOC 16B-255.1007

NYCRR

255.1007 Required elements of a GDPIM plan.

A written GDPIM plan must contain procedures for developing and implementing the following elements:

(a) Knowledge. An operator must demonstrate an understanding of its gas distribution system developed from reasonably available information.

(1) Identification of the characteristics of the pipeline's design and operations and the environmental factors that are necessary to assess the applicable threats and risks to its gas distribution pipeline.

(2) Consideration of the information gained from past design, operations, and maintenance.

(3) Identification of the additional information needed and provide a plan for gaining that information over time through normal activities conducted on the pipeline (for example, design, construction, operations or maintenance activities).

(4) Development and implementation of a process by which the GDPIM program will be reviewed periodically and refined and improved as needed.

(5) Provision for the capture and retention of data on any new pipeline installed. The data must include, at a minimum, the location where the new pipeline is installed and the material of which it is

constructed.

(b) Identify threats. The operator must consider the following categories of threats to each gas distribution pipeline:

- (1) corrosion;
- (2) natural forces;
- (3) excavation damage;
- (4) other outside force damage;
- (5) material, weld or joint failure (including compression coupling);
- (6) equipment failure;
- (7) incorrect operation; and
- (8) other concerns that could threaten the integrity of its pipeline.

An operator must consider reasonably available information to identify existing and potential threats. Sources of data may include, but are not limited to, incident and leak history, corrosion control records, continuing surveillance records, patrolling records, maintenance history, and excavation damage experience.

(c) Evaluate and rank risk. An operator must evaluate the risks associated with its distribution pipeline. In this evaluation, the operator must determine the relative importance of each threat and estimate and rank the risks posed to its pipeline. This evaluation must consider each applicable current and potential threat, the likelihood of failure associated with each threat, and the potential consequences of such a failure. An operator may subdivide its pipeline into regions with similar characteristics (e.g., contiguous areas within a distribution pipeline consisting of mains, services and other appurtenances; areas with common materials or environmental factors), and for which similar actions likely would be effective in reducing risk.

(d) Identify and implement measures to address risks. Determine and implement measures designed to reduce the risks from failure of its gas distribution pipeline. These measures would include an effective leak management program as required by sections 255.805 through 255.821, unless all leaks are repaired when found.

(e) Measure performance, monitor results, and evaluate effectiveness.

(1) Develop and monitor performance measures from an established baseline to evaluate the effectiveness of its GDPIM program. An operator must consider the results of its performance monitoring in periodically re-evaluating the threats and risks. These performance measures must include the following:

(i) Number of hazardous leaks either eliminated or repaired or total number of leaks if all leaks are repaired when found, categorized by cause;

- (ii) Number of excavation damages;
- (iii) Number of excavation tickets (receipt of information by the underground facility operator from the one-call notification center pursuant to Part 753 Protection of Underground Facilities, Subpart 753-5 One-Call Notification Systems of this Title);
- (iv) Total number of leaks either eliminated or repaired, categorized by cause;
- (v) Number of hazardous leaks either eliminated or repaired or total number of leaks if all leaks are repaired when found, categorized by material; and
- (vi) Any additional measures the operator determines are needed to evaluate the effectiveness of the operator's GDPIM program in controlling each identified threat.
- (f) Periodic evaluation and improvement. An operator must reevaluate threats and risks on its entire pipeline and consider the relevance of threats in one location to other areas. Each operator must determine the appropriate period for conducting complete program evaluations based on the complexity of its system and changes in factors affecting the risk of failure. An operator must conduct a complete program re-evaluation at least every five years. The operator must consider the results of the performance monitoring in these evaluations.
- (g) Report results. Report, on an annual basis, the four measures listed in paragraphs (e)(1)(i) through (e)(1)(iv) of this section, as part of the annual report required by 49 CFR Part 191.11.

.SO DOC 16B-255.1009

NYCRR

255.1009 Required report when compression couplings fail.

(a) Except as provided in paragraph (b) of this section, each operator of a distribution pipeline system must submit a report on each mechanical fitting failure, excluding any failure that results only in a non-hazardous leak, on a Department of Transportation Form PHMSA F-7100.1-2. The report(s) must be submitted in accordance with 49 CFR 191.12.

(b) The mechanical fitting failure reporting requirements in paragraph (a) of this section do not apply to the following:

- (1) Small LPG operator as defined in section 255.1001; or
- (2) LNG facilities.

.SO DOC 16B-255.1011

NYCRR

255.1011 Records an operator must keep.

An operator must maintain records demonstrating compliance with the requirements of sections 255.1003 through 255.1015 for at least 10 years. The records must include copies of superseded GDPIM plans

developed under sections 255.1003 through 255.1015.

.SO DOC 16B-255.1013

NYCRR

255.1013 Deviations from required periodic inspections.

(a) An operator may propose to reduce the frequency of periodic inspections and tests required in this Part on the basis of the engineering analysis and risk assessment required by this subpart.

(b) An operator must submit its proposal to the Public Service Commission as prescribed in sections 255.13(c). The Public Service Commission may accept the proposal on its own authority, with or without conditions and limitations, on a showing that the operator's proposal, which includes the adjusted interval, will provide an equal or greater overall level of safety.

(c) An operator may implement an approved reduction in the frequency of a periodic inspection or test only where the operator has developed and implemented an integrity management program that provides an equal or improved overall level of safety despite the reduced frequency of periodic inspections.

.SO DOC 16B-255.1015

NYCRR

255.1015 GDPIM plan requirements for a master meter or a small liquefied petroleum gas (LPG) operator.

(a) General. No later than August 2, 2011 the operator of a master meter or small LPG system must develop and implement a GDPIM program that includes a written GDPIM plan as specified in subdivision (b) of this section. The GDPIM program for these pipelines should reflect the relative simplicity of these types of pipelines.

(b) Elements. A written GDPIM plan must address, at a minimum, the following elements:

(1) Knowledge. The operator must demonstrate knowledge of its pipeline, which, to the extent known, should include the approximate location and material of its pipeline. The operator must identify additional information needed and provide a plan for gaining knowledge over time through normal activities conducted on the pipeline (for example, design, construction, operations or maintenance activities).

(2) Identify threats. The operator must consider, at minimum, the following categories of threats (existing and potential): corrosion, natural forces, excavation damage, other outside force damage, material or weld failure, equipment failure, and incorrect operation.

(3) Rank risks. The operator must evaluate the risks to its pipeline and estimate the relative importance of each identified threat.

(4) Identify and implement measures to mitigate risks. The operator must determine and implement measures designed to reduce the risks from

failure of its pipeline.

(5) Measure performance, monitor results, and evaluate effectiveness. The operator must monitor, as a performance measure, the number of leaks eliminated or repaired on its pipeline and their causes.

(6) Periodic evaluation and improvement. The operator must determine the appropriate period for conducting GDPIM program evaluations based on the complexity of its pipeline and changes in factors affecting the risk of failure. An operator must re-evaluate its entire GDPIM program at least every five years. The operator must consider the results of the performance monitoring in these evaluations.

(c) Records. The operator must maintain, for a period of at least 10 years, the following records:

(1) A written GDPIM plan in accordance with this section, including superseded GDPIM plans;

(2) Documents supporting threat identification; and

(3) Documents showing the location and material of all piping and appurtenances that are installed after the effective date of the operator's GDPIM program and, to the extent known, the location and material of all pipe and appurtenances that were existing on the effective date of the operator's GDPIM program.

256.21 General safety provisions

.SO DOC 16B-256.1 NYCRR

Section 256.1 Supervision. All inspections and maintenance shall be under the personal direction of competent engineers or supervisors designated by the responsible operating official.

.SO DOC 16B-256.2 NYCRR

256.2 Forms and reports. All pertinent data obtained as a result of an inspection shall be entered on forms appropriate for the purpose. These reports shall receive the prompt attention of the responsible operating official, who shall issue the necessary instructions when the data in the reports is indicative of conditions requiring immediate attention. Instructions so issued shall form part of the permanent records of the company.

.SO DOC 16B-256.3 NYCRR

256.3 Fences and enclosures. Holders shall be protected by suitable fencing or other adequate means shall be provided for preventing access to holder structures by unauthorized persons.

.SO DOC 16B-256.4 NYCRR

256.4 Fire protection. A suitable number of fire hydrants shall be located at a distance of not more than 500 feet from the holder shell to insure an adequate supply of water in case of fire, excepting in the outlying territory where no water supply is available and/or where there are no buildings within 300 feet of the holder. No permanent buildings shall be erected on company property within 100 feet of a holder shell, except buildings of fire resisting construction and no gas, oil or other highly inflammable material (except lubricating oil) shall be stored therein. All gasoline tanks for use of company vehicles shall be placed underground; no temporary structures shall be erected at a radial distance of less than 50 feet from the holder shell; no combustible material of any kind shall be stored in a temporary structure of wood or other inflammable material.

.SO DOC 16B-256.5 NYCRR

256.5 Access to waterless holders. The doors on stairways and external elevators leading to top of holder shall be locked at all times. The doors shall not be unlocked except by authorized employees. A separate set of keys shall be kept in a definite location available to authorized employees for use in cases of emergency.

.SO DOC 16B-256.6

NYCRR

256.6 Exterior and interior elevators--waterless holders. A test and inspection of the exterior and interior elevator safety devices, cables, hoists, rope baskets, drums, sheaves, etc., shall be made at least once a year by trained elevator inspectors not connected with the company or any of its affiliates. An inspection of the exterior elevator shall be made at least once a week by the company. Inspection of interior elevator shall be made as outlined herein under "Interior Inspectors--Waterless Holders."

.SO DOC 16B-256.7

NYCRR

256.7 First aid and protective equipment. All waterless holders shall have as a minimum the following items of equipment readily accessible at the specified locations:

(a) Two pieces of self-contained oxygen breathing apparatus of a manufacture approved by the United States Bureau of Mines located as follows: one on upper platform or balcony; one on piston.

(b) Four fire-proofed woolen blankets located as follows: two on upper platform or balcony; two on piston.

(c) A sufficient number of extra oxygen cylinders shall be readily available on the holder or adjacent thereto.

.SO DOC 16B-256.8

NYCRR

256.8 Interior inspection and maintenance crew--waterless holders. An interior inspection and maintenance crew shall be available at all times and shall consist of at least three men, one of whom is a foreman or his immediate assistant. One man during the period of inspection shall remain on the upper landing or gallery in such a position where he can be in constant communication with the men on the piston. Where practicable telephonic communication with the engineers or supervisor's office shall be available to the man on the upper landing or gallery. All members of the crew shall be instructed and periodically drilled in the Schaefer method of resuscitation.

.SO DOC 16B-256.9

NYCRR

256.9 Preliminary precautions before entering piston chamber. Employees before entering or descending to piston chamber shall satisfy themselves that the motor driven elevator, hand operated safety hoist and folding ladders, are in a proper operating condition and that all items described herein under "First Aid and Protective Equipment" are at their specified locations.

If any item of the mechanical apparatus is not operating properly, no descent to the piston shall be made until the item is placed in proper working order. The safety basket on the hand operated safety hoist shall

be ready for immediate use before descending to piston.

.SO DOC 16B-256.10

NYCRR

256.10 Tar pumping equipment--waterless holders. Tar and skimmer pumps, including electrical equipment, tar conditioners and tar pipe lines shall be inspected at least once a week for necessary repairs and adjustments. Riser pump run indicators, switches, float rods, and gears of timing device shall be examined and inspected daily. Emergency drives for pumps shall be tested at least once a month to insure immediate availability for service. Records of pump runs shall be taken at least once a day.

.SO DOC 16B-256.11

NYCRR

256.11 Interior inspections--waterless holders. (a) Interior inspections shall be made at least once a week and shall in general comprise the following:

Inspection of skylight glass on holder top.

Inspection of lenses in flood lights.

Examination of tar in seal to detect presence of oil and water.

Inspection of piston guide rollers, rubbing bars, and levers for proper lubrication and freedom of movement.

Inspection of sealing or packing rings.

Measuring position of piston to determine piston level.

Inspection of motors, drums, cables, sheaves, safety baskets, and lubrication of motor elevator and hand operated elevator.

(b) The depth of cup tar in each alternate bay shall be measured daily. If the atmospheric temperature is below 26 degrees Fahrenheit, the condition of tar in seal shall be examined at least every day. The tar in the cup and dam shall be sampled and analyzed at least once a week. When the piston of a waterless holder is of the flexible seal ring type an adequate supply of suitable anti-freeze liquid shall be stored on the piston to insure the prompt removal of any frost and ice that may form on the inner surface of the shell during cold weather.

.SO DOC 16B-256.12

NYCRR

256.12 Atmosphere above piston--waterless holders. At least once each week a test shall be made of the quality of the atmosphere above the piston. Smoking and use of devices of any kind that might ignite an explosive mixture shall not be permitted in the piston chamber. All electric lights in space above piston shall be of the vapor-proof type. Electric motors, electric wiring and devices for all uses shall be in accordance with the Fire Underwriters requirements.

.SO DOC 16B-256.13

NYCRR

256.13 Holder connections and piping. Valves for connections to

holders including relief valves for pressure tanks shall be inspected and tested for opening, closing and leakage at least twice a year. All necessary adjustments and repairs shall be made to restore each item to a high operating efficiency. Gate valves on inlet and outlet connections shall be tested for free movement, and inspection for lubrication of stems and condition of packing at least once a week. Where practicable, control valves shall be provided on inlet and outlet connections at a point distant from the holder, and inlet, outlet and by-pass valves shall be motorized. All piping in proximity to holders shall where practicable be placed underground.

.SO DOC 16B-256.14 NYCRR

256.14 Pressure tanks--foundations and supports. An annual examination shall be made of foundations and supports for all pressure tanks to ascertain if all saddles and piers are fully supporting the tank. Any settlement which will produce additional structural strains shall be corrected at once.

.SO DOC 16B-256.15 NYCRR

256.15 Interior inspection--water-seal holders. After a long period of continuous use, not to exceed 20 years, physical tests shall be made upon specimens cut from the thin material of the crown plating, or after a period of continuous service, not to exceed 25 years, the tank shall be de-watered and a thorough interior inspection made of the condition of the shell, steel work, the internal rollers, and the permanent frame. The holder shall not be restored to service until the necessary preliminary precautions and the repairs as indicated by the inspection have been made.

.SO DOC 16B-256.16 NYCRR

256.16 Holder-cups--water-seal holders. The temperature and depth of water in cups shall be recorded at least twice a day during freezing weather. Holder-cup heating apparatus shall be inspected at least twice a day when in operation. During non-freezing weather the depth of water in cups shall be recorded at least once a day.

.SO DOC 16B-256.17 NYCRR

256.17 Exterior inspections--all holders. An inspection of the exterior of all holders shall be made at least once a month to ascertain the condition of paint, shell, framing and holder top. Guide rollers on water seal holders shall be inspected for lubricating, alignment, and clearance at least once a month. During winter months a crew shall be available to insure prompt removal of any unsafe accumulation of snow and ice on the top and other parts of the holder.

.SO DOC 16B-256.18 NYCRR

256.18 Cutting, welding and caulking. The use of cutting and welding apparatus shall not be permitted on equipment used for the storage of gas or apparatus accessory thereto until permission has been obtained from the operating engineer directly in charge of the work who shall verify fully if all the necessary precautions against fire and explosion have been taken. A pressure tank shall not be caulked with air tools until the pressure within is less than five pounds.

.SO DOC 16B-256.19 NYCRR

256.19 Purging. The purging of water-seal gas holders, waterless gas holders and pressure holders preparatory to extensive maintenance or construction work on holders, valves and pipe connections, shall be done in accordance with the latest procedure recommended by the American Gas Association Committee and accepted by the American Gas Association. As of this date the accepted procedure is dated March 15, 1933.

This same procedure shall be followed before the holder under repair is restored to service.

.SO DOC 16B-256.20 NYCRR

256.20 Supplementary inspection--all holders. At least once a year an inspection shall be made of all holders by competent independent inspectors or engineers not in the employ of the company. The inspectors or engineers shall submit complete reports to the responsible operating official.

.SO DOC 16B-256.21 NYCRR

256.21 General safety provisions. (a) Smoking, open flames or devices that might ignite an explosive mixture shall not be permitted in the immediate vicinity of the holder.

(b) During the progress of minor construction or maintenance work on holders, all customary safety rules prevailing in the plant, as well as those hereinbefore described, shall be rigidly adhered to. On work of the foregoing nature, experienced men shall be employed under direct and competent supervision, and all crews shall consist of at least two men.

(c) All procedures recommended by the American Gas Association for the purging, operation and maintenance of gasworks equipment and apparatus, including mains, are to be followed.

.SO DOC 16B-PT257 NYCRR

PART 257

LIQUEFIED PETROLEUM GAS PLANTS

(Statutory authority: Public Service Law, §§ 65(1), 66(2))

Sec.

257.0 Scope

257.1 Compliance with standard code

- 257.2 Definitions
- 257.3 Notification of proposed construction
- 257.4 General plant considerations
- 257.5 Piping systems and components
- 257.6 Instrumentation and electrical services
- 257.7 Corrosion control
- 257.8 Fire protection and safety
- 257.9 Operating and maintenance procedures
- 257.10 Odorization of gas
- 257.11 Emergencies

.SO DOC 16B-257.0 NYCRR

Section 257.0 Scope. (a) General application. Every gas corporation engaged in the storage, terminaling, handling, transfer, vaporization or air-gas mixing of liquefied petroleum gas (LPG) within the State of New York shall comply with the rules set forth in this Part. Except where otherwise indicated, it is not intended that these rules be applied retroactively to existing installations or to those under construction as of the effective date of this order insofar as design, fabrication, installation or testing are concerned.

(b) Items to which this Part does not apply. This Part does not apply to:

- (1) design and fabrication of pressure vessels covered by the ASME Boiler and Pressure Vessel Code, section VIII, Pressure Vessels, Division 1 (as described in section 10.3 of this Title);
- (2) proprietary items of equipment, apparatus or instruments;
- (3) heat exchangers; or
- (4) prefabricated units which employ plate and longitudinal welds, as contrasted to pipe.

(c) Waiver. If a waiver of or deviation from the application of any rules prescribed in this Part is indicated because of special facts, application may be made to the Public Service Commission for waiver of or deviation from the rules and regulations in this Part. Each request shall include a full and comprehensive justification for such requested waiver or deviation, together with a proposed alternate rule to be considered for application to the condition(s) requiring the waiver or deviation.

.SO DOC 16B-257.1 NYCRR

257.1 Compliance with standard code.

(a) All LPG facilities within the State of New York are to be constructed, operated and maintained, except as otherwise provided in this Part, in accordance with Standard for the Storage and Handling of

Liquefied Petroleum Gases at Utility Gas Plants, ANSI/NFPA 59 (as described in section 10.3 of this Title)(referred to in this Part as NFPA 59), and such codes, specifications and standards referred to in the NFPA 59. Those provisions of the NFPA Code or associated references that have been indicated to be optional by phraseology, including "should," "preferably," "may" or "such as" (illustrative only), are mandatory in accordance with the intent of the NFPA Code except where an obvious contradiction occurs.

.SO DOC 16B-257.2

NYCRR

257.2 Definitions.

(a) When used in this Part, the terms below shall be defined as follows in lieu of or in addition to the NFPA definitions.

(b) Department. For this Part, department shall mean the Department of Public Service, Office of Electric, Gas and Water, Safety Section, or its successor.

(c) Facilities. For purposes of this Part, the term facilities shall be synonymous with the term systems as defined in NFPA.

.SO DOC 16B-257.3

NYCRR

257.3 Notification of proposed construction.

(a) Initial report. At least 30 days prior to the start of construction or reconstruction of any LPG facility, or portion thereof, each gas corporation shall file with the department a letter of intent, together with general design data for the proposed facility. The department shall be promptly notified of any significant change affecting the initial filing which may occur after submission of the initial filing. This requirement is intended to provide notice in those cases where piping alterations, installation of additional LP storage tanks, etc., could affect the safety of the facility. The requirement is not intended to apply to normal maintenance requiring replacement of small sections of existing pipe, etc.

(b) Test notification. At least five days prior to the commencement of any tests required by this Part during construction or reconstruction, the operator shall make notification to the department, except in an emergency shorter notice may be given.

(c) Final report. Before any LPG facility is placed into operation, a report shall be filed with the department certifying that the facility has been constructed and tested in accordance with the requirements of the rules prescribed in this Part. The report shall include a summary of tests made pursuant thereto. Detailed results of all tests shall be available for examination by representatives of the department.

.SO DOC 16B-257.4

NYCRR

257.4 General plant considerations.

LPG facilities shall meet the following requirements:

(a) Siting. Siting requirements shall be governed by NFPA-59 (as described in section 10.3 of this Title).

(b) Automatic plants. Automatic plants (i.e., remotely controlled or unmanned while operating) shall be equipped with flame detectors (which will cause the plant to fail-safe) and combustible gas detectors and such other equipment to transmit alarms to the appropriate gas corporation office, and in the event of fire to the local fire department. Heat sensors may be substituted for flame detectors within structures or in any other area where it can be demonstrated that the heat sensor is more effective than a flame detector.

(c) Wall openings. Wall openings shall be at or near floor level.

(d) Plant entrance and egress. Two separate and distinct entrances must be provided at each plant site to allow for emergency and/or fire fighting equipment to gain emergency access.

(e) Ventilation. All devices associated with calorimeters or calorimixers which may vent gas within the room in which the unit is located shall be vented through piping to the outside atmosphere.

(f) Compressor stations. If compressor stations are involved in the facility they shall meet all of the requirements of section 255.163 of this Title.

.SO DOC 16B-257.5

NYCRR

257.5 Piping systems and components.

(a) Pipe labeling. All plant piping shall be identified by color coding, printing or labeling. "Scheme for Identification of Piping Systems, ANSI/ASME A13.1" (as described in section 10.3 of this Title), or any existing corporation system may be used.

(b) Welding and welding inspection. (1) Notwithstanding NFPA 59, the quality of 100 percent if practical but not less than 90 percent of the shop and field welds in all piping two inches in nominal diameter or greater carrying LPG, flammable liquids, or flammable gas shall be nondestructively tested. Welds must meet requirements of API Standard 1104 (as described in section 10.3 of this Title) except for subsection 9.3.11 for undercutting to the root bead. Such undercutting shall not exceed two inches in length, or one sixth of the length of the weld, whichever is smaller. Nondestructive inspection may consist of radiographic examination, magnetic particle testing or ultrasonic. Other methods of nondestructive inspection may be used with prior approval of the department.

(2) When pipe carrying LPG, flammable liquids, or flammable gas has a

nominal diameter of less than two inches, or when the construction project involves such a limited number of welds that nondestructive inspection would be impractical and the pipe is intended to operate at 20 percent or less of the specified minimum yield strength, then paragraph (1) of this subdivision is not mandatory, provided the welding is inspected visually and approved by a person qualified to inspect welding.

(3) In addition to the nondestructive inspection requirements outlined in this subdivision, there shall be continual control of the quality of welding by qualified personnel.

(4) Each gas corporation constructing an LPG facility shall have written welding procedures and welder testing procedures for field welding conforming to API Standard 1104 (as described in section 10.3 of this Title). All welders employed to make welds shall be qualified under the welder testing procedure.

(c) Pressure testing. (1) Piping with a maximum operating pressure up to 100 PSIG shall be tested with a calibrated indicating or recording gauge that will indicate two PSIG increments or less, at 150 percent of the maximum operating pressure, or 90 PSIG, whichever is greater. The test must be conducted by maintaining the pressure at or above the test pressure for at least one hour after stabilization. The test medium shall be air, inert gas or water.

(2) Piping with a maximum operating pressure 100 PSIG and higher shall be tested with a calibrated recording pressure gauge that will indicate increments of five PSIG or less and shall be attached to the test section. The gauge must be calibrated hourly. Calibration is against a dead-weight tester, or equivalent device, attached to the test section. The test pressure shall be at least equal to 90 percent of SMYS or 1.5 times the maximum allowable operating pressure, whichever is less. The strength test must be conducted by maintaining the pressure at or above the test pressure for at least four hours after stabilization. The test medium shall be air, inert gas, or water unless the maximum operating pressure is in excess of 20 percent SMYS in which case the test medium must be water.

(3) Due consideration and care shall be observed due to effects of changes in ambient and test medium temperature in the case of above-ground or exposed piping.

(4) If a component other than pipe is the only item being replaced or added to a pipeline, a strength test after installation is not required, provided the manufacturer of the component certifies that:

(i) the component was tested to at least the pressure required for the

pipeline to which it is being added;

(ii) the component was manufactured under a quality control system that ensures that each item manufactured is at least equal in strength to a prototype and that the prototype was tested to at least the pressure required for the pipeline to which it is being added; or

(iii) the component carries a pressure rating established through applicable ASME/ANSI, MSS specifications (as described in section 10.3 of this Title) or by unit strength calculations as described in section 255.143 of this Title.

(d) Valve operators. Powered operators shall be provided on emergency shut-off valves eight inches and larger in size. Means for manual operation shall also be provided.

.SO DOC 16B-257.6

NYCRR

257.6 Instrumentation and electrical services.

(a) Provision shall be made for the continued operation, in an emergency, of those systems which are required to be operative for the fail-safe or safe-standby condition of the plant.

(b) Electric power supply. Secondary standby electric power supply either from a second feed or on-site power shall be provided in new and existing plants adequate to maintain service to facilities such as, but not limited to, fire detection and protection systems, vital instrumentation, and emergency controls in order to insure a fail-safe or safe standby condition at all times.

(c) Fail-safe alternate. Where a gas corporation can demonstrate that a plant will shut down in a fail-safe condition in the event of power failure, the requirements in subdivision (a) of this section for secondary standby electric power supply is not mandatory.

.SO DOC 16B-257.7

NYCRR

257.7 Corrosion control.

(a) Each operator shall establish procedures as required by section 257.9(g)(5) of this Part to implement the requirements of this section. These procedures, including those for the design, installation, operation and maintenance of cathodic protection systems, must be carried out by, or under the direction of, a person qualified by experience and training in pipeline corrosion control methods.

(b) Each cathodic protection system must provide a level of cathodic protection that complies with one or more of the applicable criteria contained in Appendix 14-D of this Title. If none of these criteria are applicable, the cathodic protection system must provide a level of cathodic protection at least equal to that provided by compliance with one or more of these criteria.

.SO DOC 16B-257.8

NYCRR

257.8 Fire protection and safety.

(a) Transfer precautions. Prior to bringing a tank car or tank vehicle into the transfer area, the atmosphere in the area shall be monitored with a combustible gas detector to insure that no flammable concentration of combustible gas is present.

(b) Annual operating test. An operating test of the plant shall be made at least once each calendar year with a maximum interval of 15 months and a minimum interval of 6 months between operating periods. The department shall be notified at least five days in advance of such a test. Compliance with this requirement can be achieved for those plants which, through system need, must be operated at least once during the annual cycle. If a company does achieve compliance in this manner, no prior notice is required.

(c) Combustible storage. Provision shall be made for the safe storage of test equipment associated with calorimeters or calorimixers, such as standard natural gas cylinders or other combustibles, so that their storage and maintenance effectively separates such flammables from sources of ignition.

.SO DOC 16B-257.9

NYCRR

257.9 Operating and maintenance procedures.

(a) Each gas corporation shall develop operating and maintenance procedures based on the provisions of this Part, its experience and its knowledge of its facilities and conditions under which they are operated. The procedures shall encompass operations, maintenance, and safety procedures. The procedures must be reviewed and updated by each gas corporation at intervals not exceeding 15 months, but at least once each calendar year.

(b) Each gas corporation shall make available for inspection by the department its written procedures for maintaining compliance with the operations and maintenance safety provisions of this Part. Written notification of revision to these written procedures shall be made to the department at least 30 days prior to the effective date. Minor revisions that do not affect the intent of the procedure may be implemented immediately.

(c) Each gas corporation shall have current written operating and maintenance procedures available at the LPG facility.

(d) Each gas corporation shall satisfactorily conform with its procedures.

(e) Safety procedures shall be those involving the safety of the facility, employees and the general public. They shall specify

equipment, piping, valves and other components to be inspected or tested, the time schedules of such inspections or tests, and the program to remedy deficiencies or failures uncovered.

(f) Written procedures shall, at a minimum include, as applicable, the following:

- (1) fire protection system;
- (2) operating signal devices;
- (3) relief valve inspection with a provision that all servicing and replacement of Rego valves shall be done by a two-person team, with the second person responsible for verifying that each step is taken in the procedure being performed;
- (4) structural inspection;
- (5) corrosion control;
- (6) functional inspection;
- (7) pumps and compressors;
- (8) valves and operators;
- (9) standby electrical system inspection;
- (10) communication equipment;
- (11) housekeeping;
- (12) leakage surveys;
- (13) LGP transfer operations;
- (14) regulator inspections for lockup; and
- (15) calorimeter inspection.

(g) Procedures shall be developed to notify service personnel, emergency crews and other involved employees when LPG is being distributed. All such employees shall be trained in the properties of LPG or mixtures with other gases, the changes of the lower explosive limit and specific gravity and effects of such changes.

.SO DOC 16B-257.10 NYCRR

257.10 Odorization of gas.

(a) Prior to the introduction of LPG, or such gas mixed with natural gas, synthetic natural gas (SNG), liquefied natural gas (LNG) or other gases into a transmission line or distribution main, the gas shall be odorized in conformance with section 255.625 of this Title. This odorization rate shall be adjusted as necessary to compensate for changes in the lower explosive limit of such mixtures.

.SO DOC 16B-257.11 NYCRR

257.11 Emergencies.

(a) Emergency plans. Each gas corporation shall set up an emergency plan to be implemented in the event of facility failures or other emergencies, acquaint appropriate maintenance and operating employees

with the applicable portions of the plan and establish liaison with appropriate public officials with respect to this plan. The plan shall be reviewed at intervals not exceeding 15 months, but at least once each calendar year, with all involved parties.

(b) Reports of accidents. Each gas corporation shall report all accidents where LPG facilities may be involved as a causal injury or death to any person, damage to property, or which would cause public concern because of coverage by news media. All such accidents shall be immediately reported by telephone to the department through its emergency notification system. The written account of the accident shall be submitted to the department within 30 days. This report shall set forth in a satisfactory manner the chronological sequence of events related to the accident including a detailed description of the:

- (1) accident;
- (2) response, action and investigation by the gas corporation; and
- (3) results and findings of the gas corporation.

(c) Emergency lists. Each gas corporation shall file during January of each year with the department and the municipality within which its LPG facilities are located, the names, addresses, and telephone numbers of responsible officials of said gas corporation who may be contacted in the event of an emergency. In the event of any changes therein within the year, immediate notification thereof shall be given to the department and the municipality.

.SO DOC 16B-258.1

NYCRR

258.1 Scope. (a) This Part prescribes minimum safety standards for liquid petroleum pipeline facilities. Every liquid petroleum pipeline corporation engaged in the transportation of liquid petroleum via pipeline within the State of New York is to comply with the rules set forth in this Part.

(b) The rules and regulations of this Part are considered adequate for safety under conditions normally encountered in the liquid petroleum industry. However, these rules and regulations cannot specifically provide for all abnormal or unusual conditions; nor can they specifically detail all methods for achieving compliance. Approved alternate methods may be used provided that all work performed within the scope of this Part shall meet or exceed the safety standards expressed or implied herein.

(c) If a waiver of or deviation from the application of any rules prescribed in this Part is indicated because of special facts, application may be made to the department for a waiver of or deviation from any rule in this Part. Each application shall include a full and comprehensive justification for the requested waiver or deviation.

(d) Except where otherwise indicated, this Part is not applied retroactively to existing installations insofar as design, fabrication, installation, and testing are concerned. The provisions of this Part are, however, applicable to existing facilities that are reconstructed, relocated, or reactivated, or that are considered for an increase in maximum operating pressure.

(e) This Part does not apply to:

(1) transportation of liquid petroleum through interstate pipelines regulated under 49 CFR 195.

(2) liquid petroleum refining, handling, processing, transfer, or storage facilities licensed under article 12 of the Navigation Law or registered under 6 NYCRR Part 612 including pipelines, or portions thereof, within the property boundaries of such facilities; and

(3) liquid petroleum production facilities.

.SO DOC 16B-258.2

NYCRR

258.2 Definitions. As used in this Part:

(a) Alarm means an audible or visible means of indicating to the controller that equipment or processes are outside operator-defined, safety-related parameters.

(b) Barrel means a unit of measure equal to 42 U.S. standard gallons.

(c) Department. For this Part, department shall mean the Department of Public Service, Office of Electric, Gas and Water, Pipeline Safety

Section, or its successor, Three Empire State Plaza, Albany, NY 12223-1350, (518) 474-5453, SAFETY@DPS.NY.GOV.

(d) Hazardous liquid means petroleum, petroleum products, anhydrous ammonia, or ethanol.

(e) Liquid petroleum means crude oil, natural gasoline, natural gas liquids, liquefied petroleum gas, liquid petroleum products, and any other such flammable liquids.

(f) Liquid petroleum pipeline corporation or corporation means any individual, firm, joint venture, partnership, corporation, association, municipality, cooperative association, or joint stock association owning and operating one or more liquid petroleum pipelines in the State of New York, and includes any trustee, receiver, assignee, or personal representative thereof.

(g) Maximum operating pressure means the maximum pressure at which a pipeline may be operated as determined in accordance with section 258.8 of this Part.

(h) Municipality means a city, county, village, or other political subdivision of New York State.

(i) Pipeline means all parts of those physical facilities through which liquid petroleum moves in transportation, including line pipe, valves and other appurtenances connected to the line pipe, pumping units, fabricated assemblies associated with pumping units, metering and delivery stations and fabricated assemblies therein.

(j) Pipeline facility means new and existing pipe, rights-of-way, and any equipment, facility, or building used in the transportation of liquid petroleum.

(k) Production facility means all wells, flowlines, piping, separation equipment, storage facilities, and auxiliary equipment used in the extraction of liquid petroleum from the ground.

(l) Transportation of liquid petroleum means the gathering or delivery of liquid petroleum by pipeline.

.SO DOC 16B-258.3

NYCRR

258.3 Compliance with standard code.

Except as otherwise provided in this Part, all liquid petroleum pipeline facilities within the State of New York shall be designed, constructed, tested, operated, and maintained, in accordance with Title 49, Code of Federal Regulations, Part 195, Transportation of Hazardous Liquids by Pipeline (as described in section 10.2 of this Title), herein referred to as 49 CFR 195 followed by a rule or section number. In addition, operators shall comply with Subpart G-Operator Qualifications, of 49 CFR 195.

.SO DOC 16B-258.4

NYCRR

258.4 Notification of proposed construction or pressure increase. (a)

(a) At least 30 days prior to the start of scheduled construction or reconstruction of any liquid petroleum pipeline, the corporation shall file with the Office of Gas and Water of the department in Albany, a letter of intent and a report of specifications as required under section 258.13 of this Part. The letter of intent need not include said specifications if the length of the pipeline is less than 500 feet. The Office of Gas and Water of the department in Albany shall be promptly notified in writing of any significant change affecting the initial filing.

(b) Before any liquid petroleum pipeline is placed in operation, a report shall be filed with the Office of Gas and Water of the department in Albany certifying the maximum operating pressure to which the pipeline is intended to be operated and also certifying that the pipeline has been constructed and tested in accordance with the rules prescribed herein.

(c) The maximum operating pressure of a liquid petroleum pipeline shall not be increased without the written permission of the Office of Gas and Water of the department in Albany. At least 90 days prior to a proposed increase in the maximum operating pressure of any liquid petroleum pipeline, an acceptable program stating the investigative, testing, and corrective measures (including cathodic protection, leak history, detection and repair of leaks, and specifications of pipe and other facilities) to be taken before the pressure increase is made, shall be submitted.

.SO DOC 16B-258.5

NYCRR

258.5 Minimum cover in commercial farmlands. Notwithstanding the requirements of 49 CFR 195.248(a) for cover over buried pipelines in cultivated areas, all pipe installed in areas actively cultivated for commercial farm purposes in at least two out of the last five years, as identified by the farmland operator, shall be installed with a minimum cover of 40 inches unless the farmland operator agrees to or requires a different depth.

.SO DOC 16B-258.6

NYCRR

258.6 Hydrostatic testing.

(a) Each new, reconstructed, relocated, replaced, or reactivated segment of pipeline must be hydrostatically tested in accordance with this section to substantiate the current or proposed maximum operating pressure. Any pipeline, or segment thereof, for which the maximum operating pressure is to be increased must also be tested in accordance

with this section.

(b) Notwithstanding the requirements of 49 CFR 195.302(c), the minimum test pressure at the lowest point of the test section shall be the lesser of:

- (1) 150 percent of the maximum operating pressure; or
- (2) the pressure that produces a pipe stress equivalent to 90 percent of the specified minimum yield strength of the pipe.

(c) Except as provided in subdivision (d) of this section, the test pressure must be maintained throughout the pipeline segment for at least 12 hours following stabilization.

(d) For a short segment of pipeline (100 feet or less) which is completely exposed and where its entire circumference may be readily examined visually for the detection of leaks, the test duration shall be at least four hours following stabilization and the test shall precede coating of the welds.

(e) A calibrated recording pressure gauge that indicates increments of five pounds per square inch or less shall be attached to the test section. The gauge must be calibrated at least hourly for the first and last two hours of the test. Calibration is against a deadweight tester attached to the test section.

(f) At least five business days prior to starting a test, the corporation shall notify the Office of Gas and Water of the department in Albany in writing. In order to maintain continuity of service during emergencies, shorter notice is permissible. The corporation shall also notify the officials of the municipalities wherein the test is to be conducted. Tests conducted under this section are not deemed satisfactory unless certified by an inspector of the Office of Gas and Water of the department.

.SO DOC 16B-258.7

NYCRR

258.7 Operations, maintenance, and emergency plan.

(a) Each liquid petroleum pipeline corporation subject to this Part shall establish and file with the Office of Gas and Water of the department in Albany a detailed written plan for conducting normal operations and maintenance, and for handling abnormal operations and maintenance, and for handling abnormal operations and emergencies.

(b) the operations, maintenance, and emergency plan shall include, as a minimum, procedures covering all items specified under 49 CFR 195.402. Revisions to these written procedures shall be submitted to the Office of Gas and Water of the department in Albany at least 30 days prior to the effective date thereof.

(c) Each corporation shall satisfactorily comply with the plan

submitted to the Office of Gas and Water of the department.

(d) During January of each year, each corporation shall file a list with the Office of Gas and Water of the department in Albany, and with all municipalities within which its facilities are located, indicating the names, addresses, and home and business telephone numbers of its responsible officials who may be contacted in the event of an emergency. Revisions to this list during the year shall be immediately reported to the Office of Gas and Water of the department in Albany and affected municipalities.

.SO DOC 16B-258.8

NYCRR

258.8 Maximum operating pressure. (a) Except for surge pressures and other variations from normal operations, the maximum operating pressure of any liquid petroleum pipeline shall not exceed any of the following:

(1) the internal design pressure of the pipe as determined in accordance with 49 CFR 195.106;

(2) the design pressure of any component of the pipeline;

(3) the test pressure divided by 1.5 for a pipeline, or any part thereof, which has been tested in accordance with section 258.6(b) (1) of this Part;

(4) 80 percent of the test pressure for a pipeline, or any part thereof, which has been tested in accordance with section 258.6(b) (2) of this Part; or

(5) for a pipeline, or any part thereof, which has not been tested in accordance with section 258.6 of this Part, 80 percent of the highest operating pressure to which the pipeline was subjected for four or more continuous hours during the period October 1, 1986 through September 30, 1991, or any successive five-year period thereafter, that is documented by recording charts or records made at the time the operations were conducted.

(b) The pressure in a pipeline during surges or other variations from normal operations shall not exceed 110 percent of the maximum operating pressure established under subdivision (a) of this section. Each corporation must provide adequate controls and protective equipment to control the pressure within this limit.

.SO DOC 16B-258.9

NYCRR

258.9 Leak detection system. Each liquid petroleum pipeline shall have an acceptable automatic leak detection system capable of initiating an alarm at a location that is continuously monitored by personnel employed by the corporation and/or is capable of effecting automatic shutdown of the pipeline.

.SO DOC 16B-258.10

NYCRR

258.10 Preservation of records.

(a) Notwithstanding the requirements of Parts 292, 293, or Appendix 4-A of this Title, and 49 CFR 195.404(c), the minimum period of retention for records necessary to prove compliance with this Part shall be three years. Longer periods of retention may be mandated by Parts 292, 293, or Appendix 4-A of this Title.

(b) Records pertaining to each repair made to a pipeline shall be maintained for as long as the pipeline remains in service.

(c) All records, or copies thereof, shall be kept on file in the State of New York and accessible to the staff of the department.

.SO DOC 16B-258.11

NYCRR

258.11 Accident reports. (a) Each corporation shall report all accidents in which liquid petroleum pipeline facilities may be involved and which may result in any of the following:

- (1) explosion or fire;
- (2) death or injury to any person;
- (3) property damage;
- (4) loss of 25 or more barrels of liquid;
- (5) escape of vaporized liquid to the atmosphere; or
- (6) could cause concern because of coverage by news media.

(b) All such accidents shall be immediately reported by telephone to the department through its gas emergency notification system.

(c) A written report of each accident in which liquid petroleum pipeline facilities were involved shall be submitted to the Office of Gas and Water of the department in Albany within 30 days. The report shall set forth a chronological sequence of events including a detailed description of the:

- (1) accident;
- (2) response, action, and investigations by the corporation; and
- (3) results and findings of the investigations.

.SO DOC 16B-258.12

NYCRR

258.12 Facility failure investigation. (a) Each corporation shall establish procedures to analyze each failure or accident for the purpose of determining its cause and to minimize the possibility of a recurrence. This shall include a procedure to select samples of the failed facility or equipment for laboratory examination when necessary.

(b) The procedures shall also provide for complete cooperation with the department's gas division in testing or surveying, including using independent consultants, any equipment or systems deemed necessary by the gas division for the investigation and analysis of any failure or accident to determine its cause and to minimize the possibility of a

recurrence.

.SO DOC 16B-258.13

NYCRR

258.13 Report of specifications for proposed construction.

(a) The following maps, sketches, and drawings shall be filed with and as a part of the report of specifications:

(1) three sets of current U.S. Geological Survey Maps (7-1/2 or 15 minute) clearly indicating the entire route of the proposed construction or reconstruction and an area of one mile on either side of the route; and

(2) three sets of strip maps and design drawings showing details of the proposed construction or reconstruction.

(b) A report of specifications identical in format with subdivision

(c) of this section shall be submitted in triplicate. Where additional space is necessary, supply the requested information on attached sheets.

(c)

STATE OF NEW YORK
DEPARTMENT OF PUBLIC SERVICE
REPORT OF SPECIFICATIONS FOR PROPOSED CONSTRUCTION
LIQUID PETROLEUM PIPELINE FACILITIES

General Information

1. Corporation name _____ Date _____

2. Pipeline route:

From _____

To _____

3. Length _____

4. New construction or reconstruction _____

5. Counties traversed _____

6. Towns traversed _____

7. Cities traversed _____

8. Villages traversed _____

9. Estimated starting date _____

10. Estimated completion date _____

11. Pipeline identification name or number _____

Pipe Specifications

1. Nominal outside diameter, D (inches) _____

2. Nominal wall thickness, t (inches) _____

3. Type and/or grade of pipe _____
4. Manufacturer of steel _____
5. Manufacturer of pipe _____
6. Longitudinal joint type _____
7. Specified minimum yield strength, SMYS (psi) _____
8. Nominal ultimate strength (psi) _____
9. Fracture toughness (minimum Charpy Energy in ft. lbs. at 20μF for buried pipe, -20μF for exposed pipe) _____
10. Mill test pressure (psi) _____
11. Is pipe new or used _____

12. If used pipe is employed, describe inspection and reconditioning procedures _____

13. Are the physical and chemical specifications of pipe to be verified by outside laboratories? If yes, by whom? _____

Operating Pressure and Stress

1. Maximum operating pressure, P (psi) _____
2. Calculated pipe stress (hoop stress) = $PD/2t$ (psi) _____
3. Ratio of pipe stress to SMYS (percent) _____

Welding

1. Percentage of welds to be radiographed, by location _____
2. How will the corporation certify the radiographic technician _____

Railroad, Road, and Water Crossings

1. Railroad and road crossings:

Attach a list giving the location of each and indicating whether each is cased or uncased (if uncased, provide reason), and if heavier wall carrier pipe is used.

2. Lake, river, stream, or creek crossings:

Attach a list giving the location of each and describing any special construction precautions to be followed.

3. Pipeline encroachments:

Attach a list of any encroachments to railroads or roads, by location, and describe any special construction precautions to be followed.

Valves (see 49 CFR 195 Subpart H - Corrosion Control)

1. Number and spacing of manual sectionalizing valves _____

2. Type, make, and location of any automatic valves to be used _____

Minimum Cover and Clearance (see 49 CFR 195.245, 250)

If the minimum prescribed cover and/or clearance cannot be maintained, indicate the location, nature of problem, cover and/or clearance to be maintained, and any special precautions to be observed.

Corrosion Control (see 49 CFR 195 Subpart H - Corrosion Control)

1. Type of field coating:

For pipe (if not factory coated) _____

For welds and fittings _____

2. Type of coating test:

Before backfill _____

After backfill _____

3. Type of cathodic protection system

Pressure and Leakage Tests (see section 258.6 of this Part)

1. Test pressure

2. Test

medium _____

3. Test duration

4. Length of test section(s) _____

Right-of-Way

1. Has necessary right-of-way been obtained from each party having interest in the right-of-way? If not, what is the status?

2. Have formal approval and all necessary permits been obtained from governmental agencies? If not, what is the status?

Products Transported

Pipeline certified to transport the following liquid petroleum products:

1.

2.

3.

4.

5.

.SO DOC 16B-259.1

NYCRR

Section 259.1 Scope.

(a) This Part prescribes minimum safety standards for all LNG facilities within the State of New York, except those facilities subject to the jurisdiction of the Federal Energy Regulatory Commission, or otherwise exempted under 49 CFR 193.2001(b).

(b) As used in this Part department shall mean the Department of Public Service, Office of Electric, Gas and Water, Pipeline Safety Section, or its successor, Three Empire State Plaza, Albany, NY 12223-1350, (518) 474-5453, Safety@dps.ny.gov.

.SO DOC 16B-259.2 NYCRR

259.2 Compliance with standard code.

All LNG facilities within the State of New York shall, except as otherwise provided in this Part, conform to title 49, Code of Federal Regulations, part 193, Liquefied Natural Gas Facilities; Federal Safety Standards (as described in Section 10.2 of the Title).

.SO DOC 16B-259.3 NYCRR

259.3 Notification of proposed construction.

(a) Initial report. At least 90 days prior to the start of construction or reconstruction of any LNG facility, each gas corporation shall file with the Office of Gas and Water of the Department of Public Service, a letter of intent, together with the design data and the specifications for the proposed facility. The department shall also be promptly notified of any significant change affecting the initial filing, which may occur after submission of the initial filing.

(b) Final report. Before any LNG facility is placed in operation, a report shall be filed with the department certifying that the facility has been constructed and tested in accordance with the requirements of this Part. A summary of the results of all tests shall accompany the final report.

.SO DOC 16B-259.4 NYCRR

259.4 Procedures.

Each gas corporation shall file with the Office of Gas and Water of the Department of Public Service its written procedures established in compliance with 49 CFR parts 193.2503, 2509, 2513 and 2605. Revisions to these written procedures shall also be submitted to the Office of Gas and Water.

.SO DOC 16B-259.5 NYCRR

259.5 Reports of accidents or leaks.

(a) Each gas corporation shall report all accidents that may involve LNG facilities as a causal factor that involves injury or death to any person, any damage to the property of others, significant damage to plant property, or would cause public concern if reported by the communications media. All such accidents shall be immediately reported by telephone to the department through its gas emergency notification system. A written report of the accident shall be submitted to the department within 30 days. This report shall detail, in chronological sequence, all events related to the accident, including a description of the accident itself, the cause, and the type of response by the gas corporation to the accident as well as all proposed remedial action to be taken to prevent recurrence.

(b) Each corporation shall immediately report all unplanned spills or leaks that:

- (1) require taking any segment of pipeline or process area out of service;
- (2) result in ignition injury or death;
- (3) cause failure of a structural support; or
- (4) in the judgment of the operator, could cause public concern because of coverage by the news media.

(c) Each gas corporation shall file with the department and the municipality within which its LNG facilities are located, the names, addresses, and telephone numbers of responsible corporate officials who may be contacted in the event of an emergency. Said filing is required by January 31st of each year. In the event of any changes during the year, immediate notification shall be given to the department and the effected municipality.

.SO DOC 16B-259.6 NYCRR

259.6 Internal shutoff valves.

Notwithstanding section 259.1 of this Part, any LNG tank temporarily taken out of service and purged to atmosphere shall be fitted with an internal shutoff valve meeting the requirements of NFPA 59A Section 6.3.3.3 (as described in Section 10.3 of this Title) prior to being put back into service.

.SO DOC 16B-261.1 NYCRR

Section 261.1 Scope.

This Part prescribes certain safety requirements related to the operation and maintenance of gas appliances and gas piping located beyond the outlet of the customer's meter set assembly. Unless specified herein, this Part does not apply to the design, fabrication, nor installation of piping and appliances beyond the outlet of the customer's meter set assembly (refer to the National Fuel Gas Code NFPA 54, as described in section 10.3 of this Title).

.SO DOC 16B-261.3 NYCRR

261.3 Definitions.

(a) As used in this Part:

(1) Apartment building means a building, either rented, leased, let or hired out, or containing separately owned condominium or cooperative apartment units, to be occupied or is occupied as the residence of three or more families living independently of each other.

(2) Operator means a person who engages in the transportation of gas.

(3) Person means any individual, firm, joint venture, partnership, corporation, association, State, municipality, cooperative association, or joint stock association, and including any trustee, receiver, assignee, or personal representative thereof.

(4) Transportation of gas means the transmission or distribution of gas by pipeline or the storage of gas.

.SO DOC 16B-261.15 NYCRR

261.15 Operation and maintenance plan.

(a) Each operator shall establish and file with the Albany office of the Gas Division of the New York State Department of Public Service a

detailed written operating and maintenance plan for complying with all the provisions of this Part. This operating and maintenance plan shall include, as a minimum, procedures required to comply with the provisions of the leakage survey, carbon monoxide, and warning tag sections of this Part.

(b) Revisions to these written procedures shall be submitted to the Gas Division at least 30 days prior to the effective date thereof.

(c) The procedures shall include but not be limited to the requirements of this Part and shall be designed to make customers aware of hazardous conditions relating to their gas appliances and piping installations.

.SO DOC 16B-261.17

NYCRR

261.17 Leakage survey. (a) Whenever the operator performs a leakage survey, as required by section 255.706 or 255.723 of this Title, said survey is to include all known underground gas piping beyond the outlet of the customer's meter, excluding customer piping in industrial complexes.

(b) A building used exclusively for metering and/or regulating gas is not considered the customer's building for purposes of compliance with this requirement.

(c) In the case of nonresidential customers, the customer may accept responsibility for the required leakage survey; however, the operator must maintain appropriate records and verify that the leakage survey was completed.

.SO DOC 16B-261.19

NYCRR

261.19 High-pressure piping. As part of the procedures developed in compliance with section 261.15 of this Part, the operator's plan must provide for annual notification to the customer and owner that:

- (a) they receive gas in excess of 14 inches water column;
- (b) their piping system, including pressure reducing equipment, must meet the requirements of NFPA 54;
- (c) they must contact the operator for a safety review whenever a change in piping or appliances is planned; and
- (d) an inspection of their regulators by qualified individuals should be conducted.

.SO DOC 16B-261.21

NYCRR

261.21 Carbon monoxide prevention.

(a) When an operator has access to a residential premises for the purpose of responding to a complaint of a gas leak or odor, all operating vent-connected gas utilization equipment that are in the on-cycle shall be checked for flue spillage or possible malfunction,

even if the inquiry into the cause of the visit has been satisfied.

(b) This check shall be made in accordance with paragraph 8.6 of the National Fuel Gas Code NFPA 54 (as described in section 10.3 of this Title).

(c) The operator shall check draft hoods for indications of improper flue draft; and, if this check fails, the operator shall treat it as a Class A condition under section 261.57(b)(3) of this Part.

(d) The operator is also to conduct a visual inspection of the service regulator vent if working in the vicinity of the regulator and it is accessible.

(e) Notwithstanding the provisions of subdivision (a) of this section, the operator need only attempt to check vent-connected appliances located in the basement or utility room in multifamily dwellings once in the 12-month period beginning October 1st each year.

(1) If the operator finds the basement or utility room locked, he must attempt to locate the superintendent in order to gain access.

(2) If access cannot be gained, the operator must document that no check was made for this reason.

(3) If another leak or odor complaint is investigated at the same location in the same 12-month period, the operator must again attempt to gain access.

(4) Notwithstanding paragraphs (1) and (2) of this subdivision, if there is reason to suspect that a gas leak or CO condition exists in an inaccessible area, the operator must call the police or fire department for assistance to gain access.

(f) Except as required under paragraph (e)(4) of this section, an operator need not comply with the preceding subdivisions of this section for residences covered by a municipal regulation requiring an annual inspection of heating equipment, including a check for flue spillage, so long as the Gas Division is provided with sufficient evidence that the municipality has an effective program to ensure compliance with its regulations.

(g) If the operator is satisfied that the cause of the customer's complaint is not a natural gas leak or a condition related to gas use, such as CO or flue spillage, he shall nevertheless attempt to identify the odor which prompted the customer complaint.

(h) When an operator lights or relights a vent-connected gas utilization appliance or responds to a complaint of a suspected CO condition, the appliance shall be checked for flue spillage or possible malfunction in accordance with paragraph 8.6 of the National Fuel Gas Code NFPA 54 (as described in section 10.3 of this Title).

.SO DOC 16B-261.51

NYCRR

261.51 Warning tag procedures.

(a) Each operator shall file and maintain warning tag procedures with the Gas Division of the New York State Department of Public Service.

(b) The procedures shall include but not be limited to the requirements of this Part and be designed to make customers aware of hazardous conditions relating to their gas appliances and piping installations.

(c) The procedures shall specify categories of employees who will be deemed to possess the training, knowledge and experience necessary to recognize hazardous conditions that warrant the issuance of a warning tag.

.SO DOC 16B-261.53

NYCRR

261.53 HEFPA liaison. Whenever the disconnection results in a customer being unable to use the heating facilities, the operator shall notify its Home Energy Fair Practices Act (HEFPA) liaison with local social services departments (section 11.5(c)(2)(v) of this Title).

.SO DOC 16B-261.55

NYCRR

261.55 Warning tag inspection. (a) Whenever an operator recognizes a condition whereby a gas appliance or gas line may cause a hazard to life or property, if allowed to operate in its current condition, the employee shall attach a warning tag to the appliance, piping or meter.

(b) The warning tag shall state the Class of the hazardous condition, the actions to be taken by the customer and shall recommend that the customer contact the company for a reinspection.

(c) The operator is not required to conduct a complete inspection of the entire installation every time it is on a customer's premises.

(d) The operator is to conduct a visual inspection of the service regulator vent when working in the vicinity of the regulator and it is accessible.

.SO DOC 16B-261.57

NYCRR

261.57 Warning tag: Class A condition.

(a) A Class A condition presents an immediate hazard requiring the operator to shut off the gas and lock the meter, unless the operator can effectively isolate the affected area from the rest of the system.

(b) Class A conditions include, but are not limited to:

(1) any leaking gas piping inside the building which cannot be stopped by temporary or permanent repair means;

(2) any space or water heating appliance that is not properly venting and is discharging carbon monoxide;

(3) any venting system, used to convey flue gases, that is defective,

obstructed or inoperable; and

(4) heat exchangers which are corroded or cracked beyond repair or blocked and which cause products of combustion to enter the warm air distribution system.

.SO DOC 16B-261.59

NYCRR

261.59 Warning tag: Class B condition. (a) A Class B condition presents an immediate hazard requiring the operator to shut off the gas but not to lock the meter.

(b) If an extreme hardship would result (imminent danger to health and property) by shutting off the gas and the operator can render the condition temporarily safe, the gas may remain on for Class B conditions other than the one described in paragraph (c) (1) of this section.

(1) If the operator leaves the gas on and is not notified within five calendar days that repairs have been made, it shall conduct a reinspection and shall shut off the gas if the hazardous condition has not been permanently repaired.

(c) Class B conditions include, but are not limited to:

(1) any leaking gas appliance inside the building which cannot be stopped by temporary or permanent repair means;

(2) any gas appliance with a missing or inoperative required safety device;

(3) defective or improper wiring which may cause an unsafe condition on a gas appliance;

(4) any space heater or water heater with an inoperative thermostat;

(5) open flame burners too close to combustibles; and

(6) any unit other than a heating or hot water appliance having visual indications of improper combustion.

.SO DOC 16B-261.61

NYCRR

261.61 Warning tag: Class C condition.

(a) A Class C condition does not present an immediate hazard, but if not corrected, may become hazardous. The operator may leave the gas on.

(b) Class C conditions include, but are not limited to:

(1) any gas pipe or appliance which was leaking and has been temporarily repaired;

(2) situations where the clearance between combustibles and appliances or vent connectors are less than required but no immediate fire hazard exists;

(3) any gas piping or appliance connection identified as improper or inappropriate;

(4) vent connectors that have a rusty condition, no draft diverter where required, reduced size or are incorrectly installed but drawing

satisfactorily;

(5) improperly installed appliances such as those identified in the National Fuel Gas Code -- NFPA 54 (as described in section 10.3 of this Title); and

(6) any properly vented appliance developing excessive carbon monoxide.

(c) For vented room heaters, excessive carbon monoxide shall be defined as 0.02 percent CO in an air-free sample of the flue gases when tested in an area having a normal oxygen supply.

(d) For all other vented appliances, excessive carbon monoxide shall be defined as 0.04 percent CO in an air-free sample of the flue gases when tested in an area having a normal oxygen supply.

.SO DOC 16B-261.63

NYCRR

261.63 Warning tag: action and follow-up. (a) When a Class A condition is discovered, the operator shall lock off the gas supply at the meter, unless the affected piping or gas-fired appliance can be effectively isolated and secured from the rest of the system, and issue a warning tag.

(1) If the operator is not advised by the customer within 10 calendar days that the condition has been corrected and service is ready to be reinstated, the operator shall contact the customer no later than the end of the first business day after the 10-day period to determine the status of service.

(b) When a Class B condition is discovered, the operator shall, unless an extreme hardship would result, shut off the gas supply at the appliance and issue a warning tag.

(c) When a Class C condition is discovered, the operator shall issue a warning tag; gas service may be left on.

(d) Whenever a warning tag is issued, regardless of the class of the condition, the operator shall attempt to notify the customer and obtain a signature acknowledging receipt of such notice.

(1) In apartment buildings, the operator shall notify the property owner or agent (such as superintendent, custodian or maintenance worker) of the condition and state the corrections that are required.

(2) If the operator cannot obtain a signature, an additional notice shall be provided to the customer stating that a notice of hazardous condition tag has been issued and the corrective actions that are required.

(e) In the case of Class A conditions in New York City, the operator shall provide a written notification, including the address, date the warning tag was issued and a description of the hazardous condition, to

the New York City Department of Buildings.

(f) In the case of Class A or B conditions in apartment buildings, the operator shall post a notice in a conspicuous place at or within the dwelling stating that a warning tag has been issued and including a description of the condition.

(g) The operator shall remove the warning tag when gas service is restored, or a requested inspection is made and the operator determines that the condition has been corrected.

(h) Whenever a Class C condition described in section 261.61(b)(6) of this Part is found between August 1st and January 31st of the same heating season, the operator shall conduct a reinspection within three months. If the condition is found between February 1st and July 31st of the same year, the inspection is to be conducted prior to the start of the next heating season.

.SO DOC 16B-261.65

NYCRR

261.65 Warning tag records. (a) The operator shall maintain warning tag records which, as a minimum, shall indicate that the operator issued a warning tag, whether or not a signature was obtained, and the actions taken regarding the supply of gas to the faulty appliance or piping. The records shall also include the date of issuance, the nature of the hazardous condition, the signature and/or name of the person notified.

(b) In the case of all Class A conditions, and Class B and C conditions where reinspection was requested, the records shall also include any follow-up actions taken, the date and results of any reinspections and the date when the warning tag was removed.

.SO DOC 16B-262.1 NYCRR

Section 262.1 Scope.

(a) This part requires operators of pipeline facilities subject to part 192, 193 or 195 of Title 49 of the Code of Federal Regulations (49 CFR) to test employees for the presence of prohibited drugs and provide an employee assistance program.

(b) A description of Parts 40, 190, 192, 193, 195 or 199 of Title 49 of the Code of Federal Regulations (49 CFR), as referenced in this Part, may be found in Section 10.2 of this Title.

.SO DOC 16B-262.2 NYCRR

262.2 Applicability.

(a) This Part applies to pipeline operators, only with respect to pipeline employees located within the territory of the United States.

(b) This Part does not apply to any person for whom compliance with this Part would violate the domestic laws or policies of another country.

(c) This Part does not apply to covered functions performed on:

(1) "Master meter systems" defined in section 262.3 of this Part, or

(2) Pipelines that transport only petroleum gas or petroleum gas/air mixtures.

.SO DOC 16B-262.3

NYCRR

262.3 Definitions.

As used in this Part:

(a) Accident means an incident reportable under 49 CFR Part 191 (as described in section 10.2 of this Title) involving gas pipeline facilities or LNG facilities, or an accident reportable under 49 CFR Part 195 (as described in section 10.2 of this Title) involving hazardous liquid or carbon dioxide pipeline facilities.

(b) Administrator means the Administrator of the Research and Special Programs Administration (RSPA) of the Federal Department of Transportation (DOT), or his or her delegate.

(c) Covered employee, employee, or individual to be tested means a person who performs a covered function, including persons employed by the operator, contractors engaged by the operator, and persons employed by such contractors.

(d) Covered function means an operation, maintenance, or emergency-response function that is performed on a pipeline or LNG facility and the function is regulated by 49 CFR part 192, 193, or 195.

(e) Department means New York State Department of Public Service as certified under the pipeline safety laws (49 U.S.C. 60101 et seq.).

(f) DOT procedures means the Procedures for Transportation Work Place Drug Testing Programs published by the Office of the Secretary of Transportation of the United States in 49 CFR Part 40 (as described in section 10.2 of this Title).

(g) Fail a drug test means that the confirmation test result shows positive evidence of the presence under DOT procedures of a prohibited drug in an employee's system.

(h) Master meter system means an underground/buried pipeline system for distributing gas within, but not limited to, a definable area, such as a mobile home park, housing project, or apartment complex, where the operator purchases metered gas from an outside source for resale through an underground/buried gas distribution pipeline system. The gas

distribution pipeline system supplies the ultimate consumer who either purchases the gas directly through a meter or by other means such as by rents.

(i) Operator means a person who owns or operates pipeline facilities subject to 49 CFR Part 192, 193 or 195 (as described in section 10.2 of this Title).

(j) Pass a drug test means that initial testing or confirmation testing under DOT Procedures does not show evidence of the presence of a prohibited drug in a person's system.

(k) Performs a covered function includes actually performing, ready to perform or immediately available to perform a covered function.

(l) Positive rate means the number of positive results for random drug tests conducted under this Part plus the number of refusals of random tests required by this Part, divided by the total number of random drug tests conducted under this Part plus the number of refusals of random tests required by this Part.

(m) Prohibited drug means any of the following substances specified in Schedule I or Schedule II of the Controlled Substances Act 21 U.S.C. 801.812 (1981 & 1987) (Cum. P.P.): marijuana, cocaine, opiates, amphetamines, and phencyclidine (PCP).

(n) Refused to submit, refuse, or refuse to take means behavior consistent with DOT Procedures concerning refusal to take a drug test or refusal to take an alcohol test.

(o) RSPA means the Research and Special Programs Administration of the federal Department of Transportation.

.SO DOC 16B-262.5 NYCRR

262.5 DOT procedures. The anti-drug and alcohol programs required by this Part must be conducted according to the requirements of this Part and the DOT procedures. Terms and concepts used in this Part have the same meaning as in the DOT procedures. Violations of DOT procedures with respect to anti-drug and alcohol programs required by this Part are violations of this Part.

.SO DOC 16B-262.7 NYCRR

262.7 Stand-down waivers.

(a) Each operator who seeks a waiver under 49 CFR 40.21 from the stand-down restriction must submit an application for waiver in duplicate to the Office of Gas and Water of the Department of Public Service.

(b) Each application must:

(1) identify section 40.21 of 49 CFR as the rule from which the waiver is sought;

(2) explain why the waiver is requested and describe the employees to be covered by the waiver; and

(3) contain the information required by 49 CRF 40.21 and any other information or arguments available to support the waiver requested.

.SO DOC 16B-262.23

NYCRR

262.23 Recordkeeping.

(a) Each operator shall keep the following records for the periods specified and permit access to the records as provided by subdivision

(b) of this section:

(1) Records that demonstrate the collection process conforms to this Part must be kept for at least three years.

(2) Records of employee drug test results that show employees who had a positive test, and the type of test failed (e.g., post-accident), and records that demonstrate rehabilitation, if any, must be kept for at least five years, and include the following information:

(i) the functions performed by employees who failed a drug test;

(ii) the prohibited drugs which were used by employees who failed a drug test;

(iii) the disposition of employees who failed a drug test (e.g., termination, rehabilitation, leave without pay).

(3) Records of employee drug test results that show employee passed a drug test must be kept for at least one year.

(4) A record of the number of employees tested, by type of test (e.g., post-accident), must be kept for at least five years.

(5) Records confirming that supervisors and employees have been trained as required by this Part must be kept for at least three years.

(b) Information regarding an individual's drug testing results or rehabilitation may be released only upon the written consent of the individual, except that such information must be released regardless of consent to the administrator or the representative of the Department upon request as part of an accident investigation. Statistical data related to drug testing and rehabilitation that is not name-specific and training records must be made available to the administrator or the representative of the Department upon request.

(c) The laboratory shall release information related to a positive drug test of an individual to the individual, the employer, or the decisionmaker in a lawsuit, grievance, or other proceeding initiated by or on behalf of the individual and arising from a certified positive drug test.

.SO DOC 16B-262.100

NYCRR

262.100 Purpose.

The purpose of these Drug Testing rules is to establish programs designed to help prevent accidents and injuries resulting from the use of prohibited drugs by employees who perform covered functions for operators of certain pipeline facilities subject to 49 CFR Part 192, 193, or 195.

.SO DOC 16B-262.101

NYCRR

262.101 Anti-drug plan.

(a) Each operator shall maintain and follow a written anti-drug plan that conforms to the requirements of this Part and the DOT procedures. The plan must contain:

(1) methods and procedures for compliance with all the requirements of this Part, including the employee assistance program;

(2) the name and address of each laboratory that analyzes the specimens collected for drug testing;

(3) the name and address of the operator's medical review officer and Substance Abuse Professional; and

(4) procedures for notifying employees of the coverage and provisions of the plan.

(b) The administrator or Department may, after notice and opportunity for hearing as provided in 49 CFR 190.206, require the operator to amend its plans and procedures as necessary to provide a reasonable level of safety.

.SO DOC 16B-262.103

NYCRR

262.103 Use of persons who fail or refuse a drug test.

(a) An operator may not knowingly use as an employee any person who:

(1) fails a drug test required by this Part and the medical review officer makes a determination under 262.15(d)(2); or

(2) refuses to take a drug test required by this Part.

(b) Paragraph (a)(1) of this section does not apply to a person who has:

(1) passed a drug test under DOT procedures;

(2) been recommended by the medical review officer for return to duty in accordance with DOT procedures and have been determined by a substance abuse professional to have successfully completed required education or treatment; and

(3) not failed a drug test required by this Part after returning to duty.

.SO DOC 16B-262.105

NYCRR

262.105 Drug tests required. Each operator shall conduct the following drug tests for the presence of a prohibited drug:

(a) Pre-employment testing. No operator may hire or contract for the

use of any person as an employee unless that person passes a drug test or is covered by an anti-drug program that conforms to the requirements of this Part.

(b) Post-accident test. As soon as possible but no later than 32 hours after an accident, an operator shall drug test each employee whose performance either contributed to the accident or cannot be completely discounted as a contributing factor to the accident. An operator may decide not to test under this paragraph but such a decision must be based on the best information available immediately after the accident that the employee's performance could not have contributed to the accident or that, because of the time between that performance and the accident, it is not likely that a drug test would reveal whether the performance was affected by drug use.

(c) Random testing.

(1) Except as provided in paragraphs (c) (2) through (4) of this section, the minimum annual percentage rate for random drug testing shall be 50 percent of covered employees.

(2) The Administrator's decision to increase or decrease the minimum annual percentage rate for random drug testing is based on the reported positive rate for the entire industry. All information used for this determination is drawn from the drug Management Information System (MIS) reports required by Part 199 of Title 49 of the Code of Federal Regulations (49 CFR). In order to ensure reliability of the data, the Administrator considers the quality and completeness of the reported data, may obtain additional information or reports from operators, and may make appropriate modifications in calculating the industry positive rate. Each year, the Administrator will publish in the Federal Register the minimum annual percentage rate for random drug testing of covered employees. The new minimum annual percentage rate for random drug testing will be applicable starting January 1 of the calendar year following publication.

(3) When the minimum annual percentage rate for random drug testing is 50 percent, the Administrator may lower this rate to 25 percent of all covered employees if the Administrator determines that the data received under the reporting requirements of 199.119 of Title 49 of the Code of Federal Regulations (49 CFR) for two consecutive calendar years indicate that the reported positive rate is less than 1.0 percent.

(4) When the minimum annual percentage rate for random drug testing is 25 percent, and the data received under the reporting requirements of Section 199.119 of Title 49 of the Code of Federal Regulations (49 CFR) for any calendar year indicate that the reported positive rate is equal

to or greater than 1.0 percent, the Administrator will increase the minimum annual percentage rate for random drug testing to 50 percent of all covered employees.

(5) The selection of employees for random drug testing shall be made by a scientifically valid method, such as a random number table or a computer-based random number generator that is matched with employees' Social Security numbers, payroll identification numbers, or other comparable identifying numbers. Under the selection process used, each covered employee shall have an equal chance of being tested each time selections are made.

(6) The operator shall randomly select a sufficient number of covered employees for testing during each calendar year to equal an annual rate not less than the minimum annual percentage rate for random drug testing determined by the Administrator. If the operator conducts random drug testing through a consortium, the number of employees to be tested may be calculated for each individual operator or may be based on the total number of covered employees covered by the consortium who are subject to random drug testing at the same minimum annual percentage rate under this part or any DOT drug testing rule.

(7) Each operator shall ensure that random drug tests conducted under this part are unannounced and that the dates for administering random tests are spread reasonably throughout the calendar year.

(8) If a given covered employee is subject to random drug testing under the drug testing rules of more than one DOT agency for the same operator, the employee shall be subject to random drug testing at the percentage rate established for the calendar year by the DOT agency regulating more than 50 percent of the employee's function.

(9) If an operator is required to conduct random drug testing under the drug testing rules of more than one DOT agency, the operator may:

(i) Establish separate pools for random selection, with each pool containing the covered employees who are subject to testing at the same required rate; or

(ii) Randomly select such employees for testing at the highest percentage rate established for the calendar year by any DOT agency to which the operator is subject.

(d) Testing based on reasonable cause. Each operator shall drug test each employee when there is reasonable cause to believe the employee is using a prohibited drug. The decision to test must be based on a reasonable and articulable belief that the employee is using a prohibited drug on the basis of specific, contemporaneous physical, behavioral, or performance indicators of probable drug use. At least two

of the employee's supervisors, one of whom is trained in detection of the possible symptoms of drug use, shall substantiate and concur in the decision to test an employee. The concurrence between the two supervisors may be by telephone. However, in the case of operators with 50 or fewer employees subject to testing under this Part, only one supervisor of the employee trained in detecting possible drug use symptoms shall substantiate the decision to test.

(e) Return to Duty Testing. A covered employee who refuses to take or has a positive drug test may not return to duty in the covered function until the covered employee has complied with applicable provisions of DOT Procedures concerning substance abuse professionals and return-to-duty process.

(f) Follow-up Testing. A covered employee who refuses to take or has a positive drug test shall be subject to unannounced follow-up drug tests administered by the operator following the covered employee's return to duty. The number and frequency of such follow-up testing shall be determined by a substance abuse professional, but shall consist of at least six tests in the first 12 months following the covered employee's return to duty. In addition, follow-up testing may include testing for alcohol as directed by the substance abuse professional, to be performed in accordance with 49 CFR Part 40. Follow-up testing shall not exceed 60 months from the date of the covered employee's return to duty. The substance abuse professional may terminate the requirement for follow-up testing at any time after the first six tests have been administered, if the substance abuse professional determines that such testing is no longer necessary.

.SO DOC 16B-262.107

NYCRR

262.107 Drug testing laboratory.

(a) Each operator shall use for the drug testing required by this Part only drug testing laboratories certified by the U.S. Department of Health and Human Services under the DOT procedures.

(b) The drug testing laboratory must permit:

(1) inspections by the operator before the laboratory is awarded a testing contract; and

(2) unannounced inspections, including examination of records, at any time, by the operator, the Administrator, and a representative of the Department.

.SO DOC 16B-262.109

NYCRR

262.109 Review of drug testing results.

(a) MRO appointment. Each operator shall designate or appoint a medical review officer (MRO). If an operator does not have a qualified

individual on staff to serve as MRO, the operator may contract for the provision of MRO services as part of its anti-drug program.

(b) MRO qualifications. The MRO must be a licensed physician who has the qualifications required by DOT Procedures.

(c) MRO duties. The MRO must perform functions for the operator as required by DOT Procedures.

(d) MRO reports. The MRO must report all drug test results to the operator in accordance with DOT Procedures.

(e) Evaluation and rehabilitation may be provided by the operator, by a substance abuse professional under contract with the operator, or by a substance abuse professional not affiliated with the operator. The choice of substance abuse professional and assignment of costs shall be made in accordance with the operator/employee agreements and operator/employee policies.

(f) The operator shall ensure that a substance abuse professional, who determines that a covered employee requires assistance in resolving problems with drug abuse, does not refer the covered employee to the substance abuse professional's private practice or to a person or organization from which the substance abuse professional receives remuneration or in which the substance abuse professional has a financial interest. This paragraph does not prohibit a substance abuse professional from referring a covered employee for assistance provided through:

- (1) a public agency, such as a State, county, or municipality;
- (2) the operator or a person under contract to provide treatment for drug problems on behalf of the operator;
- (3) the sole source of therapeutically appropriate treatment under the employee's health insurance program; or
- (4) the sole source of therapeutically appropriate treatment reasonably accessible to the employee.

.SO DOC 16B-262.111

NYCRR

262.111 Retention of samples and additional testing.

(a) Samples that yield positive results on confirmation must be retained by the laboratory in properly secured, long term, frozen storage for at least 365 days as required by the DOT Procedures. Within this 365 day period, the employee or his representative, the operator, the Administrator, or the department may request that the laboratory retain the sample for an additional period. If, within the 365-day period, the laboratory has not received a proper written request to retain the sample for a further reasonable period specified in the request, the sample may be discarded following the end of the 365-day

period.

(b) If the medical review officer (MRO) determines there is no legitimate medical explanation for a confirmed positive test result other than the unauthorized use of a prohibited drug, and if timely additional testing is requested by the employee according to DOT Procedures, the split specimen must be tested. The employee may specify retesting by the original laboratory or by a second laboratory that is certified by the Department of Health and Human Services. The operator may require the employee to pay in advance the cost of shipment (if any) and reanalysis of the sample, but the employee must be reimbursed for such expense if the additional test is negative.

(c) If the employee specifies testing by a second laboratory, the original laboratory must follow approved chain of custody procedures in transferring a portion of the sample.

(d) Since some analytes may deteriorate during storage, detected levels of the drug below the detection limits established in the DOT procedures, but equal to or greater than the established sensitivity of the assay, must, as technically appropriate, be reported and considered corroborative of the original positive results.

.SO DOC 16B-262.113

NYCRR

262.113 Employee assistance program.

(a) Each operator shall provide an employee assistance program (EAP) for its employees and supervisory personnel who will determine whether an employee must be drug tested based on reasonable cause. The operator may establish the EAP as a part of its internal personnel services or the operator may contract with an entity that provides EAP services. Each EAP must include education and training on drug use. At the discretion of the operator, the EAP may include opportunity for employee rehabilitation.

(b) Education under each EAP must include at least the following elements: display and distribution of informational material; display and distribution of a community service hot line telephone number for employee assistance; and display and distribution of the employer's policy regarding the use of prohibited drugs.

(c) Training under each EAP for supervisory personnel who will determine whether an employee must be drug tested based on reasonable cause must include one 60-minute period of training on the specific, contemporaneous physical, behavioral, and performance indicators of probable drug use.

.SO DOC 16B-262.115

NYCRR

262.115 Contractor employees.

With respect to those employees who are contractors or employed by a contractor, an operator may provide by contract that the drug testing, education, and training required by this Part be carried out by the contractor provided:

(a) The operator remains responsible for ensuring that the requirements of this Part are complied with.

(b) The contractor allows access to property and records by the operator, the administrator, and a representative of the Department for the purpose of monitoring the operator's compliance with the requirements of this Part.

.SO DOC 16B-262.117

NYCRR

262.117 Recordkeeping.

(a) Each operator shall keep the following records for the periods specified and permit access to the records as provided by subdivision

(b) of this section:

(1) Records that demonstrate the collection process conforms to this Part must be kept for at least three years.

(2) Records of employee drug test results that indicate a verified positive result, records that demonstrate compliance with the recommendations of a substance abuse professional, and MIS annual report data shall be maintained for a minimum of five years.

(3) Records of employee drug test results that show employee passed a drug test must be kept for at least one year.

(4) Records confirming that supervisors and employees have been trained as required by this Part must be kept for at least three years.

(b) Information regarding an individual's drug testing results or rehabilitation must be released upon the written consent of the individual and as provided by DOT Procedures. Statistical data related to drug testing and rehabilitation that is not name-specific and training records must be made available to the administrator or the representative of the Department upon request.

(c) The laboratory shall release information related to a positive drug test of an individual to the individual, the employer, or the decisionmaker in a lawsuit, grievance, or other proceeding initiated by or on behalf of the individual and arising from a certified positive drug test.

.SO DOC 16B-262.119

NYCRR

262.119 Reporting of anti-drug testing results.

(a) Each large operator (having more than 50 covered employees) shall submit an annual MIS report to RSPA of its anti-drug testing using the Management Information System (MIS) form and instructions as required by

49 CFR Part 40 (at section 40.25 and appendix H to Part 40), not later than March 15 of each year for the prior calendar year (January 1 through December 31). The Administrator shall require by written notice that small operators (50 or fewer covered employees) not otherwise required to submit annual MIS reports to prepare and submit such reports to RSPA.

(b) Each report required under this section shall be submitted to the Office of Pipeline Safety, Research and Special Programs Administration, U.S. Department of Transportation, Room 7128, 400 Seventh Street, SW, Washington, DC 20590.

(c) To calculate the total number of covered employees eligible for random testing throughout the year, as an operator, you must add the total number of covered employees eligible for testing during each random testing period for the year and divide that total by the number of random testing periods. Covered employees, and only covered employees, are to be in an employer's random testing pool, and all covered employees must be in the random pool. If you are an employer conducting random testing more often than once per month (e.g., you select daily, weekly, bi-weekly), you do not need to compute this total number of covered employees rate more than on a once per month basis.

(d) As an employer, you may use a service agent (e.g., Consortia/Third Party Administrator (C/TPA) as defined in 49 CFR Part 40) to perform random selections for you; and your covered employees may be part of a larger random testing pool of covered employees. However, you must ensure that the service agent you use is testing at the appropriate percentage established for your industry and that only covered employees are in the random testing pool.

(e) Each operator that has a covered employee who performs multi-DOT agency functions (e.g., an employee performs pipeline maintenance duties and drives a commercial motor vehicle), count the employee only on the MIS report for the DOT agency under which he or she is randomly tested. Normally, this will be the DOT agency under which the employee performs more than 50% of his or her duties. Operators may have to explain the testing data for these employees in the event of a DOT agency inspection or audit.

(f) A service agent (e.g., C/TPA) may prepare the MIS report on behalf of an operator. However, each report shall be certified by the operator's anti-drug manager or designated representative for accuracy and completeness.

.SO DOC 16B-262.200

NYCRR

262.200 Purpose.

The purpose of this part is to establish programs designed to help prevent accidents and injuries resulting from the misuse of alcohol by employees who perform covered functions for operators of certain pipeline facilities subject to parts 192, 193, or 195 of Title 49 of the Code of Federal Regulations (49 CFR).

.SO DOC 16B-262.202

NYCRR

262.202 Alcohol misuse plan.

Each operator shall maintain and follow a written alcohol misuse plan that conforms to the requirements of this part and the DOT procedures concerning alcohol testing programs. The plan shall contain methods and procedures for compliance with all the requirements of this part, including required testing, recordkeeping, reporting, education and training elements.

.SO DOC 16B-262.209

NYCRR

262.209 Other requirements imposed by operators.

(a) Except as expressly provided in this part, nothing in this part shall be construed to affect the authority of operators, or the rights of employees, with respect to the use or possession of alcohol, including authority and rights with respect to alcohol testing and rehabilitation.

(b) Operators may, but are not required to, conduct pre-employment alcohol testing under this Part. Each operator that conducts pre-employment alcohol testing must:

(1) Conduct a pre-employment alcohol test before the first performance of covered functions by every covered employee (whether a new employee or someone who has transferred to a position involving the performance of covered functions);

(2) Treat all covered employees the same for the purpose of pre-employment alcohol testing (i.e., you must not test some covered employees and not others);

(3) Conduct the pre-employment tests after making a contingent offer of employment or transfer, subject to the employee passing the pre-employment alcohol test;

(4) Conduct all pre-employment alcohol tests using the alcohol testing procedures in DOT Procedures; and

(5) Not allow any covered employee to begin performing covered functions unless the result of the employee's test indicates an alcohol concentration of less than 0.04.

.SO DOC 16B-262.211

NYCRR

262.211 Requirement for notice.

Before performing an alcohol test under this part, each operator shall

notify a covered employee that the alcohol test is required by this part. No operator shall falsely represent that a test is administered under this part.

.SO DOC 16B-262.215 NYCRR

262.215 Alcohol concentration.

Each operator shall prohibit a covered employee from reporting for duty or remaining on duty requiring the performance of covered functions while having an alcohol concentration of 0.04 or greater. No operator having actual knowledge that a covered employee has an alcohol concentration of 0.04 or greater shall permit the employee to perform or continue to perform covered functions.

.SO DOC 16B-262.217 NYCRR

262.217 On-duty use.

Each operator shall prohibit a covered employee from using alcohol while performing covered functions. No operator having actual knowledge that a covered employee is using alcohol while performing covered functions shall permit the employee to perform or continue to perform covered functions.

.SO DOC 16B-262.219 NYCRR

262.219 Pre-duty use.

Each operator shall prohibit a covered employee from using alcohol within 4 hours prior to performing covered functions, or, if an employee is called to duty to respond to an emergency, within the time period after the employee has been notified to report for duty. No operator having actual knowledge that a covered employee has used alcohol within 4 hours prior to performing covered functions or within the time period after the employee has been notified to report for duty shall permit that covered employee to perform or continue to perform covered functions.

.SO DOC 16B-262.221 NYCRR

262.221 Use following an accident.

Each operator shall prohibit a covered employee who has actual knowledge of an accident in which his or her performance of covered functions has not been discounted by the operator as a contributing factor to the accident from using alcohol for 8 hours following the accident unless he or she has been given a post-accident test under section 262.225(a), or the operator has determined that the employee's performance could not have contributed to the accident.

.SO DOC 16B-262.223 NYCRR

262.223 Refusal to submit to a required alcohol test.

Each operator shall require a covered employee to submit to a

post-accident alcohol test required under section 262.225(a), a reasonable suspicion alcohol test required under section 262.225(b), or a follow-up alcohol test required under section 262.225(d). No operator shall permit an employee who refuses to submit to such a test to perform or continue to perform covered functions.

.SO DOC 16B-262.225

NYCRR

262.225 Alcohol tests required.

Each operator shall conduct the following types of alcohol tests for the presence of alcohol:

(a) Post-accident

(1) As soon as practicable following an accident, each operator shall test each surviving covered employee for alcohol if that employee's performance of a covered function either contributed to the accident or cannot be completely discounted as a contributing factor to the accident. The decision not to administer a test under this section shall be based on the operator's determination, using the best available information at the time of the determination, that the covered employee's performance could not have contributed to the accident.

(i) If a test required by this section is not administered within two hours following the accident, the operator shall prepare and maintain on file a record stating the reasons the test was not promptly administered. If a test required by paragraph (a) is not administered within eight hours following the accident the operator shall cease attempts to administer an alcohol test and shall state in the record the reasons for not administering the test.

(ii) (Reserved)

(3) A covered employee who is subject to post-accident testing who fails to remain readily available for such testing, including notifying the operator or operator representative of his/her location if he/she leaves the scene of the accident prior to submission to such test, may be deemed by the operator to have refused to submit to testing. Nothing in this section shall be construed to require the delay of necessary medical attention for injured people following an accident or to prohibit a covered employee from leaving the scene of an accident for the period necessary to obtain assistance in responding to the accident or to obtain necessary emergency medical care.

(b) Reasonable suspicion testing.

(1) Each operator shall require a covered employee to submit to an alcohol test when the operator has reasonable suspicion to believe that the employee has violated the prohibitions in this part.

(2) The operator's determination that reasonable suspicion exists to

require the covered employee to undergo an alcohol test shall be based on specific, contemporaneous, articulable observations concerning the appearance, behavior, speech, or body odors of the employee. The required observations shall be made by a supervisor who is trained in detecting the symptoms of alcohol misuse. The supervisor who makes the determination that reasonable suspicion exists shall not conduct the breath alcohol test on that employee.

(3) Alcohol testing is authorized by this section only if the observations required by paragraph (b) (2) of this section are made during, just preceding, or just after the period of the work day that the employee is required to be in compliance with this part. A covered employee may be directed by the operator to undergo reasonable suspicion testing for alcohol only while the employee is performing covered functions; just before the employee is to perform covered functions; or just after the employee has ceased performing covered functions.

(4)(i) If a test required by this section is not administered within 2 hours following the determination under paragraph (b) (2) of this section, the operator shall prepare and maintain on file a record stating the reasons the test was not promptly administered. If a test required by this section is not administered within 8 hours following the determination under paragraph (b) (2) of this section, the operator shall cease attempts to administer an alcohol test and shall state in the record the reasons for not administering the test. Records shall be submitted to RSPA upon request of the Administrator.

(ii) (Reserved)

(iii) Notwithstanding the absence of a reasonable suspicion alcohol test under this section an operator shall not permit a covered employee to report for duty or remain on duty requiring the performance of covered functions while the employee is under the influence of or impaired by alcohol, as shown by the behavioral, speech or performance indicators of alcohol misuse, nor shall an operator permit the covered employee to perform or continue to perform covered functions, until:

(A) An alcohol test is administered and the employee's alcohol concentration measures less than 0.02; or

(B) The start of the employee's next regularly scheduled duty period, but not less than 8 hours following the determination under paragraph (b) (2) of this section that there is reasonable suspicion to believe that the employee has violated the prohibitions in this part.

(iv) Except as provided in paragraph (b) (4) (ii), no operator shall take any action under this part against a covered employee based solely on the employee's behavior and appearance in the absence of an alcohol

test. This does not prohibit an operator with the authority independent of this part from taking any action otherwise consistent with law.

(c) Return-to-duty testing. Each operator shall ensure that before a covered employee returns to duty requiring the performance of a covered function after engaging in conduct prohibited by sections 262.215 through 262.223, the employee shall undergo a return-to-duty alcohol test with a result indicating an alcohol concentration of less than 0.02.

(d) Follow-up testing.

(1) Following a determination under section 262.243(b) that a covered employee is in need of assistance in resolving problems associated with alcohol misuse, each operator shall ensure that the employee is subject to unannounced follow-up alcohol testing as directed by a substance abuse professional in accordance with the provisions of 262.243(c) (2) (ii).

(2) Follow-up testing shall be conducted when the covered employee is performing covered functions; just before the employee is to perform covered functions; or just after the employee has ceased performing such functions.

(e) Retesting of covered employees with an alcohol concentration of 0.02 or greater but less than 0.04. Each operator shall retest a covered employee to ensure compliance with the provisions of section 262.237, if an operator chooses to permit the employee to perform a covered function within 8 hours following the administration of an alcohol test indicating an alcohol concentration of 0.02 or greater but less than 0.04.

.SO DOC 16B-262.227

NYCRR

262.227 Retention of records.

(a) General requirement. Each operator shall maintain records of its alcohol misuse prevention program as provided in this section. The records shall be maintained in a secure location with controlled access and shall be in a form that is immediately accessible to the Administrator or representatives of the Department.

(b) Period of retention. Each operator shall maintain the records in accordance with the following schedule:

(1) Five years. Records of employee alcohol test results with results indicating an alcohol concentration of 0.02 or greater, documentation of refusals to take required alcohol tests, calibration documentation, employee evaluation and referrals, and MIS annual report data shall be maintained for a minimum of 5 years.

(2) Two years. Records related to the collection process (except

calibration of evidential breath testing devices), and training shall be maintained for a minimum of 2 years.

(3) One year. Records of all test results below 0.02 (as defined in 49 CFR 40) shall be maintained for a minimum of 1 year.

(c) Types of records. The following specific records shall be maintained:

(1) Records related to the collection:

(i) Collection log books, if used.

(ii) Calibration documentation for evidential breath testing devices.

(iii) Documentation of breath alcohol technician training.

(iv) Documents generated in connection with decisions to administer suspicion alcohol tests.

(v) Documents generated in connection with decisions on post-accident tests.

(vi) Documents verifying existence of a medical explanation of the inability of a covered employee to provide adequate breath for testing.

(2) Records related to test results:

(i) The operator's copy of the alcohol test form, including the results of the test.

(ii) Documents related to the refusal of any covered employee to submit to an alcohol test required by this part.

(iii) Documents presented by a employee to dispute the result of alcohol test administered under this part.

(3) Records related to other violations of this part.

(4) Records related to evaluations:

(i) Records pertaining to a determination by a substance abuse professional concerning a covered employee's need for assistance.

(ii) Records concerning a covered employee's compliance with the recommendations of the substance abuse professional.

(5) Record(s) related to the operators MIS annual testing data.

(6) Records related to education and training:

(i) Materials on alcohol misuse awareness, including a copy of the operator's policy on alcohol misuse.

(ii) Documentation of compliance with the requirements of 262.231.

(iii) Documentation of training provided to supervisors for the purpose of qualifying the supervisors to make a determination concerning the need for alcohol testing based on reasonable suspicion.

(iv) Certification that any training conducted under this part complies with the requirements for such training.

.SO DOC 16B-262.229

NYCRR

262.229 Reporting of alcohol testing results.

(a) Each large operator (having more than 50 covered employees) shall submit an annual MIS report to RSPA of its alcohol testing results using the Management Information System (MIS) form and instructions as required by 49 CFR Part 40 (at section 40.25 and appendix H to Part 40), by March 15 of each year for the previous calendar year (January 1 through December 31). The Administrator may require by written notice that a small operator (50 or fewer covered employees), not otherwise required to submit annual MIS reports, submit such a report to RSPA.

(b) Each operator that has a covered employee who preforms multi-DOT agency functions (e.g., an employee performs pipeline maintenance duties and drives a commercial motor vehicle), count the employee only on the MIS report for the DOT agency under which he or she is tested. Normally, this will be the DOT agency under which the employee performs more than 50% of his or her duties. Operators may have to explain the testing data for these employees in the event of a DOT agency inspection or audit.

(c) Each report required under this section shall be submitted to the Office of Pipeline Safety (OPS), Research and Special Programs Administration, Department of Transportation, Room 7128, 400 Seventh Street SW., Washington, DC 20590. RSPA will allow the operator the option of sending the report on the computer disk provided by RSPA. If this option is used, a signature page attesting to the validity of the information on the computer disk must be sent to the address in this section.

(d) A service agent (e.g., Consortia/Third Party Administrator as defined in 49 CFR Part 40) may prepare the MIS report on behalf of an operator. However, each report shall be certified by the operator's anti-drug manager or designated representative for accuracy and completeness.

.SO DOC 16B-262.231

NYCRR

262.231 Access to facilities and records.

(a) Except as required by law or expressly authorized or required in this part, no employer shall release covered employee information that is contained in records required to be maintained in section 262.227.

(b) A covered employee is entitled, upon written request, to obtain copies of any records pertaining to the employee's use of alcohol, including any records pertaining to his or her alcohol tests. The operator shall promptly provide the records requested by the employee. Access to a employee's records shall not be contingent upon payment for records other than those specifically requested.

(c) Each operator shall permit access to all facilities utilized in complying with the requirements of this part to the Secretary of

Transportation, any DOT agency, or a representative of a state agency with regulatory authority over the operator.

(d) Each operator shall make available copies of all results for employer alcohol testing conducted under this part and any other information pertaining to the operators alcohol misuse prevention program when requested by the Department. The information shall include name-specific alcohol test results, records, and reports.

(e) When requested by the National Transportation Safety Board as part of an accident investigation, an operator shall disclose information related to the operator's administration of any post-accident alcohol tests administered following the accident under investigation.

(f) An operator shall make records available to a subsequent employer upon receipt of the written request from the covered employee. Disclosure by the subsequent employer is permitted only as expressly authorized by the terms of the employee's written request.

(g) An operator may disclose information without employee consent as provided by DOT Procedures concerning certain legal proceedings.

(h) An operator shall release information regarding a covered employee's records as directed by the specific, written consent of the employee authorizing release of the information to an identified person. Release of such information by the person receiving the information is permitted only in accordance with the terms of the employee's consent.

.SO DOC 16B-262.233 NYCRR

262.233 Removal from covered function.

Except as provided in sections 262.239 through 262.243, no operator shall permit any covered employee to perform covered functions if the employee has engaged in conduct prohibited by sections 262.215 through 262.223 or an alcohol misuse rule of another DOT agency.

.SO DOC 16B-262.235 NYCRR

262.235 Required evaluation and testing.

No operator shall permit a covered employee who has engaged in conduct prohibited by sections 262.215 through 262.223 to perform covered functions unless the employee has met the requirements of 262.243.

.SO DOC 16B-262.237 NYCRR

262.237 Other alcohol-related conduct.

(a) No operator shall permit a covered employee tested under the provisions of section 262.225, who is found to have an alcohol concentration of 0.02 or greater but less than 0.04, to perform or continue to perform covered functions until:

(1) The employee's alcohol concentration measures less than 0.02 in accordance with a test administered under section 262.225(e); or

(2) The start of the employee's next regularly scheduled duty period, but not less than 8 hours following administration of the test.

(b) Except as provided in Subdivision (a) of this section, no operator shall take any action under this part against an employee based solely on test results showing an alcohol concentration less than 0.04. This does not prohibit an operator with authority independent of this part from taking any action otherwise consistent with law.

.SO DOC 16B-262.239

NYCRR

262.239 Operator obligation to promulgate a policy on the misuse of alcohol.

(a) General requirements. Each operator shall provide educational materials that explain these alcohol misuse requirements and the operator's policies and procedures with respect to meeting those requirements.

(1) The operator shall ensure that a copy of these materials is distributed to each covered employee prior to start of alcohol testing under this part, and to each person subsequently hired for or transferred to a covered position.

(2) Each operator shall provide written notice to representatives of employee organizations of the availability of this information.

(b) Required content. The materials to be made available to covered employees shall include detailed discussion of at least the following:

(1) The identity of the person designated by the operator to answer covered employee questions about the materials.

(2) The categories of employees who are subject to the provisions of this part.

(3) Sufficient information about the covered functions performed by those employees to make clear what period of the work day the covered employee is required to be in compliance with this part.

(4) Specific information concerning covered employee conduct that is prohibited by this part.

(5) The circumstances under which a covered employee will be tested for alcohol under this part.

(6) The procedures that will be used to test for the presence of alcohol, protect the covered employee and the integrity of the breath testing process, safeguard the validity of the test results, and ensure that those results are attributed to the correct employee.

(7) The requirement that a covered employee submit to alcohol tests administered in accordance with this part.

(8) An explanation of what constitutes a refusal to submit to an alcohol test and the attendant consequences.

(9) The consequences for covered employees found to have violated the prohibitions under this part, including the requirement that the employee be removed immediately from covered functions, and the procedures under section 262.243.

(10) The consequences for covered employees found to have an alcohol concentration of 0.02 or greater but less than 0.04.

(11) Information concerning the effects of alcohol misuse on an individual's health, work, and personal life; signs and symptoms of an alcohol problem (the employee's or a coworker's); and including intervening, evaluating and resolving problems associated with the misuse of alcohol, including intervening when an alcohol problem is suspected, confrontation, referral to any available EAP, and/or referral to management.

(c) Optional provisions. The materials supplied to covered employees may also include information on additional operator policies with respect to the use or possession of alcohol, including any consequences for an employee found to have a specified alcohol level, that are based on the operator's authority independent of this part. Any such additional policies or consequences shall be clearly described as being based on independent authority.

.SO DOC 16B-262.241

NYCRR

262.241 Training for supervisors.

Each operator shall ensure that persons designated to determine whether reasonable suspicion exists to require a covered employee to undergo alcohol testing under section 262.225(b) receive at least 60 minutes of training on the physical, behavioral, speech, and performance indicators of probable alcohol misuse.

.SO DOC 16B-262.243

NYCRR

262.243 Referral, evaluation, and treatment.

(a) Each covered employee who has engaged in conduct prohibited by sections 262.215 through 262.223 of this part shall be advised of the resources available to the covered employee in evaluating and resolving problems associated with the misuse of alcohol. This includes the names, addresses, and telephone numbers of substance abuse professionals and counseling and treatment programs.

(b) Each covered employee who engages in conduct prohibited under sections 262.215 through 262.223 shall be evaluated by a substance abuse professional who shall determine what assistance, if any, the employee needs in resolving problems associated with alcohol misuse.

(c) (1) Before a covered employee returns to duty requiring the performance of a covered function after engaging in conduct prohibited

by sections 262.215 through 262.223 of this part, the employee shall undergo a return-to-duty alcohol test with a result indicating an alcohol concentration of less than 0.02.

(2) In addition, each covered employee identified as needing assistance in resolving problems associated with alcohol misuse:

(i) Shall be evaluated by a substance abuse professional to determine that the employee has properly followed any rehabilitation program prescribed under Subdivision (b) of this section, and

(ii) Shall be subject to unannounced follow-up alcohol tests administered by the operator following the employee's return to duty. The number and frequency of such follow-up testing shall be determined by a substance abuse professional, but shall consist of at least six tests in the first 12 months following the employee's return to duty. In addition, follow-up testing may include testing for drugs, as directed by the substance abuse professional, to be performed in accordance with 49 CFR Part 40. Follow-up testing shall not exceed 60 months from the date of the employee's return to duty. The substance abuse professional may terminate the requirement for follow-up testing at any time after the first six tests have been administered, if the substance abuse professional determines that such testing is no longer necessary.

(d) Evaluation and rehabilitation may be provided by the operator, by a substance abuse professional under contract with the operator, or by a substance abuse professional not affiliated with the operator. The choice of substance abuse professional and assignment of costs shall be made in accordance with the operator/employee agreements and operator/employee policies.

(e) The operator shall ensure that a substance abuse professional who determines that a covered employee requires assistance in resolving problems with alcohol misuse does not refer the employee to the substance abuse professional's private practice or to a person or organization from which the substance abuse professional receives remuneration or in which the substance abuse professional has a financial interest. This paragraph does not prohibit a substance abuse professional from referring an employee for assistance provided through:

- (1) A public agency, such as a State, county, or municipality,
- (2) The operator or a person under contract to provide treatment for alcohol problems on behalf of the operator,
- (3) The sole source of therapeutically appropriate treatment under the employee's health insurance program; or
- (4) The sole source of therapeutically appropriate treatment

reasonably accessible to the employee.

.SO DOC 16B-262.245 NYCRR

262.245 Contractor employees.

(a) With respect to those covered employees who are contractors or employed by a contractor, an operator may provide by contract that the alcohol testing, training and education required by this part be carried out by the contractor provided:

- (1) The operator remains responsible for ensuring that the requirements of this part and 49 CFR part 40 are complied with; and
- (2) The contractor allows access to property and records by the operator, the Administrator, any DOT agency with regulatory authority over the operator or covered employee, and, if the operator is subject to the jurisdiction of the department, a representative of the department for the purposes of monitoring the operator's compliance with the requirements of this part and 49 CFR part 40.

271.1 Late payment charges

271.2 Contents of bill

271.3 Amount of late payment charge

271.4 Contents of rate schedules

271.5 Increase in rates prohibited

.SO DOC 16B-271.1 NYCRR

Section 271.1 Late payment charges. Any corporation, partnership or person furnishing gas, electric, steam or water service may impose a

late payment charge, either one-time or continuing interest type, because of the failure of any customer to pay a bill for such service within a specified period therein stated.

.SO DOC 16B-271.2 NYCRR

271.2 Contents of bill. If any corporation, partnership or person furnishing gas, electric, steam or water service elects to impose a charge for a one-time late payment for such service, it shall show on each bill the amount billed, the amount that will be due, including the late payment charge, when the late payment charge becomes applicable.

.SO DOC 16B-271.3 NYCRR

271.3 Amount of late payment charge. If a one-time late payment charge is imposed, it shall not exceed 10 percent on the first \$10 (except that a minimum charge may be made of not to exceed 15 cents per bill), plus not to exceed three percent on that portion of the bill over \$10.

.SO DOC 16B-271.4 NYCRR

271.4 Contents of rate schedules. In case a one-time late payment charge is imposed, the rate schedules shall show the rates for service, the amount due including the late payment charge when the charge becomes applicable, and the period during which the bill may be paid without the imposition of the late payment charge.

.SO DOC 16B-271.5 NYCRR

271.5 Increase in rates prohibited. No corporation, partnership or person furnishing gas, electric, steam or water service shall so revise or redraft its rate schedules in compliance with this Part as to increase the rates for service applicable to any customer as compared with the rates now in effect without special permission of the commission.

PENALTIES AND DISCOUNTS--CONSUMERS' BILLS--MUNICIPAL GAS UTILITIES

(Statutory authority: Public Service Law, § 65)

Sec.

272.1 Late payment charge

272.2 Contents of bill

272.3 Amount of late payment charge

272.4 Contents of rate schedules

272.5 Increase in rates prohibited

.SO DOC 16B-272.1 NYCRR

Section 272.1 Late payment charge. Any municipality furnishing gas, electric or steam service may impose a late payment charge, either

one-time or continuing interest type, because of the failure of any customer to pay a bill for such service within a specified period therein stated.

.SO DOC 16B-272.2 NYCRR

272.2 Contents of bill. If any municipality furnishing gas, electric or steam service elects to impose a one-time charge for late payment for such service, it shall show on each bill the amount billed, the amount that will be due, including the late payment charge, when the late payment charge becomes applicable.

.SO DOC 16B-272.3 NYCRR

272.3 Amount of late payment charge. If a one-time late payment charge is imposed, it shall not exceed an amount equal to 10 percent of the first \$10 of any bill, plus three percent of any amount of such bill in excess of \$10; provided, however, that a minimum charge may be made of not to exceed 15 cents per bill, and further provided that there may be allowed in any block of a rate schedule a late payment charge of one mill per kilowatt hour of electricity or one mill per 100 cubic feet of gas.

.SO DOC 16B-272.4 NYCRR

272.4 Contents of rate schedules. In case a one-time late payment charge is imposed, the rate schedules shall show the rates for service, the amount due including the late payment charge when the charge becomes applicable, and the period during which the bill may be paid without the imposition of the late payment charge.

.SO DOC 16B-272.5 NYCRR

272.5 Increase in rates prohibited. No municipality furnishing gas, electric or steam service shall, without special permission of this commission, so revise or amend its rate schedules, in compliance with this Part, as to increase the rates for service applicable to any customer as compared with the rates now in effect.

.SO DOC 16B-PT273 NYCRR

PART 273

BILLS FOR SERVICE--GAS CORPORATIONS

(Statutory authority: Public Service Law, § 66)

Note: The provisions contained in this Part must be complied with by July 1, 1976; however, prior to that date, utilities may show on their bill forms the information specified by this Part. By order dated January 7, 1976, the commission directed all companies subject to this Part to send an explanatory leaflet to its customers with the first new bill form sent; the bill forms and leaflet were also required to be filed with the commission 30 days prior to use of the new bill form.

Sec.

273.1 Contents of bill

273.2 Budget or equal payment billing

273.3 List of company offices

.SO DOC 16B-273.1

NYCRR

Section 273.1 Contents of bill. Each bill for gas service issued after June 30, 1976, on the portion that is retained by the customer, shall show, but not be limited to, the following information, except as otherwise provided by this Part:

(a) The name of the corporation, partnership or person by which the service was furnished and, except as provided by this Part, no other name.

(b) The location of the principal office and one or more company offices at which it may be paid, and a statement that bills may be paid at other authorized offices.

(c) The service classification or classifications in the rate schedules on which it is based.

(d) Any charges or credits which are adjustments to the rate schedules referred to in subdivision (c) of this section shall be itemized and shown in dollars per type of unit billed and in total dollars.

(e) The billed demand or other similar factor (if applicable).

(f) Present meter reading, actual or estimated (indicate if estimated), and date thereof.

(g) Previous meter reading, actual or estimated (indicate if estimated), and date thereof, and/or the number of days or the prorated period from the previous meter reading, actual or estimated, to the present meter reading, actual or estimated.

(h) Meter multiplier or constant (if applicable).

(i) Debit or credit balance still outstanding from prior bill, if any.

(j) Quantity billed and unit of measurement, except quantity need not be shown for interim budget billing.

(k) Gross amount of bill, including any sales tax.

(l) Amount of discount and/or net amount of bill (if applicable).

(m) Date when discount period expires or late payment charge becomes effective shall be shown on the front of the bill (if applicable). The payment date is to be determined by the date of mailing or date paid at designated office.

(n) If the service be furnished by a corporation which desired to indicate that it is owned or controlled by another company, or that it constitutes part of a system, it may so indicate by the use of a small symbol or by a statement to that effect printed on the bill in small,

inconspicuous type.

(o) Only service(s) performed, materials furnished or other charges made by the company, pursuant to its filed tariff, may be included and shall be itemized on the applicable bill form. Whenever the bill form, by reason of size limitations, does not permit itemization, totals may be utilized, provided the charges making up such totals are itemized in an addendum attached to or enclosed with the bill.

(p) Each bill rendered by the company shall identify the account for which service is being charged by setting forth an account or meter number or other appropriate method of identification of the address or location of the premises where the service(s) for which the bill is rendered was/were furnished.

(q) The back of the entire bill may be used for any purposes deemed appropriate related to the service(s) rendered.

(r) As long as it does not confuse the customer, pertinent messages and information may be printed on any portion of the front of the bill.

(s) An explanation of any abbreviation or symbol used that is not in common English usage.

.SO DOC 16B-273.2

NYCRR

273.2 Budget or equal payment billing. On either the bill or in an addendum attached to or enclosed with the bill shall be shown:

(a) Identification of the type of budget or equal payment plan, if more than one plan is offered.

(b) The total of the year's budget or equal payment amounts billed to the end of the period covered by the current bill.

(c) The dollar amount billed for tariff items during the same period as in subdivision (b) of this section.

(d) Debit or credit balance to be shown as D or C on the bill and defined as follows:

D Amount due company

C Amount in customer favor

.SO DOC 16B-273.3

NYCRR

273.3 List of company offices. Each gas company shall provide annually to its customers a list of all company offices at which utility bills may be paid, if such information is not shown on its bill form.

.SO DOC 16B-275.1

NYCRR

Section 275.1 Notice of discontinuance--time.

(a) No gas corporation shall discontinue the supply of gas for nonpayment of bills rendered for service, or for failure to post a required deposit, until:

(1) at least five days after written notice has been served personally upon the person supplied;

(2) at least eight days after mailing written notice in postpaid wrapper to the person supplied, addressed to such person at premises where service is rendered; or

(3) at least five days after the person supplied has either signed for or refused a registered letter containing written notice, addressed to such person at premises where service is rendered.

(b) If the person supplied has specified to the company in writing an alternate address for billing purposes, the notice authorized under paragraphs (2) and (3) of subdivision (a) of this section shall be sent to such alternate address rather than to the premises where service is rendered.

.SO DOC 16B-275.2

NYCRR

275.2 Notice of discontinuance--format. (a) Every notice indicating discontinuance of service shall:

(1) clearly indicate in nontechnical language and, where practicable, in a bilingual format:

(i) the reason for service discontinuance;

(ii) the total amount required to be paid by the customer to avoid discontinuance of service, indicating the amount for which the customer's account is in arrears or the required deposit, if any, which must be posted by the customer, or both;

(iii) a method whereby the customer may tender payment of the full sum due and owing, including any required deposit, to avoid the discontinuance of his service;

(iv) the availability of company procedures to consider customer complaints prior to discontinuance, including the address and phone number of the office of the gas company the customer may contact in reference to his account; and

(v) the earliest date on which discontinuance may be attempted; and

(2) have printed on the face thereof, in a size type capable of attracting immediate attention, the following:

"THIS IS A FINAL DISCONNECT NOTICE. TO AVOID INCONVENIENCE, BRING THIS NOTICE TO THE ATTENTION OF THE COMPANY WHEN PAYING THIS BILL."

(b) Every notice indicating discontinuance of service to residential

customers shall include a statement that gas service to any person receiving financial assistance from a local social services department in certain cases may not be terminated, and that the recipient may inform the utility providing such service of his status so that the utility may ascertain the applicability of such provisions to him.

(c) Advise consumers that they should contact such corporation's business office immediately if any acute hardship, such as death in the family, recent unemployment, serious illness or infirmity, or other grave condition exists, in order that such corporation may determine whether any temporary arrangement should be employed to avoid immediate termination.

(d) Where full compliance with subdivision (a) of this section is found by the commission to be infeasible or to impose an unreasonable burden upon the company, the commission may grant a waiver of the requirements of such subdivision upon approval by the commission of an alternate arrangement which accomplishes the basic purposes of this section.

.SO DOC 16B-275.3

NYCRR

275.3 No discontinuance without verification of delinquent account.

(a) No gas corporation shall discontinue service for nonpayment of bills rendered, or for failure to post a required deposit, unless:

(1) it shall have verified that payment has not been received at any office of the company or at any office of an authorized collection agent through the end of the notice period required by this Part; and

(2) it shall have verified on the day disconnection occurs that payment has not been posted to the customer's account as of the opening of business on that day, or shall have complied with procedures established pursuant to section 275.4(b) of this Part.

(b) In the case of a company which serves a geographical area of this State involving more than six counties, the commission may grant a waiver of the requirements of paragraph (a) (1) of this section upon approval by the commission of an alternate procedure for verification of payments which accomplishes the basic purposes of such paragraph.

.SO DOC 16B-275.4

NYCRR

275.4 Rapid posting of payments in response to notices of discontinuance. Every gas corporation shall take reasonable steps to establish procedures to insure that any payments made in response to notices of discontinuance, when the customer brings the fact that such a notice has been issued to the attention of the company or its collection agents, shall either:

(a) be posted to the customer's account on the day payment is

received; or

(b) be processed in some manner so that discontinuance will not occur.

.SO DOC 16B-275.5

NYCRR

275.5 Days when discontinuance of service is not permitted.

No gas corporation shall discontinue service to any person for nonpayment of bills or for failure to post a required deposit on a Saturday, Sunday, public holiday, or day on which the main business office of the company is not open for business. For purposes of this section, the term public holiday refers to those holidays enumerated in the General Construction Law.

(b) No gas or gas and electric or municipal gas corporation shall discontinue gas service to any residential customer for nonpayment of bills or for failure to post a required deposit on a Friday, or the day immediately preceding a day on which the main business office of the company is not scheduled to be open for business, or the day immediately preceding a public holiday. No such corporation shall discontinue service to any residential customer for nonpayment of bills or for failure to post a required deposit during a two-week period encompassing Christmas and New Year's Day.

.SO DOC 16B-275.6

NYCRR

275.6 No additional notice required when payment by check is subsequently dishonored. Receipt of a subsequently dishonored negotiable instrument in response to a notice of discontinuance shall not constitute payment of the customer's account, and no gas corporation shall be required to issue additional notice prior to discontinuance.

.SO DOC 16B-275.7

NYCRR

275.7 Discontinuance of service to entire multiple dwellings.

(a) No gas corporation shall discontinue service to an entire multiple dwelling (as defined in the Multiple Dwelling Law or the Multiple Residence Law) where the owner, person, firm or corporation to whom or which the last preceding bill has been rendered, or from whom or which the gas corporation has received payment therefor, has failed to pay such utility bills, until it has complied with the following procedure:

(1) The gas corporation must give 15 days' written notice of its intention to so discontinue by personally serving such notice on the owner of the premises affected or on the person, firm, or corporation to whom or which the last preceding bill was rendered, or from whom or which the utility has received payment therefor, and on the superintendent or other person in charge of the building, if it can be readily ascertained that there is such superintendent or other person in charge; or

(2) The gas corporation must give 18 days' written notice to the owner, person, firm or corporation specified in paragraph (1) of this subdivision if such notice is mailed in a postpaid wrapper to the address of such persons, firm or corporation.

(3) In addition to the notice prescribed by paragraphs (1) and (2) of this subdivision, 15 days' written notice shall be posted in the public areas of such multiple dwelling, and 18 days' notice shall be mailed to the "Occupant" of each unit in that multiple dwelling, to the local health officer and director of the social services district for the political subdivision in which the multiple dwelling is located; if the multiple dwelling is located in a city or village, to the mayor thereof, or if there be none, to the manager; or, if the multiple dwelling is located in a town, then to the town supervisor; and to the county executive of the county in which the multiple dwelling is located, or if there be none, then to the chairman of such county's legislative body. Notice to mayors, managers, town supervisors, county executives, and chairmen of county legislatures may be mailed to the persons specified therein or to their designees. Notice to health officers, directors of social services, mayors, managers, supervisors, county executives and chairmen of county legislatures shall be repeated not more than four working days nor less than two working days prior to such discontinuance.

(4) Whenever a notice of intention to discontinue gas service has been made pursuant to the provisions of this section and obligations owed the gas corporation have been satisfied, the gas corporation shall notify, in the same manner as it gave such notice of intention, the occupant of each unit that the intention to discontinue gas service no longer exists.

(b) Notwithstanding the provisions contained in subdivision (a) of this section, no gas corporation shall discontinue services to a multiple dwelling, where the owner, person, firm or corporation responsible for making payment fails to pay utility bills, as long as occupants of such multiple dwellings continue to make timely payments for service in accordance with procedures filed by the utility and approved by the Public Service Commission. All notices referred to in subdivision (a) of this section shall contain the intended date of discontinuance of service and a utility contact, including a telephone number, who will advise occupants of the amount due for gas service and who will arrange meetings with occupants to attempt to work out a mechanism for avoiding discontinuance of service in the event that the owner continues to fail to make requisite payments or arrangements for

such payments. The notice shall also refer to the provisions contained in section 235-a of the New York Real Property Law authorizing occupants to set-off, against their rent, payments to utilities in such circumstances.

(c) A gas corporation, following the procedure outlined in subdivision (b) of this section, may require occupants in a multiple dwelling to pay no more than the current gas charges incurred by the owner, person, firm or corporation to whom or which the last preceding bill has been rendered or from whom or which the utility has received payment therefor. A current charge for purposes of this section means the amount properly billed the owner, etc., for gas used during the most recent billing period covered by the first bill rendered on or after the date when the disconnect notice is issued. The current charges will not include any arrears for earlier billing periods that may appear on such a bill.

(d) If occupants in a multiple dwelling find they are unable to reach an agreement with the utility to avoid discontinuance of service, they may contact the Consumer Service Section of the commission's Gas Division. After such a request is received, a representative of the Consumer Service Section of the Gas Division will attempt to work out such an agreement and will, if necessary, arrange a meeting with occupant representatives, the utility, and the owner, person, firm or corporation responsible for making payment for gas service; provided, however, that such a meeting will be required only if the Consumer Service Section receives a written petition signed by at least 25 percent of the occupants in a multiple dwelling.

(e) The Consumer Service Section may stay a threatened disconnection of service to an entire multiple dwelling where it concludes that good faith efforts are being made by the occupants to arrange for the payment of current gas bills.

(f) Whenever an owner of a multiple dwelling, or the person, firm or corporation responsible for making payment for gas service, fails to pay two consecutive bills for utility service by the time the third bill has been prepared, the utility must notify the commission within 15 days that it has invoked the procedures outlined in subdivisions (a) and (b) of this section. Unless otherwise authorized, the notification should be in the form of a semi-monthly report filed with the Consumer Service Section. Such report should be cumulative, specify the total amount due for each overdue account, the period of arrearage, and indicate if a notice of discontinuance has been sent. If these reports demonstrate a need for changes in collection procedures, the Consumer Service Section

shall advise the commission.

(g) Sections 275.3 through 275.6 of this Part shall be applicable with respect to the discontinuance of service to entire multiple dwellings.

.SO DOC 16B-275.8

NYCRR

275.8 Billing disputes. (a) Every gas corporation shall establish procedures whereby any complaint filed with such corporation by any customer thereof in regard to any bill for service rendered or any deposit required will be promptly investigated in an appropriate and fair manner, with the result of such investigation being promptly reported to the complaining customer. Such procedures shall allow the acceptance and processing of complaints submitted in simple manner and form. Regardless of whether a notice of discontinuance has previously been sent, the utility's procedures shall provide that pending the utility's investigation it shall not discontinue service or issue a notice of discontinuance; provided, however, the consumer may be required to pay the undisputed portion of a disputed bill or deposit to prevent discontinuance or the issuance of a notice of discontinuance.

(b) If, after the completion of such an investigation, the utility determines that the disputed service has been rendered, or that the disputed charge or deposit is proper, in whole or in part, the utility may require the full bill or deposit or the appropriate portion thereof to be paid; in such event, appropriate notice of the determination shall be given to the customer, and where notice of discontinuance of service has previously been sent, or is served with the determination, such notice shall include a statement advising the customer of the availability of the commission's complaint handling procedures. The utility's procedures may provide for discontinuance of service if the customer fails to pay such required amount after receipt of proper notice, provided that a customer's service will not be discontinued until at least five days after notice of the utility's determination, where personal service is made upon the person supplied, or at least eight days after mailing of such a notice, and provided further that no discontinuance may occur if so precluded by the commission pursuant to section 11.2(d) of this Title.

(c) The utility's procedures shall provide that, where the complaint procedures of the commission have been invoked and it is determined that the disputed service has been rendered, or that the disputed charge or deposit is proper, in whole or in part, a customer's service will not be discontinued for failure to pay the amount found appropriate until at least 15 days after notice of the commission's determination.

(d) The procedures required to be established under this section shall

be filed with the commission for review. The commission shall be advised of any substantial changes in such procedures 30 days prior to their proposed implementation to permit commission review.

.SO DOC 16B-275.9

NYCRR

275.9 Publicizing complaint procedures. (a) Every gas corporation shall, by a notice accompanying a regular bill or otherwise, advise each of its customers annually, unless otherwise directed by the commission, of the procedures available to the customer to register complaints in regard to service or disputed bills. Such notice shall clearly state the means by which a complaint can be made to the company and shall also advise the customer that, if after contacting the company the customer remains dissatisfied, he may contact the New York State Public Service Commission. Such notice shall further state that the Public Service Commission has a staff available to give assistance in such matters, and shall also specify an appropriate address of the Public Service Commission.

(b) Prior to circulating the notice required by subdivision (a) of this section, each utility shall submit to the commission for its approval the form of such notice and the intended program for its distribution.

.SO DOC 16B-275.10

NYCRR

275.10 Hardship procedures.

Each and every gas corporation and gas and electric corporation shall file with the commission and make available for public inspection such corporation's detailed procedures for handling hardship situations where consumers are threatened with disconnection of service. The detailed procedures to be filed under this section shall include the special procedures during the cold weather seasons required by sections 275.12 and 275.13 of this Part. Such corporations shall observe their filed procedures in conducting their disconnection activity.

.SO DOC 16B-275.11

NYCRR

275.11 Reconnection. (a) On or before May 31, 1978, all gas corporations and gas and electric corporations shall file with the commission tariff provisions which provide that, except in extreme and unusual circumstances or where a customer requests otherwise, such corporations shall reconnect service; during the months of November, December, January, February and March, to any disconnected residential customer no more than 24 hours after any of the following events:

(1) receipt by the gas corporation of the full amount due (to include arrears; reestablishment charges and associated taxes; collection charges and associated taxes; and a security deposit when requested in

writing) for which service had been disconnected;

(2) agreement by the gas corporation to a plan by which the residential customer is obliged to satisfy the arrears; or

(3) direction by the commission or chief--Consumer Services Section, Power or Gas Division of the commission staff, or their designees.

(b) The direction to reconnect service under subdivision (c) of this section should only occur where it reasonably appears, in exceptional circumstances, that there is a legitimate dispute about an unpaid portion of the arrears claimed by a utility, where an apparent error in the disconnection of service has occurred, or where a serious impairment to human health or safety seems to exist.

.SO DOC 16B-275.12

NYCRR

275.12 Special procedures during cold weather periods.

(a) Not later than August 15, 1978, each and every gas corporation and gas and electric corporation shall develop methods to identify all residential households in its service territory which require gas service for heating the premises or operating a heating system.

Thereafter, such corporation shall maintain the capability of identifying such residential accounts for the purposes of this section.

(b) During the period beginning November 1 of each year and ending April 15 of the following year, each gas corporation shall observe, at a minimum, the following procedures with respect to residential customers whose gas service is necessary to heat the premises or operate a heating system (as used in this section, the term customer means a residential customer whose gas service is necessary to heat the premises or operate a heating system and includes all customers residing in dwellings not included under section 116 of the Public Service Law):

(1) No such corporation shall terminate service to any customer unless, after service of a final notice of discontinuance, the corporation has attempted to communicate with the customer, or another person, 18 years of age or older, who resides with the customer, at the customer's residence. At a minimum, the attempt at personal contact shall include one visit at the premises by field personnel during normal working hours and, in the event that personal contact is not achieved, one visit by field personnel during reasonable nonbusiness periods (6 p.m. - 9 p.m. on weekdays or 9 a.m. - 5 p.m. on Saturdays, Sundays and holidays). If communication with the person contacted is not possible because of an apparent language barrier, the corporation shall take steps to assure communication before discontinuance. During the personal contacts, the corporation's representatives shall fully explain the reasons for discontinuance and shall attempt to ascertain whether a

serious impairment to human health may result.

(2) For the purposes of this Part, a serious impairment to human health is indicated if a customer or other person residing in the premises appears to be seriously impaired and may, because of mental or physical problems, be unable to manage his or her own resources, carry out activities of daily living or protect oneself from neglect or hazardous situations without assistance from others. Indicators of serious impairment to human health include but are not limited to:

- (i) age, infirmity or mental incapacitation;
- (ii) use of life support systems, such as dialysis machines or iron lungs;
- (iii) serious illness;
- (iv) physical disability, including blindness and limited mobility;
- (v) any other factual circumstances which indicate severe or hazardous health situations.

The above criteria are general standards and the corporation's field personnel must be trained to exercise discretion, sound judgment and common sense in ascertaining whether a serious impairment to human health exists. Doubts should be resolved in favor of continued service.

(3) No such corporation shall terminate service for nonpayment where a customer or other person residing in the premises exhibits a serious impairment to human health, as described in paragraph (b) (2) of this section, unless:

- (i) the corporation notifies the local social services commissioner orally, and within five days in writing, on forms prescribed or approved by the commission (Appendix 16 contains the suggested form), that the customer or other person residing in the premises exhibits a serious impairment to human health; and
- (ii) the local social services commissioner, after an investigation, informs the corporation that the health-impairing condition does not exist or is not serious, or that an alternative means for protecting the person's health has been devised.

The corporation may exercise its own discretion with respect to terminating service to the customer in the event it does not receive an oral or written report from the local social services commissioner within 15 business days after the written referral of the matter by the corporation to the commissioner.

(4) If such a corporation terminates gas service to a customer because of nonpayment and the customer or a person 18 years of age or older residing on the premises was not personally contacted by the corporation before termination of service and has not communicated with the

corporation for the purpose of requesting reconnection before 12 noon on the day following termination of service, the corporation shall immediately attempt to determine, by onsite inspection, direct personal contact at the premises with the residential customer or other adult person, or other reasonable measures, whether there is continuing occupancy and whether a serious impairment to human health, as described in paragraph (b) (2) of this section, exists. If the corporation determines that a customer or other person residing in the premises faces impairment to his or her health, it shall immediately restore the gas service and the requirements of paragraph (b) (3) of this section shall apply. If the corporation is unable obtain personal contact with the customer or an adult residing on the premises, and does not have reasonable grounds to believe that the customer has vacated the premises, it shall immediately refer the name and address of the customer to the local commissioner of social services, in accordance with the procedures set forth in paragraph (b) (3) of this section.

(5) Each such corporation shall designate an employee who will serve as a liaison with local social services departments.

(6) Each such corporation shall file with the commission for its review the procedures to be followed by the corporation's personnel in complying with these special procedures.

(c) If such corporation decides to disconnect gas service to a residential customer because it has established that the meter or service laterals have been tampered with or a theft of service has occurred, it shall attempt to determine, according to the procedures set forth in paragraphs (b) (1) and (2) of this section, whether a serious impairment would result from service disconnection. If such corporation ascertains that a serious impairment to human health would result, it shall observe the procedures set forth in paragraphs (b) (3) and (4) of this section; provided, however, that the requirement of continued service shall not apply in the event it is impractical for such corporation to eliminate any unsafe condition. In any case where a serious impairment is found and the corporation terminates service to preclude the continuation of an unsafe condition, it shall specially notify the local social services commissioner on the same day service is disconnected and request an immediate consideration of the case.

Comment: If a utility discovers a meter tampering or theft situation and determines that a serious impairment exists, it should continue service, pending DSS review, provided that service can be rendered safely. For example, if a utility discovers that the meter of a "locked account" is advancing, it should, in most circumstances, be able to

continue service in a safe manner. In other theft cases, particularly those involving gas service, the need for rendering the condition safe may preclude the continuation of service. For example, if a gas utility discovers unsafe piping, an unsafe meter bypass or substantial damage to the meter, termination may be the best method of eliminating the unsafe condition. If the utility cannot readily repair the unsafe condition or, in the case of a gas company, cannot obtain access to the pilot lights (which would have to be relit), immediate restoration of service would not be practical. The utility should specifically note, in its referrals to DSS, those cases where heat-related service is not restored or continued so that DSS may give immediate attention to them.

.SO DOC 16B-275.13

NYCRR

275.13 Survey of residential customers previously disconnected for nonpayment or theft of service. Not earlier than September 1 nor later than November 1 of every year, each gas corporation and gas and electric corporation shall conduct a survey of all former residential customers whose gas/electric service was used for heating the premises or operating a heating system, was terminated for nonpayment, meter or service lateral tampering, or theft of service during the 12-month period ending on November 1 of that year, and has not been restored. The purpose of the survey is to determine whether a continued lack of service may expose the former customer or other person residing in the premises to a serious impairment to human health as defined in subdivision (b) of section 275.12 of this Part. If the corporation determines that a former residential customer or other person residing in the premises may be exposed to a serious impairment to human health as defined in subdivision (b) of section 275.12 of this Part, it shall restore the gas service immediately, unless the customer refuses to permit such corporation to restore service or, in theft or tampering situations, unless it is impractical for the corporation to eliminate an unsafe condition, and the requirements of subdivision (b) of section 275.12 of this Part shall apply. If the corporation is unable to obtain personal contact with the customer or an adult residing on the premises, or the customer refuses to permit service restoration, it shall immediately refer the name and address of the former customer to the local commissioner of social services in accordance with the procedures set forth in paragraph (b)(3) of section 275.12 of this Part, unless the corporation has reasonable grounds to believe that the former customer has permanently vacated the premises.

.SO DOC 16B-275.14

NYCRR

275.14 Voluntary third-party notice prior to discontinuance of

service. (a) Each and every gas and gas and electric and municipal gas corporation shall permit a residential consumer to designate a third party to receive a copy of every notice of discontinuance of service sent to such residential consumer, provided that such third party indicates in writing his or her willingness to receive such notices.

(b) Such corporations shall notify residential consumers annually of the availability of the third-party notice procedure.

.SO DOC 16B-275.15

NYCRR

275.15 Installment plans for residential customers. No such corporation shall terminate service to a customer because of the customer's failure to pay for service unless the corporation has first offered a monthly installment plan that is just and equitable. Each corporation must offer a just and equitable monthly plan to all customers whose service has been disconnected for nonpayment. To the extent practicable, the monthly installment plan should be based on the customer's ability to pay, past payment history, the amount of indebtedness, and the availability of other resources. The monthly installment plan should require a customer to pay current bills and a portion of past indebtedness. A new monthly installment plan need not be offered to a customer who is in default on an existing one.

PART 277

INTEREST ON CUSTOMER OVERPAYMENTS TO GAS UTILITIES

(Statutory authority: Public Service Law, § 118[3])

Sec.

277.1 General

277.2 Standards

277.3 Rate of interest

277.4 Limitations

.SO DOC 16B-277.1

NYCRR

Section 277.1 General. Every gas corporation or municipality shall provide interest on customer overpayments according to the standards and criteria set forth in this Part.

.SO DOC 16B-277.2

NYCRR

277.2 Standards. A customer overpayment is defined as payment by the customer to the utility in excess of the correct charge for gas service supplied to the customer which was caused by erroneous billing by the utility.

.SO DOC 16B-277.3

NYCRR

277.3 Rate of interest. The rate of interest on such amounts shall be the greater of the unadjusted customer deposit rate or the applicable

late payment rate, if any, for the service classification under which the customer was billed. Interest shall be paid from the date when the customer overpayment was made, adjusted for any changes in the deposit rate or late payment rate, and compounded monthly, until the date when the overpayment was refunded.

.SO DOC 16B-277.4 NYCRR

277.4 Limitations. This part applies to refunds returned to customers after the effective date of these rules. No gas corporation or municipality shall be required to pay interest on customer overpayments that are refunded within 30 days after such overpayment is received by the gas corporation or municipality.

CONTINUING PROPERTY RECORDS--GAS CORPORATIONS

(Statutory authority: Public Service Law, § 66)

Sec.

294.1 Corporations affected

294.2 Requirements of continuing property records

294.3 Filing of proposed record units

294.4 Completion of continuing property records

294.5 Certain records required

294.6 Original cost defined

294.7 Amounts charged in previous years to operating expenses

.SO DOC 16B-294.1

NYCRR

294.1 Corporations affected. Every gas or gas and electric corporation having annual gas operating revenues of \$100,000 or over shall establish, provide and maintain continuing property records of its property used wholly or partly in gas operations.

.SO DOC 16B-294.2

NYCRR

294.2 Requirements of continuing property records.

Such continuing property record shall comply with the following requirements:

(a) Such record shall be divided into continuing property record units which shall be arranged to conform with the operating property or the fixed capital accounts and shall include a description of each of such units.

(b) The original cost of each of such units shall be set forth provided that in those cases where the original cost cannot be ascertained without unreasonable expense, such original cost shall be estimated.

(c) Except as otherwise provided herein, there shall be shown for property hereafter installed, and for present property so far as can be ascertained, either in such record or in supporting data thereto, for each of such units, the date when charged to operating property or fixed capital, the location of the property, the manufacturer's name and any number or other identification mark imprinted thereon, the accounting

company number or designation, and such other description as may be necessary to plainly identify the property and the associated original cost thereof.

(d) When meters or major units of gas production, holder or regulator station equipment have been retired and subsequently reinstalled, the date when such property was first charged to operating property or fixed capital shall also be shown.

(e) Such property record shall show separately the units located in each city, village or town, and in the case of New York City in each borough, and in each gas production, holder or regulator station. When a corporation desires a modification of this requirement, application should be made to the commission.

(f) There shall be shown by appropriate reference the source of all entries; and all drawings and computations and other detail records, supporting either the quantities or the cost included in the continuing property record, shall be retained.

(g) The original cost of each parcel of land and each structure owned in fee shall be set forth and no further subdivision need be shown.

(h) The original cost of easements for right of way shall be separately set forth for each transmission line.

(i) Property consisting of a large number of similar units may be grouped and only the average unit cost need be set forth for similar units of each size installed during a calendar year, except that for gas meter installations separate unit costs need not be set forth for each year of installation.

.SO DOC 16B-294.3 NYCRR

294.3 Filing of proposed record units. Every gas or gas and electric corporation affected by this Part shall file on or before February 1, 1937 a statement setting forth the continuing property record units proposed to be used in its continuing property record.

.SO DOC 16B-294.4 NYCRR

294.4 Completion of continuing property records. (a) The continuing property record herein ordered to be established shall be completed as to property installed prior to January 1, 1937 on or before December 31, 1937. When a corporation desires a modification of this requirement, application should be made to the commission on or before November 1, 1937.

(b) Upon the completion of the continuing property record of property acquired prior to January 1, 1937, notice shall be given this commission.

.SO DOC 16B-294.5 NYCRR

294.5 Certain records required. (a) Each corporation affected by this Part shall keep such records of property and property retirements as will reflect, so far as practicable, the service life of all property retired, and will permit the determination of the age of all existing property; and also such records as will reflect the salvage and cost of removal of property retired from each account including property used wholly or partly in gas operations.

(b) Each such corporation shall also maintain such records supporting its books of account as are necessary to show the reserves accumulated to provide for depreciation or ultimate retirement of its property used wholly or partly in gas operations, separately for each operating property or fixed capital account.

.SO DOC 16B-294.6 NYCRR

294.6 Original cost defined. The term original cost when used herein means the cost of such property to the person or corporation first devoting it to public service.

.SO DOC 16B-294.7 NYCRR

294.7 Amounts charged in previous years to operating expenses. Nothing herein stated shall be taken as permitting the recording in the original cost shown in the continuing property record of amounts charged in previous years to operating expenses, operating taxes or other income or surplus accounts.

310.1 Authorization of uniform system of accounts for Classes A and B

.SO DOC 16B-310.1 NYCRR

Section 310.1 Authorization of uniform system of accounts for Classes A and B.

(a) The uniform system of accounts for gas corporations (Classes A and B) is hereby prescribed for every gas corporation (as that term is defined in the Public Service Law) that has annual operating revenues from gas operations of \$1,000,000 or more, subject to the jurisdiction of this commission; and every such gas corporation is hereby required, by no later than January 1, 2000, to keep its records and accounts in conformity therewith.

(b) During the 12 months following the date on which the uniform system of accounts becomes effective, any such gas corporation may, for

purposes of comparison, keep on its books, in addition to the accounts hereby prescribed, such portion or portions of its present accounts as may be deemed desirable by any such corporation.

(c) In prescribing this system of accounts, the commission does not commit itself to the approval or acceptance of any item set out in any account for the purpose of fixing rates or in determining other matters before the commission.

(d) In the system of accounts, Commission means the Public Service Commission of the State of New York.

311.1 Classification of utilities

311.2 Records

.SO DOC 16B-311.1

NYCRR

Section 311.1 Classification of utilities.

(a) For the purpose of applying systems of accounts prescribed by the commission, utilities are divided into four classes as follows:

Class A. Utilities having annual gas operating revenues of \$2,500,000 or more.

Class B. Utilities having annual gas operating revenues of \$1,000,000 or more, but less than \$2,500,000.

Class C. Utilities having annual gas operating revenues of \$150,000 or more, but less than \$1,000,000.

Class D. Utilities having annual gas operating revenues of \$25,000 or more, but less than \$150,000.

(b) This system of accounts applies to Class A and Class B utilities. The system of accounts applicable to Class C and Class D utilities is issued separately.

(c) The class to which any utility belongs shall originally be determined by the average of its annual gas operating revenues for the last three consecutive years. Subsequent changes in classification shall be made when the annual gas operating revenues for each of the three immediately preceding years shall exceed the upper limit, or be less than the lower limit, of the annual gas operating revenues of the classification previously applicable to the utility.

.SO DOC 16B-311.2

NYCRR

311.2 Records.

The books and records referred to in this section include not only

accounting records in a limited technical sense, but all other records, such as minute books, stock books, reports, correspondence, memoranda, etc. that may be useful in developing the history of, or facts regarding, any transaction. All such records in the system of accounts discussed below shall be accessible, at all times, to the authorized representatives of the commission at a location within the State of New York, unless the company is specifically exempted by order of the commission.

.SO DOC 16B-PT312

312.6 Gains or losses from the settlement of asset retirement obligations

.SO DOC 16B-312.1

NYCRR

Section 312.1 System of accounts prescribed.

Each Class A and Class B gas utility shall keep its accounts in conformity with the Code of Federal Regulations (Revised as of April 1, 2015), Title 18, Conservation of Power and Water Resources, Subchapter C - Accounts, Federal Power Act, Part 201, Uniform System of Accounts Prescribed for Natural Gas Companies Subject to the Provisions of the Federal Power Act. (As further described in section 10.2 (b) of these regulations).

.SO DOC 16B-312.2

NYCRR

312.2 Records for territorial subdivisions.

To the extent that utility's customer rates are based on a cost area or accounting division, the records that support those rates shall be maintained.

.SO DOC 16B-312.3

NYCRR

312.3 Work order and property record system required.

(a) The work order system shall include a work order estimate and work in progress record, which shall be supported as indicated in subdivisions (b) and (c) herein. Standing work orders may be used by Class A and B utilities for projects of relatively small value (e.g., \$100,000); except that projects upon which interest during construction

is charged shall not be recorded through standing work orders. These limits may be modified by order of the commission when warranted by particular circumstances.

(b) The work order estimate shall include the following particulars:

(1) The designation number or letter and the signature of the officer or employee who authorized the work or purchase. If the authorization is by the board of directors or other body, an appropriate officer shall so state above his signature.

(2) A description and location of the work to be done (or the purchase to be made), stating the reasons the work is necessary, and the dates between which such work (or purchase) is to be accomplished. For each project for which interest during construction is charged, the date completed and the date placed in operation shall be shown either in the work order estimate or the work in progress record.

(3) Detailed estimates of the cost of the project to be supported by maps, plans, diagrams, specifications, etc., as applicable.

(4) The account or accounts to which the cost of the project is chargeable and the amount chargeable to each account.

(5) Any variations between estimates and actual costs of the project.

(6) When a project involves changes to existing property, either the work order estimate or the work in progress record shall show the year of installation of any property retired or otherwise affected and shall show or refer to other records that cover the book costs (or an estimate if not known, and a statement explaining the basis for that estimate) and the name and page of the accounting and engineering books and records covering such installation and the cost thereof.

(c) The work in progress record shall contain the following particulars:

(1) A designation number or letter that shall correspond to the number or letter on the work order estimate covering the same project. When more than one such work in progress record covers the work on a work order estimate, each record shall be numbered or lettered in such a manner as to be readily identifiable with the work order estimate for the same project.

(2) The accumulated charges applicable to each job or project, the total cost of the completed project, and the cost of removal shall be shown. When any project involves charges to more than one gas plant account, the work in progress record shall be kept so as to show the amount chargeable to each account. Every charge or credit to work in progress records shall refer to the voucher, journal, or other source from which the entry therein was made.

(3) Full details at any time of the amount carried in account 107, Construction Work in Progress-Gas, or account 108.1, Retirement Work in Progress, as applicable. The cost of completed projects shall be promptly transferred from those accounts to the accounts to which it is chargeable. Upon coming into service, completed portions involving additions to accounts shall be transferred to the appropriate account even though other portions of the work covered by the same work order are not yet completed and the work order has not been closed. Credits of such transfers shall be made in separate columns.

(d) Requirement of the use of the work order system here outlined may be suspended by order of the commission in the case of a utility that satisfies the commission that the system it has in use for recording changes in gas plant accounts gives the equivalent detail by accounts in substantially the same form. The identification of expenditures with property must be complete and clear, and the detail of the cost of each project or job must be readily available. The total of the uncompleted projects must also be in agreement with account 107, Construction Work in Progress-Gas, or account 108.1, Retirement Work in Progress, as applicable.

(e) The work order system is required to record changes in electric plant used either wholly or in part in electric operations. Its use is recommended, however, in recording other expenditures, such as for plant in other departments, repairs, etc. When used for repairs, balances applicable thereto shall be cleared monthly to the appropriate accounts.

.SO DOC 16B-312.4

NYCRR

312.4 Spreading of income, revenue, and expense items.

When the amount of any unusual item includible in the income, operating revenue, or operating expense accounts is relatively so large that its inclusion in the accounts for the year in which the transactions occurred, would seriously distort net income, the company may request permission to include all or a part of the amount in account 186, Miscellaneous Deferred Debits, or account 253, Other Deferred Credits to be amortized over such period and through such accounts as the commission shall determine. Without permission of this commission, no such item shall be carried beyond the calendar year in which the transaction occurred.

.SO DOC 16B-312.5

NYCRR

312.5 Transportation of gas of others-distribution facilities.

Revenues from transporting gas to the utility's customers through the distribution facilities of the utility where the gas is provided by a party other than the utility shall be included in account 489.3,

Transportation of Gas of Others-Distribution Facilities. Subsidiary accounts shall be maintained to break down these revenues according to the classification of accounts under the sales of electricity revenue accounts. Records shall be maintained so that the quantity of gas transported and the revenue received under each rate schedule shall be readily available.

.SO DOC 16B-312.6

NYCRR

312.6 Gains or losses from the settlement of asset retirement obligations.

Gains or losses resulting from the settlement of asset retirement obligations associated with the utility plant resulting from the difference between the amount of the liability for the asset retirement obligation included in account 230, Asset Retirement Obligation, and the actual amount paid to settle the obligation shall be accounted for as follows:

(a) gains shall be credited to account 108, Accumulated Provision for Depreciation of Gas Utility Plant; and

(b) losses should be charged to account 108, Accumulated Provision for Depreciation of Gas Utility Plant.

.SO DOC 16B-ACCTSAB

ASSETS AND OTHER DEBITS

1. UTILITY PLANT

- 101. Gas Plant in Service

A. This account shall include the original cost of gas plant included in accounts 301 to 399 prescribed herein, owned by the utility and used and useful in the service of the public in its gas operations, and having an expectation of life in service of more than one year from date of installation, including such property owned by the utility but held by nominees. (See also account 106 for unclassified construction costs of completed plant actually in service.)

B. The cost of additions to and betterments of property leased from others, which are includible in this account, shall be recorded in subdivisions separate and distinct from those relating to owned property. (See Part 313 Instructions--Gas Plant Accounts, § 313.6.)

C. This account may include the entire original cost of property which is partially used and useful in utility operations when the portion which is so used and useful is not separable from the portion which is not used and useful.

102. Gas Plant Purchased or Sold

This account shall be charged with the cost of gas plant acquired as an operating unit or system by purchase, merger, consolidation, liquidation or otherwise, and shall be credited with the selling price of like property transferred to others pending the distribution to appropriate accounts in accordance with Part 313 Instructions--Gas Plant Accounts, § 313.5.

103. Experimental Gas Plant Unclassified

A. This account shall include the cost of gas plant which was constructed as a research and development project under the provisions of paragraph C, account 107, Construction Work in Progress--Gas, and due to the nature of the plant it is desirable to operate it for a period of time in an experimental status.

B. Amounts in this account shall be transferred to account 101, Gas Plant in Service, or account 121, Nonutility Property, as appropriate, when the project is no longer considered as experimental.

C. The depreciation on property in this account shall be charged to account 403, Depreciation Expense, and credited to account 108, Accumulated Provision for Depreciation of Gas Plant in Service. The amounts herein shall be depreciated over a period which would correspond to the estimated useful life of the relevant project considering the experimental characteristics involved. However, when projects are transferred to account 101, Gas Plant in Service, a new depreciation rate based on the remaining service life and undepreciated amounts, shall be established.

D. Records shall be maintained with respect to each unit of experimental plant so that full details may be obtained as to the cost, depreciation and the experimental status.

E. Should it be determined that experimental plant recorded in this account will fail to perform its function satisfactorily, the costs thereof shall be accounted for as directed or authorized by the commission.

104. Gas Plant Leased to Others

A. This account shall include the original cost of gas plant owned by the utility, but leased to others as operating units or systems, where the lessee has exclusive possession.

B. The property included in this account shall be classified according to the detailed accounts (301 to 399) prescribed for gas plant in service and this account shall be maintained in such detail as though the property were used by the owner in its gas operations.

105. Gas Plant Held for Future Use

A. This account shall include the original cost of gas plant (except land and land rights) owned and held for future used in gas service under a definite plan for such use, to include: (1) property acquired (except land and land rights) but never used by the utility in gas service, but held for such service in the future under a definite plan, and (2) property (except land and land rights) previously used by the utility in gas service, but retired from such service and held pending its reuse in the future, under a definite plan, in gas service. This includes production properties relating to leases held to insure a future supply of natural gas.

B. This account shall also include the original cost of land and land rights owned and held for future use in gas service under a plan for such use, to include land and land rights: (1) acquired but never used by the utility in gas service, but held for such service in the future under a plan, and (2) previously held by the utility in gas service, but retired from such service and held pending its reuse in the future under a plan, in gas service. (See Gas Plant Instruction, 313.7.)

C. In the event that property recorded in this account shall no longer be needed or appropriate for future utility operations, the company shall notify the commission of such condition and request approval of journal entries to remove such property from this account.

D. Gains or losses from the sale of land and land rights or other disposition of such property previously recorded in this account and not placed in utility service shall be recorded directly in account 411.6 or 411.7 as appropriate, except when such gains or losses are significant, the company may request commission approval to transfer the amounts to account 256, Deferred Gains from Disposition of Utility Plant or account 187, Deferred Losses from Disposition of Utility Plant and amortize the amounts to account 411.6, Gains from Disposition of Utility Plant, or 411.7, Losses from Disposition of Utility Plant, over such period as the commission may authorize.

E. The property included in this account shall be classified according to the detailed accounts (301 to 399) prescribed for gas plant in

service and the account shall be maintained in such detail as though the property were in service.

Note A: Materials and supplies, meters and house regulators held in reserve, and normal spare capacity of plant in service shall not be included in this account.

Note B: Include in this account natural gas wells shut in after construction which have not been connected with the line; also, natural gas wells which have been connected with the line but which are shut in for any reason except seasonal excess capacity or governmental proration requirements or for repairs.

Note C: Unsuccessful exploration and development costs shall be charged to account 338, Unsuccessful Exploration and Development Costs.

106. Completed Construction Not Classified--Gas

At the end of the year or such other date as a balance sheet may be required by the commission, this account shall include the total of the balances of work orders for gas plant which has been completed and placed in service but which work orders have not been classified for transfer to the detailed gas plant accounts.

Note: For the purpose of reporting to the commission, the classification of gas plant in service by the prescribed accounts is required; the utility shall also report the balance in this account tentatively classified as accurately as practicable according to prescribed account classifications. The purpose of this provision is to avoid any significant omissions in reported amounts of gas plant in service.

107. Construction Work in Progress--Gas

A. This account shall include the total of the balances of work orders for gas plant in process of construction.

B. Work orders shall be cleared from this account as soon as practicable after completion of the job. Further, if a project, such as a gas production plant, a compressor station, or a transmission line, is designed to consist of two or more units which may be placed in service at different dates, any expenditures which are common to and which will be used in the operation of the project as a whole shall be included in gas plant in service upon the completion and the readiness for service of the first unit. Any expenditures which are identified exclusively with units of property not yet in service shall be included in this account.

C. Expenditures on research and development projects for construction of utility facilities are to be included in a separate subdivision in this account. Records must be maintained to show separately each project

along with complete detail of the nature and purpose of the research and development project together with the related costs. Costs recorded in this account related to successful projects become a part of the cost of the project for accounting and rate purposes when the project is placed in service. Costs related to unsuccessful projects may be amortized to operating expenses with the approval of the commission.

Note: Unsuccessful exploration and development costs shall be transferred to account 338, Unsuccessful Exploration and Development Costs.

108. Accumulated Provision for Depreciation of Gas Plant in Service

A. This account shall be credited with the following:

(1) Amounts charged to account 403, Depreciation Expense (except in connection with common utility plant), to account 416, Costs and Expenses of Merchandising, Jobbing and Contract Work, and to clearing accounts for current depreciation expense.

(2) Amounts of depreciation applicable to gas properties acquired as operating units or systems. (See gas plant instruction 313.5.)

(3) Amounts charged to account 182, Extraordinary Property Losses, when authorized by the commission.

B. At the time of retirement of depreciable gas plant in service this account shall be charged with the book cost of the property retired and the cost of removal, and shall be credited with the salvage value and any other amounts recovered, such as insurance. (See Part 313 Instructions--Gas Plant Accounts, § 313.10(b)(2).) When retirements, cost of removal and salvage are entered originally in retirement work orders, the net total of such work orders shall be included in a separate subaccount hereunder, titled 108.1, Retirement Work in Progress. Upon completion of the work order, the proper distribution to subdivisions of this account shall be made as provided in the following paragraph.

C. For general ledger and balance sheet purposes, this account shall be regarded and treated as a single composite provision for depreciation. For purposes of analysis, however, each utility shall maintain subsidiary records in which this account is segregated according to the primary gas plant accounts. Such subsidiary records shall reflect the current credits and debits to this account in sufficient detail to show separately for each primary gas plant account (1) the amount of provision for depreciation, (2) the book cost of property retired, (3) cost of removal, (4) salvage, and (5) other items, including recoveries from insurance. (See, also, Part 311 Instructions--General, § 311.12(d).)

D. When transfers of plant are made from one gas plant account to another, or from or to another utility department, or from or to nonutility property accounts, the accounting for the related accumulated provision for depreciation shall be as provided in gas plant instruction 313.12.

E. The utility is restricted in its use of the accumulated provision for depreciation to the purposes set forth above. It shall not transfer any portion of this account to retained earnings or make any other use thereof without authorization by the commission.

109. Accumulated Provision for Depreciation of Gas Plant Leased to Others

A. This account shall be credited with amounts charged to account 413, Expenses of Gas Plant Leased to Others, for current depreciation expense of property included in account 104, Gas Plant Leased to Others. Include, also, credits for depreciation applicable to plant acquired as operating units or systems, or for losses transferred to account 182, Extraordinary Property Losses.

B. The requirements of account 108, Accumulated Provision for Depreciation of Gas Plant in Service, regarding retirements chargeable thereto and of subsidiary data to be maintained shall be applicable likewise to this account.

C. The utility is restricted in its use of the accumulated provision for depreciation to the purposes set forth above. It shall not transfer any portion of this account to retained earnings or make any other use thereof without authorization by the commission.

110. Accumulated Provision for Depreciation of Gas Plant Held for Future Use

A. This account shall be credited with amounts charged to account 421, Miscellaneous Nonoperating Income, for depreciation expense on property included in account 105, Gas Plant Held for Future Use. Include also the balance of accumulated provision for depreciation on property which may be transferred to account 105, Gas Plant Held for Future Use, from other property accounts.

B. The utility is restricted in its use of the accumulated provision for depreciation to the purposes set forth above. It shall not transfer any portion of this account to retained earnings or make any other use thereof without authorization by the commission.

Note: Normally, this account will not be used for current depreciation provisions because, as provided herein, the service life during which depreciation is computed commences with the date property is includible in gas plant in service. However, if special circumstances indicate the

propriety of current accruals for depreciation, such charges shall be made to account 421, Miscellaneous Nonoperating Income.

111. Accumulated Provision for Amortization and Depletion of Gas Plant in Service

A. This account shall include the accumulated provisions applicable to gas plant in service for the amortization and depletion of producing natural gas land and land rights; for the amortization of underground storage land and land rights; for the amortization of other limited-term gas plant; and for the amortization of intangible or other gas plant which is not subject to charges for depreciation expense.

B. Separate subdivisions of this account shall be maintained under the following titles:

111.1 Accumulated Provision for Amortization and Depletion of Producing Natural Gas Land and Land Rights

A. This account shall be credited with amounts charged to account 404.1, Amortization and Depletion of Producing Natural Gas Land and Land Rights, to provide for the current amortization and depletion of land and land rights from which natural gas is obtained. (See gas plant instruction 313.7, subd. (h).)

B. This account shall also be credited with such amounts as are necessary to reflect, as of the effective date of this system of accounts, the portion of the cost of land and land rights which have been exhausted through the extraction of natural gas.

C. When any property to which this account applies, is sold, relinquished, or otherwise retired from service, this account shall be charged with the amount previously credited in respect to such property. The book cost of the property so retired less the amount chargeable to this account and less the net proceeds realized at retirement shall be included in account 421.1, Gain on Disposition of Property, or account 421.2, Loss on Disposition of Property, as appropriate.

D. Records shall be maintained so as to show separately the balance applicable to each item of land and land rights which is being amortized or depleted, except that natural gas land and land rights which comprise an interest in a production area may be grouped to form a unit for amortization and depletion and the accumulated provision applicable thereto need not be segregated to show the amount related to each gas right included therein.

E. The utility is restricted in its use of the accumulated provision for amortization and depletion to the purposes set forth above. It shall not transfer any portion of this account to retained earnings or make any other use thereof without authorization by the commission.

111.2 Accumulated Provision for Amortization of Underground Storage Land and Land Rights

A. This account shall be credited with amounts charged to account 404.2, Amortization of Underground Storage Land and Land Rights, to provide for current amortization of land and land rights utilized in connection with underground gas storage operations.

B. This account also shall include all amounts of accumulated past provisions for amortization and depletion of natural gas lands and land rights converted to underground gas storage purposes. These amounts shall be transferred to this account from other accounts in which included on conversion of such property to underground storage use.

C. When any property to which this account applies is sold, relinquished, or otherwise retired from service, this account shall be charged with the amount previously credited in respect to such property. The book cost of the property so retired less the amount chargeable to this account and less the net proceeds realized at retirement shall be included in account 421.1, Gain on Disposition of Property, or account 421.2, Loss on Disposition of Property, as appropriate.

D. Records shall be maintained so as to show separately the balance applicable to each underground gas storage project.

E. The utility is restricted in its use of the accumulated provision for amortization to the purposes set forth above. It shall not transfer any portion of this account to retained earnings or make any other use thereof without authorization by the commission.

111.3 Accumulated Provision for Amortization of Other Gas Plant in Service

A. This account shall be credited with amounts charged to account 404.3, Amortization of Other Limited-term Gas Plant, for the current amortization of limited-term gas investments. It shall be credited also with amounts which may be charged to account 405, Amortization of Other Gas Plant, to account 425, Miscellaneous Amortization, to amortize intangible or other gas plant which is not subject to charges for depreciation expense and for which the accumulated amortization is not includible in either of the preceding accounts, 111.1 and 111.2.

B. When any property to which this account applies is sold, relinquished, or otherwise retired from service, this account shall be charged with the amount previously credited in respect to such property. The book cost of the property so retired less the amount chargeable to this account and less the net proceeds realized at retirement shall be included in account 421.1, Gain on Disposition of Property, or account 421.2, Loss on Disposition of Property, as appropriate.

C. Records shall be maintained so as to show separately the balance applicable to each class of property which is being amortized.

D. The utility is restricted in its use of the accumulated provision for amortization to the purposes set forth above. It shall not transfer any portion of this account to retained earnings or make any other use thereof without authorization by the commission.

112. Accumulated Provisions for Amortization and Depletion of Gas Plant Leased to Others

A. This account shall be credited with amounts charged to account 413, Expenses of Gas Plant Leased to Others, for the current amortization and depletion of producing gas lands, limited-term or other investments subject to amortization included in account 104, Gas Plant Leased to Others, including such amounts as may be applicable to underground gas storage property leased to others.

B. When any property to which this account applies is sold, relinquished, or otherwise retired from service, this account shall be charged with the amount previously credited in respect to such property. The book cost of the property so retired less the amount chargeable to this account and less the net proceeds realized at retirement shall be included in account 421.1, Gain on Disposition of Property, or account 421.2, Loss on Disposition of Property, as appropriate.

C. Records shall be maintained so as to show separately the balance applicable to each class of property which is being amortized. Amounts applicable to producing natural gas lands shall be shown in a separate account.

D. The utility is restricted in its use of the accumulated provision for amortization and depletion to the purposes set forth above. It shall not transfer any portion of this account to retained earnings or make any other use thereof without authorization by the commission.

113.1 Accumulated Provision for Abandonment of Leases

A. This account shall be credited with amounts concurrently charged to account 797, Abandoned Leases, for the purpose of providing for the costs of natural gas leases which may be abandoned and which have never been productive.

B. When such natural gas leases are abandoned, the cost thereof, including expenses incidental to abandonment, shall be charged to this account; provided, however, that any deficiency in this account at the time of abandonment of the lease shall be charged to account 797, Abandoned Leases.

C. Records supporting this account shall be so kept as to show for each abandoned lease the date and period thereof, location, date

abandoned, and the nature and amounts of the cost.

D. The utility is restricted in its use of the accumulated provision for amortization to the purposes set forth above. It shall not transfer any portion of this account to retained earnings or make any other use thereof without authorization by the commission.

Note: No provision shall be made in this account for the abandonment of producing natural gas leases, and the provisions of gas plant instruction 318.12, Transfers of Property, shall not apply to amounts included herein. (See account 111.1, Accumulated Provision for Amortization and Depletion of Producing Natural Gas Land and Land Rights.)

113.2 Accumulated Provision for Amortization of Other Gas Plant Held for Future Use

A. This account shall be credited with amounts charged to account 421, Miscellaneous Nonoperating income, for amortization expense on property included in account 105, Gas Plant Held for Future Use, not including, however, provisions for abandoned natural gas leases. Include, also, the balance of accumulated provision for amortization on property which may be transferred to account 105, Gas Plant Held for Future Use, from other property accounts.

B. The utility is restricted in its use of the accumulated provision for amortization to the purposes set forth above. It shall not transfer any portion of this account to retained earnings or make any other use thereof without authorization by the commission.

Note: Normally, this account will not be used for current amortization provisions because, as provided herein, the service life during which amortization is computed commences with the date property is includible in utility plant in service. However, if special circumstances indicate the propriety of current accruals for depreciation or amortization, such charges shall be made to account 421, Miscellaneous Non-operating Income.

114. Gas Plant Acquisition Adjustments

A. This account shall include amounts determined in accordance with gas plant instruction 313.5 representing the difference between (1) the amount of money actually paid (or the current money value of any consideration other than money exchanged) for gas plant acquired as an operating unit or system by purchase, merger, consolidation, liquidation, or otherwise, plus the costs and expenses incurred in connection with the acquisition and properly related thereto the accounting disposition of which has not been otherwise provided for, and (2) the original cost, estimated if not known, of such property less

credits thereto representing contributions in aid of construction and less the amount or amounts credited to accumulated provisions for depreciation, depletion, and amortization with respect to such property.

B. This account shall be subdivided so as to show the amounts included herein for each property acquisition, and the amounts related to gas plant in service, gas plant held for future use, and gas plant leased to others. (See gas plant instruction 313.5.)

C. The amounts recorded in this account with respect to each property acquisition shall be disposed of, written off, or provision shall be made for the amortization thereof, as follows:

(1) Debit amounts may be charged to account 426.5, Other Deductions, or account 435, Extraordinary Deductions, as appropriate, in whole or in part, or amortized through charges made in accordance with an orderly and systematic amortization program to account 425, Miscellaneous Amortization, without further direction or approval of this commission. Should the utility desire the disposition of debit amounts in any manner other than as herein provided it shall request that the commission (i) approve disposition proposed by the utility or (ii) direct appropriate disposition according to the circumstances involved in each transaction. (See also account 406.)

(2) Credit amounts shall be disposed of in such manner as this commission may approve or direct.

115. Accumulated Provision for Amortization of Gas Plant Acquisition Adjustments.

This account shall be credited or debited with amounts which are includible in account 406, Amortization of Gas Plant Acquisition Adjustments or account 425, Miscellaneous Amortization, for the purpose of providing for the extinguishment of amounts in account 114, Gas Plant Acquisition Adjustments, in instances where the amortization of account 114 is not being made by direct write-off of the account.

117. Gas Stored Underground--Noncurrent

A. This account shall include the costs of recoverable gas purchased or produced by the utility which is stored in depleted or partially depleted gas or oil fields, or other underground reservoirs and held for use in meeting service requirements of the utility's customers.

B. Gas stored during the year shall be priced at cost according to generally accepted methods of cost determination consistently applied from year to year. Transmission expenses for facilities of the utility used in moving the gas to the storage area and expenses of storage facilities shall not be included in the inventory of gas except as may be authorized by the commission.

Note B-1: In general, gas stored from the supply in an integrated system shall be priced at the average cost of the gas constituting the common supply of the system, although this general rule may be departed from where conditions of system operation of gas supply and utilization permit a valid presumption that the gas stored may be considered to be from specified sources, as indicated below.

Note B-2: When in harmony with the over-all system operation of gas supply and utilization, and the presumption is consistently observed from year to year, gas stored during the year may be presumed to be from total gas purchases, or from purchases from specified sources. When either of these presumptions is proper, the cost of gas stored shall be priced at the weighted average cost of all gas purchased, or at the weighted average cost of purchases from the specified sources, as appropriate. The weighted average cost may be the average for the preceding 12 months, except where a significant change occurs in the cost of gas, the full effect of such change shall be reflected for the period after the change is effective.

Note B-3: When in harmony with the over-all system operation of gas supply and utilization, and the presumptions are consistently observed from year to year, gas stored during the year may be presumed to be from identified sources of the utility's own production. Such stored gas shall be priced at the weighted average cost of gas produced from the specified production areas. Where this presumption is made, or where the stored gas is identified as a matter of fact under circumstances which do not permit a proper application of the theory of displacement, the utility shall maintain separate records of the cost of gas produced from such areas and the derivation of the cost used for stored gas from such sources.

Note B-4: Where gas is purchased specifically for storage, or a price concession received because of the storing of purchased gas, such gas shall be priced at the net contract price of the gas so purchased and stored.

Note B-5: The provisions of this instruction and the related footnotes shall not be construed as permitting or authorizing a restatement of the amounts at which stored gas inventories are stated on the utility's books at the effective date of this instruction, except as may be authorized by the commission.

C. Withdrawals of gas may be priced according to the first-in-first-out, last in-first-out, or weighted average cost method, in connection with which a "base stock" may be employed provided the method adopted by the utility is used consistently from year to year and

the inventory records are maintained in accordance therewith. Approval of the commission must be obtained for any other pricing method, or change in the pricing method adopted by the utility.

D. If the gas of any storage project is withdrawn below the amount established as "base stock" or encroaches upon native gas of a storage reservoir, and such gas is to be replaced within 12 months, it shall be permissible to price such gas at the estimated cost of replacement with purchased gas and to record a deferred credit therefor. For the purpose of this instruction, account 808, Gas Withdrawn from Storage--Debit, shall be charged with the estimated cost of such replacement gas and account 253, Other Deferred Credits, credited. When replacement of the gas is made the amount in account 253 shall be cleared and this account credited. This accounting will not affect normal accounting for inputs and withdrawals from storage.

E. Separate records shall be maintained for each storage project of the Mcf of gas delivered to storage, withdrawn from storage, and remaining in storage. The projects shall be grouped, however, for the purpose of maintaining inventory records of the cost of gas in storage, unless the storage projects are widely separated and the cost of gas therein varies significantly, in which event cost records shall be maintained for the separate areas.

F. Amounts debited to this account for gas placed in storage shall be credited to account 809, Gas Delivered to Storage--Credit. Amounts credited to this account for gas withdrawn from storage shall be debited to account 808, Gas Withdrawn from Storage--Debit.

G. Adjustments for inventory losses due to cumulative inaccuracies of gas measurements, or from other causes, shall be charged to account 823, Gas Losses. In the operation of storage projects the utility shall maintain such procedures of verification as will disclose and result in prompt accounting recognition of significant losses.

H. This account shall be credited with an amount equal to that debited to account 164.1, Gas Stored Underground--Current, to classify for balance sheet purposes such portion of the total inventory of gas stored underground as constitutes a current asset according to conventional rules for classification of current assets. (See account 164.1.)

Note: If with respect to any storage reservoir, the utility determines that a portion of the stored gas included in this account will not eventually be fully recovered, it may submit for consideration of the commission, a plan to create a reserve to provide for such anticipated gas losses.

118.1 Common Utility Plant

This account shall include the balances in accounts for utility plant which is used in common for gas operations and other operations. (See gas plant instruction 313.13.)

118.2 Other Utility Plant

A. This account shall include the balances in accounts for utility plant, other than gas plant and common utility plant.

B. A separate account shall be maintained for each utility department.

Note: In the case of utility services for which systems of accounts are prescribed by this commission, such as electric, steam, etc., the appropriate accounts in such systems shall be used instead of this account.

119.1 Accumulated Provision for Depreciation and Amortization of Common Utility Plant

This account shall include the accumulated provision for depreciation and amortization applicable to property carried in common utility plant account 118.1. (See also general instruction 311.12 and gas plant instruction 313.13.)

119.2 Accumulated Provision for Depreciation and Amortization of Other Utility Plant

This account shall include the accumulated provision for depreciation and amortization applicable to property in account 118.2, Other Utility Plant.

Note: In the case of utility services for which systems of accounts are prescribed by this commission, such as electric, steam, etc., the appropriate accounts in such systems shall be used instead of this account.

2. OTHER PROPERTY AND INVESTMENTS

121. Nonutility Property

A. This account shall include the book cost of land, structures, equipment or other tangible or intangible property owned by the utility, but not used in utility service and not properly includible in account 105, Gas Plant Held for Future Use.

B. This account shall be subdivided so as to show the amount of property used in operations which are nonutility in character but nevertheless constitute a distinct operating activity of the company (such as operation of an ice department) and the amount of miscellaneous property not used in operations. The records in support of each subaccount shall be maintained so as to show an appropriate classification of the property.

122. Accumulated Provision for Depreciation and Amortization of Nonutility Property

This account shall include the accumulated provision for depreciation and amortization applicable to nonutility property.

123. Investment in Associated Companies

A. This account shall include the book cost of investments in securities issued or assumed by associated companies and investment advances to such companies, including interest accrued thereon when such interest is not subject to current settlement, provided that the investment does not relate to a subsidiary company. (If the investment relates to a subsidiary company it shall be included in account 123.1, Investment in Subsidiary Companies.) Include herein the offsetting entry to the recording of amortization of discount or premium on interest bearing investments. (See account 419, Interest and Dividend Income.)

B. The account shall be maintained in such manner as to show the investment in securities of, and advances to, each associated company together with full particulars regarding any of such investments that are pledged.

Note A: Securities and advances of associated companies owned and pledged shall be included in this account, but such securities, if held in special deposits or in special funds, shall be included in the appropriate deposit or fund account. A complete record of securities pledged shall be maintained.

Note B: Securities of associated companies held as temporary cash investments are includible in account 136, Temporary Cash Investments.

Note C: Balances in open accounts with associated companies, which are subject to current settlement, are includible in account 146, Accounts Receivable from Associated Companies.

Note D: The utility may write down the cost of any security in recognition of a decline in the value thereof. Securities shall be written off or written down to a nominal value if there be no reasonable prospect of substantial value. Fluctuations in market value shall not be recorded but a permanent impairment in the value of securities shall be recognized in the accounts. When securities are written off or written down, the amount of the adjustment shall be charged to account 426.5, Other Deductions, or to an appropriate account for accumulated provisions for loss in value established as a separate subdivision of this account.

Note E: Advances made to associated companies without expectation of reimbursement shall be credited to this account and charged to account 426.5, Other Deductions.

123.1 Investment in Subsidiary Companies

A. This account shall include the cost of investments in securities

issued or assumed by subsidiary companies and investment advances to such companies, including interest accrued thereon when such interest is not subject to current settlement plus the equity in undistributed earnings or losses of such subsidiary companies since acquisition. This account shall be credited with any dividends declared by such subsidiaries.

B. This account shall be maintained in such a manner as to show separately for each subsidiary: the cost of such investments in the securities of the subsidiary at the time of acquisition; the amount of equity in the subsidiary's undistributed net earnings or net losses since acquisition; advances or loans to such subsidiary; and full particulars regarding any such investments that are pledged.

124. Other Investments

A. This account shall include the book cost of investments in securities issued or assumed by nonassociated companies, investment advances to such companies, and any investments not accounted for elsewhere. Include also the offsetting entry to the recording of amortization of discount or premium on interest bearing investments. (See account 419, Interest and Dividend Income.)

B. The records shall be maintained in such manner as to show the amount of each investment and the investment advances to each person.

C. When securities with a fixed maturity date are purchased at a discount (that is, when the total cost, including brokerage fees, taxes, commissions, etc., is less than par), such discount may be amortized over the remaining life of the securities through periodic debits to the account in which the securities are carried (preferably coincident with entries recording interest accruals) and credits to the same account in which the interest revenue is recorded. No debits shall be made in respect to discount upon securities held as investments or in special funds if there is reason to believe that such securities will be disposed of by redemption or otherwise at less than par or will not be paid at date of maturity.

D. When securities with a fixed maturity date are purchased at a premium (that is, when the total cost, including brokerage fees, taxes, commissions, etc., is in excess of par), such premium may be amortized over the remaining life of the securities through periodic credits to the account in which the securities are carried (preferably coincident with entries recording interest accruals) and debits to the same account in which the interest revenue is recorded.

Note A: Securities owned and pledged shall be included in this account, but securities held in special deposits or in special funds

shall be included in appropriate deposit or fund accounts. A complete record of securities pledged shall be maintained.

Note B: Securities held as temporary cash investments shall not be included in this account. (See account 136, Temporary Cash Investments.)

Note C: See note D of account 123.

125. Sinking Funds

This account shall include the amount of cash and book cost of investments held in sinking funds. A separate account, with appropriate title, shall be kept for each sinking fund. Transfers from this account to special deposit accounts may be made as necessary for the purpose of paying matured sinking-fund obligations, or obligations called for redemption but not presented, or the interest thereon.

126. Depreciation Fund

This account shall include the amount of cash and the book cost of investments which have been segregated in a special fund for the purpose of identifying such assets with the accumulated provisions for depreciation.

128. Other Special Funds

This account shall include the amount of cash and book cost of investments which have been segregated in special funds for insurance, employee pensions, savings, relief, hospital, and other purposes not provided for elsewhere. A separate account, with appropriate title, shall be kept for each fund.

Note: Amounts deposited with a trustee under the terms of an irrevocable trust agreement for pensions or other employee benefits shall not be included in this account.

3. CURRENT AND ACCRUED ASSETS

131. Cash

This account shall include the amount of current cash funds except working funds.

132. Interest Special Deposits

This account shall include special deposits with fiscal agents or others for the payment of interest.

133. Dividend Special Deposits

This account shall include special deposits with fiscal agents or others for the payment of dividends

134. Other Special Deposits

This account shall include deposits with fiscal agents or others for special purposes other than the payment of interest and dividends. Such special deposits may include cash deposited with federal, State, or municipal authorities as a guaranty for the fulfillment of obligations;

cash deposited with trustees to be held until mortgaged property sold, destroyed, or otherwise disposed of is replaced; cash realized from the sale of the accounting utility's securities and deposited with the trustees to be held until invested in property of the utility, etc. Entries to this account shall specify the purpose for which the deposit is made.

Note: Assets available for general corporate purposes shall not be included in this account. Further, deposits for more than one year, which are not offset by current liabilities, shall not be charged to this account but to account 128, Other Special Funds.

135. Working Funds

This account shall include cash advanced to officers, agents, employees, and others as petty cash or working funds.

136. Temporary Cash Investments

A. This account shall include the book cost of investments, such as demand and time loans, bankers' acceptances, United States Treasury certificates, marketable securities, and other similar investments, acquired for the purpose of temporarily investing cash.

B. This account shall be so maintained as to show separately temporary cash investments in securities of associated companies and of others. Records shall be kept of any pledged investments.

141. Notes Receivable

This account shall include the book cost, not includible elsewhere, of all collectable obligations in the form of notes receivable and similar evidences (except interest coupons) of money due on demand or within one year from the date of issue, except, however, notes receivable from associated companies. (See account 136, Temporary Cash Investments, and account 145, Notes Receivable from Associated Companies.)

Note: The face amount of notes receivable discounted, sold, or transferred without releasing the utility from liability as endorser thereon, shall be credited to a separate subdivision of this account and appropriate disclosure shall be made in financial statements of any contingent liability arising from such transactions.

142. Customer Accounts Receivable

A. This account shall include amounts due from customers for utility service, and for merchandising, jobbing and contract work. This account shall not include amounts due from associated companies.

B. This account shall be maintained so as to permit ready segregation of the amounts due for merchandising, jobbing and contract work.

143. Other Accounts Receivable

A. This account shall include amounts due the utility upon open

accounts, other than amounts due from associated companies and from customers for utility services and merchandising, jobbing and contract work.

B. This account shall be maintained so as to show separately amounts due on subscriptions to capital stock and from officers and employees, but the account shall not include amounts advanced to officers or others as working funds. (See account 135, Working Funds.)

144. Accumulated Provision for Uncollectible Accounts--Credit

A. This account shall be credited with amounts provided for losses on accounts receivable which may become uncollectible, and also with collections on accounts previously charged hereto. Concurrent charges shall be made to account 904, Uncollectible Accounts, for amounts applicable to utility operations, and to corresponding accounts for other operations. Records shall be maintained so as to show the write-off of accounts receivable for each utility department.

B. This account shall be subdivided to show the provision applicable to the following classes of accounts receivable:

Utility Customers for Utility Services

Merchandising, Jobbing and Contract Work

Officers and Employees

Others

Note A: Accretions to this account shall not be made in excess of a reasonable provision against losses of the character provided for.

Note B: If provisions for uncollectible notes receivable or for uncollectible receivables from associated companies are necessary, separate subaccounts therefore shall be established under the account in which the receivable is carried.

145. Notes Receivable from Associated Companies

146. Accounts Receivable from Associated Companies

These accounts shall include notes and drafts upon which associated companies are liable, and which mature and are expected to be paid in full not later than one year from date of issue, together with any interest thereon, and debit balances subject to current settlement in open accounts with associated companies. Items which do not bear a specified due date but which have been carried for more than 12 months and items which are not paid within 12 months from due date shall be transferred to account 123, Investment in Associated Companies.

Note A: On the balance sheet, accounts receivable from an associated company may be set off against accounts payable to the same company.

Note B: The face amount of notes receivable discounted, sold or transferred without releasing the utility from liability as endorser

thereon, shall be credited to a separate subdivision of this account and appropriate disclosure shall be made in financial statements of any contingent liability arising from such transactions.

150. Materials and Supplies

A. This account shall include the cost and related stores expense of unissued on all tools and unapplied materials and supplies, including gas-making materials residuals; plant materials and operating supplies; merchandise for sale; materials and supplies held primarily for nonutility purposes; and that portion of the inventory of gas stored underground which is appropriately classified as a current asset. The cost shall include, when practicable, the purchase price at the point of free delivery, plus customs duties, excise and other taxes on purchases, insurance, costs of inspection, special tests prior to acceptance, loading and unloading, transportation, and other directly assignable charges; also the related stores expenses for purchasing, storage, handling, and distribution of materials.

B. As far as practicable, transportation charges for materials shall be included as a part of the cost of the particular materials to which they relate; cash or other discounts on materials shall be deducted in determining the cost of the particular material, or credited to the account to which the material is charged. Where such items cannot be assigned directly to particular purchases, they may be included in the subdivisions of this account, 150.152, Fuel Stock Expenses Undistributed, or 150.163, Stores Expense Undistributed, as appropriate. Where other classes of expenses applicable to materials purchased cannot be directly assigned to particular purchases, they may be charged to account 150.152, or account 150.163, as appropriate.

C. Materials recovered in connection with construction, maintenance, or the retirement of property shall be charged to this account in accordance with provisions set forth in account 150.154, Plant Materials and Operating Supplies.

D. Materials and supplies issued shall be credited hereto and charged to the appropriate construction, operating expense, or other account on the basis of a unit price determined by the use of cumulative average, first-in-first-out, or such other method of inventory accounting as conforms with accepted accounting standards consistently applied. Stores expenses related to the materials and supplies shall be cleared from the subaccount 150.163, Stores Expense Undistributed, by adding to the cost of materials and supplies issued a suitable loading charge which will distribute the expenses equitably over the stores issues.

E. Physical inventories of materials, supplies, fuel, etc., shall be

taken at least every two years. The necessary adjustments shall be made to bring this account into harmony with the actual inventories. In effecting the adjustments large differences which can be assigned to important classes of materials shall be equitably adjusted among the accounts to which such classes of materials have been charged since the previous inventory. Other differences shall be equitably apportioned among the accounts to which materials have been charged, or included in the stores expense accounts, 150.152, Fuel Stock Expenses Undistributed, or 155.163, Stores Expense Undistributed as appropriate.

Note A: Interest on material bills, the payment of which has been delayed, shall be charged to Account 431, Other Interest Expense.

Note B: Customer meters and house regulators, and such associated devices as are retirement units, in stock or undergoing repairs shall not be included in this account, but in Account 381, Meters, or Account 383, House Regulators, as appropriate.

F. Separate subaccounts of this account shall be maintained under the following titles:

150.151 Fuel Stock

This account shall include the book cost of fuel on hand.

ITEMS

1. Invoice price of fuel less any cash or other discounts.
2. Freight, switching, demurrage and other transportation charges, not including, however, any charges for unloading from the shipping medium.
3. Excise taxes, purchasing agents' commissions, insurance and other expenses directly assignable to cost of fuel.

150.152 Fuel Stock Expenses Undistributed

A. This account may include the cost of labor and of supplies used and expenses incurred in unloading fuel from the shipping medium and in the handling thereof prior to its use, if such expenses are sufficiently significant in amount to warrant being treated as a part of the cost of fuel inventory rather than being charged direct to expense as incurred.

B. Amounts included herein shall be charged to expense as the fuel is used to the end that the balance herein shall not exceed the expenses attributable to the inventory of fuel on hand.

ITEMS

Labor:

1. Procuring and handling of fuel.
2. All routine fuel analyses.
3. Unloading from shipping facility and putting in storage.
4. Moving of fuel in storage and transferring from one station to another.

5. Handling from storage or shipping facility to first bunker, hopper, bucket, tank or holder of boiler house structure.

6. Operation of mechanical equipment, such as locomotives, trucks, cars, boats, barges, cranes, etc.

Supplies and Expenses:

7. Tools, lubricants and other supplies.

8. Operating supplies for mechanical equipment.

9. Transportation and other expenses in moving fuel.

10. Stores expenses applicable to fuel.

150.153 Residuals

This account shall include the book cost of residuals produced in the manufacture of gas including like products purchased for resale.

150.154 Plant Materials and Operating Supplies

This account shall include the cost of materials purchased primarily for use in the utility business for construction, operation and maintenance purposes. It shall include also the book cost of materials recovered in connection with construction, maintenance or the retirement of property, such materials being credited to construction, maintenance, or accumulated depreciation provision respectively, and included herein as follows:

(1) Reusable materials consisting of large individual items, shall be included in this account at original cost of material only, as defined in paragraphs A and B of account 150, including transportation to point of original receipt, estimated if not known. The cost of repairing such items shall be charged to the maintenance account appropriate for the previous use. (See also gas plant instruction 313.3, par. (3).)

(2) Reusable materials consisting of relatively small items, the identity of which (from the date of original installation to the final abandonment or sale thereof) can not be ascertained without undue refinement in accounting shall be included in this account at current prices new for such items. The cost of repairing such items shall be charged to the appropriate expense account as indicated by previous use.

(3) Scrap and nonusable materials included in this account shall be carried at the estimated net amount realizable therefrom. The difference between the amounts realized for scrap and nonusable materials sold and the net amount at which the materials were carried in this account, as far as practicable, shall be adjusted to the accounts credited when the materials were charged to this account.

ITEMS

1. Invoice price of materials less cash or other discounts.

2. Freight, switching or other transportation charges when practicable

to include as part of the cost of particular materials to which they relate.

3. Customs duties and excise taxes.
4. Costs of inspection and special tests prior to acceptance.
5. Insurance and other directly assignable charges.

150.155 Merchandise

This account shall include the book cost of materials, supplies, appliances, and equipment held primarily for merchandising, jobbing and contract work.

Note: Appliances held under consignment shall not be included herein, but there shall be kept a memorandum account of such appliances either at cost or at selling price, to show the appliances in stock and appliances sold.

150.156 Other Materials and Supplies

This account shall include the book cost of materials and supplies held primarily for nonutility purposes.

150.163 Stores Expense Undistributed

A. This account shall include the cost of supervision, labor and expenses incurred in the operation of general storerooms, including purchasing, storage, handling and distribution of materials and supplies.

B. This account shall be cleared by adding to the cost of materials and supplies issued a suitable loading charge which will distribute the expense equitably over store issues. The balance in the account at the close of the year shall not exceed the amount of stores expenses reasonably attributable to the inventory of materials and supplies exclusive of fuel, as any amount applicable to fuel cost should be included in account 150.152, Fuel Stock Expenses Undistributed.

ITEMS

Labor:

1. Inspecting and testing materials and supplies when not assignable to specific items.
2. Unloading from shipping facility and putting in storage.
3. Supervision of purchasing and stores department to extent assignable to materials handled through stores.
4. Getting materials from stock and in readiness to go out.
5. Inventorying stock received or stock on hand by stores employees but not including inventories by general department employees as part of internal or general audits.
6. Purchasing department activities in checking material needs, investigating sources of supply, analyzing prices, preparing and placing

orders, and related activities to extent applicable to materials handled through stores. (Optional: purchasing department expenses may be included in administrative and general expenses.)

7. Maintaining stores equipment.

8. Cleaning and tidying storerooms and stores offices.

9. Keeping stock records, including recording and posting of material receipts and issues and maintaining inventory record of stock.

10. Collecting and handling scrap materials in stores.

Supplies and Expenses:

11. Adjustments of inventories of materials and supplies but not including large differences which can readily be assigned to important classes of materials and equitably distributed among the accounts to which such classes of materials have been charged since the previous inventory.

12. Cash and other discounts not practicably assignable to specific materials.

13. Freight, express, etc., when not assignable to specific items.

14. Heat, light and power for storerooms and store offices.

15. Brooms, brushes, sweeping compounds and other supplies used in cleaning and tidying storerooms and stores offices.

16. Injuries and damages.

17. Insurance on materials and supplies and on stores equipment.

18. Losses due to breakage, leakage, evaporation, fire or other causes, less credits for amounts received from insurance, transportation companies or others in compensation of such losses.

19. Postage, printing, stationery and office supplies.

20. Rent of storage space and facilities.

21. Communication service.

22. Excise and other similar taxes not assignable to specific materials.

23. Transportation expense on inward movement of stores and on transfer between storerooms but not including charges on materials recovered from retirements which shall be accounted for as part of cost of removal.

164.1 Gas Stored Underground--Current

This account shall be debited with such amounts as are credited to account 117, Gas Stored Underground--Noncurrent, to reflect classification for balance sheet purposes of such portion of the inventory of gas stored underground as represents a current asset according to conventional rules for classification of current assets.

Note: It shall not be considered conformity to conventional rules of

current asset classification if the amount included in this account exceeds an amount equal to the cost of estimated withdrawals of gas from storage for purposes of sale within the 24-month period from date of the balance sheet, or if the amount represents a volume of gas which, in fact, could not be withdrawn from storage without impairing the pressure level of any project for normal operating purposes. (See account 117, Gas Stored Underground--Noncurrent.)

164.2 Liquefied Natural Gas in Storage

A. This account shall include the cost of liquefied natural gas stored in above or below ground facilities.

B. Natural gas purchased in a liquefied form shall be priced at the cost of such gas to the utility. Natural gas liquefied by the utility shall be priced according to generally accepted methods of cost determination consistently applied from year to year. Transmission expenses for facilities of the utility used in moving the gas to the storage facilities shall not be included in the inventory of gas except as may be authorized by the commission.

C. Amounts debited to this account for natural gas placed in storage shall be credited to account 809, Gas Delivered to Storage--Credit. Amounts credited to this account for gas withdrawn from storage shall be debited to account 808, Gas Withdrawn from Storage--Debit.

D. Withdrawals of gas may be priced according to the first-in-first-out, last-in-first-out, or weighted average cost method provided the method adopted by the utility is used consistently from year to year and inventory records are maintained in accordance therewith. Commission approval must be obtained for any other pricing method or for any change in the pricing method adopted by the utility. Separate records shall be maintained for each storage project of the Mcf of gas delivered to storage and remaining in storage.

E. Adjustments for inventory losses shall be charged to account 842.3, Gas Losses.

Note: Provisions of note B-1 through note B-5, paragraph C and E of account 117, Gas Stored Underground--Noncurrent, shall likewise be applicable to this account.

165. Prepayments

This account shall include all payments for undelivered gas, whether prepayments or advance payments, and other prepayments for insurance, rents, taxes, interest and miscellaneous items, and shall be kept or supported in such a manner as to disclose the amount of each class of prepayments or advance payments.

Note A: Gas prepayments are amounts paid to a gas seller under take or

pay provisions of an effective gas purchase contract for a sale certificated by the Federal Power Commission where future make-up of the gas not taken in the current period is provided by the contract.

Note B: Advance payments for gas (whether called "advance payments", "contribution", or otherwise) are amounts paid to others, including affiliated companies, for exploration, development, or production of natural gas: such amounts to be repaid by delivery of gas or otherwise. Such payments are made prior to any delivery of gas by payee under an effective gas purchase contract with payer, or prior to Federal and/or State authorization as appropriate. Noncurrent advance payments shall be reclassified and transferred to account 124, Other Investments, for balance sheet purposes.

171. Interest and Dividends Receivable

This account shall include the amount of interest on bonds, mortgages, notes, commercial paper, loans, open accounts, deposits, etc., the payment of which is reasonably assured and the amount of dividends declared or guaranteed on stocks owned.

Note A: Interest which is not subject to current settlement shall not be included herein but in the account in which is carried the principal on which the interest is accrued.

Note B: Interest and dividends receivable from associated companies shall be included in account 146, Accounts Receivable from Associated Companies.

172. Rents Receivable

This account shall include rents receivable or accrued on property rented or leased by the utility to others.

Note: Rents receivable from associated companies shall be included in account 146, Accounts Receivable from Associated Companies.

173. Accrued Utility Revenues

At the option of the utility, the estimated amount accrued for service rendered, but not billed at the end of any accounting period, may be included herein. In case accruals are made for unbilled revenues, they shall be made likewise for unbilled expenses, such as for the purchase of gas.

174. Miscellaneous Current and Accrued Assets

This account shall include the book cost of all other current and accrued assets, appropriately designated and supported so as to show the nature of each asset included herein.

4. DEFERRED DEBITS

181. Unamortized Debt Expense

A. This account shall include expenses related to the issuance or

assumption of debt securities. Amounts recorded in this account shall be amortized over the life of each respective issue under a plan which will distribute the amount equitably over the life of the security. The amortization shall be on a monthly basis, and the amount thereof shall be charged to account 428, Amortization of Debt Discount and Expense. Any unamortized amounts outstanding at the time that the related debt is prematurely reacquired shall be accounted for as indicated in Part 311 Instructions--General, § 311.20.

B. When the utility recognizes a mortgage recording tax as a tax deduction in the year incurred, account 410.1, Provision for Deferred Income Taxes, Utility Operating Income, shall be debited and account 283, Accumulated Deferred Income Taxes--Other, shall be credited with the amount of the related tax effect, such amount to be amortized concurrently with the related debt expense.

182. Extraordinary Property Losses

A. When authorized or directed by the commission, this account shall include extraordinary losses on property abandoned or otherwise retired from service which are not provided for by the accumulated provisions for depreciation or amortization and which could not reasonably have been foreseen and provided for, and extraordinary losses, such as unforeseen damages to property, which could not reasonably have been anticipated and which are not covered by insurance or other provisions.

B. The entire cost, less net salvage, of depreciable property retired shall be charged to accumulated provision for depreciation. If all or a portion, of the loss is to be included in this account, the accumulated provision for depreciation shall then be credited and this account charged with the amount properly chargeable hereto.

C. Application to the commission for permission to use this account shall be accompanied by a statement giving a complete explanation with respect to the items which it is proposed to include herein, the period over which, and the accounts to which it is proposed to write off the charges, and other pertinent information.

183.1 Preliminary Natural Gas Survey and Investigation Charges

A. This account shall be charged with all expenditures for preliminary surveys, plans, investigations, etc., made for the purpose of determining the feasibility of acquiring land and land rights to provide a future supply of natural gas. If such land or land rights are acquired, this account shall be credited and the appropriate gas plant account (See Part 313 Instructions--Gas Plant Accounts, § 313.7(g)(1)) charged with the amount of the expenditures related to such acquisition. If the project is abandoned, the expenditures related thereto shall be

charged to account 338, Unsuccessful Exploration and Development Costs.

B. The records supporting the entries to this account shall be so kept that the utility can furnish, for each investigation, complete information as to the identification and location of territory investigated, the number or other identification assigned to the land tract or leasehold acquired, and the nature and respective amounts of the charges.

Note: The amount of preliminary survey and investigation charges transferred to gas plant shall not exceed the expenditures which may reasonably be determined to contribute directly and immediately and without duplication to gas plant.

183.2 Other Preliminary Survey and Investigation Charges

A. This account shall be charged with all expenditures for preliminary surveys, plans, investigations, etc., made for the purpose of determining the feasibility of utility projects under contemplation, other than the acquisition of land and land rights to provide a future supply of natural gas. If construction results, this account shall be credited and the appropriate utility plant account charged. If the work is abandoned, the charge shall be made to account 426.5, Other Deductions, or the appropriate operating expense. (See Part 311 Instructions--General, § 311.7.)

B. The records supporting the entries to this account shall be so kept that the utility can furnish complete information as to the nature and the purpose of the survey, plans, or investigations and the nature and amounts of the several charges.

Note: The amount of preliminary survey and investigation charges transferred to utility plant shall not exceed the expenditures which may reasonably be determined to contribute directly and immediately and without duplication to utility plant.

184. Clearing Accounts

A. This caption shall include undistributed balances in clearing accounts at the date of the balance sheet. Balances in clearing accounts shall be substantially cleared not later than the end of the calendar year unless items held therein relate to a future period.

B. In addition to the clearing accounts otherwise specifically provided for in this system of accounts (150.152, Fuel Stock Expenses Undistributed and 150.163, Stores Expense Undistributed), the utility shall maintain any other clearing accounts necessary as a medium through which to accumulate initial costs and expenses with respect to particular types of transactions in order to facilitate the distribution and apportionment of charges on equitable bases among the appropriate

accounts to which such charges are applicable. The following clearing accounts should be used unless it can be clearly demonstrated that their use is not necessary. (See Part 311 Instructions--General, § 311.2 (d) and 311.14 (b).)

Clearing Accounts

184.1 Building Service Expenses--Clearing

184.2 Electronic Data Processing Expenses--Clearing

184.3 Laboratory Expenses--Clearing

184.4 Shop Expenses--Clearing

184.5 Tools and Work Equipment Expenses--Clearing

184.6 Transportation Expenses--Clearing

185. Temporary Facilities

This account shall include amounts shown by work orders for plant installed for temporary use in utility service for periods of less than one year. Such work orders shall be charged with the cost of temporary facilities and credited with payments received from customers and net salvage realized on removal of the temporary facilities. Any net credit or debit resulting shall be cleared to account 488, Miscellaneous Service Revenues.

186. Miscellaneous Deferred Debits

A. This account shall include all debits not elsewhere provided for, such as miscellaneous work in progress, and unusual or extraordinary expenses, not included in other accounts, which are in process of amortization and items the proper final disposition of which is uncertain.

B. The records supporting the entries to this account shall be so kept that the utility can furnish full information as to each deferred debit.

187. Deferred Losses from Disposition of Utility Plant

This account shall include losses from the sale or other disposition of property previously recorded in account 105, Gas Plant Held for Future Use, under the provisions of paragraphs B, C and D thereof, when such losses are significant and the company has received commission approval to amortize such amounts to account 411.7, losses from Disposition of Utility Plant. Records shall be maintained so that amounts relating to each loss can be readily determined. (See account 105, Gas Plant Held for Future Use.)

188. Investment in Research and Development

A. This account shall include the cost of all expenditures coming within the meaning of definition (28) (ii) of the Uniform of Accounts, except those properly includible in account 107, Construction Work in Progress.

B. Costs that are minor or of a general or recurring nature shall be transferred from this account to the appropriate operating expense function or if such costs are common to the overall operations or cannot be feasibly allocated to the various operating accounts, then such costs shall be recorded in account 930.2, Miscellaneous General Expenses.

C. When expenditures on a research project are relatively so large that their inclusion in the operating accounts in the year in which they were incurred would seriously distort those accounts, the company may request commission approval to defer such expenditures in this account and amortize them over a future period. Without such approval, expenditures charged to this account shall not be carried beyond the year in which they occurred.

Note: With the approval of the commission, amortization of expenditures related to specific programs or projects may commence at a date subsequent to the year initial expenditures are incurred to provide for consistency of accounting and rate treatment.

D. The entries in this account shall be so maintained as to show separately each project with complete detail of the nature and purpose of the research and development undertaken together with related costs.

E. Balances in this account will be considered for rate base treatment as if the amounts were part of the cost of plant in service.

190. Accumulated Deferred Income Taxes

A. This account, when its use has been authorized by the commission, shall be debited and account 411.1, Provision for Deferred Income Taxes--Credit, Utility Operating Income, or account 411.2, Provision for Deferred Income Taxes--Credit, Other Income and Deductions, as appropriate, shall be credited with an amount equal to that by which income taxes payable for the year are higher because of the inclusion of certain items in income for tax purposes, which items for general accounting purposes, will not be fully reflected in the utility's determination of annual net income until subsequent years.

B. This account shall be credited and account 410.1, Provision for Deferred Income Taxes, Utility Operating Income, or account 410.2, Provision for Deferred Income Taxes, Other Income and Deductions, as appropriate, shall be debited with an amount equal to that by which income taxes payable for the year are lower because of prior payment of taxes as provided by paragraph A above, because of difference in timing for tax purposes of particular items of income or income deductions from that recognized by the utility for general accounting purposes. Such credit to this account and debit to account 410.1 or 410.2 shall, in general, represent the effect on taxes payable in the current year of

the smaller amount of book income recognized for tax purposes as compared to the amount recognized in the utility's current accounts with respect to the item or class of items for which deferred tax accounting by the utility was authorized by the commission.

C. Vintage year records with respect to entries to this account, as described above, and the account balance, shall be so maintained as to show the factor of calculation with respect to each annual amount of the item or class of items for which deferred tax accounting by the utility is utilized.

D. The utility is restricted in its use of this account to the purposes set forth above. It shall not make use of the balance in this account or any portion thereof, except as provided in the text of this account, without prior approval of the commission. Any remaining deferred tax account balance with respect to an amount for any prior year's tax deferral, the amortization of which or other recognition in the utility's income accounts has been completed, or other disposition made, shall be debited to account 410.1, Provision for Deferred Income Taxes, Utility Operating Income, or account 410.2, Provision for Deferred Income Taxes, Other Income and Deductions, as appropriate, or otherwise disposed of as the commission may authorize or direct.

LIABILITIES AND OTHER CREDITS

5. PROPRIETARY CAPITAL

201. Common Stock Issued

204. Preferred Stock Issued

A. These accounts shall include the par value or the stated value of stock without par value if such stock has a stated value, and, if not, the cash value of the consideration received for such stock without par value, of each class of capital stock actually issued, including such capital stock in account 217, Reacquired Capital Stock.

B. When the actual cash value of the consideration received is more than the par or stated value of any stock having a par or stated value, the difference shall be credited to the premium account for the particular class and series.

C. When capital stock is retired, these accounts shall be charged with the amount at which such stock is carried herein.

D. A separate ledger account, with a descriptive title, shall be maintained for each class and series of stock. The supporting records shall show the shares nominally issued, actually issued and nominally outstanding.

Note A: When a levy or assessment, except a call for payment on subscriptions, is made against holders of capital stock, the amount

collected upon such levy or assessment shall be credited to account 207, Premium on Capital Stock.

Note B: No entries, other than those covered by the above provisions and those to record liquidating dividends, shall be made in any account for stocks without par value except upon order of the commission.

202. Common Stock Subscribed

205. Preferred Stock Subscribed

A. These accounts shall include the amount of legally enforceable subscriptions to capital stock of the utility. They shall be credited with the par or stated value of the stock subscribed, or the subscription price of stock without par or stated value, exclusive of accrued dividends, if any. Concurrently, a debit shall be made to subscriptions to capital stock, included as a separate subdivision of account 143, Other Accounts Receivable, for the agreed price. Any premium on capital stock with par or stated value shall be included in the premium account.

B. The records shall be kept in such manner as to show the amount of subscriptions to each class and series of stock.

203. Common Stock Liability for Conversion

206. Preferred Stock Liability for Conversion

A. These accounts shall include the par or stated value, or the cash value of the consideration for stock without par or stated value, as appropriate, of capital stock which the utility has agreed to exchange for outstanding securities of other companies in connection with the acquisition of properties of such companies under terms which allow the holders of the securities of the other companies to surrender such securities and receive in return therefor capital stock of the accounting utility.

B. When the securities of the other companies have been surrendered and capital stock issued in accordance with the terms of the exchange, these accounts shall be charged and accounts 201, Common Stock Issued, or 204, Preferred Stock Issued, as the case may be, shall be credited.

C. The records shall be kept so as to show separately the stocks of each class and series for which a conversion liability exists.

207. Premium on Capital Stock

A. This account shall include in a separate subdivision for each class and series of stock, the excess of the actual cash value of the consideration received on original issues of capital stock over the par or stated value and accrued dividends of such stock, together with assessments against stockholders representing payments required in excess of par or stated values.

B. Premium on capital stock shall not be set off against expenses. Further, a premium received on an issue of a certain class or series of stock shall not be set off against expenses of another issue of the same class or series.

C. When capital stock which has been actually issued is retired, the amount in this account applicable to the shares retired shall be transferred to account 210, Gain on Resale or Cancellation of Reacquired Capital Stock.

208. Donations Received from Stockholders

This account shall include the balance of credits for donations received from stockholders consisting of capital stock of the utility, cancellation or reduction of debt of the utility, and the cash value of other assets received as a donation.

209. Reduction in Par or Stated Value of Capital Stock

This account shall include the balance of credits arising from a reduction in the par or stated value of capital stock.

210. Gain on Resale or Cancellation of Reacquired Capital Stock

This account shall include the balance of credits arising from the resale or cancellation of reacquired capital stock. (See account 217, Reacquired Capital Stock.)

211. Miscellaneous Paid-in Capital

This account shall include the balance of all other credits for paid-in capital which are not properly includible in the foregoing accounts.

Note: Amounts included in unearned surplus at the effective date of this system of accounts which cannot be classified as to the source thereof shall be included in this account.

212. Installments Received on Capital Stock

A. This account shall include in a separate subdivision for each class and series of capital stock the amount of installments received on capital stock on a partial or installment payment plan from subscribers who are not bound by legally enforceable subscription contracts.

B. As subscriptions are paid in full and certificates issued, this account shall be charged and the appropriate capital stock account credited with the par or stated value, or the consideration received for stock without par or stated value. Any premium on capital stock with par or stated value shall be included in the premium account.

214. Capital Stock Expense

A. This account shall include in a separate subdivision for each class and series of stock all commissions and expenses incurred in connection with the original issuance and sale of capital stock, including

additional capital stock of a particular class or series as well as first issues. Expenses applicable to capital stock shall not be deducted from premium on capital stock.

B. When capital stock which has been actually issued by the utility is retired, the amount in this account applicable to the shares retired shall be written off to account 210, Gain on Resale or Cancellation of Reacquired Capital Stock, provided, however, that the amount shall be charged to account 439, Adjustments to Retained Earnings, to the extent that it exceeds the balance in account 210.

C. The utility may amortize the balance in this account by systematic charges to account 425, Miscellaneous Amortization, or it may write off capital stock expense in whole or in part by charges to account 439, Adjustments to Retained Earnings.

Note: Expenses in connection with the reacquisition or resale of the utility's capital stock shall not be included herein.

215. Appropriated Retained Earnings.

This account shall include the amount of retained earnings which has been appropriated or set aside for specific purposes. Separate subaccounts shall be maintained under such titles as will designate the purpose for which each appropriation was made.

216. Unappropriated Retained Earnings.

This account shall include the balance, either debit or credit, of unappropriated retained earnings arising from earnings of the utility. This account shall not include any amounts representing the undistributed earnings of subsidiary companies.

216.1 Unappropriated Undistributed Subsidiary Earnings

This account shall include the balance, either debit or credit, of undistributed retained earnings of subsidiary companies since their acquisition. When dividends are received from subsidiary companies relating to amounts included in this account, this account shall be debited and account 216, Unappropriated Retained Earnings, credited.

217. Reacquired Capital Stock

A. This account shall include in a separate subdivision for each class and series of capital stock, the cost of capital stock actually issued by the utility and reacquired by it and not retired or cancelled, except, however, stock which is held by trustees in sinking or other funds.

B. When reacquired capital stock is retired or cancelled, the difference between its cost, including commissions and expenses paid in connection with the reacquisition, and its par or stated value (or the proportionate amount at which it is recorded in accounts 201 or 204 in

the case of stock without par or stated value) plus any premium and less any expense applicable to the shares retired, shall be debited or credited as appropriate, to account 210, Gain on Resale or Cancellation of Reacquired Capital Stock; provided, however, that debits shall be charged to account 439, Adjustments to Retained Earnings, to the extent that they exceed the balance in account 210.

C. Subject to the specific authorization or direction of the commission, (see section 69 of Public Service Law) when reacquired capital stock is resold by the utility, the difference between the amount received on the resale of the stock, less expenses incurred in the resale, and the cost of the stock included in this account shall be accounted for as outlined in paragraph B.

6. LONG-TERM DEBT

221. Bonds

This account shall include in a separate subdivision for each class and series of bonds the face value of the actually issued and unmatured bonds which have not been retired or canceled; also the face value of such bonds issued by others the payment of which has been assumed by the utility.

222. Reacquired Bonds

A. This account shall include the face value of bonds actually issued or assumed by the utility and reacquired by it and not retired or canceled. (See section 69 of Public Service Law.) The account for reacquired debt shall not include securities which are held by trustees in sinking or other funds.

B. When bonds are reacquired, the difference between face value adjusted for unamortized discount, expense or premium and the amount paid upon reacquisition shall be accounted for in accordance with provisions set forth in general instruction 311.20.

223. Advances from Associated Companies

A. This account shall include the face value of notes payable to associated companies and the amount of open book accounts representing advances from associated companies. It does not include notes and open accounts representing indebtedness subject to current settlement which are includible in account 233, Notes Payable to Associated Companies, or account 234, Accounts Payable to Associated Companies. (See general instruction 311.14.)

224. Other Long-term Debt

A. This account shall include, until maturity, all long-term debt not otherwise provided for. This covers such items as receivers' certificates, real estate mortgages executed or assumed, assessments for

public improvements, notes and unsecured certificates of indebtedness not owned by associated companies, receipts outstanding for long-term debt, and other obligations maturing more than one year from date of issue or assumption. (See balance sheet instruction 312.2.)

B. Separate accounts shall be maintained for each class of obligation, and records shall be maintained to show for each class all details as to date of obligation, date of maturity, interest dates and rates, security for the obligation, etc.

Note: Miscellaneous long-term debt reacquired shall be accounted for in accordance with the procedure set forth in account 222, Reacquired Bonds.

225. Unamortized Premium on Long-term Debt

A. This account shall include the excess of the cash value of consideration received over the face value upon the issuance or assumption of long-term debt securities.

B. Amounts recorded in this account shall be amortized over the life of each respective issue under a plan which will distribute the amount equitably over the life of the security. The amortization shall be on a monthly basis, with the amounts thereof to be credited to account 429, Amortization of Premium on Debt--Credit. (See general instruction 311.20.)

226. Unamortized Discount on Long-term Debt--Debit

A. This account shall include the excess of the face value of long-term debt securities over the cash value of consideration received therefor, related to the issue or assumption of all types and classes of debt.

B. Amounts recorded in this account shall be amortized over the life of the respective issues under a plan which will distribute the amount equitably over the life of the securities. The amortization shall be on a monthly basis, with the amounts thereof charged to account 428, Amortization of Debt Discount and Expense. (See general instruction 311.20.)

7. CURRENT AND ACCRUED LIABILITIES

231. Notes Payable.

This account shall include the face value of all notes, drafts, acceptances, or other similar evidences of indebtedness, payable on demand or within a time not exceeding one year from date of issue, to other than associated companies.

232. Accounts Payable.

This account shall include all amounts payable by the utility within one year, which are not provided for in other accounts.

233. Notes Payable to Associated Companies

234. Accounts Payable to Associated Companies

These accounts shall include amounts owing to associated companies on notes, drafts, acceptances, or other similar evidences of indebtedness, and open accounts payable on demand or not more than one year from date of issue or creation.

Note: Exclude from these accounts notes and accounts which are includible in account 223, Advances from Associated Companies.

235. Customer Deposits

This account shall include all amounts deposited with the utility by customers as security for the payment of bills.

236. Taxes Accrued

A. This account shall be credited with the amount of taxes accrued during the accounting period, corresponding debits being made to the appropriate accounts for tax charges. Such credits may be based upon estimates, but from time to time during the year as the facts become known, the amount of the periodic credits shall be adjusted so as to include as nearly as can be determined in each year the taxes applicable thereto. Any amount representing a prepayment of taxes applicable to the period subsequent to the date of the balance sheet, shall be shown under account 165, Prepayments.

B. If accruals for taxes are found to be insufficient or excessive, correction therefor shall be made through current tax accruals. However, if such corrections are so large as to seriously distort current expenses, see general instruction 311.7(b).

C. Accruals for taxes shall be based upon the net amounts payable after credit for any discounts, and shall not include any amounts for interest on tax deficiencies or refunds. Interest received on refunds shall be credited to account 419, Interest and Dividend Income, and interest paid on deficiencies shall be charged to account 431, Other Interest Expense.

D. The records supporting the entries to this account shall be kept so as to show for each class of taxes, the amount accrued, the basis for the accrual, the accounts to which charged, and the amount of tax paid.

237. Interest Accrued.

This account shall include the amount of interest accrued but not matured on all liabilities of the utility not including, however, interest which is added to the principal of the debt on which incurred. Supporting records shall be maintained so as to show the amount of interest accrued on each obligation.

238. Dividends Declared

This account shall include the amount of dividends which have been declared but not paid. Dividends shall be credited to this account when they become a liability.

239. Matured Long-term Debt

This account shall include the amount of long-term debt (including any obligation for premiums) matured and unpaid, without specific agreement for extension of the time of payment, and bonds called for redemption but not presented.

240. Matured Interest

This account shall include the amount of matured interest on long-term debt or other obligations of the utility at the date of the balance sheet unless such interest is added to the principal of the debt on which incurred.

241. Tax Collections Payable

This account shall include the amount of taxes collected by the utility through payroll deductions or otherwise pending transmittal of such taxes to the proper taxing authority.

Note: Do not include liability for taxes assessed directly against the utility which are accounted for as part of the utility's own tax expense.

242. Miscellaneous Current and Accrued Liabilities

This account shall include the amount of all other current and accrual liabilities not provided for elsewhere appropriately designated and supported so as to show the nature of each liability.

8. DEFERRED CREDITS

252. Customer Advances for Construction

This account shall include advances by customers for construction which are to be refunded either wholly or in part. When a customer is refunded the entire amount to which he is entitled according to the agreement or rule under which the advance was made, the balance, if any, remaining in this account shall be credited to the gas plant accounts to which the cost of the property was charged.

253. Other Deferred Credits

A. This account shall include advance billings and receipts and other deferred credit items, not provided for elsewhere, including amounts which cannot be entirely cleared or disposed of until additional information has been received.

B. Amounts for contributions in aid of construction still remaining in the account "Contributions in Aid of Construction" at the effective date of the uniform system of accounts prescribed herein shall be credited temporarily to an appropriate subdivision of this account and shall be

disposed of in accordance with provisions of gas plant instruction 313.2, subdivision (e).

255. Accumulated Deferred Investment Tax Credits

A. This account shall be credited with investment tax credits allowed in the current year on property defined in section 50 of the Internal Revenue Code of 1954, when the utility elects to defer such credits rather than to recognize in the income statement the total benefits of the tax credits as realized. The utility may not transfer amounts from this account except as authorized herein and in accounts 411.4, Investment Tax Credit Adjustments, Utility Operations; 411.5, Investment Tax Credit Adjustments, Nonutility, Operations and 420, Investment Tax Credits, or with approval of the commission (See special instructions for accounts 411.4 and 411.5.)

B. If the investment tax credits deferred in this account are to be applied as a reduction of the rate base, the utility shall amortize the amount of such deferrals by debiting this account and crediting account 420, Investment Tax Credits with a proportionate amount determined in relation to the book service life of the property to which the tax credits relate. If, however, the deferred investment tax credits are to be applied as a reduction of the cost of service, the proportionate restorations to income shall be credited to account 411.4, Investment Tax Credit Adjustments, Utility Operations.

C. Subdivisions of this account by department shall be maintained for deferred investment tax credits which are related to utility operations other than gas or to nonutility operations. Accounting procedures adopted for utility and nonutility operations are to be followed on a consistent basis.

D. Separate records shall be maintained for each year's investment tax credit for gas and other utility operations (by primary utility plant accounts) and for nonutility operations, identifying the properties giving rise to the investment tax credits for each year so that they can be amortized over the weighted average book service life of such properties.

E. The utility is restricted in its use of this account to the purposes set forth above. Unless otherwise authorized by the commission, the utility shall not record in this account amounts of investment tax credits allowed on property other than that defined in Section 50 of the Internal Revenue Code of 1954. Such amounts of investment tax credits shall be treated as a current reduction of income tax expense unless the commission has authorized other disposition.

256. Deferred Gains from Disposition of Utility Plant

This account shall include gains from the sale or other disposition of property previously recorded in account 105, Gas Plant Held for Future Use, under the provisions of paragraph B, C, and D thereof, when such gains are significant and the company has received commission approval to amortize such amounts to account 411.6, Gains from Disposition of Utility Plant. Records shall be maintained so that amounts relating to each gain can be readily determined. (See account 105, Gas Plant Held for Future Use.)

281. Accumulated Deferred Income Taxes--Accelerated Amortization

A. This account shall be credited and account 410.1, Provision for Deferred income Taxes, Utility Operating Income, or 410.2, Provision for Deferred Income Taxes, Other Income and Deductions, as appropriate, shall be debited with an amount equal to that by which taxes on income payable for the year are lower because of the use of accelerated (five-year) amortization of (1) certified defense facilities in computing such taxes, as permitted by section 168 of the Internal Revenue Code of 1954 and (2) certified pollution control facilities in computing such taxes, as permitted by section 169 of the Internal Revenue Code of 1954, as compared to the depreciation (deduction) otherwise appropriate and allowable for tax purposes according to the straight line or other nonaccelerated depreciation method and appropriate estimated useful life for such property.

B. This account shall be debited and account 411.1, Provision for Deferred Income Taxes--credit, Utility Operating Income or 411.2, Provision for Deferred Income Taxes--Credit, Other income and Deductions, as appropriate, shall be credited with an amount equal to that by which taxes on income payable for the year are greater because of the use in prior years of accelerated (five-year) amortization of (1) certified defense facilities and (2) pollution control facilities instead of nonaccelerated or nonliberalized depreciation otherwise appropriate for income tax purposes, and deferral of taxes in such prior years as described in paragraph A, above. Such debit to this account and credit to account 411.1 or 411.2, shall, in general, represent the effect on taxes payable for the current year of the unavailability of a depreciation deduction for tax purposes, or a reduced amount, with respect to any depreciable property for which accelerated amortization was used in prior years, as compared to the depreciation deduction otherwise available and appropriate for such property, considering its estimated useful life, according to the depreciation method ordinarily used by the utility for similar property in computing depreciation for tax purposes by a nonaccelerated or nonliberalized depreciation method.

C. Records with respect to entries to this account, as described above, and the account balance, shall be so maintained as to show the factors of calculation and the separate amounts applicable to the facilities of each certification or authorization of accelerated amortization for tax purposes.

D. The use of this account and the accounting described above are not mandatory for any utility which, in accordance with a consistent policy, elects not to follow deferred tax accounting even though accelerated amortization is used in computing taxes on income. If, however, deferred tax accounting is initiated with respect to any certified defense facility or certified pollution control facility, the accounting shall not be suspended or discontinued on the property covered by that certificate, without approval of the commission.

E. The utility is restricted in its use of this account to the purpose set forth above. It shall not transfer the balance in this account or any portion thereof to retained earnings or make any use thereof except as provided in the text of this account without prior approval of the commission. Any remaining balance of accumulated deferred taxes with respect to any certified defense facility or certified pollution control facility for which deferred tax accounting has been followed, shall, upon expiration of the estimated useful life of the facility on which deferred tax calculations were based, or upon retirement from service of such facility or predominant part thereof be credited to account 411.1, Provision for Deferred Income Taxes--Credit, Utility Operating Income, or 411.2, Provision for Deferred Income Taxes--Credit, Other Income and Deductions, as appropriate, or otherwise be applied as the commission may authorize or direct.

F. Upon the disposition by sale, exchange, transfer, abandonment or premature retirement of plant of which there is a related balance herein, this account shall be charged with an amount equal to the related income tax expense, if any, arising from such disposition and account 411.1, Provision for Deferred Income Taxes--Credit, Utility Operating Income, or 411.2, Provision for Deferred Income Taxes--Credit, Other Income and Deductions, as appropriate, shall be credited. When the remaining balance, after consideration of any related income tax expenses, is less than \$25,000 this account shall be charged and account 411.1 or 411.2, as appropriate, credited with such balance. If after consideration of any related income tax expense, there is a remaining amount of \$25,000 or more, the commission shall authorize or direct how such amount shall be accounted for at the time approval for the disposition of accounting is granted. When plant is disposed of by

transfer to a wholly owned subsidiary, the related balance in this account shall also be transferred. When the disposition related to retirement of an item or items under a group method of depreciation, where there is no tax effect in the year of retirement, no entries are required in this account if it can be determined that the related balances would be necessary to be retained to offset future group item tax deficiencies.

Note: If, in addition to a gas utility department, the utility operates another department, such as electric, steam, etc. or has nonutility property for which related deferred taxes on income are included in this account, such deferrals shall be classified so as to show separately amounts related to the utility operating income of each department and to other income and deductions.

282. Accumulated Deferred Income Taxes--Liberalized Depreciation

A. This account, when authorized by the commission, shall be used for the deferral and normalization of tax differentials resulting from the use of liberalized depreciation as permitted by section 167 of the Internal Revenue Code of 1954. It shall also be used for the deferral and normalization of tax differentials resulting from the use of the Class Life Asset Depreciation Range, as provided and required by the Revenue Act of 1971.

Note: Tax differentials resulting from the current deduction of the cost of removal included in the Class Life Asset Depreciation Range provisions of the Revenue Act of 1971 shall be included in account 283. Also, companies taking liberalized depreciation and flowing through the tax effect on January 1, 1972, shall continue to flow through these tax effects.

B. This account shall be credited and account 410.1, Provision for Deferred Income Taxes, Utility Operating Income, or 410.2, Provision for Deferred Income Taxes, Other Income and Deductions, as appropriate, shall be debited with an amount equal to that by which taxes on income payable for the year are lower because of the use of liberalized depreciation in computing such taxes, as permitted by section 167 of the Internal Revenue Code of 1964, as compared to the depreciation deduction otherwise appropriate and allowable for tax purposes for similar property of the same estimated useful life according to the straight line or other non-liberalized method of depreciation to include those accumulated tax deferrals arising from the use of the Class Life Asset Depreciation Range, as provided and required by the Revenue Act of 1971.

C. This account shall be debited and account 411.1, Provision for Deferred Income Taxes--Credit, Utility Operating Income, or 411.2,

Provision for Deferred Income Taxes--Credit, Other Income and Deductions, as appropriate, shall be credited with an amount equal to that by which taxes on income payable for the year are greater because of the use in prior years of liberalized depreciation for income tax purposes, and deferral of taxes in such prior years as described in paragraph B above. Such debit to this account and credit to account 411.1 or 411.2 shall, in general, represent the effect on taxes payable for the current year of the smaller amount of depreciation permitted for tax purposes for the current year with respect to any depreciable property for which liberalized depreciation including Class Life Asset Depreciation Range was used in prior years, as compared to the depreciation deduction otherwise appropriate and available for similar property of the same estimated useful life according to the straight line or other nonliberalized depreciation method ordinarily used by the utility in computing depreciation for tax purposes.

D. Records with respect to entries to this account, as described above, and the account balance, shall be so maintained as to show the factors of calculation and the separate amounts applicable to the plant additions of each vintage year of each class, group, or unit as to which different liberalized depreciation methods and estimated useful lives have been used. The underlying calculations to segregate and associate deferred tax amounts with the respective vintage years may be based on reasonable methods of approximation, if necessary, consistently applied.

E. Except for tax deferrals arising from the use of Class Life Asset Depreciation Range, the use of this account and the accounting described above are not permitted for any utility even though liberalized depreciation is used in computing taxes on income, unless prior approval of the commission is obtained. If, as authorized herein, deferred tax accounting is initiated with respect to any property, such accounting shall not be discontinued on that property without approval of the commission.

F. The utility is restricted in its use of this account to the purposes set forth above. It shall not transfer the balance in the account or any portion thereof to retained earnings or make any use thereof except as provided in the text of this account without prior approval of the commission. Any remaining deferred tax reserve balance with respect to any year's plant additions or subdivisions thereof for which liberalized depreciation accounting has been followed or, upon retirement from service of such property or predominant portion thereof, or upon expiration of the estimated useful life of which the depreciation calculations for tax purposes are based, shall be credited

to account 411.1, Provision for Deferred Income Taxes--Credit, Utility Operating Income, or 411.2, Provision for Deferred Income Taxes--Credit, Other Income and Deductions, as appropriate, or otherwise applied as the commission may authorize or direct.

G. Upon the disposition by sale, exchange, transfer, abandonment or premature retirement of plant on which there is a related balance herein, this account shall be charged with an amount equal to the related income tax expense, if any, arising from such disposition and account 411.1, Provision for Deferred Income Taxes--Credit, Utility Operating Income, or 411.2, Provision for Deferred Income Taxes--Credit, Other Income and Deductions, as appropriate, shall be credited. When the remaining balance, after consideration of any related income tax expenses, is less than \$25,000, this account shall be charged and account 411.1 or 411.2, as appropriate, credited with such balance. If after consideration of any related income tax expense, there is a remaining amount of \$25,000 or more, the commission shall authorize or direct how such amount shall be accounted for at the time approval for the disposition of accounting is granted. When plant is disposed of by transfer to a wholly owned subsidiary, the related balance in this account shall also be transferred. When the disposition relates to retirement of an item or items under a group method of depreciation where there is no tax effect in the year of retirement, no entries are required in this account if it can be determined that the related balances would be necessary to be retained to offset future group item tax deficiencies.

Note: If in addition to a gas utility department, the utility operates another department, such as electric, steam, etc. or has nonutility property for which related deferred taxes on income are included in this account, such deferrals shall be classified so as to show separately amounts related to the utility operating income of each department and to other income and deductions.

283. Accumulated Deferred Income Taxes--Other

A. This account, when its use has been authorized by the commission, shall be credited and account 410.1, Provision for Deferred Income Taxes, Utility Operating Income, or 410.2, Provision for Deferred Income Taxes, Other Income and Deductions, as appropriate, shall be debited with an amount equal to that by which taxes on income payable for the year are lower because of the current use of deductions other than accelerated amortization or liberalized depreciation, in the computation of income taxes which deductions for general accounting purposes will not be fully reflected in the utility's determination of annual net

income until subsequent years. However, commission approval is not required for transactions described in Part 311, Instructions--General § 311.20(d), and in account 181, Unamortized Debt Expense. Also, without commission approval, this account and the accounting provided herein shall be used for the deferral and amortization of the tax effects resulting from the current deduction of gas exploration and development costs, and the cost of removal included in the Class Life Asset Depreciation Range provisions of the Revenue Act of 1971.

B. This account shall be debited and account 411.1, Provision for Deferred Income Taxes--Credit, Utility Operating Income, or 411.2, Provision for Deferred Income Taxes--Credit, Other Income and Deductions, as appropriate, shall be credited with an amount equal to that by which taxes on income payable for the year are greater because of deferral of taxes on income in previous years, as provided by paragraph A, above, because of difference in timing for tax purposes of particular income deductions from that recognized by the utility for general accounting purposes, other than with respect to accelerated amortization or liberalized depreciation. Such debit to this account and credit to account 411.1 or 411.2, shall, in general, represent the effect on taxes payable in the current year of the smaller deduction permitted for tax purposes as compared to the amount recognized in the utility's current accounts with respect to the item or class of items for which deferred tax accounting by the utility was authorized by the commission.

C. Vintage year records with respect to entries to this account, as described above, and the account balance, shall be so maintained as to show the factors of calculation with respect to each annual amount of the item or class of items for which deferred tax accounting by the utility is utilized.

D. The utility is restricted in its use of this account to the purposes set forth above. It shall not transfer the balance in the account or any portion thereof to retained earnings or to any other account or make any use thereof except as provided in the text of this account, without prior approval of the commission. Upon the disposition by sale, exchange, transfer, abandonment or premature retirement of items on which there is a related balance herein, this account shall be charged with an amount equal to the related income tax effect, if any, arising from such disposition and account 411.1, Provision for Deferred Income Taxes--Credit, Utility Operating Income, or 411.2, Provision for Deferred Income Taxes--Credit, Other Income and Deductions, shall be credited. When the remaining balance, after consideration of any related

tax expenses, is less than \$25,000, this account shall be charged and account 411.1 or 411.2, as appropriate, credited with such balance. If after consideration of any related income tax expense, there is a remaining amount of \$25,000 or more, the commission shall authorize or direct how such amount shall be accounted for at the time approval for the disposition of accounting is granted. When plant is disposed of by transfer to a wholly owned subsidiary, the related balance in this account shall also be transferred. When the disposition relates to retirement or an item or items under a group method of depreciation where there is no tax effect in the year of retirement, no entries are required in this account if it can be determined that the related balance would be necessary to be retained to offset future group item tax deficiencies.

Note: In determining appropriate use of this account as a basis of request to the commission for authorization of its use, for the deferral of taxes, consideration shall be given to the relative importance of the amount involved, and to other items in the utility's accounts where "prepaid tax accounting" may be appropriate, such as situations (a) where the time of taking a deduction in computing taxes on income is such that the tax deduction must be delayed or applied to a series of future years as opposed to earlier recognition of such item in determination of income in the general accounts of the utility, or (b) where inclusion of an income item is required for tax purposes but is to be recognized in whole or in part in the utility's income accounts of a subsequent year or years.

9. OPERATING RESERVES

261. Property Insurance Reserve

A. This account shall include amounts reserved by the utility for self-insurance against losses through accident, fire, flood, or other hazards to its own property or property leased from others. The amounts charged to account 924, Property Insurance, or other appropriate accounts to cover such risks shall be credited to this account. A schedule of risks covered by this reserve shall be maintained, giving a description of the property involved, the character of the risks covered and the rates used. (See general instruction 311.11.)

B. Charges shall be made to this account for losses covered by self-insurance. Details of these charges shall be maintained according to the year the casualty occurred which gave rise to the loss.

262. Injuries and Damages Reserve

A. This account shall be credited with amounts charged to account 925, Injuries and Damages, or other appropriate accounts, to meet the

probable liability, not covered by insurance, for deaths or injuries to employees and others, and for damages to property neither owned nor held under lease by the utility. (See general instruction 311.11.)

B. When liability for any injury or damage is admitted by the utility either voluntarily or because of the decision of a court or other lawful authority, such as a workmen's compensation board, the admitted liability shall be charged to this account and credited to the appropriate liability account. Details of these charges shall be maintained according to the year the casualty occurred which gave rise to the loss.

Note: Recoveries or reimbursements for losses charged to this account shall be credited hereto; the cost of repairs to property of others if provided for herein, shall be charged to this account.

263. Pensions and Benefits Reserve

A. This account shall include provisions made by the utility and amounts contributed by employees for pensions, accident and death benefits, savings, relief, hospital and other provident purposes, where the funds represented by the reserve are included in the assets of the utility either in general or in segregated fund accounts. (See general instructions 311.11 and 311.16; and operating expense account 926, Employee Pensions and Benefits.)

B. Amounts paid by the utility for the purposes for which this reserve is established shall be charged hereto.

C. A separate account shall be kept for each kind of reserve included herein.

Note: If employee pension or benefit plan funds are not included among the assets of the utility but are held by outside trustees, payments into such funds, or accruals therefor, shall not be included in this account.

265. Miscellaneous Operating Reserves

A. This account shall include all operating reserves maintained by the utility which are not provided for elsewhere.

B. This account shall be maintained in such manner as to show the amount of each separate reserve and the nature and amounts of the debits and credits thereto.

Note: This account includes only such reserves as may be created for operating purposes and does not include any reservations of retained earnings the credits of which should be carried in account 215, Appropriated Retained Earnings.

GAS PLANT ACCOUNTS

1. INTANGIBLE PLANT

- 301. Organization
 - 302. Franchises and Consents
 - 303. Miscellaneous Intangible Plant
 - 2. PRODUCTION PLANT
 - A. MANUFACTURED GAS PRODUCTION PLANT
 - 304. Land and Land Rights
 - 305. Structures and Improvements
 - 306. Boiler Plant Equipment
 - 307. Other Power Equipment
 - 310. Water Gas Generating Equipment
 - 311. Liquefied Petroleum Gas Equipment
 - 312. Oil Gas Generating Equipment
 - 313. Generating Equipment--Other Processes
 - 314. Coal, Coke, and Ash Handling Equipment

- 399. Other Tangible Property

1. INTANGIBLE PLANT

- 301. Organization

This account shall include all fees paid to Federal or State governments for the privilege of incorporation and expenditures incident to organizing the corporation, partnership, or other enterprise and putting it into readiness to do business.

ITEMS

1. Cost of obtaining certificates authorizing an enterprise to engage in the public utility business.
2. Fees and expenses for incorporation.
3. Fees and expenses for mergers or consolidations.
4. Office expenses incident to organizing the utility.
5. Stock and minute books and corporate seal.

Note A: This account shall not include any discounts upon securities issued or assumed; nor shall it include any costs incident to negotiating loans, selling bonds or other evidences of debt, or expenses in connection with the authorization, issuance, or sale of capital stock.

Note B: Exclude from this account and include in the appropriate expense account the cost of preparing and filing papers in connection with the extension of the term of incorporation unless the first organization costs have been written off. When charges are made to this account for expenses incurred in mergers, consolidations, or reorganizations, amounts previously included herein or in similar accounts in the books of the companies concerned shall be excluded from this account.

302. Franchises and Consents

A. This account shall include amounts paid to the federal government, to a State or to a political subdivision thereof in consideration for franchises, consents, or certificates, running in perpetuity or for a specified term of more than one year, together with necessary and reasonable expenses incident to procuring such franchises, consents, or certificates. It shall include necessary and reasonable expense incident to obtaining permission and approval to exercise such rights and privileges when the applications therefor are acted upon favorably by the regulatory body. Such expenses include fees for legal and other professional service, expenses of witnesses, cost of newspaper and other advertisements, etc., and pay and expenses of employees engaged in preparing exhibits and other data for hearings. If an application for a franchise, consent, or certificate is denied, expenditures incident to the application shall be charged to account 426.5, Other Deductions or account 435, Extraordinary Deductions, as appropriate.

B. If a franchise, consent, or certificate is acquired by assignment, the charge to this account in respect thereof shall not exceed the amount paid therefor by the utility to the assignor, nor shall it exceed the amount paid by the original grantee, plus the expense of acquisition to such grantee. Any excess of the amount actually paid by the utility over the amount above specified shall be charged to account 426.5, Other Deductions.

C. When any franchise has expired, the book cost thereof shall be credited hereto and charged to account 426.5, Other Deductions, or to account 111.3, Accumulated Provision for Amortization of Other Gas Plant in Service, as appropriate.

D. Records supporting this account shall be kept so as to show separately the book cost of each franchise or consent.

Note: Annual or other periodic payments under franchises shall not be included herein but in the appropriate operating expense account.

303. Miscellaneous Intangible Plant

A. This account shall include the cost of patent rights, licenses, privileges, and other intangible property necessary or valuable in the conduct of the utility's gas operations and not specifically chargeable to any other account.

B. When any item included in this account is retired or expires, the book cost thereof shall be credited hereto and charged to account 426.5, Other Deductions, or account 111.3, Accumulated Provision for Amortization of Other Gas Plant in Service, as appropriate.

C. This account shall be maintained in such a manner that the utility

can furnish full information with respect to the amounts included herein.

2. PRODUCTION PLANT

A. Manufactured Gas Production Plant

304. Land and Land Rights

This account shall include the cost of land and land rights used in connection with manufactured gas production. (See gas plant instruction 313.7.)

305. Structures and Improvements

This account shall include the cost of structures and improvements used in connection with manufactured gas production. (See gas plant instruction 313.8.)

Note: Include relief holders in this account.

306. Boiler Plant Equipment

This account shall include the cost installed of furnaces, boilers, steam and feed water piping, boiler apparatus, and accessories used in the production of steam at gas production plants.

ITEMS

1. Accumulators.
2. Air preheaters, including fans and drives, and ducts not part of building.
3. Ash disposal equipment, including sluiceways not part of a building, pumps and piping, crane, ash bucket conveyor and drives, ash cars, etc.
4. Belt conveyors, including drives.
5. Blast gate valves.
6. Blow-down tanks and piping.
7. Boilers, including valves attached thereto, casings, safety valves, soot blowers, soot hoppers, superheaters, and feed water regulators.
8. Cinder and dust catcher system, including mechanical and electric types.
9. Coal and coke handling equipment, including hoppers, lorries, etc., used wholly for boilers.
10. Combustion control system, including all apparatus installed for the regulation and control of the supply of fuel or air to boilers.
11. Control apparatus.
12. Cranes, hoists, etc., wholly identified with apparatus listed herein.
13. Desuperheaters and reducing valves.
14. Draft apparatus, including forced, induced, and other draft systems, with blowers, fans, and ducts not part of building.

15. Economizers.
16. Emergency lighting systems, not part of building, keep-a-lite systems, etc.
17. Emergency signal systems, in connection with boiler operation.
18. Feed water heaters, including primary and stage.
19. Flues, uptakes, and breeching, whether or not stacks are included in this account.
20. Foundations and settings, specially constructed for and not intended to outlast the apparatus for which provided.
21. Furnaces.
22. Gas firing system, including gas lines, burners, etc., for gas fired boilers.
23. Injectors.
24. Mechanical stoker and feeding systems, clinker grinders, including drives.
25. Meters, gauges, recording instruments, etc.
26. Oil burning equipment, including tanks, heaters, pumps with drives, burner equipment, piping and conditioning apparatus.
27. Painting, first cost.
28. Panels, control (for operating apparatus listed herein).
29. Piping system, steam header and exhaust header, including accessory pipe hangers, steam traps, etc., make-up water, feed water, drip, blow-off, water pipe lines used for steam plant, and valve control system.
30. Platforms, railings, steps, gratings, etc., appurtenant to apparatus listed herein.
31. Pulverizing equipment.
32. Pumps and driving units, for feed water, heater condensate, condenser water, and drip.
33. Stacks--brick, steel, and concrete, when set on separate foundations independent of substructure or superstructure of building.
34. Steam reheaters.
35. Steelwork, especially constructed for apparatus listed herein.
36. Tanks, including surge, weighing, return, blow-off, feed water storage.
37. Tar burning equipment for utilization of tar as boiler fuel, including tanks, pumps, burner equipment, piping, etc.
38. Waste heat boilers and accessory equipment.
39. Water treatment system, including purifiers, settling tanks, filters, chemical mixing and dosing apparatus, etc.

Note A: This account shall not include boilers or steam pipes whose

primary purpose is the heating of buildings.

Note B: When the system for supplying boiler or condenser water is elaborate, as when it includes a dam, reservoir, canal, or pipe line, the cost shall not be charged to this account but to a special subdivision of account 305, Structures and Improvements (Manufactured Gas).

307. Other Power Equipment

A. This account shall include the cost installed of electric generating and accessory equipment used for supplying electricity in gas production plants.

B. This account shall also include the cost installed of miscellaneous power equipment at gas production plants which is not included in any other account.

ITEMS

1. Acid proofing of battery rooms.
2. Air duct runs in battery rooms.
3. Air pumps, steamjet.
4. Batteries for control and general station use.
5. Belts, pulleys, hangers, shafts, and countershafts.
6. Cables between generators and switchboards.
7. Cabinets, control.
8. Compartments, including buses, connections and items permanently attached.
9. Enclosure equipment not an integral part of building.
10. Engines, including steam rotary or reciprocating, steam turbines, and internal combustion engines.
11. Foundations and settings, specially constructed for and not intended to outlast the apparatus for which provided.
12. Generators, AC or DC including excitation system.
13. Ground connections, for main station ground.
14. Lightning arresters.
15. Motor generators, frequency changers, and converters.
16. Overhead power lines, including poles, crossarms, insulators, conductors, etc.
17. Panels, control, including supports and instruments.
18. Piping applicable to apparatus listed herein.
19. Reactors.
20. Rectifiers.
21. Safety equipment, including rubber mats, remote closing devices, glove cabinets.
22. Switchboards, including frames, panels, meters, and instruments.

23. Switching equipment, including oil circuit breakers, disconnecting switches, and connections.

24. Synchronous converters.

25. Transformers, including transformer platforms.

26. Underground conduit system, including manholes and conductors.

Note: When any unit of equipment listed herein is wholly used to furnish power to equipment included in another single account, its cost shall be included in such account.

310. Water Gas Generating Equipment

This account shall include the cost installed of equipment used in the generation of water gas.

ITEMS

1. Automatic operation equipment.

2. Back-run installations.

3. Blast equipment, including blowers and driving units, piping and supports.

4. Bridge, coal shed to generator house.

5. Carburetors.

6. Charging equipment, fuel.

7. Circulating water pumps.

8. Concrete or brick pits, including cover, not part of building.

9. Control apparatus.

10. Conveyors.

11. Dust collectors.

12. Enclosures for equipment (barriers, fire walls, guards, housings, screens, etc.).

13. Flow meters.

14. Foundations and settings, specially constructed for and not intended to outlast the apparatus for which provided.

15. Fuel handling equipment used exclusively for fuel for this account.

16. Gauges, indicating and recording.

17. Generators.

18. Hot valves.

19. Hydraulic operation equipment.

20. Instruments and meters, electrical.

21. Oil handling and storage apparatus used solely for water gas apparatus (tanks, pumps and oil lines, oil heaters, manholes, valve pits, regulators, strainers, etc.).

22. Oil spray.

23. Operating floors and supports, stairways, etc.

- 24. Piling under foundations.
- 25. Piping and valves--steam (commencing at steam header), tar (to decanter), water (inside of building), and gas (up to outlet of final pieces of apparatus in building).
- 26. Pressure regulators.
- 27. Scales, when used in connection with items in this account.
- 28. Seal pots.
- 29. Superheaters and superheater stacks.
- 30. Tanks, hydraulic pressure.
- 31. Valve operating mechanisms.
- 32. Wash boxes.
- 33. Waste heat boilers and associated equipment.

311. Liquefied Petroleum Gas Equipment

A. This account shall include the cost installed of equipment used for the production of gas from petroleum derivatives, such as propane, butane, or gasoline.

B. Subdivisions of this account shall be maintained for each producing process for which this account is provided. A separate subaccount shall be maintained also for bottling equipment included herein.

ITEMS

- 1. Blowers.
- 2. Boilers.
- 3. Calorimixer.
- 4. Carbureting equipment.
- 5. Compression equipment.
- 6. Controller.
- 7. Control apparatus.
- 8. Enclosures and protective fences.
- 9. Foundations and settings, specially constructed for and not intended to outlast the apparatus for which provided.
- 10. Heat exchanger.
- 11. Gauges and instruments.
- 12. Mixing or proportioning equipments.
- 13. Motors, not an integral part of driven equipment.
- 14. Odorizing equipment.
- 15. Oil separator.
- 16. Piping--steam (commencing at steam header), water (inside of building), oil (from supply tank), and gas (up to outlet of final piece of apparatus in building).
- 17. Pits.
- 18. Prime movers.

19. Pumps, including driving units.

20. Regulator.

21. Stairs, platforms, and ladders.

22. Storage equipment, tanks, etc.

23. Superheater.

24. Traps.

25. Valves--regulating and check.

26. Vaporizing equipment.

312. Oil Gas Generating Equipment

This account shall include the cost installed of equipment used for generating oil gas.

ITEMS

1. Air blast equipment, including blowers and driving units, piping and supports.

2. Air inlet louvers and filters.

3. Foundations and settings, specially constructed for and not intended to outlast the apparatus for which provided.

4. Generating equipment, including automatic cycle controls, generators, operating floor, superheaters and wash boxes.

5. Instruments and instrument boards, complete with signal lights and thermocouples and including gauge board, pressure gauges and pyrometers.

6. Meters and regulators, such as, air flow meter, generator oil meter, steam flow meter and steam regulator.

7. Piping and valves, air, steam (commencing at steam header), water (inside building) and oil gas (up to outlet of final piece of apparatus in building).

8. Pumps, hydraulic and oil.

9. Tanks, hydraulic accumulator, hydraulic return, oil and steam accumulator.

313. Generating Equipment--Other Processes

This account shall include, with subdivisions for each type of gas produced, the cost installed of generating equipment which is not included in any of the foregoing accounts, such as equipment used for generating acetylene gas, etc.

314. Coal, Coke, and Ash Handling Equipment

This account shall include the cost installed of structures or equipment used for the transportation, storage, washing, and treatment of coal, coke, and ashes, when used for general gas plant operations.

ITEMS

1. Bins--mixing, refuse, storage, etc.

2. Boom operating mechanisms.

3. Breaker equipment.
4. Bridges, bridge track, and machinery.
5. Bucket conveyors and supports.
6. Capstan.
7. Cars.
8. Chutes.
9. Circuit breakers.
10. Coal loaders.
11. Coal preparation machinery, including washing and drying equipment.
12. Conduit, electrical.
13. Conveyors and supports.
14. Crane, caterpillar.
15. Driving apparatus for equipment listed herein.
16. Elevators.
17. Enclosure equipment.
18. Engines, not an integral part of driven equipment.
19. Foundations and settings, specially constructed for and not intended to outlast the apparatus for which provided.
20. Gravity swing unloader.
21. Hoppers.
22. Instruments or meters, electrical.
23. Ladders, fixed.
24. Loading towers and equipment.
25. Locomotives.
26. Motor generators used only for equipment in this account.
27. Panel, control.
28. Pits.
29. Pulverizing equipment.
30. Railroad sidings and yard tracks.
31. Sampling equipment.
32. Scales.
33. Screens.
34. Sheds and fencing.
35. Shuttle boom.
36. Signal system equipment.
37. Silo.
38. Skip hoist.
39. Stairs, railings, etc.
40. Transfer cars and trucks.
41. Trestles.

42. Turntable.
43. Unloaders.
44. Weighometer.

315. Catalytic Cracking Equipment

This account shall include the cost installed of equipment used for producing gas by the catalytic cracking process.

ITEMS

1. Caloric meters.
2. Catalytic furnace, including catalyst and foundation.
3. Combustion air blowers.
4. Compressors, air.
5. Control equipment.
6. Cooling coils, including foundations.
7. Cooling towers, including foundations.
8. Enclosures.
9. Fractionalizing units.
10. Piping and valves.
11. Preheaters.
12. Pressure regulators.
13. Proportioning controls.
14. Tanks.
15. Vaporizers.

316. Other Reforming Equipment

This account shall include the cost installed of equipment, other than catalytic cracking equipment, used primarily for reforming gas with resultant changes in its chemical composition and calorific value.

ITEMS

1. Blast equipment, including blowers and driving units, piping, and supports.
2. Control apparatus.
3. Foundations and settings, specially constructed for and not intended to outlast the apparatus for which provided.
4. Fuel and ash handling equipment, used wholly in reforming gas.
5. Oil gas apparatus, used for reforming gas.
6. Piping--steam (commencing at steam header), water (inside of building), and gas (up to outlet of final piece of apparatus in building).
7. Pumps and driving units.
8. Purifiers for gas to be reformed.
9. Regulators.
10. Water gas generators, used primarily for reforming gas.

317. Purification Equipment

This account shall include the cost installed of apparatus used for the removal of impurities from gas and apparatus for conditioning gas, including pumps, wells, and other accessory apparatus.

ITEMS

1. Blowers for revivifying.
2. Blowers for activators.
3. Condensers and washer coolers.
4. Control apparatus--conduit, cable, cabinets, switchboards, etc.
5. Crane or cover lifting equipment, not part of the structure.
6. Dehydrators.
7. Engines, not an integral part of driven equipment.
8. Foundations and settings, specially constructed for and not intended to outlast the equipment for which provided.
9. Instruments and meters, electric.
10. Lubricators.
11. Naphthalene and light oil scrubbers.
12. Other accessory equipment such as coolers, spray ponds, pumps, platforms, railings, stairs.
13. Oxide elevators and pits, platforms, tables, and trenches.
14. Piping--air, steam, water, gas, condensate, liquor, tar, etc., from inlet valve of first piece of apparatus to outlet valve of final piece of apparatus (or, in building, from entrance to building to exit from building).
15. Precipitators.
16. Purifier--iron oxide or liquid, including first filling.
17. Recording gauges and thermometers.
18. Revivifying air ducts.
19. Saturator with auxiliary equipment.
20. Scrubbers.
21. Seal and drip pots.
22. Signal system identified with equipment herein.
23. Sulphur removal apparatus.
24. Tar extractors and Cottrell precipitators.
25. Tar pumps and tanks.
26. Track runs for cranes and hoists.
27. Wash boxes.
28. Water meters, for cooling water.

318. Residual Refining Equipment

This account shall include the cost installed of apparatus used in refining and handling of residuals except where the apparatus is

necessary for the operation of property included in account 317,
Purification Equipment.

ITEMS

1. Ammonia still, condensers, saturators, etc.
2. Apparatus for removal of residuals from purifier liquids.
3. Coke filter.
4. Coke handling and storage facilities, used solely for coke held for sale.
5. Condensers.
6. Control apparatus.
7. Coolers.
8. Decanters.
9. Foundations specially constructed for and not intended to outlast the apparatus for which provided.
10. Gauges.
11. Heating equipment for apparatus included in this account.
12. Instruments.
13. Light oil stills, washers, etc.
14. Piping and pumps.
15. Platforms, stairs, and ladders.
16. Separators.
17. Storage tanks.
18. Supports.
19. Tar dehydrators, stills, etc.
319. Gas Mixing Equipment

This account shall include the cost installed of equipment used for mixing manufactured and natural gas, or the mixing of other gases incident to delivery of such mixed gases to the distribution system.

ITEMS

1. Alcohol units.
2. Automatic mixing controls.
3. B.t.u. adjustor.
4. Calorimeter.
5. Calorimixer.
6. Compressor.
7. Gas heater.
8. Gas scrubber (air filter, dust cleaner).
9. Gauges and instruments.
10. Meters.
11. Mixing chambers.
12. Odorizing equipment.

13. Oil pump units.
14. Panel and control equipment.
15. Piping and valves.
16. Regulators, pressure and ratio.
17. Safety alarm equipment.

320. Other Equipment

A. This account shall include the cost installed of equipment used in the production of manufactured gas, when not assignable to any of the foregoing accounts.

B. This account shall be subdivided to show separately laboratory equipment, yard piping, and miscellaneous equipment.

ITEMS

1. Cabinet, control.
2. Compressed air system.
3. Fire hose carts.
4. First aid room equipment.
5. Foamite system.
6. Foundations and settings specially constructed for and not intended to outlast the the apparatus for which provided.
7. Odorizing equipment.
8. Oil foggers.
9. Panel, control.
10. Piping--yard, when not includible in other accounts.
11. Pits.
12. Platforms.
13. Production laboratory equipment.
14. Special signal equipment.
15. Works exhauster including driving units and governor.
16. Works station meters, including gauges, piping and accessories.

Note A: Office equipment, desks, chairs, etc., shall not be included herein but in account 391, Office Furniture and Equipment.

Note B: When production laboratory equipment is used jointly for manufactured gas and natural gas, the entire installation may be included either in this account or in account 337, Other Equipment (Natural Gas Production and Gathering Plant).

Note C: Odorizing equipment or oil foggers and saturators in pumping or regulating pits on transmission or distribution mains, may be included in the account for transmission or distribution pumping and regulating equipment.

B. Natural Gas Production Plant

Natural Gas Production and Gathering Plant

Special Instructions

Costs Related to Leases. The net book value of amounts recorded in the natural gas production accounts incurred on or related to leases acquired by the utility, shall, in general, not exceed the net realizable value (estimated selling price less estimated costs of extraction, completion and disposal) of recoverable hydrocarbon reserves discovered on such leases. After initiation of exploration and development on leases, the utility must determine after a reasonable period of time, and annually thereafter, whether the net realizable value of such recoverable reserves will be sufficient to absorb the net book value of amounts recorded in the accounts. The recoverable reserves shall be determined and attested to by independent appraisers no less frequently than every three years. If the net realizable value of recoverable reserves is not sufficient to absorb the net book value of amounts in the production accounts, the utility shall reduce the net book value of the amounts in the accounts to net realizable value of recoverable reserves. The reduction shall be made by first reducing the unamortized amounts recorded in account 338, Unsuccessful Exploration and Development Costs, by debiting account 404.1, Amortization and Depletion of Producing Natural Gas Land and Land Rights. Next, if the net book value related to successful costs exceeds the net realizable value of the recoverable reserves, the production plant accounts shall be written down to such net realizable value by appropriate charges and credits to the expense and valuation accounts. However, if the amount of the reduction to net realizable value of recoverable reserves as determined above is so large that its inclusion in the operating accounts in the year in which it is recognized would seriously distort those accounts, the company may request commission approval to defer such a reduction and amortize it over a future period. If, within one year from the date of such approval, a utility's recoverable reserves as provided above is sufficient to support also the unamortized balance of such costs, it shall reinstate these costs in the appropriate plant accounts, provided that the costs have not received consideration in rates. With the approval of the commission, amortization of the reduction to net realizable value of recoverable reserves may commence at a date subsequent to the year in which such a reduction is recognized to provide for consistency of accounting and rate treatment.

325.1 Producing Lands

This account shall include the cost of lands held in fee on which producing natural gas wells are located, and lands held in fee which are being drained of natural gas through the operation by the utility of

wells on other land. (See gas plant instruction 313.7, subd. (g).)

325.2 Producing Leaseholds

A. This account shall include the cost of acquiring leaseholds on which the utility pays royalties for natural gas obtained therefrom. (See gas plant instruction 313.7, subd. (g).)

B. Exclude from this account rents paid periodically for rights obtained under leases. Exclude also from this account the cost of leaseholds which terminate in one year or less after they become effective.

325.3 Gas Rights

This account shall include the cost of natural gas rights used in producing natural gas, whereby the utility obtains ownership in gas underlying land not owned or leased by the utility. It does not provide for gas rights which are leased and which are properly chargeable to account 325.2, Producing Leaseholds.

325.4 Rights-of-Way

This account shall include the cost of all interests in land which terminate more than one year after they become effective and on which are located gathering pipe lines, telephone pole lines, and like property used in connection with the production of natural gas. (See Part 313 Instructions--Gas Plant Accounts, § 313.7.)

325.5 Other Land and Land Rights

This account shall include the cost of land and land rights used in connection with the production of natural gas, when not properly assignable to any of the foregoing accounts. (See Part 313 Instructions--Gas Plant Accounts, § 313.7.)

326. Gas Well Structures

This account shall include the cost of well structures and improvements used in connection with the housing of permanent bailers and other equipment necessary to keep the wells in operation. (See Part 313 Instructions--Gas Plant Accounts, § 313.8.)

327. Field Compressor Station Structures

This account shall include the cost of structures and improvements used in connection with the housing of compressor station equipment used to raise the pressure of natural gas before it is conveyed to the terminus of the field lines. (See Part 313 Instructions--Gas Plant Accounts § 313.8.)

328. Field Measuring and Regulating Station Structures

The account shall include the cost of structures and improvements used in connection with the housing of meters, regulators and appurtenant appliances for measuring and regulating natural gas before the point

where it enters the transmission or distribution system. (See Part 313 Instructions--Gas Plant Accounts, § 313.8.)

329. Other Structures

This account shall include the cost of structures and improvements used in connection with natural gas production and gathering not provided for elsewhere. (See Part 313 Instructions--Gas Plant Accounts, § 313.8.)

330. Producing Gas Wells--Well Construction

This account shall include the cost of drilling producing gas wells.

ITEMS

1. Clearing well site.
2. Hauling, erecting, dismantling, and removing boilers, portable engines, derricks, rigs, and other equipment and tools used in drilling.
3. Drilling contractors' charges.
4. Drive pipe.
5. Fuel or power.
6. Labor.
7. Rent of drilling equipment.
8. Water used in drilling, obtained either by driving wells, piping from springs or streams, or by purchase.
9. Hauling well equipment.
10. Shooting, fracturing, acidizing.

Note A: For detailed records of well construction, see general instruction 311.12.

Note B: Cost of drilling, etc., incurred in connection with dry holds shall be charged as provided in account 796, Nonproductive Well Drilling.

331. Producing Gas Wells--Well Equipment

This account shall include the cost of equipment in producing gas wells.

ITEMS

1. Bailing equipment.
2. Boilers and drives permanently connected.
3. Casing.
4. Derrick.
5. Fence, when solely an enclosure for equipment.
6. Fittings, including shutin valves, bradenheads and casing heads.
7. Packing.
8. Tank, oil or water, etc.
9. Tubing.

332. Field Lines

This account shall include the cost installed of field lines used in conveying natural gas from the wells to the point where it enters the transmission or distribution system.

ITEMS

1. Gathering lines, including pipe, valves, fittings, and supports.
2. Cathodic protection equipment.
3. Creek crossings, suspension bridges and other special construction.
4. Line drips and separators.

333. Field Compressor Station Equipment

This account shall include the cost installed of compressor station equipment and associated appliances used to raise the pressure of natural gas before it is conveyed to the terminus of the field lines.

ITEMS

1. Boiler plant, coal handling and ash handling equipment for steam powered compressor station.
2. Compressed air system equipment.
3. Compressor equipment and driving units, including auxiliaries, foundations, guard rails and enclosures, etc.
4. Electric system equipment, including generating equipment and driving units, power wiring, transformers, regulators, battery equipment, switchboard, etc.
5. Fire fighting equipment.
6. Gas lines and equipment, including fuel supply lines, cooling tower and pond and associated equipment, dehydrators, fuel gas mixers, special pipe bends and connections, and associated scrubbers, separators, tanks, gauges and instruments.
7. Laboratory and testing equipment.
8. Lubricating oil system, including centrifuge, filter, tanks, purifier, and lubricating oil piping, etc.
9. Water supply and circulation system, including water well, tank, water piping, cooling tower, spray fence, and water treatment equipment, etc., but not including water system equipment solely for domestic and general use.

334. Field Measuring and Regulating Station Equipment

This account shall include the cost installed of meters, gauges, and other equipment used in measuring and regulating natural gas collected in field lines before the point where it enters the transmission or distribution system.

ITEMS

1. Automatic control equipment.
2. Boilers, heaters, etc.

3. Foundations, pits, etc.
4. Gas cleaners, scrubbers, separators, dehydrators, etc.
5. Gauges and instruments, including piping, fittings, wiring, etc., and panel boards.
6. Headers.
7. Meters, orifice or positive, including piping and connections.
8. Oil fogging equipment.
9. Odorizing equipment.
10. Regulators or governors, including controls and instruments.
11. Structures of a minor nature or portable type. (See note to gas plant instruction 313.8, subd. (c).)

Note: When gathering lines and associated devices are raised or lowered or other change in their location is made, the cost of the work shall be charged to the maintenance account appropriate for the class of property which is moved. Incidental replacement of retirement units in connection with a change in location shall be accounted for as additions and retirements.

335. Drilling and Cleaning Equipment

This account shall include the cost of implements and equipment used in drilling and cleaning natural gas wells.

ITEMS

1. Bailers.
2. Bits and other drilling tools.
3. Boilers.
4. Derricks.
5. Drilling cables.
6. Drilling machines.
7. Engines.
8. Motors.
9. Pulling machines.
10. Pumps.
11. Rigs.
12. Tanks.

336. Purification Equipment

This account shall include the cost installed of apparatus used for the removal of impurities from gas and apparatus for conditioning gas.

ITEMS

1. Condensers and washer coolers.
2. Dehydrators.
3. Foundations and settings, specially constructed for and not intended to outlast the equipment for which provided.

4. Other accessory equipment, such as coolers, spray ponds, pumps, platforms, railings, stairs.

5. Piping, from inlet valve of first piece of apparatus to outlet valve of final piece of apparatus (or, in building, from entrance to building to exit from building).

6. Scrubbers.

7. Sulphur removal apparatus.

8. Water supply system.

Note: In general, this account shall include all dehydrators located in or adjacent to production areas which are used to remove water and other stray liquids from gas produced by the utility or purchased in adjacent to production areas. In some instances, such dehydrators may be located some* from the production sources of the gas. Where, however, the utility has no production and gathering facilities with respect to any of the gas passing through the dehydrators, such as at the purchase point at use head of a transmission pipe line company, the dehydrators may be included in account 368, Compressor Station Equipment, or account 367, Mains, whichever is the most practicable and reasonable under the circumstances.

* So in original

337. Other Equipment

This account shall include the cost installed of equipment used in the production and gathering of natural gas, when not assignable to any of the foregoing accounts.

ITEMS

1. Calorimeter.

2. Control installation.

3. Crane.

4. Laboratory equipment.

5. Odorizing unit.

6. Oil fogger.

Note A: Office equipment, desks, chairs, etc., shall not be included herein but in account 391, Office Furniture and Equipment.

Note B: When production laboratory equipment is used jointly for manufactured gas and natural gas the entire installation may be included either in this account or in account 320, Other Equipment.

Note C: Odorizing equipment or oil foggers and saturators in pumping or regulating pits on transmission or distribution mains, may be included in the account for transmission or distribution pumping and regulating equipment, as appropriate.

338. Unsuccessful Exploration and Development Costs

A. This account shall include unsuccessful exploration and development costs incurred on or related to hydrocarbon leases, on properties in the contiguous 48 States and the State of Alaska. It shall also include costs of a preliminary nature incurred in the search for natural gas.

B. The costs recorded in this account shall be amortized by debiting account 404.1, Amortization and Depletion of Producing Natural Gas Land and Land Rights, and crediting this account using the unit-of-production or other acceptable method of amortization as hydrocarbons are extracted from producing wells.

C. In general, the unamortized costs recorded in this account shall not exceed the net realizable value (estimated selling price less estimated costs of extraction, completion and disposal) of proven hydrocarbon reserves. (See Special Instructions--Costs Related to Leases, above).

Note: Records of the costs and characteristics of non-productive wells shall conform, as appropriate, to the requirements of the note to general instruction 311.12, records for each plant and for territorial subdivisions.

3. NATURAL GAS STORAGE PLANT

A. Underground Storage Plant

350.1 Land

This account shall include the cost of lands held in fee on which underground storage wells are located, and other lands held in fee within an area utilized for the underground storage of gas. (See gas plant instruction 313.7, subd.(g).)

350.2 Rights-of-Way

This account shall include the cost of all interests in land which do not terminate until more than one year after they become effective and on which are located underground storage lines, telephone pole lines, and like property used in connection with underground gas storage operations. (See gas plant instruction 313.7.)

351. Structures and Improvements

A. This account shall include the cost in place of structures and improvements used wholly or predominantly in connection with underground storage of natural gas. (See gas plant instruction 313.8.)

B. This account shall be subdivided as follows:

351.1 Well Structures.

351.2 Compressor Station Structures.

351.3 Measuring and Regulating Station Structures.

351.4 Other Structures.

352. Wells

This account shall include the drilling cost of wells used for injection and withdrawal of gas from underground storage projects, including wells kept open and used for observation.

352.1 Storage Leaseholds and Rights

A. This account shall include the cost of leaseholds, storage rights, mineral deeds, etc., on lands for the purpose of utilizing subsurface reservoirs for underground gas storage operations. (See gas plant instruction 313.7.)

B. Exclude from this account rents or other charges paid periodically for use of subsurface reservoirs for underground gas storage purposes.

Note: Items such as buildings, wells, lines, equipment and recoverable gas used in storage operations acquired with land or storage leaseholds and rights are to be classified in the appropriate accounts.

352.2 Reservoirs

This account shall include costs to prepare underground reservoirs for the storage of natural gas.

ITEMS

1. Geological, geophysical and seismic costs.
2. Plugging abandoned wells.
3. Fuel and power.
4. Drilling and equipping fresh water wells, disposal wells, and solution wells.
5. Leaching of salt dome caverns.
6. Rentals on storage rights and leases incurred during construction and development period.
7. Gas used during the development period.
8. Costs incident to maintaining covenants of production leaseholds during the period required to convert them to storage leaseholds.
9. Other rehabilitation work.

352.3 Nonrecoverable Natural Gas

A. This account shall include that cost of gas in underground reservoirs, including depleted gas or oil fields and other underground caverns or reservoirs used for the storage of gas which will not be recoverable.

B. Such nonrecoverable gas shall be priced at the acquisition cost of native gas or, when acquired for storage by purchase or presumed to be supplied from the utility's own production, priced as outlined in paragraph B of account 117, Gas Stored Underground-Noncurrent. After devotion to storage, the cost of the gas shall not be restated to effect subsequent price changes in purchased gas or changes in the cost of gas produced by the utility. When the utility has followed the practice of

adjusting nonrecoverable gas to the weighted average cost of gas purchased or supplied from its own production, cost shall be the weighted average cost of such gas at the effective date of this account.

ITEMS

Drilling:

1. Clearing well site.
2. Hauling, erecting, dismantling, and removing boilers, portable engines, derricks, rigs, and other equipment and tools used in drilling.
3. Drilling contractors' charges.
4. Drive pipe.
5. Fuel or power.
6. Labor.
7. Rent of drilling equipment.
8. Water used in drilling, obtained either by driving wells, piping from springs or streams, or by purchase.
9. Hauling well equipment.
10. Shooting, fracturing, acidizing.

Equipment:

11. Bailing equipment.
12. Boilers and drives permanently connected.
13. Casing.
14. Derrick.
15. Fence, when solely an enclosure for equipment.
16. Fittings, including shut-in valves, bradenheads and casing heads.
17. Packing.
18. Tank, oil or water, etc.
19. Tubing.

353. Lines

This account shall include the cost installed of gas pipe lines used wholly or predominantly for conveying gas from point of connection with transmission or field lines to underground storage wells and from underground storage wells to the point where the gas enters the transmission or distribution system.

ITEMS

1. Cathodic protection equipment.
 2. Creek crossings, suspension bridges and other special construction.
 3. Lines, including pipe, valves, fittings, and supports.
 4. Line drips and separators.
- ##### 354. Compressor Station Equipment

This account shall include the cost installed of compressor station equipment used wholly or predominantly for the purpose of raising the

pressure of gas for delivery to underground storage or to raise the pressure of gas withdrawn from underground storage for delivery to the transmission or distribution system.

ITEMS

1. Boiler plant, coal handling and ash handling equipment for steam powered compressor station.
2. Compressed air equipment.
3. Compressor equipment and driving units, including auxiliaries, foundations, guard rails and enclosures, etc.
4. Electric system equipment, including generating equipment and driving units, power wiring, transformers, regulators, battery equipment, switchboard, etc.
5. Fire fighting equipment.
6. Gas lines and equipment, including fuel supply lines, cooling tower and pond and associated equipment, dehydrators, fuel gas mixers, special pipe bends and connections, and associated scrubbers, separators, tanks, gauges and instruments.
7. Laboratory and testing equipment.
8. Lubricating oil system, including centrifuge, filter tanks, purifier, and lubricating oil piping, etc.
9. Water supply and circulation system, including water well, tank, water piping, cooling tower, spray fence, and water treatment equipment etc., but not including water system equipment solely for domestic and general use.

355. Measuring and Regulating Equipment.

This account shall include the cost installed of equipment used wholly or predominantly for the purpose of measuring and regulating deliveries of gas to underground storage and withdrawals of gas from underground storage.

ITEMS

1. Automatic control equipment.
2. Boilers, heaters, etc.
3. Foundations, pits, etc.
4. Gas cleaners, scrubbers, separators, dehydrators, etc.
5. Gauges and instruments, including piping, fittings, wiring, etc. and panel boards.
6. Headers.
7. Meters, orifice or positive, including piping and connections.
8. Oil fogging equipment.
9. Odorizing equipment.
10. Regulators or governors, including controls and instruments.

11. Structures of a minor nature or portable type. (See note to gas plant instruction 313.8, subd. (c).)

357. Other Equipment

This account shall include the cost installed of equipment used wholly or predominantly in connection with underground storage of gas, when not assignable to any of the foregoing accounts.

ITEMS

1. Calorimeter.
2. Control installation.
3. Crane.
4. Odorizing unit.
5. Oil fogger.

B. Other Storage Plant

360. Land and Land Rights

A. This account shall include the cost of land and land rights used in connection with the storage of gas in holders. (See Gas Plant Instruction 313.7.)

B. The records supporting this account shall be kept to show separately plant used for local storage and plant used for liquefied storage.

361. Structures and Improvements

A. This account shall include the cost in place of structures and improvements used in connection with the storage of gas in holders. (See Gas Plant Instruction 313.8.)

B. The records supporting this account shall be kept to show separately plant used for local storage and plant used for liquefied storage.

362. Gas Holders

A. This account shall include the cost installed of holders and associated appliances, used in the storage of gas above ground, or in underground receptacles.

B. The records supporting this account shall be kept to show separately plant used for local storage and plant used for liquefied storage.

Note: Relief holders used in connection with manufactured gas operations shall be included in account 305, Structures and Improvements.

ITEMS

1. Alarm systems.
2. Buried piping, tanks or other underground construction for gas storage.

3. Flood and fire control equipment.
4. Foundations.
5. Holder pistons.
6. Holders-waterless, including elevators, tar apparatus, and inlet and outlet connections.
7. Holders-waterseal, including oil skimmer, heating equipment, drips, and inlet and outlet connections.
8. Hortonspheres and high pressure tanks, including inlet and outlet connections, access equipment, etc.
9. Lighting.
10. Pumps.
11. Ventilating equipment.
12. Walkways.

363. Purification Equipment

This account shall include the cost installed of apparatus used for the removal of impurities from gas and apparatus for conditioning gas.

ITEMS

1. Condensers and washer coolers.
2. Dehydrators.
3. Foundations and settings, specially constructed for and not intended to outlast the equipment for which provided.
4. Other accessory equipment, such as coolers, spray ponds, pumps, platforms, railings, stairs.
5. Piping from inlet valve of first piece of apparatus to outlet valve of final piece of apparatus (or, in building from entrance to building to exit from building).
6. Scrubbers.
7. Sulphur removal apparatus.
8. Water supply system.

363.1 Liquefaction Equipment

This account shall include the cost installed of equipment used in the liquefaction of natural gas.

ITEMS

1. Cold box.
2. Heat exchanger.
3. Condensers.
4. Pumps.
5. Tanks.

363.2 Vaporizing Equipment

This account shall include the cost installed of vaporizing equipment used in connection with liquefied natural gas storage.

363.3 Compressor Equipment

A. This account shall include the cost installed of compressor equipment and associated appliances used in connection with other storage plant.

B. The records supporting this account shall be kept to show separately plant used for local storage and plant used for liquefied storage.

363.4 Measuring and Regulating Equipment

A. This account shall include the cost installed of equipment used to measure deliveries of gas to other storage and withdrawals of gas from other storage.

B. The records supporting this account shall be kept to show separately plant used for local storage and plant used for liquefied storage.

ITEMS

1. Automatic control equipment.
2. Boilers, heaters, etc.
3. Foundations, pits, etc.
4. Gas cleaners, scrubbers, separators, dehydrators, etc.
5. Gauges and instruments, including piping, fittings, wiring, etc. and panel boards.
6. Headers.
7. Meters, orifice or positive, including piping and connections.
8. Oil fogging equipment.
9. Odorizing equipment.
10. Regulators or governors, including controls and instruments.
11. Structures of a minor nature of portable type.

363.5 Other Equipment

A. This account shall include the cost installed of other equipment used in connection with the storage of gas in holders.

B. The records supporting this account shall be kept to show separately plant used for local storage and plant used for liquefied storage.

ITEMS

1. Complete inlet and outlet connections.
2. Foundations.
3. Gauges and instruments.
4. Regulating apparatus.

4. TRANSMISSION PLANT

365.1 Land and Land Rights

This account shall include the cost of land and land rights, except

rights-of-way, used in connection with transmission operations. (See gas plant instruction 313.1.)

365.2 Rights-of-Way

This account shall include the cost of rights-of-way used in connection with transmission operations. (See gas plant instruction 313.7.)

366. Structures and Improvements

A. This account shall include the cost in place of structures and improvements used in connection with transmission operations. (See gas plant instruction 313.8.)

B. This account shall be subdivided as follows:

366.1 Compressor Station Structures

366.2 Measuring and Regulating Station Structures

366.3 Other Structures

367. Mains

A. This account shall include the cost installed of transmission system mains.

B. The records supporting this account shall be so kept as to show separately the cost of mains of different sizes and types and of each tunnel, bridge, or river crossing. (See gas plant instruction 313.10, subd. (i).)

ITEMS

1. Anti-freeze lubricating equipment.
2. Automatic valve operating mechanisms, including pressure tanks, etc.
3. By-pass assembly.
4. Caissons, tunnels, trestles, etc., for submarine mains.
5. Cathodic protection equipment.
6. Drip lines and pots.
7. Excavation, including shoring, bracing, bridging, pumping, backfill, and disposal of excess excavated material.
8. Foundations.
9. Gas cleaners, scrubbers, etc., when not part of compressor station or measuring and regulating equipment.
10. Leak clamps. (See gas plant instruction 313.10, subd. (c) (1).)
11. Linewalkers' bridges.
12. Manholes.
13. Municipal inspection.
14. Pavement disturbed, including cutting and replacing pavement, pavement base and sidewalks.
15. Permits.

16. Pipe coating.
17. Pipe and fittings.
18. Pipe laying.
19. Pipe supports.
20. Protection of street openings.
21. River, highway, and railroad crossings, including revetments, pipe anchors, etc.
22. Valves.
23. Welding.

Note: When gas mains and associated devices are raised or lowered or other change in their location is made, the cost of the work shall be charged to the maintenance account appropriate for the class of property which is moved. Incidental replacement of retirement units in connection with a change in location shall be accounted for as additions and retirements.

368. Compressor Station Equipment

This account shall include the cost installed of compressor station equipment and associated appliances used in connection with transmission system operations.

ITEMS

1. Boiler plant, coal handling and ash handling equipment for steam powered compressor station.
2. Compressed air system equipment.
3. Compressor equipment and driving units, including auxiliaries, foundations, guard rails and enclosures, etc.
4. Electric system equipment, including generating equipment and driving units, power wiring, transformers, regulators, battery equipment, switchboard, etc.
5. Fire fighting equipment.
6. Gas lines and equipment, including fuel supply lines, cooling tower and pond and associated equipment, dehydrators, fuel gas mixers, special pipe bends and connections, and associated scrubbers, separators, tanks, gauges and instruments.
7. Laboratory and testing equipment.
8. Lubricating oil system, including centrifuge, filter, tanks, purifier, and lubricating oil piping, etc.
9. Structures of a minor nature or portable type. (See note to gas plant instruction 313.8, subd.(c).)
10. Water supply and circulation system, including water well, tank, water piping, cooling tower, spray fence, and water treatment equipment, etc., but not including water system equipment solely for domestic and

general use.

369. Measuring and Regulating Station Equipment

This account shall include the cost installed of meters, gauges, and other equipment used in measuring or regulating gas in connection with transmission system operations.

ITEMS

1. Automatic control equipment.
2. Boilers, heaters, etc.
3. Foundations, pits, etc.
4. Gas cleaners, scrubbers, separators, dehydrators, etc.
5. Gauges and instruments, including piping, fittings, wiring, etc., and panel boards.
6. Headers.
7. Meters, orifice or positive, including piping and connections.
8. Oil fogging equipment.
9. Odorizing equipment.
10. Regulators or governors, including controls and instruments.
11. Structures of a minor nature or portable type. (See note to gas plant instruction 313.8, subd. (c).)
12. Telemetering equipment.

371. Other Equipment

This account shall include the cost installed of equipment used in transmission system operations, when not assignable to any of the foregoing accounts.

5. DISTRIBUTION PLANT

374. Land and Land Rights

This account shall include the cost of land and land rights used in connection with distribution operations. (See gas plant instruction 313.7.)

375. Structures and Improvements

This account shall include the cost in place of structures and improvements used in connection with distribution operations. (See gas plant instruction 313.8.)

376. Mains

A. This account shall include the cost installed of distribution system mains.

B. The records supporting this account shall be so kept as to show separately the cost of mains of different sizes and types and of each tunnel, bridge, or river crossing. (See gas plant instruction 313.10, subd. (i).)

ITEMS

1. Caissons, tunnels, trestles, etc. for submarine mains.
2. Clamps, leak when installed at time of construction; when clamps are installed subsequent to construction, the accounting shall be in accordance with gas plant instruction 313.10, subd. (c) (1).
3. Drip lines and pots.
4. Electrolysis tests, in connection with new construction.
5. Excavation, including shoring, bracing, bridging, pumping, backfill, and disposal of excess excavated material.
6. Hauling, unloading, and stringing pipe.
7. Lamping and watching new construction.
8. Municipal inspection.
9. Pavement disturbed, including cutting and replacing pavement, pavement base, and sidewalks.
10. Permits.
11. Pipe coating.
12. Pipe and fittings.
13. Pipe laying.
14. Pipe supports.
15. Protection of street openings.
16. Relocating city storm and sanitary sewers, catch basins, etc., or protecting same in connection with new construction.
17. Replacement of municipal drains and culverts in connection with new construction.
18. Roadway boxes.
19. Shifting excavated material due to traffic conditions in connection with new construction.
20. Sleeves and couplings.
21. Special crossovers, bridges and foundations for special construction
22. Surveying and staking lines.
23. Valves not associated with pumping or regulating equipment.
24. Welding.
25. Wood blocking.

Note: When gas mains and associated devices are raised or lowered or other change in their location is made, the cost of the work shall be charged to the maintenance account appropriate for the class of property which is moved. Incidental replacement of retirement units in connection with a change in location shall be accounted for as additions and retirements.

377. Compressor Station Equipment

This account shall include the cost installed of compressor station

equipment and associated appliances used in connection with distribution system operations.

ITEMS

1. Boiler plant, coal handling and ash handling equipment for steam powered compressor station.
2. Compressed air system equipment.
3. Compressor equipment and driving units, including auxiliaries, foundations, guard rails and enclosures, etc.
4. Electric system equipment, including generating equipment and driving units, power wiring, transformers, regulators, battery equipment, switchboards, etc.
5. Fire fighting equipment.
6. Gas lines and equipment, including fuel supply lines, cooling tower and pond and associated equipment, dehydrators, fuel gas mixers, special pipe bends and connections, and associated scrubbers, separators, tanks, gauges and instruments.
7. Laboratory and testing equipment.
8. Lubricating oil system, including centrifuge, filter, tanks, purifier, and lubricating oil piping, etc.
9. Water supply and circulation system, including water well, tank water piping, cooling tower, spray fence and water treatment equipment, etc., but not including water system equipment solely for domestic and general use.

378. Measuring and Regulating Station Equipment

This account shall include the cost installed of meters, gauges and other equipment used in measuring and regulating gas in connection with distribution system operation other than the measurement of gas deliveries to customers. (See gas plant instruction 318.10, subd. (i).)

ITEMS

1. Automatic control equipment.
2. Foundations.
3. Gauges and instruments.
4. Governors or regulators.
5. Meters.
6. Odorizing equipment.
7. Oil fogging equipment.
8. Piping.
9. Pressure relief equipment.
10. Structures of a minor nature or portable type. (See note to gas plant instruction 313.8, subd. (c).)
11. Telemetering equipment

12. Vaults or pits, including valves contained therein.

380. Services

A. This account shall include the cost installed of service pipes and accessories leading to the customers' premises. (See gas plant instruction 313.10, subd. (i).)

B. A complete service begins with the connection on the main and extends to but does not include the connection with the customer's meter. A stub service extends from the main to the property line, or the curb stop.

C. Services which have been used but have become inactive shall be retired from utility plant in service immediately if there is no prospect for reuse, and, in any event, shall be retired by the end of the second year following that during which the service became inactive unless reused in the interim. No portion of a completed service shall be accounted for as a stub service after the use thereof has been discontinued. Utilities shall establish a routine whereby accuracy of accounting for services will be checked for the entire territory within each five-year period.

ITEMS

1. Curb valves and curb boxes.
2. Excavation, including shoring, bracing, bridging, pumping, backfill, and disposal of excess excavated material.
3. Landscaping, including lawns and shrubbery.
4. Municipal inspection.
5. Pavement disturbed, including cutting and replacing pavement, pavement base, and sidewalks.
6. Permits.
7. Pipe and fittings, including saddle, T, or other fitting on street main.
8. Pipe coating.
9. Pipe laying.
10. Protection of street openings.
11. Service drips.
12. Service valves, at head of service, when installed or furnished by the utility.

Note: When services and associated devices are raised or lowered or other change in their location is made, the cost of the work shall be charged to the maintenance account appropriate for the class of property which is moved. Incidental replacement of retirement units in connection with a change in location shall be accounted for as additions and retirements.

381. Meters

A. This account shall include the cost of meters and devices and appurtenances thereto, for use in measuring the gas delivered to its users, whether actually in service or held in reserve.

B. When a meter is permanently retired from service, the amount at which it is included herein shall be credited to this account.

ITEMS

Meters, including badging and initial testing.

Note A: This account shall not include meters for recording the output of a production plant, gathering system, etc. It includes only those meters to record gas delivered to customers, including company use.

Note B: Minor items shall be included in this account only when in service or associated with a unit of property held in reserve; otherwise they shall be carried in account 150.154, Plant Materials and Operating Supplies.

Note C: The utility shall maintain a statistical record to show separately the number of each type and size of meter or group of types and sizes as carried in the continuing property record. Underlying records shall be kept so that the utility can determine readily for each such classification the number of meters in service (the meters subdivided between active and locked); and the number carried herein but not in service, the latter to include units undergoing repairs. Such records shall also show the number of meter installations which prior to the effective date of this uniform system of accounts was charged to operating expenses.

382. Meter Installations

A. This account shall include the cost of labor and materials used and expenses incurred in connection with the original installation of customer meters.

B. When a meter installation is permanently retired from service, the cost thereof shall be credited to this account.

ITEMS

1. Cocks.
2. Locks.
3. Labor.
4. Meter bars.
5. Pipe and fittings.
6. Seals.
7. Shelves.
8. Swivels and bushings.
9. Transportation.

Note A: The cost of removing and resetting meters shall be charged to account 878, Meter and House Regulator Expenses.

Note B: Charges made to customers for connection, disconnection, or reconnection of meters shall be credited to account 488, Miscellaneous Service Revenues.

Note C: The provisions of this account shall not be interpreted as permitting the inclusion within the installation costs reflected in this account or in the continuing property record any amounts of installation costs charged to operating expenses or to surplus in periods prior to the effective date of the system of accounts prescribed herein. (See gas plant instruction 313.1, subds. (a) and (b).)

Note D: See note C to account 381.

383. House Regulators

A. This account shall include the cost of house regulators and devices and appurtenances thereto, for use in regulating the gas delivered to its users, whether actually in service or held in reserve.

B. When a house regulator is permanently retired from service, the amount at which it is included herein shall be credited to this account.

Note A: Minor items shall be included in this account only when in service or associated with a unit of property held in reserve; otherwise they shall be carried in account 150.154, Plant Materials and Operating Supplies.

Note B: The utility shall maintain a statistical record to show separately the number of each type and size of regulator or group of types and sizes as carried in the continuing property record. Underlying records shall be kept so that the utility can determine readily for each such classification the number of regulators in service; and the number carried herein but not in service, the latter to include units undergoing repairs. Such records shall also show the number of house regulator installations which prior to the effective date of this uniform system of accounts was charged to operating expenses.

384. House Regulator Installations

A. This account shall include the cost of labor and materials used and expenses incurred in connection with the original installation of house regulators.

B. If the utility's policy is to charge customers for the first installation of house regulators, such amounts shall be credited to account 495, Other Gas Revenues; and the costs of installation of house regulators incurred by the utility shall be charged to account 878, Meter and House Regulator Expenses. (See also note B following.)

C. When a house regulator installation is permanently retired from

service, the cost thereof shall be credited to this account.

ITEMS

1. Cocks.
2. Labor.
3. Locks.
4. Pipe and fittings.
5. Regulator vents.
6. Swivels and bushings.
7. Transportation.

Note A: The cost of removing and resetting house regulators shall be charged to account 878, Meter and House Regulator Expenses.

Note B: The provisions of this account shall not be interpreted as permitting inclusion within the installation costs reflected in this account or in the continuing property record any amounts of installation costs charged to operating expenses or to surplus in periods prior to the effective date of the system of accounts prescribed herein. (See gas plant instruction 313.1, subds. (a) and (b).)

Note C: See note B to account 383.

385. Industrial Measuring and Regulating Station Equipment

This account shall include the cost of special and expensive installations of measuring and regulating station equipment, located on the distribution system, serving customers such as industrials, hospitals, schools, and other large establishments.

ITEMS

(See account 378 for items.)

386. Other Property on Customers' Premises

A. This account shall include the cost, including first setting and connecting, of equipment owned by the utility installed on customers' premises which is not includible in other accounts.

B. This account shall be subdivided so as to show separately the cost of water heaters, space heaters, and other equipment on customers' premises (including municipal corporations) leased to customers, but not including property held for sale.

Note A: The cost of setting or connecting such appliances or equipment on the premises of customers and the cost of resetting or removal shall not be charged to this account but to account 879, Customer Installations Expenses.

Note B: Do not include in this account any costs incurred in connection with merchandising, jobbing or contract work activities.

387. Other Equipment

This account shall include the cost installed of all other

distribution system equipment not provided for in the foregoing accounts, including street lighting equipment.

6. GENERAL PLANT

389. Land and Land Rights

This account shall include the cost of land and land rights used for gas plant purposes, the cost of which is not properly includible in other land and land rights accounts. (See gas plant instruction 313.7.)

390. Structures and Improvements

This account shall include the cost in place of structures and improvements used for gas plant purposes, the cost of which is not properly includible in other structures and improvements accounts. (See gas plant instruction 313.8.)

391. Office Furniture and Equipment

A. This account shall include the cost installed of all office furniture and equipment owned by the utility and devoted to gas service, and not permanently attached to buildings. Articles of slight value or short service life acquired subsequent to the commencement of operations shall be charged to the appropriate operating expense account and not to this account. (See note to gas plant instruction 313.3, par. (3).)

B. If the utility has equipment includible in this account at more than one location, separate records shall be maintained for each location.

ITEMS

1. Bookcases and shelves.
2. Desks, chairs, and desk equipment.
3. Drafting room equipment.
4. Electronic data processing equipment.
5. Filing, storage, and other cabinets.
6. Floor covering.
7. Library and library equipment.
8. Mechanical office equipment such as accounting machines, typewriters, etc.
9. Safes.
10. Showcases and equipment for display of merchandise.
11. Signs, display and advertising.
12. Tables.

392. Transportation Equipment

This account shall include the cost of transportation vehicles used for utility purposes.

ITEMS

1. Airplanes.

2. Automobiles.
3. Bicycles.
4. Electrical vehicles.
5. Motor trucks.
6. Motorcycles.
7. Repair cars or trucks.
8. Tractors and trailers.
9. Other transportation vehicles.

Note: Compressors, hoists, concrete mixers, etc., so mounted on a vehicle that they can be removed readily, thereby making the vehicle available for transportation of other material or equipment, shall be included in account 394, Tools, Shop, and Garage Equipment, and the vehicle shall be included in this account; minor incidental equipment, such as pumps for drying manholes or tool racks and boxes which interfere little with the use of the vehicle for other transportation, shall, together with the vehicle, be included in this account.

393. Stores Equipment

A. This account shall include the cost installed of equipment used for the receiving, shipping, handling, and storage of materials and supplies when not an integral part of the housing structure. (See note to gas plant instruction 313.3, par. (3).)

B. If the utility has equipment includible in this account at more than one location, separate records shall be maintained for each location.

ITEMS

1. Chain falls.
2. Counters.
3. Cranes (portable).
4. Elevating and stacking equipment (portable).
5. Hoists.
6. Lockers.
7. Scales.
8. Shelving.
9. Storage bins.
10. Trucks, hand and power driven.
11. Wheelbarrows.

394. Tools, Shop, and Garage Equipment

A. This account shall include the cost of tools, implements, and equipment used in construction, repair work, general shops and garages and not specifically provided for or includible in other accounts. (See note to gas plant instruction 313.3, par. (3).)

B. If the utility has equipment includible in this account at more than one location, separate records shall be maintained for each location.

C. The records shall be maintained in such manner as to show the items of garage equipment in a separate subdivision of this account.

ITEMS

1. Air compressors.
2. Anvils.
3. Automobile repair shop equipment.
4. Battery charging equipment.
5. Belts, shafts and countershafts.
6. Boilers.
7. Cable pulling equipment.
8. Concrete mixers.
9. Derricks.
10. Drill presses.
11. Electric equipment.
12. Engines.
13. Forges.
14. Foundations and settings specially constructed for equipment in this account and not expected to outlast the equipment for which provided.
15. Furnaces.
16. Gas producers.
17. Gasoline pumps, oil pumps, and storage tanks.
18. Greasing tools and equipment.
19. Hoists.
20. Ladders.
21. Lathes.
22. Machine tools.
23. Motor driven tools.
24. Motors.
25. Pipe threading and cutting tools.
26. Pneumatic tools.
27. Pumps.
28. Riveters.
29. Smithing equipment.
30. Tool racks.
31. Vises.
32. Welding apparatus.
33. Work benches.

Note: Office equipment, desks, chairs, etc., shall not be included herein but in account 391, Office Furniture and Equipment.

395. Laboratory Equipment

A. This account shall include the cost installed of laboratory equipment used for general laboratory purposes and not specially provided for or includible in other departmental or functional plant accounts. (See note to gas plant instruction 313.3, par. (3).)

B. If the utility has equipment includible in this account at more than one location, separate records shall be maintained for each location.

ITEMS

1. Balances and scales.
2. Barometers.
3. Calorimeters--bomb, flow, recording types, etc.
4. Electric furnaces.
5. Gas burning equipment.
6. Gauges.
7. Glassware, beakers, burettes, etc.
8. Humidity testing apparatus.
9. Laboratory hoods.
10. Laboratory tables and cabinets.
11. Meter provers.
12. Muffles.
13. Oil analysis apparatus.
14. Piping.
15. Specific gravity apparatus.
16. Standard bottles for meter prover testing.
17. Stills.
18. Sulphur and ammonia apparatus.
19. Tar analysis apparatus.
20. Thermometers--indicating and recording.
21. Any other item of equipment for testing gas, fuel, flue gas, water, residuals, etc.

Note: Office equipment, desks, chairs, etc., shall not be included herein but in account 391, Office Furniture and Equipment.

396. Power Operated Equipment

This account shall include the cost of power operated equipment used in construction or repair work exclusive of equipment includible in other accounts. Include, also, the tools and accessories acquired for use with such equipment and the vehicle on which such equipment is mounted.

ITEMS

1. Air compressors, including driving unit and vehicle.
2. Back filling machines.
3. Boring machines.
4. Bulldozers.
5. Cranes and hoists.
6. Diggers.
7. Engines.
8. Pile drivers.
9. Pipe cleaning machines.
10. Pipe coating or wrapping machines.
11. Tractors--crawler type.
12. Trenchers.
13. Other power operated equipment.

Note: It is intended that this account include only such large units as are generally self-propelled or mounted on moveable equipment.

397. Communication Equipment

This account shall include the cost installed of telephone, telegraph and wireless equipment for general use in connection with the utility's gas operations.

ITEMS

1. Carrier terminal equipment including repeaters, power supply equipment, transmitting and receiving sets.
2. Microwave equipment, including power supply equipment, transmitters, amplifiers, paraboloids, towers, reflectors, receiving equipment, etc.
3. Radio equipment, fixed and mobile, including antenna, power equipment, transmitters and receivers, and portable receiver-transmitter units.
4. Telephone equipment including switchboards, power and testing equipment, conductors, pole lines, etc.

398. Miscellaneous Equipment

This account shall include the cost of equipment, apparatus, etc., used and useful in gas operations, which is not includible in any other account. (See note to gas plant instruction 313.3 par. (3).)

ITEMS

1. Hospital and infirmary equipment.
2. Kitchen equipment.
3. Operator's cottage furnishings.
4. Radios.
5. Recreation equipment.

6. Restaurant equipment.
7. Soda fountains.
8. Other miscellaneous equipment.

Note: Miscellaneous equipment of the nature indicated above wherever practicable shall be assigned to the utility plant accounts on a functional basis.

399. Other Tangible Property

A. This account shall include the cost of tangible gas plant not provided for elsewhere.

B. A separate subdivision of this account shall be maintained for each class of property in which the utility has a relatively large investment, and records shall be kept so as to show separately the cost of each major item.

Net Income

1. UTILITY OPERATING INCOME

400. Operating Revenues

There shall be shown under this caption the total amount included in the gas operating revenue accounts provided herein.

401. Operation Expense

There shall be shown under this caption the total amount included in the gas operation expense accounts provided herein.

402. Maintenance Expense

There shall be shown under this caption the total amount included in the gas maintenance expense accounts provided herein.

402.1 Joint Expense

There shall be shown under this caption the total amount included in the gas joint expense accounts provided herein.

403. Depreciation Expense

A. This account shall include the amount of depreciation expense for all classes of depreciable gas plant in service and on the portion of depreciable common utility plant in service applicable to gas operations, except such depreciation expense as is chargeable to account 915, Costs and Expenses of Merchandising, Jobbing and Contract Work, and to clearing accounts.

B. The utility shall keep such records of property and property retirements as will reflect the service life of property which has been retired and aid in estimating probable service life by mortality, turnover, or other appropriate methods; and also such records as will reflect the percentage of salvage and cost of removal for property retired from each account, or subdivision thereof, for depreciable utility plant.

Note A: Depreciation expense applicable to property included in account 104, Gas Plant Leased to Others, shall be charged to account 413, Expenses of Gas Plant Leased to Others.

Note B: Depreciation expense applicable to transportation equipment, shop equipment, tools, work equipment, power operated equipment and other general equipment may be charged to clearing accounts as necessary in order to obtain a proper distribution of expenses between

construction and operation.

404.1 Amortization and Depletion of Producing Natural Gas Land and Land Rights

A. This account shall include charges for amortization and depletion of producing natural gas land and land rights. (See account 111.1, Accumulated Provision for Amortization and Depletion of Producing Natural Gas Land and Land Rights.)

B. The charges to this account shall be made in such manner as to distribute the cost of producing natural gas land and land rights over the period of their benefit to the utility, based upon the exhaustion of the natural gas deposits recoverable from such land and land rights.

404.2 Amortization of Underground Storage Land and Land Rights

A. This account shall include charges for amortization of land and land rights of underground storage projects for natural gas. (See account 111.2, Accumulated Provision for Amortization of Underground Storage Land and Land Rights.)

B. The charges to this account shall be made in such manner as to distribute the cost of amortizable land and land rights over the period of their benefit to the utility, and with respect to any land or land rights which include native gas in the storage reservoir, such amounts shall be amortized or depleted on the basis of production of such native gas after the volume of stored gas has been withdrawn from the reservoir.

404.3 Amortization of Other Limited-term Gas Plant

This account shall include amortization charges applicable to amounts included in the gas plant accounts and the portion applicable to gas operations of amounts included in common plant accounts for limited-term franchises, licenses, patent rights, limited-term interests in land, and expenditures on leased property where the service life of the improvements is terminable by action of the lease. The charges to this account shall be such as to distribute the book cost of each investment as evenly as may be over the period of its benefit to the utility. (See account 111.3, Accumulated Provision for Amortization of Other Gas Plant in Service.)

405. Amortization of Other Gas Plant

A. When authorized by the commission, this account shall include charges for amortization of intangible or other gas plant in service which does not have a definite or terminable life and which is not subject to charges for depreciation expense.

B. This account shall be supported in such detail as to show the amortization applicable to each investment being amortized, together

with the book cost of the investment and the period over which it is being written off.

406. Amortization of Gas Plant Acquisition Adjustments

This account shall be debited or credited, as the case may be, with amounts includible in operating expenses, pursuant to approval or order of the commission, for the purpose of providing for the extinguishment of the amounts in account 114, Gas Plant Acquisition Adjustments, and in the appropriate subdivision of account 118.1, Common Utility Plant. (See balance sheet account 114, Gas Plant Acquisition Adjustments, paragraph C.)

407.1 Amortization of Property Losses

This account shall be charged with amounts credited to account 182, Extraordinary Property Losses, when the commission has authorized the amount in the latter account to be amortized by charges to gas operating expenses.

407.2 Amortization of Conversion Expenses

This account shall be charged with amortization of amounts authorized by the commission to be included in account 186, Miscellaneous Deferred Debits, for expenses incurred in the conversion of distribution plant from manufactured gas service to natural gas service.

Special Instructions

Accounts 408.1 and 408.2

A. These accounts shall include the amounts of ad valorem, gross revenue or gross receipts taxes, State unemployment insurance, franchise taxes, Federal excise taxes, social security taxes, and all other taxes assessed by Federal, State, county, municipal, or other local governmental authorities, except Federal income taxes.

B. These accounts shall be charged in each accounting period with the amounts of taxes which are applicable thereto, with concurrent credits to account 236, Taxes Accrued, or account 165, Prepayments, as appropriate. When it is not possible to determine the exact amounts of taxes, the amounts shall be estimated and adjustments made in current accruals as the actual tax levies become known.

C. The charges to these accounts shall be made or supported so as to show the amount of each tax and the basis upon which each charge is made. In the case of a utility rendering more than one utility service, taxes of the kind includible in these accounts shall be assigned directly to the utility department the operation of which gave rise to the tax insofar as practicable. Where the tax is not attributable to a specific utility department, it shall be distributed among the utility departments or nonutility operations on an equitable basis, after

appropriate study to determine such basis.

Note A: Special assessments for street and similar improvements shall be included in the appropriate utility plant or nonutility property account.

Note B: Taxes specifically applicable to construction shall be included in the cost of construction.

Note C: Gasoline and other sales taxes shall be charged as far as practicable to the same account as the materials on which the tax is levied.

Note D: Social security and other forms of so-called payroll taxes shall be distributed to utility departments and to nonutility functions on a basis related to payroll. Amounts applicable to construction shall be charged to the appropriate plant account.

Note E: Interest on tax refunds or deficiencies shall not be included in this account but in account 419, Interest and Dividend Income, or 431, Other Interest Expense, as appropriate.

Note F: Taxes assumed by the utility on property leased from the others for use in utility operations shall be charged to the appropriate rent expense or clearing account.

Note G: Taxes characterized as franchise taxes levied by taxing authorities against the utility for the privilege of exercising its corporate franchise or carrying on its business in such corporate or organized capacity shall be included in this account.

Note H: Amounts payable annually or more frequently under the terms of franchises, shall be included in account 927, Franchise Requirements.

Note I: Taxes assumed by the utility on interest paid to holders of utility's bonds or other indebtedness in respect to income and other taxes levied against such income of security holders, shall be charged to account 431, Other Interest Expense.

408.1 Taxes Other Than Income Taxes, Utility Operating Income

This account shall include those taxes other than income taxes, which relate to utility operating income. This account shall be maintained so as to allow ready identification of the various classes of taxes relating to Utility Operating Income (by department), Utility Plant Leased to Others and Other Utility Operating Income.

408.2 Taxes Other Than Income Taxes, Other Income and Deductions

This account shall include those taxes other than income taxes, which relate to Other Income and Deductions.

409. Income Taxes

Special Instructions

Accounts 409.1, 409.2 and 409.3

A. These accounts shall include the amounts of Federal income properly accruable during the period covered by the income statement to meet the actual liability for such taxes. Concurrent credits for the tax accruals shall be made to account 236, Taxes Accrued, and as the exact amounts of taxes become known, the current tax accruals shall be adjusted by charges or credits to these accounts, unless such adjustments are properly includible in account 439, Adjustments to Retained Earnings, so that these accounts as nearly as can be ascertained shall include the actual taxes payable by the utility. (See general instruction 311.7(b).)

B. The accruals for income taxes shall be apportioned among utility departments and to Other Income and Deductions so that, as nearly as practicable, each tax shall be included in the expenses of the utility department or Other Income and Deductions, the income from which gave rise to the tax. The income tax effect of amounts recorded in account 439, Adjustments to Retained Earnings, shall be recorded in the account. The tax effect relating to Interest Charges shall be allocated between utility and nonutility operations. The basis for this allocation shall be the ratio of net investment in utility plant (including amounts in account 106, Completed Construction not Classified--Gas and account 107, Construction Work in Progress--Gas) to net investment in nonutility plant.

Note A: Taxes assumed by the utility on interest shall be charged to account 431, Other Interest Expense.

Note B: Interest on tax refunds or deficiencies shall not be included in this account but in account 419, Interest and Dividend Income, or account 431, Other Interest Expense, as appropriate.

409.1 Income Taxes, Utility Operating Income

This account shall include the amount of those Federal income taxes which relate to utility operating income. This account shall be maintained so as to allow ready identification of tax effects (both positive and negative) relating to Utility Operating Income (by departments), Utility Plant Leased to Others and Other Utility Operating Income.

409.2 Income Taxes, Other Income and Deductions

This account shall include the amount of those Federal income taxes (both positive and negative) which relate to Other Income and Deductions.

409.3 Income Taxes, Extraordinary Items

This account shall include the amount of those Federal income taxes (both positive and negative) which relate to Extraordinary Items.

Special Instructions

Accounts 410.1, 410.2, 411.1 and 411.2

A. Accounts 410.1 and 410.2 shall be debited, and Accumulated Deferred Income Taxes shall be credited, with amounts equal to any current deferrals of taxes on income or any allocations of deferred taxes originating in prior periods, as provided by the texts of accounts 190, 281, 282 and 283. There shall not be netted against entries required to be made to these accounts any credit amounts appropriately includible in account 411.1 or 411.2.

B. Accounts 411.1 and 411.2 shall be credited, and Accumulated Deferred Income Taxes shall be debited with amounts equal to any allocations of deferred taxes originating in prior periods or any current deferrals of taxes on income, as provided by the texts of accounts 190, 281, 282 and 283. There shall not be netted against entries required to be made to these accounts any debit amounts appropriately includible in account 410.1 or 410.2.

410.1 Provision for Deferred Income Taxes, Utility Operating Income

This account shall include the amounts of those deferrals of taxes and allocations of deferred taxes, which relate to Utility Operating Income (by department).

410.2 Provisions for Deferred Income Taxes, Other Income and Deductions

This account shall include the amounts of those deferrals of taxes and allocations of deferred taxes, which relate to Other Income and Deductions.

411.1 Provision for Deferred Income Taxes--Credit, Utility Operating Income

This account shall include the amounts of those allocations of deferred taxes and deferrals of taxes, credit, which relate to Utility Operating Income (by department).

411.2 Provision for Deferred Income Taxes--Credit, Other Income and Deductions

This account shall include the amounts of those allocations of deferred taxes and deferrals of taxes, credit, which relate to Other Income and Deductions.

Special Instructions

Accounts 411.4 and 411.5

A. These accounts shall be debited and account 255, Accumulated Deferred Investment Tax Credits shall be credited with the total amount of investment tax credits allowed on property defined in section 50 of the Internal Revenue Code of 1954 which the utility used in the calculation of reported current year's income taxes charged to accounts

409.1, Income Taxes, Utility Operating Income, and 409.2, Income Taxes, Other Income and Deductions, as appropriate, when the utility elects to defer such credits.

B. Account 411.4 shall be debited and account 420, Investment Tax Credits shall be credited with one-half (or such other portion as determined by the commission in the utility's most recent rate case) of the total amount of investment tax credits allowed on property defined in section 50 of the Internal Revenue Code of 1954 which the utility used in the calculation of reported current year's income taxes charged to account 409.1, Income Taxes, Utility Operating Income, when the utility's accounting does not provide for the deferral of such tax credits, and all benefits of the tax credits are to be recognized in the current income statement as realized.

C. When a utility has deferred investment tax credits and when such credits are to be applied as a reduction of the cost of service, account 411.4 shall be credited and account 255 shall be debited with a proportionate amount of such credits determined in relation to the book service life of the property to which they relate. If, however, the deferred tax credits are applied as a reduction of the rate base, account 420, Investment Tax Credits, shall be used in a similar manner. Deferred investment tax credits related to nonutility property shall be amortized by crediting account 411.5 and debiting account 255 with a proportionate amount as determined above.

411.4 Investment Tax Credit Adjustments, Utility Operations

This account shall include the amount of those investment tax credit adjustments related to property used in Utility Operations (by department).

411.5 Investment Tax Credit Adjustments, Nonutility Operations

This account shall include the amount of those investment tax credit adjustments related to property used in Nonutility Operations.

411.6 Gains from Disposition of Utility Plant

This account shall include, as approved by the commission, amounts relating to gains from the disposition of future use utility plant including amounts which were previously recorded in and transferred from account 105, Gas Plant Held for Future Use, under the provisions of paragraphs B, C, and D thereof. Income taxes relating to gains recorded in this account shall be recorded in account 409.1, Income Taxes, Utility Operating Income.

411.7 Losses from Disposition of Utility Plant

This account shall include, as approved by the commission, amounts relating to losses from the disposition of future use utility plant

including amounts which were previously recorded in and transferred from account 105, Gas Plant Held for Future Use, under the provisions of paragraphs B, C, and D thereof. Income taxes relating to losses recorded in this account shall be recorded in account 409.1, Income Taxes, Utility Operating Income.

411.8 Miscellaneous Adjustments of Income Taxes--Utility Operating Income

This account shall include adjustments of prior years Federal income tax related to utility operations. (See § 311.7.) This account shall also be used for other tax adjustments which the commission may authorize or direct to be recorded herein.

412. Revenues from Gas Plant Leased to Others

413. Expenses of Gas Plant Leased to Others

A. These accounts shall include respectively, revenues from gas property constituting a distinct operating unit or system leased by the utility to others, and which property is properly includible in account 104, Gas Plant Leased to Others, and the expenses attributed to such property.

B. The detail of expenses shall be kept or supported so as to show separately the following:

Operation.

Maintenance.

Depreciation.

Amortization.

Note: Related taxes shall be recorded in account 408.1, Taxes Other Than Income Taxes, Utility Operating Income, or account 409.1, Income Taxes, Utility Operating Income, as appropriate.

414. Other Utility Operating Income

A. This account shall include the revenues received and expenses incurred in connection with the operations of utility plant, the book cost of which is included in account 118.2, Other Utility Plant.

B. The expenses shall include every element of cost incurred in such operations, including depreciation, rents and insurance.

Note A: Related taxes shall be recorded in account 408.1, Taxes Other Than Income Taxes, Utility Operating Income, or account 409.1, Income Taxes, Utility Operating Income, as appropriate.

Note B: In the case of utility services for which systems of accounts are prescribed by this commission, such as electric, steam, etc., the appropriate accounts in such systems shall be used instead of this account.

2. OTHER INCOME

415. Revenues from Merchandising, Jobbing and Contract Work

416. Costs and Expenses of Merchandising, Jobbing and Contract Work

A. These accounts shall include respectively all revenues derived from the sale of merchandise and jobbing or contract work, including any profit or commission accruing to the utility on jobbing work performed by it as agent under contracts whereby it does jobbing work for another for a stipulated profit or commission and all expense incurred in such activities.

B. Records in support of these accounts shall be so kept as to permit ready summarization of revenues, costs and expenses by such major items as are feasible.

ITEMS

Account 415:

1. Revenues from sale of merchandise and from jobbing and contract work.

2. Discounts and allowances made in settlement of bills for merchandise and jobbing work.

Account 416:

Labor:

1. Canvassing and demonstrating appliances in homes and other places for the purpose of selling appliances.

2. Demonstrating and selling activities in sales rooms.

3. Installing appliances on customer premises where such work is done only for purchasers of appliances from the utility.

4. Installing wiring, pipe, or other property work on a jobbing or contract basis.

5. Preparing advertising materials for appliance sales purposes.

6. Receiving and handling customer orders for merchandise or for jobbing services.

7. Cleaning and tidying sales rooms.

8. Maintaining display counters and other equipment used in merchandising.

9. Arranging merchandise in sales rooms and decorating display windows.

10. Reconditioning repossessed appliances.

11. Bookkeeping and other clerical work in connection with merchandise and jobbing activities.

12. Supervising merchandise and jobbing operations.

Materials and Expenses:

Advertising in newspapers, periodicals, radio, television, etc.

Cost of merchandise sold and of materials used in jobbing work.

Stores expenses on merchandise and jobbing stocks.
Fees and expenses of advertising and commercial artists' agencies.
Printing booklets, dodgers, and other advertising data.
Premiums given as inducement to buy appliances.
Light, heat, and power.
Depreciation on equipment used primarily for merchandise and jobbing operations.

Rent of sales rooms or of equipment.
Transportation expense in delivery and pickup of appliances by utility's facilities or by others.

Stationery and office supplies and expenses.
Losses from uncollectible merchandise and jobbing accounts.
Note: Related taxes shall be recorded in account 408.2, Taxes Other Than Income Taxes, Other Income and Deductions, or account 409.2, Income Taxes, Other Income and Deductions, as appropriate.

417. Revenues from Nonutility Operations

417.1 Expenses of Nonutility Operations

A. These accounts shall include revenues and expenses applicable to operations which are nonutility in character but nevertheless constitute a distinct operating activity of the enterprise as a whole, such as the operation of an ice department or the operation of a servicing organization for furnishing supervision, management, engineering, and similar service to others.

B. The expenses shall include all elements of costs incurred in such operations, and the accounts shall be maintained so as to permit ready summarization as follows:

Operation.
Maintenance.
Rents.
Depreciation.
Amortization.

Note: Related taxes shall be recorded in account 408.2, Taxes Other Than Income Taxes, Other Income and Deductions, or account 409.2, Income Taxes, Other Income and Deductions, as appropriate.

418. Nonoperating Rental Income

A. This account shall include all rent revenues and related expenses of land, buildings, or other property included in account 121, Nonutility Property, which is not used in operations covered by accounts 417 or 417.1.

B. The expenses shall include all elements of costs incurred in the ownership and rental of property and the accounts shall be maintained so

as to permit ready summarization as follows:

Operation.

Maintenance.

Rents.

Depreciation.

Amortization.

Note: Related taxes shall be recorded in account 408.2, Taxes Other Than Income Taxes, Other Income and Deductions, or account 409.2, Income Taxes, Other Income and Deductions, as appropriate.

418.1 Equity in Earnings of Subsidiary Companies

This account shall include the utility's equity in the earnings or losses of subsidiary companies for the year.

419. Interest and Dividend Income

A. This account shall include interest revenues on securities, loans, notes, advances, special deposits, tax refunds and all other interest-bearing assets, and dividends on stocks of other companies, whether the securities on which the interest and dividends are received are carried as investments or included in sinking or other special fund accounts.

B. If any interest or dividends are required to be retained in a special fund and the fund is represented by a reserve, the amount of such accretion to the fund shall concurrently be credited to the appropriate reserve account and charged to account 436, Appropriations of Retained Earnings.

C. This account may include the pro rata amount necessary to extinguish (during the interval between the date of acquisition and the date of maturity) the difference between the cost to the utility and the face value of interest-bearing securities. Amounts thus credited or charged shall be concurrently included in the accounts in which the securities are carried.

D. Where significant in amount, expenses, excluding operating taxes and income taxes, applicable to security investments and to interest and dividend revenues thereon shall be charged hereto.

Note A: Interest accrued, the payment of which is not reasonably assured, dividends receivable which have not been declared or guaranteed, and interest or dividends upon reacquired securities issued or assumed by the utility shall not be credited to this account.

Note B: Related taxes shall be recorded in account 408.2, Taxes Other Than Income Taxes, Other Income and Deductions, or account 409.2, Income Taxes, Other Income and Deductions, as appropriate.

419.1 Allowance for Funds Used During Construction

This account shall include concurrent credits for allowance for funds used during construction based upon the net cost for the period of construction of borrowed funds used for construction purposes and a reasonable rate upon the utility's own funds when so used. (See gas plant instruction 313.3(a) (17).)

420. Investment Tax Credits

A. This account shall be credited with investment tax credit amounts determined in accordance with the following:

1. By amounts equal to the authorized debits to account 411.4, Investment Tax Credit Adjustments, Utility Operations, for investment tax credits used in calculating income taxes for the current year when the utility's accounting does not provide for the deferral of such credits.

2. By amounts equal to the debits to account 255, Accumulated Deferred Investment Tax Credits, for the amortization of the deferred tax credits over the book service life of the property to which the tax credits relate when such credits are to be applied as a reduction of the rate base.

421. Miscellaneous Nonoperating Income

This account shall include all revenue and expense items except taxes, properly includible in the income account and not provided for elsewhere. Related taxes shall be recorded in account 408.2, Taxes Other Than Income Taxes, Other Income and Deductions, or account 409.2, Income Taxes, Other Income and Deductions, as appropriate.

ITEMS

1. Gain on disposition of investments and reacquisition and resale or retirement of utility's debt securities and investments.

2. Profit on sale of timber. (See gas plant instruction 313.7, subdivision (c).)

3. Profits from operations of others realized by the utility under contracts.

421.1 Gain on Disposition of Property

This account shall be credited with the gain on the sale, conveyance, exchange or transfer of utility or other property to another. Amounts relating to gains on land and land rights held for future use recorded in account 105, Gas Plant Held for Future Use, will be accounted for as prescribed in paragraphs B, C, and D thereof. (See gas plant instructions 313.5(f), 313.7(e), and 313.10(e).) Income taxes on gains recorded in this account shall be recorded in account 409.2, Income Taxes, Other Income and Deductions.

3. OTHER INCOME DEDUCTIONS

421.2 Loss on Disposition of Property

This account shall be charged with the loss on the sale, conveyance, exchange, or transfer of utility or other property to another. Amounts relating to losses on land and land rights held for future use recorded in account 105, Gas Plant Held for Future Use, will be accounted for as prescribed in paragraph B, C, and D thereof. (See gas plant instructions 313.5(f), 313.7(e), and 313.10(e).) The reduction in income taxes attributable to losses recorded in this account shall be recorded in account 409.2, Income Taxes, Other Income and Deductions.

425. Miscellaneous Amortization

This account shall include amortization charges not includible in other accounts which are properly deductible in determining the income of the utility before interest charges. Charges includible herein, if significant in amount, must be in accordance with an orderly and systematic amortization program.

ITEMS

1. Amortization of utility plant acquisition adjustments, or of intangibles included in utility plant in service when not authorized to be included in utility operating expenses by the commission. (See account 114, Gas Plant Acquisition Adjustments.)

2. Amortization of amounts in account 182, Extraordinary Property Losses, when not authorized to be included in utility operating expenses by the commission.

3. Amortization of capital stock expenses when in accordance with a systematic amortization program.

426. Miscellaneous Income Deductions

This account shall include miscellaneous expense items which are nonoperating in nature but which are properly deductible before determining total income before interest charges. The account shall be maintained according to subaccounts shown below:

426.1 Donations

This account shall include all payments or donations for charitable, social or community welfare purposes.

426.2 Life Insurance

This account shall include all payments for life insurance of officers and employees where company is beneficiary (net premiums less increase in cash surrender value of policies). (See account 926.2, Employee Welfare Expenses--note A.)

426.3 Penalties

This account shall include payments by the company for penalties or fines for violation of any regulatory statutes by the company or its

officials.

426.4 Expenditures for Certain Civic, Political and Related Activities

This account shall include expenditures for the purpose of influencing public opinion with respect to the election or appointment of public officials, referenda, legislation, or ordinances (either with respect to the possible adoption of new referenda, legislation or ordinances or repeal or modification of existing referenda, legislation or ordinances) or approval, modification or revocation of franchises; or for the purpose of influencing the decisions of public officials or advancing the political objective of the utility, but shall not include such expenditures which are directly related to appearances before regulatory or other governmental bodies in connection with the reporting utility's existing or proposed operations.

426.5 Other Deductions

This account shall include other miscellaneous expenses which are nonoperating in nature, but which are properly deductible before determining total income before interest charges.

ITEMS

1. Loss relating to investments in securities written off or written down.
2. Loss on sale of investments.
3. Loss on reacquisition, resale or retirement of utility's debt securities.
4. Preliminary survey and investigation expenses related to abandoned projects, when not written off to the appropriate operating expense account.

4. INTEREST CHARGES

427. Interest on Long-term Debt

A. This account shall include the amount of interest on outstanding long-term debt issued or assumed by the utility, the liability for which is included in account 221, Bonds, or account 224, Other Long-term Debt.

B. This account shall be so kept or supported as to show the interest accruals on each class and series of long-term debt.

Note: This account shall not include interest on nominally issued or nominally outstanding long-term debt, including securities assumed.

428. Amortization of Debt Discount and Expense

A. This account shall include the amortization of unamortized debt discount and expense on outstanding long-term debt. Amounts charged to this account shall be credited concurrently to accounts 181, Unamortized Debt Expense, and 226, Unamortized Discount on Long-term Debt--Debit.

B. This account shall be so kept or supported as to show the debt

discount and expense on each class and series of long-term debt.

429. Amortization of Premium on Debt--Credit

A. This account shall include the amortization of unamortized net premium on outstanding long-term debt. Amounts credited to this account shall be charged concurrently to account 225, Unamortized Premium on Long-term Debt.

B. This account shall be so kept or supported as to show the premium on each class and series of long-term debt.

430. Interest on Debt to Associated Companies

A. This account shall include interest accrued on amounts included in account 223, Advances from Associated Companies, and on all other obligations to associated companies.

B. The records supporting the entries to this account shall be so kept as to show to whom the interest is to be paid, the period covered by the accrual, the rate of interest and the principal amount of the advances or other obligations on which the interest is accrued.

431. Other Interest Expense

This account shall include all interest charges not provided for elsewhere.

ITEMS

1. Interest on notes payable on demand or maturing one year or less from date and on open accounts, except notes and accounts with associated companies.

2. Interest on customers' deposits.

3. Interest on claims and judgments, tax assessments, and assessments for public improvements past due.

4. Income and other taxes levied upon bondholders of utility and assumed by it.

5. EXTRAORDINARY ITEMS

434. Extraordinary Income.

This account shall be credited with nontypical, non-customary, infrequently recurring gains, which would significantly distort the current year's income computed before extraordinary items, if reported other than as extraordinary items. Income tax relating to the amounts recorded in this account shall be recorded in account 409.3, Income Taxes, Extraordinary Items. (See general instruction 311.7(a).)

435. Extraordinary Deductions

This account shall be debited with nontypical, non-customary, infrequently recurring losses, which would significantly distort the current year's income computed before extraordinary items, if reported other than as extraordinary items. Income tax relating to the amounts

recorded in this account shall be recorded in account 409.3, Income Taxes, Extraordinary Items. (See general instruction 311.7(a).)

RETAINED EARNINGS ACCOUNT

433. Balance Transferred from Income

436. Appropriations of Retained Earnings

437. Dividends Declared--Preferred Stock

438. Dividends Declared--Common Stock

439. Adjustments to Retained Earnings

This group of accounts (433 and 436 to 439), in combination, is designed to show the net changes in account 216, Unappropriated Retained Earnings, during the accounting period. (See unappropriated retained earnings instruction 314.1).

433. Balance Transferred from Income

This account shall include the net credit or debit transferred from income for the year.

436. Appropriations of Retained Earnings

This account shall include appropriations of retained earnings.

ITEMS

1. Appropriations required under terms of mortgages, orders of courts, contracts, or other agreements.

2. Appropriations required by action of regulatory authorities.

3. Other appropriations made at option of utility for specific purposes.

437. Dividends Declared--Preferred Stock

438. Dividends Declared--Common Stock

A. These accounts shall include amounts declared payable out of retained earnings as dividends on actually outstanding capital stock issued by the utility.

B. Dividends shall be segregated for each class and series of capital stock as to those payable in cash, stock and other forms. If not payable in cash, the medium of payment shall be described with sufficient particularity to identify it.

439. Adjustments to Retained Earnings

A. This account shall include significant nonrecurring transactions relating to prior periods. Other than transactions of capital stock as specified in paragraph B below, all entries to this account must receive prior commission approval. These transactions are limited to those adjustments which (1) can be specifically identified with and related to the business activities of particular prior periods, and (2) are not attributable to economic events occurring subsequent to the date of the financial statements for the prior period, and (3) depend primarily on

determinations by persons other than the management, and (4) were not susceptible of reasonable estimation prior to such determination. This account shall also include the related income tax effects on items included herein. All items included in this account shall be sufficiently described in the entries relating thereto as to permit ready analysis.

B. Adjustments, charges or credits due to losses on reacquisition, resale or retirements of the company's own capital stock shall be included in this account. (See account 210, Gain on Resale or Cancellation of Reacquired Capital Stock, for the treatment of gains.)

ITEMS

1. Significant nonrecurring adjustments or settlements of income taxes.
2. Significant amounts resulting from litigation or similar claims.
3. Significant amounts relating to adjustments or settlements of utility revenue under rate processes.
4. Significant adjustments to plant in service, depreciation and amortization as a result of commission direction.
5. Write-off of unamortized capital stock expense.

1. SALES OF GAS

480. Residential Sales
481. Commercial and Industrial Sales
482. Other Sales to Public Authorities
483. Sales for Resale
484. Interdepartmental Sales

2. OTHER OPERATING REVENUES

487. Forfeited Discounts
488. Miscellaneous Service Revenues
489. Revenues from Transportation of Gas of Others
490. Sales of Products Extracted from Natural Gas
491. Revenues from Natural Gas Processed by Others
492. Incidental Gasoline and Oil Sales
493. Rent from Gas Property
494. Interdepartmental Rents
495. Other Gas Revenues

1. SALES OF GAS

480. Residential Sales

A. This account shall include the net billing for gas supplied for residential or domestic purposes and to religious bodies.

B. Records shall be maintained so that the quantity of gas sold and the revenue received under each rate schedule shall be readily

available.

Note: When gas supplied through a single meter is used for both residential and commercial purposes, the total revenue shall be included in this account or account 481, Commercial and Industrial Sales, according to the rate schedule which is applied. If the same rate schedules are applicable to both residential and commercial service, classification shall be according to principal use.

481. Commercial and Industrial Sales

A. This account shall include the net billing for gas supplied to commercial and industrial customers.

B. Records shall be maintained so that the quantity of gas sold and revenue received under each rate schedule shall be readily available. Records supporting the entries to this account shall be so maintained that the quantity of gas sold and the charges made therefor for each customer for each month or other appropriate billing period are readily available.

Note: When gas supplied through a single meter is used for both commercial and residential purposes, the total revenue shall be included in this account or in account 480, Residential Sales, according to the rate schedule which is applied. If the same rate schedules are applicable to both residential and commercial service, classification shall be according to principal use.

482. Other Sales to Public Authorities

A. This account shall include the net billing for gas supplied to municipalities or divisions or agencies of federal or state governments, under special contracts or agreements or service classifications, applicable only to public authorities, for general governmental and institutional purposes, except any revenues under rate schedules the revenues from which are includible in account 481 or 483, and except any revenues from gas used for purposes such as power plant fuel for publicly owned electric systems, manufacturing processes of arsenals, etc., and other major uses of gas which appropriately may be classified in account 481, Commercial and Industrial Sales.

B. Records shall be maintained so that the quantity of gas sold and the revenue received from each customer and from each major special contract shall be readily available.

483. Sales for Resale

A. This account shall include the net billing for gas supplied to other gas utilities or to public authorities for resale purposes.

B. Records shall be maintained so that there shall be readily available the revenues for each customer under each revenue schedule and

the billing determinants, as applicable, i.e., volume of gas (actual and billing), contract demand, maximum actual demand, billing demand, and b.t.u. adjustment factor.

Note: Revenues from gas supplied to other public utilities for use by them and not for distribution, shall be included in account 481, Commercial and Industrial Sales, unless supplied under the same contract as and not readily separable from revenues includible in this account.

484. Interdepartmental Sales

A. This account shall include amounts charged by the gas department at tariff or other specified rates for gas supplied by it to other utility departments.

B. Records shall be maintained so that the quantity of gas supplied each other department and the charge made therefor shall be readily available.

2. OTHER OPERATING REVENUES

487. Forfeited Discounts

This account shall include the amounts which the utility allows its customers on condition that they pay their gas bills on or before a specified date and which are forfeited by the customers because of failure to pay within the specified time.

488. Miscellaneous Service Revenues

This account shall include revenues from all miscellaneous services and charges billed to customers which are not specifically provided for in other accounts.

ITEMS

1. Fees for changing, connecting, or disconnecting service.
2. Profit on maintenance of appliances, piping, gas firing and other utilization facilities, or other installation on customers' premises.
3. Net credit or debit (cost less net salvage and less payment from customers) on closing work orders for plant installed for temporary service of less than one year. (See account 185, Temporary Facilities.)
4. Recovery of expenses in connection with gas diversion cases. (Billing for the gas consumed shall be included in the appropriate gas revenue account.)
5. Services performed for other gas companies for testing and adjusting meters, changing charts, etc.

489. Revenues from Transportation of Gas of Others

This account shall include revenues from transporting gas for other companies through the production, transmission, and distribution lines, or compressor stations of the utility.

490. Sales of Products Extracted from Natural Gas

A. This account shall include revenues from sales of gasoline, butane, propane, and other products extracted from natural gas, net of allowances, adjustments, and discounts, including sales of similar products purchased for resale.

B. Records shall be maintained so that the quantity, sales price, and revenues for each type of product sold to each purchaser shall be readily available.

491. Revenues from Natural Gas Processed by Others

A. This account shall include revenues from royalties and permits, or other bases of settlement, for permission granted others to remove products from natural gas of the utility.

B. The records supporting this account shall be so maintained that full information concerning determination of the revenues will be readily available concerning each processor of gas of the utility, including as applicable:

- (1) the mcf of gas and appropriate average b.t.u. content thereof per cubic foot delivered to such other party for processing,
- (2) the mcf of gas and approximate average b.t.u. content thereof per cubic foot of gas received back from the processor,
- (3) the field, general production area, or other source of the gas processed,
- (4) mcf of gas used for processing fuel, etc., which is chargeable to the utility,
- (5) total gallons of each product recovered by the processor and the utility's share thereof,
- (6) the revenues accruing to the utility, and
- (7) the basis of determination of the revenues accruing to the utility.

Such records shall be maintained even though no revenues are derived from the processor.

492. Incidental Gasoline and Oil Sales

This account shall include revenues from natural gas gasoline produced direct from gas wells or recovered from drips or obtained in connection with purification or dehydration processes, and revenues from oil obtained from wells which produce oil and gas, the investment in which is carried in account 330, Producing Gas Wells.

493. Rent from Gas Property

A. This account shall include rents received for the use by others of land, buildings, and other property devoted to gas operations by the utility.

B. When property owned by the utility is operated jointly with others

under a definite arrangement for sharing the actual expenses among the parties to the arrangement, any amount received by the utility for interest or return or in reimbursement of taxes or depreciation on the property shall be credited to this account. (See operating expense instruction 317.5.)

Note: Do not include rent from property constituting an operating unit or system in this account. (See account 412, Revenues from Gas Plant Leased to Others, and income account instruction 315.3.)

494. Interdepartmental Rents

This account shall include rents credited to the gas department on account of rental charges made against other departments (electric, water, etc.) of the utility. In the case of property operated under a definite arrangement to allocate the costs among the departments using the property, any reimbursement to the gas department for interest or return and depreciation and taxes shall be credited to this account.

495. Other Gas Revenues

This account shall include revenues derived from gas operations not includible in any of the foregoing accounts.

ITEMS

1. Compensation for minor or incidental services provided for others such as customer billing, engineering, etc.
2. Profit or loss on sale of materials and supplies not ordinarily purchased for resale and not handled through merchandising and jobbing accounts.
3. Sales of steam, water, or electricity, including sales or transfers to other departments of the utility.
4. Service charges for storing gas of others.
5. Miscellaneous royalties received.
6. Revenues from dehydration and other processing of gas of others, except products extraction where products are received as compensation and sales of such are includible in account 490, Sales of Products Extracted from Natural Gas, and except compression of gas of others, revenues from which are includible in account 489, Revenues from Transportation of Gas of Others.
7. Include in a separate subaccount revenues in payment for rights and/or benefits received from others which are realized through research and development ventures.

1. PRODUCTION EXPENSES

A. MANUFACTURED GAS PRODUCTION EXPENSES

A 1. Steam Production

Operation

700. Operation Supervision and Engineering

This account shall include the cost of labor and expenses incurred in the general supervision and direction of the operation of steam production. Direct supervision of specific activities shall be charged to the appropriate account. (See Part 317 Instruction--Operating Expense Instruction ò 317.1.)

Note: The cost of fuel analyses shall be charged to account 150.152, Fuel Stock Expenses Undistributed.

701. Operation Labor

This account shall include the cost of labor used in boiler rooms and elsewhere about the premises engaged in production of steam or

assignable to the production of steam.

ITEMS

1. Blowing flues.
2. Cleaning boilers.
3. Handling coal, coke and breeze from place of storage to boilers.
4. Janitorial, messenger, watchman and similar services.
5. Operating boilers.
6. Operating elevators.
7. Pulverizing coal.
8. Pumping tar from storage tank to boilers.
9. Removing ashes.
10. Testing steam meters, gauges and other instruments.

702. Boiler Fuel

A. This account shall include the cost of coal, oil, gas or other fuel used in the production of steam, including applicable amounts of stock expenses. It shall also include the net cost of, or the net amount realized from, the disposal of ashes.

B. Records shall be maintained to show the quantity and cost of each type of fuel used.

Note: The cost of fuel, except gas, and related fuel stock expenses, shall be charged initially to appropriate fuel accounts carried under accounts 150.151, Fuel Stock, and 150.152, Fuel Stock Expenses Undistributed, and cleared to this account on the basis of fuel used, See accounts 150.151 and 150.152 for basis of fuel costs and includible items of fuel stock expenses.

703. Miscellaneous Steam Expenses

This account shall include the cost of material used and expenses incurred in the production of steam, not includible in the foregoing accounts.

ITEMS

1. Boiler compounds.
2. Building service expenses.
3. Chemicals.
4. Communication service.
5. Lubricants.
6. Miscellaneous supplies.
7. Pumping supplies and expenses.
8. Purification supplies and expenses.
9. Tools, hand.
10. Waste.
11. Water purchased.

12. Research and development expenses.

704. Steam Transferred--Credit

A. This account shall include such portion of the cost of producing steam as is charged to other gas operating expense accounts, or to others or to a coordinate department under a joint facility arrangement.

B. The records supporting the entries to this account shall be so kept that the utility can furnish readily an explanation of the bases of the credits to this account and the amounts charged to (1) other gas accounts, (2) other utility departments, and (3) outside parties under a joint facility arrangement. The records shall show, likewise, the amounts of steam production operation and steam production maintenance expenses, respectively, chargeable to each of the foregoing. (See operating expense instruction 317.5, subd. (b).)

Note A: If the utility produces gas by a single process at only one plant, credits need not be made to this account for the cost of steam used in such gas production facility.

Note B: Where steam is produced by waste heat boilers, and such steam becomes part of the general plant supply, this account should be charged and the steam expense account in the appropriate functional group of accounts (water gas production, etc.) credited with the value of such steam. However, if the steam so produced is used in the same functional operation as that through which derived, such entries need not be made.

MAINTENANCE

705. Maintenance Supervision and Engineering

This account shall include the cost of labor and expenses incurred in the general supervision and direction of maintenance of steam production facilities. Direct field supervision of specific jobs shall be charged to the appropriate maintenance accounts. (See operating expense instruction 317.1.)

706. Maintenance of Structures

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of structures and improvements used in steam production operations, the book cost of which is includible in account 305, Structures and Improvements. (See operating expense instruction 317.2.)

707. Maintenance of Boiler Plant Equipment

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of equipment used in steam production, the book cost of which is includible in account 306, Boiler Plant Equipment. (See operating expense instruction 317.2.)

708. Maintenance of Other Steam Production Plant

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of equipment used in steam production operations, the book cost of which is includible in account 314, Coal, Coke, and Ash Handling Equipment, or account 320, Other Equipment. (See operating expense instruction 317.2.)

A 2. Manufactured Gas Production Operation

710. Operation Supervision and Engineering

This account shall include the cost of labor and expenses incurred in the general supervision and direction of the operation of manufactured gas stations. Direct supervision of specific activities such as steam production and power operations, water gas generation, etc., shall be charged to the appropriate account. (See operating expense instruction 317.1.)

Note: The cost of fuel analyses shall be charged to account 150.152, Fuel Stock Expenses Undistributed.

Production Labor and Expenses

711. Steam Expenses

A. This account shall include the cost of steam used in manufactured gas production. This includes the cost of steam transferred from the gas department's own supply and charges for steam transferred from others or from coordinate departments under joint facility arrangements. (See account 704, Steam Transferred--Credit.)

B. This account shall be so kept as to show separately for each source of steam the point of delivery, the quantity, the charges therefore, and the bases of such charges.

712. Other Power Expenses

This account shall include the cost of electricity or other power, except steam, used in manufactured gas operation. This includes the cost of power purchased, the operation cost of electricity or other power, such as compressed air, produced by the gas department and charges from others or from coordinate departments for power produced under joint facility arrangements.

715. Water Gas Generating Expenses

This account shall include the cost of labor used and expenses incurred in the operation of water gas sets exclusive of the cost of fuel and oil for water gas production.

ITEMS

Labor:

1. Supervising.
2. Work of the following character in connection with the operation of

water gas sets (excepting the waste heat boiler and auxiliaries):

- a. Inspecting, testing, clinkering, lighting and starting up.
 - b. Controlling fire and heats with fuel charges, barring and rodding fires, operating grates and jackets, taking stains, observing pyrometers, pressures, seal pot water flow and stack gases, regulating input materials such as coke, oil, natural gas, steam and air.
 - c. Making required flow rate and operating cycle changes.
 - d. Cleaning and removing ashes, carbon, and sediment from the set and connections, the wash box, seal pot, oil spray, duct pockets, bootlegs, and collectors, and cleaning and reluting producer set doors.
 - e. Operating, cleaning and lubricating fuel charging lorries, blowers, valves, automatic operators, and grates, together with their instruments, gauges and controls, also the ash belts.
3. Operating, cleaning and lubricating auxiliary equipment, such as hydraulic pumps, circulating water pumps, oil pumps from storage to sets, steam accumulators and regulators and reducers on natural gas for reforming, exhausters, revivifying air blowers, and purifier exhausters.
4. Handling fuel from storage into bins with conveyors.
5. Removing and disposing of ashes, carbon, sediment, and other waste material.
6. Cleaning of generator and exhauster houses, including janitorial and similar services.

Materials and Expenses:

7. Packing, waste, lubricants, etc.
8. Small hand tools.
9. Building service, communication service, transportation.

716. Oil Gas Generating Expenses

This account shall include the cost of labor used and expenses incurred in the operation of equipment for the production of oil gas exclusive of cost of the oil.

ITEMS

Labor:

1. Supervising.
2. Cleaning, firing and operating oil gas machines.
3. Handling oil from place of storage to oil gas sets.
4. Measuring oil.
5. Removing and disposing of carbon deposits, and other cleaning and incidental labor.

Materials and Expenses:

6. Packing, waste, lubricants, etc.
7. Small hand tools.

8. Building service, communication service, transportation.

717. Liquefied Petroleum Gas Expenses

This account shall include the cost of labor used and expenses incurred in the operation of equipment used for vaporizing petroleum derivatives such as propane, butane or gasoline exclusive of cost of the materials vaporized or used for fuel in the vaporizing process.

ITEMS

Labor:

1. Supervising.
2. Operating, cleaning and lubricating liquid petroleum vaporizers and injectors.
3. Taking pressures and temperatures, and reading gauges on storage tanks.
4. Inspecting and testing equipment and setting and adjusting controls and regulators.
5. Watching pressure gauges, maintaining pressures and relieving excess pressures through lines.
6. Repressuring storage tanks.

Materials and Expenses:

7. Packing, waste, lubricants, etc.
8. Small hand tools.
9. Building service, communication service, transportation.

718. Other Process Production Expenses

This account shall include the cost of labor used and expenses incurred in operating equipment used for the production of gas by processes not provided for in the foregoing accounts.

Gas Fuels

721. Water Gas Generator Fuel

A. This account shall include the cost of fuel used in making water gas, including applicable amounts of fuel stock expenses. It shall also include the net cost of, or net proceeds from, the disposal of ashes.

B. Records shall be kept to show the quantity and cost of each type of fuel used.

Note: The cost of fuel and related fuel stock expenses shall be charged initially to the appropriate fuel account carried under accounts 150.151, Fuel Stock, and 150.152, Fuel Stock Expenses Undistributed, and cleared to this account on the basis of fuel used. See accounts 150.151 and 150.152 for the basis of fuel costs and includible items of fuel stock expenses.

722. Fuel for Oil Gas

This account shall include the cost of fuel for the manufacture of gas

by the oil gas process.

723. Fuel for Liquefied Petroleum Gas Process

This account shall include the cost of fuel for vaporization of liquefied petroleum gas and for the compression of air in liquefied petroleum gas process.

724. Other Gas Fuels

This account shall include the cost of fuel for the manufacture of gas by processes not provided for in the above fuel accounts.

Gas Raw Materials

726. Oil for Water Gas

A. This account shall include the cost of oil used in carbureting water gas, including applicable amounts of fuel stock expenses.

B. Records shall be kept to show the type, quantity, and cost of oil used.

Note: The cost of oil and related fuel stock expenses shall be charged initially to the appropriate account carried under accounts 150.151, Fuel Stock, and 150.152, Fuel Stock Expenses Undistributed, and cleared to this account on the basis of oil used. See accounts 150.151 and 150.152 for basis of costs and includible items of fuel stock expenses.

727. Oil for Oil Gas

A. This account shall include the cost of oil used in making oil gas, including applicable amounts of fuel stock expenses.

B. Records shall be kept to show the type, quantity, and cost of oil used.

Note: The cost of oil and related fuel stock expenses shall be charged initially to the appropriate raw materials account carried under accounts 150.151, Fuel Stock, and 150.152, Fuel Stock Expenses Undistributed, and cleared to this account on the basis of oil used. See accounts 150.151 and 150.152 for basis of costs and includible items of fuel stock expenses.

728. Liquefied Petroleum Gas

A. This account shall include the cost of liquefied petroleum gas, such as propane, butane, or gasoline, vaporized for mixing with other gases or for sale unmixed, including applicable amounts of fuel stock expenses.

B. Records shall be kept to show the type, quantity, and cost of liquefied petroleum gas.

Note: The cost of liquefied petroleum gas and related fuel stock expenses shall be charged initially to the appropriate account under accounts 150.151, Fuel Stock, and 150.152, Fuel Stock Expenses Undistributed, and cleared to this account on the basis of liquefied

petroleum gas used. See accounts 150.151 and 150.152 for basis of costs and includible items of fuel stock expenses.

729. Raw Materials for Other Gas Processes

A. This account shall include the cost of raw materials used in the production of manufactured gas by any process not provided for by the foregoing accounts including the production of coal gas by use of retorts, including applicable amounts of fuel stock expenses.

B. Records shall be kept to show the type, quantity, and cost of each raw material used, comparable to the accounting specified in the foregoing accounts for specified types of gas processes.

Note: The cost of raw materials and fuel stock expenses shall be charged initially to the appropriate account carried under accounts 150.151, Fuel Stock, and 150.152, Fuel Stock Expenses Undistributed, and cleared to this account on the basis of raw materials used. See accounts 150.151 and 150.152 for basis of raw materials cost and includible items of raw materials stock expenses.

Other Operation Expenses

730. Residuals Expenses

A. This account shall include the cost of labor, materials used and expenses incurred including uncollectible accounts in obtaining, handling, preparing, refining, and marketing residuals produced in manufactured gas production processes.

B. Divisions of this account shall be maintained for each of the principal types of expenses chargeable hereto and for each residual or by-product carried in account 731, Residuals Produced--Credit.

731. Residuals Produced--Credit

A. This account shall be credited and the appropriate subdivision of account 150.153, Residuals, debited monthly with the estimated value of residuals obtained in connection with the production of manufactured gas, whether intended for sale or for use in operations.

B. If the net amount realized from the sale of residuals is greater or less than the amount at which they were originally credited hereto, an adjusting entry shall be made crediting or debiting this account and charging or crediting the appropriate subdivisions of account 150.153, Residuals, with the difference.

732. Purification Expenses

This account shall include the cost of labor, materials used and expenses incurred in operating purification equipment and apparatus used for conditioning manufactured gas.

ITEMS

Labor:

1. Supervising.
2. Operating conveyors, condensers, coolers, tar extractors and precipitators, shaving scrubbers and naphthalene and light oil scrubbers.
3. Emptying, rearranging, shifting, cleaning, purging, and refilling purifier boxes.
4. Removing spent oxide to refuse pile.
5. Revivifying oxide.
6. Oiling dip sheets of purifier boxes.
7. Inspecting, testing, controlling adjustments, and taking stains.
8. Cleaning and lubricating purification equipment.

Materials and Expenses:

9. Iron oxide.
10. Unslacked lime.
11. Shavings.
12. Soda ash for liquid purifiers.
13. Wash oil for naphthalene scrubber.
14. Sulphuric acid.

733. Gas Mixing Expenses

This account shall include the cost of labor, materials used and expenses incurred in operating equipment for mixing natural and manufactured gas, or vaporized liquefied petroleum gases for delivery to the distribution system.

ITEMS

Labor:

1. Supervising.
2. Mixing enrichment gas and other gases or air, including mixing of liquid petroleum gas with air in a liquid petroleum air gas plant, and operation of air jetting equipment and controls.
3. Operating, cleaning and lubricating of cleaners, reducers, calorimeters, calorimixers, appliances and mixing apparatus with their related recorders, gauges, valves and controls, and gravimeters.
4. Inspecting, testing and adjusting mixing equipment.
5. Reading instruments and gauges, changing charts, and recording instrument and gauge readings.

Materials and Expenses:

6. Packing, waste, lubricants, etc.
7. Small hand tools.
8. Building service, communication service, transportation.

734. Duplicate Charges--Credit

This account shall include concurrent credits for charges which are

made to manufactured gas production operating expenses for manufactured gas not entering common system supply, steam or electricity used for which there is no direct money outlay.

Note: For manufactured gas used from the common system supply, concurrent credits shall be made to account 812, Gas Used for Other Utility Operations--Credit.

735. Miscellaneous Production Expenses

This account shall include the cost of labor, materials used and expenses incurred in manufactured gas production operations not includible in any of the foregoing accounts.

ITEMS

Labor:

1. Supervising.
 2. Cleaning gas works yard of coke dust and other waste materials.
 3. Humidifying gas or oil fogging gas at the production plant.
 4. Cutting grass and care of the grounds around the gas works.
 5. Clearing gas works yard of snow.
 6. Janitor service and messenger service.
 7. Operating elevators and other conveyances for general use at the gas works.
 8. General clerical and stenographic work at gas works.
 9. Guarding and patrolling plant and yard.
 10. Testing plant instruments not elsewhere provided for.
 11. Laboratory labor, except that chargeable to other accounts.
 12. Reading manufactured gas meters, and calculating and recording hourly volumes produced.
 13. Pumping drips (water) at plant (not provided for elsewhere).
 14. Odorizing manufactured gas.
 15. Operating, cleaning, and lubricating of air compressors with their tanks, instruments, meters, gauges, and controls when used to supply compressed air into the plant's air system.
 16. Operating effluent water treatment systems, including chemical treatment ozonation, filter, and related equipment, including treatment of carbon and residual sludge, and removing spent oxide, and spent filtering materials.
 17. Pumping water for cooling and condensing.
 18. Cleaning filters and other operating duties of water system.
- Materials and Expenses:
19. Building service, communication service, transportation.
 20. First aid supplies and safety equipment.
 21. Office supplies, printing and stationery.

- 22. Meals, traveling and incidental expenses.
- 23. Fuel for heating plant, water for fire protection or general use, and similar items.
- 24. Lubricants, packing, waste, etc.
- 25. Odorizing chemicals.
- 26. Hand tools, drills, saw blades, files, etc.
- 27. Fire protection supplies.
- 28. Fogging oils, alcohol, etc.
- 29. Chemicals, filter materials, etc. and payments to others for disposal of plant effluents and waste.
- 30. Chemicals for water treatment.
- 31. Research and development expenses.

736. Rents

This account shall include rents for property of others used, occupied or operated in connection with manufactured gas production operations. (See operating expense instruction 317.3.)

Maintenance

740. Maintenance Supervision and Engineering

This account shall include the cost of labor and expenses incurred in the general supervision and direction of maintenance of manufactured gas production facilities. Direct field supervision of specific jobs shall be charged to the appropriate maintenance accounts. (See operating expense instruction 317.1.)

741. Maintenance of Structures

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of structures, the book cost of which is includible in account 305, Structures and Improvements. (See operating expense instruction 317.2.)

742. Maintenance of Production Equipment

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of equipment for the production of manufactured gas, the book cost of which is included in accounts 306 to 320, inclusive, except such equipment as is used for the production of steam, the maintenance of which is includible in accounts 707, Maintenance of Boiler Plant Equipment, and 708, Maintenance of Other Steam Production Plant. (See operating expense instruction 317.2.)

Joint Expenses

743.1 Joint Expenses--Debit

A. This account shall include amounts for the cost of operation and maintenance payable by the gas department to others, or to a coordinate department, for joint facilities used, occupied or operated in

connection with the production of manufactured gas. (See operating expense instruction 317.5.)

B. The records supporting the entries to this account shall be so kept that the utility can furnish a complete explanation of the debits to this account, including the following:

- (1) Charges from others
- (2) Charges from coordinate departments

743.2 Joint Expenses--Credit

A. This account shall include such portion of the cost of operating and maintaining joint facilities operated by the gas department in connection with the production of manufactured gas as is charged to others or to a coordinate department. (See operating expense instruction 317.5.)

B. The records supporting the entries to this account shall be so kept that the utility can furnish a complete explanation of the credits to this account, including the following:

- (1) Charges to others
- (2) Charges to coordinate departments

B. Natural Gas Production Expenses

Natural Gas Production and Gathering Operation

750. Operation Supervision and Engineering

This account shall include the cost of labor and expenses incurred in the general supervision and direction of the operation of production and gathering systems. Direct supervision of specific activities such as turning on and shutting off wells, operating measuring and regulating stations, etc., shall be charged to the appropriate account. (See operating expense instruction 317.1.)

ITEMS

1. Supervision. (See operating expense instruction 317.1.)
2. Gas depletion and gas reserve activities.
3. Geological activities in connection with gas production.
4. Rights-of-way office activities and supervision, not in connection with construction or retirement work, or storage.

751. Production Maps and Records

This account shall include the cost of labor, materials used and expenses incurred in the preparation and maintenance of production maps and records.

ITEMS

Labor:

With respect to production maps:

1. Supervising.

2. Preparing farm maps, field inventory maps, well location plats, and other maps used in connection with natural gas production and gathering operations.

3. Posting changes and making corrections of maps.

4. Maintaining files of maps and tracings.

5. Surveying deeds, leases, rights-of-way, well locations, etc. , for map revisions.

6. Reproducing maps (blueprints, photostats, etc.)

With respect to land records:

7. Supervising.

8. Abstracting titles to date for extension and renewal of leases.

9. Adjusting land and well rentals.

10. Checking free gas rights.

11. Maintaining land and lease records.

12. Delivering rental and royalty checks.

13. Assigning, pooling, merging, renewing, and extending leases.

14. Patrolling land.

15. Preparing expiration calendars.

16. Replacing leases (not involving additional consideration).

17. Transferring payees.

Materials and Expenses:

18. Blueprints, photostats, etc.

19. Drafting materials and supplies.

20. Surveying materials and supplies.

21. Employee transportation and travel expenses.

22. Freight, express, parcel post, trucking, and other transportation.

23. Janitor and washroom supplies, etc.

24. Office supplies, stationery and printed forms.

25. Utility services: light, water, and telephone.

752. Gas Wells Expenses

This account shall include the cost of labor, materials used and expenses incurred in operating producing gas wells.

ITEMS

Labor:

1. Supervising.

2. Testing, bailing, swabbing, blowing and gauging producing gas wells.

3. Cleaning off old well locations.

4. Painting signs, etc.

5. Minor upkeep of well roads and fences, etc.

6. Turning wells off and on.

7. Pumping wells.

Materials and Expenses:

8. Gas, gasoline, and oil used in pumping, bailing, heating and swabbing.

9. Lumber, nails, and other materials used for upkeep of fences, making signs, etc.

10. Materials for upkeep of well roads, etc.

11. Well swabs.

12. Employees' transportation and travel expenses.

13. Freight, express, parcel post, trucking and other transportation.

14. Transportation: company and rented vehicles.

753. Field Lines Expenses

This account shall include the cost of labor, materials used and expenses incurred in operating field lines.

ITEMS

Labor:

1. Supervising.

2. Walking or patrolling lines.

3. Attending valves, lubricating valves and other equipment, blowing and cleaning lines and drips, draining water from lines, operating and cleaning scrubbers, thawing freezes.

4. Taking line pressures, changing pressure charts, operating alarm gauges.

5. Building and repairing gate boxes, foot bridges, stiles, tool boxes, etc. , used in line operations, erecting line markers and warning signs, repairing old line roads.

6. Cleaning debris, cutting grass and weeds on rights-of-way.

7. Inspecting and testing not specifically to determine necessity for repairs.

8. Protecting utility property during work by others.

9. Standby time of emergency crews, responding to fire calls, etc.

10. Locating valve boxes or drip riser boxes.

11. Cleaning and repairing tools used in mains operations, making tool boxes, etc.

12. Cleaning structures and equipment.

13. Driving trucks.

Materials and Expenses:

14. Line markers and warning signs.

15. Lumber, nails, etc. , used in building and repairing gate boxes, foot bridges, stiles, tool boxes, etc.

16. Charts.

17. Scrubber oil.
 18. Hand tools.
 19. Lubricants, wiping rags, waste, etc.
 20. Freight, express, parcel post, trucking and other transportation charges.
 21. Employees' transportation and travel expenses.
 22. Janitor and washroom supplies.
 23. Utility services: light, water, telephone.
 24. Gas used in field line operations.
 754. Field Compressor Station Expenses
- This account shall include the cost of labor, materials used, except fuel, and expenses incurred in operating field compressor stations.

ITEMS

Labor:

1. Supervising.
2. Operating and checking engines, equipment valves, machinery, gauges, and other instruments, including cleaning, wiping, polishing, and lubricating.
3. Operating boilers and boiler accessory equipment, including fuel handling and ash disposal, recording fuel used, and unloading and storing coal and oil.
4. Repacking valves and replacing gauge glasses, etc.
5. Recording pressures, replacing charts, keeping logs, and preparing reports of station operations.
6. Inspecting and testing equipment when not specifically to determine necessity for repairs or replacement of parts.
7. Pumping drips at the station.
8. Taking dew point readings.
9. Testing water.
10. Cleaning structures, cutting grass and weeds, and minor grading around station.
11. Cleaning and repairing hand tools used in operations.
12. Driving trucks.
13. Watching during shut downs.
14. Clerical work at station.

Materials and Expenses:

15. Scrubber oil.
16. Lubricants, wiping rags, and waste.
17. Charts and printed forms, etc.
18. Gauge glasses.
19. Chemicals to test waters.

- 20. Water tests and treatment by other than employees.
- 21. Janitor and washroom supplies, first aid supplies, landscaping supplies, etc.
- 22. Employees' transportation and travel expenses.
- 23. Freight, express, parcel post, trucking, and other transportation.
- 24. Utility services: light, water, telephone.

755. Field Compressor Station Fuel and Power

A. This account shall include the cost of gas, coal, oil, or other fuel, or electricity, used for the operation of field compressor stations, including applicable amounts of fuel stock expenses.

B. Records shall be maintained to show the quantity of each type of fuel consumed or electricity used at each compressor station, and the cost of such fuel or power.

Note: The cost of fuel, except gas, and related fuel stock expenses shall be charged initially to appropriate fuel accounts carried in accounts 150.151, Fuel Stock, and 150.152, Fuel Stock Expenses Undistributed, and cleared to this account on the basis of fuel used. See accounts 150.151 and 150.152, for the basis of fuel costs and includible fuel stock expenses.

756. Field Measuring and Regulating Station Expenses

This account shall include the cost of labor, materials used and expenses incurred in operating field measuring and regulating stations.

ITEMS

Labor:

- 1. Supervising.
- 2. Recording pressures and changing charts, reading meters, etc.
- 3. Estimating lost meter registrations, etc. , except gas purchases and sales.
- 4. Calculating gas volumes from meter charts, except for gas purchases and sales.
- 5. Adjusting and calibrating measuring equipment, changing meters, orifice plates, gauges, clocks, etc. , not in connection with maintenance or construction.
- 6. Testing gas samples, inspecting and testing, gas sample tanks and other meter engineer's equipment, determining specific gravity and b.t.u. content of gas.
- 7. Inspecting and testing equipment not specifically to determine necessity for repairs including pulsation tests.
- 8. Cleaning and lubricating equipment.
- 9. Keeping logs and other operating records, preparing reports of operations, etc.

10. Attending boilers and operating other accessory equipment.
11. Installing and removing district gauges for pressure survey.
12. Thawing freeze in gauge pipes.
13. Inspecting and pumping drips, dewatering manholes and pits, inspecting sumps, cleaning pits, etc. , blowing meter drips.
14. Moving equipment, minor structures, etc. , not in connection with construction, retirement, or maintenance work.

Materials and Expenses:

15. Charts and printed forms, stationery and office supplies, etc.
16. Lubricants, wiping rags, waste.
17. Employees' transportation and travel expenses.
18. Freight, express, parcel post, trucking and other transportation.
19. Utility services: light, water, telephone.

757. Purification Expenses

This account shall include the cost of labor, materials used and expenses incurred in operating equipment used for purifying, dehydrating and conditioning of natural gas.

ITEMS

Labor:

1. Supervising.
2. Changing charts on fuel meters.
3. Emptying, cleaning and refilling purifier boxes.
4. Oiling dip sheets of purifier covers.
5. Removing spent oxide to refuse piles.
- 6 Revivifying oxide.
7. Taking readings of inlet and outlet pressures and temperature.
8. Unloading and storing glycol.
9. Watching station and equipment.
10. Cutting grass and weeds, and minor grading around equipment and stations.
11. Hauling operating employees, materials, supplies and tools, etc.
12. Inspecting and testing equipment, not specifically to determine necessity for repairs or replacement of parts.
13. Lubricating equipment, valves, etc.
14. Operating and checking equipment, valves, instruments, etc.

Materials and Expenses:

15. Liquid purifying supplies.
16. Iron oxide.
17. Odorizing matches.
18. Charts, printed forms, etc.
19. Employees' transportation and travel expenses.

20. Freight, express, parcel post, trucking, and other transportation.
21. Gas used in operations.
22. Janitor, washroom, and landscaping supplies.
23. Lubricants, wiping rags, waste, etc.
24. Utility services: light, water, telephone.

Note: Inclusion of dehydration expenses in this account shall be consistent with the functional classification of dehydration plant as to which, see the note to account 336, Purification Equipment, relating to cases where dehydrators may be located some distance from the production sources of gas.

758. Gas Well Royalties

A. This account shall include royalties paid for natural gas produced by the utility from wells on land owned by others.

B. Records supporting the entries to this account shall be so kept that the utility can furnish the name of the parties to each contract involving royalties, the terms of each contract, the location of the property involved, the method of determining the royalties, and the amounts payable.

759. Other Expenses

This account shall include the cost of labor, materials used and expenses incurred in producing and gathering natural gas and not includible in any of the foregoing accounts.

ITEMS

Labor:

1. Moving cleaning tools between locations.
2. Operating communications system.
3. Reading limited and unlimited free gas meters.

Materials and Expenses:

4. Miscellaneous small tools, etc.
5. Research and development expenses.

760. Rents

This account shall include rents for property of others used, occupied or operated in connection with the production and gathering of natural gas, other than rentals on land and land rights held for the supply of natural gas. (See operating expense instruction 317.3.)

Note: See account 795, Delay Rentals, for rentals paid on lands held for the purpose of obtaining a supply of gas in the future.

Maintenance

761. Maintenance Supervision and Engineering

This account shall include the cost of labor and expenses incurred in the general supervision and direction of maintenance of the production

and gathering facilities as a whole. Direct field supervision of specific jobs shall be charged to the appropriate maintenance account. (See Part 317 Instruction--Operating Expense Instruction ÷ 317.1.)

762. Maintenance of Structures

This account shall include the cost of labor, materials used, and expenses incurred in the maintenance of structures and improvements, the book cost of which is includible in accounts 326, Gas Well Structures, 327, Field Compressor Station Structures, 328, Field Measuring and Regulating Station Structures, and 329, Other Structures. (See Part 317 Instruction--Operating Expense Instruction ÷ 317.2.)

763. Maintenance of Producing Gas Wells

This account shall include the cost of labor, materials used, and expenses incurred in maintenance of gas wells and equipment includible in accounts 330, Producing Gas Wells--Well Construction, and 331, Producing Gas Wells--Well Equipment. (See Part 317 Instruction--Operating Expense Instruction ÷ 317.2.)

764. Maintenance of Field Lines

This account shall include the cost of labor, materials used and expenses incurred in maintenance of field lines the book cost of which is includible in account 332, Field Lines. (See Part 317 Instruction--Operating Expense Instruction ÷ 317.2.)

ITEMS

1. Electrolysis and leak inspections (not routine).
2. Installing and removing temporary lines, when necessitated by maintenance.
3. Lamping and watching while making repairs.
4. Lowering and changing location of portion of lines, when the same pipe is used.
5. Protecting lines from fires, floods, land slides, etc.
6. Rocking creek crossings.

765. Maintenance of Field Compressor Station Equipment

This account shall include the cost of labor, materials used and expenses incurred in maintenance of field compressor station equipment includible in account 333, Field Compressor Station Equipment. (See Part 317 Instruction--Operating Expense Instruction. ÷ 317.2.)

766. Maintenance of Field Measuring and Regulating Station Equipment

This account shall include the cost of labor, materials used and expenses incurred in maintenance of field measuring and regulating station equipment includible in account 334, Field Measuring and Regulating Station Equipment. (See Part 317 Instruction--Operating Expense Instruction ÷ 317.2.)

767. Maintenance of Purification Equipment

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of purification equipment includible in account 336, Purification Equipment. (See Part 317 Instruction--Operating Expense Instruction ÷ 317.2.)

Note: Inclusion of dehydration maintenance expenses in this account shall be consistent with the functional classification of dehydration plant as to which see the note to account 336, Purification Equipment, relating to cases where dehydrators may be located some distance from the production sources of gas.

768. Maintenance of Drilling and Cleaning Equipment

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of drilling cleaning equipment includible in account 335, Drilling and Cleaning Equipment, except such costs of maintaining drilling tools or other equipment which are assignable to the cost of drilling wells. (See Part 317 Instruction--Operating Expense Instruction ÷ 317.2.)

769. Maintenance of Other Equipment

This account shall include the cost of labor, materials used and expenses incurred in maintenance of other production and gathering equipment includible in account 337, Other Equipment. (See Part 317 Instruction--Operating Expense Instruction ÷ 317.2.)

Joint Expenses

769.1 Joint Expenses--Debit

A. This account shall include amounts for the cost of operation and maintenance payable by the gas department to others or to a coordinate department for joint facilities used, occupied, or operated in connection with the production of natural gas. (See Part 317 Instruction-Operating Expense Instruction 317.5.)

B. The records supporting the entries to this account shall be so kept that the utility can furnish a complete explanation of the debits to this account including the following:

- (1) Charges from others
- (2) Charges from coordinate departments

769.2 Joint Expenses--Credit

A. This account shall include such portion of the cost of operating and maintaining joint facilities operated by the gas department in connection with the production of natural gas as is charged to others or to a coordinate department. (See Part 317 Instruction--Operating Expense Instruction ÷ 317.5.)

B. The records supporting the entries to this account shall be so kept

that the utility can furnish a complete explanation of the credits to this account, including the following:

- (1) Charges to others
- (2) Charges to coordinate departments

C. OTHER GAS SUPPLY EXPENSES

Operation

800. Natural Gas Well Head Purchases

A. This account shall include the cost at well head of natural gas purchased from producers in gas fields or production areas where only the utility's facilities are used in bringing the gas from the well head into the utility's natural gas system.

B. The records supporting this account shall be so maintained that there shall be readily available for each vendor and well head the quantity of gas, basis of charges, and amount paid for the gas.

Note: If gas purchases are made under one contract covering both well head and field line purchases and such amounts are not readily separable, the utility may classify such purchases according to predominant source or according to a reasonable estimate.

801. Natural Gas Field Line Purchases

A. This account shall include the cost, at point of receipt by the utility, of natural gas purchased in gas fields or production areas at points along gathering lines, and at points along the utility's transmission lines within field or production areas, exclusive of purchases at outlets of gasoline plants includible in account 802, where facilities of the vendor or others are used in bringing the gas from the well head to the point of entry into the utility's natural gas system.

B. The records supporting this account shall be so maintained that there shall be readily available for each vendor and each point of receipt, the quantity of gas, basis of charges, and amount paid for the gas.

Note: If gas purchases are made under one contract covering both well head and field line purchases and such amounts are not readily separable, the utility may classify such purchases according to predominant source or according to a reasonable estimate.

802. Natural Gas Gasoline Plant Outlet Purchases

A. This account shall include the cost, at point of receipt by the utility, of natural gas purchased at the outlet side of vendor's natural gas products extraction plants.

B. The records supporting this account shall be so maintained that there shall be readily available for each vendor and for each products extraction plant, the quantity of gas, basis of the charges, and the

amount paid for the gas.

803. Natural Gas Transmission Line Purchases

A. This account shall include the cost, at point of receipt by the utility, of natural gas purchased at points along the utility's transmission lines not within gas fields or production areas, excluding purchases at the outlets of products extraction plants includible in account 802.

B. The records supporting this account shall be so maintained that there shall be readily available for each vendor and each point of receipt, the quantity of gas, basis of charges, and the amount paid for the gas.

804. Natural Gas City Gate Purchases

A. This account shall include the cost, at point of receipt by the utility, of natural gas purchased which is received at the entrance to the distribution system of the utility.

B. The records supporting this account shall be so maintained that there shall be readily available for each vendor and each point of receipt, the quantity of gas, basis of the charges, and the amount paid for the gas.

Note: Do not credit this account for gas used in reforming for which the cost is charged to manufactured gas production expenses. Credits for such gas should be made to account 812, Gas Used for Other Utility Operations--Credit.

805. Other Gas Purchases

A. This account shall include the cost, at point of receipt by the utility, of manufactured gas, refinery gas, or any gas other than natural gas, or other than any mixed gas in which the natural gas is an important proportion of the mixture.

B. The records supporting this account shall be so maintained that there shall be readily available for each vendor and each point of receipt, the kind and quantity of gas, b. t. u. content, basis of the charges, and the amount paid for the gas.

806. Exchange Gas

A. This account shall include debits or credits for the cost of gas in unbalanced exchange transactions whereby gas is received from another party in exchange for delivery of gas to such other party and receipt and delivery of such gas is not completed during the accounting period. Contra entries to those in this account shall be made to account 174, Miscellaneous Current and Accrued Assets, for exchange gas receivable, and to account 242, Miscellaneous Current and Accrued Liabilities, for exchange gas deliverable. Such entries shall be reversed and appropriate

contra entries made to this account when gas is received or delivered in satisfaction of the amounts receivable or deliverable. This accounting is not required for minor transactions.

B. If revenue is earned or amounts are payable in consideration of the performance of exchange services, such revenue or expense should be recorded in account 495, Other Gas Revenues, or account 813, Other Gas Supply Expenses, as appropriate. See, however, accounts 489, Revenues from Transportation of Gas of Others, and 858, Transmission and Compression of Gas by Others, for transactions which, in fact, are for transportation of gas rather than exchange of gas.

C. Records shall be maintained so that there is readily available for each gas exchange the volume of gas received and delivered whether or not entries of dollar amounts to this account are required.

807. Purchased Gas Expenses

A. This account shall include expenses incurred directly in connection with the purchase of gas for resale.

B. The utility shall not include as purchased gas expense, segregated or apportioned expenses of operating and maintaining gathering system plant whether such plant is devoted solely or partially to purchases of gas, except that the utility shall include the cost of turning on and off purchase gas wells and operating measuring stations devoted exclusively to measuring purchased gas.

C. In general, it is intended that this account include only the expenses directly related to purchased gas, including the expenses of computing volumes of gas purchased, and special items directly related to gas purchases which are not includible in other accounts.

D. This account shall be subdivided as follows:

807.1 Wells Expenses--Purchased Gas

807.2 Operation of Purchased Gas Measuring Stations

807.3 Maintenance of Purchased Gas Measuring Stations

807.4 Purchased Gas Calculations Expenses

807.5 Other Purchased Gas Expenses

808. Gas Withdrawn from Storage--Debit

A. This account shall include debits for the cost of gas withdrawn from storage during the year. Contra credits for entries to this account shall be made to accounts 117, Gas Stored Underground--Noncurrent, or 164.1, Liquefied Natural Gas in Storage, as appropriate.

B. Withdrawal of gas from storage shall not be netted against deliveries to storage. (See account 809.)

Note: Adjustments for gas inventory losses incurred in underground storage operations due to cumulative inaccuracies in gas measurement, or

from other causes, shall be entered in account 823, Gas Losses. If, however, any adjustment is substantial, the utility may request commission approval to amortize the amount of the adjustments to account 823 over future operating periods.

809. Gas Delivered to Storage--Credit

A. This account shall include credits for the cost of gas delivered to storage during the year. Contra debits for entries to this account shall be made to accounts 117, Gas Stored Underground--Noncurrent, or 164.1, Liquefied Natural Gas in Storage, as appropriate.

B. Deliveries of gas to storage shall not be netted against withdrawals from storage. (See account 808.)

810. Gas Used for Compressor Station Fuel--Credit

This account shall include concurrent credits for charges which are made to operating expenses for gas consumed for compressor station fuel from the common system gas supply.

812. Gas Used for Other Utility Operation--Credit

This account shall include concurrent credits for charges which are made to operating expenses or other accounts of the gas department for gas consumed from the common system supply for operating and utility purposes other than uses for which credits are includible in any of the foregoing accounts. (See account 484, Interdepartmental Sales, for gas supplied to departments other than the gas utility department.)

813. Other Gas Supply Expenses

This account shall include the cost of labor, materials used and expenses incurred in connection with gas supply functions not provided for in any of the above accounts, including research and development expenses.

JOINT EXPENSES

813.1 Joint Expenses--Debit

A. This account shall include amounts payable by the gas department to others or to a coordinate department, for joint facilities used, occupied or operated in connection with the production of gas when it is impracticable to allocate such payments to the joint expenses-debit accounts under manufactured gas production or natural gas production. (See operating expense instruction 317.5.)

B. The records supporting the entries to this account shall be so kept that the utility can furnish a complete explanation of the debits to this account, including the following:

- (1) Charges from others
- (2) Charges from coordinate departments

813.2 Joint Expenses--Credit

A. This account shall include such portion of the cost of operating and maintaining joint facilities operated by the gas department in connection with the production of gas as is charged to others or to a coordinate department when it is impracticable to allocate such cost to the joint expenses-credit accounts under manufactured gas production or natural gas production. (See operating expense instruction 317.5.)

B. The records supporting the entries to this account shall be so kept that the utility can furnish a complete explanation of the credits to this account, including the following:

- (1) Charges to others
- (2) Charges to coordinate departments

2. NATURAL GAS STORAGE

A. UNDERGROUND STORAGE EXPENSES

Operation

814. Operation Supervision and Engineering

This account shall include the cost of labor and expenses incurred in the general supervision and direction of underground storage operations. Direct supervision of specific activities such as turning on and shutting off storage wells, compressor station operations, etc. , shall be charged to the appropriate account. (See operating expense instruction 317.1.)

815. Maps and Records

This account shall include the cost of labor, materials used and expenses incurred in the preparation and maintenance of storage maps and land records.

ITEMS

Labor:

With respect to land records:

1. Supervising.
2. Abstracting titles to date for extension and renewal of leases.
3. Adjusting land and well rentals.
4. Renewing and extending leases or replacing leases not involving additional consideration.
5. Transferring, assigning, pooling, and merging leases.
6. Delivering rental checks.
7. Clerical work in maintaining storage land and lease records.
8. Preparing and maintaining lease expiration calendars.

With respect to maps:

9. Supervising.
10. Preparing maps, well location plats, etc.
11. Reproducing maps, (blueprints or photostats).

12. Posting and revising maps.
13. Surveying deeds, leases, rights-of-way, well locations, etc. , for map revisions.
14. Maintaining files of maps and tracings.
15. Field checking boundaries, markers, etc. , in connection with preparation of maps.

Materials and Expenses (general):

16. Reproduction of land and lease records and maps (blueprints, photostats, etc.).
17. Drafting materials and supplies.
18. Surveying materials and supplies.
19. Employees' transportation and travel expenses.

816. Wells Expenses

This account shall include the cost of labor, materials used and expenses incurred in operating storage gas wells.

ITEMS

Labor:

1. Supervising.
2. Testing, bailing, swabbing, blowing, and gauging storage wells.
3. Painting signs, etc.
4. Minor upkeep of well roads, fences, etc.
5. Turning storage wells on and off.
6. Moving cleaning out tools between locations.
7. Driving trucks.

Materials and Expenses:

8. Gas, gasoline, and oil used in pumping, bailing, heating, and swabbing.
9. Lumber, nails, and other materials used for repairing old well roads and fences.
10. Well swabs.
11. Employees' transportation and travel expenses.
12. Freight, express, parcel post, trucking, and other transportation.

817. Lines Expenses

This account shall include the cost of labor, materials used and expenses incurred in operating underground storage lines.

ITEMS

Labor:

1. Supervising.
2. Walking or patrolling lines.
3. Attending valves, lubricating valves and other equipment, blowing and cleaning lines and drips, draining water from lines, operating and

cleaning scrubbers, thawing freezes.

4. Taking line pressures, changing pressure charts, operating alarm gauges.

5. Building and repairing gate boxes, foot bridges, stiles, tool boxes, etc. used in line operations, erecting line markers and warning signs, repairing old line roads.

6. Cleaning debris, cutting grass and weeds on rights-of-way.

7. Inspecting and testing not specifically to determine necessity for repairs.

8. Protecting utility property during work by others.

9. Standby time of emergency crews, responding to fire calls, etc.

10. Locating valve boxes or drip riser boxes.

11. Cleaning and repairing tools used in storage lines operations.

12. Cleaning structures and equipment.

13. Driving trucks.

Materials and Expenses:

14. Line markers and warning signs.

15. Lumber, nails, etc., used in building and repairing gate boxes, foot bridges, stiles, etc.

16. Charts.

17. Scrubber oil.

18. Hand tools.

19. Lubricants, wiping rags, waste, etc.

20. Freight, express, parcel post, trucking and other transportation.

21. Employees' transportation and travel expenses.

22. Janitor and wash room supplies.

23. Utility services: light, water, telephone.

24. Gas used in operations.

818. Compressor Station Expenses

This account shall include the cost of labor, materials used and expenses incurred in operating underground storage compressor stations.

ITEMS

Labor:

1. Supervising.

2. Operating and checking engines, equipment, valves, machinery, gauges, and other instruments, including cleaning, wiping, polishing, and lubricating.

3. Operating boilers and boiler accessory equipment, including fuel handling and ash disposal, recording fuel used, and unloading and storing coal and oil.

4. Repacking valves and replacing gauge glasses, etc.

5. Recording pressures, replacing charts, keeping logs, and preparing reports of station operations.
6. Inspecting and testing equipment when not specifically to determine necessity for repairs or replacement of parts.
7. Pumping drips at the station.
8. Taking dew point readings.
9. Testing water.
10. Cleaning structures housing equipment, cutting grass and weeds, and minor grading around station.
11. Cleaning and repairing hand tools used in operations.
12. Driving trucks.
13. Watching during shut downs.
14. Clerical work at station.

Materials and Expenses:

15. Scrubber oil.
16. Lubricants, wiping rags, and waste.
17. Charts and printed forms, etc.
18. Gauge glasses.
19. Chemicals to test water.
20. Water tests and treatment by other than employees.
21. Janitor and washroom supplies, first aid supplies, landscaping supplies, etc.
22. Employees' transportation and travel expenses.
23. Freight, express, parcel post, trucking, and other transportation.
24. Utility services: light, water, telephone.

819. Compressor Station Fuel and Power

A. This account shall include the cost of gas, coal, oil, or other fuel, or electricity, used for the operation of underground storage compressor stations, including applicable amounts of fuel stock expenses.

B. Records shall be maintained to show the quantity of each type of fuel consumed or electricity used at each compressor station, and the cost of such fuel or power.

Note: The cost of fuel, except gas, and related fuel stock expenses shall be charged initially to appropriate fuel accounts carried in accounts 150.151, Fuel Stock, and 150.152, Fuel Stock Expenses Undistributed, and cleared to this account on the basis of fuel used. See accounts 150.151, and 150.152 for the basis of fuel costs and includible fuel stock expenses.

820. Measuring and Regulating Station Expenses

This account shall include the cost of labor, materials used and

expenses incurred in operating underground storage measuring and regulating stations.

ITEMS

Labor:

1. Supervising.
2. Recording pressures and changing charts, reading meters, etc.
3. Estimating lost meter restrictions, etc., except gas purchases and sales.
4. Calculating gas volumes from meter charts except gas purchases and sales.
5. Adjusting and calibrating measuring equipment, changing meters, orifice plates, gauges, clocks, etc., not in connection with construction or maintenance.
6. Testing gas samples, inspecting and testing gas sample tanks and other meter engineers equipment, determining specific gravity and b.t.u. content of gas.
7. Inspecting and testing equipment not specifically to determine necessity for repairs, including pulsation tests.
8. Cleaning and lubricating equipment.
9. Keeping log and other operating records, preparing reports of operations, etc.
10. Attending boilers and operating other accessory equipment.
11. Installing and removing district gauges for pressure survey.
12. Thawing freeze in gauge pipe.
13. Inspecting and pumping drips, dewatering manholes and pits, inspecting sumps, cleaning pits, etc., blowing meter drips.
14. Moving equipment, minor structures, etc., not in connection with maintenance or construction.

Materials and Expenses:

15. Charts and printed forms, stationery and office supplies, etc.
16. Lubricants, wiping rags, waste.
17. Employees' transportation and travel expenses.
18. Freight, express, parcel post, trucking and other transportation.
19. Utility services: light, water, telephone.

822. Exploration and Development

This account shall include expenses of investigation, exploration, and development of underground storage projects under consideration which prove not feasible. There also shall be included in this account the net cost of drilling nonoperative wells within an existing storage project.

(See account 183.2, Other Preliminary Survey and Investigation Charges.)

Note: Include in account 352, Wells, the cost of wells which may be

drilled within a storage project for purposes of pressure observation rather than for injection or withdrawal of gas.

823. Gas Losses

This account shall include the amounts of inventory adjustments representing the cost of gas lost or unaccounted for in underground storage operations due to cumulative inaccuracies of gas measurements or other causes. (See paragraph G of account 117, Gas Stored Underground--Noncurrent.) If, however, any adjustment is substantial, the utility may, with approval of the commission amortize the amount of the adjustment to this account over future operating periods.

824. Other Expenses

This account shall include the cost of labor, materials used and expenses incurred in operating underground storage plant, and other underground storage operating expenses, not includible in any of the foregoing accounts, including research and development expenses.

825. Storage Well Royalties

A. This account shall include royalties, rents, and other payments includible in operating expenses for gas wells and gas land acreage located within and comprising underground storage projects of the utility. (See operating expense instruction 317.3.)

B. The records supporting this account shall be so maintained that information will be readily available for each storage project, of the parties to each contract, basis of the charges, and location of wells to which the royalties or rents of each contract relate.

826. Rents

This account shall include rents for property of others used in connection with the storage of gas underground, other than rents and royalties paid with respect to storage wells and gas lands utilized for the holding of gas in underground storage. (See operating expense instruction 317.3.)

Maintenance

830. Maintenance Supervision and Engineering

This account shall include the cost of labor and expenses incurred in the general supervision and direction of maintenance of underground storage facilities. Direct field supervision of specific jobs shall be charged to the appropriate maintenance account. (See operating expense instruction 317.1.)

831. Maintenance of Structures

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of structures, the book cost of which is includible in account 351, Structures and Improvements. (See

operating expense instruction 317.2.)

832. Maintenance of Reservoirs and Wells

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of storage wells, the book cost of which is included in account 352, Wells, and the maintenance of reservoirs, the book cost of which is included in account 352.2, Reservoirs. (See operating expense instructions 317.2.)

833. Maintenance of Lines

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of underground storage lines, the book cost of which is includible in account 353, Lines. (See operating expense instruction 317.2.)

834. Maintenance of Compressor Station Equipment

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of equipment, the book cost of which is includible in account 354, Compressor Station Equipment. (See operating expense instruction 317.2.)

835. Maintenance of Measuring and Regulating Station Equipment

This account shall include the cost of labor,* materials used and expenses incurred in the maintenance of equipment, the book cost of which is includible in account 355, Measuring and Regulating Equipment. (See operating expense instruction 317.2.)

* So in Original. ", " should be "and".

837. Maintenance of Other Equipment

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of equipment, the book cost of which is includible in account 357, Other Equipment. (See operating expense instruction 317.2.)

Joint Expenses

838.1 Joint Expenses--Debit

A. This account shall include amounts payable by the gas department to others or to a coordinate department for joint facilities used, occupied, or operated in connection with the underground storage of gas. (See operating expense instruction 317.5.)

B. The records supporting entries to this account shall be so kept that the utility can furnish a complete explanation of the debits to this account, including the following:

- (1) Charges from others
- (2) Charges from coordinate departments

838.2 Joint Expense--Credit

A. This account shall include such portion of the cost of operating

and maintaining joint facilities operated by the gas department in connection with the underground storage of gas as is charged to others or to coordinate departments. (See operating expense instruction 317.5.)

B. The records supporting the entries to this account shall be so kept that the utility can furnish a complete explanation of the credits to this account, including the following:

- (1) Charges to others
- (2) Charges to coordinate departments

B. OTHER STORAGE EXPENSES

Operation

840. Operation Supervision and Engineering

A. This account shall include the cost of labor and expenses incurred in the general supervision and direction of the operation of other storage facilities. Direct supervision of specific activities such as operation of gas holders shall be charged to the appropriate account. (See operating expenses instruction 317.1.)

B. Records supporting entries to this account shall be kept to show separately expenses associated with local storage and liquefied storage operations.

841. Operation Labor and Expenses

A. This account shall include the cost of labor, materials used and expenses incurred in operating storage holders and other storage equipment.

B. Records supporting entries in this account shall be kept to show separately expenses associated with local storage and liquefied storage operations.

ITEMS

Labor:

1. Supervising.
2. Operating, checking, lubricating, cleaning, and polishing equipment, machinery, valves, instruments, and other local storage equipment.
3. Reading meters, gauges and other instruments, changing charts, preparing operating reports, etc.
4. Pumping inlet and outlet holder drips.
5. Inspecting and testing equipment when not specifically for repairs or replacement of parts.
6. Cleaning structures housing equipment, cutting grass and weeds, and doing minor grading work around structures and equipment.
7. Cleaning and repairing hand tools used for operations, etc.
8. Operating steam lines for heating storage facilities.

Materials and Expenses:

9. Charts for pressure gauges and meters, printed forms, etc.
10. Lubricants, wiping rags, waste, etc.
11. Janitor and washroom supplies, landscaping supplies, etc.
12. Employee travel and transportation expenses.
13. Freight, express, parcel post, trucking, and other transportation.
14. Utility services; light, water, telephone.
15. Chemicals.
16. Refrigerants.
17. Research and development expenses.

842. Rents

A. This account shall include rents for property of others used or operated in connection with other storage operations. (See operating expense instruction 317.3.)

B. Records supporting entries to this account shall be kept to show separately rents associated with local storage and liquefied storage operations.

842.1 Fuel

A. This account shall include the cost of natural gas or other fuel used in the operation of other storage plant.

B. Concurrent credits offsetting charges to this account for natural gas used for fuel shall be made to account 812, Gas Used for Other Utility Operations--Credit.

C. Records supporting entries to this account shall be kept to show separately the cost of natural gas or other fuel used in local storage and liquefied storage operations.

842.2 Power

A. This account shall include the cost of electricity consumed for operation of facilities used in the operation of other storage plant.

B. Records supporting entries to this account shall be kept to show separately the cost of electricity used in local storage and liquefied storage operations.

842.3 Gas Losses

This account shall include the amounts of inventory adjustments representing the cost of gas lost or unaccounted for in other storage operations due to shrinkage or other causes.

Maintenance

843. Maintenance Supervision and Engineering

A. This account shall include the cost of labor and expenses incurred in the general supervision and direction of maintenance of other storage facilities. Direct field supervision of specific jobs shall be charged

to the appropriate maintenance account. (See operating expense instruction 317.1.)

B. Records supporting entries to this account shall be kept to show separately expenses associated with local storage and liquefied storage operations.

844. Maintenance of Structures

A. This account shall include the cost of labor, materials used and expenses incurred in the maintenance of structures, the book cost of which is includible in account 361, Structures and Improvements. (See operating expense instruction 317.2.)

B. Records supporting entries to this account shall be kept to show separately expenses associated with local storage and liquefied storage operations.

845. Maintenance of Gas Holders

A. This account shall include the cost of labor, materials used and expenses incurred in the maintenance of gas holders, the book cost of which is includible in account 362, Gas Holders. (See operating expense instruction 317.2.)

B. Records supporting entries to this account shall be kept to show separately expenses associated with local storage and liquefied storage operations.

846. Maintenance of Purification Equipment

This account shall include the cost of labor, materials used and expenses incurred in maintenance of purification equipment, the book cost of which is includible in account 363, Purification Equipment. (See operating expense instruction 317.2.)

847. Maintenance of Liquefaction Equipment

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of liquefaction equipment, the book cost of which is includible in account 363.1, Liquefaction Equipment. (See operating expense instruction 317.2.)

848. Maintenance of Vaporizing Equipment

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of vaporizing equipment, the book cost of which is includible in account 363.2, Vaporizing Equipment. (See operating expense instruction 317.2.)

848.1 Maintenance of Compressor Equipment

A. This account shall include the cost of labor, materials used and expenses incurred in the maintenance of compressor equipment, the book cost of which is includible in account 363.3, Compressor Equipment. (See operating expense instruction 317.2.)

B. The records supporting entries to this account shall be kept to show separately expenses associated with local storage and liquefied storage operations.

848.2 Maintenance of Measuring and Regulating Equipment

A. This account shall include the cost of labor, materials used and expenses incurred in the maintenance of measuring and regulating equipment, the book cost of which is includible in account 363.4, Measuring and Regulating Equipment. (See operating expense instruction 317.2.)

B. The records supporting entries to this account shall be kept to show separately expenses associated with local storage and liquefied storage operations.

848.3 Maintenance of Other Equipment

A. This account shall include the cost of labor, materials used and expenses incurred in the maintenance of equipment, the book cost of which is includible in account 363.5, Other Equipment. (See operating expense instruction 317.2.)

B. The records supporting entries to this account shall be kept to show separately expenses associated with local storage and liquefied storage operations.

JOINT EXPENSES

849.1 Joint Expenses--Debit

A. This account shall include amounts payable by the gas department to others or to a coordinate department for joint facilities used, occupied, or operated in connection with the local or liquefied storage of natural gas. (See operating expense instruction 317.5.)

B. The records supporting the entries to this account shall be so kept that the utility can furnish a complete explanation of the debits to this account for local storage or liquefied storage, including the following:

- (1) Charges from others
- (2) Charges from coordinate departments

849.2 Joint Expenses--Credit

A. This account shall include such portion of the cost of operating and maintaining joint facilities operated by the gas department in connection with the local or liquefied storage of natural gas as is charged to others or coordinate departments. (See operating expense instruction 317.5.)

B. The records supporting the entries to this account shall be so kept that the utility can furnish a complete explanation of the credits to this account for local or liquefied storage, including the following:

- (1) Charges to others
- (2) Charges to coordinate departments

3. TRANSMISSION EXPENSES

OPERATION

850. Operation Supervision and Engineering

This account shall include the cost of labor and expenses incurred in the general supervision and direction of the operation of transmission facilities. Direct supervision of specific activities such as operation of transmission lines, compressor stations, etc., shall be charged to the appropriate account. (See operating expense instruction 317.1.)

851. System Control and Load Dispatching

This account shall include the cost of labor and expenses incurred in dispatching and controlling the supply and flow of gas through the system.

ITEMS

Labor:

1. Supervising.
2. Analysis of pressures for irregularities, as received.
3. Collecting pressures by telephone and radio.
4. Controlling mixture of various gases to maintain proper b.t.u. content.
5. Correspondence and records, typing and maintaining files.
6. Controlling production and storage inputs and withdrawals.
7. Instructing field men to increase or decrease pressures at regulators.
8. Maintaining pressures at compressor stations, key line junctions and regulating stations to divide the available gas during heavy demand periods.
9. Maintaining pressure log sheets.
10. Maintaining proper compression ratios at compressor stations, consistent with economical operations.
11. Maintaining lowest necessary line pressures consistent with satisfactory service.
12. Maintaining well operation record by well classification.
13. Requesting pressure changes at compressor stations, regulating stations, and key line junctions.
14. Rerouting gas during emergencies and planned shut downs.

Materials and Expenses:

15. Consultants' fees and expenses.
16. Meals, traveling, and incidental expenses in connection with system load dispatching.

17. Office supplies, stationery and printed forms.

18. Transportation: company and rental vehicles.

19. Utility services: light, water, telephone.

853. Compressor Station Labor and Expenses

This account shall include the cost of labor, materials used and expenses incurred (other than fuel and power) in operating transmission compressor stations.

ITEMS

Labor:

1. Supervising.

2. Operating and checking engines, equipment valves, machinery, gauges, and other instruments, including cleaning, wiping, polishing, and lubricating.

3. Operating boilers and boiler accessory equipment, including fuel handling and ash disposal, recording fuel used, and unloading and storing coal and oil.

4. Repacking valves and replacing gauge glasses, etc.

5. Recording pressures, replacing charts, keeping logs, and preparing reports of station operations.

6. Inspecting and testing equipment not specifically to determine necessity for repairs.

7. Pumping drips at the station.

8. Taking dew point readings.

9. Testing water.

10. Cleaning structures housing equipment, cutting grass and weeds and minor grading around station.

11. Cleaning and repairing hand tools used in operations.

12. Driving trucks.

13. Watching during shut downs.

14. Clerical work at station.

Materials and Expenses:

15. Scrubber oil.

16. Lubricants, wiping rags, and waste.

17. Charts and printed forms, etc.

18. Gauge glasses.

19. Chemicals to treat water.

20. Water tests and treatment by other than employees.

21. Janitor and washroom supplies, first aid supplies, landscaping supplies, etc.

22. Employees' transportation and travel expenses.

23. Freight, express, parcel post, trucking, and other transportation.

24. Utility services: light, water, telephone.

854. Gas for Compressor Station Fuel

A. This account shall include the cost of gas used for the operation of transmission compressor stations.

B. Records shall be maintained to show the mcf of gas consumed at each compressor station, the average b.t.u. content, and the cost of such gas.

855. Other Fuel and Power for Compressor Stations

A. This account shall include the cost of coal, oil, and other fuel, or electricity, used for the operation of transmission compressor stations, including applicable amounts of fuel stock expenses.

B. Records shall be maintained to show the quantity of each type of fuel consumed or electricity used at each compressor station, and the cost of such fuel or power.

Note: The cost of fuel, includible in this account, and related fuel stock expenses shall be charged initially to appropriate fuel accounts carried in accounts 150.151, Fuel Stock, and 150.152, Fuel Stock Expenses Undistributed, and cleared to this account on the basis of fuel used. See accounts 150.151 and 150.152 for the basis of fuel costs and includible fuel stock expenses.

856. Mains Expenses

This account shall include the cost of labor, materials used and expenses incurred in operating transmission mains.

ITEMS

Labor:

1. Supervising.
2. Walking or patrolling lines.
3. Attending valves, lubricating valves and other equipment, blowing and cleaning lines and drips, draining water from lines, operating and cleaning scrubbers, thawing freezes.
4. Taking line pressures, changing pressure charts, operating alarm gauges.
5. Building and repairing gate boxes, foot bridges, stiles, etc., used in line operations, erecting line markers and warning signs, repairing old line roads.
6. Cleaning debris, cutting grass and weeds on rights-of-way.
7. Inspecting and testing not specifically to determine necessity for repairs.
8. Protecting utility property during work by others.
9. Standby time of emergency crews responding to fire calls, etc.
10. Locating valve boxes or drip riser boxes.

11. Cleaning and repairing tools used in mains operations, making tool chests, etc.

12. Cleaning structures and equipment.

13. Driving trucks.

Materials and Expenses:

14. Line markers and warning signs.

15. Lumber, nails, etc., used in building and repairing gate boxes, foot bridges, stiles, etc.

16. Charts.

17. Scrubber oil.

18. Hand tools.

19. Lubricants, wiping rags, waste, etc.

20. Freight, express, parcel post, trucking and other transportation.

21. Employees' transportation and travel expenses.

22. Janitor and washroom supplies.

23. Utility services: light, water, telephone.

24. Gas used in mains operations.

857. Measuring and Regulating Station Expenses

This account shall include the cost of labor, materials used and expenses incurred in operating transmission measuring and regulating stations.

ITEMS

Labor:

1. Supervising.

2. Recording pressures and changing charts, reading meters, etc.

3. Estimating lost meter registrations, etc., except gas purchases and sales.

4. Calculating gas volumes from meter charts, except gas purchases and sales.

5. Adjusting and calibrating measuring equipment, changing meters, orifice plates, gauges, clocks, etc., not in connection with construction or maintenance.

6. Testing gas samples, inspecting and testing gas sample tanks and other meter engineers' equipment, determining specific gravity and b.t.u. content of gas.

7. Inspecting and testing equipment not specifically to determine necessity for repairs including pulsation tests.

8. Cleaning and lubricating equipment.

9. Keeping log and other operating records, preparing reports of operation, etc.

10. Attending boilers and operating other accessory equipment.

11. Installing and removing district gauges for pressure survey.
12. Thawing freeze in gauge pipe.
13. Inspecting and pumping drips, dewatering manholes and pits, inspecting sumps, cleaning pits, etc., blowing meter drips.
14. Moving equipment, minor structures, etc., not in connection with maintenance or construction.

Materials and Expenses:

15. Charts and printed forms.
16. Lubricants, wiping rags, waste.
17. Employees' transportation and travel expenses.
18. Freight, express, parcel post, trucking and other transportation.
19. Utility services: light, water, telephone.

858. Transmission and Compression of Gas by Others

A. This account shall include amounts paid to others for the transmission and compression of gas of the utility.

B. Records supporting this account shall be so maintained that there shall be readily available for each agreement, name of other party, mcf of gas delivered to the other party for transmission or compression and the mcf of gas received back by the utility after transmission or compression, points of delivery to and receipt of gas from other party, amount and basis of charges for the transmission or compression service.

Note: If in connection with any gas delivered to another for transmission or compression such other party also processes the gas for extraction of gasoline or other salable products, credits attributable to the products so extracted shall be made to account 491, Revenues from Natural Gas Processed by Others, to the end that amounts recorded in this account shall only be charges for transportation or compression service.

859. Other Expenses

This account shall include the cost of labor, materials used and expenses incurred in operating transmission system equipment and other transmission system expenses not includible in any of the foregoing accounts including research and development expenses.

860. Rents

This account shall include rents for property of others used, occupied or operated in connection with the operation of the transmission system. Include herein rentals paid for regulator sites, railroad crossings, rights-of-way, payments to governmental bodies and others for use of public or private lands and reservations for rights-of-way; and also amounts payable for depreciation, taxes, interest or return, under joint facility agreements. (See operating expense instructions 317.3 and

317.5.)

MAINTENANCE

861. Maintenance Supervision and Engineering

This account shall include the cost of labor and expenses incurred in the general supervision and direction of maintenance of transmission system facilities. Direct field supervision of specific jobs shall be charged to the appropriate maintenance accounts. (See operating expense instruction 317.1.)

862. Maintenance of Structures

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of structures, the book cost of which is includible in account 366, Structures and improvements. (See operating expense instruction 317.2.)

863. Maintenance of Mains

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of mains, the book cost of which is includible in account 367, Mains. (See operating expense instruction 317.2.)

ITEMS

1. Supervising.
2. Electrolysis and leak inspection.
3. Installing and removing temporary lines, when necessitated by maintenance.
4. Lamping and watching while making repairs.
5. Lowering and changing location of lines, when the same pipe is used.
6. Protecting lines from fires, floods, landslides, etc.
7. Rocking creek crossings.

864. Maintenance of Compressor Station Equipment

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of equipment, the book cost of which is includible in account 368, Compressor Station Equipment. (See operating expense instruction 317.2.)

865. Maintenance of Measuring and Regulating Station Equipment

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of equipment, the book cost of which is includible in account 369, Measuring and Regulating Station Equipment. (See operating expense instruction 317.2.)

867. Maintenance of Other Equipment

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of equipment, the book cost of

which is includible in account 371, Other Equipment. (See operating expense instruction 317.2.)

JOINT EXPENSES

868.1 Joint Expenses--Debit

A. This account shall include amounts for the cost of operation and maintenance payable by the gas department to others or to a coordinate department, for joint facilities used, occupied or operated in connection with the transmission of gas. (See operating expense instruction 317.5.)

B. The records supporting the entries to this account shall be so kept that the utility can furnish a complete explanation of the debits to this account, including the following:

- (1) Charges from others
- (2) Charges from coordinate departments

868.2 Joint Expenses--Credit

A. This account shall include such portion of the cost of operating and maintaining joint facilities, operated in connection with the transmission of gas as is charged to others, or to a coordinate department. (See operating expense instruction 317.5.)

B. The records supporting the entries to this account shall be so kept that the utility can furnish a complete explanation of the credits to this account, including the following:

- (1) Charges to others
- (2) Charges to coordinate departments

4. DISTRIBUTION EXPENSES

OPERATION

870. Operation Supervision and Engineering

This account shall include the cost of labor and expenses incurred in the general supervision and direction of distribution system operations. Direct supervision of specific activities such as load dispatching, mains operation, removing and resetting meters, etc., shall be charged to the appropriate account. (See operating expense instruction 317.1.)

871. Distribution Load Dispatching

This account shall include the cost of labor, materials used and expenses incurred in dispatching and controlling the supply and flow of gas through the distribution system.

ITEMS

Labor:

1. Supervising.
2. Analyzing pressures for irregularities.
3. Collecting pressures by telephone and radio.

4. Controlling mixture of various gases to maintain proper b.t.u. content.

5. Correspondence and records, typing and maintaining files.

6. Controlling gas-make and inputs to distribution system.

7. Maintaining pressures at key points to divide the available gas during heavy demand periods.

8. Maintaining pressure log sheets.

9. Maintaining lowest necessary line pressures consistent with satisfactory service.

10. Rerouting gas during emergencies and planned shut downs.

Materials and Expenses:

11. Consultants' fees and expenses.

12. Meals, travelling, and incidental expenses.

13. Office supplies, stationery and printed forms.

14. Transportation: company and rented vehicles.

15. Utility services: light, water, telephone.

872. Compressor Station Labor and Expenses

This account shall include the cost of labor, materials used and expenses incurred in operating distribution compressor stations.

ITEMS

Labor:

1. Supervising.

2. Operating and checking engines, equipment valves, machinery, gauges, and other instruments, including cleaning, wiping, polishing, and lubricating.

3. Operating boilers and boiler accessory equipment, including fuel handling and ash disposal, recording fuel used, and unloading and storing coal and oil.

4. Repacking valves and replacing gauge glasses, etc.

5. Recording pressures, replacing charts, keeping logs, and preparing reports of station operations.

6. Inspecting and testing equipment and instruments when not specifically to determine necessity for repairs or replacement of parts.

7. Pumping drips at the station.

8. Taking dew point readings.

9. Testing water.

10. Cleaning structures housing equipment, cutting grass and weeds, and doing minor grading around station.

11. Cleaning and repairing hand tools used in operations.

12. Driving trucks.

13. Watching during shut downs.

14. Clerical work at station.

Materials and Expenses:

15. Scrubber oil.

16. Lubricants, wiping rags, and waste.

17. Charts and printed forms, etc.

18. Gauge glasses.

19. Chemicals to test water.

20. Water tests and treatment by other than employees.

21. Janitor and washroom supplies, first aid supplies, landscaping supplies, etc.

22. Employees' transportation and travel expenses.

23. Freight, express, parcel post, trucking, and other transportation.

24. Utility services: light, water, telephone.

873. Compressor Station Fuel and Power

A. This account shall include the cost of gas, coal, oil, or other fuel, or electricity, used for the operation of distribution compressor stations, including applicable amounts of fuel stock expenses.

B. Records shall be maintained to show the quantity of each type of fuel consumed or electricity used at each compressor station, and the cost of such fuel or power.

Note: The cost of fuel, except gas, and related fuel stock expenses shall be charged initially to appropriate fuel accounts carried in accounts 150.151, Fuel Stock, and 150.152, Fuel Stock Expenses Undistributed, and cleared to this account on the basis of fuel used. See accounts 150.151 and 150.152 for the basis of fuel costs and includible fuel stock expenses.

874. Mains and Services Expenses

This account shall include the cost of labor, materials used and expenses incurred in operating distribution system mains and services.

ITEMS

Labor:

1. Supervising.

2. Walking or patrolling lines.

3. Attending valves, lubricating valves and other equipment, blowing and cleaning lines and drips, draining water from lines, thawing freezes.

4. Taking line pressures, changing pressure charts, operating alarm gauges.

5. Building and repairing gate boxes, foot bridges, stiles, etc., used in distribution mains operations, erecting line markers and warning signs, etc.

6. Cleaning debris, cutting grass and weeds on rights-of-way.
7. Inspecting and testing equipment not specifically to determine necessity for repairs.
8. Protecting utility property during work by others.
9. Standby time of emergency crews, responding to fire calls, etc.
10. Locating and inspecting valve boxes or drip riser boxes, service lines, mains, etc.
11. Cleaning and repairing tools used in mains operations, making tool boxes, etc.
12. Cleaning structures and equipment.
13. Driving trucks used in mains and service operations.
14. Making routine leak survey.
15. Oil fogging.

Materials and Expenses:

16. Line markers and warning signs.
17. Lumber, nails, etc., used in building and repairing gate boxes, foot bridges, stiles, tool boxes, etc.
18. Charts.
19. Scrubber oils.
20. Hand tools.
21. Lubricants, wiping rags, waste, etc.
22. Freight, express, parcel post, trucking and other transportation.
23. Uniforms.
24. Employee transportation and travel expenses.
25. Janitor and washroom supplies.
26. Utility services: light, water, telephone.
27. Gas used in mains operations.
28. Oil for fogging.

875. Measuring and Regulating Station Expenses

This account shall include the cost of labor, materials used and expenses incurred in the operation of measuring and regulating station equipment located on local distribution systems exclusive of equipment used to serve specific customers. (See account 876.)

ITEMS

Labor:

1. Supervising.
2. Recording pressures and changing charts, reading meters, etc.
3. Estimating lost meter registrations, etc., except purchases and sales.
4. Calculating gas volumes from meter charts, except gas purchases and sales.

5. Adjusting and calibrating measuring equipment, changing meters, orifice plates, gauges, clocks, etc.

6. Taking and testing gas samples, inspecting and testing valves, regulators, gas sample tanks and other meter engineers' equipment, determining specific gravity and b.t.u. content of gas.

7. Inspecting and testing equipment and instruments not specifically to determine necessity for repairs, including pulsation tests.

8. Cleaning and lubricating equipment.

9. Keeping log and other operating records.

10. Attending boilers and operating other accessory equipment.

11. Installing and removing district gauges for pressure survey.

12. Thawing freeze in gauge pipe.

13. Inspecting and pumping drips, dewatering manholes and pits, inspecting sumps, cleaning pits, blowing meter drips, etc.

14. Moving equipment, minor structures, etc., not in connection with maintenance or construction.

Materials and Expenses:

15. Charts and printed forms, stationery and office supplies, etc.

16. Lubricants, wiping rags, waste.

17. Uniforms.

18. Employee transportation and travel expenses.

19. Freight, express, parcel post, trucking and other transportation.

20. Utility services: light, water, telephone.

876. Measuring and Regulating Station Expenses--Industrial

This account shall include the cost of labor, materials used and expenses incurred in the operation of measuring and regulating stations located on local distribution systems to serve specific industrial and commercial customers, such as industrials, hospitals, schools, and other large establishments. (See account 875.)

ITEMS

(See account 875 for items.)

878. Meter and House Regulator Expenses

This account shall include the cost of labor, materials used and expenses incurred in connection with removing, resetting, changing, testing, and servicing customer meters and house regulators.

ITEMS

Labor:

(a) Removing, reinstalling, and changing or exchanging customer meters and house regulators:

1. Initiating or terminating service, including incidental meter reading.

2. Periodic replacement of meters and house regulators because of age.
3. Changing or exchanging meters and house regulators because of complaints or removal for inspection.
4. Resetting meters on existing connections.
5. Handling meters and house regulators to and from customer premises and meter shop.
6. Listing, tagging, and placing meter labels, etc., for removed and reset meters.
7. Changing position of meters or house regulators on the same premises.
8. Installing or removing blank linings.
9. Unproductive calls, etc.
- (b) Turning on and turning off meters, except for failures of customers to pay bills:
 10. Turning on meters, including necessary time to insure that gas lines are proper to use and that appliances are in usable condition.
 11. Turning off meters including time to make safety precautions.
- (c) Other:
 12. Supervising.
 13. Clerical work on meter history and associated equipment record cards, test cards, and reports.
 14. Handling and recording meters for stock.
 15. Inspecting and testing meters and house regulators.
 16. Inspecting and adjusting meter testing equipment.
 17. Driving trucks used in meter operations.

Materials and Expenses:

18. Meter locks and seals.
 19. Lubricants, wiping rags, waste, etc.
 20. Uniforms.
 21. Freight, express, parcel post, trucking, and other transportation.
 22. Utility services: light, water, telephone, heating.
 23. Office supplies, stationery and printing.
 24. Employees' transportation expenses.
 25. Janitor, washroom, first aid supplies, etc.
879. Customer Installations Expenses
- A. This account shall include the cost of labor, materials used and expenses incurred in work on customer premises other than expenses includible in account 878, Meter and House Regulator Expenses, including the cost of servicing customer-owned appliances when the cost of such work is borne by the utility.
 - B. Damage to customer equipment by employees of the utility whether

incidental to the work or the result of negligence, shall be charged to the job on which the employee was engaged at the time of damage.

ITEMS

Labor:

1. Supervising.
2. Altering customer-owned service extensions or meter connections.
3. Investigating and correcting pressure difficulties or stoppages in customer-owned piping.
4. Adjusting and repairing burner pilots because of impurities in the gas or failure of the distribution system.
5. Oiling or spraying noisy customer meters.
6. Investigating and stopping gas leaks on customers' premises caused by defective meter, customer-owned piping, or customer appliances.
7. Inspecting new installations to determine that the customers' equipment and piping are properly installed and connected.
8. Consolidating meter installations, without change of size, due to elimination of separate meters for different service classifications.
9. Investigating and adjusting complaints of service on customers' premises.
10. Gas load surveys including the incidental preparations and replacement of meters.
11. Unproductive calls.
12. Stenographic and clerical work.
13. Janitorial services, etc.
14. Installing demand or test meters.
15. Inspecting, cleaning, repairing and adjusting customer-owned appliances for domestic, industrial, or commercial use, including house heating furnaces and other space heating appliances, hotel and restaurant appliances.
16. Replacing defective parts in customer-owned appliances and salvaging reusable appliance parts.

Materials and Expenses:

17. Lubricants, wiping rags, waste, etc.
18. Uniforms.
19. Replacement parts for appliances.
20. Office supplies, printing and stationery.
21. Janitor, washroom, first aid supplies, etc.
22. Employees' transportation and travel expenses.
23. Utility services: light, water, telephone.

Note A: Amounts billed customers for any work, the cost of which is charged to this account, shall be credited to this account. Any excess

over costs resulting therefrom shall be transferred to account 488, Miscellaneous Service Revenues.

Note B: Do not include in this account expenses incurred in connection with merchandising, jobbing and contract work.

880. Other Expenses

This account shall include the cost of distribution maps and records, distribution office expenses, and the cost of labor and materials used and expenses incurred in distribution system operations not provided for elsewhere, including the expenses of operating street lighting systems and research and development expenses.

881. Rents

This account shall include rents for property of others used, occupied or operated in connection with the operation of the distribution system. Include herein rentals paid for regulator sites, railroad crossings, rights-of-way, payments to governmental bodies and others for use of public or private lands, reservations for rights-of-way; and also amounts payable for depreciation, taxes, interest or return, under joint facility agreement. (See operating expense instructions 317.3 and 317.5.)

MAINTENANCE

885. Maintenance Supervision and Engineering

This account shall include the cost of labor and expenses incurred in the general supervision and direction of maintenance of distribution system facilities. Direct field supervision of specific jobs shall be charged to the appropriate maintenance accounts. (See operating expense instruction 317.1.)

886. Maintenance of Structures

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of structures, the book cost of which is includible in account 375, Structures and Improvements. (See operating expense instruction 317.2.)

887. Maintenance of Mains

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of distribution mains, the book cost of which is includible in account 376, Mains. (See operating expense instruction 317.2.)

ITEMS

1. Supervising.
2. Trenching, backfilling, and breaking and restoring pavement in connection with the installation of leak or reinforcing clamps.
3. Work performed as the result of municipal improvements, such as

street widening, sewers, etc., where the gas mains are not retired.

4. Municipal inspections relating to maintenance work.

5. Other work of the following character:

a. Locating leaks incident to maintenance.

b. Cutting off mains without replacement. (Minor cuts not retired.)

c. Repairing leaking joints.

d. Repairing broken mains.

e. Repairing leaks on main drip riser or valve test pipe.

f. Bringing main valve box, main drip riser box, valve test pipe box, or pressure pipe roadway box up to grade.

g. Cleaning, repainting, coating, and wrapping exposed mains.

h. Repacking main valves.

i. Locating and clearing gas main faults.

j. Lowering and changing location of mains.

k. Trenching, backfilling, cutting-in or removal of pipe not retired in connection with the installation of leak clamps, valves, or drips.

l. Watching and lamping open cuts associated with maintenance.

m. Restoration of permanent pavement in connection with work chargeable to maintenance.

n. Emergency stand-by time associated with maintenance.

o. Repairing sewers, drains, walls, etc., when damaged by maintenance work.

p. Making electrolysis tests to maintain life of plant.

q. Repairing property of others damaged by maintenance work.

888. Maintenance of Compressor Station Equipment

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of equipment, the book cost of which is includible in account 377, Compressor Station Equipment. (See operating expense instruction 317.2.)

889. Maintenance of Measuring and Regulating Station Equipment

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of equipment, the book cost of which is includible in account 378, Measuring and Regulating Station Equipment. (See operating expense instruction 317.2.)

890. Maintenance of Measuring and Regulating Station Equipment--Industrial

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of equipment, the book cost of which is includible in account 385, Industrial Measuring and Regulating Station Equipment. (See operating expense instruction 317.2.)

892. Maintenance of Services

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of services, the book cost of which is includible in account 380, Services. (See operating expense instruction 317.2.)

ITEMS

1. Supervising.
 2. Testing pipe for leaks and condition of wrapping.
 3. Testing for, locating, and clearing trouble on company maintained services.
 4. Inspecting and testing after repairs have been made.
 5. Reporting on condition of gas services to determine the need for repairs.
 6. Making minor repairs and changes.
 7. Rearranging and changing the location of services not retired.
 8. Repairing service valves for reuse.
 9. Stopping leaks on service pipes and drip risers.
 10. Lowering and raising curb boxes to grade.
 11. Replacing less than a complete service, when not retired.
 12. Installing fittings, valves, drips, frost protection devices, or replacing similar items on existing services.
 13. Cutting and replacing pavement, pavement base and sidewalks in connection with maintenance work.
 14. Restoring condition of services damaged by fire, storm, leakage, flood, accident or other casualties.
 15. Repairing property of others damaged by maintenance work.
 16. Transferring services in connection with the installation of new mains.
 17. Installing, maintaining, and removing temporary facilities to prevent the interruption of service.
 18. Converting low pressure gas distribution service to medium or high pressure service.
 19. Relocating and rerouting gas service temporarily during alterations of buildings.
 20. Performing work resulting from municipal improvements, such as street widening, sewers, etc.
 21. Replacing service valve box or drip riser box.
 22. Installing, removing or replacing service valve, drip pot, or drip riser.
 23. Repacking service valve.
893. Maintenance of Meters and House Regulators
This account shall include the cost of labor, materials used and

expenses incurred in the maintenance of meters and house regulators, the book cost of which is includible in accounts 381, Meters, and 383, House Regulators. (See operating expense instruction 317.2.)

ITEMS

1. Inspecting and testing meters and house regulators on customers' premises or in shops in connection with repairs.

2. Cleaning, repairing, and painting meters, house regulators, and accessories and equipment.

3. Repairing testing equipment.

4. Rebuilding and overhauling meters without changing their rated capacities.

5. Resealing house regulators with mercury, replacing diaphragms, springs and other defective or worn parts.

6. Replacing or adding any item not constituting a retirement unit.

894. Maintenance of Other Equipment

A. This account shall include the cost of labor, materials used and expenses incurred in the maintenance of street lighting equipment and all other distribution system equipment not provided for elsewhere, the book cost of which is includible in accounts 386, Other Property on Customers' Premises, and 387, Other Equipment. (See operating expense instruction 317.2.)

B. This account shall be subdivided so as to show separately the cost of maintenance (when the cost is borne by the utility) of gas property leased to customers, the book cost of which is included in account 386, Other Property on Customers' Premises.

Joint Expenses

895.1 Joint Expenses--Debit

A. This account shall include amounts for the cost of operation and maintenance payable by the gas department to others, or to a coordinate department, for joint facilities used, occupied, or operated in connection with distribution of gas. (See operating expense instruction 317.5.)

B. The records supporting the entries to this account shall be so kept that the utility can furnish a complete explanation of the debits to this account, including the following:

(1) Charges from others.

(2) Charges from coordinate departments.

895.2 Joint Expenses--Credit

A. This account shall include such portion of the cost of operating and maintaining joint facilities operated by the utility in connection with the distribution of gas as is charged to others or to another

coordinate department. (See operating expense instruction 317.5)

B. The records supporting the entries to this account shall be so kept that the utility can furnish a complete explanation of the credits to this account, including the following:

- (1) Charges to others.
- (2) Charges to coordinate departments.

5. CUSTOMER ACCOUNTS EXPENSES

Operation

901. Supervision

This account shall include the cost of labor and expenses incurred in the general direction and supervision of customer accounting and collecting activities. Direct supervision of a specific activity shall be charged to account 902, Meter Reading Expenses, or account 903, Customer Records and Collection Expenses, as appropriate. (See operating expense instruction 317.1.)

902. Meter Reading Expenses

This account shall include the cost of labor, materials used and expenses incurred in reading customer meters, and determining consumption when performed by employees engaged in reading meters.

ITEMS

Labor:

1. Addressing forms for obtaining meter readings by mail.
2. Changing and collecting meter charts used for billing purposes.
3. Inspecting time clocks, checking seals, etc., when performed by meter readers and the work represents a minor activity incidental to regular meter reading routine.
4. Meter reading--small consumption, and obtaining load information for billing purposes. (Exclude and charge to account 878, Meter and House Regulator Expenses, or to account 903, Customer Records and Collection Expenses, as applicable, the cost of obtaining meter readings, first and final, if incidental to the operation of removing or resetting, sealing or locking, and disconnecting, or reconnecting meters.)
5. Measuring gas--large consumption, including reading meters, changing charts, calculating charts, estimating lost meter registrations, determining specific gravity, etc., for billing purposes.
6. Computing consumption from meter reader's book or from reports by mail when done by employees engaged in reading meters.
7. Collecting from prepayment meters when incidental to meter reading.
8. Maintaining record of customers' keys.
9. Computing estimated or average consumption when performed by

employees engaged in reading meters.

Materials and Expenses:

10. Badges, lamps, and uniforms.
11. Demand charts, meter books and binders and forms for recording readings, but not the cost of preparation.
12. Postage and supplies used in obtaining meter readings by mail.
13. Transportation, meals, and incidental expenses.

903. Customer Records and Collection Expenses

This account shall include the cost of labor, materials used and expenses incurred in work on customer applications, contracts, orders, credit investigations, billing and accounting, collections and complaints.

ITEMS

Labor:

1. Receiving, preparing, recording and handling routine orders for service, disconnections, transfers or meter tests initiated by the customer, excluding the cost of carrying out such orders, which is chargeable to the account appropriate for the work called for by such orders.
2. Investigations of customers' credit and keeping of records pertaining thereto, including records of uncollectible accounts written off.
3. Receiving, refunding or applying customer deposits and maintaining customer deposit, line extension, and other miscellaneous records.
4. Checking consumption shown by meter readers' reports where incidental to preparation of billing data.
5. Preparing address plates and addressing bills and delinquent notices.
6. Preparing billing data.
7. Operating billing and bookkeeping machines.
8. Verifying billing records with contracts or rate schedules.
9. Preparing bills for delivery, and mailing or delivering bills.
10. Collecting revenues, including collection from prepayment meters unless incidental to meter reading operations.
11. Balancing collections, preparing collections for deposit, and preparing cash reports.
12. Posting collections and other credits or charges to customer accounts and extending unpaid balances.
13. Balancing customer accounts and controls.
14. Preparing, mailing, or delivering delinquent notices and preparing reports of delinquent accounts.

15. Final meter reading of delinquent accounts when done by collectors incidental to regular activities.

16. Disconnecting and reconnecting service because of nonpayment of bills.

17. Receiving, recording, and handling of inquiries, complaints, and request for investigations from customers, including preparation of necessary orders, but excluding the cost of carrying out such orders, which is chargeable to the account appropriate for the work called for by such orders.

18. Statistical and tabulating work on customer accounts and revenues, but not including special analyses for sales department, rate department, or other general purposes, unless incidental to regular customer accounting routines.

19. Preparing and periodically rewriting meter reading sheets.

20. Determining consumption and computing estimated or average consumption when performed by employees other than those engaged in reading meters.

Materials and Expenses:

21. Address plates and supplies.

22. Cash overages and shortages.

23. Commissions or fees to others for collecting.

24. Payments to credit organizations for investigations and reports.

25. Postage.

26. Transportation expenses, including transportation of customer bills and meter books under centralized billing procedure.

27. Transportation, meals, and incidental expenses.

28. Bank charges, exchange, and other fees for cashing and depositing customers' checks.

29. Forms for recording orders for services, removals, etc.

30. Charges made direct or apportioned through clearing accounts for costs covering the use of electronic data processing equipment and other mechanical equipment, whether owned or rented from others, properly assignable to this account in connection with the customer records and collection functions.

Note: The cost of work on meter history and meter location records is chargeable to account 878, Meter and House Regulator Expenses.

904. Uncollectible Accounts

This account shall be charged with amounts sufficient to provide for losses from uncollectible utility revenues. Concurrent credits shall be made to account 144, Accumulated Provision for Uncollectible Accounts--Credit. Losses from uncollectible accounts shall be charged to

account 144.

905. Miscellaneous Customer Accounts Expenses

This account shall include the cost of labor, materials used and expenses incurred not provided for in other accounts.

ITEMS

Labor:

1. General clerical and stenographic work.
2. Miscellaneous labor.

Materials and Expenses:

3. Communication service.
4. Miscellaneous office supplies and expenses and stationery and printing other than those specifically provided for in accounts 902 and 903.

906. Rents

This account shall include rents of property of others used in connection with customers' accounting and collecting. (See account 903, and operating expense instructions 317.3 and 317.5.)

6. CUSTOMER SERVICE EXPENSES

Operation

909. Supervision

This account shall include the cost of labor and expenses incurred in the general direction and supervision of customer service activities, the object of which is to promote safe, efficient and economical use of the utility's service. Direct supervision of a specific activity, such as customer assistance and informational advertising shall be charged to the account wherein the costs of such activity are included. (See operating expense instruction 317.1.)

910. Customer Assistance Expenses

A. This account shall include the cost of labor, materials used and expenses incurred in providing instructions or assistance to present customers, the object of which is to promote safe, efficient and economical use of the utility's service.

B. Wherever allocations are used to arrive at the amount to be included in this account, and account 916, Demonstrating and Selling Expenses, the method and basis of allocation shall be reflected by underlying records.

ITEMS

Labor:

1. Direct supervision of department.
2. Processing customer inquiries relating to the proper use of present gas equipment, the replacement of such equipment and information related

to such equipment.

3. Advice directed to customers as to how they may achieve the best heating and safety with respect to existing gas equipment.

4. Demonstrations, exhibits, lectures and other programs designed to instruct customers in the economical or efficient use of gas service.

5. Engineering and technical advice requested by customers without prior solicitation by the utility in connection with the present or future use of utility service.

Materials and Expenses:

6. Supplies and expenses pertaining to demonstrations, exhibits, lectures and other programs.

7. Loss in value on equipment and appliances used for demonstration purposes.

8. Office supplies and expenses.

9. Transportation, meals and incidental expenses.

Note A: Do not include in this account expenses that are already provided for in accounts 879, Customer Installations Expenses and 416, Costs and Expenses of Merchandising, Jobbing and Contract Work.

911. Informational Advertising Expenses

A. This account shall include the cost of labor, materials used and expenses incurred in advertising activities which primarily convey concrete information as to what the utility urges or suggests customers should do in utilizing gas service to protect health and safety, to promote environmental protection, to utilize their gas equipment safely and economically, or to conserve gas. Include also in this account advertising activities relating to actions by the gas utility which bear directly on its provision of service to the customer.

B. Entries relating to informational advertising included in this account shall contain or refer to supporting documents which identify the specific advertising message. If references are used, copies or scripts of the advertising message shall be readily available.

C. Where informational advertising is undertaken by an association on behalf of its members, or by a holding company on behalf of its subsidiaries, the amount of expense for such advertising charged to any member or subsidiary which is a New York gas utility and included in this account, shall be determined in accordance with the text of this account as set forth herein.

ITEMS

Labor:

1. Direct supervision of informational advertising activities.

2. Preparing informational advertising material for newspapers,

periodicals, billboards, etc., and preparing and conducting informational motion pictures, radio and television programs.

3. Preparing informational booklets, bulletins, etc. used in direct mail advertising.

4. Preparing informational window and other displays.

5. Clerical and stenographic work.

6. Investigating advertising agencies and media and conducting negotiations in connection with the placement and subject matter of informational advertising.

Materials and Expenses:

7. Advertising in newspapers, periodicals, billboards, radio, etc. for informational purposes.

8. Fees and expenses of advertising agencies and commercial artists related to informational advertising.

9. Postage on direct mail informational advertising.

10. Printing of informational booklets, dodgers, bulletins, etc.

11. Supplies and expenses in preparing informational advertising materials.

12. Office supplies and expenses.

13. Novelties for general distribution.

Below are examples of the advertising includible in this account:

14. Instructions in the proper use of equipment, owned by the utility or the customer, which makes use of the utility's service.

15. Information as to new rates, billing practices, new inspection or meter reading schedules.

16. Notification of emergency conditions and procedures to be followed during the emergency.

17. Advice concerning hazards associated with the utility's gas service.

18. Appeals for conservation of gas with suggestions of measures the customer may take.

Note: Exclude from the account and charge to account 930.2, Miscellaneous General Expenses, the cost of publication of stockholder reports, dividend notices, bond redemption notices, financial statements, and other notices of a general corporate character. Exclude also all expenses of promotional, institutional or goodwill, and political advertising. (See account 917, Promotional Advertising Expenses, account 930.1, Institutional or Goodwill Advertising Expenses and account 426.4, Expenditures for Certain Civic, Political and Related Activities.)

912. Miscellaneous Customer Service Expenses

This account shall include the cost of labor, materials used and expenses incurred in connection with customer service activities which are not includible in other customer service expense accounts.

ITEMS

Labor:

1. General clerical and stenographic work not assigned to specific functions.

2. Miscellaneous labor.

Materials and Expenses:

3. Communication service.

4. Printing, postage and office supplies expenses applicable to customer service activities except those chargeable to account 911, Informational Advertising Expenses.

913. Rents

This account shall include rents properly includible in operating expenses for property of others used by customer service organizations for customer service activities. (See operating expenses instructions 317.3 and 317.5.)

7. SALES PROMOTION EXPENSES

Operation

915. Supervision

This account shall include the cost of labor and expenses incurred in the general direction and supervision of sales promotion activities, except merchandising, the object of which is to promote or retain the use of utility services by present or prospective customers. Direct supervision of a specific activity such as demonstrating, selling or promotional advertising shall be charged to the account wherein the costs of such activity are included. (See operating expense instruction 317.1.)

916. Demonstrating and Selling Expenses

A. This account shall include the cost of labor, materials used and expenses incurred in promotional, demonstrating, and selling activities, except by merchandising, designed to promote or retain the use of utility services by present or prospective customers.

B. Wherever allocations are used to arrive at the amount to be included in this account and Account 910, Customer Assistance Expenses, the method and basis of allocation shall be reflected by underlying records.

ITEMS

Labor:

1. Demonstrating uses of utility services.

2. Conducting cooking schools, preparing recipes, and related home service activities.

3. Exhibitions, displays, lectures, and other programs designed to promote use of utility services.

4. Experimental and developmental work in connection with new and improved appliances and equipment, prior to general public acceptance.

5. Solicitation of new customers or additional business from old customers, including commissions paid employees.

6. Engineering and technical advice to present or prospective customers in connection with promoting or retaining the use of utility services.

7. Special customer canvasses when their primary purposes is the retention of business or the promotion of new business.

Materials and Expenses:

8. Cooperative promotions with appliance dealers, builders, and plumbing contractors designed to promote or retain the use of utility service.

9. Inducements offered directly to customers and incentive awards given to employees in connection with promoting or retaining the use of utility services.

10. Supplies and expenses pertaining to demonstration and experimental and developmental activities.

11. Booth and temporary space rental.

12. Loss in value on equipment and appliances used for demonstration purposes.

13. Transportation, meals and incidental expenses.

Note: A separate subdivision of this account shall be maintained to record the cost of programs designed primarily to induce industry to locate within the company's service territory.

917. Promotional Advertising Expenses

A. This account shall include the cost of labor, materials used and expenses incurred in advertising designed to promote or retain the use of utility service, except advertising the sale of merchandise by the utility.

B. Entries relating to promotional advertising included in this account shall contain or refer to supporting documents which identify the specific advertising message. If references are used, copies or scripts of the advertising message shall be readily available.

C. Where promotional advertising is undertaken by an association on behalf of its members, or by a holding company on behalf of its subsidiaries, the amount of expense for such advertising charged to any

member or subsidiary which is a New York gas utility and included in this account shall be determined in accordance with the text of this account as set forth.

ITEMS

Labor:

1. Direct supervision of sales promotional activities.
2. Preparing promotional advertising material for newspapers, periodicals, billboards, etc., and preparing and conducting promotional motion pictures, radio and television programs.
3. Preparing booklets, bulletins, etc. used in direct mail promotional advertising.
4. Preparing window and other displays.
5. Clerical and stenographic work.
6. Investigating advertising agencies and media and conducting negotiations in connection with the placement and subject matter of promotional advertising.

Materials and Expenses:

7. Promotional advertising in newspapers, periodicals, billboards, radios, etc.
8. Promotional advertising matters such as posters, bulletins, booklets, and related items.
9. Fees and expenses of advertising agencies and commercial artists related to promotional advertising.
10. Novelties for general distribution.
11. Postage on direct mail promotional advertising.
12. Premiums distributed generally, such as recipe books, etc., when not offered as inducement to purchase appliances.
13. Printing of promotional booklets, dodgers, bulletins, etc.
14. Supplies and expenses in preparing promotional advertising materials.
15. Office supplies and expenses.

Note A: The cost of advertisements which set forth the value or advantages of utility service without reference to specific appliances, or, if reference is made to appliances, invites the reader to purchase appliances from his dealer, or refer to appliances not carried for sale by the utility, shall be considered sales promotion advertising and charged to this account. However, advertisements which are limited to specific makes of appliances sold by the utility and prices, terms, etc., thereof without referring to the value or advantages of utility service, shall be considered as merchandise advertising and the cost shall be charged to account 416, Costs and Expenses of Merchandizing,

Jobbing and Contract Work.

Note B: Advertisements which substantially mention or refer to the value or advantages of utility service, together with specific reference to makes of appliances sold by the utility and the price, terms, etc., thereof, and designed for the joint purposes of increasing the use of utility service and the sales of appliances shall be considered as a combination advertisement and the costs shall be distributed between this account and account 416, Costs and Expenses of Merchandising, Jobbing and Contract Work on the basis of space, time or other promotional factors.

Note C: A separate subdivision of this account shall be maintained to record the cost of advertising designed primarily to induce industry to locate within the company's service territory.

918. Miscellaneous Sales Promotion Expenses

This account shall include the cost of labor, materials used and expenses incurred in connection with sales promotion activities, except merchandising, which are not includible in other sales promotion expense accounts.

ITEMS

Labor:

1. General clerical and stenographic work not assigned to specific functions.
2. Special analysis of customer accounts and other statistical work for sales purposes not a part of the regular customer accounting and billing routine.
3. Miscellaneous labor.

Materials and Expenses:

4. Communication service.
5. Printing, postage and office supplies and expenses applicable to sales promotion activities except those chargeable to account 917, Promotional Advertising Expenses.

919. Rents

This account shall include rents properly includible in operating expenses for property of others used by the sales promotions organizations for promotional, demonstrating and sales promotional activities, except merchandising. (See operating expenses instructions 317.3 and 317.5.)

Note: Rent expenses in connection with merchandising is includible in account 416, Costs and Expenses of Merchandising, Jobbing and Contract Work.

8. ADMINISTRATIVE AND GENERAL EXPENSES

Operation

920. Administrative and General Salaries

A. This account shall include the compensation (salaries, bonuses, and other consideration for services, but not including directors' fees) of officers, executives, and other employees of the utility properly chargeable to utility operations and not chargeable directly to a particular operating function.

B. This account may be subdivided in accordance with a classification appropriate to the departmental or other functional organization of the utility.

921. Office Supplies and Expenses

A. This account shall include office supplies and expenses incurred in connection with the general administration of the utility's operations which are assignable to specific administrative or general departments and are not specifically provided for in other accounts. This includes the expenses of the various administrative and general departments, the salaries and wages of which are includible in account 920.

B. This account may be subdivided in accordance with a classification appropriate to the departmental or other functional organization of the utility.

ITEMS

1. Automobile service, including charges through clearing account.
2. Bank messenger and service charges.
3. Books, periodicals, bulletins and subscriptions to newspapers, newsletters, tax services, etc.
4. Building service expenses for administrative and general purposes.
5. Communication service expenses.
6. Cost of individual items of office equipment used by general departments which are of small value or short life.
7. Membership fees and dues in trade, technical, and professional associations paid by utility for employees. (Company memberships are includible in account 930.2.)
8. Office supplies and expenses.
9. Payment of court costs, witness fees, and other expenses of legal department.
10. Postage, printing and stationery.
11. Meals, traveling and incidental expenses.

Note: Office expenses which are clearly applicable to any group of operating expenses other than the administrative and general group shall be included in the appropriate account in such group. Further, general expenses which apply to the utility as a whole rather than to a

particular administrative function shall be included in account 930.2, Miscellaneous General Expenses.

922. Administrative Expenses Transferred--Credit

This account shall be credited with administrative expenses recorded in accounts 920 and 921 which are transferred to construction costs or to nonutility accounts. (See gas plant instruction 313.4.)

923. Outside Services Employed

A. This account shall include the fees and expenses of professional consultants and others for general services which are not applicable to a particular operating function or to other accounts. It shall include also the pay and expenses of persons engaged for a special or temporary administrative or general purpose in circumstances where the person so engaged is not considered as an employee of the utility.

B. This account shall be so maintained as to permit ready summarization according to the nature of service and the person furnishing the same.

ITEMS

1. Fees, pay and expenses of accountants and auditors, actuaries, appraisers, attorneys, engineering consultants, management consultants, negotiators, public relations counsel, tax consultants, etc.

2. Supervision fees and expenses paid under contracts for general management services.

Note: Do not include inspection and brokerage fees and commissions chargeable to other accounts or fees and expenses in connection with security issues which are includible in the expenses of issuing securities.

924. Property Insurance

A. This account shall include the cost of insurance or reserve accruals to protect the utility against losses and damages to owned or leased property used in its utility operations. It shall include also the cost of labor and related supplies and expenses incurred in property insurance activities.

B. Recoveries from insurance companies or others for property damages shall be credited to the account charged with the cost of the damage. If the damaged property has been retired, the credit shall be to the appropriate account for accumulated provision for depreciation.

C. Records shall be kept so as to show the amount of coverage for each class of insurance carried, the property covered, and the applicable premiums. Any dividends distributed by mutual insurance companies shall be credited to the accounts to which the insurance premiums were charged.

ITEMS

1. Premiums payable to insurance companies for fire, storm, burglary, boiler explosion, lightning, fidelity, riot, and similar insurance.
2. Amounts credited to account 261, Property Insurance Reserve, for similar protection.
3. Special costs incurred in procuring insurance.
4. Insurance inspection service.
5. Insurance counsel, brokerage fees, and expenses.

Note A: The cost of insurance or reserve accruals capitalized shall be charged to construction either directly or by transfer to construction work orders from this account.

Note B: The cost of insurance or reserve accruals for the following classes of property shall be charged as indicated:

- (1) Materials and supplies and stores equipment, to account 150.163, Stores Expense Undistributed or appropriate materials account.
- (2) Transportation and other general equipment to appropriate clearing accounts that may be maintained.
- (3) Gas plant leased to others, to account 413, Expenses of Gas Plant Leased to Others.
- (4) Nonutility property, to the appropriate nonutility income account.
- (5) Merchandise and jobbing property, to account 915, Costs and Expenses of Merchandising, Jobbing and Contract Work.

Note C: The cost of labor and related supplies and expenses of administrative and general employees, who are only incidentally engaged in property insurance work, may be included in accounts 920 and 921, as appropriate.

925. Injuries and Damages

A. This account shall include the cost of insurance or reserve accruals to protect the utility against injuries and damages claims of employees or others, losses of such character not covered by insurance, and expenses incurred in settlement of injuries and damages claims. It shall also include the cost of labor and related supplies and expenses incurred in injuries and damages activities.

B. Reimbursements from insurance companies or others for expenses charged hereto on account of injuries and damages and insurance dividends or refunds shall be credited to this account.

ITEMS

1. Premiums payable to insurance companies for protection against claims from injuries and damages by employees or others, such as public liability, property damages, casualty, employee liability, etc., and amounts credited to account 262, Injuries and Damages Reserve, for

similar protection.

2. Losses not covered by insurance or reserve accruals on account of injuries or deaths to employees or others and damages to the property of others.

3. Fees and expenses of claim investigators.

4. Payment of awards to claimants for court costs and attorneys' services.

5. Medical and hospital service and expenses for employees as the result of occupational injuries, or resulting from claims of others.

6. Compensation payments under workmen's compensation laws.

7. Compensation paid while incapacitated as the result of occupational injuries. (See note A.)

8. Cost of safety, accident prevention and similar educational activities.

Note A: Payments to or in behalf of employees for accident or death benefits, hospital expenses, medical supplies or for salaries while incapacitated for service or on leave of absence beyond periods normally allowed, when not the result of occupational injuries, shall be charged to account 926, Employee Pensions and Benefits.

Note B: The cost of injuries and damages or reserve accruals capitalized shall be charged to construction directly or by transfer to construction work orders from this account.

Note C: Exclude herefrom the time and expenses of employees (except those engaged in injuries and damages activities) spent in attendance at safety and accident prevention educational meetings, if occurring during the regular work period.

Note D: The cost of labor and related supplies and expenses of administrative and general employees, who are only incidentally engaged in injuries and damages activities, may be included in accounts 920 and 921, as appropriate.

Note E: Losses or insurance premiums paid in connection with transportation and garage equipment shall be charged to the appropriate accounts for transportation expenses.

926. Employee Pensions and Benefits

This account shall include employee pensions, welfare expenses and the costs incurred in the administration of the pension and welfare department. The account shall be maintained according to subaccounts shown below:

926.1 Employee Pensions

A. This account shall include pensions payable currently to retired employees or their beneficiaries. (See general instruction 311.16.)

B. This account shall include the cost of advance provision for pensions to be paid to retired employees or their beneficiaries. Such cost represents amounts payable to a trust fund or to an insurance company where the following conditions are met:

- (1) Pension plan is definite and formally adopted.
- (2) Amounts paid are irrevocably dedicated to pension purposes.
- (3) A program of advance provision based on actuarial studies or on other recognized and acceptable systematic method of computation or allocation is undertaken.

C. This account shall include any payments under the pension plan, in addition to the current accruals specified in paragraph B, such as payments computed in relation to a prior service period, but such amounts may, with the approval of the commission, be spread over a period of years, if their inclusion when paid would seriously distort the expenses of that year.

D. Incidental benefits payable on withdrawal or death under a definite and formally adopted pension plan may be considered as pensions within the intent of paragraphs A and B.

Note A: Credit to this account the portion of pension costs which is applicable to nonutility operations, or which is charged to construction and retirement work orders, and to clearing or other accounts unless such amounts are distributed directly to the accounts concerned in the first instance.

Note B: Social security and unemployment benefit taxes shall be included in account 408, Taxes Other Than Income Taxes, or other appropriate accounts. (See account 408, paragraph D.)

Note C: Each utility making charges to this subaccount under provisions of paragraph B above shall have filed with this commission a copy of its pension plan and pension trust agreement or contract with an insurance company for the purchase of annuities, together with a description of its program of advance provision for pension costs. Any material change in these items shall be reported promptly to the commission.

Note D: A complete record of the computation of the amounts paid as advance provision for pensions shall be maintained.

Note E: No charges shall be made to this account in anticipation of discretionary pension payments in the future.

Note F: Upon adoption of an accrual plan of accounting, pension payments to employees retired before the adoption of such plan shall be charged to an existing pension reserve until such reserve is exhausted, unless the reserve is eliminated by payment of an equivalent amount into

the pension trust fund.

926.2 Employee Welfare Expenses

A. This account shall include the expenses incurred in conducting employees' educational and recreational activities; the cost of employees relief and benefits (other than pensions, and injuries and damages chargeable to account 925, Injuries and Damages) and the cost of life insurance for employees when the utility is not the beneficiary.

B. This account shall not include any charges representing amounts used or to be used for the purchase of securities of the accounting company or any associated company, whether contributed by the accounting company or deducted from salaries and wages of employees, unless and until such amounts have actually been realized and paid to the employees in cash or its equivalent subject to their free disposition. To the extent that the securities thus purchased have an actual market value, the amounts paid for them may be carried meanwhile in account 128, Other Special Funds; otherwise such amounts shall be charged to account 426, Miscellaneous Income Deductions. (See general instruction 311.7(b).)

Note A: When the utility is the beneficiary of insurance on officers or employees, the cash surrender value shall be included in account 174, Miscellaneous Current and Accrued Assets, and the excess of cost of insurance over such cash surrender value shall be charged to account 426, Miscellaneous Income Deductions.

Note B: See subaccount 926.1, note B.

Note C: Credit to this account the portion of welfare expenses which is applicable to nonutility operations or which is charged to construction and retirement work orders, and to clearing or other accounts unless such amounts are distributed directly to the accounts concerned in the first instance.

926.3 Pension and Welfare Administration

This account shall include the salaries of persons engaged in the administration of the pension and welfare department and the expenses incurred in such administration.

Note A: The cost of labor and related supplies and expenses of administrative and general employees who are only incidentally engaged in welfare and pension activities may be included in the accounts appropriate for their major duties.

Note B: Credit to this account the portion of the cost of the administration of the welfare and pension department which is applicable to amounts transferred to nonutility operations or which are charged to construction and retirement work orders or to clearing or other accounts, unless such administrative costs are distributed directly to

the accounts concerned in the first instance.

927. Franchise Requirements

A. This account shall include payments to municipal or other governmental authorities, and the cost of materials, supplies and services furnished such authorities without reimbursement in compliance with franchise, ordinance, or similar requirements; provided, however, that the utility may charge to this account at regular tariff rates, instead of cost, utility service furnished without charge under provisions of franchises. (See also account 302, Franchises and Consents.)

B. When no direct outlay is involved, concurrent credit for such charges shall be made to account 929, Duplicate Charges--Credit.

C. The account shall be maintained so as to readily reflect the amounts of cash outlays, utility service supplied without charge, and other items furnished without charge.

Note A: Franchise taxes shall not be charged to this account but to account 408.1, Taxes Other Than Income Taxes, Utility Operating Income.

Note B: Any amount paid as initial consideration for a franchise running for more than one year shall be charged to account 302, Franchises and Consents.

928. Regulatory Commission Expenses

A. This account shall include all expenses (except pay of regular employees only incidentally engaged in such work) properly includible in utility operating expenses, incurred by the utility in connection with formal cases before regulatory commissions, or other regulatory bodies, or cases in which such a body is a party, including payments made to a regulatory commission for fees assessed against the utility for pay and expenses of such commission, its officers, agents, and employees.

B. Amounts of regulatory commission expenses which by approval or direction of the commission are to be spread over future periods shall be charged to account 186, Miscellaneous Deferred Debits, and amortized by charges to this account.

C. The utility shall be prepared to show the cost of each formal case.

ITEMS

1. Salaries, fees, retainers, and expenses of counsel, solicitors, attorneys, accountants, engineers, clerks, attendants, witnesses, and others engaged in the prosecution of, or defense against petitions or complaints presented to regulatory bodies, or in the valuation of property owned or used by the utility in connection with such cases.

2. Office supplies and expenses, payments to public service or other regulatory commissions, stationery and printing, traveling expenses, and

other expenses incurred directly in connection with formal cases before regulatory commissions.

Note A: Exclude from this account and include in other appropriate operating expense accounts, expenses incurred in the improvement of service, additional inspection, or rendering reports, which are made necessary by the rules and regulations, or orders, of regulatory bodies.

Note B: Do not include in this account amounts includible in account 302, Franchises and Consents, account 181, Unamortized Debt Expense, or account 214, Capital Stock Expense. Expenses incident to securing certificates of convenience and necessity from regulatory bodies shall be charged to account 302, Franchises and Consents. Costs and expenses incident to securing authorization for issuance of long term debt or capital stock shall be charged to account 181, Unamortized Debt Expense or account 214, Capital Stock Expense, as appropriate.

Note C: Do not include in this account costs incident to the acquisition of franchises, consents or certificates, or to construction or acquisition of gas property, which are chargeable to the gas plant accounts. Costs incurred in connection with property purchases shall be accounted for as provided in gas plant instruction section 313.5. (See also accounts 183.1 and 183.2.)

Note D: Do not include in this account expenses in connection with investigations by legislative bodies or cases to which the utility is not a party.

Note E: The cost of maintaining continuing property records of gas plant shall not be included herein but in other operation and maintenance expense accounts appropriate for the class of expenditure.

929. Duplicate Charges--Credit

This account shall include concurrent credits for charges which may be made to operating expenses or to other accounts for the use of utility service from its own supply. Include, also, offsetting credits for any other charges made to operating expenses for which there is no direct money outlay.

930.1 Institutional or Goodwill Advertising Expenses

A. This account shall include the cost of labor, materials used and expenses incurred in advertising and related activities which by their content or presentation clearly indicate that they serve only to improve the image of the utility itself or the area or the community it serves.

B. Entries relating to institutional or goodwill advertising included in this account shall contain or refer to supporting documents which identify the specific advertising message. If references are used, copies or scripts of the advertising message shall be readily available.

C. Where institutional or goodwill advertising is undertaken by an association on behalf of its members, or by a holding company on behalf of its subsidiaries, the amount of expense for such advertising charged to any member or subsidiary which is a New York gas utility and included in this account, shall be determined in accordance with the text of this account as set forth herein.

ITEMS

Labor:

1. Supervision of institutional or goodwill advertising activities.
2. Preparing advertising material for newspapers, periodicals, billboards, etc., and preparing or conducting motion pictures, radio and television programs.
3. Preparing booklets, bulletins, etc., used in direct mail advertising.
4. Preparing window and other displays.
5. Clerical and stenographic work.
6. Investigating advertising agencies and media and conducting negotiations in connection with the placement and subject matter of advertising.

Materials and Expenses:

7. Advertising in newspapers, periodicals, billboards, radio, etc.
8. Advertising matter such as posters, bulletins, booklets and related items.
9. Fees and expenses of advertising agencies and commercial artists.
10. Postage on direct mail advertising.
11. Printing of booklets, dodgers, bulletins, etc.
12. Supplies and expenses in preparing advertising materials.
13. Office supplies and expenses.
14. Novelties for general distribution.

Below are examples of the advertising includible in this account:

15. Pronouncements primarily lauding the utility or the area or community it serves.
16. Advertising activities to inform the public of the utility's consciousness of, or involvement in, health, safety, conservation or environmental programs.
17. Advertising activities to inform the public of the utility's participation in programs to improve the economic conditions of the area or the community it serves.
18. Advertising activities to inform the public of the utility's role of good citizenship in the area or the community it serves.
19. Information and routine data supplied by the utility to local

governments, planning agencies, civic groups, businesses, and the general public which is not includible in Account 911, Informational Advertising Expenses.

930.2 Miscellaneous General Expenses

A. This account shall include the cost of labor and expenses incurred in connection with the general management of the utility not provided for elsewhere.

B. This account shall be maintained or supported in such manner, as to readily disclose the principal types of items included herein, as corporate and fiscal expenses, association dues, contributions, etc.

ITEMS

Labor:

1. Miscellaneous labor not elsewhere provided for.

Expenses:

2. Industry association dues for company memberships.
3. Contributions for conventions and meetings of the industry.
4. Research and development expenses not charged to other operation and maintenance expense accounts on a functional basis.
5. Communication service not chargeable to other accounts.
6. Current trustee, registrar, and transfer agent fees and expenses.
(See Note below.)
7. Stockholders meeting expenses.
8. Dividend and other financial notices.
9. Printing and mailing dividend checks.
10. Directors' fees and expenses.
11. Publishing and distributing annual reports to stockholders.
12. Public notices of financial, operating and other data required by regulatory statutes, not including, however, notices required in connection with security issues or acquisitions of property.

Note: Fees and expenses incurred in connection with original or additional issues of stocks or bonds shall be charged to account 214, Capital Stock Expense, or to account 181, Unamortized Debt Discount and Expense, as appropriate.

931.1 General Rents

This account shall include rent properly includible in gas operating expenses covering the property of others used, occupied or operated in connection with the administrative and general functions of the utility; and also amounts payable for depreciation, taxes, interest or return, under joint facility agreements. (See operating expense instructions 317.3 and 317.5 and account 931.2.)

931.2 Expenses of Data Processing Equipment

This account shall include expenses properly includible in gas operating expenses charged direct or through clearing accounts for costs covering the use of electronic data processing equipment and other mechanical equipment, whether owned or rented from others, in connection with the administrative and general functions of the utility. (See operating expense instructions 317.3 and 317.5 and account 931.1.)

MAINTENANCE

932. Maintenance of General Plant

A. This account shall include the cost of maintenance of general plant. (See operating expense instruction 317.2.)

B. This account shall be subdivided as indicated below:

932.1 Maintenance of Structures

This account shall include the cost of maintenance of general buildings, the book cost of which is included in account 390, Structures and Improvements.

932.2 Maintenance of Office Furniture and Equipment

This account shall include the cost of maintenance of office furniture and equipment, the book cost of which is included in account 391, Office Furniture and Equipment.

932.3 Maintenance of Communication Equipment

This account shall include the cost of maintenance of communication equipment for general use in connection with the utility's operations, the book cost of which is included in account 397, Communication Equipment.

932.4 Maintenance of Miscellaneous Equipment

This account shall include the cost of maintenance of miscellaneous property not provided for elsewhere including miscellaneous general equipment, the book cost of which is included in account 398, Miscellaneous Equipment.

Note: Maintenance of plant included in other general equipment accounts shall be included herein unless charged to clearing accounts or to the particular functional maintenance expense account indicated by the use of the equipment.

JOINT EXPENSES

933.1 Joint Expenses--Debit

A. This account shall include amounts for the cost of operation and maintenance payable by the gas department to others or to a coordinate department for joint facilities used, occupied or operated in connection with administrative and general functions of the utility. (See operating expense instruction 317.5.)

B. The records supporting the entries to this account shall be so kept

1969, to keep its records and accounts in conformity therewith.

(b) During the 12 months following the date on which said uniform system of accounts becomes effective, any such gas corporation may, for purposes of comparison, keep on its books, in addition to the accounts hereby prescribed, such portion or portions of its present accounts as may be deemed desirable by any such corporation.

(c) Each gas corporation for which this uniform system of accounts is prescribed shall classify, set forth, and carry all assets, liabilities, capital stock, and surplus existing as of the effective date of this uniform system of accounts, as prescribed in such system of accounts.

(d) Each such gas corporation shall prepare and file in triplicate with the commission not later than six months after the effective date of this uniform system of accounts, summary statements showing (1) the closing balance of each balance sheet account carried on the books directly preceding the effective date of this system of accounts prescribed herein, the title of each account under this system of accounts to which any portion thereof was transferred, and the amount so transferred, and (2) the opening balance of each account under this system of accounts, the title of each account from which any portion thereof was transferred, and the amount so transferred. Reserves existing at the effective date of this system of accounts accumulated to provide for losses upon retirement or withdrawal of property from service, depreciation, amortization, depletion or replacement of fixed capital or operating property shall be transferred to the accounts prescribed herein for depreciation and amortization reserves.

(e) In prescribing this system of accounts, the commission does not commit itself to the approval or acceptance of any item set out in any account, for the purpose of fixing rates or in determining other matters before the commission.

.SO DOC 16B-320.1

NYCRR

320.1 Definitions.

(a) When used in this system of accounts:

(1) Accounts means the accounts prescribed in this system of accounts.

(2) Associated companies means companies or persons that, directly or indirectly, through one or more intermediaries, control, or are controlled by, or are under common control with, the accounting company.

(3) Control (including the terms controlling, controlled by, and under common control with) means the possession, directly or indirectly, of the power to direct or cause the direction of the management and policies of a company, whether such power is exercised through one or more intermediary companies, or alone, or in conjunction with, or

pursuant to an agreement, and whether such power is established through a majority or minority ownership or voting of securities, common directors, officers, or stockholders, voting trusts, holding trusts, associated companies, contract, or any other direct or indirect means.

(4) Commission or this commission means the Public Service Commission of the State of New York.

(5) Company. (See paragraph (10), *infra*.)

(6) Cost means the amount of money actually paid for property or services or the cash value at the time of the transaction of any consideration other than money. (See, however, gas plant instruction, Section 322.1.)

(7) Gas corporation. (See Public Service Law.)

(8) Long-term debt means notes or other obligations having a life of more than one year from date of creation or assumption (except obligations representing advances from associated companies) and all unmatured bonds and receivers' certificates.

(9) Original cost, as applied to gas plant, means the cost of such property to the person first devoting it to public service.

(10) Person means an individual, a corporation, a partnership, an association, a joint-stock company, a business trust, or any organized group of persons, whether incorporated or not, or any receiver or trustee.

(11) Utility or utility company as used herein and when not otherwise indicated in the context, means any gas corporation. (See Public Service Law.)

.SO DOC 16B-321.1

NYCRR

Section 321.1 Classification of utilities.

(a) For the purpose of applying the system of accounts prescribed herein, utilities are divided into two classes as follows:

Class C:

Utilities having annual gas operating revenues of more than \$150,000 but not more than \$1,000,000. Such utilities shall keep all the accounts prescribed herein which are applicable to their operations.

Class D:

Utilities having annual gas operating revenues of more than \$25,000 but not more than \$150,000. Such utilities shall keep all the accounts prescribed herein which are applicable to their operations, except those accounts in which the letter D does not appear in the prefix.

(b) The class to which any utility belongs shall be determined by the average of its annual gas operating revenues for the three years next preceding the effective date of this system of accounts. If the average of its gas operating revenues for the three years ended December 31 of any year following the effective date of this system of accounts is greater than the maximum specified for the class within which the utility has therefore been included, such utility shall for the succeeding year keep the accounts prescribed for such higher class.

(c) Any utility, which because of its revenues falls within a given class, may, at its option, adopt the system of accounts prescribed for a higher class. Notice of such action shall be promptly filed with the commission.

.SO DOC 16B-321.2

NYCRR

321.2 Records. (a) Each utility shall so keep its books of account, and all other books, records, and memoranda which support in any way the entries in such books of account, as to be able to furnish readily full information as to any item included in any account. Each entry shall be supported by such detailed information as will permit a ready identification, analysis, and verification of all the facts relevant thereto.

(b) The books and records referred to herein include not only account records in a limited technical sense, but all other records such as minute books, stock books, reports, correspondence, memoranda, engineering records, calculations, drawings, etc., which may be useful in developing the history of or facts regarding any transaction.

(c) Except as authorized by this commission, all operating,

accounting, or financial papers, records, books, invoices, stubs, maps, or documents or any papers or records which support entries to any of the accounts or which are necessary for an analysis shall be retained permanently. All such records shall be accessible, at all times, to the authorized representatives of the commission at a location within the State of New York.

(d) Subdivisions of any account in the system of accounts prescribed herein and clearing, temporary, or experimental accounts may be kept, provided that such subdivisions or additional accounts do not impair the integrity of the prescribed accounts. The titles of all subdivisions or subaccounts shall refer by number and title to the account or accounts of which they are subdivisions.

(e) All charges to the accounts prescribed in this system for gas plant, income, operating revenues and operating expenses shall be just and reasonable and any payments by the utility in excess of just and reasonable charges shall be included in account 1538, Miscellaneous Income Deductions.

(f) The numbers prefixed to account titles are to be considered as part of the titles. Each utility may, however, adopt a different system of account numbers provided that the numbers herein prescribed shall appear in the descriptive headings of the ledger accounts. When the same account number is used in systems of accounts prescribed for different classes of operations conducted by one utility, the initial letters G, E, O, R, S, and W may be prefixed to identify the account with gas, electric, omnibus, rail line, steam heating, or water, respectively. Accounts for common utility plant and operations shall be designated by the word "common."

.SO DOC 16B-321.3

NYCRR

321.3 Accounting period. Each utility in Class C shall keep its books on a monthly basis, so that all transactions applicable thereto, as nearly as may be ascertained, shall be entered monthly in the books of the utility. Each utility in Class D shall keep its books on either a monthly or quarterly basis; when the quarterly basis is used provisions contained herein relative to monthly entries shall be regarded as calling for quarterly entries. A trial balance shall be taken after the monthly or quarterly postings have been made, and each utility shall close its books at the end of each calendar year.

.SO DOC 16B-321.4

NYCRR

321.4 Submission of questions. To maintain uniformity of accounting, utilities shall submit questions of doubtful interpretation to the commission for consideration and decision. Utilities shall also ask for

instructions, if occasion arises, regarding the accounting for such transactions as spreading over a number of months relatively large income or expense items which if included in the accounts for a single month would seriously distort the accounts; the disposition of items which relate to transactions which occurred prior to the current calendar year but which were not recorded in the books of account in the prior year and which are relatively so large that inclusion in the accounts for a single year would seriously distort the accounts; and expenditures for replacement of units of property leased from others. Ordinary delayed items shall be charged or credited to the same accounts which would have been charged or credited if the items had not been delayed.

.SO DOC 16B-321.5

NYCRR

321.5 Accounting to be on accrual basis. (a) The utility is required to keep its accounts on the accrual basis. This requires the inclusion in its accounts on an estimated basis of all known transactions of appreciable amount which affect the accounts, even though bills covering such transactions have not been received or rendered. When the bills are received or rendered, appropriate adjustments shall be made.

(b) Also when payments are made for items such as insurance, rents, taxes, or interest, the amount applicable to future periods shall be charged to account 1132, Prepayments, and spread over the periods to which applicable by credits to account 1132, Prepayments, and charges to the accounts appropriate for the expenditure.

.SO DOC 16B-321.6

NYCRR

321.6 Interpretation of lists of items. Lists of "items" appearing in the texts of the accounts or elsewhere herein are for the purpose of more clearly indicating the application of the prescribed accounting. The lists are intended to be representative, but not exhaustive. The appearance of an item in a list warrants inclusion of the item in the account mentioned only when the text of the account also indicates inclusion, inasmuch as the same item frequently appears in more than one list. The proper entry in each instance must be determined by the texts of the accounts.

.SO DOC 16B-321.7

NYCRR

321.7 Transactions with associated companies. (a) Each utility shall so keep its accounts and records as to be able to furnish accurately and expeditiously statements of all transactions with associated companies, showing the general nature of the transactions, the amounts involved therein and the amounts included in each account prescribed herein with respect to such transactions.

(b) Dividends, rebates, or earnings, from associated companies or mutual service companies representing refunds of the excess charges made by such companies over the cost to them, shall be cleared through account 1901, Charges by Associated Companies--Clearing, and shall be credited so far as practicable to the same accounts to which the corresponding charges were made, including proper distinction between construction and operating expenses. Credits applicable to operating expenses which it is impracticable to allocate among the accounts to which the corresponding charges have been made, shall be to account 1806, Duplicate Charges--Credit.

.SO DOC 16B-321.8

NYCRR

321.8 Depreciation accounting.

(a) Depreciation, as applied to gas plant, means the net loss in service value not restored by current maintenance, incurred in connection with the consumption or prospective retirement of gas plant in the course of service from causes which are known to be in current operation and against which the utility is not protected by insurance. Among the causes to be given consideration are wear and tear, decay, action of the elements, exhaustion of natural resources, inadequacy, obsolescence, changes in the art, changes in demand, and requirements of public authorities.

(b) Each utility shall record each month (see also general instruction ò 321.3) the estimated amount of depreciation on gas plant accrued during that month, by crediting the appropriate subdivision of account 1250, Reserve for Depreciation of Utility Plant, and charging the accounts for the depreciation expense as follows:

Account in Which Gas Plant is Included	Subdivision of Account to be Credited	Account to be Charged
1101 Gas Plant in Service	1250.1 Reserve for Depreciation of Gas Plant in Service	1503 Depreciation (See notes hereunder.)
1102 Gas Plant Leased to Others	1250.2 Reserve for Depreciation of Gas Plant Leased to Others	1505.2 Expenses of Gas Plant Leased to Others
1104 Gas Plant Held for Future Use	1250.4 Reserve for Depreciation of Gas Plant Held for Future Use	The question to be submitted to the Commission
1106 Unclassified Gas Plant	1250.6 Reserve for Depreciation of Unclassified Gas Plant	1503 Depreciation (See notes hereunder.)

Note A: To the extent that any gas property is used in construction, the

depreciation thereon shall be charged to account 1103, Construction Work in Progress; if clearing accounts are used, depreciation of plant (except structures) the maintenance and operation of which are charged to clearing accounts, shall be charged to such clearing accounts.

Note B: The accounting for depreciation of utility plant in other departments carried in account 1108, Other Utility Plant, which are subject to regulations by the commission shall be in accordance with the effective system of accounts applicable to such operations.

Note C: Depreciation accruals on "Common" plant (see note B under Utility Plant) shall be currently distributed on an equitable basis to the departments making use thereof; the reserve applicable to common plant shall be carried by Class C utilities in subdivisions of account 1250, Reserve for Depreciation of Utility Plant, applicable to the plant account wherein the common plant is carried.

Note D: See also account 1250, Reserve for Depreciation of Utility Plant, and gas plant instruction section 322.2.

.SO DOC 16B-321.9

NYCRR

321.9 Distribution of pay and expenses of employees. (a) The charges to gas plant, operating expense and other accounts for services and expenses of employees engaged in activities chargeable to various accounts, such as construction and operations (or in more than one type of gas operation, such as production and distribution) shall be based upon the actual time engaged in the respective classes of work, or, in case that method is impracticable, upon the basis of a study of the time actually engaged during a representative period.

(b) The pay and expenses of general officers shall be charged to the actual work on which they are engaged, to the particular operations over which they have direct supervision, or if their jurisdiction is over the entire gas operation, to the appropriate accounts provided in the Administrative and General group in operating expenses.

(c) Except as otherwise specifically provided in this system of accounts or by order of the commission, no amounts for salaries or wages shall be included in charges to gas plant, cost of removal, or gas operating expenses, except employees' welfare and pension expenses includible in account 1800, Other General Expenses, which are not paid to employees affected subject to their free disposition. Payroll deductions made under a statute or order of a court; or for such purposes as group insurance, purchase of appliances or homes, etc., authorized by written order of the employee without coercion of any kind, may be included.

.SO DOC 16B-321.10

NYCRR

321.10 Accounting for other departments. This system of accounts is designed for use by gas utilities. If the utility, in addition to its gas operations, operates other departments, such as electric or steam, it shall keep such accounts for the other departments as may be prescribed by this commission, and in the absence of prescribed accounts, it shall keep such accounts as are proper or necessary to reflect the results of operating each such other department. It is not intended that proprietary and similar accounts which apply to the utility as a whole shall be departmentalized. (See also general instruction § 321.2, subd. (f).)

.SO DOC 16B-321.11

NYCRR

321.11 Allocation of costs between gas plant and operating expenses to be made currently. Each utility shall determine currently the cost which are applicable to the gas plant accounts and in the case of costs involving allocations, the amount which is applicable to other accounts, such as operating expenses, taxes, depreciation reserve (cost of plant removal), other balance sheet accounts, and income or surplus accounts; the intent of this provision being that such costs shall be allocated to the accounts to which they are applicable when they are incurred.

.SO DOC 16B-321.12

NYCRR

321.12 Employee pensions and benefits. (a) All cost of employee pensions and benefits, whether such costs represent pensions payable currently to retired employees or their beneficiaries, advance provision for future payments, or both, are includible in the charges of each accounting period, provided: (1) the pension program under which the costs are determined is reasonable, (2) amounts paid are irrevocably dedicated to pension purposes, and (3) any program of systematic advance provision is based on actuarial studies or other recognized and acceptable systematic method of computation and allocation. Pension payments and accruals are includible in account 1800, Other General Expenses; however, a utility may distribute to construction and retirement projects and to clearing and other accounts an applicable portion of the pension and benefits costs.

(b) No charge shall be made to any account in this system of accounts to reflect the advance provision for employee pension and benefits costs or to augment incomplete provision at a given date for amounts computed in relation to service prior to that date, unless full particulars of the program shall have been filed with the commission together with copies of supporting documents. Filings shall be promptly made also of any material changes in pension or other benefits programs, subsequent to the initial presentation to the commission. Acceptance by the

commission of such data, as filed, shall not be interpreted as constituting approval of a pension and employee benefits program, or of documents associated therewith, or of any accounting made thereunder by the utility.

(c) The utility shall keep supporting records which will disclose as of the end of each accounting period:

(1) the amounts disbursed by the company during the period direct to pensioners or their beneficiaries;

(2) the amounts paid into the fund dedicated to future pension payments; and for each of such classes of disbursements, the accumulated total from the beginning of the year;

(3) the amount accumulated in the pension fund as provision for future pension payments; and

(4) at each year end the amount by which pension commitments under the plan as then in effect, even though subject to future amendment or termination, computed in relation to employee service to that date, (generally the "actuarial liability") exceed the amount in the pension fund.

Section 322.1 Gas plant to be recorded at original cost. (a) All amounts included in subaccounts 1301-1390 of accounts 1101 to 1104 for gas plant (except as otherwise provided in account 1302, Franchises and Consents) shall be the original cost (see § 320.1, subd. (a)(9)) of such gas plant. (See also paragraphs B and C of account 1106.)

(b) When the term cost is used in the detailed gas plant accounts (1301-1390), it shall mean the original cost unless otherwise specified and shall include not only the materials, supplies, labor, services and other items consumed or employed in the construction and installation of

gas plant, but also the cost of preliminary studies, plans, surveys, engineering, supervision, and general expenses, which contribute directly and immediately to gas plant without duplication of such costs.

(c) When the consideration given for property is other than cash, the value of such consideration shall be determined on a cash basis. In the entry recording such transaction the actual consideration shall be described with sufficient particularity to identify it. The utility shall be prepared to furnish the commission the particulars of its determination of the cash value of the consideration, if other than cash.

(d) When property is purchased under a plan involving deferred payments, no charge shall be made to the gas plant accounts for interest, insurance, or other expenditures occasioned solely by such form of payment.

(e) Gas plant contributed to the utility or constructed by it from contributions to it of cash or its equivalent shall be charged to the gas plant accounts at cost (see § 320.1, subd. (a)(6)) to the utility (i.e., original cost less the portion thereof contributed by or on behalf of customers). Records shall be kept so that the utility can readily furnish information as to the source, purpose, and amount of each contribution, the property to which each contribution relates, and the conditions, if any, upon which each contribution was made.

Note: Amounts received for construction which are ultimately to be refunded, wholly or in part, shall be credited to account 1241, Customer Advances for Construction. When the amount to be refunded has been finally determined, the balance, if any remaining in account 1241 shall be debited thereto and credited to the gas plant accounts to which the cost of the property was charged.

.SO DOC 16B-322.2

NYCRR

322.2 Additions and retirements of gas plant. (a) For the purpose of avoiding undue refinement in accounting for additions to and retirements and replacements of gas plant, all property shall be considered as consisting of (1) units of property or retirement units and (2) minor items. Units of property means those items of gas plant which are sufficiently distinct or important so that when they are retired with or without being replaced by other units of the same type or use, they are accounted for by crediting the amount at which they are carried on the books to the gas plant account in which included. All other items are to be considered as minor items. These retirement units should not be confused with continuing property record units filed by Class C utilities; the latter are units for which the cost will be shown

separately in the continuing property records. Whenever units of property are mentioned in this system of accounts, the term refers to retirement units and not to continuing property record units. Each utility may adopt its own list of units of property for the purpose of this instruction until such time as the commission shall prescribe a list of units.

(b) Units of property. (1) When a unit of property is added to gas plant, the cost thereof shall be added to the appropriate gas plant account.

(2) When a unit of property is retired from gas plant (i.e., is removed, sold, abandoned, destroyed or otherwise ceases to be used or useful in gas service), whether or not replaced by another unit of the same type or use, the amount at which it is carried on the books shall be credited to the gas plant account in which it is included (determined in the manner set forth in subd. (d), below) and charged to the depreciation reserve provided for such property.

(c) Minor items of property. (1) When a minor item of property which does not replace a similar item is added to gas plant, the cost thereof shall be charged to the appropriate maintenance account and no entry shall be made in the gas plant or depreciation reserve accounts.

(2) When a minor item is retired and replaced independently of the unit of property of which it is a part, the cost of replacement shall be charged to the appropriate maintenance account and no entry shall be made in the gas plant or depreciation reserve accounts.

(3) When a minor item the book cost of which does not exceed \$50 is retired and not replaced, if the book cost of such minor item is included with or spread over one or more units of property so that it will be accounted for through the retirement of such one or more units of property, no separate credit to the gas plant account shall be made; otherwise, however, the book cost of such minor item shall be credited to the appropriate gas plant account and charged to account 1250, Reserve for Depreciation of Utility Plant.

Note: For example, if a given length of main, including all fittings, valves, drip pots, etc., is a unit and the cost of such section of main includes the cost of the valves, drip pots, etc., no separate credit to the plant account shall be made when a drip pot or valve (the book cost of which is less than \$50) is retired even though not replaced. Any labor in connection with the removal shall be charged to the appropriate maintenance account, and any salvage for material recovered shall be credited to the appropriate maintenance account.

(d) Determination of amount to be credited to plant accounts. Gas

plant retired shall be credited to the plant accounts at the amount at which such property is included therein, including all components of construction costs, such as engineering, supervision, interest and taxes during construction, etc. The amount shall be determined from the utility's records and if this can not be done, it shall be estimated.

When it is impracticable to determine the amount carried on the books for each item, due to the relatively large number or small cost thereof, the average of such items, with due allowances for any differences in size, character, and year of installation (if known), shall be used.

(e) Land retired. When land is retired the amount at which it is carried on the books shall be credited to the appropriate land account. If the land is sold, the difference between the amount at which it is carried on the books and the sale price of the land (less commissions and other expenses of making the sale) shall be credited or debited to account 1250, Reserve for Depreciation of Utility Plant.

.SO DOC 16B-322.3

NYCRR

322.3 Components of construction cost. (a) The cost of construction properly includible in the gas plant accounts shall include, when applicable, and when actually incurred, the cost of contract work, labor, materials and supplies, transportation, engineering and supervision, law expenditures, compensation and other insurance and injuries and damages applicable to construction, taxes and interest during construction, permits and privileges, use of construction facilities, cost of keeping construction records, and other analogous elements applicable to the construction and acquisition of gas plant.

The costs includible in the principal items are:

(1) Contract work includes amounts paid for work performed under contract by other companies, firms, or individuals, costs incident to the award of such contracts, and the inspection of such work. The cost of work performed by the utility on projects when part of the work is performed by the utility itself and part is performed by others under contract shall be included as labor, materials, transportation, general administration, engineering services, etc.

(2) Labor includes the pay and expenses of employees of the utility engaged on construction work, and also workmen's compensation insurance, payroll taxes and similar items of expense.

(3) Materials and supplies includes the purchase price at the point of free delivery plus customs duties, excise taxes, the cost of inspection, loading and transportation, the related stores expenses and the cost of fabricated materials from the utility's shop. In determining the cost of materials and supplies used for construction, proper credit shall be

made for unused materials and supplies, for materials recovered from temporary structures used in performing the work involved, and for discounts allowed and realized in the purchase of materials and supplies.

(4) Transportation includes the cost of transporting employees, materials and supplies, tools, purchased equipment, and other work equipment (when not under own power) to and from points of construction. It includes amounts paid to others as well as the cost of operating the utility's own transportation equipment.

(5) Engineering and supervision includes the portion of the pay and expenses of general officers, engineers, surveyors, draftsmen, inspectors, superintendents and their assistants applicable to construction work and the amounts paid to other companies, firms or individuals engaged by the utility to plan, design, prepare estimates, supervise, inspect, or give general advice and assistance in connection with construction work.

(6) Law expenditures includes the general law expenditures incurred in connection with construction and the court and legal costs directly related thereto.

(7) Interest during construction includes the net cost of borrowed funds used for construction purposes and a reasonable rate upon the utility's own funds when so used. Interest during construction shall be charged to the individual job upon which the funds are expended and shall be credited to account 1536, Interest Charged to Construction--Credit. The period for which interest may be capitalized shall be limited to the period of construction. No interest shall be included in these accounts upon expenditures for construction projects which have been abandoned.

(8) Taxes during construction includes taxes on physical property (including land) during the period of construction and other taxes properly includible in construction costs before the facilities become available for service.

Note: The cost of property includes the cost of preliminary surveys and studies and the cost of preparing plans and specifications at the time of construction for construction projects which are undertaken, and also the cost of keeping the construction accounts during the construction period, together with the cost of maps, books, files and other systems employed and permanently preserved in support of such construction costs.

The cost of property does not include the cost incurred subsequent to the construction period of preparing, installing or maintaining maps,

inventories, accounting and other financial records of property for use in the operation of a constructed plant, the cost of the preparation of inventories, appraisals, or other studies, nor costs incurred in the establishment or revision of accounting routine.

.SO DOC 16B-322.4

NYCRR

322.4 Land and land rights. (a) Land and land rights (accounts 1310, 1360 and 1370) means land owned in fee by the utility and rights, interests, and privileges held by the utility in land owned by others, such as leaseholds, easements, natural gas rights, rights of way, and other like interests in land.

(b) Separate entries shall be made for the acquisition, transfer, or retirement of each parcel of land, and each land right, or gas right, having a life of more than one year. A record shall be maintained showing the nature of ownership, full legal description, area, map reference, purpose for which used, city, village, county, and tax district in which situated, from whom purchased or to whom sold, payment given or received, other costs, contract date and number, date of recording deed, book and page of record. Entries transferring or retiring land or land rights shall refer to the original entry recording its acquisition.

(c) Entries to the gas plant accounts for limited-term interests in land shall make specific reference to the lease, contract or arrangement under which each interest is held or used, together with a concise statement of the terms of the lease, contract or arrangement.

(d) The cost of buildings and other improvements (other than public improvements) shall not be included in the land accounts. If at the time of acquisition of an interest in land such interest extends to buildings or other improvements (other than public improvements), which are then devoted to gas operations, the land and improvements shall be separately appraised and the cost allocated to land and buildings or improvements on the basis of the appraisals. If the improvements are removed or wrecked without being used in gas operations, the cost thereof and the cost of removing or wrecking shall be charged and the salvage credited to the account in which the cost of the land is recorded.

(e) The principal items to be included in the accounts for land and land rights are as follows:

- (1) Bulkheads, not requiring maintenance or replacement
- (2) Cost of acquisition of land including mortgages and other liens assumed (but not subsequent interest thereon after the property is placed in service)
- (3) Clearing (first cost) the land of brush, trees and debris; and

also tree trimming (first cost) when not chargeable to other gas plant accounts

- (4) Condemnation proceedings, including court and counsel costs
- (5) Consents and abutting damages, payment for
- (6) Conveyancers' and notaries' fees
- (7) Fees, commissions, etc., to brokers, agents and others in connection with the acquisition of the land or land rights
- (8) Grading the land, except when directly occasioned by the building of a structure
- (9) Leases, cost of voiding upon purchase to secure possession of land
- (10) Removing, relocating, or reconstructing property of others, in order to acquire quiet possession
- (11) Special assessments levied by public authorities for public improvements on the basis of benefits for new roads, new bridges, new sewers, new curbing, new pavements, and other public improvements, but not taxes levied to provide for the maintenance of such improvements
- (12) Surveys in connection with the acquisition
- (13) Taxes assumed, accrued to date of transfer of title
- (14) Title, examining, clearing, insuring, and registering in connection with the acquisition, and defending against claims relating to the period prior to the acquisition

.SO DOC 16B-322.5

NYCRR

322.5 Structures and improvements. (a) Structures and improvements (accounts 1311, 1361 and 1371) means all permanent buildings and structures to house, support or safeguard property or persons, and improvements of a permanent character on or to land, including all fixtures permanently attached to and made a part of buildings or structures and which can not be removed therefrom without cutting into the walls, ceilings or floors, or without in some way impairing the buildings.

(b) Structures and improvements are of two types: Buildings and Other Structures. The principal items includible under "Buildings" are:

- (1) Architects' plans
- (2) Ash pits (when located within the building proper)
- (3) Boilers, furnaces, piping, wiring, fixtures and machinery for heating, lighting, signaling, ventilating and plumbing
- (4) Bulkheads, including dredging, riprap fill, piling, decking, concrete, fenders, etc., when exposed and subject to maintenance and replacement
- (5) Chimneys
- (6) Coal bins and bunkers

- (7) Commissions and fees to brokers, agents, architects and others
- (8) Conduit
- (9) Damages to abutting property during construction
- (10) Door checks and door stops
- (11) Drainage and sewerage systems
- (12) Elevators, cranes, hoists, etc., and the machinery for operating them, when not specifically provided for in other accounts
- (13) Excavation, including shoring, bracing, bridging, refill, and disposal of excess excavated material
- (14) Fire protection systems when forming a part of a structure
- (15) Floor covering (permanently attached)
- (16) Foundations and piers for machinery, constructed as a permanent part of a building or other item listed herein
- (17) Grading when directly occasioned by the building of a structure
- (18) Leases, voiding, upon purchase, to secure possession of structures
- (19) Leased property, expenditures on (See gas plant instruction 322.8.)
- (20) Lighting fixtures and outside lighting systems
- (21) Painting, at time of construction
- (22) Partitions, including movable
- (23) Permits and privileges
- (24) Platforms, railings, and gratings when constructed as a part of a structure
- (25) Power boards for services to a building
- (26) Refrigerating systems for general use
- (27) Retaining walls
- (28) Scales, connected to and forming a part of a structure
- (29) Screens
- (30) Sprinkling systems
- (31) Stacks--brick, steel, or concrete, when set on foundation forming part of general foundation and steel work of a building
- (32) Storage facilities constituting a part of a building
- (33) Storm doors and windows
- (34) Subways, areaways, and tunnels directly connected to and forming part of a structure
- (35) Tanks constructed as part of a building when not includible in another account
- (36) Tunnels, intake and discharge, when constructed as part of a structure
- (37) Vaults constructed as part of a building

(38) Water supply system for a building

(39) Window shades and ventilators

(c) Items not included in buildings:

(1) Do not include in the cost of buildings any lighting, heating, or other fixtures temporarily attached for purposes of display or demonstration.

(2) The cost of specially provided foundations not expected to outlast the machinery or apparatus for which provided, and the cost of angle irons, castings, etc., installed at the base of an item of equipment, shall be charged to the same account as the cost of the machinery, apparatus, or equipment.

(3) Minor buildings and structures, such as those located at natural gas wells or which house compressor equipment or other apparatus at booster stations located on natural gas lines, telephone stations, etc., shall be considered a part of the facility in connection with which constructed or operated and the cost thereof shall be accounted for accordingly.

(4) When furnaces and boilers are used primarily for furnishing steam for some particular department and only incidentally for furnishing steam for heating a building and operating the equipment therein, the entire cost of such furnaces and boilers shall be charged to the appropriate equipment account, and no part to the building account.

(d) Items includible under other structures

(1) Athletic field structures

(2) Docks

(3) Fences and fence curbs (not including protective fences isolating individual items of equipment, which should be charged to the appropriate equipment account)

(4) Holders, relief

(5) Holders, waterless, including steel structure, piston, elevators, cost of first tar seal, tar apparatus and tar storage tanks, stairways, etc.

(6) Holders, waterseal, including tank construction, water holder lifts, framework, stairways and heating equipment

(7) Inlet and outlet lines to holders and storage tanks, including inlet and outlet valve pits and drip pumps

(8) Infra-site communication system poles, pole fixtures, wires and cables

(9) Landscaping, lawns, shrubbery, etc.

(10) Roadways, railroads, bridges, and trestles, intra-site, except railroads provided for in equipment accounts

- (11) Sewer systems for general use
- (12) Sidewalks, curbs and streets constructed by the utility
- (13) Tanks when constructed as distinct structural units, including high pressure gas storage tanks
- (14) Water front improvements
- (15) Water supply piping, hydrants and wells
- (16) Wells into which gas is pumped for storage
- (17) Yard drainage systems
- (18) Yard lighting systems
- (19) Yard surfacing, gravel, concrete, or oil

.SO DOC 16B-322.6 NYCRR

322.6 Work order system required (Class C utilities only). (a) Each utility shall record all changes, such as installations, additions, retirements or replacements in gas plant used wholly or partly in gas operations by means of a work order or job order system. Such work orders and supporting records shall be permanently preserved.

(b) All installations, additions, retirements, or replacements shall be covered by work orders. Standing work orders may be used for projects of less than \$250 each, such as for mains, services, and meters.

(c) The work order shall include the following particulars:

- (1) A work order number
- (2) A description and the location of the work to be done (or the purchase to be made), the dates between which such work (or purchase) is to be accomplished, the date when the work was begun and the date when finished, the estimated cost of the project, together with maps, plans, diagrams, specifications, etc., applicable to the project

- (3) The accumulated charges applicable to each particular job or project and the total cost of the completed project; the cost of removal shall also be shown. When any project involves charges to more than one account, the work order shall be so kept as to show the amount chargeable to each account. Every charge or credit on work orders shall refer to the voucher, journal, or other source from which the entry therein was made.

(d) The cost of completed projects shall be promptly transferred to the accounts to which chargeable.

Note: Requirement of the use of the work order system here outlined may be suspended by order of the commission in the case of a utility which satisfies the commission that the system which it has in use for recording changes in gas plant accounts gives the equivalent detail by accounts in substantially the same form. The identification of expenditures with property must be complete and clear, and the detail of

the cost of each project or job must be readily available.

.SO DOC 16B-322.7

NYCRR

322.7 Transfers of property. (a) When property is transferred from one account for gas plant to another, from one utility department to another, such as from gas to electric, or, in the case of Class C utilities, to or from accounts 1101, Gas Plant in Service, 1102, Gas Plant Leased to Others, and 1104, Gas Plant Held for Future Use, the transfer shall be recorded by transferring the book cost thereof from the one account, department or division to the other, and likewise any related amounts carried in the depreciation and amortization reserves and other accounts shall be transferred in accordance with the segregation of such reserves and other accounts. When property (except customers' meters and house regulators) in connection with which installation costs have been incurred is physically transferred it shall be accounted for as provided in gas plant instruction section 322.2.

(b) When property subject to depreciation is transferred from the gas plant accounts to account 1110, Other Physical Property, the transfer shall be accomplished by crediting the gas plant accounts and charging the depreciation reserve with the book cost of the item transferred; the depreciation reserve shall then be credited and account 1110, Other Physical Property, charged with the fair value of the property transferred.

.SO DOC 16B-322.8

NYCRR

322.8 Expenditures on property leased for use in gas operations. (a) The cost of additions and betterments, excluding replacements by lessee of units of property installed by lessor, to property leased from other shall be charged to separate subdivisions of the gas plant accounts appropriate for the class of property leased. Depreciation thereon shall be computed on a basis consistent with the duration of the lease.

(b) The cost of initial repairs and rearrangements to adapt the property for use in gas operations shall be charged to a subdivision of account 1132, Prepayments, and amortized over the life of the lease through credits to that account with concurrent debits to the rent account appropriate for the class of property involved.

(c) If, in the case of leased property, replacements of units of property installed by the lessor become necessary, the utility shall make application to the commission for instructions regarding the accounting procedure to be followed and shall submit full particulars of the nature and extent of the replacements.

(d) When expenditures on property leased from others for use in gas operations are relatively minor, or the period of the lease is less than

one year, the cost shall be charged to the account appropriate for the cost of repairs of such plant.

.SO DOC 16B-PT323

NYCRR

PART 323

INSTRUCTIONS--OPERATING REVENUE ACCOUNTS

(Statutory authority: Public Service Law, § 66)

Sec.

323.1 Purpose of operating revenue accounts

323.2 Basis of credits to operating revenue accounts

323.3 Commissions on gas sales

323.4 Gas supplied without direct charge

323.5 Gas or steam used by utility

323.6 Supporting records

.SO DOC 16B-323.1

NYCRR

Section 323.1 Purpose of operating revenue accounts. The operating revenue accounts (1600 to 1615) are designed to show the amounts of money which the utility becomes entitled to receive from furnishing gas utility service and from service incidental thereto, including amounts for services rendered but not yet billed when the utility exercises its option to record in account 1133, Miscellaneous Current and Accrued Assets, such accrued gas revenue.

.SO DOC 16B-323.2

NYCRR

323.2 Basis of credits to operating revenue accounts. Credits to the operating revenue accounts shall be made on the basis of the net tariff rates. Discounts forfeited for delayed payments shall be credited to account 1612, Customers' Forfeited Discounts. Corrections of overcharges and overcollections theretofore credited, authorized abatements and allowances, and other corrections shall be charged to the revenue accounts to which they relate.

.SO DOC 16B-323.3

NYCRR

323.3 Commissions on gas sales. If the utility distributes all or a part of its gas through an agent but the sales are made to customers under rate schedules filed by the utility, the utility shall credit its revenue accounts with the full amount of sales to customers. The commission paid to the agent shall be charged to account 1800, Other General Expenses, and any distribution expenses charged by the agent shall be debited to the appropriate expense accounts. Agents shall credit the amount of commissions earned to operating revenue account 1615, Miscellaneous Gas Revenues.

.SO DOC 16B-323.4

NYCRR

323.4 Gas supplied without direct charge. Gas supplied to

municipalities, or to other governmental units, without charge, in accordance with franchise and similar requirements, shall be charged to account 1805, Franchise Requirements, and credited concurrently to account 1806, Duplicate Charges--Credit.

.SO DOC 16B-323.5 NYCRR

323.5 Gas or steam used by utility. (a) If the utility desires to charge the appropriate accounts in any of its gas operations with the cost of gas or steam used from its own supply, the credit therefor shall not be made to operating revenue accounts, but to account 1806, Duplicate Charges--Credit. (See also account 1752, Natural Gas Production--Credit.)

(b) Gas supplied by the utility from its own supply to other departments shall be credited to account 1607, Interdepartmental Sales. The accounting for steam supplied from the manufactured gas production plant for purposes other than the production of manufactured gas shall be as provided in account 1728, Steam Produced--Credit.

.SO DOC 16B-323.6 NYCRR

323.6 Supporting records. Each utility shall so keep the records supporting the entries to each gas sales account that it can furnish:

- (a) the name of each customer,
- (b) the quantity of gas furnished to each customer,
- (c) the amount charged for gas furnished each customer, and
- (d) the service classifications under which the charge is made. Each utility shall also be prepared to report upon request, within a reasonable time, for each month or other billing period and for each year, the quantity of gas sold and the charges therefor, by service classifications.

UTILITY PLANT

Note A: In accounts 1101, 1102, and 1104 for gas plant are to be carried the totals of the detailed plant accounts 1301-1390 in which the utility's plant is required to be carried on the utility's plant ledger.

Note B: If the utility is engaged in more than one utility service, such as gas, electric or steam, and any of its utility plant is used in common for several utility services or for other services, the original cost of such plant may be carried in a separate subdivision of the plant accounts, whereto the word "Common" shall be suffixed to designate such property as common.

D 1100. Gas Plant

This account shall include items provided for in accounts 1101 to 1104.

C 1101. Gas Plant in Service

This account shall include the original cost of gas plant owned and used and useful by the utility in the service of the public in its gas operations. The original cost of such plant not owned, including additions to and betterments of property leased from others, shall be included in separate subdivisions of this account. (See gas plant instruction ÷ 322.8.)

C 1102. Gas Plant Leased to Others

This account shall include the original cost of gas plant owned by the utility and leased to others as operating units or systems when the

lessee has exclusive possession, such as an entire production plant, distribution system, or office building.

C 1103. Construction Work in Progress

This account shall include the expenditures on gas plant in process of construction but not ready for service at the date of the balance sheet.

C 1104. Gas Plant Held for Future Use

This account shall include the original cost of gas plant owned and held for future use in gas service under a definite plan for such use. This includes property acquired but never used by the utility in gas service, but held for such service in the future under a definite plan, and property previously used by the utility in gas service, but retired from such service and held pending its reuse in gas service in the future under a definite plan.

Note A: Materials and supplies and meters and house regulators held in reserve shall not be included in this account.

Note B: Amounts paid as rentals for land or rights held to insure a future supply of natural gas shall be charged to account 1526, Miscellaneous Non-operating income, or, in case there is a definite plan for the use of such land or rights, such amounts may be included in account 1104, Gas Plant Held for Future Use; provided, that such rentals for a period in excess of one year shall not be included either in account 1104, Gas Plant Held for Future Use, or, after such land or rights are actually used, in account 1101, Gas Plant in Service, except upon order of this commission.

Note C: Wells shut in after construction and which have not been connected with the line, and wells which have been connected with the line but which are shut in for any reason except seasonal excess capacity or for repairs, shall be included in this account.

D C 1105. Gas Plant Acquisition Adjustments

A. With respect to gas plant acquired prior to the effective date hereof and still in service at that date, this account shall include (unless otherwise ordered by this commission) the difference between the amount carried on the books therefor as of the effective date hereof, and the original cost thereof when such difference is not clearly includible in any other account.

B. With respect to gas plant acquired after December 31, 1938, as an operating unit or system by purchase, merger, consolidation, liquidation or otherwise, this account shall include (unless otherwise ordered by this commission) the difference between (a) the cost to the accounting utility of such gas plant, and (b) the original cost thereof less credits representing contributions (see paragraph B of account 1265,

Contributions in Aid of Construction, and gas plant instruction 322.1, subd. (e)), less the amount or amounts credited to the depreciation reserves of the accounting utility at the time of acquisition with respect to such gas plant and less the amount in account 1265, Contributions in Aid of Construction.

C. Whenever practicable, this account shall be subdivided by Class C utilities according to the character of the amounts included herein and so as to show the amounts applicable to gas plant in service, gas plant leased to others, and gas plant held for future use.

D. A record shall be kept of the amounts in this account for each property acquisition after the effective date hereof.

E. With respect to the amount applicable to gas plant acquired prior to the effective date hereof, and to each property acquisition thereafter, the utility shall notify the commission as to its program for depreciation, amortization, or other disposition of the amounts included in this account.

D C 1106. Unclassified Gas Plant

A. Pending the classification of gas plant at the effective date of this system of accounts in accordance with the accounts prescribed herein, as provided in paragraph B hereof, each utility shall maintain its present accounts with respect to such property which shall be summarized under the title of this account.

B. Not later than six months after the effective date hereof, each utility in Class C shall submit to the commission the entries it proposes to make to carry out the provisions of this system of accounts with reference to the original cost of its gas plant as of the effective date hereof. It shall submit also a comparative balance sheet showing the accounts and amounts appearing in its books as of the effective date of this system of accounts and the accounts and respective amounts as of the same date after the proposed entries shall have been made.

C. Nothing herein stated shall be taken as permitting the recording as part of the original cost of gas plant of amounts charged in previous years to operating expenses, operating taxes or other income or surplus accounts.

D. There shall also be included in a separate subdivision of this account (1) the cost of gas plant acquired as an operating unit or system by purchase, merger, consolidation, liquidation or otherwise, pending the distribution thereof to the appropriate accounts in accordance with orders of this commission; and (2) the credit for the sale price of gas plant constituting an operating unit or system sold, conveyed or transferred to another through sale, merger, consolidation,

or otherwise, pending the completion of the accounting for the transaction and an order of this commission for the accounting of such sale.

D C 1108. Other Utility Plant

A. There shall be included under this caption the balances in accounts for utility plant other than gas plant, as for example, electric, steam, etc.

B. A separate account shall be kept for each utility department.

Note: In the case of utility services for which systems of accounts are prescribed by this commission, the appropriate accounts in such systems shall be used.

INVESTMENT AND FUND ACCOUNTS

D C 1110. Other Physical Property

A. This account shall include the cost to the utility of land, structures, and equipment owned by the utility and not includible in utility plant accounts (1100-1108).

B. The records supporting the entries to this account shall be so kept that the utility can furnish information as to the nature and cost of each kind of property, from whom it was acquired, its location, and its use.

D C 1114. Miscellaneous Investments and Special Funds

A. This account shall include assets, such as:

- (1) Investments in securities issued or assumed by others
- (2) Advances to others, except advances to associated companies (see account 1115) including interest accrued thereon
- (3) Assets held in sinking funds, depreciation funds, and other special funds, such as:
 - (a) Cash
 - (b) Securities issued by others or other assets, at cost except as provided in paragraphs C and D
 - (c) Live securities, issued or assumed by the utility, at cost
 - (d) Securities of the utility issued to trustees without intervening sale, at face value
- (4) Special deposits for more than one year, such as for rent, performance of contracts, etc.

B. The records shall be so kept as to show the amount of each investment and the investment advances to each person.

C. Except as otherwise provided, the investments included in this account shall be recorded at cost at the time of acquisition. Cost does not include any amount paid for accrued interest or dividends. The utility may write down the cost of any investment in recognition of a

decline in the value thereof, and if there be no reasonable prospect of substantial value it shall be written off or written down to a nominal value. Fluctuations in market value shall not be recorded but a permanent impairment in the value shall be recognized in the accounts. When investments are written off or written down the amount of the adjustment shall be charged to account 1538, Miscellaneous Income Deductions, or to account 1414, Miscellaneous Debits to Surplus, except that if a reserve has been created therefor, it shall be to such reserve account.

D. If securities with a fixed maturity date are purchased at a discount or at a premium, such discount or premium may be written off over the remaining life of the securities through periodic debits or credits to this account with concurrent credits or debits to account 1524, Interest Revenues.

Note A: Securities pledged shall be so indicated.

Note B: This account shall not include advances to or open accounts with associated companies. (See account 1115, Owing by Associated Companies.)

OWING BY ASSOCIATED COMPANIES

D C 1115. Owing by Associated Companies

A. This account shall include debit balances in all accounts with associated companies, and notes and drafts upon which associated companies are liable, together with interest thereon.

B. This account shall be so kept as to show for each associated company the amounts receivable on notes separately from amounts receivable on open accounts, and the due date of each item.

Note: The face amount of notes receivable from associated companies discounted or sold without releasing the utility from liability as endorser thereon, shall not be credited to this account, but to account 1221, Notes Receivable Discounted.

CURRENT AND ACCRUED ASSETS

D C 1120. Cash and Working Funds

This account shall include cash on hand and in bank and cash advanced to officers, agents, employees, and others as petty cash or working funds. Special cash deposits for payment of interest, dividends, or other special purposes shall be included in this account in separate subdivisions which shall specify the purpose for which each such special deposit is made.

Note: Deposits for more than one year shall not be charged to this account but to account 1114, Miscellaneous Investments and Special Funds.

D C 1124. Notes Receivable

This account shall include the cost of all collectible obligations in the form of notes receivable and similar evidences (except interest coupons) of money due on demand or within one year from the date of issue, which are not includible in other accounts.

Note A: Notes receivable from associated companies shall not be included herein but in account 1115, Owing by Associated Companies.

Note B: When notes receivable are discounted, sold or transferred, unless transferred without recourse, an entry shall be made debiting account 1120, or other applicable accounts, and crediting account 1221, Notes Receivable Discounted. If notes receivable are placed in a bank for collection, no entry need be made therefor in the general ledger, but a memorandum entry to state the fact shall be made in the note record.

D C 1125. Accounts Receivable

A. This account shall include amounts due on open accounts from customers for utility services (including merchandising, jobbing and contract work) and from others than customers, except amounts due from associated companies.

B. Utilities shall subdivide this account to show separately (1) amounts due from customers, (2) amounts due from officers and employees (except working fund advances which are includible in account 1120, but including amounts due for utility service), and (3) amounts due from others.

D C 1131. Materials and Supplies

A. This account shall include the cost of unissued small tools and unapplied materials and supplies (except meters and house regulators). The cost shall include, when practicable, the purchase price at the point of free delivery, plus customs duties, excise and other taxes on purchases, freight, insurance, costs of inspection, special tests prior to acceptance, loading and unloading, transportation and other directly assignable charges.

B. If inward transportation charges on materials are not included as a part of the cost of the particular materials to which they relate, they shall be charged to account 1810, Stores, Shop and Laboratory Expenses, unless account 1902, Stores Expenses--Clearing, is used, in which case they shall be therein included.

C. Cash or other discounts on materials shall be deducted, when practicable, in determining the cost of the particular material, or credited to the account to which the material is charged. Discounts which are not so handled shall be credited to account 1810, Stores, Shop

and Laboratory Expenses, unless account 1902, Stores Expenses--Clearing, is used, in which case they shall be therein included.

D. Materials recovered in connection with construction, maintenance, or the retirement of property which are not intended to be reused, shall be designated as "scrap" and charged to this account at amounts which it is estimated will be realized therefrom; if they are intended to be reused, they shall be charged to this account at the average price at which like materials are carried, except that large individual items of equipment, such as production plant equipment, shall be carried at original cost.

E. When materials are issued for use, this account shall be credited with either the actual cost of the material issued or the average cost of all items of the same kind and size, not including "scrap" material. Scrap material shall be credited to this account when sold or otherwise disposed of at the amount at which such materials were charged into the account. Account 1250, Reserve for Depreciation of Utility Plant, shall be adjusted for the difference between the amount charged hereto and the amount received therefor if material was recovered from retirement of property, and the appropriate maintenance account shall be adjusted if such material was recovered on maintenance work.

F. Inventories of materials, supplies, fuel, etc., shall be taken at least annually and the necessary adjustments shall be made to bring this account into harmony with the actual inventories. In effecting the adjustments, differences shall be equitably apportioned among the accounts to which materials have been charged since the preceding inventory, or included in account 1810, Stores, Shop and Laboratory Expenses, unless account 1902, Stores Expenses--Clearing, is used, in which case they shall be therein included.

Note: Appliances held under consignment shall not be included herein, but there shall be kept a memorandum account of such appliances either at cost or at selling price, to show the appliances in stock and appliances sold.

D C 1132. Prepayments

A. When a payment is made in advance of the period to which the expenditure applies, the amount thereof shall be charged to this account. Each month or other accounting period to which the item applies an entry shall be made crediting this account and charging the appropriate account with its proper portion of the prepayment.

B. Representative items includible herein are prepaid insurance, rents (see gas plant instruction 322.8), taxes and interest. The account shall be so kept or supported as to disclose the balance of each class

of prepayments.

Note: For example, an insurance premium amounting to \$1200 is paid on a policy running for a year in the future. The amount of the premium shall be charged to this account, and each month or other accounting period, entries shall be made transferring from this account to the appropriate operating expense or other account the portion of the premium which is applicable to the period.

D C 1133. Miscellaneous Current and Accrued Assets

This account shall include the following classes of items:

- (1) Interest, dividends and rents receivable, except from associated companies
- (2) Estimated amounts accrued to the utility for service rendered but not billed as of the end of any accounting period (This is optional.)
- (3) Cash surrender value of life insurance policies under which the utility is the beneficiary (See note to account 1800, Other General Expenses.)
- (4) Other assets not includible in accounts 1120 to 1132, or 1115, which are readily convertible into cash or are held for current use in operations or construction

DEFERRED DEBITS

D C 1140. Unamortized Debt Discount and Expense

A. Discount on bonds or other debt is the excess of the face value of the securities plus interest accrued at the date of sale over the cash value of the consideration received from their sale; when the amount (or cash value of the consideration) received exceeds the face value and accrued interest, the excess is the premium. Expenses incurred in connection with the issue are items such as fees for drafting mortgages, taxes and fees for issuing and recording, commissions or fees paid for selling bonds, cost of obtaining governmental authorization, etc.

B. When discount and expenses are incurred on an issue of long-term debt (see § 320.1, subd. (a)(8)) or when expenses on an issue are greater than the premiums on such issue, the amount thereof shall be included in this account. A separate subdivision shall be kept for each class and series of long-term debt.

C. The discount and expense (or expense less premium if a net debit) on each issue shall be written off over the life of the issue to which it applies under a plan that will equitably distribute the amounts over the life of the bonds or other long-term debt. This may be done by monthly charges to account 1531, Amortization of Debt Discount and Expense, and credits to this account. The utility may, however, charge off discount and expense (or expenses less premium if a net debit) over

a shorter period by charges to account 1414, Miscellaneous Debits to Surplus.

D. When bonds or other long-term debt are reacquired, any balance included in this account representing discount and expense (or expense less premium if a net debit) on the reacquired debt shall be credited to this account and debited to account 1414, Miscellaneous Debits to Surplus. The difference between the face value of the bonds or other long-term debt and the amount for which they were reacquired shall be carried to Surplus. (See also account 1153, Reacquired Long-term Debt.)

D C 1146. Miscellaneous Deferred Debits

A. This account shall include the following classes of items:

(1) Expenditures for preliminary surveys, plans, investigations, etc., made for the purpose of determining the feasibility of projects under contemplation. If construction results, this account shall be credited with the amount applicable thereto and the appropriate gas plant accounts shall be charged with an amount which does not exceed the expenditures which may reasonably be determined to contribute directly and immediately and without duplication to gas plant. If the work is abandoned, the charge shall be to account 1538, Miscellaneous Income Deductions, or account 1414, Miscellaneous Debits to Surplus, unless otherwise authorized or directed by this commission.

(2) Extraordinary property losses which require abandonment or retirement of property in advance of adequate provision therefor through reserves or otherwise, such as destruction by floods, condemnation for public use, etc. When such losses are incurred the utility shall make application to this commission to prescribe the accounting therefor and shall submit all the relevant facts concerning the case.

(3) Undistributed balances in clearing accounts (see accounts 1901 to 1905) at the date of the balance sheet. Balances in clearing accounts shall be substantially cleared not later than the end of the calendar year unless items held therein relate to a future period.

(4) Balances representing expenditures for work in progress other than on utility plant. This includes jobbing and contract work in progress.

(5) Other debit balances, the proper final disposition of which is uncertain, and unusual or extraordinary expenses, not included in other accounts, which are in process of being written off.

B. The records supporting the entries to this account shall be so kept that the utility can furnish full information as to each deferred debit included herein.

CAPITAL STOCK EXPENSE

D C 1151. Capital Stock Expense

A. There shall be reported by this caption all balances in the accounts for expenses incurred in connection with the issuance and sale of capital stocks.

B. The accounts hereunder shall be so kept as to show separately the expense on each class and series of capital stocks.

C. Credits made to this account to write off capital stock expense (if the utility desires to write off such expense) shall be offset by debits to account 1414, Miscellaneous Debits to Surplus.

D. When capital stock is reacquired, this account shall be credited and account 1414, Miscellaneous Debits to Surplus, shall be charged with the amount of expenses included herein applicable to such reacquired stock.

REACQUIRED SECURITIES

D C 1152. Reacquired Capital Stock

A. This account shall include the par value of capital stock which had been issued by the utility and is reacquired by it and not retired or canceled, but is held by the utility. Stock without par value shall be included in this account at the proportionate amount at which the particular class and series of stock is included in account 1200, Common Capital Stock, or account 1201, Preferred Capital Stock.

B. The difference between the amount paid for capital stock reacquired and the amount at which such reacquired stock is charged to this account in accordance with paragraph A, above, shall be carried to account 1401, Miscellaneous Credits to Surplus, or account 1414, Miscellaneous Debits to Surplus, as appropriate, to which shall also be transferred any premium or expense applicable to the capital stock reacquired.

C. When reacquired capital stock is retired or canceled, this account shall be credited and account 1200 or 1201, as applicable, shall be charged with the amounts at which such stock is included therein. When reacquired capital stock is resold by the utility (see section 69 of Public Service Law), the par value (or amount included in this account for stock without par value) of the stock resold shall be credited to this account.

D. This account shall be so kept or supported as to show the amount herein applicable to each class and series of stock.

D C 1153. Reacquired Long-term Debt

A. This account shall include the par or face value of bonds or other long-term debt which had been issued or assumed by the utility and is reacquired by it and held under conditions which do not permit the utility to treat such securities as paid, retired, or canceled, but which permit the resale of the securities (see section 69 of Public

Service Law). It shall not include securities which are held by trustees in sinking or other funds.

B. The difference between the amount paid for bonds or other long-term debt reacquired and their par or face value shall be debited or credited, as appropriate, to account 1414, Miscellaneous Debits to Surplus, or 1401, Miscellaneous Credits to Surplus, to which shall also be transferred any discount, premium or expense applicable to the reacquired bonds or other long-term debt.

C. When reacquired bonds or other long-term debt are resold by the utility (see section 69 of Public Service Law), the par or face value thereof shall be credited to this account. When reacquired bonds or other long-term debt are retired or canceled, this account shall be credited and the appropriate long-term debt account shall be charged with the par or face value thereof*.

So in original. "therof" should be "thereof".

D. This account shall be so kept or supported as to show the amount herein applicable to each class and series of long-term debt.

LIABILITIES AND OTHER CREDITS

CAPITAL STOCK

D C 1200. Common Capital Stock

D C 1201. Preferred Capital Stock

A. These accounts shall include the par value of capital stock with par value and the cash value of the consideration received for non-par stock, of each class of capital stock which has been issued and is outstanding, and also the capital stock in account 1152, Reacquired Capital Stock.

B. When the actual cash value of the consideration received is more than the par value of any stock having par value, the excess shall be credited to account 1203, Premiums and Assessments on Capital Stock.

C. When capital stock is retired and canceled, these accounts shall be charged with the amount at which such stock is carried herein.

D. A separate ledger account, with a descriptive title, shall be kept for each class and series of stock. The supporting records shall show the shares in the hands of the public and those reacquired by the company and not resold.

Note A: When a levy or assessment, except a call for payment on subscriptions, is made against holders of capital stock, the amount collected upon such levy or assessment on capital stock with par value shall be credited to account 1203, Premiums and Assessments on Capital Stock, and a levy or assessment on capital stock without par value shall be included in these accounts.

Note B: No entries, other than those covered by the above provisions and those to record liquidating dividends, shall be made in any account for non-par stocks, except upon order of this commission.

D C 1203. Premiums and Assessments on Capital Stock

A. This account shall include the excess of actual cash value of the consideration received over the par value and accrued dividends, of par value stock issued, together with assessments against stockholders representing payments required in excess of par value. (Assessments on stock without par value shall be included in account 1200 or 1201, as appropriate.)

B. A separate account shall be kept for premiums and assessments on each class and series of par stock.

C. When capital stock is reacquired or retired, the amount in this account with respect to the shares of such stock reacquired or retired shall be debited hereto.

D C 1205. Instalments Received on Capital Stock

A. This account shall include the amount of instalments received on capital stock subscribed for on a partial or instalment payment plan.

B. As subscriptions are paid in full and certificates issued, this account shall be charged and account 1200, Common Capital Stock, account 1201, Preferred Capital Stock, or account 1152, Reacquired Capital Stock (if reacquired stock is resold), credited with the par value of such capital stock having par value, and with the consideration received for capital stock without par value. Premiums on capital stock with par value shall be transferred to account 1203, Premiums and Assessments on Capital Stock.

Note: The records supporting the entries to this account shall be so kept that the corporation can furnish the name and address of each subscriber, the amount and kind of capital stock subscribed, the date of subscription, the date that each payment is due and the date that each is paid, the nature of each payment (whether cash or other consideration) and any other information that is necessary to make the history of the subscription complete.

NON-CORPORATE PROPRIETORSHIP

D C 1206. Non-corporate Proprietorship

This account shall include the investment in an unincorporated utility by the proprietor thereof, and shall be charged with all withdrawals from the business by its proprietor. At the end of each calendar year the net income for the year as developed in the income account shall be transferred to this account. There shall also be entered in this account such items as in corporate organizations are handled through Surplus.

(See optional accounting procedure provided in note C hereunder.)

Note A: Amounts payable to the proprietor as just and reasonable compensation for services performed shall not be charged to this account but to appropriate operating expense or other accounts.

Note B: When the utility is owned by a partnership, a separate account shall be kept to show the net equity of each member therein and the transactions affecting the interest of each such partner.

Note C: This account may be restricted to the amount considered by the proprietor to be the permanent investment in the business, subject to change only by additional investment by the proprietor or the withdrawal of portions thereof not representing net income. When this option is taken the surplus accounts shall be maintained and entries thereto shall be made in accordance with the texts thereof.

LONG-TERM DEBT

D C 1210. Bonds

This account shall include the face value of unmatured bonds which have been issued and have not been retired or canceled; also the face value of such bonds issued by others the payment of which has been assumed by the utility. The account shall be so kept as to show the face value of each class and series outstanding.

Note A: The accounting for discount, expense, and premium on long-term debt, is set forth in accounts 1140, Unamortized Debt Discount and Expense, and 1240, Unamortized Premium on Debt.

Note B: Matured long-term debt shall be included in account 1225, Matured Long-term Debt.

D C 1211. Receivers' Certificates

A. This account shall include the face value of certificates of indebtedness issued by receivers in possession of the property and acting under the orders of a court.

B. A separate subdivision shall be kept for each issue of receivers' certificates.

Note: Matured receivers' certificates shall be included in account 1225, Matured Long-term Debt.

D C 1213. Miscellaneous Long-term Debt

A. This account shall include until maturity all notes or other obligations (except advances from associated companies) having a life of more than one year after issue or assumption. This includes such items as real estate mortgages, executed or assumed, assessments for public improvements due later than one year after date, etc.

B. Separate accounts shall be kept for each class of obligation, and records shall show separately for each class all details as to date of

obligation, date of maturity, interest dates and rates, security for the obligation, etc.

Note: Matured long-term debt shall be included in account 1225, Matured Long-term Debt.

DEBTS TO ASSOCIATED COMPANIES

D C 1214. Debts to Associated Companies

This account shall include all amounts owed to associated companies on notes, drafts, acceptances or other similar evidences of indebtedness and open accounts payable, and also interest on obligations included herein, and shall be so kept as to show separately the amount payable to each associated company on (1) notes, (2) open accounts.

CURRENT AND ACCRUED LIABILITIES

D C 1220. Notes Payable

This account shall include the face value of all notes, drafts, acceptances, or other similar evidences of indebtedness to other than associated companies, payable on demand or which by their terms are payable within a time not exceeding one year from the date of issue.

D C 1221. Notes Receivable Discounted

This account shall include the face amount of notes receivable discounted or sold without releasing the utility from liability as endorser thereon.

D C 1222. Accounts Payable

This account shall include all open accounts payable by the utility within one year, and which are not provided for in other accounts.

D C 1224. Dividends Declared

This account shall include the amount of dividends which have been declared but not paid. Dividends shall be credited to this account when they become a liability.

D C 1225. Matured Long-term Debt

When any debt carried in account 1210, Bonds, 1211, Receivers' Certificates, or 1213, Miscellaneous Long-term Debt, matures but is not paid or for which no specific agreement for extension of the time of payment is made, it shall be transferred to this account; bonds called for redemption but not presented, shall also be included herein.

D C 1227. Customers' Deposits

This account shall include all amounts deposited with the utility by customers as security for the payment of bills.

D C 1228. Taxes Accrued

A. This account shall be credited each month with the amount of taxes applicable thereto when payment of such taxes is to be made in a subsequent period. Concurrently, debits shall be made to the appropriate

accounts for tax charges. In the absence of precise information as to the amount of the tax the monthly credits to this account will necessarily be based upon estimates; when the actual amount of the tax becomes known, the amounts of the periodic accruals shall be adjusted so as to include as nearly as can be determined in each year the taxes applicable thereto.

B. The records supporting the entries to this account shall be so kept that the utility can furnish information as to the amount of each class of taxes accrued, the basis for each tax accrual, the accounts to which charged, and the amount of each class of taxes paid.

D C 1229. Interest Accrued

This account shall include the amount of interest accrued on long-term debt and other liabilities of the utility, except interest on debt to associated companies, which shall be included in account 1214, Debts to Associated Companies, and except interest which is added to the principal of the debt on which incurred.

Note: This account shall be so kept as to show the amount of matured interest on each obligation.

D C 1230. Other Current and Accrued Liabilities

This account shall include liabilities of a current character (those which are either matured at the date of the balance sheet or become due on demand or within one year from date of issuance or assumption except bonds, receivers' certificates, and debts to associated companies) or which have accrued but are not payable at the date of the balance sheet, other than those for which accounts 1220 to 1229 have been provided.

DEFERRED CREDITS

D C 1240. Unamortized Premium on Debt

A. This caption shall include credit balances representing the premiums less expenses, when a net credit, on each issue of long-term debt, including receivers' certificates. (See account 1140 for definitions of premium and debt expense.)

B. The net credit of the premium less expense on each issue shall be written off over the life of the issue under a plan that will equitably distribute the amounts over the life of the securities by debits to this account and credits to account 1532, Amortization of Premium on Debt--Credit.

C. When bonds or other long-term debt are reacquired, any balance included in this account representing premium (less expense) on the debt shall be wiped out by a debit to this account and a credit to account 1401, Miscellaneous Credits to Surplus. (See also account 1153, Reacquired Long-term Debt.)

D C 1241. Customer Advances for Construction

A. This account shall include such advances by customers for construction as are to be refunded wholly or in part. When a customer is refunded the entire amount to which he is entitled according to the agreement or rule under which the advance was made, the balance, if any, remaining in this account shall be debited hereto and credited to the gas plant accounts to which the cost of the property was charged.

B. In each accounting period (see general instruction § 321.3), this account shall be charged and account 1615, Miscellaneous Gas Revenues, credited with amounts deductible for depreciation on property for which the advances were made to the extent that the liability of the utility to make refunds is reduced because of such depreciation on the property.

C. Separate subdivisions shall be kept for each utility service.

D C 1242. Other Deferred Credits

This account shall include advanced billings and receipts and other deferred credit items not provided for elsewhere; also amounts which cannot be entirely cleared or disposed of until additional information has been received or which should be credited to income or to surplus accounts in the future.

RESERVES

D C 1250. Reserve for Depreciation of Utility Plant

A. This account shall be credited with the following:

(1) Amounts representing currently accruing depreciation on utility plant (See general instruction § 321.8.)

(2) Amounts charged to account 1414, Miscellaneous Debits to Surplus, for past accrued depreciation of utility plant

(3) Accrued depreciation upon utility properties acquired as operating units or systems

(4) Amounts charged upon approval of the commission to account 1146, Miscellaneous Deferred Debits

B. Class C utilities shall subdivide this account as follows:

C 1250.1 Reserve for Depreciation of Gas Plant in Service

C 1250.2 Reserve for Depreciation of Gas Plant Leased to Others

C 1250.4 Reserve for Depreciation of Gas Plant Held for Future Use

C 1250.6 Reserve for Depreciation of Unclassified Gas Plant

C 1250.8 Reserve for Depreciation of Other Utility Plant

C. Class C utilities shall keep further subdivisions of the foregoing accounts to show the amounts applicable to each gas plant account (1302-1390); and also subdivisions for "Common" plant.

D. This account shall be charged with the amount carried on the books for plant retired (except items in account 1301, Organization), and with

the cost of removal, and shall be credited with the salvage realized and any other amounts recovered, such as insurance. (See also item 2 of account 1146, Miscellaneous Deferred Debits.)

E. The reserves shall be so kept as to show separately for each subdivision (1) the amount of the accrual for depreciation, (2) the amount at which property retired was carried on the books, (3) cost of removal, (4) salvage, and (5) other items, including recoveries from insurance.

Note: The utility is restricted in its use of the reserve to the purposes set forth above. It shall not divert any portion of the reserve to Surplus or make any other use thereof without the approval of this commission.

D C 1252. Reserve for Amortization of Gas Plant Acquisition Adjustments

This account shall be credited (or debited) with amounts which are charged (or credited) to account 1505, Amortization of Gas Plant Acquisition Adjustments, to account 1538, Miscellaneous Income Deductions, or to Surplus, for the purpose of providing for the extinguishment of amounts carried in account 1105, Gas Plant Acquisition Adjustments.

D C 1254. Reserve for Uncollectible Accounts

This account shall be credited each month with estimated amounts required to provide for losses on accounts receivable which may become uncollectible, and also with collections on accounts previously charged hereto. Concurrent charges shall be made to account 1783, Uncollectible Accounts, for amounts applicable to gas operations, and to corresponding accounts for other operations.

Note: Accretions to this reserve shall not be made in excess of a reasonable provision against losses of the character provided for.

D C 1255. Reserve for Insurance, Injuries and Damages

A. This account shall be credited, and account 1798, Insurance, Injuries and Damages, or other appropriate account, charged each month with amounts which the utility estimates are required for self-insurance against losses through accident, fire, flood, or other hazards to its own property or property leased from others, and for probable liability, not covered by insurance, for deaths or injuries to employees and others, and for damages to property not owned or held under lease. A schedule of risks covered by this reserve shall be maintained, giving a description of the property involved, the risks covered, and the rates used.

B. Charges shall be made to this account for:

(1) Losses to property owned or leased from others, covered by self-insurance

(2) Liability for any injury or damage which is admitted by the utility either voluntarily or because of the decision of a court or other lawful authority, such as a workmen's compensation board; the amount of the liability pending its payment shall be credited to the appropriate liability account.

Note A: Accretions to this reserve shall not be made in excess of a reasonable provision against losses of the character provided for.

Note B: Recoveries or reimbursements for losses charged to this account shall be credited hereto.

D C 1258. Miscellaneous Reserves

A. This account shall include all reserves which are not provided for elsewhere in this system of accounts, such as reserves for pensions, accident and death benefits, relief or other provident purposes, etc., and for depreciation of property carried in account 1110, Other Physical Property.

B. This account shall be so kept as to show the amount of each separate reserve and the nature and amounts of the debits and credits hereto.

CONTRIBUTIONS IN AID OF CONSTRUCTION

D C 1265. Contributions in Aid of Construction

A. This account shall include those contributions for construction purposes made prior to January 1, 1947 in cash, services or property by States, municipalities or other governmental agencies, individuals and others which have not been transferred to other accounts.

B. Amounts in this account at December 31, 1946 which are refundable wholly or in part shall be transferred to account 1241, Customer Advances for Construction. Unless otherwise ordered by the commission, non-refundable amounts in this account at December 31, 1946 which can be identified with property in gas plant accounts shall be transferred to the appropriate accounts. Amounts not identified with property in gas plant accounts may be distributed to gas plant accounts under a plan approved by the commission; otherwise the amounts remain in this account. Except as provided herein, amounts in this account shall not be transferred to any other account without the approval of the commission.

C. The records supporting the entries to this account shall be so kept that the utility can furnish information as to the purpose of each contribution, the conditions, if any, upon which it was made, and the amount of contributions from (a) States, (b) municipalities, (c) customers, and (d) others.

D. This account shall be subdivided according to departments (gas, electric, etc.) of the utility.

SURPLUS

D C 1271. Surplus

This account shall include the total of balances of accounts 1400 to 1414. The balance may be either a credit or a debit.

GAS PLANT ACCOUNTS

INTANGIBLE PLANT

D C 1301. Organization

D C 1302. Franchises and Consents

D C 1303. Miscellaneous Intangible Plant

D 1363. Transmission and Distribution Lines

C 1363.1. Mains

C 1363.2. Pumping and Regulating Equipment

C 1363.3. Services

D C 1366. Meters and House Regulators

D C 1367. Installations on Customers' Premises

D C 1368. Leased Property on Customers' Premises

D C 1369. Street Lighting Equipment

GENERAL PLANT

D C 1370. Land and Land Rights

D C 1371. Structures and Improvements

D C 1372. Office Furniture and Equipment

D C 1373. Transportation Equipment

D C 1379. Other General Equipment

D C 1390. Other Tangible Property

INTANGIBLE PLANT

D C 1301. Organization

This account shall include fees paid to federal or State governments for the privilege of incorporation and expenditures for organizing the corporation, partnership or other enterprise and putting it into readiness to do business.

ITEMS

1. Cost of obtaining certificates authorizing an enterprise to engage in the public utility business (except costs includible in account 1302)
2. Fees and expenses for incorporation
3. Fees and expenses for mergers or consolidations
4. Office expenses incident to organizing the utility
5. Stock and minute books and corporate seal

Note A: This account shall not include any discounts upon securities issued or assumed; nor shall it include any costs incident to negotiating loans, selling bonds or other evidences of debt, or expenses in connection with the authorization, issuance, or sale of capital stock.

Note B: Exclude from this account and include in the appropriate expense account the cost of preparing and filing papers in connection with the extension of the term of incorporation unless the first organization costs have been written off. When charges are made to this account for expenses incurred in mergers, consolidations, or reorganizations, amounts previously carried on the books of the corporations merged, consolidated, or reorganized shall not be included in this account.

D C 1302. Franchises and Consents

A. This account shall include only amounts paid to the federal government, to a State or to a political subdivision thereof in consideration for franchises, consents, or certificates, running in perpetuity or for a specified term of more than one year.

B. If a franchise, consent, or certificate is acquired by assignment, the charge to this account in respect thereof shall not exceed the amount paid therefor by the utility to the assignor, nor shall it exceed the amount paid by the original grantee. Any excess of the amount actually paid by the utility over the amount above specified shall be charged to account 1414, Miscellaneous Debits to Surplus.

C. When any franchise has expired, the amount included therefor in this account shall be credited hereto.

Note: Annual or other periodic payments under franchises shall not be included herein but in the appropriate operating expense account.

D C 1303. Miscellaneous Intangible Plant

A. This account shall include the cost of patent rights, licenses, privileges, and other intangible property necessary or valuable in the conduct of the utility's gas operations and not specifically chargeable to any other account.

B. When any item included in this account is retired or expires, the amount included herein for the item shall be credited hereto.

C. This account shall be so kept that the utility can furnish full information with respect to the amounts included herein.

Note: Expenses incident to procuring franchises, consents, or certificates shall not be included herein.

PRODUCTION PLANT

Note: If the utility produces gas in two or more plants, separate production plant accounts shall be kept for each plant; when more than one kind of gas is produced at a single plant, the equipment used in common, if any, shall be kept in separate subdivisions and the extent of use for each process shall be indicated.

D C 1310. Land and Land Rights

This account shall include the cost of land and land rights used in connection with gas production. (See gas plant instruction ò 322.4.)

D C 1311. Structures and Improvements

This account shall include the cost in place of structures and improvements used in connection with gas production. This includes relief and storage holders when located at the production plant. (See gas plant instruction ò 322.5.)

D C 1317. Coal Gas Equipment

This account shall include the cost installed of plant and equipment used for the production and purification of coal gas.

ITEMS

1. Power equipment, such as furnaces, boilers, internal combustion engines and other driving equipment; accessory equipment, such as fuel and ash handling and storage equipment, piping and accessories, etc.

2. Benches and retorts, coke ovens, and accessory equipment

3. Purification equipment and accessories

4. Purification equipment and accessories

5. Residual refining equipment and accessories

6. Other production and accessory equipment, such as gas mixing equipment, tanks, odorizing equipment, oil foggers, piping and accessories, works exhausters, works station meters and gauges, production laboratory equipment, etc.

Note A: This account shall not include boilers or steam pipes whose primary purpose is the heating of structures.

Note B: Include office furniture and equipment, desks, chairs, etc., in account 1372, Office Furniture and Equipment.

D C 1320. Water Gas Equipment

This account shall include the cost installed of equipment used in the generation and purification of water gas.

ITEMS

1. Power equipment, such as furnaces, boilers, internal combustion engines and other driving equipment; accessory equipment such as fuel and ash handling and storage equipment, piping and accessories, etc.
2. Water gas generating equipment, such as generators, carburetors, superheaters, and equipment accessory thereto
3. Purification equipment and accessories
4. Residual refining equipment and accessories
5. Other production and accessory equipment, such as gas mixing equipment, tanks, odorizing equipment, oil foggers, piping and accessories, works exhauster, works station meters and gauges, production laboratory equipment, etc.

Note A: This account shall not include boilers or steam pipes whose primary purpose is the heating of structures.

Note B: Include office furniture and equipment, desks, chairs, etc., in account 1372, Office Furniture and Equipment.

D C 1321. Petroleum Gas Equipment

This account shall include the cost installed of equipment used for the production of gas from petroleum derivatives, such as propane, butane or gasoline.

ITEMS

1. Bottling equipment and accessories
2. Carbureting equipment and accessories
3. Compression equipment including pumps and accessories
4. Foundations and settings, specially constructed for and not expected to outlast the apparatus for which provided
5. Mixing or proportioning equipment
6. Piping, including valves
7. Storage equipment other than holders
8. Vaporizing equipment

Note: Include office furniture and equipment, desks, chairs, etc., in account 1372, Office Furniture and Equipment.

D C 1322. Production Equipment--Other Processes

This account shall include the cost installed of production equipment for processes other than those provided for in preceding accounts, such as for the production of oil gas, acetylene gas, etc., and for producer

gas when not for use in the manufacture of coal gas.

D C 1324. Producing Gas Wells

This account shall include the cost installed of productive gas wells, up to and including well gate, including cost of drilling, casing, tubing, packing, and shutting in wells; also minor buildings and structures at the wells.

ITEMS

1. Casing
2. Clearing site for drilling
3. Drive pipe
4. Fittings, including shut-in valve, separators and drips
5. Fuel or power used in drilling, cost of
6. Packing
7. Pumps and drives permanently connected
8. Tubing
9. Rent of drilling equipment
10. Roads to well site, cost of making, clearing, etc.
11. Cost of hauling, erecting, dismantling, and removing boilers, portable engines, derricks, rigs and other equipment and tools used in drilling
12. Water used in drilling, obtained either by driving wells, piping from springs or streams, or by purchase

Note A: Records shall be kept to show the cost and the depth of each well drilled.

Note B: Cost of drilling, etc., incurred in connection with dry holes shall be charged as provided in account 1749, Non-productive Well Drilling Expenses.

D C 1325. Gathering Lines and Equipment

This account shall include the cost installed of pipe lines and equipment used in conveying natural gas from the wells to the point of storage or compression, or where it enters the transmission or distribution system.

ITEMS

1. Boosters
2. Drip traps
3. Driving units
4. Gathering lines, including pipe, valves, fittings, and supports
5. Instruments, meters, pressure gauges, etc.
6. Pressure regulators
7. Pumps

D C 1326. Drilling and Cleaning Equipment

This account shall include the cost of implements and equipment used in drilling and cleaning natural gas wells.

ITEMS

1. Bailers
2. Boilers
3. Derricks
4. Drilling cables
5. Drilling machines
6. Engines
7. Motors
8. Pulling machines
9. Rigs

D C 1330. Other Production Equipment

This account shall include the cost installed of equipment used in the production of gas, when not assignable to any of the foregoing accounts.

ITEMS

1. Equipment for reforming gas
2. Gas mixing equipment
3. Natural gas purification equipment
4. Odorizing equipment
5. Oil foggers
6. Production laboratory equipment

TRANSMISSION AND DISTRIBUTION PLANT

D C 1360. Land and Land Rights

This account shall include the cost of land and land rights used in connection with transmission or distribution operations. (See gas plant instruction ò 322.4.)

D C 1361. Structures and Improvements

A. This account shall include the cost in place of structures and improvements used in connection with transmission or distribution operations. (See gas plant instruction ò 322.5.)

B. This includes storage holders and accessory equipment when located on the transmission or distribution system. Storage holders and accessory equipment located at the production plant shall be included in account 1311, Structures and Improvements.

D 1363. Transmission and Distribution Lines

This account shall include property provided for in accounts 1363.1, 1363.2 and 1363.3.

C 1363.1 Mains

This account shall include the cost installed of transmission and distribution system mains.

ITEMS

1. Drip lines and pots
2. Excavation, including shoring, bracing, bridging, pumping, backfill, and disposal of excess excavated material
3. Municipal inspection
4. Pavement disturbed, including cutting and replacing pavement, pavement base and sidewalks
5. Permits
6. Pipe coatings
7. Pipe and fittings
8. Pipe laying
9. Pipe supports
10. Protection of street openings
11. Surveys made for main construction
12. Valves (including manholes or pits), not associated with pumping or regulating equipment

Note: The cost of cutting and replacing pavement, pavement base and sidewalks disturbed in laying mains shall be included in a separate subdivision of this account.

C 1363.2 Pumping and Regulating Equipment

This account shall include the cost installed of pumping, regulating, and measuring equipment, including minor structures which house such equipment.

ITEMS

1. After-cooling equipment and accessories
2. Boosters
3. Compressors
4. Driving units for items listed herein
5. Excavation, including shoring, bracing, bridging, pumping, backfill, and disposal of excess excavated material
6. Foundations and vaults for items listed herein
7. Governors or regulators for pressure in mains
8. Manholes or pits used to house equipment included in this account
9. Meters located on mains
10. Pavement disturbed, including cutting and replacing pavement, pavement base, and sidewalks
11. Piping and fittings for equipment
12. Pressure indicators
13. Pressure regulating devices
14. Valves associated with pumping or regulating equipment

C 1363.3 Services

A. This account shall include the cost installed of service pipes, from the point at which the main is tapped to and including the first fitting or valve inside of the building wall, when the utility actually incurs such cost for which it has not been reimbursed. This includes the cost of stub services run in anticipation of future use. Service laterals serving meters at more than one location shall be included in this account.

B. The utility shall keep records to show separately the number and average length of high pressure and low pressure services of each diameter and material, the book cost of which is included in this account; and the number through which gas is being delivered, those which have been used but which are inactive, and those to which no meters are attached.

C. Services which have been used but have become inactive shall be retired immediately if there is no prospect no reuse, and, in any event, shall be retired by the end of the year following that during which the service became inactive unless reused in the interim.

D. When a service previously retired in accordance with paragraph C is reused, the amount previously credited to this account on retirement shall be charged hereto and concurrently credited to account 1250, Reserve for Depreciation of Utility Plant.

ITEMS

1. Curb valves and curb boxes
 2. Drips
 3. Excavation, including shoring, bracing, bridging, pumping, backfill, and disposal of excess excavated material
 4. Municipal inspection
 5. Pavement disturbed, including cutting and replacing pavement, pavement base, and sidewalks
 6. Permits
 7. Pipe and fittings, including saddle, tee or other fitting on street main
 8. Pipe coatings
 9. Protection of street openings
- D C 1366. Meters and House Regulators

A. This account shall include the cost installed of meters, house regulators or other devices and appurtenances thereto, used in measuring the gas delivered to its users, and the cost of meters and house regulators held in reserve. The installation cost includible herein is the first installation at a location.

B. When a meter or house regulator is permanently retired from

service, the amount at which it is included herein shall be credited to this account. Meter installations in excess of the number of meters installed and house regulator installations in excess of the number of house regulators installed, both active and inactive, shall be retired immediately if there is no prospect of reuse, and in any event shall be retired by the end of the year following that during which the meter or house regulator was removed unless reused in the interim.

C. The records for meters and house regulators shall be so kept that the utility can furnish information as to the number of various types and capacities in service and in reserve as well as the location of each meter or house regulator owned.

D. When a meter or house regulator installation previously retired in accordance with paragraph B is reused, the amount previously credited to this account on retirement shall be charged hereto and concurrently credited to account 1250, Reserve for Depreciation of Utility Plant. Any installation costs incurred at the time of reuse shall be charged to account 1763, Labor on Customers' Premises.

ITEMS

1. Cocks
2. House regulators
3. Meter bars
4. Meters, including badging and initial testing
5. Pipe and fittings
6. Regulator vents
7. Seals
8. Shelves
9. Swivels and bushings

Note A: This account shall not include meters for recording the output of a production plant, gathering system, etc. It includes only those meters for use in recording gas delivered to customers.

Note B: The cost of removing and resetting meters and house regulators shall be charged to account 1763, Labor on Customers' Premises.

Note C: The utility shall keep statistical records to show separately the number of meter installations the cost of which is included herein, and the number of meter installations which prior to the effective date of this system of accounts was charged to operating expenses.

Note D: Minor items such as meter badges and their attachments shall be included in this account only when in service or associated with a meter held in reserve; otherwise they shall be carried in account 1131, Materials and Supplies.

Note E: Charges made to customers for connection, disconnection or

reconnection of meters shall be credited to account 1615, Miscellaneous Gas Revenues.

D C 1367. Installations on Customers' Premises

This account shall include the cost installed of equipment on the customer's side of a meter when the utility incurs such cost and when the utility retains title to and assumes full responsibility for maintenance and replacement of such property. This account shall not include equipment leased to customers. (See account 1368, Leased Property on Customers' Premises.)

D C 1368. Leased Property on Customers' Premises

This account shall include the cost of water heaters, space heaters and other equipment on customers' premises (including municipal corporations), leased to customers, but not including property held for sale.

Note A: The cost of setting and connecting such appliances or equipment on the premises of customers and the cost of resetting or removal shall not be charged to this account but to operating expense account 1763, Labor on Customers' Premises.

Note B: Do not include in this account any costs incurred in connection with merchandising, jobbing, or contract work activities.

D C 1369. Street Lighting Equipment

This account shall include the cost installed of property used solely for street lighting.

ITEMS

1. Anti-freezers
2. Burners and burner regulators
3. Excavation, including shoring, bracing, bridging, pumping, backfill and disposal of excess excavated material
4. Lamp posts
5. Lamps
6. Lamp services and risers
7. Municipal inspection
8. Pavement disturbed, including cutting and replacing pavement, pavement base, and sidewalks
9. Permits
10. Protection of street openings

GENERAL PLANT

D C 1370. Land and Land Rights

This account shall include the cost of land and land rights used for gas plant purposes, the cost of which is not properly includible in other land and land rights accounts. (See gas plant instruction ò

322.4.)

D C 1371. Structures and Improvements

This account shall include the cost in place of structures and improvements used for gas plant purposes, the cost of which is not properly includible in other structures and improvements accounts. (See gas plant instruction ÷ 322.5.)

D C 1372. Office Furniture and Equipment

A. This account shall include the cost installed of all office furniture and equipment owned by the utility and devoted to gas service, and not permanently attached to buildings. Articles of slight value or short service life acquired subsequent to the commencement of operations shall be charged to the appropriate operating expense account and not to this account.

B. If the utility has equipment includible in this account at more than one location, separate records shall be maintained for each location.

ITEMS

1. Book cases and shelves
2. Desks, chairs, etc.
3. Drafting room equipment
4. Filing, storage, and other cabinets
5. Floor covering
6. Library and library equipment
7. Mechanical office equipment such as accounting machines, typewriters, etc.
8. Safes
9. Tables

D C 1373. Transportation Equipment

This account shall include the cost of transportation and garage equipment when such equipment is not an integral part of the housing structure. This account shall be subdivided as follows:

1373.1 Vehicles

1373.2 Garage and Repair Equipment

ITEMS

1. Automobile repair shop equipment
2. Automobiles
3. Battery charging equipment
4. Bicycles
5. Drays
6. Electric vehicles
7. Gasoline and oil pumps (portable)

8. Gasoline storage tanks
9. Greasing tools and equipment
10. Horses, wagons and harness
11. Horseshoeing equipment
12. Marine equipment
13. Motorcycles
14. Motor trucks
15. Oil storage tanks
16. Repair cars or trucks
17. Tractors
18. Trailers
19. Trucks
20. Other garage or stable equipment

Note: Office furniture and equipment shall be included in account 1372, Office Furniture and Equipment.

D C 1379. Other General Equipment

This account shall include the cost installed of the following equipment:

(1) Equipment used for the receiving, shipping, handling and storage of materials and supplies when not an integral part of the housing structure

(2) Equipment specially provided for general shops when such equipment is not an integral part of the housing structure

(3) Laboratory equipment used for general laboratory purposes and not specially provided for or includible in other departmental or functional plant accounts

(4) Tools, implements, and equipment used in construction or repair work exclusive of equipment includible in other equipment accounts

(5) Other general equipment, apparatus, etc., used in the utility's gas operations, and which is not includible in any other account

Note A: General equipment of the nature indicated above whenever practicable shall be assigned to the gas plant accounts on a functional basis. Thus, to illustrate, laboratory equipment used at the production plant only, shall be included in accounts 1317-1330 as applicable.

Note B: Office furniture and equipment shall be included in account 1372, Office Furniture and Equipment.

D C 1390. Other Tangible Property

A. This account shall include the cost of tangible gas plant not provided for elsewhere.

B. A separate subdivision of this account shall be kept for each class of property in which the utility has a relatively large investment, and

records shall be so kept as to show separately the cost of each major item.

SURPLUS ACCOUNTS

CREDITS

D C 1400. Credit Balance Transferred from Income Account

D C 1401. Miscellaneous Credits to Surplus

DEBITS

D C 1410. Debit Balance Transferred from Income Account

D C 1411. Dividend Appropriations--Preferred Stock

D C 1412. Dividend Appropriations--Common Stock

D C 1413. Miscellaneous Reservations of Surplus

D C 1414. Miscellaneous Debits to Surplus

Note: Total of surplus accounts to be carried as balance sheet account 1271.

CREDITS

D C 1400. Credit Balance Transferred from Income Account

This account shall include the net credit balance transferred from the income account for the year.

D C 1401. Miscellaneous Credits to Surplus

A. This account shall include all credits affecting the surplus or deficit not provided for elsewhere. Among the items which shall be credited to this account are:

(1) Credits for amounts previously written off through charges to surplus

(2) Delayed income, operating revenue, and operating expense credits as provided in general instruction section 321.4

(3) Profits on reacquirement of the utility's securities (See accounts 1152 and 1153.)

(4) Surplus arising from donations by stockholders of the utility's capital stock

(5) Surplus arising from a reduction of the par value of the utility's capital stock

(6) Surplus arising from forgiveness of debt of the utility

B. All items included in this account shall be sufficiently described in the entries relating thereto as to identify them with all accounts affected, and if the credits relate to prior years, the amount applicable to each year shall be shown.

DEBITS

D C 1410. Debit Balance Transferred from Income Account

This account shall include the net debit balance transferred from the income account for the year.

D C 1411. Dividend Appropriations--Preferred Stock

D C 1412. Dividend Appropriations--Common Stock

A. These accounts shall include amounts declared payable out of surplus or earnings as dividends on outstanding capital stock issued by the utility.

B. Dividends shall be segregated as to those payable in cash and otherwise. If not payable in cash, the medium of payment shall be described with sufficient particularity to identify it.

C. This account shall be so kept or supported as to show separately the dividends on each class and series of stock.

D C 1413. Miscellaneous Reservations of Surplus

A. This account shall include the reservations or appropriations of surplus for purposes not provided for elsewhere in this system of accounts.

B. The entries to this account shall show the nature of each reservation of surplus.

D C 1414. Miscellaneous Debits to Surplus

A. This account shall include amounts chargeable to surplus not provided for elsewhere. Among the items which shall be charged hereto are:

(1) Amounts charged to surplus to cover past accrued depreciation and amortization not provided for

(2) Decline in value of investments (See account 1114.)

(3) Delayed income, operating revenue, and operating expense debits as provided in general instruction section 321.4

(4) Payments of amounts previously credited to surplus

(5) Losses on requirement of the utility's securities (See accounts 1152 and 1153.)

(6) Losses which are not properly chargeable to operating expenses or income and for which reserves have not been provided

B. All items included in this account shall be sufficiently described in the entries relating thereto as to identify them with all accounts affected, and if the charges relate to prior years, the amount applicable to each year shall be shown.

INCOME ACCOUNTS

Note: The income accounts (1501 to 1540) are designed to show for each month and each calendar year the operating revenues and expenses, the other income, the income deductions, the net income, the miscellaneous reservations of net income and the amount of income or less remaining for transfer to surplus.

UTILITY OPERATING INCOME

D C 1501. Operating Revenues

Under this caption shall be included the total operating revenues credited to the revenue accounts 1600 to 1615, derived by the utility from its gas operations during the period covered by the income account.

D C 1502. Operation and Maintenance

Under this caption shall be included the total expenses shown in accounts 1700 to 1811, incurred by the utility in its gas operations during the period covered by the income account.

D C 1503. Depreciation

A. This account shall include the depreciation expense applicable to gas operations, on plant carried in accounts 1101 and 1106 for the period covered by the income account, except such depreciation expense as is charged to clearing accounts or to construction work in progress.

B. Class C utilities shall keep supporting records to show the amount of depreciation charges applicable to each gas plant account.

D C 1505. Amortization of Gas Plant Acquisition Adjustments

This account shall be debited or credited, as the case may be, with amounts which the commission shall have determined are includible in operating revenue deductions for the purpose of providing for the extinguishing of the amount in account 1105, Gas Plant Acquisition Adjustments. Account 1252, Reserve for Amortization of Gas Plant Acquisition Adjustments, shall be concurrently credited or debited.

D C 1506. Property Losses Chargeable to Operations

This account shall be charged with amounts credited to account 1146, Miscellaneous Deferred Debits, when the commission has authorized an extraordinary loss included in the latter account to be written off by charges to operations.

D C 1507. Operating Taxes

A. This account shall include the amount of Federal, State, county, municipal and other taxes, including payroll taxes (but excluding taxes on net income, excess profits, undivided profits, excess dividends or capital stock) which are properly chargeable to gas operations, and except taxes includible in account 1789, Merchandising, Jobbing and Contract Work, or in clearing accounts. (See account 1228, Taxes Accrued.)

B. This account shall be charged each month with the amount of taxes which are applicable thereto, and concurrent credits shall be made to account 1228, Taxes Accrued. (See also account 1132, Prepayments.)

C. Taxes assumed by the utility on property leased from others for use in gas operations shall be considered as additional rent and so charged.

D. This account shall be so kept as to show the amount of each kind of tax, and the basis upon which each charge is made.

Note: The following items shall not be charged to this account but shall be treated as specified below:

(1) Gasoline or other sales taxes shall be added to the cost of the materials on which levied

(2) Taxes chargeable to other utility operations shall be assigned to such operations: taxes applicable to non-utility operations shall be charged to account 1521, Income from Non-utility Operations

(3) Annual or more frequent payments under the terms of franchise, shall be included in account 1805, Franchise Requirements

(4) Special assessments for street and similar improvements shall be included in the gas plant account in which the property with which the taxes are identified is included

(5) Taxes applicable to gas construction shall be charged to account 1103, Construction Work in Progress; taxes on labor charged to cost of removal shall be charged to account 1250, Reserve for Depreciation of Utility Plant

(6) Taxes on net income, excess profits, undivided profits, excess dividends, or capital stock, shall be charged to account 1539, Income Taxes

D C 1508. Income from Gas Plant Leased to Others

A. This account shall include all rental income from gas property leased by the utility to others, and which property is included in account 1102, Gas Plant Leased to Others.

B. This account shall be subdivided as follows:

1508.1 Revenues from Gas Plant Leased to Others

1508.2 Expenses of Gas Plant Leased to Others

C. This account shall be so kept or supported as to show separately the following for each lease:

1. Rentals

2. Expenses

3. Depreciation

4. Taxes

5. Uncollectible rents

D C 1509. Other Utility Operating Income

Under this caption shall be included (1) the revenues derived from and (2) operation and maintenance, depreciation, rents and taxes incurred in the operation of utility plant, the book cost of which is included in account 1108, Other Utility Plant.

Note: In the case of utility services for which systems of accounts are prescribed by this commission, such as electric, water, etc., the appropriate accounts in such systems shall be used instead of this

account.

OTHER INCOME

D C 1521. Income from Non-utility Operations

A. This account shall include the revenues derived from and the expenses incurred in non-utility operations.

B. The expenses shall include every element of cost (except return on investment) incurred in such operations, including depreciation, rents, taxes, insurance, etc.

D C 1523. Dividend Revenues

This account shall include the revenues derived by the utility from dividends on stocks of other companies.

Note: No dividends on reacquired securities issued or assumed by the utility shall be included in this account.

D C 1524. Interest Revenues

This account shall include interest revenues on investments, loans, notes, advances, special deposits, etc.

D C 1526. Miscellaneous Non-operating Income

This account shall include all revenue items properly includible in the income account other than from operations (utility and non-utility), interest, or dividends. It shall also include all expenses incurred in connection with such revenues.

INCOME DEDUCTIONS

D C 1530. Interest on Long-term Debt

A. This account shall include in each accounting period the amount of interest applicable thereto on outstanding long-term debt issued or assumed by the utility, the liability for which is included in account 1210, Bonds, account 1211, Receivers' Certificates, or account 1213, Miscellaneous Long-term Debt. No interest shall be accrued on reacquired debt carried in account 1153, Reacquired Long-term Debt.

B. Amounts charged to this account shall be credited to account 1229, Interest Accrued.

C. This account shall be so kept or supported by other records as to show the interest accruals on each class and series of long-term debt.

D C 1531. Amortization of Debt Discount and Expense

This account shall include in each accounting period the portion of unextinguished debt discount and expense on outstanding long-term debt which is applicable to such period. The amount shall be computed as provided in account 1140, Unamortized Debt Discount and Expense, to which account concurrent credit shall be made.

D C 1532. Amortization of Premium on Debt--Credit

This account shall include in each accounting period the portion of

unextinguished premium (or premium less expenses, when a net credit) on outstanding long-term debt which is applicable to such period. The amount shall be computed as provided in account 1240, Unamortized Premium on Debt, to which account concurrent debit shall be made.

D C 1534. Interest on Debt to Associated Companies

A. This account shall include in each accounting period interest on debt to associated companies and shall be so kept as to show the amount of interest on each such debt.

B. Amounts charged to this account shall be credited to account 1214, Debts to Associated Companies.

D C 1535. Other Interest Charges

This account shall include in each accounting period all interest not provided for in account 1530 or 1534, and shall be so kept as to show the amount of interest charges on each debt.

D C 1536. Interest Charged to Construction--Credit

When interest is charged to construction in accordance with gas plant instruction, paragraph (7) of subdivision (a) of section 322.3, concurrent credit shall be made to this account.

D C 1538. Miscellaneous Income Deductions

This account shall include miscellaneous debits to income not provided for elsewhere.

ITEMS

1. Decline in value of investments
2. Donations
3. Expenditures for associated companies for which the utility will not be reimbursed
4. Charges not includible in account 1505, Amortization of Gas Plant Acquisition Adjustments, to write off amounts in account 1105, Gas Plant Acquisition Adjustments, and other items being written off which are not elsewhere provided for
5. Penalties or fines for violations of law
6. Expenses in connection with interest and dividend revenues
7. Taxes assumed on interest

D C 1539. Income Taxes

This account shall include taxes on net income, excess profits, undivided profits, excess dividends, and capital stock.

DISPOSITION OF NET INCOME

D C 1540. Miscellaneous Reservations of Net Income

A. This account shall include reservations of net income, such as may be required under the terms of mortgages, deeds of trust, orders of a court, contracts, or other agreements, and other reservations of net

income.

B. Amounts charged to this account shall be credited concurrently to the appropriate reserve account.

C. The entries in this account shall show the nature of each reservation of income.

OPERATING REVENUE ACCOUNTS

SALES OF GAS

D C 1600. Residential Sales

D C 1602. Commercial and Industrial Sales

D C 1603. Public Street and Highway Lighting

D C 1604. Other Sales to Public Authorities

D C 1605. Sales to Other Gas Utilities

D C 1607. Interdepartmental Sales

D C 1608. Other Sales

OTHER GAS REVENUES

D C 1610. Rent from Gas Operating Property

D C 1612. Customers' Forfeited Discounts

D C 1614. Servicing of Customers' Installations

D C 1615. Miscellaneous Gas Revenues

SALES OF GAS

D C 1600. Residential Sales

A. This account shall include revenues from gas supplied to residential customers, and to religious bodies.

B. When gas supplied through a single meter is used for both residential and commercial purposes, the total revenue shall be included in this account or in account 1602, Commercial and Industrial Sales, according to the principal use.

D C 1602. Commercial and Industrial Sales

A. This account shall include revenues from gas supplied for commercial and industrial purposes.

B. When gas supplied through a single meter is used for both commercial and residential purposes, the total revenue shall be included in this account or in account 1600, Residential Sales, according to the principal use.

D C 1603. Public Street and Highway Lighting

This account shall include revenues from gas supplied and services rendered for the purpose of lighting streets, highways, parks and other public places for municipalities or other* divisions or agencies of state or federal governments.

So in original. "othe" should be "other"

D C 1604. Other Sales to Public Authorities

This account shall include the revenues from gas supplied to municipalities or divisions or agencies of Federal or State governments, under special contracts or agreements or service classifications applicable only to public authorities, except such revenues as are includible in accounts 1603 and 1605.

D C 1605. Sales to Other Gas Utilities

A. This account shall include revenues from gas supplied to other gas utilities or to public authorities for distribution to others. (See also account 1755, Gas Purchased.)

B. Revenues from gas supplied to other public utilities for use by them and not for distribution shall be included in account 1602, Commercial and Industrial Sales, unless supplied under the same contract as and not readily separable from revenues includible in this account.

Note: The records supporting the entries to this account shall show separately for each contract the point of delivery, the maximum demand, the quantity supplied, the basis for the charge, and the total charge to the distributor. When gas is delivered to a utility at more than one point, like detail shall be furnished for each point of delivery.

D C 1607. Interdepartmental Sales

A. This account shall include the total amounts charged to other departments of the utility by the gas department for gas supplied by the latter.

B. The utility shall be prepared to furnish the basis and the computations of the charges to other departments.

D C 1608. Other Sales

This account shall include revenues derived from gas supplied users and which are not properly includible in revenue accounts 1600 to 1607, inclusive.

OTHER GAS REVENUES

D C 1610. Rent from Gas Operating Property

A. This account shall include rents for the use by others of land, buildings and other property devoted to gas operations by the utility. This covers such matters as rent from pipe lines, buildings, stations, land, etc.

B. This account shall be so kept as to show the nature of the property for which rent was received and the basis of the charges for the use thereof.

Note: Do not include in this account rents from property included in account 1102, Gas Plant Leased to Others. (See account 1508, Income from Gas Plant Leased to Others.)

D C 1612. Customers' Forfeited Discounts

This account shall include the amounts which the utility allows its customers on condition that they pay their gas bills on or before a specified date and which are forfeited because of failure to pay within the specified time.

D C 1614. Servicing of Customers' Installations

This account shall include revenues accruing to the utility from charges to customers on account of the maintenance of appliances, piping, or other installations on customers' side of meters.

D C 1615. Miscellaneous Gas Revenues

This account shall include revenues derived from gas operations not includible in any of the foregoing accounts. This covers such items as fees and charges for changing, connecting and disconnecting service, profit on the sale of unused materials and supplies not ordinarily purchased for resale, commissions on sales or distribution of others' gas (sold under rates filed by such others), management or supervision fees, sale of steam (except when the utility furnishes steam-heating service), revenues from transmitting gas of others, and rentals from property included in account 1368, Leased Property on Customers' Premises.

OPERATION AND MAINTENANCE ACCOUNTS

Note: If the utility produces gas by more than one process or in two or more plants, separate production expense accounts shall be kept for each process or plant.

PRODUCTION EXPENSES

MANUFACTURED GAS PRODUCTION

Note: If the utility manufactures gas by more than one process or in two or more plants, separate production expense accounts shall be kept for each process or plant.

D 1700. Supervision and Labor

This account shall include items provided for in accounts 1701, 1702 and 1703.

C 1701. Supervision

This account shall include the cost of supervising and directing the operation and maintenance of the production plant.

C 1702. Operation Labor

This account shall include the pay of employees for the time during which they are engaged in operating the production plant.

C 1703. Maintenance Labor

This account shall include the pay of employees or others for the time during which they are engaged in making repairs to the production plant. This includes, in addition to labor on actual repairs, such work as routine inspection and testing, replacing or adding minor items of plant (see gas plant instruction 322.2, subd. (c)), testing for, locating

and clearing trouble, restoring the condition of damaged property, etc., but not replacing items of property designated as "units of property. "

D 1710. Fuel

This account shall include items provided for in accounts 1711, 1712, 1713 and 1714.

C 1711. Boiler Fuel

A. This account shall include the cost delivered at works of coal, oil, gas, or other fuel used in the production of steam. It shall also include the net cost of, or the net amount realized from, the disposal of ashes.

B. Records shall be kept to show the quantity and the cost of each type of fuel used.

C 1712. Coal Gas Fuel

A. This account shall include the cost delivered at works of fuel used under retorts or under coke ovens, but not the cost of fuel used for making steam or coal carbonized in retorts or in coke ovens; it shall also include the cost of producer gas used in making coal gas.

B. If coke produced by the company is used under boilers, the accounting shall be as provided in account 1726, Residuals Produced--Credit; if natural gas produced by the utility is used for fuel under retorts or under coke ovens, this account shall be charged with concurrent credit to account 1752, Natural Gas Production--Credit.

C. This account shall include the net cost of, or the net amount realized from, the disposal of ashes.

D. Records shall be kept to show the quantity and the cost of each type of fuel used.

C 1713. Coal Carbonized

A. This account shall include the cost delivered at works of coal used in retorts or in coke ovens for making coal gas.

B. Records shall be kept to show the quantity and the cost of each type of coal used.

C 1714. Water Gas Generator Fuel

A. This account shall include the cost delivered at works of fuel used in water gas generators, including fuel used for reforming gas by means of water gas generators. It shall also include the net cost of, or the net amount realized from, the disposal of ashes.

B. Records shall be kept to show the quantity and the cost of each type of fuel used.

D C 1716. Oil and Enriching Materials

This account shall include the cost delivered at works of oil used in carbureting and materials used for enriching water gas.

D C 1718. Liquefied Petroleum Gas

A. This account shall include the cost delivered at works of liquefied petroleum gas, such as propane, butane, or gasoline, used in making gas.

B. Records shall be kept to show the quantity and the cost of liquefied petroleum gas used.

D C 1719. Raw Materials for Other Gas Processes

A. This account shall include the cost delivered at works of raw materials and fuel used in the production of any kind of gas other than coal gas, water gas, liquefied petroleum gas or natural gas.

B. Records shall be kept to show the type, quantity, and cost of raw materials used.

D C 1720. Miscellaneous Works Supplies and Expenses

This account shall include the cost of supplies used and expenses incurred in connection with the production of manufactured gas not includible in the preceding production accounts.

ITEMS

1. Lubricants
2. Packing
3. Power or steam purchased
4. Purification supplies
5. Tools, hand
6. Waste
7. Water

D C 1724. Maintenance Materials and Expenses

This account shall include materials and supplies used and expenses incurred in repairing and maintaining the manufactured gas production plant.

ITEMS

1. Bills from others for repairs, inspection, adjustment or other maintenance of production plant structures or equipment
2. Materials and supplies used in making repairs or in replacing, minor items of property (See gas plant instruction § 322.2, subd. (c)).
3. Minor items added to plant
4. Transportation, shop and stores expenses, if clearing accounts are used

Note: Materials recovered in connection with repair and maintenance work which is charged to this account, shall be credited hereto; repairing such materials for reuse shall be charged hereto.

D C 1725. Rents

A. This account shall include all rents for property of others used, occupied, or operated in connection with the production of manufactured

gas. Taxes paid on such property shall be charged hereto.

B. If the leased property is used by more than one department of the utility, the rental (and taxes) shall be apportioned on an equitable basis to the departments making use of the property. If a portion of the rented property is subleased, the revenue therefrom shall be included in account 1610, Rent from Gas Operating Property.

D C 1726. Residuals Produced--Credit

A. This account shall be credited and account 1131, Materials and Supplies, debited in each accounting period with the estimated value of residuals and other by-products obtained in connection with the production of manufactured gas, whether intended for sale or for use in operations.

B. If the net amount realized from the sale of residuals is greater or less than the amount at which they were originally credited hereto, an adjusting entry shall be made crediting or debiting this account and charging or crediting account 1131, Materials and Supplies, with the difference.

C. Records shall be so kept as to show for each type of residual or other by product the quantity produced and the amount at which charged to account 1131, Material and Supplies; the quantity sold and the price received therefor; and the quantity and value of residuals used.

D C 1727. Residuals Expense

A. This account shall include all expenses incurred in handling, preparing and marketing residuals produced in manufactured gas production processes, including uncollectible residual accounts.

B. This account shall be so kept as to show the amount of expense applicable to each type of residual.

D C 1728. Steam Produced--Credit

This account shall include credits for steam produced in the manufactured gas department and transferred to another operating department of the utility, or used in gas operations other than the production of manufactured gas, except when such steam production is treated as a joint facility, in which case the accounting shall be as provided in accounts 1808-1809.

Note: The utility shall keep records to show the basis for determining the amounts to be credited to this account.

NATURAL GAS PRODUCTION

Note: If the utility operates in two or more fields, separate production expense accounts shall be kept for each field.

D 1730. Supervision and Labor

This account shall include items provided for in accounts 1731, 1732

and 1733.

C 1731. Supervision

This account shall include the cost of supervising and directing the operation and maintenance of natural gas production facilities.

C 1732. Operation Labor

This account shall include the pay of employees for the time during which they are engaged in the operation of gas wells, gathering lines, field measuring and regulating stations, and purification facilities.

C 1733. Maintenance Labor

This account shall include the pay of employees or others for the time during which they are engaged in making repairs to the natural gas wells, gathering lines and equipment, purification facilities, field measuring and regulating stations, and drilling and cleaning equipment. This includes, in addition to labor on actual repairs, such work as routine inspection and testing, replacing or adding minor items of plant (see gas plant instruction 322. 2, subd. (c)), testing for, locating and clearing trouble, restoring the condition of damaged property, etc., but not replacing items of property designated as "units of property."

D 1740. Materials, Supplies and Expenses

This account shall include items provided for in accounts 1741 and 1742.

C 1741. Operation Supplies and Expenses

This account shall include the cost of all supplies, tools, etc., used, and miscellaneous expenses incurred, in the production and purification of natural gas, but not repair materials, parts, etc.

ITEMS

- | | |
|------------------------------|---------------------------------|
| 1. Fuel | 7. Pressure charts and supplies |
| 2. Lubricants | 8. Purification supplies |
| 3. Meter charts and supplies | 9. Tools, hand |
| 4. Odorizing material | 10. Transportation |
| 5. Oil for oil fogging | 11. Traveling expenses |
| 6. Power | 12. Waste |

C 1742. Maintenance Materials and Expenses

This account shall include materials and supplies used and expenses incurred in repairing and maintaining the natural gas wells, gathering lines and equipment, purification facilities, field measuring and regulating stations, and drilling and cleaning equipment.

ITEMS

1. Bills from others for repairs, inspection, adjustment or other maintenance of natural gas structures or equipment
2. Materials and supplies used in making repairs or in replacing minor

items of property (See gas plant instruction § 322.2, subd. (c).)

3. Minor items added to plant

4. Transportation, shop and stores expenses, if clearing accounts are used

Note: Materials recovered in connection with repair and maintenance work which is charged to this account shall be credited hereto; repairing such materials for reuse shall be charged hereto.

D C 1746. Gas Well Royalties and Rents

A. This account shall include royalties paid for natural gas produced by the utility from land owned by others; also rents includible in operating expenses for operated gas wells or land. (See note B to account 1104.)

B. Records supporting the entries to this account shall be so kept that the utility can furnish the names of the parties to each contract involving royalties or rents, the terms of each contract, the location of the property involved, the method of determining the royalties or rents, and the amounts payable.

D C 1747. Rents for Unoperated Leases

This account shall include rents for the lease of gas lands or rights which are necessary to protect the supply of gas for operated wells.

Note: Amounts paid as rentals for land or rights held to insure a future supply of natural gas shall be charged to account 1526, Miscellaneous Non-operating Income, except as provided in note B to account 1104.

D C 1748. Other Natural Gas Rents

This account shall include rents includible in operating expenses for property of others used in connection with the production of natural gas not includible in the foregoing accounts. (See also gas plant instruction § 322.8.)

ITEMS

1. Rents for right to lay and maintain field lines

2. Rents for measuring and regulating station sites on production system

D C 1749. Non-productive Well Drilling Expenses

This account shall include the costs incurred in drilling non-productive wells at producing gas fields. (See general instruction § 321.4.)

Note: The costs incurred in drilling non-productive wells at a field where the utility has no producing wells shall be charged to account 1538, Miscellaneous Income Deductions, or to account 1414, Miscellaneous Debits to Surplus, unless the commission shall approve some other

procedure for accounting for such costs.

D C 1750. Residuals Produced--Credit

A. This account shall be credited and account 1131, Materials and Supplies, debited in each accounting period with the estimated value of residuals and other by-products obtained in connection with the production of natural gas, whether intended for sale or for use in operations.

B. If the net amount realized from the sale of residuals is greater or less than the amount at which they were originally credited hereto, an adjusting entry shall be made crediting or debiting this account and charging or crediting account 1131, Materials and Supplies, with the difference.

C. Records shall be so kept as to show for each type of residual or other by-product the quantity produced and the amount at which charged to account 1131, Materials and Supplies; the quantity sold and the price received therefor; and the quantity and value of residuals used.

D C 1751. Residuals Expense

A. This account shall include all expenses incurred in handling, preparing and marketing residuals produced in natural gas production processes, including uncollectible residual accounts.

B. This account shall be so kept as to show the amount of expense applicable to each type of residual.

D C 1752. Natural Gas Production--Credit

This account shall be credited with the cost of natural gas which is produced by the utility and which is used in manufactured gas production and charged to account 1712, Coal Gas Fuel. This account shall also be credited with the cost of natural gas produced by the utility and used in gas well construction. The cost to be so accounted for shall include amounts charged in accounts 1730 to 1751, inclusive, and account 1503.

MISCELLANEOUS PRODUCTION

D C 1755. Gas Purchased

A. This account shall include the cost at the point of delivery to the utility of all gas purchased for resale, including charges for readiness to serve. This includes gas purchased for reforming.

B. When the contract is a reciprocal one, i.e., when either party thereto may take gas from the other, the amount payable for the gross quantity of gas received shall be charged hereto in each accounting period and the amount receivable for the gross quantity supplied to the other party shall be included in the appropriate revenue account.

C. The records supporting the entries to this account shall be so kept as to show for each company from which gas is obtained the type of gas,

the point of delivery, the quantity thereof, the basis of the charges, and the amount payable therefor.

D C 1756. Other Production Expenses

A. This account shall include any production expenses, including expenses incurred directly in connection with the purchase or storage of gas, which are not provided for in other production expense accounts.

B. This account shall also include, in a separate subdivision thereof, amounts debited or credited to reflect the decrease or increase in the cost of gas in storage at the end of the accounting period. However, if the variation in the cost of gas in storage is negligible in amount, such entries need not be made.

TRANSMISSION AND DISTRIBUTION EXPENSES

D 1760. Supervision and Labor

This account shall include items provided for in accounts 1761 to 1765.

C 1761. Supervision

This account shall include the cost of supervising and directing the operation and maintenance of the transmission and distribution systems.

C 1762. Operation Labor

This account shall include the pay of employees for the time during which they are engaged in operating the transmission and distribution systems, except labor on work on customers' premises (chargeable to account 1763) and labor on street lighting (chargeable to account 1765). (See also note hereunder.)

ITEMS

1. Attending gates and valves
2. Keeping maps and other transmission and distribution operating records
3. Labor, mixing gas
4. Operating holder valves
5. Patrolling
6. Pressure, recording of
7. Pumping drips
8. Recording holder readings

Note: Maintenance labor shall be included in account 1764 or 1765, as appropriate.

C 1763. Labor on Customers' Premises

This account shall include the pay of employees for the time during which they are engaged in inspecting, testing, repairing, removing and resetting or changing the location of meters or house regulators and accessory equipment located on customers' premises, investigating

service complaints, adjustments in connection with changes in B.t.u. content, pressure, and other work on customers' premises.

Note: The cost of the first installation at a location of a meter or house regulator shall not be charged to this account but to gas plant account 1366, Meters and House Regulators.

C 1764. Maintenance Labor

This account shall include the pay of employees engaged in repairing and maintaining transmission and distribution facilities, including holders located on the transmission or distribution lines, but not meters or street lighting systems.

ITEMS

1. Cutting and replacing pavement, pavement base, and sidewalks in connection with repairs
2. Inspecting and testing after repairs have been made
3. Inspecting, testing and reporting on the condition of mains, services, and holders on lines, to determine the need for repairs, minor replacements and changes
4. Replacing or adding minor items of plant (See gas plant instruction 322.2, subd. (c).)
5. Repairing materials for reuse
6. Restoring the condition of damaged mains, services and holders on lines (See note B, below.)
7. Routine work to prevent trouble
8. Testing for, locating, and clearing trouble
9. Training employees for maintenance work

Note A: Meter repair labor shall be included in account 1763; street lighting repair labor shall be included in account 1765.

Note B: The cost of maintenance does not include cost of replacing items of property designated as "units of property. "

C 1765. Street Lighting Labor

This account shall include the pay of employees for the time during which they are engaged in work on the street lighting systems.

ITEMS

1. Cleaning fixtures
2. Recording pressure
3. Renewing lights
4. Repairs to system
5. Restoring the condition of damaged property (See note below.)
6. Routine inspection and tests
7. Testing for and clearing trouble

Note: The cost of maintenance does not include cost of replacing items

of property designated as "units of property. "

D 1770. Materials, Supplies and Expenses

This account shall include items provided for in accounts 1771, 1772 and 1773.

C 1771. Operation Supplies and Expenses

This account shall include the cost of all supplies, tools, etc., used and miscellaneous expenses incurred in operating the transmission and distribution systems, excepting materials, supplies and expenses used in maintenance and on the street lighting systems.

Note: All materials and supplies used and expenses incurred on street lighting systems are chargeable to account 1773, Street Lighting Materials, Supplies and Expenses; maintenance materials and supplies used and expenses incurred on other transmission and distribution property are chargeable to account 1772, Maintenance Materials, Supplies and Expenses.

C 1772. Maintenance Materials, Supplies and Expenses

This account shall include the cost of materials and supplies used and expenses incurred in repairing and maintaining transmission and distribution system property (excepting the street lighting systems), but including materials and supplies used and expenses incurred in work on customers' premises.

ITEMS

1. Meter repair materials
2. Paving repair materials
3. Replacing or adding minor items of property (See gas plant instruction ÷ 322.2, subd. (c).)
4. Transportation, shop and stores expenses, if clearing accounts are used
5. Work done by others

C 1773. Street Lighting Materials, Supplies and Expenses

This account shall include the cost of materials and supplies used and expenses incurred in operating, repairing and maintaining the street lighting systems. This includes, in addition to materials and supplies used on repairs to street lighting property, such items as lamps, glassware, etc., but does not include the cost of replacing items designated as "units of property. "

D C 1776. Rents

A. This account shall include all rents for property of others used, occupied, or operated in connection with the transmission or distribution system. Taxes paid on such property shall be charged hereto. (See also gas plant instruction ÷ 322.8.)

B. If the leased property is used by more than one department of the utility; the rental (and taxes) shall be apportioned on an equitable basis to the departments making use of the property. If a portion of the rented property is subleased, the revenue therefrom shall be included in account 1610, Rent from Gas Operating Property.

D C 1777. Miscellaneous Expenses

This account shall include transmission and distribution expenses not elsewhere provided for, including amounts payable to others for transmission of gas.

CUSTOMERS' ACCOUNTING AND COLLECTING EXPENSES

D 1780. Meter Reading, Accounting and Collecting

This account shall include items provided for in accounts 1781 and 1782.

C 1781. Meter Reading

This account shall include the pay of employees engaged in reading customers' meters, and the cost of supplies used and expenses incurred in connection therewith.

ITEMS

1. Badges
2. Forms for recording readings
3. Lamps
4. Meter readers, pay of
5. Transportation
6. Uniforms

C 1782. Accounting and Collecting

This account shall include the pay and expenses of employees engaged on customers' applications, contracts, orders, complaints, and inquiries, and in making credit investigations, billing, collecting customers' bills, and bookkeeping; and the cost of supplies used and expenses incurred in connection therewith.

ITEMS

1. Accounts, customers', keeping of
2. Address plates
3. Billing
4. Bookkeeping
5. Books
6. Cashier, pay of
7. Commissions, fees, or salaries of collectors
8. Delivery of bills
9. Disconnection for non-payment of bills
10. Office supplies

11. Postage
12. Stationery and printing
13. Statistical work on customers' accounts
14. Tabulating sales
15. Transportation

D C 1783. Uncollectible Accounts

This account shall be charged each month with amounts sufficient to provide for losses from uncollectible gas revenues. Concurrent credits shall be made to account 1254, Reserve for Uncollectible Accounts.

Losses from uncollectible accounts shall be charged to such reserve.

D C 1784. Rents

A. This account shall include rents for property of others used, occupied, or operated in connection with customers' accounting and collecting, such as for a commercial office. Taxes paid on such property shall be charged hereto. (See also gas plant instruction § 322.8.)

B. If the leased property is used by more than one department of the utility, the rents (and taxes) shall be apportioned on an equitable basis to the departments making use of the property. If a portion of the rented property is subleased, the revenue therefrom shall be included in account 1610, Rent from Gas Operating Property.

Note: If the commercial office and the general office occupy space jointly, and the allocation of the rental to each office is not practicable, the entire amount for office rental may be included in account 1803, General Rents.

SALES PROMOTION EXPENSES

D C 1786. Sales Expenses

This account shall include the cost of labor employed and expenses incurred for the purpose of promoting the sale of gas, other than merchandising, jobbing or contract work activities.

ITEMS

1. Advertising
2. Demonstrating use of appliances
3. Salaries and commissions of solicitors

D C 1789. Merchandising, Jobbing and Contract Work

A. This account shall include expenses of merchandising, jobbing and contract work; also all revenues derived from the sale of gas merchandise, and jobbing or contract work, including any profit or commissions accruing to the utility from jobbing work performed by it as agent under agency contracts whereby it undertakes to do jobbing work for another for a stipulated profit or commission.

B. This account shall be subdivided as follows:

1789.1 Revenues from Merchandising, Jobbing and Contract Work

1789.2 Cost of Merchandising, Jobbing and Contract Work

ADMINISTRATIVE AND GENERAL EXPENSES

D C 1790. Salaries of General Officers

This account shall include the compensation (salaries, bonuses and other consideration for services) of officers and executives of the utility, properly chargeable to gas operations and not chargeable directly to a particular gas function.

Note: Directors' fees, even though paid to officers, shall be charged to account 1800, Other General Expenses.

D C 1791. Other General Office Salaries

This account shall include the compensation of employees engaged in the general offices properly chargeable to gas operations and not chargeable directly to a particular gas function.

D C 1793. General Office Expenses

This account shall include the expenses of general officers and general office employees, and the cost of office supplies and office expenses in connection with the general administrative functions of the utility's gas operations.

ITEMS

1. Books and periodicals for office use
2. Building service (not including rent)
3. Meals and hotel bills
4. Membership fees and dues in trade, technical and professional associations
5. Office supplies
6. Postage
7. Printing
8. Stationery
9. Telephone, telegrams, etc.
10. Traveling expenses

D 1795. Special Services

A. This account shall include amounts payable to any corporation, firm or individual, other than officers and employees of the utility, for special services to the gas department for general supervision and management services and expenses, and for legal and other special services and expenses.

ITEMS

1. Service:
 - (a) Auditing and accounting
 - (b) Legal

- (c) Management
- (d) Rates
- (e) Secretarial
- (f) Statistical
- (g) Supervisory

2. Expenses:

- (a) Hotel
- (b) Meals
- (c) Printing
- (d) Stationery
- (e) Traveling

B. Class C utilities shall subdivide this account as follows:

C 1795.1 Management and Supervision

C 1795.2 Legal Services

C 1795.3 Other Special Services

C. Records supporting this account shall be so kept as to show (1) the basis of each fee, (2) the amount of the fee, and (3) the person to whom the fee is paid or payable.

Note A: Legal or other special services in connection with formal cases before regulatory commissions, or in cases in which such a commission is a party, shall be charged to account 1797, Regulatory Commission Expenses, or when specifically applicable to injury or damage cases to account 1798, Insurance, Injuries and Damages, or other appropriate account.

Note B: Legal or other special services incident to the construction of gas property shall be charged to the appropriate utility plant accounts. Legal services incident to the issuance of long-term debt or capital stock shall be charged to account 1140, Unamortized Debt Discount and Expense, account 1240, Unamortized Premium on Debt, or account 1151, Capital Stock Expense, as appropriate.

D C 1797. Regulatory Commission Expenses

A. This account shall include all expenses (except pay of regular employees only incidentally engaged in such work), properly includible in gas operating expenses, incurred by the utility in connection with formal cases before regulatory commissions, or other regulatory bodies, or cases in which such a body is a party, including payments made to a regulatory commission for fees assessed against the accounting utility for pay and expenses of such commission, its officers, agents, and employees.

B. Amounts of regulatory commission expenses which are spread over future periods shall be charged to account 1146, Miscellaneous Deferred

Debits, and amortized by charges to this account. (See general instruction § 321.4.)

C. The utility shall be prepared to report the cost of each formal case.

D. The costs which may be partly chargeable to this account and partly to the other accounts enumerated in notes A and B to account 1795 shall be equitably apportioned, and the basis of allocation to the several accounts shall be submitted to this commission.

ITEMS

1. Salaries, fees, retainers, and expenses of counsel, solicitors, attorneys, accountants, engineers, clerks, attendants, witnesses, and others engaged in the prosecution of, or defense against, petitions or complaints presented to regulatory bodies, or in the valuation of property owned or used by the utility in connection with such cases

2. Expenses: Engineering supplies, office expenses, payments to public service or other regulatory commissions, stationery and printing, traveling expenses, and other expenses incurred directly in connection with formal cases before regulatory commissions

Note A: Exclude from this account and include in other appropriate operating expense accounts, expenses incurred in the improvement of service, additional inspection, or rendering reports, which are made necessary by the rules and regulations, or orders, of regulatory bodies.

Note B: Do not include in this account costs incident to the construction of gas property, which are chargeable to the tangible gas plant accounts. Costs incurred in connection with property purchases shall be accounted for as provided in paragraph D of account 1106, Unclassified Gas Plant. Costs incurred incident to the issuance of long-term debt shall be charged to account 1140, Unamortized Debt Discount and Expense, or account 1240, Unamortized Premium on Debt, as applicable; costs incurred incident to the issuance of capital stock shall be charged to account 1151, Capital Stock Expense.

Note C: Do not include in this account expenses in connection with investigations by legislative bodies or cases to which the utility is not a party.

D C 1798. Insurance, Injuries and Damages

A. This account shall include the cost of insurance to protect the utility against the following losses and damages:

(1) Losses and damages to owned or leased property used in its gas operations such as by fire, storm, burglary, boiler explosion, lightning, etc.

(2) Protection against claims for injuries or deaths to employees or

others, or damages to the property of others, including public liability, property damage, boiler, casualty, employees' liability, etc.

(3) Other losses which occur in connection with gas operations, and payments and expenses on account of damages for nonperformance of contractual obligations

B. Amounts may be accrued monthly sufficient to meet the probable liability for such losses, concurrent credits being made to account 1255, Reserve for Insurance, Injuries and Damages, in which case losses sustained shall be charged to the reserve. This includes payments to attorneys, investigators and adjusters, court costs, etc.

C. Reimbursements from insurance companies or others for expenses charged hereto on account of property damages or for injuries and damages, and insurance dividends or refunds, shall be credited to this account.

Note A: If clearing accounts 1902 to 1905 are kept, the applicable items provided for in this account shall be included in such clearing accounts.

Note B: The utility shall so keep its records as to show the amount of coverage for each class of insurance carried, the property covered, the applicable premiums, and the distribution of the costs to specific operations or functions. If the utility carries reserves for self-insurance, it shall maintain records to show the types of losses against which such reserves are maintained, and the basis of the accruals to the reserves for each risk covered.

D C 1800. Other General Expenses

A. This account shall include such items of expense applicable to the gas department, not provided for in other accounts, as the cost of publishing and distributing annual reports to stockholders; advertising notices of stockholders' meetings; dividend and other corporate and financial notices of a general character; association dues; contributions for conventions and meetings of the industry; fees of transfer agents, registrars of stock and fiscal agents; director's fees; fees for filing annual reports and tariff schedules; commissions paid under agency sales contracts; expenses incurred in accident, welfare, educational and recreational work; cost of life insurance for employees when the utility is not the beneficiary; pensions payable currently to retired employees or their beneficiaries and the cost of advance provision for pensions to be paid to retired employees or their beneficiaries, except payroll taxes, (see general instruction ÷ 321.12); cost of employees' relief and benefits; and any other miscellaneous expenses connected with the general management and not otherwise

provided for.

B. This account shall not include any charges representing amounts used or to be used for the purchase of securities of the accounting company or any associated company, whether contributed by the accounting company or deducted from salaries and wages of employees, unless and until such amounts have actually been realized and paid to the employees in cash or its equivalent subject to their free disposition. To the extent that the securities thus purchased have an actual market value, the amounts paid for them may be carried meanwhile in account 1114, Miscellaneous Investments and Special Funds; otherwise such amounts shall be charged to account 1538, Miscellaneous Income Deductions. (See general instruction § 321.7.)

Note A: When the utility is the beneficiary of insurance on officers or employees, the cash surrender value shall be included in account 1133, Miscellaneous Current and Accrued Assets, and the excess of cost of the insurance over such cash surrender value shall be charged to account 1538, Miscellaneous Income Deductions.

Note B: No charges shall be made to this account or distributed to other accounts to cover advance provision for future pension payments, unless the controlling plan has been filed with the commission; and no charges shall be made in anticipation of discretionary pension payments in the future.

Note C: Records shall be kept so that the amounts paid for pensions and the amounts paid as advance provision for future pensions can be readily determined.

Note D: Upon adoption of an accrual plan of accounting, pension payments to employees retired before the adoption of such plan shall be charged to an existing pension reserve until such reserve is exhausted, unless any such existing reserve is eliminated by payment of an equivalent amount into the pension trust fund.

D C 1802. Operation and Maintenance of General Property

This account shall include the cost of operating and maintaining general buildings and general office furniture and equipment.

D C 1803. General Rents

A. This account shall include rent, covering the property of others used, occupied, or operated in connection with the general and administrative functions of the utility, such as general offices. Taxes paid on such property shall be charged hereto. (See also gas plant instruction § 322.8.)

B. If the leased property is used by more than one department of the utility, the rental (and taxes) shall be apportioned on an equitable

basis to the departments making use of the property. If a portion of the rented property is subleased, the revenue therefrom shall be included in account 1610, Rent from Gas Operating Property.

Note: If the commercial office and the general office occupy space jointly and the allocation of the rental to each office is not practicable, the entire amount of such rental may be included in this account.

D C 1805. Franchise Requirements

A. This account shall include payments to municipal or other governmental authorities, and the cost of materials, supplies and services furnished such authorities without reimbursement in compliance with franchise, ordinance, or similar requirements, provided, however, that the utility may charge to this account at regular tariff rates, instead of cost, gas furnished without charge under provisions of franchises.

B. When no direct outlay is involved, concurrent credits for such charges shall be to account 1806, Duplicate Charges--Credit.

Note A: Taxes shall not be charged to this account. (See account 1507, Operating Taxes.)

Note B: The cost of plant, supplies, etc., given as an initial consideration for a franchise running for more than one year shall be charged to account 1302, Franchises and Consents.

D C 1806. Duplicate Charges--Credit

A. This account shall include concurrent credits for charges which are made to account 1805, Franchise Requirements, to the extent that such charges do not represent direct outlays. It shall also include concurrent credits for charges made to operating expense or other accounts of the gas department for gas or steam for heating for which there is no direct money outlay.

B. This account shall be so kept as to disclose the nature and amount of each item included herein.

D C 1807. Administrative and General Expenses Transferred--Credit

A. This account shall be credited with amounts recorded in the administrative and general expenses which are properly includible in construction costs, covering the portion of the pay and expenses of general officers, clerks, and others when engaged on construction work.

B. The records supporting this account shall be so kept as to show the basis of determining the amounts transferred to construction.

Note: See gas plant instruction, paragraph (5) of subdivision (a) of section 322.3.

D C 1808. Joint Expenses--Debit

D C 1809. Joint Expenses--Credit

A. A joint facility for the purpose of this system of accounts is defined as any property occupied or used jointly by the utility and another or others under a definite arrangement whereby the actual costs are shared between or among the parties. Property of the utility occupied or used under a similar definite arrangement between the gas department and a coordinate department or departments shall likewise be considered as a joint facility.

B. Amounts payable by the gas department to others or to a coordinate department for joint facilities used, occupied, or operated in connection with gas operations shall be charged to account 1808, Joint Expenses--Debit; amounts receivable under the arrangements shall be credited to account 1809, Joint Expenses--Credit. The cost of natural gas produced by the utility and used in manufactured gas production shall be credited to account 1752, Natural Gas Production--Credit.

C. These accounts shall also include interdepartmental rents receivable or payable even though such rents are not determined on the basis of costs of operation and maintenance of property jointly used.

D. The records supporting the entries to these accounts shall be so kept that the utility can furnish a complete explanation of the items therein.

D C 1810. Stores, Shop and Laboratory Expenses

A. This account shall include the cost of labor employed and expenses incurred in the operation and maintenance of the gas storerooms, shops and laboratories if such expenses are not allocated, either directly or through the medium of a clearing account, to the accounts, benefited.

B. This account, when kept, shall include costs covered by the text and items listed in accounts 1902, Stores Expenses--Clearing, and 1905, Shop and Laboratory Expenses--Clearing, except depreciation, insurance, and rents. (See accounts 1503, 1798 and 1803.)

Note A: The cost of repairs to meters and other plant (repairs) {4} made at the shop shall not be included herein but in the accounts appropriate for such maintenance.

FOOTNOTE: (4) Supplied by editor.

Note B: Stores, shop and laboratory expenses applicable to construction shall not be included in operating expenses.

D C 1811. Transportation Expenses

A. This account shall include the cost of labor employed and expenses

incurred in the operation and maintenance of transportation equipment if such expenses are not allocated, either directly or through the medium of a clearing account, to the accounts benefited. For item list and optional accounting, see account 1903, Transportation Expenses--Clearing.

B. This account, when kept, shall include costs covered by the text and items listed in account 1903, Transportation Expenses--Clearing.

Note: Transportation expenses applicable to construction shall not be included in operating expenses.

CLEARING ACCOUNTS REQUIRED

D C 1901. Charges by Associated Companies--Clearing

OPTIONAL

1902. Stores Expenses--Clearing

1903. Transportation Expenses--Clearing

1905. Shop and Laboratory Expenses--Clearing

REQUIRED

Note: Utilities which do not use accounts 1902 to 1905 shall keep accounts 1810, Stores, Shop and Laboratory Expenses, and 1811, Transportation Expenses.

D C 1901. Charges by Associated Companies--Clearing (Required)

A. This account shall include all charges made by associated companies against the utility for any purpose whatsoever (except interest), including charges for management, supervision, purchasing, construction, accounting, engineering, legal, financial, rent, advertising, materials and supplies, equipment and other property, commissions, taxes and other items, together with credits applicable thereto as provided in general instruction section 321.7.

B. This account shall be cleared by charging the appropriate accounts with the expenditures applicable thereto.

C. The records supporting this account shall be so kept as to show the nature of each charge together with the account or accounts to which each charge is cleared.

Note: The mandatory use of this account may be suspended upon order of the commission if equivalent information is readily obtainable from other records of the utility.

1902. Stores Expenses--Clearing (Optional)

A. This account shall include the cost of labor and expenses incurred in the operation and maintenance of the storerooms (other than those identified only with a particular function) including storage, handling and distribution of materials and supplies.

B. Cash discounts shall be credited hereto when such discounts can not be applied to the cost of particular materials.

C. This account shall be cleared by adding to the cost of materials and supplies a suitable loading charge which will distribute the expense equitably over stores issues.

ITEMS

1. Adjustments of inventories of materials and supplies
2. Collecting and handling scrap materials in stores
3. Depreciation of storeroom equipment
4. Discount on materials, when not assignable to specific items
5. Freight, express, etc., when not assignable to specific items
6. Heat, light and power for storerooms and stores offices
7. Injuries and damages
8. Inspecting and testing materials and supplies, when not assignable to specific items
9. Insurance on materials and supplies and on stores equipment
10. Losses due to breakage, leakage, evaporation, fire and other causes. Credit any amounts received from insurance, transportation companies or others in compensation of such losses
11. Maintenance of stores equipment
12. Pay and expenses of storekeepers, clerks and others employed in storerooms or in store offices
13. Purchasing agents' fees, portion applicable to items carried through this account
14. Purchasing agents' pay and expenses, portion applicable to items carried through this account
15. Rents (See also gas plant instruction 322.8.)
16. Transporting materials into storehouse, when not assignable to specific items

Note: Large differences in the accounts disclosed by inventories, which can readily be assigned to important classes of materials, shall be equitably adjusted among the accounts to which such classes of materials have been charged since the preceding inventory. Other differences shall be equitably apportioned among the accounts to which materials have been charged, or included in this account.

1903. Transportation Expenses--Clearing (Optional)

A. This account shall include the cost of labor and expenses incurred in the operation and maintenance of the gas general transportation equipment, including direct taxes and depreciation on transportation equipment.

B. This account shall be cleared by apportionment to operating

expense, gas plant, or other accounts benefited on a basis which will distribute the expenses equitably. Credits to this account shall be made in such detail as to permit ready analysis.

ITEMS

1. Depreciation of transportation equipment
2. Feed and bedding for horses and mules
3. Fuel and lubricants for vehicles (including sales and excise taxes thereon)
4. Freight, express, drayage, etc., on fuel, repair parts, etc.
5. Heat, light and power for garage and garage office
6. Injuries and damages
7. Insurance on garage equipment and transportation equipment including public liability and property damage
8. License fees for vehicles and drivers
9. Maintenance of transportation and garage equipment
10. Operation of garages and stables
11. Pay and expenses of drivers, mechanics, etc.
12. Rent of garage buildings and grounds (See also gas plant instruction 322.8)
13. Rent of vehicles and other rents
14. Taxes, direct, such as on gasoline, oil, tires, etc.
15. Tires, tubes and chains

1905. Shop and Laboratory Expenses--Clearing (Optional)

A. This account shall include the cost of labor and expenses incurred in the operation and maintenance of shops and laboratories of the utility, other than those identified wholly with a particular function.

B. This account shall be cleared by apportionment to operating expense, gas plant, or other accounts benefited on a basis which will distribute the expenses equitably. Credits to this account shall be made in such detail as to permit ready analysis.

C. If a laboratory is maintained at a production plant in connection with the operation of the plant, the costs incident to its operation and maintenance shall be charged to the appropriate production expense account.

ITEMS

1. Charts
2. Collecting and handling scrap materials
3. Depreciation of equipment
4. Heat, light and power
5. Injuries and damages
6. Insurance on equipment and supplies

7. Pay and expenses of superintendents, machinists, chemists and other employees in shops or laboratories

8. Rents (See also gas plant instruction § 322.8.)

9. Repairs to equipment

10. Testing supplies

350.1 Utility contract and procurement procedures

350.2 Filing of changes in procedure

.SO DOC 16B-350.1

NYCRR

Section 350.1 Utility contract and procurement procedures.

(a) Every gas corporation subject to the jurisdiction of this Commission with annual gross operating revenues in excess of \$5,000,000 shall file, in accordance with the requirements of § 3.5 of this Title, with this Commission the procedures which govern the contracting for and procurement of services, equipment or materials to be used in its utility operations. The statement shall:

(1) Describe the circumstances in which cost estimates will be prepared and the procedures for awarding a contract which exceeds such an estimate. Such estimates, when prepared:

(i) shall be related to market conditions and trends as well as the utility's own experience; and

(ii) where competitive bidding is employed, shall remain confidential until after the bids are opened.

(2) where competitive bidding is employed, specify the procedures used in preparing and maintaining lists of qualified bidders by geographical area, type of material or service provided, and degree of capability, including:

(i) the criteria used for including or excluding bidders;

(ii) a description of the circumstances in which all bidders on such a

list will not be solicited in instances where the utility uses competitive bidding; and

(iii) a provision that in the absence of such a list, all requests to be allowed to bid that are not honored, shall be reviewed within the utility.

(3) Where competitive bidding is employed, specify the procedure to be employed to ensure that sealed bids are opened at the time and place specified.

(4) Specify the procedure employed in making awards in the absence of bids or, where competitive bidding is employed, to a person other than the low bidder.

(5) Specify the procedures employed in reviewing contract expenditures, relating such expenditures to any cost estimate, the amount of the award and existing market conditions.

(6) Include a requirement for disclosure to the utility of any ownership or beneficial interest in potential suppliers by employees involved in specifying or procuring services, equipment and material which requirement shall provide that no employee in the purchasing department nor anyone with authority to review or approve a purchasing decision shall have such an interest except in accordance with such rules as the utility may develop and file with this Commission.

.SO DOC 16B-350.2 NYCRR

350.2 Filing of changes in procedure.

Each such electric, gas and steam corporation shall file with this commission any change in these procedures at least 30 days before they are to be effective, unless otherwise authorized by this commission.

PART 351

CONTRACTS OR AGREEMENTS FOR THE CONSTRUCTION,
IMPROVEMENT,

EXTENSION OR MAINTENANCE OF UTILITY PLANTS

(Statutory authority: Public Service Law, § 115)

Sec.

351.1 Filing of proposed contract

351.2 Subcontract on cost-plus basis

351.3 Emergency contract

351.4 Quarterly filing of contract

351.5 Waiver of rule

.SO DOC 16B-351.1 NYCRR

Section 351.1 Filing of proposed contract.

(a) Every public utility company subject to the jurisdiction of this

commission shall file, in accordance with the requirement of § 3.5 of this Title, with this Commission one copy of every proposed cost-plus contract or agreement, including those contracts or agreements in which the payment to be made by the utility is based on time and material consumed regardless of the number of units completed, for the construction, improvement or extension of its plant, works or system exceeding in amount \$100,000 in any calendar year, and a list of any other offers received, and such contract or agreement shall not become effective until it has been on file with this Commission for 30 days, or until the Commission has notified the utility that such contract or agreement may be made effective immediately. If during the 30 day period, the Commission determines that it is in the public interest for the contract or agreement for the work proposed to be performed shall be let after public bidding, the Commission will notify the public utility company, and the filed contract or agreement will not become effective. In such circumstances the public utility shall proceed to make a public offering of the proposed work in accordance with the direction of the Commission.

(b) When the accumulated amount of all other such contracts or agreements awarded to a single contractor in any calendar year has exceeded \$100,000, a list of such contracts, including any other offers received, shall be filed, in accordance with the requirements of § 3.5 of this Title, with the Commission by March 1 of the succeeding year.

.SO DOC 16B-351.2

NYCRR

351.2 Subcontract on cost-plus basis. In view of the fact that a so-called subcontract covering any part of the work to be performed under a cost-plus contract or agreement entered into by a public utility company is, in effect, the contract or agreement of the public utility company within the meaning of § 115 of the Public Service Law, every such subcontract on a cost-plus basis, proposed to be let under a principal contract or agreement which is subject to § 351.1 hereof, shall be filed, in accordance with the requirements of § 3.5 of this Title, with the Commission in accordance with the requirements of provisions of such section. All such contracts or agreements shall contain suitable provisions to give effect to the provisions of this Part. This section shall not apply to a subcontract which provides by its terms that the maximum payment thereunder shall not exceed the sum of \$5,000.

.SO DOC 16B-351.3

NYCRR

351.3 Emergency contract. In case a storm, flood, accident or similar emergency requires that a contract or agreement be made without

complying with the foregoing provisions of this Part in order to maintain or restore the company's service, immediate notice shall be given to the Commission by telephone of the making of such contract or agreement, and a copy thereof shall be filed in accordance with the requirements of § 3.5 of this Title, as soon as possible, but not later than 10 days after the making thereof, and such contract or agreement shall be exempted from the other provisions of this Part.

.SO DOC 16B-351.4 NYCRR

351.4 Quarterly filing of contract. Every public utility company subject to the jurisdiction of this commission shall file with this commission quarterly, one copy of every contract or agreement for the construction, improvement, extension or maintenance of its plant, works or system exceeding in amount \$1,000,000 in any calendar year, and a list of any other offers received.

.SO DOC 16B-351.5 NYCRR

351.5 Waiver of rule. Any public utility company may apply to this commission for a waiver or modification of all or part of the requirements of this Part upon a showing that compliance therewith would be impracticable or unduly burdensome in connection with a particular project, contract or agreement.

.SO DOC 16B-PT352 NYCRR

PART 352

LIMITATION OF LIABILITY CLAUSES--GAS CORPORATIONS

(Statutory authority: Public Service Law, § 115)

Sec.

352.1 Prohibition of certain limitation of liability provisions

.SO DOC 16B-352.1 NYCRR

Section 352.1 Prohibition of certain limitation of liability provisions.

Every gas corporation, electric corporation and gas and electric corporation shall, where necessary, amend its filed tariff schedules by eliminating therefrom:

(a) Provision attempting to relieve such corporation from liability arising from the gross negligence or willful misconduct of its officers, agents or servants.

(b) Provisions limiting the liability of the corporation for damages resulting from its own negligence in connection with the property owned, installed or maintained by a customer or leased by a customer from a third party.

(c) Provisions limiting the liability of the company for any damages resulting from the negligence of the company in connection with the

supplying or use of electricity or gas or from the presence or operation of the company's structures, equipment, wires, pipes, appliances or devices on the consumer's premises.

.SO DOC 16B-400.1 NYCRR

Section 400.1 Definitions. (a) A complaint test is a test of a meter, made by a utility as a result of a complaint made to the utility by a customer.

(b) A periodic test is a scheduled test of a meter, made by a utility at fixed intervals, in accordance with the meter testing schedule contained herein.

(c) An office test is a test of a meter, made by a utility at the direction of an officer or employee of the utility.

(d) A referee test is a test of a meter, made or witnessed by a representative of the commission as a result of a complaint made to the commission by a customer.

(e) The term meter, when used with respect to a steam flow meter of the velocity type in conjunction with a main line orifice or to a steam flow meter of the head type, refers to the secondary element (flow mechanism).

.SO DOC 16B-400.2 NYCRR

400.2 General. (a) The rules and regulations contained herein are promulgated to establish minimum requirements for the guidance of utilities in controlling operating conditions and in instituting practices in connection with the installation, testing and maintenance of steam meters and steam service equipment.

(b) For the purpose of these rules and regulations, the term utilities shall include all corporations which distribute steam under the jurisdiction of the commission and which have 1,000 or more meters installed on customers' premises.

(c) Each utility shall provide adequate meter testing facilities and shall have all meters, used or intended to be used for the purpose of billing customers, tested as required by the rules and regulations contained herein.

(d) No utility shall use for the purpose of billing customers any steam meter or accessory equipment which affects or determines the measurement of the quantity of steam furnished to or for the use of any

customer, the type of which shall not have been approved by the commission.

(e) Application for approval by the commission of a type of steam meter, including any accessory equipment which affects or determines the measurement of the quantity of steam furnished to or for the use of any customer, shall be submitted by a utility by whom such meter is intended to be used.

(f) Provision shall be made to insure that a condensate type meter will in no case operate under pressure.

(g) The installation of a head type flow meter shall conform with the applicable provisions set forth in the American Society of Mechanical Engineers Standards covering flow measurement (presently designated as PTC 19.5; 4-1959), in effect at the time of meter installation.

(h) Each utility shall maintain its equipment in customers' premises in good condition.

(i) Each utility shall keep a record of the average pressure which exists each month at pressure recording stations throughout its system.

(j) Each steam meter in service shall have affixed thereto, in a permanent manner, an identifying number or designation.

.SO DOC 16B-400.3 NYCRR

400.3 Reference standards. (a) Tests to determine the effective area of all orifice plates used in testing steam meters shall be made at least once each six months, and a record of these tests shall be retained for a period of two years.

(b) The gauges, scales, thermometers, etc., used in making tests shall be calibrated at intervals consistent with good laboratory practice.

.SO DOC 16B-400.4 NYCRR

400.4 Referee tests. (a) In a referee test, a representative of the commission will seal the meter or meter device involved, and will notify the utility within 24 hours that such meter or device has been sealed.

(b) In a referee test, the seals for the meter or the meter device involved shall be opened only in the presence of a representative of the commission. The meter or meter device shall be tested under the direction of a representative of the commission.

(c) When, in a referee test, the percentage registration of a meter is found to be more than 102 percent, no charge shall be made for such test. If, however, as a result of such test, the percentage registration of the meter is found to be 102 percent or less, a charge shall be made to the customer by the utility based on the following schedule:

Type of Meter	Capacity or Size	Fee
Condensate	3000 lbs. per hr. or less	\$25.00

Condensate	Over 3000 lbs. per hr.	50.00
Area	1 in.	25.00
Area	1 1/2 in.	25.00
Area	2 in.	50.00
Area	3 in.	75.00
Area	4 in.	100.00
Area	6 in.	150.00
Area	8 in.	300.00
Velocity	1 in.	25.00
Velocity	2 in.	25.00
Velocity	3 in.	50.00
Velocity	4 in.	50.00
Head	All	100.00

.SO DOC 16B-400.5 NYCRR

400.5 Meter records. (a) For all steam meters installed on customers' premises records shall be maintained which identify the year purchased, the manufacturer, the type, the identifying number, the nameplate data relative to the rating of the meter, the location, and the date of last test. Such records shall be sufficient to identify all associated meters and accessory equipment affecting the accuracy of the billing.

(b) The test record of each meter and meter device installed on customers' premises shall be retained until a superseding test is made, but for a period of not less than two years.

.SO DOC 16B-400.6 NYCRR

400.6 Schedule of testing steam meters. (a) Each steam meter shall be tested prior to installation at a location or within 30 days after initially being placed in service at that location.

(b) All steam meters installed upon customers' premises shall be tested in accordance with the following schedule:

(1) Meters of the condensate type--at least 25 percent of the total number of meters of such type in service shall be tested in each calendar year, the required number of meters to be tested being selected from those longest without test.

(2) Meters of the area type shall be tested at least once every five years.

(3) Meters of the velocity type--at least 20 percent of the total number of meters of such type in service shall be tested in each calendar year, the required number of meters to be tested being selected from those longest without test.

(4) Meters of the head type shall be tested at least once every year.

.SO DOC 16B-400.7 NYCRR

400.7 Rules for testing steam meters.

(a) All meters shall be adjusted to register accurately with a tolerance of not more than two percent.

(b) Steam flow meters--area and velocity types. (1) Steam flow meters of the area and velocity types shall be tested using air or steam as the testing medium except as provided in section 400.4(b) of this Part.

(2) In tests employing steam as the testing medium, the steam used shall in no case contain more than one percent moisture and may be slightly superheated.

(3) In tests employing either air or steam as the testing medium and flow tubes with orifices as the reference standards, the test equipment and test procedure shall conform with the applicable provisions set forth in the American Society of Mechanical Engineers Standards, covering flow measurement (presently designated PTC 19.5; 4-1959), in effect at the time of test.

(4) In tests conducted in accordance with paragraph (3) of this subdivision, meters shall be tested at the load points specified below:

(i) Area type meters. One test shall be made at each of six load points starting at approximately one-sixth load and continuing in equal steps to 100 percent of meter rating.

(ii) Velocity type meters. Two tests shall be made at each of three load points approximately equal to 50 percent, 60 percent and 70 percent of meter rating.

(5) In tests employing steam as the testing medium and a condensate weighing scale as the reference standard, meters shall be tested at the load points specified below:

(i) Area type meters. Two tests shall be made at each of six load points starting at approximately one-sixth load and continuing in equal steps to 100 percent of meter rating.

(ii) Velocity type meters. Two tests shall be made at each of three load points approximately equal to 50 percent, 75 percent and 100 percent of meter rating.

(6) Each main line metering orifice plate used in conjunction with a steam flow meter of the velocity type shall be inspected and its diameter measured for conformity with the original installation at least once every five years.

(7) The diameter of each main line metering orifice plate removed from service shall be measured and entered on a record which shall be retained for a period of at least one year.

(c) Steam flow meters--head type. (1) The test made in accordance with section 400.6(a) of this part of steam flow meters of the head type

shall consist of the following:

(i) Certification of the primary element, including the orifice plate, for conformance with the applicable provisions set forth in the American Society of Mechanical Engineers Standards, covering flow measurement (presently designated PTC 19.5; 4-1959), in effect at the time of the test.

(ii) Verification of the correctness of the meter constant.

(iii) The test of the secondary element (flow mechanism) shall be made in place on the customer's premises at each of five load points approximately equal to 20 percent, 40 percent, 60 percent, 80 percent and 100 percent of meter rating.

(2) On subsequent tests, the procedure in subparagraph (1) (iii) of this subdivision shall be followed.

(3) Each metering orifice plate shall be inspected and its diameter measured for conformity with the original installation at least once every five years.

(4) The diameter of each metering orifice plate removed from service shall be measured and entered on a record which shall be retained for a period of at least one year.

(d) Steam condensate meters. (1) Steam condensate meters shall be tested using water as the testing medium.

(2) Two tests shall be made at each of two load points with the meter passing a known quantity of water at rates of flow approximately equal to first, 100 percent and second, 50 percent of meter rating.

.SO DOC 16B-400.8

NYCRR

400.8 Determination of steam meter performance. (a) When the results of two tests at a given load fail to agree within two percent, additional tests up to a total of four, shall be made at that load until agreement within two percent is obtained on any two tests. If such agreement is not obtained the meter registration shall be reported as "Indeterminate".

(b) The percentage registration shall be reported as "Indeterminate" when for any reason there is doubt as to whether the accuracy of registration can be determined. See subdivision (c) of this section.

(c) The percentage registration shall be reported as "Non-registering" if for any reason a meter is found not registering at the specified test points. See subdivision (b) of this section.

(d) The percentage registration of the meter shall be determined by arithmetically averaging the results obtained at the specified test points, except that for condensate meters the percentage registration shall be obtained by multiplying the average of the test results at 50

percent of meter rating by two, adding the average of the test results of 100 percent of meter rating and dividing the total by three.

.SO DOC 16B-400.9 NYCRR

400.9 Reporting of tests of steam meters.

(a) Reports of complaint, periodic and office tests of steam meters shall be made each month and filed with the commission not later than the 15th day of the following month on forms 8 1/2 x 11 inches in size as shown in section 400.10 of this Part.

(b) If no complaint, periodic or office tests are made, the form shown in section 400.10 of this Part shall be filed regularly bearing the statement "NO TESTS MADE".

.SO DOC 16B-400.10 NYCRR

400.10 Form for reporting complaint, periodic and office tests.

The reports of complaint, periodic and office tests of steam meter shall be made in the form designated "Complaint, Periodic and Office Tests." (See Appendix 8-A.)

.SO DOC 16B-400.11 NYCRR

400.11 Quality of steam.

(a) The quality of steam furnished to the customer shall not fall below 95 percent (steam shall not contain more than five percent condensate by weight) except under abnormal conditions that cannot be foreseen nor guarded against.

(b) A test to determine the quality of steam supplied at a customer's premises shall be made by the utility when requested by the commission.

(c) Tests of steam quality shall be made by a throttling type or a separating type of calorimeter in conformance with the applicable provisions set forth in the American Society of Mechanical Engineers Standards, covering quality of steam in effect at the time the test is made (presently designated at PTC 19.11-1959). The utility shall record the findings of such test on the form hereinafter prescribed.

(d) When a throttling calorimeter is used, three tests shall be made at intervals of not less than 15 minutes. When a separating calorimeter is used, two runs of 10 minutes each, spaced not less than 15 minutes apart shall be made.

(e) Calorimeter sets to be used in steam quality tests shall be calibrated within 48 hours prior to such tests.

(f) Reports of steam quality tests shall be made on forms 8 1/2 x 11 inches in size as shown in section 400.12 of this Part.

.SO DOC 16B-400.12 NYCRR

400.12 Form for reporting steam quality tests. The report of steam quality tests shall be made in the form designated "Steam Quality Test

Record". (See Appendix 8-B.)

.SO DOC 16B-400.13 NYCRR

400.13 Schedule for testing of pressure compensated counters.

Counters of the pressure compensated type are to be tested before being placed in service and at least once each year thereafter.

.SO DOC 16B-400.14 NYCRR

400.14 Testing of pressure compensated counters.

(a) The counter shall be tested by applying pressure to the compensating mechanism and rotating the "following" magnet a fixed number of turns as shown in the following table with two readings being taken at each of the test pressures. Should the results of the two tests at any of the test pressures, one taken with the pressure being increased to the test point and the other with the pressure being decreased, vary by more than one percent, additional pairs of tests shall be taken until such agreement is reached. The average of the readings obtained shall be deemed to be the condition of the counter.

(b) If more than four additional pairs of tests are required, the test shall be considered "indeterminate".

(c) The accuracy at each test point shall be determined by the following formula:

$$\text{Percent Registration} = \frac{\text{Observed Revs. of Counter} \times 100}{4 \times \text{Correct No. of Counter Turns}}$$

Pressure in Psig.	No. of Magnet Turns	Correct No. of Counter Turns
87 1/2	29	4
125	25	4
186	21	4

.SO DOC 16B-400.15 NYCRR

400.15 Referee tests of pressure compensated counters.

Pressure compensated counters shall not be removed from Shuntflo meters undergoing referee tests and shall be tested in the presence and under the direction of a representative of the commission.

.SO DOC 16B-400.16 NYCRR

400.16 Adjustments on pressure compensated counters.

Counters found to be registering with an error exceeding plus or minus one percent shall be adjusted to register accurately with a tolerance of plus or minus one percent.

.SO DOC 16B-400.17 NYCRR

400.17 Reports of tests of pressure compensated counters.

A report of all installation tests, office tests, periodic tests, and

complaint tests made during each year shall be prepared as of December 31st of that year. Such report shall be made in a form satisfactory to the commission and shall be filed with the commission not later than January 31 st following the date of the report.

.SO DOC 16B-PT402 NYCRR

PART 402

CONSUMER DEPOSITS - STEAM CORPORATIONS

(Statutory authority: Public Service Law, §§ 36[3],
66, 80, 89-c, 97, 117)

Sec.

402.1 Records

402.2 Index of consumers

402.3 Interest

402.4 Application of deposit to unpaid bill

402.5 Refund

402.6 Certificate of deposit

402.7 Refund without certificate of deposit

402.8 Circular containing terms of deposit

402.9 Special rule for residential customers who transfer dwelling units

.SO DOC 16B-402.1 NYCRR

Section 402.1 Records. Each and every steam corporation holding consumer deposits shall keep such records as will show, with respect to each deposit:

- (a) the name of the consumer making the deposit;
- (b) the address (including street and number) of each depositor, if known;
- (c) the date of receipt of the deposit;
- (d) the amount of the deposit;
- (e) the interest accrued upon the deposit to be entered biennially or more frequently;
- (f) all credits of interest made in reduction of amounts billed for service rendered, and the dates of such credits;
- (g) all payments of interest made on each deposit, and the dates of such payments;
- (h) deductions representing sums due and unpaid to the corporation when depositor ceased to be a consumer, and the date thereof, together with such other information as any such corporation may deem necessary to make a complete record of each deposit.

.SO DOC 16B-402.2 NYCRR

402.2 Index of consumers. Each and every steam corporation holding consumer deposits shall keep, in addition to the records prescribed in

section 402.1 of this Part, an index or indices, alphabetically or geographically arranged, which shall show at all times the name of each consumer from whom a deposit has been exacted, and whose said deposit or any part thereof remains unpaid, with appropriate reference in such index to the consumer's account.

.SO DOC 16B-402.3

NYCRR

402.3 Interest.

Each and every steam corporation holding consumer deposits shall allow to each depositor simple interest on the amount deposited. The interest rate to be applied to the amount deposited shall be a composite yield of intermediate term, A-rated corporate bonds, as reported in financial publications, less costs of administering deposits of 1.75 per centum per annum. The rate shall be updated effective January 1st each year, based upon yield information available on the first Friday of October of the preceding year. The commission will issue an advisory letter which publicizes the information to assure consistency. Each corporation shall credit such interest to each depositor whose deposit shall have been held for one year by paying such interest in cash or deducting it from the amount of a bill for steam service rendered such depositor thereafter, but not later than the next bill rendered after the next succeeding first day of October, and at each one-year interval thereafter.

.SO DOC 16B-402.4

NYCRR

402.4 Application of deposit to unpaid bill. Each and every steam corporation holding consumer deposits shall render to each depositor, when and as his deposit is applied to an unpaid bill or bills, a statement showing:

- (a) the bill or bills then due and unpaid;
- (b) the amount thereof;
- (c) the amount of the deposit, together with the interest accrued thereon and the period covered thereby; and
- (d) the balance of the bill or bills remaining unpaid or the balance of the deposit and interest thereon remaining to the credit of the depositor.

.SO DOC 16B-402.5

NYCRR

402.5 Refund.

Each and every steam corporation holding consumer deposits shall render to each depositor, when his deposit is refunded, a statement showing the amount of the deposit and the date thereof; the amount of unpaid interest accrued thereon to date of the refund and the period covered thereby; and the amount of deposit and interest refunded. Each

depositor upon becoming entitled thereto, either by reason of nondelinquency for one year or upon ceasing to be a consumer, may withdraw his deposit and all interest thereon which has not been refunded or credited against bills for service upon surrendering his deposit certificate (or submitting satisfactory proof of ownership of the deposit or of the right to receive the same) and the payment of all bills for which such deposit is security. The "prudent" period of deposit retention, referred to in Public Service Law, section 117, may not exceed two years of nondelinquency in the payment of bills rendered.

.SO DOC 16B-402.6

NYCRR

402.6 Certificate of deposit. Each and every steam corporation holding consumer deposits shall issue to every consumer from whom a deposit may be exacted a certificate of deposit, for which shall be used a good quality of paper and on which certificate there shall be printed, in addition to the receipt for the moneys deposited, the substance of the following:

THIS RECEIPT IS NOT NEGOTIABLE OR TRANSFERABLE

Interest will be allowed on this deposit so long as it shall remain with the corporation. When this deposit has been held for one year, interest thereon will be paid in cash or credited on a bill for service rendered the depositor thereafter, but not later than the first bill rendered after the next succeeding first day of October, and at the expiration of each succeeding one-year period.

Preserve this receipt to be surrendered when deposit is returned.

.SO DOC 16B-402.7

NYCRR

402.7 Refund without certificate of deposit. Each and every steam corporation holding consumer deposits shall provide reasonable ways and means, in such manner as such corporation may elect, whereby a depositor who makes application for the return of his deposit and is entitled to the return thereof, but who is unable to produce the original certificate of deposit or receipt, may not be deprived of his rights.

.SO DOC 16B-402.8

NYCRR

402.8 Circular containing terms of deposit. Each and every steam corporation holding consumer deposits shall keep on hand for distribution to its consumers printed circulars, over its corporate or business name, which circulars shall be entitled "TERMS AND CONDITIONS UPON WHICH CONSUMERS' DEPOSITS ARE COLLECTED, HELD, AND MAY BE

WITHDRAWN" and which shall contain a copy of this Part, a copy of Public Service Law, section 117 (as added by L. 1976, ch. 557) and such other pertinent information as the corporation may elect. Every such

corporation, prior to or upon exacting a deposit, shall furnish a copy of said circular to the consumer or applicant for service from whom a deposit is demanded.

.SO DOC 16B-402.9 NYCRR

402.9 Special rule for residential customers who transfer dwelling units. No steam corporation may require a deposit of a residential customer where such customer transfers residences within such corporation's service territory and continues service with such corporation if the residential customer was not required to post a security deposit or had a security deposit returned pursuant to section 117 of the Public Service Law.

.SO DOC 16B-CIVSB NYCRR

SUBCHAPTER B

Securities

PART

410 Notice of Issuance by Steam Corporations of Stocks, Bonds, Notes, or Other Evidences of Indebtedness

.SO DOC 16B-PT410 NYCRR

PART 410

NOTICE OF ISSUANCE BY STEAM CORPORATIONS OF STOCKS,
BONDS, NOTES, OR OTHER EVIDENCES OF INDEBTEDNESS

(Statutory authority: Public Service Law, § 82)

Sec.

410.1 Contents of notice

410.2 Issuance not heretofore reported

.SO DOC 16B-410.1 NYCRR

Section 410.1 Contents of notice.

Pursuant to the provisions of section 82 of the Public Service Law, as amended, every steam corporation subject to said section, after the issuance or assumption of stocks, bonds, notes or other evidences of indebtedness, including bonds, notes or other evidences of indebtedness, payable on demand or within less than 12 months, shall file with this commission a notice of such transaction within the time and in the form specified in the following:

(a) Name of reporting utility (indicate whether corporation, partnership, individual, or other party).

(b) Address of reporting utility.

(c) The name of the official responsible for statements submitted and to whom should be addressed any correspondence relating thereto.

(d) Date of the report.

(e) Period covered by the report (both dates inclusive where

applicable).

(f) Information regarding securities and obligations issued.

(1) Pursuant to authority granted by order of this commission:

(i) Notice of issuance shall be filed within the period specified in the order approving the issuance of the securities or obligations.

(ii) Issuance of capital stock, in exchange for convertible securities issued pursuant to commission authorization, may be reported annually, not later than 60 days after the end of the calendar year covered by the report; such report to show only the number of shares of such stock issued during such calendar year, the securities retired by reason of the exchange, and the additional consideration realized, if any, by reason of the exchange.

(iii) For each type of security or obligation, include the following information, as appropriate:

(a) Designation of security--classified according to distinguishing characteristics, such as class of stock of par value or no par value and dividend rate of preferred stock, or character of debt obligation and interest rate or maturity date or other distinguishing characteristic.

(b) Date of actual issue or assumption.

(c) Number of shares of each class of stock or principal amount of each debt obligation issued.

(d) Consideration realized from each class or type of security (if consideration is other than cash, give description and basis of value).

(e) Case number and date of order of this commission under which the security issue was authorized.

(2) Securities issued or assumed under circumstances not requiring the formal approval of this commission, such as obligations (real estate mortgages, chattel mortgages, conditional sales agreements, promissory notes, etc.) having a term of less than 12 months:

(i) Notice of issuance set forth the transaction covering obligations issued during each calendar month and shall be filed not later than 10 days after the end of the calendar month covered by such report.

(ii) For each type of obligation of \$10,000 face amount or more, include the following information as appropriate:

(a) Designation of the obligation giving descriptive distinguishing characteristics. Include description of real estate mortgage, chattel mortgage, conditional sale agreement, or any hypothecation of assets given in connection with the obligation.

(b) Date of actual issue or assumption.

(c) Name of payee.

(d) Principal or face amount.

- (e) Rate of interest.
 - (f) Date of maturity (if demand so specify) or schedule of periodic payments.
 - (g) Names of endorsers, if any.
 - (h) Consideration realized from issuance of the obligation.
 - (i) Purpose for which the obligation was issued; if for cash indicate the use to which the proceeds are to be applied.
 - (j) State whether the obligation represents an increase of indebtedness or an obligation given in renewal of existing obligations or in cancellation of accounts payable. For renewals of obligations of \$10,000 face amount or more, give the dates and amounts of the obligations for which the renewal obligation is in whole or in part to be substituted; for renewals of obligations of less than \$10,000 face amount, give the date or month of issuance, the rate of interest, date or month of maturity and the total amount of the obligations for which the renewal obligation is in whole or in part to be substituted. (See subparagraph (iv) of this paragraph.)
 - (iii) For each type of obligation of less than \$10,000 face amount list the information required in subparagraph (ii) of this paragraph or group each type of obligation of less than \$10,000 face amount which is identical except for the payee, the exact date of issue or assumption within any one calendar month and the exact date of maturity within any one calendar month. Report for each group the information required in subparagraph (ii)(a), (e), (g), (h), (i) and (j) of this paragraph but substitute for subparagraph (ii)(b), (c), (d) and (f), the following; (b) month of actual issue or assumption, (c) number of obligations, (d) amount of indebtedness and (f) the month and year of maturity (if demand so specify).
 - (iv) Report the outstanding obligations as of the final date of the period covered by the notice of issuance. List the date of actual issue or assumption, principal or face amount and rate of interest of all obligations reported pursuant to subparagraph (ii) of this paragraph. For obligations reported pursuant to subparagraph (iii) of this paragraph, list the date or month of actual issue or assumption, the rate of interest of each obligation or group of obligations and the amount of each obligation or group of obligations outstanding.
- (3) For any other class of securities, give corresponding particulars, not later than 10 days after the end of the calendar month in which issued or assumed, to the end that the commission may be fully advised as to the nature of the transaction and purpose for which obligations were incurred or securities were issued and the proceeds therefrom are

to be used.

(g) Each notice of issuance of securities or obligations shall be subscribed by an executive officer of the corporation, a member of the partnership, the individual owner, or other party of the utility in behalf of which the notice is filed, and affirmed by such person as true under the penalties of perjury.

.SO DOC 16B-410.2 NYCRR

410.2 Issuance not heretofore reported. Every such public utility which has not filed with this commission a notice of the issuance of any stocks, bonds, notes, or other evidences of indebtedness now outstanding and issued with or without the approval of this commission shall, within 30 days from the date of service of a copy of this order, file a notice of each such transaction in the form prescribed herein.

420.15 Asbestos control

.SO DOC 16B-420.1 NYCRR

Section 420.1 Scope. (a) This Part prescribes minimum safety requirements for the design, fabrication, installation, inspection,

testing, operation, and maintenance of steam distribution systems.

(b) Every steam corporation, as defined in section 2(22) of the Public Service Law, engaged in the distribution of steam via pipeline within the State of New York shall comply with the rules set forth in this Part. As used in this Part, the term "steam corporation" refers only to those entities required to comply with this Part.

(c) This Part does not apply to:

(1) piping and facilities used for or in connection with the generation or production of steam; and

(2) the design, fabrication, and installation of piping downstream of the customer's property line.

.SO DOC 16B-420.2

NYCRR

420.2 Compliance with standard code. All steam distribution pipeline facilities shall be designed, constructed, tested, operated and maintained, except as otherwise provided in this Part, in accordance with "Power Piping, ASME B31.1-1989" (as set forth in section 10.3 of this Title.)

.SO DOC 16B-420.3

NYCRR

420.3 Notification of construction. At least 10 days prior to the start of construction or reconstruction of any steam pipeline 100 feet or more in length, each steam corporation shall file with the Albany office of the Gas Division of the New York State Department of Public Service a letter of intent providing details of the proposed construction.

.SO DOC 16B-420.4

NYCRR

420.4 Operating and maintenance plan. (a) Each steam corporation subject to this Part shall establish and file with the Albany office of the Gas Division of the New York State Department of Public Service a detailed written operating and maintenance plan for complying with all the provisions of this Part. Revisions to these written procedures shall be submitted to the Gas Division in Albany at least 30 days prior to the effective date thereof.

(b) The operating and maintenance plan shall include, as a minimum, the following:

(1) detailed instructions for employees covering operating and maintenance procedures during normal operations and repairs;

(2) procedures for welding, brazing, and welder qualifications;

(3) procedures for reporting, investigating, classifying, handling, and monitoring steam leaks;

(4) procedures to correct, within specified timeframes, deficiencies found during inspections, evaluations, tests, etc. required by this

Part;

(5) procedures for continuing surveillance of steam facilities to determine and take appropriate action concerning failures, leakage history, and other unusual operating and maintenance conditions;

(6) an established list of qualified persons who exclusively may approve the turn-on of any section of the steam distribution system; and

(7) procedures to insure that the turn-on of any section of the steam distribution system is accomplished only by persons specifically trained, qualified, and approved for such purpose.

(c) Each steam corporation shall establish and maintain detailed maps of its distribution pipelines and maps or records of its service lines as necessary to administer its operating and maintenance plan.

(d) Each steam corporation shall satisfactorily conform with the operating and maintenance plan submitted to the Gas Division of the New York State Department of Public Service.

.SO DOC 16B-420.5

NYCRR

420.5 Emergency plans. (a) Each steam corporation shall establish written procedures to minimize the hazards resulting from a steam pipeline emergency. At a minimum, the procedures must provide for the following:

(1) receiving, identifying, and classifying notices of events which require immediate response;

(2) establishing and maintaining adequate means of communication with fire, police, and other public officials;

(3) establishing and maintaining continuous communication between field crews and dispatching personnel;

(4) the availability of personnel, equipment, tools, and materials, as needed at the scene of an emergency;

(5) actions directed toward protecting people first, and then property;

(6) emergency shutdown in any section of the pipeline system necessary to minimize hazards to life or property;

(7) making safe any actual or potential hazard to life or property;

and
(8) safely restoring any main or service outage.

(b) Each steam corporation shall:

(1) furnish supervisors who are responsible for emergency action a copy of the latest edition of the emergency plan;

(2) train the appropriate operating personnel to assure that they are knowledgeable of the emergency procedures; and

(3) review employee activities to determine whether the procedures

were effectively followed in each emergency.

(c) During January of each year, each steam corporation shall file a list with the Albany office of the Gas Division of the New York State Department of Public Service and with all municipalities within which its facilities are located, indicating the names, addresses, and home and business telephone numbers of its responsible officials who may be contacted in the event of an emergency. Changes and revisions to this list within the year shall be immediately reported to the Gas Division and affected municipalities.

.SO DOC 16B-420.6

NYCRR

420.6 Customer education and information program.

(a) Each steam corporation shall initiate and maintain on a continuing basis a satisfactory program for customer education and information designed to assist its customers, and appropriate government organizations, in the recognition of steam emergency conditions and situations, and to impress upon them the need for, and means by which, the steam corporation can be given notification of such situations.

(b) The program and the media used must be as comprehensive as necessary to reach all areas in which steam is distributed.

(c) During January of each year, each steam corporation shall file with the Secretary, in accordance with the requirements of § 3.5 of this Title, a current description of its customer education and information program, including a detailed statement of the means of its implementation and samples of all descriptive literature and other educational aids.

.SO DOC 16B-420.7

NYCRR

420.7 Employee training. (a) Each employee involved in the operation, maintenance, or testing of steam pipelines and related facilities shall satisfactorily complete training at all progression levels to insure effective and safe implementation of the procedures required by this Part. Additionally, each such employee, including supervisors, shall be tested annually to determine proficiency at his/her current progression level and shall satisfactorily complete refresher training as testing results deem necessary.

(b) Each new employee shall receive basic classroom training prior to on-the-job training in field operations.

.SO DOC 16B-420.8

NYCRR

420.8 Periodic inspections. (a) Steam traps and trap piping assemblies shall be inspected for general condition and proper operation at least six times each calendar year at intervals not exceeding ten weeks.

(b) Blow-off valves and by-pass valves shall be checked for

operability immediately prior to closing each associated main valve during a scheduled shut down of a section of the steam distribution pipeline system. Removal of condensate from a shut down section of pipeline must be accomplished prior to re-opening main valves.

(c) Accessible expansion slip joints shall be inspected at least twice each calendar year at intervals not exceeding 30 weeks. The inspection shall include checks for leakage, proper alignment, and traverse measurement.

(d) Inside service line valves shall be inspected at the time of periodic meter reading. Valve seals, and warning tags stating that the opening of the service valve must be made only by authorized steam corporation personnel, shall be affixed to each inside service valve. Missing or illegible tags and broken seals must be replaced as soon as possible, but no later than one week, after the condition was discovered. Broken seals, indicating possible unauthorized operation of the valve, shall be investigated to determine cause.

(e) Manholes containing steam facilities shall be inspected for general conditions and adequacy of insulation at least once each calendar year at intervals not exceeding 15 months and shall be inspected for structural integrity at least once each ten calendar years.

(f) System pressure telemetering recording devices shall be inspected and tested for accuracy at least twice each calendar year at intervals not exceeding 30 weeks. At a minimum, pressure recording gauges shall be installed at the interface between portions of the system which are designed for different operating pressures.

.SO DOC 16B-420.9

NYCRR

420.9 Welding - qualification and nondestructive testing.

(a) Welding must be performed by qualified welders employing qualified welding procedures. Welders and welding procedures shall be qualified in accordance with API Standard 1104 (as set forth in section 10.3 of this Title) or section IX of the ASME Boiler and Pressure Vessel Code (as set forth in section 10.3 of this Title).

(b) Notwithstanding the pressure and temperature limitations contained in ASME B31.1-1989, welds subjected to temperatures over $350\mu\text{F}$ ($175\mu\text{C}$) shall be subject to nondestructive testing by radiographic inspection in accordance with subdivisions (c) and (d) of this section.

(c) All field welds in new steam pipeline installations and all prefabricated shop welds shall be nondestructively tested.

(d) Field welds made on existing steam pipeline facilities shall be subject to a program of random unannounced nondestructive testing to

assess the quality of welding and test the work of each welder. The required minimum testing rate shall be 10 percent of all welds made during a calendar month. If 10 percent or more of the welds tested in a calendar month are found to be unacceptable, the test rate shall increase by five percent for the ensuing calendar month. If fewer than 10 percent of the welds are found to be unacceptable in a month where the required test rate was greater than 10 percent, the test rate may be decreased by five percent for the ensuing calendar month.

.SO DOC 16B-420.10

NYCRR

420.10 Records. (a) Each steam corporation shall maintain records documenting all inspections, maintenance, tests, etc., required by this Part.

(b) Notwithstanding the requirements of Part 292 or Appendix 4-A of this Title, the minimum period of retention of records required by this Part shall be three years. Longer periods of retention may be mandated by Part 292 and Appendix 4-A of this Title.

(c) All records, or copies thereof, shall be kept on file in the State of New York and shall be readily accessible to the staff of the New York State Department of Public Service.

.SO DOC 16B-420.11

NYCRR

420.11 Leaks.

(a) Any notification of a steam leak, or any notification of damage to facilities by contractors or other outside sources shall constitute the need for prompt action.

(b) Each steam corporation shall be responsible for the investigation, prioritization, and repair of each leak found on its system.

(c) Emergency leaks require an immediate response to protect life and property and must be worked continuously until repairs are completed or until the condition is no longer hazardous. Emergency leaks include, but are not limited to:

- (1) any leak on the bellows of an expansion joint;
- (2) any leak which could cause property damage or personal injury or any leak which, in the judgment of the operating personnel at the scene, is regarded as potentially hazardous; or
- (3) any leak resulting from damage by contractors or other outside forces.

(d) Nonemergency leaks include any leak which is not immediately hazardous at the time of discovery and can be reasonably expected to remain that way. Nonemergency leaks shall be repaired within six months from the date of discovery.

(e) A steam leak record, identified by number shall be used to depict

the entire history of a leak from the time of discovery through repair. The record shall contain information as to the nature of the repair.

.SO DOC 16B-420.12

NYCRR

420.12 Reports of incidents and interruptions. (a) Each steam corporation shall report all incidents involving steam facilities which cause injury or death to any persons or damage to property, which result in an airborne release of asbestos, or which could cause concern because of coverage by news media.

(b) Any unscheduled interruption of service affecting two or more customers or any other interruption which could cause public concern because of coverage by the news media, shall also be reported.

(c) All such incidents and service interruptions shall be immediately reported by telephone to the Gas Division of the New York State Department of Public Service through its emergency notification system.

(d) A written report of each incident in which steam facilities were involved shall be submitted to the Albany office of the Gas Division of the New York State Department of Public Service within 30 days. The report shall set forth a chronological sequence of events including a detailed description of the:

- (1) incident or interruption;
- (2) response, action, and investigation by the steam corporation; and
- (3) results and findings of the investigations.

(e) Each steam corporation shall file an annual summary report of all incidents which resulted in injury, fatality, property damage, or asbestos contamination with the Albany office of the Gas Division of the New York State Department of Public Service not later than January 31 of each year. The reports shall include, for each incident, the following:

- (1) the date of the incident;
- (2) the specific location;
- (3) the number of injuries which required hospitalization;
- (4) the number of fatalities;
- (5) the approximate cost of property damage; and
- (6) the determined cause of the incident.

(f) Each steam corporation shall file with the Albany office of the Gas Division of the New York State Department of Public Service a monthly report of each unscheduled interruption of service to any customer. The reports shall be filed no later than 15th day of the month following that for which the report is rendered and shall be arranged in accordance with Appendix 3-A of this Title to contain the following:

- (1) the district in which the interruption occurred;
- (2) the month for which the report is rendered;

- (3) the date(s) of the interruption;
- (4) the time the steam corporation received notification of the interruption;
- (5) the time the steam corporation dispatched its personnel to the scene of the interruption and their arrival time;
- (6) the times when interruptions began and ended;
- (7) the duration in hours and minutes of such interruptions;
- (8) the number of customers affected; and
- (9) the cause or causes of the interruptions.

.SO DOC 16B-420.13

NYCRR

420.13 Logging and analysis of steam emergency reports.

(a) Each steam corporation shall record each report of a steam leak or emergency received on a suitably numbered service record.

(b) A daily log shall be kept and maintained on file recording the receipt and handling of each such report and shall contain the following information:

- (1) cross reference to the related service record number;
- (2) location of leak or emergency;
- (3) time report first received;
- (4) description as to type of leak or emergency;
- (5) time personnel first dispatched to location;
- (6) time of arrival of personnel at location; and
- (7) times of dispatch and arrival of any additional personnel called to the location.

(c) Each steam corporation shall submit to the Albany office of the Gas Division of the New York State Department of Public Service, on or before the 15th day of each calendar month, a summary analysis of its performance in responding to reports of steam leaks and emergencies, as reflected in the daily log entries for the preceding calendar month. The analysis shall be furnished in a format identical to subdivision (d) of this section and shall be signed by a responsible official.

(d)

420.14 Facility failure investigation. (a) Each steam corporation shall establish procedures to analyze each failure or incident for the purpose of determining its cause and to minimize the possibility of a recurrence. This shall include a procedure to select samples of the failed facility or equipment for laboratory examination when necessary.

(b) The procedures shall also provide for complete cooperation with the staff of the Gas Division of the New York State Department of Public Service, in testing or surveying, including using independent consultants, any equipment or systems deemed necessary by staff for the investigation and analysis of any failure or accident to determine its cause and to minimize the possibility of a recurrence.

.SO DOC 16B-420.15 NYCRR

420.15 Asbestos control. (a) Each steam corporation shall have procedures to eliminate asbestos materials from all accessible manholes, vaults, etc. which contain steam facilities.

(b) Each steam corporation shall have emergency procedures to control and eliminate asbestos-contaminated debris resulting from the failure of any steam pipeline or facility.

(c) Each steam corporation shall have a program to eliminate asbestos materials from all exposed piping and fittings and from bellows type expansion joints in the steam distribution system.

(d) The procedures shall comply with applicable rules and regulations regarding the removal, handling and disposal of asbestos materials.

PART 433

BILLS FOR SERVICE--STEAM CORPORATIONS

(Statutory authority: Public Service Law, § 44)

Note: The provisions contained in this Part must be complied with by July 1, 1976; however, prior to that date, utilities may show on their bill forms the information specified by this Part. By order dated January 7, 1976, the commission directed all companies subject to this Part to send an explanatory leaflet to their customers with the first new bill form sent; the bill forms and leaflet were also required to be filed with the commission 30 days prior to use of the new bill form.

Sec.

433.1 Contents of bill

433.2 Budget or equal payment billing

433.3 List of company offices

.SO DOC 16B-433.1

NYCRR

Section 433.1 Contents of bill. Each bill issued after June 30, 1976, together with its addendum bill form (if applicable), for steam service, on the portion that is retained by the customer, shall show, but not be limited to, the following information, except as otherwise provided by this Part:

(a) The name of the corporation, partnership or person by which the service was furnished and, except as provided by this Part, no other name.

(b) The location of the principal office and one or more company offices at which it may be paid, and a statement that bills may be paid at other authorized offices.

(c) The service classification or classifications in the rate schedules on which it is based.

(d) Any charges or credits which are adjustments to the rate schedules referred to in subdivision (c) of this section shall be itemized and shown in dollars per type of unit billed and in total dollars.

(e) The billed demand or other similar factor (if applicable).

(f) Present meter reading, actual or estimated (indicate if estimated), and date thereof.

(g) Previous meter reading, actual or estimated (indicate if estimated), and date thereof, and/or the number of days or the prorated period from the previous meter reading, actual or estimated, to the present meter reading, actual or estimated.

(h) Meter constant, temperature, pressure and pressure factor.

(i) Debit or credit balance still outstanding from prior bill, if any.

(j) Quantity billed and unit of measurement, except quantity need not be shown for interim budget billing.

(k) Gross amount of bill, including any sales tax.

(l) Amount of discount and/or net amount of bill (if applicable).

(m) Date when discount period expires or late payment charge becomes effective shall be shown on the front of the bill (if applicable). The payment date is to be determined by the date of mailing or date paid at designated office.

(n) If the service be furnished by a corporation which desires to indicate that it is owned or controlled by another company, or that it constitutes part of a system, it may so indicate by the use of a small symbol or by a statement to that effect printed on the bill in small, inconspicuous type.

(o) Only service(s) performed, materials furnished or other charges made by the company, pursuant to its filed tariff, may be included and shall be itemized on the applicable bill form. Whenever the bill form, by reason of size limitations, does not permit itemization, totals may be utilized, provided the charges making up such totals are itemized in an addendum attached to or enclosed with the bill.

(p) Each bill rendered by the company shall identify the account for which service is being charged by setting forth an account or meter number or other appropriate method of identification of the address or location of the premises where the service(s) for which the bill is rendered was (were) furnished.

(q) The back of the entire bill may be used for any purposes deemed appropriate related to the service(s) rendered.

(r) As long as it does not confuse the customer, pertinent messages

and information may be printed on any portion of the front of the bill.

(s) An explanation of any abbreviation or symbol used that is not in common English usage.

.SO DOC 16B-433.2

NYCRR

433.2 Budget or equal payment billing. On either the bill or in an addendum attached to or enclosed with the bill shall be shown:

(a) Identification of the type of budget or equal payment plan if more than one plan is offered.

(b) The total of the year's budget or equal payment amounts billed to the end of the period covered by the current bill.

(c) The dollar amount billed for tariff items during the same period as in subdivision (b) of this section.

(d) Debit or credit balance to be shown as D or C on the bill and defined as follows:

D Amount due company

C Amount in customer favor

.SO DOC 16B-433.3

NYCRR

433.3 List of company offices. Each steam company shall provide annually to its customers a list of all company offices at which utility bills may be paid, if such information is not shown on its bill form.

PART 434

NOTICES OF DISCONTINUANCE AND COMPLAINT PROCEDURES

(Statutory authority: Public Service Law, §§ 4, 20, 80, 84, 85)

Sec.

434.1 Notice of discontinuance--time

434.2 Notice of discontinuance--format

434.3 No discontinuance without verification of delinquent account

434.4 Rapid posting of payments in response to notices of discontinuance

434.5 Days when discontinuance of service is not permitted

434.6 No additional notice required when payment by check is subsequently dishonored

434.7 Discontinuance of service to entire multiple dwellings

434.8 Billing disputes

434.9 Publicizing complaint procedures

434.10 Hardship procedures

434.11 Special procedures during cold weather periods

434.12 Survey of residential customers previously disconnected for nonpayment or theft of service

434.13 Voluntary third-party notice prior to discontinuance of service

434.14 Installment plans for residential customers

.SO DOC 16B-434.1 NYCRR

Section 434.1 Notice of discontinuance--time. (a) No steam corporation shall discontinue the supply of steam for nonpayment of bills rendered for service or for failure to post a required deposit until either:

(1) at least five days after written notice has been served personally upon the person supplied;

(2) at least eight days after mailing written notice in postpaid wrapper to the person supplied, addressed to such person at premises where service is rendered; or

(3) at least five days after the person supplied has either signed for or refused a registered letter containing written notice, addressed to such person at premises where service is rendered.

(b) If the person supplied has specified to the company in writing an alternate address for billing purposes, the notice authorized under paragraphs (2) and (3) of subdivision (a) shall be sent to such alternate address rather than to the premises where service is rendered.

.SO DOC 16B-434.2 NYCRR

434.2 Notice of discontinuance--format.

(a) Every notice indicating discontinuance of service shall:

(1) clearly indicate in nontechnical language:

(i) the reason for service discontinuance;

(ii) the total amount required to be paid by the customer to avoid discontinuance of service, indicating the amount for which the customer's account is in arrears or the required deposit, if any, which must be posted by the customer, or both;

(iii) a method whereby the customer may tender payment of the full sum due and owing, including any required deposit, to avoid the discontinuance of his service;

(iv) the availability of company procedures to consider customer complaints prior to discontinuance, including the address and phone number of the office of the steam company the customer may contact in reference to his account; and

(v) the earliest date on which discontinuance may be attempted; and

(2) have printed on the face thereof in a size type capable of attracting immediate attention the following:

"THIS IS A FINAL DISCONNECT NOTICE. TO AVOID
INCONVENIENCE, BRING THIS NOTICE TO THE
ATTENTION OF THE COMPANY WHEN PAYING THIS BILL."

(b) Where full compliance with subdivision (a) of this section is

found by the commission to be infeasible or to impose an unreasonable burden upon the company, the commission may grant a waiver of the requirements of such subdivision upon approval by the commission of an alternate arrangement which accomplishes the basic purposes of this section.

.SO DOC 16B-434.3

NYCRR

434.3 No discontinuance without verification of delinquent account.

(a) No steam corporation shall discontinue service for nonpayment of bills rendered or for failure to post a required deposit unless:

(1) it shall have verified that payment has not been received at any office of the company or at any office of an authorized collection agent through the end of the notice period required by this Part; and

(2) it shall have verified on the day disconnection occurs that payment has not been posted to the customer's account as of the opening of business on that day, or, shall have complied with procedures established pursuant to section 434.4(b) of this Part.

(b) In the case of a company which serves a geographical area of this State involving more than six counties, the commission may grant a waiver of the requirements of paragraph (1) of subdivision (a) of this section upon approval by the commission of an alternate procedure for verification of payments which accomplishes the basic purposes of that paragraph.

.SO DOC 16B-434.4

NYCRR

434.4 Rapid posting of payments in response to notices of discontinuance. Every steam corporation shall take reasonable steps to establish procedures to insure that any payments made in response to notices of discontinuance, when the customer brings the fact that such a notice has been issued to the attention of the company or its collection agents, shall either:

(a) be posted to the customer's account on the day payment is received; or

(b) be processed in some manner so that discontinuance will not occur.

.SO DOC 16B-434.5

NYCRR

434.5 Days when discontinuance of service is not permitted. (a) No steam corporation shall discontinue service to any person for nonpayment of bills or for failure to post a required deposit on a Saturday, Sunday, public holiday, or day on which the main business office of the company is not open for business. For purposes of this section, public holiday shall refer to those holidays enumerated in the General Construction Law.

(b) No steam corporation or municipal steam corporation shall

discontinue service to any residential customer for nonpayment of bills or for failure to post a required deposit on a Friday, or on the day preceding a day on which the main business office of the company is not scheduled to be open for business, or the day immediately preceding a public holiday. No such corporation shall discontinue service to any residential customer for nonpayment of bills or for failure to post a required deposit during a two-week period encompassing Christmas and New Year's Day.

.SO DOC 16B-434.6

NYCRR

434.6 No additional notice required when payment by check is subsequently dishonored. Receipt of a subsequently dishonored negotiable instrument in response to a notice of discontinuance shall not constitute payment of the customer's account, and no steam corporation shall be required to issue additional notice prior to discontinuance.

.SO DOC 16B-434.7

NYCRR

434.7 Discontinuance of service to entire multiple dwellings.

(a) No steam corporation shall discontinue service to an entire multiple dwelling (as defined in the Multiple Dwelling Law or the Multiple Residence Law) where the owner, person, firm or corporation to whom or which the last preceding bill has been rendered, or from whom or which the steam corporation has received payment therefor, has failed to pay such utility bills, until it has complied with the following procedure:

(1) The steam corporation must give 15 days' written notice of its intention to so discontinue by personally serving such notice on the owner of the premises affected or on the person, firm, or corporation to whom or which the last preceding bill was rendered, or from whom or which the utility has received payment therefor, and on the superintendent or other person in charge of the building, if it can be readily ascertained that there is such superintendent or other person in charge; or

(2) The steam corporation must give 18 days' written notice to the owner, person, firm or corporation specified in paragraph (1) of this subdivision if such notice is mailed in a postpaid wrapper to the address of such persons, firm or corporation.

(3) In addition to the notice prescribed by paragraphs (1) and (2) of this subdivision, 15 days' written notice shall be posted in the public areas of such multiple dwelling, and 18 days' notice shall be mailed to the "Occupant" of each unit in that multiple dwelling, to the local health officer and director of the social services district for the political subdivision in which the multiple dwelling is located; if the

multiple dwelling is located in a city or village, to the mayor thereof, or if there be none, to the manager; or, if the multiple dwelling is located in a town, then to the town supervisor; and to the county executive of the county in which the multiple dwelling is located, or if there be none, then to the chairman of such county's legislative body. Notice to mayors, managers, town supervisors, county executives, and chairmen of county legislatures may be mailed to the persons specified therein or to their designees. Notice to health officers, directors of social services, mayors, managers, supervisors, county executives and chairmen of county legislatures shall be repeated not more than four working days nor less than two working days prior to such discontinuance.

(4) Whenever a notice of intention to discontinue steam service has been made pursuant to the provisions of this section and obligations owed the steam corporation have been satisfied, the steam corporation shall notify, in the same manner as it gave such notice of intention, the occupant of each unit that the intention to discontinue steam service no longer exists.

(b) Notwithstanding the provisions contained in subdivision (a) of this section, no steam corporation shall discontinue services to a multiple dwelling, where the owner, person, firm or corporation responsible for making payment fails to pay utility bills, as long as occupants of such multiple dwellings continue to make timely payments for service in accordance with procedures filed by the utility and approved by the Public Service Commission. All notices referred to in subdivision (a) of this section shall contain the intended date of discontinuance of service and a utility contact, including a telephone number, who will advise occupants of the amount due for steam service and who will arrange meetings with occupants to attempt to work out a mechanism for avoiding discontinuance of service in the event that the owner continues to fail to make requisite payments or arrangements for such payments. The notice shall also refer to the provisions contained in section 235-a of the New York Real Property Law authorizing occupants to set-off, against their rent, payments to utilities in such circumstances.

(c) A steam corporation, following the procedure outlined in subdivision (b) of this section, may require occupants in a multiple dwelling to pay no more than the current steam charges incurred by the owner, person, firm or corporation to whom or which the last preceding bill has been rendered or from whom or which the utility has received payment therefor. A current charge for purposes of this section means

the amount properly billed the owner, etc., for steam used during the billing period covered by the first bill rendered on or after the date when the disconnect notice is issued. The current charges will not include any arrears for earlier billing periods that may appear on such a bill.

(d) If occupants in a multiple dwelling find they are unable to reach an agreement with the utility to avoid discontinuance of service, they may contact the Consumer Service Section of the commission's Power Division. After such a request is received, a representative of the Consumer Service Section of the Power Division will attempt to work out such an agreement and will, if necessary, arrange a meeting with occupant representatives, the utility, and the owner, person, firm or corporation responsible for making payment for steam service; provided, however, that such a meeting will be required only if the Consumer Service Section receives a written petition signed by at least 25 percent of the occupants in a multiple dwelling.

(e) The Consumer Service Section may stay a threatened disconnection of service to an entire multiple dwelling where it concludes that good faith efforts are being made by the occupants to arrange for the payment of current steam bills.

(f) Whenever an owner of a multiple dwelling, or the person, firm or corporation responsible for making payment for steam service, fails to pay two consecutive bills for utility service by the time the third bill has been prepared, the utility must notify the commission within 15 days that it has invoked the procedures outlined in subdivisions (a) and (b) of this section. Unless otherwise authorized, the notification should be in the form of a semi-monthly report filed with the Consumer Service Section. Such report should be cumulative, specify the total amount due for each overdue account, the period of arrearage, and indicate if a notice of discontinuance has been sent. If these reports demonstrate a need for changes in collection procedures, the Consumer Service Section shall advise the commission.

(g) Sections 434.3 through 434.6 of this Part shall be applicable with respect to the discontinuance of service to entire multiple dwellings.

.SO DOC 16B-434.8

NYCRR

434.8 Billing disputes. (a) Every steam corporation shall establish procedures whereby any complaint filed with such corporation by any customer thereof in regard to any bill for service rendered or any deposit required will be promptly investigated in an appropriate and fair manner, with the result of such investigation being promptly reported to the complaining customer. Such procedures shall allow the

acceptance and processing of complaints submitted in simple manner and form. Regardless of whether a notice of discontinuance has previously been sent, the utility's procedures shall provide that pending the utility's investigation it shall not discontinue service or issue a notice of discontinuance; provided, however, the consumer may be required to pay the undisputed portion of a disputed bill or deposit to prevent discontinuance or the issuance of a notice of discontinuance.

(b) If, after the completion of such an investigation, the utility determines that the disputed service has been rendered, or that the disputed charge or deposit is proper, in whole or in part, the utility may require the full bill or deposit or the appropriate portion thereof to be paid; in such event, appropriate notice of the determination shall be given to the customer, and where notice of discontinuance of service has previously been sent, or is served with the determination, such notice shall include a statement advising the customer of the availability of the commission's complaint handling procedures. The utility's procedures may provide for discontinuance of service if the customer fails to pay such required amount after receipt of proper notice, provided that a customer's service will not be discontinued until at least five days after notice of the utility's determination, where personal service is made upon the person supplied, or at least eight days after mailing of such a notice, and provided further that no discontinuance may occur if so precluded by the commission pursuant to section 11.2(d) of this Title.

(c) The utility's procedures shall provide that, where the complaint procedures of the commission have been invoked and it is determined that the disputed service has been rendered, or that the disputed charge or deposit is proper, in whole or in part, a customer's service will not be discontinued for failure to pay the amount found appropriate until at least 15 days after notice of the commission's determination.

(d) The procedures required to be established under this section shall be filed with the commission for review. The commission shall be advised of any substantial changes in such procedures 30 days prior to their proposed implementation to permit commission review.

.SO DOC 16B-434.9

NYCRR

434.9 Publicizing complaint procedures. (a) Every steam corporation shall, by a notice accompanying a regular bill or otherwise, advise each of its customers annually, unless otherwise directed by the commission, of the procedures available to the customer to register complaints in regard to service or disputed bills. Such notice shall clearly state the means by which a complaint can be made to the company and shall also

advise the customer that, if after contacting the company the customer remains dissatisfied, he may contact the New York State Public Service Commission. Such notice shall further state that the Public Service Commission has a staff available to give assistance in such matters, and shall also specify an appropriate address of the Public Service Commission.

(b) Prior to circulating the notice required by subdivision (a) of this section, each utility shall submit to the commission for its approval the form of such notice and the intended program for its distribution.

.SO DOC 16B-434.10

NYCRR

434.10 Hardship procedures. Each and every steam corporation shall file with the commission and make available for public inspection such corporation's detailed procedures for handling hardship situations where consumers are threatened with disconnection of service. The detailed procedures to be filed under this section shall include the special procedures during the cold weather seasons required by sections 434.11 and 434.12 of this Part. Such corporations shall observe their filed procedures in conducting any disconnection activity.

.SO DOC 16B-434.11

NYCRR

434.11 Special procedures during cold weather periods.

(a) Not later than August 15, 1978, each and every steam corporation shall develop methods to identify all residential households in its service territory which require a steam service for heating the premises or operating a heating system. Thereafter, such corporation shall maintain the capability of identifying such residential accounts for the purposes of this section.

(b) During the period beginning November 1st of each year and ending April 15th of the following year, each steam corporation shall observe, at a minimum, the following procedures with respect to residential customers whose steam service is necessary to heat the premises or operate a heating system (as used in this section, the term customer means a residential customer whose steam service is necessary to heat the premises or operate a heating system and includes all customers residing in dwellings not included under section 116 of the Public Service Law):

(1) No such corporation shall terminate service to any customer unless, after service of a final notice of discontinuance, the corporation has attempted to communicate with the customer, or another person, 18 years of age or older, who resides with the customer at the customer's residence. At a minimum, the attempt at personal contact

shall include one visit at the premises by field personnel during normal working hours and, in the event that personal contact is not achieved, one visit by field personnel during reasonable nonbusiness periods (6 p.m. - 9 p.m. on weekdays or 9 a.m. - 5 p.m. on Saturdays, Sundays and holidays). If communication with the person contacted is not possible because of an apparent language barrier, the corporation shall take steps to assure communication before discontinuance. During the personal contacts, the corporation's representatives shall fully explain the reasons for discontinuance and shall attempt to ascertain whether a serious impairment to human health may result.

(2) For the purposes of this Part, a serious impairment to human health is indicated if a customer or other person residing in the premises appears to be seriously impaired and may, because of mental or physical problems, be unable to manage his or her own resources, carry out activities of daily living or protect oneself from neglect or hazardous situations without assistance from others. Indicators of serious impairment to human health include but are not limited to:

- (i) age, infirmity or mental incapacitation;
 - (ii) use of life support systems, such as dialysis machines or iron lungs;
 - (iii) serious illness;
 - (iv) physical disability, including blindness and limited mobility;
- and
- (v) any other factual circumstances which indicate severe or hazardous health situations.

The above criteria are general standards and the corporation's field personnel must be trained to exercise discretion, sound judgment and common sense in ascertaining whether a serious impairment to human health exists. Doubts should be resolved in favor of continued service.

(3) No such corporation shall terminate service for nonpayment where a customer or other person residing in the premises exhibits a serious impairment to human health, as described in paragraph (2) of this subdivision, unless:

- (i) the corporation notifies the local social services commissioner orally, and within five days in writing, on forms prescribed or approved by the commission (Appendix 16 contains the suggested form) that the customer or other person residing in the premises exhibits a serious impairment to human health; and
- (ii) the local social services commissioner, after an investigation, informs the corporation that the health-impairing condition does not exist or is not serious, or that an alternative means for protecting the

person's health has been devised.

The corporation may exercise its own discretion with respect to terminating service to the customer in the event it does not receive an oral or written report from the local social services commissioner within 15 business days after the written referral of the matter by the corporation to the commissioner.

(4) If such a corporation terminates steam service to a customer because of nonpayment, and the customer or a person 18 years of age or older residing on the premises was not personally contacted by the corporation before termination of service and has not communicated with the corporation for the purpose of requesting reconnection before 12 noon on the day following termination of service, the corporation shall immediately attempt to determine, by onsite inspection, direct personal contact at the premises with the residential customer or other adult person, or other reasonable measures, whether there is continuing occupancy and whether a serious impairment to human health, as described in paragraph (b)(2) of this section, exists. If the corporation determines that a customer or other person residing in the premises faces impairment to his or her health, it shall immediately restore the steam service and the requirements of paragraph (b)(3) of this section shall apply. If the corporation is unable to obtain personal contact with the customer or an adult residing on the premises, and does not have reasonable grounds to believe that the customer has vacated the premises, it shall immediately refer the name and address of the customer to the local commissioner of social services, in accordance with the procedures set forth in paragraph (b)(3) of this section.

(5) Each such corporation shall designate an employee who will serve as a liaison with local social services departments.

(6) Each such corporation shall file with the commission for its review the procedures to be followed by the corporation's personnel in complying with these special procedures.

(c) If such corporation decides to disconnect steam service to a residential customer because it has established that the meter or service laterals have been tampered with or a theft of service has occurred, it shall attempt to determine, according to the procedures set forth in paragraphs (b)(1) and (2) of this section, whether a serious impairment would result from service disconnection. If such corporation ascertains that a serious impairment to human health would result, it shall observe the procedures set forth in paragraphs (b)(3) and (4) of this section; provided, however, that the requirement of continued service shall not apply in the event it is impractical for such

corporation to eliminate any unsafe condition. In any case where a serious impairment is found and the corporation terminates service to preclude the continuation of an unsafe condition, it shall specially notify the local social services commissioner on the same day service is disconnected and request an immediate consideration of the case.

Comment: If a utility discovers a meter tampering or theft situation and determines that a serious impairment exists, it should continue service, pending DSS review, provided that service can be rendered safely. For example, if a utility discovers that the meter of a "locked account" is advancing, it should, in most circumstances, be able to continue service in a safe manner. In other theft cases, particularly those involving gas service, the need for rendering the condition safe may preclude the continuation of service. For example, if a gas utility discovers unsafe piping, an unsafe meter bypass, or substantial damage to the meter, termination may be the best method of eliminating the unsafe condition. If the utility cannot readily repair the unsafe condition or, in the case of a gas company, cannot obtain access to the pilot lights (which would have to be relit), immediate restoration of service would not be practical. The utility should specifically note, in its referrals to DSS, those cases where heat-related service is not restored or continued so that DSS may give immediate attention to them.

.SO DOC 16B-434.12

NYCRR

434.12 Survey of residential customers previously disconnected for nonpayment or theft of service. Not earlier than September 1 nor later than November 1 of every year, each steam corporation shall conduct a survey of all former residential customers whose steam service was used for heating the premises or operating a heating system, was terminated for nonpayment, meter or service lateral tampering, or theft of service during the 12-month period ending on November 1 of that year, and has not been restored. The purpose of the survey is to determine whether a continued lack of service may expose the former customer or other person residing in the premises to a serious impairment to human health as defined in subdivision (b) of section 434.11 of this Part. If the corporation determines that a former residential customer or other person residing in the premises may be exposed to a serious impairment to human health as defined in subdivision (b) of section 434.11 of this Part, it shall restore the steam service immediately, unless the customer refuses to permit such corporation to restore service or, in theft or tampering situations, unless it is impractical for the corporation to eliminate an unsafe condition, and the requirements of subdivision (b) of section 434.11 of this Part shall apply. If the

corporation is unable to obtain personal contact with the customer or an adult residing on the premises, or the customer refuses to permit service restoration, it shall immediately refer the name and address of the former customer to the local commissioner of social services in accordance with the procedures set forth in paragraph (b)(3) of section 434.11 of this Part, unless the corporation has reasonable grounds to believe that the former customer has permanently vacated the premises.

.SO DOC 16B-434.13 NYCRR

434.13 Voluntary third-party notice prior to discontinuance of service. (a) Each and every steam corporation and municipal steam corporation shall permit a residential consumer to designate a third party to receive a copy of every notice of discontinuance of service sent to such residential consumer, provided that such third party indicates in writing his or her willingness to receive such notices.

(b) Such corporations shall notify residential consumers annually of the availability of the third-party notice procedure.

.SO DOC 16B-434.14 NYCRR

434.14 Installment plans for residential customers. No such corporation shall terminate service to a customer because of the customer's failure to pay for service unless the corporation has first offered a monthly installment plan that is just and equitable. Each corporation must offer a just and equitable monthly plan to all customers whose service has been disconnected for nonpayment. To the extent practicable, the monthly installment plan should be based on the customer's ability to pay, past payment history, the amount of indebtedness, and the availability of other resources. The monthly installment plan should require a customer to pay current bills and a portion of past indebtedness. A new monthly installment plan need not be offered to a customer who is in default on an existing one.

435.1 General

435.2 Standards

435.3 Rate of interest

435.4 Limitations

.SO DOC 16B-435.1 NYCRR

Section 435.1 General. Every steam corporation or municipality shall

provide interest on customer overpayments according to the standards and criteria set forth in this Part.

.SO DOC 16B-435.2 NYCRR

435.2 Standards. A customer overpayment is defined as payment by the customer to the utility in excess of the correct charge for steam service supplied to the customer which was caused by erroneous billing by the utility.

.SO DOC 16B-435.3 NYCRR

435.3 Rate of interest. The rate of interest on such amounts shall be the greater of the unadjusted customer deposit rate or the applicable late payment rate, if any, for the service classification under which the customer was billed. Interest shall be paid from the date when the customer overpayment was made, adjusted for any changes in the deposit rate or late payment rate, and compounded monthly, until the date when the overpayment was refunded.

.SO DOC 16B-435.4 NYCRR

435.4 Limitations. This part applies to refunds returned to customers after the effective date of these rules. No steam corporation or municipality shall be required to pay interest on customer overpayments that are refunded within 30 days after such overpayment is received by the steam corporation or municipality.

443.6 Original cost defined

443.7 Amounts charged in previous years to operating expenses

.SO DOC 16B-443.1 NYCRR

Section 443.1 Corporation affected.

Every steam corporation having annual steam operating revenues of \$100,000 or over shall establish, provide and maintain continuing property records of its property used wholly or partly in steam operations.

.SO DOC 16B-443.2 NYCRR

443.2 Requirements of continuing property.

Such continuing property record shall comply with the following requirements.

a) Such record shall be divided into continuing property record units which shall be arranged to conform with the operating property or the fixed capital accounts and shall include a description of each of such units.

(b) The original cost of each of such units shall be set forth provided that in those cases where the original cost cannot be ascertained without unreasonable expense, such original cost shall be estimated.

(c) Except as otherwise provided herein, there shall be shown for property hereafter installed, and for present property so far as can be ascertained, either in such record or in supporting data thereto, for each of such units, the date when charged to operating property or fixed capital, the location of the property, the manufacturer's name and any number or other identification mark imprinted thereon, the accounting company number or designation, and such other description as may be necessary to plainly identify the property and the associated original cost thereof.

(d) When meters or major units of steam plant equipment have been retired and subsequently reinstalled, the date when such property was first charged to operating property or fixed capital shall also be shown.

(e) Such property record shall show separately the units located in each city, village or town, and in the case of New York City in each borough, and in each steam plant. When a corporation desires a modification of this requirement, application should be made to the commission.

(f) There shall be shown by appropriate reference the source of all entries; and all drawings and computations and other detail records, supporting either the quantities or the cost included in the continuing property record, shall be retained.

(g) The original cost of each parcel of land and each structure owned in fee shall be set forth and no further subdivision need be shown.

(h) The original cost of easements for right of way shall be separately set forth for each transmission or distribution line.

(i) Property consisting of a large number of similar units may be grouped and only the average unit cost need be set forth for similar units of each size installed during a calendar year.

.SO DOC 16B-443.3 NYCRR

443.3 Filing of proposed records units.

Every steam corporation affected by this Part shall file on or before February 1, 1937, a statement setting forth the continuing property record units proposed to be used in its continuing property record.

.SO DOC 16B-443.4 NYCRR

443.4 Completion of continuing property records.

(a) The continuing property record herein ordered to be established

shall be completed as to property installed prior to January 1, 1937 or before December 31, 1937. When a corporation desires a modification of this requirement, application should be made to the commission on or before November 1, 1937.

(b) Upon the completion of the continuing property record of property acquired prior to January 1, 1937, notice shall be given to this commission.

.SO DOC 16B-443.5 NYCRR

443.5 Certain records required.

(a) Each corporation affected by this Part shall keep such records of property and property retirements as will reflect, so far as practicable, the service life of all property retired, and will permit the determination of the age of all existing property; and also such records as will reflect the salvage and cost of removal of property retired from each account including property used wholly or partly in steam operations.

(b) Each such corporation shall also maintain such records supporting its books of account as are necessary to show the reserves accumulated to provide for depreciation or ultimate retirement of its property used wholly or partly in steam operations, separately for each operating property or fixed capital account.

.SO DOC 16B-443.6 NYCRR

443.6 Original cost defined.

The term original cost when used herein means the cost of such property to the person or corporation first devoting it to public service.

.SO DOC 16B-443.7 NYCRR

443.7 Amounts charged in previous years to operating expenses.

Nothing herein stated shall be taken as permitting the recording in the original cost shown in the continuing property record of amounts charged in previous years to operating expenses, operating taxes, or other income or surplus accounts.

460.0 Order authorizing Uniform System of Accounts for Steam
Corporations in Classes A and B

460.1 Definitions

.SO DOC 16B-460.0

NYCRR

Section 460.0 Order authorizing Uniform System of Accounts for Steam
Corporations in Classes A and B.

(a) The Uniform System of Accounts for Steam Corporations (Classes A and B) is hereby prescribed for every steam corporation (as that term is defined in the Public Service Law) which has annual operating revenues from steam operations in excess of \$100,000 subject to the jurisdiction of this commission, and every such steam corporation is hereby required, on and after January 1, 1938, to keep its records and accounts in conformity therewith.

(b) During the 12 months following the date on which said uniform system of accounts becomes effective, any such steam corporation may, for purposes of comparison, keep on its books, in addition to the accounts hereby prescribed, such portion or portions of its present accounts as may be deemed desirable by any such corporation.

(c) Each steam corporation for which this uniform system of accounts is prescribed shall classify, set forth, and carry all assets, liabilities, capital stock, and surplus existing as of the effective date of this uniform system of accounts, as prescribed in such system of accounts.

(d) Each such steam corporation shall prepare and file in triplicate with the commission not later than six months after the effective date of this uniform system of accounts, summary statements showing (1) the closing balance of each balance sheet account carried on the books directly preceding the effective date of this system of accounts prescribed herein, the title of each account under this system of accounts to which any portion thereof was transferred, and the amount so transferred, and (2) the opening balance of each account under this system of accounts, the title of each account from which any portion thereof was transferred, and the amount so transferred. Reserves existing at the effective date of this system of accounts accumulated to provide for losses upon retirement or withdrawal of property from

service, depreciation, amortization or replacement of fixed capital or operating property shall be transferred to the accounts prescribed herein for depreciation and amortization reserves.

(e) In prescribing this system of accounts, the commission does not commit itself to the approval or acceptance of any item set out in any account, for the purpose of fixing rates or in determining other matters before the commission. The prescribed system of accounts is designed to set out the facts in connection with the capitalization, construction, income, expenditures, etc., and therefrom the commission will determine, in connection with such matters as may be under advisement from time to time, just what consideration shall be given to the various items in the several accounts.

(f) The system of accounts prescribed by this order shall be put into effect by each steam corporation affected thereby on January 1, 1938, except that any such steam corporation may upon notification to the commission, adopt the system of accounts prescribed herein as of January 1, 1937.

.SO DOC 16B-460.1

NYCRR

460.1 Definitions.

(a) When used in this system of accounts:

(1) Accounts means the accounts prescribed in this system of accounts.

(2) Actually issued, as applied to securities issued or assumed by the utility, means those which have been sold to bona fide purchasers for a valuable consideration (including those issued in exchange for other securities or other property); also securities issued as dividends on stock, and those which have been issued in accordance with contractual requirements direct to trustees of sinking funds.

(3) Actually outstanding, as applied to securities issued or assumed by the utility, means those which have been actually issued and are neither retired nor held by or for the utility; provided, however, that securities held by trustees shall be considered as actually outstanding.

(4) Amortization means the gradual extinguishment of an amount in an account by prorating such amount over a fixed period, over the life of the asset or liability to which it applies, or over the period during which it is anticipated the benefit will be realized.

(5) Associated companies means companies or persons that, directly or indirectly, through one or more intermediaries, control, or are controlled by, or are under common control with, the accounting company.

(6) Control (including the terms controlling, controlled by, and under common control with) means the possession, directly or indirectly, of the power to direct or cause the direction of the management and

policies of a company, whether such power is exercised through one or more intermediary companies, or alone, or in conjunction with, or pursuant to an agreement, and whether such power is established through a majority or minority ownership or voting of securities, common directors, officers, or stockholders, voting trusts, holding trusts, associated companies, contract, or any other direct or indirect means.

(7) Book cost means the amount at which property is recorded in these accounts without deduction of related reserves. As applied to steam plant, book cost means the amount at which property is included in account 106 or in accounts 101 to 104.

(8) Book value, when applied to steam plant, means the book cost less related depreciation reserves. When applied to other property, it means book cost less related reserves for loss in value.

(9) Buildings. (See steam plant instruction § 463.9.)

(10) Commission or the commission means the Public Service Commission of the State of New York.

(11) Company. (See par. (28), *infra*.)

(12) Construction cost, components of. (See steam plant instruction 463.4.)

(13) Cost means the amount of money actually paid for property or services or the cash value at the time of the transaction of any consideration other than money (See, however, steam plant instruction §463.2.)

(14) Cost of removal means the cost of demolishing, dismantling, tearing down, or otherwise removing steam plant, including the cost of transportation and handling incidental thereto.

(15) Debt expense means all expenses in connection with the issuance and sale of evidences of debt, such as fees for drafting mortgages and trust deeds; fees and taxes for issuing or recording evidences of debt; cost of engraving and printing bonds and certificates of indebtedness; fees paid trustees; specific costs of obtaining governmental authority; fees for legal services; fees and commissions paid underwriters, brokers, and salesmen for marketing such evidences of debt; fees and expenses of listing on exchanges; and other like costs.

(16) Depreciation, as applied to steam plant, means the net loss in service value not restored by current maintenance, incurred in connection with the consumption, use or prospective retirement of steam plant in the course of service from causes against which the utility is not protected by insurance. Among the causes to be given consideration are wear and tear, decay, action of the elements, inadequacy, obsolescence, changes in the art, changes in demand and requirements of

public authorities.

(17) Discount, as applied to the securities issued or assumed by the utility, means the excess of the par or face value of the securities plus interest or dividends accrued at the date of the sale over the cash value of the consideration received from their sale.

(18) Equipment. (See steam plant instruction ÷ 463.10.)

(19) Improvements. (See steam plant instruction ÷ 463.9.)

(20) Investment advances means advances, represented by notes or by book accounts only, with respect to which it is mutually agreed or intended between the creditor and debtor that they shall be settled by the issuance of capital stock or long-term obligations, or shall not be subject to current settlement.

(21) Land and land rights. (See steam plant instruction ÷ 463.8.)

(22) Long-term debt means obligations having a life of more than one year from date of creation or assumption except obligations representing advances from associated companies, and all unmatured bonds and receivers' certificates.

(23) Minor items of property means the associated part or items of which retirement units (see par. (36), *infra.*) are composed.

(24) Net salvage value means the salvage value of property retired less the cost of removal.

(25) Nominally issued, as applied to securities issued or assumed by the utility, means those which have been signed, certified, or otherwise executed, and placed with the proper officer for sale and delivery, or pledged, or otherwise placed in some special fund of the utility, but which have not been sold or issued direct to trustees of sinking funds in accordance with contractual requirements.

(26) Nominally outstanding, as applied to securities issued or assumed by the utility, means those which, after being actually issued, have been reacquired by or for the utility under circumstances which require them to be considered as held alive and not retired, provided, however, that securities held by trustees shall be considered as actually outstanding.

(27) Original cost, as applied to steam plant, means the cost of such property to the person, or to the municipal corporation operating a public utility, first devoting it to public service.

(28) Person means an individual, a corporation, a partnership, an association, a joint-stock company, a business trust, or any organized group of persons, whether incorporated or not, or any receiver or trustee.

(29) Premium, as applied to the securities issued or assumed by the

utility, means the excess of the cash value of the consideration received from their sale over the sum of their par or face value and interest or dividends accrued at the date of sale.

(30) Property retired, as applied to steam plant, means property which has been removed, sold, abandoned, destroyed, or which for any cause has ceased to be used and useful in the steam service of the public.

(31) Replacing or replacement, when not otherwise indicated in the context, means the construction or installation of steam plant in place of property retired, together with the removal of the property retired.

(32) Salvage value means the amount received for property retired, less any expenses incurred in connection with the sale or in preparing the property for sale; or, if retained, the amount at which the material recoverable is chargeable to account 131, materials and supplies, or other appropriate account.

(33) Service value means the difference between original cost and net salvage value of steam plant.

(34) Steam corporation. (See Public Service Law.)

(35) Structures. (See steam plant instruction ÷ 463.9.)

(36) Retirement units means those items of steam plant which when retired, with or without replacement are accounted for by crediting the book cost thereof to the steam plant account in which included.

(37) Utility or utility company, as used herein and when not otherwise indicated in the context, means any steam corporation. (See Public Service Law.)

NYCRR

Section 461.1 Classification of utilities. (a) For the purpose of applying the system of accounts prescribed herein, utilities are divided into two classes as follows:

Class A. Utilities having annual steam operating revenues of \$750,000 or more. Such utilities shall keep all the accounts prescribed herein which are applicable to their operations.

Class B. Utilities having annual steam operating revenues of more than \$100,000 but less than \$750,000. Such utilities shall keep all the accounts prescribed herein which are applicable to their operations, except those operation and maintenance accounts in which the letter B does not appear in the prefix.

(b) The class to which any utility belongs shall be determined by the average of its annual steam operating revenues for the three years next preceding the effective date of this system of accounts. If at the end of any calendar year following the effective date of this system of accounts the annual steam operating revenues of the utility for the three years ended on that date shall average \$750,000, then such utility shall be classified as a class A utility for the next succeeding year.

(c) Any utility may at its option adopt the system of accounts prescribed herein for class A utilities. Notice of such action shall be promptly filed with the commission.

.SO DOC 16B-461.2

NYCRR

461.2 Records. (a) Each utility shall so keep its books of account, and all other books, records, and memoranda which support in any way the entries in such books of account, as to be able to furnish readily full information as to any item included in any account. Each entry shall be supported by such detailed information as will permit a ready identification, analysis, and verification of all the facts relevant thereto.

(b) The books and records referred to herein include not only accounting records in a limited technical sense, but all other records such as minute books, stock books, reports, correspondence, memoranda, engineering records, calculations, drawings, etc., which may be useful in developing the history of or facts regarding any transaction.

(c) Except as authorized by the commission, all operating, accounting, or financial papers, records, books, invoices, stubs, maps, or documents or any papers or records which support entries to any of the accounts or which are necessary for an analysis shall be retained permanently. All such records shall be accessible, at all times, to the authorized representatives of the commission at a location within the State of New York.

(d) Subdivisions of any account in the system of accounts prescribed herein may be kept, provided that such subdivisions do not impair the integrity of the prescribed accounts. The titles of all such subdivisions or subaccounts shall refer by number or title to the account or accounts of which they are subdivisions.

(e) Clearing accounts, in addition to those prescribed, and temporary or experimental accounts may be kept, provided such additional accounts do not impair the integrity of the prescribed accounts.

(f) Not later than July 1, 1944, each utility shall have filed with the commission a copy of its manual of accounts, or other systematic statement of accounts, showing every account or subaccount kept during the year 1943, and thereafter shall file (either as the changes occur, or for each calendar year at a date not later than the filing of its annual report) a statement of each account, subaccount, and clearing account opened or discontinued and the effective date of each change. For each clearing account opened, the purpose of the account shall be stated.

(g) The numbers prefixed to account titles are to be considered as part of the titles. Each utility may, however, adopt a different system of account numbers provided that the numbers herein prescribed shall appear in the descriptive headings of the ledger accounts. When the same account number is used in systems of accounts prescribed for different classes of operations conducted by one utility, the initial letters S, E, G, O, R, and W may be prefixed to identify the account with steam heating, electric, gas, omnibus, rail line, or water, respectively. Common utility plant and operating accounts shall be designated by letter C.

.SO DOC 16B-461.3

NYCRR

461.3 Accounting period. Each utility shall keep its books on a monthly basis, so that for each month all transactions applicable thereto, as nearly as may be ascertained, shall be entered in the books of the utility. A trial balance shall be taken after the monthly postings have been made, and each utility shall close its books at the end of each calendar year.

.SO DOC 16B-461.4

NYCRR

461.4 Submission of questions. To maintain uniformity of accounting, utilities shall submit questions of doubtful interpretation to the commission for consideration and decision.

.SO DOC 16B-461.5

NYCRR

461.5 Interpretation of lists of items. Lists of "items" appearing in the texts of the accounts or elsewhere herein are for the purpose of more clearly indicating the application of the prescribed accounting. The lists are intended to be representative, but not exhaustive. The appearance of an item in a list warrants the inclusion of the item in the account mentioned only when the text of the account also indicates inclusion, inasmuch as the same item frequently appears in more than one list. The proper entry in each instance must be determined by the texts of the accounts.

.SO DOC 16B-461.6

NYCRR

461.6 Delayed items. (a) The term delayed items means items relating to transactions which occurred prior to the current calendar year but which were not recorded in the books of account in the prior year.

(b) Delayed items shall be charged or credited to the same accounts which would have been charged or credited had the items not been delayed; provided, that when the amount of a delayed item is relatively so large that its inclusion in the accounts for a single month would seriously distort the accounts it may be distributed in equal amounts to the accounts for the current and remaining months of the calendar year. If the amount of any delayed item is relatively so large that its inclusion in the accounts for a single year would seriously distort the accounts, the utility shall distribute the amount to the appropriate surplus account.

(c) Records shall be maintained so that the utility will be able to list and describe in the annual report for each year each delayed item amounting to \$100 or more entered in the Income Account during that year.

.SO DOC 16B-461.7

NYCRR

461.7 Unaudited items. When, at the end of any year or at such other times as a financial statement may be required by the commission, it is known that a transaction has occurred which affects the accounts, but the amount involved in the transaction and its effect upon the accounts can not be determined with absolute accuracy, then the amount shall be estimated and such estimated amount included in the proper accounts. When the item is audited appropriate adjustments shall be made in the current accounts. The utility is not required to anticipate minor items

which would not appreciably affect the accounts.

.SO DOC 16B-461.8

NYCRR

461.8 Transactions with associated companies. (a) Each utility shall so keep its accounts and records as to be able to furnish readily, accurate statements of all transactions with associated companies. The statements may be required to show the general nature of the transactions, the amounts involved therein and the amounts included in each account prescribed herein with respect to such transactions. Transactions with associated companies shall be recorded in the appropriate accounts for other transactions of the same nature, except as otherwise provided herein.

(b) If a clearing account is not maintained for each associated company in which all gross charges by that company are entered and from which they are distributed, all charges of any nature whatsoever by any associated company shall be credited at the gross amounts involved to a subaccount for that company under account 215, Advances from Associated Companies, or under account 223, Payables to Associated Companies (even though immediately transferred to an account for capital stock, long-term debt, or other liability), as appropriate. In like manner, in the absence of clearing accounts, all gross charges to any associated company shall be debited to a subaccount for that company under account 111, investments in Associated Companies (even though immediately transferred to a special deposit, special fund, or other investment account), or to account 126, Receivables from Associated Companies, as appropriate.

(c) Dividends, rebates, or earnings from associated companies or mutual service companies, representing refunds of the excess charges made by such companies over the cost to them, shall be debited to account 126, Receivables from Associated Companies, and shall be credited so far as practicable to the same accounts to which the corresponding charges were made, including proper distinction between construction and operating expenses. Credits applicable to operating expenses which it is impracticable to allocate among the accounts to which the corresponding charges have been made, shall be to account 806, Duplicate Miscellaneous Charges--Credit.

.SO DOC 16B-461.9

NYCRR

461.9 Depreciation accounting. Each utility shall record each month the estimated amount of depreciation accrued during that month on steam plant and on the portion of common utility plant applicable to steam operations. (See account 503, depreciation, account 250, reserve for depreciation of steam plant, and account 253.2, reserve for depreciation

and amortization of common utility plant.)

Note A: Depreciation expense applicable to property included in account 102, steam plant leased to others, shall be charged to account 508.2, expenses of steam plant leased to others.

Note B: Depreciation applicable to transportation, stores, shop, and laboratory equipment, and to tools and work equipment shall be charged to clearing accounts provided herein; all depreciation on structures shall be charged to account 503, depreciation.

Note C: The accounting for depreciation of utility plant in other departments which are subject to regulation by the commission shall be in accordance with the effective systems of accounts applicable to such operations.

.SO DOC 16B-461.10

NYCRR

461.10 Distribution of pay and expenses of employees. (a) The charges to steam plant, operating expense and other accounts for services and expenses of employees engaged in activities chargeable to various accounts, such as construction and operations, shall be based upon the actual time engaged in the respective classes of work or, in case that method is impracticable, upon the basis of a study of the time actually engaged during a representative period.

(b) The pay and expenses of general officers shall be charged to the actual work on which they are engaged, to the particular operations over which they have direct supervision, or to the appropriate accounts provided in the administrative and general group in operating expenses.

(c) Salaries of officers or employees and incidental expenses which can be distributed equitably upon a predetermined basis may be distributed through clearing accounts.

(d) Except as otherwise specifically provided in this system of accounts or by order of the commission, no amounts for salaries or wages shall be included in charges to steam plant, cost of removal, or steam operating expenses, except account 800, employees' welfare expenses and pensions, which are not paid to the employees affected subject to their free disposition. Payroll deductions made under a statute or order of a court; or for such purposes as group insurance, purchase of appliances or homes, etc., authorized by written order of the employee without coercion of any kind, may be included.

.SO DOC 16B-461.11

NYCRR

461.11 Employee pensions and benefits. (a) All costs of employee pensions whether such costs represent pensions payable currently to retired employees or their beneficiaries, advance provisions for such payments, or both, are includible in the charges of each accounting

period, provided:

- (1) the pension program under which the costs are determined is reasonable;
- (2) amounts paid are irrevocably dedicated to pension purposes;
- (3) any program of advance provision is based on actuarial studies of other recognized and acceptable systematic method of computation and allocation. Account 800.2, Pensions, is provided under Administrative and General Expenses for pension payments and accruals; however, a utility may clear from that account and distribute to construction and retirement work orders and to clearing and other accounts an applicable portion of the pension costs, and shall clear any such costs applicable to non-utility activities.

Note: Incidental refunds or credits to the utility of amounts disbursed for pension purposes, if such refunds are made under the provisions of a pension program filed with the commission, shall not be deemed to impair the irrevocable dedication of monies to pension purposes.

(b) Costs of accident and health insurance; hospital and surgical insurance; disability and lump sum separation allowances; life insurance, when the utility is not the beneficiary; and similar employee benefits, together with the cost of operating educational and recreational facilities, are includible in account 800.1, Employees' Welfare Expenses. (See also note A to account 799, injuries and Damages, and paragraph D of account 800.2, Pensions.) Salaries payable and expenses incurred in the administration of the welfare and pension department are includible in account 800.3, Welfare and Pensions Administration.

(c) No charge shall be made to any account in this system of accounts to reflect advance provision for employee pension and benefits costs or to augment incomplete provision at a given date for amounts computed in relation to service prior to that date, unless full particulars of the program shall have been filed with the commission, including a copy of such supporting documents as:

- (1) the resolution of the governing board authorizing the program;
- (2) insurance contract, actuarial formula, or data supporting other method of computation and allocation;
- (3) trust agreement, if any.

Like filings shall be promptly made of any subsequent material changes in the pension plan. Acceptance by the commission of such data, as filed, shall not be interpreted as constituting approval of a pension and employee benefits program or of the documents associated therewith,

or of any accounting made thereunder by the utility.

(d) The utility shall keep supporting records which will disclose as of the end of each accounting period:

(1) the amounts disbursed by the company during the period direct to pensioners or their beneficiaries;

(2) the amounts paid into the fund dedicated to future pension payments; and for each of such classes of disbursements, the accumulated total from the beginning of the year;

(3) the amount accumulated in the pension fund as provision for future pension payments; and

(4) at each year end, the amount by which pension commitments under the plan as then in effect, even though subject to future amendment or termination, computed in relation to employee service to that date, (generally the "actuarial liability") exceed the amount in the pension fund.

.SO DOC 16B-461.12

NYCRR

461.12 Territorial subdivisions.

(a) Unless otherwise authorized or directed by the commission, each city, borough, village, or town and each production plant shall constitute a cost area and separate records shall be maintained of the book cost of steam plant located therein.

(b) Operating revenues shall be recorded so that the amount for each city, borough, village, or town may be readily determined.

(c) Records shall be currently maintained so that the utility will be prepared to show operating revenue deductions separately for each city, borough, village, or town and for each production plant; provided that, with the approval of the commission, two or more such territories which are contiguous and are operated as a unit, may be combined into an accounting division.

(d) Records shall be kept to show separately the depreciation reserve applicable to property in each accounting division.

.SO DOC 16B-461.13

NYCRR

461.13 Accounting for other departments. This system of accounts is designed for use by steam utilities. If the utility, in addition to its steam operations, operates other departments, it shall keep such accounts for the other department as may be prescribed by this commission, and in the absence of prescribed accounts, it shall keep such accounts as are proper or necessary to reflect the results of operating each such other department. It is not intended that proprietary and similar accounts which apply to the utility as a whole shall be departmentalized. (See also § 461.2, subd. (g), supra.)

.SO DOC 16B-461.14

NYCRR

461.14 Spreading of income, revenue, and expense items. (a) Income, revenue, or expense items shall in all cases be entered in the accounts in the month in which they accrue and shall not be equalized by spreading over one or more months by the use of deferred debit, deferred credit, reserve or other accounts, except as otherwise specifically provided in this system of accounts or by order of the commission.

(b) When the amount of any unusual item includible in an income, operating revenue, or operating expense account for a single month is relatively so large that its inclusion in the accounts for that month would seriously distort those accounts, it may be included in account 146, other deferred debits, or account 242, other deferred credits, as appropriate, provided an order of the commission shall have been obtained permitting such procedure and determining the accounts to which it shall be distributed and the period of such distribution.

.SO DOC 16B-461.15

NYCRR

461.15 Allocation of costs between steam plant and operating expenses to be made currently. Each utility shall determine currently the costs which are applicable to the steam plant accounts and in the case of costs involving allocations, the amount which is applicable to other accounts, such as operating expenses, taxes, retirement work in progress, other balance sheet accounts, and income or surplus accounts; the intent of this provision being that such costs shall be allocated to the accounts to which they are applicable when they are incurred.

.SO DOC 16B-461.16

NYCRR

461.16 Charges shall be just and reasonable. All charges to the accounts prescribed in this system for steam plant income, operating revenues and operating expenses shall be just and reasonable and any payments by the utility in excess of just and reasonable charges shall be included in account 538, Miscellaneous income Deductions.

.SO DOC 16B-461.17

NYCRR

461.17 Approval by the commission. Whenever the phrases with the permission of the commission, with the approval of the commission, approved by the commission, authorized by the commission or directed by the commission, are used herein, such permission, approval, authorization or direction must be specific and in writing.

.SO DOC 16B-PT462

NYCRR

PART 462

INSTRUCTIONS--BALANCE SHEET ACCOUNTS

(Statutory authority: Public Service Law, § 80)

Sec.

- 462.1 Purpose of balance sheet accounts
- 462.2 Current and accrued assets
- 462.3 Current and accrued liabilities
- 462.4 Securities owned
- 462.5 Discount, expense, and premium on capital stock
- 462.6 Discount, expense, and premium on long-term debt
- 462.7 Contingent assets and liabilities
- 462.8 Company securities owned
- 462.9 Nominally issued securities

.SO DOC 16B-462.1 NYCRR

Section 462.1 Purpose of balance sheet accounts. The balance sheet accounts are intended to disclose the financial condition of the utility as of a given date by showing its assets and other debits, and liabilities, capital stock, surplus (or deficit), and other credits.

.SO DOC 16B-462.2 NYCRR

462.2 Current and accrued assets. (a) Current and accrued assets are cash, those assets which are readily convertible into cash, or are held for current use in operations or construction, current claims against others, payment of which is reasonably assured, advance payments made by the utility benefit of which is to be realized within a relatively short period, and amounts accruing to the utility which are subject to current settlement, except such items for which accounts other than those designated as current and accrued assets are provided.

(b) There shall not be included in the group of accounts designated as current and accrued assets any item the amount or collectibility of which is not reasonably assured, unless an adequate reserve has been provided therefor. Items of current character but of doubtful value may be written down and for record purposes carried in these accounts at nominal value.

.SO DOC 16B-462.3 NYCRR

462.3 Current and accrued liabilities. (a) Current and accrued liabilities are those obligations which have either matured at the date of the balance sheet or which become due within one year from the date thereof, including demand obligations, except, however, bonds, receivers' certificates and similar obligations which shall be classified as long-term debt until date or maturity, and except also advances from associated companies; accrued taxes, such as income taxes, which shall be classified in the balance sheet as accrued liabilities even though payable more than one year from the balance sheet date; compensation awards, which shall be classified as current liabilities regardless of date due; interest accrued on customers' deposits, and

minor items payable in installments which may be classified as current liabilities.

(b) If a liability is due more than one year from date of issuance or assumption by the utility, it shall be credited to a long-term debt account appropriate for the transaction, except, however, the current liabilities mentioned in subdivision (a) above; but, for the purpose of classification in the balance sheet, a debt (except bonds, receivers' certificates, and similar obligations and advances from associated companies), shall be classified as a current and accrued liability if due within one year from the balance sheet date.

.SO DOC 16B-462.4

NYCRR

462.4 Securities owned.

(a) Securities of others acquired by the utility shall be recorded in these accounts at cost at the time of acquisition. Cost does not include any amount paid for accrued interest or dividends.

(b) The utility may write down the cost of any security in recognition of a decline in the value thereof. Securities shall be written off or written down to a nominal value if there be no reasonable prospect of substantial value. Fluctuations in market value shall not be recorded, but a permanent impairment in the value of the securities shall be recognized in the accounts. When securities are written off or written down, the amount of the adjustment shall be charged to account 538, Miscellaneous Income Deductions, or to account 414, Miscellaneous Debits to Surplus, or to an appropriate reserve account.

(c) When securities with a fixed maturity date are purchased at a discount (that is, when the total cost, including brokerage fees, taxes, commissions, etc., is less than par), such discount may be amortized over the remaining life of the securities through periodic debits to the account in which the securities are carried (preferably coincident with entries recording interest accruals) and credits to the same account in which the interest revenue is recorded. No debits shall be made in respect to discount upon securities held as investments or in special funds if there is reason to believe that such securities will be disposed of by redemption or otherwise at less than par or will not be paid at date of maturity.

(d) When securities with a fixed maturity date are purchased at a premium (that is, when the total cost, including brokerage fees, taxes, commissions, etc., is in excess of par), such premium may be amortized over the remaining life of the securities through periodic credits to the account in which the securities are carried (preferably coincident with entries recording interest accruals) and debits to the same account

in which the interest revenue is recorded.

.SO DOC 16B-462.5

NYCRR

462.5 Discount, expense, and premium on capital stock.

(a) This system of accounts provides separate accounts for discount, expense, and premium on capital stock. These accounts shall be subdivided for each class and series of capital stock issued by the utility. Expenses applicable to capital stock shall not be added to capital stock discount nor deducted from premium on capital stock.

(b) In stating the balance sheet, discount and expense and premium shall not be set-off against each other.

(c) General levies or assessments against holders of stock with par value shall be credited to the premium account for the particular class and series of capital stock so assessed; levies or assessments against holders of stock without par value shall be credited to the account for the particular class and series of stock so assessed.

(d) If discount or expense on capital stock is charged off in whole or in part, prior to retirement of the stock, account 414, Miscellaneous Debits to Surplus, shall be debited.

(e) When capital stock which has been actually issued by the utility is reacquired or retired, the difference between the amount paid therefor upon reacquirement by the utility and the par value (amount at which included in account 200, Common Capital Stock, or account 201, Preferred Capital Stock, in the case of stock without par value) plus the premium or less the discount and expense originally entered in respect thereto and not charged off, shall be debited or credited, as the case may be, to account 270, Unearned Surplus; provided, however, that debits shall be charged to account 414, Miscellaneous Debits to Surplus, if the amounts thereof exceed the balance in unearned surplus; and provided further, that in no event shall debits in excess of accumulated credits from the retirement of stock be charged to unearned surplus.

Note: The above subdivision (e) does not apply in case of merger or consolidation.

.SO DOC 16B-462.6

NYCRR

462.6 Discount, expense, and premium on long-term debt.

(a) A discount, expense, and premium account shall be maintained for each class and series of long-term debt (including receivers' certificates) issued or assumed by the utility, in which shall be recorded the discount, expense, and premium associated with the issuance and sale of each such class and series of debt.

(b) In stating the balance sheet, the total of the debit balances

(discount plus expense, or expense less premium) remaining in those accounts having debit balances, shall be reported under account 140, Unamortized Debt Discount and Expense, and the total of the credit balances (premium less expense) remaining in those accounts having credit balances shall be reported under account 240, Unamortized Premium on Debt. Accounts with debit balances shall not be set off by accounts with credit balances.

(c) The discount, expense, and premium referred to above shall be amortized over the life of the respective issues under such a plan as will equitably distribute the amounts over the life of the securities. The amortization shall be on a monthly basis, and the amounts thereof shall be charged to account 531, Amortization of Debt Discount and Expense, or credited to account 532, Amortization of Premium on Debt--Credit, as may be appropriate. The utility may, however, accelerate the charging off of discount and expense by charges to account 531, Amortization of Debt Discount and Expense, or to account 414, Miscellaneous Debits to Surplus.

(d) When any long-term debt is reacquired or redeemed without being converted into another form of long-term debt and when the transaction is not in connection with a refunding operation, the unamortized debt discount and expense or premium applicable to the debt reacquired or redeemed shall be cleared from the accounts. If a debit, such amount may be distributed in whole or in part to either account 531, Amortization of Debt Discount and Expense, or to account 414, Miscellaneous Debits to Surplus; or, if a credit, to either account 532, Amortization of Premium on Debt--Credit, or account 401, Miscellaneous Credits to Surplus. The difference, if any, between the face amount of the debt reacquired or redeemed, and the amount paid upon reacquirement shall be distributed, if a debit, to either account 538, Miscellaneous Income Deductions, or account 414, Miscellaneous Debits to Surplus; or, if a credit, to either account 526, Miscellaneous Non-operating Revenues, or account 401, Miscellaneous Credits to Surplus.

(e) When the redemption of one issue or series of bonds or other long-term obligations is financed by another issue or series before the date of maturity of the first issue, the accounting shall be as provided in subdivision (d) unless otherwise ordered or directed by the commission.

(f) Discount, expense, or premium on debt shall not be included as part of the cost of constructing or acquiring any property, tangible or intangible, except under the provisions of paragraph (14) of subdivision (a) of section 463.4.

.SO DOC 16B-462.7

NYCRR

462.7 Contingent assets and liabilities. Contingent assets represent a possible source of value to the utility contingent upon the fulfillment of conditions regarded as uncertain. Contingent liabilities include items which may under certain conditions become obligations of the utility but which are neither direct nor assumed liabilities at the date of the balance sheet. The utility shall be prepared to give a complete statement of contingent assets and liabilities (including cumulative dividends on preference stock) in its annual report and at such other times as may be requested by the commission.

.SO DOC 16B-462.8

NYCRR

462.8 Company securities owned.

Securities actually issued or assumed by the utility which have been reacquired shall be either retired or carried in account 152, Reacquired Capital Stock, or account 153, Reacquired Long-term Debt, unless it is required by provision of a mortgage, or by decision of a trustee not subject to control by the accounting utility, that they be retained alive in sinking or other funds. When so retained they shall be considered as actually outstanding, but not otherwise.

.SO DOC 16B-462.9

NYCRR

462.9 Nominally issued securities. (a) Each utility shall maintain, in addition to the capital stock and bond accounts shown in the balance sheet, memorandum debit and credit accounts for securities which have been nominally, but not actually, issued.

(b) When non-par stock is nominally issued the number of shares issued shall be shown in the memorandum accounts.

(c) Subdivisions shall be maintained under the memorandum accounts for each class of securities.

- 463.8 Land and land rights
- 463.9 Structures and improvements
- 463.10 Equipment
- 463.11 Additions and retirements of steam plant
- 463.12 Work order system required
- 463.13 Transfers of property
- 463.14 Common utility plant

.SO DOC 16B-463.1 NYCRR

Section 463.1 Classification of steam plant at effective date of system of accounts. (a) Not later than December 31, 1938, each utility shall have completed the studies necessary for determining the original cost thereof and classifying its steam plant as of the effective date of this system of accounts in accordance with the accounts prescribed herein (accounts 101 to 105 and subaccounts thereunder) and it shall submit prior to said date to the commission the entries it proposes to make to carry out the provisions of this system of accounts. It shall submit also, a comparative balance sheet showing the accounts and amounts appearing in its books as of the effective date of this system of accounts and the accounts and respective amounts as of the same date after the proposed entries shall have been made.

(b) Pending the classification of steam plant at the effective date of this system of accounts in accordance with the accounts prescribed herein, each utility shall maintain its present accounts with respect to such property as subaccounts of account 106.1, Steam Plant in Process of Reclassification.

(c) Nothing herein stated shall be taken as permitting the recording as part of the original cost of steam plant of amounts charged in previous years to operating expenses, operating taxes or other income or surplus accounts.

.SO DOC 16B-463.2 NYCRR

463.2 Steam plant to be recorded at original cost.

(a) All amounts included in subaccounts of accounts 101 to 104 for steam plant (except as otherwise provided in account 302, Franchises and Consents) shall be the original cost (see § 460.1, subd. (a)(27)) of such steam plant.

(b) When the term cost is used in the detailed steam plant accounts, it shall mean the original cost unless otherwise specified and shall include not only the materials, supplies, labor, services and other items consumed or employed in the construction and installation of steam plant, but also the cost of preliminary studies, plans, surveys, engineering, supervision, and general expenses, which contribute

directly and immediately to steam plant without duplication of such costs.

(c) When the consideration given for property is other than cash, the value of such consideration shall be determined on a cash basis. In the entry recording such transaction the actual consideration shall be described with sufficient particularity to identify it. The utility shall be prepared to furnish the commission the particulars of its determination of the cash value of the consideration, if other than cash.

(d) When property is purchased under a plan involving deferred payments, no charge shall be made to the steam plant accounts for interest, insurance, or other expenditures occasioned solely by such form of payment.

(e) Steam plant contributed to the utility or constructed by it from contributions to it of cash or its equivalent shall be charged to the steam plant accounts at cost (see § 460.1, subd. (a) (13)) to the utility (i.e., original cost less the portion thereof contributed by or on behalf of customers). Records shall be kept so that the utility can readily furnish information as to the source, purpose, and amount of each contribution, the property to which each contribution relates, and the conditions, if any, upon which each contribution was made.

A: Amounts received for construction which are ultimately to be refunded, wholly or in part, shall be credited to account 241, Customers' Advances for Construction. When the amount to be refunded has been finally determined, the balance, if any, remaining in account 241 shall be debited thereto and credited to the steam plant accounts to which the cost of the property was charged.

B: Amounts in account 265, Contributions in Aid of Construction, as of the effective date of this amendment, which are applicable to and can be identified with property in service or held for future use, shall be transferred to the accounts in which the cost of such property is carried. The balance, if any, remaining in account 265, Contributions in Aid of Construction, shall be transferred to account 250, Reserve for Depreciation of Steam Plant (or account 253.1, Reserve for Depreciation and Amortization of Other Utility Plant, or 253.2, Reserve for Depreciation and Amortization of Common Utility Plant, if appropriate), unless the commission approves or directs other disposition.

.SO DOC 16B-463.3

NYCRR

463.3 Steam plant purchased. (a) When steam plant constituting an operating unit or system is acquired by purchase, merger, consolidation, liquidation, or otherwise, after the effective date of this system of

accounts, the cost of acquisition, including expenses incidental thereto and properly includible in steam plant, shall be charged to account 106.2, Steam Plant Purchased.

(b) The accounting for the acquisition shall then be completed as follows:

(1) The original cost, estimated if not known, (less any credits for contributions in aid of construction applicable to the property transferred), shall be credited to account 106.2, Steam Plant Purchased, and concurrently charged to account 101, Steam Plant in Service, account 102, Steam Plant Leased to Others, account 103, Construction Work in Progress, and account 104, Steam Plant Held for Future Use, as appropriate, and distributed to the detailed accounts which they control.

(2) The accrued depreciation applicable to the properties purchased shall be charged to account 106.2, Steam Plant Purchased, and concurrently credited to account 250, Reserve for Depreciation of Steam Plant.

(3) The amounts previously carried by the selling company in account 265, Contributions in Aid of Construction, shall be charged to account 106.2, Steam Plant Purchased, and concurrently credited to account 265, Contributions in Aid of Construction.

(4) The amount remaining in account 106.2, Steam Plant Purchased, shall then be closed to account 105, Steam Plant Acquisition Adjustments, unless otherwise ordered by this commission.

(c) In connection with the acquisition of steam plant constituting an operating unit or system, the utility shall procure, if possible, all existing records relating to the property acquired, or certified copies thereof, and shall preserve such records until authorized by the commission to destroy or otherwise dispose of them.

.SO DOC 16B-463.4 NYCRR

463.4 Components of construction cost.

(a) The cost of construction properly includible in the steam plant accounts shall include, when applicable and when actually incurred, the direct and overhead costs as listed and defined hereunder:

(1) Contract work includes amounts paid for work performed under contract by other companies, firms, or individuals, costs incident to the award of such contracts, and the inspection of such work. It does not include the cost of work performed by the utility on projects when part of the work is performed by the utility itself and part is performed by others under contract.

(2) Labor includes the pay and expenses of employees of the utility

engaged on construction work, and also workmen's compensation insurance, pay roll taxes and similar items of expense. It does not include the pay and expenses of employees which are distributed to construction through clearing accounts nor the pay and expenses included in other items hereunder.

(3) Materials and supplies includes the purchase price at the point of free delivery plus customs duties, excise taxes, the cost of inspection, loading and transportation, the related stores expenses and the cost of fabricated materials from the utility's shop. In determining the cost of materials and supplies used for construction, proper credit shall be made for unused materials and supplies, for materials recovered from temporary structures used in performing the work involved, and for discounts allowed and realized in the purchase of materials and supplies.

Note: The cost of individual items of equipment of small value (for example, \$200 or less) or of short life, including small portable tools and implements, shall not be charged to steam plant accounts unless the correctness of the accounting therefor is verified by current inventories. The costs shall be charged to the appropriate operating expense or clearing accounts, according to the use of such items, or, if such items are consumed directly in construction work, the cost shall be included as part of the cost of the construction.

(4) Transportation includes the cost of transporting employees, materials and supplies, tools, purchased equipment, and other work equipment (when not under own power) to and from points of construction. It includes amounts paid to others as well as the cost of operating the utility's own transportation equipment. (See paragraph (5) of this subdivision.)

(5) Special machine service includes the cost of labor, optional materials and supplies, depreciation, and other expenses incurred in the maintenance, operation and use of special machines, such as steam shovels, pile drivers, derricks, ditchers, scrapers, trenching machines, material unloaders, and other labor-saving machines; also expenditures for rental, maintenance and operation of machines of others. It does not include the cost of small tools and other individual items of small value or short life which are included in the cost of materials and supplies. (See paragraph (3) of this subdivision.) When a particular construction job requires the use for an extended period of time of special machines, transportation or other equipment, the net cost thereof, less the appraised or salvage value at time of release from the job, shall be included in the cost of construction.

(6) Shop service includes the proportion of the expense of the utility's shop department assignable to construction work, except that the cost of fabricated materials from the utility's shop shall be included in "materials and supplies".

(7) Protection includes the cost of protecting the utility's property from fire or other casualties and the cost of preventing damages to others, or to the property of others, including payments for discovery or extinguishment of fires, cost of apprehending and prosecuting incendiaries, witness fees in relation thereto, amounts paid to municipalities and others for fire protection, and other analogous items of expenditures in connection with construction work.

(8) Injuries and damages includes expenditures or losses in connection with construction work on account of injuries to persons and damages to the property of others; also the cost of investigation of and defense against actions for such injuries and damages. Insurance recovered or recoverable on account of compensation paid for injuries incident to construction shall be credited to the account or accounts to which such compensation is charged. Insurance recovered or recoverable on account of property damages incident to construction shall be credited to the account or accounts charged with the cost of damages.

(9) Privileges and permits includes payments for and expenses incurred in securing temporary privileges, permits or rights in connection with construction work, such as for the use of private or public property, streets, or highways, but it does not include rents, or amounts chargeable as franchises and consents for which see account 302, Franchises and Consents.

(10) Rents includes amounts paid for the use of property during the construction period, such as construction quarters and office space occupied by construction forces and amounts properly includible in construction costs for such facilities jointly used.

(11) Engineering and supervision includes the portion of the pay and expenses of engineers, surveyors, draftsmen, inspectors, superintendents, and their assistants applicable to construction work.

(12) General administration includes the portion of the pay and expenses of the general officers and administrative and general expenses applicable to construction work.

(13) Employee pensions and benefits includes the portion of the cost of employee pensions and benefits which is applicable to construction work.

(14) Engineering services includes amounts paid to other companies, firms or individuals engaged by the utility to plan, design, prepare

estimates, supervise, inspect, or give general advice and assistance in connection with construction work. A copy of the agreement or arrangement under which such services are rendered shall be preserved.

(15) Insurance includes premiums paid or amounts provided or reserved as self-insurance for the protection against loss and damages in connection with construction, by fire or other casualty, injury to or death of persons other than employees, damages to property of others, defalcation of employees and agents, and the nonperformance of contractual obligations of others. It does not include workers' compensation or similar insurance on employees included as "labor" in subdivision (b) of this section.

(16) Law expenditures includes the general law expenditures incurred in connection with construction and the court and legal cost directly related thereto, other than law expenses included in protection, paragraph (7) of this subdivision, and in injuries and damages, paragraph (8) of this subdivision.

(17) Taxes includes taxes on physical property (including land) during the period of construction and other taxes properly includible in construction costs before the facilities become available for service. The period of construction shall extend from the date of commencement of construction to the time when property is ready for service and shall also include any reasonable and necessary period during which the property is held for future service; but shall not include, except upon order of the commission, any period in excess of one year during which construction is suspended.

(18) Interest during construction includes the net cost of borrowed funds used for construction purposes and a reasonable rate upon the utility's own funds when so used. Interest during construction shall be charged to the individual job upon which the funds are expended and shall be credited to account 536, Interest Charged to Construction--Credit. The period for which interest may be capitalized shall be limited to the period of construction. No interest charges shall be included in these accounts upon expenditures for construction projects which have been abandoned. (See paragraph (17) of this subdivision.)

Note: When a part only of a plant or project is placed in operation but the construction work as a whole is incomplete, that part of the cost of the property placed in operation shall be treated as "steam plant in service" and interest thereon as a charge to construction shall cease.

(19) Earnings and expenses during construction. The earnings and

expenses during construction shall constitute a component of construction costs.

(i) The earnings shall include revenues received or earned for steam produced by generating stations during the construction period and sold or used by the utility. When such steam is sold to an independent purchaser before intermingling with steam generated by other plants, the credit shall consist of the selling price of the steam. When the steam generated by a plant under construction is delivered to the utility's steam system for distribution and sale, or is delivered to an associated company, or is delivered to and used by the utility for purposes other than distribution and sale (for manufacturing or industrial use, for example), the credit shall be the fair value of the steam so delivered. The revenues shall also include rentals for lands, buildings, etc., and miscellaneous receipts not properly includible in other accounts.

(ii) The expenses shall consist of the cost of operating the steam generating station and other cost incident to the generation and delivery of the steam for which construction is credited under subparagraph (i) of this paragraph, including the cost of repairs and other expenses (but not taxes) of operating and maintaining lands, buildings and other property, and other miscellaneous and like expenses not properly includible in other accounts.

.SO DOC 16B-463.5

NYCRR

463.5 Overhead construction costs. (a) All overhead construction costs, such as engineering, supervision, general office salaries and expenses, construction engineering and supervision by others than the accounting utility, law expenses, insurance, injuries and damages, relief and pensions, taxes and interest, shall be charged to particular jobs or units on the basis of the amounts of such overheads reasonably applicable thereto, to the end that each job or unit shall bear its equitable proportion of such costs and that the entire cost of the unit, both direct and overhead, shall be deducted from the steam plant accounts at the time the unit of property is retired.

(b) The instructions contained herein shall not be interpreted as permitting the addition to steam plant accounts of arbitrary percentages or amounts to cover assumed overhead costs, but as requiring the assignment to particular jobs and accounts of reasonable overhead costs to the extent actually incurred, as shown by records currently maintained.

(c) The records supporting the entries for overhead construction costs shall be so kept as to show the total amount of each overhead for each year, the nature and amount of each overhead expenditure charged to each

construction work order and to each steam plant account, and the bases of distribution of such costs.

.SO DOC 16B-463.6

NYCRR

463.6 Leased property, expenditures on. (a) Except as provided in subdivision (b) of this section, the cost of initial improvements (including repairs, rearrangements, additions and betterments) to property leased from others made in the course of preparing the property for service, and the cost of any subsequent additions or betterments to such leased property shall be charged to the steam plant or other property account appropriate for the class of property leased. (See account 101 and operation and maintenance instruction, section 467.5 of this Article.)

(b) When the initial improvements to leased property which are otherwise chargeable to steam plant or other property accounts are of relatively minor cost or short life, the cost shall be charged to the account in which the rent expense is included. If the period of the lease is not more than five years, the cost may be carried in account 146, Other Deferred Debits, and charged off over the period of the lease to the account in which the rent expense is included. (See also operation and maintenance instruction, section 467.5 (e) of this Article.)

.SO DOC 16B-463.7

NYCRR

463.7 Temporary facilities. When property ordinarily having a service life of more than one year is installed for temporary use in steam service, it shall be accounted for in the manner prescribed for steam plant in service.

.SO DOC 16B-463.8

NYCRR

463.8 Land and land rights.

(a) Land and land rights means land owned in fee by the utility, and rights, interests and privileges held by the utility in land owned by others, such as leaseholds, easements, rights-of-way, and other like interests in land.

(b) The accounts for land and land rights shall include the first cost, including the amounts of mortgages or other liens assumed, but not rents payable periodically with respect to such rights.

(c) When special assessments for public improvements provide for deferred payments, the full amount of the assessments shall be charged to the appropriate land account and the unpaid balance shall be carried in an appropriate liability account. Interest on unpaid balances shall be charged to the appropriate interest account. If any part of the cost of public improvements is included in the general tax levy, the amount

thereof shall be charged to the appropriate tax account.

(d) The net profit from the sale of timber, cord wood, or other property acquired with rights-of-way or other lands shall be credited to the appropriate land and land rights account. When land is held for a considerable period of time and timber on the land at the time of purchase increases in value, the net profit (after giving effect to the cost of the timber) from the sales of timber or its products shall be credited to account 526, miscellaneous nonoperating revenues.

(e) Separate entries shall be made for the acquisition, transfer, or retirement of each parcel of land, and each land right, having a life of more than one year. A record shall be maintained showing the nature of ownership, full legal description, area, map reference, purpose for which used, city, county, and tax district in which situated, from whom purchased or to whom sold, payment given or received, other costs, contract date and number, date of recording of deed, book and page of record. Entries transferring or retiring land or land rights shall refer to the original entry recording its acquisition. A parcel of land acquired and carried on the books as a unit, is not required to be subdivided, with transfers to other land accounts, merely because of the erection thereon of an incidental structure to be used in steam operations but for a purpose differing from that for which the land is chiefly employed; for example, a small general storehouse on production plant land.

(f) Entries to the steam plant accounts for limited-term interests in land shall make specific reference to the lease, contract or arrangement under which each interest is held or used, together with a concise statement of the terms of the lease, contract or arrangement.

(g) The cost of buildings and other improvements (except bulkheads, buried, not requiring maintenance or replacement; retaining walls primarily for preserving the level of land; assessments for public improvements, and sidewalks and curbs constructed by the utility on public streets) shall not be included in the land accounts. If at the time of acquisition of an interest in land such interest extends to buildings or other improvements (other than public improvements), which are then devoted to steam operations, the land and improvements shall be separately appraised and the cost allocated to land and buildings or improvements on the basis of the appraisals. If the improvements are removed or wrecked without being used in steam operations, the cost thereof and the cost of removing or wrecking shall be charged and the salvage credited to the account in which the cost of the land is recorded.

(h) The cost of land acquired in excess of that used in steam operations shall be included in account 108, Other Utility Plant, account 110, Other Physical Property, or account 104, Steam Plant Held for Future Use, as appropriate.

(i) When the purchase of land for steam operations requires the purchase of land not to be used for such purposes, the charge to the specific land account shall be based upon the cost of the land purchased, less the fair market value of that portion of the land which is not to be used for steam operations. The fair market value of such land not to be used for steam operations shall be included in account 110, Other Physical Property.

(j) When the purchase of land for steam operations requires the purchase of land not to be used for such purpose, but held for such purpose, the charge to the specific land account shall be based upon the cost of only that portion which is used for steam operations, and the cost of the remaining land shall be included in account 104, Steam Plant Held for Future Use.

(k) The items of cost to be included in the accounts for land and land rights are as follows (see steam plant instruction 463.3):

- (1) Bulkheads, buried, not requiring maintenance or replacement.
- (2) Cost of acquisition including mortgages and other liens assumed (but not subsequent interest thereon after the property is placed in service).
- (3) Clearing (first cost) the land of brush, trees and debris; and also tree trimming (first cost) when not chargeable to other steam plant accounts.
- (4) Condemnation proceedings, including court and counsel costs.
- (5) Consents and abutting damages, payment for.
- (6) Conveyancers' and notaries' fees.
- (7) Fees, commissions, and salaries to brokers, agents and others in connection with the acquisition of the land or land rights.
- (8) Grading the land, except when directly occasioned by the building of a structure.
- (9) Leases, cost of voiding upon purchase to secure possession of land.
- (10) Removing, relocating, or reconstructing property of others, such as buildings, highways, railroads, bridges, cemeteries, churches, telephone and power lines, etc., in order to acquire quiet possession.
- (11) Retaining walls when they increase the value of the land or are primarily to preserve the level of the land.
- (12) Special assessments levied by public authorities for public

improvements on the basis of benefits for new roads, new bridges, new sewers, new curbing, new pavements, and other public improvements, but not taxes levied to provide for the maintenance of such improvements.

(13) Surveys in connection with the acquisition.

(14) Taxes assumed, accrued to date of transfer of title.

(15) Title, examining, clearing, insuring, and registering in connection with the acquisition, and defending against claims relating to the period prior to the acquisition.

.SO DOC 16B-463.9

NYCRR

463.9 Structures and improvements.

(a) Structures and improvements means all permanent buildings and structures to house, support or safeguard property or persons, and improvements of a permanent character, other than public improvements, on or to land.

(b) Buildings means permanent structures to house, support or safeguard property or persons, including all fixtures permanently attached to and made a part of buildings and which can not be removed therefrom without cutting into the walls, ceilings or floors, or without in some way impairing the buildings.

(c) Improvements means permanent improvements (other than buildings) to land.

(d) Items of cost (see steam plant instruction 463.3).

BUILDINGS

(1) Architects' plans.

(2) Ash pits (when located within the building proper).

(3) Boilers, furnaces, piping, wiring, fixtures, and machinery for heating, lighting, signaling, ventilating and plumbing.

(4) Bulkheads, including dredging, riprap fill, piling, decking, concrete, fenders, etc., when exposed and subject to maintenance and replacement.

(5) Chimneys.

(6) Coal bins and bunkers.

(7) Commissions and fees to brokers, agents, architects and others.

(8) Conduit.

(9) Damages to abutting property during construction.

(10) Door checks and door stops.

(11) Drainage and sewerage systems.

(12) Elevators, cranes, hoists, etc., and the machinery for operating them, when not specifically provided for in other accounts.

(13) Excavation, including shoring, bracing, bridging, refill, and disposal of excess excavated material.

- (14) Fire protection systems when forming a part of a structure.
- (15) Floor covering (permanently attached).
- (16) Foundations and piers for machinery, constructed as a permanent part of a building or other item listed herein.
- (17) Grading when directly occasioned by the building of a structure.
- (18) Leases, voiding upon purchase, to secure possession of structures.
- (19) Leased property, expenditures on.
- (20) Lighting fixtures and outside lighting systems.
- (21) Painting, at time of construction.
- (22) Partitions, including movable.
- (23) Permits and privileges.
- (24) Platforms, railings and gratings when constructed as a part of a structure.
- (25) Power boards for services to a building.
- (26) Refrigerating systems for general use.
- (27) Retaining walls.
- (28) Scales, connected to and forming a part of a structure.
- (29) Screens.
- (30) Sprinkling Systems.
- (31) Stacks--brick, steel, or concrete, when set on foundation forming part of general foundation or steelwork of a building.
- (32) Storage facilities constituting part of a building.
- (33) Storm doors and windows.
- (34) Subways, areaways, and tunnels, directly connected to and forming part of a structure.
- (35) Tanks constructed as part of a building when not includible in another account.
- (36) Tunnels, intake and discharge, when constructed as part of a structure.
- (37) Vaults constructed as part of a building.
- (38) Water supply system for a building.
- (39) Window shades and ventilators.

OTHER STRUCTURES AND IMPROVEMENTS

- (1) Athletic field structures.
- (2) Billboards.
- (3) Docks.
- (4) Fences and fence curbs (not including protective fences isolating individual items of equipment, which should be charged to the appropriate equipment account).
- (5) Gas and oil supply systems, including pipe lines, holders,

boosters, etc.

(6) Intra-site communication system poles, pole fixtures, wires and cables.

(7) Landscaping, lawns, shrubbery, etc.

(8) Retaining walls (not associated with a building), except when they increase the value of the land or are primarily to preserve the level of the land.

(9) Roadways, railroads, bridges, and trestles, intra-site, except railroads provided for in equipment accounts.

(10) Sewer systems for general use.

(11) Sidewalks, curbs and streets constructed by the utility, except sidewalks and curbs on public streets, which shall be included in the land account.

(12) Tanks, when constructed as distinct structural units.

(13) Waterfront improvements.

(14) Water supply piping, hydrants and wells.

(15) Yard drainage systems.

(16) Yard lighting systems.

(17) Yard surfacing, gravel, concrete or oil.

Note: The cost of disposing of material excavated in connection with construction shall be considered as a part of the cost of such work, except as follows: (a) when such material is used for filling, the cost of loading, hauling and dumping shall be equitably apportioned between the work in connection with which the removal occurs and the work in connection with which the material is used; (b) when such material is sold, the net amount realized from such sales shall be credited to the work in connection with which the removal occurs. If the amount realized from the sale of excavated materials exceeds the removal costs and the costs in connection with the sale, the excess shall be credited to the land account in which the site is carried.

(e) Items not included in buildings. (1) Do not include in the cost of buildings, lighting, heating, or other fixtures temporarily attached for purposes of display or demonstration.

(2) The cost of specially provided foundations not expected to outlast the machinery or apparatus for which provided, and the cost of angle irons, castings, etc., installed at the base of an item of equipment, shall be charged to the same account as the cost of the machinery, apparatus or equipment.

(3) When furnaces and boilers are used primarily for producing steam for distribution to customers and only incidentally for heating a building and operating the equipment therein, the entire cost of such

furnaces and boilers shall be charged to the appropriate plant account, and no part to the building account.

.SO DOC 16B-463.10

NYCRR

463.10 Equipment. (a) Equipment as used in this system of accounts, means all tangible steam plant, other than land and structures as herein defined.

(b) The cost of equipment, unless otherwise indicated in the text of an equipment account, includes, in addition to the actual price thereof, sales taxes, investigation and inspection expenses necessary to such purchase, expenses of transportation when borne by the utility, labor employed, materials and supplies consumed, and expenses incurred by the utility in unloading and placing the equipment in readiness to operate.

(c) Exclude from equipment accounts hand and other portable tools which are likely to be lost or stolen or which have relatively small value (for example, \$200 or less) or short life, unless the correctness of the accounting therefor as steam plant is verified by current inventories. Special tools acquired and included in the purchase price of equipment shall be included in the appropriate plant account. Portable drills and similar tool equipment when used in connection with the operation and maintenance of a particular plant or department, such as production, transmission, distribution, etc., or stores, shall be charged to the plant account appropriate for their use.

(d) The equipment accounts shall include angle irons and similar items which are installed at the base of an item of equipment, but piers and foundations which are designed to be as permanent as the buildings which house the equipment, or which are constructed as a part of the building and which cannot be removed without cutting into the floors or walls of the building, shall be included in the building accounts.

(e) The equipment accounts shall include all the necessary costs of testing or running a plant or part thereof during an experimental or test period prior to becoming available for service. The accounting utility shall furnish the commission with full particulars of and justification for any test or experimental run extending beyond a period of 30 days.

(f) The cost of efficiency or other tests made subsequent to the date equipment becomes available for service shall be charged to the appropriate operating expense accounts, except that tests to determine whether equipment meets the specifications and requirements as to efficiency, performance, etc., guaranteed by manufacturers, made after operations have commenced and within the period specified in the agreement or contract of purchase, may be charged to the appropriate

steam plant account.

.SO DOC 16B-463.11

NYCRR

463.11 Additions and retirements of steam plant. (a) For the purpose of avoiding undue refinement in accounting for additions to and retirements and replacements of steam plant, all property shall be considered as consisting of (1) retirement units and (2) minor items of property.

(b) Units of property (i.e., retirement units, see section 460.1 (a)(36) of this Article). Each utility may adopt its own list of retirement units for the purpose of this instruction until such time as the commission shall prescribe a list of units. Not later than six months after the effective date of this system of accounts, each utility shall file with the commission a list of the items of property it proposes to account for as retirement units of property. Revisions of such list may be made at any time by appropriate filing thereof with the commission.

(1) When a retirement unit is added to steam plant, the cost thereof shall be added to the appropriate steam plant account, except that when retirement units are acquired in the acquisition of any steam plant constituting an operating system, they shall be accounted for as provided in steam plant instruction, section 463.3 of this Part.

(2) When a retirement unit is retired from steam plant, with or without replacement, the book cost thereof shall be credited to the steam plant account in which it is included, determined in the manner set forth in subdivision (d) of this section. The book cost of the retirement unit retired and credited to steam plant shall be charged to the depreciation reserve provided for such property. (See also account 144, Retirement Work in Progress, and steam plant instruction, section 463.12 of this Part.)

(c) Minor items of property. (1) When a minor item of property which does not replace a similar item in which is a part of or associated with a retirement unit and will be accounted for and retired together with such unit, and which by itself or together with other similar items makes a substantial addition, is added to the plant, the cost thereof shall be added to the appropriate steam plant account; otherwise the cost of any minor item of property shall be charged to the appropriate maintenance account. The amount added to steam plant accounts for such minor items shall not, however, exceed the additional cost computed at current prices that would have been incurred if the minor items had been installed together with the retirement units to which they are related.

(2) When a minor item of property is retired and not replaced, the

book cost thereof shall be credited to the steam plant account in which it is included; the depreciation reserve shall be charged with the book cost and cost of removal and credited with the salvage. If, however, the book cost of a minor item retired and not replaced, the original cost of which is less than \$100, has been or will be accounted for by its inclusion in the retirement unit of which it is a part when such unit is retired, no separate credit to the property account is required when such minor item is retired.

(3) When a minor item of property is replaced independently of the retirement unit of which it is a part, the cost of replacement shall be charged to the maintenance account appropriate for the item, except that if the replacement effects a substantial betterment (the primary aim of which is to make the property affected more useful, more efficient, or of greater capacity), the excess cost due to the betterment shall be charged to the appropriate steam plant account. Such excess cost shall not exceed the additional cost computed at current prices that would have been incurred for such betterment if it had been installed together with the retirement unit to which it is related.

(d) Determination of book cost. The book cost of steam plant retired shall be the amount at which such property is included in steam plant accounts 101 to 104 or 106, including all components of construction costs. The book cost shall be determined from the utility's records and if this can not be done, it shall be estimated. When it is impracticable to determine the book cost of each item, due to the relatively large number or small cost thereof, the average book cost of the items, with due allowance for any differences in size, character, and year of installation, shall be used as the book cost of the items retired.

(e) Land retired. The book cost of land retired shall be credited to the appropriate land account. If the land is sold, the difference between the book cost and the sale price of the land (less commissions and other expenses of making the sale) shall be credited or debited to the appropriate depreciation reserve.

(f) Steam plant sold. When steam plant constituting an operating unit or system is sold, conveyed or transferred to another by sale, merger, consolidation or otherwise, the book cost of the property sold or transferred to another shall be credited to the appropriate steam plant accounts, and amounts carried in account 105, Steam Plant Acquisition Adjustments, shall be credited thereto. The amounts (estimated if not known) carried with respect thereto in the depreciation and amortization reserve accounts and in account 241, Customers' Advances for Construction, and account 265, Contributions in Aid of Construction,

shall be charged to such reserves and accounts. Unless otherwise ordered by the commission, the difference, if any, between (1) the net amount of debits and credits and (2) the consideration received for the property (less commissions and other expenses of making the sale) shall be included in account 414, Miscellaneous Debits to Surplus, or account 401, Miscellaneous Credits to Surplus, as appropriate. (See account 106.3, Steam Plant Sold.)

(g) The service value of steam plant retired shall be charged in its entirety to account 250, Reserve for Depreciation of Steam Plant. Any amounts which by approval of the commission are charged to account 141, Extraordinary Property Losses, shall be credited to account 250, Reserve for Depreciation of Steam Plant.

(h) The ledgers containing the primary steam plant accounts and subdivisions thereof shall be kept so as to show on their face (1) additions, (2) retirements, and (3) transfers and adjustments. Corrections of errors and adjustments to additions or retirements in the current or preceding year shall be classified as additions or retirements.

(i) The cost of paving disturbed, including replacing pavement, pavement base and sidewalks, shall be included in the steam plant accounts only when incurred in connection with the addition of one or more retirement units of property; and the cost associated with a particular retirement unit (see, however, subd. (d), supra) shall be retired when that retirement unit is retired, irrespective of whether the paving itself has a shorter or longer life. No addition (except charges to land for public improvements) shall be made to any steam plant account for cost of paving installed in public streets which is not directly occasioned by the installation of property constituting one or more retirement units with which the paving cost is associated as an element of cost. Amounts for such cost of pavement which are included in any primary steam plant account or subdivision thereof shall be carried in a separate subdivision of the account so that the balance therein may be determined at any time.

(j) In the case of substantial items of equipment readily identifiable by serial number or other distinguishing mark, such as pumps, motors, meters, vehicles, furniture, etc., which are retired from plant and not sold or scrapped, statistical records shall be maintained to show readily the year of original entry into utility service and the year when permanently retired and the salvage realized at permanent retirement. Such statistical records shall be of such nature that the history of the property may be recast to reflect the total life and

final salvage of such items and to eliminate the intermediate retirements and reuses, during the life of the property as well as after final retirement.

.SO DOC 16B-463.12

NYCRR

463.12 Work order system required.

(a) Each utility shall record all changes in steam plant used wholly or partly in steam operations by means of a work order or job order system. The work order system shall include a work order estimate and a work in progress record, which shall be supported as indicated below.

(b) All installations, additions, retirements, or replacements shall be covered by a work order estimate and a work in progress record. Standing work orders may be used by utilities with steam annual operating revenues in excess of \$25,000,000 for projects of less than \$10,000 each; by utilities with similar revenues between \$5,000,000 and \$25,000,000 for projects of less than \$5,000 each; and utilities with similar revenues below \$5,000,000 for projects of less than \$1,000 each; except that projects upon which interest during construction is charged shall not be recorded through standing work orders. These limits may be modified by order of the commission when warranted by particular circumstances.

(c) The work order estimate shall include the following particulars:

(1) A designation number or letter and the signature of the officer or employee who authorized the work or purchase. If authorization is by the board of directors or other body, the proper officer shall so state over his signature.

(2) A description and the location of the work to be done (or the purchase to be made), stating the reasons which necessitated the work, and the dates between which such work (or purchase) is to be accomplished. For each project for which interest during construction is charged, the date when completed and the date when placed in operation shall be shown either in the work order estimate or the work in progress record.

(3) Detailed estimates of the cost of the project, to be supported by maps, plans, diagrams, specifications, etc., applicable.

(4) The account or accounts to which the cost of the project is chargeable and the amount chargeable to each account.

(5) Any variations between estimates and actual costs of the project.

(6) When a project involves changes in existing property, either the work order estimate or the work in progress record shall show the year of installation of the property retired or otherwise affected and shall show or refer to other records which cover the book cost (estimated if

not known, and the basis of the estimate to be stated) and the name and page of the accounting and engineering books and records covering such installation and the cost thereof.

(d) The work in progress record shall contain the following particulars:

(1) A designation number or letter which shall correspond to the number or letter on the work order estimate covering the same project. When more than one such work in progress record covers the work on a work order estimate, each shall be numbered or lettered in such manner as to be readily identifiable with the work order estimate for the same project.

(2) The accumulated charges applicable to each particular job or project, the total cost of the completed project, and the cost of removal shall be shown. When any project involves charges to more than one steam plant account, the work in progress record shall be kept so as to show the amount chargeable to each account. Every charge or credit on work in progress records shall refer to the voucher, journal, or other source from which the entry therein was made.

(3) Full details at any time of the amount carried in account 103, construction work in progress, or account 144, Retirement Work in Progress, as applicable. The cost of completed projects shall be promptly transferred from those accounts to the accounts to which chargeable. Upon coming into service, completed portions involving additions to accounts shall be transferred to the appropriate account although other portions of the work covered by the same work order are not yet completed and the work order has not been closed. Credits for such transfers shall be made in separate column.

A: Requirement of the use of the work order system here outlined may be suspended by order of the commission in the case of a utility which satisfies the commission that the system which it has in use for recording changes in steam plant accounts gives the equivalent detail by accounts in substantially the same form. The identification of expenditures with property must be complete and clear, and the detail of the cost of each project or job must be readily available. The total of the uncompleted projects must also be in agreement with account 103, Construction Work in Progress, or account 144, Retirement Work in Progress, as applicable.

B: The work order system is required to record changes in steam plant used wholly or partly in steam operations. Its use is recommended, however, in recording other expenditures, such as for plant in other departments, repairs, etc. When used for repairs, balances applicable

thereto shall be cleared monthly to the appropriate accounts.

.SO DOC 16B-463.13

NYCRR

463.13 Transfers of property. (a) When steam plant consisting of one or more retirement units is transferred from one account for steam plant to another, from one utility department to another, such as from steam to electric, from one cost area to another, between accounts 101, Steam Plant in Service, 102, Steam Plant Leased to Others, 104, Steam Plant Held for Future Use, or between corresponding accounts for common utility plant, the transfer shall be recorded by transferring the book cost thereof from one account, department, or cost area to the other. In the case of all transfers between accounts 101, 102 and 104, and corresponding accounts for common utility plant and from one utility department to another, and in case of transfers of substantial amounts in any year from one primary account for steam or common plant to another, or from one accounting division to another, any related amounts carried in the depreciation reserves shall, not later than the end of the year, be transferred in accordance with the segregation of such reserves. When property (except customers' meters) in connection with which installation costs have been incurred is physically transferred, it shall be accounted for as provided in steam plant instruction section 463.11.

(b) When property is transferred from the steam plant accounts to account 110, Other Physical Property, the transfer shall be accomplished by crediting the steam plant accounts and charging the depreciation reserve with the book cost of the item transferred; the depreciation reserve shall then be credited, as the estimated salvage, and account 110, Other Physical Property, concurrently charged with the market value of the property transferred. If the property is sold within a relatively short time, a debit or credit shall be made to the depreciation reserve to adjust the estimated salvage to the amount actually realized.

Note: Account 110 may be charged with the cost new (instead of the market value) and account 253.3, Reserve for Depreciation and Amortization of Other Property, credited with the difference between such cost and the market value.

.SO DOC 16B-463.14

NYCRR

463.14 Common utility plant. (a) If the utility is engaged in more than one utility service, such as steam and electric or gas, and any of its utility plant is used in common for several utility services or for other purposes to such an extent and in such manner that it is impracticable to segregate it by utility services currently in the accounts, or if general equipment is of such a nature that even though

it is used exclusively for one class of utility service or is associated with one process or function within a department, it is likely to be used simultaneously by more than one department or is subject to transfer between departments, such property may be designated and classified as "Common Utility Plant". (See accounts 109.1 to 109.6 for common utility plant.)

(b) Utility plant designated as common utility plant shall be classified according to the detailed utility plant accounts appropriate for the property. Provisions in this system of accounts applicable to steam plant accounts shall extend also to the accounts for common utility plant.

(c) The utility shall be prepared to show at any time and to report to the commission annually, or more frequently if required, and by utility plant accounts (301 to 390), the following: (1) the book cost of common utility plant, (2) the allocation of such cost to the respective departments using the common utility plant, and (3) the basis of the allocation.

(d) The expenses of operation, maintenance, depreciation and taxes of common utility plant shall be recorded in the accounts prescribed herein, but designated as common, and the allocation thereof to the departments using the common utility plant shall be supported in the same manner as the allocation of the cost of such property.

465.3 Income from sinking and other funds

465.4 Rents includible in income accounts

.SO DOC 16B-465.1 NYCRR

Section 465.1 Purpose of income accounts. (a) The income accounts (501 to 540) are designed to show for each month and each calendar year the operating revenues and expenses, the other income, the income deductions, the net income, the miscellaneous reservations of net income and the amount of income or loss remaining for transfer to earned surplus.

(b) Accounts 501 to 508 are designed to show the income from steam operations. Account 509 is designed to show the income from other utility operations which are subject to the jurisdiction of the commission. The utility shall keep the accounts relating thereto in accordance with the effective systems of accounts for the several classes of operations.

.SO DOC 16B-465.2 NYCRR

465.2 Records for other income. The records supporting the other income shall be so kept that the utility can furnish detailed statements of the revenues from each source and the expenses and other deductions related to such revenues.

.SO DOC 16B-465.3 NYCRR

465.3 Income from sinking and other funds. (a) Interest and other revenues derived from funds carried in account 113, sinking funds and account 114, miscellaneous special funds, shall be credited to account 525, Revenues From Sinking and Other Funds.

(b) When the income is required by a mortgage or other provisions to be held in the fund from which the income arises, an amount equal to the income shall be added to the fund to which it is applicable.

(c) When income derived from sinking funds and other special funds is required to be retained in the fund and the fund is represented by a reserve, the amount of such income accretions to the fund shall be credited to the appropriate reserve account and charged to account 540, Miscellaneous Reservations of Net Income, or account 413, Miscellaneous Reservations of Surplus, as appropriate.

.SO DOC 16B-465.4 NYCRR

465.4 Rents includible in income accounts. (a) Rents which the utility

receives from others for steam operating property the investment in which is properly includible in account 102, Steam Plant Leased to Others, shall be recorded in account 508, Income from Steam Plant Leased to Others. Rentals from steam property owned by the utility and properly includible in account 101, Steam Plant in Service, shall be credited to account 610, Rent from Steam Property.

(b) All expenses, including the provision for depreciation, if any, applicable to property the income from which is included in account 508, Income from Steam Plant Leased to Others, shall be charged to that account.

INSTRUCTIONS--OPERATING REVENUE ACCOUNTS

(Statutory authority: Public Service Law, § 80)

Sec.

466.1 Purpose of operating revenue accounts

466.2 Basis of credits to operating revenue accounts

466.3 Commissions on steam sales

466.4 Steam supplied without direct charge

466.5 Steam used by utility

466.6 Supporting records

.SO DOC 16B-466.1

NYCRR

Section 466.1 Purpose of operating revenue accounts. The operating revenue accounts (601 to 615) are designed to show the amounts of money which the utility becomes entitled to receive from furnishing steam utility service and from service incidental thereto, including amounts for services rendered but not yet billed when the utility exercises its option and records on its books such accrued steam revenue. (See account 130, Accrued Utility Revenues.)

.SO DOC 16B-466.2

NYCRR

466.2 Basis of credits to operating revenue accounts. Credits to the operating revenue accounts shall be made on the basis of the net tariff rates. Discounts forfeited for delayed payments, shall be credited to account 612, Customers' Forfeited Discounts. Corrections of overcharges and overcollections theretofore credited, authorized abatements and allowances, and other corrections shall be charged to the revenue accounts to which they relate.

.SO DOC 16B-466.3

NYCRR

466.3 Commissions on steam sales. If the utility distributes all or a part of its steam through an agent but the sales are made to customers under rate schedules filed by the utility, then the utility shall credit

its revenue accounts with the full amount of sales to customers. The commission paid to the agent shall be charged to account 804, Commissions Paid under Agency Sales Contracts, and any distribution expenses charged by the agent shall be debited to the appropriate expense accounts. Agents shall credit the amount of commissions earned to operating revenue account 615, Miscellaneous Steam Revenues.

.SO DOC 16B-466.4 NYCRR

466.4 Steam supplied without direct charge. Steam supplied to municipalities, or to other governmental units, without charge, in accordance with franchise and similar requirements, shall be charged to account 805, Franchise Requirements, and credited concurrently to account 806, Duplicate Miscellaneous Charges--Credit.

.SO DOC 16B-466.5 NYCRR

466.5 Steam used by utility.

(a) If the utility desires to charge the appropriate accounts in any of its steam operations with the cost of steam used from its own supply, the credit therefor shall not be made to operating revenue accounts, but to account 806, Duplicate Miscellaneous Charges--Credit.

(b) Steam supplied by the utility from its own supply to other departments shall be accounted for in the following manner: If the steam is supplied under a definite arrangement whereby the actual costs are allocated between or among the departments using the steam, the credit in the accounts of the steam department shall be made to account 712, Steam Transferred--Credit, except that the amount of any return or interest, and the amount of depreciation and taxes charged against the other departments shall be credited to account 611, Interdepartmental Rents. If the charges are at tariff or other specified rates for the steam supplied, then the entire amount charged shall be credited to account 607, Interdepartmental Sales.

.SO DOC 16B-466.6 NYCRR

466.6 Supporting records. Each utility shall so keep the records supporting the entries to each steam operating revenue account that it can furnish, (a) the name of each customer, (b) the quantity of steam furnished to each customer, (c) the amount charged for steam furnished each customer and (d) the service classification under which the charge is made. Each utility shall also be prepared to report upon request, within a reasonable time, for each month or other billing period and for each year, the quantity of steam sold and the charges therefor, by service classifications.

.SO DOC 16B-PT467 NYCRR

INSTRUCTIONS--OPERATION AND MAINTENANCE ACCOUNTS
(Statutory authority: Public Service Law, § 80)

Sec.

467.1 Purpose of operation and maintenance accounts

467.2 Maintenance, cost of

467.3 Salvage and insurance

467.4 Supervision and engineering

467.5 Operating rents

467.6 Joint facility rents and expenses

467.7 Records for each plant

.SO DOC 16B-467.1 NYCRR

Section 467.1 Purpose of operation and maintenance accounts. The operation and maintenance accounts (701 to 809) are designed to show in detail the cost (except depreciation, certain property losses, and taxes) of furnishing steam utility service. (See general instructions §§ 461.6 and 461.7.)

.SO DOC 16B-467.2 NYCRR

467.2 Maintenance, cost of. (a) The cost of maintenance chargeable to the various operating expense accounts and to clearing accounts includes labor, materials, overhead and other expenses incurred in maintenance work, such as:

- (1) Associated costs of local plant supervision.
- (2) Cost of transportation, shop and stores expense, and use of tools and implements.
- (3) Cutting and replacing pavement, pavement base, and sidewalks, in connection with repairs.
- (4) Inspecting and testing after repairs have been made.
- (5) Inspecting, testing (except routine tests of steam meters), and reporting on the condition of steam plant in service specifically to determine the need for repairs, minor replacements, rearrangements and changes.
- (6) Replacing minor items of plant (see steam plant instruction § 463.11, subd. (c)).
- (7) Rearranging and changing the location of property not retired.
- (8) Repairing materials for reuse.
- (9) Restoring the condition of property damaged by storms, breakage, floods, fire, accident, or other casualties (see subd. (b) below).
- (10) Restoring the condition of property damaged by wear and tear, decay, or action of the elements (see subd. (b) below).
- (11) Routine work (see also subd. (b) below) to prevent trouble.
- (12) Testing for, locating, and clearing trouble, including stopping

leaks.

(13) Training employees for maintenance work.

(b) The cost of maintenance does not include the cost of replacing items of property designated as retirement units. (See steam plant instruction ÷ 463.11.)

(c) Materials recovered in connection with the maintenance of property shall be credited to the same account to which the maintenance cost was charged.

(d) If the book cost of any property is carried in account 106.2, Steam Plant Purchased, the cost of maintaining such property shall be charged to the accounts for maintenance of property of the same class and use, the book cost of which is carried in other steam plant in service accounts. Maintenance of property leased from others shall be treated as provided in operation and maintenance instruction ÷ 467.5.

(e) If employees engaged in plant construction or operation are also required to make repairs, an equitable proportion of their pay and expenses shall be charged to the account appropriate for the cost of such repairs. (See general instruction ÷ 461.10.)

.SO DOC 16B-467.3

NYCRR

467.3 Salvage and insurance. (a) Salvage and insurance recovered in connection with maintenance jobs shall be credited to the appropriate maintenance accounts.

(b) If the amount of insurance recovered is relatively large and is received before the repairs have been completed, a disproportionate credit to operating expenses may be avoided by crediting the amount of the insurance recovered to a suspense account, to be transferred to the appropriate maintenance accounts as the charges for the work are made.

(c) Insurance recovered in connection with personal injuries charged to account 799, Injuries and Damages, shall be credited to that account.

(d) Dividends distributed by mutual insurance companies shall be credited to the accounts to which the insurance premiums were charged.

(e) Recoveries under fidelity bonds shall be credited to the account charged with the loss.

.SO DOC 16B-467.4

NYCRR

467.4 Supervision and engineering. The supervision and engineering includible in the operating expense accounts shall consist of the pay and expenses (company and railroad transportation, lodging, meals, taxi and car fares and other traveling and incidental expenses) of superintendents, engineers, clerks, other employees and consultants engaged in supervising and directing the operations and maintenance of each steam utility function; also office supplies and expenses,

including the maintenance of office furniture and equipment. Whenever allocations are necessary in order to arrive at the amount to be included in any account, the method and basis of allocation shall be preserved.

.SO DOC 16B-467.5

NYCRR

467.5 Operating rents. (a) Rent expense accounts are provided under each functional group of expense accounts. These accounts shall be charged with all rents paid for property used in steam operations. If the rents cover property used for more than one function, such as production and distribution, the rents shall be apportioned to the appropriate rent expense accounts on an actual, or, if necessary, an estimated basis.

(b) Rents paid for property devoted to operations for which clearing accounts are used shall be charged to the appropriate clearing accounts.

(c) The cost, when incurred by the lessee, of operating and maintaining leased property, shall be charged to the accounts appropriate for the expense if the property were owned.

(d) Taxes paid by the lessee upon leased property shall be charged to the appropriate rent expense or clearing account.

(e) When the lessee is responsible for the replacement of steam plant leased from others, the cost of replacements shall be charged to the appropriate rent expense or clearing account, unless a reserve therefor has been provided, in which event the charge shall be to the reserve.

(See steam plant instruction § 463.6.)

(f) When a portion of property or equipment rented from others for use in connection with steam operations is subleased, the revenue derived from such subleasing shall be credited to account 610, Rent from Steam Property; provided, however, that in case the rent was charged to a clearing account, amounts received from subleasing the property shall be credited to such clearing account.

(g) If leased property is used by more than one department, the rental on such property shall be apportioned to the appropriate rent or clearing accounts of the various departments of the utility.

(h) Property operated jointly by the utility and another or others under a definite arrangement whereby the actual costs are shared between or among the parties shall be considered for the purpose of this system of accounts as a joint facility, and the accounting in connection therewith shall be handled as provided in operation and maintenance instruction section 467.6, following.

(i) Rents payable to customers for use of their steam equipment shall be charged to a separate subdivision of account 710, Rents. (See note to

account 710.)

.SO DOC 16B-467.6

NYCRR

467.6 Joint facility rents and expenses. (a) A joint facility for the purpose of this system of accounts is defined as any property occupied or used jointly by the utility and another or others under a definite arrangement whereby the actual costs are shared between or among the parties. Property of the utility occupied or used under a similar definite arrangement between the steam department and a coordinate department or departments shall likewise be considered as a joint facility. (See operating revenue instruction § 466.5.)

(b) When the utility owns the joint facility, any amount received or transferred as reimbursement of operating or maintenance expenses shall be credited to the appropriate "joint expense--credit" or clearing account except credits for steam transferred, which shall be entered in account 712, steam transferred--credits; amounts received or transferred covering depreciation, taxes and interests or return, shall be credited, in the case of another or others, to account 610, rent from steam property, and in the case of coordinate departments to account 611, interdepartmental rents.

(c) The amount paid by or transferred to the utility for costs of operation and maintenance in connection with occupancy or use of a joint facility shall be charged to the appropriate joint expense--debit or clearing account or accounts; the amount for depreciation, taxes, and interest or return, shall be charged to the rent account appropriate for the class of property involved.

(d) In the event that joint facilities are used by either party in connection with construction work, credits for the full amount received and charges for the full amount paid, as the case may be, shall be made direct to the construction accounts affected.

(e) These instructions are not intended to cover cases of joint ownership of property when each joint owner bears the cost of operating and maintaining its own property. In such cases the cost of operation and maintenance shall be recorded in the appropriate operation and maintenance accounts other than the "joint expense" debit or credit accounts even though one of the joint owners operates or maintains the property and bills against other owners for all or a portion of the expenses incurred.

(f) Steam supplied by the utility from its own supply to a coordinate department shall be accounted for as provided in operating revenue instruction section 466.5, and subdivision (b), above. If the utility desires to charge the appropriate accounts in any of its steam

ASSETS AND OTHER DEBITS

UTILITY PLANT

101. Steam Plant in Service

A. This account shall include the original cost of steam plant owned and used and useful by the utility in the service of the public in its steam operations, including such property owned by the utility but held by nominees.

B. The cost of additions to and betterments of property leased from others shall also be recorded in this account. (See steam plant instruction ÷ 463.6.)

Note A: The property included in this account shall be classified according to the detailed accounts (301 to 390) for steam plant.

Note B: The account for steam plant in service may include the entire original cost of units of property which are partially used and useful in utility operations when the portion which is so used and useful is not separable from the portion which is not used and useful.

102. Steam Plant Leased to Others

A. This account shall include the original cost of steam plant owned by the utility, but leased to others as operating units or systems, where the lessee has exclusive possession.

B. The property included in this account shall be classified according to the detailed accounts (301 to 390) for steam plant, and this account shall be maintained in such detail as though the property were used by the utility in its steam operations.

103. Construction Work in Progress

This account shall include the total of the balance of work orders for steam plant in process of construction but not ready for service at the date of the balance sheet.

104. Steam Plant Held for Future Use

A. This account shall include the original cost of steam plant owned and held for use in steam service under a definite plan for such use. There shall be included herein property acquired but never used by the utility in steam service, but held for such service in the future under a definite plan, and property previously used by the utility in steam service, but retired from such service and held pending its reuse in the future, under a definite plan, in steam service.

B. The property included in this account shall be classified according to the detailed accounts (301 to 390) for steam plant, and the account shall be maintained in such manner and in such detail as though the property were in service.

Note: Materials and supplies and customers' meters held in reserve shall not be included in this account.

105. Steam Plant Acquisition Adjustments

A. With respect to steam plant constructed or otherwise acquired prior to January 1, 1938, and still in service, leased to others, and held for future use at that date, this account shall include the difference between the book cost thereof as of December 31, 1937, and the original cost thereof when such difference is not clearly includible in any other account, and unless otherwise ordered by the commission.

B. With respect to steam plant acquired after December 31, 1937, as an operating unit or system by purchase, merger, consolidation, liquidation or otherwise, this account shall include (unless otherwise ordered by the commission) the difference between (a) the cost to the accounting utility of such steam plant and (b) the original cost thereof less credits representing contributions (see paragraph B of account 265, Contributions in Aid of Construction, and steam plant instruction 463.2, subd. (e)), less the amount or amounts credited to the depreciation reserves of the accounting utility at the time of acquisition with respect to such steam plant and less the amount in account 265, Contributions in Aid of Construction. (See steam plant instructions 463.1, 463.2 and 463.3.)

C. Whenever practicable, this account shall be subdivided according to the character of the amounts included herein and so as to show the amounts applicable to steam plant in service, steam plant leased to others, and steam plant held for future use.

D. A record shall be kept of the amounts in this account for each property acquisition after December 31, 1937.

E. With respect to the amount applicable to steam plant acquired prior to January 1, 1938, and to each property acquisition thereafter, the utility shall notify the commission as to its program for depreciation, amortization, or other disposition of the amounts included in this account.

106. Unclassified Steam Plant

There shall be reported by this caption the net balance in the following accounts:

106.1 Steam Plant in Process of Reclassification

A. There shall be closed to this account the book cost of steam plant (formerly called "fixed capital" or "operating property") as of the effective date hereof. The detail or primary accounts in support of this account employed prior to such date shall be continued pending determination of the original cost thereof and classification into the steam plant accounts herein prescribed, but shall not be used for additions, betterments, or new construction.

B. No charges other than as provided in paragraph A above shall be made to this account, but retirements of steam plant owned as of the effective date hereof shall be credited hereto and to the supporting (old) fixed capital accounts until the reclassification shall have been accomplished.

Note: It is intended that this shall be only a temporary account.

106.2 Steam Plant Purchased

A. This account shall include the cost of steam plant acquired as an operating unit or system by purchase, merger, consolidation, liquidation or otherwise, pending the distribution thereof to the appropriate accounts in accordance with steam plant instruction section 463.3.

106.3 Steam Plant Sold

A. This account shall be credited temporarily with the selling price of steam plant constituting an operating unit or system, sold, conveyed or transferred to another through sale, merger, consolidation, or otherwise, pending the completion of the accounting for the transaction as provided in steam plant instruction section 463.11.

108. Other Utility Plant

A. There shall be included under this caption the balances in accounts

for utility plant other than steam plant.

B. A separate account shall be maintained for each utility department.

Note: In the case of utility services for which systems of accounts are prescribed by this Commission, such as electric, gas, etc., the appropriate accounts in such systems shall be used instead of this account.

109.1 Common Utility Plant in Service

This account shall include the original cost of utility plant in service which is used in common for steam operations and other operations. (See steam plant instruction ÷463.14.)

Note A: The property included in this account shall be classified according to the accounts for steam plant.

Note B: The account for common utility plant in service may include the entire original cost of units of property which are partially used and useful in utility operations when the portion which is so used and useful is not separated from the portion which is not used and useful.

109.2 Common Utility Plant Leased to Others

This account shall include the original cost of common utility plant leased to others as operating units or systems, when the lessee has exclusive possession. (See steam plant instruction ÷ 463.14.)

Note: The property included in this account shall be classified according to the accounts for steam plant.

109.3 Common Utility Plant Construction Work in Progress

This account shall include the total of the balances of work orders for common utility plant in process of construction but not ready for service at the date of the balance sheet. (See steam plant instruction ÷ 463.14.)

109.4 Common Utility Plant Held for Future Use

This account shall include the original cost of common utility plant owned and held for use in steam operations and other operations under a definite plan for such use. (See steam plant instruction ÷ 463.14.)

Note: The property included in this account shall be classified according to the accounts for steam plant.

109.5 Common Utility Plant Acquisition Adjustments

This account shall include in the case of common utility plant (see steam plant instruction ÷ 463.14) items corresponding to those provided for steam plant in account 105, Steam Plant Acquisition Adjustments.

109.6 Unclassified Common Utility Plant

This account shall include in the case of common utility plant (see steam plant instruction ÷ 463.14) items corresponding to those provided for steam plant in accounts 106.1, Steam Plant in Process of

Reclassification, 106.2, Steam Plant Purchased, or 106.3, Steam Plant Sold.

INVESTMENT AND FUND ACCOUNTS

110. Other Physical Property

A. This account shall include the cost to the utility (except as otherwise provided in steam plant instruction ÷ 463.13, subd.) of land, structures, and equipment owned by the utility, but not used in utility service and not properly includible in account 104, steam plant held for future use, in account 108, Other Utility Plant, or in accounts 109.1 to 109.6 common utility plant.

B. The records supporting the entries to this account shall be so kept that the utility can furnish information as to the nature and cost of each kind of property, from whom it was acquired, its location, and its use.

111. Investments in Associated Companies

There shall be reported by this caption the amounts included in accounts 111.1 and 111.2.

111.1 Investments in Securities of Associated Companies

A. This account shall include the cost (except as otherwise provided) of the utility's investment in securities issued or assumed by associated companies and held as permanent or long-term investments.

B. The account shall be maintained in such manner as to show each class of investment in each associated company.

Note: All securities of associated companies shall upon acquisition be charged to this account, but such securities if acquired for or subsequently held in special deposits or in special funds shall be transferred to the appropriate deposit, fund, or other investment account. (See general instruction, ÷ 461.8.) A complete record of securities pledged shall be maintained.

111.2 Advances to Associated Companies

A. This account shall include the amount of investment advances to associated companies and interest accrued on such advances when such interest is not subject to current settlement. (See account 126, Receivables from Associated Companies.)

B. The account shall be maintained in such manner as to show the advances to each associated company for each type of item included.

Note A: Balances in open accounts with associated companies which are subject to current settlement shall be excluded from this account and included in account 126.2, Accounts Receivable from Associated Companies.

Note B: Advances made to associated companies without expectation of

reimbursement shall immediately be credited to this account and charged to account 538, Miscellaneous Income Deductions.

112. Other investments

A. This account shall include the cost (except as otherwise provided) of the utility's investment in securities issued or assumed by non-associated companies, investment advances to such companies, and any investments not accounted for elsewhere. Securities held as temporary cash investments shall not be included in this account, but in account 123, Temporary Cash Investments.

B. The records shall be maintained in such manner as to show the amount of each investment and the investment advances to each person.

Note: Securities owned and pledged shall be included in this account, but securities held in special deposits or in special funds shall be included in the appropriate deposit or fund account. A complete record of securities pledged shall be maintained.

113. Sinking Funds

A. This account shall include the assets held in sinking funds, such as:

(1) Cash.

(2) Securities issued by others or other assets, at cost except as otherwise provided herein.

(3) Live securities, issued or assumed by the utility, at cost.

(4) Amounts deposited with trustees on account of mortgaged property sold, when held for the redemption of securities.

(5) Securities of the utility issued to trustees without intervening sale, at face value.

B. A separate account, with appropriate title, shall be kept for each sinking fund.

Note: Nothing herein contained shall be construed as preventing a utility from transferring applicable sinking or other funds to account 121.3, miscellaneous special deposits, for the purpose of paying matured sinking fund obligations, or obligations called for redemption but not presented, or the interest thereon.

114. Miscellaneous Special Funds

There shall be reported by this caption the amounts included in accounts 114.1 and 114.3.

114.1 Depreciation Fund

This account shall include the assets which have been segregated in a special fund for the purpose of identifying such assets with the reserve for depreciation.

114.3 Miscellaneous Special Funds

A. This account shall include assets which have been segregated in special funds for insurance, employees' pensions, savings, relief, hospital, and other purposes not provided for elsewhere.

B. A separate account, with appropriate title, shall be kept for each fund. Note: Amounts deposited with a trustee under the terms of an irrevocable trust agreement for pensions or other employees' benefits shall not be included in this or any other account.

CURRENT AND ACCRUED ASSETS

120. Cash

This account shall include the utility's current cash funds except working funds. (See account 122, Working Funds.)

121. Special Deposits

There shall be reported by this caption the amounts included in accounts 121.1, 121.2 and 121.3.

121.1. Interest Special Deposits

Special deposits with fiscal agents or others for the payment of interest shall be charged to this account. When interest is paid from the deposits, the amount shall be credited to this account and charged to the appropriate interest account.

121.2. Dividend Special Deposits

Special deposits with fiscal agents and others for the payment of dividends on behalf of the utility shall be charged to this account. When dividends are paid from these deposits, the amount thereof shall be credited to this account and charged to the appropriate dividends payable account.

121.3. Miscellaneous Special Deposits

Special deposits with fiscal agents or others for special purposes other than the payment of interest and dividends shall be charged to this account. Such special deposits may include cash deposited with Federal, State, or municipal authorities as a guaranty for the fulfillment of obligations; cash deposited with trustees to be held until mortgaged property sold, destroyed, or otherwise disposed of is replaced; and also cash realized from the sale of the accounting utility's securities and deposited with trustees to be held until invested in property of the utility, etc. When the purposes of such deposits are satisfied and the deposits are released, this account shall be credited with the amount released. Entries to this account shall specify the purpose for which the deposit is made.

Note A: The foregoing special deposit accounts shall not include any assets available for general purposes.

Note B: Deposits for more than one year not offset by current

liabilities shall not be charged to this account but to account 112, Other Investments.

122. Working Funds

This account shall include cash advanced to officers, agents, employees, and others as petty cash or working funds.

123. Temporary Cash Investments

A. This account shall include the cost (except as otherwise provided) of investments, such as demand and time loans, bankers' acceptances, United States Treasury certificates, marketable securities, and other similar investments, acquired for the purpose of temporarily investing cash.

B. This account shall so be maintained as to show:

Temporary cash investments--associated companies.

Temporary cash investments--other.

Note: If any of the temporary investments are pledged, proper record of such pledged investments shall be kept.

124. Notes Receivable

This account shall include the cost (except as otherwise provided) of all collectible obligations in the form of notes receivable and similar evidences (except interest coupons) of money due on demand or within one year from the date of issue, which are not includible in other accounts.

Note A: This account shall not include notes receivable from associated companies. (See account 126.1, notes receivable from associated companies.)

Note B: The amount of notes receivable discounted, sold or transferred, unless transferred without recourse, shall not be credited to this account but to account 221, notes receivable discounted.

125. Accounts 125.1 and 125.2.

There shall be reported by this caption the balances in accounts 125.1 and 125.2.

125.1. Accounts Receivable--Customers

A. This account shall include amounts due from customers for utility services, including merchandising, jobbing and contract work. This account shall not include amounts due from associated companies.

125.2. Other Accounts Receivable

A. This account shall include amounts owing the utility upon accounts with concerns or individuals, other than associated companies and customers for utility services and for merchandising, jobbing and contract work.

B. This account shall be maintained in such manner as to show separately the amounts due from officers and employees, but the account

shall not include amounts advanced to officers or others as working funds. (See account 122, Working Funds.)

126. Receivables from Associated Companies

A. This account shall include the debit balances subject to current settlement in open accounts with associated companies, and notes and drafts upon which associated companies are liable, and which mature and are expected to be paid in full not later than one year from date of issuance, together with interest thereon. Items which do not bear a specified due date but which have been carried for more than ninety days and items which are not paid within 90 days from due date shall be transferred to account 111, Investments in Associated Companies.

B. This account shall be subdivided as follows:

126.1 Notes Receivable from Associated Companies.

126.2 Accounts Receivable from Associated Companies.

Note A: On the balance sheet, accounts receivable from an associated company may be set-off against accounts payable to the same company.

Note B: The face amount of notes receivable discounted or sold without releasing the utility from liability as endorser thereon, shall not be credited to this account, but to account 221, Notes Receivable Discounted.

127. Subscriptions to Capital Stock

A. This account shall include the balance due from subscribers upon legally enforceable subscriptions to capital stock of the utility.

B. The amount of each subscription shall be charged to this account at the time the subscription is accepted, and concurrently there shall be credited to account 204, Capital Stock Subscribed, the par value of stock with par value subscribed for. The difference, if any, between the above amounts shall be debited or credited, as appropriate, to account 150, Discount on Capital Stock, or account 203, Premiums and Assessments on Capital Stock. For non-par stock the entire subscription price shall be credited to account 204, Capital Stock Subscribed.

Note: The records supporting the entries to this account shall be kept so that the corporation can furnish the name and address of each subscriber, the amount and kind of capital stock subscribed, the date of subscription, the date that each payment is due and the date that each is paid, the nature of each payment (whether cash or other consideration), and any other information that is necessary to make the history of the subscription complete.

128. Interest and Dividends Receivable

This account shall include the amount of interest on bonds, mortgages, notes, commercial paper, loans, open accounts, deposits, etc., and the

amount of dividends receivable on stocks owned.

Note A: Interest and dividends receivable from associated companies shall be included in account 126.2, Accounts Receivable from Associated Companies.

Note B: Interest which is not subject to current settlement shall be included in the account in which is carried the principal on which the interest is accrued.

Note C: No interest or dividends on securities issued or assumed by the utility shall be included in this account.

129. Rents Receivable

This account shall include rents receivable or accrued on property rented or leased by the utility to others.

Note: Rents receivable from associated companies shall be included in account 126.2, Accounts Receivable from Associated Companies.

130. Accrued Utility Revenues

This account may include the estimated amount accrued to the utility for service rendered, but not billed, as of the end of any accounting period. (The use of this account is optional.)

Note: In case the utility accrues, unbilled revenues, it shall likewise accrue unbilled expenses, such as for the purchase of steam.

131. Materials and Supplies

A. This account shall include the cost of unissued small tools and unapplied materials and supplies (including fuel). The cost shall include, when practicable, the purchase price at the point of free delivery, plus customs duties, excise and other taxes on purchases, insurance, costs of inspection, special tests prior to acceptance, loading and unloading, transportation, and other directly assignable charges.

B. Inward transportation charges for materials as far as practicable shall be included as a part of the cost of the particular materials to which they relate. When not so included, they shall be charged to account 902, Stores Expenses-Clearing.

C. Cash or other discounts on materials shall be deducted, when practicable, in determining the cost of the particular material, or credited to the account to which the material is charged. Discounts which are not so handled shall be credited to account 902, Stores Expenses--Clearing.

D. Materials recovered in connection with construction, maintenance, or the retirement of property shall be charged to this account as follows:

(1) Reusable materials consisting of large individual items shall be

included in this account at original cost of material only, as defined in paragraphs A to C hereof, including transportation to point of original receipt, estimated if not known. The cost of repairing such items shall be charged to the maintenance account appropriate for the previous use. (See also steam plant instruction, § 463.4, subd. (a) (5).)

(2) Reusable materials consisting of relatively small items, the identity of which (from the date of original installation to the final abandonment or sale thereof) cannot be ascertained without undue refinement in accounting shall be included in this account of current prices new for such items. The cost of repairing such items shall be charged to the appropriate expense account as indicated by previous use.

(3) Scrap and nonusable materials included in this account shall be carried at the estimated net amount realizable therefrom. The difference between the amounts realized for scrap and nonusable materials sold and the net amount at which the materials were carried in this account, as far as practicable, shall be adjusted to the accounts credited when the materials were charged to this account.

E. Inventories of materials, supplies, fuel, etc., shall be taken at least annually and the necessary adjustments shall be made to bring this account into harmony with the actual inventories. In effecting the adjustments, large differences which can be assigned to important classes of materials shall be equitably adjusted among the accounts to which such classes of materials have been charged since the previous inventory. Other differences shall be equitably apportioned among the accounts to which materials have been charged, or included in account 902, Stores Expenses-Clearing.

Note A: Interest on material bills, the payment of which has been delayed, shall be charged to account 535, Other Interest Charges.

Note B: The records supporting this account shall be kept so as to show, so far as practicable, the book cost of materials and supplies for each utility service and the book cost of merchandise carried in stock for the purpose of sale. Appliances held under consignment shall not be included herein, but there shall be kept a memorandum account of such appliances either at cost or at selling price, to show the appliances in stock and appliances sold.

Note C: See also general instruction 461.12.

Note D: Customers' meters in stock or undergoing repairs shall not be included in this account, but in account 360.

132. Prepayments

This account shall include amounts representing prepayments of

insurance, rents, taxes, interest, and miscellaneous items, and shall be kept or supported in such manner as to disclose the amount of each class of prepayments. Entries shall be made each month transferring from this account to the appropriate accounts the portion of each prepayment which is applicable to that month.

133. Other Current and Accrued Assets

A. This account shall include current and accrued assets of the general nature defined in account 120 to 132, inclusive, but not properly includible in any of those accounts.

B. The records supporting the entries to this account shall be so kept as to show the nature of each class of assets included herein.

DEFERRED DEBITS

140. Unamortized Debt Discount and Expense

This caption shall include the total of the debit balances, of those accounts having debit balances, of the discount, expense, and premium accounts, for all classes of long-term debt. (See balance sheet instruction ÷ 462.6.)

141. Extraordinary Property Losses

A. This account shall include, when so authorized or directed by the commission, losses in service value of property abandoned or otherwise retired from service which are not provided for by the depreciation reserves and which could not reasonably have been foreseen and provided for. It shall include also, when so authorized or directed by the commission, extraordinary losses, such as unforeseen damages to property which could not reasonably have been anticipated and which are not covered by reserves or by insurance.

B. The entire loss in service value of utility plant retired shall be charged to the depreciation reserves. If all, or a portion, of the loss in service value is to be included in this account, the depreciation reserve shall then be credited and this account charged with the amount properly chargeable hereto.

C. This account shall be so maintained that convenient itemization may be made of all amounts included herein.

D. Before making any entries in this account, the utility shall obtain the approval of the commission. Application for permission to use the account shall be accompanied by a statement or statements giving a complete explanation of the nature and cause of the property loss together with a description of the property, its location, the original cost thereof, classified in accordance with the prescribed steam plant accounts, the cost to the utility, the amount at which the property is retired or to be retired, the amount, if any, chargeable to the

depreciation reserves (showing cost thus chargeable, salvage, and cost of removal) the amount it is proposed to include in this account, the period over which and the accounts to which it is proposed to write off the loss, and a copy of any statement or statements made or planned to be made to a trustee under a mortgage or other indenture with respect to the property.

142. Preliminary Survey and Investigation Charges

A. This account shall be charged with all expenditures for preliminary surveys, plans, investigations, etc., made for the purpose of determining the feasibility of projects under contemplation. If construction results, this account shall be credited and the appropriate property account charged. If the work is abandoned, the charge shall be to account 538, Miscellaneous Income Deductions, or account 414, Miscellaneous Debits to Surplus, unless otherwise authorized or directed by the commission. (See also general instruction 461.15.)

B. The records supporting the entries to this account shall be so kept that the utility can furnish complete information as to the nature and the purpose of the survey, plans or investigations, and the nature and respective amounts of the charges.

Note: The amount of preliminary survey and investigation charges transferred to steam plant shall not exceed the expenditures which may reasonably be determined to contribute directly and immediately and without duplication to steam plant.

143. Clearing Accounts

This caption shall include undistributed balances in clearing accounts (see accounts 902 to 907) at the date of the balance sheet. Balances in clearing accounts shall be substantially cleared not later than the end of the calendar year unless items held therein relate to a future period.

144. Retirement Work in Progress

This account shall include the total of the balances of work orders for the retirement of utility plant. The amount credited to steam plant shall be charged to this account at the date the property is retired from steam service, and the cost of removal shall be charged to the account as incurred. Credits for salvage and insurance recovered shall be made to this account. Each work order applicable to steam plant shall be closed to account 250, Reserve for Depreciation of Steam Plant, upon completion of the removal, in such a manner as to record separately in the reserve the original cost of plant retired, the cost of removal, and the salvage or insurance recovered.

145. Other Work in Progress

This account shall include the total of the balances in open work or job orders for work in progress, other than that covered by accounts 103, Construction Work in Progress, 108, Other Utility Plant, 109.3, Common Utility Plant Construction Work in Progress, and 144, Retirement Work in Progress.

146. Other Deferred Debits

A. This account shall include all debits, not elsewhere provided for, the proper final disposition of which is uncertain, and unusual or extraordinary expenses, not included in other accounts, which are in process of amortization. (See also general instruction ÷ 461.14.)

B. The records supporting the entries to this account shall be so kept that the utility can furnish full information as to each deferred debits included herein.

CAPITAL STOCK DISCOUNT AND EXPENSE

150. Discount on Capital Stock

A. There shall be reported by this caption all balances in the accounts for discount on capital stock.

B. The accounts hereunder shall be kept in such manner as to show separately the discount on each class and series of capital stocks. (See balance sheet instruction ÷ 462.5.)

C. Amortization credits to this account shall be debited to account 414, Miscellaneous Debits to Surplus.

151. Capital Stock Expense

A. There shall be reported by this caption all balances in the accounts for expenses incurred in connection with the authorization, issuance and sale of capital stocks.

B. The accounts hereunder shall be kept in such manner as to show separately the expense on each class and series of capital stocks. (See balance sheet instruction ÷ 462.5.)

C. Amortization credits to this account shall be debited to account 414, Miscellaneous Debits to Surplus.

Note: There shall not be included in this account expenses in connection with the reacquisition of the utility's capital stock.

REACQUIRED SECURITIES

152. Reacquired Capital Stock

A. This account shall include the par value of capital stock actually issued by the utility and reacquired by it and not retired or canceled, except, however, stock which is held by trustees in sinking or other funds. Stock without par value shall be included in this account at the proportionate amount at which the particular class and series of stock is included in account 200, Common Capital Stock, or account 201,

Preferred Capital Stock.

B. The accounting for amounts paid for capital stock reacquired shall be as provided in paragraph e of balance sheet instruction section 462.5.

C. When reacquired capital stock is resold by the utility (see section 82 of Public Service Law) the par value (or amount included in this account for stock without par value) of the stock resold shall be credited to this account.

D. This account shall be maintained or supported in such manner as to show the amount herein applicable to each class and series of stock.

153. Reacquired Long-Term Debt

A. This account shall include the par or face value of bonds or other long-term debt actually issued or assumed by the utility and reacquired by it and held under conditions which do not permit the utility to treat such securities as paid, retired, or canceled, but which permit the resale of the securities. (See section 82 of Public Service Law.) It shall not include securities which are held by trustees in sinking or other funds.

B. When the securities are reacquired, the difference between the par or face value and the amount paid upon reacquisition, and any unamortized discount, expense or premium, shall be accounted for in accordance with balance sheet instruction section 462.6.

C. This account shall be maintained or supported in such manner as to show the amount herein applicable to each class and series of long-term debt.

LIABILITIES AND OTHER CREDITS

CAPITAL STOCK

200. Common Capital Stock

201. Preferred Capital Stock

A. These accounts shall include the par value of capital stock with par value and the cash value of the consideration received for non-par stock, of each class of capital stock actually issued and actually outstanding, and also the capital stock in account 152, Reacquired Capital Stock.

B. When the actual cash value of the consideration received is more or less than the par value of any stock having par value, the difference shall be credited or debited, as the case may be, to the discount or premium account for the particular class and series.

C. When capital stock is retired and canceled, these accounts shall be charged with the amount at which such stock is carried herein.

D. A separate ledger account, with a descriptive title, shall be

maintained for each class and series of stock. The supporting records shall show the shares nominally issued, actually issued and nominally outstanding.

Note A: When a levy or assessment, except a call for payment on subscriptions, is made against holders of capital stock, the amount collected upon such levy or assessment on capital stock with par value shall be credited to account 203, Premiums and Assessments on Capital Stock, and a levy or assessment on capital stock without par value shall be included in this account.

Note B: No entries, other than those covered by the above provision and those to record liquidating dividends, shall be made in any account for non-par stocks, except upon order of the commission.

Note C: When the amount at which a given class of stock is recorded in an account for either par or non-par stock is either increased or decreased to reflect any transaction other than the routine issuance or retirement of individual shares of such stock, the utility shall within 10 days thereof submit to this commission, with full supporting details, a copy of the entry whereby such increase or decrease was effected.

202. Stock Liability for Conversion

A. This account shall include the par value of capital stock with par value and the cash value of the consideration for non-par stock which the utility has agreed to exchange for outstanding securities of other companies in connection with the acquisition of properties of such companies under terms which allow the holders of the securities of the other companies to surrender such securities and receive in return therefor capital stock of the accounting utility.

B. When the securities of the other companies have been surrendered, this account shall be charged and account 200, Common Capital Stock, or account 201, Preferred Capital Stock, as the case may be, shall be credited.

C. The records shall be so kept as to show separately the stocks of different classes and series for which liability may exist.

203. Premiums and Assessments on Capital Stock

A. This account shall include the excess of actual cash value of the consideration received over the par value and accrued dividends, of par value stock issued, together with assessments against stockholders representing payments required in excess of par value.

B. A separate account shall be maintained for premiums and assessments on each class and series of stock.

C. When capital stock is reacquired or retired, the amount in this account with respect to the shares of such stock reacquired or retired

shall be debited hereto. (See balance sheet instruction ÷ 462.5.)

Note: Assessments on stock without par value shall be included in account 200 or account 201, as appropriate.

204. Capital Stock Subscribed

A. This account shall include the amount of legally enforceable subscriptions to capital stock of the utility. It shall be credited with the par value of capital stock with par value or with the subscription price, in the case of stock without par value, exclusive of accrued dividends, if any. Concurrently, a debit shall be made to account 127, Subscriptions to Capital Stock, for the agreed price; any discount or premium on capital stock with par value shall be debited or credited to the appropriate discount or premium account. When properly executed stock certificates have been issued representing the shares subscribed, this account shall be debited and account 200, Common Capital Stock, or account 201, Preferred Capital Stock, shall be credited with the par value of capital stock with par value, and with the consideration received for capital stock without par value.

B. The records shall be kept in such manner as to show the amount of subscriptions to each class and series of stock.

205. Installments Received on Capital Stock

A. This account shall include the amount of installments received on capital stock on a partial or instalment payment plan from subscribers who are not bound by a legally enforceable subscription contract.

B. As subscriptions are paid in full and certificates issued, this account shall be charged and account 200, Common Capital Stock, account 201, Preferred Capital Stock, or account 152, Reacquired Capital Stock, as appropriate, credited with the par value of such capital stock having par value, and with the consideration received for capital stock without par value. Any discount or premium on capital stock with par value shall be included in the appropriate discount or premium account.

C. The records shall be kept in such manner as to show the amount of installments received on each class and series of stock.

Note: The records supporting the entries to this account shall be kept so that the corporation can furnish the name and address of each subscriber, the amount and kind of capital stock subscribed, the date of subscription, the date that each payment is due and the date that each is paid, the nature of each payment (whether cash or other consideration), and any other information that is necessary to make the history of the subscription complete.

LONG-TERM DEBT

210. Bonds

A. This account shall include the face value of the actually issued and unmatured bonds, which have not been retired or canceled; also the face value of such bonds issued by others the payment of which has been assumed by the utility.

B. This account shall be so kept or supported as to show the face value of (1) nominally issued bonds, (2) nominally outstanding bonds and (3) actually outstanding bonds of each class and series.

Note A: For instructions relative to accounting for discount, expense, and premium on long-term debt, see balance sheet instruction section 462.6.

Note B: Matured long-term debt shall be included in account 225, Mature Long-term Debt.

211. Receivers' Certificates

A. This account shall include the face value of certificates of indebtedness issued by receivers in possession of the property and acting under the orders of a court.

B. A separate subdivision shall be maintained for each issue of receivers' certificates.

Note: Matured receivers' certificates shall be included in account 225, Matured Long-term Debt.

213. Miscellaneous Long-Term Debt

A. This account shall include until maturity, all long-term debt not otherwise provided for. This covers such items as real estate mortgages, executed or assumed, assessments for public improvements, notes and unsecured certificates of indebtedness not owned by associated companies, receipts outstanding for long-term debt, and other obligations maturing more than one year from date of issue or assumption. (See balance sheet instruction ò 462.3.)

B. Separate accounts shall be maintained for each class of obligation, and records shall be maintained to show separately for each class all details as to date of obligation, date of maturity, interest dates and rates, security for the obligation, etc.

Note: Matured long-term debt shall be included in account 225, Matured Long-term Debt.

ADVANCES FROM ASSOCIATED COMPANIES

215. Advances From Associated Companies

A. This account shall include the face value of notes owed to associated companies and the amount of open book accounts representing advances from associated companies, not subject to current settlement, including interest thereon when such interest is not subject to current settlement. (See general instruction ò 461.8.)

B. This account shall be subdivided as follows:

215.1 Advances on Notes.

215.2 Advances on Open Accounts.

Note A: The records supporting the entries to this account shall be so kept that the utility can furnish complete information concerning each note and open account.

Note B: Notes and open accounts representing indebtedness subject to current settlement shall be included in account 223, Payables to Associated Companies.

CURRENT AND ACCRUED LIABILITIES

220. Notes Payable

This account shall include the face value of all notes, drafts, acceptances, or other similar evidences of indebtedness to other than associated companies, payable on demand or which by their terms are payable within a time not exceeding one year from the date of issue.

(See balance sheet instruction ÷ 462.3.)

221. Notes Receivable Discounted

This account shall include the face value of notes receivable discounted or sold without releasing the utility from liability as endorser thereon.

222. Accounts Payable

This account shall include all amounts payable by the utility within one year, and which are not provided for in other accounts.

223. Payables to Associated Companies

This account shall include amounts owed to associated companies on notes, drafts, acceptances or other similar evidences of indebtedness and open accounts payable on demand or not more than one year from date of issue or creation. (See general instruction ÷ 461.8). This account shall be subdivided as follows:

223.1 Notes Payable to Associated Companies.

223.2 Accounts Payable to Associated Companies.

Note A: Exclude from this account notes and accounts which are includible in account 215, Advances from Associated Companies.

Note B: Interest on debt to associated companies which is not subject to current settlement shall be included in the account wherein is carried the debt on which it accrues; if subject to current settlement it shall be included in subdivision 223.2 of this account.

224. Dividends Declared

This account shall include the amount of dividends which have been declared but not paid. Dividends shall be credited to this account when they become a liability.

225. Matured Long-term Debt

This account shall include the amount of long-term debt (including any obligation for premiums) matured and unpaid, without specific agreement for extension of the time of payment; it shall also include bonds called for redemption but not presented.

226. Matured Interest

This account shall include the amount of matured interest on long-term debt or other obligations of the utility at the date of the balance sheet, unless such interest is added to the principal of the debt on which incurred.

227. Customers' Deposits

This account shall include all amounts deposited with the utility by customers as security for the payment of bills.

228. Taxes Accrued

A. This account shall be credited during each accounting period with the amount of taxes accrued during the period, corresponding debits being made to the appropriate accounts for tax charges. Such credits may be based upon estimates, but from time to time during the year as the facts become known, the amount of the periodic credits shall be adjusted so as to include as nearly as can be determined in each year the taxes applicable thereto. Any amount representing a prepayment of taxes applicable to the period subsequent to the date of the balance sheet shall be shown under account 132, Prepayments.

B. The records supporting the entries to this account shall be so kept that the utility can furnish information as to the amount, by classes, of taxes accrued, the basis for each tax accrual and the accounts to which charged, and the amount, by classes, of taxes paid.

229. Interest Accrued

There shall be reported by this caption the balances included in accounts 229.1 and 229.2.

229.1 Interest Accrued on Long-term Debt

This account shall include the amount of interest accrued on the long-term debt of the utility. This account shall not include any interest which is added to the principal of the debt on which incurred.

229.2 Interest Accrued on Other Liabilities

This account shall include the amount of interest accrued on liabilities of the utility other than long-term liabilities. This account shall not include any interest which is added to the principal of the debt on which incurred.

Note: Interest accrued on debt to associated companies, which interest is subject to current settlement, shall be included in account 223.2,

Accounts Payable to Associated Companies.

230. Other Current and Accrued Liabilities

This account shall include the current and accrued liabilities not provided for elsewhere.

DEFERRED CREDITS

240. Unamortized Premium on Debt

This caption shall include the total of the credit balances of the discount, expense, and premium accounts, for all classes of long-term debt, including receivers' certificates. (See balance sheet instruction ÷ 462.6.)

241. Customers' Advances for Construction

A. This account shall include such advances by customers for construction as are to be refunded wholly or in part. When a customer is refunded the entire amount to which he is entitled according to the agreement or rule under which the advance was made, the balance, if any, remaining in this account shall be debited hereto and credited to the steam plant accounts to which the cost of the property was charged.

B. Separate subdivisions shall be kept for each utility service.

242. Other Deferred Credits

This account shall include advanced billings and receipts and other deferred credit items, not provided for elsewhere; also amounts which can not be entirely cleared or disposed of until additional information has been received or which should be credited to income or to surplus accounts in the future.

RESERVES

250. Reserve for Depreciation of Steam Plant.

A. This account shall be credited with the following:

(1) Amounts charged to account 503, Depreciation (except in connection with common utility plant), to account 508, Income from Steam Plant Leased to Others, or to clearing accounts or to income or other accounts for currently accruing depreciation of steam plant.

(2) Amounts charged to account 414, Miscellaneous Debits to Surplus, for past accrued depreciation of steam plant.

(3) Accrued depreciation upon steam properties acquired as operating units or systems (see steam plant instruction ÷ 463.3).

(4) Amounts chargeable upon approval of the commission to account 141, Extraordinary Property Losses.

B. This account shall be charged with the book cost (see ÷ 460.1 (a) (6)) of steam plant retired, except items in account 301, Organization, and the cost of removal, and shall be credited with the salvage value and any other amounts recovered, such as insurance. (See also account

144, Retirement Work in Progress.)

C. For balance sheet purposes, this account shall be regarded and treated as a single composite reserve. For purposes of analysis, however, each utility shall maintain records in which the depreciation reserve shall be segregated according to the primary steam plant accounts. The credits and debits to the reserve shall be so made as to show separately for each primary steam plant account (1) the amount of the accrual for depreciation, (2) the original cost of property retired, (3) cost of removal, (4) salvage, and (5) other items, including recoveries from insurance. (See also general instruction ð 461.12.)

D. When transfers of property are made from one utility plant account to another or from or to non-utility property, the accounting shall be as provided in steam plant instruction ð 463.13.

E. This account shall be subdivided as follows:

250.1 Reserve for Depreciation of Steam Plant in Service.

250.2 Reserve for Depreciation of Steam Plant Leased to Others.

250.3 Reserve for Depreciation of Steam Plant Held for Future Use.

250.4 Reserve for Depreciation of Unclassified Steam Plant.

Note: The utility is restricted in its use of the reserve to the purposes set forth above. It shall not divert any portion of the reserve to surplus or make any other use thereof without the approval of the commission.

252. Reserve for Amortization of Steam Plant Acquisition Adjustments

This account shall be credited or debited with amounts which are charged or credited to account 505, Amortization of Steam Plant Acquisition Adjustments, to account 537, Miscellaneous Amortization, or to surplus, for the purpose of providing for the extinguishment of amounts in account 105, Steam Plant Acquisition Adjustments.

253.1 Reserve for Depreciation and Amortization of Other Utility Plant

This account shall include the depreciation and amortization reserves applicable to property in account 108, Other Utility Plant.

Note: In the case of utility services for which systems of accounts are prescribed by this commission, such as electric, gas, etc., the appropriate accounts in such systems shall be used instead of this account.

253.2 Reserve for Depreciation and Amortization of Common Utility Plant

This account shall include the depreciation and amortization reserves applicable to property carried in accounts 109.1, 109.2, 109.4, 109.5, and 109.6, subdivided so as to show separately the amounts applicable to each primary plant account. (See also general instruction ð 461.12.)

253.3 Reserve for Depreciation and Amortization of Other Property

A. This account shall include the depreciation and amortization reserves applicable to property not otherwise specifically provided for, including that carried in account 110, Other Physical Property.

B. This account shall be maintained so as to show the amount of each separate reserve and the nature and amounts of the debits and credits thereto.

254. Reserve for Uncollectible Accounts

A. This account shall be credited each month with amounts reserved for losses on accounts receivable which may become uncollectible, and also with collections on accounts previously charged hereto. Concurrent charges shall be made to account 783, Uncollectible Accounts, for amounts applicable to steam operations, and to corresponding accounts for other operations.

B. This account shall be subdivided as follows:

254.1 Utility Customers.

254.3 Associated Companies.

254.4 Officers and Employees.

254.5 Other.

Note: Accretions to this reserve shall not be made in excess of a reasonable provision against losses of the character provided for.

255. Insurance Reserve

A. This account shall include amounts reserved by the utility for self-insurance against losses through accident, fire, flood, or other hazards to its own property or property leased from others. The amounts charged to account 798, Insurance, or other appropriate accounts to cover such risks shall be credited to this account. A schedule of risks covered by this reserve shall be maintained, giving a description of the property involved, the character of the risks covered and the rates used.

B. Charges shall be made to this account for losses covered by self-insurance.

Note A: Accretions to this reserve shall not be made in excess of a reasonable provision against losses of the character provided for.

Note B: All repairs shall be charged in the first instance to the account appropriate for the repair, and all retirements shall be charged to depreciation reserves, to which accounts shall be credited amounts chargeable to this account.

256. Injuries and Damages Reserve

A. This account shall be credited with amounts charged to account 799, Injuries and Damages, or other appropriate accounts, to meet the

probable liability, not covered by insurance, for deaths or injuries to employees and others, and for damages to property not owned or held under lease by the utility.

B. When liability for any injury or damage is admitted by the utility either voluntarily or because of the decision of a court or other lawful authority, such as a workmen's compensation board, the admitted liability shall be charged to this account and credited to the appropriate liability account.

Note A: Recoveries or reimbursements for losses charged to this account shall be credited hereto; the cost of repairs to property of others if provided for herein, shall be charged to this account.

Note B: Accretions to this reserve shall not be made in excess of a reasonable provision against losses of the character provided for.

257. Employees' Provident Reserve

A. This account shall include provision which has been made by charges to operating expense or other accounts, or by specific appropriations of income or surplus, and by amounts contributed by employees (whether carried in special funds or in general funds of the utility) for pensions, accident or death benefits, savings, relief, hospital, and other provident purposes.

B. This account shall be charged with payments for which provision has been made in accordance with paragraph A.

C. Separate accounts shall be kept for each kind of reservation included herein.

Note: Amounts paid into a trust fund irrevocably devoted to the payment of pensions or other employees' benefits shall not be included in this or any other account.

258. Other Reserves

A. This account shall include all reserves maintained by the utility and which are not provided for elsewhere in this system of accounts.

B. This account shall be maintained in such manner as to show the amount of each separate reserve and the nature and amounts of the debits and credits thereto.

CONTRIBUTIONS IN AID OF CONSTRUCTION

265. Contributions in Aid of Construction

A. This account shall include those contributions for construction purposes made prior to January 1, 1945 in cash, services or property by States, municipalities or other governmental agencies, individuals and others which have not been transferred to other accounts. (See steam plant instruction 463.3.)

B. Amounts in this account at December 31, 1944 which can be

identified with steam plant accounts or can be distributed to steam plant accounts under a plan approved by the commission shall be transferred to the appropriate accounts; otherwise the amounts remain in this account. Except as provided herein and in steam plant instruction, section 463.11 subdivision (f) in the case of steam plant sold, amounts in this account shall not be transferred to any other account without the approval of the commission.

C. The records supporting the entries to this account shall be so kept that the utility can furnish information as to the purpose of each contribution, the conditions, if any, upon which it was made and the amount of contributions from (a) States, (b) municipalities, (c) customers and (d) others.

D. This account shall be subdivided according to departments (steam, electric, gas, etc.) of the utility.

SURPLUS

270. Unearned Surplus

A. This account shall include all surplus not classified herein as earned surplus. It shall include surplus arising from the acquisition of the utility's capital stock, from donations by stockholders, from a reduction of the par or stated value of the utility's capital stock, and from the forgiveness of debt of the utility except when the circumstances under which such debt was created indicate that its forgiveness is an adjustment of earned surplus and the commission has approved its inclusion in earned surplus.

B. This account shall be maintained in such manner as to permit a ready analysis of the charges and credits hereto.

Note: This account includes items often termed capital surplus.

271. Earned Surplus

This account shall include the balance, either debit or credit, of unappropriated surplus arising from earnings. It shall not include surplus includible in account 270, Unearned Surplus.

LIST OF PRIMARY STEAM PLANT ACCOUNTS

I. INTANGIBLE PLANT

- 301. Organization
- 302. Franchises and Consents
- 303. Miscellaneous Intangible Plant

II. PRODUCTION PLANT

- 310. Land and Land Rights
- 311. Structures and Improvements
- 312. Boiler Plant Equipment
- 315. Accessory Power Equipment

316. Miscellaneous Station Equipment

III. DISTRIBUTION PLANT

350. Land and Land Rights

351. Structures and Improvements

353. Mains

359. Services

360. Meters

361. Accessory Equipment on Customers' Premises

362. Installation of Meters and Accessory Equipment

IV. GENERAL PLANT

370. Land and Land Rights

371. Structures and Improvements

372. Office Furniture and Equipment

373. Transportation Equipment

374. Stores Equipment

375. Shop Equipment

376. Laboratory Equipment

377. Tools and Work Equipment

378. Communication Equipment

379. Miscellaneous Equipment

390. Other Tangible Property

I. INTANGIBLE PLANT

301. Organization

This account shall include fees paid to Federal or State governments for the privilege of incorporation and expenditures for organizing the corporation, partnership or other enterprise and putting it into readiness to do business.

ITEMS

1. Cost of obtaining certificates authorizing an enterprise to engage in the public utility business.

2. Fees and expenses for incorporation.

3. Fees and expenses for mergers or consolidations.

4. Office expenses incident to organizing the utility.

5. Stock and minute books and corporate seal.

Note A: This account shall not include any discounts upon securities issued or assumed; nor shall it include any costs incident to negotiating loans, selling bonds or other evidences of debt, or expenses in connection with the authorization, issuance, or sale of capital stock.

Note B: Exclude from this account and include in the appropriate expense account the cost of preparing and filing papers in connection

with the extension of the term of incorporation unless the first organization costs have been written off. Amounts previously carried on the books of predecessor corporations shall not be included in this account.

302. Franchises and Consents

A. This account shall include amounts paid to the Federal government, to a State or to a political subdivision thereof in consideration for franchises, consents, or certificates running in perpetuity or for a specified term of more than one year, together with necessary and reasonable expenses incident to procuring such franchises, consents, or certificates of permission or approval.

B. If a franchise, consent, or certificate is acquired by assignment, the charge to this account in respect thereof shall not exceed the amount paid therefor by the utility to the assignor, nor shall it exceed the amount paid by the original grantee, plus the expense of acquisition to such grantee. Any excess of the amount actually paid by the utility over the amount above specified shall be charged to account 414, Miscellaneous Debits to Surplus.

C. When any franchise has expired, the book cost thereof shall be credited hereto.

D. This account shall be maintained in such a manner as to show separately the amounts included for perpetual franchises and for limited-term franchises.

Note: Annual or other periodic payments under franchises shall not be included herein but in the appropriate operating expense account.

303. Miscellaneous Intangible Plant

A. This account shall include the cost of patent rights, licenses, privileges, and other intangible property necessary or valuable in the conduct of the utility's steam operations and not specifically chargeable to any other account.

B. When any item included in this account is retired or expires, the book cost thereof shall be credited hereto.

C. This account shall be maintained in such a manner that the utility can furnish full information with respect to the amounts included herein.

II. PRODUCTION PLANT

310. Land and Land Rights

This account shall include the cost of land and land rights used in connection with steam production. (See steam plant instruction ò 463.8.)

311. Structures and improvements

This account shall include the cost in place of structures and

improvements used in connection with steam production. (See steam plant instruction 463.9.)

312. Boiler Plant Equipment

This account shall include the cost installed of furnaces, boilers, fuel handling and preparation equipment, steam and feed water piping, boiler apparatus and accessories used in the production or conditioning of steam.

ITEMS

(1) Ash handling equipment, including hoppers, gates, cars, conveyors, hoists, sluicing equipment, including pumps and motors, sluicing water pipe and fittings, sluicing trenches and accessories, etc., except sluices which are a part of a building.

(2) Boiler feed system, including feed water heaters, evaporator condensers, heater drain pumps, heater drainers, deaerators, and vent condensers, boiler feed pumps, surge tanks, feed water regulators, feed water measuring equipment, and all associated drives.

(3) Boiler plant cranes and hoists and associated drives.

(4) Boilers and equipment, including boilers and baffles, economizers, super heaters, soot blowers, foundations and settings, water walls, arches, grates, insulation, blow down system, drying out of new boilers, also associated motors or other power equipment.

(5) Breeching and accessories, including breeching, dampers, soot spouts, hoppers and gates, cinder eliminators, breeching insulation, soot blowers and associated motors.

(6) Coal handling and storage equipment, including coal towers, coal lorries, coal cars, locomotives and tracks when devoted principally to the transportation of coal, hoppers, downtakes, unloading and hoisting equipment, skip hoists and conveyors, weighing equipment, magnetic separators, cable ways, housings and supports for coal handling equipment.

(7) Draft equipment, including air preheaters and accessories, induced and forced draft fans, air ducts, combustion control mechanisms, and associated motors or other power equipment.

(8) Gas burning equipment, including holders, burner equipment and piping, control equipment, etc.

(9) Instruments and devices, including all measuring, indicating and recording equipment for boiler plant service together with mountings and supports.

(10) Lighting systems (not chargeable to structures).

(11) Oil burning equipment, including tanks, heaters, pumps with drive, burner equipment and piping, control equipment, etc.

(12) Pulverized fuel equipment, including pulverizers, accessory motors, primary air fans, cyclones and ducts, dryers, pulverized fuel bins, pulverized fuel conveyors and equipment, burners, burner piping, priming equipment, air compressors, motors, etc.

(13) Stacks, including foundations and supports, stack steel and ladders, stack brick work, stack concrete, stack lining, stack painting (first), when set on separate foundations, independent of substructure or superstructure of building.

(14) Station piping, including pipe, valves, fittings, separators, traps, de-superheaters, hangers, excavation, covering, etc., for station piping system, including all steam, condensate, boiler feed and water supply piping, etc., except building plumbing or heating.

(15) Stoker or equivalent feeding equipment, including stokers and accessory motors, clinker grinders, fans and motors, etc.

(16) Ventilating equipment.

(17) Water purification equipment, including softeners and accessories, evaporators and accessories, heat exchangers, filters, tanks for filtered or softened water, pumps, motors, etc.

(18) Water supply systems, including pumps, motors, strainers, raw water storage tanks, boiler wash pumps, intake and discharge pipes and tunnels not a part of a building.

(19) Wood fuel equipment, including hoppers, fuel hogs and accessories, elevators and conveyors, bins and gates, spouts, measuring equipment and associated drives.

Note A: When the system for supplying boiler water is elaborate, as when it includes a dam, reservoir, canal, pipe line, etc., or where gas or oil is used as a fuel for producing steam and is supplied through a pipe line system owned by the utility, the cost of such special facilities shall be charged to a subdivision of account 311, Structures and Improvements.

Note B: This account shall not include boilers or steam pipes whose primary purpose is the heating of structures, or equipment on customers' premises or on distribution mains used for conditioning steam.

315. Accessory Power Equipment

A. This account shall include the cost installed of equipment devoted to the production of power for the supply of auxiliaries and general station use.

B. Subdivisions shall be maintained hereunder for the cost of equipment used for each type of power produced.

ITEMS

(1) Batteries, for control and general station use.

- (2) Belts, pulleys, hangers, shafts and countershafts.
- (3) Cables between generators and switchboards.
- (4) Compartments, including buses, connections, and items permanently attached.
- (5) Condensers, including condensate pumps, air and vacuum pumps, ejectors, unloading valves, and vacuum breakers.
- (6) Foundations and settings specially constructed for and not expected to outlast the apparatus for which provided.
- (7) Generators, including driving units (engines, turbines, and internal combustion engines).
- (8) Lubricating systems, including filters, tanks, pumps, and piping.
- (9) Motor generators, frequency changers, and rotary converters.
- (10) Overhead lines.
- (11) Piping, applicable to apparatus listed herein.
- (12) Platforms, railings, steps, gratings, etc., appurtenant to apparatus listed herein.
- (13) Protective equipment, including lighting arresters, relays, circuit breakers, switches, reactors, etc.
- (14) Steelwork, specially constructed for apparatus listed herein.
- (15) Switchboards, including frames, panels, control wiring, and instruments.
- (16) Switching equipment, including oil circuit breakers, disconnecting switches, and connections.
- (17) Test equipment, including apparatus permanently attached.
- (18) Transformers.
- (19) Tunnels, intake and discharge, when not constructed as part of the structure.
- (20) Underground conduits and cable.
- (21) Ventilating equipment, including items wholly identified with apparatus listed herein.

316. Miscellaneous Station Equipment

This account shall include the cost installed of miscellaneous equipment in and about the steam production plant devoted to general station use, and which is not properly includible in any of the foregoing steam production accounts.

ITEMS

- (1) Compressed air and vacuum cleaning systems, including tanks, compressors, exhausters, air filters, piping, etc.
- (2) Cranes and hoisting equipment, including cranes, cars, crane rails, monorails, hoists, etc., with electric and mechanical connections.

- (3) Fire extinguishing equipment for general station use.
- (4) Foundations and settings, specially constructed for and not expected to outlast the apparatus for which provided.
- (5) Locomotive cranes not includible elsewhere.
- (6) Locomotives not includible elsewhere.
- (7) Marine equipment, including boats, barges, etc.
- (8) Miscellaneous belts, pulleys, countershafts, etc.
- (9) Miscellaneous equipment, including atmospheric and weather indicating devices, intra-site communication equipment, laboratory equipment, signal systems, telephones, emergency whistles and sirens, fire alarms, and other similar equipment.
- (10) Railway cars not includible elsewhere.
- (11) Refrigerating systems, including compressors, pumps, cooling coils, etc.
- (12) Station maintenance equipment, including lathes, shapers, planers, drill presses, hydraulic presses, grinders, etc., with motors, shafting, hangers, pulleys, etc.
- (13) Ventilating equipment, including items wholly identified with apparatus listed herein.

Note A: When an item of equipment listed herein is used wholly in connection with equipment included in another account its cost shall be included in such other account.

Note B: Include office furniture and equipment, desks, chairs, etc., in account 372, Office Furniture and Equipment.

III. DISTRIBUTION PLANT

350. Land and Land Rights

This account shall include the cost of land and land rights used in connection with distribution operations. (See steam plant instruction ÷ 463.8.)

351. Structures and improvements

This account shall include the cost in place of structures and improvements used in connection with distribution operations. (See steam plant instruction ÷ 463.9.)

353. Mains

A. This account shall include the cost installed of mains and housing used in the distribution of steam and also of any regulating and measuring equipment located on distribution mains.

B. The record supporting this account shall be so kept as to show separately the cost of mains of different sizes and types and of each tunnel, bridge, or river crossing.

ITEMS

- (1) Anchor fittings.
- (2) Conditioning equipment-desuperheaters, separators, etc. (not located at source of supply).
- (3) Cooling coils on distribution mains.
- (4) Drains.
- (5) Eductors.
- (6) Ejectors.
- (7) Excavation, including shoring, bracing, bridging, pumping, backfill, and disposal of excess excavated material.
- (8) Expansion joints.
- (9) Fillers.
- (10) Foundations and vaults for items listed herein.
- (11) Governors or regulators for pressure, etc., in mains.
- (12) Housing and insulation.
- (13) Manholes.
- (14) Meters located on mains.
- (15) Moisture and temperature indicators and other recording devices on distribution mains.
- (16) Municipal inspection.
- (17) Pavement disturbed, including cutting and replacing pavement, pavement base, and sidewalks.
- (18) Permits.
- (19) Pipe, fittings and valves.
- (20) Pipe laying.
- (21) Protection of street openings.
- (22) Pumps, electric and steam.
- (23) Removal and relocation of subsurface obstructions.
- (24) Rollers and saddles.
- (25) Sewer connections.
- (26) Sumps.
- (27) Traps.
- (28) Valves and valve pits.
- (29) Variators.
- (30) Ventilating chambers and vents.

Note A: The cost of replacing pavement, pavement base, and sidewalks shall be included in a separate subdivision of this account. (See steam plant instruction 463.11, subd. (i).)

Note B: When steam mains and associated devices are raised or lowered or other change in their location is made, the cost of the work shall be charged to the maintenance account appropriate for the class of property which is moved. Incidental replacement of retirement units in connection

with a change in location shall be accounted for as additions and retirements.

A. This account shall include the cost installed of service pipes, insulation, housing and other equipment, from the point at which the main is tapped to and including the first fitting or valve inside of the building wall, when the utility actually incurs such cost for which it has not been reimbursed.

* No B.

C. Services which have been used but have become inactive and for which there is no prospect of reuse shall be retired. Utilities shall establish a routine whereby accuracy of accounting for services will be checked for the entire territory within each five-year period.

D. When a service previously retired in accordance with paragraph C is reused, the retirement entry shall be reversed.

ITEMS

- (1) Curb valves and curb boxes.
- (2) Excavation, including shoring, bracing, bridging, pumping, backfill, and disposal of excess excavated material.
- (3) Municipal inspection.
- (4) Pavement disturbed, including cutting and replacing pavement, pavement base, and sidewalks.
- (5) Permits.
- (6) Pipe and fittings, including saddle, tee, etc.
- (7) Pipe insulation, housing, etc.
- (8) Pipe laying.
- (9) Protection of street openings.
- (10) Stuffing boxes.
- (11) Separators.

Note B: The cost of replacing pavement, pavement base, and sidewalks shall be included in a separate subdivision of this account. (See steam plant instruction § 463.11 subd. (i).)

Note C: When steam services and associated devices are raised or lowered or other change in their location is made, the cost of the work shall be charged to the maintenance account appropriate for the class of property which is moved. Incidental replacement of retirement units in connection with a change in location shall be accounted for as additions and retirements.

360. Meters

A. This account shall include the cost of meters, or devices and appurtenances thereto, for use in measuring the quantity of steam delivered to its users, whether actually in service or held in reserve.

B. When a meter is permanently retired from service, the amount at which it is included herein shall be credited to this account.

ITEMS

- (1) Meters-flow or condensation.
- (2) Recorders.
- (3) Registers.
- (4) Strainers.
- (5) Testing and badging new meter.

Note A: This account shall not include meters for recording the output of a steam production plant, meters on the distribution mains, etc. It includes only those meters used to record the steam delivered to customers, including company use.

Note B: The utility shall maintain a statistical record to show separately the number of each type and size of meter or group of types and sizes as carried in the continuing property record. Underlying records shall be kept so that the utility can determine readily for each such classification the number of meters in service (subdivided between active and inactive); and the number carried herein but not in service, the latter to include meters undergoing repairs.

Note C: Minor items shall be included in this account only when installed for service; otherwise they shall be carried in account 131, Materials and Supplies.

361. Accessory Equipment on Customers' Premises

This account shall include the cost of devices and appurtenances associated with meters and the cost of other equipment owned by the utility and installed on customers' premises which is not includible in other accounts.

ITEMS

- (1) Automatic outdoor control devices.
- (2) Bypasses.
- (3) Cooling coils.
- (4) Eliminators.
- (5) Equalizing arrangements.
- (6) Head pressure pipe arrangements.
- (7) Meter dummies.
- (8) Pre-heaters.
- (9) Separators (not installed in connection with services).
- (10) Service reducing pressure valves.
- (11) Service traps.
- (12) Service valves.
- (13) Steam service controls.

(14) Thermostatic controls.

(15) Traps (other than service).

Note A: Minor items shall be included in this account only when installed for service; otherwise they shall be carried in account 131, Materials and Supplies.

Note B: The cost of steam equipment on customers' premises leased to customers shall be carried in a separate subdivision of this account.

Note C: This account shall not include the cost of installation; see account 362, Installation of Meters and Accessory Equipment, and notes thereto.

362. Installation of Meters and Accessory Equipment

A. This account shall include the cost of labor employed, materials (except those chargeable to account 360 or 361) used and expenses incurred in connection with the first installation at a location of meters and accessory equipment included in account 360, Meters, or 361, Accessory Equipment on Customers' Premises.

B. When any metered service is discontinued and the meter removed and not immediately replaced, this account shall be credited with the installation cost if such cost is included herein.

Note A: The cost of removing and resetting meters shall be charged to account 762.1, Removing and Resetting Meters and Accessory Equipment.

Note B: Charges made to customers for connection, disconnection or reconnection of meters shall be credited to account 615, Miscellaneous Steam Revenues.

Note C: All installation costs (including minor items of material) for meters and accessory equipment includible in account 360, Meters, may be charged to account 762.1, Removing and Resetting Meters and Accessory Equipment.

IV. GENERAL PLANT

370. Land and Land Right*

A. This account shall include the cost of land and land rights used for steam plant purposes, the cost of which is not properly includible in other land and land rights accounts. (See steam plant instruction ÷ 463.8.)

* So in original. "Right" should be "Rights"

371. Structures and Improvements

A. This account shall include the cost in place of structures and improvements used for steam plant purposes, the cost of which is not properly includible in other structures and improvements accounts. (See steam plant instruction ÷ 463.9.)

372. Office Furniture and Equipment

A. This account shall include the cost installed of all office furniture and equipment owned by the utility and devoted to steam service, and not permanently attached to buildings. Articles of slight value or short service life acquired subsequent to the commencement of operations shall be charged to the appropriate operating expense account and not to this account. (See also note to steam plant instruction 463.4, subd. (a) (3).)

B. If the utility has equipment includible in this account at more than one location, separate records shall be maintained for each location.

ITEMS

- (1) Book cases and shelves.
- (2) Desks, chairs, and desk equipment.
- (3) Drafting room equipment.
- (4) Filing, storage, and other cabinets.
- (5) Floor covering.
- (6) Library and library equipment.
- (7) Mechanical office equipment such as accounting machines, typewriters, etc.
- (8) Safes.*

* So in original. "Safes" should be "a. Safes"

(8)b. Signs, display and advertising.

(9) Tables.

373. Transportation Equipment

A. This account shall include the cost of transportation and garage equipment when such equipment is not an integral part of the housing structure. (See also note to steam plant instruction 463.4, subd. (a) (3).) This account shall be subdivided as follows: 373.1. Vehicles, 373.2. Garage and repair equipment.

B. If the utility has garage equipment at more than one location, separate records shall be maintained for each location.

ITEMS

- (1) Airplanes and other aviation equipment.
- (2) Automobile repair shop equipment.
- (3) Automobiles.
- (4) Battery charging equipment.
- (5) Bicycles.
- (6) Drays.
- (7) Electric vehicles.
- (8) Gasoline and oil pumps (portable).
- (9) Gasoline storage tanks.

- (10) Greasing tools and equipment.
- (11) Horses, wagons, and harness.
- (12) Horseshoeing equipment.
- (12)a. Marine equipment.
- (13) Motor trucks.
- (14) Motorcycles.
- (15) Oil storage tanks.
- (16) Repair cars or trucks.
- (17) Tractors.
- (18) Trailers.
- (19) Trucks.
- (19)a. Tugs.
- (20) Other garage or stable equipment.

Note A: Office furniture and equipment shall be included in account 372, Office Furniture and Equipment.

Note B: Compressors, hoists, concrete mixers, etc., so mounted on a vehicle that they can be removed readily, thereby making the vehicle available for transportation of other material or equipment, shall be included in account 377, Tools and Work Equipment, and the vehicle shall be included in this account; minor incidental equipment, such as pumps for drying manholes or tool racks and boxes which interfere little with the use of the vehicle for other transportation, shall, together with the vehicle, be included in this account.

374. Stores Equipment

A. This account shall include the cost installed of equipment used for the receiving, shipping, handling and storage of materials and supplies when not an integral part of the housing structure. (See also note to steam plant instruction 463.4, subd. (a) (3).)

B. If the utility has equipment includible in this account at more than one location, separate records shall be maintained for each location.

ITEMS

- (1) Chain falls.
- (2) Counters.
- (3) Cranes (portable).
- (4) Elevating and stacking equipment (portable).
- (5) Hoists.
- (6) Lockers.
- (7) Scales.
- (8) Shelving.
- (9) Storage bins.

(10) Trucks, hand and power driven.

(11) Wheelbarrows.

375. Shop Equipment

A. This account shall include the cost installed of all equipment specially provided for general shops when such equipment is not an integral part of the housing structure. (See also note to steam plant instruction ÷ 463.4, subd. (a) (3).)

B. If the utility has equipment includible in this account at more than one location, separate records shall be maintained for each location.

ITEMS

(1) Anvils.

(2) Belts, shafts, and countershafts.

(3) Boilers.

(4) Cranes and Hoists.

(5) Drill presses.

(6) Electric equipment.

(7) Engines.

(8) Forges.

(9) Foundations and settings specially constructed for and not expected to outlast the apparatus for which provided.

(10) Furnaces.

(11) Gas producers.

(12) Lathes.

(13) Machine tools.

(14) Motor driven hand tools.

(15) Motors and engines.

(16) Pipe threading and cutting machines.

(17) Pneumatic tools.

(18) Smithing equipment.

(19) Tool racks.

(20) Vises.

(21) Work benches, etc.

Note: Office furniture and equipment shall be included in account 372, Office Furniture and Equipment.

376. Laboratory Equipment

A. This account shall include the cost installed of laboratory equipment used for general laboratory purposes and not specially provided for or includible in other departmental or functional plant accounts. (See also note to steam plant instruction ÷ 463.4, subd. (a) (3).)

B. If the utility has equipment includible in this account at more than one location, separate records shall be maintained for each location.

ITEMS

- (1) Balances and scales.
- (2) Barometers.
- (3) Calorimeters.
- (4) Condensers and supports.
- (5) Crushers and grinders.
- (6) Electric furnaces.
- (7) Gas analysis apparatus.
- (8) Gauges and gauge testers.
- (9) Glassware, heaters, burettes, etc.
- (10) Laboratory hoods, tables, and cabinets.
- (11) Manometers.
- (12) Piping.
- (13) Pyrometers.
- (14) Thermometers, indicating and recording.
- (15) Weighing tanks.
- (16) Other testing, laboratory or research equipment not provided for elsewhere.

Note: Office furniture and equipment shall be included in account 372, Office Furniture and Equipment.

377. Tools and Work Equipment

This account shall include the cost of tools, implements, and equipment used in construction or repair work exclusive of equipment includible in other equipment accounts. (See also note to steam plant instruction 463.4, subd. (a) (3).)

ITEMS

- (1) Air compressors, including driving unit and vehicle.
- (2) Boilers.
- (4) Concrete mixers and distributors.
- (5) Derricks.
- (6) Engines.
- (7) Forges.
- (8) Furnaces.
- (9) Hoists.
- (10) Ladders.
- (11) Lathes.
- (12) Motors.
- (13) Pile drivers.

- (14) Pipe machines.
- (14)a. Pneumatic tools.
- (15) Power saws.
- (16) Pumps.
- (17) Riveters.
- (17)a. Steam shovels.
- (17)b. Surveying and leveling equipment.
- (17)c. Tool carts.
- (18) Tool racks.
- (18)a. Trenching equipment.
- (19) Vises.
- (20) Work benches, etc.

Note: Compressors, hoists, concrete mixers, etc., so mounted on a vehicle that they can be removed readily, thereby becoming available for use independent of the vehicle, shall be included in this account and the vehicle shall be included in account 373, Transportation Equipment; compressors, hoists, etc., permanently attached to a vehicle so as to make it practically useless for transporting anything else, shall, together with the vehicle, be included in this account.

378. Communication Equipment

This account shall include the cost installed of telephone, telegraph and wireless equipment for general use in connection with the utility's steam operations and not specially provided for or includible in other departmental or functional plant accounts. (See also note to steam plant instruction 463.4, subd. (a) (3).)

ITEMS

- (1) Antennae.
- (2) Booths.
- (3) Cables.
- (4) Distributing boards.
- (5) Extension cords.
- (6) Gongs.
- (7) Hand sets, manual and dial.
- (8) Insulators.
- (9) Intercommunicating sets.
- (10) Loading coils.
- (11) Operators' desks.
- (12) Poles and fixtures used wholly for telephone or telegraph wire.
- (13) Radio transmitting and receiving sets.
- (14) Remote control lines.
- (15) Sending keys.

- (16) Storage batteries.
- (17) Switchboards.
- (18) Telautograph circuit connections.
- (19) Telegraph receiving sets.
- (20) Telephone and telegraph circuits.
- (21) Testing instruments.
- (22) Towers.
- (23) Underground conduit used wholly for telephone or telegraph wires and cable wires.

379. Miscellaneous Equipment

This account shall include the cost of equipment, apparatus, etc., used in the utility's steam operations, and which is not includible in any other account of this system of accounts. (See also note to steam plant instruction 463.4, subd. (a) (3).)

ITEMS.

- (1) Billiard tables, including equipment,
- (2) bowling alleys, including equipment,
- (3) hospital and infirmary equipment,
- (4) kitchen equipment,
- (5) miscellaneous recreation facilities and equipment,
- (6) radios,
- (7) restaurant equipment,
- (8) soda fountains,
- (9) operators' cottage furnishings,
- (10) other miscellaneous equipment.

Note: General equipment of the nature indicated above whenever practicable shall be assigned to the steam plant accounts on a functional basis. Thus, to illustrate, recreation equipment at production station for the benefit of the station employees shall be included in account 316, Miscellaneous Station Equipment.

390. Other Tangible Property

A. This account shall include the cost of tangible steam plant not provided for elsewhere.

B. A separate subdivision of this account shall be maintained for each class of property in which the utility has a relatively large investment, and records shall be kept so as to show separately the cost of each major item.

EARNED SURPLUS ACCOUNTS

CREDITS

400. Credit Balance Transferred from Income Account

401. Miscellaneous Credits to Surplus

DEBITS

- 410. Debit Balance Transferred to Income Accounts
- 411. Dividend Appropriations--Preferred Stock
- 412. Dividend Appropriations--Common Stock
- 413. Miscellaneous Reservations of Surplus
- 414. Miscellaneous Debits to Surplus

CREDITS

- 400. Credit Balance Transferred from Income Account

This account shall include the net credit balance transferred from the income account for the year.

- 401. Miscellaneous Credits to Surplus

A. This account shall include all credits affecting the earned surplus or deficit not provided for elsewhere. Among the items which shall be credited to this account are:

- (1) Credit for amounts previously written off through charges to earned surplus.
- (2) Delayed income, operating revenue, and operating expense credits as provided in general instruction section 461.6.
- (3) Profits on reacquirement of the utility's debt securities (See balance sheet instruction ÷ 462.6.)

B. All items included in this account shall be sufficiently described in the entries relating thereto as to identify them with all accounts affected, and if the credits relate to prior years the amount applicable to each year shall be shown.

DEBITS

- 410. Debit Balance Transferred from Income Account

This account shall include the net debit balance transferred from the income account for the year.

- 411. Dividend Appropriation--Preferred Stock

A. This account shall include amounts declared payable out of surplus of earnings as dividends on actually outstanding preferred or prior lien capital stock issued by the utility, or the amounts credited to a reserve for dividends.

B. Dividends shall be segregated as to those payable in cash, stock and other forms. If not payable in cash, the medium of payment shall be described with sufficient particularity to identify it.

C. This account shall be maintained or supported in such manner as to show separately the dividends on each class and series of preferred stock.

- 412. Dividend Appropriation--Common Stock

A. This account shall include amounts declared payable out of surplus

or earnings as dividends on actually outstanding common capital stock issued by the utility, or the amounts credited to a reserve for dividends.

B. Dividends shall be segregated as to those payable in cash, stock and other forms. If not payable in cash, the medium of payment shall be described with sufficient particularity to identify it.

C. This account shall be maintained or supported in such manner as to show separately the dividends on each class and series of common stock.

413. Miscellaneous Reservations of Surplus

A. This account shall include the reservations or appropriations of surplus for purposes not provided for elsewhere in this system of accounts.

B. The entries to this account shall show the nature of each reservation of surplus.

414. Miscellaneous Debits to Surplus

A. This account shall include amounts chargeable to earned surplus not provided for elsewhere. Among the items which shall be charged hereto are:

(1) Amounts charged to earned surplus to cover past accrued depreciation and amortization not provided for.

(2) Decline in value of investments (see balance sheet instruction 462.4).

(3) Delayed income, operating revenue, and operating expense debits as provided in general instruction section 461.6.

(4) Payments of amounts previously credited to earned surplus.

(5) Losses on reacquirement of utility's debt securities (see balance sheet instruction 462.6).

(6) Losses which are not properly chargeable to operating expenses or income and for which reserves have not been provided.

B. This account may include the income taxes applicable to amounts credited direct to earned surplus when such credits affect income taxes.

C. All items included in this account shall be sufficiently described in the entries relating thereto as to identify them with all accounts affected, and if the charges relate to prior years, the amount applicable to each year shall be shown.

INCOME ACCOUNTS

UTILITY OPERATING INCOME

501. Operating Revenues

502. Operation and Maintenance

503. Depreciation

505. Amortization of Steam Plant Acquisition Adjustments

- 506. Property Losses Chargeable to Operations
- 507. Operating Taxes
- 508. Income from Steam Plant Leased to Others
- 509. Other Utility Operating Income

OTHER INCOME

- 521. Income from Non-utility Operations
- 522. Revenues from Lease of Other Physical Property
- 523. Dividend Revenues
- 524. Interest Revenues
- 525. Revenues from Sinking and Other Funds
- 526. Miscellaneous Non-operating Revenues
- 527. Non-operating Revenue Deductions

INCOME DEDUCTIONS

- 530. Interest on Long-term Debt
- 531. Amortization of Debt Discount and Expense
- 532. Amortization of Premium on Debt--Credit
- 533. Taxes Assumed on Interest
- 534. Interest on Debt to Associated Companies
- 535. Other Interest Charges
- 536. Interest Charged to Construction--Credit
- 537. Miscellaneous Amortization
- 538. Miscellaneous Income Deductions
- 539. Income Taxes

DISPOSITION OF NET INCOME

- 540. Miscellaneous Reservations of Net Income

SALES OF STEAM

- 601. General Sales
- 604. Sales to Public Authorities
- 605. Sales to Other Steam Utilities
- 607. Interdepartmental Sales
- 608. Other Sales

OTHER STEAM REVENUES

- 610. Rent from Steam Property
- 611. Interdepartmental Rents
- 612. Customers' Forfeited Discounts
- 614. Servicing of Customers' Installations
- 615. Miscellaneous Steam Revenues

UTILITY OPERATING INCOME

- 501. Operating Revenues

Under this caption shall be included the total operating revenues shown in the revenue accounts 601 to 615, derived by the utility from

its steam utility operations during the period covered by the income account.

502. Operation and Maintenance

Under this caption shall be included the total expenses shown in accounts 701 to 809, incurred by the utility in its steam operations during the period covered by the income account.

503. Depreciation

A. This account shall include for the period covered by the income account the depreciation expense on steam plant carried in accounts 101, Steam Plant in Service, 106, Unclassified Steam Plant, and the portion applicable to steam operations, on common utility plant carried in accounts 109.1, Common Utility Plant in Service, and 109.6, Unclassified Common Utility Plant, except such depreciation expense as may be charged to clearing accounts or to construction work in progress.

B. The utility shall keep supporting records to show the amount of depreciation charges by primary plant accounts.

505. Amortization of Steam Plant Acquisition Adjustments

A. This account shall be debited or credited, as the case may be, with amounts which the commission shall have determined are includible in operating revenue deductions for the purpose of providing for the extinguishment of the amount in account 105, Steam Plant Acquisition Adjustments, and account 109.5, Common Utility Plant Acquisition Adjustments.

B. Amounts recorded in this account shall be concurrently debited or credited, as the case may be, to account 252, Reserve for Amortization of Steam Plant Acquisition Adjustments, or account 253.2, Reserve for Depreciation and Amortization of Common Utility Plant.

506. Property Losses Chargeable to Operations

This account shall be charged with amounts credited to account 141, Extraordinary Property Losses, when the commission has authorized the amount in the latter account to be amortized by charges to steam operations.

507. Operating Taxes

A. This account shall include the amount of Federal, State, county, municipal and other taxes, including payroll taxes (but excluding taxes on net income, excess profits, undivided profits, excess dividends, or capital stock) which are properly chargeable to steam operations and except taxes includible in account 789, Merchandising, Jobbing and Contract Work, and in clearing accounts. (See account 228.)

B. This account shall be charged each month with the amount of taxes which are applicable thereto, and concurrent credits shall be made to

account 228, Taxes Accrued, or account 132, Prepayments. When it is necessary to apportion taxes to steam operations, full details as to the method of and facts considered in the apportionment shall be recorded.

C. When it is not possible to determine the exact amount of taxes, the amount shall be estimated and the estimate for the period charged to this account, and adjustments shall be made as the actual tax levies become known.

D. Taxes assumed by the utility on property leased from others for use in steam operations shall be charged to the appropriate rent expense or clearing account.

E. The charges to this account shall be so made or supported as to show the amount to each kind of tax, and the basis upon which each charge is made.

Note A: Gasoline and other sales taxes shall be charged, as far as practicable, to the account to which the material on which the tax is levied is charged.

Note B: Taxes assumed by the utility on interest shall be charged to account 533, Taxes Assumed on Interest.

Note C: Taxes on non-operating property the income from which is included in account 521, Income from Non-utility Operations, shall be charged to that account, and taxes on property the income from which is included in account 522, Revenues from Lease of Other Physical Property, shall be charged to account 527, Non-operating Revenue Deductions.

Note D: Taxes on property leased to others, the revenue from which is included in account 508, Income from Steam Plant Leased to Others, shall be charged to that account.

Note E: For taxes chargeable to merchandising, jobbing and contract work and to clearing accounts, see account 789 and accounts 902 to 906.

Note F: Amounts payable annually or more frequently under the terms of franchises, shall be included in account 805, Franchise Requirements.

Note G: Special assessments for initial street and similar improvements shall be included in the steam plant account in which is included the property with which the taxes are identified. Subsequent assessments for replacements shall be charged to taxes.

Note H: Taxes applicable to steam construction shall be charged to account 103, Construction Work in Progress.

Note I: Taxes on net income, excess profits, undivided profits, excess dividends, or capital stock shall be charged to account 539, Income Taxes.

508. Income from Steam Plant Leased to Others

A. This account shall include the rental income from steam property

constituting a distinct operating unit or system leased by the utility to others, and which property is properly includible in account 102, Steam Plant Leased to Others.

B. This account shall be subdivided as follows: 508.1. Revenues from Steam Plant Leased to Others, 508.2. Expenses of Steam Plant Leased to Others.

C. This account shall be so kept or supported as to show separately the following for each lease: (1) Rentals; (2) expenses, (3) depreciation, (4) taxes, (5) uncollectible rents.

509. Other Utility Operating Income

A. Under this caption shall be included the revenues received and expenses incurred in connection with the operations of utility plant, the book cost of which is included in account 108, Other Utility Plant.

B. The expenses shall include every element of cost (except return on investment) incurred in such operations, including depreciation, rents, taxes, and insurance.

Note: In the case of utility services for which systems of accounts are prescribed by this commission, such as electric, gas, etc., the appropriate accounts in such systems shall be used instead of this account.

OTHER INCOME

521. Income from Non-utility Operations

A. This account shall include the revenues from and the expenses incurred in non-utility operations.

B. The expenses shall include every element of cost (except return on investment) incurred in such operations, including depreciation, rents, taxes, and insurance.

522. Revenues from Lease of Other Physical Property

A. This account shall include all rent revenues from land, buildings or other property included in account 110, Other Physical Property.

B. All expenses, such as repairs, depreciation, taxes, uncollectible rents, etc., incurred in connection with the property leased, shall be charged to account 527, Non-operating Revenue Deductions.

523. Dividend Revenues

This account shall include the revenues derived by the utility from dividends on stocks of other companies.

Note A: No amount representing dividends receivable shall be included in this account unless the dividends have been declared or guaranteed.

Note B: No dividends on reacquired securities issued or assumed by the utility shall be included in this account.

Note C: Dividend revenues from securities held in sinking or other

special funds shall not be credited to this account but to account 525, Revenues from Sinking and Other Funds.

524. Interest Revenues

Report by this caption the amounts included in accounts 524.1 and 524.2.

524.1. Interest on Securities Owned

This account shall include interest revenues on investments in securities of other companies.

Note A: Interest accrued shall not be credited to this account unless its payment is reasonably assured.

Note B: Interest on reacquired securities issued or assumed by the utility shall not be credited to this account.

Note C: Interest on securities held in sinking or other special funds shall not be included in this account but in account 525, Revenues from Sinking and Other Funds.

Note D: This account may include for each month the applicable amount requisite to extinguish (during the interval between the date of acquisition and the date of maturity) the difference between the cost to the utility and the par value of securities on which the interest is received. Amounts thus credited or charged shall be concurrently included in the accounts in which the securities are carried. (See balance sheet instruction ÷ 462.4.)

524.2. Other Interest Revenues

This account shall include interest revenues on loans, notes, advances, special deposits, and all other interest bearing assets, except as provided in accounts 524.1 and 525.

Note: Interest accrued shall not be credited to this account unless its payment is reasonably assured.

525. Revenues from Sinking and Other Funds

A. This account shall include all revenues (whether interest or dividends) accrued on cash, securities or other assets held in account 113, Sinking Funds, and account 114, Miscellaneous Special Funds.

B. This account may include for each month the applicable amount requisite to extinguish (during the interval between the date of acquisition and the date of maturity) the difference between the cost to the utility and the par value of debt securities held in sinking or other funds. Amounts thus credited or charged shall be concurrently included in the accounts in which the securities are carried. (See balance sheet instruction ÷ 462.4.)

C. This account covers all revenues from sinking and other funds carried in accounts 113 and 114, whether or not such revenues are

required to be retained in the funds. If the revenues are required to be retained in a special fund and the fund is represented by a reserve, the amount of such accretions to the fund shall be concurrently credited to the appropriate reserve account and charged to account 540, Miscellaneous Reservations of Net income, or account 413, Miscellaneous Reservations of Surplus, as appropriate.

526. Miscellaneous Non-operating Revenues

This account shall include all revenue items, properly includible in the income account and not provided for elsewhere.

ITEMS

(1) Fees collected with the exchange of coupon bonds for registered bonds.

(2) Profits from operations of others realized by the utility under contracts.

(3) Profits on reacquirement of the utility's debt securities (see balance sheet instruction ÷ 462.6.)

(4) Profits on sale of securities not issued or assumed by the accounting utility or on sale of other investments.

(5) Profits from sale of non-operating property.

527. Non-operating Revenue Deductions

A. This account shall include the expenses, taxes and uncollectible bills applicable to the period covered by the income account which are associated or incurred in connection with the revenues which are includible in accounts 522 to 526, inclusive.

B. This account shall be maintained or supported in such manner as to disclose the expenses or deductions applicable to each non-operating revenue account.

INCOME DEDUCTIONS

530. Interest on Long-term Debt

A. This account shall include in each accounting period the amount of interest applicable thereto on actually outstanding long-term debt issued or assumed by the utility, the liability for which is included in account 210, Bonds, account 211, Receivers' Certificates, or account 213, Miscellaneous Long-term Debt.

B. The amount charged to this account shall be credited concurrently to account 29.1, Interest Accrued on Long-term Debt.

C. This account shall be so kept or supported as to show the interest accruals on each class and series of long-term debt.

Note: This account shall not include interest on nominally issued or nominally outstanding long-term debt, including securities assumed.

531. Amortization of Debt Discount and Expense

A. This account shall include in each accounting period the portion of unamortized debt discount and expense on outstanding long-term debt which is applicable to such period.

B. The amount of unamortized debt discount and expense chargeable to each accounting period shall be determined in accordance with balance sheet instruction section 462.6.

C. Amounts charged to this account shall be credited concurrently to account 140, Unamortized Debt Discount and Expense.

532. Amortization of Premium on Debt--Credit

A. This account shall include in each accounting period the portion of unamortized premium on outstanding long-term debt which is applicable to such period.

B. The amount of unamortized premium on debt includible in each accounting period shall be determined in accordance with balance sheet instruction section 462.6.

C. Amounts credited to this account shall be charged concurrently to account 240, Unamortized Premium on Debt.

533. Taxes Assumed on Interest

This account shall include amounts paid to holders of the bonds or other indebtedness of the utility, or amounts paid to governmental agencies in their behalf in respect to income and other taxes levied against the income from such debt or levied as a tax on ownership of the debt, when such taxes are assumed by the utility.

534. Interest on Debt to Associated Companies

There shall be reported by this caption the amounts included in accounts 534.1 and 534.2.

534.1. Interest on Advances from Associated Companies

A. This account shall include interest accrued on advances from associated companies and included in account 215, Advances from Associated Companies.

B. The records supporting the entries to this account shall be so kept as to show to whom the interest is to be paid, the period covered by the accrual, the rate of interest and the principal amount of the advances on which the interest is accrued.

534.2. Interest on Other Debt to Associated Companies

A. This account shall include interest accrued on amounts recorded in account 223.1, Notes Payable to Associated Companies, on amounts recorded in account 223.2, Accounts Payable to Associated Companies, and on any other obligation to associated companies, except long-term debt held by and advances from such companies, the interest on which shall be included in account 530 or 534.1, as appropriate.

B. The records supporting the entries to this account shall be so kept as to show to whom the interest is to be paid, the period covered by the accrual, the rate of interest, the nature of the obligation on which accrued, and the account or accounts credited with the accrual.

535. Other Interest Charges

A. This account shall include all interest charges not provided for elsewhere.

B. A list of some of the items of indebtedness, the interest on which is chargeable to this account, follows: (1) Assessments for public improvements, (2) claims and judgments, (3) customers' deposits, (4) notes payable on demand or maturing one year or less from date, except notes payable to associated companies, (5) open accounts, except with associated companies (6) tax assessments.

536. Interest Charged to Construction--Credit

This account shall include concurrent credits for interest charged to construction in accordance with steam plant instruction 463.4, subdivision (a), paragraph (18).

537. Miscellaneous Amortization

This account shall include amortization expenses not elsewhere provided for in this system of accounts, including amortization of amounts in account 105, Steam Plant Acquisition Adjustments, and 109.5, Common Utility Plant Acquisition Adjustments, which are not chargeable to account 505, Amortization of Steam Plant Acquisition Adjustments.

538. Miscellaneous Income Deductions

This account shall include miscellaneous debits to income, not provided for elsewhere.

ITEMS

(1) Decline in value of investments (see balance sheet instruction 462.4).

(2) Donations.

(3) Expenditures for associated companies for which the utility will not be reimbursed.

(4) Penalties or fines for violation of law.

(5) Losses on reacquirement of utility's debt securities (see balance sheet instruction 462.6.)

(6) Losses on sale of non-operating property.

539. Income Taxes

This account shall include taxes on net income, excess profits, undivided profits, excess dividends, and capital stock.

Note: When credits are made direct to surplus of items which affect the income taxes, the portion of the taxes applicable to those items may

be charged to surplus.

DISPOSITION OF NET INCOME

540. Miscellaneous Reservations of Net income

A. This account shall include reservations of net income, such as may be required under the terms of mortgages, deeds of trust, orders of courts, contracts, or other agreements, and other reservations of net income.

B. Amounts charged to this account shall be credited concurrently to the appropriate reserve account.

C. The entries in this account shall show the nature of each reservation of income.

SALES OF STEAM

601. General Sales

A. This account shall include revenues from steam supplied for general use.

604. Sales to Public Authorities

This account shall include the revenues from steam supplied to municipalities or divisions or agencies of Federal or State governments, under special contracts or agreements or service classifications applicable only to public authorities except such revenues as are includible in account 605.

605. Sales to Other Steam Utilities

A. This account shall include revenues from steam supplied to other steam utilities or to public authorities for distribution to others.

B. Revenues from steam supplied to other public utilities for use by them and not for distribution, shall be included in account 601, General Sales, unless supplied under the same contract as and not readily separable from revenues includible in this account.

Note: The records supporting the entries to this account shall show separately for each contract the point of delivery, the maximum demand, the quantity supplied, the basis for the charge, and the total charge to the distributor. When steam is delivered to a utility at more than one point, like detail shall be furnished for each point of delivery.

607. Interdepartmental Sales

This account shall include the total amounts charged to other departments of the utility by the steam department for steam supplied by the latter, if the charges are at tariff or other specified rates for the steam supplied. (See operating revenue instruction 466.5 and account 611, Interdepartmental Rents.)

608. Other Sales

This account shall include revenues derived from steam supplied users

and which are not properly includible in revenue accounts 601 to 607, inclusive.

OTHER STEAM REVENUES

610. Rent from Steam Property

A. This account shall include rents received for the use by others of land, buildings, and other property devoted to steam operations by the utility. This covers such matters as rent from buildings, stations, land, appliances, etc.

B. When any utility employs some of its steam plant for the benefit of another or others under a definite arrangement for apportioning the actual expenses among the several participants in the arrangement, and such arrangement provides for the receipt by the accounting utility of any profit or return upon its property, such profit or return, together with the amount of depreciation and taxes charged to another or others pursuant to the arrangement, shall be credited to this account. (See operation and maintenance instruction ÷ 467.6.)

Note: Do not include in this account rents from property included in account 102, steam plant leased to others. (See account 508, income from steam plant leased to others, and income instruction ÷ 465.4.)

611. Interdepartmental Rents

This account shall include the rents creditable to the steam department on account of rental charges made against other departments of the utility. In the case of property operated under a definite arrangement to allocate the costs, by accounts, among the departments using the property, the reimbursement to the steam department for operating and maintenance expenses shall be credited to the appropriate joint expense credit account or accounts, but the reimbursement for interest or return and depreciation and taxes shall be credited to this account. (See operation and maintenance instruction ÷ 467.6.)

Note: Charges for steam supplied other departments at tariff or other specified rates shall not be included in this account but in account 607, interdepartmental sales. (See operating revenue instruction ÷ 466.5.)

612. Customers' Forfeited Discounts

This account shall include the amounts which the utility allows its customers on condition that they pay their steam bills on or before a specified date and which are forfeited by the customers because of failure to pay within the specified time.

614. Servicing of Customers' Installations

This account shall include revenues accruing to the utility from charges to customers on account of the maintenance of appliances,

pipng, or other installations on customers' side of meters.

615. Miscellaneous Steam Revenues

This account shall include revenues derived from steam operations not includible in any of the foregoing accounts. This covers such items as fees and charges for changing, connecting and disconnecting service, profit on the sale of materials and supplies not ordinarily purchased for resale, commissions on sales or distribution of others' steam (sold under rates filed by such others), management or supervision fees, sale of water (except when the utility furnishes water service), and rentals from property included in account 361, Accessory Equipment on Customers' Premises.

PRODUCTION EXPENSES

OPERATION

B A 701. Operation Supervision and Engineering
This account shall include the cost of supervising and directing the operation of steam production stations. (See operation and maintenance instruction ò 467.4.)

Note: The cost of fuel analysis shall be charged to account 131, Materials and Supplies.

B 702. Station Labor

A 702.1. Boiler Labor

This account shall include the pay of employees in boiler rooms and elsewhere about the premises engaged in making steam.

ITEMS

- (1) Boiler house engineer and assistants.
- (2) Feed-pump men.
- (3) Firemen.
- (4) Furnace operators.
- (5) Helpers.
- (6) Janitors.
- (7) Stoker attendants.
- (8) Stokers.
- (9) Watchmen.
- (10) Water tenders.
- (11) Weighers.
- (12) Labor employed in:
 - (a) Blowing flues.
 - (b) Cleaning boilers.
 - (c) Handling coal and ashes (within the boiler plant).
 - (d) Pulverizing coal.
 - (e) Testing steam meters (station) and gauges and other instruments.

A 702.2. Accessory Power Equipment Labor

This account shall include the pay of employees engaged in operating accessory power equipment which is devoted to the production of power for the supply of auxiliaries and general station use.

ITEMS

- (1) Dynamomen.
- (2) Electricians.
- (3) Engineers and assistants.
- (4) Foremen and assistants.
- (5) Oilers and wipers.
- (6) Switchboard operators and assistants.

A 702.3 Miscellaneous Station Labor

This account shall include the pay of employees engaged in operating steam production stations, when such pay is not chargeable to the foregoing steam plant labor accounts.

ITEMS

- (1) Elevator men.
- (2) Janitors.
- (3) Messengers.
- (4) Watchmen.

(5) Yard and building cleaners.

B A 703. Fuel

A. This account shall include the cost delivered at stations, including cost of transferring from one station to another (see account 131, Materials and Supplies), of coal, oil, gas, or other fuel used in the production of steam. It shall also include the net cost of, or amount realized from, the disposal of ashes.

B. Records shall be maintained to show the quantity, B.t.u. content, if available, and cost of each type of fuel used.

B A 704. Water

This account shall include the cost of water for boilers and condensers, etc. If water is purchased, the charge shall be at the contract price or the meter rate; if pumped by the utility, the cost of pumping shall be charged to this account.

ITEMS

(1) Employees:

- (a) Filter cleaners.
- (b) General labor.
- (c) Pumping station operators.
- (d) Screen operators.
- (e) Water supply system operators.

(2) Supplies:

- (a) Boiler compounds.
- (b) Chemicals.
- (c) Lubricants.
- (d) Pumping supplies.
- (e) Supplies (miscellaneous).
- (f) Water purchased.

B 705. Supplies and Expenses

A 705.1. Lubricants

This account shall include the cost of lubricants for machinery in steam production stations, including the cost of recovering oil from waste and the cost of handling and filtering.

Note A: Lubricants used in pumping water shall be charged to account 704, Water.

Note B: Do not include in this account oil or grease for automobiles, trucks and wagons, or oil for lamps or for similar purposes.

A 705.2. Station Supplies

This account shall include the cost of all miscellaneous supplies, tools, etc., used in steam production stations.

ITEMS

- (1) Dynamo brushes.
- (2) Fireroom tools.
- (3) Gauge glasses.
- (4) Hand hole gaskets.
- (5) Manhole gaskets.
- (6) Packing.
- (7) Steam and air hose.
- (8) Tools (hand).
- (9) Washers.
- (10) Waste.
- (11) Wipers.

A 705.3. Station Expenses

This account shall include miscellaneous expenses, which are not specifically provided for in other operating expense accounts, incurred in the operation of steam production stations.

ITEMS

- (1) Boiler inspection fees.
- (2) Building service (not including rent).
- (3) Communication service.
- (4) Log sheets and charts.
- (5) Meter supplies.
- (6) Stationery and office supplies.
- (7) Transportation.
- (8) Water for fire protection or for general use.
- (9) Employees' service facilities expense.

MAINTENANCE

B A 706. Maintenance Supervision and Engineering

This account shall include the cost of supervising and directing the maintenance of steam production stations. (See operation and maintenance instruction ÷ 467.4.)

B A 707. Maintenance of Structures and Improvements

This account shall include the cost of maintenance of buildings, structures, fixtures, and improvements at steam production stations, the book cost of which is included in account 311, Structures and Improvements.

B 708. Maintenance of Boiler Plant Equipment

A 708.1. Maintenance of Coal Storage, Handling and Weighing Equipment

This account shall include the cost of maintenance of coal storage, handling, ash disposal, and pulverizing equipment at steam production stations, the book cost of which is included in account 312, Boiler Plant Equipment.

A 708.2. Maintenance of Furnaces and Boilers

This account shall include the cost of maintenance of furnaces and boilers at steam production stations, the book cost of which is included in account 312, Boiler Plant Equipment.

A 708.3. Maintenance of Boiler Apparatus

This account shall include the cost of maintenance of auxiliary apparatus in boiler rooms at steam production stations, the book cost of which is included in account 312, Boiler Plant Equipment, such as air preheaters, draft apparatus, combustion control apparatus, foundations, food water apparatus, pumps, and water purification systems.

A 708.4. Maintenance of Steam Piping and Accessories

This account shall include the cost of maintenance of steam production station piping systems and accessories used in connection with the making of steam, the book cost of which is included in account 312, Boiler Plant Equipment.

B 709. Maintenance of Other Station Equipment

A 709.1. Maintenance of Accessory Power Equipment

This account shall include the cost of maintenance of accessory power equipment in steam production stations, the book cost of which is included in account 315, Accessory Power Equipment.

A 709.2. Maintenance of Miscellaneous Station Equipment

This account shall include the cost of maintenance of miscellaneous station equipment, the book cost of which is included in account 316, Miscellaneous Station Equipment.

MISCELLANEOUS

B A 710. Rents

This account shall include all rents of property of others used, occupied, or operated in connection with steam power generation; and also amounts payable for depreciation, taxes, interest or return under joint facility agreements. (See operation and maintenance instruction 467.5 and 467.6.)

Note: Rents payable to customers for use of their steam equipment shall be included in a separate subdivision of this account. The utility shall keep supporting records to show for each such lease, a description of the property covered, the annual rental, and the dates when such lease became effective and the dates of actual operation by the utility.

B A 711. Steam from Other Sources

This account shall include the cost at the point of delivery to the utility of steam purchased for resale, including charges for readiness to serve and also charges for steam transferred to the steam department from another operating department of the company.

Note: The records shall be so kept as to show separately for each company from which steam is purchased, the point of delivery, the quantity, the price, and the total charge. When steam is transferred from another operating department, the utility shall be prepared to show full details of the cost of producing such steam, the basis of the charges to the steam department, and the extent and manner of use by each department involved.

B A 712. Steam Transferred--Credit

This account shall include such portion of the cost of operating and maintaining joint facilities operated by the utility in connection with the production of steam as is charged to others or to a coordinate department. (See operation and maintenance instruction ÷ 467.6.)

B A 713. Joint Expenses--Debits

A. This account shall include amounts for the cost of operation and maintenance payable by the steam department to others or to a coordinate department for joint facilities used, occupied, or operated in connection with steam production. (See operation and maintenance instruction ÷ 467.6.)

B. The records supporting the entries to this account shall be so kept that the utility can furnish a complete explanation of the debits to this account, including the following: (1) Charges from others, (2) charges from coordinate departments.

Note: Charges for steam produced in joint facilities shall not be included in this account but in account 711, Steam from Other Sources.

B A 714. Joint Expenses--Credit

A. This account shall include such portion of the cost of operating and maintaining joint facilities operated by the steam department in connection with steam production as is charged to others or to a coordinate department. (See operation and maintenance instruction ÷ 467.6.)

B. The records supporting the entries to this account shall be so kept that the utility can furnish a complete explanation of the credits to this account, including the following: (1) Charges to others, (2) charges to coordinate departments.

Note: Credits for steam transferred, produced in joint facilities, shall not be included in this account but in account 712, Steam Transferred--Credit.

DISTRIBUTION EXPENSES

OPERATION

B A 756. Operation Supervision and Engineering

This account shall include the cost of supervising and directing the

operation of the distribution system. (See operation and maintenance instruction § 467.4.)

B 758. Distribution Office Expenses

A 758.1. Distribution Maps and Records

This account shall include salaries and expenses for the preparation of distribution maps and records, including the cost of stationery, drafting materials, etc.

A 758.2 Other Distribution Office Expenses

This account shall include such distribution office expenses as heat, ice water, office supplies, stationery and printing, telephone tolls and rentals, janitor service, etc.

B A 761. Operation of Distribution Lines

This account shall include the cost of labor and material used and expenses incurred in the operation of distribution lines, including mains and regulating and measuring equipment, and services. (1) Cleaning manholes, (2) fuel, (3) lubricants and waste, (4) meter and gauge supplies, (5) moisture tests, (6) operating pumps in manholes, (7) replacing pressure charts, (8) tools, hand.

B 762. Services on Customers' Premises

A 762.1. Removing and Resetting Meters and Accessory Equipment

This account shall include the cost of labor and materials used and expenses incurred in inspecting, testing, removing and resetting or changing the location of meters and accessory equipment located on customers' premises.

This account shall include the cost of all disconnecting and reconnecting of meters, except when occasioned by the failure to pay, in which case the cost is chargeable to account 780.4, Collecting.

Note A: All installation costs of meters and of accessory equipment may be charged to this account.

A 762.2. Other Services on Customers' Premises

A. This account shall include the cost of labor and material used and expenses incurred in work on customers' premises other than amounts included in account 762.1, Removing and Resetting Meters and Accessory Equipment.

ITEMS

- (1) Changing location of appliances.
- (2) Improving character of service.
- (3) Inspecting premises.
- (4) Investigating and adjusting customers' service complaints.
- (5) Testing customers' equipment.

Note A: Fees and charges to customers for such services shall be

credited to account 614, Servicing of Customers' Installations.

Note B: This account shall not include costs incurred in connection with merchandising, jobbing and contract work.

MAINTENANCE

B A 764. Maintenance Supervision and Engineering

This account shall include the cost of supervising and directing the maintenance of the distribution system. (See operation and maintenance instruction ò 467.4.)

B A 765. Maintenance of Structures and Improvements

This account shall include the cost of maintenance of distribution structures and improvements, the book cost of which is included in account 351, Structures and Improvements.

B 769. Maintenance of Distribution Lines

A 769.1. Maintenance of Mains

This account shall include the cost of maintenance of mains, etc., the book cost of which is included in account 353, Mains.

A 769.2. Maintenance of Services

A. This account shall include the cost of maintenance of services, the book cost of which is included in account 359, Services.

B A 772. Maintenance of Meters and Accessory Equipment

This account shall include the cost of maintenance of meters and accessory equipment, the book cost of which is carried in account 360, Meters, and account 361, Accessory Equipment on Customers' Premises.

Note: The initial testing of meters shall be charged to account 360, Meters.

MISCELLANEOUS

B A 776. Rents

This account shall include all rents for property of others used, occupied, or operated in connection with the distribution system; and also amounts payable for depreciation, taxes, interest or return under joint facility agreements. (See operation and maintenance instructions ò 467.5 and 467.6.)

B A 777. Joint Expenses--Debit

A. This account shall include amounts for the cost of operation and maintenance payable by the steam department to others or to a coordinate department for joint facilities used, occupied, or operated in connection with the distribution of steam. (See operation and maintenance instruction ò 467.6.)

B. The records supporting the entries to this account shall be so kept that the utility can furnish a complete explanation of the debits to this account, including the following: (1) Charges from others, (2)

charges from coordinate departments.

B A 778. Joint Expenses--Credit

A. This account shall include such portion of the cost of operating and maintaining joint facilities operated by the steam department in connection with the distribution of steam as is charged to others or to a coordinate department. (See operation and maintenance instruction 467.6.)

B. The records supporting the entries to this account shall be so kept that the utility can furnish a complete explanation of the credits to this account, including the following: (1) Charges to others, (2) charges to coordinate departments.

CUSTOMERS' ACCOUNTING AND COLLECTING EXPENSES

B A 779. Supervision

This account shall include the cost of supervising and directing work on customers' contracts, orders, inquiries and accounts, and in meter reading and collecting. (See operation and maintenance instruction 467.4.)

B 780. Customers' Contracts, Orders, Meter Reading and Collecting

A 780.1. Customers' contracts and orders

This account shall include the pay and expenses of employees engaged in work on customers' applications, contracts, orders, complaints and inquiries, and supplies used and expenses incurred in connection therewith.

ITEMS

- (1) Books.
- (2) Building service (not including rent).
- (3) Office supplies.
- (4) Postage.
- (5) Salaries and wages.
- (6) Stationery.
- (7) Transportation.

A 780.2. Credit investigations and Records

This account shall include the pay and expenses of employees engaged in investigations of customers' credit and the keeping of records pertaining thereto, including supplies used and expenses incurred in connection therewith.

ITEMS

- (1) Books.
- (2) Building service (not including rent).
- (3) Office supplies.
- (4) Postage.

- (5) Salaries and wages.
- (6) Stationery.
- (7) Transportation.

Note: The keeping of this account is optional. If not used, charges provided for herein shall be included in account 780.1, Customers' Contracts and Orders.

A 780.3 Meter Reading

This account shall include the pay and expenses of employees engaged in reading customers' meters, and supplies used and expenses incurred in connection therewith.

ITEMS

- (1) Badges.
- (2) Building service (not including rent).
- (3) Forms for recording readings.
- (4) Lamps.
- (5) Meter charts.
- (6) Meter readers, chart collectors and chart readers, pay of.
- (7) Transportation.
- (8) Uniforms.

A 780.4. Collecting

This account shall include the pay and expenses of employees engaged in collecting customers' bills, and supplies used and expenses incurred in connection therewith; also corresponding payments to attorneys, collection agencies or others, not employees of the utility, who are engaged in making such collections.

ITEMS

- (1) Building service (not including rent).
- (1a) Cashiers, pay and expenses of.
- (2) Commissions, fees, or salaries of collectors.
- (3) Disconnection for non-payment of bills.
- (4) Office supplies.
- (5) Postage.
- (6) Stationery and printing.
- (7) Transportation.

B A 781. Customers' Billing and Accounting

This account shall include the pay and expenses of employees engaged in customers' billing and accounting work, and supplies used and expenses incurred in connection therewith.

ITEMS

- (1) Accounts, customers', keeping of.
- (2) Address plates.

- (3) Billing.
- (4) Bookkeeping.
- (5) Books.
- (6) Building service (not including rent).
- (7) Delivery of bills.
- (8) Office supplies.
- (9) Postage.
- (10) Stationery and printing.
- (11) Statistical work on customers' accounts.
- (12) Tabulating sales.
- (13) Transportation.

B A 782. Miscellaneous Expenses

This account shall include the labor, materials and expenses, which are not chargeable to the foregoing accounts, and which were used or incurred in customers' accounting and collecting.

B A 783. Uncollectible Accounts

This account shall be charged each month with amounts sufficient to provide for losses from uncollectible steam revenues. Concurrent credits shall be made to account 254, Reserve for Uncollectible Accounts. Losses from uncollectible accounts shall be charged to such reserve. (See also account 789.2.)

B A 784. Rents

This account shall include rents of property of others used in connection with customers' accounting and collecting. (See operation and maintenance instruction ÷ 467.5.)

SALES PROMOTION EXPENSES

B A 785. Supervision

This account shall include the cost of supervising and directing the sales department and the solicitation of new business, including assistants, stenographers, and clerical help on records. (See operation and maintenance instruction ÷ 467.4.)

B A 786. Salaries and Commissions

This account shall include the salaries and commissions paid salesmen for canvassing and soliciting new business, including the cost of preparing estimates for industrial and other customers.

B 787. Demonstration, Advertising and Other Sales Expenses

A 787.1. Demonstration

This account shall include the cost of labor and materials used and expenses incurred in demonstrating the use of appliances or other equipment.

ITEMS

(1) Employees: (a) Demonstrators, (b) instructors, (c) typists and clerks.

(2) Expenses: (a) Building service (not including rent), (b) communication service, (c) demonstration supplies, (d) steam service, (e) transportation.

A 787.2. Advertising

This account shall include the cost of labor and materials used and expenses incurred in connection with advertising for the purpose of promoting the sales of steam.

ITEMS

(1) Advertising in newspapers, periodicals, etc.

(2) Advertising manager and assistants.

(3) Clerks.

(4) Materials and expenses in preparing: (a) Advertisements, (b) booklets, (c) bulletins, (d) dodgers, (e) posters.

(5) Stenographers and typists.

A 787.3. Miscellaneous Sales Expenses

This account shall include the cost of labor and materials used and expenses incurred in soliciting new business, except amounts chargeable to the foregoing accounts.

B A 788. Rents

This account shall include rents properly includible in operating expenses for property of others used by the sales promotion organization. (See operation and maintenance instruction ÷ 467.5.)

B A 789. Merchandising, Jobbing and Contract Work

A. This account shall include expenses of merchandising, jobbing and contract work; also all revenues derived from the sale of steam merchandise, and jobbing or contract work, including any profit or commissions accruing to the utility from jobbing work performed by it as agent under agency contracts, whereby it undertakes to do jobbing work for another for a stipulated profit or commission.

B. This account shall be subdivided as follows:

789.1. Revenues from merchandising, jobbing and contract work.

789.2. Cost of merchandising, jobbing and contract work.

Account 789.2 shall be subdivided so as to show the major items of costs and expenses.

ITEMS OF EXPENSE

(2) Cost of merchandise sold, and of materials used for jobbing work including transportation, storage, handling.

(4) Direct taxes.

(5) Discounts and allowances made in settlement of bills for

merchandise and jobbing work.

(7) Insurance on merchandise.

(8) Inventory adjustments, merchandise.

(10) Losses from uncollectible merchandise accounts.

(13) Pay and expenses of all employees engaged in selling, delivery, installation, etc.

(14) Reconditioning repossessed appliances.

ADMINISTRATIVE AND GENERAL EXPENSES

B A 790. Salaries of General Officers and Executives

A. This account shall include the compensation (salaries, bonuses and other consideration for services) of officers and executives of the utility, properly chargeable to steam operations and not chargeable directly to a particular steam function.

B. This account shall be kept so that there will be available subdivisions thereof in accordance with the utility's administrative organization, such as executive, accounting, treasury, legal, etc.

Note: This account shall not include directors' fees paid to officers and executives.

B A 791. Other General Office Salaries

A. This account shall include the compensation of employees engaged in the general or divisional offices properly chargeable to steam operations and not chargeable directly to a particular steam function.

B. This account shall be kept so that there will be available subdivisions thereof in accordance with the utility's administrative organization, such as executive, accounting, treasury, legal, etc.

B 792. Expenses of General Officers and General Office Employees

A 792.1. Expenses of General Officers

A. This account shall include the expenses incurred for the benefit of the utility in its steam operations by officers and executives whose salaries are included in account 790 and which are not chargeable directly to a particular steam function.

B. This account shall be kept so that there will be available subdivisions thereof in accordance with the utility's administrative organization such as executive, accounting, treasury, legal, etc.

ITEMS

(1) Hotels.

(2) Meals, including payment therefor on account of overtime work.

(3) Membership fees and dues in trade, technical and professional associations.

(4) Traveling expenses.

A 792.2. Expenses of General Office Employees

A. This account shall include the expenses incurred for the benefit of the utility in its steam operations by employees whose salaries are included in account 791 and which are not chargeable directly to a particular steam function.

B. This account shall be kept so that there will be available subdivisions thereof in accordance with the utility's administrative organization such as executive, accounting, treasury, legal, etc.

ITEMS

- (1) Hotel.
- (2) Meals, including payment therefor on account of overtime work.
- (3) Membership fees and dues in trade, technical and professional associations.
- (4) Traveling expenses.

B A 793. General Office Supplies and Expenses

A. This account shall include the cost of office supplies and office expenses in connection with the general administrative functions of the utility's steam operations.

B. This account shall be kept so that there will be available subdivisions thereof in accordance with the utility's administrative organization such as executive, accounting, treasury, legal, etc.

ITEMS

- (1) Automobile service, including charges through clearing account 903, transportation expenses--clearing.
- (2) Books and periodicals for office use.
- (3) Building service (not including rent).
- (4) Communication service.
- (5) Office supplies.
- (6) Postage.
- (7) Printing.
- (8) Stationery.

Note: Office expenses which are clearly applicable to any group of operating expenses other than administrative and general shall not be included in this account.

B A 794. Management and Supervision Fees and Expenses

A. This account shall include amounts payable by the steam department to any corporation, firm, or individual, for general supervision and management services and expenses. (See general instruction, § 461.8.)

B. Records supporting this account shall be so kept as to show (1) the basis of each fee, (2) the amount of the fee, (3) the person to whom the fee is paid or payable, and (4) credits.

B A 795. Special Services

This account shall include amounts payable to any corporation, firm or individual, other than officers and employees of the utility, for special services to the steam department if the amounts are not includible in account 794, Management and Supervision Fees and Expenses, or account 796, Legal Services, or are not chargeable directly to other steam operating expense accounts or clearing or plant accounts. (See general instruction ð 461.8.)

ITEMS

(1) Services: (a) Auditing and accounting, (b) budget, (c) personnel, (d) publication, (e) rates, (f) secretarial, (g) statistical, (h) supervisory.

(2) Expenses: (a) Hotel, (b) meals, (c) printing, (d) stationery, (e) traveling.

B A 796. Legal Services

This account shall include amounts payable to any corporation, firm, or individual, other than officers and employees of the utility, for legal services and related expenses of the steam department which are not chargeable directly to other steam operating expense accounts or to clearing or plant accounts.

Note A: Legal services in connection with formal cases before regulatory commissions, or in cases in which such a commission is a party, or when specifically applicable to injury or damage cases shall be charged to account 797, Regulatory Commission Expenses, account 799, Injuries and Damages, or Other Appropriate Account.

Note B: Legal services incident to the construction of steam property shall be charged to the appropriate utility plant accounts. (For legal services in connection with property purchased, see steam plant instruction ð 463.3, subd. (a).) Legal services incident to the acquisition of franchises, consents or certificates, or to the issuance of long-term debt or capital stock shall be charged to account 140, Unamortized Debt Discount and Expense, account 240, Unamortized Premium on Debt, or account 151, Capital Stock Expense, as appropriate.

B A 797. Regulatory Commission Expenses

A. This account shall include all expenses (except pay of regular employees only incidentally engaged in such work) properly includible in steam operating expenses, incurred by the utility in connection with formal cases before regulatory commissions, or other regulatory bodies, or cases in which such a body is a party, including payments made to a regulatory commission for fees assessed against the accounting utility for pay and expenses of such commission, its officers, agents and employees.

B. Amounts of regulatory commission expenses which are spread over future periods shall be charged to account 146, Other Deferred Debits, and amortized by charges to this account. (See general instruction 461.14.)

C. The utility shall be prepared to report the cost of each formal case.

D. The cost of work which may be partly chargeable to this account and partly to the other accounts enumerated in notes A and B of account 796 shall be equitably apportioned, and the basis of allocation to the several accounts shall be submitted to the commission.

ITEMS

(1) Salaries, fees, retainers, and expenses of counsel, solicitors, attorneys, accountants, engineers, clerks, attendants, witnesses, and others engaged in the prosecution of, or defense against, petitions or complaints presented to regulatory bodies, or in the valuation of property owned or used by the utility in connection with such cases.

(2) Expenses: Engineering supplies, office expenses, payments to public service or other regulatory commissions, stationery and printing, traveling expenses, and other expenses incurred directly in connection with formal cases before regulatory commissions.

Note A: Exclude from this account and include in other appropriate operating expense accounts, expenses incurred in the improvement of service, additional inspection, or rendering reports, which are made necessary by the rules and regulations, or orders, of regulatory bodies.

Note B: Do not include in this account costs incident to the acquisition of franchises, consents or certificates, or to the construction or acquisition of steam property, which are chargeable to the steam plant accounts. Costs incurred in connection with property purchases shall be accounted for as provided in steam plant instruction section 463.3. Costs incurred incident to the issuance of long-term debt or capital stock shall be charged to account 140, Unamortized Debt Discount and Expense, account 240, Unamortized Premium on Debt, or account 151, Capital Stock Expense, as applicable. (See also account 142.)

Note C: Do not include in this account expenses in connection with investigations by legislative bodies or cases to which the utility is not a party.

Note D: The cost of maintaining continuing property records of steam plant shall not be included herein but in other operation and maintenance accounts appropriate for the class of expenditure.

B A 798. Insurance

This account shall include the cost of insurance to protect the utility against losses and damages to owned or leased property used in its steam operations, except as provided in note C hereunder. There shall be included in this account the premiums payable to insurance companies or amounts credited to account 255, Insurance Reserve, for Fire, Storm, Burglary, Boiler Explosion, Lightning, and other Insurance; and special costs incurred in procuring insurance, such as insurance inspection services, and the pay, traveling, and office expenses of officers, clerks, and other employees of an insurance department.

Note A: Recoveries from insurance companies or others for property damages shall be credited to the account charged with the cost of the damage. If the damaged property has been retired, the credit shall be to account 250, Reserve for Depreciation of Steam Plant, or other appropriate reserve account.

Note B: The utility shall so keep its records as to show the amount of coverage for each class of insurance carried, the property covered, the applicable premiums, and the distribution of the costs to specific operations or functions.

Note C: The cost of insurance to protect the utility against losses and damages to the following classes of owned or leased property used in steam operations shall be charged as indicated:

(1) Laboratory equipment and supplies, to account 904, Laboratory Expenses--Clearing.

(2) Materials and supplies and stores equipment, to account 902, Stores Expenses--Clearing.

(3) Transportation and garage equipment and supplies, to account 903, Transportation Expenses--Clearing.

(4) Shop equipment and supplies, to account 905, Shop Expenses-Clearing.

(5) Tools and work equipment, to account 906, Tools and Work Equipment Expenses-Clearing.

(6) Buildings and building equipment to account 907, Building Service-Clearing, if used.

Note D: Exclude from this account insurance on officers and employees. (See account 800.1.)

B A 799. Injuries and Damages

A. This account shall include losses not covered by insurance on account of injuries or deaths to employees or others, which occur in connection with steam operations, and payments and expenses on account of damages to the property of others or for non-performance of contractual obligations, whether the loss be occasioned by fire, flood,

storm, or other cause. Amounts may be accrued monthly sufficient to meet the probable liability for such losses, concurrent credits being made to account 256, Injuries and Damages Reserve, in which case losses sustained shall be charged to the reserve.

B. This account shall also include:

1. Pay and expenses of officers and employees regularly engaged in or specifically assigned to work in connection with injuries to employees or others, damages to property of others, etc.

2. Payments to attorneys, investigators and adjusters, court costs, etc.

3. Insurance premiums for protection against claims from injuries and damages, including public liability, property damages, boiler, casualty, employees' liability, etc., except as provided in note C hereunder.

C. Reimbursements from insurance companies or others for expenses charged hereto on account of injuries and damages, and insurance dividends or refunds, shall be credited to this account.

Note A: Payments to or in behalf of employees, including accident and death benefits, salaries, hospital expenses, medical supplies; also salaries, fees, and expenses of surgeons, doctors, nurses, etc., or amounts reserved for such payments, when provided for through a plan for employees' benefits, shall be charged to account 800, Employees' Welfare Expenses and Pensions.

Note B: No part of the salaries of officers or employees of the law department shall be included in this account for merely incidental services in connection with injury and damage claims.

Note C: Losses or insurance premiums paid in connection with transportation and garage equipment shall be charged to account 903, Transportation Expenses--Clearing.

Note D: Exclude from this account insurance on officers and employees and the cost of injuries and damages chargeable directly to steam plant accounts, clearing accounts or to other appropriate accounts.

B 800. Employees' Welfare Expenses and Pensions

A 800.1. Employees' Welfare Expenses

A. This account shall include the expenses incurred in conducting employees' accident prevention, educational and recreational activities, the cost of employees' relief and benefits (other than pensions, and injuries and damages chargeable to account 799, Injuries and Damages) and the cost of life insurance for employees when the utility is not the beneficiary.

B. This account shall not include any charges representing amounts used or to be used for the purchase of securities of the accounting

company or any associated company, whether contributed by the accounting company or deducted from salaries and wages of employees, unless and until such amounts have actually been realized and paid to the employees in cash or its equivalent subject to their free disposition. To the extent that the securities thus purchased have an actual market value, the amounts paid for them may be carried meanwhile in account 114.3, Miscellaneous Special Funds; otherwise such amounts shall be charged to account 538, Miscellaneous Income Deductions. (See general instruction ÷ 461.6.)

Note A: When the utility is the beneficiary of insurance on officers or employees, the cash surrender value shall be included in account 133, other current and accrued assets, and the excess of cost of the insurance over such cash surrender value shall be charged to account 538, Miscellaneous Income Deductions.

Note B: See note to account 800.2.

Note C: Credit to this account the portion of welfare expenses which is applicable to non-utility operations or which is charged to construction and retirement work orders, and to clearing or other accounts unless such amounts are distributed directly to the accounts concerned in the first instance.

A 800.2 Pensions

A. This account shall include pensions payable currently to retired employees or their beneficiaries. (See general instruction ÷ 461.11.)

B. This account shall include the cost of advance provision for pensions to be paid to retired employees or their beneficiaries. Such cost represents amounts payable to a trust fund or to an insurance company where the following conditions are met:

1. Pension plan is definite and formally adopted.
2. Amounts paid are irrevocably dedicated to pension purposes.
3. A program of advance provision based on actuarial studies or on other recognized and acceptable systematic method of computation or allocation is undertaken.

C. This account shall include any payments under the pension plan, in addition to the current accruals specified in paragraph B, such as payments computed in relation to a prior service period, but such amounts may, with the approval of the commission, be spread over a period of years, if their inclusion when paid would seriously distort the expenses of that year.

D. Incidental benefits payable on withdrawal or death under a definite and formally adopted pension plan may be considered as pensions within the intent of paragraphs A and B.

Note A: Credit to this account the portion of pension costs which is applicable to non-utility operations or which is charged to construction and retirement work orders, and to clearing or other accounts unless such amounts are distributed directly to the accounts concerned in the first instance.

Note B: Social security and unemployment benefit taxes shall be included in account 507, Operating Taxes, or other appropriate account. (See notes C, E and H to account 507.)

Note C: Each utility making charges to this account under paragraph B shall have filed with this commission a copy of its pension plan and pension trust agreement or contract with an insurance company for the purchase of annuities, together with a description of its program of advance provision for pension costs. Any material change in these items shall be reported promptly to the commission.

Note D: A complete record of the computation of the amounts paid as advance provision for pensions shall be maintained.

Note E: No charges shall be made to this account in anticipation of discretionary pension payments in the future.

Note F: Upon adoption of an accrual plan of accounting, pension payments to employees retired before the adoption of such plan shall be charged to an existing pension reserve until such reserve is exhausted, unless the reserve is eliminated by payment of an equivalent amount into the pension trust fund.

A 800.3 Welfare and Pensions Administration

This account shall include the salaries of persons engaged in the administration of the welfare and pensions department and the expenses incurred in such administration.

Note A: The cost of labor and related supplies and expenses of administrative and general employees who are only incidentally engaged in welfare and pension activities may be included in the accounts appropriate for their major duties.

Note B: Credit to this account the portion of the cost of the administration of the welfare and pension department which is applicable to amounts transferred to non-utility operations or which are charged to construction and retirement work orders or to clearing or other accounts, unless such administrative costs are distributed directly to the accounts concerned in the first instance.

B A 801.1 Corporate and Fiscal Expenses

This account shall include expenses of holding meetings of stockholders, cost of publishing and distributing annual reports to stockholders, cost of publishing corporate, dividend, and redemption

notices, fees of stock transfer agents and registrars, fees and expenses of trustees and fiscal agents, expense of listing securities on stock exchanges, and other analogous items.

B A 801.2 Miscellaneous General Expenses

This account shall include such items of expense applicable to the steam department as association dues; contributions for conventions and meetings of the industry; cost of research and experimental work conducted for the benefit of the steam department or the industry or for the improvement of steam service (except such amounts as may be properly chargeable to other accounts); director's fees; fees for filing annual reports and tariff schedules; and any other miscellaneous expenses connected with the general management and not otherwise provided for.

B 802. Maintenance of General Property

A 802.1 Maintenance of Structures and Improvements

This account shall include the cost of maintenance of general buildings, the book cost of which is included in account 371, Structures and Improvements.

Note: The cost of maintenance of buildings and improvements may be charged to account 907, Building Service-Clearing, in accordance with the provisions of that account.

A 802.2. Maintenance of Office Furniture and Equipment

This account shall include the cost of maintenance of office furniture and equipment used by the administrative divisions of the steam department.

Note: The cost of maintenance of office furniture and equipment used elsewhere than in the administrative departments shall be charged to the maintenance, construction or clearing account appropriate to the use thereof.

A 802.3. Maintenance of Communication Equipment

This account shall include the cost of maintenance of miscellaneous property not provided for in connection with the utility's operations, the book cost of which is included in account 378, Communication Equipment.

Note: If a clearing account is kept for the distribution of communication expenses to the appropriate accounts, the maintenance of communication equipment may be charged thereto and the use of this account discontinued.

A 802.4. Maintenance of Miscellaneous Equipment

This account shall include the cost of maintenance of miscellaneous property not provided for elsewhere including miscellaneous general equipment, the book cost of which is included in account 379,

Miscellaneous Equipment, and tools and work equipment included in account 377, Tools and Work Equipment.

Note: Maintenance of tools and work equipment may be charged to a clearing account and distributed to appropriate accounts based on the use of the equipment.

B A 803. General Rents

This account shall include rent property includible in steam operating expenses covering the property of others used, occupied or operated in connection with the general and administrative functions of the utility; and also amounts payable for depreciation, taxes, interest or return under joint facility agreements. (See operation and maintenance instructions 467.5 and 467.6.)

Note: Rent for offices and buildings may be charged to account 907, Building Service-Clearing, in accordance with the provisions of that account.

B A 804. Commissions Paid Under Agency Sales Contracts

This account shall include the amount paid or payable by the utility to its agents as commission for distributing steam over the agent's distribution lines and selling the same, and for all services performed in connection therewith.

Note A: This account shall be used only when sales are made under rate schedules filed by the accounting utility and when the gross receipts therefrom are credited to it; otherwise the transactions shall be accounted for as sales of steam.

Note B: Records pertaining to each agency sales contract shall be so kept by the utility as to show full particulars as to amounts paid for each kind of service rendered thereunder.

B A 805. Franchise Requirements

A. This account shall include payments to municipal or other governmental authorities, and the cost of materials, supplies and services furnished such authorities without reimbursement in compliance with franchise, ordinance, or similar requirements, provided, however, that the utility may charge to this account at regular tariff rates, instead of cost, steam furnished without charge under provisions of franchises. (See also account 302, Franchises and Consents.)

B. When no direct outlay is involved concurrent credit for such charges shall be to account 806, Duplicate Miscellaneous Charges-Credit.

C. This account shall be subdivided as follows

805.1. Cash outlays.

805.2. Steam supplied without charge--debit.

805.3. Other items furnished without charge--debit.

Note A: Taxes shall not be charged to this account. (See account 507, Operating Taxes.)

B A 806. Duplicate Miscellaneous Charges--Credit

A. This account shall include concurrent credits for charges which are made to account 805, Franchise Requirements, to the extent that such charges do not represent direct outlays. It shall also include concurrent credits for charges made to operating expense or other accounts of the steam department for steam for heating or other purposes for which there is no direct money outlay (see operating revenue instruction ÷ 466.5); and also refunds by associated companies and mutual service companies provided for in subdivision (c) of general instruction section 461.8.

B. This account shall be kept in such manner as to disclose the nature and amount of each item included herein.

B A 807. Administrative and General Expenses Transferred--Credit

A. This account shall be credited with amounts recorded in the administrative and general expenses which are properly includible in construction costs.

B. The records supporting this account shall be so kept as to show the basis of determining the amounts transferred to construction.

Note: See steam plant instruction, section 463.5.

B A 808. Joint Expenses--Debit

A. This account shall include amounts for the cost of operation and maintenance payable by the steam department to others or to a coordinate department for joint facilities used, occupied or operated in connection with administrative and general functions of the utility. (See operation and maintenance instruction ÷ 467.6.)

B. The records supporting the entries to this account shall be so kept that the utility can furnish a complete explanation of the debits to this account, including the following: (1) Charges from others, (2) charges from coordinate departments.

B A 809. Joint Expenses--Credit

A. This account shall include such portion of the cost of operating and maintaining joint facilities operated by the steam department in connection with its administrative and general functions as is chargeable to others, or to a coordinate department. (See operation and maintenance instruction ÷ 467.6.)

B. The records supporting the entries to this account shall be so kept that the utility can furnish a complete explanation of the credits to this account, including the following: (1) Charges to others, (2) charges to coordinate departments.

CLEARING ACCOUNTS

- 902. Stores Expenses--Clearing
- 903. Transportation Expenses--Clearing
- 904. Laboratory Expenses--Clearing
- 905. Shop Expenses--Clearing
- 906. Tools and Work Equipment Expenses--Clearing
- 907. Building Service--Clearing
- 902. Stores Expenses--Clearing
 - A. This account shall include the cost of supervision, labor and expenses incurred in the operation and maintenance of the steam general storerooms, including storage, handling and distribution of materials and supplies.
 - B. Cash discounts shall be credited hereto when such discounts can not be applied to the cost of particular materials.
 - C. This account shall be cleared by adding to the cost of materials and supplies a suitable loading charge which will distribute the expense equitably over stores issues.

ITEMS

- (1) Adjustments of inventories of materials and supplies.
- (2) Books, stationery, and office supplies.
- (3) Building service.
- (4) Collecting and handling scrap materials in stores.
- (5) Communication service.
- (5a) Depreciation of storeroom equipment.
- (6) Discount on materials when not assignable to specific items.
- (7) Freight, express, etc., when not assignable to specific items.
- (8) Heat, light and power for storerooms and stores offices.
- (9) Injuries and damages.
- (10) Inspecting and testing materials and supplies, when not assignable to specific items.
- (11) Insurance on materials and supplies and on stores equipment.
- (12) Losses due to breakage, leakage, evaporation, fire and other causes. Credit any amounts received from insurance, transportation companies or others in compensation of such losses.
- (13) Maintenance of office furniture and equipment.
- (14) Maintenance of stores equipment.
- (15) Pay and expenses of storekeepers, clerks, and others employed in storerooms or in store offices.
- (16) Postage, stationery and printing.
- (16a) Purchasing agents' fees, portion applicable to items carried through this account.

(16b) Purchasing agents' pay and expenses, portion applicable to items carried through this account.

(17) Rents.

(18) Taxes, direct.

(19) Transporting materials into storehouse, when not assignable to specific items.

Note A: Large differences in the accounts disclosed by inventories, which can readily be assigned to important classes of materials, shall be equitably adjusted among the accounts to which such classes of materials have been charged since the previous inventory. Other differences shall be equitably apportioned among the accounts to which materials have been charged, or included in this account.

Note B: Transportation charges on materials recovered from retirements of steam plant shall be charged to the account to which the cost of removal was charged.

903. Transportation Expenses--Clearing

A. This account shall include the cost of supervision, labor and expenses incurred in the operation and maintenance of the general transportation equipment of the steam department, including direct taxes and depreciation on transportation equipment.

B. This account shall be cleared by apportionment to operating expense, steam plant or other accounts on a basis which will distribute the expenses equitably. Credits to this account shall be made in such detail as to permit ready analysis thereof.

ITEMS

- (1) Books and stationery.
- (2) Building service.
- (3) Communication service.
- (4) Depreciation of transportation equipment.
- (5) Feed and bedding for horses and mules.
- (6) Fuel and lubricants for vehicles (including sales and excise taxes thereon).
- (7) Freight, express, drayage, etc., on fuel, repair parts, etc.
- (8) Heat, light, and power for garage and garage office.
- (9) Injuries and damages.
- (10) Insurance on garage equipment and transportation equipment, including public liability and property damage.
- (11) License fees for vehicles and drivers.
- (12) Maintenance of office furniture and equipment.
- (13) Maintenance of transportation and garage equipment.
- (14) Office supplies, postage, etc.

- (15) Operation of garages and stables.
- (16) Pay and expenses of drivers, mechanics, etc.
- (17) Rent of garage buildings and grounds.
- (18) Rent of vehicles and other rents.
- (19) Taxes, direct.
- (20) Tires, tubes and chains.

904. Laboratory Expenses--Clearing

A. This account shall include the cost of supervision, pay of chemists, engineers, assistants and other employees, and expenses of such employees, engaged in the operation and maintenance of steam general laboratories.

B. If a laboratory is maintained at a production station in connection with the operation of the station, the costs incident to its operation and maintenance shall be charged to the appropriate production expense account.

C. This account shall be cleared by apportioning on an equitable basis the total of the expenses to operating expense, steam plant, and other accounts benefited. Credits to this account shall be made in such detail as to permit ready analysis thereof.

ITEMS

- (1) Books and stationery.
- (2) Building service.
- (3) Charts.
- (4) Chemists and their assistants, pay and expenses of.
- (5) Communication service.
- (5a) Depreciation of laboratory equipment.
- (6) Heat, light and power.
- (7) Injuries and damages.
- (7a) Insurance on laboratory equipment and supplies.
- (8) Maintenance of equipment.
- (9) Periodicals.
- (10) Rents.
- (11) Taxes, direct.
- (12) Testing supplies.

Note: The mandatory use of this account may be suspended upon order of the commission if equivalent information is readily obtainable from other records of the utility.

905. Shop Expenses--Clearing

A. This account shall include the cost of supervision, labor and expenses incurred in the operation and maintenance of steam general shops of the utility.

B. This account shall be cleared by apportionment to operating expense, steam plant, or other accounts benefited on a basis which will distribute the expenses equitably. Credits to this account shall be made in such detail as to permit ready analysis.

ITEMS

- (1) Books and stationery.
- (2) Building service.
- (3) Collecting and handling scrap materials.
- (4) Communication service.
- (4a) Depreciation of shop equipment.
- (5) Heat, light and power.
- (6) Injuries and damages.
- (6a) Insurance on shop equipment and supplies.
- (7) Repairs to shop equipment.
- (8) Rents.
- (9) Pay and expenses of superintendents, machinists and other employees in shops.
- (10) Taxes, direct.

906. Tools and Work Equipment Expenses--Clearing

A. This account shall include the cost of supervision, labor and expenses incurred in the operation and maintenance of the general tools and work equipment of the steam department, including direct taxes and depreciation on such equipment.

B. This account shall be cleared by apportionment to operating expense, utility plant or other appropriate accounts on a basis which will distribute the expenses equitably according to the use of the equipment. Credits to this account shall be made in such detail as to permit ready analysis thereof.

ITEMS

- (1) Books and stationery.
- (2) Building service.
- (3) Communication service.
- (4) Depreciation of tools and work equipment.
- (5) Fuel and lubricants for equipment including sales and excise taxes thereon.
- (6) Injuries to persons and damages to property of others in the operation of tools and work equipment.
- (7) Insurance.
- (8) License fees for equipment.
- (9) Pay and expenses of operators, mechanics, etc.
- (10) Rent of tools and work equipment.

(11) Repairs to tools and work equipment.

(12) Shop expenses.

(13) Taxes, direct.

Note: The use of this account is optional. If not used, maintenance of the equipment, to the extent applicable to operating expenses, shall be charged to account 802.4, Maintenance of Miscellaneous Equipment.

907. Building Service--Clearing

A. This account shall include the cost of operating and maintaining offices and buildings whether owned or rented from others, when such expenses are not allocated as they are incurred to the operating expense or other accounts benefited.

B. This account shall be cleared by apportionment to the appropriate accounts on the basis of the use made of the property.

C. A separate subdivision of this account shall be kept for each building operated.

ITEMS

(1) Cleaning service and supplies.

(2) Communication service.

(3) Elevator service.

(4) Fuel.

(5) Heat.

(6) Injuries and damages.

(7) Insurance

(8) Janitor service, including rent for space occupied as living quarters.

(9) Light.

(10) Maintenance of buildings.

(11) Pay and expenses of superintendents.

(12) Power.

(13) Refrigeration.

(14) Rents.

(15) Towels.

(16) Water.

.SO DOC 16B-480.1

NYCRR

Section 480.1 Utility contract and procurement procedures.

(a) Every steam corporation subject to the jurisdiction of this Commission with annual gross operating revenues in excess of \$5,000,000 shall file, in accordance with the requirements of § 3.5 of this Title, with this Commission the procedures which govern the contracting for and procurement of services, equipment or materials to be used in its utility operations. The statements shall:

(1) Describe the circumstances in which cost estimates will be prepared and the procedures for awarding a contract which exceeds such an estimate. Such estimates, when prepared:

(i) Shall be related to market conditions and trends as well as the utility's own experience; and

(ii) Where competitive bidding is employed, shall remain confidential until after the bids are opened.

(2) Where competitive bidding is employed, specify the procedures used in preparing and maintaining lists of qualified bidders by geographical area, type of material or service provided, and degree of capability, including:

(i) The criteria used for including or excluding bidders;

(ii) A description of the circumstances in which all bidders on such a list will not be solicited in instances where the utility uses competitive bidding; and

(iii) A provision that in the absence of such a list, all requests to be allowed to bid that are not honored, shall be reviewed within the utility.

(3) Where competitive bidding is employed, specify the procedure to be employed to ensure that sealed bids are opened at the time and place specified.

(4) Specify the procedure employed in making awards in the absence of bids or, where competitive bidding is employed, to a person other than the low bidder.

(5) Specify the procedures employed in reviewing contract expenditures, relating such expenditures to any cost estimate, the amount of the award and existing market conditions.

(6) Include a requirement for disclosure to the utility of any ownership or beneficial interest in potential suppliers by employees involved in specifying or procuring services, equipment and materials, which requirement shall provide that no employee in the purchasing department nor anyone with authority to review or approve a purchasing decision shall have such an interest, except in accordance with such rules as the utility may develop and file with this Commission.

.SO DOC 16B-480.2 NYCRR

480.2 Filing of changes in procedures.

Each such electric, gas and steam corporation shall file with this commission any change in these procedures at least 30 days before they are to be effective, unless otherwise authorized by this commission.

PART 481

CONTRACTS OR AGREEMENTS FOR THE CONSTRUCTION,
IMPROVEMENT,

EXTENSION OR MAINTENANCE OF UTILITY PLANTS

(Statutory authority: Public Service Law, § 115)

Sec.

481.1 Filing of proposed contract

481.2 Subcontract on cost-plus basis

481.3 Emergency contract

481.4 Quarterly filing of contract

481.5 Waiver of rule

.SO DOC 16B-481.1 NYCRR

Section 481.1 Filing of proposed contract.

(a) Every public utility company subject to the jurisdiction of this commission shall file with, in accordance with the requirements of § 3.5 of this Title, with this Commission one copy of every proposed cost-plus contract or agreement, including those contracts or agreements in which the payment to be made by the utility is based on time and material consumed regardless of the number of units completed, for the construction, improvement or extension of its plant, works or system exceeding in amount \$100,000 in any calendar year, and a list of any other offers received, and such contract or agreement shall not become effective until it has been on file with this commission for 30 days, or until the commission has notified the utility that such contract or agreement may be made effective immediately. If during the 30 day period, the Commission determines that it is in the public interest for the contract or agreement for the work proposed to be performed to be let after public bidding, the Commission will notify the public utility

company, and the filed contract or agreement will not become effective. In such circumstances the public utility shall proceed to make a public offering of the proposed work in accordance with the direction of the Commission.

(b) When the accumulated amount of all other such contracts or agreements awarded to a single contractor in any calendar year has exceeded \$100,000, a list of such contracts, including any other offers received, shall be filed, in accordance with the requirements of § 3.5 of this Title, with the Commission by March 1 of the succeeding year.

.SO DOC 16B-481.2

NYCRR

481.2 Subcontract on cost-plus basis. In view of the fact that a so-called subcontract covering any part of the work to be performed under a cost-plus contract or agreement entered into by a public utility company is, in effect, the contract or agreement of the public utility company within the meaning of § 115 of the Public Service Law, every such subcontract on a cost-plus basis, proposed to be let under a principal contract or agreement which is subject to § 481.1 hereof, shall be filed, in accordance with the requirements of § 3.5 of this Title, with the commission in accordance with the requirements of provisions of such section. All such contracts or agreements shall contain suitable provisions to give effect to the provisions of this Part. This section shall not apply to a subcontract which provides by its terms that the maximum payment thereunder shall not exceed the sum of \$5,000.

.SO DOC 16B-481.3

NYCRR

481.3 Emergency contract. In case a storm, flood, accident or similar emergency requires that a contract or agreement be made without complying with the foregoing provisions of this Part in order to maintain or restore the company's service, immediate notice shall be given to the Commission by telephone of the making of such contract or agreement, and a copy thereof shall be filed, in accordance with the requirements of § 3.5 of this Title, as soon as possible, but not later than 10 days after the making thereof, and such contract or agreement shall be exempted from the other provisions of this Part.

.SO DOC 16B-481.4

NYCRR

481.4 Quarterly filing of contract.

Every public utility company subject to the jurisdiction of this commission shall file with this commission quarterly, one copy of every contract or agreement for the construction, improvement, extension or maintenance of its plant, works or system exceeding in amount \$1,000,000 in any calendar year, and a list of any other offers received.

.SO DOC 16B-481.5
481.5 Waiver of rule.

NYCRR

Any public utility company may apply to this commission for a waiver or modification of all or part of the requirements of this Part upon a showing that compliance therewith would be impracticable or unduly burdensome in connection with a particular project, contract or agreement.

.SO DOC 16B-APB1

NYCRR

APPENDIX B-1

(cf. Part 233)

Utility Name

Certificate of Compliance
New Residential Construction

The undersigned certifies that the
Utility Name

Certificate of Compliance
New Residential Construction

The undersigned certifies that the
-----1-or 2-family residence -----multi-family residence
at (location)-----
is or will be, not later than 30 days after time of occupancy, in compliance with one of the following statute provisions (check one):

- Part 1: E101.6]
- Part 3]New York State Energy Conservation
- Part 4]Construction Code
- Part 5]
- Appendix A, Opinion 77-10, Minimum Insulation Standards, New York State Public Service Commission (applies only to buildings on which construction began between April 1, 1977 and January 1, 1979).

It is understood that electric and/or gas service will, depending on the applicable circumstances, not be connected, be subject to a 25-percent surcharge on the utility bill until all violation are eliminated, or be disconnected, if, upon inspection, the structure is found not to be in compliance with the conditions set forth above.

The undersigned certifies that a properly executed copy of this certificate will be delivered to the owner prior to closing, and further attests that all statements and representations contained in this certificate are true and accurate.

16 NYCRR 10.3 for applicable editions.

API 5L -- Steel Pipe, "API Specification for Line Pipe" (1991).

ASTM Specification A53/A53M -- Steel Pipe, "Standard Specification for Pipe, Steel Black and Hot-Dipped, Zinc-Coated, Welded and Seamless" (1990).

ASTM Specification A106 -- Steel pipe, "Standard Specification for Seamless Carbon Steel Pipe for High Temperature Service" (1991).

ASTM Specification A333 /A333M- Steel pipe, "Standard Specification for Seamless and Welded Steel Pipe for Low Temperature Service" (1991).

ASTM A381 -- Steel pipe, "Standard Specification for Metal-Arc-Welded Steel Pipe for Use with High-Pressure Transmission Systems" (1989).

ASTM Specification A671 -- Steel pipe, "Standard Specification for Electric-Fusion-Welded Pipe for Atmospheric and Lower Temperatures" (1989).

ASTM Specification A672 -- Steel pipe, "Standard Specification for Electric-Fusion-Welded Steel Pipe for High-Pressure Service at Moderate Temperatures" (1989).

ASTM Specification A691 - Steel pipe, "Standard Specification for Carbon and Alloy Steel Pipe, Electric-Fusion-Welded for High Pressure Service at High Temperatures"

ASTM Specification B88 -- Copper tubing, "Standard Specification for Seamless Copper Water Tube" (1989).

ASTM D2513 -- Thermoplastic pipe and tubing, "Standard Specification for Thermoplastic Gas Pressure Pipe, Tubing, and Fittings" (1990).

ASTM D2517 -- Thermosetting plastic pipe and tubing, "Standard Specification for Reinforced Epoxy Resin Gas Pressure Pipe and Fittings" (1981).

II. Steel pipe of unknown or unlisted specification.

A. Bending properties. For pipe 2 inches (51 millimeters) or less in diameter, a length of pipe must be cold bent through at least 90 degrees around a cylindrical mandrel that has a diameter 12 times the diameter of the pipe, without developing cracks at any portion and without opening the longitudinal weld.

For pipe more than 2 inches (51 millimeters) in diameter, the pipe must meet the requirements of the flattening tests set forth in ASTM Specification A53/A53M (as described in section 10.3 of this Title), except that the number of tests must be at least equal to the minimum required in paragraph II-D of this appendix to determine yield strength.

B. Weldability. A girth weld must be made in the pipe by a welder who is qualified under this Part. The weld must be made under the most

severe conditions under which welding will be allowed in the field and by means of the same procedure that will be used in the field. On pipe more than 4 inches (102 millimeters) in diameter, at least one test weld must be made for each 100 lengths of pipe. On pipe 4 inches (102 millimeters) or less in diameter, at least one test weld must be made for each 400 lengths of pipe. The weld must be tested in accordance with API Standard 1104. If the requirements of API Standard 1104 cannot be met, weldability may be established by making chemical tests for carbon and manganese, and proceeding in accordance with section IX of the ASME Boiler and Pressure Vessel Code. The same number of chemical tests must be made as are required for testing girth weld.

C. Inspection. The pipe must be clean enough to permit adequate inspection. It must be visually inspected to ensure that it is reasonably round and straight and there are no defects which might impair the strength or tightness of the pipe.

D. Tensile properties. If the tensile properties of the pipe are not known, the minimum yield strength may be taken as 24,000 PSI (165 MPa) or less, or the tensile properties may be established by performing tensile tests as set forth in API Specification 5L. All test specimens shall be selected at random and the following number of tests must be performed:

Number of Tensile Tests-All Sizes

10 lengths or less..... 1 set of tests for each length.

11 to 100 lengths..... 1 set of tests for each 5 lengths,
but not less than 10 tests.

Over 100 lengths..... 1 set of tests for each 10 lengths,
but not less than 20 tests.

If the yield-tensile ratio, based on the properties determined by those tests, exceeds 0.85, the pipe may be used only as provided in subdivision 255.55(c).

III. Steel pipe manufactured before November 12, 1970, to earlier editions of listed specifications. Steel pipe manufactured before November 12, 1970, in accordance with a specification of which a later edition is listed in section I of this Appendix, is qualified for use under this Part if the following requirements are met:

A. Inspection. The pipe must be clean enough to permit adequate inspection. It must be visually inspected to ensure that it is reasonably round and straight and that there are no defects which might impair the strength or tightness of the pipe.

B. Similarity of specification requirements. The edition of the listed specification under which the pipe was manufactured must have

substantially the same requirements with respect to the following properties as a later edition of that specification listed in section I of this appendix:

(1) Physical (mechanical) properties of pipe, including yield and tensile strength, elongation, and yield to tensile ratio, and testing requirements to verify those properties.

(2) Chemical properties of pipe and testing requirements to verify those properties.

C. Inspection or test of welded pipe. On pipe with welded seams, one of the following requirements must be met:

(1) The edition of the listed specification to which the pipe was manufactured must have substantially the same requirements with respect to nondestructive inspection of welded seams and the standards for acceptance or rejection and repair as a later edition of the specification listed in section I of this Appendix.

(2) The pipe must be tested in accordance with this Part to at least 1.25 times the maximum allowable operating pressure if it is to be installed in a class 1 location and to at least 1.5 times the maximum allowable operating pressure if it is to be installed in a class 2, 3, or 4 location. Notwithstanding any shorter time period permitted under this Part, the test pressure must be maintained for at least 8 hours.

.SO DOC 16B-AP14C

NYCRR

APPENDIX 14-C

END PREPARATION FOR BUTT WELDING SECTIONS HAVING UNEQUAL

THICKNESSES AND UNEQUAL SPECIFIED YIELD STRENGTHS

Explanatory Notes

General

1. The sketches in Figure 523-B illustrate acceptable preparations for joining pipe ends by butt welding for materials having unequal wall thicknesses and/or with unequal strengths (minimum specified yield strength).

2. The thickness of the sections to be joined, beyond the joint design area, shall comply with the design requirements of this Part.

3. When the minimum specified yield strengths of the sections to be joined are unequal, the deposited weld metal shall have mechanical properties at least equal to those of the section having the higher strength.

4. The transition between ends of unequal thickness may be accomplished by taper or welding as illustrated or by means of a prefabricated transition ring.

5. Sharp notches or grooves at the edge of the weld where it joins a slanted surface shall be avoided.

6. For joining unequal thicknesses of equal specified yield strengths, the rules given herein apply, except there is no minimum angle limit to the taper.

7. THE MAXIMUM THICKNESS t_{d} FOR DESIGN PURPOSES SHALL NOT BE GREATER THAN $1.5t$.

Internal Diameters Unequal

A. For piping to operate at hoop stresses of less than 20 percent of specified minimum yield strength, if the nominal wall thicknesses of the adjoining ends do not vary more than 1/8-inch, no special treatment is necessary provided adequate penetration and bond is accomplished in welding. If the offset is greater than 1/8-inch the following paragraphs will apply.

FOR STRESS LEVELS ABOVE 20 PERCENT OF THE MINIMUM SPECIFIED YIELD STRENGTH.

B. If the nominal wall thicknesses of the adjoining ends do not vary more than 3/32 inch, no special treatment is necessary provided full penetration and bond is accomplished in welding. See sketch (a).

C. Where the nominal internal offset is more than 3/32 inch and there is no access to the inside of the pipe for welding, the transition must be made by a taper cut on the inside end of the thicker section. See sketch (b). The taper angle shall not be steeper than 30 deg. nor less than 14 deg.

D. Where the nominal internal offset is more than 3/32 inch, but does not exceed 1/2 the thinner section, and there is access to the inside of the pipe for welding, the transition may be made with a tapered weld as shown in sketch (c). The land on the thicker section must be equal to the offset plus the land on abutting section.

E. Where the nominal internal offset is more than 1/2 the thinner section, and there is access to the inside of the pipe for welding, the transition may be made with a taper cut on the inside end of the thicker section as shown in sketch (b), or by a combination taper weld to 1/2 the thinner section and a taper cut from that point as shown in sketch (d).

External Diameters Unequal

F. Where the external offset does not exceed 1/2 the thinner section, the transition may be made by welding as shown by sketch (e), provided the angle of rise of the weld surface does not exceed 30 deg. and both

- (4) A voltage at least as negative (cathodic) as that originally established at the beginning of the Tafel segments of the E-log-I curve. This voltage must be measured in accordance with section IV of this Appendix.
- (5) A net protective current from the electrolyte into the structure surface as measured by an earth current technique applied at predetermined current discharge (anodic) points of the structure.

B. Aluminum structures.

- (1) Except as provided in subparagraphs (3) and (4) of this paragraph, a minimum negative (cathodic) voltage shift of 150 millivolts, produced by the application of protective current. The voltage shift must be determined in accordance with sections II and IV of this Appendix.
- (2) Except as provided in subparagraphs (3) and (4) of this paragraph, a minimum negative (cathodic) polarization voltage shift of 100 millivolts. This polarization voltage shift must be determined in accordance with sections III and IV of this Appendix.
- (3) Notwithstanding the alternative minimum criteria in subparagraphs (1) and (2) of this paragraph, aluminum, if cathodically protected at voltages in excess of 1.20 volts as measured with reference to a copper-copper sulfate half cell, in accordance with section IV of this Appendix, and compensated for the voltage (IR) drops other than those across the structure-electrolyte boundary may suffer corrosion resulting from the build-up of alkali on the metal surface. A voltage in excess of 1.20 volts may not be used unless previous test results indicate no appreciable corrosion will occur in the particular environment.
- (4) Since aluminum may suffer from corrosion under high pH conditions, and since application of cathodic protection tends to increase the pH at the metal surface, careful investigation or testing must be made before applying cathodic protection to stop pitting attack on aluminum structures in environments with a natural pH in excess of 8.

C. Copper structures. A minimum negative (cathodic) polarization voltage shift of 100 millivolts. This polarization voltage shift must be determined in accordance with sections III and IV of this Appendix.

D. Metals of different anodic potentials. A negative (cathodic) voltage, measured in accordance with section IV of this Appendix, equal

to that required for the most anodic metal in the system must be maintained. If amphoteric structures are involved that could be damaged by high alkalinity covered by subparagraphs (3) and (4) of paragraph B of this section, they must be electrically isolated with insulating flanges or the equivalent.

II. Interpretation of voltage measurement. Voltage (IR) drops other than those across the structure-electrolyte boundary must be considered for valid interpretation of the voltage measurement in paragraphs A(1) and (2) and paragraph B(1) of section I of this Appendix.

III. Determination of a polarization voltage shift. The polarization voltage shift must be determined by interrupting the protective current and measuring the polarization decay. When the current is initially interrupted, an immediate voltage shift occurs. The voltage reading after the immediate shift must be used as the base reading from which to measure polarization decay in paragraphs A(3), B(2) and C of section I of this Appendix.

IV. Reference half cells.

A. Except as provided in paragraphs B and C of this section, negative (cathodic) voltage must be measured between the structure surface and a saturated copper-copper sulfate half cell contacting the electrolyte.

B. Other standard reference half cells may be substituted for the saturated copper-copper sulfate half cell. Two commonly used reference half cells are listed below along with their voltage equivalent to -0.85 volt as referred to a saturated copper-copper sulfate half cell:

(1) Saturated KCl calomel half cell: -0.78 vol*.

* So in original. "vol" should be "volt".

(2) Silver-silver chloride half cell used in sea water: -0.80 volt.

C. In addition to the standard reference half cells, an alternate metallic material or structure may be used in place of the saturated copper-copper sulfate half cell if its potential stability is assured and if its voltage equivalent referred to a saturated copper-copper sulfate half cell is established.

APPENDIX 14-E

Guidance on Determining High Consequence Areas and on Carrying out Requirements in the Integrity Management Rule

I. Guidance on Determining a High Consequence Area

To determine which segments of an operator's transmission pipeline

system are covered for purposes of the integrity management program requirements, an operator must identify the high consequence areas. An operator must use the methods defined in paragraph (1) or (2) of subdivision (f) of section 255.903 of this Part to identify a high consequence area. An operator may apply one method to its entire pipeline system, or an operator may apply one method to individual portions of the pipeline system. (Refer to Figure 1 below for a diagram of a high consequence area.)

II. Guidance on Assessment Methods and Additional Preventive and Mitigative Measures for Transmission Pipelines

(a) Table 1 below gives guidance to help an operator implement requirements on additional preventive and mitigative measures for addressing time dependent and independent threats for a transmission pipeline operating below 30% SMYS not in a High Consequence Area (i.e. outside of potential impact circle) but located within a Class 3 or Class 4 Location.

(b) Table 2 below gives guidance to help an operator implement requirements on assessment methods for addressing time dependent and independent threats for a transmission pipeline in a High Consequence Area.

(c) Table 3 below gives guidance on preventative & mitigative measures addressing time dependent and independent threats for transmission pipelines that operate below 30% SMYS, in High Consequence Areas.

Table 1

Preventive and Mitigative Measures for Transmission Pipelines Operating Below 30% SMYS not in HCAs but in Class 3 and 4 Locations

APPENDIX 14-F

QUALIFICATION OF WELDERS FOR CERTAIN DISTRIBUTION MAINS AND SERVICE

LINES

I. Basic test. The test is made on pipe 12 inches or less in diameter. The test weld must be made with the pipe in a horizontal fixed position so that the test weld includes at least one section of overhead position welding. The beveling, root opening, and other details must conform to the specifications of the procedure under which the welder is being qualified. Upon completion, the test weld is cut into four coupons and subjected to a root bend test. If, as a result of this test, two or more of the four coupons develop a crack in the weld material, or between the weld material and base metal, that is more than 1/8-inch long in any direction, the weld is unacceptable. Cracks that occur on the corner of the specimen during testing are not considered. A welder who successfully passes a butt-weld qualification test under this section

shall be qualified to weld on all pipe diameters less than or equal to 12 inches.

II. Additional tests for welders of service line connections to mains. A service line connection fitting is welded to a pipe section with the same diameter as a typical main. The weld is made in the same position as it is made in the field. The weld is unacceptable if it shows a serious undercutting or if it has rolled edges. The weld is tested by attempting to break the fitting off the run pipe. The weld is unacceptable if it breaks and shows incomplete fusion, overlap, or poor penetration at the junction of the fitting and run pipe.

III. Periodic tests for welders of small service lines. Two samples of the welder's work, each about 8 inches long with the weld located approximately in the center, are cut from steel service line and tested as follows:

(1) One sample is centered in a guided bend testing machine and bent to the contour of the die for a distance of 2 inches on each side of the weld. If the sample shows any breaks or cracks after removal from the bending machine, it is unacceptable.

(2) The ends of the second sample are flattened and the entire joint subjected to a tensile strength test. If failure occurs adjacent to oil in the weld metal, the weld is unacceptable. If a tensile strength testing machine is not available, this sample must also pass the bending test prescribed in subparagraph (1) of this paragraph.

EXPLANATION: matter in brackets is subscript

APPENDIX 14-G

EXAMPLES OF ILLUSTRATING THE REINFORCEMENT OF WELDED BRANCH CONNECTIONS

Example 1

An 8 inch outlet is welded into a 24 inch header. The header material is API 5LX 46 with 5/16 inch wall. The outlet is API 5L Grade B (Seamless) Sched. 40 with 0.322 inch wall. The working pressure is 650 PSI. The Class Location is 1. The joint efficiency is 1.00. The temperature is 100μ F. Design Factors F=0.60, E=1.00, T=1.00. For dimensions see Figure for Example 1, Appendix 14-G.

Header:

Nominal wall thickness:

$$t = PD = \frac{650 \times 24}{2 \times 46000 \times 0.60 \times 1.00 \times 1.00} = 0.283 \text{ inch}$$

$$\text{Excess thickness in header wall (H-t)} = 0.312 - 0.283 = 0.029$$

inch

Outlet:

Nominal wall thickness:

$$t[b] = \frac{650 \times 8.625}{2 \times 35000} = 0.133 \text{ inch}$$

$$2 \times 35000 \times 0.60 \times 1.00 \times 1.00$$

Excess thickness in outlet wall $(B-t[b]) = 0.322-0.133 = 0.189$ inch

$d = \text{diameter of opening} = 8.625-(2 \times 0.322) = 7.981$ inch

Reinforcement required.

$$A[R] = d \times t = 7.981 \times 0.283 = 2.26 \text{ square inch}$$

Reinforcement provided:

$$A[1] = (H-t)d = 0.029 \times 7.981 = 0.23 \text{ square inch}$$

Effective area in outlet:

Height (L) $2-1/2 B + M$ (assume $1/4$ inch pad) $= 2-1/2 \times 0.322 + 0.25 = 1.05$ inches or $2-1/2 H = 2.5 \times 0.312 = 0.78$ inch.

Use 0.78 inch.

$$A[2] = 2(B-t[b])L = 2 \times 0.189 \times 0.78 = 0.295 \text{ sq. in.}$$

This must be multiplied by $35000/46000$

$$\text{Effective } A[2] = 0.295 \times 35000/46000 = 0.22 \text{ sq. in.}$$

$$46000$$

$$\text{Required area } A[3] = A[R] - A[1] - A[2] =$$

$$2.26 - 0.23 - 0.22 = 1.81 \text{ sq. in.}$$

Use reinf. pl. $1/4$ inch thick (minimum practicable) x 15.5 inch diameter

$$\text{Area } (15.50 - 8.62) \times 0.25 = 1.72 \text{ sq. in.}$$

Fillet welds (assuming two $1/4$ inch welds each side)

$$0.25 \times 0.25 \times 0.50 \times 2 \times 2 = 0.12 \text{ sq. in.}$$

$$\text{Total } A[3] \text{ provided} = 1.84 \text{ sq. in.}$$

Example 2

A 16 inch outlet is welded into a 24 inch header. The header material is API 5LX46 with $5/16$ inch wall. The outlet is API 5L Grade B (Seamless) Sched. 20 with 0.312 wall. The working pressure is 650 PSI. The Class Location is 1. The reinforcement must be of the complete encirclement type. The joint efficiency is 1.00. The temperature is 100μ F. Design Factors $F = 0.60$, $E = 1.00$, $T = 1.00$. For dimensions see Figure for Example 2 in Appendix 14-G.

Header:

Nominal wall thickness:

$$t = PD = \frac{650 \times 24}{2 \times 35000} = 0.283 \text{ inch}$$

$$2SFET \quad 2 \times 46000 \times 0.60 \times 1.00 \times 1.00$$

Excess thickness is header wall (H-t) = 0.020 inch

Outlet:

Nominal wall thickness:

$$t[b] = \frac{650 \times 16}{46000} = 0.248 \text{ inch}$$

$$\frac{2 \times 35000 \times 0.60 \times 1.00 \times 1.00}{46000}$$

Excess thickness in outlet wall (B-t[b]) = 0.312 - 0.248 = 0.064 inch

$$d = \text{diameter of opening} = 16.000 - (2 \times 0.312) = 15.376 \text{ inches}$$

Reinforcement required:

$$A[R] = d \times t = 15.376 \times 0.283 = 4.35 \text{ sq. in.}$$

Reinforcement provided:

$$A[1] = (H - t)d = 0.029 \times 15.376 = 0.44 \text{ sq. in.}$$

Effective area in outlet:

$$\text{Height (L)} \quad 2\text{-}1/2 \text{ B} + \text{M (assume } 5/16 \text{ inch pl.)} = 2.5 \times 0.312 + 0.312 = 1.09 \text{ inch or } 2\text{-}1/2 \text{ H} = 2.5 \times 0.312 = 0.78 \text{ inch.}$$

Use 0.78 inch

$$A[2] = 2(B-t[b]) L = 2 \times 0.064 \times 0.78 = 0.10 \text{ sq. in.}$$

This must be multiplied by 35000/46000

$$\text{Effective } A[2] = 0.10 \times 35000 / 46000 = 0.08 \text{ sq. in.}$$

$$\frac{46000}{46000}$$

$$\text{Required area } A[3] = A[R] - A[1] - A[2] =$$

$$4.35 - 0.44 - 0.08 = 3.83 \text{ sq.}$$

in.

Approx. required thickness of reinforcement

$$3.83 / (30 - 16) = 0.27 \text{ inch}$$

Use 5/16 inch pl. net reqd. length (neglecting welds)

$$3.83 / 0.312 = 12.3 \text{ inch}$$

Use plate 29 inches long

$$A[3] = 0.312 \times (29 - 16) = 4.05 \text{ sq. in.}$$

Two 1/4 inch welds to outlet

$$2 \times 0.25 \times 0.25 \times 0.50 = 0.06 \text{ sq. in.}$$

$$A[3] \text{ provided} = 4.11 \text{ sq. in.}$$

The use of end welds is optional.

- (2) Actual sendout, mean temperature and the gas supply for the peak day of the previous winter. During the season, was service to any customer curtailed or interrupted to conserve the gas supply?
- (3) Estimated sendout, assumed mean temperature and the gas supply (including Federal Power Commission docket numbers under which each increment of the supply was authorized) for the peak day of the coming winter.
- (4) Estimated 12-month sendout and the gas supply (including Federal Power Commission docket numbers under which each increment of the supply was authorized) for the coming heating season.
- (5) Has a procedure been established for curtailing industrial loads when necessary to do so?

STATE OF NEW YORK

PUBLIC SERVICE COMMISSION

REPORT OF SPECIFICATIONS OF PROPOSED CONSTRUCTION OF

GAS PIPELINE TO BE SUBJECTED TO PRESSURE OF 125 PSIG OR MORE

255.302

(Submitted in Triplicate)

Gas Corporation _____ Date _____

Route:
From _____ To _____

New Construction _____ Reconstruction _____

Counties traversed _____

Towns traversed _____

Cities traversed _____

Incorporated villages traversed _____

Estimated date: Start of construction _____

Completion of construction _____

Identity of line (gas corporation name or number) _____

Required filing: The following maps, sketches, and drawings shall be filed with, and as part of, this report:

- (a) Two sets of current U.S. Geological Survey maps (7 1/2 or 15-minute) sufficient to show the entire route of the proposed construction or reconstruction and an area of one mile on either side of the route. The route of the construction or reconstruction shall be clearly indicated thereon, and
- (b) Two sets of strip maps and design drawings showing details of the proposed construction or reconstruction.

NOTE: Where more than one construction design factor is used, the specifications relative to each shall be separately listed.

Where necessary, supply the requested information on attached sheets identified by the Roman numeral, number, and letter designation of the item on this form.

I. General

- 1. Length
- 2. Nominal outside diameter, "D", inches
- 3. Nominal wall thickness, "t", inches
- 4. Type and/or grade of pipe
- 5. Manufacturer of steel

6. Manufacturer of pipe
7. Type of longitudinal joint
8. Specified minimum yield strength, psi
9. Nominal ultimate strength, psi
10. Is pipe new or used?
11. If used pipe is employed, describe the inspection and reconditioning
12. Mill test pressure, psi
13. Maximum certified operating pressure, psi
14. Calculated pipe stress (hoop stress)
Where $PD = \text{stress, psi}$
 $2t$
15. Ratio of pipe stress to yield strength, percent
16. Check of pipe specifications:
 - (a) Are the physical and chemical specifications of pipe to be verified by outside laboratories?
 - (b) By whom?
17. (a) By class locations, what percentage of the welds are to be radiographed?
(b) By whom?
(c) How will gas corporation certify the radiograph technician?

II. Fabrication

What inspection procedures will be followed for detection of gouges, grooves, and dents for:

- (a) Factory coated pipe
- (b) Field coated pipe

III. Railroad, Road, and Water Crossings

1. Railroad crossings
 - (a) List, giving location
 - (b) Indicate whether cased or not; if not cased, provide reason
2. Street or road crossings
 - (a) List, giving location
 - (b) Indicate whether cased or not
 - (c) Indicate if heavier wall carrier pipe used
3. Lake, river, stream, or creek crossings
 - (a) List, giving location
 - (b) Describe any special construction precautions to be followed
4. Pipeline encroachments
 - (a) List any encroachments to railroads by location
 - (b) List any encroachments to roads in which special construction precautions will be employed; identify by

location

IV. Valves

1. Manual valves
 - (a) Number of sectionalizing valves
 - (b) Spacing of sectionalizing valves
2. Type, make, and location of any automatic valves to be used
3. Blowdown procedure
 - (a) Describe method
 - (b) Number, size, and location of blowdown valves
 - (c) Estimated blowdown time for each section of pipeline

V. Minimum cover

If minimum prescribed cover cannot be maintained, indicate location, nature of problem, and special precautions to be observed

VI. Exposed piping and self-supported spans

other than on gas corporation property

1. Number of instances
2. Location of each
3. Reasons for exposed piping
4. Total length in each instance
5. Length of each self-supported span
6. Precautions taken (signs, fences, etc.)
7. What special precautions taken

VII. Corrosion control

1. Type of field coating:
 - (a) For pipe (if not factory coated)
 - (b) For girth welds and fittings
2. Type of test of coating before backfill
3. Type of test of coating after backfill
4. Proposed cathodic protection

VIII. Pressure and leakage tests

1. Test pressure
2. Test medium
3. Duration of test
4. Length of test sections
5. What is the source of water supply used?
6. How and where is water disposed of after test?

IX. Purging of pipelines and mains

Description of purging procedure by class location

X. Route of Pipeline

1. Has gas corporation obtained necessary R/W from each party having interest in R/W? If not, what is status?

2. Has gas corporation obtained formal approval and all necessary permits from governmental agencies? If not, what is status?

XI. Class locations

Supply full information for entire length of pipeline to indicate basis of determination of class location of each segment thereof in accordance with 16 NYCRR 255.5.

XII. Odorizing provisions

1. Type of equipment to be installed
2. Type of odorant to be added
3. Threshold perception to be achieved (percent of L.E.L.)

Required filing: The following maps, sketches, and drawings shall be filed with and as a part of this report:

(a) Three sets of current U.S. Geological Survey Maps (7-1/2 or 15-minute) sufficient to show the entire route of the proposed construction or reconstruction and an area of one mile on either side of the route. The route of the construction or reconstruction shall be clearly indicated thereon.

(b) Three sets of strip maps and design drawings showing details of the proposed construction or reconstruction.

* * *

Note: Where more than one construction type design factor is used, the specifications relative to each shall be separately listed. Where necessary, supply the requested information on attached sheets identified by the Roman numeral, number, and letter designation of the item on this form.

* * *

I. GENERAL

1. Length

2. Nominal outside diameter, "D," inches
3. Nominal wall thickness, "t," inches
4. Type and/or grade of pipe
5. Manufacturer of steel
6. Manufacturer of pipe
7. Type of longitudinal joint
8. Specified minimum yield strength, psig
9. Nominal ultimate strength, psig
10. Is pipe new or used
11. If used pipe is employed, describe the inspection and reconditioning
12. Mill test pressure, psig
13. Certified maximum operating pressure, psig
14. Calculated pipe stress (hoop stress) psig
Where $PD = \text{stress} \times 2t$
15. Ratio of pipe stress to yield strength, percent
16. Check of pipe specifications:
 - (a) Are the physical and chemical specifications of pipe to be verified by outside laboratories?
 - (b) By whom?
17. (a) By location, what percentage of the welds are to be radiographed?
(b) By whom?

II. FABRICATION (SEE 16 NYCRR 258.7)

What inspection procedures will be followed for detection of gouges, grooves, and dents for:

- (a) Factory coated pipe
- (b) Field coated pipe

III. RAILROAD, ROAD, AND WATER CROSSINGS (SEE 16 NYCRR 258.5)

1. Railroad crossings
 - (a) List, giving location
 - (b) Indicate whether cased or not; if not cased, provide basis
2. Road crossings
 - (a) List, giving location
 - (b) Indicate whether cased or not
 - (c) Indicate if heavier wall carrier pipe is used
3. Lake, river, stream, or creek crossings
 - (a) List, giving location
 - (b) Describe any special construction precautions to be followed
4. Pipeline encroachments

- (a) List any encroachments to railroads, by location
- (b) List any encroachments to roads, in which special construction precautions will be employed; identify by location

IV. VALVES (SEE NYCRR 258.12)

- 1. Manual valves
 - (a) Number of sectionalizing valves
 - (b) Spacing of sectionalizing valves
- 2. Type, make, and location of any automatic valves to be used

V. MINIMUM COVER AND CLEARANCE (SEE 16 NYCRR 258.6)

If minimum prescribed cover and clearance cannot be maintained, indicate location, nature of problem, and cover or clearance to be employed, plus special precautions to be observed.

VI. CORROSION CONTROL (SEE 16 NYCRR 258.10)

- 1. Type of field coating:
 - (a) For pipe (if not factory coated)
 - (b) For girth welds and fittings
- 2. Type of test of coating before backfill
- 3. Type of test of coating after backfill
- 4. Proposed cathodic protection

VII PRESSURE AND LEAKAGE TESTS (SEE 16 NYCRR 258.9)

- 1. Test pressure
- 2. Test medium
- 3. Duration of test
- 4. Length of test sections

VIII ROUTE OF PIPELINE

- 1. Has corporation obtained necessary R/W from each party having interest in R/W? If not, what is status?
- 2. Has corporation obtained formal approval and all necessary permits from governmental agencies? If not, what is status?

APPENDIX 7-G(a)

MAP OF AN AREA USED FOR COMMERCIAL FARM PURPOSES

AND

REVIEW OF THE PROPOSED DEPTH-OF-COVER BY THE FARMLAND OPERATOR

(To be completed for each affected farmland area, as denoted under "Minimum Cover" in Appendix 7-G)

NAME OF FARMLAND OPERATOR FOR THE AFFECTED AREA:

LOCATION OF AFFECTED FARMLAND AREA:

(Nearest public road, Town, County)

REVIEW INFORMATION

In areas actively cultivated for commercial farm purposes, as identified by the farmland operator, all pipe shall be installed with a minimum of 40 inches of cover. The farmland operator may allow less than 40 inches of cover if less conforms with normal agricultural practices and planned agricultural engineering projects. The farmland operator may require a depth-of-cover greater than 40 inches where necessary to safely accommodate such practices and projects.

FARMLAND OPERATOR: I am aware that the local Soil Conservation Agent* is available to discuss with me, prior to executing this document, depth-of-pipeline cover compatible with safe practices and standards of the U.S. Department of Agriculture, Soil Conservation Service, contained in the National Handbook of Conservation Practices and its National Engineering Manual. I have reviewed and have a copy of the proposed map (attached hereto) of the line across my farm.

Date

(Signed) Farmland Operator

* USDA, Soil Conservation Service employee or County Soil and Water Conservation District employee.

.SO DOC 16C-500.1

NYCRR

Section 500.1 General.

(a) All waterworks corporations under the jurisdiction of the Public Service Commission shall install approved meters and approved accessories, and before placing in service, test all water meters used for the purpose of billing customers, and shall adjust the same so that the registration on the meter dial shall indicate the quantity of water actually passing through the meter within the limits herein provided. However, meters and accessories placed in the field prior to the effective date of the approval regulations will be grandfathered, based on a review of the accuracy and reliability performance data supplied by waterworks corporations as directed by commission staff. Such application must be submitted within six months of the effective date of this section.

(b) (1) No waterworks corporation furnishing metered water service shall allow a meter to remain in service for a period longer than that specified in the following table without checking or testing said meter for accuracy and making the necessary readjustments if found to be incorrect beyond the limits herein provided.

Size of meter	Interval between test
5/8-inch, 3/4-inch	15 years
1-inch	5 years
1-1/2 inch, 2-inch	4 years
3-inch	3 years
4-inch	2 years
6-inch and larger	1 year

In the case of new model water meters, the company shall test a sample of the meters after they have been in service for five years. The size of the sample shall be 10 percent of the total meters of that model in service for five years or, alternatively, any percentage which the company can demonstrate is statistically valid. When the test results have proven satisfactory for three consecutive years, the sampling of these meters may be discontinued.

(2) Nor shall any meter be permitted to remain in service without similarly checking for accuracy and readjusting when its registration since the last test exceeds the following:

Interval between test

Size	registration
5/8-inch	1,500,000 gallons
3/4-inch, 1-inch	2,000,000 gallons
1-1/2-inch	3,000,000 gallons
2-inch	7,000,000 gallons

provided, however, that such routine tests shall not be required more often than once a year.

(c) All water meters in service on or after April 1, 1932, for which there is no record of test within five years, shall be tested promptly thereafter, and in all cases within one year from said date; provided, however, that companies having over 5,000 meters will be allowed two years; but at least one half of the meters shall be tested during the first year.

(d) A complete record shall be kept by each waterworks corporation of all tests made by it to include:

- (1) owning or serving company's number;
- (2) manufacturer's name and number;
- (3) type and rated capacity;
- (4) date of installation, removal, and test;
- (5) reason for test;
- (6) history of meter; to include date of purchase, various places of installation with dates of installation and removal and reason for such removal; and
- (7) date of test; to include meter readings, measurement of water passed, method of measurement, location of test whether on premises of customer, in laboratory or shop or elsewhere, and any other pertinent information.

(e) On and after March 31, 1946, all waterworks corporations shall make report of water meter tests on Revised Form No. 2{1} and in accordance with the instructions attached thereto.

(f) In order to facilitate the testing of new or repaired meters, the commission may detail inspectors to make tests on the premises of water supply corporations or meter manufacturers or at meter repair shops, provided such premises are maintained and equipped as hereinafter provided.

(g) The name of the manufacturer and a serial number shall be plainly stamped on each meter.

(h) Upon placing or replacing a meter in service, unless the register is set at zero, the water company shall securely attach a tag stamped with figures indicating the date and meter dial reading at the time of setting. When removing a meter, or when a reading is taken for rendering

a final bill, the consumer shall be given the reading at the time and shall be given the opportunity to read the meter if he so desires.

{1} Revised Form No. 2 and its corresponding instructions are set out in Appendix 9-A.

.SO DOC 16C-500.2

NYCRR

500.2 Types of meters. Service meters covered by this Part in use for measuring water delivered to consumers are divided into four general classes, as follows: displacement, current, compound, and fire-service.

(a) Displacement meters. Displacement meters are known by the motion of the piston, as reciprocating, rotary, oscillating, and rotating disc meters. These meters are positive in action and displace or carry over a fixed quantity for each stroke or revolution of the piston or disc.

(b) Current meters. Current meters are nonpositive in action, but record the flow by the number of revolutions of a water wheel or propeller, which is set in motion by the force of the flowing water coming in contact with the wheel or propeller blades.

(c) Compound meters. Compound meters consist of a combination of a main-line meter of the current or displacement type for measuring large flows and a small by-pass meter of the displacement type for measuring small flows, together with an automatic valve mechanism for diverting the small flows through the by-pass meter.

(d) Fire-service meters. Fire-service meters are compound meters consisting of a main-line meter of the proportional type for measuring large flows and a small by-pass meter of the displacement type for measuring small flows together with an automatic valve mechanism for diverting the small flows through the by-pass meter. The combination is designed to afford a clear passage through the meter when the valve is raised from its seat.

.SO DOC 16C-500.3

NYCRR

500.3 Approval of meters and meter reading accessories.

(a) Definitions. Unless the specific context otherwise requires, as used in this Part:

(1) Meter - any meter testing equipment or measurement device used for the determination of the units of water furnished.

(2) Accessory - any meter reading device attached to the meter used to display, transmit or adjust the reading of a meter index.

(3) Acceptable devices - those types or models of meters or accessories, eligible to be submitted for approval, that conform to requirements intended to determine their reliability and acceptable accuracy insofar as they can be demonstrated by tests; the meter or accessory shall meet or exceed staff designated requirements.

(4) Approved devices - those types or models of meters or accessories which have been approved by the Commission for use in customer billing and in the general operations of a water utility plant.

(b) Selection of devices for testing. (1) One or more units of equipment covered by the application, as determined and selected by staff, shall be made available for testing and may be retained for such purpose by the commission. Such units will be intended for actual use and not include experimental models.

(c) Application of approval.

(1) An application for approval shall be filed by the first utility intending to use the meter or accessory in New York. The application shall be filed, in accordance with the requirements of § 3.5 of this Title, with the Secretary of the Commission.

(2) An application for approval shall contain:

- (i) name and address of applicant;
- (ii) name and address of manufacturer;
- (iii) manufacturer's type or model designation;
- (iv) complete technical description covering construction details and materials;
- (v) test data observed and/or prepared by the applicant;
- (vi) test data certified by the manufacturer;
- (vii) photographs (8" x 10" exploded view) and/or manufacturer's drawings;
- (viii) the general customer category or specific application for which the utility intends to use the meter or accessory;
- (ix) the approximate cost per unit; and
- (x) certification of correctness and completeness of application by an officer of the applicant.

(d) Modification of approved devices.

(1) Permission to use an approved device is effective only for those types of models which are of the same design and construction as the type or model approved. If the manufacturer of an approved device changes its materials, construction, or design in a manner that may affect its operation, accuracy or safety, the sponsoring utility or the utility intending to use the modified device shall notify the Commission staff, specifying the changes.

(2) Department staff will evaluate the effects of the modification and determine whether the device remains acceptable and, if so, whether the existing approval is adequate or should be amended, and will so notify the utility.

(e) Strength and capacity of meters. (1) Strength. New meters shall be

of sufficient strength to withstand without damage a working-pressure test of 150 pounds per square inch.

(2) Capacity. New meters shall show a loss of head not to exceed the following amounts when the rate of flow for delivery is that given in the following Table, viz.: for displacement and current meters, 15 pounds per square inch; for compound meters, 20 pounds per square inch; for fire-service meters, 4 pounds per square inch.

Size	DELIVERY: GALLONS PER MINUTE			
	Displacement	Current	Compound	Fire-service
Inches				
1/2.....	15
1/2 x 3/4.....	15
5/8.....	20
5/8 x 3/4.....	20
3/4.....	30

12.....	3,375	3,100	6,400

.SO DOC 16C-500.4

NYCRR

500.4 Testing equipment. (a) Each water works corporation, unless specifically excused by the commission, shall provide for and have available such meter testing laboratory or shop, standard meters, instruments, and other facilities as may be deemed necessary by the commission properly to make the tests required herein. Such equipment and facilities shall be acceptable to the commission and shall be available at all reasonable times for inspection and use by authorized representatives of the commission. Water-works corporations may cooperate in arranging for meter testing facilities. Tests for accuracy of such equipment will be made at such intervals as the commission may

deem necessary.

(b) Requests to be excused from the provisions of subdivision (a) of this section will be considered from water-works corporations having less than 100 meters in service when satisfactory arrangements are made for testing of meters at approved laboratories; or from companies which arrange for all facilities prescribed herein at approved locations elsewhere than on the premises of said company.

(c) The minimum equipment required for registration tests is as follows:

(1) A quick-acting valve on the discharge pipe through the use of which the flow can be started and stopped without appreciable loss of time.

(2) A valve and an orifice attachment on the outlet side of the meter, either of which can be used to establish the rate of flow desired.

(3) Pressure gauges connected on both the inlet and outlet of the meter to show whether any material change in pressure occurs during the period of test, which would affect the rate of flow. The outlet pipe is to have sufficient head on it so that the meter will always have pressure on its outlet end and preferably not less than five pounds per square inch.

(4) A measuring device which may be either of the volumetric or weighing type. Whichever is used, the accuracy of determination of the volume or weight of water discharged into the measuring device must be such as to bring the limit of error within one quarter of one percent.

(5) It is desirable to have available for testing meters a test table and appurtenances which are manufactured by several concerns. Such an outfit would include the equipment enumerated in the preceding four paragraphs.

.SO DOC 16C-500.5

NYCRR

500.5 Tests of meters.

(a) Tests to be made on meters may be considered in two classes, viz.: routine tests as hereinbefore required and tests required upon complaint of consumers or for other special purposes.

(b) The volume of water passed must be sufficient to cause at least one revolution of the pointer on the initial dial except for sensitivity test at "minimum test flow" rate when the said rate shall be maintained for at least five minutes during which time the pointer on the initial dial shall show a steady uniform movement.

(c) Tests of meters over two inches in size may be made in place on the premises by means of an accurately calibrated test-meter of suitable size or by some other reliable apparatus approved by the commission.

(d) Displacement type. (1) All routine tests of displacement type meters shall be conducted by testing for accuracy of registration at not less than two rates of flow within "normal test flow limits", one rate to be approximately that at which the percentage of accuracy is a maximum and the other at approximately the high rate of flow, or in the case of large meters tested in place on premises, at as high a rate as practicable.

(2) All tests made upon complaint of consumers or for other special purposes shall be conducted by testing for accuracy of registration at not less than three rates, namely, at the two rates stipulated above for routine tests and also at approximately the low rate of flow.

(e) Current type. All routine and complaint tests of current meters shall be made within and as near as practicable to the low and high rates given under "normal test flow limits" and, if required, at intermediate rates.

(f) Compound and fire-service types. The accuracy of compound and fire-service meters should be determined by making a sufficient number of tests at different rates of flow between the high and low rates given under "normal test flow limits" to permit the construction of a representative accuracy curve; the tests should be of such scope that the rates of flow at the beginning and end of the "change-over" and the maximum error in registration can readily be determined.

.SO DOC 16C-500.6

NYCRR

500.6 Registration of meters.

(a) Displacement type. The registration on the meter dial shall indicate the quantity recorded to be not less than 98.5 percent nor more than 101.5 percent of the water actually passed through the meter while it is being tested at any rate of flow within the limits specified herein under "normal test flow limits". At the "minimum test-flow" rate to the lowest normal test flow rate as set forth in the following table, the meter shall register not less than 95 percent and not more than 101 percent of the water that actually passes through it. The meter shall show proper sensitivity when tested at the rate of flow set forth under "minimum test flow" as provided in Section 500.5.

Size (inches)	Normal test flow limits (gallons per minute)	Minimum test flow (gallons per minute)
1/2.....	1 to 15.....	1/4
1/2 x 3/4.....	1 to 15.....	1/4
5/8.....	1 to 20.....	1/4
5/8 x 3/4.....	1 to 20.....	1/4
3/4.....	2 to 30.....	1/2

1.....	3 to 50.....	3/4
1-1/2.....	5 to 100.....	1-1/2
2.....	8 to 160.....	2
3.....	16 to 315.....	4
4.....	28 to 500.....	7
6.....	48 to 1,000.....	12

(b) Current type. The registration on the meter dial shall indicate the quantity recorded to be not less than 98 percent nor more than 102 percent of the water actually passed through the meter while it is being tested at any rate of flow within the limits specified herein under "normal test flow limits". The meter shall show proper sensitivity when tested at the rate of flow set forth under "minimum test flow" as provided in section 500.5.

Size (inches)	Normal test flow limits (gallons per minute)	Minimum test flow (gallons per minute)
1-1/2.....	12 to 100.....	1 1/2
2.....	35 to 100.....	30
3.....	40 to 250.....	35
4.....	50 to 500.....	45
5.....	75 to 90.....	70
6.....	90 to 1,200.....	85
8.....	100 to 1,500.....	90
10.....	125 to 2,000.....	110
12.....	150 to 2,800.....	140

(c) Compound type. (1) The registration on the meter dials shall indicate the quantity recorded to be not less than 97 percent nor more than 103 percent of the water actually passed through the meter while it is being tested at any rate of flow within the limits specified under "normal test flow limits", except in the registration of flows within the "changeover" from by-pass meter to mainline meter. The registration at these rates of flow shall be not less than 90 percent and not more than 103 percent. The difference in the rate of flow at the beginning and at the end of the "changeover" shall not exceed the figures given in the following table:

Size (inches)	Gallons per minute
1-1/2	20
2.....	20
3.....	30
4	30
6.....	40

8.....	75
10	100
12.....	620

(2) The beginning of the "changeover" is when the accuracy of registration falls below 97 percent, due to the automatic valve mechanism, and the end of the "changeover" is when the accuracy of registration again reaches 97 percent.

(3) The meter shall show proper sensitivity when tested at the rate of flow set forth under "minimum test flow" as provided in section 500.5.

Size, main meter (inches)	Normal test flow limits (gallons per minute)	Minimum test flow (gallons per minute)
1-1/2.....	2 to 100.....	1/2
2.....	2 to 160.....	1/2
3.....	4 to 320.....	1
4.....	6 to 500.....	1-1/2
6.....	10 to 1,000.....	3
8.....	16 to 1,600.....	4
10.....	32 to 2,300.....	8
12.....	32 to 3,100.....	14

(d) Fire-service type. (1) Registration on the meter dials shall indicate the quantity recorded to be not less than 97 percent nor more than 103 percent of the water actually passed through the meter while it is being tested at any rate of flow within the limits specified under "normal test flow limits", except in the registration of flows within the "changeover" from by-pass meter to the mainline meter. The registration at these rates of flow shall be not less than 85 percent. The difference in the rate of flow at the beginning and at the end of the "changeover" shall not exceed the figures given in the following table:

Size (inches)	Gallons per minute
3.....	40
4	60
6.....	130
8.....	210
10	300
12.....	620

(2) The beginning of the "changeover" is when the accuracy of registration falls below 97 percent due to the automatic valve mechanism, and the end of the "changeover" is when the accuracy of registration again reaches 97 percent.

(3) The meter shall show proper sensitivity when tested at the rate of flow under "minimum test flow" as provided in section 500.5 of this Part.

Size (inches)	Normal test flow limits (gallons per minute)	Minimum test flow (gallons per minute)
3.....	8 to 400.....	2
4.....	8 to 700.....	2
6.....	16 to 1,600.....	4
8.....	28 to 2,800.....	7
10.....	48 to 4,400.....	12
12.....	48 to 6,400.....	12
.SO DOC 16C-500.7		NYCRR

500.7 Complaint tests.

(a) (1) If any consumer owning a meter or to whom a meter has been furnished shall request the Public Service Commission to test such meter, a test will be made by a duly authorized representative of the commission. Such test may be made by means of a test meter or other approved device on the premises of the complainant or in the meter laboratory of either the company or the commission as may be determined by the commission. The water company and the complainant will be notified when said test is to be made, and each may have a representative present to witness the test.

(2) The water company shall render the representative of the commission all necessary assistance in making said test or in removing the meter from the premises of the consumer to such place as the commission may designate for tests.

(3) If such meter on being tested shall be found to be incorrect beyond the limits prescribed, the meter shall forthwith be adjusted by the water company as provided herein or another meter, which has been tested and properly adjusted, shall be installed in place of the meter complained of.

.SO DOC 16C-500.8	NYCRR
-------------------	-------

500.8 Adjustment of bills due to over-registration of meter.

(a) Displacement meters. (1) If upon test of displacement meters upon complaint (except as herein provided for meters tested in place), it be found that the weighted average percentage of accuracy of the meter, determined as hereinafter specified, exceeds 100 percent, the bills of the consumer shall be adjusted to the extent of such excess for one-half of the quantity registered since the last test unless it can be shown that the error is due to an accident or other cause, the approximate date of which can be determined, in which case it shall be figured back

to such date; or unless the consumer has suffered no damage from said error by virtue of the fact that the meter has registered a quantity of water less than that allowed for the minimum rate of the applicable rate schedule.

(2) For the purpose of adjustment of consumers' bills, the weighted average percentage of accuracy of a displacement meter, except as herein provided for meters tested in place, shall be determined by giving a weight of two to the percentage at the rate at which the percentage of accuracy is a maximum and a weight of unity to each of the percentages at approximately the low and high rates of flow within "normal test flow limits".

(b) Meters other than displacement type. The adjustment of bills, upon complaint of consumers, where current, compound, and fire-service meters, or meters of all types tested in place on premises are involved, will be determined from an accuracy curve, developed from tests of the meter in question, properly averaged. If the average percentage of accuracy so determined exceeds 100 percent, the bills of the consumer shall be adjusted in the manner hereinbefore provided for displacement meters.

.SO DOC 16C-500.9

NYCRR

500.9 Percentage of accuracy.

The percentage of accuracy of a meter is the ratio (expressed in percentage) of its registration in a given time to the actual amount of water passed through the meter in the same time.

.SO DOC 16C-500.10

NYCRR

500.10 Percentage error. The percentage error of a meter is the difference between its percentage of accuracy and 100 percent. A meter whose percentage of accuracy is 95 percent is said to be 5 percent slow, or its error is minus 5 percent. A meter whose percentage of accuracy is 105 percent is said to be 5 percent fast, or its error is plus 5 percent.

.SO DOC 16C-500.11

NYCRR

500.11 Nonregistering meters.

(a) The reading of a duly installed meter showing the amount of water consumed shall be used for all metered billing purposes except where it appears that the meter has ceased to register or has registered inaccurately.

(b) In all cases where a meter is found to be defective, it shall be immediately replaced by a meter that has been tested and properly adjusted.

(c) In cases where it is found that a meter has ceased to register or

has registered inaccurately and it cannot be determined by reasonable test the percentage of inaccuracy, an estimated bill for the billing period immediately preceding the date when such meter was found defective and for the period from said date to the date of replacement of the meter, may be rendered the consumer but the right to render an estimated bill is strictly limited to such periods and for all other periods the bill shall be the minimum rate provided in the applicable rate schedule. The estimated bill shall be based upon the amount of water consumed in the corresponding period in prior years, except where it appears that there has been a change in the occupancy of the premises or in the use of water, in which case an equitable adjustment shall be made. This subdivision does not apply to residential customers of any waterworks corporation that is covered by Part 14 of this Title.

.SO DOC 16C-PT501

PART 501

EXTENSION OF MAINS

(Statutory authority: Public Service Law, §§ 89-b, 89-c)

Sec.

501.1 Definitions

501.2 Construction of facilities

501.3 Applicant within specified distance

501.4 Applicant beyond specified distance

501.5 Maintenance of service line beyond highway limits

501.6 Cost of installation before service required

501.7 Responsibility for maintenance and replacement

501.8 Applicants who cannot qualify as reasonably permanent customers

501.9 Filing of main extension agreements

501.10 Petition for waiver

.SO DOC 16C-501.1

NYCRR

Section 501.1 Definitions. (a) Water main - a pipe carrying water which is generally available to more than one service line.

(b) Extension - the extension of water main including the pipe, elbows, tees, valves, reducers, service taps, and other appurtenances which may be part of the facilities extended to provide water service.

(c) Service line or lateral - the pipe and valves which are used to deliver the water from the main into the customer premises; the company portion being that between the main and the customer property line, and the customer portion being that from the property line into the premises.

(d) Service connection - the facilities necessary to provide the customer service, including the service line, the main tap, meter, and

other related facilities.

(e) Extension costs - as used in this Part shall include the costs of labor, equipment and materials used in the extension installation, all paving charges for the repair or replacement of street or sidewalk which may be disturbed in the course of such installation, the costs of inspection, amounts paid to governmental authorities for permits to do the work required, and other costs or taxes that are legally imposed by any governmental authority.

(f) Applicant - a person, developer, builder, partnership, association, corporation, or governmental agency requesting service to a specific location.

(g) Developer - a business or person who will subdivide or prepare real estate for residential or commercial occupancy, who requires the installation of utility plant in advance of occupancy, and whose success resulting in utility customers can be considered speculative since it is dependent upon the success of the real estate venture.

(h) Residential service - water service for sanitary and potable domestic use.

(i) Surcharge - a charge billed to the customer in addition to the regular bill for service.

(j) Gross annual utility revenue - the total of customer charges for utility service billed in one year.

(k) Advance or deposit - money advanced by the applicant to the utility subject to refund.

(l) Contribution - money paid by the applicant to the utility, usually to pay for the cost of installing plant, which will not be refunded.

(m) Water-works tariff - the schedule of rules and charges for water service, filed with and approved by the Commission, under which the utility is required to provide service.

(n) Service area - the area in which the utility has required government authorization to provide utility service.

.SO DOC 16C-501.2

NYCRR

501.2 Construction of facilities.

(a) Facilities within highway. All water-works corporations subject to the jurisdiction of this commission shall hereafter furnish, place, construct, operate, maintain and when necessary replace at their own cost and expense all mains, service pipes, service connections and other facilities within the territorial limits of any street, avenue, road or way that is for any highway purpose under the jurisdiction of the legislative body of any city, town, village, county or the State of New York, or other public place open to the general public for highway

purposes, provided all necessary easements are furnished without cost to such corporation.

(b) Facilities outside highway. Where such facilities will be constructed without the territorial limits of any street, avenue, road or way, or other public place open for highway purposes, the applicant shall be allowed to construct the facilities, where such dilengagement* results in lower cost or better time performance, using contractors and materials acceptable to the water-works corporation, pursuant to its water system specifications, based on safety and compatibility and, as to contractors, reputable past performance, and subject to inspection and approval by the water-works corporation based on such specifications. The additional cost of said inspections is to be paid by the applicant.

* So in original

.SO DOC 16C-501.3

NYCRR

501.3 Applicant within specified distance. Upon written application of the owner or occupant of any property abutting on any such street, avenue, road or way or other public place within the distance specified in section 501.4(d) of this Part of any main of a water-works corporation, appropriate to the service requested, such water-works corporation shall furnish, place and construct at its own cost and expense such mains, service pipes, service connections and facilities as are necessary to render the service requested.

.SO DOC 16C-501.4

NYCRR

501.4 Applicant beyond specified distance. Whenever an owner or occupant of any property abutting on any street, avenue, road or way or other public place as hereinbefore defined in which there is no water main within the distance specified in subdivision (d) of this section from said property makes a written application for service to the water-works corporation having authority to render service to said applicant, such corporation shall extend its system so as to serve said property, provided:

(a) Said applicant shall first have assured said corporation that he will be a reasonably permanent customer by meeting the following conditions:

(1) the applicant will own or occupy a premises in a permanent structure and on a building lot which both comply with governmental building codes and requirements;

(2) the applicant will take service for at least one year continually on an annual or seasonal basis; and

(3) the applicant will take service within 60 days of completion of

the main extension.

(b) The applicant shall first have executed an agreement, the terms of which shall provide substantially as follows:

(1) applicant shall agree to pay to said corporation the rates charged to customers served under section 501.3 of this Part and in addition a surcharge of 19 percent (return, depreciation, taxes and maintenance) per year of the actual, reasonable cost of such portion of said main extension (excluding the cost of any service pipe, hydrants, and their accessories) that is in excess of the distance specified in subdivision (d) of this section from the end of the nearest water main appropriate to the service requested if the size of said extension be six inches or less in nominal diameter or if the service requested requires a main larger than six inches in diameter or 19 percent of the estimated cost of a six-inch main if said corporation lays a main greater than six inches in diameter when not necessary for the service requested; provided, however, that said surcharge shall begin at the date when water service is first available to the applicant and shall cease 10 years from that date;

(2) whenever more than one customer shall be connected to said extension, said surcharge shall be so adjusted as to yield to said corporation not more than said 19 percent in any one year from all customers served from said extension and said surcharge shall be reasonably allocated to the several customers served from said extension, taking into account that the distance of main hereinafter specified and a service are to be allowed without surcharge for each customer connected thereto;

(3) whenever the number of customers on a main extension multiplied by the distance specified hereinafter shall equal or exceed the length of the main extension, all surcharges shall cease; and

(4) in lieu of the above surcharge, the applicant may at his option pay the cost of the main extension in excess of the distance hereinafter specified subject to annual refunds without interest related to the number of new customers added to the extension each year multiplied by the distance hereinafter specified; however, refunds shall cease after 10 years or when the total of all refunds equals the amount of the original payment made by the applicant.

(c) The applicant shall first have furnished reasonable security as to performance of his agreement if so required by said water-works corporation; said reasonable security as to performance shall be by advance payment of the surcharge for a period not to exceed one year, or where an applicant's premises does not yet exist, by completion of the

foundation and construction of a substantial portion of the premises framing before main extension construction is commenced, or by deposit by the applicant of the entire estimated cost of the extension until said premises construction is complete.

(d) The specified distance allowed for each applicant taking service from the main extension shall be 75 feet for "Class A" water-works corporations as defined in the Uniform System of Accounts and section 561.1 of this Title. For corporations that do not qualify as "Class A" corporations, the Commission staff may allow a main extension of less than 75 feet, at the corporation's request, based on the corporation's financial ability and existing investment in main.

.SO DOC 16C-501.5 NYCRR

501.5 Maintenance of service line beyond highway limits. That portion of the service pipe without the limits of a street, avenue, road or way as hereinbefore defined or easement area shall be provided, placed, constructed and maintained by the property owner or the customer but in accordance with such reasonable specification for the construction and maintenance thereof as may be filed in the tariff schedules of said water-works corporation.

.SO DOC 16C-501.6 NYCRR

501.6 Cost of installation before service required. Whenever, at the request of an owner or occupant, a service pipe is provided through which service is not immediately desired, said property owner or occupant shall bear the entire reasonable expense of providing, placing and constructing the service pipe and accessories, but he shall be entitled to a refund whenever water service is begun for such part of the expense as the water-works corporation is hereinbefore required to assume. Such refund shall be the cost of said service pipe and accessories, less depreciation at the rate of three percent per annum for the period which said pipe has been in the ground.

.SO DOC 16C-501.7 NYCRR

501.7 Responsibility for maintenance and replacement. All water-works corporations shall hereafter be solely responsible for the maintenance and replacement of all mains, service pipes and facilities placed within a street, avenue, road or way as hereinbefore defined or easement area used by said water-works corporations for supplying water to its customers; and if adequate maintenance requires the reconstruction or replacement of such mains, service pipes and facilities, said mains, service pipes and facilities shall be reconstructed or replaced by the water-works corporation responsible for maintenance as hereinbefore provided. However, replacement or reconstruction of mains and service

pipes less than two inches in diameter in excess of 75 feet in length heretofore installed and privately owned, shall be governed by the provisions of section 501.4 of this Part.

.SO DOC 16C-501.8

NYCRR

501.8 Applicants who cannot qualify as reasonably permanent customers. An applicant who cannot qualify as a reasonably permanent customer may be required to deposit the entire cost of the main extension and installed services with the water-works corporation. The portion of the deposit related to the length of main extension within the specified distance, as set forth in section 501.4(d) of this Part, and the cost of the service, hydrants and accessories shall be refunded without interest within 30 days of the applicant taking service and demonstrating reasonable permanency. For developers who are subdividing or preparing real estate for residential or commercial occupancy, who require the installation of utility plant in advance of occupancy, the water-works corporation may retain as a deposit the cost of the entire extension, subject to annual refunds without interest determined as the proportion of the number of customers connected to the extension that year multiplied by the distance specified in section 501.4(d) of this Part, related to the total extension length. No further refunds will be made after five years after the date construction of the extension is completed and approved or after the total of all refunds equals the amount of the deposit.

.SO DOC 16C-501.9

NYCRR

501.9 Filing of main extension agreements. All line extensions shall require a line extension agreement setting forth the terms and conditions under which the extension will be made, duly signed by the water-works and applicant. No charges or conditions shall be obtained from or imposed upon the applicant for the provision and extension of water service, other than those contained in the line extension agreement in compliance with the water-works tariff or as approved by the commission. One copy of each main extension agreement shall be filed with the commission within 30 days of execution; or where such agreements may exceed ten in number in any calendar year, the utility may instead maintain a file at company offices of such agreements and file a summary of such agreements by January 31 of the following year.

.SO DOC 16C-501.10

NYCRR

501.10 Petition for waiver. As provided in Part 5 of this Title, petition may be made in writing in a specific case for waiver, modification or relief from any of the provisions of these rules by stating the supporting facts and reasons for waiver. However, such

petition shall not be made for waiver of Part 501 until the water-works has first obtained approval by the Department of Environmental Conservation and the town of service area modification which may be necessary to include the applicant within the water-works' service area or franchised service territory. Nor shall the petition for waiver contain provisions which would not reasonably apply to any other similar applicant, or in any way be discriminatory.

503.10 Inspection of new plant facilities

503.11 Maintenance of records

.SO DOC 16C-503.1

NYCRR

Section 503.1 General.

The provisions of this Part shall apply to water corporations providing service to 4,000 or more year-round customers. The standards relating to service interruptions contained in section 503.3 of this Part shall apply to all water corporations under the commission's jurisdiction. In providing service to its customers each water corporation shall comply with the recommended standards for waterworks, policies for the review and approval of plans and specifications for public water supplies, 1987 Edition (hereinafter referred to as the Ten State Standards) as described in section 10.3 of this Title. The text of the Ten State Standards appears in 16 NYCRR section 5-1.22(b) of this Title, Appendix 5-A. Compliance with the standards in this Part does not release a water corporation from complying with all other applicable laws, rules and regulations as promulgated by other governmental bodies. Nor does compliance with these standards release a water corporation from implementing other operating practices, maintenance programs or planning measures which may be necessary to preserve the immediate or long-term viability of the water system and to provide safe and adequate service to its customers.

503.2 System pressures.

(a) System pressures. Minimum working pressure (the pressure under all conditions except fire flows) in all portions of the water corporation's distribution system should not be less than 35 pounds per square inch (psi). Additionally, for new water plant construction designed to serve five or more customers, the minimum design pressure should also be an amount that, upon calculation, would theoretically be sufficient to maintain 15 psi at an 8 gallons per minute (gpm) flow at the meter. If this condition is not met, but the pressure on the company's main in the immediate area satisfies the 35 psi requirement (or has been exempted from such requirement by the commission), it will be the responsibility of the developer/owner of new properties requesting service to make all modifications necessary to meet the pressure and flow standard required at the meter. The maximum customer pressure at the building line should be 100 psi, except where differences in elevation require pressure higher than 100 psi in order to meet the minimum working pressure in other parts of the distribution system. In such cases where the system pressure exceeds 100 psi, the company should attempt to reduce the pressure to 100 psi by creating a separate pressure zone or installing pressure-reducing valves in the distribution system. If a company can demonstrate that this is impractical due to excessive cost or engineering considerations, the customer will have the option of installing an individual pressure-reducing valve. The customer exercising this option will be responsible for purchasing, maintaining and replacing such valve, and all costs associated therewith.

(b) Monitoring requirements. Each water corporation shall have the necessary equipment to record an individual customer's pressure and to make pressure surveys and record at least a 24-hour continuous test. Each water corporation shall monitor the system pressure in each pressure zone at or near the point of highest elevation in the zone, where the lowest pressures can be expected to be experienced, and shall report to the department on a monthly basis each instance when the pressure drops below the minimum working pressure as previously specified for a period of four hours or longer. Likewise, pressure will be monitored in each pressure zone at or near the point of the lowest elevation in the zone where the highest pressures can be expected to be experienced. This monitoring requirement may be satisfied by using the readings taken at one of the water corporation's regular operating stations provided that the water corporation can demonstrate that it can accurately extrapolate the pressures at the highest and lowest

elevations from such readings.

.SO DOC 16C-503.3

NYCRR

503.3* Interruptions of service.

(a) Interruptions of service. Each water corporation shall make reasonable efforts to prevent interruptions of service. When interruption occurs, the water corporation shall reestablish service within the shortest possible time period consistent with the general safety and public welfare. Whenever service is to be interrupted for the purpose of scheduled maintenance, this work shall be done at a time which will cause the least inconvenience to customers provided that the schedule is compatible with local ordinances and does not result in substantial additional costs.

(b) Monitoring requirements. A record shall be kept by each water corporation of all interruptions to service having a duration of one hour or more, from any cause whatsoever, except those resulting from violation of the company's filed tariff regulations or customer-requested disconnections. Such records shall describe the nature, location, time, cause, extent and duration of the interruption. A record of that information shall be open for public as well as department inspection during the water corporation's normal business hours. Each water corporation shall immediately notify the fire department of each municipality affected, and upon written request of the municipality concerned the police department as well, of existing and/or proposed interruptions to service which may affect the continuity of service to fire flows for a period of one hour or longer. Where planned interruptions in water service, which are likely to exceed one hour in duration are anticipated, all customers who will be affected thereby shall be notified at least four hours in advance to permit them to prepare for the interruption in water service. As used in this section, a planned interruption is any interruption of which the company has prior knowledge and which has an anticipated time and duration. This would normally include all interruptions which are not of an emergency nature. Immediate notice by telephone or telefacsimile shall be given to the department by each water corporation of all interruptions to, or major impairments of, service of a duration of four hours or more which affect the continuity of service to five or more customers or one percent of the total number of customers served, whichever is larger, or which affect available fire flows. Notice shall also be given of any accident or damage to portions of the plant which might lead to such interruptions of service. If such interruption occurs after 4:45 p.m. and before 8:30 a.m., and notice is to be transmitted by telephone, such

notice shall be given promptly on the next business day following the interruption. A written report of all such interruptions shall be filed with the department within five business days following that in which the interruption occurred.

* Applies to all water corporations regardless of size.

.SO DOC 16C-503.4

NYCRR

503.4 Quantity of supply.

(a) Quantity of supply. Every water corporation will file with the department a copy of its emergency plan for maintaining a reasonable supply of water during a drought or other emergency affecting the maintenance and delivery of a safe and adequate supply of potable water. A water corporation may submit a copy of the plan filed with and approved by the State Department of Health pursuant to 10 NYCRR 5-1.33. The plan will include provisions for implementing water use restrictions and other conservation measures and for utilizing alternate and existing or potential emergency supplies.

(b) Surface sources. Each water corporation that employs a surface source of supply shall comply with the provisions of the Ten State Standards, with the additional requirement that the maximum projected demand shall take into consideration forecasted growth or decline in both the number of customers and in system usage for at least a 10-year period into the future. Also, such projections shall be updated on an ongoing basis and where they show that demand will exceed supply, the water corporation shall undertake all reasonable efforts to reduce and control future demands to bring them into balance with supply. If appropriate, the water corporation shall develop plans, consistent with existing State requirements, to secure additional supply.

(c) Groundwater sources. Each water corporation that employs groundwater sources of supply shall comply with the appropriate provisions of the Ten State Standards with the additional requirement that the numbers used for design average and maximum day demand shall reflect a projection of growth or decline in the number of customers and in system usage for at least a 10-year period into the future. Also, such projections shall be updated on an ongoing basis and where they show that demand will exceed supply the water corporation shall begin measures to control demand or, if appropriate, secure additional supply.

(d) Monitoring requirements. (1) Surface sources. Each water corporation shall submit to the department for approval as soon as possible, but no later than one year after the effective date of these standards, a plan to monitor source capacity and establish warning levels for declining source capacity. The plan's warning levels should

be based upon original design demand and historical source levels so as to provide a warning when the source capacity falls below design capacity. Once the plan is implemented, which must occur no later than two years after the effective date of these standards, daily records shall be kept indicating source level or capacity, date, and location of reading for each source. The department shall be notified within one business day whenever the source level falls below the established warning levels.

(2) Groundwater sources. Each water corporation having a groundwater source shall equip each of its well pumps with a timing device which indicates time operated on a 24-hour basis. Each company shall have the resources to meter the discharge of each well under normal operating conditions. Readings shall be taken and recorded on a daily basis and shall indicate the discharge of each well or group of wells on a common discharge line, time of operation, well identification, date and time of day recorded. The chart produced by an automatic flow recording device shall be sufficient to satisfy this requirement. For the purposes of this rule, a group of wells from which water is withdrawn by a common source of suction shall be considered a single well. Production meters shall be calibrated every two years. At least once every three years each water corporation will conduct tests to determine the specific capacity of each well authorized for use and the actual capacity of each well's pump. As used in this Part, specific capacity shall refer to the yield of a well in gallons per minute per foot of drawdown. The results of these tests will be reported to the department within 10 business days if the specific capacity results indicate a 10 percent or greater decrease in specific capacity as compared with rated specific capacity or if the well pump capacity is less than 80 percent of the design rated capacity. The rated specific capacity of each source will be reported to this department within three months of enactment of these standards. Any changes in rated specific capacity of any source must be reported to this department within 10 business days.

(3) Additional monitoring requirements - total production. The average day design demand and maximum day design demand will be reported to this department within three months of enactment of these standards. The department will also be notified whenever:

- (i) actual maximum day production exceeds maximum day design demand;
- or
- (ii) actual average day production exceeds average day design demand on an annual basis.

503.5 Atmospheric storage. The water level in all storage facilities shall be monitored twice daily, at those points in time at which the greatest and least amount of storage is normally found to exist, and records kept of levels by date and time or by continuous recording chart. The department will be notified annually by January 31st of the subsequent year whenever actual average day demand on an annual basis for systems supplied by wells exceeds total storage capacity plus the supply available from approved emergency interconnections, standby power and alternate sources.

.SO DOC 16C-503.6

NYCRR

503.6 Valves, blow-offs and hydrants. (a) Valves and blow-offs. Each water corporation shall have a program to test each valve and blow-off and implement such program so that each valve and blow-off is tested at least once every five years. Upon staff's request, the details of the program will be submitted for its review and approval. Implementation of this program will begin no later than two years after the effective date of these standards. The provisions of this section shall not be applicable to service line valves.

(b) Hydrants. Each water corporation which provides public fire protection shall have a program to inspect and test each hydrant a minimum of once every three years with a minimum of one-third of the hydrants being inspected and tested annually. The method of inspecting and testing each hydrant will conform to the American Water Works Association Manual M-17, third edition, printed in 1989 and entitled Installation, Field Testing and Maintenance of Fire Hydrants, as described in section 10.3 of this Title. The implementation of this program will begin no later than two years after the effective date of these standards.

(c) Monitoring requirements. (1) Valves and blow-offs. The department shall be notified by January 31st of the subsequent year whenever the number of either valves or blow-offs not completely functional/operable and accessible exceeds five percent of the total of each tested during the preceding year, and the water corporation shall at the same time provide its plan for rectifying the problem and returning the system to compliance.

(2) Hydrants. The department shall be notified by January 31st of the subsequent year whenever the number of hydrants not completely functional/operable and accessible exceeds the limitations set forth in the table below on a proportionate basis for the number of hydrants tested during the preceding year. The department reserves the right to require more frequent testing should these limitations be exceeded.

Number of hydrants in system	Percent and number limit
Less than 500	5% not to exceed 15
500 to 1,000	3% not to exceed 21
1,001 to 5,000	2% not to exceed 24
Over 5,000	0.5% of all hydrants

.SO DOC 16C-503.7

NYCRR

503.7 Flushing.

(a) Flushing. Each water corporation will have a properly engineered written flushing program and, upon staff's request, will submit the details of that program to staff for its review and approval. Each water corporation should flush its transmission and distribution system a minimum of once a year, except where it can be demonstrated that a particular system or portion thereof does not require flushing. This program shall be implemented no later than two years after the effective date of these standards.

(b) Monitoring requirements. Each water corporation shall maintain a record of the date, time and duration of each flushing sequence.

.SO DOC 16C-503.8

NYCRR

503.8 Lost and unaccounted-for water.

(a) Lost and unaccounted-for water. Each water corporation shall maintain records on an annual basis of nonrevenue producing water use and shall use prudent means to minimize lost and unaccounted-for water.

(b) Monitoring requirements. Each water corporation shall notify this department when annual nonrevenue producing water use, which would include lost and unaccounted-for water as well as other nonmetered uses of water, exceeds 18 percent of annual production. This notification will also include specific measures being taken to reduce nonrevenue producing water use to acceptable levels and a description of any significant event that impacted this level.

.SO DOC 16C-503.9

NYCRR

503.9 Maps and records.

(a) Maps and records. (1) Each water corporation shall maintain accurate, to scale, up-to-date maps which shall show the service territory.

(2) Each water corporation shall also maintain accurate, to scale, up-to-date supply diagrams and distribution maps which shall, at a minimum, include the relative locations and capacities of major sources of supply and production facilities, pumping stations, treatment plants, storage facilities, and transmission and distribution mains. The water corporation shall retain such maps and other information, as necessary, to enable it to promptly and accurately identify the location of mains,

services, valves, hydrants and blow-offs.

(3) Records shall be kept for each valve, hydrant and service connection. Records for valves and service connections (including curbstops) will include the size and location while records for hydrants will include the size, location, manufacturer and identification number.

(b) Monitoring requirements. A map or maps showing the location of sources, storage, pump stations and the principal transmission and distribution mains within the service territory shall be submitted to the department as soon as possible but no later than one year after the effective date of these standards. Maps showing additions and significant changes thereto in each calendar year shall be submitted by March 31st of each succeeding year. If there are no changes in such calendar year, the water corporation shall simply notify the department in writing of this fact. Because of the necessity of such maps, any water corporation not possessing same shall begin an immediate program to prepare and file them. In the event such maps cannot be filed within the above-stated period, the water corporation shall request department approval for additional time to submit the maps. This request must be made within three months of the effective date of these standards.

.SO DOC 16C-503.10

NYCRR

503.10 Inspection of new plant facilities.

(a) Inspection of new plant facilities. No plant additions including backbone plant, storage, transmission and distribution mains shall be placed in service and no additional customers may be served until such additions have been inspected by qualified water corporation personnel under the direct supervision of an engineer licensed to practice in the State of New York. Construction of plant not being done by the water corporation which will become its property, such as construction by a real estate developer, will be inspected by qualified water corporation personnel or a representative of the water corporation under the direct supervision of an engineer licensed to practice in the State of New York and the water corporation shall be reimbursed for the costs of such inspection by the developer who is building the plant.

(b) Monitoring requirements. Inspection reports, which will include job identification, materials installed by billing units (where applicable) such as linear feet of pipe, number of valves and size etc., location of plant by physical measurements in the field and description of progress and quality of work performed, shall be maintained in the files for each job inspected.

.SO DOC 16C-503.11

NYCRR

503.11 Maintenance of records. All records related to these service

standards shall be available for inspection by staff of the department at an office of the water corporation in the county in which the waterworks is located. In addition, these records shall be kept on file for a period of six years.

NYCRR

Section 510.1 Records.

Each and every waterworks corporation holding consumer deposits shall keep such records as will show, with respect to each deposit:

(a) the name of the consumer making the deposit;

(b) the address (including street and number) of each depositor, if known;

(c) the date of receipt of the deposit;

(d) the amount of the deposit;

(e) the interest accrued upon the deposit to be entered biennially or more frequently;

(f) all credits of interest made in reduction of amounts billed for service rendered, and the dates of such credits;

(g) all payments of interest made on each deposit, and the dates of such payments;

(h) deductions representing sums due and unpaid to the corporation when depositor ceased to be a consumer, and the date thereof, together with such other information as any such corporation may deem necessary to make a complete record of each deposit.

.SO DOC 16C-510.2

NYCRR

510.2 Index of consumers.

Each and every waterworks corporation holding consumer deposits shall keep, in addition to the records prescribed in section 510.1 of this Part, an index or indices, alphabetically or geographically arranged, which shall show at all times the name of each consumer from whom a

deposit has been exacted, and whose said deposit or any part thereof remains unpaid, with appropriate reference in such index to the consumer's account.

.SO DOC 16C-510.3

NYCRR

510.3 Interest.

Each and every waterworks corporation holding consumer deposits shall allow to each depositor simple interest on the amount deposited. The interest rate to be applied to the amount deposited shall be a composite yield of intermediate term, A-rated corporate bonds, as reported in financial publications, less costs of administering deposits of 1.75 per centum per annum. The rate shall be updated effective January 1st each year, based upon yield information available on the first Friday of October of the preceding year. The Commission will issue an advisory letter which publicizes the information to assure consistency. Each corporation shall credit such interest to each depositor whose deposit shall have been held for one or more years by paying such interest in cash or deducting it from the amount of a bill for water service rendered such depositor thereafter, but not later than the next bill rendered after the next succeeding first day of October and at each one-year interval thereafter.

.SO DOC 16C-510.4

NYCRR

510.4 Application of deposit to unpaid bill. Each and every waterworks corporation holding consumer deposits shall render to each depositor, when and as his deposit is applied to an unpaid bill or bills, a statement showing:

- (a) the bill or bills then due and unpaid;
- (b) the amount thereof;
- (c) the amount of the deposit, together with the interest accrued thereon and the period covered thereby; and
- (d) the balance of the bill or bills remaining unpaid or the balance of the deposit and interest thereon remaining to the credit of the depositor.

.SO DOC 16C-510.5

NYCRR

510.5 Refund. Each and every waterworks corporation holding consumer deposits shall render to each depositor, when his deposit is refunded, a statement showing the amount of the deposit and the date thereof; the amount of unpaid interest accrued thereon to date of the refund and the period covered thereby; and the amount of deposit and interest refunded. Each depositor upon becoming entitled thereto either by reason of nondelinquency for one year or upon ceasing to be a consumer may withdraw his deposit and all interest thereon which has not been

refunded or credited against bills for service upon surrendering his deposit certificate (or submitting satisfactory proof of ownership of the deposit or of the right to receive the same) and the payment of all bills for which such deposit is security. The "prudent" period of deposit retention, referred to in Public Service Law, section 117, may not exceed two years of nondelinquency in the payment of bills rendered.

.SO DOC 16C-510.6

NYCRR

510.6 Certificate of deposit. Each and every waterworks corporation holding consumer deposits shall issue to every consumer from whom a deposit may be exacted a certificate of deposit for which shall be used a good quality of paper and on which certificate there shall be printed, in addition to the receipt for the moneys deposited, the substance of the following:

THIS RECEIPT IS NOT NEGOTIABLE OR TRANSFERABLE

Interest will be allowed on this deposit so long as it shall remain with the corporation. When this deposit has been held for one year, interest thereon will be paid in cash or credited on a bill for service rendered the depositor thereafter, but not later than the first bill rendered, after the next succeeding first day of October and at the expiration of each succeeding one-year period.

Preserve this receipt to be surrendered when deposit is returned.

.SO DOC 16C-510.7

NYCRR

510.7 Refund without certificate of deposit. Each and every waterworks corporation holding consumer deposits shall provide reasonable ways and means, in such manner as such corporation may elect, whereby a depositor who makes application for the return of his deposit and is entitled to the return thereof, but who is unable to produce the original certificate of deposit or receipt, may not be deprived of his rights.

.SO DOC 16C-510.8

NYCRR

510.8 Circular containing terms of deposit. Each and every waterworks corporation holding consumer deposits shall keep on hand for distribution to its consumers printed circulars, over its corporate or business name, which circulars shall be entitled "TERMS AND CONDITIONS UPON WHICH CONSUMERS' DEPOSITS ARE COLLECTED, HELD, AND MAY BE

WITHDRAWN" and which shall contain a copy of this Part, a copy of Public Service Law, section 117 (as added by L. 1976, ch. 557) and such other pertinent information as the corporation may elect. Every such corporation, prior to or upon exacting a deposit, shall furnish a copy of said circular to the consumer or applicant for service from whom a deposit is demanded.

.SO DOC 16C-510.9

NYCRR

510.9 Special rule for residential customers who transfer dwelling units.

No waterworks corporation may require a deposit of a residential customer where such customer transfers residences within such corporation's service territory and continues service with such corporation if the residential customer was not required to post a security deposit or had a security deposit returned pursuant to section 117 of the Public Service Law.

.SO DOC 16C-510.10

NYCRR

510.10 Exceptions. Sections 510.4-510.9 do not apply to residential customers of any waterworks corporation that is covered by Part 14 of this Title.

Sec.

520.1 Contents of notice

520.2 Issuance not heretofore reported

.SO DOC 16C-520.1

NYCRR

Section 520.1 Contents of notice.

Pursuant to the provisions of section 89-f of the Public Service Law, as amended, every waterworks corporation subject to said section, after the issuance or assumption of stocks, bonds, notes or other evidences of indebtedness, including bond, notes or other evidences of indebtedness payable on demand or within less than 12 months, shall file with this commission a notice of such transaction within the time and in the form specified in the following:

(a) Name of reporting utility (indicate whether corporation, partnership, individual, or other party).

(b) Address of reporting utility.

(c) The name of the official responsible for statements submitted and

to whom should be addressed any correspondence relating thereto.

(d) Date of the report.

(e) Period covered by the report (both dates inclusive where applicable).

(f) Information regarding securities or obligations issued.

(1) Pursuant to authority granted by order of this commission:

(i) Notice of issuance shall be filed within the period specified in the order approving the issuance of the securities or obligations.

(ii) Issuance of capital stock, in exchange for convertible securities issued pursuant to commission authorization, may be reported annually, not later than 60 days after the end of the calendar year covered by the report; such report to show only the number of shares of such stock issued during such calendar year, the securities retired by reason of the exchange, and the additional consideration realized, if any, by reason of the exchange.

(iii) For each type of security or obligation, include the following information, as appropriate:

(a) Designation of security--classified according to distinguishing characteristics, such as class of stock of par value or no par value and dividend rate of preferred stock, or character of debt obligation and interest rate or maturity date or other distinguishing characteristic.

(b) Date of actual issue or assumption.

(c) Number of shares of each class of stock or principal amount of each debt obligation issued.

(d) Consideration realized from each class or type of security (if consideration is other than cash, give description and basis of value).

(e) Case number and date of order of this commission under which the security issue was authorized.

(2) Securities issued or assumed under circumstances not requiring the formal approval of this commission, such as obligations (real estate mortgages, chattel mortgages, conditional sale agreements, promissory notes, etc.) having a term of less than 12 months:

(i) Notice of issuance shall set forth the transaction covering obligations issued during each calendar month and shall be filed not later than 10 days after the end of the calendar month covered by such period.

(ii) For each type of obligation of \$10,000 or more, include the following information as appropriate:

(a) Designation of the obligation giving descriptive distinguishing characteristics. Include description of real estate mortgage, chattel mortgage, conditional sale agreement, or any hypothecation of assets

given in connection with the obligation.

(b) Date of actual issue or assumption.

(c) Name of payee.

(d) Principal or face amount.

(e) Rate of interest.

(f) Date of maturity (if demand so specify) or schedule of periodic payments.

(g) Names of endorsers, if any.

(h) Consideration realized from issuance of the obligation.

(i) Purpose for which the obligation was issued; if for cash indicate the use to which the proceeds are to be applied.

(j) State whether the obligation represents an increase of indebtedness or an obligation given in renewal of existing obligations or in cancellation of accounts payable. For renewals of obligations of \$10,000 face amount or more, give the dates and amounts of the obligations for which the renewal obligation is in whole or in part to be substituted; for renewals of obligations of less than \$10,000 face amount, give the date or month of issuance, the rate of interest, date or month of maturity and the total amount of the obligations for which the renewal obligations is in whole or in part to be substituted. (See subparagraph (iv) of this paragraph).

(iii) For each type of obligation of less than \$10,000 face amount list the information required in subparagraph (ii) of this paragraph or group each type of obligation of less than \$10,000 face amount which is identical except for the payee, the exact date of issue or assumption within any one calendar month and the exact date of maturity within any one calendar month. Report for each group the information required in subparagraph (ii) (a), (e), (g), (h), (i) and (j) of this paragraph but substitute for subparagraph (ii) (b), (c), (d) and (f) the following; (b) month of actual issue or assumption, (c) number of obligations, (d) amount of indebtedness and (f) the month and year of maturity (if demand so specify).

(iv) Report the outstanding obligations as of the final date of the period covered by the notice of issuance. List the date of actual issue or assumption, principal or face amount and rate of interest of all obligations reported pursuant to subparagraph (ii) of this paragraph. For obligations reported pursuant to subparagraph (iii) of this paragraph list the date or month of actual issue or assumption, the rate of interest of each obligation or group of obligations and the amount of each obligation or group of obligations outstanding.

(3) For any other class of securities, give corresponding particulars,

not later than 10 days after the end of the calendar month in which issued or assumed, to the end that the commission may be fully advised as to the nature of the transaction and purpose for which obligations were incurred or securities were issued and the proceeds therefrom are to be used.

(g) Each notice of issuance of securities or obligations shall be subscribed by an executive officer of the corporation, a member of the partnership, the individual owner, or other party of the utility in behalf of which the notice is filed, and affirmed by such person as true under the penalties of perjury.

.SO DOC 16C-520.2 NYCRR

520.2 Issuance not heretofore reported.

Every such public utility which has not filed with this commission a notice of the issuance of any stocks, bonds, notes, or other evidences of indebtedness now outstanding and issued with or without the approval of this commission shall, within 30 days from the date of service of a copy of this order, file a notice of each such transaction in the form prescribed herein.

(Statutory authority: Public Service Law, § 89-c)

Sec.

531.1 Late payment charge

531.2 Contents of bill

531.3 Amount of late payment charge

531.4 Contents of rate schedules

531.5 Increase in rates prohibited

.SO DOC 16C-531.1 NYCRR

Section 531.1 Late payment charge. Any corporation, partnership or person furnishing water service may impose a late payment charge, either

one-time or continuing interest type, because of the failure of any customer to pay a bill for such service within a specified period therein stated. This section does not apply to residential customers of any waterworks corporation that is covered by Part 14 of this Title.

.SO DOC 16C-531.2 NYCRR

531.2 Contents of bill. If any corporation, partnership or person furnishing water service elects to impose a one-time charge for late payment for such service, it shall show on each bill the amount billed, the amount that will be due, including the late payment charge, when the late payment charge becomes applicable. This section does not apply to residential customers of any waterworks corporation that is covered by Part 14 of this Title.

.SO DOC 16C-531.3 NYCRR

531.3 Amount of late payment charge. If a one-time late payment charge may be imposed, it shall not exceed 10 percent on the first \$10 (except that a minimum charge may be made of not to exceed 15 cents per bill), plus not to exceed three percent on that portion of the bill over \$10.

.SO DOC 16C-531.4 NYCRR

531.4 Contents of rate schedules. In case a one-time late payment charge is imposed, the rate schedules shall show the rates for service, the amount due including the late payment charge when the charge becomes applicable, and the period during which the bill may be paid without the imposition of the late payment charge.

.SO DOC 16C-531.5 NYCRR

531.5 Increase in rates prohibited. No corporation, partnership or person furnishing gas, electric, steam or water service shall so revise or redraft its rate schedules in compliance with this Part as to increase the rates for service applicable to any customer as compared with the rates now in effect without special permission of the commission.

Sec.

533.1 Exceptions

533.2 Notice of discontinuance--time

533.3 Notice of discontinuance--format

533.4 No discontinuance without verification of delinquent account

533.5 Rapid posting of payments in response to notices of discontinuance

533.6 No discontinuance on Saturday, Sunday, public holiday, or day on which the main business office of the company is not open for business

533.7 No additional notice required when payment by check is subsequently dishonored

533.8 Discontinuance of service to entire multiple dwellings

533.9 Billing disputes

533.10 Publicizing complaint procedures

.SO DOC 16C-533.1 NYCRR

Section 533.1 Exceptions. This Part does not apply to residential customers of any waterworks corporation that is covered by Part 14 of this Title.

.SO DOC 16C-533.2 NYCRR

Section 533.2 Notice of discontinuance--time. (a) No waterworks corporation shall discontinue the supply of water for nonpayment of bills rendered for service or failure to post a required deposit until either:

(1) at least 15 days after written notice has been served personally upon the proper person or persons as hereinafter defined;

(2) at least 18 days after mailing written notice in postpaid wrapper to the address of such proper person or persons; or

(3) at least 15 days after the proper person or persons has either signed for or refused a registered letter containing written notice, mailed to the address of such proper person or persons.

(b) As used in this Part:

(1) The term proper person means:

(i) either the owner of the premises where service is rendered, or in lieu thereof, the person, firm or corporation to whom or which the last preceding bill has been rendered and from whom or which the waterworks corporation has received payment therefor; and

(ii) the superintendent or other person in charge of the building or premises where service is rendered, if it can be readily ascertained that there is such superintendent or other person in charge.

(2) The term address of such proper person or persons as that term relates to the persons indicated in subparagraph (1)(i) of this subdivision means the address where service is rendered, except that if the proper person has specified to the company in writing an alternate address for billing purposes, such term shall refer to such alternate address.

.SO DOC 16C-533.3

NYCRR

533.3 Notice of discontinuance--format.

(a) Every notice indicating discontinuance of service shall:

(1) clearly indicate in nontechnical language:

(i) the reason for service discontinuance;

(ii) the total amount required to be paid by the customer to avoid discontinuance of service, indicating the amount for which the customer's account is in arrears or the required deposit, if any, which must be posted by the customer, or both;

(iii) a method whereby the customer may tender payment of the full sum due and owing, including any required deposit, to avoid the discontinuance of his service;

(iv) the availability of company procedures to consider customer complaints prior to discontinuance, including the address and phone number of the office of the waterworks company the customer may contact in reference to his account; and

(v) the earliest date on which discontinuance may be attempted; and

(2) have printed on the face thereof in a size type capable of attracting immediate attention the following:

"THIS IS A FINAL DISCONNECT NOTICE. TO AVOID INCONVENIENCE, BRING THIS NOTICE TO THE ATTENTION OF THE COMPANY WHEN PAYING THIS BILL."

(b) Where full compliance with subdivision (a) of this section is found by the commission to be infeasible or to impose an unreasonable burden upon the company, the commission may grant a waiver of the

requirements of such subdivision upon approval by the commission of an alternate arrangement which accomplishes the basic purposes of this section.

.SO DOC 16C-533.4

NYCRR

533.4 No discontinuance without verification of delinquent account.

(a) No waterworks corporation shall discontinue service for nonpayment of bills rendered or for failure to post a required deposit unless:

(1) it shall have verified that payment has not been received at any office of the company or at any office of an authorized collection agent through the end of the notice period required by this Part; and

(2) it shall have verified on the day disconnection occurs that payment has not been posted to the customer's account as of the opening of business on that day, or, shall have complied with procedures established pursuant to section 533.4(b) of this Part.

(b) In the case of a company which serves a geographical area of this State involving more than six counties, the commission may grant a waiver of the requirements of subdivision (a) of this section upon approval by the commission of an alternate procedure for verification of payments which accomplishes the basic purposes of that subdivision.

.SO DOC 16C-533.5

NYCRR

533.5 Rapid posting of payments in response to notices of discontinuance. Every waterworks corporation shall take reasonable steps to establish procedures to insure that any payments made in response to notices of discontinuance, when the customer brings the fact that such a notice has been issued to the attention of the company or its collection agents, shall either:

(a) be posted to the customer's account on the day payment is received; or

(b) be processed in some manner so that discontinuance will not occur.

.SO DOC 16C-533.6

NYCRR

533.6 No discontinuance on Saturday, Sunday, public holiday, or day on which the main business office of the company is not open for business. No waterworks corporation shall discontinue service to any person for nonpayment of bills or for failure to post a required deposit on a Saturday, Sunday, public holiday, or day on which the main business office of the company is not open for business. For purposes of this section, "public holiday" shall refer to those holidays enumerated in the General Construction Law.

.SO DOC 16C-533.7

NYCRR

533.7 No additional notice required when payment by check is subsequently dishonored. Receipt of a subsequently dishonored negotiable

instrument in response to a notice of discontinuance shall not constitute payment of the customer's account, and no waterworks corporation shall be required to issue additional notice prior to discontinuance.

.SO DOC 16C-533.8

NYCRR

533.8 Discontinuance of service to entire multiple dwellings.

(a) No waterworks corporation shall discontinue service to an entire multiple dwelling (as defined in the Multiple Dwelling Law or the Multiple Residence Law) where the owner, person, firm or corporation to whom or which the last preceding bill has been rendered, or from whom or which the waterworks corporation has received payment therefor, has failed to pay such utility bills, until it has complied with the following procedure:

(1) The waterworks corporation must give 15 days' written notice of its intention to so discontinue by personally serving such notice on the owner of the premises affected or on the person, firm, or corporation to whom or which the last preceding bill was rendered, or from whom or which the utility has received payment therefor, and on the superintendent or other person in charge of the building, if it can be readily ascertained that there is such superintendent or other person in charge.

(2) The waterworks corporation must give 18 days' written notice to the owner, person, firm or corporation specified in paragraph (1) of this subdivision if such notice is mailed in a postpaid wrapper to the address of such person, firm or corporation.

(3) In addition to the notice prescribed by paragraphs (1) and (2) of this subdivision, 15 days' written notice shall be posted in the public areas of such multiple dwelling, and 18 days' notice shall be mailed to the "Occupant" of each unit in that multiple dwelling, to the local health officer and director of the social services district for the political subdivision in which the multiple dwelling is located; if the multiple dwelling is located in a city or village, to the mayor thereof, or if there be none, to the manager; or, if the multiple dwelling is located in a town, then to the town supervisor; and to the county executive of the county in which the multiple dwelling is located, or if there be none, then to the chairman of such county's legislative body. Notice to the mayors, managers, town supervisors, county executives, and chairmen of county legislatures may be mailed to the persons specified therein or to their designees. Notice to health officers, directors of social services, mayors, managers, supervisors, county executives and chairmen of county legislatures shall be repeated not more than four

working days nor less than two working days prior to such discontinuance.

(4) Whenever a notice of intention to discontinue water service has been made pursuant to the provisions of this section and obligations owed the waterworks corporation have been satisfied, the waterworks corporation shall notify, in the same manner as it gave such notice of intention, the occupant of each unit that the intention to discontinue water service no longer exists.

(b) Notwithstanding the provisions contained in subdivision (a) of this section, no waterworks corporation shall discontinue services to a multiple dwelling, where the owner, person, firm or corporation responsible for making payment fails to pay utility bills, as long as occupants of such multiple dwellings continue to make timely payments for such service in accordance with procedures filed by the utility and approved by the Public Service Commission. All notices referred to in subdivision (a) of this section shall contain the intended date of discontinuance of service and a utility contact, including a telephone number, who will advise occupants of the amount due for water service and who will arrange meetings with occupants to attempt to work out a mechanism for avoiding discontinuance of service in the event that the owner continues to fail to make requisite payments or arrangements for such payments. The notice shall also refer to the provisions contained in section 235-a of the New York Real Property Law authorizing occupants to setoff, against their rent, payments to utilities in such circumstances.

(c) A waterworks corporation, following the procedure outlined in subdivision (b) of this section, may require occupants in a multiple dwelling to pay no more than the current water charges incurred by the owner, person, firm or corporation to whom or which the last preceding bill has been rendered or from whom or which the utility has received payment therefor. A current charge, for purposes of this section, means the amount properly billed the owner, etc., for water used during the most recent billing period covered by the first bill rendered on or after the date when the disconnect notice is issued. The current charges will not include any arrears for earlier billing periods that may appear on such a bill.

(d) If occupants in a multiple dwelling find they are unable to reach an agreement with the utility to avoid discontinuance of service, they may contact the commission's water division. After such a request is received, a representative of the water division will attempt to work out such an agreement and will, if necessary, arrange a meeting with

occupant representatives, the utility, and the owner, person, firm or corporation responsible for making payment for water service; provided, however, that such a meeting will be required only if the water division receives a written petition signed by at least 25 percent of the occupants in a multiple dwelling.

(e) The water division may stay a threatened disconnection of service to an entire multiple dwelling where it concludes that good faith efforts are being made by the occupants to arrange for the payment of current water bills.

(f) Whenever an owner of a multiple dwelling, or the person, firm or corporation responsible for making payment for water service, fails to pay two consecutive bills for utility service by the time the third bill has been prepared, the utility must notify the commission within 15 days that it has invoked the procedures outlined in subdivisions (a) and (b) of this section. Unless otherwise authorized, the notification should be in the form of a semimonthly report filed with the water division. Such report should be cumulative, specify the total amount due for each overdue account, the period of arrearage, and indicate if a notice of discontinuance has been sent. If these reports demonstrate a need for changes in collection procedures, the division shall advise the commission.

(g) Sections 533.3 through 533.6 of this Part shall be applicable with respect to the discontinuance of service to entire multiple dwellings.

.SO DOC 16C-533.9

NYCRR

533.9 Billing disputes. (a) Every waterworks corporation shall establish procedures whereby any complaint filed with such corporation by any customer thereof in regard to any bill for service rendered or any deposit required will be promptly investigated in an appropriate and fair manner, with the result of such investigation being promptly reported to the complaining customer. Such procedures shall allow the acceptance and processing of complaints submitted in simple manner and form. Regardless of whether a notice of discontinuance has previously been sent, the utility's procedures shall provide that pending the utility's investigation it shall not discontinue service or issue a notice of discontinuance; provided, however, the consumer may be required to pay the undisputed portion of a disputed bill or deposit to prevent discontinuance or the issuance of a notice of discontinuance.

(b) If, after the completion of such an investigation, the utility determines that the disputed service has been rendered, or that the disputed charge or deposit is proper, in whole or in part, the utility may require the full bill or deposit or the appropriate portion thereof

to be paid; in such event, appropriate notice of the determination shall be given to the customer, and where notice of discontinuance of service has previously been sent, or is served with the determination, such notice shall include a statement advising the customer of the availability of the commission's complaint handling procedures. The utility's procedures may provide for discontinuance of service if the customer fails to pay such required amount after receipt of proper notice, provided that a customer's service will not be discontinued until at least five days after notice of the utility's determination, where personal service is made upon the person supplied, or at least eight days after mailing of such a notice; and provided further that a customer's service shall not be discontinued, nor shall a notice of discontinuance be issued, if a complaint regarding a bill or deposit has been made to the commission and the customer pays the undisputed portion of any bill for service, including bills for current usage, during the commission's investigation of such complaint, unless the commission shall otherwise order.

(c) The utility's procedures shall provide that, where the complaint procedures of the commission have been invoked and it is determined that the disputed service has been rendered, or that the disputed charge or deposit is proper, in whole or in part, a customer's service will not be discontinued for failure to pay the amount found appropriate until at least 15 days after notice of the commission's determination.

(d) The procedures required to be established under this section shall be filed with the commission for review. The commission shall be advised of any substantial changes in such procedures 30 days prior to their proposed implementation to permit commission review.

.SO DOC 16C-533.10

NYCRR

533.10 Publicizing complaint procedures. (a) Every waterworks corporation shall, by a notice accompanying a regular bill or otherwise, advise each of its customers annually, unless otherwise directed by the commission, of the procedures available to the customer to register complaints in regard to service or disputed bills. Such notice shall clearly state the means by which a complaint can be made to the company and shall also advise the customer that, if after contacting the company the customer remains dissatisfied, he may contact the New York State Public Service Commission. Such notice shall further state that the Public Service Commission has a staff available to give assistance in such matters, and shall also specify an appropriate address of the Public Service Commission.

(b) Prior to circulating the notice required by subdivision (a) of

this section, each utility shall submit to the commission for its approval the form of such notice and the intended program for its distribution.

.SO DOC 16C-PT534

NYCRR

Section 544.1 Corporations affected.

Every waterworks corporation having annual water operating revenues of \$100,000 or over shall establish, provide and maintain continuing property records of its property used wholly or partly in water operations.

.SO DOC 16C-544.2

NYCRR

544.2 Requirements of continuing property records.

Such continuing property record shall comply with the following requirements:

(a) Such record shall be divided into continuing property record units which shall be arranged to conform with the operating property or the fixed capital accounts and shall include a description of each of such units.

(b) The original cost of each of such units shall be set forth provided that in those cases where the original cost cannot be ascertained without unreasonable expense, such original cost shall be estimated.

(c) Except as otherwise provided herein, there shall be shown for property hereafter installed, and for present property so far as can be ascertained, either in such record or in supporting data thereto, for each of such units, the date when charged to operating property or fixed capital, the location of the property, the manufacturer's name and any number or other identification mark imprinted thereon, the accounting company number or designation, and such other description as may be necessary to plainly identify the property and the associated original

cost thereof.

(d) When meters or major units of power plant, pumping or purification equipment have been retired and subsequently reinstalled, the date when such property was first charged to operating property or fixed capital shall also be shown.

(e) Such property record shall show separately the units located in each city, village or town, and in the case of New York City in each borough, and in each power plant, pumping plant or purification plant. When a corporation desires a modification of this requirement, application should be made to the commission.

(f) There shall be shown by appropriate reference the source of all entries; and all drawings and computations and other detail records, supporting either the quantities or the cost included in the continuing property record, shall be retained.

(g) The original cost of each parcel of land and each structure owned in fee shall be set forth and no further subdivision need be shown.

(h) The original cost of easements for right of way shall be separately set forth for each transmission or distribution line.

(i) Property consisting of a large number of similar units may be grouped and only the average unit cost need be set forth for similar units of each size installed during a calendar year, except that in the case of Account 325, Meter Installations, separate unit costs for ordinary small inside meter installations need not be set forth for each year of installation.

.SO DOC 16C-544.3

NYCRR

544.3 Filing of proposed record units.

Every water-works corporation affected by this Part shall file on or before February 1, 1937 a statement setting forth the continuing property record units proposed to be used in its continuing property record.

NYCRR

544.4 Completion of continuing property records.

(a) The continuing property record herein ordered to be established shall be completed as to property installed prior to January 1, 1937 on or before December 31, 1937. When a corporation desires a modification of this requirement, application should be made to the commission on or before November 1, 1937.

(b) Upon the completion of the continuing property record of property acquired prior to January 1, 1937, notice shall be given this commission.

.SO DOC 16C-544.5

NYCRR

544.5 Certain records required.

(a) Each corporation affected by this Part shall keep such records of property and property retirements as will reflect, so far as practicable, the service life of all property retired, and will permit the determination of the age of all existing property; and also such records as will reflect the salvage and cost of removal of property retired from each account including property used wholly or partly in water operations.

(b) Each such corporation shall also maintain such records supporting its books of account as are necessary to show the reserves accumulated to provide for depreciation or ultimate retirement of its property used wholly or partly in water operations, separately for each operating property or fixed capital account.

.SO DOC 16C-544.6

560.1 Definitions

560.2 Abstracts from law

.SO DOC 16C-560.0

NYCRR

Section 560.0 Order authorizing uniform system of accounts for classes A and B.

(a) The uniform system of accounts for waterworks corporations (classes A and B) is hereby prescribed for every waterworks corporation (as that term is defined in the Public Service Law) which has annual operating revenues from water operations of \$700,000 or more, subject to the jurisdiction of this commission, and every such water corporation is hereby required, on and after July 1, 1987, to keep its records and accounts in conformity therewith.

(b) During the 12 months following the date on which said uniform system of accounts becomes effective, any such waterworks corporation may for purposes of comparison, keep on its books, in addition to the accounts hereby prescribed, such portion or portions of its present accounts as may be deemed desirable by any such corporation.

(c) Each waterworks corporation for which this uniform system of accounts is prescribed shall classify, set forth, and carry all assets, liabilities, capital stock, and retained earnings (formerly surplus) existing as of the effective date of this uniform system of accounts, as prescribed in such system of accounts.

(d) As of the date a utility becomes subject to this system of accounts, it shall prepare opening entries in accordance with the following provisions:

(1) The accounts prescribed herein shall be opened by transferring thereto the balances carried in the accounts previously maintained. The company is authorized to make such subdivisions, reclassifications, or consolidations of such balances as are necessary to meet the requirements of this system of accounts.

(2) The company shall prepare and keep as supporting records summary statements showing:

(i) the closing balances in each account carried on the books prior to the adoption of this system of accounts;

(ii) the journal entries to effect the transfer of those balances to the accounts prescribed herein, arranging such entries so as to show for

each account or subdivision thereof from what account and to what account each amount was transferred;

(iii) the resultant opening balance of each account under this system of accounts.

(3) The first annual report filed with this commission by a utility covering its operations subsequent to the adoption of this system of accounts shall include copies of the statements referred to in paragraph (2) of this subdivision.

(e) In prescribing this system of accounts, the commission does not commit itself to the approval or acceptance of any item set out in any account for the purpose of fixing rates or in determining other matters before the commission. The prescribed system of accounts is designed to set out the facts in connection with the capitalization, construction, income, expenditures, etc., and therefrom the commission will determine, in connection with such matters as may be under advisement from time to time, just what consideration shall be given to the various items in the several accounts.

(f) The system of accounts prescribed by this Part shall become effective July 1, 1987 and shall be put into effect by each water corporation affected thereby on July 1, 1987.

.SO DOC 16C-560.1

NYCRR

560.1 Definitions.

(a) When used in this system of accounts:

(1) Accounts means the accounts prescribed in this system of accounts.

(2) Actually issued, as applied to securities issued or assumed by the utility, means those which have been sold to bona fide purchasers for a valuable consideration, those issued as dividends on stock, and those which have been issued in accordance with contractual requirements direct to trustees of sinking funds.

(3) Actually outstanding, as applied to securities issued or assumed by the utility, means those which have been actually issued and are neither retired nor held by or for the utility; provided, however, that securities held by trustees shall be considered as actually outstanding.

(4) Amortization means the gradual extinguishment of an amount in an account by distributing such amount over a fixed period, over the life of the asset or liability to which it applies, or over the period during which it is anticipated the benefit will be realized.

(5)(i) Associated companies means companies or persons that, directly or indirectly, through one or more intermediaries, control, or are controlled by, or are under common control with, the accounting company.

(ii) Control (including the terms controlling, controlled by, and

under common control with), means the possession, directly or indirectly, of the power to direct or cause the direction of the management and policies of a company, whether such power is exercised through one or more intermediary companies, or alone, or in conjunction with, or pursuant to an agreement, and whether such power is established through a majority or minority ownership or voting of securities, common directors, officers, or stockholders, voting trusts, holding trusts, associated companies, contract or any other direct or indirect means.

(6) Book cost means the amount at which property is recorded in these accounts without deduction of related provisions for accrued depreciation, amortization, or for other purposes.

(7) Commission or the commission means the Public Service Commission of the State of New York.

(8) Company, corporation, water-works corporation (see definition (20) herein; Public Service Law; also General Provisions, § 560.2 subd. (b), Abstract from law).

(9) Cost means the amount of money actually paid for property or services. When the consideration given is other than cash in a purchase and sale transaction, as distinguished from a transaction involving the issuance of common stock in a merger or a pooling of interest, the value of such consideration shall be determined on a cash basis.

(10) Cost of removal means the cost of demolishing, dismantling, tearing down or otherwise removing water plant, including the cost of transportation and handling incidental thereto.

(11) Debt expense means all expenses in connection with the issuance and initial sale of evidences of debt, such as fees for drafting mortgages and trust deeds; fees and taxes for issuing or recording evidences of debt; cost of engraving and printing bonds and certificates of indebtedness, fees paid trustees; specific costs of obtaining governmental authority; fees for legal services; fees and commissions paid underwriters, brokers, and salesmen for marketing such evidences of debt; fees and expenses of listing on exchanges; and other like costs.

(12) Depreciation, as applied to depreciable water plant, means the loss in service value not restored by current maintenance, incurred in connection with the consumption or prospective retirement of water plant in the course of service from causes which are known to be in current operation and against which the utility is not protected by insurance. Among the causes to be given consideration are wear and tear, decay, action of the elements, inadequacy, obsolescence, changes in the art, changes in demand and requirements of public authorities.

(13) Discount as applied to debt securities issued or assumed by the

utility, means the excess of the face value of the debt securities plus interest accrued at the date of the sale over the cash value of the consideration received from their sale.

(14) Investment advances means advances, represented by notes or by book accounts only, with respect to which it is mutually agreed or intended between the creditor and debtor that they shall be settled by the issuance of securities or shall not be subject to current settlement.

(15) Minor items of property means the associated parts or items of which retirement units are composed.

(16) Net salvage value means the salvage value of property retired less the cost of removal.

(17) Nominally issued, as applied to securities issued or assumed by the utility, means those which have been signed, certified, or otherwise executed, and placed with the proper officer for sale and delivery, or pledged, or otherwise placed in some special fund of the utility, but which have not been sold, or issued direct to trustees of sinking funds in accordance with contractual requirements.

(18) Nominally outstanding, as applied to securities issued or assumed by the utility, means those which, after being actually issued, have been reacquired by or for the utility under circumstances which require them to be considered as held alive and not retired, provided, however, that securities held by trustees shall be considered as actually outstanding.

(19) Original cost as applied to water plant, means the cost of such property to the person, or to the municipal corporation operating a public utility, first devoting it to public service.

(20) Person means an individual, a corporation, a partnership, an association, a joint stock company, a business trust, or any organized group of persons, whether incorporated or not, or any receiver or trustee.

(21) Premium, as applied to the securities issued or assumed by the utility, means the excess of the cash value of the consideration received from their sale over the sum of their par (stated value of stocks without par value) or face value and interest or dividends accrued at the date of sale.

(22) Property retired, as applied to water plant, means property which has been removed, sold, abandoned, destroyed, or which for any cause has ceased to be used and useful in the water service of the public.

(23) Replacing or replacement, when not otherwise indicated in the context, means the construction or installation of water plant in place

of property retired, together with the removal of the property retired.

(24) Research and development means expenditures incurred by the companies either directly or through another person or organization (such as research institute, industry association, foundation, university, engineering company or similar contractor) in pursuing research and development activities including experiment, design, installation, construction or operation. Such research and development costs should be reasonably related to the existing or future utility business. The term includes but is not limited to: all such costs incidental to the design, development or implementation of an experimental facility, a plant process, a product, a formula, an invention, a system or similar items, and the improvement of already existing items of a like nature; and the costs of obtaining its own patent, such as attorney's fees expended in making and perfecting a patent application. The term does not include expenditures for efficiency surveys; studies of management, management techniques and organization; consumer surveys, advertising, promotions, or items of a like nature.

(25) Retained earnings (formerly earned surplus) means the accumulated net income of the utility less distribution to stockholders and transfers to other capital accounts.

(26) Retirement units means those items of water plant which, when retired, with or without replacement, are accounted for by crediting the book cost thereof to the water plant account in which included.

(27) Salvage value means the amount received for property retired, less any expenses incurred in connection with the sale or in preparing the property for sale, or, if retained, the amount at which the material recoverable is chargeable to materials and supplies, or other appropriate account.

(28) Service life means the time between the date water plant is includible in water plant in service, or water plant leased to others, and the date of its retirement. If depreciation is accounted for on a production basis rather than on a time basis, then service life should be measured in terms of the appropriate unit of production.

(29) Service value means the difference between the original cost and the net salvage value of water plant.

(30) Utility or utility company, as used herein and when not otherwise indicated in the context means any waterworks corporation, as defined in the Public Service Law, to which this system of accounts is applicable.

.SO DOC 16C-560.2

NYCRR

560.2 Abstracts from law.

(a) Authority for uniform system of accounts. This uniform system of accounts for waterworks corporations is established and issued by the Public Service Commission under the following provision of the Public Service Law (chapter 48 of the Consolidated Laws):

"Section 89-c, subdivision 3. The commission shall have power, in its discretion, to prescribe uniform methods of keeping accounts, records and books to be observed by waterworks corporations. It may also, in its discretion, prescribe by order forms of accounts, records and memoranda to be kept by such corporations. Notice of alterations by the commission in the required method or form of keeping a system of accounts shall be given to such corporations by the commission at least six months before the same shall take effect. Any other and additional forms of accounts, records and memoranda kept by such corporations shall be subject to examination by the commission."

(b) Definition of waterworks corporation.

"Section 2, subdivision 27. The term "waterworks corporation," when used in this Chapter includes every corporation, company, association, joint stock association, partnership and person, their lessees, trustees or receivers, appointed by any court whatsoever, owning, operating or managing any water plant or waterworks, except where water is distributed solely on or through private property solely for the use of the distributor or its tenants and not for sale to others. With respect to waterworks corporations having a property value of \$30,000 or less, only the provisions of this Chapter relating to the regulation of water rates shall apply."

"Section 5-b. Corporations formed to acquire property or to transact business which would be subject to the provisions of this Chapter, and corporations possessing franchises for any of the purposes contemplated by this Chapter, shall be deemed to be subject to the provisions of this Chapter although no property may have been acquired, business transacted or franchises exercised."

Note: Whenever the term waterworks corporation is used in this uniform system of accounts it shall be understood to have the inclusive meaning given it by the definitions quoted above. The term waterworks company is used in the same sense as waterworks corporation.

.SO DOC 16C-561.1 NYCRR

Section 561.1 Classification of utilities. (a) For the purpose of applying systems of accounts prescribed by the commission, water utilities are divided into four classes, as follows:

Class A. Utilities having annual water operating revenues of \$1,000,000 or more.

Class B. Utilities having annual water operating revenues of \$700,000 or more but less than \$1,000,000.

Class C. Utilities having annual water operating revenues of \$400,000 or more but less than \$700,000.

Class D. Utilities having annual water operating revenues of \$100,000 or more but less than \$400,000.

(b) This system of accounts applies to Class A and B utilities. Those applicable to Class C and Class D utilities are issued separately.

(c) The class to which any utility belongs shall originally be determined by the average of its annual water operating revenues for the last three consecutive years. Subsequent changes in classification shall be made when the annual water operating revenues for each of the three

immediately preceding years shall exceed the upper limit, or be less than the lower limit, of the annual water operating revenues of the classification previously applicable to the utility.

(d) Any utility may, at its option, adopt the system of accounts prescribed by the commission for any larger class of utilities. Notice of such action shall be promptly filed with the commission.

.SO DOC 16C-561.2

NYCRR

561.2 Records. (a) Each utility shall keep its books of account and all other books, records, and memoranda which support the entries in such books of account so as to be able to furnish readily full information as to any item included in any account. Each entry shall be supported by such detailed information as will permit ready identification, analysis, and verification of all facts relevant thereto.

(b) The books and records referred to herein include not only accounting records in a limited technical sense, but all other records, such as minute books, stock books, reports, correspondence, memoranda, etc., which may be useful in developing the history of or facts regarding any transaction. All such records shall be accessible, at all times, to the authorized representatives of the commission at a location within the State of New York, unless the company is specifically exempted by order of this commission.

(c) No utility shall destroy any such books or records unless the destruction thereof is permitted by rules and regulations of the commission.

(d) In addition to prescribed accounts, clearing accounts, temporary or experimental accounts, and subdivisions of any account, may be kept, provided the integrity of the prescribed accounts is not impaired.

(e) All amounts included in the accounts prescribed herein for water plant and operating expenses shall be just and reasonable and any payments or accruals by the utility in excess of just and reasonable charges shall be included in account 426, Miscellaneous Income Deductions.

(f) The arrangement or sequence of the accounts prescribed herein shall not be controlling as to the arrangement or sequence in report forms which may be prescribed by the commission.

(g) Not later than March 31, 1974, each utility shall have filed with the commission a copy of its manual of accounts, or other systematic statement of accounts showing every account or subaccount kept during the year 1973, and thereafter shall file (either as changes occur, or for each calendar year at a date not later than the filing of its annual

report) a statement of each account, subaccount, and clearing account opened or discontinued and the effective date of such change. For each clearing account opened, the purpose of the account shall be stated.

.SO DOC 16C-561.3

NYCRR

561.3 Numbering system.

(a) The account numbering scheme used herein consists of a system of three-digit whole numbers as follows:

(100-199) Assets and Other Debits.

(200-299) Liabilities and Other Credits.

(300-399) Plant Accounts.

(400-432, 434-435) Income Accounts.

(433, 436-439) Retained Earnings Accounts.

(460-479) Revenue Accounts.

(600-699) Production, Transmission and Distribution Expenses.

(900-949) Customer Accounts, Sales and General Administrative Expenses.

(b) In certain instances, numbers have been skipped in order to allow for possible later expansion or to permit better coordination with the numbering system for other utility departments.

(c) The numbers prefixed to account titles are to be considered as part of the titles. Each utility, however, may adopt for its own purposes a different system of account numbers (see also general instruction 561.2, subd. (d)) provided that the numbers herein prescribed shall appear in the descriptive headings of the ledger accounts and in the various sources of original entry; however, if a utility used a different group of account numbers and it is not practicable to show the prescribed account numbers in the various sources of original entry, such reference to the prescribed account numbers may be omitted from the various sources of original entry. Moreover, each utility using different account numbers for its own purposes shall keep readily available a list of such account numbers which it uses and a reconciliation of such account numbers with the account numbers provided herein. It is intended that the utility's records shall be so kept to permit ready analysis by prescribed accounts (by direct reference to sources of original entry to the extent practicable) and to permit preparation of financial and operating statements directly from such records at the end of each accounting period according to the prescribed accounts.

.SO DOC 16C-561.4

NYCRR

561.4 Accounting period. Each utility shall keep its books on a monthly basis so that for each month all transactions applicable

thereto, as nearly as may be ascertained, shall be entered in the books of the utility. Amounts applicable or assignable to specific utility departments shall be so segregated monthly. Each utility shall close its books at the end of each calendar year unless otherwise authorized by the commission.

.SO DOC 16C-561.5

NYCRR

561.5 Submission of questions. To maintain uniformity of accounting, utilities shall submit questions of doubtful interpretation to the commission for consideration and decision.

.SO DOC 16C-561.6

NYCRR

561.6 Item lists. Lists of "items" appearing in the texts of the accounts or elsewhere herein are for the purpose of more clearly indicating the application of the prescribed accounting. The lists are intended to be representative, but not exhaustive. The appearance of an item in a list warrants the inclusion of the item in the account mentioned only when the text of the account also indicates inclusion inasmuch as the same item frequently appears in more than one list. The proper entry in each instance must be determined by the texts of the accounts.

.SO DOC 16C-561.7

NYCRR

561.7 Extraordinary items. It is the intent that net income shall reflect all items of profit and loss during the period with the sole exception of prior period adjustments as described in section 561.8. Those items related to the effects of events and transactions which have occurred during the current period and which are not typical or customary business activities of the company shall be considered extraordinary items. Accordingly, they will be events and transactions of significant effect which would not be expected to recur frequently and which would not be considered as recurring factors in any evaluation of the ordinary operating processes of business. (In determining significance, items of a similar nature should be considered in the aggregate. Dissimilar items should be considered individually; however, if they are few in number, they may be considered in the aggregate.) To be considered as extraordinary under the above guidelines, an item should be more than approximately five percent of income, computed before extraordinary items. Commission approval must be obtained to treat an item of less than five percent, as extraordinary. (See accounts 434, Extraordinary Income, and 435, Extraordinary Deductions.)

.SO DOC 16C-561.8

NYCRR

561.8 Prior period items. (a) As a general rule, items relating to transactions which occurred prior to the current calendar year but were

not recorded in the books of account shall be included in the same accounts in which they would have been recorded had the item been recorded in the proper period. Such items relate to events or transactions which occurred in a prior period, or periods, the accounting effects of which could not be determined with reasonable assurance at the time, usually because of major uncertainty then existing. When the amount of a prior period item is relatively so large its inclusion for a single month would distort the accounts for that month, the amount may be distributed in equal amounts to the accounts for the current and remaining months of the calendar year. However, if the amount of any prior period item is so large that the company believes its inclusion in the income statement would seriously distort the net income for the year, the company may request commission approval to record the amount in account 439, Adjustments to Retained Earnings. Such a request must be accompanied by adequate justification.

(b) Treatment as prior period adjustments should not be applied to the normal, recurring corrections and adjustments which are the natural result of the use of estimates inherent in the accounting process. For example, changes in the estimated remaining lives of fixed assets affect the computed amounts of depreciation, but these changes should be considered prospective in nature and not prior period adjustments. Similarly, relatively insignificant adjustments of provisions for liabilities (including income taxes) made in prior periods should be considered recurring items to be reflected in operations of the current period. Some uncertainties, for example those relating to the realization of assets (collectibility of accounts receivable, ultimate recovery of deferred costs of realizability of inventories or other assets), would not qualify for prior period adjustment treatment, since economic events subsequent to the date of the financial statements must of necessity enter into the elimination of any previously-existing uncertainty. Therefore, the effects of such matters are considered to be elements in the determination of net income for the period in which the uncertainty is eliminated. (See account 439, Adjustments to Retained Earnings.)

.SO DOC 16C-561.9

NYCRR

561.9 Unaudited items. Whenever a financial statement is required by the commission, if it is known that a transaction has occurred which affects the accounts but the amount involved in the transaction and its effect upon the accounts cannot be determined with absolute accuracy, the amount shall be estimated and such estimated amount included in the proper accounts. The utility is not required to anticipate minor items

which would not appreciably affect the accounts.

.SO DOC 16C-561.10

NYCRR

561.10 Bases of distribution of pay and expenses of employees. (a) The charges to water plant, operating expenses and other accounts for services and expenses of employees engaged in activities chargeable to various accounts, such as construction, maintenance, and operations, shall be based upon the actual time engaged in the respective classes of work or, in case that method is impracticable, upon the basis of a study of the time actually engaged during a representative period.

(b) The pay and expenses of general officers shall be charged to the actual work on which they are engaged, to the particular operations over which they have direct supervision, or to the appropriate accounts provided in the administrative and general group in operating expenses.

(c) Salaries of officers or employees and incidental expenses which can be distributed equitably upon a predetermined basis may be distributed through clearing accounts.

(d) Except as otherwise specifically provided in this system of accounts or by order of the commission, no amounts for salaries or wages shall be included in charges to water plant, cost of removal, or water operating expenses, except account 926, Employee Pensions and Benefits, which are not paid to the employees affected subject to their free disposition. Payroll deductions made under a statute or order of a court; or for such purposes as group insurance, purchase of appliances or homes, etc., authorized by written order of the employee without coercion of any kind, may be included.

.SO DOC 16C-561.11

NYCRR

561.11 Payroll distribution. Underlying accounting data shall be maintained so that the distribution of the cost of labor charged direct to the various accounts will be readily available. Such underlying data shall permit a reasonably accurate distribution to be made of the cost of labor charged initially to clearing accounts so that the total labor cost may be classified among construction, cost of removal, water operating functions (source of supply, power, pumping, purification, transmission, distribution, etc.), and non-utility operations.

.SO DOC 16C-561.12

NYCRR

561.12 Operating reserves. Accretions to operating reserve accounts made by charges to operating expenses shall not exceed a reasonable provision for the expense. Material balances in such reserve accounts shall not be diverted from the purpose for which provided unless the permission of the commission is first obtained.

.SO DOC 16C-561.13

NYCRR

561.13 Records for each plant and for territorial subdivisions. (a) Unless otherwise authorized or directed by the commission, each city, borough, village, or town and each water plant shall constitute a cost area and separate records shall be maintained of the book cost of water plant located therein. The term "plant" as here used means each source of supply, each pumping station (small booster stations may be grouped), each water treatment plant and the transmission and distribution system in each city, borough, village, town or such other operating area as the commission may require.

(b) Operating revenues shall be recorded so that the amount for each city, borough, village, town or other operating area required by the commission, may be readily determined.

(c) Records shall be currently maintained so that the utility will be prepared to show operating revenue deductions separately for each city, borough, village, town, or other operating area required by the commission, and for each water plant; provided that, with the approval of the commission two or more such territories which are contiguous and are operated as a unit, may be combined into an accounting division.

(d) Records shall be kept to show separately the accumulated provisions for depreciation applicable to property in each accounting division.

.SO DOC 16C-561.14

NYCRR

561.14 Accounting for other departments. If the utility also operates other departments, such as gas, electric, etc., it shall keep such accounts for the other departments as may be prescribed by proper authority and in the absence of prescribed accounts, it shall keep such accounts as are proper or necessary to reflect the results of operating each such department. It is not intended that proprietary and similar accounts which apply to the utility as a whole shall be departmentalized.

.SO DOC 16C-561.15

NYCRR

561.15 Transactions with associated companies. (a) Each utility shall keep its accounts and records so as to be able to furnish accurately and expeditiously statements of all transactions with associated companies. The statements may be required to show the general nature of the transactions, the amounts involved therein and the amounts included in each account prescribed herein with respect to such transactions. Transactions with associated companies shall be recorded in the appropriate accounts for transactions of the same nature. Nothing herein contained, however, shall be construed as restraining the utility from subdividing accounts for the purpose of recording separately

transactions with associated companies.

(b) If a clearing account is not maintained for each associated company in which all gross charges by that company are entered and from which they are distributed, all charges of any nature whatsoever by any associated company shall be credited at the gross amounts involved to a subaccount for that company under the appropriate subdivisions of accounts for Advances from Associated Companies and Payables to Associated Companies, even though immediately transferred to an account for capital stock, long-term debt, or other liability. In like manner, in the absence of clearing accounts, all gross charges to any associated company shall be debited to a subaccount for that company under the appropriate subdivisions of accounts for investments in Associated Companies and Receivables from Associated Companies, even though immediately transferred to a special deposit, special fund, other investment account, or other asset.

(c) Dividends, rebates, or earnings from associated companies or mutual service companies, representing refunds of the excess charges made by such companies over the cost to them, shall be debited to account 146, Accounts Receivable from Associated Companies, and shall be credited so far as practicable to the same accounts to which the corresponding charges were made, including proper distinction between construction and operating expenses. Credits applicable to operating expenses, where it is impracticable to allocate them among the accounts to which the corresponding charges have been made shall be recorded in account 929, Duplicate Charges--Credit.

.SO DOC 16C-561.16

NYCRR

561.16 Contingent assets and liabilities. Contingent assets represent a possible source of value to the utility contingent upon the fulfillment of conditions regarded as uncertain. Contingent liabilities include items which may under certain conditions become obligations of the utility but which are neither direct nor assumed liabilities at the date of the balance sheet. The utility shall be prepared to give a complete statement of contingent assets and liabilities (including cumulative dividends on preference stock) in its annual report and at such other time as may be requested by the commission.

.SO DOC 16C-561.17

NYCRR

561.17 Employee pensions and benefits. (a) All costs of employee pensions whether such costs represent pensions payable currently to retired employees or their beneficiaries, advance provision for such payments, or both, are includible in the charges of each accounting period, provided:

- (1) the pension program under which the costs are determined is reasonable;
- (2) amounts paid are irrevocably dedicated to pension purposes;
- (3) any program of advance provision is based on actuarial studies or other recognized and acceptable systematic method of computation and allocation.

(b) Account 926, Employee Pensions and Benefits, is provided under Administrative and General Expenses to include pension payments and accruals, employee welfare expenses, and expenses incurred in the administration of the welfare and pension department. However, a utility may clear from that account and distribute to construction and retirement work orders and to clearing and other accounts an applicable portion of the pension costs, and shall clear any such costs applicable to nonutility activities. Employee welfare expenses include costs of accident and health insurance; hospital and surgical insurance; disability and lump sum separation allowances; life insurance, when the utility is not the beneficiary; and similar employee benefits, together with the costs of operating educational and recreational facilities. Welfare and pension administrative expenses include salaries payable and costs incurred in the administration of the welfare and pension department.

Note: Incidental refunds or credits to the utility of amounts disbursed for pension purposes; if such refunds are made under the provisions of a pension program filed with the commission, shall not be deemed to impair the irrevocable dedication of monies to pension purposes.

(c) No charge shall be made to any account in this system of accounts to reflect advance provision for employee pension and benefit costs or to augment incomplete provision at a given date for amounts computed in relation to service prior to that date, unless full particulars of the program shall have been filed with the commission, including a copy of such supporting documents as:

- (1) the resolution of the governing board authorizing the program;
- (2) insurance contract, actuarial formula, or data supporting other method of computation and allocation;
- (3) trust agreement, if any.

Like filings shall be promptly made of any subsequent material charges in the pension plan. Acceptance by the commission of such data, as filed, shall not be interpreted as constituting approval of a pension and employee benefits program or of the documents associated therewith, or of any accounting made thereunder by the utility.

(d) The utility shall keep supporting records which will disclose as of the end of each accounting period:

(1) the amounts disbursed by the company during the period direct to pensioners or their beneficiaries;

(2) the amounts paid into the fund dedicated to future pension payments; and for each of such classes of disbursements, the accumulated total from the beginning of the year;

(3) the amount accumulated in the pension fund as provision for future pension payments; and

(4) at each year end, the amount by which pension commitments under the plan as then in effect, even though subject to future amendment or termination, computed in relation to employee service to that date, (generally the "actuarial liability"), exceed the amount in the pension fund.

.SO DOC 16C-561.18

NYCRR

561.18 Spreading of income, revenue, and expense items. (a) When the amount of any unusual item includible in an income, operating revenue, or operating expense account for a single month is relatively so large that its inclusion in the accounts for that month would seriously distort those accounts, it may be included in account 186, Miscellaneous Deferred Debits, or account 253, Other Deferred Credits, as appropriate, and distributed in equal amounts to the accounts for the current and remaining months of the calendar year.

(b) When the amount of any unusual item includible in the income, operating revenue, or operating expense accounts is relatively so large that its inclusion in the accounts for the year in which the transaction occurred, would seriously distort those accounts, the company may request permission to include all or a part of the amount in account 186, Miscellaneous Deferred Debits, or account 253, Other Deferred Credits to be amortized over such period and through such accounts as the commission shall determine. Without permission of this commission no such items shall be carried beyond the year in which the transaction occurred.

.SO DOC 16C-561.19

NYCRR

561.19 Allocation of costs between water plant and operating expenses to be made currently. Each utility shall determine currently the costs which are applicable to the water plant accounts and in the case of costs involving allocation, the amount which is applicable to other accounts, such as operating expenses, taxes, retirement work in progress, other balance sheet accounts, and income accounts; the intent of this provision being that such costs shall be allocated to the

accounts to which they are applicable when they are incurred.

.SO DOC 16C-561.20

NYCRR

561.20 Approval by the commission. Whenever the phrases "with the permission of the commission", "with the approval of the commission", "approved by the commission", "authorized by the commission", or "directed by the commission", are used herein, such permission, approval, authorization, or direction must be specific and in writing.

.SO DOC 16C-561.21

NYCRR

561.21 Long-term debt; premium, discount and expense, and gain or loss on reacquisition. (a) Premium, discount and expense.

(1) A separate premium, discount and expense account shall be maintained for each class and series of long-term debt (including receivers' certificates) issued or assumed by the utility. The premium will be recorded in account 225, Unamortized Premium on Long-term Debt, the discount be recorded in account 226, Unamortized Discount on Long-term Debt--Debit, and the expense of issuance shall be recorded in account 181, Unamortized Debt Expense.

(2) The premium, discount and expense shall be amortized over the life of the respective issues under a plan which will distribute the amounts equitably over the life of the securities. The amortization shall be on a monthly basis, and amounts thereof relating to discount and expense shall be charged to account 428, Amortization of Debt Discount and Expense. The amounts relating to premium shall be credited to account 429, Amortization of Premium on Debt--Credit.

(b) Reacquisition, without refunding. When long-term debt is reacquired or redeemed without being converted into another form of long-term debt and when the transaction is not in connection with a refunding operation (primarily redemptions for sinking fund purposes), the difference between the amount paid upon reacquisition and the face value; plus any unamortized premium less any related unamortized debt expense and reacquisition costs; or less any unamortized discount, related debt expense and reacquisition costs applicable to the debt redeemed, retired and cancelled, shall be included in account 421, Miscellaneous Nonoperating Income, or account 426.5, Other Deductions, as appropriate.

(c) Reacquisition, with refunding. When the redemption of one issue or series of bonds or other long-term obligations is financed by another issue or series before the maturity date of the first issue, the difference between the amount paid upon refunding and the face value; plus any unamortized premium loss related debt expense; or less any unamortized discount and related debt expense, applicable to the debt

refunded, shall be included in account 421, Miscellaneous Nonoperating Income, or account 426.5, Other Deductions, as appropriate. If the utility desires to amortize any of the discount, expense, or premium associated with the issuance or redemption of the first issue over a period subsequent to the date of redemption, the permission of the commission must be obtained.

(d) When the utility chooses to use the optional privilege of deferring the tax on the gain attributable to the reacquisition of debt by reducing the depreciable basis of utility property for tax purposes, pursuant to section 108 of the Internal Revenue Code, the related tax effect shall be deferred as the income is recognized for accounting purposes, and the deferred amounts shall be amortized over the life of the associated property on a vintage year basis. Account 410.1, Provision for Deferred Income Taxes, Utility Operating Income, shall be debited, and account 283, Accumulated Deferred Income Taxes--Other, shall be credited with an amount equal to the estimated income tax effect applicable to the portion of the income attributable to reacquired debt, recognized for accounting purposes during the period. Account 283 shall be debited and account 411.1, Provision for Deferred Income Taxes--Credit, Utility Operating Income, shall be credited with an amount equal to the estimated income tax effects during the life of the property, attributable to the reduction in the depreciable basis for tax purposes.

(e) The tax effects relating to gain or loss shall be allocated as above to utility operations except in cases where a portion of the debt reacquired is directly applicable to nonutility operations. In that event the related portion of the tax effects shall be allocated to nonutility operations. Where it can be established that reacquired debt is generally applicable to both utility and nonutility operations, the tax effects shall be allocated between utility and nonutility operations based on the ratio of net investment in utility plant to net investment in nonutility plant.

(f) Premium, discount or expense on debt shall not be included as an element in the cost of construction or acquisition of property (tangible or intangible), except under the provisions of water plant instruction 563.3(a)(17) and account 419.1, Allowance for Funds Used During Construction.

PART 562

INSTRUCTIONS--BALANCE SHEET ACCOUNTS

(Statutory authority: Public Service Law, § 89-c, subd. 3)

Sec.

562.1 Current and accrued assets

562.2 Current and accrued liabilities

.SO DOC 16C-562.1

NYCRR

Section 562.1 Current and accrued assets. Current and accrued assets are cash, those assets which are readily convertible into cash or are held for current use in operations or construction, current claims against others, payment of which is reasonably assured, and amounts accruing to the utility which are subject to current settlement except such items for which accounts other than those designated as current and accrued assets are provided. There shall not be included in the group of accounts designated as current and accrued assets any item, the amount or collectibility of which is not reasonably assured, unless an adequate provision for possible loss has been made therefor. Items of current character but of doubtful value may be written down and for record purposes carried in these accounts at nominal value.

.SO DOC 16C-562.2

NYCRR

562.2 Current and accrued liabilities. Current and accrued liabilities are those obligations which have either matured or which become due within one year from the date thereof; except, however, bonds, receivers certificates and similar obligations which shall be classified as long-term debt until date of maturity; accrued taxes, such as income taxes, which shall be classified as accrued liabilities even though payable more than one year from date; compensation awards, which shall be classified as current liabilities regardless of date due; and minor amounts payable in installments which may be classified as current liabilities. If a liability is due more than one year from date of issuance or assumption by the utility, it shall be credited to a long-term debt account appropriate for the transaction, except, however, the current liabilities previously mentioned.

INSTRUCTIONS--WATER PLANT ACCOUNTS

(Statutory authority: Public Service Law, § 89-c, subd. 3)

Sec.

563.1 Classification of water plant at effective date of system of accounts

563.2 Water plant to be recorded at original cost

563.3 Components of construction cost

563.4 Overhead construction costs

563.5 Water plant purchased or sold

- 563.6 Expenditures on leased property
- 563.7 Land and land rights
- 563.8 Structures and improvements
- 563.9 Equipment
- 563.10 Additions and retirements of water plant
- 563.11 Work order and property record system required
- 563.12 Transfers of property
- 563.13 Common utility plant
- 563.14 Supply, transmission and distribution mains
- 563.15 Multiple use plant

.SO DOC 16C-563.1 NYCRR

Section 563.1 Classification of water plant at effective date of system of accounts. (a) The water plant accounts provided herein are generally the same as those contained in the prior system of accounts except for some changes in classification, regrouping, and rearrangement of certain accounts. Except for these changes, the balances in the various plant accounts, as determined under the prior system of accounts, should be carried forward. Any remaining balance of plant which has not yet been classified, pursuant to the requirements of the prior system, shall be classified in accordance with the following instructions.

(b) The cost to the utility of its unclassified plant shall be ascertained by analysis of the utility's records. Adjustments shall not be made to record in utility plant accounts amounts previously charged to operating expenses or to income deductions in accordance with the uniform system of accounts in effect at the time or in accordance with the discretion of management as exercised under a uniform system of accounts, or under accounting practices previously followed.

(c) The detailed water plant accounts (301 to 399, inclusive) shall be stated on the basis of cost to the utility, after giving effect to any amounts of contributions in aid of construction applicable to the property, of plant constructed by it and the original cost, estimated if not known, of plant acquired as an operating unit or system. The difference between the original cost, as above, and the cost to the utility of water plant after giving effect to any accumulated provision for depreciation or amortization, shall be recorded in account 114, Water Plant Acquisition Adjustments. The original cost of water plant shall be determined by analysis of the utility's records or those of predecessor or vendor companies with respect to water plant previously acquired as operating units or systems and the difference between the original cost so determined, less accumulated provisions for

depreciation and amortization and the cost to the utility, with necessary adjustments for retirements from date of acquisition, shall be entered in account 114, Water Plant Acquisition Adjustments. Any difference between the cost of water plant and its book cost, when not properly includible in other accounts, shall be recorded in account 116, Other Water Plant Adjustments.

.SO DOC 16C-563.2

NYCRR

563.2 Water plant to be recorded at original cost. (a) All amounts included in the accounts for water plant acquired as an operating unit or system, except as otherwise provided in the texts of the intangible plant accounts, shall be stated at the cost incurred by the person who first devoted the property to utility service. All other water plant shall be included in the accounts at the cost incurred by the utility. Where the term "cost" is used in the detailed plant accounts, it shall have the meaning stated in this subdivision. (See also § 560.1, definition (19).)

(b) When the consideration given for property is other than cash, the value of such consideration shall be determined on a cash basis. (See, however, § 560.1, definition (9).) In the entry recording such transaction, the actual consideration shall be described with sufficient particularity to identify it. The utility shall be prepared to furnish the commission the particulars of its determination of the cash value of the consideration if other than cash.

(c) When property is purchased under a plan involving deferred payments, no charge shall be made to the water plant accounts for interest, insurance, or other expenditures occasioned solely by such form of payment.

(d) Contributions for construction purposes made in cash, services or property by any governmental agency, individuals or others shall be credited to the plant account chargeable with the cost of construction. In the case of water plant contributed to the utility, water plant accounts shall be charged only with such expenses, if any, incurred by the utility for which it was not reimbursed, to obtain title, possession or ownership of said plant. Records shall be kept so that the utility can readily furnish information as to the source, purpose, and amount of each contribution, the property to which each contribution relates and the conditions, if any, upon which each contribution was made.

(e) As of the effective date of this uniform system of accounts, the account "Contributions in Aid of Construction" is discontinued. Amounts for contributions in aid of construction still remaining in such account at the effective date of the uniform system of accounts prescribed

herein shall be transferred temporarily to an appropriate subdivision of account 253, Other Deferred Credits. The amounts which can be identified with property in water plant accounts and with property which has been retired shall be charged to account 253 and concurrently credited to the water plant accounts or to the accumulated provisions for depreciation, as appropriate. With respect to the remaining amounts of contributions, which cannot be identified or associated with specific water plant property, the utility shall submit a proposal for an account disposition of such remaining balance to the commission for its consideration and determination. Except as provided herein, such amounts representing contributions in aid of construction shall not be transferred to any other account without the approval of the commission.

Note: Amounts received for construction which are ultimately to be refunded, wholly or in part, shall be credited to account 252, Customers' Advances for Construction. When the amount to be refunded has been finally determined, the balance, if any, remaining in account 252 shall be debited thereto and credited to the water plant accounts to which the cost of the property was charged.

.SO DOC 16C-563.3

NYCRR

563.3 Components of construction cost.

(a) The cost of construction property includible in the water plant accounts shall include, where applicable, the direct and overhead costs as listed and defined hereunder:

(1) Contract work includes amounts paid for work performed under contract by other companies, firms, or individuals, costs incident to the award of such contracts, and the inspection of such work.

(2) Labor includes the pay and expenses of employees of the utility engaged on construction work, and related workmen's compensation insurance, payroll taxes and similar items of expense. It does not include the pay and expenses of employees which are distributed to construction through clearing accounts nor the pay and expenses included in other items hereunder.

(3) Materials and supplies includes the purchase price at the point of free delivery plus customs duties, excise taxes, the cost of inspection, loading and transportation, the related stores expenses, and the cost of fabricated materials from the utility's shop. In determining the cost of materials and supplies used for construction, proper allowance shall be made for unused materials and supplies, for materials recovered from temporary structures used in performing the work involved and for discounts allowed and realized in the purchase of materials and supplies.

Note: The cost of individual items of equipment of small value (for example, \$200 or less) or of short life, including small portable tools and implements, shall not be charged to water plant accounts unless the correctness of the accounting therefor is verified by current inventories. The cost shall be charged to the appropriate operating expense or clearing accounts, according to the use of such items, or, if such items are consumed directly in construction work, the cost shall be included as part of the cost of the construction.

(4) Transportation includes the cost of transporting employees, materials and supplies, tools, purchased equipment, and other work equipment (when not under own power) to and from points of construction. It includes amounts paid to others as well as the cost of operating the utility's own transportation equipment. (See paragraph (5) of this subdivision.)

(5) Special machine service includes the cost of labor (optional), materials and supplies, depreciation, and other expenses incurred in the maintenance, operation and use of special machines, such as steam shovels, pile drivers, derricks, ditchers, scrapers, material unloaders, and other labor-saving machines; also expenditures for rental, maintenance and operation of machines of others. It does not include the cost of small tools and other individual items of small value or short life which are included in the cost of materials and supplies. (See paragraph (3) of this subdivision.) When a particular construction job requires the use for an extended period of time of special machines, transportation or other equipment, the net book cost thereof, less the appraised or salvage value at time of release from the job, shall be included in the cost of construction.

(6) Shop service includes the proportion of the expense of the utility's shop department assignable to construction work, except that the cost of fabricated materials from the utility's shop shall be included in "materials and supplies".

(7) Protection includes the cost of protecting the utility's property from fire or other casualties and the cost of preventing damages to others, or to the property of others, including payments for discovery or extinguishment of fires, cost of apprehending and prosecuting incendiaries, witness fees in relation thereto, amounts paid to municipalities and others for fire protection, and other analogous items of expenditures in connection with construction work.

(8) Injuries and damages includes expenditures or losses in connection with the construction work on account of injuries to persons and damages to the property of others; also the cost of investigation of and defense

against actions for such injuries and damages. Insurance recovered or recoverable on account of compensation paid for injuries to persons incident to construction shall be credited to the account or accounts to which such compensation is charged. Insurance recovered or recoverable on account of property damages incident to construction shall be credited to the account or accounts charged with the cost of the damages.

(9) Privileges and permits includes payments for and expenses incurred in securing temporary privileges; permits or rights in connection with construction work, such as for the use of private or public property, streets or highways, but it does not include rents, or amounts chargeable as franchises and consents, for which see account 302, Franchises and Consents.

(10) Rents includes amounts paid for the use of construction quarters and office space occupied by construction forces, and amounts properly includible in construction costs for such facilities jointly used.

(11) Engineering and supervision includes the portion of the pay and expenses of engineers, surveyors, draftsmen, inspectors, superintendents and their assistants applicable to construction work.

(12) General administration capitalized includes the portion of the pay and expenses of the general officers and administrative and general expenses applicable to construction work.

(13) Engineering services includes amounts paid to other companies, firms or individuals engaged by the utility to plan, design, prepare estimates, supervise, inspect, or give general advice and assistance in connection with construction work.

(14) Insurance includes premiums paid or amounts provided or reserved as self-insurance for the protection against loss and damages in connection with construction, by fire or other casualty, injury to or death of persons other than employees, damages to property of others, defecation of employees and agents, and the nonperformance of contractual obligations of others. It does not include workers' compensation or similar insurance on employees included as "labor" in paragraph (2) of this subdivision.

(15) Law expenditures includes the general law expenditures incurred in connection with construction and the court and legal costs directly related thereto, other than law expenses included in protection, paragraph (7) of this subdivision, and in injuries and damages, paragraph (8) of this subdivision.

(16) Taxes includes taxes on physical property (including land) during the period of construction and other taxes properly includible in

construction costs before the facilities become available for service. The period for which taxes may be capitalized shall be limited to the period of construction. (See provisions set forth in paragraph (17) of this subdivision, Allowance for funds used during construction, which may be applicable, as appropriate, to this paragraph.)

(17) Allowance for funds used during construction. (i) Allowance for funds used during construction includes the net cost of borrowed funds used for construction purposes and a reasonable rate upon the utility's own funds when so used. No allowance-for-funds-used-during-construction charges shall be included in these accounts upon expenditures for construction projects which have been abandoned. Allowance for funds used during construction shall be charged to the individual job upon which the funds are expended and shall be credited to account 419.1, Allowance for Funds Used During Construction.

(ii) The period for which an allowance for funds used may be capitalized shall be limited to the period of construction. The period of construction shall extend from the date of commencement of construction to the time when property is ready for service, and shall also include any reasonable and necessary period during which the property is held for future service. No allowance for funds used should be accrued during periods of interrupted construction, unless the company can justify the interruption as being reasonable under the circumstances.

Note applicable to paragraphs (16) and (17) of this subdivision:

When a part only of a plant or project is placed in operation or is completed and ready for service, but the construction work as a whole is incomplete, that part of the cost of property placed in operation, or ready for service, shall be treated as "Water Plant in Service", and allowance for funds used and taxes thereon as charges to construction shall cease. Allowance for funds used and taxes on that part of the cost of the plant which is incomplete may be continued as charges to construction until such time as it is placed in operation or is ready for service, except as limited by provisions of paragraphs (16) and (17) of this subdivision.

(18) Earnings and expenses during construction includes:

(i) all revenues derived during the construction period from property which is included in the cost of a project under construction; and

(ii) all expenses which are attributable to the revenues received.

(a) The earnings shall include revenues received or earned for water produced by plants during the construction period and sold or used by the utility. When such water is sold to an independent purchaser before

intermingling with water from other plants, the credit shall consist of the selling price of the water. When the water from a plant under construction is delivered to the utility's water system for distribution and sale, or is delivered to an associated company, or is delivered to and used by the utility for purposes other than distribution and sale (for manufacturing or industrial use, for example), the credit shall be the fair value of the water so delivered. The revenues shall also include rentals for lands, buildings, etc., and miscellaneous receipts not properly includible in other accounts.

(b) The expenses shall consist of the cost of operating the water plant, and other costs incident to the production and delivery of the water for which construction is credited under clause (a) of this subparagraph, including the cost of repairs and other expenses (but not taxes) of operating and maintaining lands, buildings and other property, and other miscellaneous and like expenses not properly includible in other accounts.

.SO DOC 16C-563.4

NYCRR

563.4 Overhead construction costs. (a) All overhead construction costs, such as engineering, supervision, general office salaries and expenses, construction engineering and supervision by others than the accounting utility, law expenses, insurance, injuries and damages, relief and pensions, taxes and interest, shall be charged to particular jobs or units on the basis of the amounts of such overheads reasonably applicable thereto, to the end that each job or unit shall bear its equitable proportion of such costs and that the entire cost of the unit, both direct and overhead, shall be deducted from the plant accounts at the time the property is retired.

(b) As far as practicable, the determination of payroll charges includible in construction overheads shall be based on time card distributions thereof. Where this procedure is impractical, special studies shall be made periodically of the time of supervisory employees devoted to construction activities to the end that only such overhead costs as have a definite relation to construction shall be capitalized. The addition to direct construction costs of arbitrary percentages or amounts to cover assumed overhead costs is not permitted.

(c) The records supporting the entries for overhead construction costs shall be so kept as to show the total amount of each overhead for each year, the nature and amount of each overhead expenditure charged to each construction work order and to each utility plant account, and the basis of distribution of such costs.

.SO DOC 16C-563.5

NYCRR

563.5 Water plant purchased or sold. (a) When water plant constituting an operating unit or system is acquired by purchase, merger, consolidation, liquidation or otherwise, after the effective date of this system of accounts, the costs of acquisition, including expenses incidental thereto properly includible in water plant, shall be charged to account 102, Water Plant Purchased or Sold.

(b) The accounting for the acquisition shall then be completed as follows:

(1) The original cost of plant, estimated if not known, shall be credited to account 102, Water Plant Purchased or Sold, and concurrently charged to the appropriate water plant in service accounts and to account 104, Water Plant Leased to Others, account 105, Water Plant Held for Future Use, and account 107, Construction Work in Progress--Water, as appropriate.

(2) The depreciation and amortization applicable to the original cost of the properties purchased, shall be charged to account 102, Water Plant Purchased or Sold, and concurrently credited to the appropriate account for accumulated provision for depreciation or amortization.

(3) The cost to the utility of any property includible in account 121, Nonutility Property, shall be transferred thereto.

(4) The remaining amount of contributions in aid of construction, which have not been identified with and credited to specific water plant acquired, shall be disposed of in accordance with provisions of water plant instruction, section 563.2(e) of this Part.

(5) The amount remaining in account 102, Water Plant Purchased or Sold, shall then be closed to account 114, Water Plant Acquisition Adjustments, unless otherwise authorized by the commission.

(c) If property acquired in the purchase of an operating unit or system is in such physical condition when acquired that it is necessary substantially to rehabilitate it in order to bring the property up to the standards of the utility, the cost of such work, except replacements, shall be accounted for as part of the purchase price of the property.

(d) When any property acquired as an operating unit or system includes duplicate or other plant which will be retired by the accounting utility in the reconstruction of the acquired property or its consolidation with previously owned property, the proposed accounting for such property shall be presented to the commission.

(e) In connection with the acquisition of water plant constituting an operating unit or system, the utility shall procure, if possible, all existing records relating to the property acquired, or certified copies

thereof, and shall preserve such records in conformity with regulations or practices governing the preservation of records of its own construction.

(f) When water plant constituting an operating unit or system is sold, conveyed or transferred to another by sale, merger, consolidation or otherwise, the book cost of the property sold or transferred to another shall be credited to the appropriate utility plant accounts, including amounts carried in account 114, Water Plant Acquisition Adjustments, and the amounts (estimated if not known) carried with respect thereto in the accounts for accumulated provisions for depreciation and amortization and in account 252, Customer Advances for Construction, shall be charged to such accounts and the contra entries made to account 102, Water Plant Purchased or Sold. Unless otherwise ordered by the commission, the difference, if any, between (1) the net amount of debits and credits and (2) the consideration received for the property (less commissions and other expenses of making the sale) shall be included in account 421.1, Gain on Disposition of Property, or 421.2, Loss on Disposition of Property. (See account 102, Water Plant Purchased or Sold.)

Note: In cases where existing utilities merge or consolidate because of financial or operating reasons or statutory requirements rather than as a means of transferring title or purchased properties to a new owner, the accounts of the constituent utilities, with the approval of the commission, may be combined. In the event original cost has not been determined, the resulting utility shall proceed to determine such cost as outlined herein.

.SO DOC 16C-563.6

NYCRR

563.6 Expenditures on leased property. (a) The cost of substantial initial improvements (including repairs, rearrangements, additions, and betterments) made in the course of preparing for utility service property leased for a period of more than one year, and the cost of subsequent substantial additions, replacements, or betterments to such property, shall be charged to the water plant account appropriate for the class of property leased. If the service life of the improvements is terminable by action of the lease, the cost, less net salvage, of the improvements shall be spread over the life of the lease by charges to account 404, Amortization of Limited-term Water Plant. However, if the service life is not terminated by action of the lease but by depreciation proper, the cost of the improvements, less net salvage, shall be accounted for as depreciable plant.

(b) If the improvements made to property leased for a period of more than one year are of relatively minor cost, or if the lease is for a

period of not more than one year, the cost of the improvements shall be charged to the account in which rent is included, either directly or by amortization thereof.

.SO DOC 16C-563.7

NYCRR

563.7 Land and land rights. (a) The accounts for land and land rights shall include the cost of land owned in fee by the utility, and rights, interests, and privileges held by the utility in land owned by others, such as leaseholds, easements, water and water power rights, diversion rights, submersion rights, rights-of-way, and other like interests in land. Do not include in the accounts for land and land rights and rights-of-way, costs incurred with first clearing and grading the land and rights-of-way and the damage costs associated with the construction and installation of plant. Such costs shall be included in the appropriate plant accounts directly benefited.

(b) Where special assessments for public improvements provide for deferred payments, the full amount of the assessments shall be charged to the appropriate land account and the unpaid balance shall be carried in an appropriate liability account. Interest on unpaid balances shall be charged to the appropriate interest account. If any part of the cost of public improvements is included in the general tax levy, the amount thereof shall be charged to the appropriate tax account.

(c) The net profit from the sale of timber, wood, sand, gravel, other resources, or other property acquired with the right-of-way or other lands shall be credited to the appropriate plant account to which related. Where land is held for a considerable period of time and timber and other natural resources on the land at the time of purchase increases in value, the net profit, (after giving effect to the cost of the natural resources) from the sales of timber or its products or other natural resources shall be credited to the appropriate utility operating income account when such land has been recorded in account 105, Water Plant Held for Future Use, or classified as plant in service otherwise to account 421, Miscellaneous Nonoperating Income.

(d) Separate entries shall be made for the acquisition, transfer, or retirement of each parcel of land, and of each water right, land right, (except rights-of-way for distribution lines), having a life of more than one year. A record shall be maintained showing the nature of ownership, full legal description, area, map reference, purpose for which used, city, county, and tax district in which situated, from whom purchased or to whom sold, payment given or received, other costs, contract date and number, date of recording of deed, and book and page of record. Entries transferring or retiring land or land rights shall

refer to the original entry recording its acquisition. A parcel of land acquired and carried on the books as a unit is not required to be subdivided with transfers to other land accounts merely because of the erection thereon of an incidental structure to be used in water operations but for a purpose differing from that for which the land is chiefly employed; for example, a small storehouse on source of supply land.

Note: In the case of distribution land rights, when the expected period of occupancy does not exceed the estimated life of the initial plant installed, the cost of permits or privileges to place distribution lines or other distribution plant and the related pay and expenses of employees and other costs incident to acquiring such permits, shall be included in the account appropriate for the cost of the property constructed and not in the accounts for distribution land or land rights.

(e) Any difference between the amount received from the sale of land or land rights, less agents' commissions and other costs incident to the sale, and the book cost of such land or rights shall be included in account 117, Accumulated Gains and Losses from Disposition of Utility Land and Land Rights, when such property has been used in utility service or recorded in account 105, Water Plant Held for Future Use, otherwise, such difference shall be included in account 421.1, Gain on Disposition of Property, or 421.2, Loss on Disposition of Property, as appropriate, unless a reserve therefore has been authorized and provided. Appropriate adjustments of the accounts shall be made with respect to any structures or improvements located on land sold.

(f) The cost of buildings and other improvements (other than public improvements) shall not be included in the land accounts. If at the time of acquisition of an interest in land such interest extends to buildings or other improvements (other than public improvements), which are then devoted to water operations, the land and improvements shall be separately appraised and the cost allocated to land and buildings or improvements on the basis of the appraisals. If the improvements are removed or wrecked without being used in operations, the cost of removing or wrecking shall be charged and the salvage credited to the account in which the cost of the land is recorded.

(g) When the purchase of land for water operations requires the purchase of more land than needed for such purposes, the charge to the specific land account shall be based upon the cost of the land purchased, less the fair market value of that portion of the land which is not to be used in utility operations. The portion of the cost

measured by the fair market value of the land not to be used shall be included in account 105, Water Plant Held for Future Use, account 118.2, Other Utility Plant, or account 121, Nonutility Property, as appropriate.

(h) Provision shall be made for amortizing amounts carried in the accounts for limited-term interest in land, so as to apportion equitably the cost of each interest over the life thereof. (See account 111, Accumulated Provision for Amortization of Water Plant in Service, and account 404, Amortization of Limited-term Water Plant.)

(i) The items of cost to be included in the accounts for land and land rights are as follows:

- (1) Bulkheads, buried, not requiring maintenance or replacement.
- (2) Cost, first, of acquisition including mortgages and other liens assumed (but not subsequent interest thereon).
- (3) Condemnation proceedings, including court and counsel costs.
- (4) Consents and abutting damages, payment for.
- (5) Conveyancers' and notaries' fees.
- (6) Fees, commissions, and salaries to brokers, agents, and others in connection with the acquisition of the land or land rights.
- (7) Leases, cost of voiding upon purchase to secure possession of land.
- (8) Removing, relocating, or reconstructing property of others, such as buildings, highways, railroads, bridges, cemeteries, churches, telephone and power lines, etc., in order to acquire quiet possession.
- (9) Retaining walls unless identified with structures.
- (10) Special assessments levied by public authorities for public improvements on the basis of benefit for new roads, new bridges, new sewers, new curbing, new pavements, and other public improvements, but not taxes levied to provide for the maintenance of such improvements.
- (11) Surveys in connection with the acquisition, but not amounts paid for topographical surveys and maps where such costs are attributable to structures, or plant equipment erected or to be erected or installed on such land.
- (12) Taxes assumed, accrued to date of transfer of title.
- (13) Title, examining, clearing, insuring, and registering in connection with the acquisition and defending against claims relating to the period prior to the acquisition.
- (14) Appraisals prior to closing title.
- (15) Cost of dealing with distributees or legatees residing outside of the State or country, such as recording power of attorney, recording will or exemplification of will, recording satisfaction of State tax.

- (16) Filing satisfaction of mortgage.
- (17) Documentary stamps.
- (18) Photographs of property at acquisition.
- (19) Fees and expenses incurred in the acquisition of water rights, and grants.
- (20) Cost of fill to extend bulkhead line over land under water, where riparian rights are held, which is not occasioned by the erection of a structure.
- (21) Sidewalks and curbs constructed by the utility on public property.
- (22) Labor and expenses in connection with securing rights-of-way, where performed by company employees and company agents.

.SO DOC 16C-563.8

NYCRR

563.8 Structures and improvements. (a) The accounts for structures and improvements shall include the costs of all buildings and facilities to house, support, or safeguard property or persons, including all fixtures permanently attached to and made a part of buildings and which cannot be removed therefrom without cutting into the walls, ceilings, or floors or without in some way impairing the buildings, and improvements of a permanent character on or to land. Also include those costs incurred in connection with the first clearing and grading of land and rights-of-way and the damage costs associated with construction and installation of plant.

(b) The cost of specially provided foundations not intended to outlast the machinery or apparatus for which provided, and the cost of angle irons, castings, etc., installed at the base of an item of equipment, shall be charged to the same account as the cost of the machinery, apparatus, or equipment.

(c) Minor buildings and structures, such as valve towers, patrolmen's towers, telephone stations, etc., which are used directly in connection with or form a part of a reservoir, dam, waterway, etc., shall be considered a part of the facility in connection with which constructed or operated and the cost thereof accounted for accordingly.

(d) Where furnaces and boilers are used primarily for furnishing steam for some particular department and only incidentally for furnishing steam for heating a building and operating the equipment therein, the entire cost of such furnaces and boilers shall be charged to the appropriate plant account, and no part to the building account.

(e) Where the structure of a dam forms also the foundation of a building, such foundation shall be considered a part of the dam.

(f) The cost of disposing of materials excavated in connection with

construction of structures shall be considered as a part of the cost of such work, except as follows:

(1) when such material is used for filling, the cost of loading, hauling, and dumping shall be equitably apportioned between the work in connection with which the removal occurs and the work in connection with which the material is used;

(2) when such material is sold, the net amount realized from such sales shall be credited to the work in connection with which the removal occurs. If the amount realized from the sale of excavated materials exceeds the removal costs and the costs in connection with the sale, the excess shall be credited to the land account in which the site is carried.

(g) Lighting or other fixtures temporarily attached to buildings for purposes of display or demonstration shall not be included in the cost of the building but in the appropriate equipment account.

(h) The items of cost to be included in the accounts for structures and improvements are as follows:

- (1) Architects' plans and specifications including supervision.
- (2) Ash pits (when located within the building).
- (3) Athletic field structures and improvements.
- (4) Boilers, furnaces, piping, wiring, fixtures, and machinery for heating, lighting, signaling, ventilating, and air conditioning systems, plumbing, vacuum, cleaning systems, incinerator and smoke pipe, flues, etc.
- (5) Bulkheads, including dredging, riprap fill, piling, decking, concrete, fenders, etc., when exposed and subject to maintenance and replacement.
- (6) Chimneys.
- (7) Coal bins and bunkers.
- (8) Commissions and fees to brokers, agents, architects and others.
- (9) Conduit (not to be removed) with its contents.
- (10) Damages to abutting property during construction.
- (11) Docks.
- (12) Door checks and door stops.
- (13) Drainage and sewerage systems.
- (14) Elevators, cranes, hoists, etc., and the machinery for operating them.
- (15) Excavation, including shoring, bracing, bridging, refill, and disposal of excess excavated material, cofferdams around foundation, pumping water from cofferdams during construction, and test borings.
- (16) Fences and fence curbs (not including protective fences isolating

items of equipment, which shall be charged to the appropriate equipment account).

- (17) Fire protection systems, when forming a part of a structure.
- (18) Flagpole.
- (19) Floor covering (permanently attached).
- (20) Foundations and piers for machinery, constructed as a permanent part of a building or other items listed herein.
- (21) Grading and clearing, when directly occasioned by the building of a structure.
- (22) Intrasite communication system, poles, pole fixtures, wires and cables.
- (23) Landscaping, lawns, shrubbery, etc.
- (24) Leases, voiding upon purchase to secure possession of structures.
- (25) Leased property, expenditures on.
- (26) Lighting fixtures and outside lighting system.
- (27) Mail chutes, when part of a building.
- (28) Marquee, permanently attached to building.
- (29) Painting, first cost.
- (30) Permanent paving, concrete, brick, flagstone, asphalt, etc., within the property lines.
- (31) Partitions, including movable.
- (32) Permits and privileges.
- (33) Platforms, railings and gratings, when constructed as a part of a structure.
- (34) Power boards for services to a building.
- (35) Refrigerating systems for general use.
- (36) Retaining walls, except when identified with land.
- (37) Roadways, railroads, bridges and trestles, intrasite, except railroads provided for in equipment accounts.
- (38) Roofs.
- (39) Scales, connected to and forming a part of a structure.
- (40) Screens.
- (41) Sewer systems, for general use.
- (42) Sidewalks, culverts, curbs and streets constructed by the utility on its property.
- (43) Sprinkling systems.
- (44) Sump pumps and pits.
- (45) Stacks--brick, steel or concrete, when set on foundation forming part of general foundation and steelwork of a building.
- (46) Steel inspection during construction.
- (47) Storage facilities constituting a part of a building.

- (48) Storm doors and windows.
- (49) Subways, areaways and tunnels, directly connected to and forming part of a structure.
- (50) Tanks, constructed as part of a building or as a distinct structural unit.
- (51) Temporary heating during construction (net cost).
- (52) Temporary water connection during construction (net cost).
- (53) Temporary shanties and other facilities used during construction (net cost).
- (54) Topographical maps.
- (55) Tunnels, intake and discharge, when constructed as part of a structure, including sluice gates, and those constructed to house mains.
- (56) Vaults constructed as part of a building.
- (57) Watchmen's sheds and clock systems (net cost when used during construction only).
- (58) Water basins or reservoirs.
- (59) Waterfront improvements.
- (60) Water meters and supply system for a building or for general company purposes.
- (61) Water supply piping, hydrants and wells.
- (62) Wharves.
- (63) Window shades and ventilators.
- (64) Yard drainage system.
- (65) Yard lighting system.
- (66) Yard surfacing--gravel, concrete or oil. (First cost only.)

Note: Structures and improvements accounts shall be credited with the cost of coal bunkers, stacks, foundations, subways, tunnels, etc., the use of which has terminated with the removal of the equipment with which they are associated, even though they have not been physically removed.

.SO DOC 16C-563.9

NYCRR

563.9 Equipment. (a) The cost of equipment chargeable to the water plant accounts, unless otherwise indicated in the text of an equipment account, includes the net purchase price thereof, sales taxes, investigation and inspection expenses necessary to such purchase, expenses of transportation when borne by the utility, labor employed, materials and supplies consumed, and expenses incurred by the utility in unloading and placing the equipment in readiness to operate. Also include those costs incurred in connection with the first clearing and grading of land and rights-of-way and the damage costs associated with construction and installation of plant.

- (b) Exclude from equipment accounts hand and other portable tools

which are likely to be lost or stolen or which have relatively small value (for example, \$200 or less) or short life, unless the correctness of the accounting therefor as water plant is verified by current inventories. Special tools acquired and included in the purchase price of equipment shall be included in the appropriate plant account. Portable drills and similar tool equipment, when used in connection with the operation and maintenance of a particular plant or department, such as pumping, transmission, distribution, etc., or in "stores", shall be charged to the plant account appropriate for their use.

(c) The equipment accounts shall include angle irons and similar items which are installed at the base of an item of equipment, but piers and foundations which are designed to be as permanent as the buildings which house the equipment, or which are constructed as a part of the building and which cannot be removed without cutting into the walls, ceilings or floors, or without in some way impairing the building, shall be included in the building accounts.

(d) The equipment accounts shall include the necessary costs of testing or running a plant or part thereof during an experimental or test period prior to becoming available for service. The utility shall furnish the commission with full particulars of and justification for any test or experimental run extending beyond a period of 30 days.

(e) The cost of efficiency or other tests made subsequent to the date equipment becomes available for service shall be charged to the appropriate expense accounts, except that tests to determine whether equipment meets the specifications and requirements as to efficiency, performance, etc., guaranteed by manufacturers, made after operations have commenced and within the period specified in the agreement or contract of purchase, may be charged to the appropriate water plant account.

.SO DOC 16C-563.10

NYCRR

563.10 Additions and retirements of water plant. (a) For the purpose of avoiding undue refinement in accounting for additions to and retirements and replacements of water plant, all property shall be considered as consisting of:

- (1) retirement units; and
- (2) minor items of property.

Each utility shall use such list of retirement units as is in use by it at the effective date hereof, or as may be prescribed by the commission. Not later than December 31st of the year in which a utility first becomes subject to this system of accounts, it shall file with the commission a list of the items of property it proposes to account for as

retirement units of property. Revisions of such list may be made at any time by appropriate filing thereof with the commission.

(b) The addition and retirement of retirement units shall be accounted for as follows:

(1) When a retirement unit is added to the water plant, the cost thereof shall be added to the appropriate water plant account, except that when units are acquired in the acquisition of any water plant constituting an operating system, they shall be accounted for as provided in water plant instruction, section 563.5 of this Part.

(2) When property ceases to be used and useful in water service, it shall be retired immediately from the water plant accounts. When a retirement unit is retired from water plant with or without replacement, the book cost thereof shall be credited to the water plant account in which it is included, determined in the manner set forth in subdivision (d) of this section. If the retirement unit is of a depreciable class, the book cost of the unit retired and credited to water plant shall be charged to the accumulated provision for depreciation applicable to such property. The cost of removal and the salvage shall be charged or credited, as appropriate, to such depreciation account. (See also account 108 and water plant instruction, section 563.11 of this Part.)

(c) The addition and retirement of minor items of property shall be accounted for as follows:

(1) When a minor item of property which does not replace a similar item and which is a part of or associated with a retirement unit and will be accounted for and retired together with such unit, and which by itself or together with other similar items makes a substantial addition, is added to the plant, the cost thereof shall be added to the appropriate water plant account; otherwise the cost of any minor item of property shall be charged to the appropriate maintenance account. The amount added to water plant accounts for such minor items shall not, however, exceed the additional cost computed at current prices that would have been incurred if the minor items had been installed together with the retirement units to which they are related.

(2) When a minor item of property is retired and not replaced, the book cost thereof shall be credited to the water plant account in which it is included; and, in the event the minor item is a part of depreciable plant, the account for accumulated provision for depreciation shall be charged with the book cost and cost of removal and credited with the salvage. If, however, the book cost of the minor item retired and not replaced has been or will be accounted for by its inclusion in the retirement unit of which it is a part when such unit is

retired, no separate credit to the property account is required when such minor item is retired.

(3) When a minor item of depreciable property is replaced independently of the retirement unit of which it is a part, the cost of replacement shall be charged to the maintenance account appropriate for the item, except that if the replacement effects a substantial betterment (the primary aim of which is to make the property affected more useful, more efficient, or of greater durability, or of greater capacity), the excess cost of the replacement over the estimated cost at current prices of replacing without betterment shall be charged to the appropriate water plant account.

(d) The book cost of water plant retired shall be the amount at which such property is included in the water plant accounts, including all components of construction costs. The book cost shall be determined from the utility's records, and if this cannot be done it shall be estimated. When it is impracticable to determine the book cost of each unit, due to the relatively large number or small cost thereof, an appropriate average book cost of the units, with due allowance for any differences in size and character, shall be used as the book cost of the units retired.

(e) The book cost of land retired shall be credited to the appropriate land account. If the land is sold, the difference between the book cost (less any accumulated provision for depreciation, or amortization therefor which has been authorized and provided) and the sale price of the land (less commissions and other expenses of making the sale) shall be recorded in account 117, Accumulated Gains and Losses from Disposition of Utility Land and Land Rights, when the property has been used in utility service, or recorded in account 105, Water Plant Held for Future Use; otherwise such difference shall be included in accounts 421.1, Gain on Disposition of Property, or 421.2, Loss on Disposition of Property, as appropriate. If land is not used in utility service but is retained by the utility, such property shall be charged to account 105, Water Plant Held for Future Use, or account 121, Nonutility Property, as appropriate, in accordance with instructions contained in section 563.12, Transfers of Property.

(f) The book cost less net salvage of depreciable water plant retired shall be charged in its entirety to account 108, Accumulated Provision for Depreciation of Water Plant in Service. Any amounts which, by approval or order of the commission, are charged to account 182, Extraordinary Property Losses, shall be credited to account 108, Accumulated Provision for Depreciation of Water Plant in Service.

(g) The accounting for the retirement of amounts, included in account 302, Franchises and Consents, and account 303, Miscellaneous Intangible Plant, and the items of limited-term interest in land included in the accounts for land and land rights, shall be as provided for in the text of account 111, Accumulated Provision for Amortization of Water Plant in Service, account 404, Amortization of Limited-term Water Plant, and account 405, Amortization of Other Water Plant.

(h) The ledgers containing the primary water plant accounts and subdivisions thereof shall be kept so as to show on their face (1) additions, (2) retirements, and (3) transfers and adjustments. Corrections of errors and adjustments to additions or retirements in the current or preceding year shall be classified as additions or retirements.

(i) The cost of paving disturbed, including replacing pavement, pavement base and sidewalks, shall be included in the water plant accounts only when incurred in connection with the addition of one or more retirement units of property; and the cost associated with a particular retirement unit shall be retired when that retirement unit is retired, irrespective of whether the paving itself has a shorter or longer life. No addition (except charges to land for public improvements) shall be made to any water plant account for cost of paving installed in public streets which is not directly occasioned by the installation of property constituting one or more retirement units with which the paving cost is associated as an element of cost.

.SO DOC 16C-563.11

NYCRR

563.11 Work order and property record system required. (a) Each utility shall record all construction and retirements of water plant by means of work orders or job orders. Separate work orders may be opened for additions to and retirements of water plant or the retirements may be included with the construction work order, provided, however, that all items relating to the retirements shall be kept separate from those relating to construction and provided, further, that any maintenance costs involved in the work shall likewise be segregated.

(b) Each utility shall keep its work order system so as to show the nature of each addition to or retirement of water plant, the total cost thereof, the source or sources of costs, and the water plant account or accounts to which charged or credited. Work orders covering jobs of short duration may be cleared monthly.

(c) Each utility shall maintain records in which, for each plant account, the amounts of the annual additions and retirements, subsequent to the effective date of this system of accounts, are classified so as

to show the number and cost of the various record units or retirement units.

(d) All installations, additions, retirements, or replacements shall be covered by a work order estimate and a work in progress record, which shall be supported as indicated in subdivisions (e) and (f) herein.

Standing work orders may be used for projects of less than \$1,000 each, except that projects upon which interest during construction is charged shall not be recorded through standing work orders. These limits may be modified by order of the commission when warranted by particular circumstances.

(e) The work order estimate shall include the following particulars:

(1) A designation number or letter and the signature of the officer or employee who authorized the work or purchase. If authorization is by the board of directors or other body, the proper officer shall so state over his signature.

(2) A description and the location of the work to be done (or the purchase to be made), stating the reasons which necessitated the work, and the dates between which such work (or purchase) is to be accomplished. For each project of which interest during construction is charged, the date when completed and the date when placed in operation shall be shown either in the work order estimate or the work in progress record.

(3) Detailed estimates of the cost of the project to be supported by maps, plans, diagrams, specifications, etc., as applicable.

(4) The account or accounts to which the cost of the project is chargeable and the amount chargeable to each account.

(5) Any variations between estimates and actual cost of the project.

(6) When a project involves changes in existing property, either the work order estimate or the work in progress record shall show the year or installation of the property retired or otherwise affected and shall show or refer to other records which cover the book cost (estimated if not known, and the basis of the estimate to be stated) and the name and page of the accounting and engineering books and records covering such installation and the cost thereof.

(f) The work in progress record shall contain the following particulars:

(1) A designation number or letter which shall correspond to the number or letter of the work order estimate covering the same project. When more than one such work in progress record covers the work on a work order estimate, each shall be numbered or lettered in such manner as to be readily identifiable with the work order estimate for the same

project.

(2) The accumulated charges applicable to each particular job or project, the total cost of the completed project, and the cost of removal shall be shown. When any project involves charges to more than one water plant account, the work in progress record shall be kept so as to show the amount chargeable to each account. Every charge or credit on work in progress records shall refer to the voucher, journal, or other source from which the entry therein was made.

(3) Full details at any time of the amount carried in account 107, Construction Work in Progress--Water or account 108.1, Retirement Work in Progress, as applicable. The cost of completed projects shall be promptly transferred from those accounts to the accounts to which chargeable. Upon coming into service, completed portions involving additions to accounts shall be transferred to the appropriate account although other portions of the work covered by the same work order are not yet completed and the work order has not been closed. Credits for such transfers shall be made in separate columns.

Note A: Requirement of the use of the work order system here outlined may be suspended by order of the commission in the case of a utility which satisfies the commission that the system which it has in use for recording changes in water plant accounts gives the equivalent detail by accounts in substantially the same form. The identification of expenditures with property must be complete and clear, and the detail of the cost of each project or job must be readily available. The total of the uncompleted projects must also be in agreement with account 107, Construction Work in Progress--Water, or subaccount 108.1, Retirement Work in Progress, as applicable.

Note B: The work order system is required to record changes in water plant used wholly or partly in water operations. Its use is recommended, however, in recording other expenditures, such as for plant in other departments, repairs, etc. When used for repairs, balances applicable thereto shall be cleared monthly to the appropriate accounts.

.SO DOC 16C-563.12

NYCRR

563.12 Transfers of property. (a) When property is transferred from one water plant account to another, from one utility department to another, such as from water to electric, from one operating division or area to another, to or from accounts 101, Water Plant in Service, 104, Water Plant Leased to Others, and 105, Water Plant Held for Future Use, the transfer shall be recorded by transferring the original cost thereof from the one account, department, or location to the other. Any related amounts carried in the accounts for accumulated provisions for

depreciation or amortization shall be transferred in accordance with the segregation of such accounts.

(b) When depreciable property is transferred from the water plant accounts to account 121, Nonutility Property, the transfer shall be accomplished by crediting the water plant accounts and charging the accumulated provision for depreciation with the book cost of the item transferred; the accumulated provision for depreciation shall then be credited, as the estimated salvage, and account 121, Nonutility Property, concurrently charged with the market value of the property transferred. If the property is sold within a relatively short time, a debit or credit shall be made to the accumulated provision for depreciation to adjust the estimated salvage to the amount actually realized. If at the time of transfer, the market value is less than the cost new, account 121 may be charged with the cost new (instead of the market value) and account 122, Accumulated Provision for Depreciation and Amortization of Nonutility Property, credited with the difference between such cost and the market value.

(c) When nondepreciable land or land rights are transferred from the water plant accounts to account 121, Nonutility Property, the transfer shall be accomplished by crediting the appropriate plant accounts with the book cost of such property and charging account 121, Nonutility Property, with the market value of the property transferred; any difference between the book cost and the market value of the property transferred shall be included in account 117, Accumulated Gains and Losses from Disposition of Utility Land and Land Rights. If the property is sold within a relatively short time the related gain or loss previously recorded in account 117, shall be adjusted to the amount actually realized upon sale of such property.

.SO DOC 16C-563.13

NYCRR

563.13 Common utility plant.

(a) If the utility is engaged in more than one utility service, such as water, electric and gas, and any of its utility plant is used in common for several utility services or for other purposes to such an extent and in such manner that it is impracticable to segregate it by utility services currently in the accounts, such property may be designated and classified as "common utility plant".

(b) The book amount of utility plant designated as common plant shall be included in account 118.1, Common Utility Plant, and if applicable in part to water department, shall be segregated and accounted for in subaccounts as water plant is accounted for in accounts 101 to 107, inclusive, and water plant adjustments in accounts 114 and 116; any

amounts classifiable as common plant acquisition adjustments or common plant adjustments shall be subject to disposition as provided in paragraph C and B of accounts 114 and 116, respectively, or amounts classified in those accounts. The original cost of common utility plant in service shall be classified according to detailed utility plant accounts appropriate for the property.

(c) The utility shall be prepared to show at any time and to report to the commission annually, or more frequently, if required, and by utility plant accounts (301 to 399) the following: (1) the book cost of common utility plant, (2) the allocation of such cost to the respective departments using the common utility plant, and (3) the basis of the allocation.

(d) The accumulated provision for depreciation and amortization of the utility shall be segregated so as to show the amount applicable to the property classified as common utility plant.

(e) The expenses of operation, maintenance, rents, depreciation and amortization, and taxes of common utility plant shall be recorded in the accounts prescribed herein, but designated as common expenses, and the allocation of such expenses to the departments using the common utility plant shall be supported in such manner as to reflect readily the basis of allocation used. Provisions in this system of accounts applicable to water plant and operations shall extend also to the accounts for common utility plant and operations.

.SO DOC 16C-563.14

NYCRR

563.14 Supply, transmission and distribution mains. (a) All mains, pipes, aqueducts, canals or other facilities for carrying water shall be classified according to their primary functional use as follows:

Supply mains

Transmission and distribution mains

Fire mains

(b) Supply main means any main, pipe, aqueduct or canal the primary purpose of which is to convey water from one unit to another unit in the source of supply, water treatment or pumping plant and generally providing no service connections with customers.

(c) Transmission and distribution main means any main the primary purpose of which is to convey water, requiring no further processing except incidental chlorination or pressure boosting, from a unit in the source of supply, water treatment or pumping plant to customers.

(d) Fire main means any main forming part of an integrated system used exclusively for fire protection purposes.

.SO DOC 16C-563.15

NYCRR

563.15 Multiple use plant. Land, rights of-way and structures used jointly for several functions, such as supply, and transmission and distribution purposes, shall be classified according to the major use thereof.

567.4 Salvage and insurance

567.5 Joint facility rents and expenses

.SO DOC 16C-567.1

NYCRR

Section 567.1 Supervision and engineering. The supervision and engineering includible in the operating expense accounts shall consist of the pay and expenses of superintendents, engineers, clerks, other employees and consultants engaged in supervising and directing the operation and maintenance of each utility function. Wherever allocations are necessary in order to arrive at the amount to be included in any account the method and basis of allocation shall be reflected by underlying records.

ITEMS

Labor:

1. Special tests to determine efficiency of equipment operation.
2. Preparing or reviewing budgets, estimates, and drawings relating to

- operation or maintenances for departmental approval.
3. Preparing instructions for operations and maintenance activities.
 4. Reviewing and analyzing operating results.
 5. Establishing organizational setup of departments and executing changes therein.
 6. Formulating and reviewing routines of departments and executing changes therein.
 7. General training and instruction of employees by supervisors whose pay is chargeable hereto. Specific instruction and training in a particular type of work is chargeable to the appropriate functional account.
 8. Secretarial work for supervisory personnel, but not general clerical and stenographic work chargeable to other accounts.

Expenses:

9. Consultants' fees and expenses.
10. Meals, traveling and incidental expenses.

.SO DOC 16C-567.2 NYCRR

567.2 Maintenance. (a) The cost of maintenance chargeable to the various operating expense and clearing accounts includes labor, materials, overheads, and other expenses incurred in maintenance work. A list of work operations applicable generally to utility plant is included hereunder. Other work operations applicable to specific classes of plant are listed in functional maintenance expense accounts.

(b) Materials recovered in connection with the maintenance of property shall be credited to the same account to which the maintenance cost was charged.

(c) If the book cost of any property is carried in account 102, Water Plant Purchased or Sold, the cost of maintaining such property shall be charged to the accounts for maintenance of property of the same class and use, the book cost of which is carried in other water plant in service accounts. Maintenance of property leased from others shall be treated as provided in operating expense instruction 567.3.

ITEMS

1. Direct field supervision of maintenance.
2. Inspecting, testing, and reporting on condition of plant specifically to determine the need of repairs, replacements, rearrangements and changes in inspecting and testing the adequacy of repairs which have been made.
3. Work performed specifically for the purpose of preventing failure, restoring serviceability or maintaining life of plant.
4. Rearranging and changing the location of plant not retired.

5. Repairing for reuse materials recovered from plant.
6. Testing for, locating and clearing trouble.
7. Net cost of installing, maintaining, and removing temporary facilities to prevent interruptions in service.
8. Replacing or adding minor items of plant which do not constitute a retirement unit. (See water plant instruction 563.10.)

.SO DOC 16C-567.3

NYCRR

567.3 Rents. (a) The rent expense accounts provided under the several functional groups of expense accounts shall include all rents, including taxes paid by the lessee on leased property, for property used in water operations, except (1) minor amounts paid for occasional or infrequent use of any property or equipment and all amounts paid for use of equipment that, if owned, would be includible in plant accounts 391 to 398, inclusive, which shall be treated as an expense item and included in the appropriate functional account and (2) rents which are chargeable to clearing accounts, and distributed therefrom to the appropriate account. Rent of sales rooms or of equipment used in connection with merchandising activities shall be included in account 416, Costs and Expenses of Merchandising, Jobbing and Contract work. If rents cover property used for more than one function, such as pumping and distribution, or by more than one department, the rents shall be apportioned to the appropriate rent expense or clearing accounts of each department on an actual, or, if necessary, an estimated basis.

(b) When a portion of property or equipment rented from others for use in connection with utility operations is subleased, the revenue derived from such subleasing shall be credited to the rent revenue account in operating revenues; provided, however, that in case the rent was charged to a clearing account, amounts received from subleasing the property shall be credited to such clearing account.

(c) The cost, when incurred by the lessee, of operating and maintaining leased property, shall be charged to the accounts appropriate for the expense if the property was owned.

(d) The cost incurred by the lessee of additions and replacements to water plant leased from others shall be accounted for as provided in water plant instruction 563.6.

(e) Property operated jointly by the utility and another or others under a definite arrangement whereby the actual costs are shared between or among the parties shall be considered for the purpose of this system of accounts as a joint facility, and the accounting in connection therewith shall be handled as provided in operating expense instruction 567.5.

.SO DOC 16C-567.4

NYCRR

567.4 Salvage and insurance. (a) Salvage and insurance recovered in connection with maintenance jobs shall be credited to the appropriate maintenance accounts.

(b) If the amount of insurance recovered is relatively large and is received before the repairs have been completed, a disproportionate credit to operating expenses may be avoided by crediting the amount of the insurance recovered to a suspense account, to be transferred to the appropriate maintenance accounts as the charges for the work are made.

(c) Insurance recovered in connection with personal injuries charged to account 925, Injuries and Damages, shall be credited to that account.

(d) Dividends distributed by mutual insurance companies shall be credited to the accounts to which the insurance premiums were charged.

(e) Recoveries under fidelity bonds shall be credited to the account charged with the loss.

.SO DOC 16C-567.5

NYCRR

567.5 Joint facility rents and expenses. (a) A joint facility for the purpose of this system of accounts is defined as any property occupied or used jointly by the utility and another or others under a definite arrangement whereby the actual costs are shared between or among the parties. Property of the utility occupied or used under a similar definite arrangement between the water department and a coordinate department or departments shall likewise be considered as a joint facility. (See operating revenue instruction, § 566.3.)

(b) When the utility owns the joint facility, any amount received or transferred as reimbursement of operating or maintenance expenses shall be credited to the appropriate operation, maintenance, or clearing account except credits for steam or other power transferred, which shall be entered in account 625, Expenses Transferred--Credit; amounts received or transferred covering depreciation, taxes and interest or return, shall be credited, in the case of another or others, to account 472, Rents from Water Property, and in the case of coordinate departments to account 473, Interdepartmental Rents.

(c) The amount paid by or transferred to the utility for costs of operation and maintenance in connection with occupancy or use of a joint facility owned by another shall be charged to the appropriate operation, maintenance, or clearing account or accounts; the amounts for depreciation, taxes and interest or return shall be charged to the rent account appropriate for the class of property involved.

(d) In the event that joint facilities are used by either party in connection with construction work, credits for the full amount received

and charges for the full amount paid, as the case may be, shall be made direct to the construction accounts affected.

(e) These instructions are not intended to cover cases of joint ownership of property when each joint owner bears the cost of operating and maintaining its own property. In such cases the cost of operations and maintenance shall be recorded in the appropriate operation and maintenance accounts even though one of the joint owners operates or maintains the property and bills against other owners for all or a portion of the expenses incurred.

(f) Water supplied by the utility from its own supply to a coordinate department shall be accounted for as provided in operating revenue instruction section 566.3. If the utility desires to charge the appropriate accounts in any of its water operations with the cost of steam or other power used from its own supply, credit therefor shall be made to account 929, Duplicate Charges--Credit.

(g) If the arrangement regarding use of facilities does not provide for the allocation of actual costs, the facilities shall not be considered as joint.

(h) The utility shall be prepared to furnish for each charge or credit the detail thereof and the basis of allocation.

ASSETS AND OTHER DEBITS

1. UTILITY PLANT

101. Water Plant in Service

A. This account shall include the original cost of water plant included in accounts 301 to 399 prescribed herein, owned by the utility and used and useful in the service of the public in its water operations, and having an expectation of life in service of more than one year from date of installation, including such property owned by the utility but held by nominees. (See also account 106 for unclassified construction costs of completed plant actually in service.)

B. The cost of additions to and betterments of property leased from others, which are includible in this account, shall be recorded in subdivisions separate and distinct from those relating to owned property. (See water plant instruction, ò 563.6.)

102. Water Plant Purchased or Sold

A. This account shall be charged with the cost of water plant acquired as an operating unit or system by purchase, merger, consolidation, liquidation, or otherwise, and shall be credited with the selling price of like property transferred to others pending the distribution to appropriate accounts in accordance with water plant instruction, ò 563.5.

103. Water Plant in Process of Reclassification

A. This account shall include temporarily the balance of utility plant as of the effective date of the prior system of accounts, which has not yet been reclassified as of the effective date of this system of accounts. The detailed or primary accounts in support of this account employed prior to such date shall be continued pending reclassification into the water plant accounts herein prescribed (301-399), but shall not be used for additions, betterments, or new construction.

B. No charges other than as provided in paragraph A, above, shall be made to this account, but retirements of such unclassified water plant shall be credited hereto and to the detailed or primary accounts maintained in support of this account until the reclassification shall have been accomplished.

104. Water Plant Leased to Others

A. This account shall include the original cost of water plant owned by the utility, but leased to others as operating units or systems, where the lessee has exclusive possession.

B. The property included in this account shall be classified according to the detailed accounts (301 to 399) prescribed for water plant in service, and this account shall be maintained in such detail as though the property were used by the owner in its water operations.

105. Water Plant Held for Future Use

A. This account shall include the original cost of water plant (except land and land rights) owned and held for future use in water service under a definite plan for such use, to include: (1) Property acquired (except land and land rights) but never used by the utility in water service, but held for such service in the future under a definite plan and (2) property (except land and land rights) previously used by the utility in water service, but retired from such service and held pending its reuse in the future, under a definite plan, in water service.

B. This account shall also include the original cost of land and land rights owned and held for future use in water service under a plan for such use, to include land and land rights: (1) Acquired but never used by the utility in water service, but held for such service in the future under a plan, and (2) previously held by the utility in water service, but retired from such service and held pending its reuse in the future under a plan, in water service. (See water plant instruction 563.7.)

C. In the event that property recorded in this account shall no longer be needed or appropriate for future utility operations, the company shall notify the commission of such condition and request approval of journal entries to remove such property from this account.

D. Gains or losses from the sale of land and land rights or other disposition of such property previously recorded in this account and not placed in utility service shall be recorded directly in account 117, Accumulated Gains and Losses from Disposition of Utility Land and Land Rights.

E. The property included in this account shall be classified according to the detail accounts (301 to 399) prescribed for water plant in service and the account shall be maintained in such detail as though the property were in service.

Note: Materials and supplies, and meters held in reserve, and normal spare capacity of plant in service shall not be included in this account.

106. Completed Construction Not Classified--Water

At the end of the year or such other date as a balance sheet may be required by the commission, this account shall include the total of the balances of work orders for water plant which has been completed and placed in service, but which work orders have not been classified for transfer to the detailed water plant accounts.

Note: For the purpose of reporting to the commission, the classification of water plant in service by the prescribed accounts is required; the utility shall also report the balance in this account tentatively classified as accurately as practicable according to prescribed account classifications. The purpose of this provision is to avoid any significant omissions in reported amounts of water plant in service.

107. Construction Work in Progress--Water

A. This account shall include the total of the balances of work orders for water plant in process of construction.

B. Work orders shall be cleared from this account as soon as practicable after completion of the job. Further, if a project, such as pumping station or water treatment plant, is designed to consist of two or more units which may be placed in service at different dates, any expenditures which are common to and which will be used in the operation of the project as a whole shall be included in water plant in service upon the completion and the readiness for service of the first unit. Any expenditures which are identified exclusively with units of property not yet in service shall be included in this account.

C. Expenditures on research and development projects for construction of utility facilities are to be included in a separate subdivision in this account. Records must be maintained to show separately each project along with complete detail of the nature and purpose of the research and

development project together with the related costs. Costs recorded in this account related to successful projects become a part of the cost of the project for accounting and rate purposes when the project is placed in service. Costs related to unsuccessful projects may be amortized to operating expenses with the approval of the commission.

Note: See also account 106, Completed Construction Not Classified.

108. Accumulated Provision for Depreciation of Water Plant in Service

A. This account shall be credited with the following:

(1) Amounts charged to account 403, Depreciation Expense, to account 416, Costs and Expenses of Merchandising, Jobbing, and Contract Work, and to clearing accounts for current depreciation expense.

(2) Amounts of depreciation applicable to water properties acquired as operating units or systems. (See water plant instruction, § 563.5).

(3) Amounts charged to account 182, Extraordinary Property Losses, when authorized by the commission.

B. At the time of retirement of depreciable water plant in service, this account shall be charged with the book cost of the property retired and the cost of removal, and shall be credited with the salvage value and any other amounts recovered, such as insurance. (See water plant instruction, § 563.10(b)(2).) When retirements, cost of removal and salvage are entered originally in retirement work orders, the net total of such orders may be included in a separate subaccount hereunder, titled 108.1, Retirement Work in Progress. Upon completion of the work order, the proper distribution to subdivisions of this account shall be made as provided in the following paragraph.

C. For general ledger and balance sheet purposes, this account shall be regarded and treated as a single composite provision for depreciation. For purposes of analysis, however, each utility shall maintain subsidiary records in which this account is segregated according to the primary water plant accounts. Such subsidiary records shall reflect the current credits and debits to this account in sufficient detail to show separately for each primary water plant account (1) the amount of provision for depreciation, (2) the book cost of property retired, (3) cost of removal, (4) salvage, and (5) other items including recoveries from insurance. (See also, general instruction 561.13,(d).)

D. When transfers of plant are made from one water plant account to another or from or to another utility department, or from or to nonutility property accounts, the accounting for the related accumulated provision for depreciation shall be as provided in water plant instruction, § 563.12.

E. The utility is restricted in its use of the accumulated provisions for depreciation to the purposes set forth above. It shall not divert any portion of this account to retained earnings or make any other use thereof without authorization by the commission.

109. Accumulated Provision for Depreciation of Water Plant Leased to Others

A. This account shall be credited with amounts charged to account 413, Expenses of Water Plant Leased to Others for current depreciation expense of property included in account 104, Water Plant Leased to Others. Include, also, credits for depreciation applicable to plant acquired as operating units or systems, or for losses transferred to account 182, Extraordinary Property Losses.

B. The requirements of account 108, Accumulated Provision for Depreciation of Water Plant in Service, regarding retirements chargeable thereto and of subsidiary data to be maintained shall be applicable likewise to this account.

C. The utility is restricted in its use of the accumulated provisions for depreciation to the purposes set forth above. It shall not transfer any portion of this account to retained earnings or make any other use thereof without authorization by the commission.

110. Accumulated Provision for Depreciation of Water Plant Held for Future Use

A. This account shall be credited with amounts charged to account 421, Miscellaneous Nonoperating Income, for depreciation expense on property included in account 105, Water Plant Held for Future Use. Include, also, the balance of accumulated provision for depreciation on property which may be transferred to account 105, Water Plant Held for Future Use, from other property accounts.

B. The utility is restricted in its use of accumulated provision for depreciation to the purposes set forth above. It shall not transfer any portion of this account to retained earnings or make any other use thereof without authorization by the commission.

Note: Normally, this account will not be used for current depreciation provisions, because, as provided herein, the service life during which depreciation is computed commences with the date property is includible in water plant in service. However, if special circumstances indicate the propriety of current accruals for depreciation, such charges shall be made to account 421, Miscellaneous Nonoperating Income.

111. Accumulated Provision for Amortization of Water Plant in Service

A. This account shall be credited with amounts charged to account 404, Amortization of Limited-term Water Plant, for the current amortization

of limited-term water investments. It shall be credited also with amounts which may be charged to account 405, Amortization of Other Water Plant, or to account 425, Miscellaneous Amortization, to amortize intangible or other water plant which does not have a definite or terminable life and is not subject to charges for depreciation expense.

B. When any property to which this account applies is sold, relinquished, or otherwise retired from service, this account shall be charged with the amount previously credited in respect to such property. The book cost of the property so retired less the amount chargeable to this account and less the net proceeds realized at retirement shall be included in account 421.1, Gain or Disposition of Property, or 421.2, Loss on Disposition of Property as appropriate.

C. Records shall be maintained so as to show separately the balance applicable to each class of property which is being amortized.

D. The utility is restricted in its use of the accumulated provisions for amortization to the purposes set forth above. It shall not transfer any portion of this account to retained earnings or make any other use thereof without authorization of the commission.

112. Accumulated Provision for Amortization of Water Plant Leased to Others

A. This account shall be credited with amounts charged to account 413, Expenses of Water Plant Leased to Others, for the current amortization of limited-term or other investments subject to amortization included in account 104, Water Plant Leased to Others.

B. When any property to which this account applies is sold, relinquished or otherwise retired from service, this account shall be charged with the amount previously credited in respect to such property. The book cost of the property so retired less the amount chargeable to this account and less the net proceeds realized at retirement shall be included in account 421.1, Gain on Disposition of Property, or account 421.2, Loss on Disposition of Property as appropriate.

C. Records shall be maintained so as to show separately the balance applicable to each class of property which is being amortized.

D. The utility is restricted in its use of the accumulated provision for amortization to the purposes set forth above. It shall not transfer any portion of this account to retained earnings or make any other use thereof without authorization by the commission.

113. Accumulated Provision for Amortization for Water Plant Held for Future Use

A. This account shall be credited with amounts charged to account 421, Miscellaneous Nonoperating Income, for amortization expense on property

included in account 105, Water Plant Held for Future Use. Include, also, the balance of accumulated provision for amortization on property which may be transferred to account 105, Water Plant Held for Future Use, from other property accounts.

B. The utility is restricted in its use of the accumulated provision for amortization to the purposes set forth above. It shall not transfer any portion of this account to retained earnings or make any other use thereof without amortization by the commission.

114. Water Plant Acquisition Adjustments

A. This account shall include amounts determined in accordance with water plant instruction, § 563.5 representing the differences between (1) the amount of money actually paid (or the current money value of any consideration other than money exchanged) for water plant acquired as an operating unit or system by purchase, merger, consolidation, liquidation, or otherwise, plus the costs and expenses incurred in connection with the acquisition and properly related thereto the accounting disposition of which has not been otherwise provided for, and (2) the original cost, estimated if not known, of such property less credits thereto representing contributions in aid of construction and less the amount or amounts credited to accumulated provisions for depreciation and amortization with respect to such property.

B. This account shall be subdivided so as to show the amounts included herein for each property acquisition, and the amounts related to water plant in service, water plant held for future use, and water plant leased to others. (See water plant instruction, § 563.5.)

C. The amounts recorded in this account with respect to each property acquisition shall be disposed of, written off, or provision shall be made for the amortization thereof, as follows:

(1) Debit amounts may be charged to account 426.5, Other Deductions, or account 435, Extraordinary Deductions, as appropriate in whole or in part, or amortized through charges made in accordance with an orderly and systematic amortization program to account 425, Miscellaneous Amortization, without further direction or approval of this commission. Should the utility desire the disposition of debit amounts in any manner other than as herein provided, it shall request that the commission (i) approve disposition proposed by the utility or (ii) direct appropriate disposition according to the circumstances involved in each transaction. (See also account 406.)

(2) Credit amounts shall be disposed of in such manner as this commission may approve or direct.

115. Accumulated Provision for Amortization of Water Plant Acquisition

Adjustments

This account shall be credited or debited with amounts which are includible in account 406, Amortization of Water Plant Acquisition Adjustments or account 425, Miscellaneous Amortization, for the purpose of providing for the extinguishment of amounts in account 114, Water Plant Acquisition Adjustments, in instances where the amortization of account 114 is not being made by direct write-offs of the account.

116. Other Water Plant Adjustments

A. This account shall include the difference between the original cost, estimated if not known, and the book cost of utility plant to the extent that such difference is not properly includible in account 114, Water Plant Acquisition Adjustments

B. Amounts included in this account shall be classified in such manner as to show the origin of each amount and shall be disposed of as the commission may approve or direct.

Note: The provisions of this account shall not be construed as approving or authorizing the recording of appreciation of utility plant.

117. Accumulated Gains and Losses from Disposition of Utility Land and Land Rights

A. This account shall include gains and losses from disposition of utility land and land rights as determined by water plant instructions 563.7(e), 563.10(e) and 563.12(c).

B. Gains or losses recorded in this account in accordance with Paragraph A above shall be reduced by the related Federal income tax when realized and concurrently debited or credited, as appropriate, to account 411.8, Miscellaneous Adjustments of Income Taxes--Utility Operating Income.

C. The records supporting the entries to this account shall be so kept that the utility can furnish full particulars with respect to the amounts included herein.

118.1 Common Utility Plant

This account shall include the balances in accounts for utility plant which is used in common for water operations and other operations. (See water plant instruction, 563.13.)

118.2 Other Utility Plant

A. This account shall include the balances in accounts for utility plant, other than water plant and common utility plant.

B. A separate account shall be maintained for each utility department.

Note: In the case of utility services for which systems of accounts are prescribed by this commission, such as electric, gas, steam, etc., the appropriate accounts in such systems shall be used instead of this

account.

119.1 Accumulated Provision for Depreciation and Amortization of Common Utility Plant

This account shall include the accumulated provision for depreciation and amortization applicable to property carried in common utility plant account 118.1. (See also general instruction, § 561.13 and water plant instruction, § 563.13.)

119.2 Accumulated Provision for Depreciation and Amortization of Other Utility Plant

This account shall include the accumulated provision for depreciation and amortization applicable to property in account 118.2, Other Utility Plant.

Note: In the case of utility services for which systems of accounts are prescribed by this commission, such as electric, gas, steam, etc., the appropriate accounts in such systems shall be used instead of this account.

2. OTHER PROPERTY AND INVESTMENTS

121. Nonutility Property

A. This account shall include the book cost (except as otherwise provided in water plant instruction § 563.12) of land, structures, equipment or other tangible or intangible property owned by the utility, but not used in utility service and not properly includible in account 105, Water Plant Held for Future Use.

B. This account shall be subdivided so as to show the amount of property used in operations which are nonutility in character but nevertheless constitute a distinct operating activity of the company (such as operation of an ice department) and the amount of miscellaneous property not used in operations. The records in support of each subaccount shall be maintained so as to show an appropriate classification of the property.

122. Accumulated Provision for Depreciation and Amortization of Nonutility Property

This account shall include the accumulated provision for depreciation and amortization applicable to nonutility property.

123. Investment in Associated Companies

A. This account shall include the book cost of investments in securities issued or assumed by associated companies and investment advances to such companies, including interest accrued thereon when such interest is not subject to current settlement. Include also the offsetting entry to the recording of amortization of discount or premium on interest bearing investments. (See account 419, Interest and Dividend

Income.)

B. The account shall be maintained in such manner as to show the investment in securities of, and advances to, each associated company together with full particulars regarding any of such investments that are pledged.

Note A: Securities and advances of associated companies owned and pledged shall be included in this account, but such securities, if held in special deposits or in special funds, shall be included in the appropriate deposit or fund account. A complete record of securities pledged shall be maintained.

Note B: Securities of associated companies held as temporary cash investments are includible in account 136, Temporary Cash Investments.

Note C: Balances in open accounts with associated companies, which are subject to current settlement, are includible in account 146, Accounts Receivable from Associated Companies.

Note D: The utility may write down the cost of any security in recognition of a decline in the value thereof. Securities shall be written off or written down to a nominal value if there be no reasonable prospect of substantial value. Fluctuations in market value shall not be recorded but a permanent impairment in the value of securities shall be recognized in the accounts. When securities are written off or written down, the amount of the adjustment shall be charged to account 426.5, Other Deductions, or to an appropriate account for accumulated provisions for loss in value established as a separate subdivision of this account.

Note E: Advances made to associated companies without expectation of reimbursement shall be credited to this account and charged to account 426.5, Other Deductions.

124. Other Investments

A. This account shall include the book cost of investments in securities issued or assumed by nonassociated companies, investment advances to such companies, and any investments not accounted for elsewhere. Include also the offsetting entry to the recording of amortization of discount expense or premium on interest bearing investments. (See account 419, Interest and Dividend Income.)

B. The records shall be maintained in such manner as to show the amount of each investment and the investment advances to each person.

C. When securities with a fixed maturity date are purchased at a discount (that is, when the total cost, including brokerage fees, taxes, commissions, etc., is less than par), such discount may be amortized over the remaining life of the securities through periodic debits to the

account in which the securities are carried (preferably coincident with entries recording interest accruals) and credits to the same account in which the interest revenue is recorded. No debits shall be made in respect to discount upon securities held as investments or in special funds if there is reason to believe that such securities will be disposed of by redemption or otherwise at less than par or will not be paid at date of maturity.

D. When securities with a fixed maturity date are purchased at a premium (that is when the total cost including brokerage fees, taxes, commissions, etc., is in excess of par) such premium may be amortited* over the remaining life of the securities through periodic credits to the account in which the securities are carried (preferably coincident with entries recording interest accruals) and debits to the same account in which the interest revenue is recorded.

* So in original. "amortited" should be "amortized".

Note A: Securities owned and pledged shall be included in this account, but securities held in special deposits or in special funds shall be included in appropriate deposit or fund accounts. A complete record of securities pledged shall be maintained.

Note B: Securities held as temporary cash investments shall not be included in this account. (See account 136, Temporary Cash Investments.)

Note C: See note D of account 123.

125. Sinking Funds

This account shall include the amount of cash and book cost of investments held in sinking funds. A separate account, with appropriate title, shall be kept for each sinking fund. Transfers from this account to special deposit accounts, may be made as necessary for the purpose of paying matured sinking-fund obligations, or obligations called for redemption but not presented, or the interest thereon.

126. Depreciation Fund

This account shall include the amount of cash and the book cost of investments which have been segregated in a special fund for the purpose of identifying such assets with the accumulated provisions for depreciation.

128. Other Special Funds

This account shall include the amount of cash and book cost of investments which have been segregated in special funds for insurance, employee pensions, savings, relief hospital, and other purposes not provided for elsewhere. A separate account, with appropriate title, shall be kept for each fund.

Note: Amounts deposited with a trustee under the terms of an

irrevocable trust agreement for pensions of other employee benefits shall not be included in this account.

3. CURRENT AND ACCRUED ASSETS

131. Cash

This account shall include the amount of current cash funds except working funds.

132. Interest Special Deposits

This account shall include special deposits with fiscal agents or others for the payment of interest.

133. Dividend Special Deposits

This account shall include special deposits with fiscal agents or others for the payment of dividends.

134. Other Special Deposits

This account shall include deposits with fiscal agents or others for special purposes other than the payment of interest and dividends. Such special deposits may include cash deposited with Federal, State, or municipal authorities as a guaranty for the fulfillment of obligations; cash deposited with trustees to be held until mortgaged property sold, destroyed, or otherwise disposed of is replaced; cash realized from the sale of the accounting utility's securities and deposited with trustees to be held until invested in property of the utility, etc. Entries to this account shall specify the purpose for which the deposit is made.

Note: Assets available for general corporate purposes shall not be included in this account. Further deposits for more than one year, which are not offset by current liabilities, shall not be charged to this account but to account 128, Other Special Funds.

135. Working Funds

This account shall include cash advanced to officers, agents, employees and others as petty cash or working funds.

136. Temporary Cash Investments

A. This account shall include the book cost of investments, such as demand and time loans, bankers' acceptance, United States Treasury certificates, marketable securities, and other similar investments, acquired for the purpose of temporarily investing cash.

B. This account shall be so maintained as to show separately temporary cash investments in securities of associated companies and of others. Records shall be kept of any pledged investments.

141. Notes Receivable

This account shall include the book cost, not includible elsewhere, of all collectible obligations in the form of notes receivable and similar evidences (except interest coupons) of money due on demand or within one

year from the date of issue except, however, notes receivable from associated companies. (See account 136, Temporary Cash Investments, and account 145, Notes Receivable from Associated Companies.)

Note: The face amount of notes receivable discounted, sold or transferred without releasing the utility from liability as endorser thereon, shall be credited to a separate subdivision of this account and appropriate disclosure shall be made in financial statements of any contingent liability arising from such transactions.

142. Customer Accounts Receivable

A. This account shall include amounts due from customers for utility service and for merchandising, jobbing and contract work. This account shall not include amounts due from associated companies.

B. This account shall be maintained so as to permit ready segregation of amounts due for merchandising, jobbing and contract work.

143. Other Accounts Receivable

A. This account shall include amounts due the utility upon open accounts, other than amounts due from associated companies and from customers for utility service and merchandising, jobbing and contract work.

B. This account shall be maintained so as to show separately amounts due subscriptions to capital stock and from officers and employees, but the account shall not include amounts advanced to officers or others as working funds. (See account 135, Working Funds.)

144. Accumulated Provision for Uncollectible Accounts--Credit

A. This account shall be credited with amounts provided for losses on accounts receivable which may become uncollectible, and also with collections on accounts previously charged hereto. Concurrent charges shall be made to account 904, Uncollectible Accounts, for amounts applicable to utility operations, and to corresponding accounts for other operations. Records shall be maintained so as to show the write-offs of accounts receivable for each utility department.

B. This account shall be subdivided to show the provision applicable to the following classes of accounts receivable:

- Utility Customers for Utility Service
- Merchandising, Jobbing and Contract Work
- Officers and Employees
- Others

Note A: Accretions to this account shall not be made in excess of a reasonable provision against losses of the character provided for.

Note B: If provisions for uncollectible notes receivable or for uncollectible receivables from associated companies are necessary,

separate subaccounts therefore shall be established under the account in which the receivable is carried.

145. Notes Receivable from Associated Companies

146. Accounts Receivable from Associated Companies

These accounts shall include notes and drafts upon which associated companies are liable, and which mature and are expected to be paid in full not later than one year from date of issue, together with any interest thereon, and debit balances subject to current settlement in open accounts with associated companies. Items which do not bear a specified due date but which have been carried for more than 12 months and items which are not paid within 12 months from due date shall be transferred to account 123, Investment in Associated Companies.

Note A: On the balance sheet, accounts receivable from an associated company may be set off against accounts payable to the same company.

Note B: The face amount of notes receivable discounted, sold or transferred without releasing the utility from liability as endorser thereon, shall be credited to a separate subdivision of this account and appropriate disclosure shall be made in financial statements of any contingent liability arising from such transactions.

150. Materials and Supplies

A. This account shall include the cost and related stores expense of unissued small tools and unapplied materials and supplies, including fuel; plant materials and operating supplies; merchandise for sale; and materials and supplies held primarily for nonutility purposes. The cost shall include, when practicable the purchase price at the point of free delivery, plus customs duties, excise and other taxes on purchases, insurance, costs of inspection, special tests prior to acceptance, loading and unloading, transportation, and other directly assignable charges; also the related stores expenses for purchasing, storage, handling, and distribution of materials.

B. As far as practicable, transportation charges for materials shall be included as a part of the cost of the particular materials to which they relate; cash or other discounts on materials shall be deducted in determining the cost of the particular material, or credited to the account to which the material is charged. When such items cannot be assigned directly to particular purchases, they may be included in the subdivisions of this account, 150.152, Fuel Stock Expenses Undistributed, or 150.163, Stores Expenses Undistributed, as appropriate. Where other classes of expenses applicable to materials purchased cannot be directly assigned to particular purchases, they may be charged to account 150.152, or account 150.163, as appropriate.

C. Materials recovered in connection with construction, maintenance, or the retirement of property shall be charged to this account in accordance with provisions set forth in account 150.154, Plant Materials and Operating Supplies.

D. Materials and supplies issued shall be credited hereto and charged to the appropriate construction, operating expense, or other account on the basis of a unit price determined by the use of cumulative average, first-in first-out, or such other method of inventory accounting as conforms with accepted accounting standards consistently applied. Stores expenses related to the materials and supplies shall be cleared from the subaccount 150.163, Stores Expense Undistributed, by adding to the cost of materials and supplies issued a suitable loading charge which will distribute the expenses over the stores issued.

E. Physical inventories of materials, supplies, fuel, etc., shall be taken at least every two years. The necessary adjustments shall be made to bring this account into harmony with the actual inventories. In effecting the adjustment, large differences which can be assigned to important classes of materials shall be equitably adjusted among the accounts to which such classes of materials have been charged since the previous inventory. Other differences shall be equitably apportioned among the accounts to which materials have been charged, or included in the stores expense accounts, 150.152, Fuel Stock Expenses Undistributed, or 150.163, Stores Expense Undistributed, as appropriate.

Note A: Interest on material bills, the payment of which has been delayed, shall be charged to account 431, Other Interest Expense.

Note B: Customer meters, and such associated devices as are retirement units, in stock or undergoing repairs shall not be included in this account, but in account 346, Meters.

F. Separate subaccounts of this account shall be maintained under the following titles:

150.151. Fuel Stock

This account shall include the book cost of fuel on hand.

ITEMS

- (1) Invoice price of fuel less any cash or other discounts.
- (2) Freight, switching, demurrage and other transportation charges, not including, however, any charges for unloading from the shipping medium.
- (3) Excise taxes, purchasing agents' commissions, insurance and other expenses directly assignable to cost of fuel.

150.152. Fuel Stock Expenses Undistributed

A. This account may include the cost of labor and of supplies used and

expenses incurred in unloading fuel from the shipping medium and in the handling thereof prior to its use, if such expenses are sufficiently significant in amount to warrant being treated as a part of the cost of fuel inventory rather than being charged direct to expense as incurred.

B. Amounts included herein shall be charged to expense as the fuel is used to the end that the balance herein shall not exceed the expenses attributable to the inventory of fuel on hand.

ITEMS

Labor:

- (1) Procuring and handling of fuel.
- (2) All routine fuel analyses.
- (3) Unloading from shipping facility and putting in storage.
- (4) Moving of fuel in storage and transferring from one station to another.
- (5) Handling from storage or shipping facility to first bunker, hopper, bucket, tank or holder of boiler house structure.
- (6) Operations of mechanical equipment, such as locomotives, trucks, cars, boats, barges, cranes, etc.

Supplies and Expenses:

- (7) Tools, lubricants and other supplies.
- (8) Operating supplies for mechanical equipment.
- (9) Transportation and other expenses in moving fuel.
- (10) Stores expenses applicable to fuel.

150.154. Plant Materials and Operating Supplies

This account shall include the cost of materials purchased primarily for use in the utility business for construction, operation and maintenance purposes. It shall include also the book cost of materials recovered in connection with construction, maintenance, or the retirement of property, such materials being credited to construction, maintenance, or accumulated depreciation provision respectively, and included herein as follows:

1. Reusable materials consisting of large individual items, shall be included in this account at original cost of material only, as defined in paragraphs A and B of account 150, including transportation to point of original receipt, estimated if not known. The cost of repairing such items shall be charged to the maintenance account appropriate for the previous use. (See also water plant instruction, § 563.3, item (3).)

2. Reusable materials consisting of relatively small items, the identity of which (from the date of original installation to the final abandonment or sale thereof) can not be ascertained without undue refinement in accounting shall be included in this account at current

prices new for such items. The cost of repairing such items shall be charged to the appropriate expense account as indicated by previous use.

3. Scrap and nonusable materials included in this account shall be carried at the estimated net amount realizable therefrom. The difference between the amounts realized for scrap and nonusable materials sold and the net amount at which the materials were carried in this account, as far as practicable, shall be adjusted to the accounts credited when the materials were charged to this account.

ITEMS

- (1) Invoice of materials less cash or other discounts.
- (2) Freight, switching or other transportation charges when practicable to include as part of the cost of particular materials to which they relate.
- (3) Customs duties and excise taxes.
- (4) Costs of inspection and special tests prior to acceptance.
- (5) Insurance and other directly assignable charges.

150.155. Merchandise

This account shall include the book cost of materials, supplies, appliances, and equipment held primarily for merchandising, jobbing and contract work.

Note: Appliances held under consignment shall not be included herein, but there shall be kept a memorandum account of such appliances either at cost or at selling price, to show the appliances in stock and appliances sold.

150.156. Other Materials and Supplies

This account shall include the book cost of materials and supplies held primarily for nonutility purposes.

150.163. Stores Expense Undistributed

A. This account shall include the cost of supervision, labor and expenses incurred in the operation of general storerooms, including purchasing, storage, handling and distribution of materials and supplies.

B. This account shall be cleared by adding to the cost of materials and supplies issued a suitable loading charge which will distribute the expense equitably over stores issues. The balance in the account at the close of the year shall not exceed the amount of stores expenses reasonably attributable to the inventory of materials and supplies exclusive of fuel, as any amount applicable to fuel costs should be included in account 150.152, Fuel Stock Expenses Undistributed.

ITEMS

Labor:

- (1) Inspecting and testing materials and supplies when not assignable to specific items.
- (2) Unloading from shipping facility and putting in storage.
- (3) Supervision of purchasing and stores department to extent assignable to materials handled through stores.
- (4) Getting materials from stock and in readiness to go out.
- (5) Inventorying stock received or stock on hand by stores employees but not including inventories by general department employees as part of internal or general audits.
- (6) Purchasing department activities in checking material needs, investigating sources of supply, analyzing prices, preparing and placing orders, and related activities to extent applicable to materials handled through stores. (Optional: purchasing department expenses may be included in administrative and general expenses.)
- (7) Maintaining stores equipment.
- (8) Cleaning and tidying storerooms and stores offices.
- (9) Keeping stock records, including recording and posting of material receipts and issues and maintaining inventory record of stock.
- (10) Collecting and handling scrap materials in stores.

Supplies and Expenses:

- (11) Adjustments of inventories of materials and supplies but not including large differences which can readily be assigned to important classes of materials and equitably distributed among the accounts to which such classes of materials have been charged since the previous inventory.
- (12) Cash and other discounts not practicably assignable to specific materials.
- (13) Freight, express, etc., when not assignable to specific items.
- (14) Heat, light and power for storerooms and stores offices.
- (15) Brooms, brushes, sweeping compounds and other supplies used in cleaning and tidying storerooms and stores offices.
- (16) Injuries and damages.
- (17) Insurance on materials and supplies and on stores equipment.
- (18) Losses due to breakage, leakage, evaporation, fire or other causes, less credits for amounts received from insurance, transportation companies or others in compensation of such losses.
- (19) Postage, printing, stationery and office supplies.
- (20) Rent of storage space and facilities.
- (21) Communication service.
- (22) Excise and other similar taxes not assignable to specific materials.

(23) Transportation expense on inward movement of stores and on transfer between storerooms but not including charges on materials recovered from retirements which shall be accounted for as part of cost of removal.

165. Prepayments

This account shall include amounts representing prepayments of insurance, rents, taxes, interest and miscellaneous items, and shall be kept or supported in such manner as to disclose the amount of each class of prepayment.

171. Interest and Dividends Receivable

This account shall include the amount of interest on bonds, mortgages, notes, commercial paper, loans, open accounts, deposits, etc., the payment of which is reasonably assured and the amount of dividends declared or guaranteed on stocks owned.

Note A: Interest which is not subject to current settlement shall not be included herein but in the account in which is carried the principal on which the interest is accrued.

Note B: Interest and dividends receivable from associated companies shall be included in account 146, Accounts Receivable from Associated Companies.

172. Rents Receivable

This account shall include rents receivable or accrued on property rented or leased by the utility to others.

Note: Rents receivable from Associated Companies shall be included in account 146, Accounts Receivable from Associated Companies.

173. Accrued Utility Revenues

At the option of the utility, the estimated amount accrued for service rendered, but not billed at the end of any accounting period, may be included herein. In case accruals are made for unbilled revenues, they shall be made likewise for unbilled expenses, such as for the purchase of electric energy.

174. Miscellaneous Current and Accrued Assets

This account shall include the book cost of all other current and accrued assets, appropriately designated and supported so as to show the nature of each asset included herein.

4. DEFERRED DEBITS

181. Unamortized Debt Expense

A. This account shall include expenses related to the issuance or assumption of debt securities. Amounts recorded in this account shall be amortized over the life of each respective issue under a plan which will distribute the amount equitably over the life of the security. The

amortization shall be on a monthly basis, and the amount thereof shall be charged to account 428, Amortization of Debt Discount and Expense. Any unamortized amounts outstanding at the time that the related debt is prematurely reacquired shall be accounted for as indicated in general instruction 561.21.

B. When the utility recognizes a mortgage recording tax as a tax deduction in the year incurred, account 410.1, Provision for Deferred Income Taxes, Utility Operating Income, shall be debited and account 283, Accumulated Deferred Income Taxes--Other, shall be credited with the amount of the related tax effect, such amount to be amortized concurrently with the related debt expense.

182. Extraordinary Property Losses

A. When authorized or directed by the commission, this account shall include extraordinary losses on property abandoned or otherwise retired from service which are not provided for by the accumulated provisions for depreciation or amortization and which could not reasonably have been foreseen and provided for, and extraordinary losses, such as unforeseen damages to property, which could not reasonably have been anticipated and which are not covered by insurance or other provisions.

B. The entire cost, less net salvage, of depreciable property retired shall be charged to accumulated provision for depreciation. If all, or a portion, of the loss is to be included in this account, the accumulated provision for depreciation shall then be credited and this account charged with the amount properly chargeable hereto.

C. Application to the commission for permission to use this account shall be accompanied by a statement giving a complete explanation with respect to the items which it is proposed to include herein, the period over which, and the accounts to which it is proposed to write off the charges, and other pertinent information.

183. Preliminary Survey and Investigation Charges

A. This account shall be charged with all expenditures for preliminary surveys, plans, investigations, etc., made for the purpose of determining the feasibility of utility projects under the contemplation. If construction results, this account shall be credited and the appropriate utility plant account charged. If the work is abandoned, the charge shall be to account 426.5, Other Deductions, or to the appropriate operating expense account. (See general instructions, ¶ 561.18.)

B. The records supporting the entries to this account shall be so kept that the utility can furnish complete information as to the nature and the purpose of the survey, plans, or investigations and the nature and

amounts of the several charges.

Note: The amount of preliminary survey and investigation charges transferred to water plant shall not exceed the expenditures which may reasonably be determined to contribute directly and immediately and without duplication to water plant.

184. Clearing Accounts

A. This caption shall include undistributed balances in clearing accounts at the date of the balance sheet. Balances in clearing accounts shall be substantially cleared not later than the end of the calendar year unless items held therein relate to a future period.

B. In addition to the clearing accounts otherwise specifically provided for in this system of accounts (150.152, Fuel Stock Expenses Undistributed and 150.163, Stores Expense Undistributed), the utility shall maintain any other clearing accounts necessary as a medium through which to accumulate initial costs and expenses with respect to particular types of transactions in order to facilitate the distribution and apportionment of charges on equitable bases among the appropriate accounts to which such charges are applicable. The following clearing accounts should be used unless it can be clearly demonstrated that their use is not necessary. (See general instructions, § 561.2, (d), and § 561.15, (b)).

Clearing Accounts

184.1 Building Service Expenses--Clearing

184.2 Electronic Data Processing Expenses--Clearing

184.3 Laboratory Expenses--Clearing

184.4 Shop Expenses--Clearing

184.5 Tools and Work Equipment Expenses -Clearing

184.6 Transportation Expenses--Clearing

185. Temporary Facilities

This account shall include amounts shown by work orders for plant installed for temporary use in utility service for periods of less than one year. Such work orders shall be charged with the cost of temporary facilities and credited with payments received from customers and net salvage realized on removal of the temporary facilities. Any net credit or debit resulting shall be cleared to account 471, Miscellaneous Service Revenues.

186. Miscellaneous Deferred Debits

A. This account shall include all debits not elsewhere provided for, such as miscellaneous work in progress, and unusual or extraordinary expenses, not included in other accounts, which are in process of amortization, and items the proper final disposition of which is

uncertain.

B. The records supporting the entries to this account shall be so kept that the utility can furnish full information as to each deferred debit.

188. Investment in Research and Development

A. This account shall include the cost of all expenditures coming within the meaning of Definition (24) of the Uniform System of Accounts, except those properly includible in account 107, Construction Work in Progress.

B. Costs that are minor or of a general or recurring nature shall be transferred from this account to the appropriate operating expense function or if such costs are common to the overall operations or cannot be feasibly allocated to the various operating accounts, then such costs shall be recorded in account 930, Miscellaneous General Expenses.

C. When expenditures on a research project are relatively so large that their inclusion in the operating accounts in the year in which they were incurred would seriously distort those accounts, the company may request commission approval to defer such expenditures in this account and amortize them over a future period. Without such approval, expenditures charged to this account shall not be carried beyond the year in which they are incurred.

Note: With the approval of the commission, amortization of expenditures related to specific programs or projects may commence at a date subsequent to the year initial expenditures are incurred to provide for consistency of accounting and rate treatment.

D. The entries in this account shall be so maintained as to show separately each project with complete detail of the nature and purpose of the research and development undertaken together with related costs.

E. Balances in this account will be considered for rate base treatment as if the amounts were part of the cost of plant in service.

190. Accumulated Deferred Income Taxes

A. This account, when its use has been authorized by the commission, shall be debited and account 411.1, Provision for Deferred Income Taxes--Credit, Utility Operating Income, or account 411.2, Provision for Deferred Income Taxes--Credit, Other Income and Deductions, as appropriate, shall be credited with an amount equal to that by which income taxes payable for the year are higher because of the inclusion of certain items in income for tax purposes, which items for general accounting purposes will not be fully reflected in the utility's determination of annual net income until subsequent years.

B. This account shall be credited and account 410.1, Provision for Deferred Income Taxes, Utility Operating Income, or account 410.2,

Provision for Deferred Income Taxes, Other Income and Deductions, as appropriate, shall be debited with an amount equal to that by which income taxes payable for the year are lower because of prior payment of taxes as provided by paragraph A above, because of difference in timing for tax purposes of particular items of income or income deductions from that recognized by the utility for general accounting purposes. Such credit to this account and debit to account 410.1 or 410.2 shall, in general, represent the effect on taxes payable in the current year of the smaller amount of book income recognized for tax purposes as compared to the amount recognized in the utility's current accounts with respect to the item or class of items for which deferred tax accounting by the utility was authorized by the commission.

C. Vintage year records with respect to entries to this account, as described above, and the account balance, shall be so maintained as to show the factor of calculation with respect to each annual amount of the item or class of items for which deferred tax accounting by the utility is utilized.

D. The utility is restricted in its use of this account to the purposes set forth above. It shall not make use of the balance in this account or any portion thereof except as provided in the text of this account, without prior approval of the commission. Any remaining deferred tax account balance with respect to an amount for any prior year's tax deferral, the amortization of which or other recognition in the utility's income accounts has been completed, or other disposition made, shall be debited to account 410.1, Provision for Deferred Income Taxes, Utility Operating Income, or account 410.2, Provision for Deferred Income Taxes, Other Income and Deductions, as appropriate, or otherwise disposed of as the commission may authorize or direct.

LIABILITIES AND OTHER CREDITS

5. PROPRIETARY CAPITAL

201. Common Stock Issued

202. Common Stock Subscribed

A. These accounts shall include the par value or stated value of stock without par value if such stock has a stated value, and, if not, the cash value of the consideration received for such stock without par value, of each class of capital stock actually issued, including such capital stock in account 217, Reacquired Capital Stock.

B. When the actual cash value of the consideration received is more than the par or stated value of any stock having a par or stated value, the difference shall be credited to the premium account for the particular class and series.

C. When capital stock is retired, these accounts shall be charged with the amount at which such stock is carried herein.

D. A separate ledger account, with a descriptive title, shall be maintained for each class and series of stock. The supporting records shall show the shares nominally issued, actually issued and nominally outstanding.

Note A: When a levy or assessment, except a call for payment on subscriptions, is made against holders of capital stock, the amount collected upon such levy or assessment shall be credited to account 207, Premium on Capital Stock.

Note B: No entries, other than those covered by the above provisions and those to record liquidating dividends, shall be made in any account for stocks without par value, except upon order of the commission.

203. Common Stock Liability for Conversion

204. Preferred Stock Issued

205. Preferred Stock Subscribed

A. These accounts shall include the amount of legally enforceable subscriptions to capital stock of the utility. They shall be credited with the par or stated value of the stock subscribed, or the subscription price of stock without par or stated value, exclusive of accrued dividends, if any. Concurrently, a debit shall be made to subscriptions to capital stock, included as a separate subdivision of account 143, Other Accounts Receivable, for the agreed price. Any premium on capital stock with par or stated value shall be included in the premium account.

B. The records shall be kept in such manner as to show the amount of subscriptions to each class and series of stock.

206. Preferred Stock Liability for Conversion

A. These accounts shall include the par or stated value or the cash value of the consideration for stock without par or stated value, as appropriate, of capital stock which the utility has agreed to exchange for outstanding securities of other companies in connection with the acquisition of properties of such companies under terms which allow the holders of the securities of the other companies to surrender such securities and receive in return therefor capital stock of the accounting utility.

B. When the securities of the other companies have been surrendered and capital stock issued in accordance with the terms of the exchange, these accounts shall be charged and accounts 201, Common Stock Issued, or 204, Preferred Stock Issued, as the case may be, shall be credited.

C. The records shall be kept so as to show separately the stocks of

each class and series for which a conversion liability exists.

207. Premium on Capital Stock

A. This account shall include in a separate subdivision for each class and series of stock, the excess of the actual cash value of the consideration received on original issues of capital stock over the par or stated value and accrued dividends of such stock, together with assessments against stockholders representing payments required in excess of par or stated values.

B. Premium on capital stock shall not be set off against expenses. Further, a premium received on an issue of a certain class or series of stock shall not be set off against expenses of another issue of the same class or series.

C. When capital stock which has been actually issued is retired, the amount in this account applicable to the shares retired shall be transferred to account 210, Gain on Resale or Cancellation of Reacquired Capital Stock.

208. Donations Received from Stockholders

This account shall include the balance of credits for donations received from stockholders consisting of capital stock of the utility, cancellation or reduction of debt of the utility, and the cash value of other assets received as a donation.

209. Reduction in Par or Stated Value of Capital Stock

This account shall include the balance of credits arising from a reduction in the par or stated value of capital stock.

210. Gain or Resale or Cancellation of Reacquired Capital Stock

This account shall include the balance of credits arising from the resale or cancellation of reacquired capital stock. (See account 217, Reacquired Capital Stock.)

211. Miscellaneous Paid-in Capital

This account shall include the balance of all other credits for paid-in capital which are not properly includible in the foregoing accounts.

Note: Amounts included in unearned surplus at the effective date of this system of accounts which cannot be classified as to the source thereof shall be included in this account.

212. Installments Received on Capital Stock

A. This account shall include in a separate subdivision for each class and series of capital stock the amount of installments received on capital stock on a partial or installment payment plan from subscribers who are not bound by legally enforceable subscription contracts.

B. As subscriptions are paid in full and certificates issued, this

account shall be charged and the appropriate capital stock account credited with the par or stated value, or the consideration received for stock without par or stated value. Any premium on capital stock with par or stated value shall be included in the premium account.

214. Capital Stock Expense

A. This account shall include in a separate subdivision for each class and series of stock all commissions and expenses incurred in connection with the original issuance and sale of capital stock, including additional capital stock of a particular class or series as well as first issues. Expenses applicable to capital stock shall not be deducted from premium on capital stock.

B. When capital stock which has been actually issued by the utility is retired, the amount in this account applicable to the shares retired shall be written off to account 210, Gain on Resale or Cancellation of Reacquired Capital Stock, provided, however, that the amount shall be charged to account 439, Adjustments to Retained Earnings, to the extent that it exceeds the balance in account 210.

C. The utility may amortize the balance in this account by systematic charges to account 425, Miscellaneous Amortization, or it may write off capital stock expense in whole or in part by charges to account 439, Adjustments to Retained Earnings.

Note: Expenses in connection with the reacquisitions or resale of the utility's capital stock shall not be included herein.

215. Appropriated Retained Earnings

This account shall include the amount of retained earnings which has been appropriated or set aside for specific purposes. Separate subaccounts shall be maintained under such titles as will designate the purpose for which each appropriation was made.

216. Unappropriated Retained Earnings

This account shall include the balance, either debit or credit, of unappropriated retained earnings arising from earnings. It shall not include items includible in any of the accounts for paid-in capital.

217. Reacquired Capital Stock

A. This account shall include in a separate subdivision for each class and series of capital stock, the cost of capital stock actually issued by the utility and reacquired by it and not retired or cancelled, except, however, stock which is held by trustees in sinking or other funds.

B. When reacquired capital stock is retired or cancelled, the difference between its cost, including commissions and expenses paid in connection with the reacquisition, and its par or stated value (or the

proportionate amount at which it is recorded in accounts 201 or 204 in the case of stock without par or stated value) plus any premium and less any expense applicable to the shares retired, shall be debited or credited as appropriate, to account 210, Gain on Resale or Cancellation of Reacquired Capital Stock; provided, however, that debits shall be charged to account 439, Adjustments to Retained Earnings, to the extent that they exceed the balance in account 210.

C. Subject to the specific authorization or direction of the commission (see section 69 of Public Service Law), when reacquired capital stock is resold by the utility, the difference between the amount received on the resale of the stock, less expenses incurred in the resale, and the cost of the stock included in this account shall be accounted for as outlined in paragraph B.

6. LONG-TERM DEBT

221. Bonds

This account shall include, in a separate subdivision for each class and series of bonds, the face value of the actually issued and unmatured bonds which have not been retired or canceled; also, the face value of such bonds issued by others the payment of which has been assumed by the utility.

222. Reacquired Bonds

A. This account shall include the face value of bonds actually issued or assumed by the utility and reacquired by it and not retired or canceled. (See section 69 of Public Service Law.) The account for reacquired debt shall not include securities which are held by trustees in sinking or other funds.

B. When bonds are reacquired, the difference between face value adjusted for unamortized discount, expense or premium and the amount paid upon reacquisition shall be accounted for in accordance with provisions set forth in general instruction 561.2.

223. Advances from Associated Companies

A. This account shall include the face value of notes payable to associated companies and the amount of open book accounts representing advances from associated companies. It does not include notes and open accounts representing indebtedness subject to current settlement which are includible in account 233, Notes Payable to Associated Companies, or account 234, Accounts Payable to Associated Companies. (See general instruction, § 561.15.)

B. The records supporting the entries to these accounts shall be so kept that the utility can furnish complete information concerning each note and open account.

224. Other Long-Term Debt

A. This account shall include, until maturity, all long-term debt not otherwise provided for. This covers such items as receivers' certificates, real estate mortgages executed or assumed, assessments for public improvements, notes and unsecured certificates of indebtedness not owned by associated companies, receipts outstanding for long-term debt, and other obligations maturing more than one year from date of issue or assumption. (See balance sheet instruction, ¶ 562.2.)

B. Separate accounts shall be maintained for each class of obligation, and records shall be maintained to show separately for each class all details as to date of obligation, date of maturity, interest dates and rates, security for the obligation, etc.

Note: Miscellaneous long-term debt reacquired shall be accounted for in accordance with the procedure set forth in account 222, Reacquired Bonds.

225. Unamortized Premium on Long-term Debt

A. This account shall include the excess of the cash value of consideration received over the face value upon the issuance or assumption of long-term debt securities.

B. Amounts recorded in this account shall be amortized over the life of each respective issue under a plan which will distribute the amount equitably over the life of the security. The amortization shall be on a monthly basis, with the amounts thereof to be credited to account 429, Amortization on Premium on Debt--Credit. (See general instruction 561.21.)

226. Unamortized Discount on Long-term Debt--Debit

A. This account shall include the excess of the face value of long-term debt securities over the cash value of consideration received therefor, related to the issue or assumption of all types and classes of debt.

B. Amounts recorded in this account shall be amortized over the life of the respective issues under a plan which will distribute the amount equitably over the life of the securities. The amortization shall be on a monthly basis, with the amounts thereof charged to account 428, Amortization of Debt Discount and Expense. (See general instruction 561.21.)

7.CURRENT AND ACCRUED LIABILITIES

231. Notes Payable

This account shall include the face value of all notes, drafts, acceptances, or other similar evidences of indebtedness, payable on demand or within a time not exceeding one year from date of issue, to

other than associated companies.

232. Accounts Payable

This account shall include all amounts payable by the utility within one year, which are not provided for in other accounts.

233. Notes Payable to Associated Companies

234. Accounts Payable to Associated Companies

These accounts shall include amounts owing to associated companies on notes, drafts, acceptances, or other similar evidences of indebtedness, and open accounts payable on demand or not more than one year from date of issue or creation.

Note: Exclude from these accounts notes and accounts which are includible in account 223, Advances from Associated Companies.

235. Customer Deposits

This account shall include all amounts deposited with the utility by customers as security for the payment of bills.

236. Taxes Accrued

A. This account shall be credited with the amount of taxes accrued during the accounting period, corresponding debits being made to the appropriate accounts for tax charges. Such credits may be based upon estimates, but from time to time during the year as the facts become known, the amount of the periodic credits shall be adjusted so as to include as nearly as can be determined in each year the taxes applicable thereto. Any amount representing a prepayment of taxes applicable to the period subsequent to the date of the balance sheet, shall be shown under account 165, Prepayments.

B. If accruals for taxes are found to be insufficient or excessive, correction therefor shall be made through current tax accruals. However, if such corrections are so large as to seriously distort current expenses, see general instruction, ¶ 561.8.

C. Accruals for taxes shall be based upon the net amounts payable after credit for any discounts, and shall not include any amounts for interest on tax deficiencies or refunds interest received on refunds shall be credited to account 419, Interest and Dividend Income, and interest paid on deficiencies shall be charged to account 431, Other Interest Expense.

D. The records supporting the entries to this account shall be kept so as to show for each class of taxes, the amount accrued, the basis for the accrual, the accounts to which charged, and the amount of tax paid.

237. Interest Accrued

This account shall include the amount of interest accrued but not matured on all liabilities of the utility not including, however,

interest which is added to the principal of the debt on which incurred. Supporting records shall be maintained so as to show the amount of interest accrued on each obligation.

238. Dividends Declared

This account shall include the amount of dividends which have been declared but not paid. Dividends shall be credited to this account when they become a liability.

239. Matured Long-term Debt

This account shall include the amount of long-term debt (including any obligation for premiums) matured and unpaid, without specific agreement for extension of the time of payment and bonds called for redemption but not presented.

240. Matured Interest

This account shall include the amount of matured interest on long-term debt or other obligations of the utility at the date of the balance sheet unless such interest is added to the principal of the debt on which incurred.

241. Tax Collections Payable

This account shall include the amount of taxes, collected by the utility through payroll deductions or otherwise pending transmittal of such taxes to the proper taxing authority.

Note: Do not include liability for taxes assessed directly against the utility which are accounted for as part of the utility's own tax expense.

242. Miscellaneous Current and Accrued Liabilities

This account shall include the amount of all other current and accrued liabilities not provided for elsewhere appropriately designated and supported so as to show the nature of each liability.

8. DEFERRED CREDITS

252. Customer Advances for Construction

This account shall include advances by customers for construction which are to be refunded either wholly or in part. When a customer is refunded the entire amount to which he is entitled according to the agreement or rule under which the advance was made, the balance if any, remaining in this account shall be credited to the water plant accounts to which the cost of the property was charged.

253. Other Deferred Credits

A. This account shall include advance billings and receipts and other deferred credit items, not provided for elsewhere, including amounts which cannot be entirely cleared or disposed of until additional information has been received.

B. Amounts for contributions in aid of construction still remaining in the account "Contributions in Aid of Construction" at the effective date of the uniform system of accounts prescribed herein shall be credited temporarily to an appropriate subdivision of this account and shall be disposed of in accordance with provisions of water plant instruction, 563.2, subdivision (e).

255. Accumulated Deferred Investment Tax Credits

A. This account shall be credited with investment tax credits allowed in the current year on property defined in section 50 of the Internal Revenue Code of 1954, when the utility elects to defer such credits rather than to recognize in the income statement the total benefits of the tax credit as realized. The utility may not transfer amounts from this account except as authorized herein and in accounts 411.4, Investment Tax Credit Adjustments, Utility Operations; 411.5, Investment Tax Credit Adjustments, Nonutility Operations; and 420, Investment Tax Credits, or with approval of the commission. (See special instructions for accounts 411.4 and 411.5.)

B. If the investment tax credits deferred in this account are to be applied as a reduction of the rate base, the utility shall amortize the amount of such deferrals by debiting this account and crediting account 420, Investment Tax Credits with a proportionate amount determined in relation to the book service life of the property to which the tax credits relate. If, however, the deferred investment tax credits are to be applied as a reduction of the cost of service, the proportionate restorations to income shall be credited to account 411.4, Investment Tax Credit Adjustments, Utility Operations.

C. Subdivisions of this account by department shall be maintained for deferred investment tax credits which are related to utility operations other than water or to nonutility operations. Accounting procedures adopted for utility and nonutility operations are to be followed on a consistent basis.

D. Separate records shall be maintained for each year's investment tax credit for water and other utility operations (by primary utility plant accounts) and for nonutility operations, identifying the properties giving rise to the investment tax credits for each year so that they can be amortized over the weighted average book service life of such properties.

E. The utility is restricted in its use of this account to the purposes set forth above. Unless otherwise authorized by the commission, the utility shall not record in this account amounts of investment tax credits allowed on property other than that defined in section 50 of the

Internal Revenue Code of 1954. Such amounts of investment tax credits shall be treated as a current reduction of income tax expense unless the commission has authorized other disposition.

281. Accumulated Deferred Income Taxes--Accelerated Amortization

A. This account shall be credited and account 410.1, Provision for Deferred Income Taxes, Utility Operating Income, or 410.2, Provision for Deferred Income Taxes, Other Income and Deductions, as appropriate, shall be debited with an amount equal to that by which taxes on income payable for the year are lower because of the use of accelerated (five-year) amortization of (1) certified defense facilities in computing such taxes, as permitted by section 168 of the Internal Revenue Code of 1954 and (2) certified pollution control facilities in computing such taxes, as permitted by section 169 of the Internal Revenue Code of 1954, as compared to the depreciation (deduction) otherwise appropriate and allowable for tax purposes according to the straight line or other nonaccelerated depreciation method and appropriate estimated useful life of such property.

B. This account shall be debited and account 411.1, Provision for Deferred Income Taxes--Credit, Utility Operating Income or 411.2, Provision for Deferred Income Taxes--Credit, Other Income and Deductions, as appropriate, shall be credited with an amount equal to that by which taxes on income payable for the year are greater because of the use in prior years of accelerated (five-year) amortization of (1) certified defense facilities and (2) pollution control facilities instead of nonaccelerated or nonliberalized depreciation otherwise appropriate for income tax purposes, and deferral of taxes in such prior years as described in paragraph A, above. Such debit to this account and credit to account 411.1 or 411.2, shall, in general, represent the effect of taxes payable for the current year of the unavailability of a depreciation deduction for tax purposes, or a reduced amount, with respect to any depreciable property for which accelerated amortization was used in prior years, as compared to the depreciation deduction otherwise available and appropriate for such property, considering its estimated useful life, according to the depreciation method ordinarily used by the utility for similar property in computing depreciation for tax purposes by a nonaccelerated or nonliberalized depreciation method.

C. Records with respect to entries to this account, as described above, and the account balance, shall be so maintained as to show the factors of calculation and the separate amounts applicable to the facilities of each certification or authorization of accelerated amortization for tax purposes.

D. The use of this account and the accounting described above are not mandatory for any utility which, in accordance with a consistent policy, elects not to follow deferred tax accounting even though accelerated amortization is used in computing taxes on income. If, however, deferred tax accounting is initiated with respect to any certified defense facility or certified pollution control facility, the accounting shall not be suspended or discontinued on the property covered by that certificate without approval of the commission.

E. The utility is restricted in its use of this account to the purpose set forth above. It shall not transfer the balance in this account or any portion thereof to retained earnings or make any use thereof except as provided in the text of this account without prior approval of the commission. Any remaining balance of accumulated deferred taxes with respect to any certified defense facility or certified pollution control facility for which deferred tax accounting has been followed, shall, upon expiration of the estimated useful life of the facility on which deferred tax calculations were based, or upon retirement from service of such facility or predominant part thereof be credited to account 411.1, Provision for Deferred Income Taxes--Credit, Utility Operating Income, or 411.2, Provision for Deferred Income Taxes--Credit, Other Income and Deductions, as appropriate, or otherwise be applied as the commission may authorize or direct.

F. Upon the disposition by sale, exchange, transfer, abandonment or premature retirement of plant of which there is a related balance herein, this account shall be charged with an amount equal to the related income tax expense, if any, arising from such disposition and account 411.1, Provision for Deferred Income Taxes--Credit, Utility Operating Income, or 411.2, Provision for Deferred Income Taxes--Credit, Other Income and Deductions, as appropriate, shall be credited. When the remaining balance, after consideration of any related income tax expenses, is less than \$25,000 this account shall be charged and account 411.1 or 411.2, as appropriate, credited with such balance. If after consideration of any related income tax expense, there is a remaining amount of \$25,000 or more, the commission shall authorize or direct how such amount shall be accounted for at the time approval for the disposition of accounting is granted. When plant is disposed of by transfer of a wholly owned subsidiary, the related balance in this account shall also be transferred. When the disposition related to retirement of an item or items under a group method of depreciation, where there is no tax effect in the year of retirement, no entries are required in this account if it can be determined that the related

balances would be necessary to be retained to offset future group item tax deficiencies.

Note: If, in addition to a water utility department, the utility operates another utility department or has nonutility property for which related deferred taxes on income are included in this account, such deferrals shall be classified so as to show separately amounts related to the utility operating income of each department and to other income and deductions.

282. Accumulated Deferred Income Taxes--Liberalized Depreciation

A. This account, when authorized by the commission, shall be used for the deferral and normalization of tax differentials resulting from the use of liberalized depreciation as permitted by section 167 of the Internal Revenue Code of 1954. It shall also be used for the deferral and normalization of tax differentials resulting from the use of the Class Life Asset Depreciation Range, as provided and required by the Revenue Act of 1971.

Note: Tax differentials resulting from the current deduction of the cost of removal included in the Class Life Asset Depreciation Range provisions of the Revenue Act of 1971 shall be included in account 283. Also, companies taking liberalized depreciation and flowing through the tax effect on January 1, 1972, shall continue to flow through these tax effects.

B. This account shall be credited and account 410.1, Provision for Deferred Income Taxes, Utility Operating Income, or 410.2, Provision for Deferred Income Taxes, Other Income and Deductions, as appropriate, shall be debited with an amount equal to that by which taxes on income payable for the year are lower because of the use of liberalized depreciation in computing such taxes, as permitted by section 167 of the Internal Revenue Code of 1954, as compared to the depreciation deduction otherwise appropriate and allowable for tax purposes for similar property of the same estimated useful life according to the straight line or other nonliberalized method of depreciation to include those accumulated tax deferrals arising from the use of the Class Life Asset Depreciation Range, as provided and required by the Revenue Act of 1971.

C. This account shall be debited and account 411.1, Provision for Deferred Income Taxes--Credit, Utility Operating Income, or 411.2, Provision for Deferred Income Taxes--Credit, Other Income and Deductions, as appropriate, shall be credited with an amount equal to that by which taxes on income payable for the year are greater because of the use in prior years of liberalized depreciation for income tax purposes, and deferral of taxes in such prior years as described in

paragraph B above. Such debit to this account and credit to account 411.1 or 411.2, shall, in general, represent the effect on taxes payable for the current year of the smaller amount of depreciation permitted for tax purposes for the current year with respect to any depreciable property for which liberalized depreciation including Class Life Asset Depreciation Range was used in prior years, as compared to the depreciation deduction otherwise appropriate and available for similar property of the same estimated useful life according to the straight line or other nonliberalized depreciation method ordinarily used by the utility in computing depreciation for tax purposes.

D. Records with respect to entries to this account, as described above, and the account balance, shall be so maintained as to show the factors of calculation and the separate amounts applicable to the plant additions of each vintage year for each class, group, or unit as to which different liberalized depreciation methods and estimated useful lives have been used. The underlying calculations to segregate and associate deferred tax amounts with the respective vintage years may be based on reasonable methods of approximation, if necessary, consistently applied.

E. Except for tax deferrals arising from the use of Class Life Asset Depreciation Range, the use of this account and the accounting described above are not permitted for any utility even though liberalized depreciation is used in computing taxes on income, unless prior approval of the commission is obtained. If, as authorized herein, deferred tax accounting is initiated with respect to any property, such accounting shall not be discontinued on that property without approval of the commission.

F. The utility is restricted in its use of this account to the purposes set forth above. It shall not transfer the balance in the account or any portion thereof to retained earnings or make any use thereof except as provided in the text of this account without prior approval of the commission. Any remaining deferred tax reserve balance with respect to any year's plant additions or subdivisions thereof for which liberalized depreciation accounting has been followed or, upon retirement from service of such property or predominant portion thereof, or upon expiration of the estimated useful life on which the depreciation calculations for tax purposes are based, shall be credited to account 411.1, Provision for Deferred Income Taxes--Credit, Utility Operating Income, or 411.2, Provision for Deferred Income Taxes--Credit, Other Income and Deductions, as appropriate, or otherwise applied as the commission may authorize or direct.

G. Upon the disposition by sale, exchange, transfer, abandonment or premature retirement of plant on which there is a related balance herein, this account shall be charged with an amount equal to the related income tax expense, if any, arising from such disposition and account 411.1, Provision for Deferred Income Taxes--Credit, Utility Operating Income, or 411.2, Provision for Deferred Income Taxes--Credit, Other Income and Deductions, as appropriate, shall be credited. When the remaining balance, after consideration of any related income tax expenses, is less than \$25,000, this account shall be charged and account 411.1 or 411.2, as appropriate, credited with such balance. If after consideration of any related income tax expense, there is a remaining amount of \$25,000 or more, the commission shall authorize or direct how such amount shall be accounted for at the time approval for the disposition of accounting is granted. When plant is disposed of by transfer to a wholly owned subsidiary, the related balance in this account shall also be transferred. When the disposition relates to retirement of an item or items under a group method of depreciation where there is no tax effect in the year of retirement, no entries are required in this account if it can be determined the related balances would be necessary to be retained to offset future group item tax deficiencies.

Note: If in addition to a water utility department, the utility operates another utility department or has nonutility property for which related deferred taxes on income are included in this account, such deferrals shall be classified so as to show separately amounts related to the utility operating income of each department and to other income and deductions.

283. Accumulated Deferred Income Taxes--Other

A. This account, when its use has been authorized by the commission, shall be credited and account 410.1, Provision for Deferred Income Taxes, Utility Operating Income, or 410.2, Provision for Deferred Income Taxes, Other Income and Deductions, as appropriate, shall be debited with an amount equal to that by which taxes on income payable for the year are lower because of the current use of deductions other than accelerated amortization or liberalized depreciation, in the computation of income taxes which deductions for general accounting purposes will not be fully reflected in the utility's determination of annual net income until subsequent years. However, commission approval is not required for transactions described in general instruction 561.21, subdivision (d), and in account 181, Unamortized Debt Expense. Also, without commission approval, this account and the accounting provided

herein shall be used for the deferral and amortization of the tax effects resulting from the current deduction of the cost of removal included in the Class Life Asset Depreciation Range provisions of the Revenue Act of 1971.

B. This account shall be debited and account 411.1, Provision for Deferred Income Taxes--Credit, Utility Operating Income, or 411.2, Provision for Deferred Income Taxes--Credit, Other Income and Deductions, as appropriate, shall be credited with an amount equal to that by which taxes on income payable for the year are greater because of deferral of taxes on income in previous years, as provided by paragraph A, above, because of difference in timing for tax purposes of particular income deductions from that recognized by the utility for general accounting purposes, other than with respect to accelerated amortization or liberalized depreciation. Such debit to this account and credit to account 411.1 or 411.2, shall, in general, represent the effect on taxes payable in the current year of the smaller deduction permitted for tax purposes as compared to the amount recognized in the utility's current accounts with respect to the item or class of items for which deferred tax accounting by the utility was authorized by the commission.

C. Vintage year records with respect to entries to this account, as described above, and the account balance, shall be so maintained as to show the factors of calculation with respect to each annual amount of the item or class of items for which deferred tax accounting by the utility is utilized.

D. The utility is restricted in its use of this account to the purposes set forth above. It shall not transfer the balance in the account or any portion thereof to retained earnings or to any other account or make any use thereof except as provided in the text of this account, without prior approval of the commission. Upon the disposition by sale, exchange, transfer, abandonment or premature retirement of items on which there is a related balance herein, this account shall be charged with an amount equal to the related income tax effect, if any, arising from such disposition and account 411.1, Provision for Deferred Income Taxes--Credit, Utility Operating Income, or 411.2, Provision for Deferred Income Taxes--Credit, Other Income and Deductions, shall be credited. When the remaining balance, after consideration of any related tax expenses, is less than \$25,000, this account shall be charged and account 411.1 or 411.2, as appropriate, credited with such balance. If after consideration of any related income tax expense, there is a remaining amount of \$25,000 or more, the commission shall authorize

or direct how such amount shall be accounted for at the time approval for the disposition of accounting is granted. When plant is disposed of by transfer to a wholly owned subsidiary, the related balance in this account shall also be transferred. When the disposition relates to retirement of an item or items under a group method of depreciation where there is no tax effect in the year of retirement, no entries are required in this account if it can be determined that the related balance would be necessary to be retained to offset future group item tax deficiencies.

Note: In determining appropriate use of this account as a basis of request to the commission for authorization of its use, for the deferral of taxes, consideration shall be given to the relative importance of the amount involved, and to other items in the utility's accounts where "prepaid tax accounting" may be appropriate such as situations (a) where the time of taking a deduction in computing taxes on income is such that the tax deduction must be delayed or applied to a series of future years as opposed to earlier recognition of such item in determination of income in the general accounts of the utility or (b) where inclusion of an income item is required for tax purposes but is to be recognized in whole or in part in the utility's income accounts of a subsequent year or years.

9. OPERATING RESERVES

261. Property Insurance Reserve

A. This account shall include amounts received by the utility for self-insurance against losses through accident, fire, flood, or other hazards to its own property or property leased from others. The amounts charged to account 924, Property Insurance, or other appropriate accounts to cover such risks shall be credited to this account. A schedule of risks covered by this reserve shall be maintained, giving a description of the property involved, the character of the risks covered and the rates used. (See general instruction, § 561.12.)

B. Charges shall be made to this account for losses covered by self-insurance. Details of these charges shall be maintained according to the year the casualty occurred which gave rise to the loss.

262. Injuries and Damages Reserve

A. This account shall be credited with amounts charged to account 925, Injuries and Damages, or other appropriate accounts, to meet the probable liability, not covered by insurance, for deaths or injuries to employees and others, and for damages to property neither owned nor held under lease by the utility. (See general instruction, § 561.12.)

B. When liability for any injury or damage is admitted by the utility

either voluntarily or because of the decision of a court or other lawful authority, such as a workmen's compensation board, the admitted liability shall be charged to this account and credited to the appropriate liability account. Details of these charges shall be maintained according to the year the casualty occurred which gave rise to the loss.

Note: Recoveries or reimbursements for losses charged to this account shall be credited hereto; the cost of repairs to property of others if provided for herein, shall be charged to this account.

263. Pensions and Benefits Reserve

A. This account shall include provisions made by the utility and amounts contributed by employees, for pensions, accident and death benefits, savings, relief, hospital and other provident purposes, where the funds represented by the reserve are included in the assets of the utility either in general or in segregated fund accounts. (See general instruction, §§ 561.12 and 561.17; and Operating Expense account 926, Employee Pensions and Benefits.)

B. Amounts paid by the utility for the purposes for which this reserve is established shall be charged hereto.

C. A separate account shall be kept for each kind of reserve included herein.

Note: If employee pension or benefit plan funds are not included among the assets of the utility but are held by outside trustees, payments into such funds, or accruals therefor, shall not be included in this account.

265. Miscellaneous Operating Reserves

A. This account shall include all operating reserves maintained by the utility which are not provided for elsewhere.

B. This account shall be maintained in such manner as to show the amount of each separate reserve and the nature and amounts of the debits and credits thereto.

Note: This account includes only such reserves as may be created for operating purposes and does not include any reservations of retained earnings, the credits of which should be carried in account 215, Appropriated Retained Earnings.

WATER PLANT ACCOUNTS

1. INTANGIBLE PLANT

301. Organization

302. Franchises and Consents

303. Miscellaneous Intangible Plant

2. SOURCE OF SUPPLY PLANT

- 310. Land and Land Rights
- 311. Structures and Improvements
- 312. Collecting and Impounding Reservoirs
- 313. Lake, River and Other Intakes
- 314. Wells and Springs
- 315. Infiltration Galleries and Tunnels
- 316. Supply Mains
- 317. Other Water Source Plant
- 3. PUMPING PLANT
 - 320. Land and Land Rights
 - 321. Structures and Improvements
 - 322. Boiler Plant Equipment
 - 323. Other Power Production Equipment
 - 324. Steam Pumping Equipment
 - 325. Electric Pumping Equipment
 - 326. Diesel Pumping Equipment
 - 327. Hydraulic Pumping Equipment
 - 328. Other Pumping Equipment
- 4. WATER TREATMENT PLANT
 - 330. Land and Land Rights
 - 331. Structures and Improvements
 - 332. Water Treatment Equipment
- 5. TRANSMISSION AND DISTRIBUTION PLANT
 - 340. Land and Land Rights
 - 341. Structures and Improvements
 - 342. Distribution Reservoirs and Standpipes
 - 343. Transmission and Distribution Mains
 - 344. Fire Mains
 - 345. Services
 - 346. Meters
 - 348. Hydrants
 - 349. Other Transmission and Distribution Plant
- 6. GENERAL PLANT
 - 389. Land and Land Rights
 - 390. Structures and Improvements
 - 391. Office Furniture and Equipment
 - 392. Transportation Equipment
 - 393. Stores Equipment
 - 394. Tools, Shop and Garage Equipment
 - 395. Laboratory Equipment
 - 396. Power Operated Equipment

397. Communication Equipment

398. Miscellaneous Equipment

399. Other Tangible Property

1. INTANGIBLE PLANT

301. Organization

This account shall include all fees paid to Federal or State governments for the privilege of incorporation and expenditures incident to organizing the corporation, partnership or other enterprise and putting it into readiness to do business.

ITEMS

(1) Cost of obtaining certificates authorizing an enterprise to engage in the public utility business.

(2) Fees and expenses for incorporation.

(3) Fees and expenses for mergers or consolidations.

(4) Office expenses incident to organizing the utility.

(5) Stock and minute books and corporate seal.

Note A: This account shall not include any discount upon securities issued or assumed; nor shall it include any costs incident to negotiating loans, selling bonds or other evidences of debt, or expenses in connection with the authorization, issuance and sale of capital stock.

Note B: Exclude from this account and include in the appropriate expense account the cost of preparing and filing papers in connection with the extension of the term of incorporation unless the first organization costs have been written off. When charges are made to this account for expenses incurred in mergers, consolidations or reorganizations, amounts previously included herein or in similar accounts in the books of the companies concerned shall be excluded from this account.

302. Franchises and Consents

A. This account shall include amounts paid to the Federal government, to a State or to a political subdivision thereof in consideration for franchises, consents, or certificates, running in perpetuity or for a specified term of more than one year, together with necessary and reasonable expenses incident to procuring such franchises, consents, or certificates. It shall include necessary and reasonable expenses incident to obtaining permission and approval to exercise such rights and privileges when the applications therefor are acted upon favorably by the regulatory body. Such expenses include fees for legal and other professional service, expenses of witnesses, cost of newspaper and other advertisements, etc., and pay and expenses of employees engaged in

preparing exhibits and other data for hearings. If an application for a franchise, consent, or certificate is denied, expenditures incident to the application shall be charged to account 426.5, Other Deductions or account 435, Extraordinary Deductions, as appropriate.

B. If a franchise, consent or certificate is acquired by assignment, the charge to this account in respect thereof shall not exceed the amount paid therefor by the utility to the assignor, nor shall it exceed the amount paid by the original grantee, plus the expense of acquisition to such grantee. Any excess of the amount actually paid by the utility over the amount above specified shall be charged to account 426.5, Other Deductions.

C. When any franchise has expired, the book cost thereof shall be credited hereto and charged to account 426.5, Other Deductions, or to account 111, Accumulated Provision for Amortization of Water Plant in Service, as appropriate.

D. Records supporting this account shall be kept so as to show separately the book cost of each franchise or consent.

Note: Annual or other periodic payments under franchises shall not be included herein but in the appropriate operating expense account.

303. Miscellaneous Intangible Plant

A. This account shall include the cost of patent rights, licenses, privileges and other intangible property necessary or valuable in the conduct of the utility's water operations and not specifically chargeable to any other account.

B. When any item included in this account is retired or expires, the book cost thereof shall be credited hereto and charged to account 426.5, Other Deductions, or to account 111, Accumulated Provision for Amortization of Water Plant in Service, as appropriate.

C. This account shall be maintained in such a manner that the utility can furnish full information with respect to the amounts included herein.

2. SOURCE OF SUPPLY PLANT

310. Land and Land Rights

This account shall include the cost of land and land rights used in connection with source of supply operations. (See water plant instruction ÷ 563.7.)

311. Structures and Improvements

This account shall include the cost in place of structures and improvements used in connection with source of water supply not includible in other accounts for source of supply plant. (See water plant instruction ÷ 563.8.)

312. Collecting and Impounding Reservoirs

This account shall include the cost in place of structures and improvements used for impounding, collecting and storing water in the source of supply system.

ITEMS

- (1) Aerators (when installed as a integral part of collecting and impounding reservoirs).
- (2) Bridges and culverts.
- (3) Clearing land.
- (4) Dams.
- (5) Drainage conduits.
- (6) Embankments.
- (7) Fish ladders and elevators.
- (8) Fences.
- (9) Gate houses and equipment.
- (10) Landscaping.
- (11) Lighting systems.
- (12) Retaining walls.
- (13) Roads and paths.
- (14) Sewers.
- (15) Spillways and channels.
- (16) Any other permanent improvement to collecting and impounding reservoirs.

313. Lake, River and Other Intakes

This account shall include the cost installed of lake, river and other intakes used as a source of water supply.

ITEMS

- (1) Clearing land.
- (2) Conduits.
- (3) Cribs.
- (4) Fences.
- (5) Gate houses and equipment.
- (6) Intake pipes (up to suction header).
- (7) Intake wells.
- (8) Lighting systems.
- (9) Screens and racks.

314. Wells and Springs

This account shall include the cost installed of wells and springs used as a source of water supply.

ITEMS

- (1) Clearing land.

- (2) Collecting basins.
- (3) Collecting pipes.
- (4) Fences.
- (5) Landscaping.
- (6) Lighting systems.
- (7) Overflow spillways and channels.
- (8) Sewers.
- (9) Springs and appurtenances.
- (10) Wells, casings and appurtenances, including cost of test wells and non-productive wells drilled as part of a project resulting in a source of water within the same supply area.

315. Infiltration Galleries and Tunnels

This account shall include the cost installed of infiltration galleries and tunnels used as a source of water supply.

ITEMS

- (1) Conduits.
- (2) Gate houses and equipment.
- (3) Piping.

316. Supply Mains

This account shall include the cost installed of supply mains, pipes, aqueducts and canals and their appurtenances. (See water plant instruction ò 563.14.)

ITEMS

- (1) Air chambers.
- (2) Blow-offs and overflows.
- (3) Bridges and culverts.
- (4) Canals.
- (5) Electrolysis control equipment.
- (6) Gauges and recorders.
- (7) Jointing and jointing material.
- (8) Manholes.
- (9) Meters and meter houses.
- (10) Municipal inspection or permits.
- (11) Pavement disturbed, including cutting and replacing pavement, pavement base and sidewalks. (See ò 563.10, subd. (i).)
- (12) Pipes, aqueducts or conduits.
- (13) Placing mains and accessories.
- (14) Pressure regulators.
- (15) Protection of street openings.
- (16) Shut-offs.
- (17) Special castings.

- (18) Sterilizing new mains.
- (19) Surge tanks.
- (20) Trenching, including shoring, bracing, bridging, pumping, backfill and disposal of excess excavated material.
- (21) Tunnels.
- (22) Valves and appurtenances.
- (23) Valve vaults.

317. Other Water Source Plant

This account shall include the cost installed of other water source plant which is not properly includible in other source of supply plant accounts.

Note: Office equipment, desks, chairs, etc., shall not be included herein but in account 391, Office Furniture and Equipment.

3. PUMPING PLANT

320. Land and Land Rights

This account shall include cost of land and land rights used in connection with pumping operations. (See water plant instruction 563.7.)

321. Structures and Improvements

This account shall include cost in place of structures and improvements used in pumping operations. (See water plant instruction 563.8.)

322. Boiler Plant Equipment

This account shall include the cost installed of furnaces, boilers, coal and ash handling and coal preparing equipment, steam and feed water piping, boiler apparatus and accessories used in the production of steam to be used primarily for pumping operations.

ITEMS

1. Ash handling equipment, including hoppers, gates, cars, conveyors, hoists, sluicing equipment; including pumps and motors, sluicing water pipe and fittings, sluicing trenches and accessories, etc., except sluices which are a part of a building.

2. Boiler feed system, including feed water heaters, evaporative condensers, heater drain pumps, heater drainers, deaerators and vent condensers, boiler feed pumps, surge tanks, feed water regulators, feed water measuring equipment and all associated drives.

3. Boiler plant cranes and hoists and associated drives.

4. Boilers and equipment, including boilers and baffles, economizers, superheaters, soot blowers, foundations and settings, water walls, arches, grates, insulation, blow-down system, drying out of new boilers, also associated motors or other power equipment.

5. Breeching and accessories, including breeching, dampers, soot spouts, hoppers and gates, cinder eliminators, breeching insulation, soot blowers and associated motors.

6. Coal handling and storage equipment, including coal towers, coal lorries, coal cars, locomotives and tracks when devoted principally to the transportation of coal, hoppers, downtakes, unloading and hoisting equipment, skip hoists and conveyors, weighing equipment, magnetic separators, cable ways, housings and supports for coal handling equipment.

7. Draft equipment, including air preheaters and accessories, induced and forced draft fans, air ducts, combustion control mechanisms and associated motors or other power equipment.

8. Gas burning equipment, including holders, burner equipment and piping control equipment, etc.

9. Instruments and devices, including all measuring, indicating and recording equipment for boiler plant service together with mountings and supports.

10. Lighting systems.

11. Oil burning equipment, including tanks, heaters, pumps with drive, burner equipment and piping, control equipment, etc.

12. Pulverized fuel equipment, including pulverizers, accessory motors, primary air fans, cyclones and ducts, dryers, pulverized fuel bins, pulverized fuel conveyors and equipment, burners, burner piping, priming equipment, air compressors, motors, etc.

13. Stacks, including foundations and supports, stack steel and ladders, stack brick work, stack concrete, stack lining, stack painting (first), when set on separate foundations, independent of substructure or superstructure of building.

14. Station piping, including pipe, valves, fittings, separators, traps, desuperheaters, hangers excavation, covering, etc., for station piping system, including all steam, condensate, boiler feed and water supply piping, etc.

15. Stoker or equivalent feeding equipment, including stokers and accessory motors, clinker grinders, fans and motors, etc.

16. Ventilating equipment.

17. Water purification equipment, including softeners and accessories, evaporators and accessories, heat exchangers, filters, tanks for filtered or softened water, pumps, motors, etc.

18. Water supply systems, including pumps, motors, strainers, raw water storage tanks, boiler wash pumps, intake and discharge pipes and tunnels not a part of a building.

19. Wood fuel equipment, including hoppers, fuel hogs and accessories, elevators and conveyors, bins and gates, spouts, measuring equipment and associated drives.

Note A: When the system for supplying boiler or condenser water is elaborate, as when it includes a dam, reservoir, canal, or pipe line, the cost shall not be charged to this account but to account 321, Structures and Improvements.

Note B: This account shall not include boilers or steam pipes whose primary purpose is the heating of buildings.

323. Other Power Production Equipment

A. This account shall include the cost installed of any equipment used for the production of power, other than boiler plant equipment, principally for use in pumping operations.

B. Subdivisions shall be maintained hereunder for the cost of equipment used for each type of power produced, such as hydraulic works, generators, etc.

Note: Diesel engines which drive pumps directly shall not be included in this account but in account 326, Diesel Pumping Equipment.

324. Steam Pumping Equipment

This account shall include the cost installed of pumping equipment driven by steam.

ITEMS

- (1) Engines for driving pumps.
- (2) Pumps, including setting, gearing, shafting, and belting.
- (3) Water piping within station, including valves.
- (4) Auxiliary equipment for engines and pumps such as oiling systems, cooling systems, condensers, etc.
- (5) Steam lines and valves.
- (6) Regulating, recording and measuring devices.
- (7) Foundations, frames and bed plates.
- (8) Ladders, stairs and platforms if a part of pumping unit.

325. Electric Pumping Equipment

This account shall include the cost installed of pumping equipment driven by electric power.

ITEMS

- (1) Motors for driving pumps.
- (2) Pumps, including setting, gearing, shafting, and belting.
- (3) Water piping within station, including valves.
- (4) Auxiliary equipment for motors and pumps such as oiling systems, cooling systems, condensers, etc.
- (5) Electric power lines and switching.

- (6) Regulating, recording and measuring devices.
- (7) Foundations, frames and bed plates.
- (8) Ladders, stairs and platforms if a part of pumping unit.

326. Diesel Pumping Equipment

This account shall include the cost installed of pumping equipment driven by diesel engines.

ITEMS

- (1) Engines for driving pumps.
- (2) Pumps, including setting, gearing, shafting and belting.
- (3) Water piping within station, including valves.
- (4) Auxiliary equipment for engines and pumps such as oiling systems, cooling systems, condensers, etc.
- (5) Oil supply lines and accessories.
- (6) Regulating, recording and measuring devices.
- (7) Foundations, frames and bed plates.
- (8) Ladders, stairs and platforms if a part of pumping unit.

327. Hydraulic Pumping Equipment

This account shall include the cost installed of pumping equipment driven by hydraulic power.

ITEMS

- (1) Water wheels and turbines and driving pumps.
- (2) Pumps, including setting, gearing, shafting and belting.
- (3) Water piping within station, including valves.
- (4) Auxiliary equipment for water wheels and turbines and pumps such as oiling systems, cooling systems, condensers, etc., (within walls of pumping station structure).
- (5) Regulating, recording and measuring devices.
- (6) Foundations, frames and bed plates.
- (7) Ladders, stairs and platforms if a part of pumping unit.

328. Other Pumping Equipment

This account shall include cost of equipment used in pumping operations not properly includible in accounts 324, 325, 326 and 327, such as gas engine and gasoline engine pumping equipment. Subdivisions shall be maintained hereunder for each type of pumping equipment.

Note: Office equipment, desks, chairs, etc. shall not be included in this account but in account 391, Office Furniture and Equipment.

4. WATER TREATMENT PLANT

330. Land and Land Rights

This account shall include the cost of land and land rights used in connection with water treatment plant operations. (See water plant instruction ÷ 563.7.)

331. Structures and Improvements

This account shall include the cost in place of structures and improvements used in connection with the operation of the water treatment plant. (See water plant instruction ñ 563.8.)

332. Water Treatment Equipment

This account shall include the cost installed of apparatus, equipment and other facilities used for the treatment of water.

ITEMS

Aerators (when installed as an integral of the water treatment plant):

- (1) Aircompressor.
- (2) Piping system, including valves.
- (3) Spray nozzles.
- (4) Substructures.

Chemical Treating Plant:

- (1) Agitating equipment.
- (2) Ammonia machines.
- (3) Carbonating equipment.
- (4) Chemical manufacturing plants.
- (5) Chemical pumps.
- (6) Chemical handling equipment.
- (7) Chlorine machines.
- (8) Coke.
- (9) Dry feed machines.
- (10) Dry storage bins.
- (11) Electrolytic cell.
- (12) Elevator (when not part of building.)
- (13) Fluoridation equipment.
- (14) Gauges.
- (15) Gravity feed or pump feed apparatus.
- (16) Motors.
- (17) Piping system, including valves.
- (18) Rate controllers.
- (19) Sludge pumps.
- (20) Softening equipment.
- (21) Solution feed equipment.
- (22) Solution tanks.
- (23) Switchboards.
- (24) Weighing equipment.

Clear Water Basin:

- (1) Basin.
- (2) Gauges.

- (3) Piping system, including valves.
- (4) Substructures.

Filter Plant:

- (1) Airblower and compressor.
- (2) Filters.
- (3) Gauges.
- (4) Piping system.
- (5) Rate controllers.
- (6) Sand, gravel or other filtering media.
- (7) Substructures.
- (8) Surface work equipment.
- (9) Valve control tables.
- (10) Valve operating mechanism.
- (11) Valves.
- (12) Wash troughs.
- (13) Wash water pumps.
- (14) Wash water tanks.

Mixing Chambers:

- (1) Piping system, including valves.
- (2) Chambers.
- (3) Mechanical mixers.

Sedimentation or Coagulation Basin:

- (1) Basins.
- (2) Coagulant storage tanks.
- (3) Feeder equipment.
- (4) Industrial railroad.
- (5) Mechanical mixers.
- (6) Orifice devices.
- (7) Piping system, including valves.
- (8) Screens and hoists.
- (9) Sludge removal apparatus.

Softening Plant:

- (1) Carbonating chambers and equipment.
- (2) Clear water basins.
- (3) Gauges.
- (4) Gravel.
- (5) Meters.
- (6) Mixing tanks and chambers.
- (7) Permanent chemical softening agents.
- (8) Piping system, including valves.
- (9) Salt solution or brine tanks and appurtenances.

- (10) Salt solution pumps.
- (11) Salt storage bins.
- (12) Sedimentation or coagulation basins.
- (13) Substructures.
- (14) Underdrain systems.
- (15) Wash water controllers.

Note: Protecting superstructures shall be included in account 331, Structures and Improvements.

5. TRANSMISSION AND DISTRIBUTION PLANT

340. Land and Land Rights

This account shall include the cost of land and land rights used in connection with transmission and distribution operations. (See water plant instruction ò 563.7.)

341. Structures and Improvements

This account shall include the costs in place of structures and improvements, other than reservoirs and standpipes, used in connection with transmission and distribution operations. (See water plant instruction ò 563.8.)

342. Distribution Reservoirs and Standpipes

This account shall include the cost in place of reservoirs, tanks, standpipes, and appurtenances used in storing water for distribution. (See water plant instruction ò 563.8.)

ITEMS

- (1) Aerators (when installed as an integral part of distribution reservoirs).
- (2) Bridges and culverts.
- (3) Clearing land.
- (4) Dams.
- (5) Embankments.
- (6) Fences
- (7) Foundations.
- (8) Gates and gate houses.
- (9) Landscaping.
- (10) Lighting systems.
- (11) Piping system within reservoirs.
- (12) Retaining walls.
- (13) Roads and paths.
- (14) Rust-proofing apparatus.
- (15) Sewers.
- (16) Spillways and channels.
- (17) Standpipes.

- (18) Superstructures.
- (19) Tanks.
- (20) Towers.
- (21) Valves and appurtenances.
- (22) Valve vaults and houses.
- (23) Water level and control apparatus.

343. Transmission and Distribution Mains

A. This account shall include the cost installed of transmission and distribution mains and appurtenances. (See water plant instruction ÷ 563.14.)

B. Records supporting this account shall be kept as to show separately the cost of mains of different sizes and types and of each tunnel, bridge, or river crossing.

ITEMS

- (1) Air chambers.
- (2) Blow-offs and overflows.
- (3) Bridges and culverts.
- (4) Electrolysis control equipment.
- (5) Gauges and recorders.
- (6) Jointing and jointing material.
- (7) Manholes.
- (8) Meters and appurtenances.
- (9) Municipal inspection or permits.
- (10) Pavement disturbed, including cutting and replacing pavement, pavement base and sidewalks. (See ÷ 563.10 subd. (i).)
- (11) Pipes.
- (12) Placing mains and accessories.
- (13) Pressure regulators.
- (14) Protection of street openings.
- (15) Shut-offs.
- (16) Special castings.
- (17) Sterilizing new mains.
- (18) Surge tanks.
- (19) Trenching, including shoring, bracing, bridging, pumping, backfill and disposal of excess excavated material.
- (20) Tunnels.
- (21) Valves and appurtenances.
- (22) Valve vaults.

Note: When transmission and distribution mains and associated devices are raised or lowered or other change in their location is made, the cost of the work shall be charged to the maintenance account appropriate

for the class of property which is moved. Incidental replacement of retirement units in connection with a change in location shall be accounted for as additions and retirements.

344. Fire Mains

This account shall include the cost installed of mains and appurtenances used exclusively for fire protection purposes. For items includible in this account see account 343. (See water plant instruction ÷ 563.14.)

Note: When fire mains and associated devices are raised or lowered or other change in their location is made, the cost of the work shall be charged to the maintenance account appropriate for the class of property which is moved. Incidental replacement of retirement units in connection with a change in location shall be accounted for as additions and retirements.

345. Services

A. This account shall include the cost installed of service pipes and accessories leading to the customers' premises.

B. A complete service begins with the connection on the main and extends to but does not include the connection with the customer's meter. A stub service extends from the main to the property line, or the curb stop.

C. Services which have been used but have become inactive shall be retired from utility plant in service immediately if there is no prospect for reuse, and, in any event, shall be retired by the end of the second year following that during which the service became inactive unless reused in the interim. No portion of a completed service shall be accounted for as a stub service after the use thereof has been discontinued. Utilities shall establish a routine whereby accuracy of accounting for services will be checked for the entire territory within each five-year period.

ITEMS

- (1) Corporation stops or tees.
- (2) Gate valves and boxes.
- (3) Goose necks.
- (4) Jointing and jointing material.
- (5) Municipal inspection or permits.
- (6) Pavement disturbed, including cutting and replacing pavement, pavement base and sidewalks. (See ÷ 563.10 subd. (i).)
- (7) Pipes.
- (8) Placing pipes and accessories.
- (9) Protection of street openings.

- (10) Service or curb boxes.
- (11) Service or curb stops.
- (12) Tapping main.

Note: When services are raised or lowered or other change in their location is made, the cost of the work shall be charged to account 675, Maintenance of Services.

346. Meters

A. This account shall include the cost of meters, devices and appurtenances attached thereto, for use in measuring the water delivered to users, whether actually in service or held in reserve; this account shall also include the cost of labor employed, materials used, and expenses incurred in connection with the first installation of meters, devices and appurtenances attached thereto.

B. When a meter is permanently retired from service, the amount at which it is included herein and the cost of its installation included herein shall be credited to this account and concurrently charged to the appropriate related accumulated provision for depreciation.

ITEMS

- (1) Meters, including badging and initial testing.
- (2) Meter coupling.
- (3) Installation, labor of (first installation only).
- (4) Meter bars.
- (5) Meter yokes.
- (6) Meter fittings, connections and shelves.
- (7) Meter vaults and boxes.
- (8) Stops.

Note A: This account shall not include meters for recording the output of a supply or treatment plant, or those located on mains. It includes only those meters to record water delivered to customers, including company use and for those used elsewhere in the system if a type available for general use.

Note B: The cost of removing and resetting meters shall be charged to account 663, Meter Expenses, to which account shall be credited the salvage recovered from minor items when a meter is removed from service but not permanently retired.

Note C: The utility shall maintain a statistical record to show separately the number of each type and size of meter or group of types and sizes as carried in the continuing property record. Underlying records shall be kept so that the utility can determine readily for each such classification the number of company-owned meters in service (subdivided between active and inactive) and the number of meters

carried herein but not in service, the latter to include meters undergoing repairs; and the number of meters in service owned by customers.

Note D: Minor items shall be included in this account only when in service or associated with a unit of property held in reserve; otherwise they shall be carried in account 150.154, Plant Materials and Operating Supplies.

Note E: Charges made to customers for connection, disconnection or reconnection of meters shall be credited to account 471, Miscellaneous Service Revenues.

348. Hydrants

A. This account shall include the cost installed of hydrants in service owned by the utility.

B. Records shall be kept so as to show number, size (nominal diameter of bottom connection), number and size of hose connections, diameter of main to which attached and type of hydrants classified as to public use and private use.

ITEMS

- (1) Connection to main.
- (2) Excavation, backfill, and disposal of excess excavated material.
- (3) Hydrants and fittings, including barrel and shoe.
- (4) Manholes.
- (5) Pavement disturbed, including cutting and replacing pavement, pavement base and sidewalks. (See § 563.10 subd. (i).)
- (6) Pipe including leads and drains.
- (7) Tee at main.
- (8) Valves and valve boxes.

349. Other Transmission and Distribution Plant

This account shall include the cost installed of all other transmission and distribution system plant not provided for in the foregoing accounts.

ITEMS

- (1) Cisterns or basins.
- (2) Connections to main.
- (3) Excavation, backfill, and disposal of excess excavated material.
- (4) Fountains, basins, troughs, pools, etc.
- (5) Pavement disturbed, cutting and replacing pavement, pavement base and sidewalks. (See § 563.10 subd. (i).)
- (6) Piping.
- (7) Valves and valve boxes.

Note: Office equipment, desks, chairs, etc. shall not be included in

this account but in account 391, Office Furniture and Equipment.

6. GENERAL PLANT

389. Land and Land Rights

This account shall include the cost of land and land rights used for water plant purposes, the cost of which is not properly includible in other land and land rights accounts. (See water plant instruction ÷ 563.7)

390. Structures and Improvements

This account shall include the cost in place of structures and improvements used for water plant purposes, the cost of which is not properly includible in other structures and improvements accounts. (See water plant instruction ÷ 563.8.)

391. Office Furniture and Equipment

A. This account shall include the cost installed of all office furniture and equipment owned by the utility and devoted to water service, and not permanently attached to buildings. Articles of slight value or short service life acquired subsequent to the commencement of operations shall be charged to the appropriate operating expense account and not to this account. (See note to water plant instruction ÷ 563.3, subd. (a)(3).)

B. If the utility has equipment includible in this account at more than one location, separate records shall be maintained for each location.

ITEMS

- (1) Book cases and shelves.
- (2) Desks, chairs, and desk equipment.
- (3) Drafting room equipment.
- (4) Electronic data processing equipment.
- (5) Filing, storage, and other cabinets.
- (6) Floor covering.
- (7) Library and library equipment.
- (8) Mechanical office equipment such as accounting machines, typewriters, etc.
- (9) Safes.
- (10) Signs, display and advertising.
- (11) Tables.

392. Transportation Equipment

This account shall include the cost of transportation vehicles used for utility purposes.

ITEMS

- (1) Airplains*.

* So in original. "Airplains" should be "Airplanes".

- (2) Automobiles.
- (3) Bicycles.
- (4) Electrical vehicles.
- (5) Motor trucks.
- (6) Motorcycles.
- (7) Repair cars or trucks.
- (8) Tractors and trailers.
- (9) Other transportation vehicles.

Note: Compressors, hoists, concrete mixers, etc., so mounted on a vehicle that they can be removed readily, thereby making the vehicle available for transportation of other material or equipment, shall be included in account 394, Tools, Shop and Garage Equipment, and the vehicle shall be included in this account; minor incidental equipment, such as pumps for drying manholes or tool racks and boxes which interfere little with the use of the vehicle for other transportation, shall, together with the vehicle, be included in this account.

393. Stores Equipment

A. This account shall include the cost installed of equipment used for the receiving, shipping, handling, and storage of materials and supplies when not an integral part of the housing structure. (See note to water plant instruction 563.3(a)(3).)

B. If the utility has equipment includible in this account at more than one location, separate records shall be maintained for each location.

ITEMS

- (1) Chain falls.
- (2) Counters.
- (3) Cranes (portable).
- (4) Elevating and stacking equipment (portable).
- (5) Hoists.
- (6) Lockers.
- (7) Scales.
- (8) Shelving.
- (9) Storage bins.
- (10) Trucks, hand and power driven.
- (11) Wheelbarrows.

394. Tools, Shop and Garage Equipment

A. This account shall include the cost of tools, implements, and equipment used in construction, repair work, general shops and garages and not specifically provided for or includible in other accounts. (See

note to water plant instruction ÷ 563.3 (a)(3.)

B. If the utility has equipment includible in this account at more than one location, separate records shall be maintained for each location.

C. The records shall be maintained in such manner as to show the items of garage equipment in a separate subdivision of this account.

ITEMS

- (1) Air compressors.
- (2) Anvils.
- (3) Automobile repair shop equipment.
- (4) Battery charging equipment.
- (5) Belts, shafts and countershafts.
- (6) Boilers.
- (7) Cable pulling equipment.
- (8) Concrete mixers.
- (9) Drill presses.
- (10) Derricks.
- (11) Electric equipment.
- (12) Engines.
- (13) Forges.
- (14) Furnaces.
- (15) Foundations and setting specially constructed for and not expected to outlast the equipment of which provided.
- (16) Gas producers.
- (17) Gasoline pumps, oil pumps and storage tanks.
- (18) Greasing tools and equipment.
- (19) Hoists.
- (20) Ladders.
- (21) Lathes.
- (22) Machine tools.
- (23) Motor driven tools.
- (24) Motors.
- (25) Pipe threading and cutting tools.
- (26) Pneumatic tools.
- (27) Pumps.
- (28) Riveters.
- (29) Smithing equipment.
- (30) Tool racks.
- (31) Vises.
- (32) Welding apparatus.
- (33) Work benches.

Note: Office equipment, desks, chairs, etc. shall not be included herein but in account 391, Office Furniture and Equipment.

395. Laboratory Equipment

A. This account shall include the cost installed of laboratory equipment used for general laboratory purposes and not specifically provided for or includible in other departmental or functional plant accounts. (See note to water plant instruction 563.3(a) (3).)

B. If the utility has equipment includible in this account at more than one location, separate records shall be maintained for each location.

ITEMS

- (1) Autoclaves.
- (2) Barometers.
- (3) Cameras.
- (4) Centrifuge.
- (5) Distilling apparatus.
- (6) Furnaces.
- (7) Microscopes.
- (8) Ovens.
- (9) Pitometers.
- (10) Rain gauges.
- (11) Refrigerators.
- (12) Scales.
- (13) Sterilizers.
- (14) Stop watches.
- (15) Testing machines.
- (16) Thermometers.
- (17) Voltmeters.
- (18) Other bacteriological, electric, chemical, hydraulic or research equipment.

Note: Office equipment, desks, chairs, etc., shall not be included herein but in account 391, Office Furniture and Equipment.

396. Power Operated Equipment

This account shall include the cost of power operated equipment used in construction or repair work exclusive of equipment includible in other accounts. Include also, the tools and accessories acquired for use with such equipment and the vehicle on which such equipment is mounted.

ITEMS

- (1) Air compressors, including driving unit and vehicle.
- (2) Back filing* machines.

* So in original. "filing" should be "filling".

- (3) Boring machines.
- (4) Bulldozers.
- (5) Cranes and hoists.
- (6) Diggers.
- (7) Engines.
- (8) Pile drivers.
- (9) Pipe cleaning machines.
- (10) Pipe coating or wrapping machines.
- (11) Tractors--crawler type.
- (12) Trenches.
- (13) Other power operated equipment.

Note: It is intended that this account only include such large units as are generally self-propelled or mounted on moveable equipment.

397. Communication Equipment

This account shall include the cost installed of telephone, telegraph and wireless equipment for general use in connections* with the utility's water operations.

* So in original. "connections" should be "connection".

ITEMS

- (1) Antennae.
- (2) Booths.
- (3) Cables.
- (4) Distribution boards.
- (5) Extension cords.
- (6) Gongs.
- (7) Handsets, manual and dial.
- (8) Insulators.
- (9) Intercommunicating sets.
- (10) Loading coils.
- (11) Operators* desks.

* So in original. Apstrophe inadvertently omitted.

- (12) Poles and fixtures used wholly for telephone and telegraph wires.
- (13) Radio transmitting and receiving sets.
- (14) Remote control equipment and lines.
- (15) Sending keys.
- (16) Storage batteries.
- (17) Switchboards.
- (18) Telautograph circuit connections.
- (19) Telegraph receiving sets.
- (20) Telephone and telegraph circuits.
- (21) Testing instruments.

(22) Towers.

(23) Underground conduit used wholly for telephone or telegraph wires and cable wires.

398. Miscellaneous Equipment

This account shall include the cost of equipment, apparatus, etc., used and useful in water operations, which is not includible in any other account. (See note to water plant instruction ÷ 563.3(a) (3).)

ITEMS

(1) Hospital and infirmary equipment.

(2) Kitchen equipment.

(3) Recreation equipment.

(4) Radios.

(5) Restaurant equipment.

(6) Soda fountains.

(7) Operator's cottage furnishings.

(8) Other miscellaneous equipment.

399. Other Tangible Property

A. This account shall include the cost of tangible water plant not provided for elsewhere.

B. A separate subdivision of this account shall be maintained for each class of property in which the utility has a relatively large investment, and records shall be kept so as to show separately the cost of each major item.

Net Income

1. UTILITY OPERATING INCOME

400. Operating Revenues

There shall be shown under this caption the total amount included in the water operating revenue accounts provided herein.

401. Operation Expense

There shall be shown under this caption the total amount included in the water operation expense accounts provided herein.

402. Maintenance Expense

There shall be shown under this caption the total amount included in the water maintenance expense accounts provided herein.

403. Depreciation Expense

A. This account shall include the amount of depreciation expense for all classes of depreciable water plant in service and on the portion of depreciable common utility plant in service applicable to water operations, except such depreciation expense as is chargeable to account 416, Costs and Expenses of Merchandising, Jobbing and Contract Work, and to clearing accounts.

B. The utility shall keep such records of property and property retirements as will reflect the service life of property which has been retired and aid in estimating probable service life by mortality, turnover, or other appropriate methods; and also such records as will reflect the percentage of salvage and cost of removal for property retired from each account, or subdivision thereof, for depreciable utility plant.

Note A: Depreciation expense applicable to property included in account 104, Water Plant Leased to Others, shall be charged to account 413, Expenses of Water Plant Leased to Others.

Note B: Depreciation expense applicable to transportation equipment, shop equipment, tools, work equipment and power operated equipment and other general equipment may be charged to clearing accounts as necessary in order to obtain a proper distribution of expenses between construction and operation.

404. Amortization of Limited-term Water Plant

This account shall include amortization charges applicable to amounts included in the water plant accounts for limited-term franchises, licenses, patent rights, limited-term interests in land, and expenditures on leased property where the service life of the improvements is terminable by action of the lease. The charges to this account shall be such as to distribute the book cost of each investment as evenly as may be over the period of its benefit to the utility. (See account 111, Accumulated Provision for Amortization of Water Plant in Service.)

405. Amortization of Other Water Plant

A. When authorized by the commission, this account shall include charges for amortization of intangible or other utility plant in service which does not have a definite or terminable life and which is not subject to charges for depreciation expense.

B. This account shall be supported in such detail as to show the amortization applicable to each investment being amortized, together with the book cost of the investment and the period over which it is being written off.

406. Amortization of Water Plant Acquisition Adjustments

This account shall be debited or credited, as the case may be, with amounts includible in operating expenses, pursuant to approval or order of the commission, for the purpose of providing for the extinguishment of the amounts in account 114, Water Plant Acquisition Adjustments, and in the appropriate subdivision of account 118.1, Common Utility Plant. (See balance sheet account 114, Water Plant Acquisition Adjustments, paragraph C.)

407. Amortization of Property Losses

This account shall be charged with amounts credited to account 182, Extraordinary Property Losses, when the commission has authorized the amount in the latter account to be amortized by charges to water operating expenses.

Special Instructions Accounts 408.1 and 408.2

A. These accounts shall include the amounts of ad valorem, gross revenue and gross receipts taxes, State unemployment insurance, franchise taxes, Federal excise taxes, social security taxes, and all other taxes assessed by Federal, State, county, municipal, or other local governmental authorities, except Federal income taxes.

B. These accounts shall be charged in each accounting period with the amounts of taxes which are applicable thereto, with concurrent credits

to account 236, Taxes Accrued, or account 165, Prepayments, as appropriate. When it is not possible to determine the exact amounts of taxes, the amounts shall be estimated and adjustments made in current accruals as the actual tax levies become known.

C. The charges to these accounts shall be made or supported so as to show the amount of each tax and the basis upon which each charge is made. In the case of a utility rendering a number of utility services, taxes includible in these accounts shall be assigned directly to the utility department the operation of which gave rise to the tax insofar as practicable. Where the tax is not attributable to a specific utility department, it shall be distributed among the utility departments or nonutility operations on an equitable basis, after appropriate study to determine such basis.

Note A: Special assessments for street and similar improvements shall be included in the appropriate utility plant or non utility property account.

Note B: Taxes specifically applicable to construction shall be included in the cost of construction.

Note C: Gasoline and other sales taxes shall be charged as far as practicable to the same account as the materials on which the tax is levied.

Note D: Social security and other forms of so-called payroll taxes shall be distributed to utility departments and to nonutility functions on a basis related to payroll. Amounts applicable to construction shall be charged to the appropriate plant account.

Note E: Interest on tax refunds or deficiencies shall not be included in this account but in account 419, Interest and Dividend Income or 431, Other Interest Expense, as appropriate.

Note F: Taxes assumed by the utility on property leased from others for use in utility operations shall be charged to the appropriate rent expense or clearing account.

Note G: Taxes characterized as franchise taxes levied by taxing authorities against the utility for the privilege of exercising its corporate franchise or carrying on its business in such corporate or organized capacity shall be included in this account.

Note H: Amounts payable annually or more frequently under the terms of franchises, shall be included in account 927, Franchise Requirements.

Note I: Taxes assumed by the utility on interest paid to holders of utility's bonds or other indebtedness in respect to income and other taxes levied against such income of security holders, shall be charged to account 431, Other Interest Expense.

408.1 Taxes Other Than Income Taxes, Utility Operating Income

This account shall include those taxes other than income taxes which relate to utility operating income. This account shall be maintained so as to allow ready identification of the various classes of taxes relating to Utility Operating Income (by department), Water Plant Leased to Others and Other Utility Operating Income.

408.2 Taxes Other Than Income Taxes, Other Income and Deductions

This account shall include taxes other than income taxes which relate to Other Income and Deductions.

Special Instructions

Accounts 409.1, 409.2 and 409.3

A. These accounts shall include the amounts of Federal income taxes on income properly accruable during the period covered by the income statement to meet the actual liability for such taxes. Concurrent credits for the tax accruals shall be made to account 236, Taxes Accrued, and as the exact amounts of taxes become known, the current tax accruals shall be adjusted by charges or credits to these accounts, unless such adjustments are properly includible in account 439, Adjustments to Retained Earnings, so that these accounts as nearly as can be ascertained shall include the actual taxes payable by the utility. (See general instruction 561.8 for prior period adjustments.)

B. The accruals for income taxes shall be apportioned among utility departments and to Other Income and Deductions so that, as nearly as practicable, each tax shall be included in the expenses of the utility department or Other Income and Deductions, the income from which gave rise to the tax. The income tax effect of amounts recorded in account 439, Adjustments to Retained Earnings shall be recorded in that account. The tax effects relating to Interest Charges shall be allocated between utility and nonutility operations. The basis for this allocation shall be the ratio of net investment in utility plant (including amounts in account 106, Completed Construction not Classified--Water and account 107, Construction Work in Progress--Water) to net investment in nonutility plant.

Note A: Taxes assumed by the utility on interest shall be charged to account 431, Other Interest Expense.

Note B: Interest on tax refunds or deficiencies shall not be included in this account but in account 419, Interest and Dividend Income, or account 431, Other Interest Expense, as appropriate.

409.1 Income Taxes, Utility Operating Income

This account shall include the amount of Federal income taxes which relate to utility operating income. This account shall be maintained so

as to allow ready identification of tax effects (both positive and negative) relating to Utility Operating Income (by department), Water Plant Leased to Others and Other Utility Operating Income.

409.2 Income Taxes, Other Income and Deductions

This account shall include the amount of Federal income taxes (both positive and negative) which relate to Other Income and Deductions.

409.3 Income Taxes, Extraordinary Items

This account shall include the amount of Federal income taxes (both positive and negative) which relate to Extraordinary Items.

Special Instructions

Accounts 410.1, 410.2, 411.1 and 411.2

A. Accounts 410.1 and 410.2 shall be debited, and Accumulated Deferred Income Taxes shall be credited, with amounts equal to any current deferrals of taxes on income or any allocations of deferred taxes originating in prior periods, as provided by the texts of accounts 190, 281, 282 and 283. There shall not be netted against entries required to be made to these accounts any credit amounts appropriately includible in account 411.1 or 411.2.

B. Accounts 411.1 and 411.2 shall be credited, and Accumulated Deferred Income Taxes shall be debited with amounts equal to any allocations of deferred taxes originating in prior periods or any current deferrals of taxes on income, as provided by the texts of accounts 190, 281, 282 and 283. There shall not be netted against entries required to be made to these accounts any debit amounts appropriately includible in account 410.1 or 410.2.

410.1 Provision for Deferred Income Taxes, Utility Operating Income

This account shall include the amounts of those deferrals of taxes and allocations of deferred taxes, which relate to Utility Operating Income (by department).

410.2 Provision for Deferred Income Taxes, Other Income and Deductions

This account shall include the amounts of those deferrals of taxes and allocations of deferred taxes, which relate to Other Income and Deductions.

411.1 Provision for Deferred Income Taxes--Credit, Utility Operating Income

This account shall include the amounts of those allocations of deferred taxes and deferrals of taxes, credit, which relate to Utility Operating Income (by department).

411.2 Provision for Deferred Income Taxes--Credit, Other Income and Deductions

This account shall include the amounts of those allocations of

deferred taxes and deferrals of taxes, credit, which relate to Other Income and Deductions.

Special Instructions
Accounts 411.4 and 411.5

A. These accounts shall be debited and account 255, Accumulated Deferred Investment Tax Credits shall be credited with the total amount of investment tax credits allowed on property defined in section 50 of the Internal Revenue Code of 1954 which the utility used in the calculation of reported current year's income taxes charged to accounts 409.1, Income Taxes, Utility Operating Income, and 409.2, Income Taxes, Other Income and Deductions, as appropriate, when the utility elects to defer such credits.

B. Account 411.4 shall be debited and account 420, Investment Tax Credits shall be credited with one-half (or such other portion as determined by the commission in the utility's most recent rate case) of the total amount of investment tax credits allowed on property defined in section 50 of the Internal Revenue Code of 1954 which the utility used in the calculation of reported current year's income taxes charged to account 409.1, Income Taxes, Utility Operating Income, when the utility's accounting does not provide for the deferral of such tax credits, and all benefits of the tax credits are to be recognized in the current income statement as realized.

C. When a utility has deferred investment tax credits and when such credits are to be applied as a reduction of the cost of service, account 411.4 shall be credited and account 255 shall be debited with a proportionate amount of such credits determined in relation to the book service life of the property to which they relate. If, however, the deferred tax credits are applied as a reduction of the rate base, account 420, Investment Tax Credits, shall be used in a similar manner. Deferred investment tax credits related to nonutility property shall be amortized by crediting account 411.5 and debiting account 255 with a proportionate amount as determined above.

411.4 Investment Tax Credit Adjustments, Utility Operations

This account shall include the amount of those investment tax credit adjustments related to property used in Utility Operations (by department).

411.5 Investment Tax Credit Adjustments, Nonutility Operations

This account shall include the amount of those investment tax credit adjustments related to property used in Nonutility Operations.

411.8 Miscellaneous Adjustments of Income Taxes--Utility Operating Income

A. This account shall be debited or credited, as appropriate, with an amount equal to that by which taxes payable on utility operating income for the year are either reduced or increased because of the inclusion of a loss or gain in account 117, Accumulated Gains and Losses from Disposition of Utility Land and Land Rights, in the computation of Federal income tax for the current year.

B. This account shall include adjustments of prior years Federal income tax related to utility operations. (See § 561.8.) This account shall also be used for other tax adjustments which the commission may authorize or direct to be recorded herein.

412. Revenues from Water Plant Leased to Others

413. Expenses of Water Plant Leased to Others

A. These accounts shall include respectively, revenues from water property constituting a distinct operating unit or system leased by the utility to others, and which property is properly includible in account 104, Water Plant Leased to Others, and the expenses attributable to such property.

B. The detail of expenses shall be kept or supported so as to show separately the following:

Operation

Maintenance

Depreciation

Amortization

Note: Related taxes shall be recorded in account 408.1, Taxes Other Than Income Taxes, Utility Operating Income, or account 409.1, Income Taxes, Utility Operating Income, as appropriate.

414. Other Utility Operating Income

A. This account shall include the revenues received and expenses incurred in connection with the operations of utility plant, the book cost of which is included in account 118.2, Other Utility Plant.

B. The expenses shall include every element of cost incurred in such operations, including depreciation, rents and insurance.

Note: Related taxes shall be recorded in account 408.1, Taxes Other Than Income Taxes, Utility Operating Income, or account 409.1, Income Taxes, Utility Operating Income, as appropriate.

2. OTHER INCOME AND DEDUCTIONS

A. Other Income

415. Revenues from Merchandising, Jobbing and Contract Work

416. Costs and Expenses of Merchandising, Jobbing and Contract Work

A. These accounts shall include, respectively, all revenues derived from the sale of merchandise and jobbing or contract work, including any

profit or commission accruing to the utility on jobbing work performed by it as agent under contracts whereby it does jobbing work for another for a stipulated profit or commission and all expenses incurred in such activities.

B. Records in support of these accounts shall be so kept as to permit ready summarization of revenues, costs and expenses by such major items as are feasible.

ITEMS

Account 415:

- (1) Charges for installing meters owned by customers.
- (2) Charges for tapping mains and installing services when not includible in account 345, Services.
- (3) Revenues from sales of meters to customers or others for installation of* customers' premises.

* So in original. "of" should be "on".

(4) Revenues from sale of water appliances and from piping and other jobbing or contract work.

(5) Discounts and allowances made in settlement of bills for merchandise and jobbing work.

Account 416:

Labor:

(1) Canvassing and demonstrating appliances in homes and other places for the purpose of selling appliances.

(2) Demonstrating and selling activities in sales rooms.

(3) Installing appliances on customer premises where such work is done only for purchasers of appliances from the utility.

(4) Installing wiring, pipe, or other property work on a jobbing or contract basis.

(5) Preparing advertising materials for appliance sales purposes.

(6) Receiving and handling customer orders for merchandise or for jobbing services.

(7) Cleaning and tidying sales rooms.

(8) Maintaining display counters and other equipment used in merchandising.

(9) Arranging merchandise in sales rooms and decorating display windows.

(10) Reconditioning repossessed appliances.

(11) Bookkeeping and other clerical work in connection with merchandise and jobbing activities.

(12) Supervising merchandise and jobbing operations.

Materials and Expenses:

- (13) Advertising in newspapers, periodicals, radio, television, etc.
- (14) Cost of merchandise sold and of materials used in jobbing work.
- (15) Stores expenses on merchandise and jobbing stock.
- (16) Fees and expenses of advertising and commercial artists' agencies.
- (17) Printing booklets, dodgers, and other advertising data.
- (18) Premiums given as inducement to buy appliances.
- (19) Light, heat, and power.
- (20) Depreciation of equipment used primarily for merchandise and jobbing operations.
- (21) Rent of sales rooms or of equipment.
- (22) Transportation expense in delivery and pick-up of appliances by utility's facilities or by others.
- (23) Stationery and office supplies and expenses.
- (24) Losses from uncollectible merchandise and jobbing accounts.

Note: Related taxes shall be recorded in account 408.2, Taxes Other Than Income Taxes, Other Income and Deductions, or account 409.2, Income Taxes, Other Income and Deductions, as appropriate.

417. Revenues from Nonutility Operations

417.1 Expenses of Nonutility Operations

A. These accounts shall include revenues and expenses applicable to operations which are nonutility in character but nevertheless constitute a distinct operating activity of the enterprise as a whole, such as the operation of an ice department or a servicing organization for furnishing supervision, management, engineering, and similar services to others.

B. The expenses shall include all elements of costs incurred in such operations, and the accounts shall be maintained so as to permit ready summarization as follows:

- Operation
- Maintenance
- Rents
- Depreciation
- Amortization

Note: Related taxes shall be recorded in account 408.2, Taxes Other Than Income Taxes, Other Income and Deductions, or account 409.2, Income Taxes, Other Income and Deductions, as appropriate.

418. Nonoperating Rental Income

A. This account shall include all rent revenues and related expenses of land, buildings, or other property included in account 121, Nonutility Property, which is not used in operations covered by accounts

417, or 417.1.

B. The expenses shall include all elements of costs incurred in the ownership and rental of the property and the accounts shall be maintained so as to permit ready summarization as follows:

- Operation
- Maintenance
- Depreciation
- Rents
- Amortization

Note: Related taxes shall be recorded in account 408.2, Taxes Other Than Income Taxes, Other Income and Deductions, or account 409.2, Income Taxes, Other Income and Deductions, as appropriate.

419. Interest and Dividend Income

A. This account shall include interest revenues on securities, loans, notes, advances, special deposits, tax refunds and all other interest-bearing assets, and dividends on stocks of other companies, whether the securities on which the interest and dividends are received are carried as investments or included in sinking or other special fund accounts.

B. If any interest or dividends are required to be retained in a special fund and the fund is represented by a reserve, the amount of such accretion to the fund shall concurrently be credited to the appropriate reserve account and charged to account 436, Appropriations of Retained Earnings.

C. This account may include the pro rata amount necessary to extinguish (during the interval between the date of acquisition and the date of maturity) the difference between the cost to the utility and the face value of interest-bearing securities. Amounts thus credited or charged shall be concurrently included in the accounts in which the securities are carried.

D. Where significant in amount, all expenses excluding operating taxes and income taxes applicable to security investments and to interest and dividend revenues thereon shall be charged hereto.

Note A: Interest accrued, the payment of which is not reasonably assured, dividends receivable which have not been declared or guaranteed, and interest or dividends upon reacquired securities issued or assumed by the utility shall not be credited to this account.

Note B: Related taxes shall be recorded in account 408.2, Taxes Other Than Income Taxes, Other Income and Deductions, or account 409.2, Income Taxes, Other Income and Deductions, as appropriate.

419.1 Allowance for Funds Used During Construction

This account shall include concurrent credits for allowance for funds used during construction based upon the net cost for the period of construction of borrowed funds used for construction purposes and a reasonable rate upon the utility's own funds when so used. (See Water Plant Instruction 563.3 (a), (17).)

420. Investment Tax Credits

A. This account shall be credited with investment tax credit amounts determined in accordance with the following:

1. By amounts equal to the authorized debits to account 411.4, Investment Tax Credit Adjustments, Utility Operations, for investment tax credits used in calculating income taxes for the current year when the utility's accounting does not provide for the deferral of such credits.

2. By amounts equal to the debits to account 255, Accumulated Deferred Investment Tax Credits, for the amortization of the deferred tax credits over the book service life of the property to which the tax credits relate when such credits are to be applied as a reduction of the rate base.

421. Miscellaneous Nonoperating Income

This account shall include all revenue and expense items, except taxes, properly includible in the income account and not provided for elsewhere. Related taxes shall be recorded in account 408.2, Taxes Other Than Income Taxes, Other Income and Deductions, or account 409.2, Income Taxes, Other Income and Deductions, as appropriate.

ITEMS

(1) Fees collected in connection with the exchange of coupon bonds for registered bonds.

(2) Gain on disposition of investments and reacquisition and resale or retirement of utility's debt securities and investments.

(3) Profit on sale of timber or other natural resources. (See water plant instruction § 563.7(c).)

(4) Profits from operations of others realized by the utility under contracts.

421.1 Gain on Disposition of Property

This account shall be credited with the gain on the sale, conveyance, exchange or transfer of utility or other property to another. Amounts relating to gains on land and land rights held for future use recorded in account 105, Water Plant Held for Future Use will be accounted for as prescribed in paragraphs B, C, and D thereof. (See water plant instructions 563.5 subd. (f), 563.7, subd. (e) and 563.10, subd. (e).)

Income taxes on gains recorded in this account shall be recorded in

account 409.2, Income Taxes, Other Income and Deductions.

B. Other Income Deductions

421.2 Loss on Disposition of Property

This account shall be charged with loss on the sale, conveyance, exchange, or transfer of utility or other property to another. Amounts relating to losses on land and land rights held for future use recorded in account 105, Water Plant Held for Future Use, will be accounted for as prescribed in paragraphs B, C, and D thereof. (See water plant instructions 563.5 subd. (f), 563.7 subd. (e) and 563.10 subd. (e).)

The reduction in income taxes attributable to losses recorded in this account shall be recorded in account 409.2, Income Taxes, Other Income and Deductions.

425. Miscellaneous Amortization

This account shall include amortization charges not includible in other accounts which are properly deductible in determining the income of the utility before interest charges. Charges includible herein, if significant in amount, must be in accordance with an orderly and systematic amortization program.

ITEMS

(1) Amortization of utility plant acquisition adjustments, or of intangibles included in utility plant in service when not authorized to be included in utility operating expenses by the commission. (See account 114, Water Plant Acquisition Adjustments.)

(2) Amortization of amounts in account 182, Extraordinary Property Losses, when not authorized to be included in utility operating expenses by the commission.

(3) Amortization of capital stock expenses when in accordance with a systematic program.

426. Miscellaneous Income Deductions

This account shall include miscellaneous expense items which are nonoperating in nature but which are properly deductible before determining total income before interest charges. The account shall be maintained according to subaccounts shown below:

426.1 Donations

This account shall include all payments or donations for charitable, social or community welfare purposes.

426.2 Life Insurance

This account shall include all payments for life insurance of officers and employees where company is beneficiary (net premiums less increase in cash surrender value of policies). (See account 926.2, Employee Welfare Expenses--note A.)

426.3 Penalties

This account shall include payments by the company for penalties or fines for violation of any regulatory statutes by the company or its officials.

426.4 Expenditures for Certain Civic, Political and Related Activities

This account shall include expenditures for the purpose of influencing public opinion with respect to the election or appointment of public officials, referenda, legislation, or ordinances (either with respect to the possible adoption of new referenda, legislation or ordinances or repeal or modification of existing referenda, legislation or ordinances) or approval, modification or revocation of franchises; or for the purpose of influencing the decisions of public officials, but shall not include such expenditures which are directly related to appearances before regulatory or other governmental bodies in connection with the reporting utility's existing or proposed operations.

426.5 Other Deductions

This account shall include other miscellaneous expenses which are nonoperating in nature, but which are properly deductible before determining total income before interest charges.

ITEMS

- (1) Loss relating to investments in securities written-off or written-down.
- (2) Loss on sale of investments.
- (3) Loss on reacquisition, resale or retirement of utility's debt securities.
- (4) Preliminary survey and investigation expenses related to abandoned projects, when not written-off to the appropriate operating expense account.

3. INTEREST CHARGES

427. Interest on Long-term Debt

A. This account shall include the amount of interest on outstanding long-term debt issued or assumed by the utility, the liability for which is included in account 221, Bonds, or account 224, Other Long-term Debt.

B. This account shall be so kept or supported as to show the interest accruals on each class and series of long-term debt.

Note: This account shall not include interest on nominally issued or nominally outstanding long-term debt, including securities assumed.

428. Amortization of Debt Discount and Expense

A. This account shall include the amortization of unamortized debt discount and expense on outstanding long-term debt. Amounts charged to this account shall be credited concurrently to accounts 181, Unamortized

Debt Expense, and 226, Unamortized Discount on Long-term Debt- Debit.

B. This account shall be so kept or supported as to show the debt discount and expense on each class and series of long-term debt.

429. Amortization of Premium on Debt--Credit

A. This account shall include the amortization of unamortized net premium on outstanding long-term debt. Amounts credited to this account shall be charged concurrently to account 225, Unamortized Premium on Long-term Debt.

B. This account shall be so kept or supported as to show the premium on each class and series of long-term debt.

430. Interest on Debt to Associated Companies

A. This account shall include the interest accrued on amounts included in account 223, Advances from Associated Companies, and on all other obligations to associated companies.

B. The records supporting the entries to this account shall be so kept as to show to whom the interest is to be paid, the period covered by the accrual, the rate of interest and the principal amount of the advances or other obligations on which the interest is accrued.

431. Other Interest Expense

This account shall include all interest charges not provided for elsewhere.

ITEMS

(1) Interest on notes payable on demand or maturing one year or less from date and on open accounts, except notes and accounts with associated companies.

(2) Interest on customers' deposits.

(3) Interest on claims and judgments, tax assessments, and assessments for public improvements past due.

(4) Income and other taxes levied upon bondholders of utility and assumed by it.

4. EXTRAORDINARY ITEMS

434. Extraordinary Income

This account shall be credited with nontypical, noncustomary, infrequently recurring gains, which would significantly distort the current year's income computed before extraordinary items, if reported other than as extraordinary items. Income tax relating to the amounts recorded in this account shall be recorded in account 409.3, Income Taxes, Extraordinary Items. (See general instruction 561.7.)

435. Extraordinary Deductions

This account shall be debited with nontypical, noncustomary, infrequently recurring losses, which would significantly distort the

current year's income computed before extraordinary items, if reported other than as extraordinary items. Income tax relating to the amounts recorded in this account shall be recorded in account 409.3, Income Taxes, Extraordinary Items. (See general instruction 561.7.)

RETAINED EARNINGS ACCOUNTS

- 433. Balance Transferred from Income
- 436. Appropriations of Retained Earnings
- 437. Dividends Declared--Preferred Stock
- 438. Dividends Declared--Common Stock
- 439. Adjustments to Retained Earnings

This group of accounts (433 and 436 to 439) in combination, is designed to show the net changes in account 216, Unappropriated Retained Earnings, during the accounting period. (See unappropriated retained earnings, instruction 564.1.)

- 433. Balance Transferred from Income

This account shall include the net credit or debit transferred from income for the year.

- 436. Appropriations of Retained Earnings

This account shall include appropriations of retained earnings.

ITEMS

(1) Appropriations required under terms of mortgages, orders of courts, contracts, or other agreements.

(2) Appropriations required by action of regulatory authorities.

(3) Other appropriations made at option of utility for specific purposes.

- 437. Dividends Declared--Preferred Stock

- 438. Dividends Declared--Common Stock

A. These accounts shall include amounts declared payable out of retained earnings as dividends on actually outstanding capital stock issued by the utility.

B. Dividends shall be segregated for each class and series of capital stock as to those payable in cash, stock and other forms. If not payable in cash, the medium of payment shall be described with sufficient particularity to identify it.

- 439. Adjustments to Retained Earnings

A. This account shall include significant nonrecurring transactions relating to prior periods. Other than transactions of capital stock as specified in paragraph B below, all entries to this account must receive prior commission approval. These transactions are limited to those adjustments which (a) can be specifically identified with and related to the business activities of particular prior periods, and (b) are not

attributable to economic events occurring subsequent to the date of the financial statements for the prior period, and (c) depend primarily on determinations by persons other than the management, and (d) were not susceptible of reasonable estimation prior to such determination. This account shall also include the related income tax effects on items included herein. All items included in this account shall be sufficiently described in the entries relating thereto as to permit ready analysis.

B. Adjustments, charges or credits due to losses on reacquisition, resale or retirement of the company's own capital stock shall be included in this account. (See account 210, Gain on Resale or Cancellation of Reacquired Capital Stock, for the treatment of gains.)

ITEMS

- (1) Significant nonrecurring adjustments or settlements of income taxes.
- (2) Significant amounts resulting from litigation or similar claims.
- (3) Significant amounts relating to adjustments or settlement of utility revenue under rate processes.
- (4) Significant adjustments to plant in service, depreciation and amortization as a result of commission direction.
- (5) Write-off of unamortized capital stock expenses.

OPERATING REVENUE ACCOUNTS

1. SALES OF WATER

460. Unmetered Sales to General Customers
461. Metered Sales to General Customers
462. Private Fire Protection Service
463. Public Fire Protection Service
464. Other Sales to Public Authorities
465. Sales to Irrigation Customers
466. Sales for Resale
467. Interdepartmental Sales

2. OTHER OPERATING REVENUES

470. Forfeited Discounts
471. Miscellaneous Service Revenues
472. Rents from Water Property
473. Interdepartmental Rents
474. Other Water Revenues

1. SALES OF WATER

460. Unmetered Sales to General Customers

A. This account shall include the net billing for water supplied for residential, commercial and industrial (except irrigation) purposes

where the charge is not dependent in any way on the quantity of water delivered but is based on diameter of service pipe or per fixture, room, foot of frontage, or other similar unit.

B. Records shall be maintained so that the estimated quantity of water sold and the amount of revenue under each rate schedule shall be readily available.

C. This account may be subdivided as follows:

460.1 Unmetered Sales to Residential Customers

460.2 Unmetered Sales to Commercial Customers

460.3 Unmetered Sales to Industrial Customers

461. Metered Sales to General Customers

A. This account shall include the net billing for measured water supplied for residential, commercial or industrial purposes where the total charge is, or may be, in any way dependent on the quantity of water delivered.

B. Records shall be maintained so that the quantity of water sold and the amount of revenue under each rate schedule shall be readily available.

C. This account may be subdivided as follows:

461.1 Metered Sales to Residential Customers

461.2 Metered Sales to Commercial Customers

461.3 Metered Sales to Industrial Customers

Note: This account includes all revenues under service classifications which consist of a rate for a specified diameter of service pipe, or per meter, fixture, room, foot of frontage, or other similar unit, plus an additional charge or an adjustment dependent upon the quantity of water delivered.

462. Private Fire Protection Service

A. This account shall include the net billing for the use of fire protection apparatus and for water delivered in connection therewith, for the protection from fire of specific facilities either privately or publicly owned, which are billed under distinct fire protection rate schedules.

B. Records shall be readily available to show the amount of revenue under each rate schedule.

463. Public Fire Protection Service

A. This account shall include the net billing to municipalities and other public authorities for the use of mains, hydrants, or other fire protection facilities and for water delivered in connection therewith for the purpose of fire protection to the general public.

B. When the charges for fire protection include the use of water for

street sprinkling, sewer flushing, or other similar purposes the total revenue may be included in this account.

Note: The records supporting the entries to this account shall be kept so as to show separately for each political subdivision the number, size (i.e., size of hydrant valve opening), and type of hydrants and the diameter of the main to which they are connected, the rate per hydrant or other fire protection charge, and the total revenue.

464. Other Sales to Public Authorities

A. This account shall include the net billing for water supplied to municipalities, or other subdivisions or agencies of State or Federal governments, under special contracts or agreements or service classifications applicable only to public authorities.

B. Records shall be maintained so that the quantity (estimated if not metered) of water sold and the amount of revenue under each contract, agreement or rate schedule shall be readily available.

Note: Do not include herein revenues from water supplied for fire protection or for resale (see accounts 463 and 466) or from sales billed under general service classifications.

465. Sales to Irrigation Customers

A. This account shall include the net billing for water supplied for commercial irrigation purposes, under distinct irrigation rates, billed under either metered or flat rate tariff schedules.

B. Records shall be maintained so that the quantity (estimated if not metered) of water sold and the amount of revenue under each rate schedule shall be readily available.

C. This account shall be subdivided as follows:

465.1 Metered Sales to Irrigation Customers

465.2 Flat Rate Sales to Irrigation Customers

466. Sales for Resale

A. This account shall include the net billing for water supplied (including stand-by service) to other water utilities or to public authorities for resale purposes.

B. Records supporting the entries to this account shall show separately for each contract or rate schedule the point of delivery, the quantity of water supplied (estimated if not metered) the basis for the charge, and the total charge to the distributor.

Note: Where the contract is reciprocal, i.e., where either party thereto may take water from the other, the total amount receivable for water supplied to the other party shall be included herein and the total amount payable for water received from the other party shall be charged to account 602, Purchased Water.

467. Interdepartmental Sales

A. This account shall include amounts charged by the water department at tariff or other specified rates for water supplied by it to other utility departments. (See operating revenue instruction § 566.3 and account 473, Interdepartmental Rents.)

B. Records shall be maintained so that the quantity of water supplied each other department and the charges therefor shall be readily available.

2. OTHER OPERATING REVENUES

470. Forfeited Discounts

This account shall include the amounts which the utility allows its customers on condition that they pay their water bills on or before a specified date and which are forfeited by the customers because of failure to pay within the specified time.

471. Miscellaneous Service Revenues

This account shall include revenues for all miscellaneous services and charges billed to customers which are not specifically provided for in other accounts.

ITEMS

(1) Fees for changing, or reconnecting service.

(2) Profit on maintenance of appliances, piping or other installations on customers' premises.

(3) Net credit or debit (cost less net salvage and less payment from customers) on closing of work order for plant installed for temporary service of less than one year. (See account 185, Temporary Facilities.)

(4) Recovery of expenses in connection with unauthorized taking of water (billing for the water used shall be included in the appropriate water revenue account.)

472. Rents from Water Property

A. This account shall include rents received for the use by others of land, buildings and other property devoted to water operations by the utility.

B. When property owned by the utility is operated jointly with others under a definite arrangement for apportioning the actual expenses among the parties to the arrangement, any amounts received by the utility for interest or return or in reimbursement of taxes or depreciation on the property shall be credited to this account.

Note: Do not include in this account rents from property constituting an operating unit or system. (See account 412, Revenues from Water Plant Leased to Others, and income account instruction § 565.3.)

473. Interdepartmental Rents

This account shall include rents credited to the water department on account of rental charges made against other departments (gas, electric, etc. of the utility). In the case of property operated under a definite arrangement to allocate the cost among the departments using the property, any reimbursement to the water department for interest or return and depreciation and taxes shall be credited to this account.

Note: Charges for water supplied other utility departments shall not be included in this account, but in account 467, Interdepartmental Sales. (See operating revenue instruction 566.3.)

474. Other Water Revenues

This account shall include revenues derived from water operations not includible in any of the foregoing accounts.

ITEMS

(1) Commissions on sales or distribution of water of others when sold under rates filed by such others.

(2) Compensation for minor or incidental services provided for others such as customer billing, engineering, etc.

(3) Profit or loss on sale of material and supplies not ordinarily purchased for resale and not handled through merchandising and jobbing accounts.

(4) Sale of steam, but not including sales made by a steam-heating department or transfers of steam under joint facility operations.

OPERATION AND MAINTENANCE
EXPENSE ACCOUNTS

1. SOURCE OF SUPPLY EXPENSES

Operation

- 600. Operation Supervision and Engineering

This account shall include the cost of labor and expenses incurred in the general supervision and direction of the operation of water source of supply facilities. Direct supervision of specific activities shall be charged to the appropriate account. (See operating expense instruction 567.1.)

- 601. Operation Labor and Expenses

This account shall include the cost of labor, materials used and expenses incurred in the operation of the source of supply plant.

ITEMS

Labor:

- (1) Cutting brush and weeds.
- (2) Electrolysis and soil corrosion investigations.
- (3) Keeping plant log and records and preparing reports of operation.
- (4) Operating and lubricating gates and valves.
- (5) Patrolling and inspecting.
- (6) Removing organic growth.
- (7) Removing sediment.

Materials and Expenses:

- (8) Attendants' supplies.
- (9) Charts and gauge supplies.
- (10) Lubricants and waste.
- (11) Tools.
- (12) Transportation, meals and incidental expenses.

602. Purchased Water

A. This account shall include the cost at the point of delivery of water purchased for resale. This includes charges for readiness to serve and the portion applicable to each accounting period of annual or more frequent payments for the right to divert water at the source of supply.

B. The records supporting this account shall be so kept as to show each supplier from which water is purchased, point of delivery, quantity purchased, basis of charges and the cost of water purchased. (See note to account 466, Sales for Resale.)

603. Miscellaneous Expenses

This account shall include the cost of labor, materials used and expenses incurred which are not specifically provided for or are not readily assignable to other water source of supply expense accounts.

ITEMS

Labor:

- (1) General clerical and stenographic work at source of supply offices.
- (2) Preparing maps.
- (3) Building service.
- (4) Care of grounds including snow removal, cutting grass, etc.

Materials and Expenses:

- (5) Building service supplies.
- (6) First aid supplies and safety equipment.
- (7) Map record supplies.

(8) Miscellaneous office supplies and expenses, printing and stationery.

(9) Utility service.

(10) Cost of nonproductive wells (or amortization thereof) drilled as part of a project which did not result in a source of water within the same supply area. (See account 183, Preliminary Survey and Investigation Charges.)

(11) Research and development expenses.

604. Rents

This account shall include all rents of property of others used, occupied, or operated in connection with the source of supply system. (See operating expense instruction ÷ 567.3.)

Maintenance

610. Maintenance Supervision and Engineering

This account shall include the cost of labor and expenses incurred in the general supervision and direction of the maintenance of water source of supply facilities. Direct supervision of specific jobs shall be charged to the appropriate maintenance account. (See operating expense instruction ÷ 567.1.)

611. Maintenance of Structures and Improvements

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of structures and improvements, the book cost of which is includible in account 311, Structures and Improvements and of similar property leased from others. (See operating expense instruction ÷ 567.2.)

612. Maintenance of Collecting and Impounding Reservoirs

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of collecting and impounding reservoirs, the book cost of which is includible in account 312, Collecting and Impounding Reservoirs, and of similar property leased from others. (See operating expense instructions ÷ 567.2.)

613. Maintenance of Lake, River and Other Intakes

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of lake, river and other intakes, the book cost of which is includible in account 313, Lake, River and Other Intake, and of similar property leased from others. (See operating expense instruction ÷ 567.2.)

614. Maintenance of Wells and Springs

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of wells and springs, the book cost of which is includible in account 314, Wells and Springs, and of similar

property leased from others. (See operating expense instruction ÷ 567.2.)

615. Maintenance of Infiltration Galleries and Tunnels

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of infiltration galleries and tunnels, the book cost of which is includible in account 315, Infiltration Galleries and Tunnels, and of similar property leased from others. (See operating instruction ÷ 567.2.)

616. Maintenance of Supply Mains

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of mains and appurtenances, the book cost of which is includible in account 316, Supply Mains, and of similar property leased from others. (See operating expense instruction ÷ 567.2.)

617. Maintenance of Miscellaneous Water Source Plant

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of other water source plant, the book cost of which is includible in account 317, Other Water Source Plant, and any general or other plant the maintenance of which is assignable to the source of supply function and is not provided for elsewhere. (See operating expense instruction ÷ 567.2.)

2. PUMPING EXPENSES

Operation

620. Operation Supervision and Engineering

This account shall include the cost of labor and expenses incurred in the general supervision and direction of the operation of power production and pumping. Direct supervision of specific activities such as fuel handling, power production, etc., shall be charged to the appropriate account. (See operating expense instruction ÷ 567.1.)

621. Fuel for Power Production

A. This account shall include the cost of fuel used in the production of power to operate pumps. Records shall be maintained to show the quantity and cost of each type of fuel used.

B. The cost of fuel shall be charged initially to appropriate fuel accounts carried under account 150.151, Fuel Stock, and cleared to this account on the basis of the fuel used. Fuel handling expenses may be charged to this account as incurred or charged initially to account 150.152, Fuel Stock Expenses Undistributed. In the latter event they shall be cleared to this account on the basis of the fuel used.

C. The net cost of disposal of residuals (disposal expenses less proceeds from any sales) shall be included herein.

Note: See account 150.151, Fuel Stock, and 150.152, Fuel Stock Expenses Undistributed for items of fuel cost and fuel handling expenses.

622. Power Production Labor and Expenses

This account shall include the cost of labor, materials used, and expenses incurred in the production of power used to operate pumps. This includes all expenses in preparing and handling of fuel incurred beyond the point where the fuel enters the first boiler plant bunker, hopper, tank or holder, etc. and all expense involved in handling and disposal of fuel residuals within the plant.

ITEM

Labor:

- (1) Direct supervision of power production.
 - (2) Operating fuel conveying, storage, weighing, measuring and processing equipment within power production plant.
 - (3) Operating boiler and boiler auxiliary equipment.
 - (4) Operating boiler feed water purification and treatment equipment.
 - (5) Operating ash collecting or other residual and disposal equipment located inside the plant.
 - (6) Operating other power production equipment.
 - (7) Keeping power production log* and records and preparing reports on power production operation.
- * So in original. "long" should be "log".
- (8) Testing boiler water.
 - (9) Testing, checking, and adjusting meters, gauges and other instruments and equipment in power production plant.
 - (10) Cleaning power production plant equipment when not incidental to maintenance work.

Materials and Expenses (other than fuel):

- (11) Boiler compounds, chemicals and, inspection fees.
- (12) Boiler feed water.
- (13) Lubricants.

Note: When water used for power production is taken from the supply for general distribution, the cost of the water so used may, at the option of the company, be charged to this account and credited to account 929, Duplicate Charges--Credit.

623. Fuel or Power Purchased for Pumping

A. This account shall include the cost of fuel or power purchased used directly in operation of pumps.

B. This account shall also include the cost of power transferred to water pumping operations from other departments under joint facility

arrangements.

C. The cost of fuel shall be charged initially to appropriate fuel accounts carried under account 150.151, Fuel Stock, and cleared to this account on the basis of the fuel used.

ITEMS

- (1) Diesel fuel.
- (2) Electric power.
- (3) Gasoline.
- (4) Gas.
- (5) Other fuel or power.
- (6) Steam.

624. Pumping Labor and Expenses

This account shall include the cost of labor, materials used and expenses incurred in operating pumps and auxiliary equipment.

ITEMS

Labor:

- (1) Direct supervision of pumping operations.
- (2) Operating pumps, turbines, and engines.
- (3) Operating condensers, circulating water systems and other auxiliary apparatus.
- (4) Operating lubrication and oil control systems, including oil purification.
- (5) Operating control and protective equipment.
- (6) Operating valves to point where water enters the water treatment or transmission and distribution system.
- (7) Keeping plant log and records and preparing reports of operation.
- (8) Testing, checking and adjusting meters, gauges, and other instruments, controls, etc., in the pumping plant.
- (9) Cleaning pumping equipment when not incidental to maintenance work.

Materials and Expenses (other than power purchased):

- (10) Lubricants, waste, gaskets, etc.
- (11) Transportation, meals and incidental expenses.

625. Expenses Transferred--Credit

A. This account shall include credits for expenses of power production or pumping which are charged to others* to other departments under a joint operating arrangement. Include also credits for expenses chargeable to other water accounts outside the pumping group. Full details of the basis of determination of the costs transferred shall be maintained.

* So in original.

B. If the charge to others or to other departments of the utility include an amount for depreciation, taxes and return on the joint facilities, such portion of the charge shall be credited, in the case of others, to account 472, Rents from Water Property, and in the case of other departments of the utility, to account 473, Interdepartmental Rents.

626. Miscellaneous Expenses

This account shall include the cost of labor, materials used and expenses incurred which are not specifically provided for or are not readily assignable to other pumping expense accounts.

ITEMS

Labor:

- (1) General clerical and stenographic work.
- (2) Guarding and patrolling plant and yard.
- (3) Building service.
- (4) Care of grounds including snow removal, cutting grass, etc.
- (5) Miscellaneous labor.

Materials and Expenses:

- (6) General operating supplies, such as tools, gaskets, packing waste, gauge glasses, hose, indicating lamps, record and report forms, etc.
- (7) First aid supplies and safety equipment.
- (8) Building service supplies.
- (9) Utility service.
- (10) Miscellaneous office supplies and expenses, printing and stationery.
- (11) Transportation, meals, and incidental expenses.
- (12) Research and development expenses.

627. Rents

This account shall include all rents of property of others used, occupied or operated in connection with the pumping of water. (See operating expense instruction 567.3.)

Maintenance

630. Maintenance of Supervision and Engineering

This account shall include the cost of labor and expenses incurred in the general supervision and direction of the maintenance of power production and pumping plant. Direct supervision of specific maintenance work shall be charged to the appropriate maintenance account. (See operating expense instruction 567.1.)

631. Maintenance of Structures and Improvements

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of structures and improvements used

in connection with pumping, the book cost of which is includible in account 321, Structures and Improvements, and of similar property leased from others. (See operating expense instruction ÷ 567.2.)

632. Maintenance of Power Production Equipment

A. This account shall include the cost of labor, materials used and expenses incurred in the maintenance of power production equipment used directly in pumping operations, the book cost of which is includible in accounts 322, Boiler Plant Equipment, and 323, Other Power Production Equipment, and of similar equipment leased from others.

B. For the purpose of making charges hereto and to account 633, Maintenance of Pumping Equipment, the point at which power production plant is distinguished from pumping equipment is defined as follows:

- (1) Inlet flange of throttle valve on prime mover.
- (2) Flange of all steam extraction lines on prime mover.
- (3) Hotwell pump outlet on condensate lines.
- (4) Inlet flange of all turbine room auxiliaries.
- (5) Connection to line side of motor starter for all boiler plant equipment.
- (6) Connection of electric power transmission lines to pump equipment controls.

633. Maintenance of Pumping Equipment

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of pumping equipment, the book cost of which is includible in account 324, Steam Pumping Equipment, 325, Electric Pumping Equipment, 326, Diesel Pumping Equipment, 327, Hydraulic Pumping Equipment, and 328, Other Pumping Equipment and, of similar equipment leased from others, and any general or other plant the maintenance of which is assignable to the pumping function and is not provided for elsewhere. (See paragraph B of account 632, Maintenance of Power Production Equipment.)

3. WATER TREATMENT EXPENSES

Operation

640. Operation Supervision and Engineering

This account shall include the cost of labor and expenses incurred in the general supervision and direction of the operation of water treatment facilities. Direct supervision of specific activities shall be charged to the appropriate account. (See operating expense instruction ÷ 567.1.)

641. Chemicals

This account shall include the cost of all chemicals used in the treatment of water. Include also the entire cost of any chemicals

manufactured by the utility.

ITEMS

- (1) Activated carbon.
- (2) Ammonia.
- (3) Caustic soda.
- (4) Chlorine.
- (5) Copper Sulphate.
- (6) Fluorine compounds.
- (7) High test hypochlorite.
- (8) Iron sulphate.
- (9) Lime.
- (10) Soda ash
- (11) Sodium chlorite.
- (12) Sulphate of alumina.
- (13) Sulphuric acid.
- (14) Other chemicals.

642. Operation Labor and Expenses

A. This account shall include the cost of labor, materials used and expenses incurred in the operation of the water treatment plant.

B. The cost of water used for washing filters or for washing or cleaning other water treatment facilities may be charged to this account. When such charges are made, concurrent credits shall be made to account 929, Duplicate Charges Credit.

ITEMS

Labor:

- (1) Applying chemicals.
- (2) Cleaning basins.
- (3) Operating filters.
- (4) Removing ice.
- (5) Removing sediment
- (6) Washing filters.
- (7) Operating water softening plant.
- (8) Operating fluoridation plant.
- (9) Testing and analyzing.

Materials and Expenses:

- (10) Charts.
- (11) Lubricants, waste, etc.
- (12) Shop and laboratory expenses.
- (13) Transportation, meals and incidental expenses.
- (14) Utility service.

643. Miscellaneous Expenses

This account shall include the cost of labor, materials used and expenses incurred which are not specifically provided for or are not readily assignable to other water treatment operation expense accounts.

ITEMS

Labor:

- (1) General clerical and stenographic work.
- (2) Guarding and patrolling.
- (3) Building service.
- (4) Care of grounds including snow removal, cutting grass, etc.
- (5) Miscellaneous labor.

Materials and Expenses:

- (6) General operating supplies.
- (7) First aid supplies and safety equipment.
- (8) Building service supplies.
- (9) Utility service.
- (10) Miscellaneous office supplies and expenses, printing and stationery.
- (11) Transportation, meals and incidental expense.
- (12) Research and development expenses.

644. Rents

This account shall include all rents of property of others used, occupied or operated in connection with water treatment. (See operating expense instruction ÷ 567.3.)

Maintenance

650. Maintenance Supervision and Engineering

This account shall include the cost of labor and expenses incurred in the general supervision and direction of the maintenance of water treatment plant. Direct supervision of specific jobs shall be charged to the appropriate maintenance account. (See operating expense instruction ÷ 567.1.)

651. Maintenance of Structures and Improvements

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of structures and improvements, the book cost of which is includible in account 331, Structures and Improvements, and of similar property leased from others. (See operating expense instruction ÷ 567.2.)

652. Maintenance of Water Treatment Equipment

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of water treatment equipment, the book cost of which is includible in account 332, Water Treatment Equipment, and of similar equipment leased from others. Include also any

general or other plant the maintenance of which is assignable to the water treatment function and is not provided for elsewhere. (See operating expense instruction ÷ 567.2.)

4. TRANSMISSION AND DISTRIBUTION EXPENSES

Operation

660. Operation Supervision and Engineering

This account shall include the cost of labor and expenses incurred in the general supervision and direction of the operation of the transmission and distribution system. Direct supervision of specific activities shall be charged to the appropriate account. (See operating expense instruction ÷ 567.1.)

661. Storage Facilities Expenses

This account shall include the cost of labor, materials used and expenses incurred in the operation of distribution reservoirs, tanks and standpipes.

ITEMS

Labor:

- (1) Supervising operation of storage facilities.
- (2) Routine inspection of storage facilities.
- (3) Operating and lubricating gates and valves.
- (4) Adjusting rust-proofing and signal equipment.
- (5) Keeping records and preparing reports.
- (6) Care of grounds around storage facilities.
- (7) Cleaning and flushing of storage facilities.

Materials and Expenses:

- (8) Operating supplies, such as lubricants, waste, meter and gauge charts, etc.
- (9) Records and report forms.
- (10) Utility services.
- (11) Tool expense.
- (12) Transportation, meals and incidental expenses.

662. Transmission and Distribution Lines Expenses

This account shall include the cost of labor, material used and expenses incurred in the operation of transmission and distribution mains, fire mains, services and hydrants.

ITEMS

Labor:

- (1) Supervision operation of mains, services and hydrants.
- (2) Routine patrolling.
- (3) Electrolysis and soil corrosion investigations and tests.
- (4) Operating and lubricating gates and valves.

- (5) Observing and recording pressure.
- (6) Flushing mains and hydrants.
- (7) Reading and changing charts in master meters.

Materials and Expenses:

- (8) Operating materials, such as lubricants, waste, meter and gauge charts, etc.
- (9) Tool expense.
- (10) Transportation, meals and incidental expenses.

663. Meter Expenses

This account shall include the cost of labor, materials used and expenses incurred in the operation of customer meters and associated equipment.

ITEMS

Labor:

- (1) Supervising meter operation.
- (2) Removing and resetting, disconnecting and reconnecting, changing and relocating meters and associated equipment, except the cost of the first testing and setting of a meter which shall be charged to utility plant account 346, Meters.
- (3) Turning on and shutting off service even though a meter is not installed or removed (other than shutting off for nonpayment of bills.)
- (4) Inspecting and testing meters on premises or in shops other than that incidental to maintenance.
- (5) Inspecting and adjusting meter testing equipment.
- (6) Clerical work on meter history record cards, test cards and reports.

Materials and Expenses:

- (7) Meter seals and miscellaneous meter supplies.
- (8) Record and report forms and office supplies for the meter department.
- (9) Utility services for meter department.
- (10) Tool expense.
- (11) Transportation, meals and incidental expenses.

664. Customer Installations Expenses

This account shall include the cost of labor, materials used and expenses incurred in work on customer installations and in inspecting premises and in rendering services to customers of the nature of those indicated by the list of items hereunder.

ITEMS

Labor:

- (1) Supervising customer installations work.

(2) Testing, inspecting, adjusting, and repairing customers' plumbing and fixtures.

(3) Testing and inspecting services installed by the customer.

(4) Investigating and adjusting customers' service complaints.

(5) Changing customers' house piping for the convenience of the utility.

Materials and Expenses:

(6) Materials used in servicing customers' plumbing and fixtures.

(7) Tool expense.

(8) Transportation, meals and incidental expenses.

Note A: Amounts billed customers for any work, the cost of which is charged to this account, shall be credited to this account. Any excess over costs shall be transferred to account 471, Miscellaneous Service Revenues.

Note B: Do not include in this account expenses incurred in connection with merchandising, jobbing and contract work.

665. Miscellaneous Expenses

This account shall include the cost of labor, materials used and expenses incurred in transmission and distribution system operation not provided for elsewhere.

ITEMS

Labor:

(1) Preparing maps and prints.

(2) General clerical and stenographic work, except that chargeable to account 663, Meter Expenses.

(3) Service interruption and trouble records.

(4) Operating records, but not plant accounting, covering mains, services, hydrants, valves, and other transmission and distribution facilities. Exclude meter records chargeable to account 663, Meter Expenses.

(5) Building service.

(6) Miscellaneous labor not provided for elsewhere.

Materials and Expenses:

(7) Map and record supplies.

(8) Printing, stationery, supplies and expenses, except that chargeable to account 663, Meter Expenses.

(9) Building service supplies.

(10) Utility services.

(11) First aid supplies.

(12) Transportation, meals and incidental expenses.

(13) Research and development expenses.

666. Rents

This account shall include all rents of property of others used, occupied or operated in connection with the transmission and distribution system. (See operating expense instruction ÷ 567.3.)

Maintenance

670. Maintenance Supervision and Engineering

This account shall include the cost of labor and expenses incurred in the general supervision and direction of the maintenance of the transmission and distribution system. Direct supervision of specific jobs shall be charged to the appropriate maintenance account. (See operating expense instruction ÷ 567.1.)

671. Maintenance of Structures and Improvements

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of structures and improvements, the book cost of which is includible in account 341, Structures and Improvements, and of similar property leased from others. (See operating expense instruction ÷ 567.2.)

672. Maintenance of Distribution Reservoirs and Standpipes

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of distribution reservoirs, tanks, standpipes, and related facilities, the book cost of which is includible in account 342, Distribution Reservoirs and Standpipes, and of similar property leased from others. (See operating expense instruction ÷ 567.2.)

673. Maintenance of Transmission and Distribution Mains

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of mains, the book cost of which is includible in account 343, Transmission and Distribution Mains, and of similar property leased from others. (See operating expenses instruction ÷ 567.2.)

674. Maintenance of Fire Mains

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of fire mains, the book cost of which is includible in account 344, Fire Mains, and of similar property leased from others. (See operating expense instruction ÷ 567.2.)

675. Maintenance of Services

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of services, the book cost of which is includible in account 345, Services, and of similar property leased from others. (See operating expense instruction ÷ 567.2.)

676. Maintenance of Meters

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of meters and meter testing equipment, the book cost of which is includible in account 346, Meters, account 395, Laboratory Equipment, and of similar property leased from others. (See operating expense instruction ÷ 567.2.)

Note A: The initial testing of meters shall be charged to account 346, Meters.

Note B: When water used for testing meters is taken from the supply for general distribution, the cost of water so used may be charged to this account and credited to account 929, Duplicate Charges--Credit.

677. Maintenance of Hydrants

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of fire hydrants and associated equipment, the book cost of which is includible in account 348, Hydrants, and of similar property leased from others. (See operating expense instruction ÷ 567.2.)

678. Maintenance of Miscellaneous Plant

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of plant, the book cost of which is includible in account 349, Other Transmission and Distribution Plant, and any general or other plant the maintenance of which is assignable to the transmission and distribution function and is not provided for elsewhere. (See operating expense instruction ÷ 567.2.)

5. CUSTOMER ACCOUNTS EXPENSES

Operation

901. Supervision

This account shall include the cost of labor and expenses incurred in the general direction and supervision of customer accounting and collecting activities. Direct supervision of a specific activity shall be charged to account 902, Meter Reading Expenses, or account 903, Customer Records and Collection Expenses, as appropriate. (See operating expense instruction ÷ 567.1.)

902. Meter Reading Expenses

This account shall include the cost of labor, materials used and expenses incurred in reading customer meters, and determining consumption when performed by employees engaged in reading meters.

ITEMS

Labor:

- (1) Addressing forms for obtaining meter readings by mail.
- (2) Changing and collecting meter charts used for billing purposes.
- (3) Checking seals, etc. when performed by meter readers and the work

represents a minor activity incidental to regular meter reading routine.

(4) Reading meters for billing purposes. Exclude and charge to account 663, Meter Expenses, or to account 903, Customer Records and Collection Expenses, as applicable, the cost of obtaining meter readings, first and final, if incidental to the operation of removing or resetting, sealing, or locking, and disconnecting or reconnecting meters.

(5) Computing consumption from meter reader's book or from reports by mail when done by employees engaged in reading meters.

(6) Collecting from prepayment meters when incidental to meter reading.

(7) Maintaining record of customers' keys.

(8) Computing estimated or average consumption when performed by employees engaged in reading meters.

Materials and Expenses:

(9) Badges, lamps, and uniforms.

(10) Meter books and binders and forms for recording readings, but not the cost of preparation.

(11) Postage and supplies used in obtaining meter readings by mail.

(12) Transportation, meals, and incidental expenses.

903. Customer Records and Collection Expenses

This account shall include the cost of labor, materials used and expenses incurred in work on customer applications, contracts, orders, credit investigations, billing and accounting, collections and complaints.

ITEMS

Labor:

(1) Receiving, preparing, recording and handling routine orders for service, disconnections, transfers or meter tests initiated by the customer, excluding the cost of carrying out such orders, which is chargeable to the account appropriate for the work called for by such orders.

(2) Investigations of customer's credit and keeping of records pertaining thereto, including records of uncollectible accounts written off.

(3) Receiving, refunding or applying customer deposits and maintaining customer deposit, line extension, and other miscellaneous records.

(4) Checking consumption shown by meter readers' reports where incidental to preparation of billing data.

(5) Preparing address plates and addressing bills and delinquent notices.

(6) Preparing billing data.

- (7) Operating billing and bookkeeping machines.
- (8) Verifying billing records with contracts or rate schedules.
- (9) Preparing bills for delivery, and mailing or delivering bills.
- (10) Collecting revenues, including collection from prepayment meters unless incidental to meter reading operations.
- (11) Balancing collections, preparing collections for deposit, and preparing cash reports.
- (12) Posting collections and other credits or charges to customer accounts and extending unpaid balances.
- (13) Balancing customer accounts and controls.
- (14) Preparing, mailing, or delivering delinquent notices and preparing reports of delinquent accounts.
- (15) Final meter reading of delinquent accounts when done by collectors incidental to regular activities.
- (16) Disconnecting and reconnecting service because of nonpayment of bills.
- (17) Receiving, recording, and handling of inquiries, complaints, and requests for investigations from customers, including preparation of necessary orders, but excluding the cost of carrying out such orders, which is chargeable to the account appropriate for the work called for by such orders.
- (18) Statistical and tabulating work on customer accounts and revenues, but not including special analysis for sales department, rate department, or other general purposes, unless incidental, to regular customer accounting routines.
- (19) Preparing and periodically rewriting meter reading sheets.
- (20) Determining consumption and computing estimated or average consumption when performed by employees other than those engaged in reading meters.

Materials and Expenses:

- (21) Address plates and supplies.
- (22) Cash overages and shortages.
- (23) Commissions or fees to others for collecting.
- (24) Payments to credit organizations for investigations and reports.
- (25) Postage.
- (26) Transportation expenses, including transportation of customer bills and meter books under centralized billing procedure.
- (27) Transportation, meals, and incidental expenses.
- (28) Bank charges, exchange, and other fees for cashing and depositing customers' checks.
- (29) Forms for recording orders for services, removals, etc.

(30) Rent of mechanical equipment.

Note: The cost of work on meter history and meter location records is chargeable to account 663, Meter Expenses.

904. Uncollectible Accounts

This account shall be charged with amounts sufficient to provide for losses from uncollectible utility revenues. Concurrent credits shall be made to account 144, Accumulated Provision for Uncollectible Accounts--Credit. Losses from uncollectible accounts shall be charged to account 144.

905. Miscellaneous Customer Accounts Expenses

This account shall include the cost of labor, materials used and expenses incurred not provided for in other accounts.

ITEMS

Labor:

- (1) General clerical and stenographic work.
- (2) Miscellaneous labor.

Materials and Expenses:

- (3) Communication service.
- (4) Miscellaneous office supplies and expenses and stationery and printing other than those specifically provided for in accounts 902 and 903.

6. SALES EXPENSES

Operation

910. Sales Expenses

This account shall include the cost of supervising and directing the sales department, salaries and commissions for soliciting business, sales advertising expenses, and miscellaneous supplies and expenses incurred in sales activities.

Note: Where sales activities of the utility are minor and the expenses are not material, this account need not be maintained, in which event the expenses shall be charged to the administrative and general expense account appropriate for the nature of the expense.

7. ADMINISTRATIVE AND GENERAL EXPENSES

Operation

920. Administrative and General Salaries

A. This account shall include the compensation (salaries, bonuses, and other consideration for services, but not including directors' fees) of officers, executives, and other employees of the utility property chargeable to utility operations and not chargeable directly to a particular operating function.

B. This account shall be subdivided in accordance with the utility's

administrative organization such as executive, accounting, treasury, legal, etc.

921. Office Supplies and Other Expenses

A. This account shall include office supplies and other expenses incurred in connection with the general administration of the utility's operations which are assignable to specific administrative or general departments and are not specifically provided for in other accounts. This includes the expenses of the various administrative and general departments, the salaries and wages of which are includible in account 920.

B. This account shall be subdivided in accordance with the utility's administrative organization such as executive, accounting, treasury, legal, etc.

Note: Office expenses which are clearly applicable to any group of operation expenses other than the administrative and general group shall be included in the appropriate account in each functional group. Further, general expenses which apply to the utility as a whole rather than to a particular administrative function shall be included in account 930, Miscellaneous General Expenses.

ITEMS

- (1) Automobile service, including charges through clearing accounts.
- (2) Bank messenger and service charges.
- (3) Books, periodicals, bulletins and subscriptions to newspapers, newsletters, tax services, etc.
- (4) Building service expenses for customer accounts, sales and administrative and general purposes.
- (5) Communication service.
- (6) Cost of individual items of office equipment used by general department which are of small value or short life.
- (7) Membership fees and dues in trade, technical, and professional associations paid by utility for employees. (Company memberships are includible in account 930.)
- (8) Office supplies and expenses.
- (9) Payment of court costs, witness fees, and other expenses of legal department.
- (10) Postage, printing and stationery.
- (11) Meals, traveling and incidental expenses.

922. Administrative Expenses Transferred--Credit

This account shall be credited with administrative expenses recorded in account 920 and 921 which are transferred to construction costs or to nonutility accounts. (See water plant instruction 563.4.)

923. Outside Services Employed

A. This account shall include the fees and expenses of professional consultants and others for general services which are not applicable to a particular operating function nor to other accounts. It shall include also the pay and expenses of persons engaged for a special or temporary administrative or general purpose in circumstances where the person so engaged is not considered as an employee of the utility.

B. This account shall be so maintained as to permit ready summarization according to the nature of service and the person furnishing the same.

ITEMS

(1) Fees, pay and expenses of accountants and auditors, actuaries, appraisers, attorneys, engineering consultants, management consultants, negotiators, public relations counsel, tax consultants, etc.

(2) Supervision fees and expenses paid under contracts for general management services.

Note: Do not include inspection and brokerage fees and commissions chargeable to other accounts or fees and expenses in connection with security issues which are includible in the expenses of issuing securities.

924. Property Insurance

A. This account shall include the cost of insurance or reserve accruals to protect the utility against losses and damages to owned or leased property used in its utility operations. It shall include also the cost of labor and related supplies and expenses incurred in property insurance activities.

B. Recoveries from insurance companies or others for property damages shall be credited to the account charged with the cost of the damage. If the damaged property has been retired, the credit shall be to the appropriate account for accumulated provision for depreciation.

C. Records shall be kept so as to show the amount of coverage for each class of insurance carried, the property covered, and the applicable premiums. Any dividends distributed by mutual insurance companies shall be credited to the accounts to which the insurance premiums were charged.

ITEMS

(1) Premiums payable to insurance companies for fire, storm, burglary, boiler explosion, lightning, fidelity, riot, and similar insurance.

(2) Amounts credited to account 261, Property Insurance Reserve, for similar protection.

(3) Special costs incurred in procuring insurance.

- (4) Insurance inspection service.
- (5) Insurance counsel, brokerage fees and expenses.

Note A: The cost of insurance or reserve accruals capitalized shall be charged to construction either directly or by transfer to construction work orders from this account.

Note B: The cost of insurance or reserve accruals for the following classes of property shall be charged as indicated:

- (1) Materials and supplies and stores equipment, to account 150.163, Stores Expense, Undistributed, or appropriate material account.
- (2) Transportation and other general equipment, to appropriate clearing accounts that may be maintained.
- (3) Utility plant leased to others, to account 413, Expenses of Water Plant Leased to Others.
- (4) Nonutility property to the appropriate nonutility income account.
- (5) Merchandise and jobbing property, to account 416, Costs and Expenses of Merchandising, Jobbing and Contract Work.

Note C: The cost of labor and related supplies and expenses of administrative and general employees who are only incidentally engaged in property insurance work may be included in accounts 920 and 921, as appropriate.

925. Injuries and Damages

A. This account shall include the cost of insurance or reserve accruals to protect the utility against injuries and damage claims of employees or others, losses of such character not covered by insurance, and expenses incurred in settlement of injuries and damages claims. It shall also include the cost of labor and related supplies and expenses incurred in injuries and damages activities.

B. Reimbursements from insurance companies or others for expenses charged hereto on account of injuries and damages and insurance dividends or refunds shall be credited to this account.

ITEMS

(1) Premiums payable to insurance companies for protection against claims from injuries and damages by employees or others, such as public liability, property damage, casualty, employee liability, etc., and amounts credited to account 262, Injuries and Damages Reserve, for similar protection.

(2) Losses not covered by insurance or reserve accruals on account of injuries or deaths to employees or others and damages to the property to* others.

* So in original. "to" should be "of".

- (3) Fees and expenses of claim investigators.

(4) Payment of awards to claimants for court costs and attorneys' services.

(5) Medical and hospital service and expenses for employees as the result of occupational injuries, or resulting from claims of others.

(6) Compensation payments under workmen's compensation laws.

(7) Compensation paid while incapacitated as the result of occupational injuries. (See note A.)

(8) Cost of safety, accident prevention and similar educational activities.

Note A: Payments to or in behalf of employees for accident or death benefits, hospital expenses, medical supplies or for salaries while incapacitated for service or on leave of absence beyond periods normally allowed, when not the result of occupational injuries, shall be charged to account 926, Employee Pensions and Benefits. (See also note B of account 926.)

Note B: The cost of injuries and damages or reserve accruals capitalized shall be charged to construction directly or by transfer to construction work orders from this account.

Note C: Exclude herefrom the time and expenses of employees (except those engaged in injuries and damages activities) spent in attendance at safety and accident prevention educational meetings, if occurring during regular work period.

Note D: The cost of labor and related supplies and expenses of administrative and general employees who are only incidentally engaged in injuries and damages activities may be included in accounts 920 and 921 as appropriate.

Note E: Losses or insurance premiums paid in connection with transportation and garage equipment shall be charged to appropriate accounts for transportation expenses.

926. Employees Pensions and Benefits

This account shall include employee pensions, welfare expenses and the costs incurred in the administration of the pension and welfare department. The account shall be maintained according to subaccounts shown below:

926.1 Employee Pensions

A. This account shall include pensions payable currently to retired employees or their beneficiaries. (See general instruction 561.17.)

B. This account shall include the cost of advance provision for pensions to be paid to retired employees or their beneficiaries. Such cost represents amounts payable to a trust fund or to an insurance company where the following conditions are met:

- (1) Pension plan is definite and formally adopted.
- (2) Amounts paid are irrevocably dedicated to pension purposes.
- (3) A program of advance provision based on actuarial studies or on other recognized and acceptable systematic method of computation or allocation is undertaken.

C. This account shall include any payments under the pension plan, in addition to the accruals specified in paragraph B, such as payments computed in relation to a prior service period, but such amounts may, with the approval of the commission, be spread over a period of years, if their inclusion when paid would seriously distort the expenses of that year.

D. Incidental benefits payable on withdrawal or death under a definite and formally adopted pension plan may be considered as pensions within the intent of paragraphs A and B.

Note A: Credit to this account the portion of pension costs which is applicable to nonutility operations, or which is charged to construction and retirement work orders, and to clearing or other accounts unless such amounts are distributed directly to the accounts concerned in the first instance.

Note B: Social security and unemployment benefit taxes shall be included in account 408, Taxes Other Than Income Taxes, or other appropriate accounts. (See account 408, paragraph D.)

Note C: Each utility making charges to this subaccount under provisions of paragraph B above shall have filed with this commission a copy of its pension plan and pension trust agreement or contract with an insurance company for the purchase of annuities, together with a description of its program of advance provision for pension costs. Any material change in these items shall be reported promptly to the commission.

Note D: A complete record of the computation of the amounts paid as advance provision for pensions shall be maintained.

Note E: No charges shall be made to this account in anticipation of discretionary pension payments in the future.
