

Company Name: Con Edison
Case Description:
Case: 08-E-0539

Response to NYPA Interrogatories – Set NYPA1
Date of Response: 06/02/2008
Responding Witness: Rate Panel

Question No. :6

Does the Electric Rate Panel believe that NYPA produced a “deficiency” during the 2006 test year (where “deficiency” is defined as commonly used in prior Con Edison Electric Rate Cases)? If so, please provide all studies, analyses, data and/or information to support a specific deficiency calculation.

Response:

As indicated in response to NYPA 4, the Company did not perform an ECOS study for 2006 or 2007. However, as explained in our testimony, we believe that the 2005 ECOS study indicates that there is a remaining NYPA deficiency for the rate year beginning April 1, 2009.
